DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapid'y as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38, and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction: —	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas: —	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services: —	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade: —	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	**999**

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e c.
- 0X4 Geographers

1 *Administrative, Executive and Managerial Workers*

0X3 Librarians, Archivists and Related *Workers*:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers:*

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment.
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

9 *Service, Sports and Recreation Workers.*

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes, Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

by

K. S. Bhatnagar

Deputy Superintendent of Census Operations, Madhya Pradesh

The District

Jhabua district was constituted on the formation of Madhya Bharat in 1948. It was composed of the following States: (1) Jhabua State; (2) Alirajpur State; (3) Jobat State; (4) Kathiwada; (5) Mathwad; (6) Petlawad Pargana of Holkar State and one village (Kanwada) of Dhar State. The District headquarters are located at Jhabua (pop. 6315), also the former State capital for over 300 years. During the decade the district has not undergone any major change, although some inter tahsil transfer of villages have taken place. The total area as per Surveyor General's figure is 2,615 sq. miles while the Director of Land Records computes at 2623 sq. miles. The difference is due to the different methods adopted.

HISTORY: A brief history of the constituent units is given below.—

JHABUA.— Jhabua was founded in 1584 by Keshodas Rathor, who is also mentioned in *Aine Akbari*. He hailed from the famous Rathor family which founded Jodhpur. His ancestor Bir Singh (1489-93) was the fifth son of Jodha the founder of Jodhpur. Keshodas joined the Mughals and soon distinguished himseif. It was however during Jehangir's reign that he rose into prominence as a field commander and obtained grants of lands for suppressing disorders in south-west Malwa. He died in Badnawar in 1618. After his death his jagirs were attached but in 1642 Shahiehan restored these territories to Maha Singh a nephew of Keshodas. Maha Singh defeated the Nayaks of Jhabua and Thandla and established his capital at Jhabua in 1642. Since then Rathors ruled over Jhabua till 1948 when thr State was merged into the new State of Madhya Bharat.

Alirajpur and Jobat

Ananda Deo a scion of Rathor family was the founder of the State and built the fortress Anandaoli in 1437, which later came to be known as Ali. Anand Deo had two grand-sons *viz*. Gopal Deo and Kesho Deo, who succeeded to the gaddi of Alirajpur and Jobat respectively. In 1800 the capital was shifted to Rajpur and the town came to be known as Alirajpur. (Ali was about 6-8 miles south of Alirajpur the present sub-divisional headquarter).

Kathiwara and Mathwar

Kathiwara and Mathwar were two small principalities having an area of 69 and 65 sq. miles respectively. The Kathiwara family is said to have come from Junagarh in Kathiawar.

Petlawad

Petlawad was a pargana of Indore district in Holkar State. In the earlier times it was held by Labhana chief who incurred the displeasure of Keshodas the founder of Jhabua who attacked and captured it. Round about 1730 when Holkar rose to power Petlawad-Thandla came under his jurisdiction. The land is hilly, lying on a spur on the Vindhyas and along the western boundary of the plateau. During the days of princely State, it was an isolated pocket, on formation of Madhya Bharat it was added to Jhabua district, since then there has been no change

Boundaries

The district lies in the extreme western part of the state between 22° and 23.3° N latitudes and 73° and 75° E longitudes and touches Gujarat, Maha-

rashtra and Rajasthan borders. The district is bounded by Banswara district of Rajasthan in north-west, Panch-Mahal and Baroda districts of Gujarat in the west, Dhulia district of Maharashtra and West Nimar district in south, Dhar district in the east and Ratlam district in north.

The Vinhyan Range running in Gujarat crosses the district, extending from Jobat. The Vindhyan Range which runs across the State extending from Mandu to Gwalior in north contains many places of historical interest It is also the source of many important rivers in Malwa and other parts of Central India, of these Mahi flows across the district. The river Narmada, flows towards the southern portion of the district and forms a boundary with Maharashtra.

Physical Features

The terrain is generally hilly and the soil is light hence not well suited for cultivation. Only in the villages where the soil is black, conditions for agriculture become better. The terrain being hilly, the vegetation over the hills having been cut indiscriminately and illegally felled in the last few years, the hills have therefore been denuded of trees and this has caused considerable soil erosion. The two main rivers are Mahi and Anas. The Mahi which enters the district from Dhar in west and forms the boundary with Ratlam and flows north-west. The Anas river rises near Jobat and flows through Thandla and Jhabua tahsils and turns away into Gujarat. The waters of river Narmada only touch the southern fringe of the district near Mathwar. The main tributaries of Narmada are Hathini, and Dahi, those of Mahi are Pampavati and Ladki while other streams join Anas.

Geological Formations

More than half of the area is covered by Deccan trap, which is also known as the Malwa trap. This covers Petlawad and major portions of Jhabua and Thandla tahsils. Other formations are:—

(i) Alluvium

(ii) Cretaceous-Lemata with merium-Bagh beds

(iii) Aravalis

(iv) Banded gneissic complex.

In Jobat and parts of Alirajpur tahsils Banded gneissic formations are met with. In some parts of Jhabua and Thandla tahsils archean sediments as represented by Aravalis are found. The alluvium and cretaceous rocks cover the areas around river Hathini and Ankbar, near Ali underlying the Deccan trap are many rocks representing Nimar sand stone, Bagh beds and lematas

Mineral Deposits

Manganese: The major portion of deposits of manganese occur in Thandla tahsil of the district. These are at Kajlidungari, Rambhapur, Paranthi, Naganwat and Nanpur. In these places ore is generally of good quality but the percentage of quarts is higher. At Kajlidungari it is estimated that the ore would be to the tune of 8,37,000 tons.

Manganese mines in other parts of the district are not very considerable and have not been estimated; but in lesser quantity the ore is found in a few other villages of Thandla tahsil and in some areas of Jhabua, Jobat and Alirajpur tahsils.

The other mines in the district are:—(1) asbestos, (2) limestones and (3) talc. Asbestos deposits are found near Jobat. The material obtained is mostly brittle. Limestone deposits are found in the trap covered by the Narmada Valley and in some areas round Jhabua. Talc is found in patches in Alirajpur and Jobat tahsils but is of no economic use.

Climate

The climate though generally moderate is subject to greater extremes than the more open land of Malwa. It is however more pleasant around Kathiwara in southern part of the district, where the forest is somewhat dense and mean elevation is over 1200 feet; within this slight degree of variation, the area falls into two climate regions:—

(1) The comparatively hot regions of the northern portions of the district *viz.* Jhabua, Thandla and Petlawad tahsils;

(2) The fairly cooler regions of south comprising of Alirajpur and Jobat tahsils.

Seasons

The hot season locally called *'unhala'* commences from the begining of March and extends upto June each year. The maximum temperature has been known to go upto 113° F. This is followed by the monsoons which break from the south-west by middle or end of June. From June to September the weather remains cool and damp. This is followed by winter which commences in November and goes upto February. There is one meterological station at Alirajpur and eight other rain-guage stations. The district shows great variation in rainfall which varies from 31.12" at Thandla to 61.89" at Kathiwara. The district average is about 32.26". Although there are no available records regarding rainfall at Mathwar, but it receives as much rainfall as Kathiwara The main rainy months are from June to September, during which period nearly 98% of the total rainfall is received from the south-western monsoons.

Temperature

Reliable temperature records are only available since1955 from the meterological station at Alirajpur. Prior to 1955 there were a few rain guages and some thermometers affixed in some dispensaries and hospitals. The highest temperature recorded is 42.8°C and the lowest 11.05°C. There have been no cyclonic storms though duststorms in the hot season are very frequent. Thundershowers and hailstorms although comparatively rare are received sometimes.

Forests*

A Forest Division at Jhabua was constituted on 1-2-1962 after bifurcating Dhar Forest Division. The forests have been inherited from the erstwhile princely states and comprise of the following categories :—

(1) Reserved Forests of former Jhabua, Indore, Alirajpur States;

(2) Unclassed Forests of former Jhabua, Mathwar, Jobat, Kathiwara and Alirajpur States;

(3) Ex-proprietory Forests.

At present the forest is divisible into :—

(a) Reserved forest 218.04 sq. miles.

(b) Protected forests 553.64 sq. miles total 771.68 sq. miles or nearly 36.6% of the total area.

The entire district is traversed by the Vindhyan ranges and could be divided into two parts (1) the table land of Jhabua sub-division on the north and (2) the Narmada Valley in the south. In the north the hills have a moderate slope but those in the south are precipitious.

Types of Forests

There are two types of forests :—(a) Teak (*Tectona grandis*); Forests and (b) Mixed forests of Salai (*Boswellia serrata*) and Anjan (*Hardwickia binata*). The teak is generally of poor quality except in a few pockets. Bamboos grow in sheltered ranges of Mathwar and Kathiwara. Salai and Anjan forest is mostly found around Narmada Valley and Mathwar range. The following species of timber is found :—

(1) teak *Tectona grandis*
(2) saja *Terminalia tomentosa.*
(3) salai *Boswellia serrata.*
(4) anjan *Hardwickia binata.*
(5) dhowda *Anogeissus latifolia.*

Fauna

The forests not being very thick the wild life found is essentially limited. Tigers (*Felix tigris*), are rare. Panthers (*Felix pardus*), hyena (*Hyaena striata*), jackals (*canis aurens*), foxes (*Vulpes bengalensis*), sambhar (*cervus unicolour*) are found although indiscriminate killing has destroyed much of wild life.

Snakes, scorpions, centipedes of all description are found. The common birds of Central India are seen all over. Among game birds partridges, sand groves, green pigeons, ducks are found. Among the fishes the following are found :—bharoli (*Gadusia chapra*) (Ham), patola (*Notopterus notopterus* (Pallas), jhalar (*Barlius barila* (Ham), khaipate (*Puntinus chrycoponia* (C & V), badus (*Torkhudree sykes*), Narmada rohu (*Labeo fimbriatus*) and sanwal (*Chhana striatus*) (Bi), in the rivers.

*Source : Divisional Forest Officer, Jhabua.

II

THE ADMINISTRATIVE SET UP.

The Representation of the district in Parliament and State Legislature.

For the parliament, the district along with four legislature constituencies of Dhar district, returns one representative on the Scheduled Tribe seat. The following legislative constituencies are included in the Parliamentary Constituency.

Serial No. and name of Constituency	Extent in terms of Assembly Constituencies
35 Jhabua (Scheduled Tribes)	268 Manawar East (District Dhar), 269 Manawar West (District Dhar), 272 Sardarpur (District Dhar), 273 Kukshi (District Dhar), 274 Alirajpur, 275 Jobat, 276 Jhabua, 277 Thandla.

There are four legislative constituencies in the district returning one member each on the Scheduled Tribes seat. These are :

Name and number of Assembly Constituency.

274 Alirajpur tahsil (ST)

275 Jobat tahsil (ST) and patwari circle Nos. 5 to 16 in Jhabua tahsil.

276 Jhabua tahsil (excluding patwari circles 5 to 16 and patwari circle Nos. 25 to 40 in Petlawad tahsil.

277 Thandla (ST). Thandla tahsil and Petlawad tahsil (including patwari halkas 25 to 40).

General Administration

As a district, Jhabua came into existence on formation of Madhya Bharat in 1948. Prior to that the different States, *viz.* Jhabua, Alirajpur, Jobat, Kathiwara and Mathwara had varying standards of administration. It was only after the formation of Madhya Bharat that a pattern of uniform administration with a Collector and District Magistrate in the overall charge of general administration was introduced.

The Collector is assisted by five Deputy Collectors, one of whom is stationed at Alirajpur, which is the sub divisional headquarters for Alirajpur and Jobat tahsils. Each tahsil is a sub-division and the Deputy Collector placed in the charge is called Sub-Divisional Officer and he is also vested with the powers of a Sub-Divisional Magistrate to enable him to deal with law and order situation. Each tahsil is placed under the charge of a tahsildar, who is assisted by one or more naib-tahsildars. Since there is a complete separation of the judiciary from the executive, cases go up for trial before Judicial Magistrates, who are also civil judges under the administrative control of the High Court of Judicature. Jhabua comes under the jurisdication of Dhar Civil and Sessions District. An Additional Sessions Judge is, however, posted here for sessions cases. Although, Jhabua is not a 'complete' district in as much as all the departments do not function from here, but in some cases from Dhar or Ratlam but lately with the impact of developmental works, more and more offices are being located each year. Apart from this, the Collector is also the Chief Revenue Authority for the district in which capacity he is responsible for maintenance of all land records and collection of land revenues, a task in which he is assisted by various officials of the Revenue Department. For the administration of above, the tahsils are sub-divided into Revenue Inspector circles and patwari halkas; their break-up being as follows :—

District	Tahsils	R. I. circles	Patwari Halkas	Police stations including out posts.	Municipal towns
Jhabua	5	12	224	35	5

Besides these statutory functions, the Collector is also the Chief representative of the Government and co-ordinates the working of various departments. He is also the Chairman of the District Advisory Committee and thus plays a key-role in the administration.

Police Department.

The Police Department is placed under a Superintendent of Police who is assisted by two

deputies, one of whom is posted at Alirajpur and designated as Sub-Divisional Officer (P). There are in all 16 Police stations and 19 outposts in the district or a Police Station for 32,149 population or 164.9 square miles. The district is generally quiet except for Alirajpur sub-division where there have been too many murders.

Crime in the District.

The incidence of crime is particularly high in Alirajpur sub-division. Out of 495 cases of dacoity registered in 1963 in the district, 414 were committed in Alirajpur Sub-division alone. Alirajpur Police Station had 132 offences and Jobat 66. Since the area is not very densely populated the crime figures appear to be on the high side. These crimes are committed mostly by Bhils and the area affected coincide with the old border of Jobat and Alirajpur States. There has been some lessening of crime in 1963 as compared 1962, but it cannot be said that incidence of crime has by and large gone down. The figures are given below.

Year	Murders	Total crime
1962	138	2,655
1963	103	2,102

Other statistics taken for the period October-December, 62 and 63 also reveal the same pattern.

	Offence				Total Crimes	
	Murders		Dacoites			
	1962	1963	1962	1963	1962	1963
October	13	3	26	39	215	152
November	18	6	31	29	212	203
December	8	6	44	43	281	265

Whereas it would be difficult to ascertain the causes of such offences, sex, land disputes, turbulence of nature which makes them flare up on slightest provocation and economic conditions appear to be important ones. The malaise is at the same time much more deep-rooted to admit of any generalisation. The Bhils were known to be of virulent disposition and carry with them their bows and arrows and sometimes *dharias, phaliyas.* The general background of the district also appears to lend a helping hand to a somewhat difficult situation. The land is of poor quality; forests have been cut, wild life is becoming scarce, the soil erosion is cutting away the little fertility of the soil and hence even mere existence becomes a hard problem. Whenever the rains fail, the Bhils take to crime, as it is, they were never known as good cultivators : with the failure of rains, the temptation to steal or loot becomes irresistable. Armed with bows and arrows, finding no animals for food, robbery becomes handy and other crimes follow.

The Bhils prefer living in their own farmstead and there is no feeling of togetherness; a feeling which seems to arise from living in a hamlet or a village. He thus remains very much of individualist, living almost without any society. In this 'social vaccum' the propensities for crime grow faster. Already he carries the seeds of a violent race, and these sprout more violently in this background. Perhaps the problem is more of socio-economic maladjustment than anything else.

Besides the above there are (1) Civil Surgeon, (2) District Forest Officer, (3) Executive Engineer, Irrigation, (4) District Excise Officer, (5) District Livestock Officer, (6) Assistant Registrar, Co-operatives, (7) Principal, Government Degree College, (8) Agent, State Bank, (9) District Inspector of Schools and (10) Assistant Soil Conservation Officer. For the following departments, however, the district falls under administrative jurisdictions of Dhar, where the district offices are located : (1) Executive Engineer, PWD, (2) Assistant Director of Industries (3) District Statistical Officer, (4) Publicity Officer.

The Administration of various departments.

Revenue Department.

The revenue administration is in accordance with the Madhya Pradesh Land Revenue code, 1959. In all the seven States, which now constitute the district, the ryotwari pattern prevailed, even though jagirs also existed. During the decade, the old revenue laws *viz.* M. B. Land Revenue and Tenancy Act has been repealed and replaced by the present Code. In respect of Settlement, the oldest settlement is of 1928-29, for Petlawad tahsil. It was carried out by Indore State and was meant for 30

years. In Jhabua State the Settlement was effected in 1929-30 and was valid for 15 years The same has been extended. The tracts coming in the former Alirajpur, Kathiwara, Mathwar and Jobat States were settled only during the decade in 1956-57. Prior to that, land revenue was recovered on the basis of the ploughs used for cultivation. For one plough, the area of cultivation was reckoned at 10 acres and demand for land revenue was calculated on a rough and ready basis : the seed sown served as a measure for assessing produce and consequently land revenue. Whereas the rules were codified in Indore and Dhar States, circulars were issued in Jhabua and Jobat, but in Alirajpur no such rules were framed or drafted.

The best type of soil pays revenue at the rate of 8-00 per acre, the lighter type at 2-50 per acre. The unirrigated variety pays revenue between Rs. 2-12 P. to 0-25 per acre.

Generally speaking the quality of soil is poor and only in a few patches where the soil is rich, irrigation is possible.

The total land revenue and collections are as below :—

Year	Arrears	Demand	Total	Realisation
1958-59	161,168	943,348	1,104,516	954,472
1959-60	150,044	963,536	1,113,580	982,367
1960-61	131,213	971,470	1,102,683	1,025,882

Past History.

Rainfall being an uncertain factor, a failure leads to great economic hardship and it becomes necessary to remit or suspend land revenue. During the decade, the district remained a scarcity area and relief works had to be started in 1952-53 and 1953-54. The economic condition of the peasantry is so marginal, that a failure of rains causes a complete collapse. This has been the revenue history of the district, thus the peasantry lives in fairly difficult circumstances.

Collection of Land Revenue.

The collection of land revenue was primarily the responsibility of village patel or the headman appointed for the purpose. In collaboration with the village patwari he is responsible for the collection of land revenue. He is paid commission at the following rates.

Table Showing Commission payable to patel on Land revenue and miscellaneous revenue collected.

		Rates
1	On the first Rs. 1,500	6 p
2	On the second Rs. 1,500	4 p
3	On the third Rs. 1,500	3 p
4	On the fourth Rs. 1,500	2 p
5	For the balance exceeding Rs. 6,000	1 p

Provided that annual remuneration of any patel in respect of any village shall not be less than Rs. 36.00. The remuneration is paid from the treasury once in each year.

In the former States in Indore and Dhar, patels were responsible for collection. In Jhabua a special havaldar was given to the patwari for collecting land revenue. In Alirajpur a peon-chaprasi mal-assisted patwari and the help of police was liberally taken for recovery. The patel was paid a commission varying from Rs. 3.12 to Rs. 6.25. Recently as many as ten selected panchayats have been given the powers for collecting land revenue The innovation is still in an infant stage.

Agriculture

The conditions for cultivation in the district had never been very encouraging. To begin with the quality of soil is rather poor, the Bhils who form a bulk of the population had never been known for steady cultivation on a settled and permanent basis. Whenever the rains failed, there was general scarcity; irrigation works are very few and lastly, nothing had ever been done to improve the conditions of the cultivators.

During this decade, however, there has been some improvements in agricultural practices and more land than ever has been brought under cultivation. There are no fewer than twenty four major and medium projects for irrigation. They are under different stages of construction and at present only 6,859 acres or 1.0% of the total cultivated area is irrigated.

A large quantity of chemical fertilisers has also been distributed. There has almost been a six-fold increase in the distribution of these. The undulating terrain of the country has made it necessary to conserve the soil hence contour bunding to prevent soil erosion has been done in about 5,000 acres and contour bunding to cover another 15,000 acres is in progress. Efforts have also been made to instal persian wheels, oil engine pumps and increase irrigation facilities by boring, deepening and repairing old wells besides digging newer ones.

Yield

The yield rate in the district is generally low. When compared with the State figures, an acre produces 387 lbs. of Juar, 378 of wheat, 907 of maize and 255 lbs. of gram as against the State average of 628, 587, 1014 and 514 lbs. respectively for the above crops. The reasons are not far to seek. The soil is of poor quality and the whole area is unirrigated.

Education

There has been some progress in this sphere. In 1951 there were 2 High Schools, 5 Middle Schools and 261 Primary Schools as against this there is a Degree College, 5 Higher Secondary, 9 Middle Schools and 404 Primary Schools with a total student population of nearly 20,000. There has been considerable expansion in the hostel facilities for the Tribal students. The Tribal Welfare Department has as many as eight hostels with accommodation for 618 boys and 200 girls. Besides there are three professional Institutes for carpentry, weaving and agriculture. There is a Basic Training College and 36 Adult Schools. Despite these efforts the literacy in the district does not compare favourably with the neighbouring areas. The progress from 1951 when it was 2.2 to 1961 when it is 6% is however noticeable. Even as it is the district has returned least literates in the State. The Tribal Welfare Department has also been giving scholarships with a view to encourage tribals to read.

Public Health and Medical.

There are practically no records of the medical history of the district. The district has been visited by plague and influenza between 1903–1921 on several occasions, but the worst was the influenza epidemic which raged in 1918–19. The influenza attack came via the neighbouring provinces and Bombay and Kukshi. During the period the casualties were high. In Alirajpur State (now Alirajpur and part of Jobat tahsils) 3,000 lives were lost, in Jobat State the casualties mounted to 653. The mortality figure of Jhabua was 6,384 and the other areas of the district, Petlawad tahsil, Kathiwara and Mathwar lost about 10,037 persons. In 1920-21 there was an outbreak of cholera. There was an outbreak of small pox in 1929–30. Apart from this epidemic malaria had been a constant dread and till a few years ago it was the main destroyer. Now however, thanks to the National Malaria Eradication Programme, the scourge is under control.

To the aboriginal the witch doctor 'Badwas' is the main hope of cure, though, his influence is reported to be on the decline. The first allopathic dispensary was established at Jhabua in 1863, but by 1900 the district had as many as five at Thandla (1874) Ranapur (1874), Alirajpur and Jobat. Another dispensary was started at Bhabhra. From 1918–35 the founding of dispensaries was fairly rapid and a Mission Hospital was established in 1923. Jhabua and Alirajpur States had made provisions in their budgets to aid King Edward Medical School at Indore so that they could nominate their candidates for training.

Jhabua, to begin with was not a medical district. For administrative convenience two tahsils *viz* Jobat and Alirajpur were placed under the Dhar district while the remaining Jhabua, Thandla and Petlawad were placed under Ratlam. It become an independent medical district from 1-4-62 with Civil Surgeon at Jhabua. Jhabua has two hospitals, one branch dispensary at Alirajpur, six graded hospitals, eight ungraded hospitals, twenty two Ayurvedic Aushdhalayas, two T.B. hospitals, two maternity Homes, twelve Primary Health Centres and ten Family Planning clinics. The total number of beds available in the various hospitals and dispensaries are 145. There are no specialists except for the Venereal Diseases, under a scheme financed by the Tribal Welfare Department.

Water Supply.

In the rural areas the population is mostly scattered and so there is no arrangement for

supplying water, which is procured mostly from stre ams and when they dry up in summer, small wells are dug up on the banks. Guinea–worm, a water–borne infection has been noticed. Jhabua town was provided with protected water supply, but the same in summer, dries up. There are no filteration arrangements.

Malaria Eradication.

The tract was notoriously malarious. Although the former States distributed antimalaria pills, yet the incidence was not reduced. On formation of Madhya Bharat, the problem was tackled more energetically. D. D. T. was sprayed and a sub-unit of National Malaria Eradication Programme was stationed at Jhabua in 1953 and in Alirajpur in 1954. The spraying of D. D. T. was carried out in two rounds and it is now reported that malaria is under control.

Sanitation.

There is no underground drainage scheme nor is there any scheme for sanitation.

C. D. and N. E. S. Blocks.

There are twelve blocks in the district. Their break-up and other details being—

S.No.	Name of the Block with tahsil in bracket	Date of establishment	Number of villages	Area in sq. miles	Remarks
(1)	(2)	(3)	(4)	(5)	(6)
1	Jhabua (Jhabua)	2 10-63	95		Started as N. E. S., converted to C. D. on 1-4-55, reverted to stage II on 1-4-59
2	Alirajpur (Alirajpur)	2-10-56	88	234	SMPT : reverted to Stage II
3	Rama (Jhabua)	1-4-58 2-10-62	124	230	Period of stage is extended to 31-3-64, converted to TD on 2-10-62.
4	Jobat (Jobat)	1-4-58	62	168	Stage I.
5	Petlawad (Petlawad)	2-10-58	239	369	Started as P. E, converted into stage I on 1-4-60.
6	Thandla (Thandla)	1-4-59	111	211	Started as P. E. converted to Stage I on 1-4-60.
7	Sondwa (Alirajpur)	1-4-60	134	349	Started as P. E. converted to stage I on 1-4-61.
8	Meghnagar (Thandla)	2-10-60	111	193	Stage I.
9	Bhabra (Jobat)	1-4-61	54	153	Stage I.
10	Kathiwara (Alirajpur)	1-4-62	125	275	Stage I.
11	Udaigarh (Jobat)	1-4-62	86	142	Stage I.
12	Jhabua (Jhabua)	2-10-62	138	181	P. E.

During this period the tempo of development in the rural area was created and the people in general were made known the benefits they can derive from the extension agencies.

During the year 1953 the 1st NES Block was opened in Jhabua having its headquarters at Ranapur. Later on the headquarters was shifted to Jhabua proper. This block was comprised of 197

The cultivators are not particularly irrigation minded and due to the difficult conditions, cost goes very high. At the end of first Five Year Plan, the total area irrigated was 7,005 acres. The details being.

	Area in acres	
	First plan	Second plan
Irrigated by private sources.	6991	7000
by Govt. works.	14	164
	7005	7164

Thus during the decade and even as a result of two Five Year Plans the area under irrigation has not increased in any measure. It is hoped that by the end of Third Five Year Plan, the irrigation potential would be boosted up to 13,879 acres. The details being :—

Irrigation by old Govt. works.....	879
Irrigation by new Govt. works.....	4000
Irrigation by other sources.....	9000
	13879

At present the district produces mainly *Kharif* crops *viz*. Jowar, maize, cotton and groundnut. These crops do not require much irrigation. There are very few *rabi* crops and the double - cropped area practically nil. Thus the irrigation prospects are at present somewhat limited.

Some of the main irrigation tanks are*: Khawasa (350), Sater (170), Bhagore (150), Agral (116), Chapaner (110) and Rampuria (100). Figures in brackets indicate the average area likely to be irrigated. The water for irrigation is being supplied from above tanks and maximum potential will be reached in due course. The district officer of the following departments however continues to function from Dhar

(1) The Assistant Director of Industries.

(2) District Statistical officer and Publicity Officer.

III

THE PEOPLE

The Growth of Population

During the last sixty years the population of the district has grown by 232.91%, which incidentally represents the highest rate of the growth in the State for the above period. During the decade 1951-61 the increase has been to the tune of 34.42% which is again higher than the variation in Indore Division 27.65% and the State 24.17%. As compared to the decade 1941-51 (percentage variation 11.40%) the growth has been much higher. The table below gives the variation in population during the last sixty years.

Table Showing Variation in Population (1901-61)

District	Year	Persons	Decade Variation (+Increase) (—Decrease)	Percentage Variation		
				Jhabua	Indore Division	Madhya Pradesh
1	2	3	4	5	6	7
Jhabua	1901	154,513		...	...	...
	1911	215,631	+ 61,118	+ 39.56	+ 16.19	+ 15.30
	1921	250,096	+ 34,465	+ 15.98	+ 7.14	— 1.38
	1931	292,356	+ 42,260	+ 16.90	+ 15.40	+ 11.39
	1941	343,223	+ 50,867	+ 17.40	+ 13.95	+ 12.34
	1951	382,673	+ 39,450	+ 11.49	+ 13.78	+ 8.67
	1961	514,384	+ 131,711	+ 34.42	+ 27.65	+ 24.17
	1901-1961			+232.91	+137.76	+ 92.00

*Figures have been supplied by the Executive Engineer, Irrigation Division, Jhabua.

It is also noteworthy that Jhabua during the 1901-11 decade also returned the highest variation of 39.56% in the State. Another noticeable feature is that presure of growth during the last sixty years has been well maintained excepting during 1911-21, 1921-31, 1931-41, when the percentage variation remained between 15.98 and 17.40. It is interesting to observe that the adjoining districts of Jhabua, have also returned a very steady and sustained growth. Even adjoining districts of Gujarat, Rajasthan and Maharashtra seem to reflect the same tendencies.

Table-Showing Percentage Variation of Population 1901-1961.

	District	1901-61	1951-61	1941-51	1931-41	1921-31	1911-21	1901-11
	1	2	3	4	5	6	7	8
(1)	Jhabua	+232.91	+34.42	+11.49	+17.40	+16.90	+15.98	+39.56
(2)	Ratlam	+102.63	+26.67	+13.90	+15.39	+18.54	+ 0.21	+ 2.47
(3)	Dhar	+119.64	+27.74	+ 6.38	+ 9.54	+ 9.88	+14.66	+17.11
(4)	West Nimar	+197.22	+30.55	+11.40	+15.04	+18.21	+10.07	+36.53
(5)	Baroda (Gujarat)	+158.72	+26.02	+15.92	+19.02	+16.38	+ 8.32	+18.05
(6)	Panch Mahal (Gujarat)	+219.73	+29.85	+19.55	+15.06	+19.01	+16.35	+29.29
(7)	Dhulia (Maharashtra)	+201.32	+27.44	+25.36	+18.29	+20.33	+ 6.20	+24.77
(8)	Banswara (Rajasthan)	+187.42	+33.29	+18.89	+15.05	+18.74	+17.10	+13.38

The entire surrounding region exhibits a some what high rate of population. There has not been a decade where there was any loss in population. Even in the decade 1911-21 where epidemics ravaged and destroyed a great deal of population; these districts did not suffer any loss. Like Jhabua in Madhya pradesh, Dhulia in Maharashtra, has shown the highest growth in the last sixty years and Panch Mahal is second to Dangs in Gujarat. Thus in all the adjoining districts of Jhabua, there has been a continuous increase in the population during the decades. Whereas the northern districts of Madhya Pradesh, specially in Gwalior suffered losses in population in 1901-11 and 1911-21 decades, the southern part of Malwa plateau was a little more fortunate. The loss of population in the region being comparatively less and Jhabua in south shows an increase despite these calamities. J.W.D. Johnstone, Census Commissioner for Gwalior State in 1901 while writing on the loss of population in 1901 in northern districts (Bhind and Morena) of the State mentioned that during the famine 1899-1900 the population migrated towards Malwa where the failure of monsoons did not cause such hardship.

Another factor which seems to be responsible for the high rate of growth is the greater concentration of tribal population in the district which is 84.7% of the total. This is the highest concentration of the tribes in any district in the State. If we add the Scheduled Castes to this, the total Scheduled Castes/Scheduled Tribes population comes to 87 6%. Among the Scheduled Castes and Tribes the rate of growth is comparatively higher.

Analysing the position decade wise in 1911 we find that the population increased by 39.56% in Jhabua and Alirajpur States the rise being 37.0% and 44.0% respectively which was fairly high. From the above increase Luard concluded that the rise was due to the rapid recovery of the population, from the after effects of the famine of 1899-1900. The soil in western Central India which includes the present Jhabua district, was more fertile and hence capable of sustaining greater population. The

The cultivators are not particularly irrigation minded and due to the difficult conditions, cost goes very high. At the end of first Five Year Plan, the total area irrigated was 7,005 acres. The details being.

	Area in acres	
	First plan	Second plan
Irrigated by private sources.	6991	7000
by Govt. works.	14	164
	7005	7164

Thus during the decade and even as a result of two Five Year Plans the area under irrigation has not increased in any measure. It is hoped that by the end of Third Five Year Plan, the irrigation potential would be boosted up to 13,879 acres. The details being :—

Irrigation by old Govt. works	879
Irrigation by new Govt. works	4000
Irrigation by other sources	9000
	13879

At present the district produces mainly *Kharif* crops *viz.* Jowar, maize, cotton and groundnut. These crops do not require much irrigation. There are very few *rabi* crops and the double - cropped area practically nil. Thus the irrigation prospects are at present somewhat limited.

(4)	West Nimar	+197.22	+30.55	+11.40	+15.04	+18.21	+10.07	+36.53
(5)	Baroda (Gujarat)	+158.72	+26.02	+15.92	+19.02	+16.38	+ 8.32	+18.05
(6)	Panch Mahal (Gujarat)	+219.73	+29.85	+19.55	+15.06	+19.01	+16.35	+29.29
(7)	Dhulia (Maharashtra)	+201.32	+27.44	+25.36	+18.29	+20.33	+ 6.20	+24.77
(8)	Banswara (Rajasthan)	+187.42	+33.29	+18.89	+15.05	+18.74	+17.10	+13.38

The entire surrounding region exhibits a some what high rate of population. There has not been a decade where there was any loss in population. Even in the decade 1911-21 where epidemics ravaged and destroyed a great deal of population; these districts did not suffer any loss. Like Jhabua in Madhya pradesh, Dhulia in Maharashtra, has shown the highest growth in the last sixty years and Panch Mahal is second to Dangs in Gujarat. Thus in all the adjoining districts of Jhabua, there has been a continuous increase in the population during the decades. Whereas the northern districts of Madhya Pradesh, specially in Gwalior suffered losses in population in 1901-11 and 1911-21 decades, the southern part of Malwa plateau was a little more fortunate. The loss of population in the region being comparatively less and Jhabua in south shows an increase despite these calamities. J.W.D. Johnstone, Census Commissioner for Gwalior State in 1901 while writing on the loss of population in 1901 in northern districts (Bhind and Morena) of the State mentioned that during the famine 1899-1900 the population migrated towards Malwa where the failure of monsoons did not cause such hardship.

Another factor which seems to be responsible for the high rate of growth is the greater concentration of tribal population in the district which is 84.7% of the total. This is the highest concentration of the tribes in any district in the State. If we add the Scheduled Castes to this, the total Scheduled Castes/Scheduled Tribes population comes to 87 6%. Among the Scheduled Castes and Tribes the rate of growth is comparatively higher.

Analysing the position decade wise in 1911 we find that the population increased by 39.56% in Jhabua and Alirajpur States the rise being 37.0% and 44.0% respectively which was fairly high. From the above increase Luard concluded that the rise was due to the rapid recovery of the population, from the after effects of the famine of 1899-1900. The soil in western Central India which includes the present Jhabua district, was more fertile and hence capable of sustaining greater population. The

political conditions according to him were a general bar to the expansion of the population. The soil in Jhabua district is generally not of a very high quality, but the political conditions, certainly retarded the growth, even this appeared to be upset by the high fertility.

Although there was a fairly severe influenza epidemic before 1921, yet the population increased by 15.98%, which was again fairly high, looking to the severity of epidemics in the decade. There was no scarcity during the decade though rainfall in 1911 and 1918 was somewhat scanty. The district was visited by influenza but the mortality was not very high.

Luard was of the opinion that this growth was due to natural increase and more accurate counting. He in his report on Alirajpur State wrote*, "During the past ten years a further advance of over 23 percent, was made, in spite of the calamities of Influenza and Cholera. This increase is due to natural growth and more accurate counting. A part of this increase may be accounted for by pilgrims on their way to attend the Ujjain Simhast fair and partly to immigrants from neighbouring districts and States on account of wheat harvesting season which fell about the actual Census time. Generally speaking more people were returned at the Preliminary Enumeration than at the actual Census. The effect of this was very apparent in Gwalior, Jhabua and Dhar as the figures for migration show."

Alirajpur State then had an area of 836 sq. miles covering a little less than one-third of the area of the present district. The fact that the increase for the entire district was 15.98% suggests that in other areas of the district the increase was less. Petlawad Pargana of the old Holkar State lost in population to the tune of 2.1%. @ This naturally brings down the overall increase.

From the above it appears that Jhabua district was spared the severity of the epidemic for in neighbouring Ratlam the increase of population was only 0.21%. One of the reasons why influenza epidemic was not so severe, may be found in the mode of the living of the Bhils and Bhilalas who form a bulk of the population. Instead of congregating in a habitation they remain away from each other in their fields; during the raging epidemics, they are away from the contagion; hence are spared from its severity. It would also be noticed that in the near-by region including Dhar, West Nimar, Baroda, Panch Mahal, Dhulia and Banswara districts there was an increase in the population.

The growth in 1921-31, roughly corresponds to the general growth of the division. The economic condition during the decade was good and no scarcity or relief works were opened. This was a decade of slow growth and the increase in the district reflects the same. The same is also true of 1931-41 decade.

In 1941-51 decade, for the first time in the last sixty years the growth in Indore Division is higher than that in Jhabua district. One of the reasons for this is the political changes, by which the States were merged into Madhya Bharat. The capitals of former princely States and Jagirs like Jobat, Kathiwada and Marhwar presented a somewhat deserted appearance. This in turn affected the population dependent on those chiefs, nobles and rulers.

During the present decade however there has been considerable growth 34.42%. This, apart from the natural increase is also due to migration for as against 5.32% in 1951, 6% of the total population or 30,927 persons are born outside the district. In this period, more attention than ever was paid to the development of the district and quite a few administrative offices came up; along with them grew up some population.

The Tahsils, Towns, Villages and Houses

Five tahsils *viz.* (a) Jhabua, (b) Jobat, (c) Ali-

*The Central India State Census Series 1921 Vol. XXVI, Alirajpur State. Text and Tables compiled by Lt. Col. C. E. Luard M.A. (oxon) IA,SCO in Central India.

@Central India Census Series 1921 Volume I Holkar State by Rahalkar and Kapse under the direction of Lt. Col. C. E. Luard SCO in Central India.

rajpur, (d) Thandla and (e) Petlawad constitute the district. All the tahsils are named after their main towns. Ranapur in Jhabua tahsil is the only other town. Thus there are six towns in the district. The table below gives the number of towns, villages and density of population.

Table-Showing the number of towns and villages along with density of population in the district.

District/Tahsil	No. of villages	No. of towns	Area in sq. miles	Persons per sq. mile	Rank in Area	Rank in Density
1	2	3	4	5	6	7
Jhabua District	1,367	6	2,623	196		
1 Thandla Tahsil	222	1	404	222	4	3
2 Petlawad Tahsil	239	1	369	179	5	4
3 Jhabua Tahsil	357	2	557	233	2	1
4 Jobat Tahsil	202	1	424	232	3	2
5 Alirajpur Tahsil	347	1	869	150	1	5

From the above it follows that Jhabua has the largest number of villages and is the most thickly populated tahsil of the district. Jobat tahsil has the least number of villages and has almost same density of population being 232 persons to a sq. mile.

Alirajpur tahsil is the biggest in area, next only to Jhabua in the number of villages but is least densely populated of all tahsils having returned only 150 persons to a sq. mile. Petlawad tahsil is the smallest in area and is very slightly more densely populated than Alirajpur. Thandla tahsil fourth in area, third in density is also fourth in number of villages.

The Towns.

Alirajpur is the only town with a population of over 10,000 persons. In 1951 this was the only town, the remaining appear as towns for the first time. The total population of the towns is 35,727 persons all 'huddled' together in 1.3 sq. miles of area. Thus the density works out at 26,862 persons per sq. mile which is on the high side. The urban density of the State is 6,428 and that of Indore division 12,604. It appears that area figures are not very accurate for they include areas under municipal jurisdiction only and in many cases this is not up to date. The towns in the district are not as congested as may appear from these statistics.

Alirajpur (10,161) had been a town since 1931. In 1951 it was included in class V; i. e. town with a population 5,000-9,999 persons. During the present decade however it has been included in Class IV i. e. where the population is between 10,000 to 19,999 persons. Jhabua (6,315), Thandla (5,071), and Ranapur (5,320) are in Class V i. e. having population of more than 5,000 but less tnan 9,999 persons. Petlawad (4,820) and Jobat (4,040) are in Class VI i. e. towns with a populatlon of less than 5,000 persons. All these have been included in the towns for the first time.

The Villages.

During the decade the number of villages has remained the same, although there have been some internal transfers. The number of villages in the tahsils were as follows :—

political conditions according to him were a general bar to the expansion of the population. The soil in Jhabua district is generally not of a very high quality, but the political conditions, certainly retarded the growth, even this appeared to be upset by the high fertility.

Although there was a fairly severe influenza epidemic before 1921, yet the population increased by 15.98%, which was again fairly high, looking to the severity of epidemics in the decade. There was no scarcity during the decade though rainfall in 1911 and 1918 was somewhat scanty. The district was visited by influenza but the mortality was not very high.

Luard was of the opinion that this growth was due to natural increase and more accurate counting. He in his report on Alirajpur State wrote*, "During the past ten years a further advance of over 23 percent, was made, in spite of the calamities of Influenza and Cholera. This increase is due to natural growth and more accurate counting. A part of this increase may be accounted for by pilgrims on their way to attend the Ujjain Simhast fair and partly to immigrants from neighbouring districts and States on account of wheat harvesting season which fell about the actual Census time. Generally speaking more people were returned at the Preliminary Enumeration than at the actual Census. The effect of this was very apparent in Gwalior, Jhabua and Dhar as the figures for migration show."

Alirajpur State then had an area of 836 sq. miles covering a little less than one-third of the area of the present district. The fact that the increase for the entire district was 15.98% suggests that in other areas of the district the increase was less. Petlawad Pargana of the old Holkar State lost in population to the tune of 2.1%. @ This naturally brings down the overall increase.

From the above it appears that Jhabua district was spared the severity of the epidemic for in neighbouring Ratlam the increase of population was only 0.21%. One of the reasons why influenza epidemic was not so severe, may be found in the mode of the living of the Bhils and Bhilalas who form a bulk of the population. Instead of congregating in a habitation they remain away from each other in their fields; during the raging epidemics, they are away from the contagion; hence are spared from its severity. It would also be noticed that in the nearby region including Dhar, West Nimar, Baroda, Panch Mahal, Dhulia and Banswara districts there was an increase in the population.

The growth in 1921-31, roughly corresponds to the general growth of the division. The economic condition during the decade was good and no scarcity or relief works were opened. This was a decade of slow growth and the increase in the district reflects the same. The same is also true of 1931-41 decade.

In 1941-51 decade, for the first time in the last sixty years the growth in Indore Division is higher than that in Jhabua district. One of the reasons for this is the political changes, by which the States were merged into Madhya Bharat. The capitals of former princely States and Jagirs like Jobat, Kathiwada and Marhwar presented a somewhat deserted appearance. This in turn affected the population dependent on those chiefs, nobles and rulers.

During the present decade however there has been considerable growth 34.42%. This, apart from the natural increase is also due to migration for as against 5.32% in 1951, 6% of the total population or 30,927 persons are born outside the district. In this period, more attention than ever was paid to the development of the district and quite a few administrative offices came up; along with them grew up some population.

The Tahsils, Towns, Villages and Houses

Five tahsils *viz.* (a) Jhabua, (b) Jobat, (c) Ali-

*The Central India State Census Series 1921 Vol. XXVI, Alirajpur State. Text and Tables compiled by Lt. Col. C. E. Luard M.A. (oxon) IA,SCO in Central India.

@Central India Census Series 1921 Volume I Holkar State by Rahalkar and Kapse under the direction of Lt. Col. C. E. Luard SCO in Central India.

rajpur, (d) Thandla and (e) Petlawad constitute the district. All the tahsils are named after their main towns. Ranapur in Jhabua tahsil is the only other town. Thus there are six towns in the district. The table below gives the number of towns, villages and density of population.

Table-Showing the number of towns and villages along with density of population in the district.

District/Tahsil	No. of villages	No. of towns	Area in sq. miles	Persons per sq. mile	Rank in Area	Rank in Density
1	2	3	4	5	6	7
Jhabua District	1,367	6	2,623	196		
1 Thandla Tahsil	222	1	404	222	4	3
2 Petlawad Tahsil	239	1	369	179	5	4
3 Jhabua Tahsil	357	2	557	233	2	1
4 Jobat Tahsil	202	1	424	232	3	2
5 Alirajpur Tahsil	347	1	869	150	1	5

From the above it follows that Jhabua has the largest number of villages and is the most thickly populated tahsil of the district. Jobat tahsil has the least number of villages and has almost same density of population being 232 persons to a sq. mile.

Alirajpur tahsil is the biggest in area, next only to Jhabua in the number of villages but is least densely populated of all tahsils having returned only 150 persons to a sq. mile. Petlawad tahsil is the smallest in area and is very slightly more densely populated than Alirajpur. Thandla tahsil fourth in area, third in density is also fourth in number of villages.

The Towns.

Alirajpur is the only town with a population of over 10,000 persons. In 1951 this was the only town, the remaining appear as towns for the first time. The total population of the towns is 35,727 persons all 'huddled' together in 1.3 sq. miles of area. Thus the density works out at 26,862 persons per sq. mile which is on the high side. The urban density of the State is 6,428 and that of Indore division 12,604. It appears that area figures are not very accurate for they include areas under municipal jurisdiction only and in many cases this is not up to date. The towns in the district are not as congested as may appear from these statistics.

Alirajpur (10,161) had been a town since 1931. In 1951 it was included in class V; i. e. town with a population 5,000-9,999 persons. During the present decade however it has been included in Class IV i. e. where the population is between 10,000 to 19,999 persons. Jhabua (6,315), Thandla (5,071), and Ranapur (5,320) are in Class V i. e. having population of more than 5,000 but less tnan 9,999 persons. Petlawad (4,820) and Jobat (4,040) are in Class VI i. e. towns with a populatlon of less than 5,000 persons. All these have been included in the towns for the first time.

The Villages.

During the decade the number of villages has remained the same, although there have been some internal transfers. The number of villages in the tahsils were as follows :—

Table—Showing 1,000 Census Houses by roof material.

District/Tahsil		Grass leaves, reeds, thatch, wood or bamboo	Tiles, slates shingle	Corrugated iron zinc or other metal sheets	Asbestos cement sheets	Bricks and lime	Concrete or stone slabs	All other material
1		2	3	4	5	6	7	8
Jhabua District	R	74	883	26	2	Neg.	1	14
	U	45	573	290	27	..	42	23
1 Thandla Tahsil	R	64	887	30	9	Neg.	Neg.	10
	U	...	577	282	14	...	9	118
2 Petlawad ,,	R	232	709	55	1	Neg.	3	Neg.
	U	92	520	306	...	...	82	...
3 Jhabua ,,	R	64	874	14	Neg.	...	...	48
	U	64	567	287	48	...	22	12
4 Jobat ,,	R	21	945	33	1	...	...	...
	U	25	772	142	6	...	55	...
5 Alirajpur ,,	R	42	942	15	...	...	1	Neg.
	U	30	521	350	30	...	61	8

The available living space in such houses is about 250 sq. feet or there about. The table below gives the decade variation in the number of houses.

Table—Showing the position of occupied houses in Jhabua District (1951-61).

Year	Population	No. of occupied houses	Persons per occupied house	1951-61 variation (+) (—)	Percentage variation
1	2	3	4	5	6
1951	382,673	66,126	5.79	...	...
1961	514,384	88,284	5.83	+22,158	33.51

As against the population increase of 34.42% there has been an increase of 33.51% in the number of occupied houses. The congestion has increased but only slightly for now there are 5.83 persons per house. Excepting Indore district the figure represents the highest concentration per house in the division.

The Depopulated Villages.

The number of depopulated villages has come down to 36 in 1961 from 54 in 1951. In all tahsils the number has gone down. The earlier table also gives the details. Petlawad tahsil with 21 depopulated villages still leads in the district.

The Area and Population of Villages.

The area of a village in the district is 1.91 sq. miles and among the district itself, a village in Alirajpur tahsil is the biggest in area, being 2.50 sq. miles and smaller in Jhabua 1.56 sq. miles. The average area of a village in other tahsils is: Jobat 2.10, Thandla 1.82, Petlawad 1.55 sq. miles.

The villages generally speaking sustain small population. Whereas in Indore division the average population per village is 409.42 persons, it is only 359.6 persons in the district. Among the tahsils the population per village varies from 470 in Jobat tahsil to 281.1 in Petlawad tahsil. The others returning (a) Thandla 381.4, (b) Alirajpur 353.2, and (c) Jhabua 337.5. Thus it follows that on an average the villages in Jobat tahsil sustain the highest population. The villages in Petlawad return only 281.1 persons per village.

The Proportion of Sexes.

The number of females per one thousand males is 958, which is a little above the State average of 953 and much above the division average of 935. The sex-wise figures for 1901 for Jhabua are not available. In the last fifty years 1911-61 however there has been steady decline in the number of females.

The table below gives the changes in proportion of sexes 1911-61.

Table-Showing females per one thousand males.

Name of District.	1961	1951	1941	1931	1921	1911
Jhabua	958	949	956	958	971	1,001

Since 1911 the number of females has been declining although in the present decade they have shown a slight increase. This appears to conform to the general pattern of the region. The comparable position in other adjoining districts is: Ratlam 941, West Nimar 958, Banswara 971, Panch Mahal 936, Baroda 907 and Dhulia 967. The pattern remains more or less the same.

It has been observed that (a) in areas where urban concentration is not much the proportion of females is high, (b) among the Scheduled Tribes the proportion of females is high. In Jhabua the concentration of tribals is high and there is practically no urban centre.

From 1911 to 1951 there had been a consistent decrease in the number of female births; a phenomenon which is common to the region. The fall of 30, between 1911 and 1921, is somewhat sharp; it should however be remembered that during the influenza epidemic, the female mortality was of a very high order. Since then the decline in sex-ratio has continued. Only in the last decade 1951-61, there have been more female births as is obvious from the sex-ratio in the 0-4 age-group where there are 1,029 females per 1,000 males and this age-group constitutes nearly one-fifth of the population in the district.

Vital Statistics.

In 1953 the Madhya Bharat State Government promulgated the Madhya Bharat Births, Deaths, Marriages Registration Act 1953 basing it on a similar Act of 1886 of the Government of India, making the registration of births and deaths compulsory, but it was never enforced. The position regarding the maintenance of vital statistics therefore has been far from satisfactory. During the decade, under the existing laws the municipalities and the panchayats were required to maintain statistics of births and deaths Both these local bodies have not been able to keep any accurate statistics and the position remained practically the same as was described by Ranglal in 1955. In the Report of Operations Connected with the Improvement of Population Data M. B. 1952, he wrote* :—

"The arrangements for the registration of births and deaths are unsatisfactory even in large municipal towns. The Director's Report as to the agency responsible for the reporting of the deaths in urban areas is silent. All that is known is that generally the responsibility has been laid either on members of the family of the deceased or on sweepers or on both."

Whereas the position was bad enough in the municipalities, it was much worse in the case of Panchayats; Kendra Panchayats were made responsible to arrange for the registration of births, deaths and marriages in their jurisdiction provided it could find funds, for the purpose. The Gram Panchayats were supposed to record births and deaths and send the figures monthly to the Mandal Panchayats through the Kendra Panchayats which submitted returns to the Deputy Director of Health Services. The municipalities also sent these returns to the Deputy Director concerned who after consolidation sent it to the Director, Health Services. The Panchayats obviously failed to grasp the importance of this duty and no regular records were maintained and the result was that no statistics worth the name were ever compiled.

The births and deaths statistics of the municipalities are generally those that are made available to them by the Government or municipal hospitals

*Census of India, Paper No. 2-1955, Sample Census of Births and Deaths, 1952-53.

and such others as may have been collected by their Health Department. The coverage is by no means full, as many births and deaths are never reported. There being no supervising agency, it is impossible to verify the accuracy. In 1952 when an experimental Census of births and deaths was conducted in Madhya Bharat the results were as follows:—

1. Period covered by Census. 30-10-1951 to 18-10-1952
2. Period of which figures were supplied by the Health Department. 1-11-1951 to 31-10-1952

Births and Deaths rates per 1,000 of population calculated on basis of :—

	Result of experimental Census		Figures supplied by Health Department	
	Births	Deaths	Births	Deaths
State of Madhya Bharat	33.0	18.8	10.4	6.5
Hills	36.2	19 7	8.7	5.7

The absence of accurate statistics causes great difficulty in estimating the annual rate of natural increase-no wonder it was then estimated at between 1.4 to 1.6 percent annually.

The Age Table.

The table below gives the age and sex structure of the district and corresponding data for the State :—

Age-group	Percentage of population in the age-group						Sex Ratio	
	Jhabua			State			Jhabua	State
	P	M	F	P	M	F		
1	2	3	4	5	6	7	8	9
0- 4	19.8	9.8	10.0	16.4	8.2	8.2	1,029	996
5- 9	16.6	8.6	8.0	14.3	7.3	7.0	936	966
10-14	10.0	5.3	4.7	10.1	5.4	4.7	868	847
0-14	**46.4**	**23.7**	**22.7**	**40.8**	**20.9**	**19.9**	**959**	**947**
15-19	7.6	3.9	3.7	7.9	4.1	3.8	947	929
20-24	8.4	4.1	4.3	8.6	4.2	4.4	1,067	1,069
25-29	8.4	4.2	4.2	8.8	4.5	4.3	987	939
30-34	7.2	3.8	3.4	7.4	3.9	3.5	912	897
15-34	**31.6**	**16.0**	**15.6**	**32.7**	**16.7**	**16.0**	**980**	**959**
35-39	5.7	3.0	2.7	5.8	3.1	2.7	903	878
40-44	4.8	2.5	2.3	5.2	2.7	2.5	893	950
45-49	3.5	1.9	1.6	4.2	2.2	2.0	848	886
50-54	3.1	1.7	1.4	4.0	2.1	1.9	838	908
55-59	1.4	0.7	0.7	2.1	1.1	1.0	939	903
35-59	**18.5**	**9.8**	**8.7**	**21.3**	**11.2**	**10.1**	**882**	**905**
60-64	1.7	0.8	0.9	2.4	1.2	1.2	1,169	1,080
65-69	0.7	0.3	0.4	0.9	0.4	0.5	1,112	1,157
70+	1.0	0.4	0.6	1.8	0.7	1.1	1,344	1,373
60+	**3.4**	**1.5**	**1.9**	**5.1**	**2.3**	**2.8**	**1,209**	**1,190**
Age not stated	0.1	0.1	Neg.	0.1	0.1	Neg.	844	898

In the 0-9 age-group there is 36.4% of the population which is very high for this age-group, the State figure being only 30.7%. This also emphasises the high growth rate during the last decade. In the last five years of the decade the number of females born exceeds the males. Both in the 0-4 and 5-9 age groups the percentage of population is much higher than that for the State. It again stresses the high rate of growth during the decade. In the age-group 15-34 however the num-

ber of persons to the general population corresponds nearly with the State average.

Nearly 78.0% of the population is thus in the age-groups 0-14 and 15-34. This is higher than the State average of 73.5%. In the 35-59 age-group however the percentage of population in the district which is 18.5% is below the State figure of 21.3%. Among the older age 60+ the percentage goes down further to 3.4% as against 5.1% for the State. Thus it may be noticed that there are few old persons-longevity is not particularly high.

The table below gives the distribution of 100 persons in 1951 and 1961 into broad age-groups. Strictly speaking the data is not comparable because the 1951 figures are based on a 10% sample and the 1961 on absolute figures. However with this limitation the comparison is offered.

Age-group 1951 data based on 10% Sample	1951			1961		
	P	M	F	P	M	F
0-14	44.1	22.5	21.6	46.4	23.7	22.7
15-34	34.2	17.3	16.9	31.6	16.0	15.6
35-64	20.2	10.8	9.4	20.2	10.6	9.6
65+	1.4	0.6	0.8	1.7	0.7	1.0
Age not stated	0.1	0.1	0.0	0.1	0.1	Neg.

The composition reveals that there has been an increase of 2.3% in 0-14 age-group or the younger population-the result of increase in births during the last decade. The 15-34 age-group reveals a decrease of 2.6% which more or less balances the above increase. The other compositions have not been disturbed.

The Sex Composition in various age-groups.

Excepting in 0-4, 20-24, 60-64, 65-69, 70+ age-groups returning 1,029, 1,067, 1,169, 1,112, 1,344 females per thousand males all the other age-groups have returned less number of females. The worst age-groups in this respect are 10-14, 40-44, 45-49, 50-54 which have returned 868, 893, 848 and 838 per one thousand females respectively. From this it also follows that in Jhabua women live longer than men as is borne out from the ratio in 60+ age-group.

Marital Status.

The table below indicates the marital status of the population in the district.

The Marital Status.

Age Groups	Total Population		Never Married		Married		Widowed		Divorced or separated		Unspecified	
	M	F	M	F	M	F	M	F	M	F	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13

65-69	100	100	0.96	0.17	72.37	27.04	26.16	72.33	0.51	0.46	...	...
70+	100	100	1.59	0.32	60.42	17.91	37.52	81.16	0.47	0.61	...	...
A.N.S.	100	100	91.67	87.50	7.78	9.87	0.55	2.63	...	...	...	...

Persons in the 0-9 age-group were tabulated as never married and the fact that 95.53% of males and 88.21% females in 10-14 age-group are unmarried suggests that pre-puberty marriages are very few. Bet ween 15-19 years, nearly two-thirds-65.02% of the females are married. This indicates that quite a substantial number of females are married in this age-group, hence the age of marriage is nearer this age-group. Among the males however only 28.57% are married by this age. In the age-groups 20-24, 25-29, 30-34 a very high percentage of women are married: and in the 30-34 age-group 2:77% are widows. Among the males nearly one-third still remain unmarried upto 20-24 years. Therefore, it appears that men marry late. In the age-groups that follow more and more men are married. Even in the 55-59 nearly four-fifth of the male population is married. It is only after the age of 40 that one out of 20 persons is a widower. The proportion of married women begins to go down after the age of 45 and as this figure shrinks, the proportion of widows goes up and over two-fifths become widows after 59. Whereas in 65-69 age group as many as 72.37% among male are married the percentage is only 27.04% among women. This underlines the difference between the ages of married couples. Generally the females are younger than their husbands. The other categories Divorced or Separated and never Married constitute very small proportion.

Literacy:

There are only 6.0 persons who are literate. This is the lowest for any district in the State. The main reason for this is that the district is mostly inhabited by the scheduled tribes who constitute 84.7% of the total population. Literacy among them is indeed very poor therefore the figures naturally make a somewhat dismal reading. Similarly the Scheduled Castes constitute 2.88% or 14,805 persons. The literacy among Scheduled Caste is 3.9% and among the Scheduled Tribes it is 1.31%. Though the educational facilities have expanded considerably but apparently much still has to be done in this direction.

Religion:

The main religions returned along with their percentage composition are as follows:

Table Showing Percentage Composition of Religion in Jhabua District.

Religion	Persons	Percentage to population
1	2	3
Hindus	494,133	96.06
Muslims	10,500	2.04
Jains	5,110	1.00
Christians	4,583	0.89
Sikhs	46	0.01
Budhists	11	Neg.
Others	1	Neg.
Total :—	514,384	100.00

The decade variation has been as follows:

Religion	1951	1961	Variation (+)or(-)	Percentage variation
1	2	3	4	5
Hindus	369,052	494,133	+125,081	+ 33.89
Muslims	8,499	10,500	+ 2,001	+ 23.54
Jains	3,326	5,110	+ 1,784	+ 53.64
Christians	1,741	4,583	+ 2,842	+163.24
Sikhs	49	46	— 3	— 6.12
Budhists	...	11	+ 11	+100.00

Christians have shown an increase of 163.24% followed by Jains +53.64% and Hindus +33.89%. Sikhs have shown a decrease of 6.12% during the decade. The growth has been more or less normal excepting among Christians. The Christian Mission have been working for quite some time in the district.

Mother Tongue:

In 1951 seventeen languages with fourteen sub-languages, four under Hindi (Western) six under Rajasthani, two under Bhili and two under Gujarati were returned. Languages with speakers over 1,000 persons are given below:

Language	1961 Persons	1951 Persons
1	2	3
Bhilali	129,338	56,257
Bhili	240,018	257,214
Gujarati	6,827	9,628
Malvi	3,440	7,148
Urdu	4,080	4,402
Hindi	127,930	41,791

The district has returned the following foreign languages, Afghani 9, Arabic 6, English 27, French 3, German 4, Irish 1 and Nepali 49. The following foreign languages appear for the first time. Afghani, Arabic, French, German and Irish. The speakers in Bhili and Bhilali together constitute 369, 356 speakers or 71.81% of the total comparable to 81.92% in 1951. The table below gives the decade variation of eight main mother-tongues (six with speakes of 1000 persons and above and Marathi and Nimadi with 770 and 845 speakers respectively).

Table—Showing Mother Tongues 1951-61.

Name of Mother Tongue	1961		1951		Variation	
	Persons	Percentage	Persons	Percentage	Persons	Percentage (+) (—)
1	2	3	4	5	6	7
Total Speakers	514,384	100	382,673	100	+131,711	+ 34.42
1 Bhilali	129,338	25.14	56,257	14.70	+ 73,081	+ 129.91
2 Bhili	240,018	46.66	257,214	67.22	— 17,196	— 6.69
3 Gujarati	6,827	1.33	9,426	2.46	— 2,599	— 27.57
4 Hindi	127,930	24.87	41,668	10.89	+ 86,262	+ 207.02
5 Malwi	3,440	0.67	7,148	1.87	— 3,708	— 51.87
6 Marathi	770	0.15	631	0.17	+ 139	+ 22.03
7 Nimadi	845	0.16	2,991	0.78	— 2,146	— 71.75
8 Urdu	4,080	0.79	4,402	1.15	— 322	— 7.31

Bhilali shows a high rate of increase Bhilali has been spoken over a great portion of the district. Speakers of Hindi show a great increase. Nimadi and Malwi show a decline. These along with Gujarati are spoken mostly in the neighbouring areas of the district.

The Scheduled Tribes/Scheduled Castes Population.

The district has returned 435, 793 persons or 84.7% under Scheduled Tribes. These are Bhils, Bhilalas, Barela, Patelia and other sub-tribes. Among themselves Patelias are considered more advanced socially and economically. Bhilalas come next followed by Bhils. The concentration of the tribal population in the district is the heaviest in the State followed by Bastar 72.3%. Literacy among the tribal population is rather poor there being only 5,219 and 498 literate males and females. There are only 4 males who are matriculates and above. As among the tahsils the concentration is as follows :

Tahsil	Percentage of tribal population	Rank
1	2	3
1 Thandla	84.99	3
2 Petlawad	70.04	5
3 Jhabua	87.58	2
4 Jobat	91.34	1
5 Alirajpur	84.13	4

Thus leaving Petlawad in all other tahsils the tribal population is over 84% and in Jobat the concentration is heaviest. Patelias reside mostly in Jhabua, Thandla and Petlawad tahsils and Bhilalas in Alirajpur and Jobat. Some of the tribes are discussed below:--

The Bhils.

In the district Bhils, Bhilalas including Barelas, Patelia and sub-tribes have been grouped together; hence figures for all these tribes appear together.

The name Bhil is supposed to have been derived from a Dravidian word for bow-which is a characteristic weapon of the tribe. C.S. Venkatachar is of the opinion that Bhils are a section of the great Munda race which occupied the pre-Dravidian India in the Central regions. He wrote* "Malcolm records that according to the Bhil tradition, their home is in the country to the north-west of Malwa from where they were ousted when the Rajputs began to conquer their country. This again meant a further displacement of the Bhils along the Vindhyas. The tradition of the Bhils in Malwa points to immigration from a western home but the story of their change of habitat does not appear to have clearly survived. The Jhabua Bhills still retain some dim and incoherent outlines of their migration. Their story is that the first Bhils were the Damor. Another section of the Bhils were the Warkrya who were living with the Damor One Warkrya committed violence on the daughter of a Damor as a result of which war sprung between the two people. The Damors fared badly in the struggle and they had to migrate. They stopped at a place called Dholka in Kushalgarh State (Rajputana Agency). This is supposed by the Bhils to be their original home and other tribes are said to have sprung from the Damors. The Bhils have their own traditions of their origin. One relates that a dhobi who used to wash his clothes in a river was one day warned by a fish of the approach of a great deluge. The fish informed him that as he had always fed those of his species he had come to give him this warning and to urge him to prepare a large box which would enable him to escape. The dhobi prepared the box and got into it with his sister and a cock. After the deluge Rama sent out his messenger to inquire into the state of affairs. The messenger heard the crowing of the cock and so discovered the box. Rama then had the box brought before him and asked the man who he was and how he had escaped. The dhobi told his tale. Rama then made him face in turn north, east and west and swear that the woman with him was his sister. The dhobi remained firm in asserting she was his sister. Rama then turned him towards the south, upon which the dhobi contradicted his statement and said she was his wife. Rama then asked who told him how to escape and on hearing at once had the fish's tongue cut out, and since then that kind of fish has been tongueless. Rama then told the dhobi to set about repopulating the world, and he therefore married his sister by whom he had seven sons and seven daughters. Rama presented the first born son with a horse but the recipient of this gift, being unable to ride, left the horse on the plain and went into the forest to cut wood, he and his descendants becoming foresters and starting the Bhil tribe."

Russel and Hiralal also wrote in a similar strain saying that they were the oldest inhabitants of Southern Rajputana. In the later nineteenth century and early twentith the Bhils were known for their pre-datory habits viz. thieving, robberies including highway robberies. Although at present, it cannot be claimed that they have completely given those up, yet it has declined considerably. The British with a view to improve these habits and also with a view to strengthen internal security constituted a special Corps, which was known as Malwa Bhil Corps and stationed at Indore. This Corps of some well-trained Bhils was ultimately wound up after independance.

The Bhils have returned cultivators as their occupation, followed by workers as agricultural labourers. The table below gives their occupational pattern.

Name of Tribe	Total Workers	I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10	11
Bhils and Bhilalas	100.00	94.15	2.58	1.98	0.10	0.08	0.12	0.05	0.11	0.83

*Census of India, 1931, Vol. XX, Central India Agency, Part I Report P. 239, C. S. Venkatachar, ICS, S.C.O.

Their participation rate is very high being 587 as against 561 for the district. The sex-ratio among them is 964.

The Bhilalas.

The Bhilalas have a considerable admixture of Rajput blood in them. The name of the tribe is said to be derived from Bhilara (or Bhilala) i. e. those accused of being Bhils from ara-a fault. They consider this appellation derogatory.

Patelias.

Like Bhilalas they too have considerable admixture of Rajput blood in them. The name Patelia is derived from bitle or "polluted" owing to their being out caste.

The Scheduled Castes.

There are 14,805 persons or 2.88% of the total population, who have been returned as Scheduled Castes. The main castes are Balai, Bhangi or Mehtar, Chamar, Bair.va, Bhambi, Jatav, Mochi or Regar, Dhanuk and Kotwal (only castes returning a population of 1,000 persons or above have been considered). The details are:-

Name of Scheduled Caste	Total population			Percentage to total Scheduled Caste population
	Persons	Males	Females	
1	2	3	4	5
Balai	2,500	1,287	1,213	16.9%
Bhangi	1,689	858	831	11.4%
Chamar	3,737	1,969	1,768	25.2%
Dhanuk	3,547	1,823	1,724	24.0%
Kotwal	1,594	809	785	10.8%

The Balais are working mostly as cultivators and in other Services. The Bhangis are engaged in household industry and in scavenging in which 199 persons work. The Chamars work mostly as cultivators, in the household industry making shoes and leather products and very few are also in other services. As many as 291 persons are still engaged in tanning and currying of hides, the traditional profession of Chamars, which is slowly being given up. The Dhanuks live almost entirely in rural areas their main occupation being cultivation, working as agricultural labourers, working in mining, quarrying and other services.

What has been said about Dhanuks also holds good for Kotwals who in addition also work in the household industries.

The following table gives the occupational pattern of the Scheduled Castes. The sex-ratio and participation rate is 929 and 525 respectively.

Distribution of Total workers into their Industrial categories of Scheduled Castes for each selected Caste.

Name of Scheduled Castes	Total workers	Workers in									Total workers (I-IX)	Non workers
		I	II	III	IV	V	VI	VII	VIII	IX		
1	2	3	4	5	6	7	8	9	10	11	12	13
All Scheduled Castes	100	49.64	7.95	5.29	22.31	1.07	0.41	0.93	0.48	11.92	52.48	47.52
1 Balai	100	60.82	13.65	1.77	8.26	1.30	1.30	1.71	—	11.19	58.60	41.40
2 Bhangi	100	14.58	1.89	0.13	43.05	2.70	0.13	0.41	0.94	36.17	43.87	56.13
3 Chamar	100	46.54	4.94	2.96	38.60	1.13	0.20	0.15	0.25	5.23	54.21	45.79
4 Kotwal	100	69.91	7.21	2.17	7.67	0.11	0.11	0.46	—	12.36	54.83	45.17
5 Dhanuk	100	64.70	10.67	16.04	0.33	0.16	—	0.05	—	8.05	51.51	48.49

The Economy of the District.

The district has returned 561 workers per one thousand persons, which is considerably higher than 499 the figure for Indore Division. The district *vis-a-vis* the State returns more workers (523 being the State figures). Incidentally the number of workers per thousand persons is the highest for the division. Among the males there are 598 workers per thousand, highest in the division, but not high enough for the State figure of 602. Among the females there are 523 workers per thousand, the figure is fairly high, and also higher than the State figure of 440 workers. In the urban areas of the district there are however fewer workers in accordance with the general pattern of the State.

The table below gives the total number of workers in rural and urban parts of the district and neighbouring districts:

District		Total population			Total workers		
		P	M	F	P	M	F
1		2	3	4	5	6	7
Ratlam	T	1,000	1,000	1,000	482	575	384
	R	1,000	1,000	1,000	546	601	488
	U	1,000	1,000	1,000	323	512	113
Jhabua	T	1,000	1,000	1,000	561	598	523
	R	1,000	1,000	1,000	577	605	548
	U	1,000	1,000	1,000	357	518	179
Dhar	T	1,000	1,000	1,000	537	582	489
	R	1,000	1,000	1,000	558	592	523
	U	1,000	1,000	1,000	349	494	187
Indore Division	T	1,000	1,000	1,000	499	573	419
	R	1,000	1,000	1,000	554	598	509
	U	1,000	1,000	1,000	322	497	123

From the above it follows that the district has returned greater number of workers both in males and females in rural and urban areas. The number of females returned as workers is also fairly high. Areas with tribal population have been known to return greater number of workers.

The Pattern of Work.

The district has returned 288,798 persons, 157, 175 males and 131, 623 females or 56.1% of the population as workers. The details of work is indicated below :

S. No.	Category	Description of the category of workers	Total workers persons	Percentage to total workers	Rank
1	2	3	4	5	6
1	I	As cultivators	255,292	88.40	1
2	II	As Agricultural labourers	7,561	2.62	3
3	III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities	6,082	2.10	4
4	IV	At Household Industries	5,280	1.83	5
5	V	Manufacturing other than Household Industry	984	0.34	7
6	VI	In Construction	773	0.27	9
7	VII	In Trade and Commerce	3,808	1.32	6
8	VIII	In Transport, Storage and Communications	869	0.30	8
9	IX	In Other Services	8,149	2.82	2
		Total Workers	288,798	100.00	

From the above cultivation appears to be the main prop of the economy and along with agricultural labourers account for 91.02% of the workers. There are no industries and there is very little scope for trade and commerce. The table below gives distribution by working categories of each tahsils.

Distribution of 100 persons by working categories of each tahsil.

District/Tahsil	Total Workers	WORKERS IN I	II	III	IV	V	VI	VII	VIII	IX	To total population Total Workers	Non-Workers
1	2	3	4	5	6	7	8	9	10	11	12	13
Jhabua District	100	88.40	2.62	2.10	1.83	0.34	0.27	1.32	0.30	2.82	56.14	43.86
1 Thandla Tahsil	100	90.19	1.14	1.83	1.81	0.34	0.43	1.14	0.83	2.29	56.67	43.33
2 Petlawad ,,	100	87.28	3.03	1.65	2.73	0.39	0.20	1.67	0.45	2.60	55.22	44.78
3 Jhabua ,,	100	91.06	1.78	0.32	1.84	0.32	0.30	1.28	0.16	2.94	56.86	43.14
4 Jobat ,,	100	87.74	3.22	3.86	1.52	0.22	0.10	1.02	0.10	2.22	56.64	43.36
5 Alirajpur ,,	100	85.48	3.85	3.01	1.60	0.43	0.28	1.54	0.15	3.66	55.17	44.83

Jhabua tahsil returns the highest number of workers although the position is more or less same in the other tahsils too.

Cultivation

The net area sown in the district has shown a steady rise in the deade. In 1960-61; the net area sown was 673,063 acres or 1,051.66 Sq. miles, the highest during the decade This represents 40.09 % of the surface. The area sown more than once has also shown an increase during the decade. The table below gives the percentage increase in the area sown.

Year	Net area sown	Variation	Percentage Variation
1	2	3	4
1951-52	461,328		
1960-61	673,063	+ 211,735	+ 45.9

Table showing increase in area sown more than once:

Year	Area sown more than once	Increase in acres	Percentage Variation
1	2	3	4
1951-52	4,108		
1960-61	62,800	+ 58,692	+1,428.7

Thus in the net area sown and area sown more than once there have been very substantial increase during the decade.

Crops :

Of the total net area sown 9.33% is being sown more than once, 84,83% went under food grains, 15.42% under oil seeds and another 23.88 under non-food crops. The main food grains sown are maize, jowar, rice, bajra, wheat, gram and tur. Ground nut is the main non-food crop. The table below gives the pattern of cultivation.

Percentage of area under different Crops to Net area sown

District/Tahsil	Net area sown	Rice	Jowar	Bazra	Maize	Wheat	Barley
1	2	3	4	5	6	7	8
Jhabua District	100.00	11.17	6.46	2.75	26.18	1.20	0.11
Jhabua Tahsil	100.00	13.22	3.81	Neg.	38.30	1.74	0.27
Thandla Tahsil	100.00	16.53	0.94	...	42.07	1.81	0.17
Petlawad Tahsil	100.00	18.46	2.29	...	15.99	2.95	0.13
Jobat Tahsil	100.00	8.94	8.88	2.50	25.95	0.50	0.04
Alirajpur Tahsil	100.00	5.65	10.97	7.50	14.63	0.25	Neg.

Percentage of area under different Crops to Net area sown–contd.

District/Tahsil	Net area sown	Other cereals and millets	Total cereals and millets	Gram	Tur	Other pulses	Total pulses	Total food grains
1	2	9	10	11	12	13	14	15
Jhabua District	100.00	12.85	60.72	8.31	1.74	14.05	24.10	84.83
Jhabua Tahsil	100.00	6.97	64.31	10.25	3.18	5.48	18.90	83.21
Thandla Tahsil	100.00	1.87	63.40	7.80	1.45	2.61	11.86	75.25
Petlawad Tahsil	100.00	2.40	42.22	12.30	0.47	10.19	22.96	65.18
Jobat Tahsil	100.00	17.67	64.48	8.18	2.14	22.05	32.36	96.85
Alirajpur Tahsil	100.00	23.25	62.25	5.39	1.05	21.31	27.75	90.00

Percentage of area under different Crops to Net area sown–concld.

District/Tahsil	Net area sown	Total food crops	Ground nut	Castor	Til	Total oil seeds	Total non-food crops	Area sown more than once
1	2	16	17	18	19	20	21	22
Jhabua District	100.00	85.45	13.37	0.90	1.06	15.42	23.88	9.33
Jhabua Tahsil	100.00	83.73	18.32	2.35	0.62	21.43	28.40	12.13
Thandla Tahsil	100.00	76.35	9.55	0.49	1.65	11.86	33.36	9.71
Petlawad Tahsil	100.00	66.92	13.99	0.39	1.98	16.56	43.92	10.84
Jobat Tahsil	100.00	97.09	9.43	0.92	1.13	11.48	12.13	9.21
Alirajpur Tahsil	100.00	90.30	14.04	0.21	0.67	14.92	16.15	6.45

From the above it follows that *kharif* (sown in rains and cut in winter) crops are the main crops followed by *rabi* (sown in winter but cut in spring.

Among the tahsils, in Petlawad the area under non-food crops is the highest whereas in Jobat the acreage under food crops is very high.

THE FOOD CROPS :

Maize :

In 1960–61, maize was sown in 176,202 acres which represents the highest acreage in the decade. It is entirely unirrigated and is the staple food of the population. It is a sturdy crop, and can be grown in light soil with little rainfall.

Jowar :

It was grown in 1960–61 in 43,481 acres. There has been a steady increase in the area and the 1960–61 figure is the highest in the decade.

Rice :

In 1960–61 the acreage under rice was 75,197 acres which also is the highest in the decade. The area has steadily been going up. It is entirely unirrigated and of coarse variety.

Bajra :

The area under bajra has shown a steady increase in the decade. It was sown in 16,594 acres in 1951–52 and touched its peak the figure 27,653 in 1955–56. It continued to vary and in 1960–61 it was sown in 18,533 acres. It is unirrigated. It is sown mostly in Alirajpur and Jobat tahsils.

Wheat :

The acreage under wheat was only 1,976 in 1951–52. Since then there has been a steady increase. In 1959–60 the figure rose to 17,312, in 1960–61 it again came down to 8,053 acres, out of which 3,212 acres were irrigated. During the

decade the irrigated area has shown some increase. Wheat is sown in areas of rich black soil of which there are some patches. In Alirajpur and Jobat tahsils where the soil is of poor quality the area under wheat is very little.

PULSES :

Gram

The area under gram has been somewhat erratic. It was 7,594 acres in 1951–52 touched an all time high of 109,835 acres in 1959–60 again falling to 55,945 acres in 1960–61. In Petlawad and Jhabua tahsils the acreage under gram is comparatively higher than in other tahsils. It is mostly of the unirrigated type and only 1,011 acres are irrigated.

Tur :

The variation for tur has not been great. It has varied from 13,193 in 1959–60 to 10,360 acres in 1952–53.

OIL SEEDS :

Ground Nuts :

The area under ground nut has shown a steady rise from 51,898 acres in 1951–52 to 89,896 acres in 1960–61 after touching 103,766 acres in 1959–60. It has proved to be an excellent cash crop, hence the increase in the acreage. Since there is plenty of demand of groundnut in Gujarat which is near, the acreage shows an increasing tendency. In Jhabua, Petlawad and Alirajpur tahsils the acreage under the crops appears higher than in other tahsils

Castor :

The acreage under castor has been showing a steady increase from 228 acres in 1951–52 to 6,072 acres in 1960–61.

Til :

The area has steadily been declining. It appears that because groundnut is getting more popular, there is a corresponding fall in til.

FIBRES :

Cotton :

The area under cotton has been steadily increasing from 31,681 acres in 1951–52 to 53,138 acres in 1960–61. The increase has been steady and much of the cotton is used up in the ginning presses.

Irrigation :

The facilities for irrigation are very meagre. Only 6,859 acres or 1.02% are irrigated. The increase in irrigation is as follows :

Year	Area irrigated (in acres)	Increase	Percentage variation
1	2	3	4
1951–52	3,756		
1960–61	6,859	+ 3,103	+ 82.61

Although the figure 82.61% appears impressive yet the area irrigated is very little. The sources* of irrigation are mostly private wells and tanks. The details are :

Total area irrigated	Wells	Tanks	All other sources
1	2	3	4
6,859	6,439	54	366

Cultivation Generally

There are twelve N.E.S. Blocks in the district. Efforts are being made to distribute chemical fertilisers and for bringing more area under irrigation. In 1961 about 125 tons of chemical fertilisers were distributed. Cultivators are also being encouraged to take taccavi loans for irrigation, wells and pumps and persian wheels. The improvement of agricultural methods is perhaps the biggest single task that confronts the development authorities.

Workers as Agricultural Labourers.

There are 7,561 persons, 4,251 males and 3,310 females or 2.62% of the workers, who are engaged as agricultural labourers. These are mostly the casual labourers, who work during the cropping season and remain idle, left to themselves for the remaining part of the year. Most of them work as general unskilled labourers wherever they can find some work. The wages are paid to the labourers in cash and kind. Male reapers and harvesters were getting Rs. 1.25 in 1958. This figure has gone up lately and they are reported to be getting upto Rs. 1.50 per day. The number of hours of work expected of them is nine to ten. Ploughman also

*Source : Director of Land Records, Madhya Pradesh.

get the same wages. When payment is made in kind, the earnings in terms of money come to about Rs. 1.00 depending upon the selling price of the crop.

There are very few labourers, who are employed on a permanent basis. Only cultivators with big holdings i.e. over 20 acres can afford to engage them. They are paid partly in cash and given food and shelter. The cash emoluments come to about Rs. 200-250 a year. There is no dearth of labourers, who are reported to be available in good number. In fact labourers from the district often go to Gujarat for the cutting of crops.

Workers in Mining, Quarrying etc.

In this category there are 6,082 persons, 4,098 males and 1,984 females constituting 2.10% of the total workers. They are mostly working in the following categories. (only categories returning 100 persons or over considered.)

Code No:	Brief description of the category	Number of Workers			Percentage to total workers of the category	Rank
		Persons	Males	Females		
(1)	(2)	(3)	(4)	(5)	(6)	(7)
020	Planting and replanting and conservation of forests.	267	267	...	4.39	2
024	Production of fodder by explortation of forests.	197	55	142	3·24	3
025	Production of gum, resins, lac, heels barks, wild fruits and leaves in forests.	175	174	1	2.88	4
040	Production and rearing of livestocks (large heads only mainly for milk & animal power such as cow, buffalo.	4,990	3,270	1,720	82.05	1
103	Mining of manganese.	137	97	40	2.25	5

The bulk of the workers are engaged in rearing livestock for milk and animal power. Workers in forests come next. The other categories 024 and 025 are those that they may be expected in a district with some forests. It is interesting to note that in manganese mines, there are 137 workers. These are located in Kajlidungri.

Workers at the Household Industry.

These are 5,280 persons, 3,469 males and 1,811 females constituting 1.83% of the total workers. The main household industries are (only industries with 200 or more workers have been considered.)

Code No.	Brief description of Industry	No. of Workers			Percentage to total workers of the category	Rank
		Persons	Males	Females		
1	2	3	4	5	6	7
207	Production of edible fats and oils (other than hydrogeneted oil).	316	185	131	6.0	6
273	Making of textile garments including rain coats and headgear.	423	343	80	8.0	4
288	Manufacture of materials from cork, bamboos, cane, leaves and other allied products.	799	390	409	15.1	2
310	Currying, tanning and finishing of hides and skins.	304	167	137	5.8	7

1	2	3	4	5	6	7
311	Manufacture of shoes and other leather footwear.	458	386	72	8.7	3
350	Manufacture of earthenware and earthen pottery.	1,074	602	472	20.3	1
369	Manufacture of sundry hardwares.	340	287	53	6.4	5
393	Manufacture of jewellery, silverware etc.	261	246	15	4.9	8

Pottery making (earthen vessels) is the main household industry followed, by making of bamboo products. The workers in leather constitute 14.5% of the workers in the household industry. These are mostly the chamars, the traditional workers in leather. The other industries are of the conventional types that may be found in a backward district. There are, however, 261 persons who have been returned as engaged in manufacture of gold and silver works using precious metals. From the above it is also obvious that the district has no distinctive household industries.

Workers in Manufacturing other than Household Industry.

There are only 984 persons 853 males 131 females constituting 0.34% of the total workers in this category in which mostly the males work. There are no major industries in the district as is obviously apparent from the very few workers of the category. The following, however, are the main industries with number of workers also indicated (only industries with 75 workers and above considered).

Code No.	Brief description of Industry	No. of Workers			Percentage to total workers of the category	Rank
		Persons	Males	Females		
1	2	3	4	5	6	7
200	Production of rice, atta, flour etc. by milling dehusking and processing of food grains.	87	81	6	8.8	4
209	Production of food products such as sweatmeats etc.	91	76	15	9.2	3
273	Making of textile garments etc.	95	81	14	9.7	2
399	Manufacture and repair of goods not assigned to any other group.	149	141	8	15.5	1

From the above it is obvious that there are no major industries in the district. In the code 399, are included workers of lac bangles, beads from conch shells and horn goods, and workers of garlands from flowers. The tribal women wear lac bangles and are fond of it. So in this category are included these bangle workers. There are no other industries

Workers in Construction:

There are only 773 persons, 735 males, 38 females constituting 0.27% of the total workers in this category; in which male workers completely outnumber the females. The main categories of workers are (only categories with 75 workers or more considered).

Code No.	Brief description of the Industry	No. of Workers			Percentage to total workers of the category	Rank
		Persons	Males	Females		
1	2	3	4	5	6	7
400	Construction and maintenance of buildings including erection, decorative constructions, electrical & sanitary installation.	387	360	27	50.1	1
401	Construction and maintenance of roads railways, bridges, tunnels.	355	344	11	45.9	2

Workers are mostly those that work in the P. W. D. maintaining and constructing roads and bridges and some with railways. The other category includes workers engaged both in the governmental construction activity and by private parties.

Workers in Trade and Commerce.

There are 3808 persons, 3528 males, 280 females or 1.32% of the total workers. The district apparently offers very little scope for trade and commerce and hence there are so few persons in this profession. The main trades and callings are (only trades with 200 persons and above considered).

Code No.	Brief description of the trade	No. of Workers			Percentage to Total workers of the category	Rank
		Persons	Males	Females		
1	2	3	4	5	6	7
600	Wholesale trading in cereals and pulses.	316	314	2	8.3	3
640	Retail trade in cereals, pulses, Vegetables, fruits, spices, oils, etc., etc.	1,973	1,774	199	51.8	1
648	Retail trade in straw and fodder.	197	186	11	5.2	5
650	Retail trading in fibres, yarns.	321	321	—	8.4	2
689	Retail trade in goods unspecified.	238	218	20	6.2	4

This is more or less the conventional pattern of trade and commerce. Much of the trade is spread out in urban areas. The table below gives the urban percentage of the trades.

Code No.	Total persons	Persons in urban areas	Percentage to total Urban workers of the category
600	316	220	11.2
640	1,973	1,011	51.2
648	197	7	0.4
650	321	216	11.0
689	238	104	5.3

Workers in Transport, Storage and Communications.

There are 869 persons, 867 males and 2 females in this category and they constitute 0.30% of the working force. The main categories of workers are (only categories of 80 workers or more considered).

Code No.	Brief description of the industry	No. of workers			Percentage to total workers of the category	Rank.
		Persons	Males	Females		
1	2	3	4	5	6	7
700	Transport by railways.	371	371	—	42.7	1
701	Transport by bus services.	130	130	—	15.0	3
702	Transporting by motor vehicles.	192	192	—	22.1	2
703	Transporting by other means.	80	80	—	9.2	4

The railway line passes through the district towards the western portion. Meghnagar station is the alighting station for the district. Workers in the railway relate to the above. Apart from the railway bus transport is the only means of communications.

Other Services.

There are 8,149 persons, 6,348 males, 1801 females or 2.82% of the total workers in this category. The main categories of workers are (only 750 and above workers considered).

Code No.	Brief description of the industry	No. of Workers			Percentage to total workers of the category	Rank
		Persons	Males	Females		
1	2	3	4	5	6	7
809	Public Services in administrative departments and offices of State Governments.	1,073	1,056	17	13.2	3
811	Educational services such as those rendered by colleges (non-technical types)	1,167	1,039	128	14.3	2
890	Services rendered by organisations or individuals not classified elsewhere.	789	518	271	9.7	4
900	Activities not adequately specified.	1,937	1,101	836	23.8	1

This category is the second to cultivation. The increase in public service is due mostly to the expension of the government activities with particular reference to the two Five Year Plans. It might be useful to compare the 1951 and 1961 figures with reference to the following categories.

S. No.	Category of service rendered	Workers in 1951			Workers in 1961			Percentage of variations
		Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9
1	Educational services	206	183	23	1,209	1,079	130	+ 1003 + (486.89%)
2	Medical Health Services	848	406	442	640	471	169	- 208 - (24.53%)
3	Police Deptt.	441	440	1	676	674	2	+ 235 + (53.29%)

In 1951 there were 206 nurses 194 males, 12 females and 172 midwives as against this there are 77 nurses 16 males, 61 females and 43 nursing attendants and 49 midwives and health visitors in 1961 which show a reduction. It is difficult to account for this reduction since there has been considerable expansion of medical facilities.

The Non-workers.

There are 2,25,586 persons, 1,05,520 males and 1,20,066 females or 43.86% of the total population which has been returned as non-workers. The break-up of non-workers is as follows :

Persons not at work classified by sex broad age-groups and type of activity.

District	Age-group	Total non-working population			Full time students		
		Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8
Jhabua District	All ages	225,586	105,520	120,066	13,222	10,123	3,099
	0—14	198,094	100,447	97,647	11,711	8,733	2,978
	15—34	12,922	2,483	10,439	1,511	1,390	121
	35—59	7,378	860	6,518	—	—	—
	60 +	6,892	1,567	5,325	—	—	—
	Age not stated	300	163	137	—	—	—
Percentage to all ages		100.00			5.86		

Households duties			Dependents infants and disabled			Retired rentier or independent means		
Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
9	10	11	12	13	14	15	16	17

1,464	91	1,373	184,867	91,597	93,270	—	—	—
9,209	92	9,117	1,870	753	1,117	9	8	1
4,781	59	4,722	2,268	568	1,700	95	65	30
1,689	9	1,680	4,986	1,399	3,587	144	112	32
4	—	4	296	163	133	—	—	—
7.60			86.13			0.11		

Beggars vegrants etc.			Inmates of penal mental and charitable institutions.			Persons seeking employment for the first time			Persons employed before but now out of employment and seeking work		
Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
18	19	20	21	22	23	24	25	26	27	28	29
482	293	189	44	41	3	73	68	5	83	79	4
42	18	24	1	—	1	3	3	—	6	5	1
186	108	78	34	33	1	47	45	2	56	54	2
187	126	61	9	8	1	21	18	3	17	16	1
67	41	26	—	—	—	2	2	—	4	4	—
0.21			0.02			0.03			0.04		

Dependents and disabled form a bulk of non-workers. In the younger age-group 0–14, they are most numerous. In the 60 + age-group, the number of females is fairly great. This is followed by persons engaged in household duties, which keeps 16,896 females busy. Full time students form 5.86% of the total and as many as 1,511 have been returned in 15–34 age-group. Presumably they belong to the younger group in this classification. Beggars and vagrants constitute 0.21% followed by the retired and the rentiers types.

V
COMMUNICATIONS

The Railways

The Western Railway main-line Delhi-Bombay passes through the western portion of the district touching Meghnagar, where except the Frontier Mail and De–Luxe Express other trains stop. This is the only point of contact with the railways. Bamnia is also a railway station but a passenger stop only. Thus from communications point of view the position is unenviable.

The Roads

There are 173 miles of class I roads in the district. The road from Dhar to Jhabua is the main artery of communication, for it leads to Baroda, Ahmedabad on one side and to Indore, Ujjain, Bhopal on the other. This road is an all weather road, though in heavy rains the traffic is held up for sometime. The road carried heavy inter-state traffic throughout the year. The passenger buses plying on this road connect Jhabua to Indore, Ahmedabad, Baroda, Bhopal, Ujjain and Dhar. The other important class I roads are :—

Name of the Road	Boundaries of State through which it passes	Length in Miles
Jhabua-Kushalgarh	M. P., Rajasthan	29.0
Jhabua-Jobat	M. P.	28.4
Bagh-Jobat-Ambua	M. P.	19.0
Alirajpur-Dohad	M. P., Gujarat	29.4
Bamnia-Petlawad	M. P.	11.5
Kathiwara-Khera	M. P.	55.0
Alirajpur-Chadpur	M. P.	10.0
Alirajpur-Kukshi	M. P.	14.1
Jhabua-Annas Pipal	M. P.	10.2

Apart from these there are five Fair weather class II murrum roads; the total mileage being 67 miles and 3 furlongs. These roads are useful in the dry season for they open the interior. Thus roads are the main lines of communications.

The Post, Telegraphs and Phone Facilities

Telephone facilities exist at Jhabua, Meghnagar, Alirajpur where there is a Public Call Office. Telegraph facilities however are available in Jhabua, Jobat, Alirajpur, Petlawad, Thandla Meghnagar and Bamnia.

There are seven sub-post offices and 40 branch offices in the district. Apart from these there are no modes of any communications.

The Summing Up

The district occupies 1.54% of the surface of the State and returns 1.59% of its population. In view of this, the density of population is 196 persons to a sq. mile, a figure slightly greater than 190 the State figure. In matter of growth in the last sixty years, the district is first in the State. It has yet another first to its credit; having returned 84.7% of population as Scheduled Tribes. It occupies the last place in matter of literacy having returned 60 literates per 1000 persons. Thus with two firsts and one first from the other end, the district holds a somewhat unique position.

It ranks thirty-fourth in population and thirty-first in area, when compared to Bilaspur (2,021,793) highest in population and Bastar 15,128 sq. miles biggest in area, the district is a little less than one-fourth of Bilaspur in population and a little more than one fifth of Bastar in area. When compared to Datia the smallest in population and area it is more than two and half times in population and more than thrice times its size.

Socially backward and economically poor, the district because of its many sided problems, is extremely interesting. It is located in almost an entirely rural setting; there being only 69 persons per 1,000 persons living in urban areas. The soil erosion along with the felling of forests poses a threat to cultivation : the quality of soil being poor hardly comforts. The entire economy depends upon cultivation and cultivation is further totally dependent on the vagaries of rains. Whenever the rains fail, the district reaches the verge of a disaster. So precarious is the living. The Scheduled Tribes seem to be taking their time in adiusting to newer conditions. The forests are no longer capable of supplying their demands for one there has been indiscriminate killing of wild life thus depriving them of valuable food and secondly the cutting and clearing of forests have caused the wild life to flee and this also scares away the rainbearing clouds-the life giving force to the earth. Perhaps these factors add to the already difficult conditions.

Efforts are being made to allay some of these conditions; it will, however, be sometime before results become noticeable. The twelve NES Blocks covering the district are making headway; their efforts are mainly diverted towards improving the agricultural methods and production. The need for constructing minor and medium-sized irrigation projects cannot be over emphasied. There are hardly any industries at present nor does there seem much of such potential. Manganese mines however, underline potential mineral growth.

With a view to give greater attention to the developing needs of the district, the Government has during the decade established district offices of practically all departments. In pursuance of the above the offices of Civil Surgeon, Executive Engineer, Irrigation, were brought here. The Tribal Welfare Department also has undertaken various developmental works and the same are in progress.

In the district itself the decade rate of growth has been of a high order being 34.42% second only to Sehore 44.82% the district where the capital of the State and a heavy industry *viz.* Heavy Electricals Ltd. grew up. The high rate of growth suggests high fertility rate for the population in about 30 years time may double itself at this rate. Jhabua has never lost in population over the sixty years. Although there are six towns-in the district, but they are not much of urban centres and many of them appear more like overgrown villages. The villages are generally small having a population of less than 500 persons. There has been a decline in the number of depopulated villages and pressure per occupied house has increased although only slightly. This is probably due to the fact that Bhils prefer to build their houses and live separately, there has been a considerable increase (+30.51%) in the number of occupied houses.

During the decade more females than males were born. The maintenance of Vital Statistics is far from satisfactory. There has been some

progress in literacy although the percentage of literates continues to be very low. Hindus form the bulk of population. Christians show substantial increase Bhili, Bhilali and Hindi are the main languages in that order. Monsoons have often been known to fail and this causes a virtual collapse of economy. The tribals seem in a state of transition and with a lot of deforestation find food difficult to obtain. This leads to a socio-economic maladjustment. Crimes statistics shoot up; although the criminal propensities of these tribes were acknowledged in the past too, but with a society in ferment, these assume serious proportion as is the case in Alirajpur sub-division where for too many murders are committed. Thus with all this the district poses problems and offers interesting possibilities.

Some important places in the district

Alirajpur (Pop. 10,161).

The town is over 150 years old, having been founded in 1800 A.D. and was a princely State upto 28th May 1948, before its merger into the district. It is the biggest town of the district and a sub-divisional headquarter lying 51 miles south of Jhabua and connected by a direct road. Apart from the NES Blocks, Telegraph and Postal facilities are also available. (please also see p. xxxvii)

Bamnia (Pop. 1,752).

A village in Petlawad tahsil. A primary School, dispensary, Co-operative Society and Post and Telegraph office are located here. It is on the main railway line (Western Railway, Delhi-Bombay Central Section) but only a passenger stop.

Bhabara (Pop. 1,706).

A village in Jobat tahsil lying north west of Jobat near the road to Gohad. The famous freedom fighter, Chandra Shekhar Azad was said to have been born here. A small dispensary, Post office, a Co-operative Society and a Middle School is located here.

Jhabua (Pop. (6,315).

Jhabua is a small town, once it was the capital of the State. The town has shown some growth during the decade. It is reached from Meghnagar a rail head on Western Railway, 11 miles north-west of Jhabua. (Please also see p. xxxvii). Five miles east of the town lies Deojhari where there is a kund and temple.

Jhaknawada (Pop. 1,480).

A small village in Petlawad tahsil. Once a Jagir village, it shot into some prominence when the local Thakur refused to hand over administration on the formation of Madhya Bharat and precipitated a difficult situation. The Chief however ultimately yielded to persuasion. Two miles away near Mahi river is located an old Shiv temple which is said to be the abode of Shringesh rishi.

Jobat (Pop. 4,040).

Once a small princely state, the town is now the tahsil headquarters lying 29 miles south of Jhabua. There is a Tribal Block at Jobat, along with dispensaries schools and other administrative offices of tahsil level. (Please also see p. xxxvii)

Kathiwara (Pop. 562).

Kathiwara was a small estate, now in Alirajpur tahsil: It is a somewhat picturesquely situated village and bamboos have been grown in some patches (Please also see p. xxxvii)

Mathwar (Pop. 739).

Like Kathiwara, Mathwar also was a small principality now in Alirajpur tahsil.
(Please also see p. xxxvii):

Meghnagar (Pop. 2,447).

A village about 11 miles north of Jhabua, it is a rail head on the western Railway-Bombay Central-Delhi section. There is a dispensary and Post and Telegraphs facilities are also available.

Petlawad (Pop. 4,820).

Formerly it was a tahsil headquarters of Holkar State (Indore). It continued as a tahsil headquarters, where local offices are located. It lies 38 miles north-east of Jhabua. It is a municipal town situated on Ladki river.

Rama (Pop. 283).

A village 11 miles east of Jhabua on Jhabua-Sardarpur road. A Block has been located here.

Thandla (Pop. 5,071).

A tahsil headquarters town 21 miles west of Jhabua. There is a Municipality and tahsil level offices are located here. In 1717 Anup Singh the ruler of Jhabua was killed at Thandla. His widow stayed under the protection of the Mahant of Shivgarh, a place about 3 miles south-east of Thandla and a son was born to her. He was named Shiv Singh and become the sixth ruler of Jhabua.

Note : 1 Under Columns 3 (a) and 3(b), (a) represents the area figures furnished by the Surveyor General of India; (b)represents the area figures furnished by the State Survey Department. The area figures of tahsils, total and rural are based on the figures of the State Survey Department.

2 The urban area figures are collected by the Census Organisation.

3 Population per square mile has been calculated on area figures furnished by the State Survey Office.

4 Towns treated as such for the first time in 1961 Census are printed in Italics

5 (M) Stands for Municipality, and (G.P.) Stands for Gram Panchayat.

APPENDIX—I

Statement showing 1951 territorial units constituting the present set up (only those names/areas which have undergone changes since 1951 have been shown below)

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note:—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups, showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc, as in the case of villages.

The following examples will make the above note clear :—

Jhabua District Total 200 (90) signifies that there are 90 establishments in Jhabua District pertaining to minor group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains." Thandla Tahsil Total 206 (15) signifies that there are 15 establishments in Thandla Tahsil pertaining to minor group 206, which stands for "Production of butter, ghee, cheese and other dairy products. Village 8 Parwada 311 (1) signifies that in village Parwada which has 8 as its location code number there is one establishment pertaining to minor group 311, which stands for "Manufacture of shoes and other leather footwear." Thandla Town, ward No. 1 207 (7) signifies that there are 7 establishments located in Ward No. 1 at Thandla Town Pertaining to minor group 207, which stands for "Production of edible fats and oils (other than hydrogenated oil)."

THANDLA DISTRICT

APPENDIX VIII

TOWNS AND VILLAGES HAVING PUBLIC LATRINES

1 THANDLA TAHSIL

Urban

Location code number and name of town :—

II THANDLA

Ward No. 1 Ward No. 5.

Rural

NIL

2 PETLAWAD TAHSIL

Urban

Location code number and name of town :—

I PETLAWAD

Ward No. 1, Ward No. 2 and Ward No. 4.

Rural

Location code number and name of village :—

149 Raipuria.

3 JHABUA TAHSIL

Urban

Location code number and name of town :—

III JHABUA

Ward No. 3.

VI RANAPUR

3 JHABUA TAHSIL—*Concld.*

Rural

Location code number and name of village :—

245 Khardu Badi, **265** Samoi, **272** Para.

4 JOBAT TAHSIL

Urban

NIL

Rural

NIL

5 ALIRAJPUR TAHSIL

Urban

Location code number and name of town :—

V ALIRAJPUR

Ward No. 1, Ward No. 3.

Rural

Location code number and name of village :—

78 Ambua (Bor Jhad), **99** Chandpur, **129** Bor Khad, **233** Umarali.

APPENDIX IX

TOWNS AND VILLAGES HAVING DRAINS

1 THANDLA TAHSIL

Urban

NIL

Rural

ocation code number and name of village :—

216 Meghnagar.

2 PETLAWAD TAHSIL

Urban

ocation code number and name of town :—

I PETLAWAD

Ward No. 1, Ward No. 2, Ward No. 3 and Ward No. 4.

Rural

NIL

3 JHABUA TAHSIL

Urban

Location code number and name of town :—

III JHABUA

Ward No. 1, Ward No. 2, Ward No. 3 and Ward No 4.

3 JHABUA TAHSIL—*Concld.*

Rural

NIL

4 JOBAT TAHSIL

Urban

Location code number and name of town :—

IV JOBAT

Ward No. 1, Ward No. 2, Ward No. 3 and Ward No. 4.

Rural

Location code number and name of village :—

193 Badi Khattali.

5 ALIRAJPUR TAHSIL

Urban

Location code number and name of town :—

V ALIRAJPUR

Ward No. 1, Ward No. 2, Ward No. 3, Ward No. 4, and Ward No. 6.

Rural

Location code number and name of village :—

78 Ambua (Bor Jhad).

APPENDIX X

TOWNS AND VILLAGES IN WHICH WEEKLY OR FORTNIGHTLY MARKETS ARE HELD TOGETHER WITH THE DAY ON WHICH IT IS HELD

1 THANDLA TAHSIL

Urban

Location code number and name of town :—

II THANDLA

Ward No. 3 (Tuesday).

Rural

Location code number and name of village :—

100 Parwaliya (Monday), **133** Madrani (Wednesday), **193** Rambhapur (Monday), **216** Meghnagar (Saturday).

2 PETLAWAD TAHSIL

Urban

Location code number and name of town :—

I PETLAWAD

Ward No. 3 (Monday)

Rural

Location code number and name of village :—

1 Ghooghari (Thursday), **17** Karwad (Wednesday), **38** Bamniamandi (Saturday), **52** Sarngi (Thursday), **77** Bodayta (Wednesday), **144** Jamli (Tuesday), **149** Raipuria (Sunday), **189** Bekalda (Friday), **194** Mohankot (Monday), **232** Jhaknwda (Saturday).

3 JHABUA TAHSIL

Urban

Location code number and name of town :—

III JHABUA

Ward No. 1 (Sunday).

VI RANAPUR

(Saturday)

3 JHABUA TAHSIL—*Concld.*

Rnral

Location code number and name of village:—

28 Kalyan Pura (Wednesday), **108** Pitol-Kalan (Tuesday), **127** Rama (Friday), **208** Dhekal-Badi (Wednesday), **245** Khardu Badi (Tuesday), **265** Samoi (Friday), **272** Para (Thursday), **321** Andharwad (Tuesday).

4 JOBAT TAHSIL

Urban

Location code number and name of town :—

IV JOBAT

Ward No. 1 (Thursday).

Rural

Location code numberand name of village :—

3 Barzar (Wednesday), **63** Bhabara (Monday), **72** Udayagad Friday), **100** Bori (Wednesday) **154** Baledi (Saturday), **193** Badi Khattali (Wednesday), **202** Kadwal (Friday).

5 ALIRAJPUR TAHSIL

Urban

Location code number and name of town :—

V ALIRAJPUR

Ward No. 1 (Monday).

Rural

Location code number and name cf village :—

28 Kattiwada Khas (Friday), **64** Am Khunt (Tuesday), **78** Ambua (Borchad) (Tuesday), **99** Chandpur (Wednesday), **166** Sorwa (Sunday), **171** Nanpur (Saturday), **190** Ajanda (Sunday), **233** Umarali (Saturday), **261** Walpur (Friday), **268** Chhak Tala (Sunday), **271** Madhu Palwi (Sunday). **272** Mundala (Sunday), **300** Bakhat Garh (Tuesday).

PART II

OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies (the agency or source is indicated below each Table or Statement) and from official publications. These are presented under the following heads :—

1 Rainfall and Temperature

2 Economic Statistics :—

- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics :—

- (a) Health and Medical
- (b) Vital Statistics

7 Communications

8 Miscellaneous
