FOREWORD

The district census handbook (DCH), complied by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and ward-wise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the proces of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, Primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and othet amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into considerations. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/ Town lavels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, IAS, the Director of Census Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy., Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the head-quarters under the guidance of Shri M. M, Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April, 1982

PREFACE

The District Census Handbook complied by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Primary Census Abstract included in the publication relate to the district of Puruliya. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers.

As mentioned earlier, the 1981 Census operation in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are greateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N Rama Rao, Asstt Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Puruliya (Principal Census Officer) and his innumerable colleagues including the Charge Superintendents, Census Supervisors, Census enumerators. The data were processed

under the Deputy Director in-charge of the Regional Tabulation office by a host of Coders, Checkers, Tabulators, Supervisors etc. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of data have been done by the Central Tabulation Unit of this office under the supervision of Sri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operation, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The credit for preparation of the maps goes to the Map unit of this directorate under the technical and administrative guidance and supervision of Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal, who was ably assisted by Shri Chourajit Singh, Senior Geographer, Sri T. S. Khadatkar, Geographer and their colleagues.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Sri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Sri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among offical's of the State Government who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS, Shri B. Bhattacharyya, WBCS, both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to Joyma Kali Press, 90 B C. Road, Barddhaman for the printing of this publication.

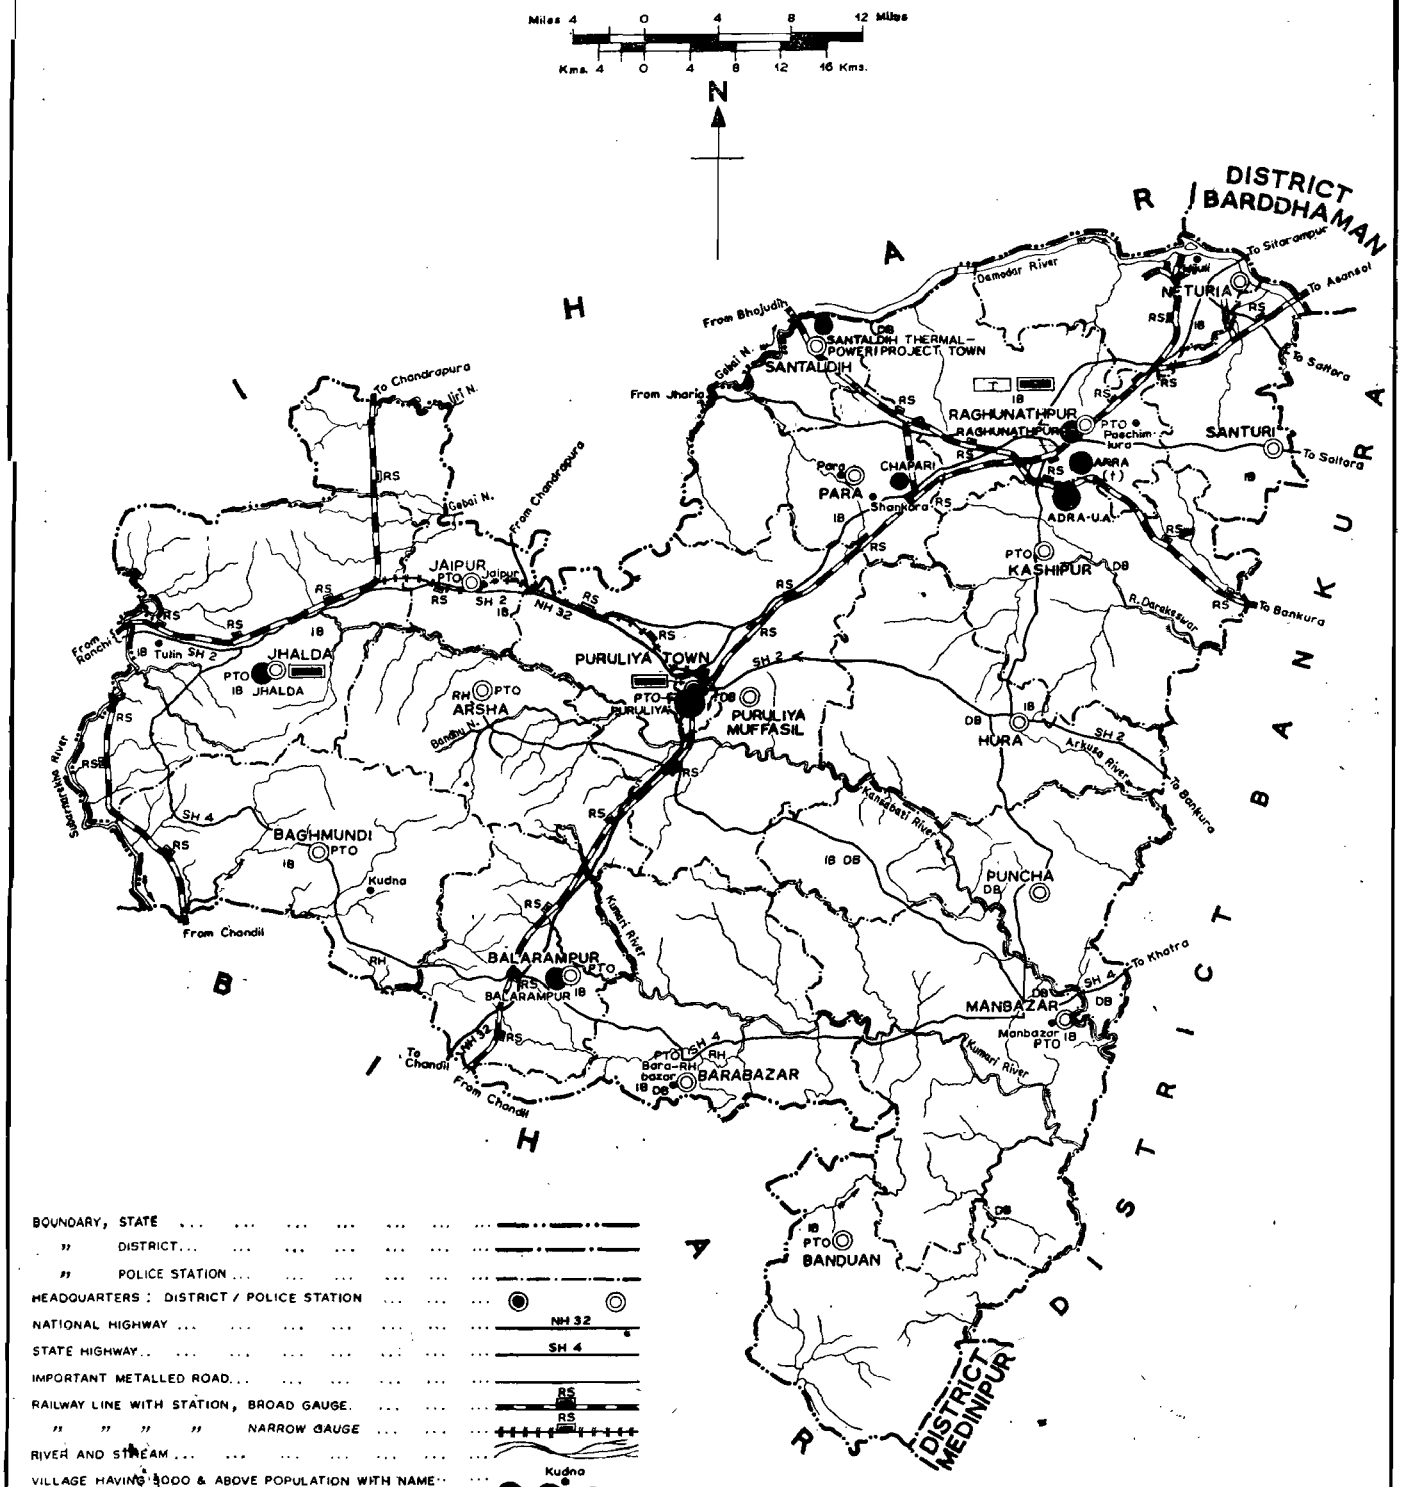

Sukumar Sinha
Joint Director of Census Operations
West Bengal

Number of Towns :			291	8

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows :

a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

b) All other places which satisfied the following criteria :

i) A population of 5,000 as the minimum,

ii) Density per square kilometre would be a minimum of 400, and

iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographyically contiguous urban continuum. An urban agglomeration shows how a particular area has had geograghically continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must neceasarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, *i. e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not convered by the definition of urban as stated above will be treated as Rural.

Census House :

We defined the census houses in the following manner :

"A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both". Actually to make the concept under-standable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singlenses of use.

Household :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There map be a household of persons related by blood or household of unrelated persons or having a mix of both".

Scheduled Castes/Scheduled Tribes :

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribes returns his caste or tribe by a synonym or generic name

of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

Literates :

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

Main Worker :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, viz. main workers, marginal workers and non-workers.

The 1961 Census definition of worker as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the "Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly .....There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition. it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basicaily are performing household duties or students etc., for the purpose of their main activety, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons.....participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census anyone who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts viz. (i) cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) other workers in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories

Marginal Worker :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding Enumeration.

Non-Workers :

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggers etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

Scope of Primary Census Abstract :

The Primary Census Abstract is the basic table prepared from the total count of census. It has been presented at three levels, viz. (1) District Primary Census Abstract, (2) Urban/Village Primary Census Abstract and (3) Primary Census Abstract of Scheduled Castes and Scheduled Tribes—District level showing towns and police stations. The District Primary Census Abstract presented here corresponds to that in 1971 and contains the following items :—Area of the police stations/towns in Km^2, number of occupied residential houses, number of households, total population and its division into sexes, scheduled castes population and its division into males and females, scheduled Tribes population and its division into males and females, the sex division of the literates, total male main worker and total female main worker, total male cultivators

and total female cultivators, similar sex division of agricultural labourers, household industries, other workers, marginal workers and non-workers. All these information have been covered in 39 columns.

The urban/village PCA has been outlined with 28 cols. and have been depicted with occupied residential houses, number of households, population, scheduled castes population, scheduled tribes population literates, main workers showing its four broad divisions, marginal workers and non-workers. All these data have been shown with sex division. The urban/village PCA represents data wardwise for statutory towns and as a whole for non-statutory towns and mouzawise.

The primary census abstracts of scheduled castes and scheduled tribes represent separately all information like scheduled castes and scheduled tribes population, literates, main-workers with broad categories, marginal workers and non-workers showing males and females for all the items in 31 columns.

The 1981 Census categorised workers into four major categories. The first and second categories *i. e.* cultivators and agricultural labourers correspond to categories followed in 1971. The third category represents workers corresponding to category v (a) of 1971. All other remaining workers grouped together in category iv of 1981. This category includes workers engaged in categories III, IV, V(b), VI, VII, VIII and IX of 1971.

ANALYSIS OF DATA

It is a Census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District census Handbook 1981 follows the same manner as in 1951, 1961. A large number of inset tables has been prepared on Town Directory, Village Directory and Primary Census Abstract to make the analysis more scientific and acceptable.

TABLE 1

Table 2 presents decadal change in the distribution of population, separately for total, rural and urban areas of the district. It is noticed from the table that the district has recorded a growth of 15.65 percent over the decade 1971-81 which is considerably lower than that of the overall state average of 23.17 percent for the decade. The rural growth of the district works out to 14.72 percent only while the urban growth registers 25.98 percent. On the other hand, the state of West Bengal has recorded a rural growth of 20.36 percent and the urban growth of 31.73 percent. Among the police stations, the highest growth rate of 28.07 percent is found in Puruliya town police station while the Puruliya Muffasil police station has shown a growth of 21.52 percent. Banduan police station has recorded the lowest percent growth of 0.87 during 1971-81.

TABLE 3—DISTRIBUTION OF VILLAGES BY POPULATION RANGE

Range of Population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
— 200	444	18·11
200— 499	790	32·21
500—1,999	1,100	44·87
2,000—4,999	110	4·49
5,000—9,999	8	0·32
10,000+	..	..
Total	**2,452**	**100·00**

The distribution of villages by population range has been given in table 3. The table reveals that the majoirity of the villages *i.* e. 44.37 percent have fallen in the population range of 500-1,999. The second largest group of villages *i.* e. 790 (32.21%) in number have population varying from 200-499. 8 villages in the district constituting 0.32 percent only are in the population range of 5,000-9,999.

TABLE 4—DISTRIBUTION OF VILLAGES BY DENSITY

Rage of density (Per sq. Kms.)	Total No. of Villages in each density range	Percentage of Villages in each density range
1	2	3
— 10	16	0·65
11— 20	15	0·61
21— 50	53	2·16
51—100	154	6·28
101—200	525	21·41
201—300	690	28·14
301—500	632	25·78
501+	366	14·93
Not Known	1	0·04
Total	**2,452**	**100·00**

Table 4 deals with the distribution of villages by density of population. The largest number of villages (28.14 percent) have the density varying from 201-300 per sq. km. The next group of villages 632 (25.78) have been grouped under the density range of 301-500. There are 16 or 0.65% villages are characterised with the density upto 10 persons per sq. km. in the district.

TABLE 5—PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Castes Population to Total Population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
0—5	303	17·99
6—10	270	16·03
11—15	216	12·83
16—20	176	10·45
21—30	239	14·19
31 and above	480	28·51
Total	**1,684**	**100·00**

The table 5 furnishes information regarding scheduled caste population to total population in the villages of the district of Puruliya. Of the 2,452 inhabited villages in the district, scheduled caste population is found in 1,684 or 68.68 percent of the total inhabited villages. The scheduled caste population over 30 percent is found in 480 villages *i.e.* 28.51 percent of the inhabited villages. The second largest group of villages, 303 in number or in terms of percentage 17.99 have the scheduled caste population upto 5 percent only.

TABLE 6—PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage of Scheduled Tribes Population to Total Population	No. of Villages in each range	Percentage of Villages in each range
1	2	3
0— 5	322	17·33
6—15	344	18·52
16—25	204	10·98
26—35	161	8·66
36—50	199	10·71
51 and above	628	33·80
Total	**1,858**	**100·00**

Table 6 gives information on proportion of scheduled tribe population to total population in the villages of the district. The district has in all 2,452 inhabited villages. Out of these villages, scheduled tribe population is found in 1,858 villages, *i. e.* 75.77 percent of the total inhabited villages. Among the villages comprising tribal population, 628 (33.80 percent) villages have scheduled tribe population over 50 percent. The second largest group of villages (344 in number) have the percentage range of scheduled tribe population varying from 6 to 15 percent. This group of villages form 18·52 percent of the total inhabited villages of the district. Scheduled tribe population upto 5 percent is found in 322 (17.33%) villages only.

TABLE 7—PROPORTION OF SCHEDULED CASTES/SCHEDULED TRIBES POPULATION IN TOWNS

Sl. No.	Name of the Town	Total Population	Total Scheduled Caste Population	Total Scheduled Tribe Population	Percentage of Scheduled Castes Population to Total Population	Percentage of Scheduled Tribe Population to Total Population
1	2	3	4	5	6	7
1	Jhalda (M)	13,194	3,708	68	28·10	0·51
2	Balarampur (NM)	15,564	1,720	860	11·05	5·53
3	Puruliya (M)	73,904	16,265	1,212	22·01	1·64
4	Chapari (NM)	6,835	612	277	8·95	4·05
5	Santaldih Thermal Power Project Town(NM)	5,305	216	82	4·07	1·55
6	Raghunathpur (M)	15,606	4,523	128	28·98	0·82
7	Para (NM)	15,246	3,031	147	19·88	0·96
8	Adra(NM)	21,108	2,799	159	13·26	0·75
	All Towns	**166,762**	**32,874**	**2,933**	**19·71**	**1·76**

Table 7 brings out the proportions of scheduled caste and scheduled tribe population to total population in each town of the district. The percentage of scheduled caste population to total population in the urban sector of the district accounts for 19.71 percent which is much higher than the state average of 10.31 percent in this regard. Townwise, the highest percentage of scheduled caste population has been observed in Jhalda town with 28.10 percent. Puruliya town comes next with 22.01 percent. Santaldih Thermal Power Project town with 4.07 percent scheduled caste population happens to be the town with the lowest proportion of scheduled caste population in the district.

In connection with the scheduled tribe population in the urban sector of the district, it is seen from the table that 1.76 percent of the total urban population of the district belongs to scheduled tribe. The state's proportion of scheduled tribe population in the urban sector on the other hand is 0.80 percent only. Townwise, Balarampur has the highest proportion of tribal population in the district *i. e.* 5.53 percent. Chapari comes next with 4.05 percent tribal population in the town. Jhalda town has the lowest proportion of scheduled tribe population *i. e.* 0.51 percent.

TABLE 8—LITERACY RATES BY POPULATION RANGES OF VILLAGES

Range of Population	No. of Villages in each range	Literacy rate
1	2	3
— 200	444	21·65
200— 499	790	43·76
500—1999	1,100	26·45
2000—4999	110	32·64
5000—9999	8	41·06
10,000+	..	..
Total	**2,452**	**27·48**

The literacy rate by population range of villages have been given in table 8. It transpires from the table that 27.48 percent of the total rural population of the district is literate. This proportion is higher than the state rural average of 33.12 percent in this regard. Among the villages of the different population ranges, the highest literacy rate of 43.76 percent is found in the villages with population 200 to 499. There are 8 villages in the population range of 5,000-9999, where 41.06 percent of the population is literate. On the other hand, the villages with the lowest literacy rate of 21.65 percent are in the size class of less than 200. The maximum number of villages 1100 (48.84%) belonging to the population range of 500-1,999 have literates in the population to the extent of 26.45 percent.

TABLE 9—LITERACY RATES FOR TOWNS

Sl. No.	Name of the Towns	Literacy Rate
1	2	3
1	Jhalda (M)	51·64
2	Balarampur (NM)	43·30
3	Puruliya (M)	56·55
4	Chapari (NM)	63·66
5	Santaldih Thermal Power Project Town (NM)	61·83
6	Raghunathpur (M)	48·04
7	Arra (NM)	43·64
8	Adra (NM)	65·73
	All Towns	**54·57**

Table 9 illustrates the literacy rates as found in the towns of the district. The proportion of literates in the urban sector of the district works out to 54.57 percent. In comparison, the literacy rate in the urban sector of the state is 62.66 percent. Among the towns, the highest proportion of literates is found in Adra town with 65.73 percent followed by Chapari with 63.66 percent literates in the population. Balarampur town with 43.30 percent literates, on the other hand, is at the bottom.

The percentage distribution of scheduled castes and scheduled tribes, literates, workers and non-workers in the police stations of the district Puruliya are given in table 10. The scheduled castes constitute 18·78 percent of the total population of the district. The scheduled tribe population also constitutes almost an identical proportion of 18·79 percent in the district. The highest proportion of scheduled caste population is found in Raghunathpur police station followed by Para. In terms of percentages they are 33·32 and 31·31 respectively. Among the police stations, Banduan tops the list with 51·78 percent tribal population and Puruliya town police station with 1·64 percent tribal population comes last. It is apparent from the table that the district's overall position in respect of literacy is rather discouraging in comparison to the state as a whole in this regard. Whereas the rate of literacy at the district level is 29·69 percent only it is 40·94 percent at the state level.

The proportions of main workers and marginal workers in the district Puruliya are higher than the state average in these respects. It will be seen from the table that 31·10 percent and 7·17 percent of the total population of the district are main workers and marginal workers respectively as against the state figures of main workers and marginal workers of 28·26 percent and 1·91 percent respectively. The percentage of non-working population in the district Puruliya works out to 61·73 percent as against the state average of 69·83 percent.
