DISTRICT CENSUS HANDBOOK

PART B—VILLAGE AND TOWNWISE
PRIMARY CENSUS ABSTRACT

KALAHANDI

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted At the same time, comparability with the 1971 data has also been kept in view All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the corelation of the amenities

with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and accordingly to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirement of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the column on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahasil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahasil/police station/C. D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri A. R. Nanda, I. A. S., the Director of Census Operations, Orissa on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April 1982.

PREFACE

It has been the tradition of Indian Census to present demographic data in as detailed a manner as possible so as to serve effectively the interests of the users of census data. 1981 Census has been completed leaving behind a vast mass of data collected carefully and meticulously on a country-wide basis by an army of trained enumerators. It is needless to mention that modern Census is no more confined to mere counting of heads. It is a kind of stock-taking, as it were, of the nation's human wealth. It has collected information of every individual, besides a host of other activities, institutions, establishments, services and so on. Thus, it has become an indispensable instrument of policy for development planning-reffered to by planners, data users, scholars and people from different disciplines and aims at presenting a complete picture of man in socio-economic and cultural settings.

District Census Handbook was first introduced as an auxilliary to 1951 Census and appeared as a State Government publication in more comprehensive and ambitious form in subsequent censuses. Under the existing instruction, the Director of Census has the responsibility of providing the Census data as well as non-census socio-economic and administrative statistics for this publication which is the responsibility of the State Government. In 1951 and 1961, it was published in one volume. During 1971, this publication was proposed to be presented in three parts. Part-A incorporated the Town and Village Directories, Part-B incorporated the Primary Census Abstract and provided data upto village level for the rural area and upto enumeration block level for the urban area. Part-C incorporated other Census tables and administrative statistics.

According to the publication programme of 1981 Census, it has to be pubilshed in two parts. Part-A will comprise the Village and Town Directory whereas Part-B will contain Village and Town-wise Primary Census Abstract. The first Part— Part-A consists of important statistical information relating to each town besides an array of statistical data relating to land use and various other amenities available in each village. Part-B of the present publication contains the essential census data known as Primary Census Abstract which provides demographic details of each district, tahasil,police station and down to each village and town and within the town, each ward. The aforesaid statistical information is enriched by the administrative map of the administrative units viz., district, tahasil and police station, availabe in the publication. These maps have been prepared in the Directorate of Census on the basis of maps obtained from the competent local authorities. In the Police Station maps, villages have been presented by their location code number for want of space. For the names of villages, one would have to refer to the alphabetical list of village of each tahasil, which are available both in Part-A and Part-B for facility of the readers.

With the object of avoiding delay and also to make each volume handy and not-too-bulky, it has been decided to bring out 1981 District Census Handbook in two parts.

In pursuance of the scheme for publication of the District Census Handbook, an analytical note has been provided explaining the census concepts adopted in the operation for easy appreciation of the subjects covered in the directory. An administrative map of the district is given at the beginning of the volume. Brief history of the district has been provided for introducing the district to the reader. The scope of Village Directory, Town Directory, Statements and Primary Census Abstract has been explained with reference to the contents of statements available in the publication.

The geographical aspect of the district including decadal jurisdictional changes available in the publication is intended to make it more informative. Another venture of 1981 is presentation of major characteristics of the district particularly in relation to the economic resources as furnished by the district authorities in the various fields of administration. This is directed to provide an interesting profile of the district to the reader as well as appreciation of developmental activity in the district during the decade. Notes on different codes used in this directory have been provided for the convenience of the reader in understanding the data. Note on places of religious/historical interest has been provided to make the publication more interesting. The analysis of census results of the district at the end will be of some interest to the readers and data users.

Information on amenities in the Village Directory has been collected from the Tahasildars and Block Development Officers. A very few selected items were collected through the census enumerator during his door-to-door visit. The Executive Officers of Municipalities and Notified Area Councils provided such data on towns. The collection and compilation of such massive data of each village and town was a stupendous task. Despite all possible care taken through intensive check and re-check to remove discrepancies in facts and figures, possibility of errors still creeping in can not be altogether ruled out.

I must express my deep gratitude to Shri P. Padmanabha, I. A. S., Registrar General and Census Commissioner, India and Shri N. G. Nag, Deputy Registrar General (Social Studies) for the timely guidance and advice through circulars.

I must place on record my deep appreciation and thanks to the Departments of Government of Orissa, heads of Departments, local bodies, District Officers, Tahasildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils for whose active co-operation and help the voluminous compilation has been possible.

For providing additional information on general characteristics of the district as economic activity, decadal changes (1971—81) of special note, I am grateful to Shri L. Kindo I. A. S., District Magistrate and Shri B. N. Bisoi, O. .A. S. (I), and Shri P. R. Negi, O. A. S. (I), Additional District Magistrate-cum-District Census Officers, Kalahandi, who had taken keen interest in making this compilation more informative.

For timely scrutiny, compilation and tabulation of District Census Handbook data, the supervision and assistance rendered by S/Shri B. Sahu, O. A. S. (I), N. C. Dutta, O. A. S. (I), J. Panda, O. A. S. (I), P. C. Roy, O. A. S. (I), and P. K. Mohapatra, O. A. S. (I), Deputy Directors-in charge of Regional Tabulation Offices and their staff are worth mentioning. The job would have been difficult but for their diligent and tireless effort.

In my office, I am specially thankful to Shri S. K. Swain, Deputy Director, Shri Madan Mohan Das, O. A. S., Deputy Director, Shri C. R. Mohanty, Asstt. Director and the staff of District Census Handbook, Map and Printing branches of the Census Directorate for diligence and zeal shown in this important assignment. Its expeditious preparation has placed a heavy burden on all officers and staff of this office To each of them I am deeply obliged. The Deputy Director of Survey & Map Publication, Orissa, Cuttack has ensured printing and to him I offer my thanks.

Bhubaneswar,
September, 1982.

A. R. NANDA

ANALYTICAL NOTE

Census Concepts

Some of the important concepts and definitions used in 1981 Census and frequently mentioned in this publication are briefly explained below.

Village

It has been the Census tradition to present statistics by rural-urban break-up. Villages and Towns are universally accepted as the basic units of human habitation. A "Village" refers to any tract of land recognised as a village by the local administration in the revenue record. The revenue village may have a definite surveyed bonudary or not. The revenue village may comprise several hamlets which do not have definite boundary or areas distinctly marked. The revenue village is inclusive of the sites of residence of the inhabitants and the entire area including hills, nalas, cultivable land and village forest, but excluding reserve forest. An uninhabited village is one which does not have any residential population in the entire tract. A revenue village may comprise several hamlets with a boundary in case of a surveyed village or a national boundary in case of unsurveyed village; but the entire village is one unit for presentation of census data.

There are some forest villages located inside reserve forests and recognised by the State Government, which have been taken as villages for the purpose of Census. Similarly, inside the reserve forest, some clusters of habitation were located, which are sometimes unauthorised in the eye of law. Such cases were also recognised as villages by way of treating clusters inside the jurisdiction of a forester's beat as one village. In course of the decade, several areas in the State remaining unsurveyed upto the previous census, have been surveyed in the meanwhile and such villages were included in the frame of current census.

Town

No society can be strictly termed as fully urban or completely rural. The dividing line is a far from sharp, since condition varies from country to country and it has not been possible to formulate a uniform definition which can be applicable to all places.

For the purpose of 1981 Census in India, an urban area has been defined as :

(a) all places with a Municipality, Corporation or Cantonment Board or Notified Town Area

and (b) all other places satisfying the following criteria :

(i) a minimum population of 5, 000,

(ii) atleast 75 per cent of the male working population engaged in non-agricultural (and allied) activity,

(iii) a population density of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile).

Similar criteria were also adopted during 1971 Census.

Thus the area statutorily notified by the State Government as "Municipalities" and "Notified Area Councils" have been brought under the urban frame of Census. Besides, there are some marginal cases having distinct urban characteristic which as such do not qualify to be town by the State Government. Such cases—13 in number throughout the State were finalised by the Director of Census in consultation with the District Magistrates, which have been presented under the nomenclature of non-statutory census town, satisfying the following conditions :

(a) a minimum population of 5, 000 as projected in 1981 ;

(b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits ;

(c) a density of population of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile)

Classification of Towns

It has been customary for the census to classify the towns according to the size of their population. For 1981 operation, the classification was as follows :

CLASS	POPULATION
I	100,000 and Above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Less than 5,000

Urban Agglomeration

The concept of "Urban Agglomeration" introduced during 1971 Census has also been adopted during 1981 to take care of the continuous urban spread of a recognised urban area Very often, large railway colonies, university campuses, port areas and military camps, etc. come up around the statutory boundary limit of the city or town having distinct urban characteristics. Such areas may not by themselves qualify to be treated as towns, but form a continuous spread with the town as 'out-growths' of the town and deserve to be treated as urban. Such town(s) together with their out-growths have been treated as urban units and are called Urban Agglomerations". Thus an Urban Agglomeration may comprise :

(a) a city with continuous urban out-growth, (the part of the out-growth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) or

(b) one town with similar out-growth or two or more adjoining towns with their out-growths as in (a) or

(c) a city and one or more adjoining towns with their out-growths all of which form a continuous spread.

Accordingly, eight Urban Agglomerations have been formed in the 1981 Census throughout the State.

Standard Urban Area

During the 1971 Census, a new concept of "Standard Urban Area" was introduced in the context of urban classification. The Standard Urban Area is defined as the projected growth area of a city or town having a population of 50, 000 or more during a period of two or three decades. While delineating Standard Urban Area it is not only necessary to take into account the towns and villages which will get merged in to it' but also the intervening areas which are potentially urban. The Standard Urban Area is a long-term planning area having a growth potential in a longer time span. In the context of developmental planning for urban areas, it is desirable to fix the Standard Urban Area beyond the boundary of large town having growth potential over a period of 20 years or so.

The standard urban area includes all areas which have any or all of the following characteristics (b) to (e), while characteristic (a) should be the basic minimum .

(a) Core town having minimum population of 50,000;

(b) Predominant urban land use;

(c) Intensive interaction with urban centres as reflected in communication for the purpose of work and secondary educational facilities; extension of city bus service, sale of commodities like milk, dairy products, vegetables (other than those transported by rail or truck haul) and purchase of food grains, clothes, general provisions, etc. by the consumers directly;

(d) Anticipated urban growth as a result of future location of industry, market, transport and communication, administrative and servicing facilities;

(e) Existence of big villages with large population of working force engaged in non-agricultural and industrial categories.

Taking these factors into account the following standard urban areas were formed during the 1971 Census; 1. Sambalpur

2. Raurkela, 3. Baleshwar, 4. Cuttack, 5. Jeypur, 6. Brahmapur, 7. Bhubaneswar and 8. Puri. The standard urban areas of these towns were finalised in consultation with the Town and Country Planning Organisation of Government of India and Town Planning Organisation of Government of Orissa and are continued in 1981 Census.

There is subtle difference between the standard urban area and urban agglomeration. For the urban agglomeration out-growths should be contiguous having distinct urban characterstics, whereas, standard urban areas would cover both urban and rural areas around a core town which are likely to be urbanised within a period of two to three decades.

Building

A "Building" is generally a single structure on the ground. Sometimes, it is made up of more than one component unit which are used or likely to be used as dwellings (residence) or establishments, such as shops, business houses, offices, factories, workshops, schools, places of entertainments, places of worship, godowns and stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. Usually, a structure will have 4 walls and a roof. However, there are some areas where the very nature of construction of house is such that there may not be any wall. A typical example of this may be found in the Nolia habitation at Puri, where the house does not have wall, but an entrance and the conical roof which almost touches the ground. Such structures are also treated as buildings.

Census House

A 'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

An "occupied residential house" is a census house which is partly or wholly used for the purpose of residence at the time of Census enumeration.

Household

A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of un-related persons or having a mix of both. Example of un-related households are boarding houses, messes, hotels, residential hotels, rescue homes, jails and ashrams etc. These are called "institutional households". There may be one member households, two-members households or multi-member households. For Census purposes, each one of these types is regarded as a household. If a group of persons who are un-related to each other live in a census house, but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person is treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen.

Enterprise

An "Enterprise" is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an enterprise may consist of members of the household or hired workers or both. An enterprise may be owned and operated by one household or by several households jointly (on a partnership basis) or by an institutional body. The activities of an enterprise may be carried on in a single census house or in more than one census house or in the open i.e. without premises. The activity of the enterprise may also be carried on only for a part of the year but on a fairly regular basis. It may also be possible that more than one enterpreneurial activity can be carried out in one census house. However, the results of such economic census after tabulation are being brought out by the Central Statistical Organisation separately. This excercise was extended to provide data for the planners regarding categories of agricultural and non-agricultural enterprises. The voluminous data included location of enterprise, description of the activities of enterprise, nature of operation,

type of ownership, social group of owner, power/fuel used for the activity and the total number of hired persons usually working in the enterprise.

Literate

A person is considered to be literate if he is able to read and write in any language with understanding. A person who can merely read but can not write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 4 years or less have been treated as illiterate, even if the child is going to school and may have picked up reading and writing a few odd words.

Scheduled Caste

The Scheduled Castes are specified in the Government of India (modification) order of 1956. 93 castes have been notified as Scheduled Castes in this State.

One caste, viz., 'Kuli' in Sambalpur district has been dropped from the Scheduled Caste list as per the Amendment Order, 1976.

Worker and Working Population

The population of a country can bé divided into economically active and inactive. The economical active group is generally referred to as the working population. What proportion of our population are engaged in work or are economically active and what job they do for their living, these are the issues which the Census proposed to obtain through its massive operation in order to provide a broad dimensional picture of the labour-force. The Censuses conducted so far contain a wealth of economic data. There have been experimentations with the definitions from Census to Census and as a result, the definition of working force has rarely remained unchanged between two Censuses as would be evident from the paragraphs to follow.

"The means of livelihood" approach was adopted from 1901 upto 1951. From 1901 to 1921 the expressions used were "Workers" and "Dependents". In 1931, the concepts used were "earner", "working dependent" and "non-working dependent". In 1951, the categories were "self supporting persons", "earning dependents" and "non-earning dependents". In 1961 and 1971, however, there was a shift to the labour-force approach, according to which a person was tre ated as "worker" if his activity during the reference period was productive one. Thus, from 1961 the concept of worker and non-worker came into being. The difference in the concepts in 1961, 1971 and 1981 Censuses is summarised below :

(a) 1961 Census

"Workers" = mian workers + marginal workers of 1981.
"Non-workers" = non-workers of 1981.

(b) 1971 Census

"Workers" = main workers of 1981.
"Non-workers" = marginal workers + non-workers of 1981.

The questions which were canvassed in the individual slips during 1981 Census to elicit information on the characteristics of the population were as follows :

I. Q. 14A Worked any time at all last year ?
Yes
No (H/ST/D/R/B/I/O)

II. Q. 14B If yes in 14A, did you work for major part of last year ?
Yes (1)/No. (2)

III. Q. 15A Main activity last year ?
Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

IV. Q. 15B 14B Yes—Any other work any time last year ? Yes (C/AL/HHI/OW/No)
14B No—Work done any time last year ? (C/AL/HHI/OW)

V. Q. 16 If no in 14A or 14B, seeking/ available for work ? Yes (1)/No (2)

Basically, during 1981 Census the questions have been formulated so as to divide the population into those who have worked any time at

all during the last year and those who have not worked at all. Having classified the population into these two broad streams, the next attempt was to divide those who have worked any time into two sub-streams viz., those who have worked in some economic activity over a period of 6 months or more or in both the agricultural seasons and those whose work can be considered as marginal or secondary (i.e. less than 6 months). Finally an attempt has also been made to determine whether those who are non-workers or those who are marginal workers are either seeking or are available for work.

"Work" has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. In all these questions the reference period is one year preceding the date of enumeration. Some work viz., agriculture and household industry are carried on either throughout the year or during a particular season or part of the year depending on local circumstances. In such cases the reference period has been the broad time span of the agricultural season preceding the enumeration has been kept.

An attempt has been made in this publication to present data relating to "main workers", "marginal workers" and "non-workers" separately. In case of main workers the distribution of such workers among cultivators and agricultural labourers, those engaged in household industry and other workers have also been given. The main workers are those who have worked for a major part of the year preceding the enumeration.

"Marginal workers" are those who have worked any time at all in the year preceding the enumeration but have not worked for a major part of the year. The type of work in which marginal worker were engaged have been elicited through question 15B.

"Non-workers" are those who have not worked any time at all in the year preceding the enumeration.

If the number of main workers, marginal workers and non-workers are added up, one would arrive at the total population itself. In other words, these are exclusive categories.

Main activity of workers has been classified into the following four broad categories :

(i) Cultivator

A person is regarded as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops viz., wheat, paddy, jawar, bajra and other crops, such as sugarcane, groundnut etc. and pulses, raw jute and kindred fibre crops, cotton, etc. and does not include fruit, growing of vegetables or keeping orchard or groves or working of plantation like tea, coffee, rubber etc.

(ii) Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation, but merely works in another person's land for wages. An agriculural labourer has no right of lease or contract on land on which he/she works.

(iii) Household Industry

"Household Industry" is defined as an industry conducted by the head of household himself/herself and/or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. It should involve production, processing, servicing or repair of articles or goods, not on the scale of a registered factory. The larger proportion of workers in a household industry should consist of members of the household including the head.

The main characteristics of the "Household industries" are the following :

a) One or more members of the household must participate. Participation by hired labour must be minimum.

b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods.

c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sell.

d) In an urban area the industry must be carried on in the precincts of the house in which the household lives. In the rural areas, the industry may be anywhere within the limits of the village.

e) The activity should not be on the scale of a registered factory.

f) Professions such as those practised by Pleader, Doctor, Barbar, Musician, Dancer, Dhobi, Astrologer etc. will not be Household Industry.

(iv) Other Workers

All workers i.e. those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or engaged in household industry are "Other Workers". This includes factory workers, plantation workers, those in trade, commerce, business. transport, mining, construction, political or social work, all Government servants, teachers, priests and artists etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry are other workers.

Other particulars, viz., name of the establishment, description of work, nature of industry, trade or service and class of worker were also obtained in respect of those who returned "household industry" or "Other work" as their activity.

Non-worker

In case of persons who are non-workers throughout, information relating to them has been obtained through categories, as mentioned below.

i) Household duties
ii) Students
iii) Dependents
iv) Retired persons or rentiers
v) Beggars etc.
vi) Inmates of institutions
vii) Other non-workers

(i) Household duties

This covers all persons who are engaged in un-paid home duties and who do no other work, or have not done any work at all during the last one year. If a person who normally attends to household duties is also engaged in some economic activity, then he or she is a worker. For example, a housewife may help in family cultivation or agriculture or make and sell cowdung-cakes etc. at odd times. She is treated as worker.

(ii) Students

This will cover all full-time students and children attending school. If a student participates in some economically productive work, like helping sometimes as an un-paid family worker in family cultivation etc. such students should be treated as a worker and not as student. Very often the daughter in the family helps in the household work though she is studying full time, in which case she is treated as student.

(iii) Dependent

This includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. Dependents include even able-bodied persons who can not be categorised in any other category of non-worker but are dependent on others.

(iv) Retired persons or rentiers

A person who has retired from service and is doing no other work and is not employed again in some full time work or engaged in some other work such as cultivation, business, trade etc. or a person who is a rentier or living on agricultural or non-agricultural royality, rent or dividend or any other person of independent means for securing which he/she does not have to work comes under this category. If a retired person is doing some work, in such case he/she is a worker.

(v) Beggar

This covers beggars, vagrants or persons without indication of source of income and those without specified source of subsistence, who are not engaged in economically productive work.

(vi) Inmates of institutions

This covers convicts in Jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc. in such institution. However, an under-trial prisoner enumerated in a jail is recorded for the work he/she was doing before he/she was apprehended. Similarly a person temporarily in a hospital or similar institution is recorded for the kind of work he/she was doing before being admitted into the hospital or institution. However, the previous work is not recorded in respect of long term under trial prisoner or convict or for long term inmates of penal, mental or charitable institution. A person is considered as 'long term', if he or she is an such institution for 6 months or more.

(vii) Other non-workers

This includes all non-workers who do not come under any of the above six categories, but are looking for work. A boy or girl who has completed education or has stopped studying and is looking for work comes under this category. Alternatively a person who is merely spending time at home as a dependent and is not doing any work and not seeking any work is not coming under this category. In case of students who may be seeking work and are quite prepared to give up studies, if they get a job they are to be recorded as 'Students'.

Area figure

In keeping with the census tradition, the Surveyor General of India provides the area figures for the State and district level. Hence the area figures of the district along with the spelling of the district name as adopted by the Surveyor General, India has been adopted in the publication, with a view to maintaining uniformity of data at the national level. The area figures of the units down below the district level, viz, tahasil, police station, towns have been given in sq. km. The Tahasildars had reported the area figures in acres in respect of the units in the rural area, whereas the Executive Officers of the urban bodies have reported the area figuers for the urban units. The area report in acres by such functionaries were converted into sq. km. Regarding the area of the villages, the same were also furnished by the Tahasildars. The total area of all tahasils of the district does not add upto the area of the district because the former represents the land-use area and is derived from the figures supplied by the local revenue authorities. Similarly the total of the village area may not tally with the rural areas of the tahasil. The difference may be due to the fact that the village area may not necessarily include the area under hills and rivers etc. which are included in the tahasil area. Besides, there are also varying methods on computation adopted at different levels. Area figures for the unsurveyed revenue villages have been left blank like the forest villages and are indicated as "Not available".

Though there has been no change in the boundary of the State between 1971-81, the revised computation in the area of some districts has resulted in marginal decrease of 135 sq. kms.

Density

The density (population per sq. km.) shown for the State/District/Tahasil/Police Station/Town have been worked out using the area figure corrected upto two places of decimals.

Spelling of administrative unit

As explained above, the spellings of district have been adopted from the Survey of India to maintain uniformity at all-India level. However the spellings of lower units, viz., tahasils, police stations, village, town are in confirmity with the spellings available in the State Government Records.

Physically handicapped persons

It is customary for the Census to introduce new concepts in every census. Accordingly an attempt was made during the houselisting operation conducted in April-May, 1980 to find out the statistics regarding the physically handicapped

persons all over the country. Physically handicapped persons were broadly recorded under three categories, viz., totally blind, totally crippled and totally dumb.

The term "Totally crippled" refers to such persons who have not lost their arms or limbs. The loss of arms or legs or all the 4 limbs refers to loss of both the arms or loss of both the legs. It is not necessary that the disabled should have lost both arms and legs. The loss of either of these i.e., both arms or both legs would be sufficient for classification as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus a paralytic who has lost use of both the legs or both the arms was taken as totally crippled, though the limbs are physically available. However, the loss of either one arm and/or leg did not classify a person as totally crippled. There are other situations where a person unfortunately suffers from more than one of the aforesaid disabilities. In such cases, the intention was to record the persons by greater disability. For example, a person may be both blind and dumb or blind and crippled. In such cases the intention was to find out the greater disability, whether blindness is considered as greater disability than either dumbness or being crippled. Similarly being crippled is greater disability than being dumb. In the extreme cases, where a person suffered from all the 3 disabilities, it was recorded under the category 'blind' which is certainly the most unfortunate disability. It was usual to find a person blind or crippled due to old age and such cases were also taken note of and categorised under appropriate classification since he suffered from disabilities.

DISTRICT CENSUS HANDBOOKS

Among the traditional documentation of the Census, the fairly comprehensive and uniform publication of District Census Handbook (D. C. H.) consisting of town and village directory and town and villagewise Primary Census Abstract (P.C.A.) has been found to be very useful and are constantly referred to by the planners and data users. The District Census Handbook is the only publication that incorporates the data down to a village level in rural area and upto ward level in the urban area. The data published in these volumes are of immense value to the planners, scholars and administrators for the purpose of village level, block level and district level planning and studies. It is a publication of the State Government. The cost there of is borne by the State Government. However, the Director of Census of the State is responsible to the extent of providing necessary data which are obtained through Census.

This document was first published as an auxiliary to 1951 Census, consequent upon the request of the Government of India to State Government to publish District Census Handbooks containing statistical information relating to villages, towns and police stations etc. of the districts. The State Government agreed to this and decided to bring out District Census Handbook as a priced publication to be published in the State Government Press This publication since then is continuing with unbroken chain. Apart from giving the rural statistical information, it readily gives a complete list of villages contained within a Police Station and District. It will not, however, be out of place to mention here that in many districts, complete list of villages is not maintained properly and the present list is the result of extensive enquiries and contacts with different agencies and can be regarded as exhaustive.

To make the data component more illustrative maps of the district, tahsil, and police station are also published in the publication. The Police Station maps showing the villages as per the population size, having different amenities represented in approved legend will help the readers in easy appreciation.

According to the 1951 publication programme; the District Census Handbook was published in one volume and did not contain information given in the village and town directory. Apart from this the brief introduction of the district, general features, density map, prescribed tables for general population, economic tables, social and cultural tables and village statistics were provided in the District Census Handbook. The Primary Census Abstract was given under the heading "village statistics". However, the information on village wise list of displaced persons, and information on small scale industries were presented in the 1951 District Census Handbook volume.

Similarly, 1961 Census publication was presented in one volume. This volume was divided into 3 parts. First part contained the introduction of the district, second part contained the census tables and the official statistics was given in the third part. The information given in the Village Directory and Town Directory for 1981 Census was not given in the 1961 District Census Handbook. The villagewise Primary Census Abstract was given in the second part under the heading of "Village Directory". The information on villagewise list of industries and tables on fairs and festivals were presented in 1961 District Census Handbook publication.

According to the 1971 Census publication programme, the District Census Handbooks were to be published in 3 volumes; Part-A containing the data on amenities, Part-B incorporating Primary Census Abstract (P. C. A.) and part-C giving administrative statistics and census tables. District Census Handbooks, part-A and part-B for the 1971 Census could be published quickly. Both these volumes were in great demand by the data users, as they contained a vast mass of data on amenities available in the Village/Town alongwith demographic features. In regard to the District Census Handbook part-C, we faced difficulties in collecting administrative statistics from various Offices and our progress in

publishing the report was considerably delayed. After obtaining necessary statistics, much difficulty had to be encountered in printing of the part-C, which was pending in the State Government Press at Cuttack for a pretty long time. Under compelling circumstances the manuscript could be printed in the Private Presses located at Cuttack and elsewhere. In view of the inordinate delay in collecting administrative statistics which would in any case be available to the data users in the publications of the respective Statistical bureaus/departments of the State Government there was re-thinking in the matter to drop the publication of part-C of the District Census Handbook for the 1981 Census.

However, it has been decided to publish the 1981 District Census Handbook in two parts. Part 'A' would be confined to village and town directory, whereas part 'B' would be confined to village and townwise Primary Census Abstract including Scheduled Castes and Scheduled Tribes, Primary Census Abstract upto Police Station/ Town levels. Despite the fact that publication of both the parts in one volume would have enhanced the value, it could not be helped in respect of the bigger districts comprising large number of villages and towns. Therefore, the publication has been broken up into two volumes (Part 'A' and 'B').

By and large, the contents of the Village and Town Directory are almost similar to those adopted for 1971 Census, barring a few changes necessitated by the requirements of the planners and data users.

The new feature of 1981 format is having provision of the distance range of the particular amenities to a village where it is not present. A few items of information like adult literacy centres have been introduced in the village directory to meet some requirement of the Minimum Needs Programme.

Another introduction viz., "total population and number of households" for each village has been shown in the village directory to ascertain the co-relation of the amenities with population and number of household they serve. Since current day planning has been initiated from the Community Development Block level, villages coming under each Community Development Block has been furnished in the annexure of the village directory for the facility of the administrators and planners, which is a departure from the earlier Censuses.

Similarly in the Town Directory, information on Scheduled Castes and Scheduled Tribes population in statement-IV and availability of adult literacy centres in statement-V are innovations keeping in view the requirement of Minimum Needs Programme.

The significant change in the Town Directory is the provision of class of town in all statements for analysis of the infrastructure of amenities.

Both the Village and Town Directory and objectives of various columns there under alongwith the connotation of various abbreviations used there in have been explained in the relevant sections.

SCOPE OF THE PRIMARY CENSUS ABSTRACT

The Primary Census Abstract is an adjunct of the "A" series of Census tabulation and publications which gives the basic demographic information on area of the units, number of occupied residential houses, number of households, total population by sex, population of scheduled castes and scheduled tribes by sex, literates, sex, main workers classified into four broad categories viz. cultivators, agricultural labourers, workers in household industry and other workers by sex, marginal workers by sex and non-workers by sex.

The data for each ward of the town and each inhabited village are provided Police Stationwise within each Tahasil of the district. All the Police Stations are serially arranged in order of the census location code number. However, the number of uninhabited villages also find place in the list of villages of the Police Station.

Relevant extract from the Primary Census Abstract showing the summary figures for the Tahasils within the district is given at the beginning of the Primary Census Abstract.

Preceeding the Primary Census Abstract of the Tahasil, an administrative map of the Tahasil showing the Police Station boundaries, location of towns and more populous villages, rivers, roads, railways, hills, forests and important institutions such as high schools, colleges, medical institutions, post and telegraph offices and rest houses etc. are presented. Thereafter, the Primary Census Abstract of the tahasil showing abstract of each constituent police station/ part police station and City/Town thereunder are available.

This is followed by the Primary Census Abstract of each police station (or part police station). An administrative map of the police station giving the boundaries of the villages with Location Code numbers and towns situated thereunder besides other details similar to the district and tahasil maps find place. Moreover, the villages by different population sizes viz., below 200,200—499, 500—999, 1,000—4,999, 5,000 and above are presented through symbolic representation. The uninhabited villages are shown by cross marks (X). The shaded portion of the map represents the urban area within the Police Station.

The list of villages within the Police Station has been arranged in alphabetical order with location code numbers. While presenting the urban Primary Census Abstract data relating to each town within the tahasil or police station and of each ward within the town have also been furnished. Thus, the Primary Census Abstract of each village within the Police Station has been presented.

The Primary Census Abstract has been presented in 28 columns. By and large the proforma adopted for the present operation is identical to the proforma adopted during the 1971 Census. The concepts and definitions used in the column headings have already been explained in the previous paragraphs.

Area figures

The area figures as supplied by the local revenue authorities of the district in respect of Tahasils, Police Station and by the local bodies in respect of towns are given in square kilometres. The area figures of the villages supplied by the Tahasildars in acres have been converted and shown in hectares. The area figures for the district, supplied by the Surveyor General of India has been adopted to maintain uniformity at the national level. The total area figures of all the tahasils within the district may not tally with the area figures of the district because the former represents the land use area only. Suitable foot note explaining the reasons for such disparity has been provided in the district Primary Census Abstract. Similarly, the total area for all the villages may not tally with the entire rural area of the Police

Station/Tahasil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc. have been accounted for in the tahasils, the same may not be covered under the area of the villages. Moreover, it may also differ due to varying methods of computation adopted at different levels.

After the presentation of the villagewise Primary Census Abstract of all the Police Stations, an appendix has also been furnished showing urban enumeration blockwise particulars on population, scheduled caste population and scheduled tribe population in each town. The identification particulars of each such enumeration block of each town have been presented in the Annexure for easy demarcation of the enumeration blocks in a town.

For the first time in 1981 Census, the Primary Census Abstracts for the Scheduled Castes and Scheduled Tribes have also been presented. Each of these Primary Census Abstracts is presented in 31 columns. Such data have been presented upto the district, tahasil, police station and town level. The concepts used in columns of the proforma have already been explained earlier.

Abbreviations

The abbreviations used in the Report are explained below :—

T	for	Total
R	for	Rural
U	for	Urban
P.S.	for	Police Station
M	for	Municipality
N.A.C.	for	Notified Area Council
C.T.	for	Census Town
O.G.	for	Out Growth
N.A.	for	Not Available
U.S.	for	Un Surveyed.

ANALYSIS OF PRIMARY CENSUS ABSTRACT DATA

The provision of introducing inset tables in the District Census Handbook is a novel feature of the 1981 Census which is aimed at providing the brief analysis of P. C. A. data for facility of planners, data users, etc. Ten in-set tables have been provided in this publication for analysing the data and each such table depicts a separate picture on demographic characteristics of the district.

Table—1 gives the population, number of villages and towns of the 1981 Census of Kalahandi district.

TABLE—1

Population, Number of Villages and Towns, 1981

S.L No.	Name of Tahasil	POPULATION									No. of Villages		No. of Towns
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13	14

4	Jayapatna	220,840	108,796	112,044	220,840	108,796	112,044	...	...	...	270	266	...
5	Kalahandi	276,434	138,563	137,871	227,480	112,893	114,587	48,954	25,670	23,284	860	809	2
6	Lanjigarh	201,911	101,010	100,901	201,911	101,010	100,901	...	...	...	755	692	...
Total District		**1,339,192**	**666,163**	**673,029**	**1,258,651**	**624,570**	**634,081**	**80,541**	**41,593**	**38,948**	**2,840**	**2,695**	**5**

As per the 1981 Census the population of the district is 1,339,192 of which 666,163 are males and 673,029 are females. The rural population of the district is 1,258,651 whereas 80,541 persons are enumerated in the urban areas of Kalahandi district. Among the Tahasils, Kalahandi Tahasil, the headquarters Tahasil of the district is reported to be the highest populous Tahasil with 276,434 persons whereas the lowest concentration of population (195,572) is found in Khariar Tahasil. No urban population is noticed in Jayapatna and Lanjigarh Tahasils of the district. Total number of villages of the district is 2,840 of which 2,695 villages are reported as inhabited. The highest number of inhabited villages (809) has been recorded in Kalahandi Tahasil followed by Lanjigarh Tahasil having 692 villages. Only 266 inhabited villages are reported in Jayapatna Tahasil. During the 1971 Census there were five towns in the district and during the current decade no addition or declassification of towns has occurred. So the total number of towns in the district is five in the 1981 Census.

Table—2 shows the decadal change in disrribution of population of the district.

TABLE—2

Decadal Change in Distribution of Population

Name of Tahasil	POPULATION						Percentage Decadal (1971-81) Variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
1 Nuapada	168,577	159,351	9,226	197,111	185,663	11,448	+ 16 93	+ 16·51	+ 24·08
2 Khariar	170,317	162,666	7,651	195,572	185,626	9,946	+ 14·83	+ 14·11	+ 30 00
3 Dharmgarh	201,428	193,552	7,876	247,324	237,131	10,193	+ 22·79	+ 22·52	+ 29·42
4 Jaypatna	215,794	215,794	...	220,840	220,840	...	+ 2·34	+ 2·34	...
5 Kalahandi	236,223	204,423	31,800	276,434	227,480	48,954	+ 17·02	+ 11·28	+ 53 94
6 Linjigarh	171,530	171,530	...	201,911	201,911	...	+ 17·71	+ 17·71	...
District	**1,163,869**	**1,107,316**	**56,553**	**1,339,192**	**1,259,651**	**80,541**	**+15·06**	**+13·67**	**+42·42**

In the 1971 Census, population of the district was 1,163,869 which increased to 1,339,192 in the 1981 Census having an increase of 15·06 per cent. In rural areas the percentage of increase in population during the decade is 13·67 per cent whereas in urban areas it is 42·42 per cent. The highest percentage of increase (22·79 per cent) is noticed in Dharmgarh Tahasil whereas the lowest percentage of increase (only 2.34 per cent) is noticed in Jayapatna Tahasil. The same pattern of increase is also marked in rural areas of the district in respect of those two Tahasils but in urban areas the highest percentage of increase in population (53.94 per cent) is noticed in Kalahandi Tahasil which is the headquarters Tahasil of the district where two towns namely Bhawanipatna and Kesinga are located.

Table—3 depicts the distribution of villages by population ranges.

TABLE—3

Distribution of Villages by Population Ranges.

Range of Population	No. of villages in each Range	Percentage of villages in each Range
1	2	3
— 200	1,064	39·48
200— 499	724	26·86
500—1,999	851	31 58
2,000—4,999	55	2 04
5,000—9,999	1	0 04
10,000 +	...	...
Total	**2,695**	**100·00**

Out of 2,695 inhabited villages of the district 1,064 or 39.48 per cent of inhabited villages are coming under the population range of less than 200 followed by 851 villages in the range of 500—1,999, 724 villages in the range of 200—499, 55 villages in the range of 2,000—4,999 and only one village namely Jayapatna under Jayapatna police station of the district is reported under the population range of 5,000—9,999. No village in the district has been reported under the population range of 10,000+. It is seen from the table that the inhabitants of the district like to stay in small groups which may be due to the physiographycal location of the district.

Table—4 depicts the distribution of villages by density ranges.

TABLE—4

Distribution of Villages by density

Range or density (per sq. km.)	Total no. of villages villages in each density range	Perdentage of villages in each density range
1	2	3
— 10	14	0·52
11— 20	39	1.45
21— 50	154	5 71
51—100	434	16·10
101—200	1,075	39·89
201—300	556	22 12
301—500	242	8·98
501 +	121	4 49
Not known	20	0·74
Total	**2,695**	**100 00**

Out of 2,695 inhabited villages of the district, the density of population i.e. population per sq. km. is not known for 20 villages. This may be due to the non-availability of area figures of these villages. The rest 2,675 villages are distributed in 8 ranges of density. Highest number of villages i. e. 1,075 villages or 39.89 per cent of the inhabited villages are coming under the density 00 followed by 596 villages in the range of 201—300. Only 14 villages or 0.52 per cent of the inhabited villages are coming under the density range of less than 10.

Table—5 gives the proportion of Scheduled Caste population to total population of the villages in the district.

TABLE—5

Proportion of Scheduled Caste population to total population in the Villages

Percentage Range of Scheduled Castes population to total population	No. of villages in each Range	Percentage of villages in each Range
1	2	3
Nil	504	18·70
5 or less	230	8·53
6—10	430	15·96
11—15	450	16·70
16—20	338	12·54
21—30	401	14·88
31+	342	12·69
Total	**2,695**	**100·00**

It is seen from the table that no Scheduled Caste population has been reported in 504 or 18.70 per cent of the inhabited villages. Rest of the inhabited villages are divided into six percentage ranges of Scheduled Caste population to total population of the district. The highest number of villages i. e. 450 villages are coming under the percentage range of 11—15 followed by 430 villages in the range of 6—10, 401 villages in the range of 21—30.

Table—6 shows the proportion of Scheduled Tribe population to total population in the villages of the district.

TABLE—6

Proportions of Scheduled Tribe population to total population in the Villages

Percentage Range of Scheduled Tribes population to total population	No. of villages in each Range	Percentage of villages in each Range
1	2	3
Nil	175	649
5 or less	143	531
6—15	304	11·28
16—25	302	11·21
26—35	252	9.35
36—50	328	12·17
51+	1,191	44·19
Total	**2,695**	**100·00**

Out of 2,695 inhabited villages of the district no Scheduled Tribe population is reported in 175 villages. It is observed from the table that most of the inhabited villages have Scheduled Tribe population. More than 50 per c nt of Scheduled Tribe population are recorded in 1,191 or 44.19 per cent of the total inhabited villages of the district.

Table—7 shows the population of Scheduled Caste/Scheduled Tribe population in tne towns of the district.

TABLE—7

Proportion of Scheduled Caste /Scheduled Tribes Population in Towns

Name of the Town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Scheduled Caste Population to total Population	Percentage of Scheduled Tribe Population to total Population

All Towns	**80·541**	**12,217**	**6,464**	**15·17**	**8·02**

Out of 80, 541 urban population of the district 12,217 belong to Scheduled Caste and 6,464 belong to Scheduled Tribes. The percentage of Scheduled Caste population to total population in urban areas of the district is 15·17 as against 8.02 percent of the Scheduled Tribes. Among the towns of the district the highest percentage of Scheduled Caste population to total population is found in Khariar town whereas the highest percentage of Scheduled Tribe population to total population is recorded in Kesinga town.

Literacy rates by population ranges of villages are shown in Table—8.

TABLE—8

Literacy rates by population Ranges of Villages

Range of population	No. of villages in each Range	Literacy rate
1	2	3
—200	1,	9·34
200—499	724	09
500—1,999	851	18 11
2,000— ,999	55	23·21
5,000 ,999	1	42 06
10,000+	...	...
Total	2,695	17·76

17.76 per cent of the rural population of the district are literates. There are 1,064 villages under the population range of less than 200 where the literacy rate is only 9.34 per cent. 724 villages are coming under the population range of 200—499 and have recorded a literacy rate of 16.09 per cent. 851 villages are coming, under the population range of 500—1,999 and the literate and educated persons of this range constitute 18.11 per cent. 55 villages are coming under the population range of 2,000—4,999 and have recorded a literacy rate of 23.21 per cent and the last one village in the population range of 5,000—9,999 has the literacy rate of 42·06 per cent. The aforesaid table shows that the villages coming under the higher range of population have recorded a higher percentage of literacy.

Table—9 shows the literacy rates for towns in the district.

TABLE—9

Literacy rates for Towns

Name of the Town	Literacy rate
1	2
Bhawanipatna	52·69
Junagarh	34·16
Kesinga	32.11
Khariar	46·17
Khari Road	43·10
All Town	**45·33**

There are five towns in the district during the 1981 Census. The urban literacy rate of the district is 45.33 per cent. Among the towns the higher literacy rate (52.69 per cent) is recorded in Bhawanipatna town which is the headquarters town of the district followed by Khariar town (46.17 per cent). The lowest literacy rate is noticed in Kesinga town (32.11 per cent).

Table—10 gives the literates, workers, non-workers, Scheduled Caste/Scheduled Tribe population in the Tahasils of the district.

The percentage of Scheduled Caste population to total population of the district is 15.76 per cent during the 1981 Census as against the corresponding figures of 17.11 per cent during 1971. The percentage of Scheduled Caste population to total population in the State is 14.66 per cent which is lower than that of the district. Similarly percentage of Scheduled tribe population to total population of the district has gone up to 31.28 per cent as against the corresponding figures of 29.26 per cent during the 1971 Census. This percentage is also higher than the State average of 22.43 per cent.

Among the tahasils, highest percentage (18.54 per cent) of Scheduled Caste population to total population is found in Kalahandi tahasil whereas the lowest rate (12·92 per cent) is found in Nuapada tahasil. Similarly, the highest percentage (40.93 per cent) of [illegible]

total population is found in Nuapada tahasil whereas the lowest percentage (21.38 per cent) is reported in Dharmgarh tahasil.

During 1981 Census, the percentage of literate and educated persons to total population of the district has been recorded as 19.42 per cent. Whereas the literacy rate of the State is 34.23 per cent which is much higher than that of the district. In rural areas the lireracy rate is only 17.76 per cent whereas in urban areas it is 45.33 per cent. 31.28 per cent of the male population of the district are reported as literates whereas only 7.68 per cent of the female population are recorded as literates. Among the tahasils the highest rate of literacy is recorded in Kalahandi tahasil (22.28 per cent) which is the headquarters tahasil of the district followed by Lanjigarh tahasil (20.74 per cent). The lowest literacy rate is found in Nuapada tahasil (16.61 per cent). Total workers in the district constitute 41.87 per cent of the total population whereas non-workers constitute only 58.13 per cent. Out of this percentage of workers, main workers constitute 35.94 per cent and marginal workers constitute 5 93 per cent. The total workers of the State constitute only 38.01 per cent of the total population. The higher percentage of workers in the district is due to more concentration of Scheduled Castes and Scheduled tribes. Among the males 61.55 per cent of the population are reported as workers whereas female workers constitute 22.39 per cent of the total female population. In rural areas the work participation rate is 42.51 per cent which is more than that of the urban areas (31.73 per cent) andthis is one of the interesting features of the district recorded during the 1981 Census. Among the tahasils , the work participation rate is the highest (49.22 per cent) in Nuapada tahasil where the highest concentration of Scheduled Tribe Population is found and the lowest percentage (38.52 per cent) of workers to total population is found in Lanjigarh Tahasil.

* These represent 'Geographical area' figures supplied by the Surveyor General, India. Figures for Urban Areas have been supplied by the local bodies. Area figures for Rural Areas are derived by subtracting the urban area from the total area of the District. The total of the area figures of the Tahasils will not tally with that of the District figures, because the former represent 'land use' area and derived from the figures supplied by the local revenue authorities.

Based upon Survey of India map with the permission of the Surveyor General of India.

Note— * Towns treated as such for the first time in 1971 Census and continue as Towns in 1981 Census are shown with asterisks in their left.

(i) Towns treated as such for the first time in 1981 Census are printed in Italics.

(ii) The following abbreviations have been used to describe the Civic Status of the towns 'M' for Municipality, 'NAC' for Notified Area Council and 'CT' for Census Town.
