PREFACE

1. INTRODUCING THE DISTRICT ..... 1—16

2. INTRODUCING THE STATISTICS ..... 17—20

3. THE VILLAGE DIRECTORY ..... 21—59

4. A—GENERAL POPULATION TABLES

A—I & Appendices — Area, Houses and Population.....61—63
A—II — Variation in Population during sixty years.....64
A—III — Villages classified by population.....65—66
A—IV — Towns (and Town-groups) classified by population in 1961 with variation since 1901.....67

5. B—GENERAL ECONOMIC TABLES

B—I — Workers and Non-workers classified by sex and broad age-groups.....68—70
B—III Pt. A — Industrial Classification of Workers and Non-workers by educational levels in urban areas only.....72—73
B—III Pt. B — Industrial Classification of Workers and Non-workers by educational levels in rural areas only.....74—75
B—IV Pt. A — Industrial Classification by sex and class of worker of persons at work at Household Industry.....85—87
B—IV Pt. B — Industrial Classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.....88—91
B—IV Pt. C & Appendix — Industrial Classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.....92—95
B—V & Appendix — Occupational Classification by sex of persons at work other than cultivation.....96—113
B—VI — Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in urban areas only.....114—118
B—VII Pt. A — Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer.....120—123
B—VII Pt. B — Industrial Classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in Household Industry.....124—125
B—VIII Pt. A — Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in urban areas only.....127—128
B—VIII Pt. B — Persons unemployed aged 15 and above by sex and educational levels in rural areas only.....129
B—IX — Persons not at work classified by sex, broad age-groups and type of activity.....130—137

6. C—SOCIAL AND CULTURAL TABLES

C—II — Age and Marital Status.....138—143
C—III Pt. A — Age, Sex and Education in all areas.....145
C—III Pt. B — Age, Sex and Education in urban areas only.....146
C—V — Mother tongue (alphabetical order).....147—151
C—VII & Supplement — Religion .....152—154
C—VIII Pt. A — Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes.....156
C—VIII Pt. B — Classification by literacy and industrial category of Workers and Non-workers among Scheduled Tribes.....157

7. SCT—TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

SCT—I Pt. A — Industrial Classification of persons at work and non-workers by sex for Scheduled Castes 159
SCT—I Pt. B & Appendix — Industrial Classification of persons at work and non-workers by sex for Scheduled Tribes....160—168
SCT—II Pt. A — Age and Marital Status for Scheduled Castes....170—171
SCT—II Pt. B — Age and Marital Status for Scheduled Tribes....172—180
SCT—III Pt.A(i) — Education in urban areas only for Scheduled Castes....182
SCT—III Pt.A(ii) — Education in urban areas only for Scheduled Tribes....183
SCT—III Pt.B(ii) — Education in rural areas only for Scheduled Tribes....184
SCT—IV Pt.A — Religion for Scheduled Castes....185
SCT—IV Pt. B — Religion for Scheduled Tribes....186—188
SC—I — — Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes ....189—190
ST—I — — Mother tongue and Bilingualism for Scheduled Tribes....191—197
ST—II — — Persons not at work classified by sex and type of activity for Scheduled Tribes....198—200

8. INTRODUCING THE OFFICIAL STATISTICS....201—204

9. TABLES ON OFFICIAL STATISTICS

1. RAINFALL AND TEMPERATURE

1.1 Monthly Total Rainfall at important centres in the district from 1951 to 1960....205—206
1.2 Average Annual Rainfall at important centres in the district....207
1.3 Maximum and Minimum Temperatures by station and by month in the district from 1951 to 1960....208—209

2. VITAL STATISTICS

2.1 Number of births and deaths as reported in the district from 1951 to 1960....210
2.2 Deaths from some selected causes in the district from 1951 to 1960....211

3. LAND UTILISATION AND AGRICULTURE

3.1 Land Utilisation Statistics in the district for the decades 1901 to 1961....212
3.2 Area under principal crops in the district for the decades 1901 to 1961....213
3.3 Gross area irrigated under different crops in the district for the decades 1901 to 1961....214
3.4 Sources of irrigation in the district for the decades 1901 to 1961....215
3.5 Yield rates of principal crops in the district, 1951-52 to 1959-60....216
3.6 Fortnightly wholesale prices of important commodities in the district from 1958 to 1960....217—229
3.7 Average retail prices of important commodities in the district for 1960....230

4. LIVESTOCK

4.1 Variation in the number of main Livestock in the district during 1945 to 1961....231

5. INDUSTRIES

5.1 List of all categories of industries in the district based on Houselists....232—234
5.2 List of small scale industries Operating in the district 236

6. ADMINISTRATION

6.1 Number of criminal cases tried and persons convicted in the district from 1951 to 1960....237
6.2 Strength of Police and Jails in the district from 1951 to 1960 238
6.3 Different types of Co-operative Societies in the district from 1951-52 to 1960-61....239
6.4 Receipts of revenue under different heads in the district from 1951-52 to 1960-61....240

7. PUBLIC HEALTH AND MEDICAL

7.1 Different classes of Public Health and Medical Centres in the district from 1951 to 1960.....241

8. EDUCATION

8.1 Number of different types of educational institutions and number of students in the district in 1959-60 and 1960-61.....242—251

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

9.1 Number of Newspapers, Printing Presses, Cinema Houses, other places of public entertainment and Periodicals & Journals.....252

10. COMMUNICATION

10.1 Names and length of village roads in the district .....253—257
10.2 Different categories of roads in the district as on 31st March, 1961.....258
10.3 Navigable waterways in the district.....259

11. COMMUNITY DEVELOPMENT

11.1 Names and Stages of the Community Development Blocks in the district.....260

12. BANKS AND SMALL SAVINGS

12.1 List of Banking Institutions functioning in the district.....261
12.2 Gross and Net collections on Small Savings in the district from 1951-52 to 1960-61.....262

13. FAIRS AND FESTIVALS AND HATS AND MARKETS

13.1 List of Fairs and Festivals—times of the year and duration in the district.....263—264
13.2 List of different types of Hats and Markets in the district.....265

14. CALENDAR OF IMPORTANT EVENTS

A descriptive note on the calendar of important events of the district.....266—267

15. ANCIENT MONUMENTS, PLACES OF WORSHIP AND GAZETTEER OF PLACE NAMES

A descriptive note on the Ancient Monuments and Antiqe objects & Gazetteer of place names of the district.....268—271

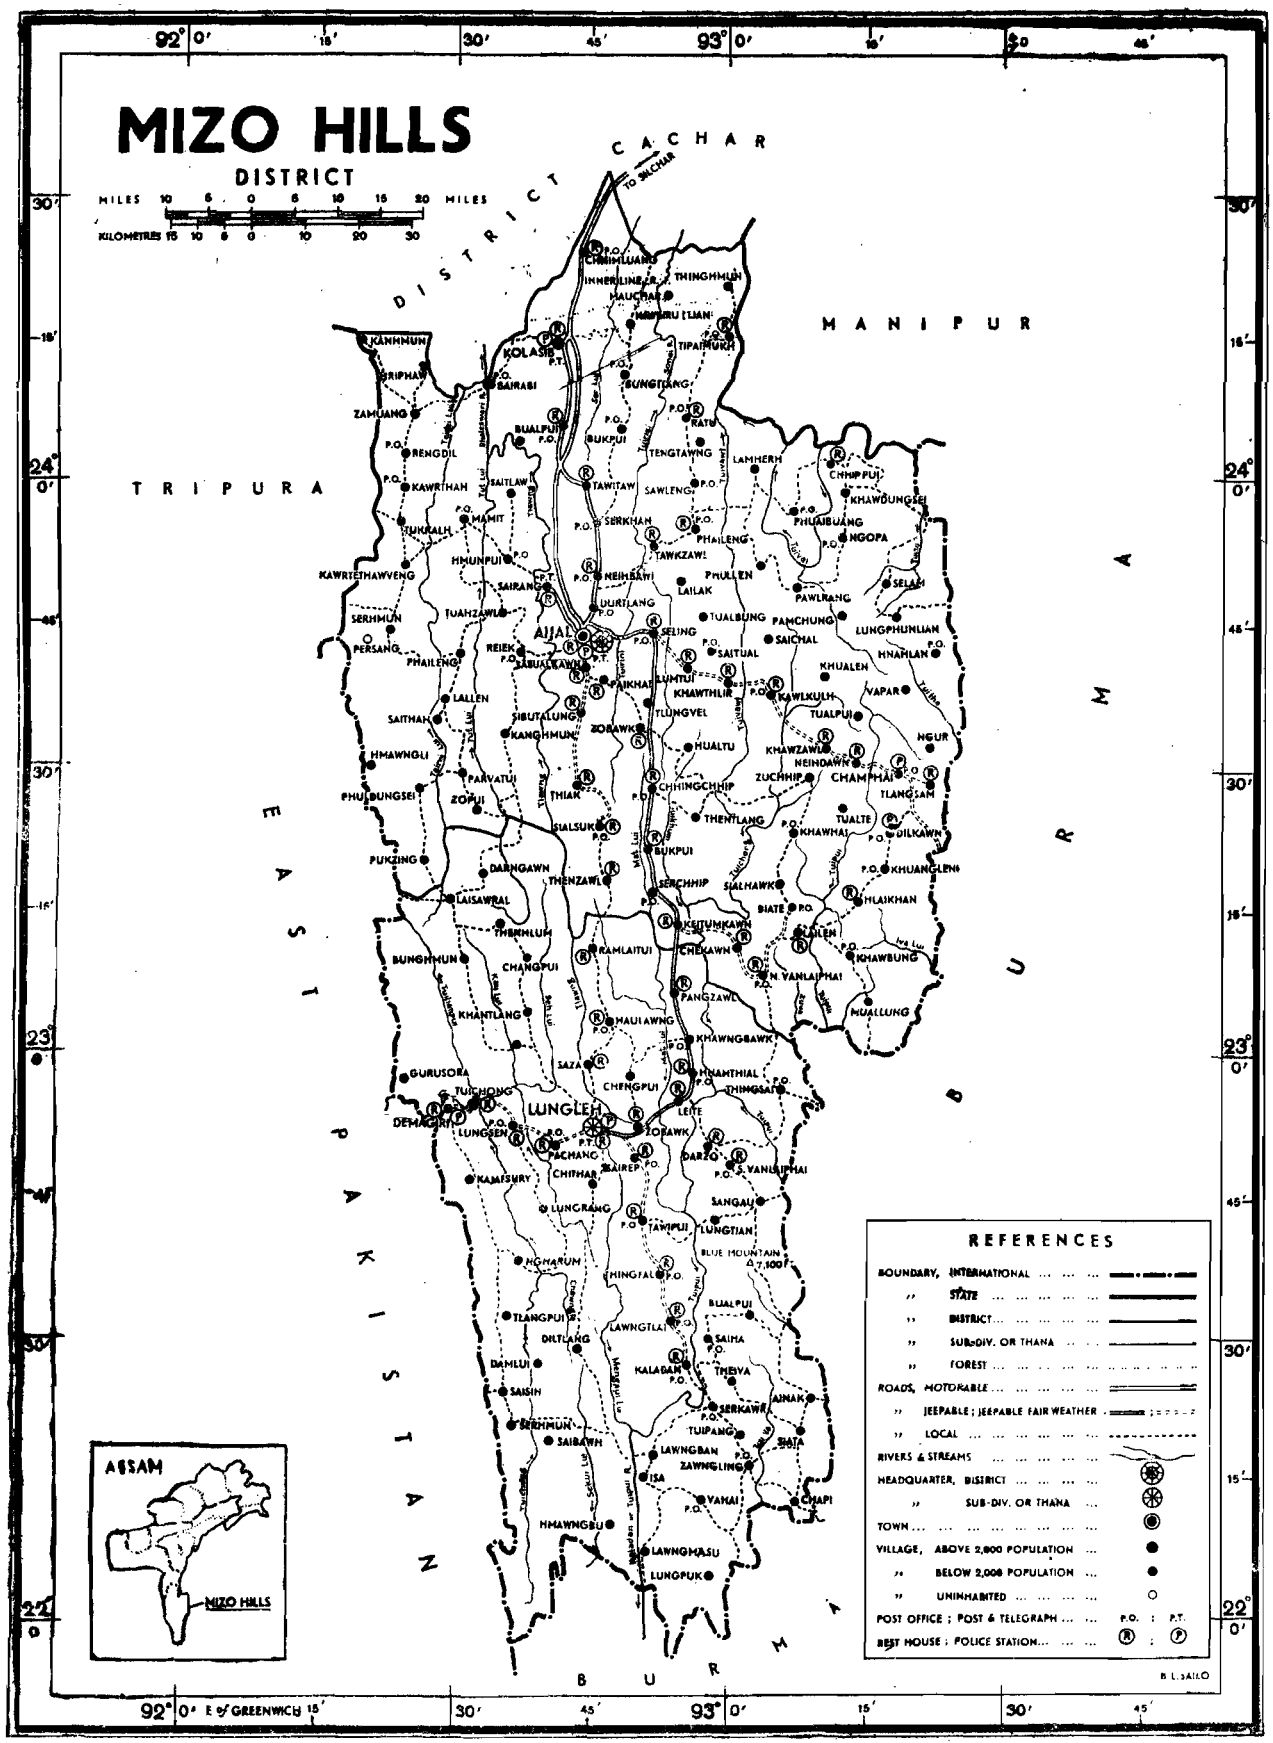

PREFACE

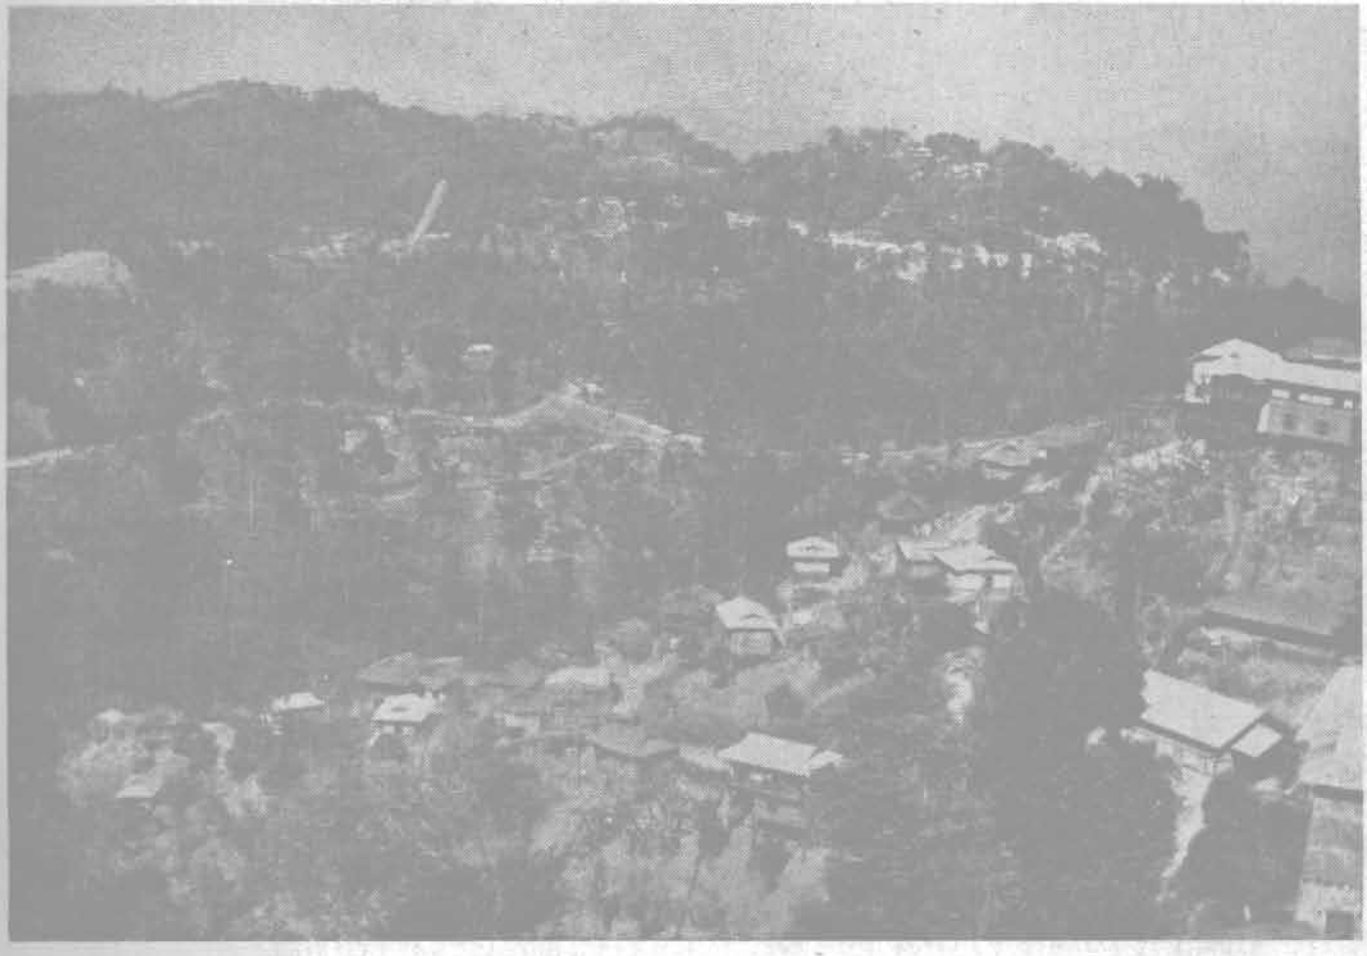

District Census Handbooks were introduced for the first time during the 1951 Census. In the 1961 Census, the District Census Handbooks have further been improved by making the introduction of the district more elaborate, by the addition of official statistics and by having separate tables for Scheduled Tribes and Scheduled Castes. The introduction to each district is a sort of gazetteer giving the physical features, geological data, climate, rainfall and temperature, flora and fauna etc. and a short history of the people inhabiting the district. Sociological data about the people have also been given briefly. Attempts have also been made to appraise the impact of the two Five Year Plans on the economy of each district. Official statistics are given in the form of tables, but there is also an introduction explaining the purpose and utility of the official statistics. For example, the District Census Handbook will supply the number of schools and dispensaries existing in each district as well as the road mileage and many other data which one would like to know about each district. Such data will be useful to the administrators, legislators and sociologists who want to study the people of any district.

Data on the various subjects mentioned above have been collected from the District Gazetteers prepared by Mr. B. C. Allen ICS, from monographs written on the people by well-known ethnographists and sociologists as well as from various Departments of Government, both Central and State. Many Deputy Commissioners and Subdivisional Officers have greatly helped me in supplying such data as are available with them concerning the district. The nature, quality and quantity of the data supplied by each Deputy Commissioner and Subdivisional Officer vary directly according to the interest that each officer has in his district/subdivision.

The preparation of tables was done under the able guidance of Sarvashri J. C. Bhuyan and K. S. Dey, Tabulation Officers, to whom I am greatly indebted. I could not have dictated my write-ups in such a short space of time had it not been for the great help given by my two Stenographers, Sarvashri G. Raghuram and J. Ramsden.

LUNGLEH
(Courtsey — Publicity, Assam)

INTRODUCING THE DISTRICT

The Mizo Hills District, previously known as the Lushai Hills, is situated at the southern-most corner of Assam, lying between 21°50′ and 24°30′ North, and 92°20″ and 93°20′ East. The Tropic of Cancer runs through this District. It covers an area of 8,134 squar miles and is the largest district of Assam. It is bounded on the North by Cachar District and Manipur State, on the East and South by Chin Hills (Burma) and on the West by Chittagong Hill Tracts of East Pakistan and the Tripura State.

Physical Features

The Mizo District being one of the hill districts of Assam, consists of ranges of hills runing from north to south in parallel series, separated from one another by narrow valleys with only a very small portion lying in the plains. The hills are very steep, more steep on the western sides of the ranges ; and the general height of these ranges is about 3,000 feet though here and there are peaks over 6,000 feet in height and the Blue Mountain (Phawngpui) in the South Mizo District rises to a height of 7,100 feet. In general, the hill ranges towards the east are higher than those towards the west and several summits in the Chin Hills are over 8,000 feet above the sea level. The hills of south Mizo District are generally smaller and more fragmented by small brooks than those of the northern sides and the top soil erosion is rapid resulting in less fertility than the northern hills.

There are a few small plains in the district situated in the midst of hills and narrow valleys. These plains are believed to have been formed in the beds of siltedup lakes. They have, as a rule, an elevation of about 4,500 feet and are covered with a thick layer of rich alluvial soil. They are surrounded by hills which slope gently towards the plains but are generally very steep, often precipitous on the outer side. The largest of these plains is Champhai which has a length of about 7 miles and at the widest part is nearly 3 miles across, Now, almost the whole of the plain has been converted into smiling rice fields. It is situated on the eastern border of the district bordering Burma and is about 90 miles from Aijal. Another plain at Vanlaiphai, about 90 miles in the south-east of Aijal, is about 6 miles long and from a quarter to half a mile in breadth. The major part of this plain has also been converted into rice fields. There is also a plain at Thenzawl, about 55 miles south of Aijal. But except for few experiments, no attempt has been made to bring this plain under cultivation.

River System

There are many rivers in the Mizo District, but only a few of them are large enough to be worth mentioning. The most important rivers are the Tlawng (Dhaleswari), the Tuirial (Sonai) and the Tuivawl which drain the northern portion of the country and eventually fall into the Barak. The southern hills are drained by the Chhimtuipui (Kalodyne) on the east, with its triburaries the Mat, Tuichang, Tiau and Tuipui ; while the Karnaphuli at the mouth of which stands Chittagong (East Pakistan) with its tributaries the Tuichawng, Kau, De, Phairuang and the Tuilianpui, form the western drainage system. The drainage systems of the district are usually complicated. The Tlawng for some 40 miles of its length runs due northwards, while parallel to it to the east the Mat and to the west, the De runs due south. In the same way, the Tuivawl, the Tuichang, the Tuilianpui and the Tut run parallel to one another for many miles but in opposite directions. The Tuichawng and the Phairuang run north till they join the De which then takes a westerly turn and delivers their combined waters into the Karnaphuli which flows south-west.

All the rivers in the district are fed by monsoon rain only. They swell rapidly during the rain and recede shortly after the rain. In winter the volume of water in the rivers is very small and many rivers are almost dried up. The Tlawng, the Tuirial and the Karnaphuli are navigable throughout the year.

Lakes

1. Palak Lake—This lake is situated in the Pawi-Lakher region in the south-eastern corner of the Lungleh subdivision. It is oval in shape and the largest in the subdivision, its length being about 660 yards and width about 600 yards. It is said that at the bottom of or below this lake, there still exists a a big village which was submerged by flood or earthquake which was the cause of the formation of this lake.

The lake was once belived by the Lakhers to be guarded by resident demons. These evil spirits were believed to have powers over the lives of the people. When the devils were displeased by the people, especially when the land around the lake was cleared for jhums or when they paid a visit to the lake without paying due reverence or when they went out for hunting around the lake, the people were subjected to illnesses of different kinds. This lake is the only abode of aquatic birds such as wild duck of different species.

2. Tamdil—At an approximate distance of 40 miles to the east of Aijal, between Saitual and Tuaibung villages, there exists a lake which is known as "Tamdil". 'Tam' in Lushai is a shortened form of 'Antam' which means a 'mustard plant' and 'dil' means 'lake'. 'Tamdil' therefore means a 'lake of mustard plant', This name is not without significance and there is a very interesting story behind it. It is said that once a big mustard plant grew in a place where the lake now situates. When the mustard plant was cut off, water came out of it incessantly. After several days the water coming out of the plant was formed into a lake and that is why it is known as 'Tamdil'.

As there are many prawns in it, the lake is also known as 'the city of prawns'. The people around this lake catch these prawns whenever they can find time.

3. **Rungdil**—The name means the 'lake of partridges'. It is so called perhaps because there used to be many partridges in and around the lake. The lake is situated near Suangpuilawn village in the north-eastern corner of the district and consists of twin lakes, more or less alike, separated from one another by a narrow stretch of land. It is said that if a pumpkin cut into halves is allowed to sink in one lake, it comes out in the other. The lakes are, therefore, believed to be connected with each other below the surface of the earth. They are also always referred to as one, not two lakes.

The Mizos, like all other primitive tribes' used to dread lakes, and other natural objects and phenomena that are somehow or other different in size, appearance etc., from the rest of the objects of nature. They associated these with many strange beliefs and worship. Lakes and huge mountains were believed to be haunted by evil spirits inimical to human beings. This lake was not an exception to this.

Some aquatic animals including water newts are found in this lake, but they are becoming scarce now.

Mountain System

Some aspects of the mountain system of this district have already been discussed under the heading—Physical Features. Only additional aspects have therefore been given under this heading. The sides of the hills are all covered with forests or bamboo jungles, except where they have been cleared for cultivation. The western sides of the ranges are always very steep and precipitous whereas the eastern sides are somewhat gentler. This makes some people believe that the district was once covered with water and the water receded from east to west. A peculiar feature of the Mizo Hills is that they rise more or less abruptly above the plains. This explains why the three larger rivers are navigable by boats far inland. One can go by boat from Hailakandi up to Sairang, a few miles below Aijal.

Phawngpui (Blue Mountain), the highest peak in the district, rises to a height of 7,078 feet and is situated in the South Mizo District. The following are the rest of the peaks whose heights are above 6,000 feet : Lengteng, 7,050 feet ; Naunuarzo, 7,021 feet ; Surtlang, 6,618 feet—all these peaks belong to the Sialkal range in the north-east corner of the district. Zopuitlang, situated in the south-east of the district, is 6,439 feet above sea level. Lurhtlang, 6,350 feet situated in the south-eastern corner of the district, and the Tan 6,320 feet situated a little north of Lurh are very important places for indigenous religious worship. Hmuifang, 6,307 feet across which runs the Aijal-Lungleh Road is an important potato-growing centre. Chalfilh, 6,249 feet is situated in the north-east of Aijal and is covered with a thick jungle of trees and canes. Ngurtlang, situated north of Champhai is 6,218 feet high, and is covered with pine forests. Tawi, 6.200 feet and Lungreng, 6,107 feet are situated in the east and south-east of Aijal respectively.

Geology

The district is composed of sandstones and shales of tertiary age, thrown into long folds, the axes of which run in a nearly north and south direction. The rocks are a continuation southwards of those forming the Patkoi range and were probably laid down in the delta or estuary of a large river issuing from the Himalayas in a tertiary period. Marine fossils of that time have been found near Lungleh embedded in nodular dark grey sandstones and shale. The rocks belong mainly to the Tipam and Surma Series of the Lower Miocene age ; the rocks of the Surma series generally form the core of the hills and the Tipams the flanks. It is possible that older formations occur in the area farthest from the plains. As mentioned above, the beds have been thrown into north-south trending folds which are continuous from North Cachar Hills. Of these folds generally, the eastern limit is more steeply inclined and posssibly at places overfolded. The beds appear to have been laid down in a sea which was probably separated from the Burmese sea about the Cretaceous time.

So far no minerals of economic value have been discovered in this district. Thin seams of lignitic coal have been reported but the quality and extent of these seams have not been examined.

Outside the western boundary of the district, gas shows and oil shows occur. Whether similar shows occur in the district is not known.

The soil type generally found in this district is a clayey loam mixed with broken angular shales of varying sizes. Though there is a fair percentage of clay in the soil the water-holding capacity of the soil is very low and due to this the top soil becomes very dry during winter. In the southern portion of the district the soil is more clayey and deeper than in the north.

Due to the continuous washing away of alkaline soil by rain water, the soil of this district is generally acidic in nature, that is to say, acid soil. But the portions which are lying in the plains are rich alluvial soil.

Climate, Temperature and Rainfall

As a whole, the district enjoys a pleasant climate and is neither very hot nor very cold. The valleys are feverish and unhealthy and during the rains the climate, even on the lower hills, is moist and enervating. In the higher ridges it is fairly cool and pleasant even at the hottest season of the year. Spring generally starts from the end of February and lasts till the middle of April. By the month of April and May, it is usually hot, the temperature rising up to 29°C. At this time, haze covers all the hills and makes the sight of them very dim. In April, violent storms sweep over the hills marking the beginning of Summer. There is ample rainfall during Summer and the average rainfall in inches at each of the eight recording centres is as follows :—

1.	Aijal	82.25 during 62 years
2.	Sairang	97.78 during 56 years
3.	Kolosib	107.58 during 44 years
4.	Sialsuk	85.67 during 44 years
5.	Champhai	76.92 during 55 years
6.	Lungleh	138.06 during 60 years
7.	Serkawn	130.27 during 18 years
8.	Demagiri	106.94 during 59 years

Owing to the steepness of the hill-sides, and the narrowness of the valleys, the rivers rise after heavy rain with wonderful rapidity. In Allen's Gazetteer it was recorded that during the last four days of May, 1889 over 27 inches of rain fell in the South Mizo District and the level of the Karnaphuli river rose over 50 feet. In autumn (September and October) except for a few showers, heavy rains cease and the temperature is usually between 25.4°C and 18.7°C. In Winter (i.e., November to February) the temperature is usually between 11.8°C and 24.7°C. There is little or no rain during Winter.

The following are the data of Aijal for 1960 obtained from the Meteorological Department, Gauhati.

Months	Temperature in °C		Relative Humidity		Rainfall
	Max	Min	08.30 hrs.	17.30 hrs.	Total rainfall
January	21.4	11.8	57	52	0.00
February	24.7	15.4	51	48	0.10
March	25.2	16.0	57	44	1.00
April	29.8	19.8	55	37	2.06
May	28.5	19.5	79	64	15.25
June	25.8	19.6	92	19	19.94
July	23.9	19.3	92	19	10.61
August	26.4	20.3	91	91	8.99
September	25.3	19.7	89	90	9.31
October	25.4	18.7	83	85	6.37
November	23.2	15.2	75	70	3.44
December	21.3	12.8	74	67	0.04

The sides of the hills are covered with forest or bamboo jungle. Rainfall and temperature of the district are suitable for

Vegetation

tress, plants and bamboos and that enable them to grow to the standard size. The cycle of 'Mautam' (bamboo-flowering) set in during the year 1958-59 and lasted till the early part of 1962 and due to that, bamboo died. Now the hill-sides have lost their natural appearance and bamboo will not grow till the next regeneration and that too calls for proper actions to be taken to preserve the bamboos. As the climate varies from place to place, various kinds of vegetation are found in the district.

Wild animals used to be numerous in the more sparsely populated portions of the district, but they are becoming very scarce now. Except for a few herds of

Fauna

elephants, a few tigers, leopards and bears in the less populated areas, animals like mithuns, bisons etc., which were said to be common in the district are no longer to be seen. Wild dogs are common and frequently kill cattle. Bears are of two varieties—the Himalayan Black Bear and the Malay Bear and they are still common. Game birds also shared the same fate as their animal counterparts and are becoming scarce. A few that are still to be seen in less populated areas include the jungle fowls (gallus ferrugenius), horn bills, pheasants, doves and pigeons. Wild goats are reported to be still surviving on the ridges of the steepest slopes.

Fishes are also becoming very scarce now. Though there are records of mahseers weighing 50 lbs. being caught in the Chhimtuipui (Kalodyne) river, such large specimens are just a myth now. Snakes are not very numerous in the district. They seem to abound more in the south then in the north. Most of the snakes are non-poisonous. Cobra, king cobra, viper etc., though not in plenty, may represent the poisonous group while python, grass-snake and many other varieties of small snakes may represent the non-poisonous group.

There are no Reserved Forests in the district except the Inner Line Forest Reserve which is about 217 square miles. The was constituted in 1877 in

Forests

the Cachar district under the provisions of tee Assam Forest Regulation which now falls within the boundaries of the Mizo District. The management of this forest rests with the State Forest Department under the control of a Deputy Conservator of Forests assisted by one Assistant Conservator of Forest and other executive staff. All other forests areas which were not consitituted as reserved forests and which were within the Rams (land) of the Lushai Chiefs for the management of which executive rules were formed by the Chief Commissioner of Assam in 1904, including the Aijal Station Reserve constituted under the executive order of the Superintendent, Lushai Hills, have been taken over by the District Council in 1956. The major portion of such forests is managed by the District Council with headquarters at Aijal with their own executive staff, and the other and smaller portion by the Regional Council of the Pawi-Lakher Region. The management of forests under the Pawi-Lakher Regional Council was, on the request of the Council, taken over by the State Forest Department since 1950. All the revenue collected from both the Reserved Forests and the Regional Council Forests is credited to the State Government, and that from the District Council Forests goes to their own fund. Approximately about three lakhs of rupees of revenue is collected annually from forests situated inside the Mizo district.

The principal species of trees exploited from the forests of the Mizo District are Jarul (Lagerstroemia Flos-Reginae), Cham (Artocarpus Chaplasa), Boroi (Heritiera Acuminita), Champasunid (Michelia Montana), Dhunarata (Canaruim Bengalense or Resiniferum), Hatia (Chickrassia tabularis), Jhalna (Terminalia Muriocarpa) and Jam (Eugenia species). Bonak (Schima Wailichii) occurs scattered over the forests on the ridges of the northern Mizo District and this species is very useful for plywood manufacture but very little exploitation of this species has taken place. Fairly large numbers of the trees Tarakgogenos Kurzii, from the seeds of which an oil is extracted for the efficacious treatment of leprosy, occur in the district and used to be exported to Chittagong in pre-partition days. Large numbers of bamboos of the species Muli (Melocanna Bambusoides) and Dolu (Teinostachyum dulloa) are extracted from the forests of both the northern and southern Mizo District.

During 1959, wholesale bamboo flowering occured throughout the district causing great famine there. All the muli bamboos died after producing flowers and fresh natural regeneration starts from the fruits. In Mizo terms, this incident is called 'Mautam' and it is said to occur in cycles of fifty years.

One of the greatest difficulties in respect of exploitations of forests produce from the Mizo District is the fact that many of the streams used for transport of forest produce have rocks

and rapids along their courses which cannot be passed by rafts. In respect of southern Mizo District, some improvement in this regard has been effected by the blasting of rocks by the Forest Department. Progress of this work in the northern Mizo District has been held up by the uncertainty of the continued existence of wooded forests because of the practice of jhuming.

An Assistant Conservator of Forests explored the forests of the northern Mizo District to choose areas which would be useful for constitution of areas dedicated to the practice of forestry under the auspices of the District Council. However, it did not materialise as expected and the District Council has taken over all the forests except the Inner Line Forest Reserve, and the state of forests is no better than what it used to be. An uncontrolled burning of forests during February to April each year has become a menace to the improvement of forests in the district. The forests as a whole have deteriorated much further.

Origin of the name of the District

The Mizo District was formerly known as the Lushai Hills. The Armed Force that invaded this land in 1889-90 was styled Lushai Hills Expeditionary Force. It is generally accepted that the name 'Lushai' has been derived from 'Lushei' which was the chief clan among many others inhabiting the district.

The district was thus known as Lushei Hills till the end of August, 1954. The Parliament of India, however, by an Act called the 'Lushai Hills District (Change of Name) Act, 1954 (18 of 1954),' assented to by the President on 20th April 1954, changed the name "Lushai Hills District" to "Mizo District" with effect from 1st September 1954.

Origin of "Mizo"

The effort to find the origin of "Mizo" is to hazard a guess into the unrecorded past. However, it is correct to say that "Lushai" is not the name originally used by the inhabitants of the district for their common identity since this word is only a derivation from the word Lusei or Lushei—as it was previously spelled—one of the sub-tribes. There must have been, however, word that linked the sub-tribes together and it is traditionally believed that the word is Mizo.

The old people who had already been adults before and during the operations of the Expeditionary Force in 1889-90 said that 'Mizo' was the name commonly used for common identity of the people inhabiting the district. Lt. Col. J. Shakespeare conformed to this view in his book the "Lushei Kuki Clans" published in 1912. He writes, "The term Lushai, as we now understand and it covers a great many clans, is the result of incorrect transliteration of the word Lushei, which is the name of a clan, which, under various chiefs of the Thangur family came into prominence in the eighteenth century.....In this monograph, Lushai is used in this wider sence, Lushei being used only for the clan of that name.....and the general population of the hills is spoken of as "Mizo". Lushai was, therefore, a later application and even under this name, the people always called themselves Mizos ; they used Lushai for their identity to outsiders by virtue of its officialdom. With political consciousness coming to the surface after independence, the movement for changing 'Lushai' to 'Mizo' took shape in the said Act of Parliament. The word 'Mizo' simply means a "hill-man".

From time immemorial the word 'Mizo' has therefore, been applied to themselves by the people of this district whenever they talked of and referred to themselves as a whole. No separate tribe or an individual has ever had the feeling of difference to the use of the word 'Mizo' as indicating the whole people as a race, or even as individual entity. Therefore, it appears that everyone has the feeling of oneness in the word, and relish it. Also whenever the word 'Lushai' is used by a foreigner in writing or in a speech, the translation of the same is always rendered as "Mizo". Therefore, the use of the word 'Lushai' as indicating the people as a whole seems to be a nomenclature. This fact was revealed in the Census Operations of 1951, when different tribes other than the Lusei, like the Ralte, the Hmar etc., refused to be entered as 'Lushai'. They said they would not mind to be entered as "Mizo", but since it had not been done they preferred to be entered after their own separate subtribes.

THE POPULATION

Composition of the Population

The population of the district is, with the exception of few immigrants, all of one race. The people, however, recognise a number of divisions and subdivisions. Each of these divisions and subdivisions bears the name of some famous man who distinguished himself in former days, and from whom the majority of those bearing the name now descended (or the whole of the

family may have adopted the name of some very distinguished member). Old men say that in their father's time the various clans lived in separate villages ruled over by Chiefs of their own clan. Prominent men in each clan founded families which were called after them, and these families have been further sub-divided as in course of time other prominent men have arisen, whose descendants were proud to adopt their names. In each case, the connection with the original clan is carefully preserved, thus a man will say that he belongs to the Liannghawr branch of the Pachuaw family of the Lushei clan.

The amount of variation between the different clans inhabiting the Mizo District is by no means constant. The Paihte, Thado and Lakher are easily distinguishable, and a brief acquaintance with them would make it apparent that they were not Luseis ; and the same applies to the clans which have been grouped under the names of Hmar and Pawi. It is manifestly unnecessary to classify the populations according to all the minor divisions, and therefore, it may be grouped under the following heads :

1	Lusei	10	Lakher
2	Ralte	11	Thado
3	Khawlhring	12	Chawnte
4	Khiangte	13	Ngente
5	Renthlei	14	Tlau
6	Chawngthu	15	Pautu
7	Paihte or Vuite	16	Rawite
8	Pawi or Pawite	17	Zawngte
9	Hmar	18	Vangchhia

With the exception of Pawi, Hmar, Paihte and Lakher, all these are true clan names. Pawi is the term used by the Luseis and other original inhabitants of the present Mizo District, for all the people living in what we call the Chin Hills of Burma. Among these Pawis or Chins there are a great many clans and families and it is almost impossible to classify them. The majority of Pawis are now living in the Pawi-Lakher Region in the extreme corner of the South Mizo District and also in the eastern side of the district bordering Burma. Few families are scattered here and there. They speak dialects different from that of the Luseis, though there are many similarities indicating the same origin. Hmar which means 'North', is used by the rest of the inhabitants of the district to denote immigrants into the district from the Manipur State. These mostly belong to clans which are very closely allied together and speak much the same, yet almost unintelligible dialect. They formerly had many wars with the Luseis, and lived north of Champhai. They now mostly live in the Manipur Hills.

Paihte is the name by which the inhabitants of the district called a particular clan now mostly inhabiting Manipur Hills and Burma Hills. A good number of the Paihtes is still to be found in the district. Vuite is the name more commonly used by its members and in Manipur. The Paihte dialect is quite unintelligible to the rest of the people. The Paihtes claim to be the descendants of one Lamleia, who was hatched out of an egg. They have many peculiar customs, quite different from those of the rest of the inhabitants.

The Lakhers are also immigrants from the Chin Hills, and are now living in the Pawi-Lakher Region together with the Pawis. But they seem different in many respects from the Pawis. The clan calls itself 'Mara', Lakher being the name used by outsiders. The Lakhers also have peculiar and distinct customs which are not found in other clans. Their dialect is also different.

Although there are different clans in the district, some of them quite distinct from the rest, the Mizos have a feeling of oneness. Differences in customs, dresses and languages have rapidly vanished from the face of the district. Now, one is unable to distinguish a man of one clan from a man of the other clan.

There used to be a number of dialects such as Lushai, Ralte Paihte, Hmar, Lakher etc., spoken in the district. Of these, Lushai is the most popular one. It is also known as the Duhlian and is the dialect of a particular clan called Lusei. Lushai, modified by contact with other dialects, is now the lingua franca of the district, and is understood not only throughout the length and breadth of the district, but also in many parts of the adjoining districts.

Dress and Ornaments

The influence of western civilisation in almost all aspects of Mizo life is very great. This is also true in respect of dress and ornaments. The menfolk have altogether abandoned their traditional dress and adopt the western dress while their counterpart still retain their 'Puan'—a hand-woven cloth about

4′×3′ in size beautifully designed, wrapped around the body in a fashion of a skirt. Ornaments have always been popular with the Mizos, and they took the form of ivory and carrings, brass or other hair-pins, amber and cornelians, necklace and combs. But now, these ornaments, as they were, have fallen into disuse and they were replaced by gold-earrings, gold rings, pearl or gold necklaces, broach etc. But the Mizos never use ornaments in excess. In fact many ladies are seen with little or no ornaments now. But the use of powder, lipstick and eye-brow pencil is almost universal with the young ladies. Many Mizo women in Shillong are now wearing only western dress.

Food

The Mizo food is quite simple. Rice forms the staple diet and is taken with pumpkin, cabbage, onions, brinjal, creeper beans, ginger, arum, potatoes etc. Meat never plays a large part in the Mizo diet but its consumption is increasing depending upon the purchasing power of the individual.

There are three forms of cooking—boiling, cooking with oil and cooking which is called "bai" by the introduction of 'saum' and 'chingal'. When a pig is killed, the fatty portions of animal are slowly boiled towards liquidity, and this is put into a gourd and hung up near the hearth for future use. This is call 'Saum'. Ash water drained through wood-ash is called 'chingal'. Manual labourers take three meals a day, one shortly after sunrise, one at midday and the last at dusk.

Modern Mizos are rapidly improving their diets. Better quality of oil, spices and more meat are all being taken in increasing quantities, and this has produced a very appreciable effect on the health of the people.

Drinking of tea has practically become a habit with the Mizos. However, tea in not regarded as a food and it is taken at any time one likes and the Mizos seem to practice the saying "all time is tea-time".

Amusements

The Mizos are very fond of group singings to the accompaniment of drum or gong or guitar. Formely, the songs were generally in praise of some former hero of the tribe. But now, almost the whole of the population profess Christianity, the theme of the songs usually sung in groups has practically changed. It it the Christian hymes which take the place of the solemn dirges of the old days. Regarding dancing, the bamboo dance of Mizo girls which is very characteristic is worth mentioning.

History

In so far as history may be said to constitute an accurate and systematic record of events, any authoritative and detailed history of early Mizos at this taler stage can no longer be attempted. Contacts with the Mizos up to the beginning of the nineteenth century were few and vague and by no means free until the very end of the century. When contacts did become free, principally a verbal, and not a written, source prevailed. From the beginning of the nineteenth century, however, records became more plentiful.

The Mizos are distinctly Mongolian. They appear to have had a common origin with many other tribes of the Tibeto-Burman Group, but today differences in culture and language are so marked as to suggest that many of these tribes must have preserved their independence sufficiently long for them to be able to develop very difinite patterns.

It is the traditional belief of the Mizo people that originally they came from "Chhinglung" meaning "Covering Rock" which may perhaps be a place now called Silung in China bordering Shan State in the east. The history of the Mizo people as far as is known is the history of a backwash or eddy of the great wave of immigration that is generally believed to have started from North-west China. Before they came to the present land, the Mizo lived in the hill tracts of Burma bordering the present Mizo District—between the Run and the Tiau rivers. Here different clans located themselves at different places and had no chiefs. They fought against each other for supremacy and the fight for suppremacy consisted in the bravest of one clan fighting the bravest of another clan in a small bridge over a river or a brook. After sometime, the use of arrows and bows became known to them, and all men, not only the bravest of them, then fought. This is believed to be about 1500 A. D.

The Mizos remained between the Run and the Tiau rivers, one clan at arms against the other, in an endless struggle for supremacy. At last the Luseis, by their bravery and prowess in the art of warfare, established their paramountcy by defeating all the other clans. Of these Lusei clans, the Sailos were the most powerful and almost all the famous Lusei chiefs belonged to this Sailo family. The Sailos claim to be descended from Sailova one of the grandsons of Thangura, the father of the clan.

Before proceeding further, it is interesting to record one story concerning the origin of the Sailo supremacy though there are others not differing substantially. The real founder

of the Lusei clan, it is claimed, was Zahmuaka in circumstances which are rather amusing. Zahmuaka was originally a slave and a poor man. He had six sons. At that time, the people of old, known as Hnamte or common people, lived separately in clans but no co-ordinating leader was forthcoming, because in those ancient days all feared that any new chief would be plundered by the Pawis or Chins. But the Hnamtes always hoped for a chief and called one Zahmuaka, though his first reaction were unfavourable. He was, however, persuaded to accept the chieftainship. Zahmuaka's rule prospered and from him sprang six Lusei clans, viz., Sailo, Zadeng, Thangluah, Palian, Rivung and Rokhum. Thanglura, Zahmuaka's fourth son had a grandson named Sailova, and Sailova's son, Chungnunga, ruled over 7,000 houses at the place called Seleshi. It was Chungnunga's ability which paved the way for the Sailos' greatness.

Now going back to the Mizos inhabiting the hills between the Run and the Tiau rivers, during their stay there, they made a good progress in all spheres of life. The bravest and the most powerful of each clan had become a chief, and, in course of time, the chieftainship became hereditary. When want of good jhuming land and the aggressions of the Pawis made it necessary for them to move, they naturally went west-ward. The Mizos, under their separate chiefs, crossed the Tiau river which now forms the Indo-Burma border line, and settled themselves in the southern part of the present Mizo District. This movement is believed to have occured at an early part of the eighteenth century.

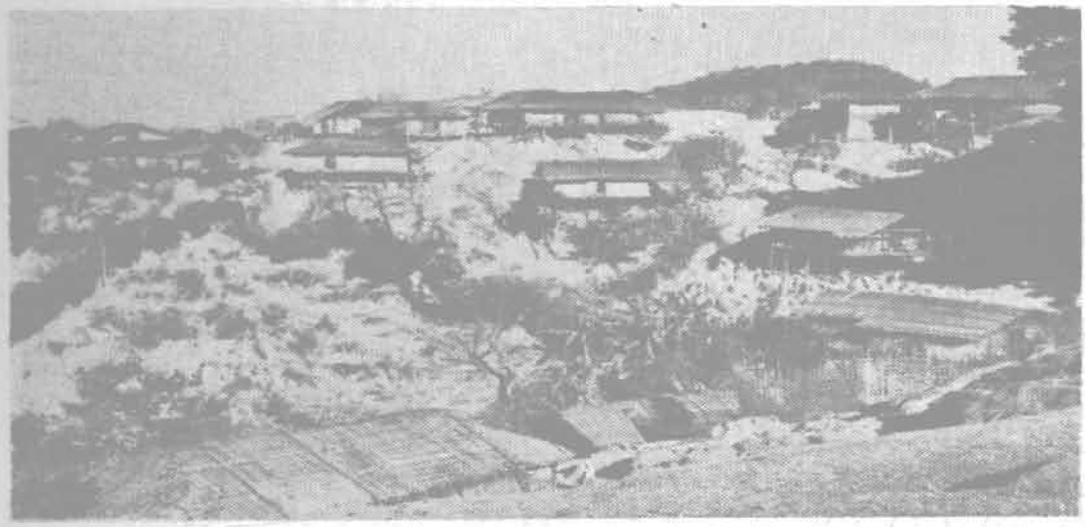

In about the year 1780, the strong Sailo migration commenced moving from the south in a northerly direction driving before them the Hrangkhawls, Biate, Thado and other kindred tribes which are now colletively known as the 'Kukis' until the Sailos, with their Lusei clans in 1810, chiefly under the Lallula Sailo, had consolidated their internal position by occupying most of the country between Champhai and Demagiri northwards up to the borders of Cachar and Sylhet. This migration was probably caused by the Zahaus and Burma clans such as the Hualngos, Fanias etc., becoming so strong that the Luseis, under the Sailo overlords, were compelled to give way and establish themselves in the area known as the North Mizo District.

In order that the Sailos might gain unchallenged paramountcy in the North Mizo District, they ultimately had to vanquish in battle their remaining kinsmen who included the Thangluah clan, the Rivungs, the Palians, the Rokhums and the Zadengs, all of whom were still holding together in separate camps but in some strength.

Probing into Sailo's defeat of their kinsmen we trace an instability which is engrained in their nature. The Palians were defeated in circumstances which may well have been only too characteristic at that time. The Zadengs had enlisted the help of the Palians to defeat the Hualngos of Burma and were successful. Success went to the heads of the Zadengs. They conceived a plot to bring ruin to their late allies. They allied themselves with a certain truculent Sailo chief named Haupui-tuaia, supported by the Chakmas of the Chittagong Hills, and falling upon the Palians, they defeated them at the Pukzing hill in 1830 in a battle from which the Palians failed to recover. The Zadengs were, however, shortly to meet their own Waterloo having relied too complacently on their apparent impregnability based on a strong settlement of four villages, each numbering up to the impressive total of 1,000 houses. This Zadeng concentration of 4,000 houses was near the Darlawng Peak. Moreover they made a faulty appreciation in relying on the belief that the Rajah of Manipur would surely come to their aid if they were ever attacked. When, however, Mangpawrha Sailo, the virile son of the great Lallula Sailo, chief leader of the Sailo migration, did attack, no help was forth-coming from Manipur. The Zadengs were utterly routed, and the last Zadeng who ruled independently died in 1857 at Chengpui near Lungleh. The Sailos now ruled supreme over the North Lushai Hills. Had they perceived the possibilities that lay in unity and consolidation, history might well have taken a very different course. But internecine wars over marriages, lands, or plunder induced a lack of control and strength which later precipitated clashes with the inhabitants of neighbouring districts in British India.

Thus, the various branches of the Sailo family were frequently at war. About 1856 a war, known as "The War of the North and the South" broke out and lasted about three years. The Northern combatants were the descendants of Lallula, their opponents being Chera's family. The bone of contention was the Piler hill. The war ended in victory for the North who surprised Khawnglung, the village at the top of a very precipitous rock, and captured the young chief and his mother, who later were ransomed for many necklaces.

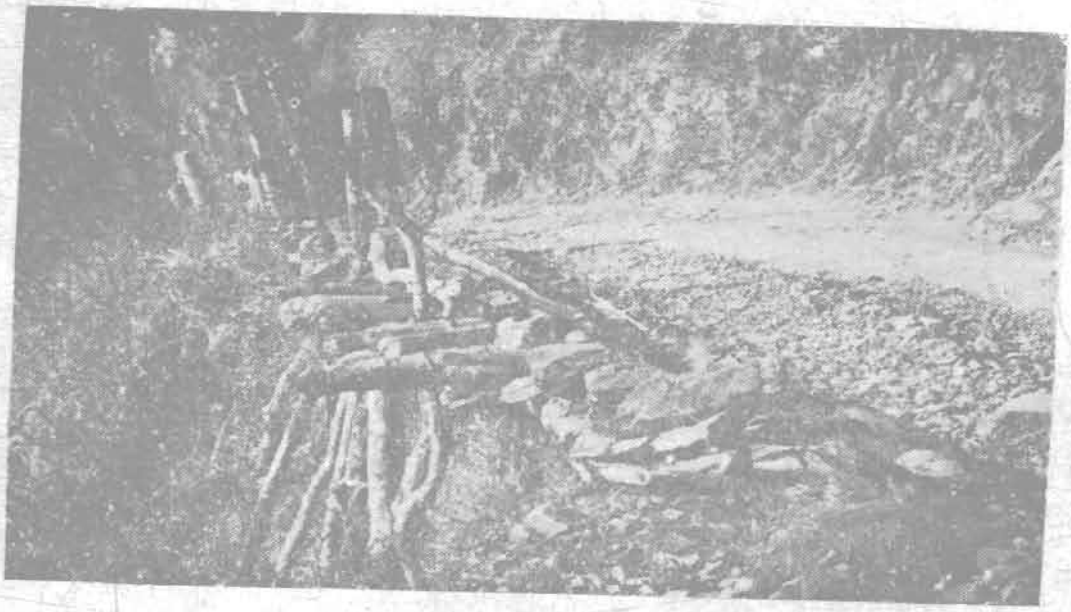

Latter the Northern Chiefs quarelled among themselves and "The War of the East and the West" broke out and lasted several years.

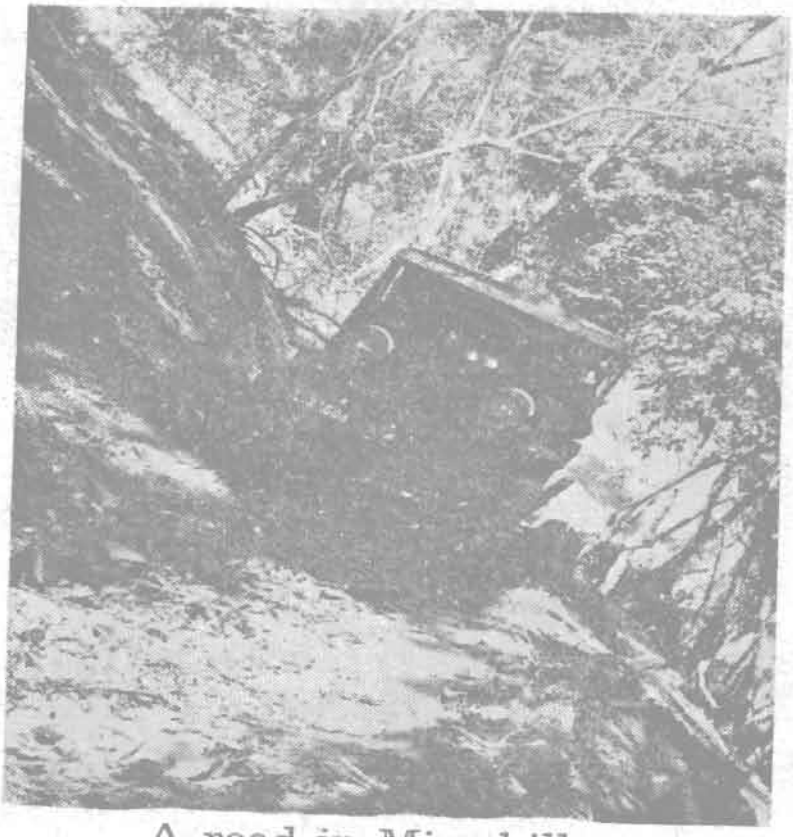

A Mizo Village

A Pawi Village

A road in Mizo hills

A road in Mizo hills

The cause is said to have been a girl called Tuali, for whose affections Liankhama and Kalkhama were rivals. The war was still indecisive when the British interfered and put an end to it.

Now, turning to an account of the main events which help to provide the background of British relations with the Mizos, we see a series of raids on inhabitants of the British India districts and counter-actions by the British Government. Prior to the advent of the British, the Mizos had been accustomed to make periodical descents upon the plains, and in 1849 four separate raids were committed, one of them on a village within ten miles of Silchar, of which 29 of the inhabitants were killed and 42 taken captive. These outrages were followed by an expedition led into the hills by Colonel Lister, who in 1850 surprised and destroyed the village of Lalngura Sailo, one of the chiefs concerned in the raid. This demonstration kept the hillmen quiet for some years ; but in 1862 they broke out afresh, and the diplomatic efforts that followed had little practical effect. In the cold season of 1868-69 raids were made on Manipur and Sylhet, and the Noarband and Maniarkhal tea factories in Cachar were burnt and plundered. An expedition was despatched into the hills, but it started too late in the season and failed to inflict the punishment required. In January 1871, a determined raid was made down the Hailakandi valley. The village of Ainakhal was burnt and 25 persons killed, the Alexandrapur tea factory was destroyed, a tea planter—Mr. Winchester—murdered, and his six-year old daughter Mary kidnapped, and attacks were made upon four other tea gardens with varying success. The raids were eventually driven off, but not before they had succeeded in killing 27 persons in addition to those already mentioned, seven of whom were sepoys sent to protect the outlying gardens. Raids were also made on Sylhet, Tippera and Manipur. Such violent and ferocious forays called for vigorous measures of repression, and in the cold season of 1871-72 two columns were sent into the hills, one from Chittagong and the other from Cachar. Mary Winchester was recovered from Chief Bengkhuaia, and legend has it that she clung determinedly to her Mizo guardian's clothes when she was to be taken away. The expedition was completely successful and the peace of the Assam Frontier remained undisturbed for the next 20 years.

In 1888 two serious raids were committed in the Chittagong Hill Tract. In one, the attacking party killed Lieutenant Stewart and two corporals of his regiment ; in the other they cut up the inhabitants of the village located only eight miles from Demagiri. The following cold season a small force was sent into the hills to exact reparation for those outrages, and stockade post was built at Lungleh and garrisoned by the 200 men. This demonstration of military activity had little affect upon the Mizos, and at the very time when the expedition was in the hills, Lianphunga, son of Sualpuilala, despatched a raiding party which devastated the Chengri Valley on the Chittagong frontier. Prompt measures for reprisal were taken, and columns were despatched into the hills from Silchar and Chittagong during the following cold season. The captives were surrendered and the offending village burnt ; but the British Government had at last come to the decision that here, as elsewhere, the only effective method of protecting the frontier was the establishment of fortified posts in the hills themselves. Stockades were accordingly erected at the Fort Tregear in the then South Lushai Hills, and at Aijal and Changsil in North Lushai. A political Officer, Captain Browne, was stationed in the northern hills, at first all seemed well. Suddenly, without a word of warning, the Mizos rose in September, 1890, attacked the two stockades and killed Captain Browne, who was marching along the road with an escort of four sepoys. A force was immediately sent up from Cachar, and though Lieutenant Swinton, the Officer in command, was killed, Aijal and Changsil were relieved without delay. Active operations were then commenced, and within two months one of the western chiefs responsible for this disturbance was large. On April 1, 1891, the South Lushai Hills, which has been controlled by the Assistant Political Officer under the Commissioner of Chittagong, were formed into a district and placed under a Superintendent.

At the beginning of 1892, the country was to all appearances in a condition of profound peace, and Mr. McCabe, the Political Officer of North Lushai, proceeded to the village of a chief named Lalbura, who had declined to comply with a requisition sent to him for coolies. He was attacked there by a party of Mizos, but they were driven off, and a force of police was then sent to the hills east of the Tuirial (Sonai) river, as the chief in this quarter had assisted Lalbura in his rising. Captain Shakespeare, the Superintendent of South Lushai Hills, heard of the attack on Mr. McCabe, and marched northwards to his assistance. When he reached Vansanga's village, the whole country rose in arms, and he was compelled to entrench himself and act on the defensive. The Mizos made constant attacks upon his camp, attempted

Lungleh, threatened Demagiri, cut the telegraph wires and spread themselves over the line of communications. Captain Shakespeare was relieved by a column despatched from Burma, and the combined forces then proceeded to inflict such punishment as they could during the short time that their scanty supplies enabled them remain in the field. In December 1892, a punitive expedition was despatched into the hills which cooperated with a column sent from Aijal and impressed upon the rebellious villages a sense of the futility of attempting to resist the British Government. No active opposition was encountered, and since that date the peace and tranquillity of the district had been undisturbed. In 1898, the South Lushai Hills were transfered to the Assam Administration, and the district for the first time took its present form.

THE HISTORY OF THE DISTRICT AS AN ADMINISTRATIVE UNIT AND THE CHANGES IN ITS COMPONENT PARTS

Mizo District, then Lushai Hills, was annexed to British India in 1891. The North Lushai Hills was under the Government of Assam while the South Lushai Hills was under the Government of Bengal. In 1898 the North and South Lushai Hills were amalgamated as one district under the charge of one Superintendent. In 1930, one more area known as Lakher land in the extreme south of the Lushai Hills was added to the already administered district. Under the provisions of the Government of India Act 1935, Lushai Hills district was declared to be excluded from the operations of the Provincial Legislatures. The main purpose of this was to encourage the people to develop themselves according to their own competence and genius.

For the purposes of administration, the district was divided into two subdivisions, Aijal and Lungleh. Aijal was in the charge of the Superintendent of the district who was allowed one Assistant Superintendent of Police as his immediate assistant. Two Assistant Superintendents of Police were sanctioned for Lungleh. For the purpose of internal administration, the district was divided into 18 circles, 12 in the Aijal and 6 in the Lungleh subdivisions. Each of these circles was placed in charge of an inteterpreter, who lived at some central spot. Orders issued by the Superintendent were transmitted to this man for communication to the chiefs. He was also required to submit every fortnight a report on the state of the crops and the general conditions of affairs within his circle. Society was, however, organised on the autocratic basis and in all minor matters, the people were subject to the chiefs.

The poeple lived in villages each of which was a separate state ruled over by its own Lal or chief. Each son of a chief, as he attained a marriageable age, was provided with a wife, and given a certain number of households and sent forth to form a village of his own. The youngest son, however, remained in his father's village and succeeded not only to the village, but also to all property.

In his government, each chief was assisted by officials of his choice, who included the Puithiam or priest, the Thirdeng or blacksmith, the Tlangau or village crier the Sadawt or chief's personal priest aided by friends of the chief known as Tlahpawi, Ramhual or the Agricultural expert who advised the chief on question of cultivation and the Upas or Elders, who were the main administrative assistants of the chief.

The Chief received from one to five baskets of rice according to the quality of the jhum assigned to the cultivators ; he also received a hind quarter of every animal killed in the chase, besides some other small dues.

There was a regular code punishments for different offences, the chief of course receiving a share of every fine levied.

The High Court had no jurisdiction in the hills, except in criminal cases in which European British subjects were concerneds. The Superintendent exercised the powers of life and death and could impose sentences of hanging or imprisonment up to the maximum amount prescribed for the offence. The death penalty or sentences of imprisonment for seven years and upwards required, however, the confirmation of the Local Government. Appeals lay with the Superintendent from the decisions of his assistants who were invested with such powers, not exceeding the powers of the Magistrate of First Class, as the Governor thought fit.

With the independence of India and the framing of the new Constitution, the operation of the Provincial Legislature had beed extended to the district and the district and the district has undergone a marked change. Under the provisions of the Sixth Schedule to the Constitution of India, a District Council with

Executive and Legistlative powers for managing the internal affairs of the tribes, their customs, manners, land rights, primary education, roads etc., was set up in 1952. In the South of the district, an autonomous region called the "Pawi-Lakher Region" was also set up with a Council having similar powers within the region. The traditional hereditary chieftainship had been abolished and the rights and interests of 259 Lushai chiefs and 50 Pawi-Lakher chiefs had been acquired by the Government with effect from 1st April, 1955 and 15th April, 1956 respectively, and the administration of the land under those chiefs had also been handed over to the District/ Rigional Council.

Mizo District Council

The Mizo District Council was inaugurated on 25th April, 1952 and has taken over the following subjects :

(1) Allotement of sites

(2) Forests, (other than Government Reserved Forests) since 1st March, 1960

(3) Regulation of jhuming, control and allotment of land for other agricultural purposes

(4) Establishment of Village Councils

(5) Village administration through Village Concils

(6) Inheritance of property, marriage and social customs

(7) Money-lending and trading by non-tribals

(8) Fishery

(9) Ferries

(10) Management and control of markets

(11) Assessment and collection of land revenue and the following taxes :—

(a) Taxes on land and buildings, agricultural taxes etc.

(b) Taxes on animals and grazing taxes

(c) Boat tax

(d) Taxes on professions, trades, callings and employments

(e) Taxes on entry of goods into markets and for sale therein

(f) Fishery revenue

(g) Tolls on persons viz., Zoram Buhchhun (Paddy tax or cash in lieu thereof)

Taxes on motor vehicles are still assessed and collected by Government on behalf of the District Council.

The Mizo District Council, in addition to the above mentioned functions, has also been functioning as the major executing agency for most of the development works under the Five Year Plans and has executed such works in regard to the development of rural water supply, rural communications etc. under the Local Development and Self-Help Schemes.

The Village Councils/Courts at the villages, Sub-ordinate District Council Courts at Aijal and Lungleh and the District Council Court at Aijal were inaugurated on 16th August, 1954 and since then have taken over the Administration of justice within their respective purview in Civil and Criminal cases.

Pawi-Lakher Regional Council

The Pawi-Lakher Regional Council was inaugurated on 23rd April, 1953 and has taken over the following subjects :—

(1) Allotment of sites

(2) Village Forest Revenues

(3) Regulation of jhuming

(4) Establishment of Village Councils/ Courts

(5) Village administration (through the Village Councils)

(6) Inheritance of property, marriage

(7) Social customs and practices

(8) Assessment and Collection of revenue and taxes The following taxes are collected by the Regional Council :—

(a) Land revenue, house tax, shop tax etc.

(b) Tolls on persons (paddy tax or cash in lieu thereof)

(c) Agricultural taxes

Forest revenue of the Region is assessed and collected by the State Forest Department.

(9) Village Concils/Courts at the villages and the Regional Council Court at Saiha were notified to function from 15th March, 1957 for administration of justice within their respective jurisdiction.

The division of the district into two subdivisions remains unchanged. The Aijal subdivision is in the charge of the Deputy Commissioner assisted by some executive officers. The Lungleh subdivision is placed in the charge of a Subvisional officer, and he is assisted by one Extra Assistant Commissioner. There are also Political Assistants who are also Assistants to the Deputy Commissioner placed at Champhai in the Aijal subdivision and Demagiri in the Lungleh subdivision.

Population

The population of Mizo District is 266,063 in 1961 as against 196,202 in 1951. This represents an increase of 35·6% during the two Censuses. The percentage variation of population in the State of Assam during 1951-1961 is 34.4. The phenomenal rise of the population in the district is due to natural increase as well as to better coverage this time. In the hill areas of Assam, the increase is 36%. The present population consists of 132,465 males and 133,598 females, i.e., 1009 females per 1000 males. Mizo District is the only district in the State where the number of females is greater than the number of male population. In the 1951 Census there were 1041 females per 1000 males. The Aijal subdivision has a population of 183,650 while Lungleh subdivision shares 82,413 of the total population of the district.

The density of population in the 1961 Census is 33 persons per square mile against 24 in 1951. This is the lowest density registered in the State, the highest density being registered by Nowgong which has 550 persons per square mile against 409 in 1951.

Though the 1961 Census reveals a phenomenal increase of population in this district rising from 196,202 in 1951 to 266,063 in 1961, it continues to lag behind all other Autonomous District of Assam. It has gained 69,861 persons in 1961 against 43,416 in 1951. In 1951 the district recorded the largest total increase among the Assam Hills Districts. But in the 1961 Census, it yielded place to the United Mikir and North Cachar Hills district which recorded the total increase of 114,286 (i.e. 69.08% increase).

Of the 266,063 people of the Mizo District, only 14,257 live in town while 251,806 live in villages. There is a definite tendency for rural people now to move towards the towns. In 1951, out of 196,202 only 6,950 lived in towns. The only town in the district is Aijal. It has an area of 5 square miles.

Mizo District where 117,097 of the total population i.e., 44.01% of the people are literates, is the most literate district in Assam. The percentage for the whole of the State is 27.36%.

In the Census of 1951, 775 displaced persons were enumerated. Most of these persons came form Chittagong in East Pakistan and Tripura State, mostly after Independence. A good number of them is leading a nomadic life.

The following table shows the variation in population during the last sixty years :

VARIATION IN POPULATION DURING THE LAST SIXTY YEARS (1901-1961)

Year	Persons	Variation	Males	Variation	Females	Variation
1901	82,434	..	39,004	..	43,430	..
1911	91,204	8,700	43,028	4,024	48,176	4,746
1921	98,406	7,202	46,652	3,624	51,754	3,578
1931	124,404	25,998	59,186	12,534	65,218	13,464
1941	152,786	28,382	73,855	14,669	78,931	13,713
1951	196,202	43,416	96,136	22,281	100,066	21,135
1961	266,063	69,861	132,465	36,329	133,598	33,532

ECONOMIC DEVELOPMENT

Economically, the Mizo District is very poor if not the poorest among the districts of the State. The reasons for economic backwardness are, however, many and varied. One of the principal reasons is lack of transport. The situation arising out of difficult transport is such that foodstuff transported into the district always has to be subsidised.

Agriculture

As is the case with all other districts of the State, agriculture forms the main occupation of the people in Mizo District. Here jhuming or shifting cultivation is practised. Paddy is the most important crop in the district. The other crops grown are potato, sweet potato, maize, cotton, ground nut, chillies, ginger, oranges, tea and coffee.

Occupation

The majority of the Mizo people still practise jhum cultivation, but during the two Five Year Plans, the Agriculture Department has been giving subsidies to the persons who reclaim land for wet paddy cultivation. As such many people evince keen interest in converting suitable lands for wet paddy cultivation thus lessening the degree of wasteful method of jhum cultivation and deforestation. Apart form agriculture, the Mizo people also keep pigs, goats, poultry and cattle. The arts and industries of the people are not of much importance, although the women still weave excellent cloths from their home grown cotton and the men are fairly good in basketmaking. The looms use in weaving are of the simplest type and are known as loin looms. During the last decade, many Mizo people have been enlisted in various Government offices, particularly in the Army and the Police.

Agricultural Schemes

Various schemes of agriculture were operated by the department in Mizo District during the First and Second Five Year plans. These are :—

I. **Grow More Food-cum-State Plan**—This scheme consists of the following :

(a) **Minor Irrigation**—During the First and Second Five Year Plans, an amount of Rs. 277,111.13 was spent for irrigation. An area of 4,629.76 acres was benefitted by it and the additional production amounted to 46,297 cwt. 50 lbs.

(b) **District Seed Farms**—Altogether 9 Seed Farms were opend during the two plans and the total area of the Farms is 125 acres.

(c) **Popularisation of Fertilisers**—Different kinds of fertilisers such as Ammonium Sulphate, Ammonium Sulphate Nitrate, Superphosphate, Bonemeal, Mixed Fertilisers etc. were distributed and the total quantity distributed is 3,131 maunds 13 seers.

(d) **Japanese Method of Paddy Cultivation**—The Japanese Method of paddy cultivation has been introduced in the Mizo District during the First Five Year Plan. Since the district is a hilly area, there are not many places where the Japanese method of paddy cultivation can be practised. As such, the increased yield of paddy was not big. However, the practice is beneficial to those cultivators who have suitable land for adopting this method.

(c) **Green Manuring**—Green Manuring seeds were also distributed during the first two Plans. Altogether, an amount of 260 maunds of different varieties of seeds such as dhaincha, sesbania, ghogamedelna, arahar, soya bean etc. was disposed of.

(f) **Soil Conservation and Counter Bunding**—In Mizo District, soil conservation works have been carried out by making dry and wet terracing. During the First and Second Five Year Plans, Rs. 27,982.00 was spent for the purpose, and the total benefitted area was 687 acres.

II. **Article 275 Schemes**—Mizo District, one of the Autonomous Districts of the State, enjoys the benefit of being under the Article 275 Programme. This Article 275 Programme is a supplementary programme to that of the State General Plan for the development of Autonomous Districts. Various programmes executed under this Scheme during the First and Second Five Year Plans are as follows :

(a) **Extension of West Paddy Cultivation**—The Scheme has been executed from the year 1955-56. The total expenditure was Rs. 184,690.86 P. and the area benefitted 1,291 acres, an additional production was 580 tons.

(b) **Land Reclamation**—The Land Reclamation work was excuted both by the Agriculture Department and the Development Department

through their Development Blocks. The expenditure incurred by the Agriculture Department for the purpose was Rs. 211.332. 92 P. An area of 1,145 acres was benefitted by it and the additional production figure was 16,845 cwt. The area reclaimed by the Community Development Block was approximately 2,332 acres and the total achievement in the Mizo District during the two Plans was approximately 3,477 acres.

(c) **Subsidised Supply of Tools and Implements**—From all the schemes operated by them, the Agriculture Department distributed different tools and implements to the cultivators. A total number of 9,143 tools and implements consisting of kodalis, jumper, shovel, ploughs etc. was distributed.

(d) **Subsiding of Model Farms**—About 30 Model Farms were selected in Mizo District and the cultivators (owners of the farms) were given barbed wire of different weight according to the size of the farms. The weight varies from 5 to 10 maunds.

(e) **Distribution of Seeds and Manures**—Both the Agriculture Department and the Multi-purpose Community Development Blocks distributed seeds and manures. The seeds distributed were paddy, sweet potato, potato, kodru etc.

(f) **Establishment of Demonstration Farms**—There are three Demonstrations Farms in the district, namely, (1) Aijal Demonstration Farm, (2) Thenzawl Demonstration Farm and (3) Lengpui Demonstration Farm, and the total acreage is 13.

III. Plant Protection Schemes—Previous to 1958-59, there was not much work on Plant Protection but from the latter part of that year, due to Mautam followed by multiplication of rats, the Rat Killing Scheme was introduced. The Anti-Rat Campaign Committees at the District and Subdivisional levels were formed to devise ways and means of holding the campaigns in different sectors. Pesticides and fugicides were distributed to the cultivators.

IV. Border Relief Scheme and Horticultural Scheme—Under these two schemes, different varieties of plants and grafts were distributed.

V. Food Shortage Scheme : This scheme was introduced due to the serious food shortage caused by the Mautam Famine in the district. The object of the scheme was to aid the cultivators as relief resources. Seeds of different crops were distributed to the cultivators during 1960-61.

VI. Local Manurial Resources : The main source of this manure is from rural compost prepared by the villagers themselves. Of course their work on this matter was supervised by the staff of the Agriculture Department. The total production of rural compost was about 13,000 tons approximately.

VII. Scheme for High Altitude Paddy : Under the Scheme, one Research Sub-Station at Aijal (Chite) was established in the year 1959-60. The station occupies 1.5 acres. Crop harvested was paddy only and the quantity 670 mds. approximately.

VIII. Rehabilitation of Tribal Families—The main work executed were establishment of one Model Farm at Lengpui and Land Reclamation. The area occupied by the Farm was 5 acres. The total expenditure incurred for Land Reclamation was Rs. 42,000·00 and the area reclaimed was 210 acres with additional outturn of 105 tons of paddy. Seeds were distributed to the cultivators rehabilitated in the model village free of cost.

IX. Field Management Committee—Altogether 211 Field Management Committees were established in the district of which 132 were registered.

Thus various programmes were introduced in the district for the improvement of agriculture. Some progress has of course been effected, but due to the peculiarity of the topography and the practice of jhum cultivation, tangible results are difficult to be achieved. On the whole, not much change has been made in the sphere of agriculture.

ANIMAL HUSBANDRY AND VETERINARY SERVICES

In the pre-Plan period, there was one Veterinary Dispensary with one Veterinary Assistant Surgeon looking after the health of livestock population scattered in an area of 8,314 sq. miles. Besides, there was a Livestock Demonstrator under the Agriculture

Department looking after the animal husbandry side. The activity of the Department suffered badly in the pre-Plan period due to this dual control. With the launching of the First Five Year Plan, the Livestock Section of the Agriculture Department was transferred to the Animal Husbandry and Veterinary Department to bring about co-ordination and intensify development work. During the first two Plans, the following institutions were established in the district :

(i) Vaccination First Aid Veterinary and Animal Husbandry Centre, Kolasib, (ii) Aijal Block Veterinary Dispensary (iii) Verterinary Dispensary-cum-Artificial Insemination Centre, Kolasib, (iv) Veterinary Dispensary, Lungleh, (v) Rural Animal Husbandry Centre, Thenzawl and (vi) Poultry Farm at Aijai

The Deperment has extended its demonstration units considerably within the limited budget. These demonstration and breeding units have helped much in grading up pigs and Red Rhode Island and White leg horn birds are found in all important villages in the district. The performances of the above breeds and graded species are better than those of the local strains. This has increased the production of pork, fats (used as cooking media), meat and eggs in the district. Besides, grants-in-aid and Border Relief grant given to the people in cash and in kind for the improvement of livestock and poultry have helped the people much. The Mizo people take care of their pigs and birds more then other animals. There are about 56,000 pigs and 1,106,009 poultry in the district. Besides, there are 42,897 cattle, 33,703 goats and 3,408 sheep. There is ample scope for the development of all these animals.

INDUSTRIES

Mizo District is one of the most Industrially backward districts of Assam. The few industries found in existence in the district are the traditional cottage and village industries. The most important of these are weaving (loin-loom), carpentry, blacksmithy, cotton g'nning and spinning, bee-keeping, cane and bamboo works, gur-making and tailoring.

During the First and Second Five Year Plans, the Industries Department implemented schemes of financial aid for development of the existing cottage and village industries and for the establishment of new industries either in the form of grants-in-aid or industrial loan under the Assam Aid to Industries Act, 1959. The following are the expenditures during the two Plans under these Schemes :—

1. Grants-in-aid	Rs.	183,294.88 P.
2. Industrial Loan	Rs.	13,000.00 P.
Total	Rs.	196,294.88 P.

Besides these schemes of financial aid, the Industries Department started two Production Centres for carpentry and blacksmithy and one Training-cum-Production Centre for carpentry and blacksmithy in the district.

Though proper survey of the industrial field in Mizo District has not been done, the district may possess some prospects and scope for establishment and development of industries like oil extraction, cotton ginning and baling, fruit preservation, and dehydration, gingerdrying, saw mills, timber treatment, cane and bamboo works, hand paper making and coffee pressing.

There is no major industry located in the Mizo District

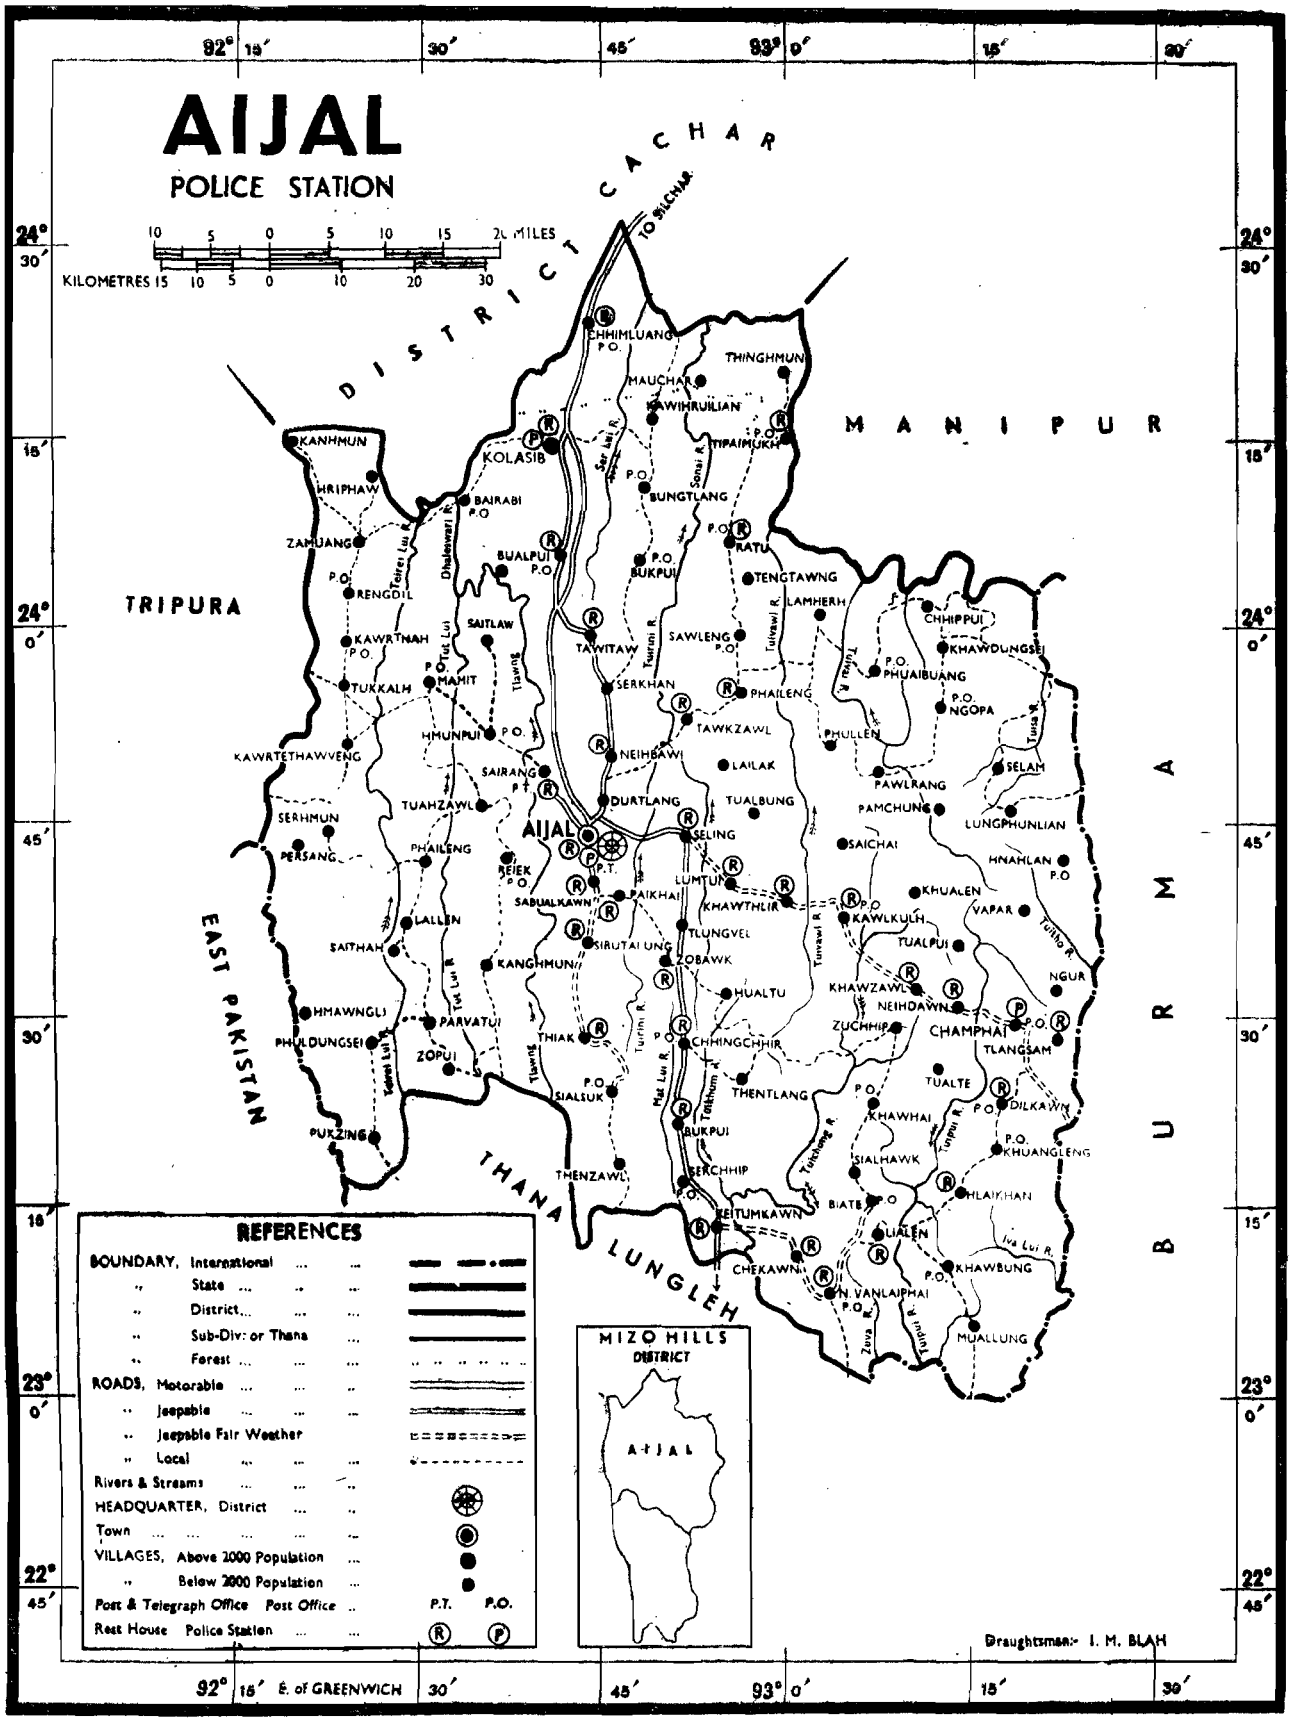

FISHERIES

The topography of the Mizo District is not favourable for the development of fisheries. The few areas of flat land are already covered by wet rice cultivation and, as a result, there is a very little scope for the development of pisciculture. There is practically no beels, marshy area, or Government Fishery Farms except some small beel areas belonging to private persons and also some natural streams and rivers belonging to the District Council. An acute scarcity of water during dry season badly affects pisciculture.

The Fishery Department of the district which has come into existence since the last part of January 1959 began with survey works of the then existing fisheries and with

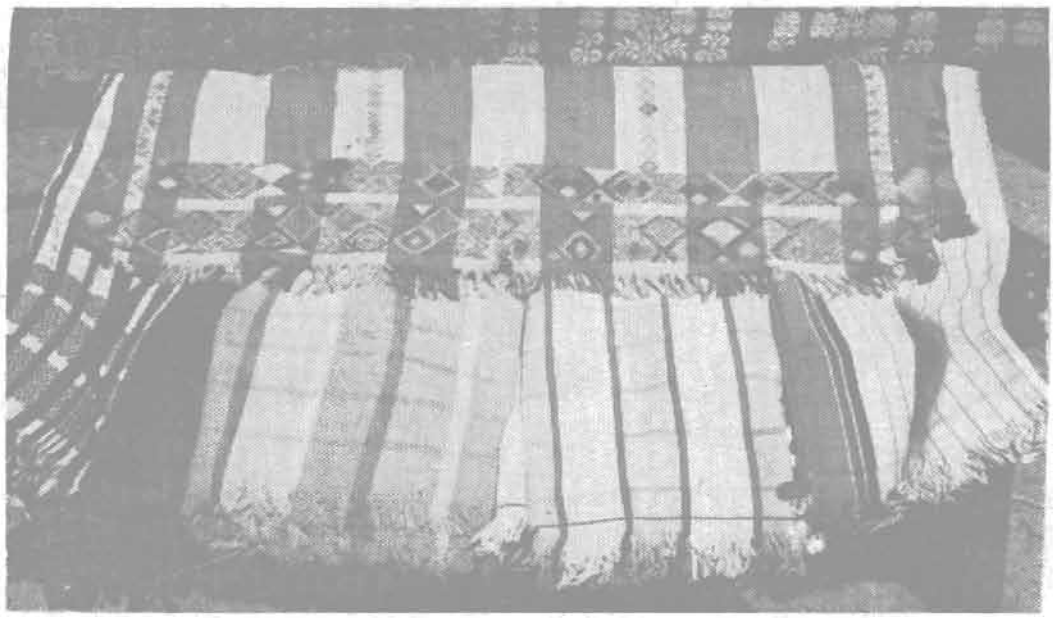

seed collection in the Tlawng river. Some fish seeds were distributed, but the improvement made during the First Five Year Plan was insignificant.

During the Second Five Year Plan, the Department distributed about Rs. 91,000.00 as subsidy under the Border Relief Scheme and 208,000 fish seeds among the deserving pisciculturists. The piscicultural practice is confined only to jheel areas due to lack of flat land areas and on an individual basis. No other scheme has yet been taken up by the Fishery Department. The unfavourable topography and the scarcity of water in the district stand in the way of fishery development.

WATER COLLECTION (MIZO)
(Courtsey — Publicity, Assam)

INTRODUCING THE STATISTICS

The All-India Census Publications published by the Union Government contain data only down to the level of a district in some cases, or to the level of a police station in other cases. Data regarding each village cannot be had from the Central Government Census Publications. But the data down to the level of a village are very essential for the purposes of the State Government and the administration in the districts and subdivisions. So for the first time, the District Census Handbooks were compiled and printed for each district of Assam in 1951. The editing and compilation was done by the Superintendent of Census Operations, but the printing and expenditure thereof was borne by the State Government. The District Census Handbooks have become very popular ever since, because they are needed not only by Government and the Deputy Commissioners and Subdivisional Officers, but also by the Local Bodies and the general public. They are absolutely essential for the purposes of delimitation of constituencies, the establishment of Panchayats, the determination of quota of civil supplies, the establishment of police stations and many other administrative matters required by the State Government. It has, therefore, been decided that in the 1961 Census also, the District Census Handbooks should be edited and compiled by the Superintendent of Census Operations and printed at the cost of the Government of Assam.

The Primary Census Abstracts given in the 1951 Census will now appear in the form of Village Directories which not only give detailed Census data for each village, but they also give such other informations as the existence of communication facilities, drinking water facilities, educational facilities, Scheduled Castes and Scheduled Tribes and the different categories of workers. The Village Directories also give us the area in acres of each village, if the village has been cadastrally surveyed and if the area figure is available, and they also give us the number of literates and the number of workers classified according to the nine categories of the Standard Industrial Classification adopted by the Government of India. Such informations are furnished for each village and for each block of a ward of a town. Thus the Directory furnishes information on the primary economic activities of each village or ward of a town and the literacy proportion of the population. This abstract is useful therefore, not only for the State Government and the Local Bodies for their administrative purposes but they are also in great demand by various Ministries of the Union Government like the Ministry of Education, Ministry of Labour and Employment, Ministry of Food and Agriculture and the Planning Commission. These data are also required for all sample surveys, both rural and urban, based on villages or wards of a town. The District Census Handbooks also contain tables on mother tongue, religion and the various tables specially prepared for Scheduled Tribes and Scheduled Castes of each district. Official statistics relating to vital statistics, statistics of household and small-scale industries, administrative statistics and other statistics relating to various activities of Government, especially those connected with the First and Second Five Year Plans, have also been given. There is therefore, no doubt that the District Census Handbooks of the 1961 Census will furnish most of the data that are required for administrative as well as for planning and development purposes.

Before 1951, the population had been classified by religion ; but at the 1951 Census, the economic classification was substituted for the classification based on religion. In 1951, the people had been divided into two broad livelihood categories, namely the agricultural classes and the non-agricultural classes, and these two classes had again been sub-divided into four classes each. Each of the eight livelihood classes was again divided into three sub-classes with reference to their economic status, namely—

(i) Self-supporting Persons ;
(ii) Non-earning Dependents and
(iii) Earning Dependents

In the 1961 Census, the classification based on livelihood has been done away with and the basis of the classification now is WORK. People have been divided into two classes, the Workers and Non-Workers. The working population has been divided into nine categories of workers namely—

I. Working as Cultivator

II. Working as Agricultural Labourer

III. Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV. Working at Household Industry

V. Working in Manufacturing other than Household Industry

VI. Working in Construction

VII. Working in Trade and Commerce

VIII. Working in Transport, Storage and Communications

IX. Working in Other Services

The working population has been classified separately according to the returns relating to occupation and industry. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely Industrial nor an Occupational Classification of the population, but it was a combination of both. There were only 10 divisions and 88 subdivisions of Industries and Services. In the 1961 Census, the National Classification of Industries and Occupations adopted by the Government of India has been used also for the Census and there are more than 300 Occupational Families and 300 Industrial Minor Groups for which figures are given for the total population sex-wise. Another unique feature of the 1961 Census is that all these Economic Tables are prepared on the basis of the principal work of a person.

Non-workers have again been classified into eight categories as follows :—

1. A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.
5. A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.
6. A convict in jail (an undertrial prisoner is shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

In the 1951 Census, the population was shown according to certain units known as Census Tracts. These Tracts were selected by the Superintendent of Census Operations on an ad hoc basis and they may constitute one Police Station, two Police Stations or even three Police Stations and they may also consist of part of a Police Station only. Urban areas of each district were treated as separate Tracts in the 1951 Census. In the 1961 Census, I have taken Police Stations only as units of Census Divisions and so all census data are given down to the level of a Police Station. The exception is that urban areas are treated as separate entities for the Subdivision.

ABBREVIATIONS OR NOTATIONS USED IN THE VILLAGE DIRECTORY

As all details cannot be given in the Village Directory, certain abbreviations and notations have been used for the sake of easy reproduction and printing. The following notations have therefore been used in the Village Directory.

NOTATIONS

1. Transport and Postal Facilities

(i) Road Bridle Path Metalled Road Tarred Road	'R'
(ii) Railway	'Rly'
(iii) Postal Facilities	
Branch Post Office	'BO'
Sub-Post Office	'SO'
Extra Departmental Branch Office	'Edbo'
Extra Departmental Sub-Office	'Edso'
Central Sub-Office	'CSO'

2. Educational Institutions

(i) Primary, Basic, Tol, Muktab, Night, Nursery School	'P'
(ii) Middle School (M.E. & M.V.)	'M'

(iii) High School or Higher Secondary	'H'
(iv) Higher Institutions including Colleges	'C'
(v) Technical Institutions	'T'

3. Drinking Water Supply

(i) Tanks or Beels	'Tk'
(ii) Kachha well	'Kw'
(iii) Pipes and Tube wells or Ring wells	'S'
(iv) Pucca well	'Pw'
(v) River, Running Stream or Springs	'Riv'

P. S. :—Distance of the items is considered up to five miles

4. Bazar Day and Medical Facilities

(i) Weekly Bazar	'Wb'
(ii) Daily Bazar	'Db'
(iii) Dispensaries	'D'
(iv) Hospitals	'Hos'

5. Veterinary Facilities and whether the village is covered by Community Development or National Extension Service Blocks

(i) Government Veterinary (ii) Private Veterinary (iii) Other Methods	'V'
(iv) Community Development	'Cd'
(v) National Extension Service	'Nes'

DEFINITIONS

The following definitions used in the 1961 Census are reproduced below for easy reference :

1. Town

For the purpose of the 1961 Census, a town means a Municipality, a Town Committee, or a Cantonment and any other area having the following urban characteristics :

(i) If the population is not less than 5,000

(ii) If the density is not less than 1,000 per square mile

(iii) If the three-fourth of the working population is outside agriculture

2. Village

In Assam, a village means a cadastral village where there has been a cadastral survey. In the Plains districts where there has been no cadastral survey, it is taken to be a gaon together with its adjacent 'tolas', 'paras' etc. provided that none of these independent collections of houses are so large or so distant from cadastral village, with distinct individual names. In the Hills districts, the most convenient definition of a village is that it is a collection of houses bearing a separate name and situated with certain boundaries traditionally recognized by the villagers.

3. House

It is a structure or part of a structure inhabited or vacant or a dwelling, shop, a shop-cum-dwelling or a place of business, workshop, school etc. with a separate entrance.

4. Household

It is a group of persons who commonly live together and take their meals from a common mess or kitchen unless the exigencies of work prevent any one of them from doing so.

5. Scheduled Tribes

They are members of the backward tribes who generally occupy the hilly areas or other rather inaccessible parts of the Indian Union. They are generally very backward and so the Government of India has prepared a schedule of such tribes for the purpose of giving them facilities in education and employment so that they may come up to the level of the other advanced people of India as soon as possible. Scheduled Tribes may belong to any religion.

6. Scheduled Castes

They belong to the lowest rung of the castes of the Hindu and Sikh religions. In order to help them rise to the level of other more advanced societies in India, the Government has made a schedule of such people—hence the name Scheduled Castes.

7. Houseless persons

They are people who have no houses to dwell and generally live in pavements or open places, such as beggars, who beg in people's houses by day and sleep under the trees by night.

8. Institutional populations

They are people who are inmates of institutions, like hostels, boardings, jails etc.

9. Worker

Is a person who is working as a cultivator, an agricultural labourer, at a household industry or he may be doing any other work but he must earn some income. Work includes not only actual work but also effective supervision and direction of work.

10. Non-worker

Is a person who is either not doing any work or who does some work from which he does not earn any income. For example, a pensioner and a rentier who earn some income but if they do not do any other work they are classified as non-workers. On the contrary, students and housewives may be doing some work either in school or in the house but as they do not earn any income they are classified as non-workers for the purpose of the Census.

11. Cultivator

For purposes of the Census a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government, (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

12. Agricultural Labourer

Is a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share, such as share of produce. The labourer should have no right of lease or contract on land on which he works nor should he be responsible for taking decision as to which crops to sow and when or taking the risk of cultivation. A share of the produce goes to him only as wages.

13. Household Industry

A household industry is defined as an industry conducted by the head of the household himself or mainly by members of the household at home or within the village in rural areas and only at home in urban areas.

TABLES

Besides the Village Directory which contains the Primary Census Abstracts for each village in the district in addition to other important informations relating to the village, all A-series tables with their appendices relating to the general population ; all B(i) i. e. General Economic Tables except B-II ; all C-series i. e. Social and Cultural Tables except C-I, C-IV & C-VI ; and all special tables for Scheduled Castes and Scheduled Tribes are reproduced in this volume. A short explanatory note for each of the above census tables presented in this volume is also given.

A—GENERAL POPULATION TABLES

TABLE A-I

AREA, HOUSES AND POPULATION

This is the basic population table for the Census. This table furnishes the data for each police station and town separately. The area is given both in square miles and square kilometres ; but the density is calculated from square miles only. In addition to the data on area and density, this table gives the number of inhabited and uninhabited villages, occupied residential houses and the population separately for males and females according to the 1961 Census for both rural and urban areas separately.

The area figures of the district and police stations are as supplied by the Director of Land Records and Surveys, Government of Assam. The area figures of the towns are collected from the respective Deputy Commissioners and Subdivisional Officers, Local Bodies and in some cases, from the Local Self-Government Department of the Government of Assam.

Appendix III to Table A-I

This table furnishes the figures for houseless and institutional population for total, rural and urban areas separately. For the purpose of studying different characteristics, this population is included in the household population.

A-I—AREA, HOUSES AND POPULATION

Note :—1. The Sq. km. and density figures of Urban areas of Police Station/Subdivision/District are worked out by using the area figures corrected upto 2 places of decimals. In addition to this, the area figures relating to Sq. km. are further adjusted to make the Police Station/Subdivision/District totals tally.

2. Town treated as such for the first time in 1951 Census which continue as town in 1961 Census is shown with asterisk(*) on the left.

TABLE A-II : VARIATION IN POPULATION DURING SIXTY YEARS

This table furnishes population data for the last seven Censuses from 1901 to 1961 and the variation of population in each decade. This is a very important table as it gives the growth of population from decade to decade and in the absence of reliable vital statistical data, forms the main source for estimation of population. One of the main changes in this table since the last Census is that percentage variation is given from decade to decade.

District	Year	Persons	Decade Variation	Percentage Decade Variation	Males	Females
1	2	3	4	5	6	7
MIZO HILLS	1901	82,434	..	..	39,004	43,430
	1911	91,204	+ 8,770	+10.64	43,028	48,176

	1931	124,404	+ 25,998	+26.42	59,186	65,218
	1941	152,786	+ 28,382	+22.81	73,855	78,931
	1951	196,202	+ 43,416	+28.42	96,136	100,066
	1961	266,063	+ 69,861	+35.61	132,465	133,598

A-III—VILLAGES CLASSIFIED BY POPULATION

This table gives figures for the number and population of villages in the various population groups which are less than 200, 200-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10,000 and above. The group less than 500 of the last Census has been split up into two groups namely, less than 200 and 200-499.

District/Subdivision/ Police Station	Total number of inhabited villages	Total Rural Population			I—Villages with less than 2,000 population—(Contd.)

TABLE A—IV

TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

This table gives the growth of each town since 1901. This table furnishes the areas of the towns of the 1961 Census both in square miles and square kilometres. For the purpose of this table, all towns are divided into 6 classes according to population. As in table A-II, the percentage variation of each town is given from decade to decade.

Class I—100,000 and above
Class II—50,000-99,999
Class III—20,000-49,999
Class IV—10,000-19,999
Class V—5,000-9,999
Class VI—less than 5,000

District	Name of Town	Status of Town	Year	Area		Persons	Decade Variation	Percentage Decade Variation	Males	Females
				Sq. miles	Sq. Km.					
1	2	3	4	5	6	7	8	9	10	11
				CLASS V—(5,000—9,999)

			1961	5.00	12.95	14,257	+7,307	+105.14	7,630	6,627

Note : Town treated as such for the first time in 1951 Census which continue as town in 1961 Census is shown with asterisk (*) on the left.

B — GENERAL ECONOMIC TABLES

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This table is prepared separately for total, rural and urban population and it gives the total population classifying the nine industrial categories of workers and non-workers. Each category is divided into five age-groups namely, 0-14, 15-34, 35-59, 60+ and Age not stated. This is the basic economic table. The classification of workers and non-workers by age-groups is a special feature of the 1961 Census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons.

TABLE B-III

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

Part A of this table relates to urban areas only. Each of the nine categories of workers and non-workers is shown by literacy and educational levels. This is an important table as it shows the employment of persons of different educational levels among the various categories of workers. This information may be of much use for the assessment of educational qualification of available man-power.

Part B of the table relates to rural areas. The educational level is confined only to (i) Literate (without educational level), (ii) Primary or Junior Basic and (iii) Matriculation and above.

TABLE B-IV

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN CULTIVATION BY SEX AND CLASS OF WORKER

This table corresponds more or less to the Union Table B-III of the 1951 Census.

It divides the working population, other than persons at work in cultivation, industrially into nine Divisions, 45 Major Groups, 343 Minor Groups and into four statuses of employment. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only ten divisions and eighty eight subdivisions of industries and services. The present classification follows the National Classification of Industries adopted by the Government of India with some suitable minor modifications within the framework. This table deals only with the industrial classification of workers. The workers in Household Industries are classified into two employment statuses, namely, Employee and Others. The workers in Non-Household Industries are classified by the four statuses of emp'oyment, namely, Employer, Employee, Single Worker and Family Worker against Employer, Employee and Independent Worker in the 1951 Census. An Employer is a person who has to employ other persons in order to carry on the business from which he secures his livelihood. He is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others is **not** an employer, even if he has the power to employ another person (s) in his office on behalf of his own employer (s).

An Employee is a person who usually works under some other person for salary or wages in cash or kind. Persons employed as Managers, Superintendents, Agents, etc. and in that capacity, employ or control other workers on behalf of their own employers are only employees.

A Single Worker is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is treated as a Single Worker.

A Family Worker is a member who works without receiving wages in cash or in kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The Family Worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives.

This table has three parts. Part A restricts itself to an account solely of persons at work at Household Industry. It presents data for employee and others only for major groups separately for total, rural and urban.

Part B deals with the persons at work in non-household industry, trade, business, profession or service by the four statuses of employment only for total and urban. This part of the table also gives data only for major groups.

Part C of the table furnishes data for each minor group of the Industrial Classification in respect of persons at work other than cultivation for total and urban. It does not classify the workers by status of employment.

This is a very important economic table as it gives the employment position in various sectors of the economy.

Explanations of the codes according to the Indian Standard Industrial Classification, so far as this district is concerned, are given below :—

DIVISION 0 : AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

Major Group	Description	Minor Group
00	**Field Produce & Plantation Crops**	
	Production of crops (including vegetables) not covered by production of cereal crops, pulses, fibres, oilseeds, sugarcane and other cash crops	005
	Production of fruits and nuts in plantations, vines and orchards	006
	Production of other agricultural produce (including fruits and nuts not covered by code 006 and flowers) not covered above	009
01	**Plantation Crops**	
	Production of tea in plantation	010
	Production of tobacco in plantation	013
	Production of other plantation crops other than coffee, rubber, ganja, cinchona and opium etc.	015
02	**Forestry and Logging**	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Production of gums, resins, lac, barks, herbs, wild fruits & leaves by the exploitation of forests	025
03	**Fishing**	
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
04	**Livestock and Hunting**	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for production of honey, wax and collection of honey	044

DIVISION 1 :	MINING AND QUARRYING	
Major Group	Description	Minor Group
10	**Mining and Quarrying**	
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109

DIVISION 2 & 3 :	MANUFACTURING	
20	**Foodstuffs**	
	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and foodgrains	200
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
22	**Tobacco Products**	
	Manufacture of bidi	220
23	**Textile-Cotton**	
	Cotton dyeing, bleaching	233
	Cotton weaving in handlooms	235
	Manufacturing of cotton nets	238
25	**Textile-Wool**	
	Embroidery and art work in woolen textile	256
26	**Textile-Silk**	
	Dyeing and bleaching of silk	261
	Weaving of silk textile by handloom	264
27	**Textile-Miscellaneous**	
	Making of textile garments including rain coats and headgear	273

Major Group	Description	Minor Group
28	**Manufacture of Wood and Wooden Products**	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	**Paper and Paper Products**	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper & paper board in handmade	291
30	**Printing and Publishing**	
	Printing and publishing of newspapers and periodicals	300
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	**Leather and Leather Products**	
	Manufacture of shoes and other leather footwear	311
	Repair of shoes & other leather footwear	314
	Repair of all other leather products except footwear	315
32	**Rubber, Petroleum, and Coal Products**	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
33	**Chemicals and Chemical Products**	
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of soap and other washing and cleaning compounds	336
34-35	**Non-Metallic Mineral Products other than Petroleum and Coal**	
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of earthen image, busts and statues	355
36	**Basic Metals and their Products except Machinery and Transport Equipment**	
	Manufacture of iron and steel furniture	364

Division 2 & 3 :	MANUFACTURING (Concluded)	
Major Group	Description	Minor Group
38	**Transport Equipment**	
	Repairing and servicing of motor vehicles	384
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
39	**Miscellaneous Manufacturing Industries**	
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metal	393
	Manufacture and repair work of goods not assignable to any other group	399

DIVISION 4 :	CONSTRUCTION	
40	**Construction**	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of waterways and water reservoirs such as bund, embankments, dam, canal, tank, tubewell, wells	403

DIVISION 5 :	ELECTRICITY, GAS, WATER & SANITARY SERVICES	
50	**Electricity and Gas**	
	Generation and transmission of electric energy	500

DIVISION 6 :	TRADE AND COMMERCE	
60-63	**Wholesale Trade**	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere)	601
	Wholesale trading in intoxicants such as wine, liquors	604
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606

Major Group	Description	Minor Group
	Wholesale trading in medicines and chemicals	610
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
	Wholesale trading in all goods not covered above	639
64-68	**Retail Trade**	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in animals	647
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in petrol, mobiloil and allied products	655
	Retail trading in stationery goods and paper	661
	Retail trading in other household equipments not covered above	664
	Retail trading in hardware and sanitary equipments	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in electrical goods like electric fan, bulb	682
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Book-selling	688
	Retail trading in goods unspecified	689
69	**Trade and Commerce (Miscellaneous)**	
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw etc.	699

DIVISION 7 : TRANSPORT, STORAGE AND COMMUNICATIONS

Major Group	Description	Minor Group
70-71	**Transport**	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Transporting by other means not covered above	709
	Services incidental to transport such as packing, crating travel agency	710
73	**Communications**	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732

DIVISION 8 : SERVICES

80	**Public Services**	
	(This does not include Govt., Quasi Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industrial groups)	
	Public service in police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative department and offices of quasi-government organisation, municipalities, local boards etc.	805
	Public service in administrative departments and offices of State Governments	809
81	**Educational and Scientific Services**	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	**Medical and Health Services**	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821

Major Group	Description	Minor Group
83	**Religious and Welfare Services**	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, (this includes missions, ashrams and other allied organisations)	830
	Religious and other allied services rendered by pandit, priest, preceptors, fakir, monk	831

APPENDIX TO TABLE B-IV PART C

MIZO HILLS DISTRICT

Minor groups having less than 1% of workers of the respective Division (less than 0.5% in case of Minor Groups of Division 2 & 3), have been shown in this Appendix.

The following abbreviations have been used :—

HI—Household Industry

NHI—Non-Household Industry

M—Males

F—Females

005 Total NHI (M 1) ; 006 Total NHI (M 4) ; 010 Total NHI (M 2) ; 015 Total NHI (M 1) ; 021 Total NHI (M 1, F 3), Urban NHI (M 1, F 3) ; 025 Total NHI (M 4, F 1) ; 200 Total HI (M 1), NHI (M 3) ; 202 Total HI (M 11), NHI (M 1) ; 206 Total HI (M 10), NHI (M 5), Urban HI (M 1) ; 220 Total HI (F 1), NHI (F 2), Urban HI (F 1), NHI (F 2) ; 238 Total NHI (F 5), Urban NHI (F 5) ; 256 Total HI (F 3), Urban HI (F 3) ; 264 Total HI (M 1), Urban HI (M 1) ; 280 Total HI (M 2), NHI (M 8), Urban HI (M 1), NHI (M 6) ; 282 Total HI (M 6), NHI (M 12), Urban HI (M 6), NHI (M 12) ; 289 Total HI (M 9) ; 291 Total NHI (M 1) ; 300 Total HI (M 1), NHI (M 9), Urban HI (M 1), NHI (M 9) ; 303 Total HI (M 1), NHI (M 4), Urban HI (M 1), NHI (M 3) ; 311 Total HI (M 1), NHI (M 2), Urban HI (M 1) ; 314 Total HI (M 1), NHI (M 7), Urban HI (M 1), NHI (M 6) ; 315 Total HI (M 1) ; 320 Total NHI (M 2), Urban NHI (M 2) ; 321 Total NHI (M 5), Urban NHI (M 5) ; 331 Total NHI (F 1) ; 336 Total NHI (M 1) ; 343 Total HI (M 12), NHI (M 6), Urban HI (M 12), NHI (M 4) ; 355 Total HI (M 1), Urban HI (M 1) ; 384 Total HI (M 1), NHI (M 12), Urban HI (M 1), NHI (M 10) ; 386 Total NHI (M 1), Urban NHI (M 1) ; 392 Total HI (M 9), NHI (M 7), Urban HI (M 9), NHI (M 6) ; 393 Total HI (M 1), NHI (M 3), Urban HI (M 1), NHI (M 3) ; 399 Total HI (M 1), NHI (M 1), Urban NHI (M 1) ; 403 Total NHI (M 1), Urban NHI (M 1) ; 600 Total NHI (F 2) ; 601 Total NHI (M 4), Urban NHI (M 1) ; 604 Total NHI (M 1, F 2) ; 606 Total NHI (M 2, F 2) ; 610 Total NHI (M 3) ; 639 Total NHI (M 2), Urban NHI (M 2) ; 645 Total NHI (M 7, F 2), Urban NHI (M 7) ; 647 Total NHI (M 2), Urban NHI (M 2) ; 655 Total NHI (M 2), Urbad NHI (M 2) ; 661 Total NHI (M 5, F 1), Urban NHI (M 4, F 1) ; 671 Total NHI (M 2), Urban NHI (M 1) ; 672 Total NHI (M 1, F 4), Urban NHI (M 1, F 4) ; 685 Total Total NHI (F 1) ; 686 Total NHI (F 1) ; 688 Total NHI (M 6), Urban NHI (M 5) ; 699 Total NHI (M 1) ; 700 Total NHI (M 1) ; 703 Total NHI (M 1) ; 710 Total NHI (M 2) ; 731 Total NHI (M 1, F 2) ; 732 Total NHI (M 3) ; 810 Total NHI (M 6), Urban NHI (M 1) ; 812 Total NHI (M 3, F 4) ; 821 Total NHI (M 14), Urban NHI (M 5) ; 832 Total NHI (M 4) ; 840 Total NHI (M 5), Urban NHI (M 2) ; 851 Total NHI (M 5), Urban NHI (M 5) ; 852 Total NHI (M 3) ; 853 Total NHI (M 1), Urban NHI (M 1) ; 860 Total NHI (M 3, F 1), Urban NHI (M 3, F 1) ; 871 Total NHI (M 4), Urban NHI (M 4) ; 881 Total NHI (M 6) ; 882 Total NHI (M 34, F 11), Urban NHI (M 20) ; 883 Total NHI (M 5), Urban NHI (M 3) ; 884 Total NHI (M 11), Urban NHI (M 8) ; 885 Total NHI (M 7), Urban NHI (M 5).

TABLE B-V

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This is a new table for the 1961 Census. As discussed earlier in case of table B-IV, the classification adopted at the 1951 Census was a combination of industrial and occupational. Two separate tables are therefore prepared on the basis of industry and occupation of the workers in this Census.

This table classifies the workers other than at cultivation into 11 Occupational Divisions, 75 Groups and 331 Families according to their occupations. This classification follows the National Classification of Occupations adopted with minor modifications within the frame work. It gives data for each family of the National Classification of Occupations separately for total and urban and for persons, males and females, and thus brings out the distribution of occupations among males and females.

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

MIZO HILLS DISTRICT

Families having less than 1% of the workers of the respective Division, (less than 0.5% in case of families of Division 7-8), have not been shown in this table, but are given in the appendix to this table. Divisions thus affected are marked with an asterisk (*).

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

This table is prepared only for urban areas and only up to the Division of the National Occupational Classification. The population under each Occupational Division is classified by the five age-groups ; 0-14, 15-34, 35-59, 60+ and Age not stated and further classified according to the broad educational levels. This table is likely to give useful informations about those occupations which attract personnel.

TABLE B-VII

Part A of this table shows persons working principally (i) as Cultivators or (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer.

Part B of this table shows the Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also workers engaged in Household Industry.

Table B-VII is prepared separately for total, rural and urban population. Part A of the table is a cross tabulation in the case of persons whose principal and secondary works are any two of (i) Cultivation, (ii) Agricultural Labour and (iii) Household Industry. This table is important as it shows the extent to which cultivation is supplemented by household industry or vice versa.

Part B of table B-VII gives data in the case of persons who are principally engaged in Non-Household Industry etc., and also engaged in Household Industry as a Secondary work.

Divisions and Major Groups appearing in the table are described below :

DIVISION 2 & 3 : Manufacturing

Major Group 20 : Foodstuffs
„ „ 23 : Textiles-Cotton
„ „ 27 : Textiles-Miscellaneous
„ „ 28 : Manufacture of wood and wooden products

DIVISION 6 : Trade and Commerce

Major Group 64-68 : Retail Trade

DIVISION 8 : Services

Major Group 80 : Public Service (This does not include Govt., Quasi Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industrial groups)
„ „ 81 : Educational and Scientific Services
„ „ 82 : Medical and Health Services
„ „ 88 : Personal Services

B-VII PART A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

TABLE B-VIII

This table shows the persons unemployed aged 15 and above by sex, broad age-groups and educational levels.

Part A of this table relates to urban areas. This is a classification of unemployed persons by their educational levels and age-groups. This is prepared separately for those who are seeking employment for the first time and for those who were employed before but are now out of employment and seeking work. In the first case, the age-groups are 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and in the second case, 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated. This table will throw light on educated unemployed for purposes of planning for employment and also for assessing the available man-power.

Part B of this table relates to rural areas. In this table educational levels for total unemployed persons are given. The educational levels are limited to Illiterate, Literate (without educational level), Primary or Junior Basic and Matriculation and above as in Table B-III Part B.

TABLE B-IX

This table shows the persons not at work classified by sex, broad age-groups and type of activity.

This table is prepared separately for total, rural and urban population. It relates to the non-working population. The non-workers are divided into eight categories given in the table according to their activities. This kind of tabulation was never attempted before, nor were questions asked on the activities of non-workers.

The eight categories are based on the recommendations of the United Nations. This table makes the data available separately for those who have an earning without working. Separate data are also available in respect of housewives, who though they do domestic work are not classified as economically active. Separate data are also available for school-attending children which may be useful to the Education Department. There is a category which consists of all other dependents including children and disabled persons.

C — SOCIAL AND CULTURAL TABLES

TABLE C-II

AGE AND MARITAL STATUS

This table is prepared separately for total, rural and urban population. This is a very important demographic table. The age-groups conform to the international requirements. From this table, it can be ascertained whether proportions in the various marital statuses have increased or decreased since last Census and whether any trend is observed in the age of marriage. This table which was prepared on a 10% sample at the 1951 Census, is prepared on full count at the present Census.

TABLE C-III

AGE, SEX AND EDUCATION

This table is prepared separately in three parts for total, rural and urban population. There are five yearly age-groups up to 34 and other age-groups are 35-44, 45-59, 60+ and Age not stated. While in the previous Censuses, only the total literate population for different age-groups was given, at the present Census, data for broad educational levels are also given. The educational levels are different for rural and urban areas as given in Table B-III. In this Handbook the Table C-III is presented for total and urban population only.

C-III PART A—AGE, SEX AND EDUCATION IN ALL AREAS

TABLE C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

Classification by literacy and industrial category of workers and non-workers among Scheduled Castes/Scheduled Tribes

This table is presented in two parts—Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes. It is prepared separately for total, rural and urban population. The table gives the total population of Scheduled Castes and Scheduled Tribes separately and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers. Literacy figures of Scheduled Castes and Scheduled Tribes are given for the first time in the present Census. This table is important as it will be the basis for the allocation of Reserved Seats in Parliament and the State Legislatures.

TABLE SCT—I

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

The SCT-I Tables are prepared in two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes.

This table is prepared for each Scheduled Caste and Scheduled Tribe. This table gives the population of each Scheduled Caste and Scheduled Tribe separately for rural and urban, and also shows in which sectors of industry members of each Scheduled Caste and Scheduled Tribe are working. Data have also been given on the un-wholesome occupations in which the members of Scheduled Castes are working. The population figures of each individual caste and tribe are often required for welfare and other works.

SCT-I PART A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES

SCT—II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This is an important demographic table corresponding to table C-II but it gives data for the total population only. The age-groups are restricted to 0—14, 15—44, 45+ and Age not stated. At present demographic data are not at all available in respect of these communities. This table thus fulfils a very useful purpose. The age and marital status data give an indication whether the population belonging to Scheduled Castes and Scheduled Tribes is decreasing, stable or increasing.

SCT-II PART A—AGE AND MARITAL STATUS FOR SCHEDULED CASTES

MIZO HILLS DISTRICT

TABLE SCT—III

EDUCATION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared for each Scheduled Caste and Scheduled Tribe and separately, for rural and urban population. It gives the literacy and educational levels for each Scheduled Caste and Scheduled Tribe. In the case of urban areas, data are given for educational levels as in Table B-III Part A. In the case of rural areas, data are given only for mere literates, Primary or Junior Basic and Matriculation and above.

SCT-III PART A (i)—EDUCATION IN URBAN AREAS ONLY FOR SCHEDULED CASTES

MIZO HILLS DISTRICT

Name of Scheduled Caste	Educational Levels							
	Total		Illiterate		Literate (without educational level)		Primary or Junior Basic	
	Males	Females	Males	Females	Males	Females	Males	Female

TABLE SCT—IV

RELIGION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared separately for rural and urban population. This table is intended to give the religions professed by members of each Caste/Tribe belonging to Scheduled Castes/Scheduled Tribes.

SCT—IV PART A

RELIGION FOR SCHEDULED CASTES

MIZO HILLS DISTRICT

Note :—Members of Scheduled Castes can belong either to the Hindu or Sikh religion. In Mizo Hills District, there are no members of Scheduled Castes belonging to Sikh religion. As all the Scheduled Castes belong to Hindu religion, the Caste-wise population in given in Table SCT-I Part A and, therefore, no separate figures have been presented in this Table.

TABLE SC—I

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

This table is prepared for total Scheduled Castes and not for individual castes. It is prepared separately for total, rural and urban population. The table gives data for students and unemployed persons in the non-working population. They are further classified according to broad educational levels consisting of Literates, Primary or Junior Basic, Matriculation or Higher Secondary and Above Matriculation or Higher Secondary. This table gives very useful informations on the students and unemployed persons among the Scheduled Castes.

RAINFALL OF MIZO HILLS DISTRICT DURING 1951-1961

INTRODUCING THE OFFICIAL STATISTICS

The Tabulation Plan and other proposals for the 1961 Census envisaged the incorporation of official statistics on a large variety of subjects for each district in the District Census Handbook of the district concerned. This proposal was communicated to all the Chief Secretaries of State Governments by the Registrar General as early as November 1960 with the request that each State Government should take up the collection of the data in right earnest so that the same may enrich the informations of the District Census Handbook. Each State Government was also welcome to further enrich the District Census Handbooks by any additional information that they may like to incorporate in the Handbook. The items with other details were listed by the Registrar General and he also indicated the periods against which such data were to be collected. Copies of the above letter and the contents therein were forwarded to all Superintendents of Census Operations by the Registrar General with the request that the matter may be pursued with the State Governments. The data were to be processed and compiled by the Superintendent of Census Operations and incorporated in the District Census Handbooks of each District.

In pursuance of this communication from the Registrar General, I opened a small cell with a Statistical Assistant, one Upper Division Assistant and a few experienced tabulation personnel to take up the work and I addressed all the State and Central Government departments dealing with the subjects under which the data were to be collected and compiled. I pursued the matter not only by letters and reminders, but also by sending my staff to the various departments concerned to copy out the data wherever it was not possible for the department concerned to supply the data to me without extra hands. But inspite of persistent pursuit for about two years, all the data could not be collected. Some informations were not available at all, while some departments were not very co-operative. As the Census Publications cannot wait indefinitely for these informations, I have to process and compile whatever data are available to me.

The subjects listed to be collected embraced almost all spheres of the socio-economic life of the people and the governmental activities connected therewith. From rainfall and temperature to places of ancient monuments and worship, from vital statistics to statistics of banks and insurances, from agricultural and land utilisation statistics to the statistics of local bodies, industries and so on, the plan was to appraise the stage of development of each one of the socially and economically important aspect of governmental activities during the last decade which coincides with the two Five Year Plans. Had it been possible to collect all the data in full, a clear picture would have been obtained of the stage of development of each district of Assam as well as the achievements and the impacts of the two Five Year Plans on the economy of each district of Assam. It would also have been possible to bring to light the inter-district and regional disparities in respect of development schemes in each district or region and these data could then be utilised as the basis for future plans and allocation of different schemes.

Realising the fact that well-conceived plans must be based on correct statistics, I started the work of collecting the data with earnestness and tried my utmost to collect as much information as possible from all departments of Government. But in spite of the best of exertions by me and my staff, only about 60% to 70% of the data have reached me till the end of 1962. These available data have been duly processed, compiled and presented in the tables following this Note. Incomplete as they are, even the data thus presented in this book will surely give a picture of the various stages of developments in each district and region of Assam and I hope that my successor may improve upon the same in the next Census. I shall now briefly describe the original plan and the achievements in respect of the collection of data against each one of the broad heads in the cases below :—

1. RAINFALL AND TEMPERATURE

The aim was to give rainfall data of five centres and temperature data for two centres for each district of Assam for the period 1951-60. I addressed the Meteorologists in charge of the Regional Meteorological Centre, Calcutta and the Gauhati Airport, and they supplied me with data for one centre in the district. I also addressed the Deputy Commissioners and Subdivisional Officers and I was able to

collect the data for three centres from these sources also, but regarding temperature, they could not supply complete data even for one centre. But even the data thus collected and compiled may be reasonably accurate for the district.

2. VITAL STATISTICS

I addressed the Director of Health Services, Assam, for supplying me with vital statistics which are so important for population planning and projection. Our plan was to show the births and deaths recorded for each month of the last decade against each police station in the district. The Public Health Department replied that they never have records of births and deaths down to the police station level and so I asked them to give the figures down to the district level, but even that also was not forthcoming. I sent my staff to the office of the Director of Health Services and they had to take much trouble in locating, extracting and compiling whatever data are available in that office regarding vital occurences from the Vital Statistics Returns lying uncared for in the office premises of the Director of Health Services. But these data are absolutely inaccurate and they cannot give any picture of births and deaths in the district. However, the table is presented for whatever it is worth. In the General Report of the 1951 Census, the then Director of Health Services admitted that there is no doubt that the collection of registration data is defective. As far back as 1921, my predecessor Mr. Llyod remarks that "it is obvious that the vital statistical figures are useless for the purposes of comparison or checking with the Census figures." In 1911, Mr. McSwinney remarks that "the inaccuracies are so great that there is danger of inferring that the present system of collecting vital statistics is absolutely useless." If the collection of vital statistics had been so bad in the past decades, it has been worse during the decade 1951-61. The Deputy Director of Health Services told me that when the data were collected by the police, mauzadars and the municipalities, something could be had from them ; but when the collection has been entrusted to the Panchayats, no figures are available at all. Government may have to devise a definite scheme and a definite agency for the collection of these vital occurences, otherwise these important statistics are of no use as far as Assam is concerned.

3. LAND UTILISATION AND AGRICULTURE

In respect of land utilisation and agriculture, informations were proposed to be furnished under the heads—(i) land utilisation statistics (ii) area under principal crops (iii) gross area irrigated (iv) sources of irrigation (v) irrigation projects (vi) yield rates of principal crops (vii) statistics of daily agricultural wages (viii) fortnightly wholesale prices of important commodities month by month (ix) consumption statistics (x) details of socio-economic enquiries (xi) agricultural extension schemes and (xii) cost of cultivation.

Statistics under these two heads are still in a very poor stage of development in Assam. In April 1961, I addressed the Director of Agriculture, the Director of Land Records and the Director of Statistics requesting them to supply me with as much data under the above heads as are available with each of them. The Director of Agriculture straightaway shifted this responsibility to the Director of Statistics. The Director of Statistics in his turn asked me to collect the data from his office records through some of my staff. The Director of Land Records directed the Settlement Officers and Deputy Commissioners concerned to supply the data direct to me. In accordance with the suggestion of the Director of Statistics, I sent a few employees of my office to collect the available data from his office records. Except for the periods 1901-12, 1952 and again from 1958 onwards, most of the data were available and were collected accordingly. In reply to the Director of Land Records' letter to all Settlement Officers and Deputy Commissioners, only the Deputy Commissioners of Cachar and Goalpara and the Settlement Officer, Sibsagar submitted some figures. The rest were silent. I also made direct correspondence with all the Revenue and Settlement Officers but to no effect. For the period 1901-12 and 1952, I wrote to the Registrar General to see if necessary figures could be extracted from some of the publications preserved in the archives of the Ministry of Food and Agriculture. The Registrar General was kind enough to take the trouble and get the figures collected and forwarded to me. These figures are included in the tables prepared under this head.

Within the above limitations, tables under Agriculture and Land Utilisation statistics have been prepared and presented. Most of the tables are limited in scope and practical usefulness from the point of view of studying the trends or projecting a policy decision owing to lack of informations for the gaps during the period under reference. The period of reference 1901-1960 is interpreted as consisting of the Census years, namely 1901, 1911, 1921, 1931, 1941, 1951 and 1961. Each Census year represents five years i. e. two years ahead and two years back of the Census year which is also included.

But the Census years 1901 and 1961 are exceptions to this rule. In view of the non-availability of data preceding the year 1901 and following the year 1961, the figures for the year 1901 has been worked out on the average of the years 1901 to 1905 and for that of 1961, the average was worked out from the year 1956-57 to 1960-61.

Although the original plan was to publish the prices of staple foodstuff and average prices of basic commodities month by month for the last decade with a cost of Living Index, the plan had to be restricted to the presentation of the available data on average retail prices of some important commodities due to the non-availability of data.

The construction of the cost of Living Index calls for informations regarding comsumption level, weightage, family budget etc. Such informations are not available even in the Department of Statistics. Consequently the idea had to be dropped. The Director of Agriculture had been requested to enlighten me with data regarding experiments in double and triple cropping and agricultural extension schemes, but even though a reply was received from him, no data could be extracted from it. The data relating to consumption statistics, details of socio-economic enquiries have also been left out altogether on account of non-availability of data.

Five representative Development Blocks in the State were selected for the study of cost of cultivation. Eight to ten holdings in each Block were again selected for collection of the relevant data as per pro-forma devised in the office of the Registrar General. One officer from each Block was called to Shillong and given the necessary training to enable them to collect the data from the relevant sources. But the informations received from the block Development Officer was found to be not according to instruction and I deputed one of my staff to that Block area to collect the data personally. The data thus collected were then sent to the office of the Registrar General, New Delhi for further instruction as to their presentation in the District Census Handbooks.

4. LIVESTOCK

Variation in the number of main livestock during 1920-60 was proposed to be given. I addressed the Secretary, Veterinary Department, Government of Assam, who directed the Director of Veterinary and Animal Husbandry Department to compile and forward the necessary figures to me. The Director of Veterinary Department could supply me with data only from 1951 onwards. For earlier period, he said the data were not available in the Department.

5. INDUSTRIES

I wrote to the Department of Industries for a list showing the Cottage and Small Scale Industries of the district, but I was referred to the Superintendent of Industries, Aijal. I wrote to the latter accordingly and he furnished me with a list of small scale industries operating in this district. A list showing all categories of industries has been compiled from the Census data extracted from the House-lists and these are presented in the tables.

6. ADMINISTRATION

Under this head, informations were sought to be incorporated in this book in respect of the (1) number of criminal cases tried, (2) persons convicted, (3) strength of police, jails, (4) receipt of different kinds of taxes, (5) receipt of land revenue, (6) number of registered documents and (7) value of property transferred in the district for the latest period of time for which informations are available. The growth of co-operative societies from 1951 till 1960 was another item under this head.

Data regarding the number of criminal cases tried and persons convicted are collected from the "Report on the Administration of Criminal Justice in the State of Assam". Some data were also colleted by my staff from the office records of the Inspector General of Police, Assam. The Commissioner of Taxes was prompt enough to supply with the figures of collections of taxes under different categories. I wrote to the Revenue Department and the Director of Land Records to send me the figures showing the receipt of land revenue during the last decade. The Director of Land Records referred me back to the Revenue Department. The Revenue Department made a lot of correspondences but no data are available from them. At long last, the compilation team could collect some figures from the 'Statistical Abstract' published by the Director of Statistics and office records of the Revenue Department unofficially. For informations regarding the number of registered documents and value of property transferred in the district, I made necessary correspondences with the Director of Land Records and Inspector General of Registration who referred me to the Accountant General and the District Registrars. I had written to the District Registrar accordingly, but nothing had been received. Data in respect of the different classes of co-operative societies were collected by my staff from the office records of the Registrar of Co-operative Societies, Assam, Shillong.

7. PUBLIC HEALTH & MEDICAL

The list presented regarding this item was prepared from data supplied by the Civil Surgeon, Mizo Hills, Aijal.

8. EDUCATION

Under this head, the intention was to show the increase in the number of various categories of schools from 1951 to 1960. I wrote to the Director of Public Instruction, Assam, accordingly and in spite of a number of reminders, he could not supply me with the required informations. My next course was to depute an assistant to that office and get the informations collected. In this way, my staff with the cooperation of the office staff of the Director of Public Instruction, could collect informations for two years only. My staff were given to understand that informations for the earlier years were not available in the office of the Director of Public Instuction.

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

The informations furnished under this head were supplied by the Deputy Commissioner, Aijal and Subdivisional Officer, Lungleh.

10. COMMUNICATION

Under this head, informations were attempted to be compiled regarding the number of (1) village roads, (2) roads and bridges and important water-ways.

For data on village roads, I wrote to the Development Commissioner who was good enough to get the data collected through the Block Development Officers. But the informations received so far are not complete for the whole district. On roads and bridges, the Chief Engineer (Roads and Buildings) was addressed and he supplied me with a booklet from which the informations presented in this book were extracted. The list of inland water-ways was supplied by the Director of Inland Water Transport, Assam.

11. COMMUNITY DEVELOPMENT

The Development Commissioner, Assam furnished me with a statement showing the names and stages of all the Community Projects in the district. After compilation to make it intelligible to the general reader, the statement is reproduced in this volume.

12 BANKS AND SMALL SAVINGS

On request, the Director of Statistics was good enough to furnish me with a list showing the banking institutions in the district. Data on Small Savings were supplied by the Regional Director, National Savings, Government of India, Assam, Shillong. Due to the non-availability of data, Insurance statistics could not be incorporated.

13 FAIRS AND FESTIVALS AND HATS AND MARKETS

The data under this head were furnished by the Deputy Commissioner, Aijal and Subdivisional Officer, Lungleh. The Members, Mizo Hills District Council supplied the data on Hats and Markets.

14 CALENDAR OF IMPORTANT EVENTS

Informations regarding some important events taking place in the district were supplied by the Deputy Commissioner, Aijal and Subdivisional Officer, Lungleh.

15 ANCIENT MONUMENTS, PLACES OF WORSHIP AND GAZETTEERS OF PLACE NAMES

The informations given under this head were supplied by the Deputy Commissioner, Aijal and Subdivisional Officer, Lungleh.

@ Figures for the year 1912-13 only.

* The forest areas exclude the forest villages within the reserves for the years 1912-13 to 1950-51

£ The informations relating to cultivable wastes, pastures and grazing lands and miscellaneous tree crops and groves etc., were not available separately for the years prior to 1951-52 and these three categories were included under the group "cultivable wastes other than fallows" for the years 1912-13 to 1949-50 which changed into category "other uncultivated land excluding current fallows" from the year 1950-51 onwards. This category since 1951-52 had been divided into (i) cultivable wastes, (ii) permanent pastures and grazing lands and (iii) area under miscellaneous tree crops and groves not included under net area sown.

‡‡ Data presented for 1961 is the average of two years viz. 1956-57 and 1957-58. For the subsequent years viz. 1958-59 to 1960-61 data are not available

@@ Average of three years viz. 1948-49 to 1950-51. For the subsequent years viz. 1951-52 and 1952-53 data are not available. It includes seedling areas.

N.R.—Not Reported

NOTES ON CALENDAR OF IMPORTANT EVENTS IN THE DISTRICT

1952—The First General Election to the Assam Legislative Assembly and the Mizo Hills District Council were held on the 4th and 5th January, 1952 respectively. The Mizo Union and the United Mizo Freedom Organisation contested. In the Assembly, the Mizo Union captured all the three seats and in the District Council, the Mizo Union captured 23 out of 24 seats, and the remaining seat went to the United Mizo Freedom Organisation.

The District Council was inaugurated by Mr. B. R. Medhi, the then Chief Minister of Assam, on the 25th April, 1952.

With the coming into force on the 12.4.1952 of the Assam Autonomous District (Administration of Justice) Regulation 1952, the designation of the 'Superintendent' and 'Assistant Superintendent' Lushai Hills were changed to that of "Deputy Commissioner" and 'Assistant Deputy Commissioner' vide the Government of Assam Notification No. TAD/R/11/61 dated the 8th April, 1952.

The first meeting of the District Council was held on the 23rd June, 1952.

The first Deputy Inspector of Schools in the District was posted in June, 1952. Ever since the management of all the primary and M. E. Schools were in the hand of the Deputy Inspector. The first annual preparation of electoral rolls was made during this year. Circle Interpreters were sent out to the villages in the District to revise the rolls on the spot. The total voters then registered was 90,814.

1953—Aijal-Lungleh Jeep Road upto Zemabawk was opened by the Prime Minister, Shri Nehru on the 3rd April, 1953. The road was constructed by the people on a voluntary and self-help basis.

Aijal Community Development Block was inaugurated on the 2nd October, 1953. This was the First Development Block ever opened in the District.

1954—The District Council Court was inaugurated on the 16th August, 1954.

On the same day, as provided by rule 6 of the Lushai Hills District, (Administration of Justice) Rule, 1953, Village Council in every village of the district started functioning.

In August, 1954, the Government decided to take up the construction of Aijal-Lungleh road (128 miles).

In October, the Executive Committee of the District was reshuffled. Two out of the three members were replaced by fresh ones.

1955—A. P. W. D. jeep reached Lungleh from Aijal on 2nd February, 1955 for the first time.

In accordance with the Assam Lushai Hills District (Acquisition of Chief's) Act, the rights and interests of 253 Chiefs were acquired by the Government and handed over to the District Council with effect from 1st April, 1955.

1956—The rights and interests of 50 Chiefs in Pawi-Lakher Region were acquired by the Government and the same were handed over to the Pawi-Lakher Autonomous Regional Council on 15.4.1956.

Due to heavy rain towards the end of May and the beginning of June, there was large scale destruction of crops. There was heavy landslide everywhere which prevented the supply of food from coming into the town from the villages. This caused partial scarcity of food in and around Aijal and Lungleh towns. The Government imported rice from Cachar District to the extent of 2,000 maunds.

Consequent on launching of Civil Disobedience Movement by the United Mizo Freedom Organisation as a protest against the alleged unfair election to the Village Council in certain villages, all the village council members belonging to the United Mizo Freedom Organisation resigned their seats on the 5th July, 1956.

Lungleh Multipurpose Community Development Block was inaugurated on the 2nd October, 1956.

1957—The Second General Election to the Assam Lesislative Assembly and the District Council were held. Mizo Union and United Mizo Freedom Organisation contested. In the Assembly, the Mizo Union captured two seats. In the District Council the Mizo Unions captured 16 seats and the United Mizo Freedom Organisation captured 8 seats.

The Village Council/Court in every village in the Pawi-Lakher Region was inaugurated on the 15th March, 1957. Telephone Exchange in Aijal was inaugurated on the 11th May, 1957.

The Kolasib C. D. Block was inaugurated on the 2nd October, 1957.

1958—Aijal College, the only college in the District was established in June, 1958.

Pawi-Lakher C. D. Block was inaugurated on 20th September, 1958.

Mamit C. D. Block was inaugurated on 8th October, 1958.

Bamboos in the whole District started seeding. This happened in every fifty years and was the sure sign of famine.

1959—This seeding of bamboos was coincided with the increase of rats. The rats, after finishing the seed of bamboos destroyed the whole crops in 1959.

In January, 1959, the Finance Commission visited the District. After making on the spot study of food situation, the Commission recommended 6 trucks and 150 Jeeps for use of lifting foodstuff to the famine affected areas.

The Anti-Malaria Co-ordination Conference was held at Aijal between the 23rd and 25th November, 1959 in which India, Pakistan and Burma were represented.

1960—The destruction of crops by rats in 1959 resulted in an acute shortage of food in the District. The entire population was affected by the famine. Relief given directly to the famine affected people by the Government during 1959-60 and 1960-61 amounted to Rs. 8,960,000. To lift the relief goods from one place to another, 60 jeeps, 12 power wagons and 12 pick-up vans, all new, were placed by the Government on the road.

NOTES ON IMPORTANT ANCIENT MONUMENTS, ANTIQUE OBJECTS AND PLACES OF WORSHIP IN THE DISTRICT

1. Near Tualcheng village in the eastern part of the district there is a row of stone slabs with no inscription or carving on them. The largest of those measured about 10 ft. wide, 2 ft. thick and about 12 ft. high. Several years ago the stones were re-erected by order of Lt. Col. Lech (1893), Commandant of Lushai Hills Military Police.

2. At Champhai, there is a tomb colled Mangkahie Lung (Mangkhaia's tomb). It is over 16 ft. high. Mangkhaia was the first prominent Chief of the Ralte Tribe.

3 Situated over looking the Champai rice plains is the tomb of the eastern Chief Vanhimailiana Sailo. At the time of the 1871-72 expedition in which the late Earl Bobosts acted as Brigade Major, this tomb was erected.

4. There is another stone monument called Sibuta Lung near Tachhip village, 14 miles south of Aijal.

The nearest Inspection Bungalow on the Aijal-Lungleh Road is named after this monument. Sibuta was a very great chief who had under him over 2,000 houses. The story goes that as a revenge against a former cruelty perpatrated on him, a beautiful girl called Darlali was put alive on a hole prepared for the great stone and over her a stone was erected. The stone itself was said to be carried from the bed of the Tlang river about six miles away from the place of erection.

Memorial stone of Lt. Col. Tom Herbert Lewin B. Sc. at Demagiri

5. A memorial stone with brass letters was erected by Lt. Col. T. H. Lewin to commemorate his coming to Lushai Hills in 1865. He worked for 9 years in Lushai Hills.

6. **Phawngpui**—(Commonly called Bhu Mountains) Phawngpui is situated within the curve of the Kolodyne river in the Pawi-Lakher Region running in a north and south direction. This mountain is the highest peak in the Mizo District.

Before the coming of Christianity to the hills the people considered this to be an abode of gods and used to sacrifice here at least once a year. There are great precipices on the western side. It is one of the few places in Assam (excluding NEFA) where rhododendrons occur.

7. **Palak Lake**—The lake is situated in the south-eastern corner of the Lungleh Subdivision in Palak Lake region. It is oval in shape and about 660 yards long. It is said that at the bottom of the lake, more correctly speaking, below this lake there still exists a big village which was submerged by flood or earth-quake which was the cause for the formation of this lake.

This lake was once believed by Lakhers to be guarded by resident demons. These evil spirits were believed to have powers over the lives of the people. When the devils were displeased especially when the lands around the lake were cleared for jhums or when they paid a visit to the lake without paying due reverence or when they went out for hunting around the lake the people were subject to illness of different kinds. The lake is the only abode of aquatic birds such as wild duck of different species.

8. **Milu Puk**—(Literally means skull cave).

This small cave is situated on a precipitous hill-side near Mampui village. In this cave

many complete human skeletons were stored. It is stated that when the cave was first discovered the skeletons were found lying in a straight line on the floor of the cave covered with clothes. Judging from the skeletal remains some skeletons appear to be of childern. Most of the bones of the adults were very long and big indicating their body structure to be bigger than that of the present inhabitants. However, at present the contents of the cave have been despoiled by Vandalism. Most of the bones have been thrown away or scattered around. No anthropological study has been carried out here.

A NOTE ON THE GAZETTEER OF PLACE NAMES IN THE DISTRICT

AIJAL

Situated at the elevation of 3,715 feet, Aijal is the Headquarters and the only town of the district. It covers an area of 5 sq. miles and its population according to the 1961 Census is 14,257. Aijal is also the seat of the District Council. There is no Town Committee, however, there are nine village Councils looking after the affairs of the town. Some roads within the town are black-topped, but they are very narrow. The main street, about two and a half miles long is electrified with effect from 26.1.1962. For the purpose of entartainment there is a cinema Hall called 'Krishna Talkies' established in 1949 and a Theatrehall established in 1954. Aijal is the main centre of learning in the district. There is one Private Night Degree College and four High Schools. The names of the high schools are the Government Mizo Multipurpose High School, the St. Paul High School, the Republic High School and the Synod High School. Regarding medical facilities, Aijal is served with only one Civil Hospital with accommodation for 54 patients and one Assam Rifles' Hospital with accommodation for 52 patients. The sanitary arrangement and drainage system of Aijal are poor. Drinking water is chiefly obtained from small hill-streams. During monsoon, rain water falling on the C. I. Sheet roof is collected and used for domestic purposes. There are two refined water reservoirs in the town. But consequent upon the tremendous growth of population at Aijal, water from the nearly hillstreams and the reservoirs is not enough to feed the people during the dry season and therefore water has to be brought into the town from the flowing river by means of motor vehicles.

There are Post and Telegraph office and a Telephone Exchange at Aijal. Aijal can be reached from other districts only from Silchar either by bus or jeeps.

For visitors, there are one Circuit House, one Dak Bungalow and a few small hotels. The standard of the hotels is very low.

CHAMPHAI

It is one of the largest villages of the district. One Assistant to the Deputy Commissioner is posted here. There are Wireless Telegraph Station, Extra Departmental Branch Post Office, Government Dispensary and Police Station. Champhai can be reached from Aijal by a fair-weather jeepable road. There is one Government Aided High School called the Gandhi Memorial High School. The elevation of Champhai is 5,504 ft. Below the Village is the famous "Champhai Plain" where the best quality of rice is grown. A great deal of rice comes from Champhai to Aijal. The place has a beautiful scenery and some pine trees can be seen in some parts.

The historical importance of Champhai is that it was the Headquarters of Calburha Sailo against whom the Expedition of 1871 was directed. The famous monuments of Mangkhaia and Vanhnuaihana are also in the Champhai area.

DURTLANG

Durtlang, elevation of which is 4,538 feet, is situated at the distance of 5 miles from Aijal. The importance of Durtlang is that Presbyterian Church Synod Hospital is there, and the same is run by the Presbyterian Church of Mizo District in co-operation with the Welsh Foreign Mission. X'ray and Surgical Instruments for minor and major surgery are available. It is also a Nurses' Training Centre which is said to be one of the best Nurses' Training Centres in Assam.

KOLASIB

It lies mid-way between Aijal and Silchar, in the Aijal-Silchar Road. It is connected with other places by Telegraph and Telephone. There are Police Station, Government Dispensary and Sub-Post Office. Community Development Block has also been opened. There are a few hotels and Inspection Bungalow. The height of Kolasib is 2,370 feet.

SAIRANG

It is situated on the bank of the Tlawng river, the only navigable river in the district. From early days Sairang remains a very important trade centre. Though it is a small village, it is an important place. Motorable road connects Aijal and Sairang. All imported goods are carried by boat from Silchar to Sairang from which they are brought to Aijal. There is a Dispensary, a Branch Post Office and a Police Station. It is thirteen miles away from Aijal.

LUNGLEH

It is the Headquarters of the Lungleh Subdivision. Subdivisional Officer, Subdivisional Police Officer, Block Development Officer, Subdivisional Medical Officer etc. are posted here. Lungleh is connected with Aijal by all-weather motorable road. There is a Sub-Post Office, a Wireless Telegraph Station, a Telegraph Office, a Multipurpose Community Development Block, a Government High School, a Civil Hospital, a Police Station and an Assam Rifles' Hospital. Its elevation is about 4,008 ft. and its area nearly 2 sq. miles. Theatrehall was established in 1958. There are a Circuit House and a Dak Bungalow.

DEMAGIRI

It is also called Tlabung. It is situated on the bank of the Karnaphuli river and is forty one milles away from Lungleh. In the pre-partition days it used to be the most important trading centre in the Lungleh Subdivision. It is the only starting point in the Lungleh Subdivision for passengers to go to the plain districts by river. One Assistant to the Deputy Commissioner is posted here. Fair-weather jeepable road runs from Lungleh to Demagiri. Sub-Post Office, Telegraph Office and Government Dispensary are located here. Demagiri is the only Passport Check Post in the district.

SERKAWN

It lies one and a half miles away from Lungleh. It is the Headquarters of the Baptist Mission. There are a Government M. E. School, a Baptist Mission High School, a Christian Hospital, Bookroom, Printing Press and a Teachers' Training School. It is 4,050 feet high.

SAIHA

With effect from the establishment of the Pawi-Lakher Region, it has become the seat of the Regional Council. The Regional Council office was built and one Sub-Deputy Collector is posted there. There is one private High School. It is situated at the height of 4,020 ft.

TUIPANG

Tuipang lies near the border of Burma. Its climatic condition is suitable for the growth of potatoes. There are Branch Post Office and Dispensary. It is an out-post of the Assam Rifles. There is also an Inspection Bungalow. Its elevation is 4,700 ft.

SERKAWR

It is the largest village in the Pawi-Lakher Region. The sixth Bungalow from Lungleh to Tuipang is situated at Serkawr. It is the Headquarters of the Lakher Pioneer Mission. The elevation of Serkawr is 3,400 ft.
