DISTRICT CENSUS HANDBOOK

PART A—VILLAGE AND TOWN DIRECTORY

KENDUJHAR

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in views. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the corelation of the amenities

with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and accordingly to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirement of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement-IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement-V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the column on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahasil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahasil/Police station/C. D.Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. R. Nanda, I. A. S., the Director of Census Operations, Orissa on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
The 26th April, 1982

PREFACE

It has been the tradition of Indian Census to present demographic data in as detailed a manner as possible so as to serve effectively the interests of the users of Census data. 1981 Census has been completed leaving behind a vast mass of data collected carefully and meticulously on a country-wide basis by an army of trained enumerators. It is needless to mention that modern Census is no more confined to mere counting of heads. It is a kind of stock-taking, as it were, of the nation's human wealth. It has collected information of every individual, besides a host of other activities, institutions, establishments, services and so on. Thus, it has become an indispensable instrument of policy for development planning-referred to by planners, data users, scholars and people from different disciplines and aims at presenting a complete picture of man in socio-economic and cultural settings.

District Census Handbook was first introduced as an auxilliary to 1951 Census and appeared as a State Government publication in more comprehensive and ambitious form in subsequent censuses. Under the existing instruction, the Director of Census has the responsibility of providing the Census data as well as non-census socio-economic and administrative statistics for this publication which is the responsibility of the State Government. In 1951 and 1961, it was published in one volume. During 1971, this publication was proposed to be presented in three parts. Part-A incorporated the Town and Village Directories, Part-B incorporated the Primary Census Abstract and provided data upto village level for the rural area and upto enumeration block level for the urban area. Part-C incorporated other Census tables and administrative statistics.

According to the publication programme of 1981 Census, it has to be pubilshed in two parts. Part-A will comprise the Village and Town Directory whereas Part-B will contain Village and Town-wise Primary Census Abstract. The first Part__ Part-A consists of important statistical information relating to each town besides an array of statistical data relating to land use and various other amenities available in each village. Part-B of the present publication contains the essential census data known as Primary Census Abstract which provides demographic details of each district, tahasil, police station and down to each village and town and within the town, each ward. The aforesaid statistical information is enriched by the administrative map of the administrative units viz., district, tahasil and police station, availabe in the publication. These maps have been prepared in the Directorate of Census on the basis of maps obtained from the competent local authorities. In the Police Station maps, villages have been presented by their location code number for want of space. For the names of villages, one would have to refer to the alphabetical list of village of each tahasil, which are available both in Part-A and Part-B for facility of the readers.

With the object of avoiding delay and also to make each volume nandy and not-too-bulky, it has been decided to bring out 1981 District Census Handbook in two parts.

In pursuance of the scheme for publication of the District Census Handbook, an analytical note has been provided explaining the census concepts adopted in the operation for easy appreciation of the subjects covered in the directory. An administrative map of the district is given at the beginning of the volume. Brief history of the district has

been provided for introducing the district to the reader. The scope of Village Directory, Town Directory, Statements and Primary Census Abstract has been explained with reference to the contents of statements available in the publication.

The geographical aspect of the district including decadal jurisdictional changes available in the publication is intended to make it more informative. Another venture of 1981 is presentation of major characteristics of the district particularly in relation to the economic resources as furnished by the district authorities in the various fields of administration. This is directed to provide an interesting profile of the district to the reader as well as appreciation of developmental activity in the district during the decade. Notes on different codes used in this directory have been provided for the convenience of the reader in understanding the data. Note on places of religious/historical interest has been provided to make the publication more interesting. The analysis of census results of the district at the end will be of some interest to the readers and data users.

Information on amenities in the Village Directory has been collected from the Tahasildars and Block Development Officers. A very few selected items were collected through the census enumerator during his door-to-door visit. The Executive Officers of Municipalities and Notified Area Councils provided such data on towns. The collection and compilation of such massive data of each village and town was a stupendous task. Despite all possible care taken through intensive check and re-check to remove discrepancies in facts and figures, possibility of errors still creeping in can not be altogether ruled out.

I must express my deep gratitude to Shri P. Padmanabha, I. A. S., Registrar General and Census Commissioner, India and Shri N. G. Nag, Deputy Registrar General (Social Studies) for the timely guidance and advice through circulars.

I must place on record my deep appreciation and thanks to the Departments of Government of Orissa, heads of Departments, local bodies, District Officers, Tahasildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils for whose active co-operation and help the voluminous compilation has been possible.

For providing additional information on general characteristics of the district as economic activity, decadal changes (1971—81) of special note, I am grateful to Shri D. C. Gupta, I. A. S. and Shri F. B. Das, I. A. S. District Magistrates and Shri B. Chatterjee I. A. S., Shri S. N. Mohapatra, O. A. S. (I) Additional District Magistrate-cum-District Census Officers, Kendujhar who had taken keen interest in making this compilation more informative.

For timely scrutiny, compilation and tabulation of District Census Handbook data, the supervision and assistance rendered by Shri B. Sahu, O. A. S (I), N. C. Dutta, O. A. S. (I), J. Panda, O. A. S. (I), P. C. Roy, O. A. S. (I), and P. K. Mohapatra, O. A. S. (I), Deputy Directors-in-charge of Regional Tabulation Offices and their staff are worth mentioning. The job would have been difficult but for their diligent and tireless effort.

In my office, I am specially thankful to Shri S. K. Swain, Deputy Director, Shri Madan Mohan Das, O. A. S., Deputy Director, Shri C. R. Mohanty, Asst. Director and the staff of District Census Handbook, Map and Printing branches of the Census Directorate for diligence and zeal shown in this important assignment. Its expeditious preparation has placed a heavy burden on all officers and staff of this office. To each of them I am deeply obliged. The Additional Director of Survey & Map Publication, Orissa, Cuttack has ensured printing and to him I offer my thanks.

Bhubaneswar,
September, 1982.

A. R. NANDA

In my office, I am specially thankful to Shri S. K. Swain, Deputy Director, Shri Madan Mohan Das, O. A. S., Deputy Director, Shri C. R. Mohanty, Asst. Director and the staff of District Census Handbook, Map and Printing branches of the Census Directorate for diligence and zeal shown in this important assignment. Its expeditious preparation has placed a heavy burden on all officers and staff of this office. To each of them I am deeply obliged. ANALYTICAL NOTE

Census Concepts

Some of the important concepts and defi-..ons used in 1981 Census and frequently ntioned in this publication are briefly ained below.

illage

It has been the Census tradition to present ..tistics by rural-urban break-up. Villages and Towns are universally accepted as the basic units of human habitation. A "Village" refers to any tract of land recognised as a village by the local administration in the revenue record. The revenue village may have a definite surveyed boundary or not. The revenue village may comprise several hamlets which do not have definite boundary or areas distinctly marked. The revenue village is inclusive of the sites of residence of the inhabitants and the entire area including hills, nalas, cultivable land and village forest, but excluding reserve forest. An uninhabited village is one which does not have any residential population in the entire tract. A revenue village may comprise several hamlets with a boundary in case of a surveyed village or a notional boundary in case of unsurveyed village; but the entire village is one unit for presentation of census data.

There are some forest villages located inside reserve forests and recognised by the State Government, which have been taken as villages for the purpose of census. Similarly, inside the reserve forest, some clusters of habitation were located, which are sometimes unauthorised in the eye of law. Such cases were also recognised as villages by way of treating clusters inside the jurisdiction of a forester's beat as one village. In course of the decade, several areas in the State remaining unsurveyed upto the previous census, have been surveyed in the meanwhile and such villages were included in the frame of current census.

Town

No society can be strictly termed as fully urban or completely rural. The dividing line is a far from sharp, since condition varies from country to country and it has not been possible to formulate a uniform definition which can be applicable to all places.

For the purpose of 1981 Census in India, an urban area has been defined as :

(a) all places with a Municipality, Corporation or Cantonment Board or Notified Town Area.

and (b) all other places satisfying the following criteria :

(i) a minimum population of 5, 000,

(ii) atleast 75 per cent of the male working population engaged in non-agricultural (and allied) activity,

(iii) a population density of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile).

Similar criteria were also adopted during 1971 Census.

Thus the area statutorily notified by the State Government as "Municipalities" and "Notified Area Councils" have been brought under the urban frame of Census. Besides, there are some marginal cases having distinct urban characteristic which as such do not qualify to be town by the State Government. Such cases—13 in number throughout the State were finalised by the Director of Census in consultation with the District Magistrates, which have been presented under the nomenclature of non-statutory census town, satisfying the following conditions :

(a) a minimum population of 5, 000 as projected in 1981 ;

(b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits ;

(c) a density of population of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile)

Classification of Towns

It has been customary for the census to classify the towns according to the size of their population. For 1981 operation, the classification was as follows :

CLASS	POPULATION
I	100,000 and Above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Urban Agglomeration

The concept of "Urban Agglomeration" introduced during 1971 Census has also been adopted during 1981 to take care of the continuous urban spread of a recognised urban area. Very often, large railway colonies, university campuses, port areas and military camps etc. come up around the statutory boundary limit of the city or town having distinct urban characteristics. Such areas may not by themselves qualify to be treated as towns, but form a continuous spread with the town as 'out-growths' of the town and deserve to be treated as urban. Such town(s) together with their out-growths have been treated as urban units and are called "Urban Agglomerations". Thus an Urban Agglomeration may comprise :

(a) a city with continuous urban out-growth, (the part of the out-growth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) or

(b) one town with similar out-growth or two or more adjoining towns with their out-growths as in (a) or

(c) a city and one or more adjoining towns with their out-growths all of which form a continuous spread.

Accordingly, eight Urban Agglomerations have been formed in the 1981 Census throughout the State.

Standard Urban Area

During the 1971 Census, a new concept of "Standard Urban Area" was introduced in the context of urban classification. The Standard Urban Area is defined as the projected growth area of a city or town having a population of 50, 000 or more during a period of two or three decades. While delineating Standard Urban Area it is not only necessary to take into account the towns and villages which will get merged into it, but also the intervening areas which are potentially urban. The Standard Urban Area is a long-term planning area having a growth potential in a longer time span. In the context of developmental planning for urban areas, it is desirable to fix the Standard Urban Area beyond the boundary of large town having growth potential over a period of 20 years or so.

The standard urban area includes all areas which have any or all of the following characteristics (b) to (e), while characteristic (a) should be the basic minimum :

(a) Core town having minimum population of 50,000;

(b) Predominent urban land use;

(c) Intensive interaction with urban centres as reflected in communication for the purposes of work and secondary educational facilities; extension of city bus service, sale of commodities like milk, dairy products, vegetables (other than those transported by rail or truck haul) and purchase of food grains, clothes, general provisions, etc. by the consumers directly;

(d) Anticipated urban growth as a result of future location of industry, market, transport and communication, administrative and servicing facilities;

(e) Existence of big villages with large population of working force engaged in non-agricultural and industrial categories.

Taking these factors into account the following standard urban areas were formed during the 1971 Census; 1. Sambalpur

2. Raurkela, 3 Baleshwar, 4. Cuttack, 5. Jeypur, 6. Brahmapur, 7. Bhubaneswar and 8. Puri. The standard urban areas of these towns were finalised in consultation with the Town and Country Planning Organisation of Government of India and Town Planning Organisation of Government of Orissa and are continued in 1981 Census.

There is subtle difference between the standard urban area and urban agglomeration. For the urban agglomeration out-growths should be contiguous having distinct urban characterstics, whereas, standard urban areas would cover both urban and rural areas around a core town which are likely to be urbanised within a period of two to three decades.

Building

A "Building" is generally a single structure on the ground. Sometimes, it is made up of more than one component unit which are used or likely to be used as dwellings (residence) or establishments, such as shops, business houses, offices, factories, workshops, schools, places of entertainment, places of worship, godowns and stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. Usually, a structure will have 4 walls and a roof. However, there are some areas where the very nature of construction of house is such that there may not be any wall. A typical example of this may be found in the Nolia habitation at Puri, where the house does not have wall, but an entrance and the conical roof which almost touches the ground. Such structures are also treated as buildings.

Census House

A 'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

An "occupied residential house" is a census house which is partly or wholly used for the purpose of residence at the time of Census enumeration.

Household

A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of un-related persons or having a mix of both. Example of unrelated households are boarding houses, messes, hotels, residential hotels, rescue homes, jails and ashrams etc. These are called "institutional households". There may be one member households, two-member-households or multi-member households. For Census purposes, each one of these types is regarded as a household. If a group of persons who are un-related to each other live in a census house, but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person is treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen.

Enterprise

An "Enterprise" is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an enterprise may consist of members of the household or hired workers or both. An enterprise may be owned and operated by one household or by several households jointly (on a partnership basis) or by an institutional body. The activities of an enterprise may be carried on in a single census house or in more than one census house or in the open i.e. without premises. The activity of the enterprise may also be carried on only for a part of the year but on a fairly regular basis. It may also be possible that more than one enterpreneurial activity can be carried out in one census house. However, the results of such economic census after tabulation are being brought out by the Central Statistical Organisation separately. This exercise was extended to provide data for the planners regarding categories of agricultural and non-agricultural enterprises. The voluminous data included location of enterprise, description of the activities of enterprise, nature of operation,

type of ownership, social group of owner, power/fuel used for the activity and the total number of hired persons usually working in the enterprise.

Literate

A person is considered to be literate if he is able to read and write in any language with understanding. A person who can merely read but can not write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 4 years or less have been treated as illiterate, even if the child is going to school and may have picked up reading and writing a few odd words.

Scheduled Caste

The Scheduled Castes are specified in the Government of India (modification) order of 1956. 93 castes have been notified as Scheduled Castes in this State.

One caste, viz., 'Kuli' in Sambalpur district has been dropped from the Scheduled Caste list as per the Amendment Order, 1976.

Worker and Working Population

The population of a country can be divided into economically active and inactive. The economical active group is generally referred to as the working population. What proportion of our population are engaged in work or are economically active and what job they do for their living, these are the issues which the Census proposed to obtain through its massive operation in order to provide a broad dimensional picture of the labour-force. The Censuses conducted so far contain a wealth of economic data. There have been experimentations with the definitions from Census to Census and as a result, the definition of working force has rarely remained unchanged between two Censuses as would be evident from the paragraphs to follow.

"The means of livelihood" approach was adopted from 1901 upto 1951. From 1901 to 1921 the expressions used were "Workers" and "Dependents". In 1931, the concepts used were "earner", "working dependent" and "non-working dependent". In 1951, the categories were "self supporting persons", "earning dependents" and "non-earning dependents". In 1961 and 1971, however, there was a shift to the labour-force approach, according to which a person was treated as "worker" if his activity during the reference period was productive one. Thus, from 1961 the concept of worker and non-worker came into being. The difference in the concepts in 1961, 1971 and 1981 Censuses is summarised below :

(a) 1961 Census

"Workers" = mian workers + marginal workers of 1981
"Non-workers" = non-workers of 1981

(b) 1971 Census

"Workers" = main workers of 1981.
"Non-workers" = marginal workers + non-workers of 1981.

The questions which were canvassed in the individual slips during 1981 Census to elicit information on the characteristics of the population were as follows :

I. Q. 14A Worked any time at all last year ?
Yes
No (H/ST/D/R/B/I/O)

II. Q. 14B If yes in 14A, did you work for major part of last year ?
Yes (1)/No. (2)

III. Q. 15A Main activity last year ?
Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

IV. Q. 15B 14B Yes—Any other work any time last year ? Yes (C/AL/HHI/OW)/No.
14B No—Work done any time last year ? (C/AL/HHI/OW)

V. Q. 16 If no in 14A or 14B, seeking/available for work ? Yes (1)/No. (2)

Basically, during 1981 Census the questions have been formulated so as to divide the population into those who have worked any time at

all during the last year and those who have not worked at all. Having classified the population into these two broad streams, the next attempt was to divide those who have worked any time into two sub-streams viz., those who have worked in some economic activity over a period of 6 months or more or in both the agricultural seasons and those whose work can be considered as marginal or secondary (i.e. less than 6 months). Finally an attempt has also been made to determine whether those who are non-workers or those who are marginal workers are either seeking or are available for work.

"Work" has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. In all these questions the reference period is one year preceding the date of enumeration. Some work viz., agriculture and household industry are carried on either throughout the year or during a particular season or part of the year depending on local circumstances. In such cases the reference period has been the broad time span of the agricultural season preceding the enumeration has been kept.

An attempt has been made in this publication to present data relating to "main workers", "marginal workers" and "non-workers" separately. In case of main workers the distribution of such workers among cultivators and agricultural labourers, those engaged in household industry and other workers have also been given. The main workers are those who have worked for a major part of the year preceding the enumeration.

"Marginal workers" are those who have worked any time at all in the year preceding the enumeration but have not worked for a major part of the year. The type of work in which marginal worker were engaged have been elicited through question 15B.

"Non-workers" are those who have not worked any time at all in the year preceding the enumeration.

If the number of main workers, marginal workers and non-workers are added up, one would arrive at the total population itself. In other words, these are exclusive categories.

Main activity of workers has been classified into the following four broad categories :

(i) Cultivator

A person is regarded as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops viz., wheat, paddy, Jawar, bajra and other crops, such as sugarcane, groundnut etc. and pulses, raw jute and kindred fibre crops, cotton, etc. and does not include fruit, growing of vegetables or keeping orchard or groves or working of plantation like tea, coffee, rubber etc.

(ii) Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation, but merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

(iii) Household Industry

"Household Industry" is defined as an industry conducted by the head of household himself/herself and/or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. It should involve production, processing, servicing or repair of articles or goods, not on the scale of a registered factory. The larger proportion of workers in a household industry should consist of members of the household including the head.

The main characteristics of the "Household industries" are the following :

a) One or more members of the household must participate. Participation by hired labour must be minimum.

b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods.

c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sell.

d) In an urban area the industry must be carried on in the precincts of the house in which the household lives. In the rural areas, the industry may be anywhere within the limits of the village.

e) The activity should not be on the scale of a registered factory.

f) Professions such as those practised by Pleader, Doctor, Barbar, Musician, Dancer, Dhobi, Astrologer etc. will not be Household Industry.

(iv) Other Workers

All workers i.e. those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or engaged in household industry are "Other Workers". This includes factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all Government servants, teachers, priests and artists etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry are other workers.

Other particulars, viz., name of the establishment, description of work, nature of industry, trade or service and class of worker were also obtained in respect of those who returned "household industry" or "Other work" as their activity.

Non-worker

In case of persons who are non-workers throughout, information relating to them has been obtained through categories, as mentioned below :

i) Household duties
ii) Students
iii) Dependents
iv) Retired persons or rentiers
v) Beggars etc.
vi) Inmates of institutions
vii) Other non-workers

(i) Household duties

This covers all persons who are engaged in un-paid home duties and who do not other work, or have not done any work at all during the last one year. If a person who normally attends to household duties is also engaged in some economic activity, then he or she is a worker. For example, a housewife may help in family cultivation or agriculture or make and sell cowdung-cakes etc. at odd times. She is treated as worker.

(ii) Students

This will cover all full-time students and children attending school. If a student participates in some economically productive work, like helping sometimes as an un-paid family worker in family cultivation etc. such students should be treated as a worker and not as student. Very often the daughter in the family helps in the household work though she is studying full time, in which case she is treated as student.

(iii) Dependent

This includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. Dependents include even able-bodied persons who can not be categorised in any other category of non-worker but are dependent on others.

(iv) Retired persons or rentiers

A person who has retired from service and is doing no other work and is not employed again in some full time work or engaged in some other work such as cultivation, business, trade etc. or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he/she does not have to work comes under this category. If a retired person is doing some work, in such case he/she is a worker.

(v) Beggar

This covers beggars, vagrants or persons without indication of source of income and those without specified source of subsistence, who are not engaged in economically productive work.

(vi) Inmates of institutions

This covers convicts in Jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc. in such institution. However, an under-trial prisoner enumerated in a jail is recorded for the work he/she was doing before he/she was apprehended. Similarly a person temporarily in a hospital or similar institution is recorded for the kind of work he/she was doing before being admitted into the hospital or institution. However, the previous work is not recorded in respect of long term under trial prisoner or convict or for long term inmates of penal, mental or charitable institutions. A person is considered as 'long term',if he or she is in such an institution for 6 months or more.

(vii) Other non-workers

This includes all non-workers who do not come under any of the above six categories, but are looking for work. A boy or girl who has completed education or has stopped studying and is looking for work comes under this category. Alternatively a person who is merely spending time at home as a dependent and is not doing any work and not seeking any work is not coming under this category. In case of students who may be seeking work and are quite prepared to give up studies, if they get a job they are to be recorded as 'Students'.

Area figure

In keeping with the census tradition, the Surveyor General of India provides the area figures for the State and district level. Hence the area figures of the district along with the spelling of the district name as adopted by the Surveyor General, India has been adopted in the publication, with a view to maintaining uniformity of data at the national level. The area figures of the units down below the district level, viz, tahasil, police station, towns have been given in sq. km. The Tahasildars had reported the area figures in acres in respect of the units in the rural area, whereas the Executive Officers of the urban bodies have reported the area figuers for the urban units. The area report in acres by such functionaries were converted into sq. km. Regarding the area of the villages, the same were also furnished by the Tahasildars. The total area of all tahasils of the district does not add upto the area of the district because the former represents the land-use area and is derived from the figures supplied by the local revenue authorities. Similarly the total of the village area may not tally with the rural areas of the tahasil. The difference may be due to the fact that the village area may not necessarily include the area under hills and rivers etc. which are included in the tahasil area. Besides, there are also varying methods on computation adopted at different levels. Area figures for the unsurveyed revenue villages have been left blank like the forest villages and are indicated as "Not available".

Though there has been no change in the boundary of the State between 1971-81, the revised computation in the area of some districts has resulted in marginal decrease of 135 sq. kms.

Density

The density (population per sq. km.) shown for the State/District/Tahasil/Police Station/Town have been worked out using the area figure corrected upto two places of decimals.

Spelling of administrative unit

As explained above, the spellings of district have been adopted from the Survey of India to maintain uniformity at all-India level. However, the spellings of lower units, viz., tahasils, police stations, village, town are in confirmity with the spellings available in the State Government records.

Physically handicapped persons

It is customary for the Census to introduce new concepts in every census. Accordingly an attempt was made during the houselisting operation conducted in April-May, 1980 to find out the statistics regarding the physically handicapped

persons all over the country. Physically handicapped persons were broadly recorded under three categories, viz., totally blind, totally crippled and totally dumb.

The term "Totally crippled" refers to such persons who have not lost their arms or limbs. The loss of arms or legs or all the 4 limbs refers to loss of both the arms or loss of both the legs. It is not necessary that the disabled should have lost both arms and legs. The loss of either of these i.e., both arms or both legs would be sufficient for classification as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus a paralytic who has lost use of both the legs or both the arms was taken as totally crippled, though the limbs are physically available. However, the loss of either one arm and/or leg did not classify a person as totally crippled. There are other situations where a person unfortunately suffers from more than one of the aforesaid disabilities. In such cases, the intention was to record the persons by greater disability. For example, a person may be both blind and dumb or blind and crippled. In such cases the intention was to find out the greater disability, whether blindness is considered as greater disability than either dumbness or being crippled. Similarly being crippled is greater disability than being dumb. In the extreme cases, where a person suffered from all the 3 disabilities, it was recorded under the category 'blind' which is certainly the most unfortunate disability. It was usual to find a person blind or crippled due to old age and such cases were also taken note of and categorised under appropriate classification since he suffered from disabilities.

Brief History of the District

The early history of Kendujhar, like other erstwhile princely States of Orissa, is fragmentary. If tradition and the papers in the Raja's possession are to be believed, Upper Kendujhar and Mayurbhanj formed part of a State called Hariharpur. Kendujhar became a separate State by about 1128 A. D. and was ruled by the Bhanjas However, during the British regime, the administration of Kendujhar between 1907-1928 was managed by Government directly and subsequently in January, 1929, it was restored to Balabhadra Narayan Bhanja son of Gopinath Narayan Bhanja who came to occupy the Gaddi. A peculiarity is noticeable in respect of this State. In 1803, when Orissa was first conquered by the British, and the tributary chiefs entered into treaty engagements in that year, for the reasons yet to by ascertained, the engagement with the chief of the Kendujhar did not materialise till December, 1804. However, for all intents and purposes, there has been no difference in the status and privileges of the chief of this State with those of other chiefs in his relation with the British Government. During the regime of Raja Balabhadra Narayan Bhanja, the princely State of Kendujhar merged with Orissa on 1st January, 1948 and was constituted into a separate district of Orissa State.

The district has two distinct and dissimilar natural regions, roughly bisected by the State Highway running from Chainbasa to Jajpur Road and passing through the district Headquarters. To the east of this highway is a gentle slope from the belt of hills spreading out into the plain land of Anandapur and portion of Sadar Sub-division. The river Baitarani flows through the plain land having a number of confluences with its tributaries. To the west of the State highway, one finds ranges of lofty hills tracing from the southern extremity to the northern and extending to Singbhum district of Bihar on one hand and the adjoining frontiers of Sundargarh district and Dhenkanal district on the other. These hill ranges contain some of the very high peaks of Orissa, viz., Gandhamardan (3,477 ft.), Mankarnacha (3,639 ft.), Gonasika (3,219 ft.) and Thakurani (3,003 ft.). This hill range also serves as the water-shed of river Baitarani in the north and Brahmani in the south and, interestingly enough, is the home of tribal population, viz., Bhuiyans and Juang. There are some table lands on the summit of these hills, which are fit for pasture and tillage.

According to the Surveyor General India, the area of the district is 8,303 sq. km. The population of the district is 1,114,622 which includes 124,379 Scheduled Castes and 499,567 Scheduled Tribes. Both area-wise and population-wise the district ranks twelfth in the State. The Scheduled Tribe population accounts for 44·82 per cent of the total population of the district.

After merger of the princely state of Kendujhar as explained earlier the district came under the direct administration of the Orissa Government and the revenue administration throughout the State took a uniform pattern gradually. A District Magistrate is in overall charge of the district administration under whom three Sub-Divisional Officers are available with comparatively smaller jurisdictions. The district is divided into 3 Sub-divisions viz., Anandapur, Kendujhar Sadar and Champua. For efficient revenue administration, the district is broken into 5 Tahasils, the lowest unit of the revenue administration in the State viz., (1) Anandapur, in Anandapur Sub-division, (2) Kendujhar Sadar and (3) Telkoi in Kendujhar Sadar Sub-division, besides (1) Champua and (2) Barbil Tahasils in Champua Sub-division. These tahasils control the revenue administration of 2,106 number of revenue villages in the district, grouped into 43 Revenue Inspector's Circles, in pursuance of the Government instructions after introduction of tahasil administration in the State.

Leaving aside the hierarchy of the revenue administration, for the purpose of developmental administration the district has been divided into 13 C. D. Blocks, which are being

manned by the Block Developmental Officers. For the purpose of Developmental administration and in keeping with the decentralisation of developmental planning, all the villages in the district have been brought under the fold of 169 Gram Panchayats.

Consequent upon rapid urbanisation in the post-independence era, creation of towns in the district has made a phenomenal progress. As against the existence of one Notified Area Council recorded during 1951 Census, one Municipality and one Notified Area Council during 1961 Census, two Municipalities and one Notified Area Council and one non-statutory Census Town during 1971 Census, the present operation has disclosed the existence of 2 Municipalities equal number of Notified Area Councils and two non-statutory Census Towns. The district has fifteen Police Stations.

District Census Hand Books

Among the traditional documentation of the Census, the fairly comprehensive and uniform publication of District Census Handbook (D. C. H.) consisting of town and village directory and town and villagewise Primary Census Abstract (P.C.A.) has been found to be very useful and are constantly referred to by the planners and data users. The District Census Handbook is the only publication that incorporates the data down to a village level in rural area and upto ward level in the urban area. The data published in these volumes are of immense value to the planners, scholars and administrators for the purpose of village level, block level and district level planning and studies. It is a publication of the State Government. The cost thereof is borne by the State Government. However, the Director of Census of the State is responsible to the extent of providing necessary data which are obtained through Census.

This document was first published as an auxiliary to 1951 Census, consequent upon the request of the Government of India to State Government to publish District Census Handbooks containing statistical information relating to villages, towns and police stations etc. of the districts. The State Government agreed to this and decided to bring out District Census Handbook as a priced publication to be published in the State Government Press. This publication since then is continuing with unbroken chain. Apart from giving the rural statistical information, it readily gives a complete list of villages contained within a Police Station and District. It will not, nowever, be out of place to mention here that in many districts, complete list of villages is not maintained properly and the present list is the result of extensive enquiries and contacts with different agencies and can be regarded as exhaustive.

To make the data component more illustrative maps of the district, tahasil and police station are also published in the publication. The Police Station maps showing the villages as per the population size, having different amenities represented in approved legend will help the readers in easy appreciation.

According to the 1951 publication programme the District Census Handbook was published in one volume and did not contain information given in the village and town directory. Apart from this the brief introduction of the district, general features, density map, prescribed tables for general population, economic tables, social and cultural tables and village statistics were provided in the District Census Handbook. The Primary Census Abstract was given under the heading "village statistics". However, the information on villagewise list of displaced persons, and information on small scale industries were presented in the 1951 District Census Handbook volume.

Similarly, 1961 Census publication was presented in one volume. This volume was divided into 3 parts. First part contained the introduction of the district, second part contained the census tables and the official statistics was given in the third part. The information given in the Village Directory and Town Directory for 1981 Census was not given in the 1961 District Census Handbook. The villagewise Primary Census Abstract was given in the second part under the heading of "Village Directory". The information on villagewise list of industries and tables on fairs and festivals were presented in 1961 District Census Handbook publication.

According to the 1971 Census publication programme, the District Census Handbooks were to be published in 3 volumes; Part-A containing the data on amenities, Part-B incorporating Primary Census Abstract (P. C. A.) and part-C giving administrative statistics and census tables. District Census Handbooks, part-A and part-B for the 1971 Census could be published quickly. Both these volumes were in great demand by the data users, as they contained a vast mass of data on amenities available in the Village/Town alongwith demographic features. In regard to the District Census Handbook Part-C, we faced difficulties in collecting administrative statistics from various Offices and our progress in

publishing the report was considerably delayed. After obtaining necessary statistics, much difficulty had to be encountered in printing of the part-C, which was pending in the State Government Press at Cuttack for a pretty long time. Under compelling circumstances the manuscript could be printed in the Private Presses located at Cuttack and elsewhere. In view of the inordinate delay in collecting administrative statistics which would in any case be available to the data users in the publications of the respective Statistical bureaus/departments of the State Government there was re-thinking in the matter to drop the publication of part-C of the District Census Handbook for the 1981 Census.

However, it has been decided to publish the 1981 District Census Handbook in two parts. Part 'A' would be confined to village and town directory, whereas part 'B' would be confined to village and townwise Primary Census Abstract including Scheduled Castes and Scheduled Tribes Primary Census Abstract upto Police Station/ Town levels. Despite the fact that publication of both the parts in one volume would have enhanced the value, it could not be helped in respect of the bigger districts comprising large number of villages and towns. Therefore, the publication has been broken up into two volumes (Part 'A' and 'B').

By and large, the contents of the Village and Town Directory are almost similar to those adopted for 1971 Census, barring a few changes necessitated by the requirements of the planners and data users.

The new feature of 1981 format is having provision of the distance range of the particular amenities to a village where it is not present. A few items of information like adult literacy centres have been introduced in the village directory to meet some requirement of the Minimum Needs Programme.

Another introduction viz., "total population and number of households" for each village has been shown in the village directory to ascertain the co-relation of the amenities with population and number of household they serve. Since current day planning has been initiated from the Community Development Block level, villages coming under each Community Development Block has been furnished in the annexure of the village directory for the facility of the administrators and planners, which is a departure from the earlier Censuses.

Similarly in the Town Directory, information on Scheduled Castes and Scheduled Tribes population in statement-IV and availability of adult literacy centres in statement-V are innovations keeping in view the requirement of Minimum Needs Programme.

The significant change in the Town Directory is the provision of class of town in all statements for analysis of the infrastructure of amenities.

Both the Village and Town Directory and objectives of various columns thereunder alongwith the connotation of various abbreviations used therein have been explained in the relevant sections.

Scope of Village Directory

The data on village directory have been presented Tahasil/P S.-wise and Village-wise. The village includes revenue village and the clusters of habitation located in any tract mentioned thereunder. The names of villages have not been arranged alphabetically since location code thereof have been provided in ascending order. However, for facility of the readers, an alphabetical list of villages under each Police Station with its location code numbers has been provided at the beginning of the village directory. In case of a village treated as an out-growth of an urban agglomeration, the code number and name have been provided minus data thereof which has been shown against such core town. In case of part-village forming a portion of an out-growth, the corresponding data has been shown in the village directory. In case of census towns, such villages have been listed in the village directory without any data on amenities, for which the town directory has to be referred to. However, the land utilisation data for such census town has been made available in Appendix—II

It has been the tradition of census to present maps of constituent administrative units beginning with the district, followed by Tahasils, and Police Stations thereunder. All the maps so presented in this volume have been authenticated by the concerned revenue authorities in so far as the boundary and spellings and locations are concerned. In case of the units adjacent to the coast land of the State, such maps have been cleared by the Survey of India through the office of the Registar General, India.

In addition to the district map, the administrative map of each Tahasil/Police Station has been given in the beginning of the village directory of that Tahasil/Police Station. The boundaries of Police Stations in the Tahasil, location of towns, large villages, rivers, roads, railways, hills, forests and important institutions such as High Schools, Colleges, Medical institutions, Post & Telegraph Offices etc. have been shown in the Tahasil map. An administrative map of the Police Station has also been presented in the beginning of the village directory of that Police Station giving the boundaries of the villages in location codes and towns located within it and other details similar to the Tahasil map. Besides, villages have also been shown through symbolic representation by different population sizes. The uninhabited villages have been shown by cross marks (X). The shaded portion of the map represents the area of the towns.

The information on Village Directory has been provided in the statement containing 20 columns giving areas of the village in hectares, population and number of households, amenities viz., educational, medical, drinking water, power supply, post and telegraph and communication etc. available in the village. In case of non-availability of any of the amenities the distance range of its availability has been provided in the directory. Similarly, the land uses pattern of the village providing the extent of forest area, area under irrigation, un-irrigated area, culturable waste and area not available for cultivation have been indicated in the directory in hectares. Places of religious, historical/archaeological interest have been shown for reference of the readers.

COLUMN 14— *Staple Food* :— Staple food refers to grain and only relates to the majority population of the village using for major portion of the year. Combination of grain in staple food viz., rice, wheat and maize etc. have been indicated.

COLUMN 15 to 19—*Land Use* :— The land use pattern given in the village directory conforms to the pattern of classification of

land use as recommended by the Ministry of Agriculture, Government of India. The guidelines in this regard are as follows. :

1. Forests
2. Not available for cultivation :
   (a) Lands put to non-agricultural uses
   (b) Barren and un-culturable lands
3. Other un-cultivated lands excluding fallow lands :
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands :
   (a) Fallow lands other than corrent fallows
   (b) Current fallows
5. Net area sown.

In the village directory Column-15 (forest) represents, the category one above. Column-16 (Irrigated) and column-17 (un-irrigated) given break-up of agricultural land, which are a combination of categories 4 (a+b) and 5 above. Column-18 (culturable waste) corresponds to category-3 (a+b+c) above. Column-19 (area not available for cultivation) corresponds to category-2 (a+b). Area figures of the village have been shown in hectares. The total of figures under columns 15 to 19 will not necessarily tally always with the total area of the village as indicated in column-3 of the directory, as there are waterways and hills etc. which may not be included in the land use statistics of the village.

Forests may mean either state owned or private forest and whether wooded or maintained as potential forest land. There are situations where patches of land have been put to agricultural use within the statutory notified forest and have been considered as forest by the revenue administration. These areas have been treated as forest. In Orissa, forest is broadly known under two categories, viz., village forest, known in local parlance as khesra forest and reserved or protected forest. The village forest constitutes an integral part of the village area unlike the reserve or protected forest. This is because communal right in land is not exercisable in the areas known as reserve forest under the Orissa Forest Act.

Leaving aside this, 4 Appendices in the village directory have been presented in this publication, which is a distinct feature of the current census publication.

These are :

i) Tahasil/Police station-wise abstract of educational, medical and other amenities.

ii) Land utilisation data in respect of non-municipal towns(Census Towns).

iii) Tahasil/Police station-wise list of villages where no amenities are available and

iv) Tahasil/Police station-wise list of villages indicating the proportion of Scheduled Caste/Scheduled Tribe population to the total population by ranges.

These appendices are new to the present census which provides Tahasil-wise abstract of villages on different priorities. The intention is that the abstract will be helpful for planning inputs in areas/villages where the basic infrastructure is lacking. Similarly the Appendix—IV will be helpful for planning of welfare programmes, for Scheduled Castes/ Scheduled Tribes at micro-level, as it provides data by ranges of Scheduled Caste/Scheduled Tribe population.

Scope of Town Directory

The town directory is intended to cover all the towns in the district statutorily notified as such as also the non-municipal census towns. The towns have been arranged in the Town Directory in the alphabetical order and do not cover strictly the military areas. The data on amenities and other aspects presented in codes has been explained in detail in separate chapters. Regarding the urban agglomeration the conventional creation of census the names of such agglomerations have been indicated which is similar to the name of the main town of the agglomeration. The particulars for such constituents of the agglomeration have been furnished separtely. Such presentation was operationally found to be convenient to have an idea of the particulars of the city or town agglomeration in toto and also severally. In the instant case, there is no such agglomeration at all in Kendujhar district.

To sum up the earlier format of 1971 D. C. H. Part-A has been restructured for 1981 census, keeping in view the objectives of the Planning Commission for the Minimum Needs Programme and the revised 6th Five Years Plan. More intrest has been taken to know the over-all infrastructure in terms of amenities, however; modest or from whatever source it may have been provided.

Information on town directory has been furnished in 6 separate statements. The scope and the content of the statement adopted for the towns is briefly explained below :

Statement—I

This statement gives the status and growth history of the town. In Columns 1 & 2, serial number of the town in alphabetical order and names of the town with class and civic administrative status have been furnished. In Columns 3 and 4 location code of the town has been indicated giving the names of the tahasil under which it is located. Column 5 gives the area figures of the town in Sq. kms. The number of household including the houseless household has been shown in Column 6. In Columns 7 to 15 the population alongwith the growth rate of town from 1901 to 1981 have been shown, for easy comparability. In Column-16 density i.e. population per Sq. km. has been furnished. In Columns 17 to 19 the sex ratios (females per 1,000 males) as recorded from the 1961 census onwards have been furnished.

Statement—II

It provides the physical aspects and location of the town. In Columns 3 to 5 the average rainfall and temperature have been furnished. Distance of the towns in Kms. from the State Head Quartars/District Head Quartars/ Sub-divisional Head Quartars / Tahasil Head Quartars the nearest city with population of one lakh or more, railway station, bus route, navigable rivers/canals within 10 kms. have also been indicated in Columns 6 to 12 respectively.

Statement—III

The statement reveals a picture of the municipal finance for the year 1978-79. The receipts of the urban local body from various sources have been provided under Columns 4 to 10 whereas the expenditures under various items have been disclosed under Columns 11 to 17.

Statement—IV

It gives information relating to civic and other amenities as it stood in 1979. Scheduled Castes and Scheduled Tribes have been given under Columns 5 (a) and 5 (b) of the statement. The road length in Kms. has been shown under Column 6. The system of sewerage, number and type of latrines available in the town in addition to the method of disposal of night soil have been shown under Columns 7 to 11. Columns 12 and 13 of the statement deals with the source of

water supply and system of storage of the town. Column 14 of the statement provided the availability of fire service if any in the town. In case such service is not available in the town, the name of the nearest place where available has been shown alongwith the distance from the town. Electrification with number of connections for different uses has been shown in Columns 15 to 19 of the statement.

Statement—V

In this statement information relating to medical, educational, recreational and cultural facilities in the town has been shown. Medical facility available in the town has been shown in Columns 4 and 5. Educational facilities, viz., number of different types of Colleges, Technical Schools, Recognised Commercial and Vocational Institutions, Higher Secondary Schools. Secondary Schools, M. E. Schools, Primary Schools and Adult Literacy Centres have been indicated in Columns 6 to 15. Column-16 shows the working women's hostel with the number of seats. Columns 17 to 20 of the statement discloses recreational and cultural facilities like stadia and cinema halls etc. available in town. In case of non-availability of medical and educational facilities in the town the name of the nearest place alongwith the distance where the facility is available has been given.

Statement—VI

This represents the information on trade, commerce industry and banking as it stood in 1979. In Columns 3 to 5, important commodities as imported into the town have been mentioned as against the exported items out of the town shown under Columns 6 to 8, The names of the three important commodities manufactured in the town have been shown in Columns 9 to 11. Number of banks, number of agricultural credit societies and number of non-agricultural credit societies available in the town have been furnished in Columns 12 to 14 respectively in the statement.

There is no notified slum area in any of the towns of the State. Hence, the prescribed Statement IV-A has not been provided in the Town Directory.

Physical aspects of the District

It is a land locked district located in the northern part of Orissa between 21°-11'N and 22°-10'N latitudes, and between 85°-11' and 86°-22' longitudes. The district is bounded in the north by Singhbhum district of Bihar. The districts of Orissa that surround it are Cuttack in the south, Sundargarh and Dhenkanal in the west, Mayurbhanj and Baleshwar in the east.

Topography of the district can be broadly classified into three categories as given below :

(a) Plain region of Baitarani River Belt : Anandapur Sub-division comprising 3 C. D. Block comes under this region where the land is mostly plain with an altitude of 45 to 60 metres above sea level. The soil type is alluvial with loamy structure. The warer level is high and the area is agriculturally more develop due to its soil fertility and water resources.

(b) Hilly region of Bhuyanpirh : This region comprises Banspal. Harichandanpur and Telkoi areas of the Kendujhar Sub-division and Joda area of Champua Sub-division. This region lies between the hill ranges of Gandhamardan and Kiriburu having undulated topography intercepted with mountains and hills with altitudes ranging from 488 to 610 metres from the sea level. The soil type is red laterite with high iron content and acidic in reaction. The texture is mostly gravelly and sandyloam. The soil is subject to heavy soil erosion and lacks fertility Moreover, shifting cultivation is done by the local tribal cultivators. In the basin of river Baitarani in Anandapur, soil is however rich alluvium.

(c) Sub-mountaineous region of the western and northern part : This region comprises Champua and Jhumpura areas in Champua Sub - division and Kendujhargarh, Ghatgaon, Patana and Saharapada areas of Kendujhar Sub-division. This region is less mountainous, but is hilly with gradual slopy terrain which is subject to soil erssion. Only the valley pockets have comparatively deeper soil and fertile patches. The district in general is situated at a height of 1,575 ft. above the sea level.

Rain fall and Climate

This district experiences hot summer with high humidity and erratic rain fall. The hot season commences from March and the month of May is considered to be the hottest month during the year when the maximum temperature is 41°C. (105·8°F) and minimum is 26°C (78·8°F). The heat is scorching. With the advent of monsoon in June, the temperature drops appreciably. However, the rains are erratic and there is always wide variation in the quantum of rainfall from year to year, which renders the district drought and flood prone thereby affecting crop situation adversely. From June to October the weather is pleasant. Winter sets in from November, December is the coldest month of the year, when the minimum temperature comes down to 13°C (55·4°F). Some times it even drops down to 7°C (44·6°F). In the winter season short spell of cold wave is not an un-common experience.

The average rain fall in the district is 1,534·55 mm (62"). It is generally concentrated during the months from June to September and is considerded fairly sufficient for agriculture in Kharif season. However, the rains are often erratic and the district is more susceptible to drought. There are 13 rain recording stations in the district located at the head quarters of Community Development Blocks. The districts receives rain mostly due to the South-west Monson. The erratic rainfall is often responsible causing for flood in rivers Baitarani and Kusei which innundates vast tracts of land in Anandapur Sub-division of the district.

Jurisdictional Changes

The district boundary has not undergone any change since its formation. No territorial changes took place in this district during the

dacade 1951-61, except shifting of the head-quarters of Kuanr Police Station to Kanjipani and Jhargaon Police Station to Barbil.

During the decade, 1961-71. Joda Police Station was newly formed comprising 98 villages from Chamakpur Police Station and three villages from Barbili Police Station having an area of 436·2 Sq.km. Simultaneously 38 villages with an area of 178·0 Sq. km. of the erstwhile Chamakpur Police Station were added to the jurisdiction of Champua Police Station.

During the decade, 1971-81 Daitari Police Station was newly formed consisting of 31 villages transferred from Harichandanpur Police Station. However, the head quarters of Ramachandrapur Police Station has been shifted from Ramchandrapur to Sainkul.

As regards revenue administration Kanjipani Tahasil functioning with head quarters at Telkoi was changed to Telkoi Tahasil under Government orders.

Regarding the changes in number of villages coming under different Police Stations, such changes have taken place due to the Survey and Settlement operation and are available in publications.

Major Characteristics of the District

Minerals and Mining : The district is bestowed with extensive deposits of iron ore, manganese ore, chromite and keolin which are of economic significance to the district as well as for the State. Despite abundant mineral resources, the district has not been systomatically exploited. The only mineral based industrial units, that have come up in Barbil-Joda sector during the plan periods are the Pig Iron and Ferro Manganese Plants.

Iron Ore : Orissa which is endowed with vast reserve of high grade iron ore ranks second in the country's iron ore deposit. Kendujhar district plays a major role in contributing to the sizeable production of iron ore. The most important Singhbhum-Kendujhar-Banei iron ore belt runs through this district. Out of 50 Kms. strike length of this belt, 14.5 Km. falls in this district.

The varieties include (1) Hard Ore (Steel grey to brownish, massive and laminated), (2) Moderately Hard Ore (laminated), (3) Soft Ores (flaky, friable and powdery) and (4) Lateritic Ores.

High grade iron ore deposits also occur on the Daitary Hill along the boundary between Kendujhar and Cuttack districts. The total reserves of this deposit are of the order of 50 million tonnes. Apart of this deposit, also falls within the administrative boundary of Cuttack district.

The estimated reserves of 1,927 million tonnes of iron ore of all grades and types found in different areas/blocks of the Kendujhar district are as follows :

Areas/Blocks	Estimated Reserves (in million tonnes)	Average Grade
1. Thakurani Group	197	64
2. Bolani	489	62
3. Deposits north of Banspani	38	64
4. Joda east and Khonbandh	200	64
5. Deposits south of Banspani	211	65
6. Gandhmardan	124	64
7. Deposits between Bhadrasahi and Koira	59	64
8. Malangtoli Group	609	60

A part of this ore is being utilised in the pig iron factory at Barbil, while bulk of the ore is either exported or consumed indigenously in the Steel Plants. The Bolani ores are supplied to the Durgapur Steel Plant.

Of the existing iron mines, the TISCO mines at Joda as well as Gandharmardan and Daitari mines operated by Orissa Mining Corporation, are fully mechanised alongwith Bolani Mines Pvt. Ltd. Private mining lassees are also engaged in small scale and medium mining in Barbil-Joda area. The mineral based industry includes a Pig Iron Plant at Barbil besides Kalinga Iron Works (Purchased and run by Orissa Industrial Development Corporation) and one Ferro Manganese Plant at Joda run by TISCO. It has recently been decided to set up a Steel Plant in Cuttack district which is close to Daitari area of this district. The Bolani ores are the steel suppliers of iron ore to Durgapur Steel Plant. Kiriburu Iron Project supplies to Bokaro and the ores operated by M. M. T. C. are exported via Paradeep Port in Cuttack district. The mode of transport is through roadways and by railways. The rail link connecting Nayagarh-Banspani region with Paradeep Port via Kendujhar-Daitary when completed will provide assured transportation for full exploitation of the minerals in the district. The off take is 87,926 M. T. during 1981.

Manganese Ore : The manganese ore doposits occur in highly folded shales of the iron ore series and in the gently folded sandstone and shales of kolhan series which over-lie in the rock of the iron ore series. Important deposits of manganese in the district are at Nalda, Barbil, Bhadrasahi, Bonai, Kora, Joda, Kalimati, Dhubna and Rodia. The grade of ore even in individual deposits has a wide range. Only about 30 per cent of the ores of the area contain more than 48 per cent manganese content. This district contributes more than 80 per cent of Orissa,s manganese production. The manganese area lie within 24 Kms. rail-head of Banspani, Barbil and Barjamda. The ore is consumed by

TISCO Ferro-Manganese Plant at Joda and Rayagada Plant in Koraput district, besides other Steel Plants within and outside the State. Orissa Mining Corporation a State Government Undertaking is operating mines of Dubna, Sermeda-Bhadasahi-Dalki mines where 800 persons are employed daily. However, the demand for manganese ore is bound to increase with the rising steel production all over the world.

Chromite : This is an important mineral widely used in refractory and chemical industries. Orissa is a leading producer of Chromite and accounts for 80 per cent of all India production of this ore. This district has three Chromite mines at Baula, Nuasahi and Phulinjhorhuli area. The annual off-take in 1981 was 61,430·7 M. T. and it is mostly exported out of the State.

Other minerals like talc and quartzite are also available in Sadar and Anandapur Subdivisions of the district. The operation is mostly manual. 71 mines, were in operation in the district during 1980-81, out of which Orissa Mining Corporation was operating in eight iron mines. The mining revenue and cess on royalty realised during 1980-81 was Rs. 138·16 lakh and Rs. 68·52 lakh respectively.

As explained above, the district was less exploited even during the princely administration. However, in the recent past, efforts have been oriented to harness the mineral deposits of the district. The Orissa Mining Corporation is going to set up a Charge Chrome Plant of 50,000 tones capacity shortly at Banaipal, close to Daitari Railway Station with an investment of Rs. 34·55 crores. The plant alongwith the mining activity will generate employment for 1,500 persons. With the collaboration of the Industrial Promotion and Investment Corporation of Orissa Ltd., Sponge Iron Plant, Silicon Carbide Plant, Desulphurisation plant, Ferro Manganese Plant and Pig Iron Plant are coming up very shortly at different locations of the district which will ultimately change the mineral-based industrial map of the district.

Forest : Out of the total forest area of 2,497·02 Sq. km., reserve forest area is 1,821·62 Sq. km. The forest is of northern tropical moist deciduous type, which contains valuable timber like Sal, Piasal and Asan etc.. During 1981, afforestation was done in 155 hectares and econcmic plantation over 70 hectares. Special afforestation programme was taken up in the tornado affected area of Patna and Saharpada blocks over 178 hectares alongwith imporvement of degraded forest over 130 hectares. Under the "Juang Developement" seheme, Asan and Arjun plantations over 20 hectares have been done in 1981. Major forest produce is timber as the district has an appreciable area under forest. Due to various measures taken up by the Government, the forest revenue of the district has increased from Rs. 23·85 lakhs in 1971 to Rs. 188·28 lakhs during 1981. However, the forest potential is yet to be exploited fully.

Consequent upon the Government policy to increase the revenue from Kendu leaf through Government agency, one Divisional Forest Officer is kept un-charge of Kendu leaf trade which has vast potential in the district. Kendu leaf is a State Government trade and export oriented. Areas like Telkoi, Jhumpura and Harichandanpur Blocks are having great potential for Kendu leaf. As against the revenue of Rs. 5·84 lakhs received during 1973, the district received a revenue of Rs. 17·56 lakhs during 1981. The produce are transacted through the Forest Corporation, a State Government undertaking.

Industry : The district was industrially backward in the pre-independence time, despite its vast potential. However, in the subsequent period a few Medium Scale Industries, viz. Ferro Manganese Plant at Joda in private sector and Kalinga Iron Works and Spun Pipe Plant at Barbil in the joint sector were estabished. The latter 2 projects were taken up by the Industrial Development Corporation of Orissa, Ltd., a State Government undertaking. In the recent past, with the assistance of Industrial Promotion and Investment Corporation of Orissa, Ltd., (IPICOL), a State Goverrment

undertaking, more projects, viz., Spnge Iron Plant, Electrolytic Dioxide Plant and Explosive Factory have been taken up in the district. Beside a few more projects like silicon carbide, paper, jute twine, G. I. casting, steel casting, sulphurisation and pig iron are likely to come up in the near future in Barbil, Joda, Anandapur and Kendujhar areas of the district. Recently one Charge Chrome Plant at Brahmani-Sailo is coming up.On completion of all these projects the industrial map of the district will undergo radical change and will encourage Small Scale and ancilliary Industries around.

The Orissa Industrial Infrastructure Development Corporation has constructed industrial sheds in the identified growth centres like Barbil and Kendujhar for location of Small Industries with necessary infrastructural facilities.

Leaving aside the Medium Industries, there has been significant development in the Small Scale Industries Sector, consequent upon establishment of District Industries Centre in 1978. The aim and objective of this centre is :—

(a) Rapid development of Village and Cottage Industries.

(b) To provide additional avenue for employment, and

(c) reduction in regional imbalance with regard to industrial development.

The centre will make appraisal of projects, recommend loan to the lending institutions, provide technical assistance by organising the programme for man power development besides helping the enterpreneur in assuring market and information system along with the availability of raw materials. The action plan prepared for the district envisages seting up of 468 Small Scale Industial units and provision of finance to 6,000 artisans. The local artisans have taken up weaving, bee keeping, oil ghani, carpentry, black-smithy, pottery, household utensil, bamboo basket making, rope making, lac processing and stone carving etc. Necessary training and incentives in shape of supply of tools are also being provided to the interested individuals.

During 1980-81, under artisan sector 1,019 units were achieved besides 85 units under S. S. I. sector. The district has 32 Co-operative societies under Khadi and Village Industries Board, besides 7 Handicraft Societies and 4 Rural Incustrial co-operatives. Under RIP/RAP schemes training is being imparted for carpentry, dhokra casting aluminium utensil, sabai furniture making, bamboo craft, stone carving, talioring and pottery under TRYSEM scheme 528 artisans were trained.

Agriculture : As explained earlier the soil of the district is mostly red loamy and red laterite except some alluvial soil found in Anandpur portion of Sadar Sub-division of the district. Simultaneously the irrigation potentint of the district was in a low ebb and recent efforts to harness the existing potential can assure irrigation and better the agricultural map of the district. The agriculture is mostly rain fed, which is often erratic, hence prone to drought situation. Paddy crops are adversely affected due to frequent dry spell.

During 1980-81 a coverage of 2,73,985 hectares was achieved under Khariff, out of which 2,17·141 hectares were cover by paddy crops. The other crops were jute, millet and oil seed etc. Out of the total paddy land 22,671 hectares were covered by high-yielding varieties of seeds.

In rabi season, the major crops raised in the district are niger, oilseed, pulses and Kulthi. An achievement of 80,454 hectares in 1980-81 was reported. Attempt has been made to take up crop in the ayacut of dugwells.

Irrigation : The irrigation facility in the district is poor. There is no major irrigation project in the district. However, two medium irrigation projects taken up during the decade are under execution. The project Kanjhari in Sadar Tahasil is under execution since April, 1979 with an estimated cost of Rs. 13.56 crores. The irrigation potential has been estimated at 9,800 hectares for Khariff and 5,900 hectares for Rabi. The second project is Remal in Anandapur Sub-division work of which has started since 1974-75 at an estimated cost of Rs. 5·21 crores.

The estimated irrigation potential is 3,940 hectares and 1,500 hectares for Kharif and Rabi crops respectively. Potential of 2,459 hectares is however available from Salandi Irrigation Project.

Minor Irrigation Projects having more than 60 acres ayacut in each case numbering 107 have been taken up, out of which 93 projects have been completed so far and 14 are on-going. The total estimated ayacut of the projects is 39,318 acres for Kharif and 7,050 acres for Rabi crop. Out of these, completed projects are giving irrigation facility for 25,326·06 acres in Kharif beside 2,635 acres of Rabi.

Dug Well : According to the ground water survey, the district has a feasibility of 1,14,720 dugwells. Till the end of 1980-81, as many as 14,238 dug wells have been constructed in the district, which includes 304 constructed during 1980-81. 133 dugwells have been energised upto 31.3.1980. The shortfall in achievement under this programme is due to, (a) poor participation of people, (b) ground water survey of the district has not been done by Orissa Lift Irrigation Corporation and (c) re-charging capacity of the existing well is poor.

Soil Conservation : The district suffers from acute problem of soil erosion because of its hilly terrain and undulating topography forming about two-fifth of the geographical area of the district. Various soil conservation measures under centrally sponsored and state plan schemes are being undertaken to tackle the problem. It includes cashew and sisal plantations in waste lands and private holdings, creation of water bodies for supplemental irrigation and planning for sage utilisation of land and water resources of the district on watershed basis.

Harticulture : The district has good potentiality for horticulture due to its agroclimatic condition, topography and soil condition. Fruit trees like Mango, Jack fruit, Guava, Popeya, Banana, Cocoanut, etc. are being encouraged. In the insitu method, local types of mango stones are planted as on ideal root-stock, on which the desired varieties are being grafted. Orchard scheme and Cashew plantation are being encouraged.

Since the production of fruits and vegetables is quite sufficient in the season, the local administration has taken up preservation of fruits and vegetables by way of establishing a Community Canning Centre at Kendujhar in October, 1980. Its activity has been extended by way of imparting training to the house-wives and tribal youth for preparing preserved nutrition products. A society of tribal youth has been organised throuth ITDA assistance which is functioning well. 1,065 beneficiaries have undergone training.

Sericulture : The following sericulture scheme are operating in the district :

1. PRIMARY TUSSAR COOPERATIVE SOCIETIES—13 TRCS were operating on March, 1980 for providing assistance of seed loan and marketing of the tussar Cocoons of Tussar reares. So far, 8,170 tribals have been enrolled as members of these societies. During 1980-81, the societies arranged loan of Rs. 3.84 lakhs from the banks for 3.345 Tussar reaers. The societies could accumulate tussar cocoons of 7,600 Kahans worth Rs. 13.82 lakhs. One seed station has been established at Harichandanpur to benefit the Tussar rearers for supplying tussar eggs with an annual capacity of 30,000 layings. During the year 1980-81, 24,800 layings were supplied by the Centre to 862 tussar rearers. To meet the deficit, one pilot project centre was started at Kalikaprasad during 1981-82 with a target to suppliment production of 40,000 layings. During 1980-81 improved tussar reelings and spinning Charkhas were supplied to 25 tussar rearers for up-lifting their earning. Two Tussar Processing Training-cum-Production Centres (Reelings and Spinning Centre) have been established at Dhenkikote and Telkoi for imparting training. So far 77 tribals have been trained. Commercial production of yarn has also been taken up at five centres in Juang area.

One mulberry demonstration farm has been established during 1981-82 at Bayakumutia near Kanjipani.

2. *PISCICULTURE*—Activities in this regard was insignificant earlier. In the recent past emphasis has been given to develop fish farming with the existing inland resources. During 1980-81, 8.5 acres of water area in 17 tanks were developed under the Economic Rehabilitation of the Rural Poor Programme and fingerlings were raised. Similarly, 3·5 acres of water-spread area were covered under the National Rural Employment Pogramme where quality fingerlings were stocked. Under the demonstration of intensive fish production scheme, 9 acres of water area were taken up during 1980·81. Under the Applied Nutrition Programme fingerlings have been stocked in tanks in favour of Mahila Samities so as to enhance the fish production and saleat fair price. Under the Fishery Extention Programme 4.7 lakhs of fry have been supplied to the tanks of diferent Gram Panchayats and private pisciculturists. Under the Integrated Rural Development Programme loan assistance is being given to different benficiaries for fish rearing. Training to the interested persons are being given for a period of 7 months so as to educate on improved methods of pisciculture.

3. *CO-OPERATIVE*—The Central Co-operative Bank Ltd, Kendujhar is the only financing agency in the Co-operative sector.

Due to increased emphasis on co-operative sector, there has been marked improvement under increase in membership as well as advancement of loan towards improvement of avocation of life. As against 91 agricultural credit societies functioning with 94,239 members during 1971,the number of societies were 48 with 123,088 members by June, 1981. As against loan advance of Rs. 39·20 lakhs during 1971, a sum of Rs. 132·34 lakhs was advanced during 1981 for agriculture. As against 69 non-agricultural Co-operative Societies functioning during 1971 with 17,648 members, there were 95 such societies with 19,773 members in existence during 1981. A sum of Rs. 32·82 lakhs were advanced as loan during 1981 in non-agricultural sector as against Rs. 9·94 lakhs advanced during 1971. Apart from advancement of loan by the co-operative bank for Khariff and Rabi crops,the existing three Land Devèlopment Banks functioning in three Sub-divisions also provide long term finance to the public in general. Both Co-operative and Land Development Banks provide loan for dug well projects as well energisation of dug wells in the district. Two Regional Co-operative Marketing Societies functioning at Kendujhar and Anandapur caders to the sale of fertiliser implement to the agriculturists in the district.

4. *ANIMAL HUSBANDRY PROGRAMME*—The total livestock population of the district, according to the 1977 live stock census is 15,09,102 as per the following details.

(a) Cattle	...	5,64,775
(b) Bufallo	...	39,595
(c) Goat	...	1,97,564
(d) Sheep	...	61,489
(e) Pig	...	14,363
(f) Horse	...	130
(g) Poultry	...	6,16,625
(h) Mole & Donkey	...	1
(i) Ducks	...	14,560

The district has 22 Veterinary Dispensaries besides, 10 key village units, 3 departmental poultry units, 80 livestock aid centres and 14 A.I. centres. Under the artificial insemination scheme, 6,753 cases have been achieved up to March, 1981 and the scheme is getting increased popularity. Schemes like dairy, goatery, poultry, goat rearing are gaining popularity in the district so as to augment family income.

Although detail survey of milk production in the district has not been made, milk is being marketed through the district milk union and M. P. C. S. Recently steps have been taken to streamline the society and establish a cold storage plant for milk preservation.

5. DRINKING WATER

Tube Wells—Till the end of 1980-81 as many as 1,641 tube wells could be sunk through Government agencies in this district under different schemes. During 1981-82, 421 tube-wells have been sunk.

Thus, the total No. of tube wells so far sunk in the district are 2,062. Out of 246 geophysically difficult and health hazard villages, 156 villages could be covered with tube-wells till the end of March, 1981 and during 1981-82, 60 such villages have been covered.

Sanitary wells—Construction, repair and deepening of sanitary wells are being executed through the Block Development Officers. So far 575 numbers of sanitary wells have been constructed and 282 number of wells are under construction. Priority has been given to construct sanitory wells in the well less villages which are identified as 176 in the district.

Land Tenure—Kendujhar princely state merged in to Orissa in 1948. The present district is co-extensive with the ex-State area except that after the merger, a zamindary area of Baleshwar district, named Ambo, was amalgamated with it and four villages of ex-State area were transferred from it to Cuttack district. On account of the constitutoin of this district in this manner, two distinct modes of land classification were prevalent in it till their revision by the Board of Revenue for the purpose of new survey and settlement operation.

In the ex-State area of Kendujhar, the classification was more varied. From the final report of the last settlement operation (1914-15), it appears that the said classification was adopted in line with the classification obtaining in some neighbouring princely states, like Angul and Sareikala, etc. The classes of lands were as follows:

(i) Aul or first class wet lands—Low lands retaining sufficient moisture and capable of high yield were classified as Aul.

(ii) Doem or second class rice lands:—These denoted intermediate class of rice growing lands between first class and third class.

(iii) Soem or third class lands:—High lands entirely dependent on rain fall and lacking in natural nutrient and yielding poor crops were classified ao soem.

(iv) Goda up-lands were generally classified as Goda. Those were subdivided into three categories.

(a) First class Goda—Kala or Gharabari lands (adjoining homesteads) which produced profitable crops like maize, mustard and vegetables etc. were classified as first class Goda.

(b) Second class Goda—Ordinary Coda lands situated away from homesteads and growing early paddy(Biali)or oilseeds were classed as second class Goda.

(c) Third class Goda—High lands situated near foot hill areas or close to forests and generally having rocky strate were classed as third class Goda These lands produced occasional crops, once in two or three years.

(v) Pala—Riparian lands capable of producing rich crops, were classified as Pala.

(vi) Sugar-cane-lands growing sugar—Cane were placed in a separate category and equated with Doem or second class rice lands.

Survey and Settlement operation of the district is supervised by the Settlement Officer at Dhenkanal(Dhenkanal-Kendujhar Settlement) who is assisted by the Charge Officer having his office located at Kendujhar up to 1981, Settlement operation has been completed in Anandpur Sub-division whereas the same is in progress in the other two Sub-divisions.

With the provision of increased facilites of irrigation and introduction of improved techniques of agriculture, the classification of lands underwent change and its revision became

imperative. The Board of Revenue have revised the classifications accordingly and the approved classifications as adopted in current Settlement Operation are as follows :

(i)	Sarad (Winter harvest)	...	1, 2 and 3
(ii)	Sarad Dofasal	...	1, 2 and 3
(iii)	Sarad Jala Dofasal	...	1, 2 and 3
(iv)	Biali (Autumn harvest)	...	...
(v)	Biali Dofasal	...	...
(vi)	Dalua (Summer harvest)	...	1 and 2
(vii)	Baje Fasal	...	1 and 2
(viii)	Pala	...	1, 2 and 3
(ix)	Taila	...	1, 2
(x)	Homestead	...	1, 2
(xi)	Bagayat	...	1, 2, 3
(xii)	Patita	...	...

6. TENANCY—Consequent upon abolition of estates and agrarian reforms brought out by legislative measures in the recent past have almost a total change have been affected in the tenancy system. Their effect has been so fundamental and wide spread that the entire texture of relationship between the state and the land holder on the one hand and tenant with his immediate land lord on the other has undergone a metamorphosis. As a result, the status of land has changed its complexion and character in the same manner as the rights of the persons who hold them. The reality in statuses connoting the same rights in more than one way under different name had to be rationalised though comprehensive legislative measures. The result of such reform reduced the statuses as follows as it exists under different local names.

Sl. No.	Name of rights in land	Local name
1	2	3
1.	With rights of permanent heritable and transferable possession.	1. Pahi 2. Debottar Rayati 3. Rayati 4. Chandana 5. Dakhal Satwa-bisista } In ex-Ambo Zamindary area of Baleshwar dist. now included in Kendujhar. 6. Chirasthayi Jama } In ex-Ambo Zamindary area of Baleshwar dist. now included in Kendujhar.
2.	With rights of permanent and heritable possession but without right of transfer.	1. Rayati with restriction for transfer within 10 years from the date of receipt of the patta.
3.	Mortgages in possession.	
4.	Holding fee of rent or on nominal rent in lieu of or not in lieu of service.	
5.	Ordinary tenants paying fixed produced rent.	1. Saja in case of Bhuyan-pirh and Juanga pirh area.
6.	Ordinary tenants paying rent as a share of produce.	1. Bhaga chas 2. Sikim.
7.	Conditional or temporary leases or assignees of Govt. land.	1. Chirol
8.	Encroachers and tress-passers.	1. Be-aine Dakhal

However, there still remain 5 jagirs such as Dehuri, Malkar, Rathagadha. Zamindary and Sobayat, which have not been abolished and are continuing as such.

7. EDUCATION—The district is economically and educationally backward due to the predominant tribal composition of population whose psychology and social behaviour hindered their advancement in education. However, various measures and incentives were provided Government for their social up-liftment during the dacade with a view to ensuring appreciable progress in the field of education. Such measures include supply of paper at concessional rate,opening of book banks for the benefit of the students upto college stage, financial assistance for reading and writing materials to the poor and meritorious students at M.E. and H.E. School stage, free supply of uniforms to poor students at Primary School level and incentives for regular attendance in Primary Schools etc. Opening of Adult Literacy Centres in the rural areas has also found favour with the population and this programme has received wide rosponse. The salient features of the district is given hereunder.

COMMUNICATION AND TRANSPORT

The district is backward which is primarily due to poor communication facilities in the district. The following types of roads and the length thereof is available in the district.

1. National Highway	...	94·0 Kms.
2. State Highway	...	217·6 Kms.
3. Major District Road	...	104·1 Kms.
4. Other District Road	...	138·5 Kms.
5. Classified Village Roads	...	338·0 Kms.
6. Express Way No. 2	...	11·0 Kms.
7. R. E. O. Road	...	297·0 Kms.

There has been phenomenal increase in road transport in the plan period. There are 4,898 vehicles in the district during 1981 as against 2,863 vehicles available in 1971. Passenger bus service has been made available to all the C. D. Block Head Quarters and Tahasil Head Quarters of the district. Transport service is now available in 11 permanent routes besides 9 temporary routes in the district. The district Head Quarters is also connected with State Head Quarters and other important places of State and few places outside the State by bus routes.

Communication by railway is very poor in the district. Only the mining belt of Barbil-Joda in Champua Sub-division is connected with Badjamda which is the only transport available for export of minerals from the area. The rail link connecting Nayagarh-Banspani region with Paradeep Port via Kendujhar-Daitary, when completed will provide assured transportation of the mineral wealth of the district.

8. SMALL SAVINGS—In the field of small savings, this district has contributed its mite for the developmental work of the State and it has been continuously been exceeding its

annual target fixed by the Government in this respect, as given below :

Year	Target (In lakhs of rupees)	Achievement (In lakhs of rupees)
1978-79	50	59·54
1979-80	60	66 76
1980-81	70	71·94
1981-82	105	56 26 (upto Jan, 1982.)

This district has 56 pay-roll saving groups having 9,922 members with a monthly deposit of Rs. 3,60,700/34 villages have been declared as 'Savings Villages' in this district, where hundered per cent families have opened Savings Pass Books. 48 Schools have been covered under the fold of 'Sanchayika' (Schools Savings Scheme) in the district. Considering the tribal predominance of the district, the achievement in this respect is encouraging.

9. TRADE AND COMMERCE—During the rule of the feudatory chiefs there was a road from Champua to Vyassasarobar (in Cuttack district) touching important villages on route and passing through Kendujhar and Anandapur. There was also the old Midnaporo-Sambalpur road which dwindled down to a track. At present there are 4 railway stations in the district used mainly for transportation of mineral products from the district. The new National Highway No. 6 passes through the district. The Express Way No. 2 starts from Joda and proceeds upto Bambari through different mining areas. Three State Highways pass through the district which maintain direct communication with all the adjoining districts. In earlier days, trade consisted of export of oilseed, lac, tussar, cocoons, cloth, hides, mahua, horns, sabai grass, timber, fuel, honey and molasses. The export trade was primarily handled by petty outside merchants and a few local traders through bullock carts. In course of time, the Marwaris and other trading classes found their way in and established shops at convenient centres/ markets. In the post-independence era, the trade and commerce has veered round to agro-based, forest-based and mineral based products. The nearest rail head at Jajapur Road mostly controls the trade of the district. The chief exports of the district are jute, oil seed, lac, mustard, niger, timber and mahua besides minerals like iron ore, manganese, chromite and quartzite.

The minerals transported out of the district during 1980-81 was as follows :

ITEM		QUANTITY IN M. T.
Iron ore	...	37,14,599
Manganese	...	3,65.899
Chromite	...	61,431
Quarzite	...	3,191

Besides, minor forest produce like sal seed to the tune of 10,904 M.T. were exported during 1980-81. The Tribal Development Co-operative Society of the district also raised some minor forest produce and exported out side the district. During 1980-81 the following i tems were exported.

ITEM		QUANTITY IN QUINTALS
Niger	...	388·50
Tamarind (for Iraq)	...	1,150
Tamarind (for Tamil Nadu)	...	28 60

This society also exports non-edible seeds like Kusum, Mahua, Harida and Mahua flower. Mahua flower is in demand for distilleries.

So far as import is concerned, the commodities mostly comprise rice, wheat and wheat products, sugar, fertiliser, grocery, iron and steel goods, cement, kerosene oil, salt, medicine, fancy goods, agricultural implements, machinery, petrol, oil, cloth, ready made garments, electrical goods, automobiles, utensils, spicies and other consumer goods. The State Civil Supplies Corporation as wel as the district Civil Supplies Office control the distribution of essential commodities which are released under orders of the State Government. The RCMS and other co-operative societies deal with consumer goods and fertiliser, agricultural implements

etc. for convenience of the public. The quantity received in the district during 1980-81 was as follows :

ITEM		QUANTITY
Cement	...	2,131 M. T.
Rice	...	107,822 Quintals
Wheat	...	28,020 -do-
Sugar	...	83,735 -do-

These commodities are distributed through the retail shops opened in the district for facility of the consumers.

The items imported to the district as well as exported from the district are mostly transported through road transport by truck and to the interiors through bullock carts on delivery from the nearest rail head at Jajpur Road, 114 kms. away from the district headquarters. Regarding consumer goods, the transactions are effected in 75 number of weekly, bi-weekly markets, located in the district.

In the weekly markets of Dhenkikote, Kendujhar Town, Harichandanpur and Salabani transaction of cattle is also made.

10. POWER—The power generation and distribution is controlled at the State level by the Orissa State Electricity Board, a State Government undertaking. At the district level one electrical division looks after the day to day administration. The district does not have any potential for power generation. Hence, it depends for supply from Hirakud Hydroelectric Project outside the district. Under the Rural Electrification Scheme, 730 villages of the district have been provided with electricity by 1980-81 as against 62 villages provided with electricity upto 1971-72. Two special project area schemes are also under execution in the district. The division also takes up the work for energisation of L. I. Points belonging to both Government as well as private persons. Till 1980-81, 148 private L. I. Points and 66 L. I. Points of Orissa L. I. Corporation have been energised in the district. 298 pumps were energised upto 1980-81.

Major social and cultural events and miscellaneous activities on note during the decade.

Home for Homeless :—Close on the heels of the calamitous drought situation in 1972-73 in the Bhuyans and Juangapirh areas of Kendujhar, the necessity for providing shelter to the orphan and destitute children was thought of. "MANOJ MANJARI SHISHU BHAVAN"—abode for the orphans was started on 17.5.1973. The Bhavan acquired a corporate status being registered under the Indian Societies Registration Act, 1960 during November, 1974.

This institution is playing a major role in the State in shaping the destiny of the unfortunate children and their upliftment. By now, it is a self-contained institution having facilities for education, medical attendance (vocational guidance) with bakery, carpentry, tailoring, music, art and craft, taking into account the ablity and aptitude of the inmates. The day to day administration is conducted by a Committee with the District Magistrate as the ex-Officio President besides official and non-official members of the locality. The strength of the inmates during 1980-81 was 120 as against 14 during 1973 74.

In conformity with the existing rules and regulations, the children are also given in adoption in and outside the country. During 1974-75 through Indian sponsorship and adoption organisation, five children were sent to Sweden and 18 to Switzerland through "Terredes Hommes". During 1977-78, 3 children were sent to Switzerland whereas in subsequent year 4 children were sent to Norway for sponsorship and adoption in collaboration with the parent association of Norway. There has also been adoption of children of this institution in our country.

International Child Welfare Associations like Terredes Hommes, Indian Society in sponsorship and adoption, Guild of Services (Orissa Branch), Enfants Espaidau Mande (France), Swedish Society for International Child Welfare, do take interest for rehabilitation and

adoption of the in-mates. Children upto the age of 12 are eligible for admission.

11. JUANG DEVELOPMENT AGENCY—Juangs are one of the primitive tribes found in the district. According to 1971 Census, the population of this tribe was 55,995 This tribe is mostly located in Jhumpura and Joda C. D. Block areas. Upliftment of this primitive community has been taken up by the State Government through the Juang Development Agency under the chairmanship of the District Magistrate from the year 1978-79. So far, 616 families scattered over 20 villages have been adopted under this scheme. This agency has taken up different schemes for development of physical resources, agriculture and allied areas, infrastructure, and provision of credit etc. Each family is being provided with 2½ acres of land fit for agriculture in a compact patch. Cropping pattern for both Khariff and Rabi along with supply of improved seeds, fertilisers, irrigation and knowhow have been initiated with a view to diverting them from their traditional shifting cultivation. Each family is provided with at least 50 fruit bearing trees to supplement their income from agriculture. Each family is also being trained in tussar rearing by either machine or manual operation and cocoons are being supplied for making yarn, so that each family can earn at least Rs. 5/-per day. Other programmes under 'area development' have also been initiated, so that each family earns at least Rs. 300/-per month Necessary measures have been taken to provide all-weather communication, supply of power and drinking water facility to the villagse. Procurement of their goods and markting thereof has been taken up by the society in order to avoid middlemanship and exploitation. 'LAMPS' (Large sized Multi Purpose Societies) have been set up to provide necessary credit facilities both in cash and kind to each family. Each family has been motivated to open savings cash book. Massive afforestation programmes has been taken up to restore the forest growth already donuded by shifting cultivation. The training in tailoring is also being promoted in the villages and the trainees after completion are being provided with free tool kit, for starting commercial production. Essential commodities are being made available through the retail centres and LAMPS.

12. NATURAL CALAMITIES—Though not in deltaic region, the district has been subjected to repeated natural calamities including flood in the last decade. River Baitarani alongwith its tributaries, viz., Suna, Ardei, Kalinjar, Musal, Kusei and Sita etc. have been responsible for floods in the district during monsoon. The decadal calender of natural calamities is furnished below.

Calendar of natural calamities in Kendujhar District (1971-81).

Sl. No	Year	Nature of occurance	Name of river in inspate
1.	29.10.71	Cyclone	
2.	From 9.9.72 to 12.9.72	Flood and Cyclonic damage	Baitarani
3.	20.7.73	Flood	Baitarani and its tributary Samakoi
4.	From 17.8.75 to 19.8.75	Flood	Baitarani and its tributaries. Suna, Ardei, Kalinjar, Musal, Kusei, Sita, Samakoi, Sita, Dey, Mankad, Hanumantia nulla, Bolani nulla
5.	1976	Drought	
6.	From 1.9.78 to 2.9.78	Flood	As indicated in item No. 4
7.	16.4.78	Tornado	...
8.	7.8.79 & 8.8.79	Flood	Baitarani, Kusei, and their tributaries, Sub-tributaries and other rivers and some nallahs were inspate.
9.	1979	Drought	..
10	17.4.81	Tornado	...

In the living memory the district had never experienced the severe tornado which affected ten villages in April, 78 and twelve

villages in April, 1981 in Anandapur Sub-division of the district and left untold miseries to the inhabitants.

The tornado of 1978 took toll of 167 human lives and 819 heads of cattle. Out of 638 houses affected, 260 were razed to the ground, 94 fully collapsed alongwith 284 which partly collapsed. 341 persons were injured due to the tornado and under went treatment in the hospitals. 26 public institutions were damaged. Relief and restoration was taken up by the State Government in massive scale for rehabilitation of the affected people.

The tornado of 1981 affected a poupulation of 5,783 covering 1,207 families living in 12 villages of Patana and Saharapada Blocks in the district. There was loss of 37 human l ves. Besides, 231 were reported injured and treated in hospital. 136 dwelling houses were razed to the ground, 205 nos. fully collapsed and 358 nos. partly collapsed. District administration underlook the relief and restoration work.

Distribution of Government waste land for agricultural and homestead purposes :

The scheme was introduced in the year 1972 under State Government Revenue Department Order No. 60972/Rev. dated 20-10-72. The ceiling for distribution of waste land for agricultural purpose was fixed at 2 acres for each family. Subsequently, the ceiling was raised to 5 acres of land with effect from 1974, only for S. C. and S. T. and then again reduced to 2 acres for all during the year, 1976. The ceiling for distribution of Government waste land is fixed at one standard acre as per Revenue Department Notification No. 18667 dated 17-10-79. No salami is charged for the settlement of lands with the land-less.

In case of irrigated Government lands given on lease, salami is charged. Similarly 4 cents of Government homested land is given on lease to the home-steadless persons free of salami. Beyond 4 decimal 50% of market value is charged towards salami.

Achievement during the d cade upto 31-3-81 is as follows :

Class of Beneficiary	Agricultural		Homestead	
	No. of Beneficiary	Area alloted in acres	No. of Beneficiary	Area alloted in acres
1	2	3	4	5
1. Scheduled Tribe	30,930	34,519·37	6,013	623·40
2. Scheduled Caste	5,102	4,401·69	939	61·14
3. Others	7,034	5,230·90	1,197	106·08

Harijan & Tribal Welfare :—A massive programme for bringing about transformation was launched during the 5th Plan period when the Tribal Development Agency Programmes and Intergated Tribal Developments Programmes were available to these communities. Both the Tribal Development Agencies and Integrated Tribal Developments Programmes have operational effect to the sub-plan. The former was a registered society where as the latter is the Government Agency.

Perceptible achievements have been made in the field of agriculture which includes land reclamation and land development, crop demonstration and providing input assistance. As a measure of subsidiary occupation to the indigent people for extra income, animal husbandry programmes have been intensified by way of starting of poultry, piggery, goatery, ard sl eep rearing etc The project piggery development officer of the district under the guide lines of Economic Rehabilitation of Rural Poor intesified this operation during 1980-81. Under the irrigation programme, minor irrigation projects and dug-wells were taken up. With a view to providing integrated credit-cum-marketing structure in the sub-plan area a new structural pattern of co-operative known as LAMP (Largest sized Multi Purpose Co-operative Society) was organised to render a package of services, like purchase of surplus agricultura' and minor forest produced of the tribals at reasonable prices.

Micro-level planning was felt essential for the primitive tribes aiming at concentrated socio-economic development of a group of families (500-600 families) in a compact area initiating, agriculture, horticulture, soil conservation and animal husbandry programme in the economic sector so as to transfer the primitive tribes to settled agriculture.

Under "modified area development approach" sponsored by the Government of India an attempt has been made to identify the tribal concentration with the minimum population of 10,000 having 50% or more tribals and such location is outside the area covered by the tribal sub-plan. This programme is being implemented in Anandapur Block under the supervision of SFDA.

Government waste land is also allotted in favour of the landless scheduled caste and scheduled tribe on priority according to the lease principle both for agriculture and home-stead purpose. Another measure is to set-up colonies in the plains by providing various amenities of living to wear away tribals from the destructive practices of shitting cultivation. Under this programme 8 colonies were taken up where 308 families are residing in the following locations.

Under the "Legal Aid Scheme" financial assistance was given to the Scheduled Caste and Scheduled Tribe involved in land ejectment cases. Legal assistance is also given to the Scheduled Castes and Scheduled Tribes for cases under I. P. C. and Cr. P. C. relating to land disputes. To encourage education, Government has established residential type of schools with facilities for free boarding and lodging for Scheduled Castes/Scheduled Tribes students who were supplied with free reading and writing materials. There are six High Schools which includes 2 for girls only, besides 5 Ashram Schools and 56 Sebashrams in the district run by State Government Out of this, 4 Sebashrams provide residential accommodation for the Schedeled Caste and Scheduled Tribe students

In addition to above, 10 Chatasalis having general education upto Class-II in the sparsely populated tribal villages of the district are available. Here no regular School building has been constructed nor are the teachers Goverr ment employees.

Modern trades like welder, tailoring have been introduced in selected High Schools out of the fund under special central assistance.

To encourage education among the tribals, pre-matric stipend, passed matric scholarship, reservation in the Sainika School at Bhubaneswar and Public School at Sunabeda, Chandragiri with monthly stipend is also available for the tribal communities. Simultaneous to the educational aid, the Orissa Reservation for Vacancies in Posts and Services (for S. Cs. and S. Ts.) Act, 1975 continues to be in force in the field of appointment.

Under health, housing and other schemes various non-official organisations viz., Utkal Adibasi Mangal Samiti, Thackarbapa Ashram, Utkal Babajivan Mandal have devoted themselves for creating awareness among these sections. Medical institutions have been made available in the tribal and allopathic dispensary is available at Suakati in Banspal Block, a 6 beded hospital at Ukhunda in Jhumpura Block, a mobile health unit is functioning in Kanjipani and Raidiha Simultaneously, another Ayurvedic disepensary is available at Chamakpur in Champua Sud-division.

Places of Religious, Historical or Archaelogical importance in villages and of Tourist interest in the towns.

The district headquarters Kendujhar is the former capital of Kendujhar princely state and is situated on the road connecting Jajapur-Kendujhar road railway station in Cuttack district with Chainbasa in Bihar State and Rourkela in Sundargarh district. The town is connected by regular bus service with sub-divisional headquarters and other importance places, besides the State Capital.

As a green land of panoramic beauties and store house of mineral wealth, the district offers a variety of attractions to the tourists, which include religious shrines, fresco paintings and water falls.

There is tourist office at the district head-quarters which provide information on places of importance and of tourist, interest as mentioned below.

1. Badaghagara Water-fall:—This is located about 10, Kms. away from the district head-quarters and is a good picnic spot. A perennial stream runs nearby. Fishery Department has recently developed pisciculture in the reservoir.

2. Sanaghagara Water-fall:—This is about 5 Kms. from the district headquarters and is a good picnic spot.

3. Murga Fall:—This is located in Thakurani hill of Joda Block in Barbil Tahasil of Champua Sub-division. A perennial stream runs along the high hills and thick forest. The water descends from a height of about 25 Mtrs. Underneath the fall is situated the shrine of Lord Siva know as 'Murga Mahadev'. The place makes a fine picnic spot. Thousand of Piligrims from surrounding villages, gather there on 'Makar Sankranti' day every year. The place can be negotiated by a motorable road from Beleipada to Nuamandi. However, there is no regular bus service to this place. It is 65 Kms. away from the district headquarters.

4. Ghatagaon Tarini:—Village Ghatagaon is situated 44 kms. from Jajapur-Kendujhar road and 50 kms. away from the district headquarters where the jungle deity Tarini is located on the State Highway No. 11. There is no temple here and the priest belongs to Sudra Caste called 'Bhuria'. Offering of cocoanut to the deity is the common practice among the way farers. The important festival of this deity is on 'Bisuva Sankranti' day.

5. Handibhanga Fall:—The Handibhanga fall, about 30 meters in height cross in the Handibhanga hill ranges near a village of the same name at a distance of 3 kms. from Joda-Basantapur road. Being surrounded by a stiff cliff of about 30-45 meters. In height the place is almost in accessible except by kutcha but difficult road from Dubuna-Kolimati village. During extreme summer one would feel quite cool at the foot of the fall.

6. Gonasika:—It is source of the river Baitarani where a Siva temple has been built. The site presents a beautiful scenery surrounded by series of valleys and wooded hills and is about 45 kms. away from Kendujhar town and is located in Banspal Block under Telkoi Tahasil. The hill top is 3,219 feet high. There is all-weather road to this place. Here river Baitarani is known as 'Guptaganga' as the river goes underground a little away. There is a pond available below which is considered by the local people as religious. This is constructed by Laxmi Narayana Bhanja one time ruler of this princely State.

7. Deogan (Kosoleswar):—On the river Kusai near, Anandapur, the temple of Kosoleswar built in circa 900 A. D. is a famous centre of piligrimage. Once upen a time it was flourishing seat of Buddhism. Even now a 5 feet high image of Abalokiteswar stands there as reminiscence of the Buddhists activities in the past. Another important monument of the place is the stone embankment on the river which is the second of its kind in the State.

8. Sitabinji:—This is located in Ghatagaon P. S. situated on the river Sita and is famous for fresco painting on a rock shelter which looks like a half-opend umbrella. The painting there depicts a royal procession and is known as Ravan Chhaya. The rock looks like a big canopy. Two stones on the hill-top known as LAVA and KUSA are worshipped on Raja Sankranti day. The place is 25 kms. from Kendujhar town and 22·5 kms. from Dhenkikota The name of the place is reported to have been originated from Sita who is now worshipped in the cave here.

Apart from this, there is another Khanda-dhar water fall of about 500 feet high amidst forest in Banspal Block in the district which is also a good picnic spot and is frequented by the

visitors. This is situated at a distance of 50 Kms. from the district headquartars. The fall is about 400 feet from the hills. A regular bus service is available to this place from the district headquarters.

Unfortunately most of the places do not have regular communication facility for the benefit of the visitors. No departmental transport facility or accommodation is available in such places. However, Government, accommodation such as P.W.D. or National Highway bungalows are available for accommodation of the visitros at places little away from these spots.

Analysis on Village and Town Directory Data

Introduction of inset tables in the District Census Handbook is a novel feature of 1981 Census which is aimed at providing a brief analysis of the results for facility of the Planners, Data Users etc. Thirteen inset tables have been provided in this publication. The contents of each such table is explained below in brief.

Table—1, depicts the distribution of villages according to the availability of different amenities under each Tahasil of Kendujhar district.

TABLE—1

Distribution of villages according to the availability of different amenities.

Sl. No.	Name of Tahasil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1.	Telkoi	330	228 (69·09)	34 (10·30)	328 (99·39)	48 (14·55)	12 (3·64)	44 (13·33)	23 (6·97)	21 (6·36)
2.	Barbil	172	124 (72·09)	14 (8·14)	165 (95·93)	30 (17·44)	8 (4 65)	11 (6·40)	53 (30·81)	37 (21 51)
3.	Champua	234	191 (81·62)	16 (6·84)	233 (99·57)	49 (20·94)	16 (6 84)	50 (21·37)	41 (17 52)	116 (49 57)
4.	Kendujhar	821	545 (66·38)	109 (13·28)	818 (99·63)	130 (15 83)	39 (4·75)	96 (11·69)	138 (16 81)	257 (31·30)
5.	Anandapur	488	373 (76·43)	23 (4·71)	486 (99 59)	111 (22·75)	17 (3·48)	72 (14·75)	128 (26·23)	202 (41·39)
	Total District	**2,045**	**1,461 (71·44)**	**196 (9·58)**	**2,030 (99 27)**	**368 (18·00)**	**92 (4·50)**	**273 (13·35)**	**383 (18·73)**	**633 (30·95)**

Out of 2,045 inhabited villages in the district, 1,461 villages are having educational facility, 196 villages are having medical facility, 2,030 villages are having drinking water facility, 368 villages are having Post and Telegraph facility, 92 villages are having market/hat facility, 273 villages are having communication facility like bus stop etc., 383 villages are approachable by pucca road and 633 villages are having the facility of power supply. It clearly reveals how backward, the district is. Coming to the Tahasils, the percentage of villages served with educational facility is comparatively low in Kendujhar Tahasil though in terms of absolute number the highest number of villages of that Tahasil are having educational facility. Similarly the highest percentage of villages having educational facility is found in Champua Tahasil. The highest percentage of villages in Kendujhar Tahasil are having medical facility. But comparatively, it is very low, as only 13·28 per cent of the villages of the Tahasil are having medical facility. Very low percentage of villages in Tahasils like Barbil, Champua, Anandapur have got the medical facility. Regarding the drinking water facility, however, the position is some-

what better in almost all the Tahasils. As regards the Postal facility, market and hat facility, communication facility the position is very much poor in most of the Tahasils. Similar is also the position of villages approachable by pucca road, power supply facility. This position is perhaps due to the district having predominantly tribal population with whom social awareness is yet to develop.

Table—2 gives the proportion of rural population served by different amenities of the district tahasilwise.

TABLE—2

Proportion of Rural Population served by different amenities

Sl. No.	Name of Tahasil	Proportion of Rural Population served by the amenities of—								
		Total Population of inhabited villages in the Tahasil	Education	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1.	Telkoi	1,40,436	86·19	25.45	99.87	32·56	8.85	21.74	12.37	13.57
2.	Barbil	1,51,845	48·07	9·78	53·62	17·26	5·51	6·60	21·53	17·82
3.	Champua	1,25,007	93·10	20·39	99·98	40·30	19·98	35·49	27·35	67·33
4.	Kendujhar	3,99,046	79·50	22·50	91·74	29·57	8·85	16·70	20·62	41·16
5.	Anandapur	2,98,288	84·80	11·10	91·28	41·85	8 26	23·87	23·72	52·31
Total District		**11,14,622**	**79·00**	**17·85**	**88·37**	**32·76**	**9·49**	**19·99**	**21·29**	**40·42**

Out of 1,114,622 population counted in rural areas of the district, 79 per cent are benefited by educational facility in the village, 17·85 per cent are served by medical facility, 88·37 per cent by drinking water facility, 32 76 per cent by Post and Telegraph facility, 9·49 per cent market/hat facility, 19·99 per cent by communication facility, 21·29 per cent of the rural population of the district are benifited by pucca road facility and 40·42 per cent by power supply facility. The position is slightly better in terms of population rather than in terms of villages. Among the Tahasils the similar position is also noticed. The rural population in Barbil Tahasil is availing lesser facility than that of other Tahasils of the district as it is more backward due to the predominant tribal population.

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available are shown in Table—3.

TABLE—3

Distribution of villages not having certain amenites, arranged by distance ranges from the places where these are available

Village not having the amenity of	Number of villages where the amenity is not avilable and available at distance of			
	−5 Kms	5+10 Kms	10+Kms	Total (Cols.2 to 4)
1	2	3	4	5
1. Education	560	16	8	584
2. Medical	719	606	524	1,849
3. Drinking water	15	...	...	15
4. P & T	1,456	176	45	1,677
5. Market/ Hat	1,011	806	136	1,953
6. Communi-cation	906	446	420	1,772

Out of 2,045 inhabited villages, educational facility is not available in 584 villages. But the inhabitants of most of these villages are enjoying this facility within a radius of less than 5 kilometers. Similarly, medical facility is not available ie 1,849 villages but the people of 719 villages are getting medical facility within a radius of less than 5 kilometres distance, 606 villages are getting these facilities within a distance range of 5 to 10 kilometres. The rest 524 villages are getting this facilitiy by travelling more than 10 kilometres distance. Drinking water facility is not available only in 15 villages for which the villagers of these villages have to move a distance of less than 5 kilometres to get drinking water. More than 50 per cent of villages of the district are not getting any facility on Post and Telegraph, market and hat and communication. For getting Post and Telegraph facility the villagers of 1,456 villages have to travel less than 5 kilometres distance, 176 villages, have to travel 5-10 kilometres distance and those of 45 villages travel more than 10 kilometres distance. Market and hat facility are available for the inhabitants of 1,011 villages within a distance of less than 5 kilometres whereas the villagers of 806 villages have got-it within a distance of 5-10 kilometres and of 136 villages have to travel a distance of more than 10 kilometres. The inhabitants of 906 villages are getting the communication facility within a distance of less than 5 kilometres, 446 villages within a distance of 5-10 kilometres and those of 420 villages have to travel more than 10 Kms.

Table—4 depicts the distribution of villages according to the distance from the nearest town and availability of different amenities in the district.

TABLE—4

Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance Range from the nearest town (in Kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenities of							
		Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
0—5	74	55 (74·32)	9 (12·16)	73 (98·65)	20 (27·03)	5 (6 76)	18 (24·32)	46 (62·16)	49 (66 22)
6—15	384	292 (76·04)	28 (7·29)	383 (99·74)	83 (21 61)	17 (4·43)	58 (15·10)	120 (31·25)	173 (45·05)
16—50	1,346	962 (71·47)	138 (10·25)	1,337 (99·33)	230 (17·09)	58 (4·31)	173 (12·85)	210 (15·60)	394 (29·27)
51+	241	152 (63·07)	21 (8·71)	237 (98·34)	35 (14·52)	12 (4·98)	24 (9·96)	7 (2·90)	17 (7·05)
Unspecified	...	...	...	...	...	...	...	...	...
Total	**20,45**	**1,461 (71·44)**	**196 (9·58)**	**2,030 (99·27)**	**368 (18·00)**	**92 (4·50)**	**273 (13·35)**	**383 (18·73)**	**633 (30·95)**

Most of the villages are coming under the distance range of 16—50 Kilometres from the nearest town. Out of 2,045 inhabited villages in the district 1,346 villages are coming under this distance range. However, there are only 74 villages within a radius of 5 kilometers distance from the town where there is possibility of early urbanisation. It reveals from the table that the villages which are nearer to townsare enjoying more facility than those which are away from the towns.

Distribution of villages according to population range and amenities available has been shown in Table—5

TABLE—5

Distribution of Villages according to Population Range and amenities available

Population range	No. of inhabited villages in each range	Number (with percentage) of Villages having the amenities of							
		Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
— 499	1,327	764 (57 57)	39 (2·94)	1,313 (98·94)	64 (4·82)	19 (1·43)	100 (7·69)	174 (13 11)	253 (19·07)
500—1,999	695	674 (96·98)	144 (20·72)	694 (99·86)	283 (40·72)	60 (8·63)	156 (22·45)	192 (27·63)	366 (52 66)
2,000—4,999	23	23 (100·00)	13 (56·52)	23 (100·00)	21 (91·30)	13 (56 52)	17 (73·91)	17 (73·91)	14 (60·87)
5,000+	...	...	...	...	...	...	...	...	...
Total	**2,045**	**14,61 (71·44)**	**196 (9·58)**	**2,030 (99·27)**	**368 (18·00)**	**92 (4·50)**	**273 (13·35)**	**383 (18·73)**	**633 (30·95)**

It reveals from the table that most of the villages of the district are coming in the lowest population range i. e. less than 500. The biger sized villages are enjoying better facilities than the villages coming under the lower population range. All the 23 villages in the highest population range of the district are getting educational as well as drinking water facilities whereas 13 villages are getting medical facility, 21 villages are served with post and telegraph facility, 13 villages are getting market / hat facility, 17 villages are having communication facility, again 17 villages are approached by pucca road and 14 villages are getting power upply facility.

Table—6 shows the main staple food in the majority of villages in each tahasil.

TABLE—6

Main Staple Food in the majority of villages in each Tahasil

Sl. N .	Name of Tahasil	Main Staple Food
1	2	3
1·	Telkoi	Rice
2·	Champua	Rice
3	Barbil	Rice
4·	Kendujhar	Rice
5·	Anandapur	Rice

It reveals from the table that the main staple food in all the tahasils as well as in the district is rice.

Table—7 shows the distribution of villages according to land use pattern in the district.

TABLE—7

Distribution of villages according to land use

Sl. No.	Name of Tahasil	No. of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1.	Telkoi	330	166,375·88	45 88	0·89
2.	Barbil	172	64,776·09	38·72	1·87
3.	Champua	234	61,771·85	64·98	4 63
4.	Kendujhar	821	200,686·82	66·26	1·88
5.	Anandapur	488	97,562·35	77·10	0·50
	Total District	**2,045**	**591,172·99**	**59·16**	**1·68**

Note– Tha area figures, for uninhabited villages and villages for which the land use data are not available are excluded from the total.

Percentage of irrigated area to total cultivable area of the district is only 1·68 per cent which implies that the district is backward in respect of irrigation. This percentage is higher in Champua Tahasil. In the mean while, a number of minor irrigation projects as well as some lift irrigation projects have been taken up in the district. It is hoped that in the near future an appreciable extent of area will be provided with irrigation facilities. It reveals from the table that the agriculture in the district is mostly rainfed. Only 59 16 per cent of the total area of the district is cultivable. This percentage is higher in case of Anandapur Tahasil.

Growth, density and sex ratio of urban population in the district in relation to the State have been presented in Table—8

TABLE—8

Growth, Density and Sex-Ratio of Urban Population in the District in relation to the State

Census year	KENDUJHAR						ORISSA					
	Total Population	Urban Population	Percentage of Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. km)	Sex ratio (No. of females per 1,000 males)	Total Population	Urban Population	Percentage of Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. km.)	Sex ratio (No.of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	588,441	9,343	1·59	+ 3·76	898	925	14,645,946	594,070	4 06	+44 01	1,195	881
1961	743,315	31,964	4·30	+232·12	580	780	17,548,846	1,109,650	6 32	+86 79	1,078	807
1971	955,514	67,347	7·05	+110·70	726	839	21,944,615	1,845,395	8 41	+66·30	1,113	845
1981	1,114,622	126,356	11·34	+ 87·62	754	867	26,370,271	3,110,287	11·79	+68 54	1,359	859

The percentage of urban population to total population is only 11·34 per cent during the current operation, whereas it was only 7·05 per cent in 1971 and 4·30 per cent in 1961 and 1.59 per cent during 1951 Census. There was only one town in the district during 1951, but the number of towns increased to 2 during 1961, 4 during 1971 and 6 during the current Census. Similarly, the density of urban population is the highest during the current operation having 754 population per Sq. km. . The sex ratio i. e. the number of females per 1,000 males is only 867 during the current operation, but in 1951 Census it was 925, in 1961 it was 780 and in 1971 Census it was 839. In comparison to State it is seen that the percentage of urban population to total population of the State is only 11·79 per cent, the density of urban population of the State is 1,359 and the sex ratio is 859 during the current operation.

Table—9 depicts the new town/towns declassified in 1981 Census.

TABLE—9

New Towns / Towns declassified in 1981 Census

Name of Towns	Population 1981 Census
(a) Added	
(i) Balagoda (Bolani) (C. T.)	9,515
(ii) Daitari (C. T.)	4,844
(b) Declassified	
NIL	

Only two non-statutory towns viz,. Balagoda (Bolani) and Daitari have been added to the urban frame of the current operation. However, no town has been declassified in the district during the decade (1971-81).

Per Capita Receipt and Expenditure in towns of the district have been shown in Table—10.

TABLE—10

Per Capita Receipt and Expenditure in Towns

Class, name & civic status of the town	Per Capita Receipt (in Rs.)			Per Capita Expenditure (in Rs.)					
	Total Receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	General Administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III Anandapur (N. A. C.)	6·94	0·18	6.76	6·14	2·06	0.80	0·92	0·06	2·29
V Balagoda (Bolani) (C.T.)	Non-municipal Town								
III Barbil (M)	36·17	15·05	21·12	31·76	2·48	4·55	7·46	4 28	12·99
VI Daitari (C.T.)	Not available								
III Joda (N. A. C.)	24·48	12·64	11·84	22·77	4·19	2·80	7·87	0·23	7·68
III Kendujhar (M)	60·74	16 56	44·18	28 84	3·07	0·72	6·07	3·27	15·71
Total*	**33·16**	**11·59**	**21·57**	**23·29**	**2·94**	**2·35**	**5·77**	**2.15**	**10·08**

* The Population of Balagoda (Bolani) and Daitari Towns have been excluded as those are non-municipal towns.

The figures in respect of non- statutory towns have been kept blank. These areas are continuing in rural frame for the purpose of revenue administration. Therefore, the financial aspects of only 4 statutory towns have been shown in this table.

Coming to the receipt side the per capita receipt has been assessed at Rs. 33·16 in the district out of which the receipt through taxes is Rs. 11·59 and receipt from other sources i. e. Government grant etc. is Rs. 21·57. As regards the expenditure side per capita total expenditure

of the district is 23·29 out of which the major chunk of Rs. 5·77 is utilised under "Public works". It reveals from the table that the financial position of the urban bodies is not sound.

Table—11 depicits the number of Schools for 10,000 population in towns.

TABLE—11

Schools per Ten Thousand Population in Towns

Class, name and civic status of town	Number per ten thousand population: Higher Secondary/ Inter/ P.U.C./ Junior College	Secondary/ Matriculatio	Junior Secondary/ Middle	Primary
1	2	3	4	5
III Anandapur (N. A. C·)	...	2	2	8
V Balagoda (Bolani) (C. T.)	...	1	1	2
III Barbil (M)	...	2	2	7
VI Daitari (C. T.)	...	2	4	4
III Joda (N. A. C.)	...	1	1	6
III Kendujhar (M)	...	2	2	7
Total	...	**2**	**2**	**7**

Facilities available upto Primaay Education in Urban area are only 7 schools per 10,000 population which confirms that the district is educationaly backward.

Number of beds in medical institutions in towns per 1, 000 population have been shown in Table—12

TABLE—I2

Number of Beds in Medical Institutions in Towns

Class, name and civic status of the town	No. of beds in Medical Institutions per 1,000 Population
1	2
III Anandapur (N. A. C.)	1
V Balagoda (Bolani) (C. T.)	2
III Barbil (M)	1
VI Daitari (C. T.)	2
III Joda (N. A. C.)	3
III Kendujhar (M)	5
Total	**3**

The district does not have any Ayurvedic or Homoeopathic hospitals with the facility of beds in the hospitals of urban areas. Hence, amenities like availability of beds is limited to the Allopathic hospitals/dispensaries run by the Government where indoor facilities are available. As against availability of 199 beds in the district in 1971 Census the current operation is disclosed with 325 beds in urban areas.

Table—13 discloses the most important commodity manufactured, exported and imported in towns.

TABLE—13

Most Important Commodity Manufactured, Exported and Imported in Towns

Class, name and civic status of the town	Most Important Commodity: Manufactured	Exported	Imported
1	2	3	4
III Anandapur (N.A.C·)	Tosser cloth	Tosser cloth	Grocery
V Balagoda (Bolani)(C.T)	...	Iron Ore	Dolamite
III Barbil (M)	Pig Iron	Iron Ore	Coal
VI Daitari (C·T.)	...	Iron Ore	Grocery
III Joda (N A.C·)	Ferro Manganese	Manganese Ore	Coal
III Kendujhar (M)	Aluminium Utensil	Aluminium Utensil	Textile goods

It has been explained earlier that the existing vast mineral and forest potential of the district is yet to be exploited to the fullest extent. From the table, it reveals that mining towns like Barbil, Daitari and Balagoda (Bolani) are exporting Iron ore and Joda exports Manganese ore by raising substantial revenue to the state ex-chequer. The district being a deficit one, all consumer articles besides iron and steel, clothing, coal etc. are imported to the towns.

SECTION–I

VILLAGE DIRECTORY

Codes used in the Village Directory

In the village directory various amenities and other data have been indicated by codes for want of space. The codes used in different columns are explained below.

COL. 5—Educational Amenities

This column is intended to provide availability of educational facility in the village under the following codes :

1.	Primary or Elementary School ...	P
2.	Junior Secondary or Middle School ...	M
3	Matriculation or Secondary ...	H
4.	Higher Secondary/Intermidiate/ Pre-University/Junior College ...	PUC
5.	College ...	C
6.	Industrial Schools ...	I
7.	Training School ...	Tr
8.	Audit literacy class / centre ...	Ac
9.	Other Educational Institutions ...	O

Schools upto class-V have been treated as Primary School and have included Nursery School, Kindergarten School, Pre-basic School, Pre-primary School, Junior basic School, upto class-V. Schools upto class-VII have been treated as Junior Secondary or Middle English School. Schools upto class-XI (Matriculation) have been considered as Secondary or High School. This also includes High Madarsa upto class-X. Schools or Colleges upto class-XII are considered as Higher Secondary Schools. In case of composite Schools like M. E. with Primary Classes or Higher Secondary Schools with M. E. Classes, those have been included in the number of Primary School and Middle School respectively. In a village having two Primary Schools and one M. E. with Primary classes, the total number of Primary Schools in the village has been recorded as three and M. E. as one.

In this process, the number of institutions have been determined and presented under the approved code. In cases of availability of more number of institutions of a type, the number has been indicated within bracket after the code. In case the amenity is not available in the village the same has been shown by a dash (—) in the relevant column having a note of the distance range regarding its availability.

COL. 6—Medical Amenities

Availability of such amenities has been presented under the following codes. In case of availability of more number of institutions of a type, such number has been indicated within bracket against the abbreviation. Where the amenities are not available, it has been indicated by a 'dash' in the relevant column with a note thereunder including distance range of its availability.

Hospital	...	H
Maternity and Child Welfare Centre	...	MCW
Maternity Home	...	MH
Child Welfare Centre	...	CWC
Health Centre	...	HC
Primary Health Centre	...	PHC
Primary Health Sub-centre	...	PHS
Dispensary	...	D
Family Planning Centre	...	FPC
T. B. Clinic	...	TB
Nursing Home	...	NH
Registered Private Practitioner	...	RP
Subsidised Medical Practitioner	...	SMP
Community Health Worker	...	CHW
Others	...	O

COL. 7—**Drinking Water Amenities**

The types of potable drinking water supply sources available within the village has been indicated by the following codes. If the amenities are not available in the village it has been presented by dash (—) in the relevant column and the distance range of its availability thereunder.

Tap Water	...	T
Well Water	...	W
Tank Water	...	Tk
Tubewell Water	...	TW
Handpump	...	HP
River Water	...	R
Fountain	...	F

Information not available	...	NA

COL. 8—**Post & Telegraph**

Availability of amenities in the village has been presented under the following codes. In case of non-availability it has been presented by dash (—) in the relevant column also indicating the distance range thereunder.

Post Office	...	PO
Telegraph Office	...	TO
Post and Telegraph Office	...	PTO
Telephone connection	...	Phone

COL. 10—**Communication**

Availability of public transport like bus, rail and water way to the village have been indicated by the following codes. In case of non-availability, it has been presented by a dash (—) in the said column with the distance range of its availability mentioned thereunder.

Bus Stop	...	BS
Railway Station	...	RS
Navigable water way (including river, canal, back-water etc.)	...	NW

COL. 11—**Approach to the village**

This is a new introduction in the 1981 Census not covered by the 1971 series. Approach to the village refers to the state of road etc. leading to the village. The intention is to see whether the village is approachable both in fair and foul weather and whether it is inaccessible sometime in the year. Such approach has been presented under the following codes.

Pucca road	...	PR
Kutcha road	...	KR
Navigable river	...	NR
Navigable canal	...	NC
Navigable water way (other than river or canal)	...	NW
Foot path	...	FP

COL. 13—**Power Supply**

If the power is actually available in the village in any form, then the same has been presented in this column under the following codes.

Electricity for domestic purpose	...	ED
Electricity for agriculture	...	EAg
Electricity for other purposses like industrial or commercial etc.	...	ED
Electricity for all purposes listed above	...	EA

COL. 20—**Remarks including any place of religious, historical or archaeological interest.**

This Column is intended to record particulars of any place of importance as well as the infromation on number of copies of newspapers coming to the village and motor cycles/scooters, cars/jeeps and tractors available in the village. The codes used in this column are as follows.

N— Copies of the newspapers coming to the village.

M— Motor cycles/Scooters available in the village.

C— Cars/Jeeps available in the village.

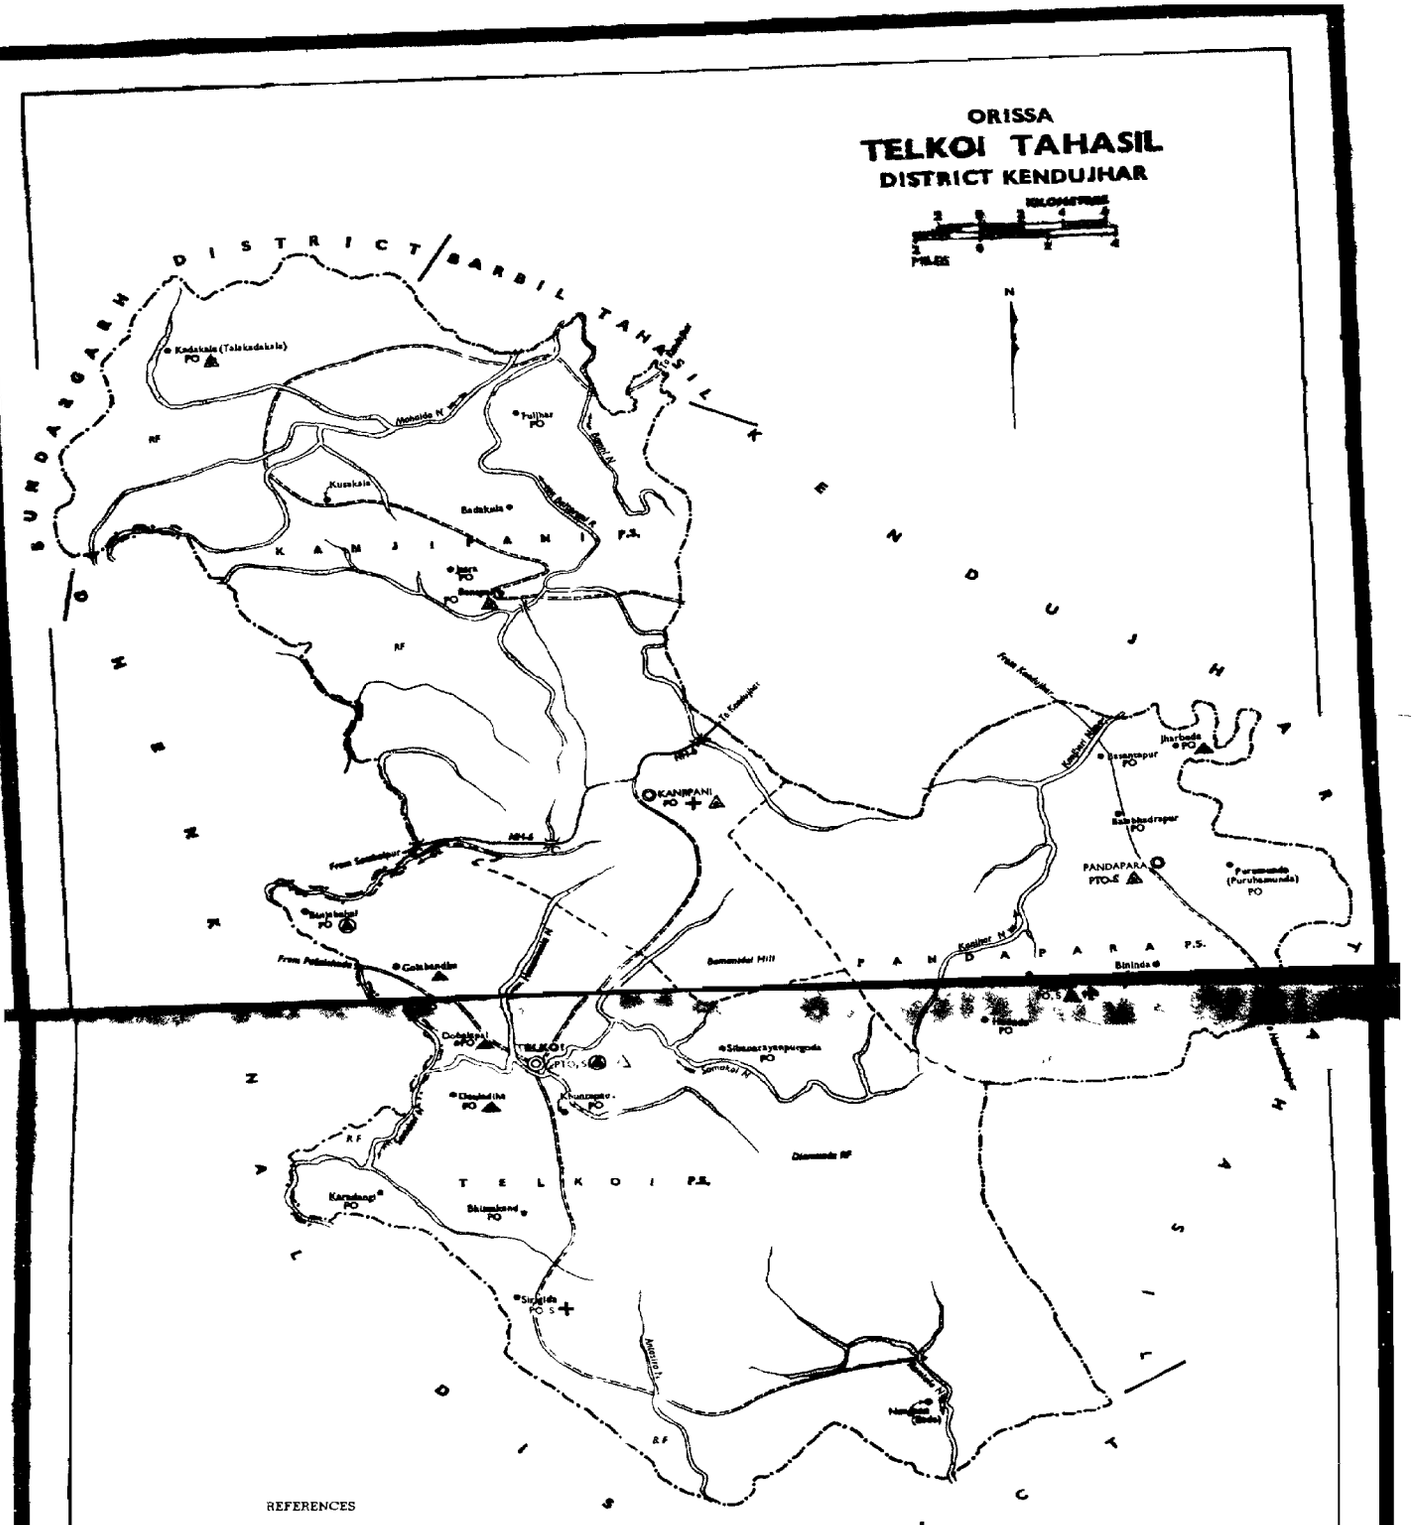

T— Tractors available in the village.

The infromation presented under this column is illustrated below:

N—32, M—2

Here N—32 represents the copies of newspapers, viz. 32 and M—2, the number of motor cycles/scooters, viz.2.

SECTION–II

TOWN DIRECTORY

Codes used in the Town Directory

STATEMENT—I

Status and growth history :

Col. 2—Class, name and civic administration status.

Class has been introduced to facilitate analysis on town directory data at State and all-India levels. It has been presented according to 1981 Census population of the core town in following ranges by the classification noted against each.

POPULATION		CLASS
1,00,000 and above	...	I
50,000—99,999	...	II
20,000—49,999	...	III
10,000—19,999	...	IV
5,000— 9,999	...	V
Below 5,000	...	VI

The name of the town has been shown in this column, with the correct spelling as adopted in the official record. Regarding the civic administration status, the town as it stood in 1980 has been indicated by the following abbreviations :

Municipality	...	M
Notified Area Council	...	NAC
Census Town	...	CT

STATEMENT—II

Physical aspects and location of towns :

Col. 12—The name of the navigable river/canal which is situated within a distance of 10 kms. has been shown under this column with distance from the referrent town. After the name of the river/canal 'R' for river and 'C' for canal has been given in brackets to denote whether it is a river or canal as illustrated below.

Mahanadi (R)—5

STATEMENT—IV

Civic and other Amenities 1979 :

Col. 6—Road length (in kms.)

Information under this column has been obtained from the officer incharge of the concerned urban local body. There are cases where the municipalities/notified area council maintain their roads accounts separately. Pucca roads and kutcha roads available in the town have been presented under the abbreviation 'PR & KR' respectively.

Col. 7—System of sewerage :

The sewerage system is implied the net work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal in the town. For the towns which are not provided with such underground sewerage system, availability of open surface drain or box drain etc. have been mentioned. The various type of sewerage/drainage system have been indicated upto two places in the town under the following codes :

Sewer	...	S
Open surface drains	...	OSD
Box surface drains	...	BSD
Sylk drains	...	SD
Cesspool method	...	CD
Pit system	...	Pt

Col. 11—Method of disposal of night soil :

Information in this regard has been obtained from the local body and the prevalent method of disposal of night soil has been presented with the following codes upto two places in order of their importance in the town. The objective of providing such data is to collect information which could help Government to provide a programme of stopping the practice of

removal of night soil as head loads and also minimising the use of human labour in the process of disposal.

Head loads	...	HL
Baskets	...	B
Wheel barrows	...	WB
Septic tank latrines	...	ST
Sewerage	...	S

Col. 12 & 13—Protected water supply :

The information collected from the local offices has been incorporated in these columns, in some cases such data had to be obtained from the State Public Health Engineering Department. The information on sources of water supply has been indicated in Col. 12 as against the system of storage with capacity in litres (in brackets) which has been presented in Col. 13. The same has been presented under following codes :

Over head tank	...	OHT
Service reservoir	...	SR
River infiltration gallery	...	IG
Bore well pumping system	...	BWP
Pressure tank	...	PT
Tubewell water	...	TW
Tap water	...	T
Well water	...	W
Tank water	...	Tk

The first five codes started above relate to the system of storage whereas, the remaining four codes represent the different sources of water supply.

STATEMENT—V

Medical, Educational, Recreational and Cultural facilities, 1979.

Col. 4 & 5—Medical facilities— Hospitals/ Dispensaries and bed available :

Information in this regard has been collected from the local offices. However, the institutions run by private doctors have not been included in these data, which have been restricted to the institutions run/aided by Government/ Semi-Government/ Local bodies/ Charitable institutions/ Social service agencies. The various types of institutions have been presented under the following codes :

Hospital	...	H
Dispensary	...	D
Health Centre	...	HC
Family Planning Centre	...	FC
T. B. Clinic	...	TB
Nursing Home	...	NH
Others	...	O

For places where medical facilities are not available, the name of the nearest place in the same district or nearest district, if in the same State or other State and its distance from the town where the facility is available has been indicated. All types of hospitals/dispensaries etc. whether allopathic, ayurvedic or homoeopathic have been covered These are further distinguished by providing additional codes :

A—Ayurvedic

U—Unani

Hom—Homoeopathic

In case of allopathic, no separate code has been given.

Col. No. 6 to 9—Educational facilities :

Information in this regard has been collected from the local officials and to the extent possible have been checked up with the informotion available in the office of the Director of Public Instructions of the State. For the place where more than one institutions of each type is available, the number thereof has been given against each in brackets. The codes used for different institutions are as follows :

Arts only	...	A
Science only	...	S
Arts and Science only	...	AS
Commerce only	...	C
Arts and Commerce only	...	AC
Combined of all categories Arts, Science and Commerce	...	ASC
Law	...	L

Col. 10—Recognised shorthand, typewriting and vocational training institutes.

Information has been collected from the local authorities. Here "recognised" means the institution recognised by statutory authority like Education Department, Commerce Department or Labour Department of the Government or semi-Government or autonomous bodies. The institution of each type has been presented under the following codes :

Shorthand	...	Sh
Typewriting	...	Type
Shorthand and Typewriting	...	Sh. Type
Others	...	O

Col. 11-14—Higher Secondary/ Intermediate/ PUC (Pre University College)/ Junior College Level, Secondary/ Matriculation, Junior Secondary/ Middle Schools and Primary Schools.

Information in this regard has been collected from the local authority and presented under the following codes.

Primary School	...	P
Junior Secondary or middle school	...	M
Matriculation or Secondary	...	H
Higher Secondary/ Intermediate/ Pre-University/ Junior College/ '10+2' system whether held in Schools or Colleges.	...	PUC

If educational facility is not available in the town, the name of the nearest place in the same district or name of the nearest district in the same State or other State with its distance from the town where the facility is available has been indicated.

Col. 17 to 20—Number of recreational and cultural facilities.

Information in this respect has been obtained from the local authority. Touring cinema has been eliminated from our purview and only permanent cinema/theaters have been included. Community halls/ auditorium have been added in this column as the same are becoming a common feature of the urban landscape. Information on Public libraries including reading rooms collected from the local authority and presented under the following codes.

Public Library	...	PL
Reading Room	...	RR
