25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;
(ii) The four-coloured map of the district ;
(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;
(iv) Supplementary information showing basic amenities available for each village ; and
(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

BOMBAY : B. A. KULKARNI
The 30th November 1964.

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

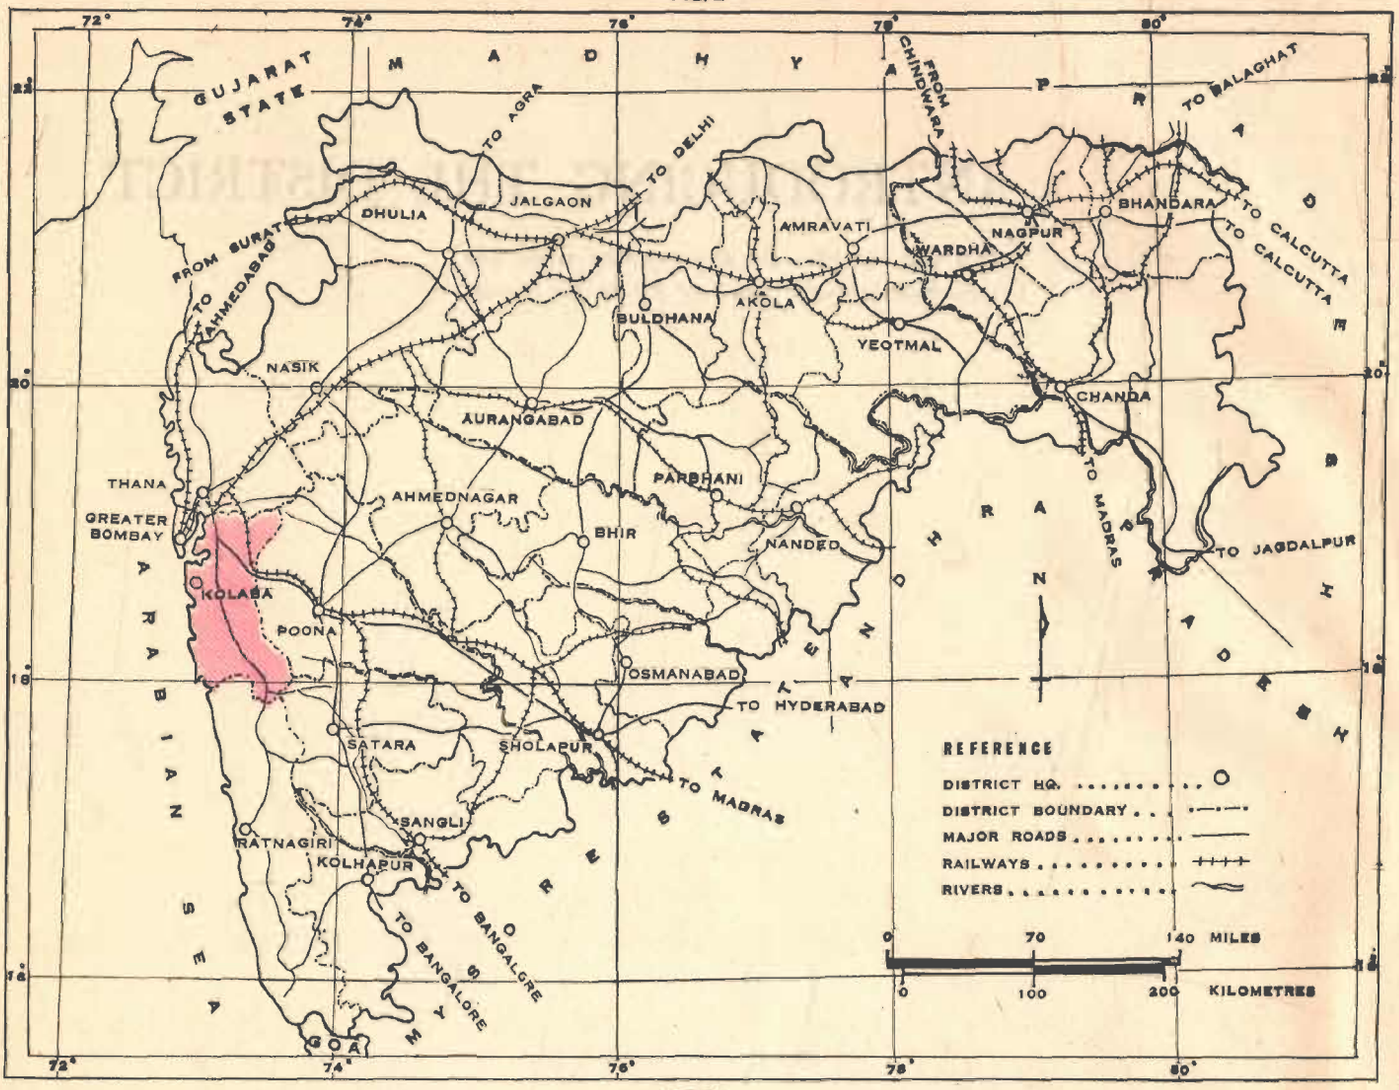

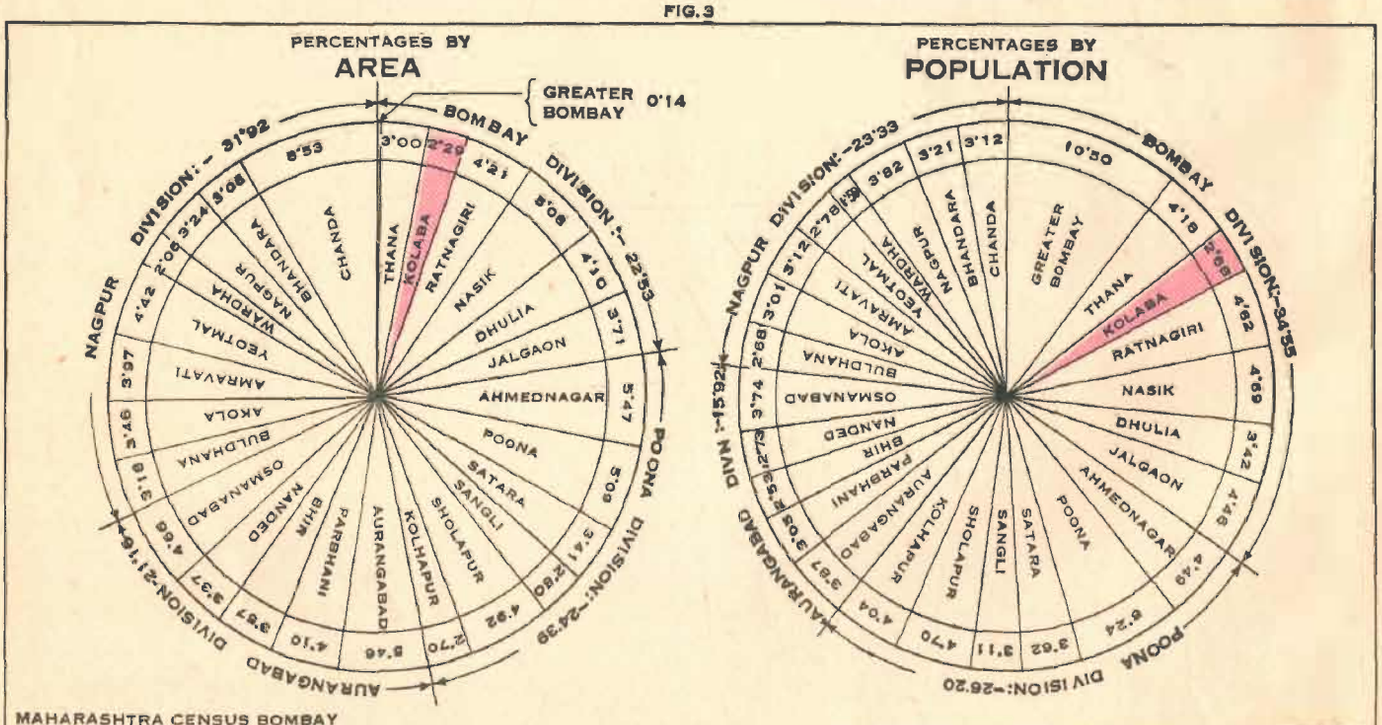

FIG. 3

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

THE DISTRICT forms part of the Bombay-Konkan strip which lies between the Sahyadri in the east and the Arabian Sea in the west. It has a coastline of about 150 miles. The district is full of mountains and valleys, interspersed with low lands separated by creeks on the sea-side.

The lines of natural drainage divide the district into three parts, north Kolaba draining north into Bombay harbour and into the sea, central Kolaba draining west along the Kundalika river and south Kolaba draining both from the north and from the south into the west-flowing Savitri river.

The district lies between 17° 52′ and 19° 3′ N. latitude and 73° 7′ and 73° 2′ E. longitude. It is surrounded by Bombay harbour in the north-west and Thana district in the north-east, the Sahyadri and beyond Sahyadri by Poona district in the east and Satara district in the south-east, Ratnagiri district to the south and Arabian Sea towards the west.

The area of the district is 2,712·3 square miles and its population in 1961 is 1,058,855. In terms of area and population the district makes 2·29 per cent and 2·68 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

The main system of hills is the Sahyadri and its offshoots.

Besides there are numerous minor ranges which are irregular and have many cross-spurs and off-shoots. One well-marked rugged range runs along almost the whole west of the district. Kankeshwar and Sagargadh are the leading peaks of the central zone of this range. Between the western belt of hills and the Sahyadris another broken and irregular line centres at the great plateau of Mirya Dongar, few miles south-east of Pen.

The famous hill fort of Raigadh is situated on a range which rises between the Sahyadri and a long spur dividing Mangaon from Mahad. In the north-east, a range passes along the boundaries of Karjat, Khalapur and Panvel talukas. Matheran, which is a plateau, is located in this range. The only notable peak in the main Sahyadrian ranges is the Kumbhicha Dongar or Dhaner hills in the south-east of Mangaon taluka.

Important Rivers

The important rivers of the district are Ulhas, Patalganga and Amba in the northern portion, Kundalika in the central portion and Savitri, Goda and Kal, a tributary of Savitri, in the southern portion.

Most of the rivers are seasonal and are practically dry for six months of the year. These west-flowing rivers drain the intensive precipitation of south-west monsoon into the Arabian Sea. High altitudes of Sahyadri in the basins of Pej river in Karjat taluka, Kundalika river in Mangaon taluka and Khopoli river in Khalapur taluka have provided very good sites for three hydro-electric power generating stations, *viz.*, those at Bhivpuri, Bhira and Khopoli, respectively.

Creeks

All along the coast there are a number of creeks in this district. The creeks at Nagothana, Roha, Rajpuri and Bankot are important and are utilised for navigation, trade and fishing purposes. Apart from these important creeks, there are certain minor creeks, *e.g.*, Karanja creek, Apta creek, Sakhar creek, etc.

At the time of high tide the mouths of rivers and creeks get blocked and the waters thus impounded spread out in the lower portions and create swamps. These swamps are known as Khar or Khajan lands. Such lands become completely or partially unfit for cultivation.

The silt and sand bars formed by the result of the action of the sea, have steadily rendered small ports such as Dharamtar, Nagothana, Roha and Dasgaon less useful for navigation purpose.

Climate

Monthly temperature records are available only for one station at Alibag (Table 1 in Part III).

The rainy season starts from the first week of June and lasts up to the end of September. It is followed by damp hot weather in October and November, winter from December to March and dry hot weather from March to June. There are no appreciable variations in temperature during different seasons of the year, the air being cooled by sea winds during hot months and by south-west monsoon during the rainy season.

Within the district, the seasons show local variations also. Along the coast, the sun is seldom oppressive and the nights though cool are often not cold. Inland and to the south, except for a few weeks in January and February, the middle of the days are hot and the nights, especially in the vicinity of streams and forests, are sometimes bitter and cold. In west Alibag, and some parts of Roha and Pen talukas, the climate in May is healthy and pleasant. Along the part of the district lying in the vicinity of the main range of Sahyadris, the climate is somewhat cooler.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall is not uniform in all parts of the district. It is heaviest in the regions near the main range of Sahyadri, with Matheran getting on an average 5,900 mm. (232 inches) in the year. The rainfall increases considerably as we go from west to east. The western or the coastal zone gets on an average 2,150 mm. (85 inches), central zone gets 3,000 mm. (118 inches) and the eastern zone bordering the Sahyadri gets 3,900 mm. (154 inches).

The rains generally start in the first week of June and last till the end of September. The intensity of rainfall is greatest in July. Though the monsoon rains cease by the end of September, the district further gets light drizzles during three seasons *viz.*, post-monsoon, winter monsoon and pre-monsoon.

The whole of the district receives the bulk of the rainfall (95 per cent) from the south-west monsoons. The post-monsoon begins with October and extends up to the end of December. It provides approximately 4·2 per cent of the annual normal rainfall. This rainfall is very important for the growing of kharif and sowing of rabi crops. Winter monsoon commences in January and lasts up to the end of February. It gives the lowest, *i.e.*, 0·1 per cent of the annual rainfall. Pre-monsoon showers during March to May amount to 0·7 per cent of the annual normal rainfall.

Dependability of Rainfall and Scarcity Areas

Mean rainfall at Alibag is 2,080·77 mm. Standard deviation is 488·70 mm. and the coefficient of variability is 23·49 per cent. Rainfall reliability is measured by the coefficient of variability. As the coefficient of variability of annual rainfall at Alibag is 23·49 per cent the degree of reliability in that region may be said to be slightly high.

As this district falls into the tract of heavy rainfall the Fact-Finding Committee appointed by the Government of Bombay in 1960 had reported that no area in this district could be considered as scarcity area.

Soils

The sub-soil stratum consists of Deccan trap rock which is completely impervious to percolation. There is, therefore, no retention of water in the soil and the district suffers from an acute shortage of water although it receives rainfall varying between 2,000 to 3,500 mm. in different parts.

In Panvel taluka and Uran mahal, chiefly black clay soil is found. On the hill-slopes, there is reddish soil which possesses much value as the best grass land. On the banks of the Dharamtar and Karanja creeks there are extensive Khar rice lands reclaimed from the sea. The tract of shell sand near the beach is suited for the growth of coconut and betelnut trees.

In Shriwardhan, Mhasala and Murud mahals and Alibag taluka, the soil is of three varieties. The first variety comprises the tract of shell sand near the beach which is suited for the growth of coconut and betelnut trees. The second variety comprises of red soil with a large mixture of shell sand. It is used for growing rice. The third comprises dark soil having little or no shell sand. It is suited for garden crops.

In Khalapur taluka and Sudhagad mahal, the low-lying lands are interspersed with patches of shallow clays and brown and red trap soils. The black clay soils on the upland are shallow. They are of overlying murum sub-soils and an admixture of fine gravel, which reduces their power of retaining moisture.

In Karjat taluka, there are three kinds of soil, a brown and a brownish black soil which are excellent for rice cultivation and a black soil good for rabi crops. These soils retain moisture and hence they are capable of producing second crops. The soils in valleys are rich and productive. On the hills, soils are usually red in colour, gravelly, poor in quality and not capable of bearing yearly crops.

In Mahad taluka and Poladpur mahal, the soil in the valleys is of a deep brown colour and is suitable for growing rice. On the plateau and hill sides soil is laterite and is capable of producing *halva* (early maturing) crops. Along the rivers, more especially in the villages near Mahad town, there are strips of alluvial deposit. The soil is soft-textured and deep and is capable of growing sugarcane, tur and vegetables but not suitable for rice cultivation. The hills consist of powdered laterite, on which inferior types of crops such as millets are grown.

The soils of Mangaon taluka are very similar to those found in Mahad taluka. Good soils of a brown colour are met with in the villages. The plateaus are composed of powdered laterite of good depth and the hill slopes are of short depth. On the river banks, especially in the valley of the Kal, there is considerable stretch of deep black clay soil which grows a good rabi crop.

The chief varieties of soil in Roha taluka are of red and black colour. Where the surrounding rocks are trap, the soil is dark coloured, and where laterite, the soil is red and generally poor. On top of hills, the red soils predominate. In the valley and plains, brown and black soils prevail. Roha valley is remarkably favourable for the growth of rice.

In Pen taluka, soils are reddish and black. Reddish soils are common in inland parts.

Minerals

The most important mineral found in the district is bauxite. It occurs in Murud and Shriwardhan mahals and Roha taluka along the west coast. These occurrences are seen in the low-lying hills just adjoining the sea and deposits of Usroli, Supegaon, Dohane and Wakalghar are of importance. The quality of bauxite ranges from 55 to 65 per cent. The indicated reserves of bauxite are of the order of five million tons. Iron ore of low grade is also found in parts of the district. Ochre deposits also occur in the district. Ochres are naturally coloured mineral pigments used for manufacture of paints. There are a number of laterite quarries in the district. There are also springs of mineral waters at Pali and Save which are famous for certain curing properties.

The district has salt producing centres at Uran, Sheva, Karanja, Pen and Panvel.

Forests

The district is fairly rich in forests. The northern talukas of Pen, Alibag and Roha with bolder and more clearly marked hill ranges are well wooded and have large rich forests. The southern talukas of Mangaon and Mahad with lower and sloping hills are thinly wooded and have few forests. The total area under forests is 655·77 sq. miles which makes 24·18 per cent of the total geographical area of the district. This also includes 171 sq. miles of forest area under private ownership spread over the district. The forest area in this districts is divided into two divisions, *viz.*, Kolaba Forest Division and Janjira Forest Division. The latter includes the forest areas of Mahad, Mangaon and Roha talukas and Mhasala, Murud, Shriwardhan and Poladpur mahals. The former division includes the remaining forests in the district. Teak is the important forest produce of the district.

Natural Zones

The district can be broadly divided into three zones. The coastal zone has, apart from rice cultivation in low-lying areas, plantations of coconut and betelnut. It comprises of Alibag taluka and Uran, Murud and Shriwardhan mahals and makes 18·8 per cent of the area of the district. Another notable feature of this zone is the fishing industry and cultivation of vegetables.

The central zone comprises of talukas of Panvel, Pen, Roha and western portions of Mangaon taluka and Mhasala mahal and makes about one-third of the district area. The low-lying areas of this zone are more fertile and are used for rice cultivation. Ragi and Varai are grown on hill slopes. Vegetables are grown and sent to Bombay market in the northern portions in general and Panvel taluka in particular. This area provides excellent opportunities for industrialization due to the existence of transport and communications facilities and availability of electricity. The hilly tract consists of the eastern parts of Karjat and Khalapur talukas and the north-east corner of Mangaon and Mahad talukas and Sudhagad and Poladpur mahals. This zone has good forests and heavy rainfall.

ADMINISTRATIVE SET-UP

Brief History

Up to 1852, the district formed a part of Thana district. In 1853, Underi and Revdanda sub-divisions of the former Kolaba agency together with Shanksi (Pen), Rajuri (Roha) and Raigadh (Mahad) sub-divisions, separated from Thana district were formed into what was called the Kolaba sub-collectorate under Thana district. The sub-collectorate was raised to a full-fledged district in 1869. Panvel taluka with Uran (Karanja) peta was transferred from Thana district in 1883. Karjat taluka was also transferred from Thana district before 1891.

In 1891, the district had the following sub-divisions :—

Alibag, Mangaon, Roha, Pen, Nagothna peta, Panvel, Uran peta, Mahad, Khalapur peta and Karjat.

Nagothna peta was abolished in the decade 1921—31 and Khalapur peta was abolished in the year 1932. A new taluka called Khalapur taluka was formed in the year 1946.

Consequent upon the merger of parts of former Indian States with the district, the taluka boundaries were reorganised in the year 1949. Poladpur, Shriwardhan, Mhasala, Sudhagad and Murud were created as new mahals. Sudhagad consisted mainly of areas formerly under Bhor State while Shriwardhan, Murud and Mhasala have areas formerly under Janjira State. Two villages from Ratnagiri district were added to this district in 1950.

With the Reorganisation of States, the district was transferred to Bombay State in 1956. Since 1960, it forms a part of Maharashtra.

Present Set-up

For administrative purposes, the district is at present divided in eight talukas and six mahals. The areas, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka and mahal are as follows :—

District/Taluka	Name of Headquarters	Area in sq. miles	Number of inhabited villages	Number of Towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
KOLABA DISTRICT	Alibag	2,712·3	1,778	12	1,058,855	100·0	100·0
1 Karjat Taluka	Karjat	241·5	170	3	87,288	8·9	8·2
2 Panvel Taluka	Panvel	215·3	177	1	115,378	7·9	10·9
3 Uran Mahal	Uran	75·2	42	1	56,462	2·8	5·3
4 Khalapur Taluka	Khalapur	156·8	140	..	53,376	5·8	5·0
5 Alibag Taluka	Alibag	195·9	172	2	124,274	7·2	11·7
6 Pen Taluka	Pen	199·6	136	1	83,201	7·4	7·9
7 Sudhagad Mahal	Pali	175·7	94	..	41,794	6·5	4·0
8 Roha Taluka	Roha	258·3	154	1	79,648	9·5	7·5
9 Murud Mahal	Murud	133·2	67	1	44,453	4·9	4·2
10 Mangaon Taluka	Mangaon	368·6	231	..	124,370	13·6	11·7
11 Shriwardhan Mahal	Shriwardhan ..	104·6	78	1	54,821	3·9	5·2
12 Mhasala Mahal	Mhasala	128·5	70	..	38,898	4·7	3·7
13 Mahad Taluka	Mahad	312·3	167	1	116,139	11·5	11·0
14 Poladpur Mahal	Poladpur	146·8	80	..	38,753	5·4	3·7

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and three Deputy Collectors who hold charge of the three revenue divisions and have their headquarters at Panvel, Alibag and Mahad, respectively. The work of Alibag division which comprises only Alibag taluka is entrusted to Resident Deputy Collector, Alibag. Eight Mamlatdars are in charge of eight talukas and six Mahalkaris in charge of the six mahal offices.

Land Revenue Settlement

The original revenue survey and settlement of different talukas and mahals in the district was completed between 1854 and 1866. The first revision settlement was completed between 1889 and 1903 and the second revision settlement between 1922 and 1928, and guaranteed for a period of thirty years. In Mangaon and Mahad talukas and Poladpur mahal second revision settlement has not been made. Out of the fourteen talukas (and mahals) second revision settlement is introduced in seven talukas, the first revision in six talukas and original settlement in one mahal (Sudhagad). In the Sudhagad mahal of the erstwhile Bhor State, the original survey rates introduced in 1884-85 are still in force. In Murud, Shriwardhan and Mhasala mahals of the erstwhile Janjira State, original settlement was completed between 1890 and 1898. First revision settlement was made between 1925 and 1929 and guaranteed for six years only. The land revenue rates have not been revised though the guarantee periods have expired.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets,

facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during the second revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlement untaxed. The comparative incidence of land revenue from field to field is thus generally the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of revenue assessments over a tract uniformly.

The method of land revenue assessments is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small *bandharas*, the land revenue is integrated and is inclusive of the charge for water. For lands irrigated under Government canals, the land revenue at dry crop rates is assessed and recovered by the Revenue Department while the water rates determined annually on the basis of actual crops raised are assessed by the Irrigation Department and recovered by the Revenue Department.

Table 24 in Part III shows demand and collection of land revenue during the ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam or Jagir villages had not been covered by most of them. In fact, some of the Inam or Jagir villages were unsurveyed and unsettled as late as in 1947. That work has now been completed. Because of such recently settled villages and because of the territorial changes in the taluka boundaries from time to time, most of the talukas today have a more varied pattern of land revenue assessments than what is seen in the reports of earlier settlements. Even then the maximum rates fixed at each settlement or revision settlement or the average land revenue rates per acre should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. Those rates for dry, garden or rice lands for each taluka are as follows :—

Taluka	Original settlement or Revision settlement	Year	Guarantee period	No. of villages	Average land revenue per acre	Group	Villages	Maximum rates per acre		
								Dry lands	Garden lands	Rice lands

Assembly and Parliamentary Constituencies

Since 1957 the district has eight Assembly seats. In 1957 Mangaon and Pen constituencies were double-member constituencies with one of the two seats from Mangaon reserved for Scheduled Castes and one of the two seats from Pen reserved for Scheduled Tribes. After abolition of the double-member constituencies in 1961, the seat from Mangaon is reserved for Scheduled Castes and the seat from Khalapur is reserved for Scheduled Tribes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly Constituency	No. of Voters on rolls
(1) Pen	73,042
(2) Khalapur	68,984
(3) Alibag	56,869
(4) Roha	60,728
(5) Shriwardhan	47,788
(6) Mangaon	61,459
(7) Panvel	72,834
(8) Mahad	58,163
Total ..	499,867

In the 1962 General Elections, the Assembly constituencies Pen, Khalapur, Alibag, Roha, Shriwardhan and Mangaon together made one Parliamentary constituency called Kolaba constituency, the Assembly constituency Panvel combined with Assembly constituencies Thana, Bassein, Murbad, Kalyan and Ulhasnagar from Thana district together made another Parliamentary constituency called Thana constituency and the remaining Assembly constituency Mahad combined with Assembly constituencies Khed, Maval, Bhor and Purandar from Poona district and Ratnagiri-Khed from Ratnagiri district together made one more Parliamentary constituency called Khed constituency.

The total number of voters on rolls in the district in 1961 was 499,867. The total population of 21 years and above according to 1961 Census is 503,347. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Mamlatdars are vested with the magisterial powers. But these powers are limited to executive matters and trial of Chapter cases only and none of them ever tries any criminal case.

The District Magistrate does not have any administrative control over the other magistrates who try criminal cases in the district. This separation of the judiciary from the executive has been brought about in the district in 1953.

The District and Sessions Judge is assisted by one Assistant Judge and Assistant Sessions Judge for some months in a year. He has jurisdiction over the entire district. He attends to civil and criminal work.

The Civil Judge (Senior Division) and First Class Judicial Magistrate attends to civil suits in the whole district and some criminal work from Alibag taluka.

There are six Civil Judges (Junior Division) and First Class Judicial Magistrates with headquarters at different taluka places. They deal with civil and criminal suits.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by one Deputy Superintendent and two Circle Police Inspectors. There are 15 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

	Police Station Headquarters	No. of villages
Karjat Taluka ..	1. Karjat	116
	2. Matheran	67
Panvel Taluka ..	3. Panvel	199
Uran Mahal ..	4. Uran	71
Khalapur Taluka	5. Khalapur	112
Alibag Taluka ..	6. Alibag	116
	7. Poynad	90
Pen Taluka ..	8. Pen	156
Sudhagad Mahal ..	9. Pali	99
Roha Taluka ..	10. Roha	126
Murud Mahal ..	11. Murud	86
Mangaon Taluka..	12. Mangaon	234
Shriwardhan Mahal. ..	13. Shriwardhan	161
Mahad Taluka ..	14. Mahad	168
Poladpur Mahal..	15. Poladpur	83

Average number of villages and population per Police Station in the district is 126 and 70,590 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

Nine out of 12 towns in the district have Municipal Committees established under the Bombay District Municipal Act of 1901. The year of establishment, the year of the last General Election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and for women are shown below for each municipality separately :—

Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 Population	Total No. of Municipal Councilllors	Seats reserved for	
						Scheduled Castes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
(1) Murud	1888	1960	4	10,055	15	1	2
(2) Uran	1867	1962	4	10,229	15	..	2
(3) Roha Ashtami	1865	1961	4	7,553	17	1	1
(4) Pen	1865	1962	4	9,549	15	..	2
(5) Panvel	1852	1961	4	18,130	21	1	1
(6) Matheran	1905	1961	4	2,842	11	1	1
(7) Mahad	1866	1962	4	11,083	19	1	2
(8) Alibag	1864	1961	4	9,909	15	..	2
(9) Shriwardhan	1887	1960	4	10,344	15	..	2

The Municipality at Panvel is the oldest of all, and had been established more than a hundred years ago. Five out of the remaining eight municipalities are nearing the hundredth year of their existence. Even the Matheran Municipality which is the youngest is nearly sixty years old.

The nine municipalities together cover 84·08 per cent of the urban population or 8·47 per cent of the total 1961 population of the district. The remaining towns, *viz.*, Neral, Karjat and Revdanda do not have municipalities.

The taxation level of each of the municipalities is shown in the next column.

Per capita municipal tax appears to be high at Matheran, but it is a hill station and much of the incidence falls on the tourists.

Name of the Municipality	1961 Population	Year 1961-62		
		Total Receipts	Receipts from Municipal taxes	*Per capita* Municipal tax
		Rs.	Rs.	Rs. nP.
(1) Murud ..	10,055	1,28,943	95,174	9 47
(2) Uran ..	10,229	1,54,801	1,04,942	10 26
(3) Roha Ashtami	7,553	1,24,237	69,796	9 24

(6) Matheran ..	2,842	2,54,354	1,53,889	54 15
(7) Mahad ..	11,083	26,10,128	1,74,543	15 75
(8) Alibag ..	9,909	1,24,033	97,701	9 86
(9) Shriwardhan	10,344	85,710	64,949	6 28

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 14 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries separately except in the case of municipal towns which are not covered by them. Three towns which do not have Municipal Committees but which are treated as towns in the 1961 Census are, however, included under the jurisdiction of the Zilla Parishad and Panchayat Samitis concerned. The Zilla Parishad covers 98·8 per cent of the area and 91·53 per cent of the total population of the district. The population covered by the Zilla Parishad includes total rural population and 15·92 per cent of urban population of the district in 1961. The number of villages, number of

non-municipal towns and population included under the Zilla Parishad and each Panchayat Samiti are shown below. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961 :—

(1)	Names of Headquarters (2)	Area in sq. miles (3)	Number of inhabited villages (4)	Number of non-municipal towns (5)	Population in 1961 (6)	Percentage by area (7)	Percentage by population (8)

14. Poladpur Panchayat Samiti	Poladpur	146·8	80	..	38,753	5·5	4·0

Constitution

The Zilla Parishad has 48 directly elected councillors. Out of these 48 seats, one seat is reserved for Scheduled Castes and four for Scheduled Tribes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected Chairmen of Panchayat Samitis are also *ex-officio* councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the block and a Chairman of a Co-operative Society conducting the business of purchase or sale of agricultural produce in the area of the block as an associate member and a Chairman of a Co-operative Society conducting the business in agriculture in the area of the block as co-opted member. Sarpanchas elected by members of Village Panchayats are elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I. A. S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the District level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided over by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two Subject Committees are presided by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the Subject Committees is achieved through the Standing Committee which includes the Chairmen of all the Subject Committees as members.

The Panchayat Samitis do not have Subject Committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject

Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now with the creation of these democratic bodies at the district and block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities, at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayats, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Local Board, District School Board and District Panchayat Mandal. The functions of non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan Schemes. If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 136 lakhs. The major portion of the receipts is of receipts from Government. They are 91·7 per cent and the Zilla Parishad receipts are 8·3 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 141 lakhs. Following are the major items of expenditure :—

General Administration ..	5·2	per cent
Education	53·1	,, ,,
Community Development Project.	8·7	,, ,,
Buildings and Communications	13·0	,, ,,
Miscellaneous	8·1	,, ,,
Other items	11·9	,, ,,

A proposal to raise cess on land revenue to 30 nP. per rupee is reported to be under consideration.

Per capita annual expenditure of the Zilla Parishad on different development heads is as follows :—

	Rs.
General Administration	0·76
Education	7·71
Community Development	1·26
Buildings and Communications ..	1·89

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 6 Class I and 32 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV category is 5,5. Moreover an establishment of 161 Gram Sevaks, 336 Talatis and 217 Village Panchayat Secretaries has been transferred from the Revenue Department to the Zilla Parishad.

VILLAGE PANCHAYATS

The number of independent village panchayats, the number of group village panchayats and the number of villages covered by group village panchayats are shown below :—

Taluka	No. of inhabited villages and non-municipal towns	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1 Karjat ..	170+2	5	38	179
2 Panvel ..	177	5	48	188
3 Uran Mahal ..	42	11	13	56
4 Khalapur ..	140	*Nil*	22	150
5 Alibag ..	172+1	1	42	202
6 Pen ..	136	9	27	146
7 Sudhagad Mahal	94	4	23	95
8 Roha ..	154	3	38	171
9 Murud Mahal	67	2	15	78
10 Mangaon ..	231	4	67	232
11 Shriwardhan Mahal.	78	8	20	76
12 Mhasala Mahal	70	1	20	79
13 Mahad ..	167	11	55	157
14 Poladpur Mahal	80	*Nil*	24	81
Total ..	1,778+3	64	452	1,890

Note—The figures in column (5) perhaps include hamlets. The totals of columns (3) and (5) do not therefore tally with column (2).

All the villages in the district are covered by village panchayats.

The break-up of the total annual income of all the village panchayats in the district for the year 1961-62 is as follows as shown in the next column.

Item	Amount (in'000)	Percentage of total income
	Rs.	
Grants	945	52·15
Taxes on houses and properties	201	11·09
Octroi	166	9·16
Other taxes	317	17·50
Total taxes	684	37·75
Income from other sources	183	10·10
Total income	1,812	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The village panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

The break-up of the total annual expenditure of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000)	Percentage of total expenditure
	Rs.	
Administration	287	15·79
Health and Sanitation	467	25·69
Public Lighting	113	6·21
Other items	951	52·31
Total Expenditure	1,818	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of panchayat *ghars*, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchyat Secretay and Assistant Gram Sevak are combined in one official who now works under the Village Panchayat.

POPULATION

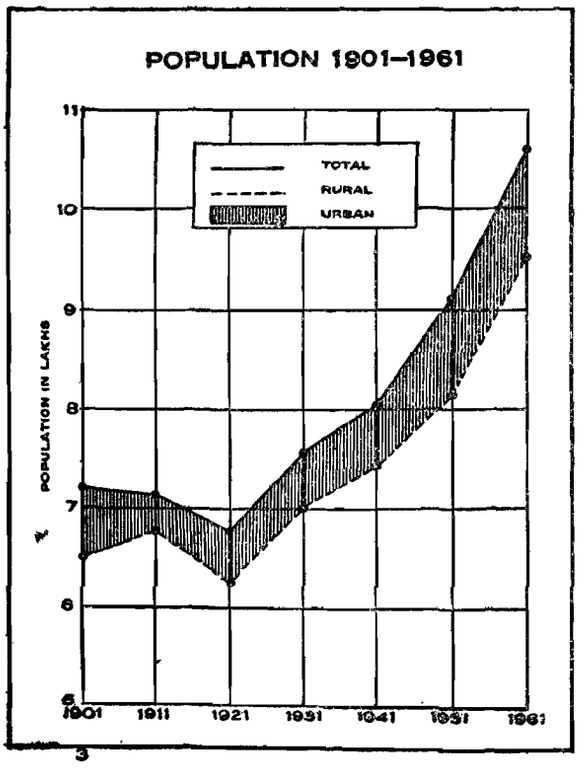

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each *taluka during 1951—1961.*

Variation

The population of the district and the decade variation rates since 1901 are as follows :—

Year	Population	Variation	Rate of variation
1901 ..	721,083	..	..
1911 ..	714,371	−6,712	−0·93
1921 ..	677,586	−36,785	−5·15
1931 ..	756,315	+78,729	+11·62
1941 ..	805,157	+48,842	+6·46
1951 ..	909,083	+103,926	+12·91
1961 ..	1,058,855	+149,772	+16·48

Figure below shows the total, rural and urban population of the district for the last seven Censuses :—

There had been a decrease of a small order in the district population in the decade 1901—11 because of the failure of crops in the years immediately following the severe famine in 1901. In the following decade the severe influenza epidemic in 1918-19 created a havoc which resulted in a decrease of 5·15 per cent in the population. Recovery from the epidemic and better agricultural seasons in the decade 1921—31 led to an increase of 11·62 per cent in the population. The slow rate of increase in the following decade may be due to the economic depression of the 'thirties. Substantial increase was however recorded in the decade 1941—51. Public health measures taken during the decade reduced the death rate considerably. Partition of the country in 1947 also added some migrants from Pakistan. The combined result was the increase of 12·91 per cent in that decade. The last decade 1951—61 has shown an increase of 16·48 per cent. It is the highest recorded growth rate for the district in the last sixty years though that growth rate is itself lower than the average decade growth rate for the State.

The 1951—61 decade variation for the State, the district and each of the talukas is as follows :—

	Percentage Variation 1951—61
MAHARASHTRA	+23·60
KOLABA DISTRICT	+16·48
1 Karjat Taluka	+24·39
2 Panvel Taluka	+26·25
3 Uran Mahal	+19·31
4 Khalapur Taluka	+28·30
5 Alibag Taluka	+17·85
6 Pen Taluka	+19·43
7 Sudhagad Mahal	+17·22
8 Roha Taluka	+17·28
9 Murud Mahal	+11·22
10 Mangaon Taluka	+13·09
11 Shriwardhan Mahal	+7·74
12 Mhasala Mahal	+11·43
13 Mahad Taluka	+7·79
14 Poladpur Mahal	+6·36

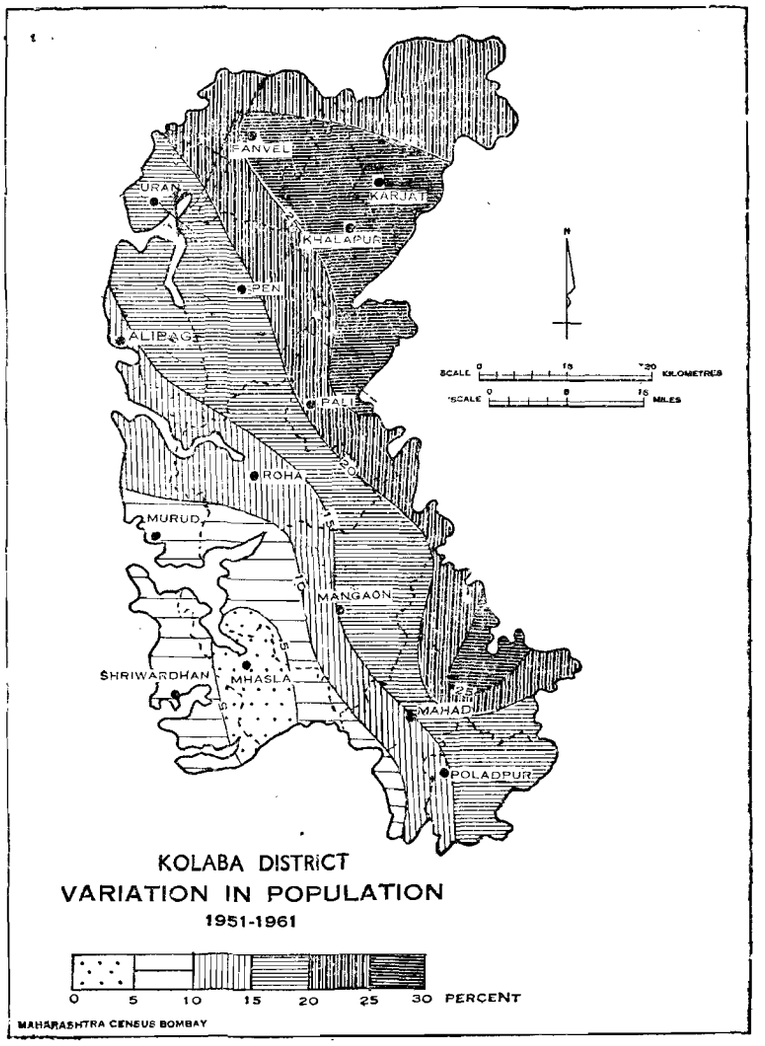

Figure to the right shows the areawise pattern of 1951—61 growth of population within the district.

There are wide differences in the decade rates of variation of different talukas. Khalapur taluka has recorded the highest (28·30 per cent) while Poladpur mahal had the lowest increase (6·36 per cent). Khalapur, Karjat, Panvel, Pen, Alibag and Roha talukas and Uran and Sudhagad mahals are above the district average and the remaining talukas or mahals are below that average.

These northern talukas have higher rates of growth than the southern talukas because of the many large-scale industries set up in Panvel, Karjat and Khalapur talukas and Uran mahal.

These areas are because of their proximity to Bombay also influenced by the overflow of Greater Bombay population. The number of commuters from Karjat, Panvel, Neral and midway stations has increased considerably and those places are increasingly serving the role of residential suburbs of Bombay.

The southern talukas have been traditionally the areas of out-migration to Bombay and a part of the natural growth of population is set off by that out-migration.

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Kolaba District	Maharashtra
1901—1961	46·84	103·97
1921—1961	56·27	89·71
1951—1961	16·48	23·60

It will be seen that the growth of population in the district has always been slower than the average for the State. The main reason has been the out-migration to Bombay particularly from the southern talukas. 1961 Census showed that 68,948 males and 40,256 females enumerated in Greater Bombay were born in Kolaba district.

Density of Population

The densities for Maharashtra, Kolaba district and its talukas for 1951 and 1961 are as follows :—

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
KOLABA DISTRICT ..	335	390	100·00
1 Karjat Taluka	291	361	8·24
2 Panvel Taluka	424	536	10·90
3 Uran Mahal	629	751	5·33
4 Khalapur Taluka ..	265	340	5·04
5 Alibag Taluka	538	634	11·74
6 Pen Taluka	349	417	7·86
7 Sudhagad Mahal ..	203	238	3·95
8 Roha Taluka	263	308	7·52
9 Murud Mahal	300	334	4·20
10 Mangaon Taluka ..	298	337	11·74
11 Shriwardhan Mahal ..	486	524	5·18
12 Mhasala Mahal ..	272	303	3·67
13 Mahad Taluka	345	372	10·97
14 Poladpur Mahal ..	248	264	3·66

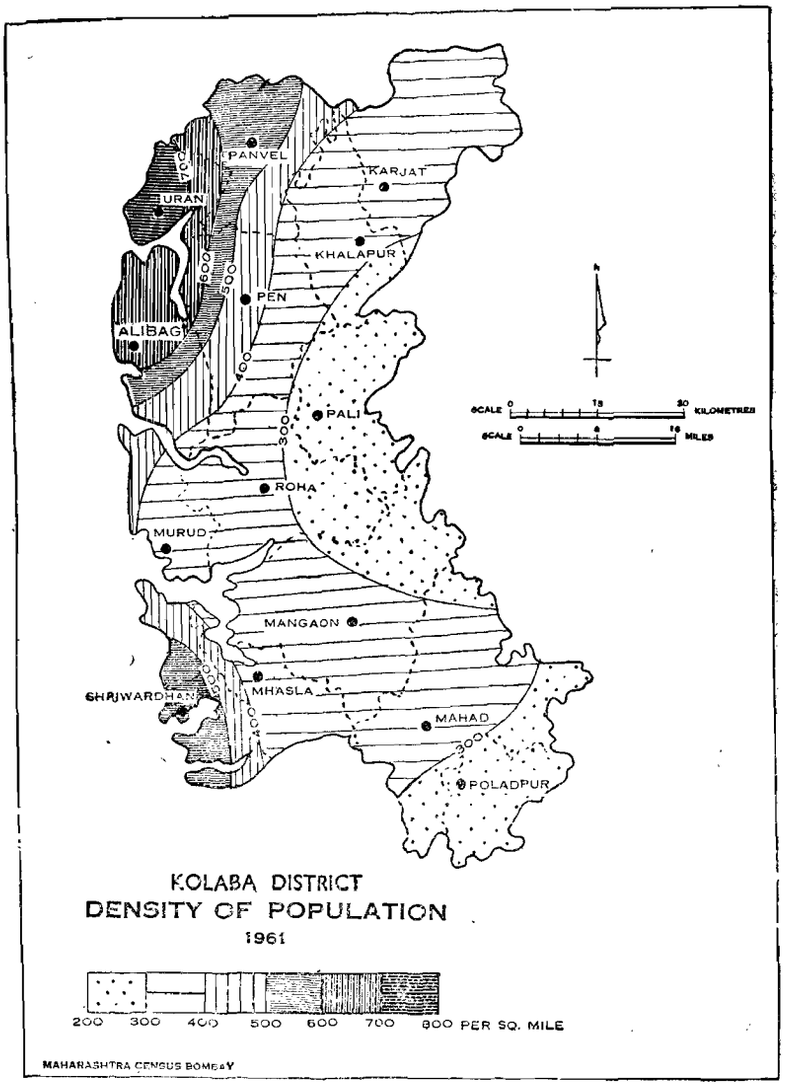

Figure to the right shows the approximate contours of density of population in 1961 within the district.

The density of the population has increased sharply from 250 per square mile in 1921 to 390 in 1961. The density of population in Kolaba district has always been higher than the State average.

Within the district the density of population varies from 751 persons per square mile in Uran mahal to 238 persons per square mile in Sudhagad mahal. Topographically Kolaba district is in the mountain ranges of Sahyadri except the small belt on the coast. Coastal areas and the northern talukas have very fertile soils and intensive cultivation of rice, fruits and vegetables. They are naturally more densely populated than the other mountainous talukas.

Though the growth of population in Shriwardhan mahal has been slow, its density is as much as 524 persons per square mile.

The talukas which have high percentage of the population are also the areas of relatively high density. Panvel and Alibag talukas and Uran and Shriwardhan mahals which are the densely populated areas together have 33·2 per cent of the population but only 21·8 per cent of the area. Sudhagad, Poladpur and Mhasala mahals and Roha taluka which are less densely populated areas together have 18·9 per cent of the population with 26·2 per cent of the area. Except for these differentials the remaining areas have an even distribution of area and population.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

	Kolaba District			Maharashtra		
Year	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901	10	..	9·90	219	..	16·59
1911	8	—47·83	5·21	232	+0·99	15·13
1921	9	+39·51	7·66	238	+18·72	18·50
1931	9	+7·65	7·39	258	+15·54	18·60
1941	9	+13·95	7·91	266	+27·11	21·11
1951	12	+50·73	10·56	383	+62·42	28·75
1961	12	+11·09	10·08	266	+21·32	28·22

In the Figure on page (12) the actual urban population of the district since 1901 is shown by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 49·51 per cent as against the average of 246·96 per cent for the State.

The district is less urbanised than the State. The proportion of urban population had decreased both for the district and the State in 1911. The reduction in the district was very substantial. Since then it has gradually increased to 10·56 per cent in 1951. It has again fallen to 10·08 per cent in 1961 in spite of a net growth of 11·09 per cent in the urban population. There had been no change in the number of towns in the last decade. The slight fall in the proportion of urban population indicates that on the whole the towns are not growing as fast as the rural areas. This again is due to location of many new industries not at the existing towns but at rural centres such as Karanja, Khopoli, etc. which might later develop into industrial towns.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows:—

Year	Kolaba District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901 ..	..	90·10	..	83·41
1911 ..	+ 4·22	94·79	+12·68	84·87
1921 ..	− 7·60	92·34	− 6·77	81·50
1931 ..	+11·95	92·61	+14·77	81·40
1941 ..	+ 5·86	92·09	+ 8·54	78·89
1951 ..	+ 9·66	89·44	+ 7·72	71·25
1961 ..	+17·11	89·92	+24·51	71·78

The net increase in rural population of the district has been 46·55 per cent, over that of 1901 and 52·19 per cent, over that of 1921. The same figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The rates of variation have never followed any trend. During 1921—1951 the urban population had grown faster at the expense of rural population. For the first time in 1961 the growth rate of rural population (17·11 per cent) is higher than the growth rate of urban population. As a result the percentage of rural population in the district is higher in 1961 than 1951.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Kolaba District		Maharashtra	
	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population
Less than 500 ..	62·49	29·95	47·72	15·02
500—999 ..	25·93	33·15	28·55	25·71
1,000—1,999 ..	8·94	22·36	16·62	28·55
2,000—4,999 ..	2·53	13·04	6·18	22·40
5,000 and over ..	0·11	1·50	0·93	8·32

Villages with less than 1,000 population are 88·42 per cent of the total number of villages in the district and have 63·10 per cent of the rural population. Villages with more than 1,000 population are 11·58 per cent of the total number of villages and account for 36·90 per cent of the rural population.

The area, number of inhabited villages, total rural population, average population per village and the number of villages per 100 sq. miles of rural area are shown below for the State, district and each taluka separately :—

State/District/Taluka (1)	Area in sq. miles (rural) (2)	Number of inhabited villages (3)	Rural population (4)	Average population per inhabited village (5)	Number of inhabited villages per 100 sq. miles of rural area (6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31
KOLABA DISTRICT	2,670·9	1,778	952,174	536	67
1 Karjat Taluka	233·7	170	73,699	434	73
2 Panvel Taluka	210·6	177	97,248	549	84
3 Uran Mahal	74·4	42	46,233	1,101	57
4 Khalapur Taluka	156·8	140	53,376	381	89
5 Alibag Taluka	190·2	172	108,125	629	90
6 Pen Taluka	195·8	136	73,652	542	70
7 Sudhagad Mahal	175·7	94	41,794	445	54
8 Roha Taluka	250·3	154	72,095	468	62
9 Murud Mahal	128·4	67	34,398	513	52
10 Mangaon Taluka	368·6	231	124,370	538	63
11 Shriwardhan Mahal	100·4	78	44,477	570	78
12 Mhasala Mahal	128·5	70	38,898	556	55
13 Mahad Taluka	310·7	167	105,056	629	54
14 Poladpur Mahal	146·8	80	38,753	484	55

The average population per village in the district is 536 against 792 in Maharashtra. It is the lowest average in Bombay and Poona Divisions and the third lowest figure in Maharashtra. The district has more number of small villages. The average population per village within the district varies from 381 in Khalapur taluka to 1,101 in Uran mahal. The number of villages per 100 sq. miles of rural area is 67 in the district and 31 in Maharashtra. Among the talukas of the district the number of villages per

100 sq. miles of rural area varies from 52 in Murud mahal to 90 in Alibag taluka. It seems that there are a large number of small villages located very near to each other. The dense population in the district thus lives in closely located small villages and not like Sangli district in large villages situated away from each other.

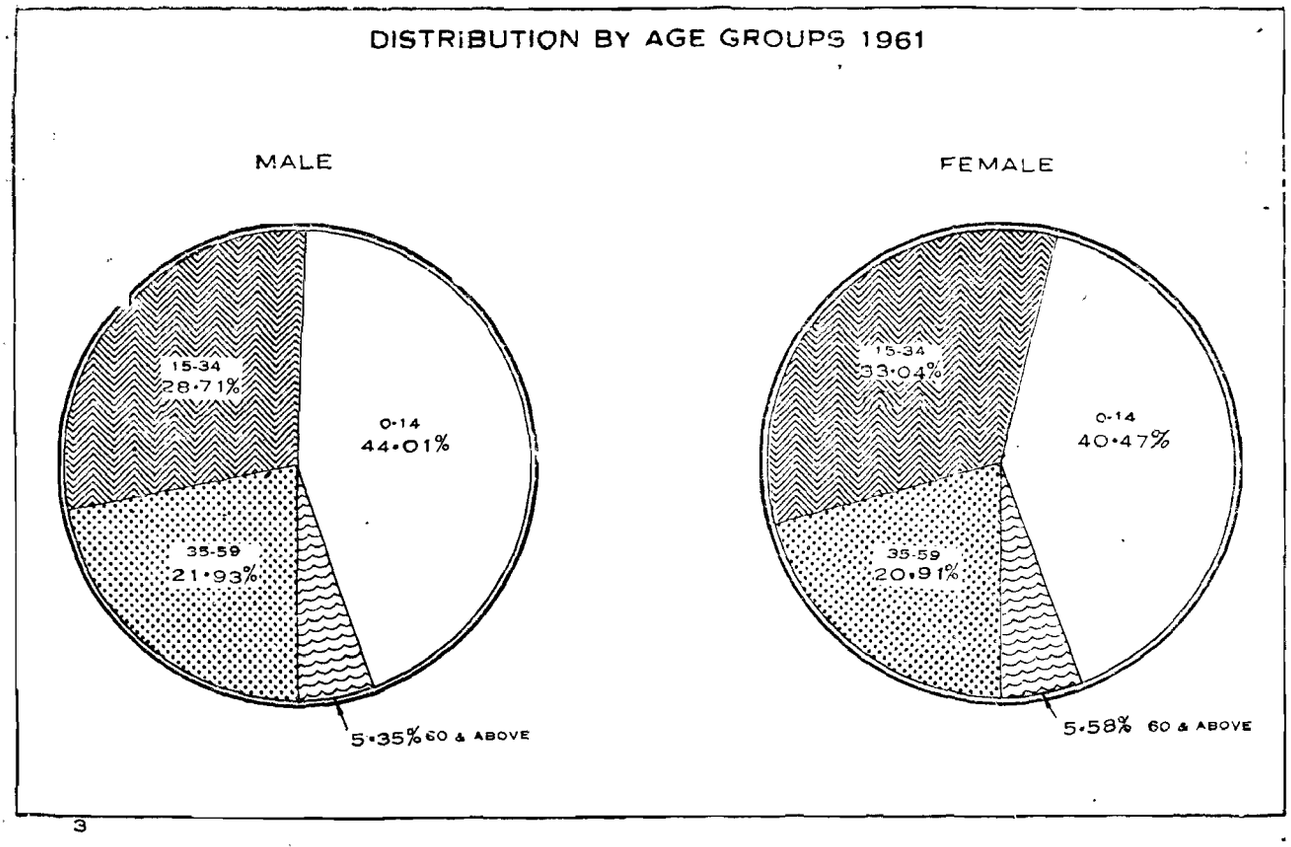

Age Composition

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 for the district and the State are shown in the next column separately for males and females compared with the corresponding proportions for 1951 in the district.

Percentages of Population by age-groups

Age-group	1951 District Total		1961 District Total		1961 Maharashtra Total	
	Males	Females	Males	Females	Males	Fmales
0 – 4 ..	13·80	12·95	16·22	15·40	14·65	15·39
5—14 ..	28·17	24·91	27·78	25·06	25·55	25·77
0—14 ..	41·97	37·86	44·00	40·46	40·20	41·16
15—34 ..	29·05	34·50	28·72	33·04	32·70	33·13
35—59 ..	24·74	22·52	21·93	20·92	22·09	20·16
15—59 ..	53·79	57·02	50·65	53·96	54·79	53·29
60 and over.	4·24	5·12	5·35	5·58	5·01	5·55
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Figure below shows the distribution of the district population by broad age-groups for males and females separately :—

During the last decade the population of children aged 0—4 increased from 13·80 to 16·22 per cent for males and from 12·95 to 15·40 per cent for females. The same trend is seen for age-group 0—14. In contrast, the proportion for 15—59 age-group decreased from 53·79 to 50·65 per cent for males and from 57·02 to 53·96 per cent for females. The proportion of males of age-groups 15—59 is 50·65 in the district against 54·79 per cent for Maharashtra. The difference can be attributed to the number of people migrating for work to Bombay and other places.

Dependency Ratio

The ratio between dependents (age-groups 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown

below for 1951 and 1961 for the district and the State, separately :—

	Kolaba District			Maharashtra		
	Youth	Aged	Total	Youth	Aged	Total
1951 Total	72·0	8·5	80·5	69·9	9·3	79·2
1961 Total	80·6	10·5	91·1	75·2	9·7	84·9
Rural	81·4	10·6	92·0	80·6	10·8	91·4
Urban	73·6	9·4	83·0	63·1	7·3	70·4

The dependency ratios are higher in Kolaba district than those for Maharashtra. It is because a part of the supporting population migrates for work out of the district. The dependency ratios for the State and the district are both higher in 1961 than those of 1951. Both the components of youth and aged have increased. The increase in dependency may be the result both of high fertility and declining mortality. The 1961 population in the district thus has a larger load of dependents than that of 1951. The dependency load is moreover larger in rural than urban areas. It is the effect of the differences in age-structure of rural and urban population resulting from the migration of working age (15—59) people from rural to urban areas within and outside the district.

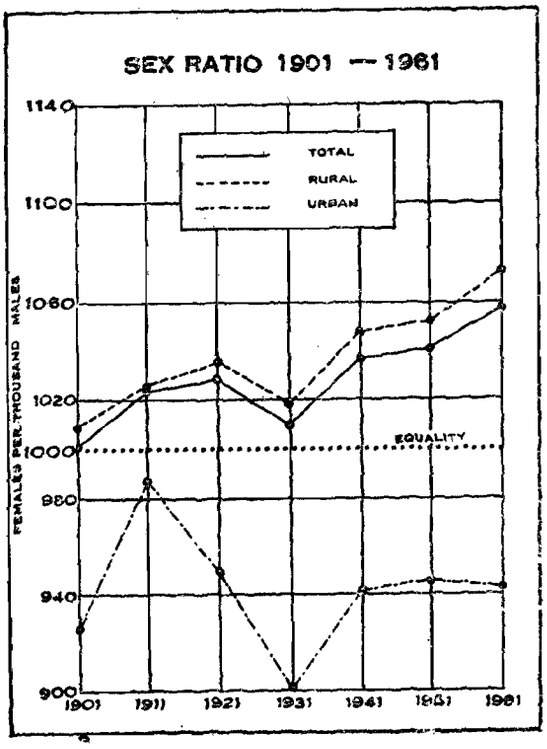

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

Year	Kolaba District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	1,000	1,009	926	978	1,002	866
1911 ..	1,023	1,025	986	966	1,000	796
1921 ..	1,028	1,034	949	950	994	776
1931 ..	1,009	1,019	901	947	987	790
1941 ..	1,036	1,045	941	949	990	810
1951 ..	1,040	1,052	945	941	1,000	807
1961 ..	1,058	1,072	943	936	995	801

Figure in the next column shows the variation in the sex ratios since 1901 for the district total, rural and urban areas separately.

Since 1901 the sex ratio of the population of the district varied between 1,000 and 1,058 while that of Maharashtra varied between 936 and 978. At each Census, the district has recorded a higher sex ratio than the State, *i.e.*, the district always had comparatively more females than the State average. It was due to the out-migration of males from the district. On the other hand, Maharashtra taken as a whole has had a net in-migration of males. There had been a fall in the sex ratio of the district in 1931 perhaps due to the return home of male workers from Bombay on account of depression. The sex ratio recovered again in 1941. The value of 1,058, recorded in 1961, is the highest ever recorded since 1901. Rural and urban sex ratios followed the same pattern as that for the total population. Rural urban differentials were of smaller order in this district.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas separately :—

Age-groups	Total	Rural	Urban
0—14	973	975	951
15—34	1,217	1,253	961
35—59	1,009	1,024	886
60+	1,105	1,116	1,004
All ages	1,058	1,072	943

Sex ratio is the lowest in the age-group 0—14 for total and rural areas, whereas it is lowest in age-group 35—59 for urban areas.

The sex ratios for each taluka in the district for total, rural and urban areas separately are as follows :—

	Total	Rural	Urban
KOLABA DISTRICT ..	1,058	1,072	943
1 Karjat Taluka	927	941	855
2 Panvel Taluka	971	984	903
3 Uran Mahal	964	977	908
4 Khalapur Taluka ..	941	941	..
5 Alibag Taluka	1,079	1,098	961
6 Pen Taluka	1,019	1,032	919
7 Sudhagad Mahal ..	988	988	..
8 Roha Taluka	1,018	1,025	955
9 Murud Mahal	1,088	1,103	1,040
10 Mangaon Taluka ..	1,129	1,129	..
11 Shriwardhan Mahal ..	1,271	1,324	1,068
12 Mhasala Mahal ..	1,328	1,328	..
13 Mahad Taluka	1,130	1,151	945
14 Poladpur Mahal ..	1,165	1,165	..

Mhasala mahal which had entirely rural population has the highest sex ratio (1,328) and is followed by Shriwardhan mahal with (1,271)

and Karjat taluka the least (927). Generally the southern and predominantly rural talukas have a higher sex ratio than that of the northern talukas. In Murud and Shriwardhan mahals, the sex ratios of urban population are also as high as 1,040 and 1,068, respectively. The variation in the sex ratio confirms that Mhasala, Shriwardhan, Poladpur, Mahad, Mangaon and Murud are in that order the areas which send out very high proportions of migrants to Greater Bombay and other places.

The rural urban differentials in sex ratio are not very significant as the urban population consists mostly of small towns.

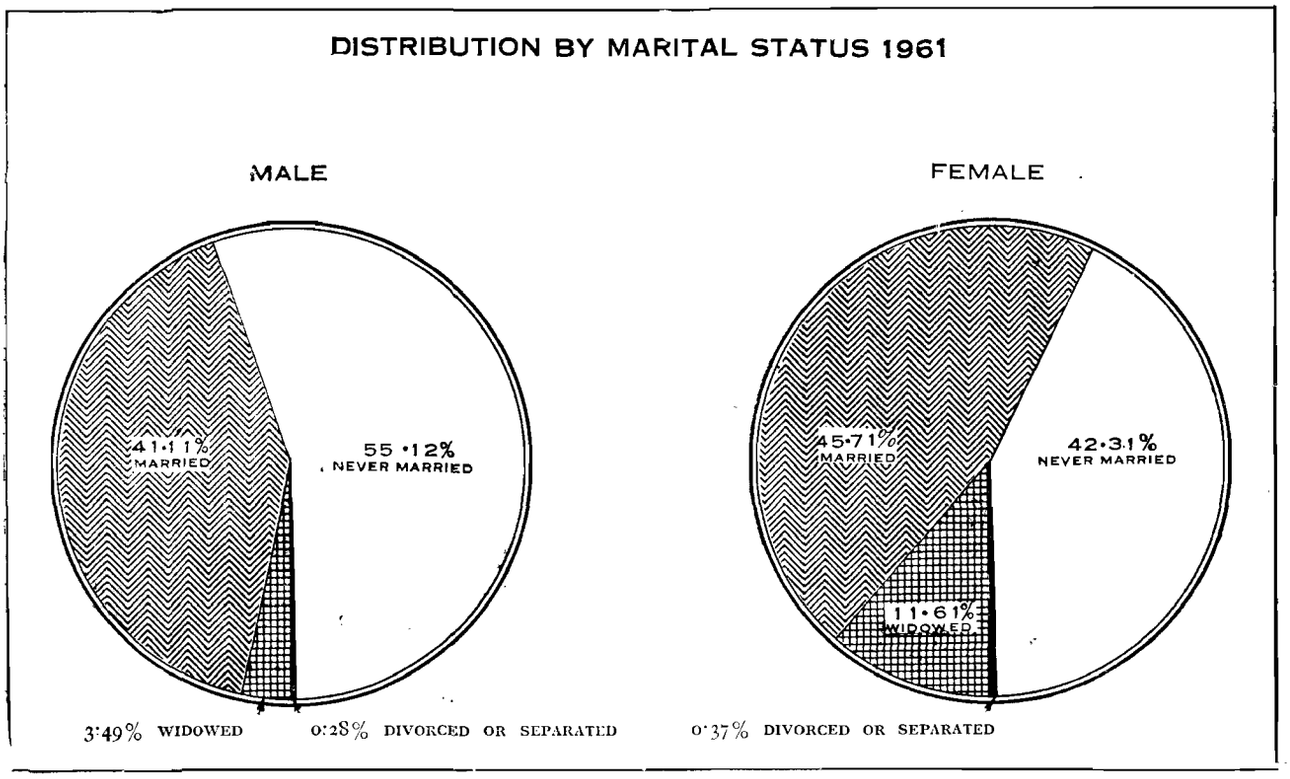

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951 :—

Year	Age-group	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14 ..	100	99·82	95·52	0·16	4·44	0·01	0·04	0·01	..
	15—34 ..	100	37·35	7·85	60·99	87·61	1·59	4·37	0·07	0·17
	35—54 ..	100	2·02	0·63	88·86	68·09	8·97	31·14	0·15	0·14
	55+ ..	100	1·05	0·36	74·31	21·86	24·55	77·75	0·09	0·03
	All ages ..	100	53·25	39·03	42·40	47·16	4·29	13·72	0·06	0·09
1961	0—14 ..	100	99·56	97·00	0·44	2·98	N	0·01	N	0·01
	15—34 ..	100	37·30	9·05	61·30	87·82	0·99	2·46	0·41	0·67
	35—54 ..	100	2·62	0·22	90·01	73·17	6·72	25·91	0·65	0·70
	55+ ..	100	0·97	0·19	75·22	25·26	23·38	74·31	0·43	0·24
	All ages ..	100	55·12	42·31	41·11	45·71	3·49	11·61	0·28	0·37

N=Negligible.

Figure below shows the distribution of the district population by marital status for males and females separately :—

During the decade 1951—61 the proportion of never married has increased for both sexes. The proportion of widowed showed a decrease. The proportion of divorced or separated showed an increase. Consequently the proportion of married decreased for both males and females. The proportion of married is higher in rural areas than urban areas. The proportion of widowed is almost the same in rural and urban areas. The proportion of never married is more in urban areas.

The rise in the age at marriage of the total population may be seen from the marital status distribution by age-groups shown on page (18).

Child Woman Ratio

The following are the child woman ratios for 1951 and 1961, *i.e.*, the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows to 1,000 married women of 15—44 years age-group is also shown for comparison.

	Number of children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	574	671	98
1961 District Total ..	703	812	67
Rural ..	712	811	66
Urban ..	614	826	79

The child woman ratio for rural areas is higher than that for urban areas. When standardised for married women of 15—44 years age-group it is slightly higher in urban areas. This may indicate either a higher fertility or a higher survival rate in urban areas of the district. Over the decade the child woman ratio has increased from 574 to 703 for all women of 15—44 age or from 671 to 812 for married women of 15—44 age. It means that in 1961 eight out of every ten married women in 15—44 age had on an average one child of less than five years age each. The increase in the number of children may be partly due to a higher birth rate and reduced infant mortality.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 98 in 1951 to 67 in 1961. There had been a significant decrease in the incidence of widowhood over a decade. In the district the number of widows per 1,000 married women in age-group 15—44 is 79 in urban areas and only 66 in rural areas. It indicates that remarriages of widows are more common in rural than urban areas.

Migration

The 1961 Census showed the proportions of population enumerated at places of birth and other places as shown below.

68·27 per cent of the population was enumerated at places of birth. This proportion for males is 80·30 per cent but for females it is only 56·89 per cent. The difference is due to women married at places other than their places of birth. This movement of females on marriage appears to be mostly within the district as the proportion of women born outside the district is only 6·47 per cent against 6·32 per cent for males.

Proportions of Population by Places of Birth

——	Total population	Place of enumeration	Elsewhere in the district	Outside the district but in Maharashtra	Outside Maharashtra
(1)	(2)	(3)	(4)	(5)	(6)
Persons	1,058,855	722,175	268,001	53,372	14,252
Males	514,534	412,847	68,803	23,597	8,879
Females	544,321	309,328	199,198	29,775	5,373
Percentage to total population—					
Persons	100·00	68·27	25·33	5·05	1·35
Males	100·00	80·30	13·33	4·59	1·73
Females	100·00	56·89	36·64	5·48	0·99

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows :—

Age-group	Sex Ratios		
	Total	Rural	Urban
All ages	1,058	1,072	943
0—4	1,004	1,007	976
5—9	997	1,000	970
10—14	898	896	905
15—19	1,173	1,207	946
20—24	1,375	1,430	1,003
25—29	1,210	1,238	986
30—34	1,112	1,139	904
35—39	1,027	1,040	918
40—44	1,081	1,102	913
45—49	994	1,009	871
50—54	979	991	881
55—59	918	932	799
60+	1,105	1,116	1,004

Rural sex ratio is almost always higher than urban sex ratio except in the age-group 10—14. These differences are more significant in adult age-groups among which the age-group 20—24 has the highest sex ratio. The same pattern can be observed for the total population. The rural sex ratio is very high in the age-group 20—24 compared to the corresponding ratio for urban areas. Age-groups 15—19 and 25—29 also have very high sex ratios in rural areas. The sex ratios for age-groups 20—24 and 25—29 are very high for urban, rural and total population. This is due to the movement of males in these age-groups outside the district in search of employment and/or for higher education. The balance in sex ratio is almost attained in the old age-groups partly due to the migrants returning home to their usual places of residence after retirement from jobs and services. The low sex ratio for the age-group 55—59 may also be partly the effect of misreporting of ages of women of that group in the higher age-group.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II (paragraphs 42 to 52).

The percentage of non-workers is lower in the population born outside the district. The percentage of workers in cultivation is higher for those born at the place of enumeration. The percentage of agricultural labourers is higher among the people born elsewhere in the district. Migrants from outside the district are engaged more in non-agricultural sectors. The differences in the percentage distribution of migrants and non-migrants are more significant in categories V, VI, VII, VIII and IX. The percentage of non-workers is higher among the people born at place of enumeration.

	Categories of Workers									Non-Workers
	I	II	III	IV	V	VI	VII	VIII	IX	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	31·11	5·09	3·88	1·39	1·94	0·55	2·09	1·52	5·49	46·94
Born at place of enumeration	34·64	4·88	3·62	1·11	1·19	0·27	1·20	1·17	3·29	48·63
Elsewhere in the district	21·73	8·14	5·52	2·26	2·66	0·70	3·31	1·87	13·33	40·48
Outside the district	6·30	1·24	3·82	3·14	9·86	3·89	10·90	5·11	16·82	38·92

Migration to Greater Bombay

A special study of Migrants in Greater Bombay undertaken in 1961 Census has revealed the following very interesting features regarding migrants from Kolaba district. The full report on that study is published in Part X (1-C) of the 1961 Maharashtra Census Report. There are (in 1961) 109,204 persons in Greater Bombay who are born in Kolaba district. Of these 68,948 or 63·14 per cent are males and 40,256 or 36·86 per cent are females. 53,618 or 77·77 per cent of the males are workers and the remaining 22·23 per cent are non-workers. Among the females only 5,057 or 12·56 per cent are workers and the remaining 87·44 per cent are non-workers. Bulk of migration is from rural areas. Twenty-five per cent of females are, however, from the urban areas of the district while the corresponding proportion for males is only 20 per cent.

A significant difference is observed between the pattern of migration to Greater Bombay from this district and other districts of Maharashtra. In case of other districts it is found that of late more females are going to Bombay with the result that sex ratio of migrants from those districts is gradually improving. In case of Kolaba district the sex ratio has remained peculiarly constant. For Kolaba migrants with stay of 15 years and more in Bombay, there are 562 females per 1,000 males. For migrants with stay of

10—14 years, the sex ratio is 616, for stay of 5—9 years it is 560 and for 1—4 years, stay it is 562. Only for migrants with less than one year's stay in Bombay the sex ratio is high (744). This may be due to seasonal migration and contiguity of the district to Greater Bombay.

Forty-six per cent of the total male workers from Kolaba are engaged in manufacturing industries; 9 per cent in trade and commerce; 12 per cent in transport, storage and communications and 28 per cent in other services. By occupational classification almost half the male workers from Kolaba are engaged as craftsmen or production process workers, 7,236 or 14 per cent as clerical and related workers, 2,495 or 5 per cent as sales workers, 1,675 or 3 per cent as workers in transport and communication occupations like drivers, conductors, etc., and 12,137 persons or 23 per cent in services, sports and recreation. This includes mostly personal or domestic services, etc.

By percentage of literacy and educational levels the distribution of workers among males and females from Kolaba district is as follows :—

	Males	Females
Illiterate	36	77
Literate without educational level ..	29	5
Primary or Junior Basic	24	7
Matriculation and above	11	11
Total ..	100	100

Kolaba migrants make 10 per cent of all migrants to greater Bombay from within Maharashtra State and 4 per cent out of all migrants to Greater Bombay. The current annual volume of migration for 1961 is 7,026 persons—3,960 males and 3,066 females. This annual migration makes 9 per cent of the current annual migration to Bombay from within Maharashtra State and 4 per cent of the current annual migration to Greater Bombay from all parts of India.

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member	7·64	7·27	11·46
2—3 members	25·04	25·17	23·75
4—6 members	43·78	44·25	39·02
7—9 members	17·63	17·54	18·48
10 members and more ..	5·91	5·77	7·29
All sizes	100·00	100·00	100·00

Among the different size groups, households with 4 to 6 members are more common (43·78 per cent) than others. The percentage distribution of the rural and urban households by their size shows that single and small-size (2—3 members) households are more (35·21 per cent) in urban areas than in rural areas (32·44 per cent).

The average size of the household is 4·95 persons for the district. It is 4·94 for rural areas and 4·97 for urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is shown below:—

	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	34·19	7·11	34·25	7·17	33·53	6·53
(2) Spouses of heads of households..	0·17	27·39	0·18	27·46	0·14	26·65
(3) Married sons	6·76	..	7·05	..	3·95	..
(4) Other married relations	3·74	14·94	3·78	15·41	3·42	9·92
(5) Never married, widowed or divorced relations..	52·66	50·28	52·41	49·70	55·03	56·39
(6) Unrelated persons	2·48	0·28	2·33	0·26	3·93	0·51
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

34·19 per cent of the males are the heads of households as against 7·11 per cent for females. Married sons are 6·76 per cent of the total males. 52·66 per cent males and 50·28 per cent females which incidentally form the largest group, are never married, widowed or divorced relations. Proportion of unrelated persons is 2·48 for males and only 0·28 for females. Nearly 27 per cent of the females are spouses of heads of households. High proportion of females in other married relations includes the daughters-in-law and daughters or sisters of the heads. The heads of households and their spouses have a higher proportion in rural areas. The proportion of married sons is less in urban areas. It may indicate that the joint family is being replaced by the biological family more in urban areas. Unrelated persons have a higher proportion in urban areas. Domestic servants are included in this category and they appear to be staying with the households more in urban than in rural areas.

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for the total population, population in school-going ages 6--11 years and the labour force (age-group 15—59) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown below :—

		Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual	1951	909	*152	*504
Actual	1961	1,059	180	554
Projected	1966	1,182	185	611
Projected	1971	1,313	208	682
Projected	1976	1,470	223	773
Projected	1981	1,660	238	887

*Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V at page 205 in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows :—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Banjari ..	0·05	0·05	0·01	97·38	2·62
(2) Gujarati ..	0·82	0·44	4·22	48·03	51·97
(3) Hindi ..	0·56	0·31	2·79	49·44	50·56
(4) Kachchhi ..	0·05	0·01	0·47	10·22	89·78
(5) Kannada ..	0·10	0·05	0·48	50·24	49·76
(6) Marathi ..	92·61	94·16	78·75	91·43	8·57
(7) Portuguese ..	0·05	0·05	N	99·42	0·58
(8) Telugu ..	0·28	0·26	0·54	80·94	19·06
(9) Urdu ..	5·28	4·59	11·52	78·04	21·96
(10) Others ..	0·20	0·08	1·22	38·17	61·83
All languages ..	100·00	100·00	100·00	89·92	10·08

N=Negligible.

Marathi is the principal language and is the mother-tongue of 92·61 per cent of the population. In rural areas Marathi speakers account for 94·16 per cent of the population. They make only 78·75 per cent of the population in urban areas. Urdu has the second largest number of speakers. It makes 5·28 per cent of the total population in the district. It is spoken more in urban areas where its speakers make as much as 11·52 per cent against 4·59 per cent for rural areas. Gujarati and Hindi are the other important languages in urban areas. Marathi, Portuguese, Banjari, and to a certain extent Telugu and Urdu language groups are mostly in rural areas whereas the Kachchhi speakers are the most urbanised. Gujarati, Hindi and Kannada groups are nearly equally distributed in rural and urban areas.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Banjari	..	..	0·05
(2) Gujarati	0·59	0·80	0·82
(3) Hindi	1·39	0·40	0·56
(4) Kachchhi	..	0·05	0·05
(5) Kannada	0·01	0·12	0·10
(6) Marathi	97·70	93·17	92·61
(7) Portuguese	..	0·05	0·05
(8) Telugu	0·05	0·15	0·28
(9) Urdu	..	4·96	5·28
(10) Others	0·26	0·30	0·20
All languages	100·00	100·00	100·00

The proportion of Marathi speakers decreased from 97·70 per cent in 1901 to 93·17 per cent in 1951 and to 92·61 per cent in 1961.

This fall in its proportion may be due to (i) out-migration of Marathi speakers from the district, (ii) in-migration of non-Marathi speakers in the growing industries, and (iii) many Muslims, who might have returned Marathi as mother-tongue in 1901 and 1951, returning Urdu in 1961.

Urdu was combined with Hindi in 1901. Its proportion has increased from 4·96 per cent in 1951 to 5·28 per cent in 1961. Other languages, though of no less importance, had been reported by a small fraction of the population. The percentage proportions of Gujarati and Hindi have increased slightly. Banjari is shown as a separate language only in 1961.

RELIGIONS

Table C-VII at pages 206-07 in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is as follows :—

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	4·36	4·70	1·25	97·11	2·89
(2) Christians ..	0·14	0·12	0·39	72·92	27·08
(3) Hindus ..	88·96	89·59	83·29	90·57	9·43
(4) Jains ..	0·35	0·19	1·75	49·96	50·04
(5) Muslims ..	5·95	5·19	12·75	78·41	21·59
(6) Others ..	0·24	0·21	0·57	75·71	24·29
All religions ..	100·00	100·00	100·00	89·92	10·08

88·96 per cent of the population of the district reported their religion as Hindu. Muslims and Buddhists account for 5·95 and 4·36 per cent of the population, respectively. The percentage of Buddhists is higher in rural than in urban areas. In contrast, the percentage of Muslims is higher in urban (12·75 per cent) than in rural areas (5·19 per cent). Christians and Jains have higher proportions in urban areas. Considering the distribution of religious groups in rural and urban areas, a striking difference can be observed among them in their degree of urbanisation. Jains are the most urbanised group. Christians and Muslims follow in that order. Buddhists are mostly in rural areas, so also are Hindus.

The comparative position of the religions in 1901 and 1961 is as follows :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists	..	4·36
(2) Christians	0·21	0·14
(3) Hindus	94·23	88·96
(4) Jains	0·28	0·35
(5) Muslims	4·85	5·95
(6) Others	0·43	0·24
All religions	100·00	100·00

Proportion of Hindus decreased from 94·23 per cent in 1901 to 88·96 per cent in 1961. In the same period the percentage of Buddhists increased to 4·36. Decrease in the percentage of Hindus is mostly accounted by the rise in the percentage of Buddhists. The increase in the Buddhist group is due to the conversion of a large number of erstwhile Hindu Scheduled Castes to Buddhism. This can further be seen from a corresponding decrease in the percentage of Scheduled Castes. Percentage proportion of Christians has also gone down in the last sixty years. The percentage proportions of Muslims and Jains have increased.

Sex ratio for each religion is as follows :—

Buddhists 1,105, Christians 803, Hindus 1,053, Jains 790, Muslims 1,131, All religions 1,058.

Higher sex ratio for Buddhists indicates that more of their males are going out of the district for work. Sex ratio is the highest among the Muslims. It confirms the general impression that many Muslims from Kolaba district migrate to Bombay and to far off lands in Africa.

SCHEDULED CASTES

Table SCT-I-Part A at pages 210-11 in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste for the district and each taluka separately. Actually 24 castes are notified as Scheduled Castes in the district but only 11 are reported in the 1961 Census.

The distribution of the Scheduled Caste population by rural and urban areas is as follows :—

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Castes	7,177	6,710	1·31	82·61	17·39
(1) Ager	16	2	N	72·22	27·78
(2) Bhangi	312	197	0·05	17·49	82·51
(3) Chalvadi	1	2	N	100·00	..
(4) Chambhar	4,100	4,057	0·77	81·89	18·11
(5) Dhor	13	9	N	18·18	81·82
(6) Holar	4	4	N	100·00	..
(7) Lingader	1	..	N	100·00	..
(8) Mahar	2,561	2,281	0·46	92·28	7·72
(9) Mang	169	156	0·03	63·38	36·62
(10) Mang Garudi					
(11) Mukri	..	2	N	..	100·00

*Inclusive of persons from the Scheduled Castes who have not reported their individual castes. N=Negligible.

The remaining 13 Scheduled Castes for which no one was returned in the district in 1961 are as follows :—

(1) Baked, (2) Chenna Dasar, (3) Garoda, (4) Halleer, (5) Halsar, (6) Holaya, (7) Mahyavanshi, (8) Meghval, (9) Nadia, (10) Pasi, (11) Shenva, (12) Tirgar, and (13) Turi.

Out of the 11 Scheduled Castes reported in the district, the largest number is of Chambhars. The second largest group is of Mahars. Bhangis are 509 and Mangs (including Mang Garudi) 325. The remaining Scheduled Castes have very small population and together make a total of 54 persons only.

The comparative position of the Scheduled Castes population in 1951 and 1961 within the district is as follows :—

	Percentage to total population in		
	Total area	Rural areas	Urban areas
All Scheduled Castes—			
1951	6·19	6·53	3·33
1961	1·31	1·20	2·26

The reduction of the proportion from 6·19 per cen in 1951 to 1·31 per cent in 1961 is due to a large number of persons from Mahar caste returning their religion in 1961 Census as Buddhist or Nav-Bauddha. Because of the change of religion they are not enumerated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. The total population of the Scheduled Castes and Nav-Bauddhas is 6 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (i) and B (i) at page 218 in Part II show the literacy and educational levels for each Scheduled Caste.

The percentages of literacy for the district population, for all Scheduled Castes and the five numerically important Scheduled Castes for rural and urban areas are as shown below.

Both males and females of the Scheduled Castes are not much behind in literacy than the general population. The Scheduled Castes appear to be taking full advantage of the educational facilities and concessions available in the district.

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	21·59	33·35	10·62	51·08	61·62	39·90
All Scheduled Castes	18·70	30·31	6·56	31·76	45·81	14·99
(1) Bhangi	37·08	44·62	16·67	31·19	44·53	12·14
(2) Chambhar	18·41	29·30	7·63	29·38	44·85	12·27
(3) Mahar	18·76	31·49	4·63	44·39	54·03	31·90
(4) Mang .. .. (5) Mang Garudi	18·45	28·85	7·84	20·17	33·85	3·70

Economic Activity

The industrial classification of persons at work and non-workers for the district average for all Scheduled Castes and for the five numerically important Scheduled Castes is as follows :—

Name of Scheduled Caste	Percentage of workers in categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District Average ..	31·13	5·10	10·60	53·17
All Scheduled Castes	22·91	9·56	16·33	51·20
(1) Bhangi ..	..	..	44·20	55·80
(2) Chambhar ..	27·27	5·16	14·17	53·40
(3) Mahar ..	19·75	18·36	14·64	47·25
(4) Mang .. (5) Mang Garudi	0·31	3·38	49·23	47·08

The proportions of workers and non-workers for the Scheduled Castes are more or less the same as for the total population of the district. The proportion of workers in cultivation is lower and that of agricultural labourers higher than the district average. This is due to the association of a few Scheduled Castes with certain services as well as to a fewer persons owning land amongst them.

Size of Land Cultivated

Tables C-I and SCT-V-Part A at pages 200 and 219 in Part II show broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Castes in rural areas, respectively. The proportions are as follows :—

Size of land cultivated	District rural population		All Scheduled Castes	
	No. of sample households	Percentage	No. of sample households	Percentage
All sizes ..	28,069	100·00	388	100·00
Less than 5 acres ..	23,884	85·09	350	90·21
5 to 9·9 acres ..	3,208	11·43	35	9·02
10 to 29·9 acres ..	912	3·25	3	0·77
30 acres and over	65	0·23	..	..

Out of a sample of 28,069 cultivating households, 388 or about 1·38 per cent households are from the Scheduled Castes in rural areas against their population which is 1·20 per cent of the rural population of the district. 90·21 per cent of the cultivating households of the Scheduled Castes are cultivating less than five acres of land against the corresponding average of 85·09 per cent for the district.

Percentage of households cultivating land over five acres among Scheduled Castes is 9·79 per cent only against the corresponding average of 14·91 per cent for the district. The proportion of cultivating households is thus smaller in the case of Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I-Part B at pages 214-15 in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Thirteen Scheduled Tribes are reported in the district in 1961 Census. Their population is 95,354 which is 9·01 per cent of the total population.

The distribution of the Scheduled Tribes population by rural and urban areas is as follows :—

Name of Scheduled Tribe	Population		Percentage to total population of the district	Percentage of each Scheduled Tribe population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Tribes	49,195	46,159	9·01	98·17	1·83
(1) Bhil	3	..	N	66·67	33·33
(2) Dhodia	18	..	N	100·00	..
(3) Dubla	538	34	0·05	100·00	..
(4) Gamit	2	2	N	100·00	..
(5) Kathodi	30,259	29,964	5·69	99·09	0·91
(6) Koli Dhor	2	4	N	100·00	..
(7) Koli Mahadev	2,222	2,197	0·42	90·84	9·16
(8) Naikda	46	6	0·01	100·00	..
(9) Pardhi	52	41	0·01	39·78	60·22
(10) Patelia	18	..	N	100·00	..
(11) Rathawa	1	1	N	100·00	..
(12) Thakur	15,719	13,813	2·79	97·52	2·48
(13) Varli	275	38	0·03	99·68	0·32

*Inclusive of persons from the Scheduled Tribes who have not reported their individual tribe. N=Negligible.

The remaining eight Scheduled Tribes for which no one was returned in the district in 1961 are as follows :—

(1) Barda, (2) Bavacha, (3) Chodhara, (4) Dhanka, (5) Gond, (6) Kokna, (7) Pomla, and (8) Vitolia.

Kathodi with 60,223 persons is the largest Scheduled Tribe in the district. Thakur with 29,532 is the next group and Koli Mahadev with 4,419 is the third largest. Dublas and Varlis are 572 and 313, respectively. The remaining eight Scheduled Tribes have very small populations and together have 196 persons only.

Kathodis are reported from all parts of the district. Thakurs are from Karjat, Pen, Khalapur and Panvel talukas and Sudhagad mahal and Koli Mahadev from Karjat, Alibag, Mahad and Khalapur talukas and Sudhagad mahal.

The Scheduled Tribes population in the district has increased from 92,584 in 1951 to 95,354 in 1961.

The reduction of the proportion of the Scheduled Tribe population to the total population of the district from 10·18 in 1951 to 9·01 in 1961 indicates that the rate of growth of the Scheduled Tribes population in the district is lower than that of the general population. The small drop in the proportion may also be partly due to their out-migration to Greater Bombay or nearby urban centres.

Literacy and Education

The Scheduled Tribes as a group are much behind in literacy than the general population and even than the Scheduled Castes. "Koli Mahadev", however, appears to be the most advanced group among them, while "Dubla" and "Varli" are the most depressed groups.

Economic Activity

The proportion of workers for the Scheduled Tribes is more than that for the total population of the district. The proportion of workers in cultivation is lower and that of agricultural labourers and all other activities higher than the district average. This is due to a fewer persons among the Scheduled Tribes owning land and association of a few of them with certain services.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of the Standing Committee which is the most powerful Committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the Subject Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(i) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, Nomadic and Semi-nomadic Tribes, Vimukta Jatis and the other Backward Classes. The concessions are awarded in the Primary Schools, High Schools or Technical Schools. 2,521 students benefited from and Rs. 37,864 were spent on these schemes during the year 1962-63. Rs. 32,929 were spent on 6 backward class hostels in the district in 1962-63. 174 students were admitted in these hostels. In addition Rs. 25,821 were spent on building grants to two (new) and five (old) backward class hostels.

(ii) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for cottage industries and professions. Rs. 22,254 were spent on more than 126 beneficiaries. Assistance for purchase of milch cattle to the Scheduled Castes and other backward classes was given to the extent of Rs. 18,350 to 82 beneficiaries. Rs. 19,425 were also given for purchase of agricultural implements during the year 1962-63. This includes expenditure of Rs. 4,000 for purchase of 2 oil pumps to be used in underdeveloped rural areas.

(iii) *Housing.*—A number of housing societies of backward classes have been formed in the district. These societies construct houses for their members. Financial assistance in the form of loans and subsidies is given to those societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other backward classes is also provided. An amount of Rs. 1,41,390 was spent under this scheme, Rs. 23,015 were given to 112 beneficiaries while Rs. 89,375 were incurred on 131 houses during 1962-63.

(iv) *Drinking Water Wells.*—An amount of Rs. 51,819 was spent under this scheme. Rs. 1,500 were spent for repairs of 2 wells in or near Scheduled Castes localities for two beneficiaries while Rs. 8,750 were incurred for drinking water wells for 15 beneficiaries from Scheduled Castes.

(v) *Medical aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to the Backward Classes. Out of Rs. 2,130 spent under this scheme, Rs.600 were spent on persons belonging to Scheduled Castes during the year 1962-63.

(vi) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film shows and gatherings are addressed at fairs and other places. Kirtan programmes and Melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in Caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability. Rs. 13,130 were spent under the schemes during the year 1962-63.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan schemes. The expenditure described above against each scheme is out of the committed schemes. There are in addition some more schemes sponsored by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes".

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Castes converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

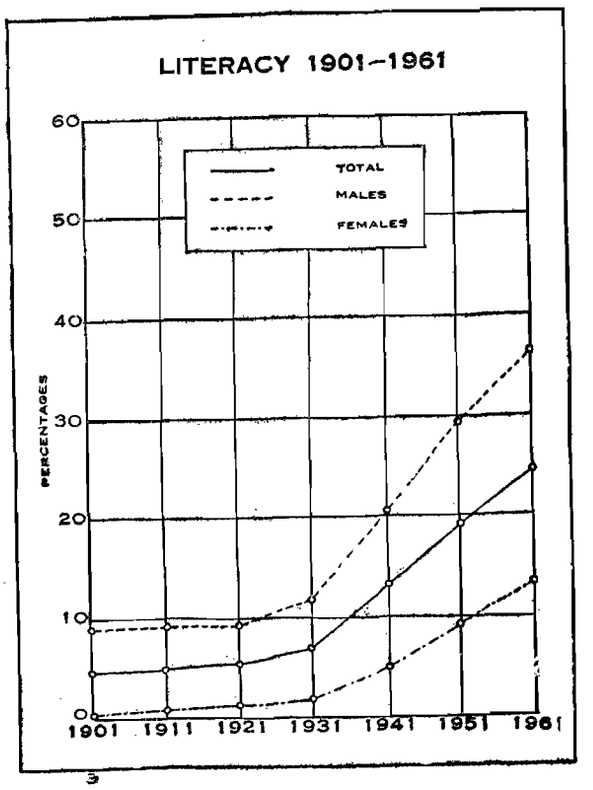

Literacy rates both for males and females have steadily improved during the last 30 years. The number of primary schools have increased from 850 in 1951 to 1,408 in 1962. Today there is not a single village with a population of 200 or more which does not have schooling facility.

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is as follows :—

	Total	Males	Females
1901	4·68	9·05	0·27
1911	4·90	9·23	0·64
1921	5·28	9·30	1·31
1931	6·75	11·73	1·76
1941	13·19	21·57	4·95
1951	19·20	29·40	9·40
1961	24·56	36·37	13·40

Figure to the right shows the growth of literacy in the district for total population, males and females, separately.

The general literacy has increased four times during the last 30 years, three times for males and eight times for females. It might be due to literacy campaigns undertaken in the country as a part of freedom struggle and also due to measures introduced by the first popular Ministry of 1937 to spread education. A scheme of compulsory primary education introduced by the State Government in 1948 seems to have helped substantially to raise the literacy rates since 1951.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately :—

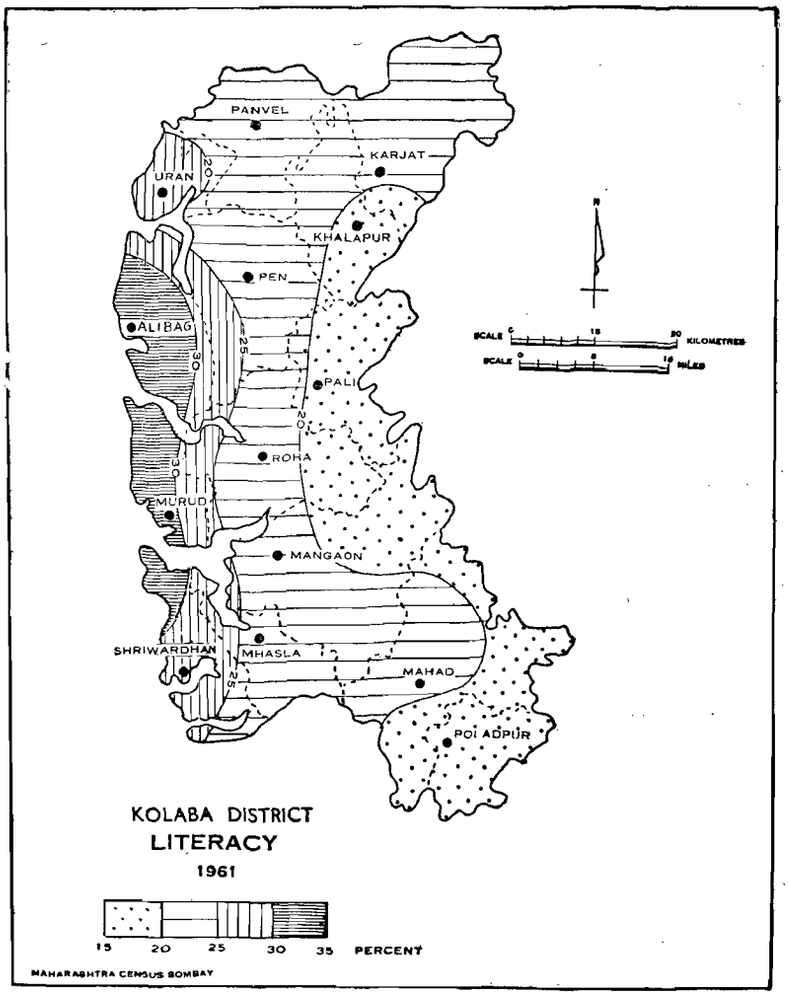

State / District / Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
KOLABA DISTRICT..	24·56	36·37	13·40	21·59	33·35	10·62	51·08	61·62	39·90
1 Karjat Taluka	24·57	34·75	13·59	19·67	29·73	8·97	51·14	60·76	39·89
2 Panvel Taluka	24·84	36·23	13·10	18·92	30·43	7·23	56·56	66·06	46·04
3 Uran Mahal	29·13	44·19	13·52	25·54	41·64	9·08	45·35	55·33	34·37
4 Khalapur Taluka	20·54	30·74	9·70	20·54	30·74	9·70	..	..	..
5 Alibag Taluka	33·90	49·22	19·70	31·54	47·28	17·21	49·69	61·42	37·50
6 Pen Taluka	23·84	37·41	10·53	19·44	33·19	6·13	57·78	68·12	46·52
7 Sudhagad Mahal	18·40	27·76	8·94	18·40	27·76	8·94	..	..	..
8 Roha Taluka	21·24	31·54	11·13	18·06	28·23	8·14	51·62	61·98	40·77
9 Murud Mahal	31·43	42·12	21·60	25·37	35·70	16·00	52·15	63·41	41·33
10 Mangaon Taluka	20·74	31·05	11·62	20·74	31·05	11·62	..	..	..
11 Shriwardhan Mahal	28·52	40·92	18·76	25·58	38·08	16·14	41·17	51·83	31·20
12 Mhasala Mahal	22·88	34·37	14·23	22·88	34·37	14·23	..	..	..
13 Mahad Taluka	22·63	34·69	11·95	19·58	31·42	9·29	51·52	62·66	39·73
14 Poladpur Mahal	13·95	23·85	5·45	13·95	23·85	5·45	..	..	..

Figure to the right shows the spread of literacy in the district by isopleths.

The most literate area in the district is located in the narrow strip in the western zone roundabout Alibag and Murud. The literacy rate drops down beyond this region as we go towards the east.

The eastern portion of the district from Khalapur in the north to Poladpur to the south has the lowest literacy rate.

Within the district, Alibag taluka has the highest literacy for total and males. Murud taluka has the highest literacy for females. In rural areas also Alibag taluka has the highest literacy rates for total, males and females. For urban areas, Pen taluka has the highest literacy rates for total, males and females.

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are as shown below. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

High literacy rates for males and females in 5—14 and 15—34 years age-groups suggest the spread of primary and secondary education during the last two decades and the success of the scheme for compulsory education.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	24·56	36·37	13·40	21·59	33·35	10·62	51·08	61·62	39·90
0—4	..	..	..	..	..	..	..	..	..
5—14	32·52	41·87	22·73	29·79	39·67	19·46	56·29	60·81	51·47
15—34	33·14	51·97	17·67	28·89	48·06	13·59	68·26	80·14	55·91
35—59	22·24	36·75	7·85	18·89	32·69	5·42	51·92	70·35	31·11
60+	17·81	33·00	4·06	15·43	29·40	2·90	40·55	65·55	15·66

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as shown in the next column.

	Total	Basic			Non-Basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV Multi-teacher	Middle I-VII
Total No. of schools.	1,408	323	79	174	577	100	155
State Government.	2	2	..	..	..	..	..
Zilla Parishad	1,296	320	77	174	476	96	153
Private ..	110	1	2	..	101	4	2

There has been an impressive growth in the number of primary schools in the district during the last ten years. There were 850 primary schools in 1951. The number rose to 1,178 in 1956 and to 1,350 in 1961. On 31st March 1962, it stood at 1,408. Out of the 1,408 primary schools, 1,296 or more than 92 per cent are managed by Zilla Parishad and only 7·81 per cent are managed by private institutions. The State Government's share in the expenditure on primary education in 1961-62 was about 87 per cent of the total expenditure. The expenditure on primary education is incurred by the State Government through grants-in-aid to the Zilla Parishads and building loans and grants to primary teachers' training colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes and Scheduled Tribes similarly get free education and scholarships are given to them at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools is also making rapid progress in this district. At the end of the First Five-Year Plan, there were 108 basic schools. This number rose to 224 by the end of Second Plan. On 31st March 1962, it stood at 576.

By 31st March 1962, 12 towns and 1,110 villages in the district had primary schools and 553 villages had schooling facilities, *i.e.*, primary schools situated within a mile from the village. 115 villages did not have even schooling facilities. Total number of primary teachers was 3,647 and 1,797 or 49·3 per cent of whom were trained.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(*As on 31st March 1962*)

	Kolaba District	Maharashtra
Average population served by a primary school	762	1,135
Average area served by a primary school (sq. miles)	1·9	3·4
Pupils per teacher	39	38
Pupils per primary school	100	127
Average annual salary per primary teacher (Rs.)	1,059	1,250
Average annual expenditure per school (Rs.)	2,962	4,903
Average number of teachers per school ..	2·6	3·3
Percentage of trained teachers	49·3	64·8

The scheme of compulsory primary education was introduced in 1948-49. In the beginning 113 villages with a population of 1,000 or above were covere under the scheme. In 1954-55 the benefit of the scheme was extended to groups of villages with a total population of 1,000 and above. In the Second Five-Year Plan period, compulsory education at the primary stage was extended to all places with population of less than 1,000 progressively to children of age-groups of 7—8, 7—9, 7—10 and 7—11 so that during the period of Second Plan the age-group 7—11 was brought under compulsion. Now the scheme has been applied to the age-group 7—11 and in all villages having population of 200 or above.

One of the Third Plan schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11. A provision of Rs. 13·05 lakhs has been made for primary education in the Third Plan in the district. During the Plan period, 205 class-rooms would be built and additional 120 teachers would be appointed in the primary schools. The number of students is expected to rise by 6,000.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of High Schools with number of students for each of them may be seen in Table 16.

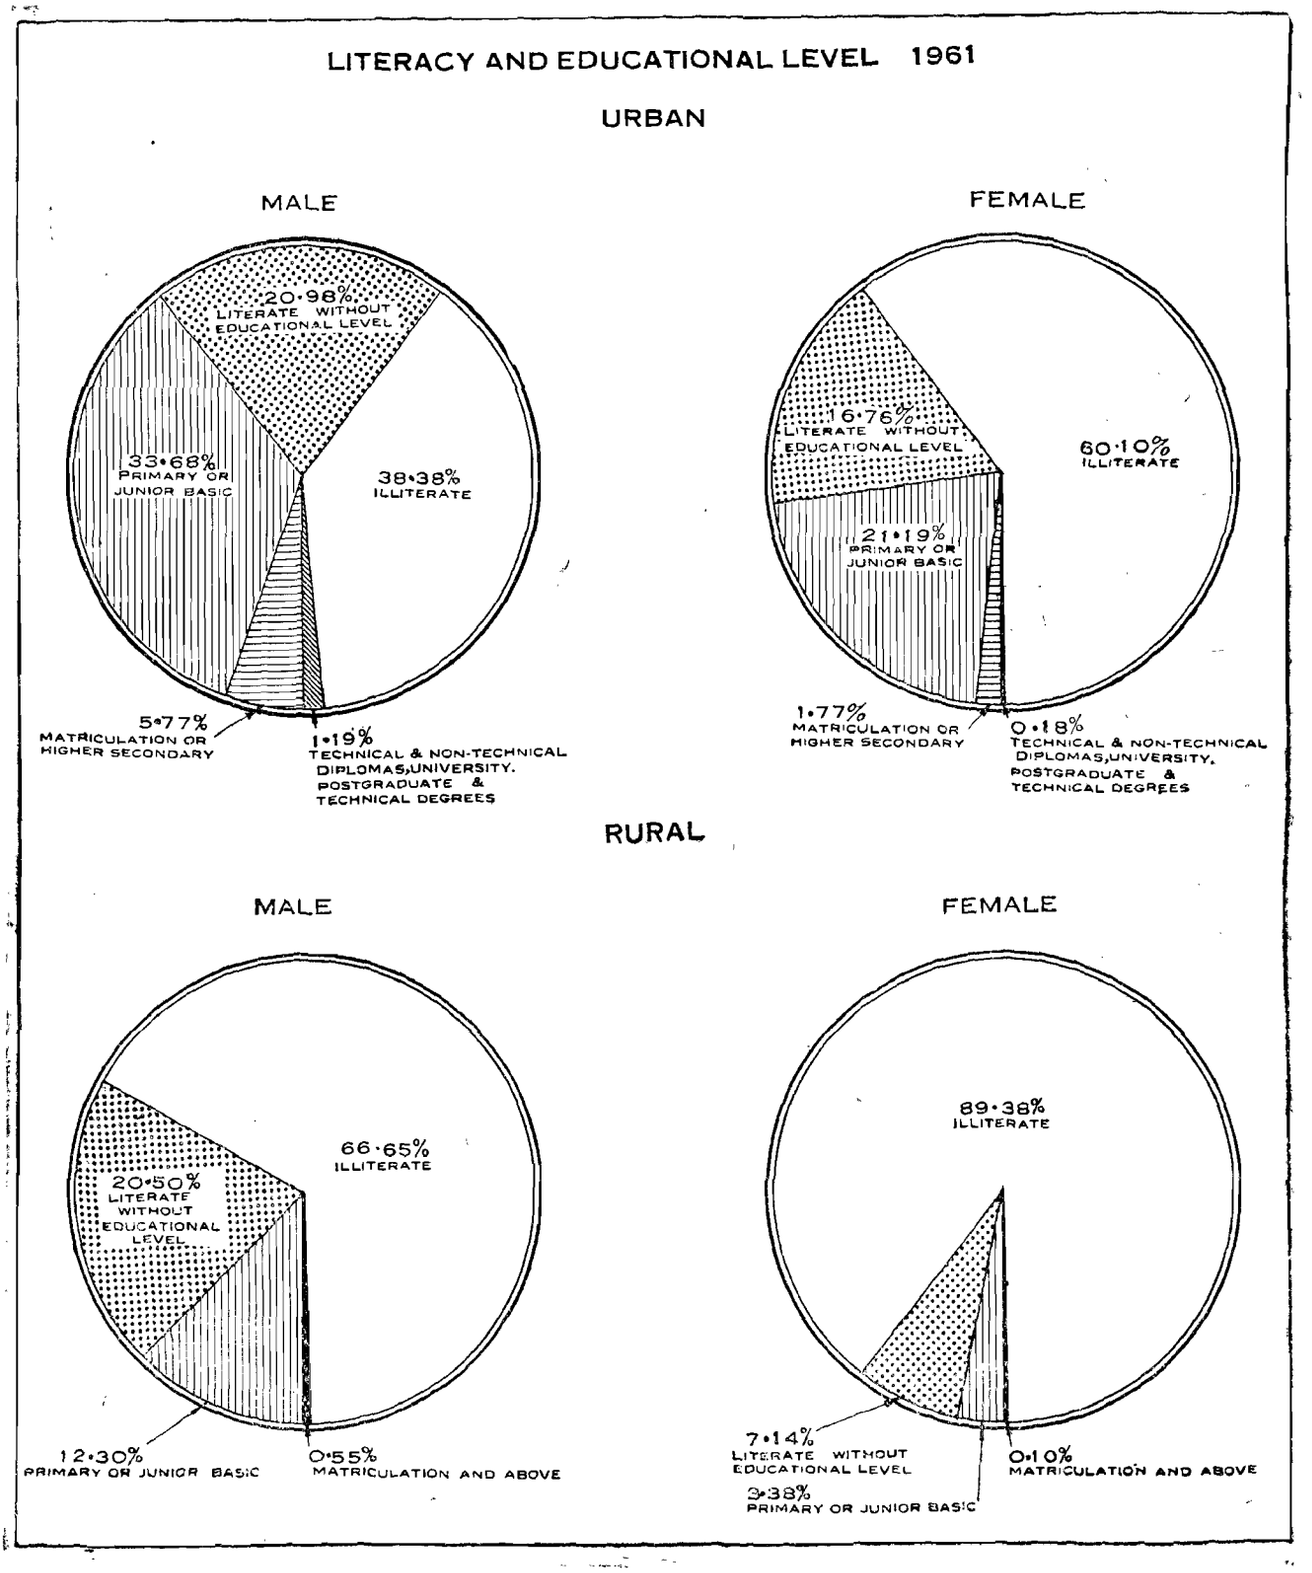

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools	
			Multi-purpose	Ordinary
Private	42	1	5	36

Total number of students on roll in the secondary schools as on 31st March 1962 was 11,770. Out of them 8,673 were boys and 3,097 girls. Total number of teachers was 475. Out of them 290 were trained teachers. Percentage of trained teachers was thus 61·0. Other indices of secondary education compared to the State average are as follows :—

	Kolaba District	Maharashtra
Population served by each high school ..	25,530	13,805
Area served by each school (sq. miles) ..	64·6	40·8
Pupil-teacher ratio	25	25
Pupils per secondary school	280	338
Average annual salary per teacher .. (Rs.)	1,806	1,870
Average annual expenditure (direct) per secondary school .. .. (Rs.)	31,838	39,543
Average number of teachers per secondary school.	11·3	13·7

Figure below shows the proportions for literates and different educational levels among males and females for rural and urban areas separately. The progress of secondary education in the district is quite steady. The number of secondary schools increased from 17 in 1950-51 to 27 in 1955-56 and to 37 in 1960-61. This figure stood at 42 on 31st March 1962.

The secondary schools are dispersed throughout the district. Sudhagad and Poladpur mahals, however, have only one secondary school each. Only Mhasala mahal had no secondary school till 1961. Alibag taluka has as many as eight secondary schools.

Private institutions alone manage all the secondary schools in the district. The Government share in the total expenditure on secondary education in 1961-62 is, however, 67·2 per cent and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in the primary schools, the number of pupils in the secondary schools may rise to 17,500 by 1965-66 and to 20,000 by 1970-71.

S. S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October and Alibag, Mahad, Roha and Panvel are the examination centres in the district. The number of candidates who appeared and passed from these centres during the year 1962 are as follows :—

	Appeared	Passed
Examination held in—		
March 1962	1,523	737
October 1962	424	142
Total ..		879

Higher Education

There was no facility for college education in the district till 1960. However two colleges have been established at Alibag and Mahad in 1961. They provide education in Arts, Science and Commerce. Both the colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government.

Technical Education

There are six schools in the district which provide facilities for technical education along with secondary education. They are : (1) Government Technical High School, Mahad ; (2) Industrial wing attached to V. K. High School, Panvel ; (3) Topiwalla Industrial High School, Alibag ; (4) Marine College and Seamen's Orphanage, Nhave, Panvel ; (5) Pen Industrial School, Pen and (6) Commerce Centre attached to the Industrial High School, Alibag. About 400 students are taking education in these schools.

Libraries

There are 19 libraries in this district, recognised by the State Government as standing on 31st March 1964. The district library gets a Government grant subject to a maximum of Rs. 6,000. Fourteen taluka libraries and four town libraries get a grant subject to a maximum of Rs. 1,000 each.

Printing Presses, Journals and Newspapers

There are 21 printing presses in the district. The number of periodicals and journals published in the district is 7, out of which four are weeklies, two monthlies and one annual journal.

Cinema Theatres

There are five permanent and five quasi-permanent cinema theatres and six touring talkies in the district (as on 21st December 1963).

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A subject committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health activities in the district.

Three towns and five villages have piped water-supply. Out of the remaining towns and villages one town and 134 villages draw drinking water from rivers, 13 villages from nallahs, 39 villages from tanks, 7 villages from springs and 2 towns and 899 villages from wells. Six towns and 681 villages draw drinking water from more than one of these sources. The water-supply is not adequate in summer in the case of 3 towns and 571 villages.

Malaria Control

The malaria eradication campaign was started in the district under the National Malaria Eradication Programme in 1953-54. Under the control phase, each house was sprayed twice in a year by DDT in the limited area where the percentage of malaria cases was high. But when the control phase passed into eradication phase each house of the district was sprayed twice in a year. The population protected under the Malaria Eradication Programme is cent per cent. Malaria surveillance programme was introduced during the year 1960-61. Under this phase the epidemic will be brought under control by distribution of anti-malaria drugs.

Anti-T. B. Campaign

B. C. G. Vaccination campaign was started in 1954. 82,314 persons were examined and 28,951 persons were vaccinated in the district till the end of 1960.

Leprosy Control

There are two leprosy hospitals at Pui in Roha taluka and Poladpur. In addition, a leprosy centre at Pen, sub-centres at Jite, Warsai, Kasu and Survey, Education and Treatment Units at Mahad, Roha, Alibag and Shriwardhan are functioning. In the leprosy hospital at Pui, occupational therapies were also started for the benefit of patients. The leprosy hospitals at Pui and Poladpur have 200 and 180 beds, respectively. In 1960, these hospitals treated 1,707 and 1,133 patients, respectively.

Family Planning Centres

There are six Family Planning Centres at Karjat, Khopoli, Nagothana, Mangaon, Nere (Panvel) and Alibag in the district. 161 vasectomy operations were performed by these centres during 1962.

Control of Smallpox

There were 211 deaths due to smallpox in 1958. This number came down to 84 in 1960. The number of vaccinations was 9,867 in 1961. The number of re-vaccinations increased from 61,991 in 1951 to 109,108 in 1956 and to 136,952 in 1961.

Medical Facilities

Medical facilities available in the district are shown in Table 17 of Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The number of private practitioners, hospitals and dispensaries are not shown there.

The number of doctors and nurses was 24 and 36, respectively, in 1960. The number of beds available decreased from 527 in 1956 to 502 in 1960.

The number of indoor and outdoor patients treated have increased between 1956—60. The number of indoor patients increased from 3,750 in 1956 to 4,663 in 1960. Similarly, the number of outdoor patients increased from 201,365 in 1956 to 226,093 in 1960.

Hospitals

There are five hospitals in the district. They are situated at Alibag, Murud, Karjat, Roha and Poladpur. Of these the Civil Hospital now called the General Hospital is at Alibag the Leprosy Hospital is at Pui in Roha taluka and Fatima Begum Hospital is at Murud-Janjira. These three hospitals are run by Government. There is also a Government Cottage Hospital at Mangaon. Leprosy Hospital at Poladpur is run by a private body.

Dispensaries

In 1960, there were 20 dispensaries in the district. Two of them are run by Government, 8 by municipalities and 10 by the District Local Board (now Zilla Parishad).

Primary Health Centres

At the end of 1960, there were 8 maternity homes and 18 primary health centres functioning in different parts of the district.

There were 27 subsidised medical practitioners working in rural areas of the district in 1960. In these centres 79,715 patients were treated during that year.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 773.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classifications by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 23 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

66·2 per cent of all the houses are used as dwellings, 23·0 per cent as cattle sheds, etc., 4·8 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 61·9 in 1951 to 75·5 in 1961. The number of persons per residential house has, however, decreased from 5·41 in 1951 to 5·17 in 1961. This may indicate an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by "owned" and "rented" categories, 88 per cent of the dwellings in the district are owned and only 12 per cent are rented. The proportion of "owned" in the rural areas is slightly higher (92 per cent) and very much lower (48 per cent) in the urban areas. Even this low proportion of 48 per cent for the urban areas in the district is somewhat higher than the average of 30 per cent for all urban areas of Maharashtra.

Out of the various materials used for walls, grass, leaves, reeds or bamboo appear to be predominant in the district with a proportion of 42·7 per cent. The proportions in Alibag taluka and Murud, Shriwardhan, Mhasala and Poladpur mahals are much lower, as the differences are made up by unburnt or burnt bricks. Unburnt bricks are predominantly used in the western (coastal) and the southern parts of the district while in the eastern and the northern parts, which are hilly and mostly occupied by tribal population, grass,leaves, reeds or bamboo are predominantly used. Stone is not used much in the district except in Mhasala and Poladpur mahals where it is used along with unburnt bricks. Burnt bricks are more common in urban areas than in the rural. Its proportion in the urban areas is 70·9 per cent against 19·9 per cent in the rural. Unburnt bricks appear to be predominant in the rural areas with a proportion of 26·9 per cent.

Out of the material of roof, tiles are predominant in the district with a proportion of 51·4 per cent. Tiled roofs are, however, more common in urban areas. Their proportion in the urban areas is 79·5 per cent against 48·6 per cent in rural areas. In the rural areas along with the tiled roofs, roofs of grass, leaves, reeds, etc., are also common and have a proportion of 49·6 per cent. Tiled roofs are very common in the southern and north-western parts of the district comprising of Panvel, Mangaon and Mahad talukas and Uran, Murud, Shriwardhan, Mhasala and Poladpur mahals. The district falls under heavy rainfall tract and the roofs are, therefore, sloping. The distribution corresponds more or less to the economic condition of the people in the district. This is evident from the fact that roofs of either grass or leaves are predominant in the eastern parts.

Corrugated iron or zinc sheets appear to be more in use in urban areas with 5·9 per cent. Their use in the rural areas seems to be very much restricted.

Classified by the number of rooms occupied, 54·7 per cent of households are occupying one room dwellings and 34·1 per cent are occupying two-room dwellings. Households occupying larger number of rooms are more in urban areas than in rural areas. Average number of persons per room is 3·06 for total, 3·17 for rural and 2·33 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the predominant economic activity in the district. 77·37 per cent of the total working population work on agriculture in the district as against 69·91 per cent in Maharashtra and 69·52 per cent in India.

Statistics regarding land utilisation, crop pattern, irrigation, wholesale and harvest prices, live-stock and agricultural implements, etc., for the district are given separately in Tables 3 to 10 in Part III.

Cultivating Seasons

As in the other areas of the State, there are two agricultural seasons, *viz.*, kharif and rabi in this district also. But the district has almost negligible area under cultivation in rabi season. Rice, ragi, small millets, kodra and varai, pulses, kulthi, udid and mung are the main crops of the kharif season. Winter rice, kulthi and wal are grown in rabi season. Rice is grown in both the seasons. Nirpunja, Bhadas, Halva, Kolamb and Ghosalval are the popular local varieties of rice.

The monthwise agricultural operations in respect of the principal crops in the district are shown in the crop calendar on page (35).

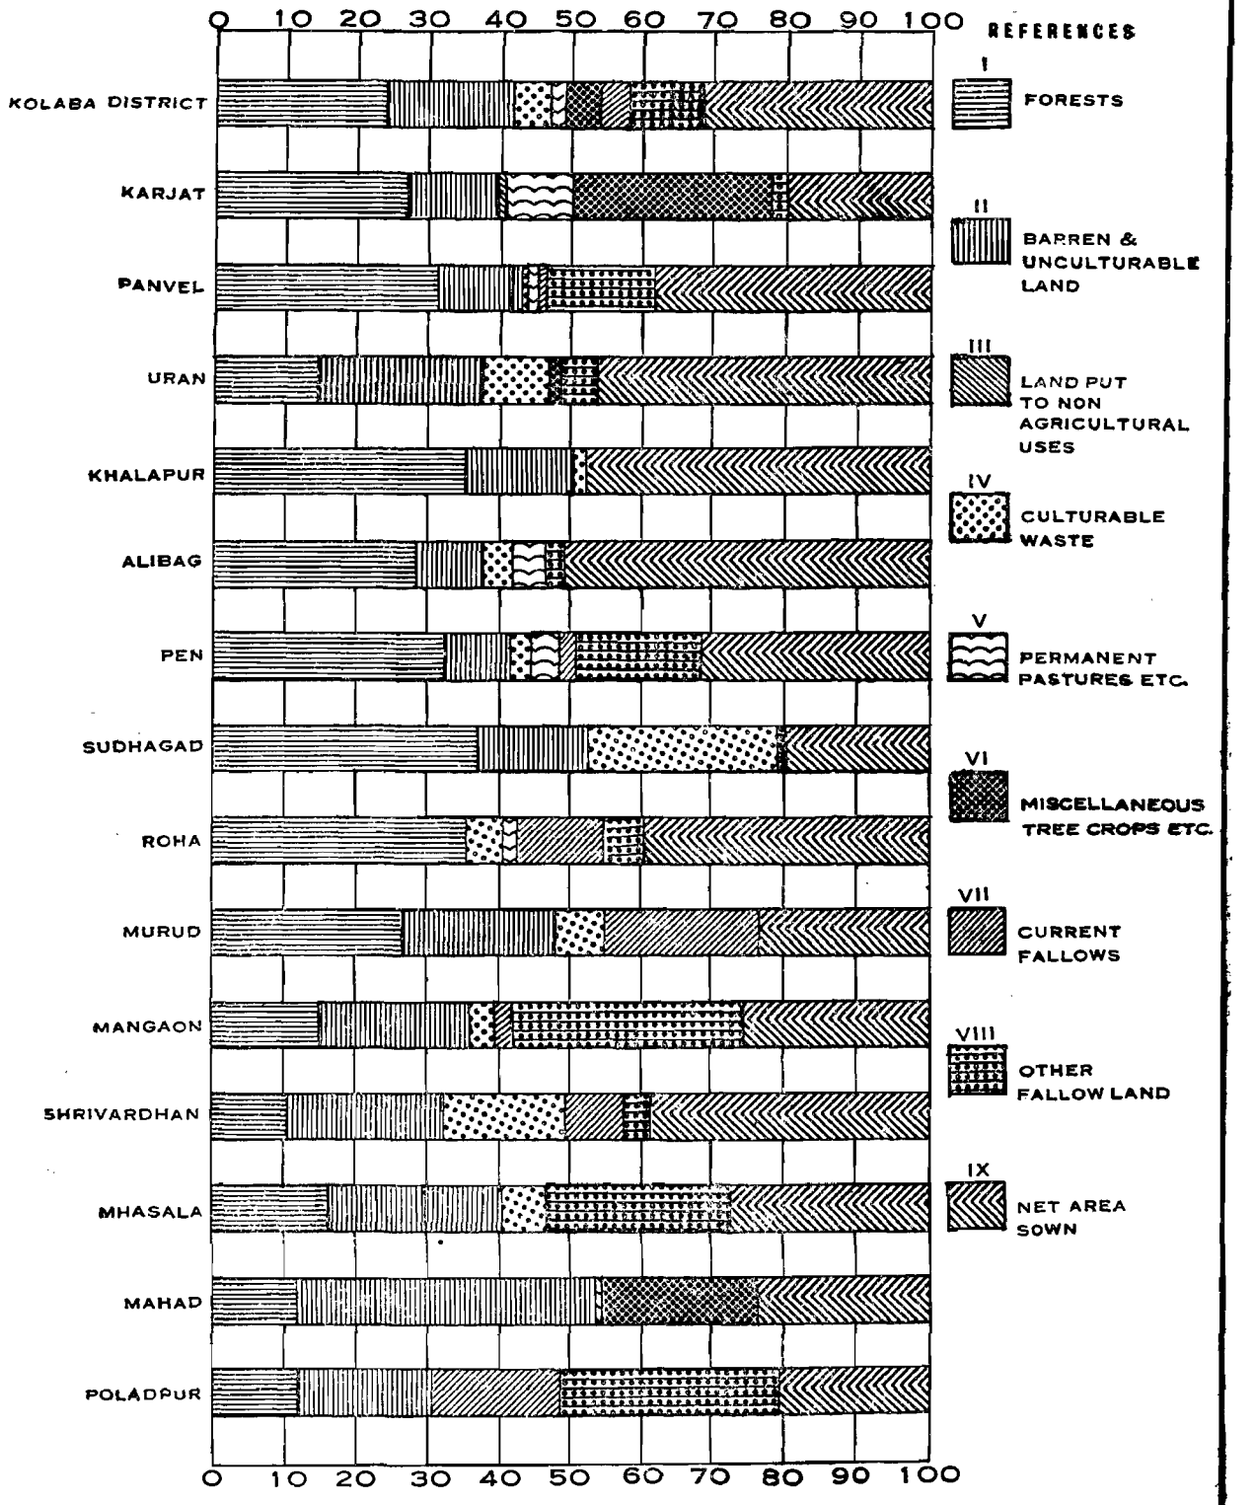

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on average for three years from 1957-58 to 1959-60 :—

Administrative Unit	Percentage of geographical area										
	Total geographical area	Forests	Barren and unculturable	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous crops and groves	Current fallows	Other fallow land	Net area sown	Total gross cropped area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
MAHARASHTRA	100	17.54	6.08	2.29	2.80	4.75	0.62	3.77	4.46	57.69	60.55

Mango	Burning	..	Interculturing	..	..	Spraying and dusting against hoppers and mildew.

The Figure at page (34) shows the land utilisation pattern for the year 1959-60 for the district and each taluka separately.

The net area sown in the district is only 30·66 per cent of the geographical area against the average of 57·69 per cent for the State. This is due to the large proportions of barren, unculturable and fallow lands. The *warkas* lands have to be left fallow for 4 to 5 years for accumulation of soil which is washed away by heavy rains. The proportion of fallow lands is therefore also very high.

The proportion of net area sown to the geographical area within the district ranges between 19·60 per cent for Karjat taluka and 51·26 per cent for Alibag taluka. It is higher than 30 per cent in Panvel (38.60 per cent), Khalapur (46.96 per cent), Alibag (51.26 per cent), Pen (33.42 per cent) and Roha (31·57 per cent) talukas and Uran (46.80 per cent) and Shriwardhan (37.68 per cent) mahals. Mangaon and Mahad talukas and Poladpur mahal have high proportion of barren lands and fallow lands and as such the percentage proportions of net areas sown are considerably low. Karjat and Mahad talukas have large

proportions of areas under miscellaneous tree groves. More than one-fourth of the geographical area in Sudhagad mahal is culturable waste. Attempts may have to be made to bring that area under cultivation. Nearly one-fourth of the geographical area of the district is covered by forests which is largely shared by Panvel (31·37 per cent), Khalapur (35·39 per cent), Pen (32·40 per cent) and Roha (35·84 per cent) talukas and Sudhagad (36·79 per cent) mahal. Only Karjat (9·65 per cent) and Alibag (4·73 per cent) talukas have significant proportions of areas under permanent pastures.

Because of the changes in the taluka boundaries in the district as well as changes in the classification of land utilisation effected in 1950-51 it is not possible to determine if there has been any change in the pattern of land utilisation during the last 40—50 years.

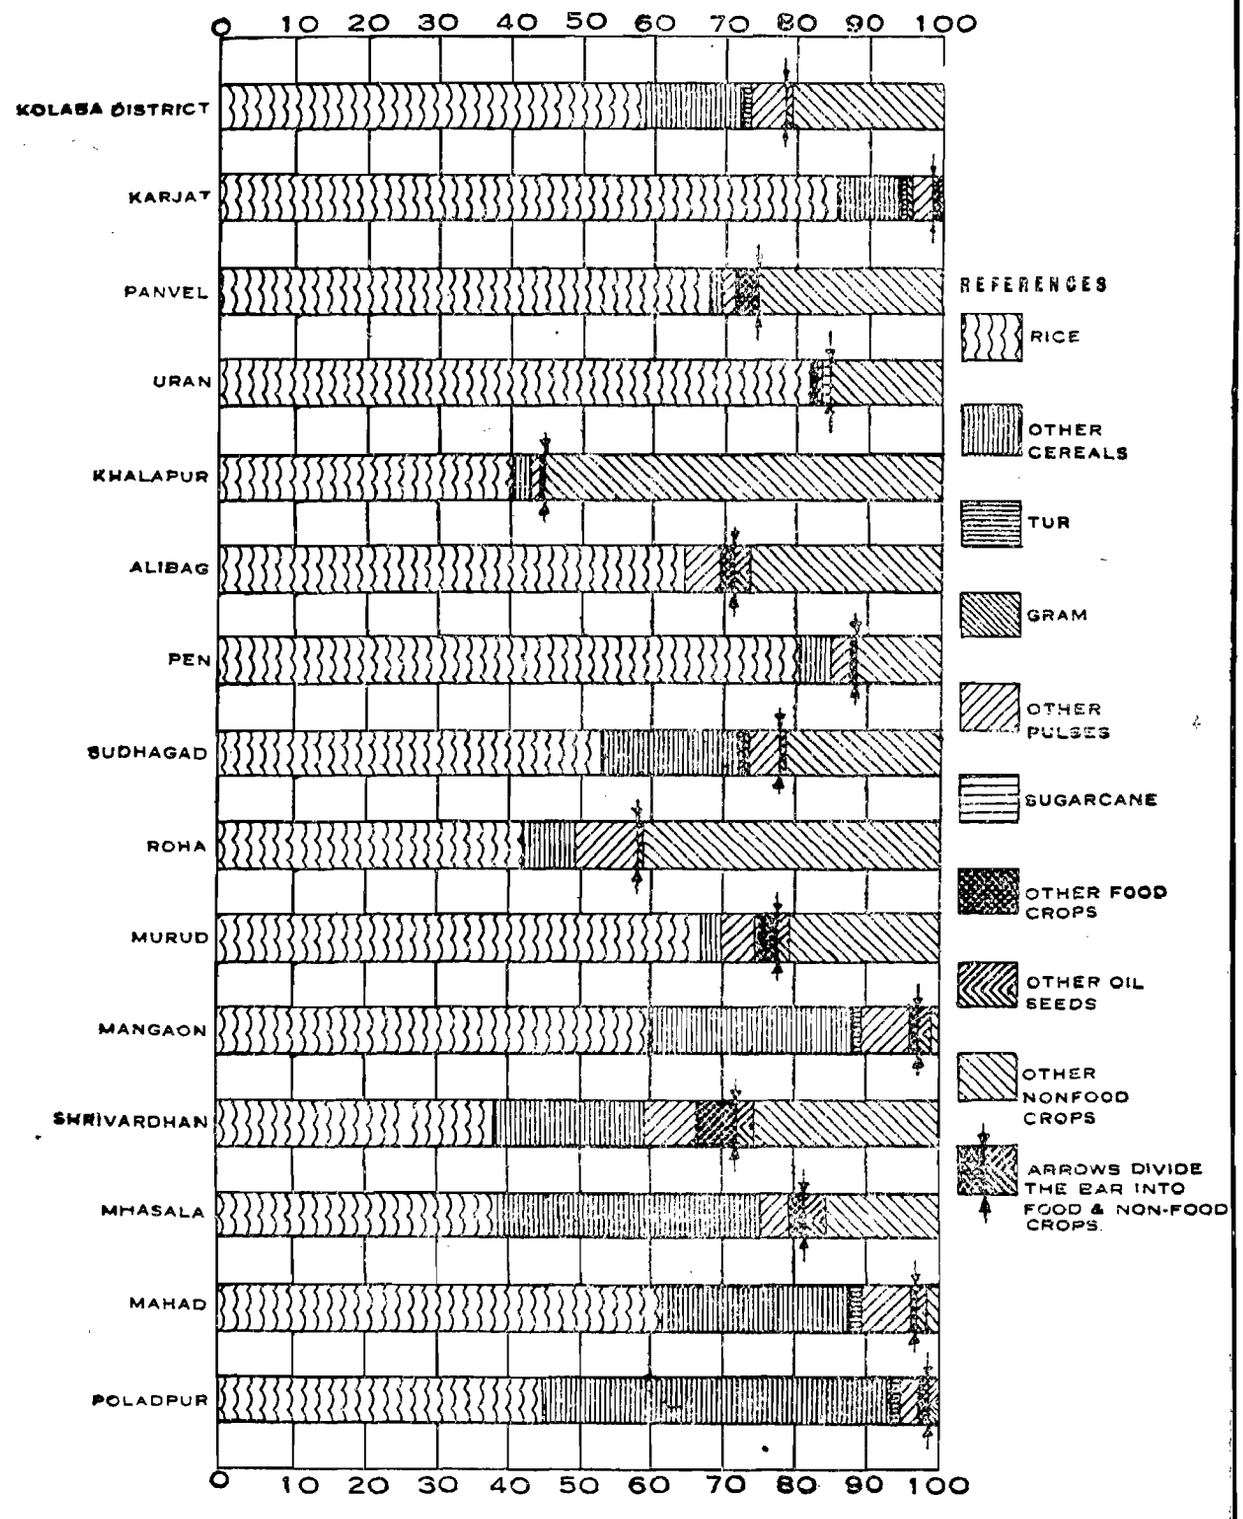

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All figures are averages for three years 1957-58 to 1959-60. Figure at page (37) shows the crop pattern for the district and each taluka separately :—

Details of cropped area	Percentage of cropped area in																
	Maharashtra	Kolaba District	Karjat Taluka	Panvel Taluka	Uran Mahal	Khalapur Taluka	Alibag Taluka	Pen Taluka	Sudhagad Mahal	Roha Taluka	Murud Mahal	Mangaon Taluka	Shrivardhan Mahal	Mhasala Mahal	Mahad Taluka	Poladpur Mahal

CROP PATTERN

TALUKAWISE PERCENTAGES 1959-60

The crop pattern of the district is typical of the Konkan region. Crops like wheat, jowar, bajri, cotton and tobacco are absent and rice is the principal crop with 59·90 per cent of the gross cropped area under it. Next in order of importance are ragi, varai, kodra and other millets which together occupy 13·20 per cent of gross cropped area. Pulses have 5·05 per cent and other food crops 1·38 per cent. All the food crops together make 79·53 per cent of the gross cropped area against the average of 69·88 per cent for Maharashtra. Compared to the State average the district naturally has a very high proportion of rice and other cereals but low proportion of pulses and other food crops. The pulses grown in the district in order of the area covered are wal, mung, udid, tur and chavli. Among condiments and spices, betelnut (*supari*) and chillies are important. Betelnut is an important garden crop and the district stands first in its area and production in the State. Among other food crops a large area is covered by fruit trees mainly mangoes and cashew. Though the area covered by them appears to be small in comparison with other crops, these tree crops are very important in the economy of the district.

Bulk of the area under non-food crops is under fodder crops. Oil-seeds occupy only 1·12 per cent of the gross cropped area. Groundnut is conspicuously absent. The oil-seeds of importance are coconut and sesamum.

Comparable statistics for the entire district prior to 1950-51 are not available. It is, therefore, difficult to study the changes in crop pattern during the last 40—50 years.

The crop pattern is considerably rich in comparison with the average for the State. The district has a very high proportion of high value crops like rice, mangoes, cashewnuts and betelnuts. The average yields per acre for most of the crops are also better than the State averages. The adverse factors are the smaller proportion of irrigated areas and considerably larger proportion of low value crops like ragi and other small millets. The estimated gross value of output per acre of cropped area in the district is Rs. 196 in 1955-56 and is the highest among all the districts of Maharashtra.

Within the district, the cropping pattern varies according to rainfall and soil types. Karjat and Pen talukas and Uran mahal have more than three-fourths of the gross cropped area under rice, the maximum being in Karjat (85·60 per cent). Ragi is generally grown along slopy hills, mountainous lands and in inferior soils. It is predominant in Mangaon, Mahad and Roha talukas and Shriwardhan, Mhasala, Poladpur and Sudhagad mahals. Nearly half of the gross cropped area in Poladpur mahal is occupied by ragi and other millets. In the southern talukas of Mangaon and Mahad and Shriwardhan mahal, the pulses cover sizable proportions of cropped areas. Shriwardhan mahal has a high proportion (5·69 per cent) of cropped area under other food crops consisting mainly of fruit trees and betelnuts. Panvel and Alibag talukas and Murud mahal also have sizable proportions under "Other food crops". Mangoes are found all over the district. The coastal areas of the district mainly Alibag taluka and Uran, Murud and Shriwardhan mahals have considerable areas under betelnuts.

The proportion of non-food crops to the gross cropped area varies considerably from taluka to taluka. It is highest (55·22 per cent) in Khalapur taluka and lowest (0·60 per cent) in Karjat taluka. Most of the area under non-food crops is covered by fodder crops. Only Karjat and Mangaon talukas have higher proportion of oil-seeds in the non-food crops, while Poladpur mahal has no fodder crop at all. Amongst oil-seeds, coconut is prevalent in the coastal areas of the district mainly in Alibag taluka and Murud, Uran and Shriwardhan mahals.

Nine-year average yields and 1958-59 acreages and outturns of important crops are shown below compared with the corresponding figures for Maharashtra taken as 100 :—

	Nine-year average yields per acre	1958-59 area	1958-59 outturn
MAHARASHTRA ..	100·00	100·00	100·00
Rice	132·79	10·54	14·24
Ragi	103·74	7·86	7·82
Tur	47·12	0·18	0·09
Gram	103·78	0·11	0·15
Sesamum	110·31	1·16	1·25

Except for tur, the district average yields are better than the averages for Maharashtra. The difference is significant in the case of rice. 10·54 per cent of the State's area under rice alone produced 14·24 per cent of the total outturn of rice in the State in 1958-59. The contribution of the district in the outturn of ragi is also significant.

The Techno-Economic Survey of Maharashtra has estimated the gross value of output per acre of cropped area in 1955-56 at Rs. 196 for the district as against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportion of workers working on land to total workers, gross area sown per worker on land and the proportion of irrigated

area to gross cropped area are shown below for the district and each of its talukas compared with the State averages :—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land (acres)	Percentage of irrigated area to gross cropped area
MAHARASHTRA	334	69·91	3·50	6·23
KOLABA DISTRICT.	390	77·37	1·45	1·31
Karjat Taluka ..	361	75·35	1·09	6·40
Panvel Taluka ..	536	76·21	1·47	3·05
Uran Mahal ..	751	58·67	1·47	0·90
Khalapur Taluka	340	77·47	2·30	1·24
Alibag Taluka ..	634	66·82	1·72	2·46
Pen Taluka ..	417	78·40	1·27	0·25
Sudhagad Mahal	238	87·58	1·29	..
Roha Taluka ..	308	82·90	2·06	0·15
Murud Mahal ..	334	57·93	1·48	4·43
Mangaon Taluka	337	88·17	1·21	..
Shriwardhan Mahal	524	60·14	2·00	..
Mhasala Mahal ..	303	84·85	1·45	..
Mahad Taluka ..	372	84·97	1·09	..
Poladpur Mahal ..	264	92·33	1·08	..

77·37 per cent of the total workers work on land. 66·47 per cent are cultivators and 10·90 per cent are agricultural labourers. The proportion of workers on land to total workers is higher than the State average (69·91 per cent). The gross cropped area per worker on land in the district is only 1·45 acres against the average of 3·50 acres for Maharashtra.

The percentage of workers working on land to total workers varies between 57·93 per cent in Murud mahal and 92·33 per cent in Poladpur mahal. In all the coastal talukas where there are large-scale fishing activities, the proportion is lower than the other talukas. Gross area sown per worker on land ranges between 1·08 acres in Poladpur mahal and 2·30 acres in Khalapur taluka. The gross area sown per worker on land in each taluka is thus considerably lower than the State average. This is so in all predominantly rice-growing tracts.

5·45 per cent of the net area sown in 1959-60 was sown more than once. This proportion of double-cropped area is slightly more than the average for the State (5·05 per cent). The proportion is high in Karjat (8·18 per cent), Panvel (5·16 per cent), Roha (8·37 per cent), Mahad (7·08 per cent) and Mangaon (7·00 per cent) talukas and Shriwardhan (7·79 per cent) and Murud (5·33 per cent) mahals. During the last decade from 1950-51 to 1959-60 there has been a gradual decrease in the net area cultivated more than once. From 31,600 acres in 1950-51 the double-cropped area decreased to 30,500 acres in 1954-55 and to 28,800 acres in 1959-60. The proportion of double-cropped area to net area sown was 5·45 per cent in 1959-60 as against 7·80 per cent in 1950-51.

Irrigation

The proportion of gross irrigated area to the gross cropped area for the district (1·31 per cent) in the year 1959-60 is considerably lower than the average for the State (6·23 per cent). In 1950-51, the proportion was only (0·87 per cent).

Within the district, the proportion of gross irrigated area to the gross cropped area ranged from 0·15 per cent in Roha taluka to 6·40 per cent in Karjat taluka. Irrigation is absent in Mangaon and Mahad talukas and Shriwardhan, Mhasala, Sudhagad and Poladpur mahals. The proportion is significant in Panvel (3·05 per cent) and Alibag (2·46 per cent) talukas and Murud (4·43 per cent) mahal.

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation separately for each taluka and the district. In 1959-60 canals irrigated 35·62 per cent, wells irrigated another 49·31 per cent and other remaining sources 15·07 per cent of irrigated area. Canals irrigated all the areas under irrigation in Karjat and Roha talukas and half of the irrigated area in Khalapur taluka. The entire irrigation in Uran and Murud mahals and Alibag taluka and 61·11 per cent irrigation in Panvel taluka is done by wells. The "other sources" of irrigation are used for irrigating 38·89 per cent irrigated area in Panvel, half the irrigated lands in Khalapur and the entire irrigated area in Pen talukas.

The net irrigated area increased from 3,800 acres in 1950-51 to 7,300 acres in 1959-60 or by 92 per cent in 10 years. The area irrigated by canals increased from 100 acres to 2,600 acres while the area under irrigation by wells multiplied by nearly two and half times.

Crop Pattern under Irrigation

Table 5 in Part III shows the crop pattern under irrigation. In 1959-60, 70 per cent of the gross irrigated area was under food crops and 30 per cent under non-food crops. Among the food crops the proportion of irrigated rice to gross irrigated area was 33 per cent, condiments and spices consisting of chillies and betelnuts 8 per cent and remaining 29 per cent under miscellaneous food crops. Among the non-food crops "Coconut as oil-seed" occupied large irrigated area. Fodder crops covered only 7 per cent of the gross irrigated areas.

Karjat taluka has almost all irrigated area under rice while most of the irrigated area in Alibag is under non-food crops.

Although rice is the main crop under irrigation, irrigated rice is only 0·73 per cent of the total area under rice. On the other hand, 21·43 per cent of area under condiments and spices and 28·81 per cent of the area under oil-seeds are irrigated in 1959-60.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production between 1951 and 1956 and that between 1956 and 1960 compares with the production of 1950-51 as follows :—

	Average production in hundred tons per year during		
	1950-51	1951—56	1956—60
Rice	1,411	1,666	1,651
Ragi	142	147	128
Other cereals	68	73	70
All cereals	1,621	1,886	1,849
Tur	5	4	3
All pulses	46	41	34
Total foodgrains	1,667	1,927	1,883

This comparison taking a single year as base may not be very safe as the base year itself might perhaps have been either a favourable or a very bad year. However, the comparison with 1950-51 does give some interesting results. The average annual production of cereals and total foodgrains increased considerably during the first Plan period over that of 1950-51. The production of rice increased by 18·07 per cent, of ragi by 3·52 per cent. The production of other cereals has also increased by 7·35 per cent. The production of pulses, however, has reduced during the same period by 10·87 per cent. In the Second Plan period, however, there has been a drop in general in the production of all types of foodgrains over the average for the First Plan period.

Agricultural Implements

Section C of Table 9 in Part III shows the agricultural implements for the district and each of its talukas for the years 1951, 1956 and 1961, separately. There has been a decrease in all the types of implements excepting wooden ploughs and carts during the decade from 1951 to 1961. The number of iron ploughs in 1961 reduced by 61 per cent than the number in 1951, while the number of wooden ploughs increased slightly by 1·66 per cent. Both the types together registered a small increase of 1·42 per cent during the decade. Large reduction is seen in the sugarcane crushers of both the types. Sugarcane crushers worked by power decreased to 43 per cent in ten years and those worked by bullocks reduced from 131 in 1951 to 17 in 1961. Similarly, the number of oil engines and electric pumps used for irrigation reduced from 1,822 and 14 in 1951 to 477 and 7 respectively in 1961.

By using standard average prices to the agricultural implements shown in Table 9 of Part III, the total outlay on them for the year 1961 may be estimated at Rs. 57 lakhs or Rs. 10·72 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 13 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as Secretary to that Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officers. The latter work as a Secretary to the Taluka Samiti. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There are six agricultural research centres carrying out experiments in this district.

The Agricultural Research Station at Karjat is the main station in the district established in the year 1919. It has a farm area of 75 acres. Research is done in this station on paddy as principal crop and ragi and wal as subsidiary crops.

An agricultural research sub-station has been established at Panvel in 1943 to conduct experiments on paddy (salt land). It has a farm area of 12·11 acres.

At the Agricultural Research Sub-Station, Khopoli (Tail Water Valley), established in 1951, research is made on both kharif and hot weather (summer crop) paddy. The sub-station has a farm area of 40 acres.

A Khar Land research station has been established at Panvel in 1959 to study the development of Khar lands. It has a farm area of 50 acres.

Under I. C. A. R. Scheme, a Model Agronomic Experimental Station on farm area of 17 acres is established at Karjat in 1953. Experiments on paddy are carried out here.

A fruit nursery has been established at Kolad in Roha taluka on a farm having area of 8 acres.

Agricultural Improvement

(i) *Increasing the area under irrigation.*—The most important item of increasing the agricultural production is to increase the area under irrigation. Unfortunately the topography of the district forbids contemplation of any large irrigation projects. Stress is, therefore, mainly laid on minor irrigation schemes like bunds, bandharas, tanks, etc. Construction of new wells and repairs or improvements to the old ones offer the quickest means of increasing irrigation facilities in the district. Keeping this in view, financial assistance and tagai loans are made available to needy cultivators. From 1950-51 to 1959-60, 1,427 additional wells were either newly constructed or brought into use through repairs due to which area irrigated by wells increased from 1,500 acres to 3,600 acres. The Third Plan envisages construction of 500 new wells and installation of 150 pumping sets.

During the Second Plan period a medium irrigation project called the Rajnala bandhara was completed. This raised the irrigational potential by about 4,000 acres. Some of the other minor irrigation projects completed during the first two Plan periods are—Wasarang bandhara on river Patal Ganga in Khalapur taluka; Muthavali canal in Roha taluka; Gahan, Kawir, Khandala, Bamanoli and Dawale bandharas in Alibag taluka; Unhere bandhara in Sudhagad mahal; Shighre bandhara in Murud mahal; Bhadwal bandhara in Karjat taluka; Kalad and Durshet bandharas in Pen taluka and Kokban bandhara in Roha taluka. All these schemes have raised irrigation potential by more than 5,000 acres. Besides the spillover works of the Second Plan period which when completed will raise irrigation potential by 2,130 acres, the Third Plan envisages new works irrigating 1,200 acres.

(ii) *Improved Seeds.*—Another item of improving food production is the recommendation of appropriate varieties or strains of crops. The Agriculture Department has recommended the following improved varieties or strains of important crops :—

Paddy	..	K-42, K-540, E. K. 70, and Bhadas 1303.
Gram	..	Chafa 816.
Groundnut	..	Kopargaon I.
Mung	..	Chayana 781.

Seed farms have been established at 5 places in the district to provide improved seed to farmers. The combined area of all the seed farms is 199·50 acres.

(iii) *Soil Conservation or Bunding and Terracing.*—The Third Five-Year Plan includes schemes of terracing of 1,000 acres involving an outlay of Rs. 5 lakhs.

(iv) *Reclamation of Khar and Khajan lands.*—The Khar Lands Development Board has implemented 99 schemes during the first two Plan periods and has developed about 38,000 acres of Khar or Khajan lands for cultivation. During the Third Plan period 24,619 acres of Khar and Khajan lands are to be reclaimed involving an outlay of Rs. 42·54 lakhs.

Live-stock

The number of live-stock for the years 1951, 1956 and 1961 have been shown separately for each taluka and the district in Table 9 of Part III.

There are 5·7 lakhs live-stocks in the district in 1961. This makes 102 live-stock per 100 acres of cultivated area. The corresponding figure for the State is 139.

The total bovine population in the district in 1961 is 88·48 per cent of the total live-stock. The number of male bovines over three years are 2·03 lakhs. The area cultivated per pair of male bovines over three years is thus 5·47 acres as against 5·48 acres for Maharashtra. There are 165,000 female bovines over three years in the district. That makes 156 female bovines over three years per 1,000 population in the district as against the State average of 159.

The total live-stock increased by 10·33 per cent during the decade 1951—61. Increase is observed in all the types of live-stock but that in number of goats (48·79 per cent) and sheep (35·29 per cent) is remarkable. The other type of live-stock also increased considerably from 500 to 800 during the ten years. The number of cattle rose by 16·4 thousands and buffaloes by 15·8 thousands. The number of poultry also multiplied 1⅓ times during the ten years period.

Veterinary Services

There are 13 full-fledged veterinary dispensaries in the district one at each taluka place excepting Mangaon where there is a branch veterinary dispensary. There is also a branch dispensary at Matheran. In addition, there are 25 veterinary aid centres at the following places in the district :—

(1) Morbe, (2) Gavan, (3) Konzar, (4) Kolad, (5) Chanere, (6) Kalamb, (7) Kashele, (8) Kondiwade, (9) Neral, (10) Khopoli, (11) Wawoshi, (12) Chowk, (13) Saigaon, (14) Borli Panchatan, (15) Dande, (16) Borli Mandala, (17) Ambet, (18) Mendadi, (19) Jambhoclpada, (20) Nandgaon, (21) Gulsunde, (22) Sai, (23) Goregaon, (24) Nizampur and (25) Indapur.

Treatment of animal diseases, control of epidemics, castration of male bovines, and control and destruction of animal parasites are the main services rendered at these dispensaries and aid centres.

The breed commonly found in the district is of non-descript type. Dangi breed of cattle has been recommended for the tract. Under the premium bull scheme three bulls of Dangi breed are located in Khalapur circle.

AGRARIAN STRUCTURE AND LAND REFORMS

The following tenures prevailed in the district before the introduction of the various Land Tenure Abolition Acts since 1949 :—

(1) The Survey or Ryotwari tenure,

(2) Khoti tenure,

(3) Kauli and Katuban tenures,

(4) Shilotri tenure, and

(5) Other inam tenures.

The first tenure alone prevails in the district now and the other tenures which were more or less concessional tenures have been abolished.

(1) *Survey tenure.*—The ordinary survey or ryotwari tenure prevailed over most of the areas of the district. It may be described as the heritable and transferable occupancy right of land continuable in perpetuity on payment of the Government demand. Later on (in 1901) it was slightly modified in respect of lands granted by Government which were subjected to certain restrictions about transfer or sale and the new occupancy rights were called new or restricted tenure. The new tenure applied only to the unalienated lands and was introduced with the object of restricting injudicious transfers in backward areas and safeguarding the lands of backward classes against falling into the hands of *savkars*.

The survey or ryotwari tenure was based upon a complete survey and soil classification and fixation of land revenue assessment upon each individual field separately.

(2) *Khoti tenure.*—The Khoti tenure originated in the Konkan owing to the rugged nature of the tract and the difficulties of collecting land revenue. The Khoti villages had been more or less farmed out on permanent leases to the Khots.

The land in a Khoti village was either Khoti Khasgi (*i.e.*, land originally held by the Khot or which he had acquired by purchase, etc., in his private capacity or brought under cultivation out of the waste land at his own expense) or Khoti Nisbat which included all the remaining land held by him only in his capacity as a Khot. The Khoti villages included some personal inam villages and some Paragana Watan Khoti villages also. The Khots held the villages on payment to Government of the aggregate assessment of the village. Their rights to the Khoti villages were heritable and transferable. They also had reversionary rights in respect of the Khoti Nisbat lands forfeited, lapsed for failure of heirs, and resigned by permanent tenants. They were to collect rents (*Khoti Faida*) from the permanent tenants and quasi-Dharekaris. The Khoti Khasgi lands were the private property of the Khots on which they had full rights. The Khoti Nisbat land, however, vested in Government and they were entitled only to rent from them.

The Khoti tenure in Kolaba district had been recognised by the Khoti Settlement Act, 1880. It has since been abolished with effect from May 15, 1950, with all its incidentals by the introduction of the Bombay Khoti Abolition Act of 1949 (Bom. VI of 1950). Four hundred and sixty-four villages were covered under this Abolition Act.

The Bombay Merged Territories (Janjira and Bhor) Khoti Tenure Abolition Act, 1954, is applicable to the merged territories of Murud, Mhasala, Shriwardhan and Sudhagad mahals and has come into operation with effect from August 1, 1954.

(3) *Kauli and Katuban tenures.*—The Kauli and Katuban tenures were found in the former State of Janjira, now merged in the Kolaba district. The expression "Kaul" ordinarily meant an agreement and implied a contract or lease of land granted on favourable terms for the reclamation of the land. It was, in essence, a reclamation lease under which land was allowed to be held free from payment of assessment for some years and the assessment was levied on a graduated scale. The expression "Katuban" meant fixed rent or assessment not able to fluctuation since 1880. The terms "Kauls" and "Katubans" came to be treated as synonymous. They covered only scattered lands in 186 villages. The Kauli assessment was generally less than the survey assessment.

These tenures have been resumed with effect from August 15, 1953, under the Bombay Kauli and Katuban Tenures Abolition Act, 1953. All such lands have since been subjected to payment of full assessment.

(4) *The Shilotri tenure.*—This again was a concessional tenure granted in order to encourage reclamation of Khar lands and ensure maintenance of the lands. Shilotri lands were lands that had been embanked and reclaimed from the sea and the permanence of which was dependent on the embankments being kept up. These reclamations were commonly known as Khars. The Shilotri tenure existed in Alibag and Pen talukas of the district.

This tenure has been abolished and the lands resumed with effect from February 1, 1956, under the Bombay Shilotri Rights (Kolaba) Abolition Act, 1955.

(5) *Inam tenures.*—Inam lands were gifted or granted by the Government for meritorious service in the past or in lieu of or on condition of some continuing service useful to the Government or to the village community. Inam lands were held free of land revenue. There were five classes of inams in the district :—

	Year of abolition
(i) Political or Saranjam inams ..	1952
(ii) Personal inams	1953
(iii) Hereditary Watan inams ..	1951
(iv) Village servants useful to the—	
(*a*) Community	1954
(*b*) Government—Patels ..	1963
Mahars ..	1959
(v) Deosthan inams.	

All inams, excepting the last category of Deosthan inams held by religious institutions or for religious services, have now been abolished under various measures of land reform. The year in which each class of inam was abolished is shown above. All hereditary watan lands held for village services have also been abolished and all village servants now work on a salary basis. The occupancy rights of abolished inam lands have been conferred on their holders or tenants, as the case may be, on conditions of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Jagirs

Jagirs were a sort of Inam villages granted by the rulers of the erstwhile States. The Jagirs of 41 villages of the former Janjira and Bhor States were abolished under the "Bombay Merged Territories and Areas (Jagirs) Abolition Act, 1953", with effect from August 1, 1954.

With the abolition of all the special or concessional tenures as described above the only tenure now prevailing throughout the district is the ryotwari or survey tenure in which the occupant holds the land directly from the Government and the assessments had been determined by survey and soil classification of each individual field.

Record of Rights

A record of rights in lands is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and

inspections and is, therefore, easily maintained up to date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual revenue accounts are prepared on the basis of the Record of Rights.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands Act which is in force since 1948. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "land to the tiller" policy, the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1957, which is known as the "Tillers' Day". This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 30th September 1963, ownership rights have been conferred upon 82,830 tenants for 38,298 acres of land in the district. Out of these, 12,886 tenants had mutually agreed with the landholders on the price to be paid by them in respect of 19,830 acres. In the remaining 69,944 cases, the prices were fixed by the Revenue Officers in respect of 18,468 acres.

Size of Land Holdings

Census Table B-X in Part II of this Volume shows that 67·73 per cent of the total number of households cultivate land and the remaining 32·27 per cent do not cultivate any land.

Census Table B-XI in Part II shows the break-up of cultivating households by size of land cultivated and by interest in the land. 39·90 per cent of the cultivating households cultivate their owned lands only. 36·88 per cent of the households cultivate tenanted lands only and the remaining 23·22 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown below.

The distribution of households in Table B-XI and the same shown in percentages in column 2 below is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of these ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	15·67	30·99
1·0 to 4·9	69·47	45·16
5·0 to 9·9	11·35	13·51
10·0 to 14·9	2·03	4·63
15·0 to 29·9	1·23	3·90
30·0 to 49·9	0·17	1·08
50+	0·08	0·73
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 6·3 acres. Average size of the ownership holding in the district was 5·0 acres in 1952-53 against the average of 12 acres for the State.

Ceiling on Holdings of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Ceiling area for dry crop land is 66 acres and for *warkas* 126 acres. In the case of irrigated lands, the ceiling area is 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons, and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1949 and work of consolidation of holdings was started in 1949. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to end of March 1963, 142 villages have been completed covering an area of 47,654 acres.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

	Acres
(i) Dry crop lands	2·0
(ii) Bagait and rice lands	0·5

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

Since the introduction of the Five-Year Plans and with the emphasis on development of rural areas, the co-operative credit movement in the district has advanced at a very rapid pace. Activities relatnig to production, processing, distribution, marketing and banking are being organised on co-operative lines. Many industrial co-operatives have yet to make progress.

Following is the description of co-operatives in the district based on the report for the year 1960-61.

Co-operative Credit

(*a*) *Agricultural Credit Societies.*—The number and membership of Agricultural Credit Societies have increased at a very rapid pace during the last decade especially during the Second Plan period.

The position of Agricultural Credit Societies in 1950-51 and 1960-61 is as under :—

	1950-51	1960-61
(1) Number of Agricultural Credit Societies	112	459
(2) Number of members	10,511	48,809
(3) Share Capital ..(Rs. in lakhs)	1·60	16·45
(4) Reserve and other funds (Rs. in lakhs)	0·52	1·61
(5) Working capital ..(Rs. in lakhs)	3·93	56·00
(6) Number of members to whom loans were advanced)	Not available	37, 0 4
(7) Amount advanced ..(Rs. in lakhs)	1·25	45·69
(8) Amount recovered ..(Rs. in lakhs)	1·15	30·75
(9) Loans outstanding ..(Rs. in lakhs)	1·66	45·16
(10) Overdues .. ..(Rs. in lakhs)	0·26	9·07

Average membership per primary society in the district is 106 against the average of 96 members for Maharashtra. 92 per cent villages in the district have been covered. The membership coverage of rural families in the district was 29 per cent against 32 per cent for Maharashtra.

Total owned funds (share capital *plus* reserve funds) of the Primary Agricultural Credit Societies in the district amounted in 1960-61 to Rs. 18·06 lakhs and formed 32·25 per cent of their working capital against 26 per cent for Maharashtra.

The loan operations of all the Primary Agricultural Societies in the district amounted to Rs. 45·69 lakhs in 1960-61. The average amount of loan per borrowing member in the district worked out to Rs. 456 as against Rs. 329 for Maharashtra.

During the decade 1951 to 1961, the number of Agricultural Credit Societies has multiplied four-fold, the membership has increased by 364 per cent, the share capital has increased almost ten times and there has been an addition of Rs. 52·07 lakhs in the working capital. In 1961 the societies advanced Rs. 44·44 lakhs more than the amount in 1951. These are ample proofs of the spectacular progress made by co-operatives in this district. The proportion of overdues to the outstanding loan has increased from 16 per cent to 20 per cent and points out to the need for improving recoveries.

(*b*) *Central Co-operative Bank.*—The Central Co-operative Bank was established in the year 1960-61 at Pen. Pen town is centrally located in the district and is easily accessible from almost all taluka places. The Bank has been working as a federal financing agency catering for the credit requirements of all the primary co-operatives in the district. Since 1962, the Zilla Parishad also transacts its financial business through this Bank. Prior to the inauguration of the Bank, the credit requirements of the agriculturists of the district were met with through the branches of the Maharashtra State Co-operative Bank.

Below is the position of the Bank during 1960-61, the year of its inauguration :—

(1) Number of members—	
(*a*) Individuals	390
(*b*) Societies	337
(2) Paid-up share capital .. .. (Rs. in lakhs)	2·85
(3) Reserve and other funds .. .. (Rs. in lakhs)	0·01
(4) Deposits .. .. (Rs. in lakhs)	Nil
(5) Borrowings .. .. .. (Rs. in lakhs)	Nil
(6) Working Capital .. .. .. (Rs. in lakhs)	2·85
(7) Cash—	
(*a*) On hand .. .. .. (Rs. in lakhs)	Nil
(*b*) At Banks .. .. .. (Rs. in lakhs)	0·11
(8) Investments—	
(*a*) Government and other Securities (Rs. in lakhs)	Nil
(*b*) Fixed deposits .. .. .. (Rs. in lakhs)	2·75
(9) Loans advanced .. .. .. (Rs. in lakhs)	Nil
(10) Profit .. .. (Rs. in lakhs)	0·01
(11) Number of branches and pay offices	1

The Bank started working in the month of October 1961 and, therefore, no transactions are seen in the data above.

(*c*) *Land Mortgage Bank.*—In the year 1960-61, the Thana and Kolaba District Land Mortgage Bank had a branch at Alibag and was catering for the needs for long-term finance of the agriculturists in this district. A separate Land Mortgage Bank has now been registered and has started working very recently.

(*d*) *Urban Banks and Credit Societies.*—There are 23 Urban Banks and Credit Societies in the district of which 7 are Urban Banks, 5 Urban Credit Societies and 11 Salary Earners' Societies. Their combined membership is 10,229, share capital Rs. 11·30 lakhs and working capital Rs. 47·03 lakhs. Nineteen of these societies together advanced an amount of Rs. 49·68 lakhs to 10,007 members during the year and made a profit of Rs. 96,000. The remaining four societies are more or less stagnant.

Agricultural Processing Societies

There are 6 Paddy Husking Co-operative Societies having membership of 865 individuals and 79 societies. Their combined share capital is Rs. 2·43 lakhs of which Government's contribution amounts to Rs. 1·07 lakhs. Only three of these societies are in production and during the year produced 39,226 maunds of husked rice. Two of these societies made a profit of Rs. 8,000 and four suffered a loss of Rs. 9,000.

Industrial Societies

There are 4 Weavers' Co-operative Societies and 57 other Industrial Societies in the district. Out of four weavers' societies, three are Khadi Weavers' and one Wool Weavers' Society. Their combined membership is 136, share capital is Rs. 9,000 and working capital is Rs. 13,000. The number of looms under co-operative fold is 182. The societies produced goods worth Rs. 10,000 during the year.

The other types of industrial societies include 3 Oil Ghanis, 2 Hand Pounding, 8 Cane and Bamboo workers, 10 Leather workers, 2 Carpentry and Smithy, 4 Metal workers, 5 Pottery and Brick-making, 11 Neera and Palm Gur, 1 Coir and Rope, and 11 miscellaneous Societies. The combined membership of these societies is 3,477, share capital Rs. 2·10 lakhs and working capital Rs. 5·69 lakhs. The value of production of the societies during the year was Rs. 4·17 lakhs.

Forest Labourers' and Labour Contract Societies

There are 33 Forest Labourers' Co-operative Societies and 14 Labour Contract Societies in the district with membership of 1,749 and 660, respectively. Their respective paid-up share capital is Rs. 1·05 lakhs and Rs. 12,000 and their working capital is Rs. 4·94 lakhs and Rs. 44,000, respectively. The Forest Labourers' Societies received subsidy of Rs. 34,000 from Government and the Labour Contract Societies received loan of Rs. 1,000 and subsidy of Rs. 2,000 during the year. The Forest Labourers' Societies extracted forest produce worth Rs. 9·21 lakhs and the value of contracts executed by Labour Contract Societies during the year was Rs. 97,000.

Co-operative Farming Societies

There are 11 Co-operative Farming Societies, of which 2 are collective farming societies, 6 tenant farming and 2 gram swarajya societies.

The Collective Farming Societies have membership of 66, share capital Rs. 700, working capital Rs. 8,057 and 128 acres under command all of which are cultivated.

The Tenant Farming Societies have a membership of 225, share capital Rs. 3,420 and working capital Rs. 12,000. They have yet to acquire land.

The Gram Swarajya Societies have 52 members, Rs. 1,005 as share capital and Rs. 1 lakh as working capital. The societies cultivated all the 17 acres under their command.

These farming societies hitherto did not either have lands or funds and hence did not function properly. Now that they have acquired land and some of them have been granted financial assistance, they are likely to show good progress in the near future.

Lift Irrigation Societies

Three Co-operative Lift Irrigation Societies have been formed in the district. The Irrigation Schemes are: (1) The Kalbhairav Scheme on Kal river, (2) Wayal and (3) Turde Schemes on Khopoli tail waters. The first scheme has alone been completed. It has an irrigation potential of 25 acres of which only three acres are irrigated. The combined membership of these three societies is 71, share capital Rs. 2,000 and working capital Rs. 9,000.

Fishery Societies

There are 16 Fishermen's Co-operative Societies in the district during the year under report. Their combined membership is 2,020, share capital Rs. 29,000 and working capital Rs. 65,000. The societies received Rs. 4,000 as loan and Rs. 2,000 as subsidy from the Government during the year. Catch value of the fish by the societies during the year is Rs. 3·47 lakhs. Seven societies made a profit of Rs. 8,000, six suffered loss of Rs. 2,000 while the remaining three were stagnant.

These co-operative societies supply fishing material such as nylon twine for nets, tar and paints for boats, fishing hooks, etc., to their members. Loans are also advanced for purchase of fishing requisites.

Dairy Societies

Ten Milk Supply Societies have been organised recently. Their combined membership is 266 and share capital Rs. 8,420 and the working capital Rs. 8,688. A milk federation has also been registered during the year at Karjat and proposes to supply milk to the Government Milk Scheme at Bombay. During the year the milk supply societies had not started operations. The societies have testing machines for testing milk and the federation now has a vehicle of its own for collecting and transporting the milk. The federation is likely to extend its activities to all the remaining talukas of the district.

Purchase and Sales Societies

There are 8 Taluka Purchase and Sales Societies and 4 other Marketing Societies in the district. Their combined membership is 175 societies and 2,610 individuals, Rs. 1·40 lakhs as share capital and Rs. 3·03 lakhs as working capital. The Government has contributed Rs. 22 thousands in the share capital of the societies. The societies cover 7 regulated mandis and one of the other 2 mandis in the district. The societies own 1 and hire 17 godowns.

The main object of the societies is to secure fair prices to the members' produces and to supply agricultural and industrial requisites at reasonable rates. A district purchase and sales society has been organised in 1963 and all the primary marketing societies have been affiliated to the district society.

Consumers' Movement

There are 11 Consumers' Stores in the district located mainly in urban areas. Six of these stores are more or less stagnant. The total membership of these societies is 636, share capital Rs. 33,000 and working capital Rs. 78,000.

These stores are trying their best to cater for the daily needs of the people in general and their members in particular. The stores undertake distribution of sugar and other controlled commodities. During the year the value of sales of these societies amounted to Rs. 3·89 lakhs. Four of these societies made a profit of Rs. 8,000, one suffered a loss of Rs. 1,000 and six others neither received profit nor loss.

Housing Societies

On 30th June 1961 there were 13 Co-operative Housing Societies in the district, nine of which were organised for Backward Classes. The combined membership of all the societies is 483, share capital Rs. 1·36 lakhs and working capital Rs. 2·15 lakhs. The societies advanced loans of Rs. 23,000 during the year to the members for construction of houses. The societies have built 52 houses and tenements till the end of the year 1960-61.

Co-operative Activity for Backward Classes

At present the activity for Backward Classes is restricted to housing societies only. There are 9 Co-operative Housing Societies organised for Backward Class persons. Their membership is 205 and share capital Rs. 6,000.

Audit Classification

The classification of different types of societies in the district on 30th June 1961 is as follows:—

	Number of societies classified as				Number of societies		Total
	A	B	C	D	Not classified	Not audited	
(1) Central Co-operative Bank.	..	..	..	..	..	1	1
(2) Agricultural Credit.	55	211	52	49	2	90	459
(3) Non-Agricultural Credit.	9	7	3	3	..	1	23

FORESTS

The forests in the district cover an area of 655·77 square miles, of which 433·42 square miles are in charge of the Forest Department and 51·35 square miles in charge of the Revenue Department. The remaining area of 171 square miles is under private forests and it is spread over the whole district. The forest area makes 24·18 per cent of the total geographical area as against 17·56 per cent for Maharashtra.

The forests are mainly situated on the hills and in the highly precipitous terrain in the Western Ghats. The area is intersected by many creeks (like the Roha, Dharamtar, Nagothana, Revdanda, Rajpuri and Bankot creeks). The forests are thus spread over disconnected bits from the sea-shore to the high hills such as the Matheran plateau.

For purposes of administration, the forests are divided into two units, *viz.*, (1) the Alibag Forest Division under the charge of Divisional Forest Officer with headquarters at Alibag, and (2) the Roha Forest Sub-Division in charge of the Sub-Divisional Forest Officer with headquarters at Roha. Both the divisions work under the Conservator of Forests, Thana Circle, with headquarters at Thana. The forests in charge of the Revenue Department are looked after by the Collector.

Most of the forest is "Moist deciduous" type on hill slopes and "Semi to Pure evergreen" type on hill tops. Commercially, the forests are one of the valuable forests of the State. The most valuable species found is "Teak". It is associated with Ain, Dhavda, Kinjal, Bondara, Khair, Hed, Sawar,

Shisham, Nana, Bibla, etc., in the moist deciduous forests. The prominent species found in semi-evergreen hill forests are Pissa, Parjambul, Anjani, Katekumbal, Bhoma, Lokhandi, Pabba, Phansi, Taitali, Tupa, Jambul, Jamb, Mango, etc. There is a fairly profuse undergrowth of Ukshi, Dhayati, Karwand, Nirgudi and Kewani on the middle slopes and lower plains. There is a fairly luxuriant growth of climbers like Gulwel, Kuily, Kusari, Palas vel, Chilar, etc. Bamboo is relatively rare and occurs in low level areas and along nallahs and river banks in moist deciduous forests. The Dowga or Kalak bamboo is the principal variety found. The Manwel or Medar bamboo is practically absent in moist areas.

In the other minor forest produce, more important are: Apta-Tembhurni leaves, Chilhar bark, Hirda, Shikekai and Kath from Khair.

Fodder and thatching grasses are available in large quantities. Julari, Husali, Bhuri, etc., are the varieties of grass found mostly in regeneration and blank areas.

Forest produce is transported in bullock carts to several forest depots whence they are transported to Bombay, Poona and other important places by trucks or country crafts. The important forest depots in the district are at Karjat, Neral and Khopoli.

The forest produce is exploited through the contractors and also through Forest Labourers' Co-operative Societies. These co-operative societies are given certain privileges. A few coupes in the forest are also worked departmentally. The revenue from the forest produce in the district is steadily rising. The annual production has increased from Rs. 6·89 lakhs in 1951 to Rs. 11·08 lakhs in 1956 and to Rs. 12·45 lakhs in 1961.

According to 1961 Census 7,927 persons are working in forestry and logging. Their distribution for industry minor group is shown in Table B-IV-C in Part II.

Recent geological surveys have revealed large deposits of bauxite in the tree clad hills of Murud, Shriwardhan and Roha ranges. The exploitation of bauxite had started since 1960-61.

The exploitation of forests is done under scientifically managed working plans which are different for different divisions and types of forests. Under the working plan in force in the Kolaba division (exclusive of the Sudhagad range of erstwhile Bhor State) the forests are constituted into 10 working circles, *viz.*, Main Teak, Fuel, Protection, Hill Station (Matheran), Casuarina, Dalhi, Fuel and Fodder Reserves, Matchwood and Minor Forest Produce Working Circles. The treatment prescribed for the Main Teak Working Circle, is selection-*cum*-improvement fellings with clear felling of at least one-third area of concentrated regeneration by plantations on gentler slopes and flatter portions. The rotation fixed is 90 years to avoid heavy soil erosion on steep slopes which was found to occur under the previous clear felling system. The exploitable girth for teak is 48" (O. B.) and for other species 36" (O. B.). In the area treated with selection-*cum*-improvement felling, large gaps of the size 68′×66′ or more are also to be rabbed and planted up.

In the Fuel Working Circle which comprises mostly semi-evergreen vegetation in transitional stage in Karjat and Alibag Ranges, the area is divided into three felling series with 30 years' felling cycle. The treatment applied is selection-*cum*-improvement fellings with an exploitable girth of 38" (O. B.).

The average area to be artificially regenerated is about 1,200 acres annually. It is done both departmentally and by agri-silvi method.

The forests in the Roha sub-division are mainly worked under selection-*cum*-improvement system with clear-felling up to one-third of the coupe area, which is regenerated with teak and other superior injaili species. Cultural operations such as weedings, cleanings and thinnings are carried out at suitable intervals.

A number of schemes were undertaken during the first two Five-Year Plans for development of forests in the district. By the end of the Second Plan 17 wet nurseries were established, plantation of teak was raised over 100 acres, matchwood and cashewnut plantation was done in 400 and 750 acres, respectively. Bamboo was propagated over 10 acres and agave plantation was raised in 87 miles. About 570 acres of denuded and arid areas were afforested.

The following important schemes have been included in the Third Five-Year Plan :—

(1) *Plantation of Valuable Trees.*—Plantation of teak and eucalyptus trees in 3,188 acres, cashewnut trees in 1,084 acres and Khair trees in 500 acres. The outlay involved is Rs. 2·85 lakhs. During the first two years of the Plan, teak plantation was raised over 232 acres, cashewnut over 453 acres and Khair over 105 acres.

(2) *Bamboo Plantation.*—Physical and financial target is not available. In the first two years of the Plan plantation has been raised over 115 acres.

(3) *Afforestation in blank and arid areas.*—During the first two years of the Plan period 215 acres are already afforested.

FISHERIES

Fishing industry is a vital economic activity and as far as fisheries are concerned the district is one of the most important districts of the State. The district has a long coastal belt stretching over 150 miles from Mora in the north to Devaghar in the south. In addition to this, rivers and tanks in the district afford large water-spread area for inland water fishery. However, marine fishery predominates over inland water fishery in the district and nearly 70 per cent of the persons engaged in Fishing Industry work in Marine Fishery.

Fishing in the sea is carried out all along the coastal line and is mainly concentrated within a distance of 10 miles from the coast. In few cases the area is extended much further. The important Marine Fishery Centres in the district are Mora, Karanja, Rewas, Thal, Navedar-Navagaon, Alibag, Nagaon, Revdanda, Korlai, Nandgaon, Murud, Rajpuri, Dighi, Bharadkhol, Shriwardhan and Bagmandle. Extensive fishing activities are carried over nine months from September to May. In the creeks and estuaries, fishing is carried out even during the monsoon.

Commercially important varieties of fish which are available in large quantities in sea and creek waters are: Saranga (white pomfret), Halwa (black pomfret), Dadha, Rawas, Ghol, Koth, Bombil, Kolambi, Karandi, Shingala, Wam, Mandeli, Mushi, Pakat, Waghli (Bolad), Bhing, Palla, Shevand, etc. Besides these, clams and oysters are also available along the entire coastal line, mainly in number of creeks and estuaries along the coast. About 520,000 metric tonnes of fish worth approximatly Rs. 60 lakhs are caught annually in the district.

Most of the fishing is carried out in small sailing boats. A few boats have been mechanised. There are about 1,900 boats engaged in fishing in the district of which 257 boats have been fitted with engines. The types of nets used for fishing are : (1) Longlines or hooks called *khanda*, (2) Barrier nets known as *wana*, (3) cast nets called *pag*, (4) Gill nets called *daldi*, and (5) Bag nets known as *dol*. Among these nets, special nets are knitted for catching particular types of fish. Bag nets or *dols* are very important nets in the fishing industry of the district. The nets are mainly prepared of cotton and hemp twine but now-a-days nylon twine is also effectively used.

Majority of the sea fish caught is transported by sea to Bombay. The fishing centres in the north of the district being close to Bombay, important varieties of fish caught there are directly brought to Bombay for sale as they fetch good price. The fishing centres in the south however do not have this advantage. Transportation facilities are rather inadequate and mainly belong to private sector. Facilities for cold storage for preservation of fish are also lacking in the district. Curing of fish by salt is the only effective method in the district by which supplies of fish available during a particular season are maintained throughout the year. In view of this, the State Department of Fisheries has recently established a Fish Curing Yard at Murud. This yard will enable local fishermen to cure fish in hygienic conditions and to market it at a good price.

A large portion of the fresh fish which is in surplus of the local consumption and which cannot be economically exported out of the district is dried. Dry fish is collected on large scale in the fishing centres in southern part of the district whence it is despatched to the interior parts of the district and to other districts also. Oil from Shark liver is extracted at various centres, in the district. Supply of shark fins and air bladders of fishes form an important aspect of the trade in the district.

The State Department of Fishery is contemplating a number of schemes for development of marine fishery in the district. With a view to explore the off-shore fishing grounds, to indicate possibilities of commercial fishing, to chart the bottom of the sea, to locate submerged obstructions for navigation if any and to facilitate fishing operations like trawling, the department has started operation of multipurpose boats in the district. For education of the fishermen's children the department runs a primary fishery school at Bagmandle with special fishery bias. Financial assistance is granted to the fishermen and fishermen's co-operative societies in the form of loan and subsidy for mechanisation of fishing crafts, purchase of fishery requisites, etc. Shark liver oil extraction centres have been established at important places as Shark fishing takes place on grand scale in the district.

The inland or fresh water fishing does not compete with the marine fishery, yet it is also an important branch of fisheries in the district. Rivers, tanks and reservoirs are the principal sources of inland waters. The important rivers of the district are Kundalika, Savitri, Goda and Kal. Most of them are however seasonal. There are more than 200 tanks in the district having a water-spread area of 660 acres. Of these 82 tanks are seasonal.

The commercially important varieties of inland water fish found in the district are : Shinghala (Kirkit), Murrel, Shivda (Pahadi or Daku), Chamar (Chalat), Pal (Dandaonya), Khavlya, Khaval, Kolshi, Zinga, Boi, Kalunder, Kharabi, Muri, etc.

These varieties are however of not fast growing types. As such, for propagation of pisciculture, the perennial tank waters in the district are stocked with quick-growing Bengal Carps, imported from

Calcutta. The varieties stocked are Catla Catla, Rohu and Mrigal. During the Second Five-Year Plan period 6·89 lakhs of Carp-fry have been stocked while during only the first two years of the Third Plan period, the quantity stocked is nearly 5 lakhs carp-fry. During the Third Plan period a fish farm with an area of eight acres has been established at Khopoli for research on pisciculture and experiments in induced breeding. The farm is also used for rearing the baby fishes of major carps to the fingerling size.

In the 1961 Census, 11,306 persons are reported as engaged in fishing as principal work : 8,062 of them are males and 3,244 females. 7,704 persons (5,579 males and 2,125 females) are engaged in sea-fishing and the rest in inland water fishing. Fishermen in the district mostly belong to the community known as "Son-Koli". The "Daldi Mohammedans" and the "Kharvi" also take to fishing in this district.

The Third Five-Year Plan envisages an amount of Rs. 30·43 lakhs for the development of fisheries in the district. This includes mechanisation of fishing crafts, assistance for the purchase of fishing requisites, boat-building yards, preservation, marketing and transport facilities for fish, etc.

Twenty-two Fisheries Co-operative Societies have now been organised in the district. These co-operative societies get loans and subsidies from the Government for mechanisation of fishing crafts, etc. Loans amounting to Rs. 6·83 lakhs and subsidy of Rs. 1·65 lakhs have been granted to the fishermen and the fisheries co-operative societies during the first two years of the Third Plan period.

MINING AND QUARRYING

Large areas of the district are covered by Deccan trap. The lava beds of the plateau tops are capped by Laterite which has resulted from weathering of the Deccan trap. Bauxite is found in these Laterite capped plateaus. It occurs in Roha taluka and Murud and Shriwardhan mahals along the west coast. The occurrences are observed in the low-lying hills adjoining the sea. Most of the areas lie in the Government forests. Bauxite is found 5 to 10 feet below the capping of Laterite and the thickness of the belts ranges from 5 to 8 feet. The reconnaissance surveys and the detailed prospecting of bauxite are being carried out and the quantitative estimates of the reserves are yet to be prepared. The indicated reserves are of the order of 5 million tons. The investigations and observations carried out so far show that the bauxite reserves in the district are quite promising for locating an Alumina plant in the district. For the present however bauxite is exploited only for export. Mining leases for extraction of bauxite in 750 acres of Murud and Shriwardhan mahals were granted to five companies and 8,285 tons of bauxite was exploited during the year 1959-60.

The district also has materials suitable for building construction, roads, etc. These comprise of clays for manufacture of bricks, sands for concrete, building stones, material for road metal, etc. The value of material extracted in the year 1959-60 was as follows :—

	Rs.
(1) Ordinary sand	37,835
(2) Gravel	85,214
(3) Murrum	27,949
(4) Building stone	2,756
(5) Brick earth	1,912
(6) Boulders	98

The mining activities in the district are however mainly confined to quarrying of stones, etc. In 1961 Census, 2,573 persons are reported to be working on quarrying of stones and 21 persons in other mining activities. Their distribution by industrial minor groups is shown in Table B-IV-C in Part II.

There are springs of mineral waters at Pali and Save in the district. These springs are reported to have properties of curing skin diseases.

INDUSTRIES

Industrially the district is very backward. Lack of power and transport facilities has hindered its industrial development. The existing industrial units are mostly small and very few are of large or medium size. They are mostly processing industries such as rice and flour mills. The employment in the non-agricultural sector leans heavily towards village and cottage industries, *i.e.*, the village artisans, working on traditional lines, producing articles of coarse variety required by local population with the locally available raw materials. With the completion of the proposed Diva-Dasgaon railway line, availability of cheap power from Koyna and because of the proximity of an industrially advanced city and a port like Bombay, there is a vast scope for rapid industrial development in the district in the near future.

There are 22,087 workers engaged in industries, 10,899 or 49·35 per cent of them are in household industries and 11,188 or 50·65 per cent in non-household industries. The total number of workers in registered factories in 1961 was 2,943 which makes 13·32 per cent of all workers engaged in industries or 3 factory workers per thousand of total population against 20 per thousand of total population of Maharashtra.

The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from the houselists are also shown separately for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

There are 17 large-scale registered factories in the district working with 50 or more workers and using power.

Salt manufacture is an important large-scale industry in the district. There are three registered units together employing about 180 workers and producing about 40 lakh Bengal maunds of salt. The industry is located mainly in Uran mahal and Panvel and Pen talukas.

The paper and pulp factory at Khopoli known as Paper and Pulp Conversion I td. manufactures paper for wrapping and packing, etc. Vijaylaxmi Board Mills, Khopoli Paper Factory and Amin & Patel Industries Ltd., all located at Khopoli, produce mill boards, cardboard cartons and allied products. These four units together employ 1,250 workers daily.

Coated Fabrics Pvt. Ltd. situated at Khopoli manufactures adhesive tapes, insulating, packing, waterproof and varnish tapes.

Swadeshi Chemicals Pvt. Ltd. of Khopoli manufactures potassium permanganate and has a capacity of 1,300 tons per month.

Dhootpapeshwar Industries Ltd. of Panvel is the oldest pharmacy in the State manufacturing Ayurvedic pharmaceuticals.

Hume Spun Pipe Co. at Pen produces R. C. C. spun pipes (used for drainage) and other concrete products.

Grindwel Abrasives Ltd. at Mora (Uran) manufactures grinding wheels, segments, stones, sticks, etc.

The Tata Hydro-Electric Power Supply Co. has its generating stations at Bhivpuri, Bhira and Khopoli. The Andhra Valley Power Supply Co. Ltd. is also at Bhivpuri and is engaged in generation and transmission of electric energy.

In addition, there are (i) Wooden articles factory at Pen, (ii) Stone crushing factory at Poladpur, and (iii) Bidi manufacturing factory at Mahad.

The following four more units have been licensed. They have yet to start production :—

(1) Production of Soda Ash (66,000 tons p.a.), Caustic Soda (16,500 tons p.a.), Potassium Chloride (420 tons p.a.), Gypsum (4,800 tons p.a.) in Uran.

(2) Hindustan Organic Chemicals Ltd. for basic chemicals and intermediates at Savale-Turade in Panvel taluka.

(3) Indian Organic Chemicals for Acetic Anhydride (600 tons), Ethyl acetate (1,080 tons), Ethyl auto acetate (300 tons) at Khopoli in Khalapur taluka.

(4) Acme Pig Iron and Centrifugal Pipe Works, for pig iron (capacity 15,000 tons) and C. I. spun pipes (9,000 tons) at Khopoli in Khalapur taluka.

Small-scale Registered Factories

There are 57 small registered manufacturing and processing units. The more important of them are rice and poha mills, bidi, plastic and clay models, cutlery articles and salt works. Eighteen registered units work on paddy milling, polishing of rice and processing of paddy for poha. Nineteen establishments are engaged in manufacture of salt.

The total number of registered factories has increased from 71 in 1955 to 76 in 1961. The number of workers in the registered factories has, however, increased considerably from 1,430 in 1955 to 2,943 in 1961.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 43·07 lakhs and working capital of Rs. 22·10 lakhs. The total value of annual production was Rs. 90·61 lakhs and the value added by manufacturing was Rs. 25·96 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1959 was only 0·13 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

The traditional crafts are conducted as household or cottage industries. They are mostly servicing and processing industries catering for the requirement of the local population. Manufacture of salt, soap, coarse mill board, copper and brass utensils, nails, pins, jewellery, bricks, umbrellas, oil ghanis, handloom weaving, carpentry, cane and bamboo works, fishing, etc., are some of the important industries in the district.

7,704 persons are engaged in production of fish by fishing in sea. The district has a coastline of 150 miles and in the absence of other non-agricultural activities, agriculture and fishing are the main sources of livelihood. There were sixteen co-operative fishing societies in 1960-61. The production of fish in inland waters, *i.e.*, in tanks and rivers is also encouraged in the district. In addition to the persons mentioned above, 3,601 persons are engaged in this type of fishing. They are mostly the persons who rear fish in ponds, tanks and perennial waters and also in fish farms and hatcheries. Carp-fry are specially brought from Calcutta and supplied to the fishermen.

5,232 workers are engaged in the production of fuel including charcoal by exploitation of forests. Forests are spread from north to south and are rich in almost all types of trees. Trees are cut for the production of charcoal and wood for fuel and simultaneously new plantations are made in the open space. 2,783 persons engaged in the production of fruits and nuts in plantations are mostly the workers engaged in the above schemes.

Many cottage industries are run on co-operative lines. Co-operative societies are formed for—

(i) Pottery and brick-making at Mahad, Poynad, Pali and Khalapur,
(ii) Oil ghanis at Pali and Roha,
(iii) Bangles at Asare,
(iv) Leather working at Matheran, Ramraj, Chowk, Murud, Roha and Bori,
(v) Handlooms at Roha, Goregaon, Ranwali and Murud,
(vi) Brass and copper utensils at Roha, Mahad, Pali and Thal.
(vii) Bamboo and cane work at Panvel and Chowk,
(viii) Coir work at Janjira,
(ix) Salt manufacture at Uran,
(x) Hand-pounding of rice at Vaijnath and Taloje,
(xi) Umbrellas at Karjat,
(xii) Grinding wheels at Uran,
(xiii) Carpentry at Roha.
(xiv) Idols of plaster of Paris and clay images at Pen.

Being principally a rice producing area, the district provides considerable employment in rice milling and hand pounding. There are 380 flour or rice mills engaging 1,266 workers.

1,833 persons are engaged as carpenters. They fix or repair doors and door frames, wooden roof beams, furniture and agricultural implements.

1,155 workers are engaged in basket weaving. Bamboo required for this industry is available in the forests of the district.

1,014 persons are engaged as potters while 1,539 workers are working as stone cutters.

The proportions of different groups of artisans to one lakh of total population in the district are as follows :—

Blacksmiths 55, Carpenters 173, Shoe-makers and repairers 72, Potters 96, Tailors 139, Spinners and Weavers 21, Basket weavers 109.

The Industries Department has started peripatetic schools in the district to impart training in cane, and bamboo work, carpentry and smithy, tailoring, etc. The Maharashtra Village Industries Board has also taken up development work of certain selected village industries such as Khadi, Salt, Hand-made paper, Hand-pounding of rice, etc.

The 'Master Plan' prepared by the Industries Department in 1960 had indicated scope for establishment of the following new industries in the district :—

(1) Rice bran-oil.
(2) Sulphuric acid.
(3) Calcium Carbide.
(4) Strawboard from paddy straw.
(5) Chemically pure salt.
(6) By-products of salt and bitterns.
(7) Acetate rayon.
(8) Viscose rayon.

The Maharashtra Industrial Development Corporation has set up a 100-acre industrial area at Roha in February 1964. The industrial area will provide water and power facilities to engineering industries.

In the Third Plan, two Industrial Estates are proposed to be set up at Panvel and Khopoli on co-operative lines.

POWER

The number of electrified towns and villages in the district is 26. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is only 10·61 per cent of the total population of the district.

The district consumption of electricity on different items for eight years is shown in Table 30 in Part III.

The *per capita* consumption is naturally much lower than the State average, as only 26 towns and villages in this district had been electrified.

The electric supply is through the State Electricity Board as well as from the private concerns. The hydro-electric stations in the district are of particular significance. These power stations are located at Khopoli, Bhivpuri and Bhira and have, respectively, installed capacities of 70,000 KW, 72,000 KW and 132,000 KW. Although the total capacity of the hydro-electric projects in the district is 274,000 KW, bulk of it is consumed by the industry in Greater Bombay and neighbouring areas and the railways for electric traction on Bombay-Poona section. In addition to Greater Bombay, bulk supply of power from these projects is made available to Panvel, Khopoli and Karjat in the district. Besides these major hydro-electric projects, there are diesel generating stations at Janjira, Murud, Mahad and Matheran with installed capacities of 51 KW, 315 KW and 246 KW, respectively. The first one is under the State Electricity Board while the second and the third are maintained by private licensees.

During the Third Five-Year Plan, it is proposed to electrify a number of towns and villages in the district under the Kolaba Electrification Scheme, the Rural Electrification Scheme of the State Electricity Board and the power to be made available from the Koyna Project. With the completion of all these schemes and supply of cheap power from Koyna, the prospects of accelerating industrial pace in the district appear to be very bright.

TRADE AND COMMERCE

The chief articles of export in the district are rice, salt, timber, sand, betelnuts, coconuts, straw, firewood, fresh and dry fish, charcoal, etc. Most of these articles are exported to Bombay. Of manufactured articles, grinding wheels and abrasives manufactured at Mora in Uran mahal have a demand outside the country also. Vegetables produced in the district are mostly exported to Bombay. Salt is exported to Bombay and other districts above the Ghat. Grocery and grains of all varieties (except rice), cloth, oil, medicines and hardware, sugar, gur, chillies, kerosene, etc., are the chief articles of import. Most of these goods come from Bombay and Thana. Agriculturists themselves bring their produce for sale at markets. The commission agents of dealers purchase goods from the producers. The distribution of goods outside the wholesale trade centres is done at market places and weekly bazars held at different places and on different days of week.

Shops

Every village is within the reach of one of the weekly bazars or in addition has one or more shops. These shops provide the inhabitants with their day-to-day requirements. They deal in all kinds of articles, such as grains, groceries, oils, gur, spices, salt, coconuts, soap, tea, tobacco, betelnuts, chillies and innumerable articles required by people for their daily use. There are in all 5,422 shops in the district: 3,793 are in rural areas and 1,629 in the urban areas. This does not include the shops temporarily set up in the weekly markets or fairs. The number of shops per 1,000 dwellings is 26·6 for the district as a whole, 20·6 for rural areas and 88·6 for urban areas. It will be seen that the urban areas have about four times more shops per 1,000 dwellings than rural areas. The ratio between shops and 1,000 dwellings for the district is below that of the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These are generally trade centres popularly known as "bazars" and are distributing rather than collecting centres. All sorts of articles like foodgrains, pulses, oils, chillies, spices, gur, cloth, fruit, vegetables, miscellaneous articles such as pots, pans, etc., are sold in these markets. Pedlars and hawkers set up booths on the market days. Agriculturists from the nearby villages also bring their farm produce. The traders and shop-keepers belonging to the market place also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The weekly markets start early in the morning and after a slack of an hour or so in the afternoon close by six in the evening to enable both the buyers and sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and, if so, on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 267 shows the locations of all these markets and also the days on which they are held.

There are altogether 24 weekly and bi-weekly markets in the district. This is the only district in the State where there are no cattle markets. Four weekly markets are held on Sunday ; 1 on Monday ; 5 on Tuesday ; 3 on Wednesday ; 4 on Thursday ; 2 on Friday and 5 on Saturday.

The map facing page 267 will show that the weekly markets are comparatively few and spread sparsely in the district. Their concentration is, however, along the west coast areas. Each has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week.

Fairs

Fairs vary little from weekly markets and sometimes consist of gatherings hardly known outside the villages. Most of the fairs held in the district are associated with important deities and religious festivals. So far as trade is concerned, fairs are complementary to the weekly markets. Considerable quantities of agricultural produce and other articles of daily use are brought for sale. A list of fairs held in the district showing their locations, duration, dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 268 shows location of all the fairs in the district having 1,000 or more gatherings. A volume giving details of fairs and festivals in Maharashtra is also issued separately.

Trade Centres

Apart from the weekly markets and fairs (1) Karjat, (2) Panvel, (3) Pen, (4) Roha, (5) Alibag, (6) Murud, (7) Khalapur and (8) Mahad are important wholesale trade centres known as principal markets in the district, as far as collection and export of agricultural produce are concerned. In addition, there is a sub-market at Neral which is under the jurisdiction of Karjat

principal market. Agricultural produce markets at these places are regulated under the Bombay Agricultural Produce Markets Act, 1939.

The annual turnover of commodities (by value in rupees) at the two important centres during the year 1962-63 was as follows :—

Commodities	Principal Market Yard	
	Karjat	Panvel
	Rs.	Rs.
Paddy	8,71,781	1,14,68,385
Rice	..	1,12,49,784

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district is 14,691 out of which 7,922 or 53·92 per cent are in rural areas and 6,769 or 46·08 per cent are in urban areas. The number of workers in trade and commerce makes 2·96 per cent of all workers in the district. 15·84 per cent and 13·47 per cent of the district number are in Alibag and Panvel talukas, respectively.

Only 2·55 per cent of the workers in trade and commerce are in wholesale trade, 95·04 per cent are in retail trade and 2·41 per cent in miscellaneous trade and commerce. Sixty-eight per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is 142. The number of wholesalers of gur, sugar, spices, oil, etc., is 110.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishments, type and location is given in Table 23 in Part III. Their break-up by talukas and type is shown below :—

	Number of Banking Offices			
	Scheduled	Non-scheduled	Co-operative	Total
DISTRICT TOTAL ..	8	1	7	16
(1) Karjat Taluka.. ..	..	..	..	..
(2) Panvel Taluka.. ..	2	..	1	3
(3) Uran Mahal	..	..	..	..
(4) Khalapur Taluka ..	..	1	..	1
(5) Alibag Taluka.. ..	1	..	1	2
(6) Pen Taluka	1	..	2	3
(7) Sudhagad Mahal ..	..	..	..	..
(8) Roha Taluka	1	..	1	2
(9) Murud Mahal ..	1	..	1	2
(10) Mangaon Taluka ..	..	..	..	..
(11) Mhasala Mahal ..	..	..	..	..
(12) Shriwardhan Mahal ..	..	..	..	..
(13) Mahad Taluka ..	2	..	1	3
(14) Poladpur Mahal ..	..	..	..	..

The district appears to be very backward in banking activities. Out of 8 talukas and 6 mahals only 6 talukas and one mahal have banking offices in them. Panvel, Pen and Mahad are important trade centres and together have more than half of the total number of banking offices in the district. Karjat and Mangaon talukas and Uran, Sudhagad, Mhasala, Shriwardhan and Poladpur mahals have no banking offices at all.

The State Bank of India works for the treasury in the district and has branches at Panvel, Alibag, Roha, Murud and Mahad.

COMMUNICATIONS AND TRANSPORT

Fairly large portion of the district is not served by rail communications. The Bombay-Poona broad gauge line (30·19 miles) and Neral-Matheran narrow gauge line (12·61 miles) both of the Central Railway pass through the talukas of Karjat and Khalapur alone. Thus the total railway mileage in the district is 42·80 miles. In addition, there are two trolly lines (about 31 miles) run by Tatas. One of them is of 8 miles running from Bhivpuri Road to Bhivpuri and the other (of 23 miles) from Roha to Bhira. Both these lines are, however, utilised only for the transportation of the material required for the electric stations at Bhivpuri and Bhira.

The construction of a railway line between Diva and Dasgaon is in progress. Panvel and Uran are also proposed to be linked by this railway line. The proposed lines will pass through Patalganga and Kundalika valleys and will certainly provide several locational advantages for the establishment of new industries.

Existing railway mileage in the district is 1·58 miles per 100 sq. miles of area against 2·66 miles in the State.

Table 21 in Part II shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page shows all these roads.

The district is well connected by roads with the adjoining districts of Thana, Poona, Greater Bombay and Ratnagiri. The district headquarters is also connected by roads with all the taluka headquarters. The eastern part is a hilly terrain and roads are, therefore, fewer in Sudhagad and Poladpur mahals and Mangaon and Mahad talukas. The Bombay-Poona-Bangalore National Highway of 32 miles in length passes through Panvel and Khalapur talukas in the district. Bombay-Konkan-Goa State Highway of about 95 miles also passes through Panvel, Pen, Roha, Mangaon and Mahad talukas and Poladpur mahal.

During the period 1951—61, there has been no addition in the National Highways. The State Highways increased by 25·81 miles and other district roads by 83·29 miles. The major district and the village roads decreased by 26·62 miles and 27·21 miles, respectively, both due to higher classification. The total increase in all types of roads (excluding municipal roads) is 55·27 miles.

Under the Nagpur Plan the district should have 1,449 miles of roads on 31st March 1961. It was short of that target by 404 miles.

New Roads

Construction of the following new roads is in progress (as on 31st March 1962) :—

(1) Kashele - Kalamb - Chinchavali road ; (2) Kharpada-Savroli road ; (3) Alibag-Roha road ; (4) Kashele-Khandas road ; (5) Roha-Murud road *via* Gophanwadi and (6) Hill Road to Matheran.

The following roads are being improved (as on 31st March 1962) :—

(1) Bombay-Poona road ; (2) Bombay-Konkan-Goa road ; (3) Wakan-Pali-Khopoli road ; (4) Chowk-Karjat road ; (5) Alibag-Rewas road ; and (6) Shriwardhan-Mahad-Ratnagiri road.

New Bridges

Work on the following important bridges is in progress (as on 31st March 1962) :—

(1) R. C. C. beam and decking slab on Anghai river on Wakan-Pali-Khopoli road ; (2) Slab on Sanglewadi nallah on Wakan-Pali-Khopoli road ; (3) Submersible R. C. C. solid slab on Ramraj creek on Alibag-Roha road ; (4) R. C. C. slab on Nidi river on Alibag-Roha road ; (5) R. C. C. beam and slab on Ekadara creek on Murud-Salav-Rajpuri road ; and (6) High level arch on Ulhas river on Karjat-Kashele road.

Posts, Telegraphs and Telephones

The district is included in the Konkan and Thana Postal Divisions. Head Post Office is situated at Alibag and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices in the district. During the year 1961-62 there were 25 sub-post offices and 140 branch post offices in the district. Their number has increased to a great extent over 1951-52.

There are telegraph offices at the following 25 places :—

(1) Alibag ; (2) Ambet ; (3) Birwadi ; (4) Borli-Panchatan ; (5) Dasgaon ; (6) Goregaon ; (7) Janjira-Murud ; (8) Mahad ; (9) Mangaon ; (10) Mhasala ; (11) Morba ; (12) Nagothana ; (13) Pali ; (14) Pen ; (15) Poladpur ; (16) Revdanda ; (17) Roha ; (18) Shriwardhan ; (19) Karjat ; (20) Khalapur ; (21) Khopoli ; (22) Matheran ; (23) Neral ; (24) Panvel ; and (25) Uran.

The following 22 places have telephone connections :—

(1) Alibag ; (2) Birwadi ; (3) Dasgaon ; (4) Goregaon ; (5) Janjira-Murud ; (6) Mahad ; (7) Mangaon ; (8) Mhasala ; (9) Nagothana ; (10) Pali ; (11) Pen ; (12) Poladpur ; (13) Revdanda ; (14) Roha ; (15) Shriwardhan ; (16) Karjat ; (17) Khalapur ; (18) Khopoli ; (19) Matheran ; (20) Uran ; (21) Panvel ; and (22) Neral.

Passenger Road Transport

During the Plan periods, a number of roads connecting the villages were constructed in the district and the buses of the State Road Transport Corporation are running regularly in the district from April 1950. This district is included in the jurisdiction of Thana Division. The State Transport operations in the district are maintained through four depots situated at (1) Mahad, (2) Panvel, (3) Pen and (4) Alibag. No separate figures for passenger transport are available for the district. The four depots together run buses on 84 routes which make 363 single trips per day. The district has six permanent and eight temporary bus stations.

Nationalisation of passenger transport in the district has been virtually completed by the end of Second Five-Year Plan. The Third Five-Year Plan schemes include expansion of the services to new places on public demand, construction of permanent bus stations and pick-up stands and provision of other facilities for the travelling public.

Goods Transport

Separate figures for lorries operated in the district are not available as the Regional Transport Officer working at Thana keeps combined records for his region including Thana, Nasik, Dhulia, Jalgaon, Ratnagiri and Kolaba districts.

Sea Transport

The district has a coastline of about 150 miles. There are a number of minor ports which are connected with the hinterland by creeks and rivers which facilitate approach to interior by country crafts and launches. Sea transport is, however, not so swift because of the silting of creeks and is not available during the monsoons.

Transport of passengers is carried mainly from the ports of Rewas, Dharamtar and Uran to Bombay daily. Cargo traffic is also handled by almost all the ports in the coastline of the district. Mora (Uran) is significant from the view-point of tonnage of cargo handled in recent years. It has handled cargo of about 69,000 tons in 1961. The ports south of Mora (Uran) are wanting in rail and good road connections to the interior.

The tonnage of cargo and passengers handled and the chief imports and exports at some of the main ports in the district during the year 1960-61 are given on page (56).

The Elephanta port is a picnic spot about six miles from Bombay and has an annual passenger traffic of about 147,000. There are regular launch services from Bombay to this port, except during monsoons. Moreover, the Bombay Steam Navigation Company runs passenger-*cum*-cargo steamers to some of the ports.

Port	Cargo Traffic			Passenger Traffic			Chief imports of commodities	Chief exports of commodities
	Imports	Exports	Total	Embark	Disembark	Total		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

*Figures for 1959-60. †Figures for 1958-59. ‡Figures for 1957-58.

Workers in Transport and Communications

7,459 persons are engaged in transport and 491 in postal, telegraphic and telephone communications, etc., in the district. Out of the workers engaged in Transport 2,274 are engaged in transport by boat, steamer, ship, cargo boat by sea or ocean, 1,947 are in railway transport, 1,270 in motor transport and 1,968 in all other kinds of transport including carts, horses on hire, ferry services, coolies, etc.

Village Communications

The Village Directory in Part I gives information for each village in the district whether it is served by a railway or a road or has a post office or not.

CONSTRUCTION

The total number of persons engaged in construction is 3,447: 2,849 are males and 598 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

15·52 per cent of the workers are engaged in construction and maintenance of dams, waterways and canals, etc., 47·29 per cent in construction and maintenance of buildings and 37·19 per cent in construction and maintenance of roads, railways, bridges, telegraph and telephone lines, etc. The large proportions engaged in the construction of buildings and roads, railways, etc., include the persons employed on the construction of school buildings, administrative offices, residential quarters for Government servants, hospitals, etc., and a number of roads, laying of railway lines and bridges including those on the Bombay-Goa State Highway.

All the workers engaged in construction together make only 0·69 per cent of the total workers in the district.

OTHER SERVICES

35,984 persons are engaged in the district in "Other Services": 28,230 are males and 7,754 are females. The major categories out of them are: (i) Public Services; (ii) Educational Services and (iii) Personal Services. Public services include administrative employees of Central, State and Local Governments. Educational services include all classes of teachers and Personal services include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of the workers in other services by minor groups is shown in Table B-IV-C in Part II.

7·26 per cent of the total workers in the district are engaged in " Other Services " as against the average of 8·53 per cent in the State. 19·34 per cent of the total workers in " Other Services " in the district are engaged in Public services and 12·22 per cent in Educational services. The former proportion is much below while the latter is slightly lower than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This may be so because the district has very few urban centres and there are hardly any comparable business services, labour associations or recreation services. Even the proportion of workers in personal services in the district (25·46 per cent) is lower than the State average of 27·15 per cent.

The number of domestic servants is 4,484 or one for about 236 population. The number of barbers is 1,337. The number of persons in laundry services (including washermen) is 384.

There are only 82 legal practitioners and 892 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is only 89 and that in other schools and colleges is 4,281.

The number of State Government employees including those now working under the Zilla Parishad is 4,647.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rate

The proportions of workers to total population, males and females for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA	47·91	57·09	38·10
KOLABA DISTRICT ..	46·83	53·06	40·94
Karjat Taluka	48·17	57·94	37·62
Panvel Taluka	45·58	55·25	35·62
Uran Mahal	45·34	52·11	38·33
Khalapur Taluka	50·82	58·84	42·30
Alibag Taluka	45·47	50·23	41·06
Pen Taluka	48·76	53·95	43·66
Sudhagad Mahal	50·06	55·28	44·77
Roha Taluka	49·37	55·66	43·19
Murud Mahal	41·45	51·20	32·49
Mangaon Taluka	48·40	52·25	44·99
Shriwardhan Mahal	39·88	46·98	34·29
Mhasala Mahal	45·02	47·55	43·11
Mahad Taluka	46·42	50·57	42·75
Poladpur Mahal	49·63	50·92	48·52

The labour participation rate, *i.e.*, the percentage of workers to total population varies from 39·88 per cent in Shriwardhan mahal to 50·82 in Khalapur taluka. For males it varies between 46·98 per cent in Shriwardhan mahal to 58·84 in Khalapur taluka. For females it varies between 32·49 in Murud mahal to 48·52 per cent in Poladpur mahal.

The labour participation rate for the district is lower than Maharashtra average for total population and for males. It is slightly higher than the State average in the case of females. These differences between male and female participation rates are due to the differences in male and female age composition resulting from the out-migration of working age males. Female participation is higher in Poladpur and Sudhagad mahals and Mangaon taluka which are economically more backward areas. Participation rate for males is the highest for Khalapur taluka where many new industries have been set up and many persons from outside have taken employment.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in Primary, Secondary and Tertiary activities for the district and the State is as follows :—

		Total workers	Primary	Secondary	Tertiary
Maharashtra ..	Total ..	100	72·25	12·34	15·41
	Rural ..	100	88·73	5·68	5·59
	Urban ..	100	11·97	36·69	51·34
Kolaba District	Total ..	100	82·92	5·25	11·83
	Rural ..	100	87·58	4·24	8·18
	Urban ..	100	22·55	18·35	59·10

As may be expected, the primary sector dominates in the district with 82·92 per cent of total workers against the State average of 72·25 per cent. The district proportion in the secondary sector is less than half of the State average. Even urban areas are very much behind with proportion just about half of the State average. It is significant that even in

urban areas the primary sector engages larger proportion of workers (22·55 per cent) than that in the secondary sector (18·35 per cent). The most significant fact is that the tertiary sector in urban areas engages as much as 59·10 per cent of the total workers. It should indicate that most of the towns in the district are more as trade and service centres. It has been described earlier that there are only 3 factory-workers per thousand of total population against 20 for the State.

Categories of Economic Activity

The distribution of workers, males and females, by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			KOLABA DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46.11	40.69	54.79	66.47	58.63	76.07
II Agricultural Labour ..	23.80	18.12	32.90	10.90	9.59	12.50
III Mining, Quarrying, Livestock, Forestry, Fishing, etc	2.16	2.97	0.86	5.65	7.32	3.60
IV Household Industry ..	4.39	4.80	3.74	2.20	2.62	1.68
V Manufacturing other than Household Industry.	6.88	10.22	1.54	2.26	3.65	0.55
VI Construction	1.24	1.69	0.53	0.69	1.04	0.27
VII Trade and Commerce ..	4.52	6.61	1.17	2.96	3.95	1.76
VIII Transport, Storage and Communications.	2,36	3.65	0.29	1.61	2.86	0.09
IX Other Services	8.54	11.25	4.18	7.26	10.34	3.48
Total Workers ..	100.00	100.00	100.00	100.00	100.00	100.00

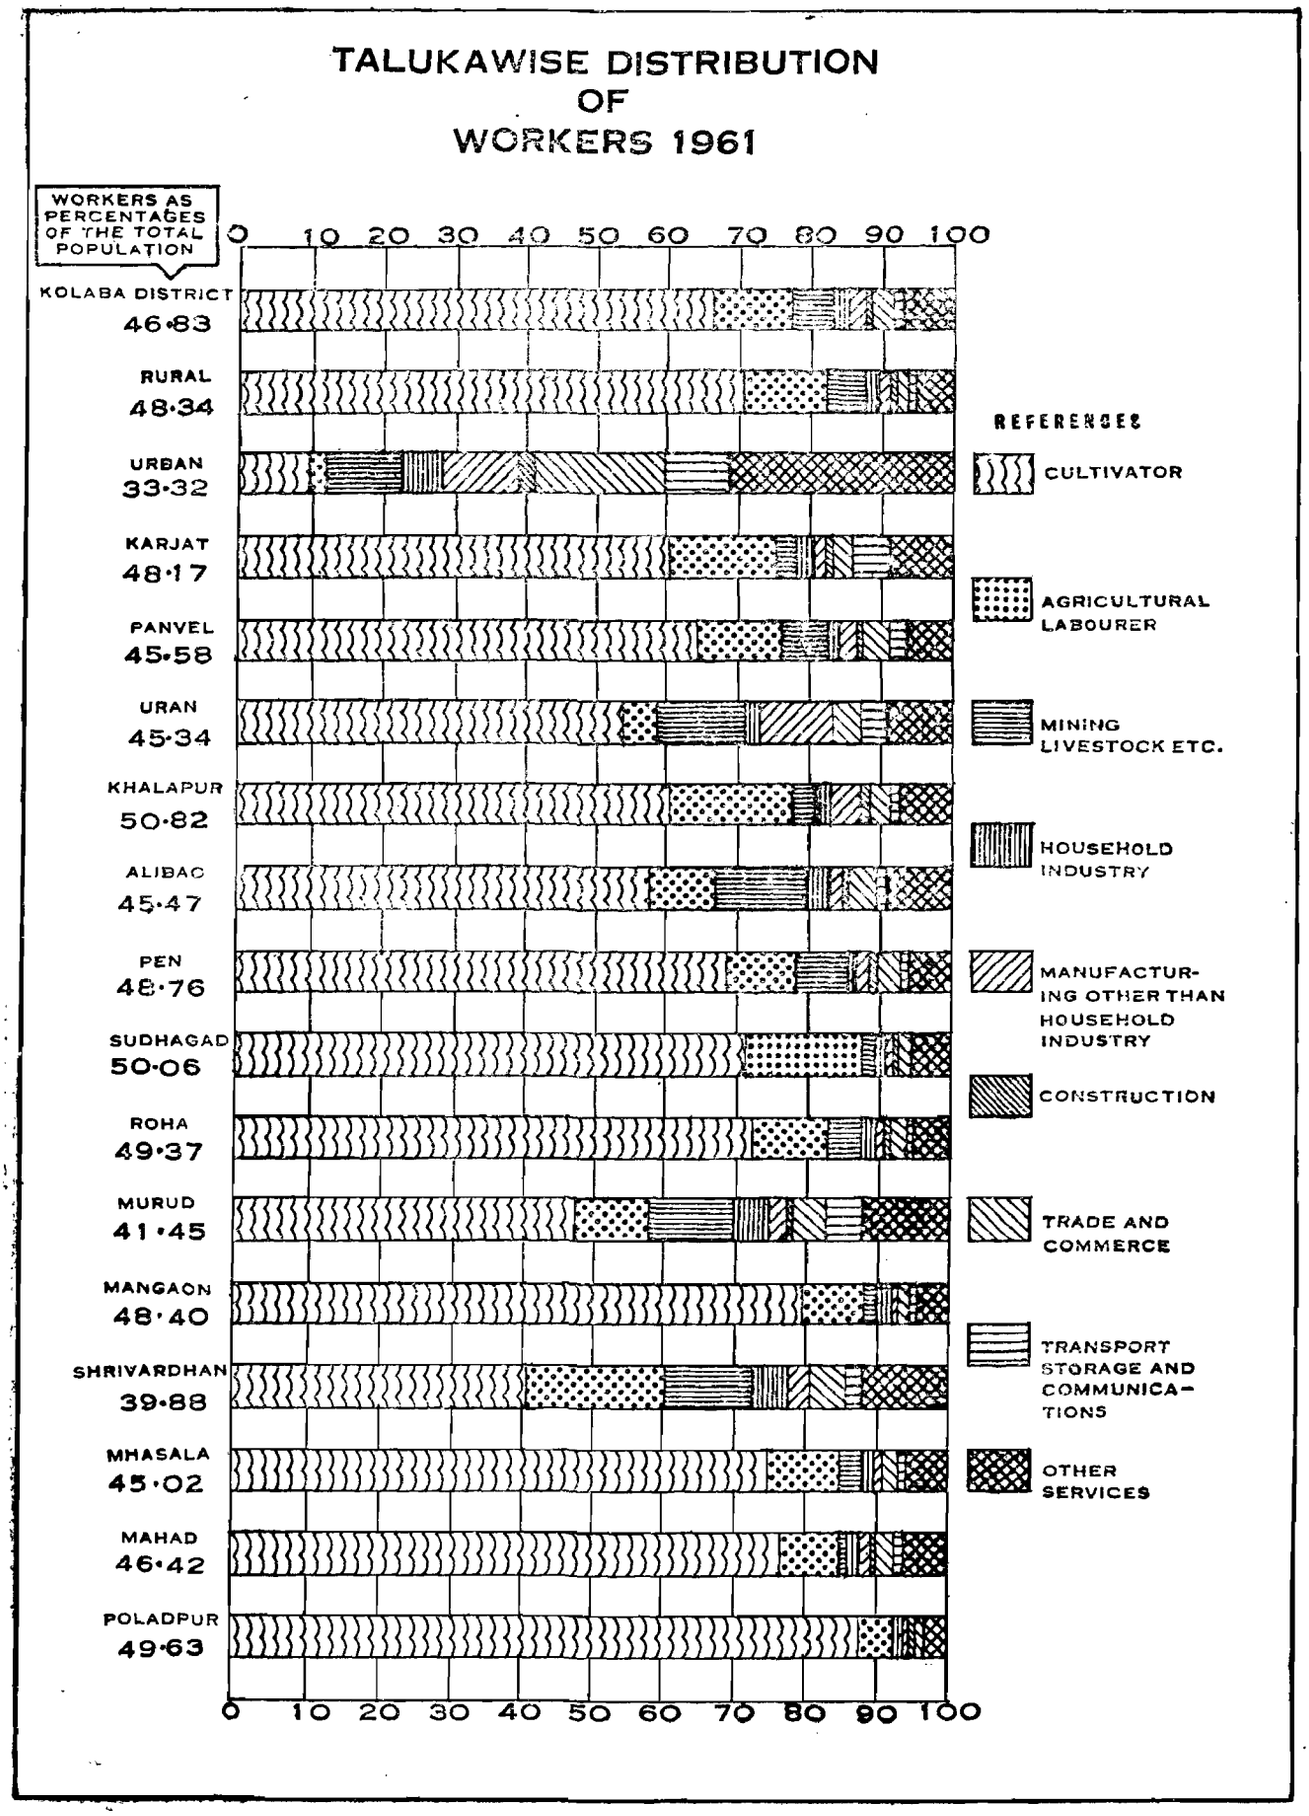

A remarkable departure from the State average is that the proportion of agricultural labourers is very low both for males and females and that the deficiency is more than made up by the higher proportions of cultivators. The State ratio between cultivators and agricultural labourers is 2 : 1 while for the district it is 7 : 1. The labour participation rates are comparable with the average for the State but the overwhelming preponderance of cultivators over agricultural labourers seems to be a special feature of the district. This may be due to the rice predominated crop pattern and cultivation practices in which outside hired labour is not appointed as much as in the other districts of Maharashtra. The other reason is that those who are so hired are themselves small cultivators and in addition to work on their own lands also work as agricultural labourers.

Table B-VII-A shows that there are 86,548 cultivators who are also working as agricultural labourers. Compared to the State average the proportion in category III is high in the district because of the fishing industry and the existence of forests. The proportions in all the other categories, *viz.*, IV to IX are lower in the district.

Talukawise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and the district are also shown for comparison.

The distribution of workers by nine categories is also shown in the figure on page (59) for the district and each taluka separately. The proportion of agricultural labourers is high in Shriwardhan and Sudhagad mahals and Khalapur taluka. Shriwardhan mahal is known for its betelnut gardens. Proportions in category III are naturally higher in coastal talukas like Alibag, Uran, Shriwardhan and Murud. That is due to the prosperous fishing industry. The proportion in category V manufacturing is the highest in Uran mahal mainly because of the salt works and a few well-established factories.

State / District / Taluka	I Cultivator	II Agricultural Labourer	III Mining, quarrying, livestock, forestry, fishing, etc.	IV Household Industry	V Manufacturing other than household industry	VI Construction	VII Trade and Commerce	VIII Transport, Storage and Communications	IX Other services	Total

Labour Participation by Age

Labour participation rates by age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-group	Kolaba District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All Ages ..	46·83	53·06	40·94	47·91	57·09	38·10
0—14 ..	5·03	5·39	4·65	8·72	8·62	8·84
15—34 ..	80·93	89·69	73·73	74·53	87·45	60·90
35—59 ..	81·31	97·02	65·73	81·57	96·86	63·68
60+ ..	41·56	68·48	17·19	49·13	72·82	26·28

Labour participation rates for the total population are lower than the Maharashtra average in 0—14, 35—59 and 60+ age-groups. They are higher only in the age-group 15—34 mainly because of a very high participation rate for females in that age-group. Lower participation in 0—14 age-group indicates that a large proportion of children are sent to schools.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra ..	68·65	14·11	13·91	3·33
Kolaba District ..	74·71	13·67	10·39	1·23

The proportion of urban population is lower and agriculture is more dominating the economy in the district than the State average. The literacy rate in the district is also lower (24·56 per cent) than the State average (29·82 per cent). The proportion of illiterates among the workers is, therefore, naturally very high and the proportions of other educational levels are consequently lower. There are however 6,117 workers with education level matriculation and above. 3,763 of them are engaged in other services, 504 in transport, storage and communications, 568 in trade and commerce, 555 in manufacturing industry (including household industry), 146 in mining, quarrying, forestry, fishing, etc., 199 in construction and as many as 382 in agriculture.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage proportions of employers, employees, single workers and family workers in the district, for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II.

	Total workers	Class of workers			
		Employers	Employees	Single workers	Family workers
Maharashtra Total	100	3·96	62·18	26·52	7·34
Rural	100	1·57	46·47	38·58	13·38
Urban	100	4·98	68·90	21·37	4·75
Kolaba District. Total	100	3·07	46·91	30·07	19·95
Rural	100	2·33	45·93	30·54	21·20
Urban	100	4·88	49·32	28·93	16·87

The proportion of single workers is lower in rural areas and higher in urban areas as compared to State averages. Proportion of employers is not much lower in the district. In fact it is higher in rural areas than the State average. But the proportions of employees are considerably lower than the State average. It may be so because there are very few large-scale establishments or factories in the district.

Percentage Distribution in Household Industry by Employees and others

The proportion of employees, *i.e.*, hired workers and others in household industries in the district for total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows:—

		Total workers	Employees	Others
Maharashtra	Total	100	8·18	91·82
	Rural	100	4·91	95·09
	Urban	100	16·35	83·65
Kolaba District	Total	100	11·64	88·36
	Rural	100	12·30	87·70
	Urban	100	8·86	91·14

The proportions of employees in household industries are higher in the district. In rural areas the proportion is approximately three times higher than the State average. But in urban areas it is as low as half of the State average. The proportion of employees in household industry is so high in rural areas because 424 women are employed in fishing industry, 136 men in food industry like rice-pounding or poha-making, 79 men in livestock and hunting and 121 men in manufacture of non-metallic products like pottery, stone or clay images, etc.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II) :—

Categories of Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work I	II	IV
MAHARASHTRA				
I Cultivation ..	Total ..	..	17.85	1.97
	Rural ..	..	18.03	1.98
	Urban ..	..	10.54	1.32
II Agricultural Labour	Total ..	13.17	..	0.94
	Rural ..	13.46	..	0.97
	Urban ..	7.12	..	0.31
IV Household Industry	Total ..	14.78	6.97	..
	Rural ..	19.61	9.38	..
	Urban ..	2.70	0.95	
KOLABA DISTRICT				
I Cultivation ..	Total ..	..	26.26	1.39
	Rural ..	..	26.33	1.39
	Urban ..	..	19.48	1.25
II Agricultural Labour	Total ..	25.15	..	0.61
	Rural ..	25.45	..	0.62
	Urban ..	6.70	..	0.24
IV Household Industry	Total ..	19.52	4.50	..
	Rural ..	22.02	5.28	..
	Urban ..	8.91	1.16	..

86,548 or about one-fourth of the total number of cultivators in the district also work as agricultural labourers. Similarly, one-fourth of the agricultural labourers also work as cultivators as a secondary or subsidiary work. These proportions are higher for total and rural areas than the State averages. All these workers having the dual classification are actually the holders of very small land holdings who work in the secondary categories to supplement their earnings from the principal work. More than one-fifth of the workers engaged in household industries also work as cultivators.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

Occupational Division	Maha-rashtra	Kolaba District
0 Professional, technical and related workers.	6·42	6·27
1 Administrative, executive and managerial workers.	3·89	3·08
2 Clerical and related workers ..	9·13	4·32
3 Sales workers	12·23	12·27
4 Farmers, fishermen, hunters, loggers and related workers.	7·64	23·67
5 Miners, quarrymen and related workers.	0·75	2·34
6 Workers in transport and communication occupations.	3·57	4·18
7 & 8 Craftsmen, production and process workers and labourers not elsewhere classified.	45·99	34·19
9 Service, sport and recreation workers	10·27	9·53
X Workers not classifiable by occupation.	0·11	0·15
Total ..	100·00	100·00

The district proportions in occupational divisions excepting divisions 3 (sales workers), 4 (farmers, fishermen, etc.), 5 (miners, quarrymen, etc.) and 6 (workers in transport and communication occupations) are lower than the State average. The proportions in occupational divisions 4 and 5 are higher for the district because of the prosperous fishing industry and large extents of forests.

Non-Workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	34.21	12.34	32.71	11.05	46.03	20.50
(2) Household duties	0.57	31.69	0.60	29.25	0.39	47.14
(3) Dependents, infants and disabled	62.65	55.55	64.76	59.33	46.10	31.59
(4) Retired, rentiess or independent means.	0.83	0.22	0.60	0.21	2.57	0.31
(5) Beggars, vagrants, etc.	0.16	0.09	0.14	0.08	0.35	0.16
(6) Inmates of institutions	0.12	0.02	0.12	0.03	0.10	0.01
(7) Persons seeking employment for the first time.	0.68	0.04	0.52	0.02	1.94	0.18
(8) Unemployed but seeking work..	0.78	0.05	0.55	0.03	2.52	0.1
Total ..	100.00	100.00	100.00	100.00	100.00	100.00

There is a marked difference in the distribution pattern for non-workers among males and females. 34·21 per cent out of male non-workers are full-time students while the corresponding proportion for females is 12·34 per cent. The reason is that 31·69 per cent females who are engaged in household duties are also included as non-workers.

There are rural-urban differences in the proportion of dependents. The remaining categories each has less than one per cent of non-working population. The rural-urban differences are similar both for males and females. In urban areas, the percentage of full-time students is almost equal to that for dependents for males. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 4·46 and 1·07 for males in urban and rural areas and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower because the group of non-workers contains a large number of adult women engaged in household duties.

Seasonal Migration

The houselist population reported for the district on 1st October 1960 was 10·53 lakhs. With the decade average rate of growth it was estimated for 1st March 1961 at 10·60 lakhs. It actually came to be 10·59 lakhs or one thousand short of the estimate. It may be due to the net seasonal out-migration from the district. Talukawise differences in the two sets of figures are striking in a few cases. Sudhagad mahal is short by four thousands, Karjat taluka by two thousands and Panvel, Khalapur, Pen and Mangaon talukas by one thousand each. These seasonal migrants are accounted as follows. Mahad taluka and Poladpur mahal three thousands each, Uran mahal two thousands and Alibag taluka one thousand. Seasonal migration to Uran mahal and Alibag taluka can be understood because of fishing industry, garden crops and salt works. But if Mahad taluka and Poladpur mahal also attract workers on land or forests may need local investigation. A large number of shepherds are however known to migrate with their flocks from up-Ghat areas down to Konkan.

Majority of seasonal migrants appear to be males as would be obvious from the following sex ratios for the total population reported in October 1960 and March 1961 :—

		1st October 1960	1st March 1961
KOLABA DISTRICT	Total	1,050	1,058
	Rural	1,063	1,072
	Urban	942	943
Karjat Taluka ..	.. .. ..	921	927

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the othe hand, statutorily recognised villages having no population have been shown with separate code numbers but with words "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown in roman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from Census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the ccupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.* shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

PART II

CENSUS TABLES

These include General Population, Economic, Household Economic, Social, Cultural, Housing and other Special Tables

CONTENTS

		PAGE
Explanatory Note (With Appendices I—III)		113
A—GENERAL POPULATION TABLES		
A-I ..	Area, Houses and Population ..	135
	Appendix I—Statement showing 1951 Territorial Units constituting the present 1961 set-up of the District.	136
	Appendix II—Number of Villages with a population of 5,000 and over and Towns with a population under 5,000.	136
	Appendix III—Houseless and Institutional Population.	136
A-II ..	Variation in population during sixty years.	137
A-III..	Villages classified by population. ..	138
A-IV..	Towns (and Town-groups) classified by population in 1961 with variation since 1901.	139
B—ECONOMIC TABLES		
(1) General Economic Tables		
Primary Census Abstract		140
B-I and B-II.	Workers and Non-workers in Talukas and Towns classified by sex and by broad age-groups.	142
B-III..	Industrial classification of workers and non-workers by educational levels—	
	Part A—District Total	152
	Part B—District Rural	152
	Part C—District Urban	152
	Part D—Talukawise Rural only..	153
B-IV..	Part A—Industrial classification by sex and class of worker of persons at work at household industry.	156
	Part B—Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.	157
	Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.	159
B-V ..	Occupational classification by sex of persons at work other than cultivation.	166
B-VI..	Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in Urban areas only.	172

		PAGE
B—ECONOMIC TABLES—*concld.*		
(1) General Economic Tables—*concld.*		
B-VII	Part A—Persons working principally (i) as Cultivators, (ii) as Agricultural labourers or (iii) at Household Industry classified by sex and by secondary work (i) at household industry, (ii) as cultivator or (iii) as agricultural labourer.	174
	Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry.	175
B-VIII	Part A—Persons unemployed, aged 15 and above, by sex, broad age-groups and educational levels in Urban areas only.	176
	Part B—Persons unemployed aged 15 and above, by sex and educational levels in Rural Areas only.	176
B-IX	Persons not at work classified by sex, broad age-groups and type of activity.	178
(2) Household Economic Tables		
B-X ..	Sample Households (i) engaged neither in cultivation nor household industry, (ii) engaged either in cultivation or household industry but not in both and (iii) engaged both in cultivation and household industry.	180
B-XI ..	Sample Households engaged in cultivation classified by interest in land and size of land cultivated.	181
B-XII..	Sample Households engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers.	182
B-XIII..	Sample Households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry.	187
B-XIV..	Sample Households engaged only in Household Industry classified by principal household industry—	
	Part A—Households classified by major groups of Principal Household Industry and number of persons engaged.	188
	Part B—Households classified by minor groups of Principal Household Industry.	189
B-XV ..	Sample Households engaged both in cultivation and household industry classified by size of land.	190
B-XVI..	Sample Principal Household Industry classified by period of working and total number of workers engaged in household industry.	196

ST-II..	Persons not at work classified by sex and type of activity for Scheduled Tribes.	222
	E—HOUSING TABLES	
E-I ..	Census houses and the uses to which they are put.	223
E-II ..	Tenure status of sample census households living in census houses used as dwelling.	224
E-IV..	Distribution of sample households living in Census Houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof.	225
E-V ..	Sample households classified by number of members and by number of rooms occupied.	226
	Number of Establishments and Workers for Industries classified by Minor Groups of Industrial Classification.	227

EXPLANATORY NOTE

This Part contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (*e.g.*, A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (*e.g.*, B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical location for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of village or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. This shows the territorial changes that have taken place during the decade. Units which had some change in area in the decade are only shown here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as town and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) person who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahootics, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, sea shore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season ; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The " household " is slightly different from a " family ". A " household " is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribe , respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A " literate " is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-VII.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I. As Cultivator.
II. As Agricultural Labourer.
III. In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV. At Household Industry.
V. In Manufacturing other than Household Industry.
VI. In Construction.
VII. In Trade and Commerce.
VIII. In Transport, Storage and Communications.
IX. In other services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, live-stock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, waterman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in service incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately, while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-II .

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I.	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II.	Agricultural Labourer ..	
III.	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV.	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V.	Manufacturing	Divisions 2 and 3.
VI.	Construction	Division 4.
VII.	Trade and Commerce ..	Division 6.
VIII.	Transport, Storage and Communications.	Division 7.
IX.	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Co'umns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes "employer", "employee", "single worker" and "family worker":

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I), The number of workers against each division, major group or minor group is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii), even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivator and II-Agricultural labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in cloumn (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka, separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry ;

(ii) engaged in cultivation only ;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and

by industry division and major group of the household industry (Appendix I). The table shows the sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 Tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of landholding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of landholding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part-III of the Maharashtra Census Report.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. All the same, the table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of landholdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of landholding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0–9 years and 70 and over. The entire population in 0–9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Table C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-B of Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activityl Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This Table for Scheduled Tribes, (same as Part A) is presented only for the district rural. The table is prepared from household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order. The figures for rural areas only are also shown separately for talukas having more than 25 per cent Tribal population.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The figures for rural areas only are also shown separately for talukas having more than 25 per cent Tribal population.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five Tables in this Series. Four of them relate to housing conditions and urnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major group and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown n columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods, goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124 This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, live-stock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Live-stock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Division 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal.
36	Basic Metals and their products except machinery and transport equipment.
37	Machinery (all kinds other than Transport) and Electrical equipment.
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services
83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations.
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described. (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting—*concld.*	
04	*Live-stock and Hunting—*	
	Production and rearing of live-stock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugar-cane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor, from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven ..	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products.	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railways bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	615
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
63	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade—*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in food stuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobiloil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper ..	661
	Retail trading in metal, porcelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous—*	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport—*	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered ahove	709
71	*Services incidental to transport—*	
	Such as packing, carting travel agency ..	710
72	*Storage and Warehousing—*	
	Operation of storage such as ware-houses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication—*	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting..	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services—*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or inividuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note: n. e. c.= not elsewhere classified

DIVISIONS

0 Professional, technical and related workers
1 Administrative, executive and managerial workers
2 Clerical and related workers
3 Sales workers
4 Farmers, fishermen, hunters, loggers and related workers
5 Miners, quarrymen and related workers
6 Workers in transport and communication occupations
7-8 Craftsmen, production process workers, and labourers not elsewhere classified
9 Service, sport and recreation workers
X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers
- 00 Architects, Engineers and Surveyors
- 01 Physicists, Chemists, Geologists and other Physical Scientists
- 02 Biologists, Veterinarians, Agronomists and Related Scientists
- 03 Physicians, Surgeons and Dentists
- 04 Nurses, Pharmacists and other Medical and Health Technicians
- 05 Teachers
- 06 Jurists
- 07 Social Scientists and Related Workers
- 08 Artists, Writers, and Related Workers
- 09 Draughtsmen, Science and Engineering Technicians, n. e. c.
- 0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers
- 10 Administrators, and Executive Officials, Government
- 11 Directors and Managers, Wholesale and Retail Trade
- 12 Directors, Managers and Working Proprietors, Financial Institutions
- 13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers
- 20 Book-Keepers and Cashiers
- 21 Stenographers and Typists
- 22 Office Machine Operators
- 28 Clerical Workers, Miscellaneous
- 29 Unskilled Office Workers

3 Sales Workers
- 30 Working Proprietors, Wholesale and Retail Trade
- 31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
- 32 Commercial Travellers and Manufacturers' Agents
- 33 Salesmen, Shop Assistants and Related Workers
- 34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers
- 40 Farmers and Farm Managers
- 41 Farm Workers
- 42 Hunters and Related Workers
- 43 Fishermen and Related Workers
- 44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers
- 50 Miners and Quarrymen
- 51 Well Drillers and Related Workers
- 52 Mineral Treaters
- 59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations
- 60 Deck Officers, Engineer Officers and Pilots, Ship
- 61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen
- 62 Aircraft Pilots, Navigators and Flight Engineers
- 63 Drivers and Firemen, Railway Engine
- 64 Drivers Road Transport
- 65 Conductors, Guards and Brakesmen (Railway)
- 66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
- 67 Telephone, Telegraph and Related Telecommunication Operators
- 68 Postmen and Messengers
- 69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified
- 70 Spinners, Weavers, Knitters, Dyers and Related Workers
- 71 Tailors Cutters, Furriers and Related Workers
- 72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers
- 73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
- 74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
- 75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
- 76 Electricians and Related Electrical and Electronics Workers
- 77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
- 78 Painters and Paper Hangers
- 79 Bricklayers, Plasterers and Construction Workers, n. e. c.
- 80 Compositors, Printers, Engravers, Book Binders and Related Workers
- 81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
- 82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
- 83 Chemical and Related Process Workers
- 84 Tobacco Preparers and Products Makers
- 85 Craftsmen and Production Process Workers, n. e. c.
- 86 Testers, Packers, Sorters and Related Workers
- 87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
- 89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers
- 90 Fire Fighters, Policemen, Guards and Related Workers
- 91 House Keepers, Cooks, Maids and Related Workers
- 92 Waiters, Bartenders and Related Workers
- 93 Building Caretakers, Cleaners and Related Workers
- 94 Barbers, Hairdressers, Beauticians and Related Workers
- 95 Launderers, Dry Cleaners and Pressers
- 96 Athletes, Sportsmen and Related Workers
- 97 Photographers and Related Camera Operators
- 99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations
- X0 Workers without occupations
- X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
- X9 Workers Not Reporting Occupations.

APPENDIX III
COMMON HOUSEHOLD INDUSTRIES
[with their Industrial Code Numbers]

Note : n. e. c. = not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal.
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of padd y by rice mill
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and foodgrains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweet-meats, laddu, peda, barphi, batasa, etc
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date plam fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkaha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
Major Group 27—Textile—Miscellaneous	
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*concld.*	
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat, and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including rain- coats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n . e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld.*
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of artwheels
289·4	Manufacure of other wood and allied products n.e.c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags
292·2	Papier mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
	Major Group 30— Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving , etching, block making, type cutting and other work connected with printing industry.
303	Book binding, stitching, sizing and other work conneteed with book binding industry
	Major Group 31—Leather and Leather Products
310·1	Flying, processing of hides and skins including taxidermy
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals).
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur.
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths, etc.
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335.6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products —*concld.*
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemicals products n. e. c.
	Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346·1	Ma king of images from soap stone
346·2	Manufacture of images, toys and other articles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods, n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*	
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n.e.c.
366·1	Making of aluminium utensils
366·2	Making of other aluminium products n. e. c.
367·1	Making of tin utensils
367·2	Making of articles from tin sheets
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets
369·4	Making and repairing of locks and trunks
369·5	Cutlery
369·6	Manufacture of pins
369·7	*Manufacture of scales, weights and measures*
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n. e. c.
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts.
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
Major Group 38—Transport Equipment	
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
Major Group 38—Transport Equipment—*concld.*	
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
Major Group 39—Miscellaneous Manufacturing Industries	
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including Silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc. *n.e.c.*
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets, balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n. e. c.

APPENDIX I

Statement showing 1951 Territorial units constituting the present 1961 set-up of the District

District/Taluka	1961 Territorial Units		
	Name	Area	
		Sq.Miles	Sq. Km.
(1)	(2)	(3-a)	(3-b)
KOLABA DISTRICT			
Sudhagad Mahal	As in 1951	162.0	419.6
	Plus: 10 villages transferred from Roha Taluka	+13.7	+35.5
	Total ..	175.7	455.1
Roha Taluka	As in 1951	272.0	704.5
	Minus: 10 villages transferred to Sudhagad Mahal	−13.7	−35.5
	Total ..	258.3	669.0
Mangaon Taluka	As in 1951	362.7	939.4
	Plus: 5 villages transferred from Mhasala Mahal	+5.9	+15.3
	Total ..	368.6	954.7
Mhasala Mahal	As in 1951	134.4	348.1
	Minus: 5 villages transferred to Mangaon Taluka	−5.9	−15.3
	Total ..	128.5	332.8
Mahad Taluka	As in 1951	271.1	702.1
	Plus: 20 villages transferred from Poladpur Mahal	+41.2	+106.7
	Total ..	312.3	808.8
Poladpur Mahal	As in 1951	188.0	486.9
	Minus: 20 villages transferred to Mahad Taluka	−41.2	−106.7
	Total ..	146.8	380.2

APPENDIX II

Number of Villages with a Population of 5,000 and over and Towns with a Population under 5,000

J-62-III-31-B—Kolaba.

EXPLANATORY NOTE

THE SCOPE of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. "Normal rainfall" [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, viz., " Daily Rainfall of India " and " Monthly Rainfall of India".

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, river beds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchard are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not morethan five years ;

(ix) *Net area sown*: The net area sown is the actual area under crops counting areas sown more than once in the same year only once;

(x) *Gross cropped area*: This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, viz., foodcrops and non-foodcrops. Foodcrops are further grouped by "cereals, pulses and others". Non-foodcrops are similarly shown under "oilseeds and others".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, viz., 1950-51, 1955-56 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area, and the gross irrigated area, are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters. (However, this table is not presented for this district as the Data are not available.)

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years: 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, i.e., calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, viz., 1961.

The word "factories" here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, viz., 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is availabe and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
