FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has

been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns of civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri S. N. Ghosh I.A.S. the Director of Census Operations West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982

P. PADMANABHA
Registrar General, India

PREFACE

The District Census Hand Book compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Primary Census Abstract included in the publication relate to the district of Maldah. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census operation in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning, enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India, has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are greateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistance right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt. Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Malda (Principal Census Officer) and his innumerable colleagues including the Charge Superin-

tendents, Census Supervisors, Census enumerators. The data were processed under the Deputy Director in-charge of the Regional Tabulation office by a host of Coders, Checkers, Tabulators, Supervisors etc. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of data have been done by Sm. Anjali Das, Smt. Sucheta Datta and Sri Pratap Singh, all SAs. Sm. Banani Ghosh, Sm. Anjali Banerjee, Sm. Reba Das, Sm. Sabita Banerjee, Sm. Renukana Bhattacharyya, Sarvasree Nikhil Kumar Bagchi, Manas Kumar Mitra, and Samaresh Banerjee all Computors under the supervision of Sri Swapan Kumar Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarker, Asstt. Director of Census Operations, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analitical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The credit for preparation of the maps goes to the Map Unit of this directorate under the technical and administrative guidance and supervision of Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal, who was ably assisted by Shri Chourajit Singh, Senior Geographer, Sri T. S. Khadatkar, Geographer and their colleagues.

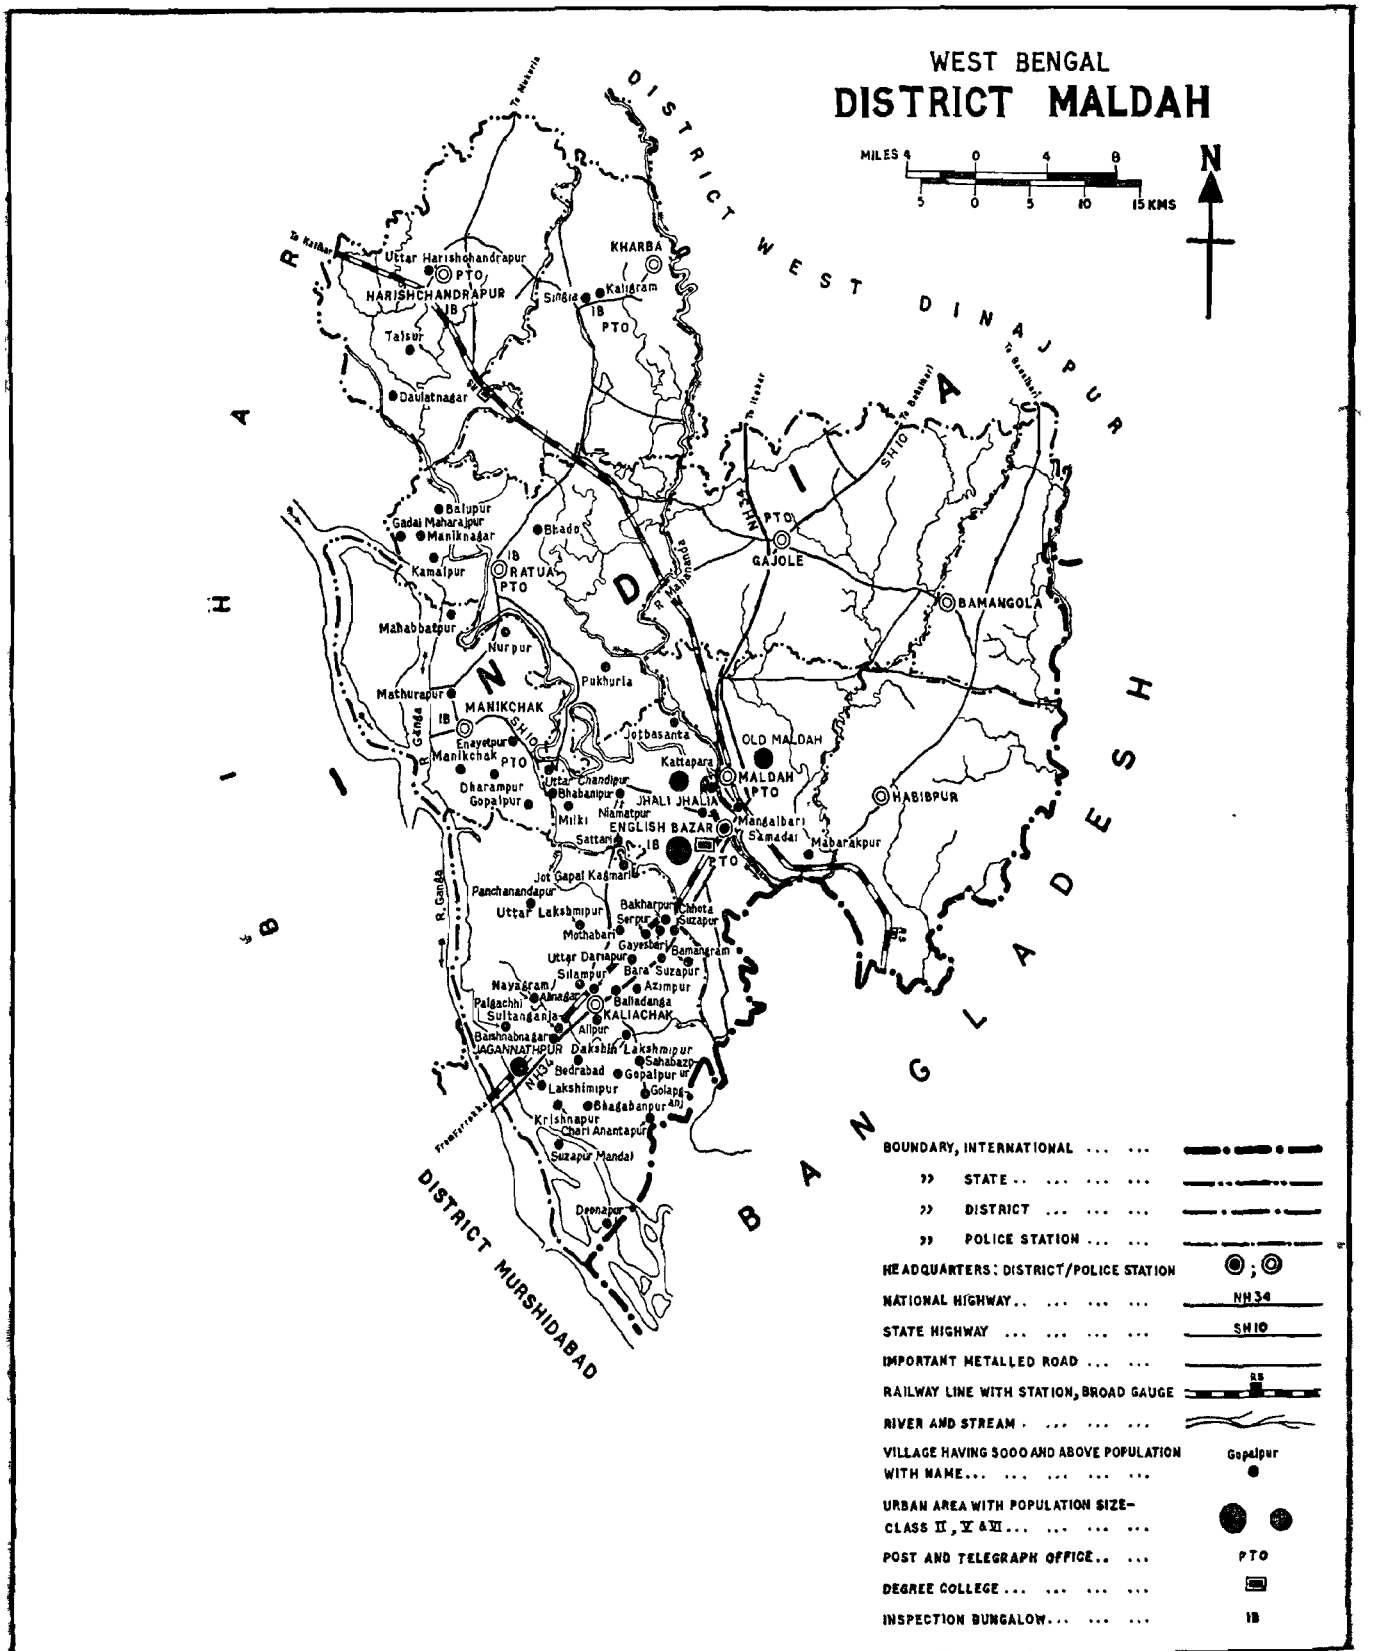

Sri Himangshu Saha Chaudhury, Printing Inspector had press-edited the manuscript. The printing of this volume was supervised by Shri Saha Chaudhury, Printing Inspector, proof reading mostly by Shri Prasanta Kumar Barman, Proof Reader and also partly by Sm. Anjali Banerjee, Computor. The entire printing work was supervised very efficiently by Sri S. K. Guha, Investigator, under the able guidance of Sri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Sri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS., Shri B. Bhattacharyya, WBCS., both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta, and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to M/s. Eureka Printing Works (P) Ltd., for the printing of this publication.

SUKUMAR SINHA
Joint Director of Census Operations
West Bengal

	Inhabited	38,024	1,615
	Uninhabited	3,088	188
Number of Towns		291	4

ANALYTICAL NOTE

ANALYTICAL NOTE :

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows :

(a) all places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment

(b) all other places which satisfied the following criteria :

(i) a population of 5,000 as the minimum,

(ii) density per square kilometre would be a minimum of 400, and

(iii) at least 75% of the male working force should be eagaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeation is also adopted for the 1981 Census An urban agglomeration means a streteh of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum An urban agglomeration shows how a particular area has had geographically continuous urbanisation

Mention may be made in this connection of urban outgrowths The concept of urban outgrowth has come into force for the first time in 1981 Census The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, *i e* it would have a population of less than 5,000 but more than 600

All other areas which are not covered by the definition of urban as stated above will be treated as Rural

Census House :

We defined the census house in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc used or recognised as a separate unit It may be occupied or vacant It may be used for a residential or non-residenlial purposes or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of Singleness of use What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use

Household :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both

Scheduled Castes/Scheduled Tribes :

We have our own list of scheduled castes and scheduled tribes notified for our state only If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of a caste or a tribe, the information was noted if it found place in the notified list All efforts were given to ascertain the correct name of the Scheduled caste or tribe as found in the notified list For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

Literates :

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate A man who can merely read but cannot write is not a literate It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing

Careful attention was also given while collecting information on educational attainment of individuals The highest educational level attained by the person enumerated was recorded This information is vital for manpower planning

Main Workers :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other They were workers and non-workers respectively But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, viz main workers, marginal workers and non-workers

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc , if the person has had some regular work of more than one hour a day throughout the greater part of the working season In the case of regular employment in any trade, profession, services, business or commerce the basis of work will be satisfied if the person was employed during any of fifteen days preceding the day on which you (Enumerator) visited the Household " In 1971, the following definition was applied "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity Work involves not only actual work but effective supervision and direction of work The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration "

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or student etc for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc , but not to the extent as a full time work Such participation will be considered as secondary work of those persons participation of work that goes to augment the income of the household will only be treated as economic activity "

In 1981 Census anyone who has done any work at all during the last one year is a worker The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971 But this time the population has been classified into three main groups, each mutually exclusive of the others The main workers are those who have worked major part of the year preceding the enumeration In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration All workers have been categorised in four distinct parts viz (i) cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workers in 1981 Census This is a major departure from the 1971 categories of workers In 1971 Census the workers were divided in nine categories

Marginal Workers :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding Enumeration

Non-workers :

Non-workers are those who have not done any economically productive work at all during the last one year All non-workers have been divided into seven categories in 1981 Census They are (i) Students (ii) Household duties, (iii) Rentiers/Retired Persons, (iv) Beggars etc (v) Inmates of Institution, (vi) Dependents and (vii) Others

Scope of Primary Census Abstract

The primary Census Abstract is the basic table prepared from the total count of census It has been presented at threes levels, viz (1) District Primary Census Abstract, (2) Urban/Village Primary Census Abstract and (3) Primary Census Abstract of Scheduled Castes and Scheduled Tribes—District level showing towns and police stations The District Primary Census Abstract presented here corresponds to that in 1971 and contains the following items —Area of the police stations/towns in Km^2, number of occupied residential houses, number of households, total population and its division into sexes, scheduled castes population and its division into males and females, scheduled tribes population and its division into males and females, the sex division of the literates, total male main worker and total female main worker, total male cultivators and total female cultivators, similar sex division of agricultural labourers, household industries, other workers, marginal workers and non-workers All these information have been covered in 39 columns

The urban/village PCA has been outlined with 28 cols and have been depicted with occupied residential house, number of households, population, scheduled castes population, scheduled tribes population, literates, main workers showing its four broad divisions, marginal workers and non-workers All these data have been shown with sex division The urban/village PCA represents data wardwise for statutory towns and as a whole for non-statutory towns and mouzawise

The primary census abstracts of scheduled castes and scheduled tribes represent separately all information like scheduled castes and scheduled tribes population, literates, main-workers with broad categories, marginal workers and non-workers showing males and females for all the items in 31 columns.

The 1981 Census categorised workers into four major categories. The first and second categories *i.e.* cultivators and agricultural labourers correspond to categories followed in 1971. The third category represents workers corresponding to category [v(a)] of 1971. All other remaining workers grouped together in category [iv] of 1981. This category includes workers engaged in categories III, IV, V(b), VI, VII, VIII and IX of 1971.

Analysis of Data :

TABLE 1—POPULATION, NUMBER OF VILLAGES AND TOWNS 1981

The police stationwise rural-urban population of Maldah District and the numbar of Villages and towns in each police station have been presented in Table 1. A decade back the district was inhabited by 1,612,657 persons and during the 1981 Census the population was counted as 2,031,871. The decennial growth rate of the district for 1971-81 is 26.00 percent which is higher than the state average of 23.17 percent in this regard. There are 1,803 mozas in the district of which 1,615 or 89.57 percent are inhabited. The district has four towns. Of these four towns, English Bazar and Old Malda are Municipal towns and Jhali-Jhalia and Jagannathpur are Non-municipal census towns.

TABLE 2—DECADAL CHANGE IN DISTRIBUTION OF POPULATION

Table 2 presents data on the decadal variation in each police station of the district Maldah, we have already seen that the overall growth in the district is 26.00 percent during 1971-81 decade. There are 25.25 percent and 42.88 for rural and urban areas of the district respectively. These are at higher level than corresponding rural and urban area figures of the state. The increase in urban population by 42.88 percent in the district is due to the emergence of two of new towns viz. Jhali-Jhalia and Jagannathpur in 1981 census. These two new towns together have added a net population of 9,074 to the urban population of the district.

TABLE 3—DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Range of Population	No. of villages in each Ranges	Percentage of villages in each Ranges
1	2	3
— 200	221	13·68
200 — 499	457	28·30
500 — 1,999	660	40·87
2,000 — 4,999	217	13·43
5,000 — 9,999	56	3·47
10,000+	4	0·25
Total	**1,615**	**100·00**

The distribution of villages by population ranges in the district Maldah is given in Table 3. It is evident from the table that the maximum number of villages account for in the population range of 500-1,999. In terms of percentage it works out to 40.87 percent of the total inhabited villages. The second largest number of villages have been found in the population range of 200-499. The villages having population more than 10,000 are 4 only.

TABLE 4—DISTRIBUTION OF VILLAGES BY DENSITY

Range of Density (Per Sq. Kms.)	Total No. of villages in each Density Range	Percentage of villages in each Density Range
1	2	3
— 10	5	0·31
11 — 20	5	0·31

101 — 200	152	9·41
201 — 300	254	15·73
301 — 500	456	28·24
501+	679	42·04
Not known	..	
Total	**1,615**	**100 00**

Table 4 gives the distribution of village by density of population per sq. km. Of the total inhabited villages 679 or 42.04 percent villages have density more than 500 persons per sq. km. There are 456 villages in the district which fall in the density range of 301-500. Only 5 villages are characterised with the lowest density *i.e.* up to 10 persons per sq. km.

TABLE 5—PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Seheduled Castes Population to total Population	No. of villages in each Range	Percentage of villages in each Range
1	2	3
0 — 5	248	19·22
6 — 10	161	12·48
11 — 15	134	10·39
16 — 20	101	7 83
21 — 30	141	10·93
31 and above	505	39·15
Total	**1,290**	**100·00**

Table 5 furnished data in respect of villages according to the proportion of Scheduled caste population to total population of villages in the district. Out of 1,615 inhabited villages of the district, the scheduled caste population are found in 1,290 villages only. There are 505 villages in the district where the proportion of scheduled caste population to total population ranges from 31 percent and plus. These villages in terms of percentage constitute 39·15. The lowest proportion of scheduled caste population *i.e.* upto 5 percent is found in 19.22 percent of the villages only.

TABLE 6—PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Tribe Population to total Population	No. of villages in each Range	Percentage of villages in each Range
1	2	3
5	144	17·41
6 — 15	114	13·79

26 — 35	90	10·88
36 — 50	116	14·03
51 and above	276	33·37
Total	**827**	**100·00**

Table 6 deals with the proportion of scheduled tribe population to total population in the villages of the district of Maldah. Out of 1,615 inhabited mouzas, the scheduled tribe population is found in 827 villages. There are 276 such villages in the district, where the scheduled tribe population has concentrated over 50 percent. Constituting scheduled tribe poputation to the tune of 36·50 percent are found in 116 villages of the district *i.e.* 14.03 percent. The lowest proportion of upto 5 percent of scheduted tribe. population on the other hand is found in 144 villages which constitute 17.41 percent of the villages having scheduled tribe population.

TABLE 7—PROPORTION OF SCHEDULED CASTES/SCHEDULFD TRIBES POPULATION IN TOWN

Sl. No.	Name of the Town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Seheduled Caste Population to total Population	Percentage of Scheduled Tribe Population to total Population
1	2	3	4	5	6	7
1	English Bazar	79,010	6,361	172	8·05	0·22
2	Jhali Jhalia	5,655	516	35	9·12	0·62
3	Jagannathpur	3,952	903	7	22·85	0·18
4	Old Maldah	8,579	1,294	9	15·08	0·10
	All Towns	**97,196**	**9,074**	**223**	**9·34**	**0·23**

Table 7 reveals information in respect of the proportions of scheduled castes and scheduled tribes population to total population in each of the four towns of the district. The scheduled caste population inhabiting the urban sector of the district of Maldah as a whole works out to 9.34 percent of the total urban population. This figure is lower than the state urban average of 10.31 in this respect. Among the towns, the highest concentration of scheduled castes is found in Jagannathpur town where scheduled castes constituted 22.85 percent of the total population. Old Maldah town with its 15.08 percent follows next.

The urban sector of the district as a whole has only 0.23 percent scheduled tribe population which is much below the state urban average of 0.80 percent in respect of scheduled tribe population. Townwise the highest percentage of 0.62 is found in Jhali-Jhalia Town.

TABLE 8—LITERACY RATES BY POPULATION RANGES OF VILLAGES

Range of Population	No. of villages in each Range	Literacy Rates
1	2	3
— 200	221	14·05
200 — 499	457	16·42
500 — 1,999	660	21·15
2,000 — 4,999	217	21·78
5,000 — 9,999	56	23·04
10,000+	4	15·44
Total	**1,615**	**21·07**

Table 8 presents the rate of literacy by population range of villages in the district Maldah. The percentage of literates in the rural sector of the district is 21.07 only. This percentage is lower than the state rural average of 33.12 percent. The highest rate of literacy (23.04) is observed in the villages with population ranging from 5000-9999. It transpires from the Table that bigger the size of the villages greater is the percentage of literates with exception however the villages with the population more than 10,000. There are four such villages in this range where the percentage of literates is recorded as 15.44 only.

TABLE 9—LITERACY RATES FOR TOWN

Sl. No.	Name of the Town	Literacy Rate
1	2	3
1	English Bazar	66·31
2	Jhali Jhalia	59·68
3	Jagannathpur	20·70
4	Old Maldah	50·66
	All towns	**62·69**

The literacy rates in the four towns of the district are given in Table 9. The literates constitute 62.69 percent of the population in the urban areas of the district which is slightly higher than the state urban average of 62.66 percent. Townwise, the highest rate of literacy (66.31 percent) is found in English Bazar—the district headquaters town. All the other towns exhibit literacy rates below the urban average of the district. The rate of literacy in Jagannathpur town is rather low *i.e.* only 20.70 percent of the population is literate.
