8. Sitai Police Station 177

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the proces of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, Primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items.. A new statement on civic and other amenities in slums in Class__I and Class__II towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into considerations. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part - A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, I A S, the Director of Census Operations, West Bengal on behalf of the State Government which has borne the cost of printing The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April, 1982

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt, district administration, research scholars and various other data-users owes its origin to 1951 Census The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Primary Census Abstract included in the publication relate to the district of Koch Bihar. A brief analytical note with a number of inset tablesbased on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census operation in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning, enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1933 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are greateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt. Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Koch Bihar (Principal Census Officer) and his innumerable colleagues including the Charge Superintendents, Census Supervisors, Census enumerators. The data were processed under the Deputy Director in-charge of the Regional Tabulation office by a host of Coders, Checkers, Tabulators. Supervisors *etc.* We acknowledge their countributions to the preparation of this volume.

The final tabulation and compilation of data have been done by the Central Tabulation Unit of this

office under the supervision of Sri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operation, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The credit for preparation of the maps goes to the Map unit of this directorate under the technical and administrative guidance and supervision of Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal, who was ably assisted by Shri Chourajit Singh, Senior Geographer, Sri T. S. Khadatkar, Geographer and their colleagues.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Sri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Sri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among officials of the State Government who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS, Shri B. Bhattacharyya, WBCS. both Deputy Secretaries to the Govt of West Bengal; Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

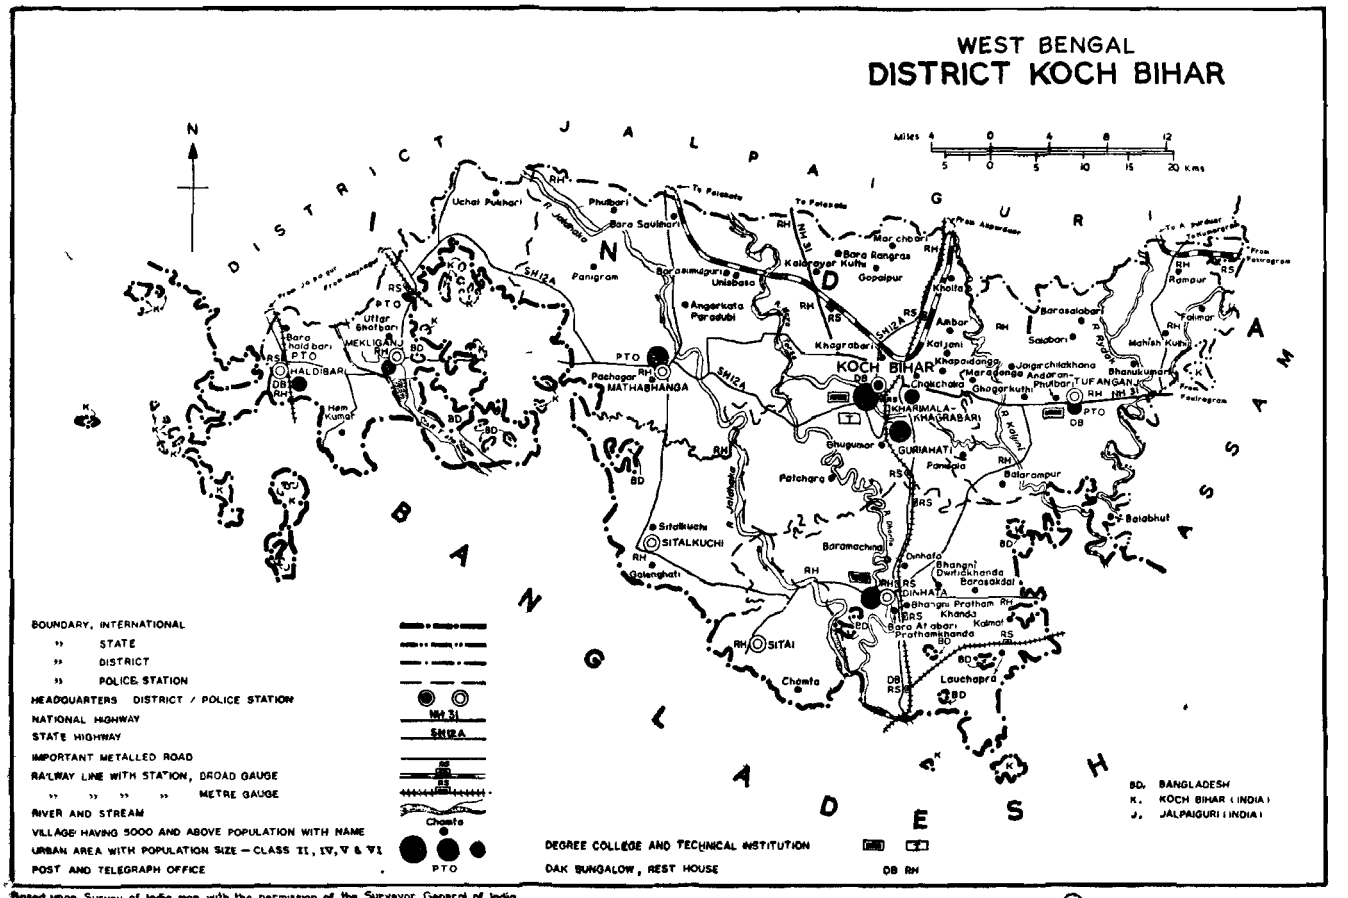

Lastly, we must express our appreciation to Joyma Kali Press, 90 B. C. Road, Barddhaman for the printing of this publication.

Sukumar Sinha
Joint Director of Census Operation,
West Bengal

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows :

a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

b) All other places which satisfied the following criteria :

i) A Population of 5,000 as the minimum,

ii) Density per square kilometre would be a minimum of 400, and

iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census, An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographycally contiguous urban continuum. An urban agglomeration shows how a particular area has had geographycally continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must neceassarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, *i. e.* it would have a population of less than 5,000 but more than 600.
All other areas which are not convered by the definition of urban as stated above will be treated as Rural.

Census House :

We defined the census house in the following manner :
"A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of Singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use.

Household :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both".

Scheduled Castes/Scheduled Tribes :

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribes returns his caste or tribe by a synonym or generic name

of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

Literates :

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

Main Worker :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other. viz. main workers, marginal workers and non-workers.

The 1961 Census definition of worker as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the "Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly . .....There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activety, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons..... participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census anyone who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts viz. (i) cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) other workers in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories.

Marginal Worker :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding Enumeration.

Non-Workers :

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggers etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

Scope of Primary Census Abstract :

The Primary Census Abstract is the basic table prepared from the total count of census. It has been presented at three levels, viz. (1) District Primary Census Abstract, (2) Urban/Village Primary Census Abstract and (3) Primary Census Abstract of Scheduled Castes and Scheduled Tribes—District level showing towns and police stations. The District Primary Census Abstract presented here corresponds to that in 1971 and contains the following items :—Area of the police stations/towns in Km^2, number of occupied residential houses, number of households, total population and its division into sexes, scheduled castes population and its division into males and females, scheduled Tribes population and its division into males and females, the sex division of the literates, total male main worker and total female main worker, total male cultivators

and total female cultivators, similar sex division of agricultural labourers, household industries, other workers, marginal workers and non-workers. All these information have been covered in 39 columns.

The urban/village PCA has been outlined with 28 cols and have been depicted with occupied residential houses, number of households, population, scheduled castes population, scheduled tribes population, literates, main workers showing its four broad divisions, marginal workers and non-workers All these data have been shcwn with sex division. The urban/village PCA represents data wardwise for statutory towns and as a whole for non-statutory towns and mouzawise.

The Primary census abstracts of scheduled castes and scheduled tribes represent separately all information like scheduled castes and scheduled tribes population, literates, main-workers with broad categories, marginal workers and non-workers showing males and females for all the items in 31 columns.

The 1981 Census categorised workers into four major categories. The first and second categories *i e* cultivators and agricultural labourers correspond to categories followed in 1971. The third category represents workers corresponding to category v(a) of 1971. All other remaining workers grouped together in category iv of 1981. This category includes workers engaged in categories III, IV, V(b), VI, VII, VIII and IX of 1971.

ANALYSIS OF DATA

It is a Census tradition to analyse certain data on sccial and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District Census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District Census Handbook 1981 follows the same manner as in 1951 and 1961. A large number of inset tables has been prepared on Town Directory, Village Directory and Primary Census Abstract to make the analysis more scientific and acceptable.

TABLE 1—POPULATION, NUMBER OF

Sl. No.	Name of Police Station	Population		
		Total		
		Persons	Males	Females

Table 1 presents data on sexwise pupulation by rural and urban separately, number of villages and towns in the district of Koch Bihar in 1981 Census. The district Koch Bihar is predominantly a rural district and 93.10 percent of its population live in villages. The district has seven towns only of which two are administered by municipality, four by town committee and remaining one is a non-municipal town. Of the municipalities, the district headquarters Koch Bihar is a class II town with a population of 67327 and Subdivisional headquarters Dinhata with a population of 14536 has acquired the size Class IV status. Two of the four town committees Mekliganj and Tufanganj cater the needs of towns of size class VI whereas one each for the size classes IV & V viz. Mathabhanga Town committee for sizs class IV and Haldibari in size class V, The solitary non-municipal town Guriahati has the status of a class IV town. Among the statutory towns of the state of West Bengal, Mekliganj with the population of 4534 happens to be smallest urban unit according to 1981 census. The urban population of the district workout to 6.90 percent only. The district is therefore predominantly a rural. Hrghest concentration of rural population is found in the Koch Bihar police station.

TABLE 2—DECADAL CHANGE IN DISTRIBUTION OF POPULATION

Sl. No.	Police Station	Population 1971 Total	1971 Rural	1971 Urban	Population 1981 Total	1981 Rural	1981 Urban	Percentage decadal Variation (1971-81) Total	Rural	Urban

Table 2 deals with decadal variation in population during 1971-81. The district has registered a growth rate of 25.28 percent during this decade which is higher than the state figure of 23.17 percent in this regard. The growth rate of 1961-71 for the district was recorded as 38.67 percent against the state average of 26.87%, the decadal growth rate is higher for urban areas than rural areas of the district. In terms of percentage they are 26.50 and 25.19 respectively. The position in 1961-71 was 38,93 percent for rural areas and 35.28 percent for urban areas. The police stationwise highest growth rate is observed in Sitai P. S. which is recorded as 34.04 percent. Likewise Haldibari P. S. shows the highest growth rate of 39.86 percent among the urban areas in the district. On the other hand, Tufanganj police station accounts for 19.34 percent growth during the decade 1971-81 which happens to be the lowest growth rate in the district.

TABLE 3—DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Range of Population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
— 200	132	11·60
200— 499	234	20·54
500—1,999	528	46·36
2,000—4,999	198	17·38
5,000—9,999	42	3·69
10,000+	5	0·43
Total	**1,139**	**100·00**

Table 3 presents distribution of villages according to the size of population. It transpires that 46.36 percent of the villages in the district have population in the range of 500-1999. There are 5 villages in the district where the population exceeds 10,000.

TABLE 4—DISTRIBUTION OF VILLAGES BY DENSITY

Range of density (Per sq. Kms.)	Total No. of Villages in each density range	Percentage of Villages in each density range
1	2	3
— 10	1	Negligible 0·09
11— 20	1	Negligible 0·09
21— 50	9	0·79
51—100	14	1·23
101—200	46	4·04
201—300	77	6·76
301—500	444	38·98
501+	547	48·02
Total	**1,139**	**100·00**

The density of population in the villages of the district of Koch Bihar is shown in Table 4. There are as many as 547 villages in the district constituting 48.02 percent of the total inhabited villages belong to the density range of 501 and plus per sq. km. The pattern of distribution of densities in villages has been examined police stationwise. The observations are significant to the extent that out of 246 inhabited villages in Dinhata P. S.. 180 villages constituting 73.17 percent and out of 259 inhabited villages in Koch Bihar P. S., 148 villages i. e. 57.14 percent have fall in the density range of 501 and plus.

TBALE 5—PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Caste Population to Total Population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
0— 5	30	2·98
6—10	40	3·98
11—15	30	2·98
16—20	40	3·98
21—30	80	7·95
31 and above	786	78·13
Total	**1,006**	**100·00**

Note :—Only those villages have been taken into account where the scheduled castes population are found.

The proportion of scheduled caste population to total population in the villages of the district Koch Bihar is given in table 5. Although there are as many as 1139 inhabited villages in the district, the scheduled caste population are found In 1006 villages only. It is interesting to note that three fourths of the inhabited villages have schedule caste population exceeding 31 percent of the total population. The proportion of scheduled caste population to total population as low as 0-5 percent is found in 30 Villages only.

TABLE 6—PROPORTION OF SCEHDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Tribe Population to Total Population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
0— 5	127	76·05
6—15	29	17·36
16—25	5	2·99
26—35	3	1·80
36—50	..	..
51 and above	3	1·80
Total	**167**	**100·00**

Note :—Only those villages have been taken into account where the scheduled tribe population are found.

Table 6 deals with the proportion of scheduled tribe population in the villages of the district of Koch Bihar. In 76.05 percent of the total inhabited villages, the percentage of scheduled tribe population to total population is 5 percent or less. There are only 3 villages in the district where the scheduled tribe population is 51 percent or more.

TABLE 7—POPORTION OF SCHEDULED CASTES/SCHEDULED TRIBES POPULATION IN TOWNS

Sl. No.	Name of the Town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Scheduled Caste Population to Total Population	Percentage of Scheduled Tribe Populaiotion to Total Population
1	2	3	4	5	6	7
1	Dinhata	14,536	1,415	19	9·73	0·13
2	Guriahati	12,774	1,535	57	12·02	0·45
3	Haldibari	7,130	1,532	161	21·49	2·26
4	* Koch Bihar	67,327	7,773	166	11·55	0·25
5	Mathabhanga	11,053	983	5	8·89	0·05
6	Mekliganj	4,534	1,578	13	34·80	0·29
7	Tufanganj	4,906	766	18	15·61	0·37
	All Towns	**122,260**	**15,582**	**439**	**12·74**	**0·36**

The proportions of scheduled castes and scheduled tribes population to total population in towns of Koch Bihar are available in table 7. The scheduled castes population constitute 12.74 percent in the urban areas of the district which is (10.31) above the state average in this connection. Within the district, the town Mekliganj has the highest proportion of 34.80 percent of scheduled caste population to total population. Whereas Mathabhanga is at the other extreme with 8.89 percent of scheduled caste popolation to total population.

The proportion of scheduled tribe population in the urban sector of the district is negligible i. e. 0.36 percent, which is far below the state average of 0.80 percent in respect of urban areas of West Bengal. Among the towns of the district numerically the largest concentration of scheduled tribe is to be found at Haldibari town with 2.26 percent followed by Guriahati town with 0.45 percent.

TABLE 8—LITERACY RATES BY POPULATION RANGES OF VILLAGES

Range of Population	No. of Villages in each range	Literacy rate
1	2	3
-- 200	132	25·69
200— 499	234	25·69
500—1,999	528	25·36
2,000—4,999	198	27·30
5,000—9,999	42	31·55
10,000+	5	31·72
Total	**1,139**	**27·44**

Table 8 reflects the literacy rates by population size of the villages. The table reveals that the rate of literacy in the Rural areas of the district of Koch-Bihar is 27.44 percent. The rural areas of the state of West Bengal as a whole on the other hand record the percentages as 33.12 in this connection. Highest percentage of literates (i. e. 31. 72) has been registered in villages with populatlon size of 10,000 and plus. It is significant to note that all the villages belonging to different population size have literacy rates below the State levels in this respect.

TABLE 9—LITERACY RATES FOR TOWNS

Sl. No.	Name of the Towns	Literacy Rate
1	2	3
1	Dinhata	71·36
2	Guriahati	56·04
3	Haldibari	58·91
4	Koch Bihar	67·85
5	Mathabhanga	68·12
6	Mekliganj	52·73
7	Tufanganj	70·87
	All Towns	**66·10**

The literacy rates for the various towns of the district are evident froms table 9. All the towns taken together, the percentage of literates works out to 66.10, which is above the State average of 62.66 percent, Townwise, Dinhata has the highest literacy rate with 71.36 percent and Mekliganj the lowest with 52.73 percent. Out of 7 towns of the dislrict, 3 towns have recorded literacy rates lower than the urban state average.

Tble 10 highlights the proportion of literates to total population. percentage of Scheduled Caste and Scheduled Tribe population, proportion of workers with break up into main and marginal workers and the proportion of non working population in each Police Station of the district of Koch Bihar. Out of a total population of 177163 in Koch Bihar 883084 (or 49.85 percent) belong to the Scheduled Castes and 439 (or 0.57 percent) Scheduled Tribes. The distribution of the Scheduled Castes and Scheduled Tribes is quite uneven in the Police Stations. Police Stationwise, the proportions of the Scheduled Castes and Scheduled Tribes to the total population are the heighest in Mekliganj and Koch Bihar with 71.41 percent and 2.31 percent respectively. In the urban areas of Haldibari and Makliganj the Scheduled Castes population are 43·62 percent and 34.80 percent respectively.

Against the literacy rate of 40.94 percent in the State of West Bengal, Koch Bihar district has 30.10 percent only. The proportions, In the rural and urban areas are 27.44% and 66.10% respectively. While the proportion in urban areas in this respect is quite appreciable and above the state average it is rather poor in the rural areas of the district. The rural urban differentials in respect of literacy is quite marked in all the Police Stations having urban areas,. Among the urban areas, the literacy rate is highest in Dinhata with 71 36 percent followed by Tufanganj with 70.87 percent. In the rural areas, the highest literacy is recorded in Koch Bihar Police Station with 32 67 percent whereas sitai has the lowest rate with 18.65 percent.

As regards working force in the district of Koch Bihar, 29.80 percent of the total population of the district is workers. This percentage is lower than the state average of 30.17 percent. The non workers comprise 70.20 percent in the District.
