Important Statistics	XIII
Analytical Note	1-37

(i) Census Concepts : Rural and urban areas, Census House, Household, Scheduled Castes/Scheduled Tribes, Literates, Main workers, Marginal workers, Non-workers etc.

(ii) Brief history of the District Census Handbook.

(iii) Scope of Village Directory and Town Directory.

(iv) Brief history of the District.

(v) Physical Aspects.

(vi) Major Characteristics.

(vii) Places of Religious, Historical or Archaeological importance in the villages and places of tourists interest.

(viii) Brief analysis of Village and Town Directory data.

Section-I : Village Directory

1.	**Jhalda Police Station**	
	(a) Alphabetical list of villages	38
	(b) Village Directory Statement	42
2.	**Jaipur Police Station**	
	(a) Alphabetical list of villages	68
	(b) Village Directory Statement	70
3.	**Arsha Police Station**	
	(a) Alphabetical list of villages	82
	(b) Village Directory Statement	84
4.	**Baghmundi Police Station**	
	(a) Alphabetical list of villages	95
	(b) Village Directory Statement	98
5.	**Balarampur Police Station**	
	(a) Alphabetical list of villages	112
	(b) Village Directory Statement	114
6.	**Barabazar Police Station**	
	(a) Alphabetical list of villages	124
	(b) Village Directory Statement	128

7. **Puruliya Muffasil Police Station**
   (a) Alphabetical list of villages 148
   (b) Village Directory Statement 152

8. **Para Police Station**
   (a) Alphabetical list of villages 174
   (b) Village Directory Statement 176

9. **Santaldih Police Station**
   (a) Alphabetical list of villages 189
   (b) Village Directory Statement 190

10. **Raghunathpur Police Station**
   (a) Alphabetical list of villages 194
   (b) Village Directory Statement 198

11 **Neturia Police Station**
   (a) Alphabetical list of villages 216
   (b) Villages Directory Statement 218

12. **Santuri Police Station**
   (a) Alphabetical list of villeges 230
   (b) Village Directory Statement 232

13. **Kashipur Police Station**
   (a) Alphabetical list of villages 242
   (b) Village Directory Statement 246

14. **Hura Police Station**
   (a) Alphabetical list of villages 266
   (b) Village Directory Statement 268

15. **Puncha Police Station**
   (a) Alphabetical list of villages 281
   (b) Village Directory Statement 284

16. **Manbazar Police Station**
   (a) Alphabetical list of villages 301
   (b) Villages Directory Statement 306

17. **Banduan Police Station**
   (a) Alphabetical list of villages 334
   (b) Villnges Directory Statement 336

Appendix-I	Police Stationwise Abstract of Amenities.	348
Appendix-II	Land utilisation data in respect of Non-Municipal Towns.	350
Appendix-III	Police Stationwise List of village where no amenities are available.	352—363
Appendix-IV	List of villages according to the proportion of Scheduled Castes and Scheduled Tribes to the total population by Ranges.	364—432

Section II Town Directory

Statement I	Status and Growth History	434
Statement II	Physical Aspects and location of Towns 1979	436
Statement III	Municipal Finance 1978-1979	438
Statement IV	Civic and other aminities 1979	440
Statement IVA	Civic and other Amenities in notified slums 1979	442
Statement V	Medical, Educational, Recreational and cultural facilities 1979	444
Statement VI	Trade, Commerce, Industry and Banking 1979	446

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the ametity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, Primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the dictrict which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Schoduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into considerations The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes ond Scheduled Tribes PCA upto Police Station/ Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, I. A. S, the Director of Census Operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publicaiion was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
the 26th April, 1982

PREFACE

The District Census Hand Book compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shri S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census statistics in the form of Village and Town Directory included in the publication relate to the district of Puruliya. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers. As mentioned earlier, the 1981 Census operation in West Bengal was conductcd by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India, whose imaginative planning, enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Sri Padmanabha.

Shri V. S. Verma, the present Registrar general, India, has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are greateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues had provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt. Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent suport and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Puruliya (Principal Census Officer) and his innumerable colleagues including the Charge

Superintendents. We acknowledge their contributions to the preparation of this volume.

The final tabulation and compilation of data have been done by the central Tabulation Unit of this office under the supervision of Sri Swapan Kumar Guha, Investigator. first under the guidance and supervision of Shri M. N. Sarker, Asstt. Director of Census Operations, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The printing work was supervised very efficiently by Sri S. K. Guha, Investigator, under the able guidance of Sri A. K Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Sri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among officials of the State Govt. who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS, Shri B. Bhattacharyya, WBCS., both Deputy Secretaries to the Govt. of West Bengal, Home (C & E) Department, Writers' Buildings, Calcutta, and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery. Govt. of West Bengal for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation to Joyma Kali Press, 90 B. C. Road, Barddhaman for the printing of this publication.

SUKUMAR SINHA
Joint Director of Census Operations
West Bengal

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows :

(a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.

(b) All other places which satisfied the following criteria :

(i) A population of 5,000 as the minimum,

(ii) Density per square kilometre would be a minimum of 400, and

(iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, *i. e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not convered by the definition of urban as stated above will be treated as Rural.

CENSUS HOUSE :

We defined the census houses in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be Used for a residential or non-residential purposes or both." Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use.

HOUSEHOLD :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both."

SCHEDULED CASTES/SCHEDULED TRIBES :

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name

of a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled caste or scheduled tribe, religion of the head of household was also examined. Scheduled caste population are found only among the population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

LITERATES :

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

MAIN WORKERS :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other. *viz.* main workers, marginal workers and non-workers.

The 1961 Census definition of worker was as follows :

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc , if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly .....There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons..... participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census anyone who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts *viz.* (i) cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) other workers in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories.

MARGINAL WORKERS :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding enumeration.

NON-WORKERS :

Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggers etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

District Census Handbook :

The District Census Handbook was started printing from 1951 Census. The Government and the Development agencies felt necessity of the data at micro—level for the social and economic development all over the country during the post independence ara. Until then, the compliation of data was limited to district, police station and town levels only. In 1951, it was extended to the mouza level.

The publication programme of district census handbook of 1951 continued undisturbed in 1961 also and it was enlarged with the introduction of official statistics.

The Major changes in the District Census Handbook publication were introduced in 1971. The District

Census Handbook 1971 was divided into three parts *viz.* Part XA, Part XB and Part XC. The first Part dealt with Village and Town Directories, in village Directory the villagewise data on amenities available was given and the information in respect of each town was given in the Town Directory. The Part XB consists of village and townwise (ward wise for municipalities, town commitees and all statutory towns) Primary Census Abstract of the concerned district.

The third part *i. e.* Part XC dealt with the nun-census data and social, economic and cultural tables. All the three parts were printed either in two volumes *i. e.* Part XA & XB and Part XC or in three volumes Part XA, Part XB and part XC separately according to the size of the districts.

The scope of District Census Handbook 1981 has been enlarged considerably specially in relation to the amenities available in the villages and towns and landuse pattern in villages and non-municipal towns. The collection of data on recognised slums of Class I and Class II towns of the state is a new addition of 1981 in the Town Directory portion of the District Census Handbook. The format of the primary census abstract have been restructured due to the change of economic questions. The data on marginal workers collected through the canvassing of individual slips is an important addition. Workers have been categorised in four sectors instead of nine in 1971.

Scope of Village Directory :

A twenty column format was canvassed during 1981 Census period for collection of data from each and every mouza within each police station. This is called village directory. The mouzas within a police station have been represented in order of their location codes. This twenty column format has been divided in four parts. The column nos. 1-4 represent general information, column nos. 5-14 represent amenities available, column nos 15 to 19 are meant for landuse pattern and the column 20 contains special information in respect of historical, archaeological and religious interest about the mouza. At the end of each police station, the totalling has been done for col. nos. 3 to 6 and 15-19. If any amenity is not available in the village a dash '—' has been marked in the relevant column and next to it the distance of the nearest place where the facility has been given in the broad ranges.

The following systems were followed for indicating educational institutions, if any, located within the villages, The abreviations used for the educational Institutions are also given below :

1. Primary or Elementary School (P)

   All nursery, kindergarten, pre-basic, pre-primary, Junior Basic School upto Class V and Primary School upto Class IV have been included in this group.

2. Junior Secondary or Middle School (M)

   All schools from Class V to Class VIII including Junior Madrasa upto Class VIII have been noted in this group.

3. Secondary Schools (H)

   All schools upto Class X including the schools providing Senior Cambridge Course and High Madrasa upto Class X have been treated as high school.

4. Higher Secondary School (PUC)

   All educational institutions where the education is imparted for Ctass XI and XII have been marked for this group.

Whiie collecting the data according to the pattern as stated above certain limitations were imposed. We have considered only those institutions which are recognised by any conpetent authority and the specific classes of a school upto which recognition has been given. In case of composite schools like secondary schools with middle classes and primary classes or middle schools with primary classes, the relevant groups of classes have been treated separately e. g, a composite school having classes upto XII (Twelve) has been divided as follows :

Classes from I to IV	. .	(P)
,, V to VIII	. .	(M)
,, IX to X	. .	(H)
,, XI to XII	. .	(PUC)

It is to be noted that by dint of the above kind of division, we are not going by how many educational institutions physically exist within a village, but by occupying of classes each group being treated as a school of its kind. It is also to be noted that the said groupings will hold true irrespective of the educational institution they belong to. For example, the grouping marked as PUC *i.* e Class XI and Class XII may physically belong to a college, but for the purpose of the Village Directory, these two classes taken together has constituted one unit of PUC , the rest of the classes has been treated as a college.

5, College (C)

Any college with the disciplines of Arts, Science and Commerce have been grouped here.

6. Industrial School (I)
7. Training School (Tr)
8. Adult literacy Class/Centre (AC)
9. Other educational institutions (O)

   (Sanskrit tole, senior basic school, Makhtab etc. have been noted as others).

It is needless to mention once again that in sl. no. 5 to 9 the institutions having recognition from any competent authority have been taken into account.

In case of more than one institution of a type in the village, the number of institutions have been indicated in brackets If any of the educational institutions as stated above is located in a village, the existence of other types of educational institutions located in nearest village (s) have not been collected. Suppose, a primary school is functioning in the viliage, but there is no middle or high school in the village under reference, in this case we have not indicated the distance of the nearest place where a middle school or a high school exists. Similarly, if there is a high school only in a particular village, no efforts are given for collecting distance of a nearest place where a primary or middle school exists. The distance by ranges of a nearest place where educational facility is available have been collected from villages having no facility of any of the above mentioned nine categories of educational institutions.

In the medical fields there are a variety of amenities. There ere indicated with abbreviations whether within the village exists any of the following medical institutions :—

Hospital	..	H
Maternity Home	..	MH
Child Welare Centre	..	CWC
Health Centre	..	HC
Primary Hcalth Centre	..	PHC
Primary Health Sub-centre	..	PHS
Dispensary	..	D
Family Planning Centre	..	FPC
TB Clinic	..	TB
Registered Private Practitioner	..	RP
Community Health Worker	..	CHW
Others	..	O

The information have baen collected in respect of those institutions only which are organised and/or aided by Government/Semi-Government/Public bodies/local bodies/social service agencies like the missioneries. The institutions run by prieate individuals have not been coveied. But the information on Registered Private Practitioners of any branch have been noted. If there are more than one facility in the vil/age, the same have been indicated in appropriate abbreviations. In case of more institutions of a type in the village, the number of institutions have been indicated against the abbreviations in bracket where no amenity is available within the village, a dash (—) has been shown in relevant column and any of the facilities as given above available in a nearest place have been noted showing the distance in broad ranges.

The sources of drinking water available within the village have been indicated by codes as follows :

Tap	=	T	Fountaion	=	F
Well	=	W	Canal	=	C
Tank	=	TK	Lake	=	L
Tubewell	=	TW	Spring	=	S
Hand Pump	=	HP	Nallah	=	N
River water	=	R	Others	=	O

If there are more than one source of drinking water in the village, the same have been indicated in appropriate abbreviations in the relevant column. In absence of any source of drinking water in the village, a dash has been given in the relevant column and next to it the distance in broad ranges of the nearest place where any of the aforesaid facilities is available has been given.

The post & Telegra ph amenities available within the village have been collected by codes as given below. The post office includes Branch and Sub Post Offlce also. The villages having no facilities in respect of Post &

Telegraph, have been marked by dash (—) in the relevent column and next to it the distance in broad ranges of the nearest place where any of the facilities as given below is avilable has been noted.

Post Office	=	PO
Telegraph Office	=	TO
Post & Telegraph Office	=	PTO
Telephone connection	=	Phone

The information on hat, market have been collected for each village. The day(s) of the week on which market/hat is held have been taken into account. Where the market/hat is held daily in a village, it has been recorded as "daily". In absence of hat/market in the village, the distance in broad ranges of the nearest place have been shown where it is held.

It has been looked whether the village is served by any mode of public transport like bus, rail and waterways and the abbreviations adopted for this purpose are given below :

Bus	..	BS
Railway Station	..	RS
Navigable waterways (including river, canal etc:)	..	NW

If there is more than one facility in the village, these have been indicated separately by individual codes as given above. If no facility is available within the village, a dash is shown in the column and next to it in brackets, the distance in broad ranges of the nearest place where the facility is available is given.

Approach to the village refers to the state of roads leading to the village from the communication centre. The approch to village has been indicated by following abbreviations :

Pucca Road	..	PR
Kucca Road	..	KR
Navigable River	..	NR
Navigable Canal	..	NC
Navigable waterway (other than river canal	..	NW

If there is more than one approach to a village, the same has been given by appropriate codes in the relevant column.

The name of the nearest town and its distance in kilometers from the village has been collected. The nearest town so indicated may not be located within the state of West Bengal, this may be located in the neighbouring state also. The operational conveniences have only been taken into consideration while collecting this information. Only those towns have been considered, which have been declared urban according to 1981 Census.

The facilities of power supply have been collected from the village where it is available in the following codes :

Electricity for Domestic consumption	ED

Electricity for Agricultural Consumption	..	E. Ag.
Electricity for other purposes like industrial, commercial etc.	..	EO
Electricity for all purposes listed above	..	EA

Where the power is consumed for more than one purpose, this has been indicated accordingly.

The staple food, only in terms of grains, consumed by the majority population of the village during the major portion of the year have been recorded. The grains may be rice, wheat. jawar, maize etc. Sometimes a combination of these grains have been consumed by the villagers as the staple food. In that case, it has been indicated as reported.

The land use pattern of the village has been presented in five broad categories. These are as follows :

1. **Forest** .. This includes all lands classed as forests under any legal enactment dealing with forests. This may be owned by the state or by any private individual. Land maintained as potential forest land have also been treated as forests. Any area used for any other purpose but situated within the forest so defined, is treated as 'forest'.

2. **Irrigated land** .. It relates to the land which has actually been irrigated under different types of irrigation for the purpose of cultivation. The sourcewise break-up of area in hectares under different systems of irrigation has been given. The codes in respect of sources have been noted as under :

Government Canal	..	GC
Private Canal	..	PC
Well (without electricity)	..	W
Well (with electricity)	..	WE
Tube well (without electricity)	..	TW
Tubewell (with electricity)	..	TWE
Tank	..	TK
Lake	..	L
River	..	R
Waterfall	..	WF
Others	..	O

3. **Unirrigated land** .. All areas under rainfall crops or under dry rice cultivation have been classified as unirrigated areas.

4. **Culturable Waste** .. It is defined as the lands within cultivated holdings have not been cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles. Land under thatching grasses, bamboo bushes and other groves for fuels etc., which are not

/

included under orchards or forests and land grazing, meadows have also been included in this category.

Area not available for cultivation ; This stands for barren, uncultivable land and land put to non-agricultural use. Barran and unculturable lands cover land within cultivable holdings which cannot be brought under cultivation without incurring a high cost. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e. g. rivers and canals etc.

Any important place of religious, historical and archaeological interest within the village have also been mentioned in the village directory. Information on the number of copies of newspaper coming in the village, and motor cycles/scooters/cars/Jeeps and tractors available in the village have been mentioned accordingly and denoted the following codes :

Newspapers	. .	N
Motors cycles/ scooters	. .	M
Cars/Jeeps	. .	C
Tractors	. .	T

In addition to the information that have been collected through Block Development Office, the following four appendices to the Villege Directory have also been compiled :

I. Police Stationwise abstract of educational, medical and other amenities,
II. Land utilisation data in respect of non-municipal (non-statutory) Census Towns.
III. Police Stationwise list of villages where no amenities are available.
IV. Police Stationwise list of village according to the proportion of scheduled castes/scheduled tribes population by ranges.

The first two appendices have been provided for obtaining actual position regarding various amenities available in the police station and as well in the district and the land utilisation pattern in the non-municipal census towns which have been treated urban by virtue of the criteria prescribed for urban units. Apdendix-III has been devised for planning input in areas where basic infrastructure is lacking. Appendix-IV has been prepared for the purpose of planning of welfare programmes for scheduled castes and scheduled tribes at micro-level, particularly in relation to the area development oriented programmes.

Scope of Town Directory :

The Town Directory has been prepared for all the statutory towns like, Municipal Corporation (MC), Municipalities (M), Notified Areas (NA), Town Committee (TC) and Cantonment areas as well as the non-statutory census towns (NM) including the outgrowths. The particulars about each town have been presented in seven statements each dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IVA is a new addition in town directory statement. It covers the information regarding demographic, civic and other amenities available in the notified or recognised slums having a population of 50,000 or more. The towns having outgrowths has been

identified with the asterisk (*) and the information available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In that case information not available (NA) has been quoted in the respective column.

The population of each town during 1981 Census has been considered for determining the class of towns. All the towns have been divided into six classes according to the range of population. They are as follows :

1. Population one lakh and above .. Class I
2. Population from 50,000 to 99,999 .. Class II
3. Population from 20,000 to 49,999 .. Class III
4. Population from 10,000 to 19,999 .. Ciass IV
5. Population from 5.000 to 9,999 .. Class V
6. Population less than 5,000 .. Class VI

A brief discussion on seven statements is given below :

Statement I :

This statement provides some basic data based on the primary census Abstract. It deals with the status and growth history of the town. The column no. 1 to 5 gives information on class, civic status, name of the rown and its location code with the police station the town belongs to. The area of the town in square kilometer has also been given. The column no. 6 to 19 give demographic information of the town. where the town did not have any urban status for the reference year(s), a 'dash' (—) has been given under these column(s). The decadal growth in percentage has been shown below the population figures from column nos. 8 to 15. The status of the statutory towns has been fixed as on April 1980.

Statement II

The statement deals with the physical aspects and location of the town as on April 1980. This statement is divided into two. First dealing with the climatological data which include rainfall and maximum-minimum temperature. The information on climatological aspects are not available in respect of some of the towns. In that case the information noted from the nearest place where it is available. This alternative however, could nct be followed uniformly due to the fact that the data are not available for the nearest place even. In such cases the information not available (NA) has been stated. In the second part *i. e.* in column nos. 6 to 12 the locational particulars have been stated for the referrent town.

Statement III

Data on municipal finances for the year 1978-79 have been presented relating to the civic administration of the statutory bodies. The information in respect of the non-municipal census towns have also been collected wherever available and have been shown in the statement. The information on finance have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census town having no information has been marked with information not available (N. A.).

Statement IV :

This statement contains 19 columns. The column nos. 1 to 5 provide general information of the town and the column nos. 6 to 19 deal with the amenities having in the referrent town. Where the town is not served by the fire fighting services of its own, the name of the nearest place from where the referrent town gets services has been given. In absence of any of the public amenities as referred to in col. 6 to 19 the relevant column has been depicted suitably like dash (—) which means amenities not available and information not available (NA) respectively.

Statement IVA :

Information about notified or reconiged slums have been given in this statement. The information is limited to the slums located in Class I and Class II towns only. The civic and other amenities that are being available to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been submitted separately for each slum.

Statement V :

This statement deals with the medical, educational recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions run by or aided by Government, Semi-Government, local bodies, charitable institutions Social Service Agencies like Missionaries etc. have been counted. Where these facilities were not available, the distance of the nearest place where these facilities are available has been noted. The family Planning Centres attached to hospitals or Maternity and Child Welfare Centres or Primary Health Centres have been treated as separate units. The maternity and Child Welfare Centres, Venereal Disease Clinic, Chest Clinic and Leporsy Clinic etc. have been treated as independent institutions and indicated in "Others" category of medical institutions.

While presenting the data on educational institutions, the same procedure as in village Directory has been followed in respect of the school and college education. The column 6 includes educational institutions like Teachers' Training College, Basic Training College etc. The information on short hand, typewriting and other vocational training Institutions have been given in column 10. In this case only the recognised institutions have been considered. The "recognised" means recognised by any statutory authority—like the Education department, commerce department, labour department etc. of the Government or Semi-Government autonomous bodies, public sector projects like municipality, corporation etc.

The vocational institutions like Music/Dancing school, Art College, Painting/Clay-modelling institutions etc. have been covered under col. 10. The institutions which are not included in cols. 6 to 14 have been taken in col. no. 15 under "Others". The columns 17-20 deal with the recreational and cultural facilities of town.

Statement VI :

This statement contains particulars of Trade, Commerce and Industry of the town. It also depicts information on Banking institutions like Banks, Agricultural Credit Societies and non-agricultural credit Societies.

The details of abb reviations used in different statements of Town Directory are given below :

Brief history of the district :

Puruliya district owes its name to an ordinary village of the same name. The village had gradually grown in importance and became the headquarters of the erstwhile Manbhum district in 1938. According to the decision of the Government of India contained in clause (b) of sub-section 1 of section 1 of the Bihar and West Bengal (Transfer of Territories) Act 1956, Puruliya, subdivision of Manbhum district, excluding Chas and Chandi police stations and the police outpost area of Palamda within Barabhum police station was transferred to West Bengal. The new district of Puruliya in West Bengal came into being on November 1, 1956.

Physical Aspects :

The district Puruliya is the Westernmost district of West Bengal. It is girdled by the tropic of cancer. The latitudinal and longitudinal extents are from 22°42′35″ to 23°42′0″ North and from 85°49′25″ and 86°54′37″ East respectively. The district is 220 kilometres away from the Bay of Bengal and the Hugli estuary. The physiographic location of the district may be characterised as between the alluvial plains of West Bengal and the ancient plateau of south-east Bihar. Puruliya has hardly any natural boundary. Only about a hundred kilometers of the district boundary follows the Damodar river in the north and the Subarnarekha in the West. Puruliya has its boundaries on the east with the Medinipur and Bankura districts of West Bengal ; on the north with the Barddhaman district of West Bengal and Dhanbad district of Bihar ; on the north-west, West and south-west with the districts of Hazaribagh, Ranchi and Singbhum of Bihar. A part of the northern boundary runs through the centre of the Panchet reservoir while eastern boundary runs partly through the centre of the Kangsabati reservoir.

The district has a gently undulating topography with occasional hillocks of hard rocks. These are residual hills, bearing testimony to the high plateau of ancient times which has been eroded down and turn the present landform. Because of erosion, the texture of the present landform is of two kinds, viz. higher peneplains which include the police stations of Jhalda, Arsa, Baghmundi, Balarampur, Barabazar and Banduan and the rests are in the zone of lower undulating surface. The highlands rise very steeply from 300 metres but the slope becomes moderate above 500 metres, there appears an uplifted peneplained surface.

The highlands of Puruliya are actually the ramnants of the spurs projecting from the Ranchi plateau to the west and functioning as watersheds of the Subarnarekha-Kasai-Damodar group of rivers. Ajodhya Pahar forms the main highland region of Puruliya. To the west and south of Ajodhya Pahar, occur a number of residual hills, isolated and detached from the parent body. There are many such outliers in Jhalda which rise steeply. Here the Chamtu is the highest point with 688 metres high. Of the other residual hills, the most spectacular is Jajuhatu dam with 542 5 metres rising encircled by numerous streams. At the southern peripheri of the Bagmundi hills the prominent outliers are Kadali Pahar and Khairapahari with 377 metres and 348 metres high respectively. The important peaks on the main highland mass of Bagmundi—Ajodhya are Ganja Pahar and

Gugni Pahar. The height of each of these peaks is 580.5 metres. The Gorgaburu and Karma hill with the heights of 677 metres and 663 metres respectiveiy are the highest peaks. There are nine peaks at the extreme north-west of the district of which Bijali Pokhar which rises 621 metres and Jabarban peak with 641 metres are worth mentioning. To the north-east of the district, Panchet hill with 643.5 metres is located.

The undulating plains from north to south of the district may be classified as the following interfluvse and broad valleys :

1) The Damodar valley ;
2) The Damodar-Kesai interfluve ;
3) The Damodar-Dwarakeswar interfluve ;
4) The Dwarakeswar.Kasai interfluve I
5) The upper Silabati catchment ;
6) The Kasai-Kumari interfluve ; and
7) The Subarnarekha valley to the west and south-west. The general slope of the the river valleys, except the Subarnarekha, is towards east and south-east. The height of the interfluves, sloping north and south, ranges between 150 and 300 metres.

The main rivers of the district are Subarnarekha which is the westernmost river in Puruliya, the Damodar forming the northern boundary, the Gobai—the most important right bank tributary of the Damodar, the Dwarakeswar, the Silabati or Silai, Kasai and the Kumari.

The Panchet and the Kangsabati reservoirs are the two most important artificial lakes of the district.

Major characteristics of the district :

According to 1972-73, 876 sq. kms. of the total land in the district of Puruliya were covered by forests. In terms of percentage it is 14 only. The area under protected forests was 72878 hectares and the reserved forests and the protected forests covered 10326 hectares and 4410 hectares respectively in the referrent year.

The classification of landuse area as in 1976-77 in the district Puruliya is given below :—

i) Net cropped area —294.90 thousand hectares
ii) Land put to non-Agricultural uses—70.72 thousand hectares
iii) Barren and unculturable waste—18.06 thousand hectares
iv) Misc. tree crops and groves—11.39 thousand hectares
v) Culturable waste—86.98 thousand hectares
vi) Other fallow land—20.10 thousand hectares
vii) Current fallow—32.95 thousand hectares

The district Puruliya is predominantly an agricultural district. According to 1981 Census 75.19 percent of the

total workers of the district depends on agriculture (i. e. cultivators and agricultural labourers). The total area covered under the production of foodgrains was 265.0 thousand hectares in the year 1976·77. Rice was cultivated in 244.8 thousand hectares of land, wheat in 5.1 thousand hectares and Pulses in 7.4 thousand hectares of land,

The total foodgrains produced during the year 1976-77 were 258.6 thousand tonnes ; of which cereals produced to the extent of 254.6 thousand tonnes. Of the cereals 242.7 thousand tonnes were rice and 1·4 thousand tonnes wheat.

The yields per hectare of land during the year 1976-77 were 991 kgs for rice and 165 kgs for wheat.

Although aggriculture is the chief sourse of livelihood in Puruliya district, the irrigation facilities in the district is far from satisfactory. The district is characterised by the presence of a largely distributed waste land. From the available statistics. the cultivable waste was estimated as 86·96 thousand hectares, fairly distributed all over the district. Although the Dwarakeswar, the Kangsabati and the Silabati and large number of rivulets originate in rhe district itself, but owing to the natural topography of the district these rivers end rivulets offer very little irrigation facilities. Irrigation in the district is done from tanks and bundhs (a type of water reservoir) from accumulation of runoff water. The accumulation of water in the tanks and the bundhs depends on rainfall only. The reserviors get mostly dried up during summer months. The irrigation with help of well covers but a portion of the total cultivable land.

There is no major irrigation projects in the district Saharajore canals– A medium irrigation projects—covered an area of 4941 hectares of cultivable land in 1976-77. Under the Drought Pond Area Programme—A medium type scheme of the Govt. of West Bengal, four irrigation schemes viz. Bandhu Irrigation Scheme, Kumari Irrigation Scheme, Rupali Irrigation Scheme and Dangra Irrigation Scheme covered an area or 1255, 243, 405 and 101 hectares of land respectively in the year 1976-77. 2531 hectares of land were irrigated in the referrent year by minor irrigation projects. 485 hectares of land were irrigated by Minor Drought Pond Area Programme Scheme only. There were 55 installations of River Lift Irrigation in the district till the end of 1976-77. As per 1981 Census, only 11.44 percent of the total cultivable area of the district is irrigated.

The district has deposits of a fairly wide range of minerals which are commercially important. Mention may be made, in particular, the minerals like china-clay, coal, copper, feldspor, fluorite, limestone and quartz, Other minerals, which are found in the district though not important from the commercial point of view as they are available on a very limited scale, are asbestos, calcite, fireclay, garnet, graphite, ilmenite, pyrites, mica, iron-ore and a few radio active minerals.

Workable deposits of china-clay occur at Amtor in Raghunathpur police station, Kalabani, Mathabhanga and Sravandi in the police stations of Puruliya, Jhalda and Baghmundi. The deposits in Kalabani contains superior-grade clay whereas the deposits in the last three villages contains clay of inferior grade.

Coal mining has been the most important extractive industry of Pururiya. All the working collieries of the district are located on the north-east corner of the district and fall under Neturia police station.

The district possesses a copper-bearing zone at Tamakhun under Manbazar police station, containing about 2% extractable copper.

Feldspar occurs at several places in the district. This mineral is used chiefly for glazing and whitening purposes. Fluorite is an important material which is required in steel, enamal and chemical industries. The deposits occur near Belamu hill in Jhalda police station. It is a rare mineral and, therefore, of great significance.

Limestone is found in several pockets in the district. A considerable quantity of limestone with low magnesia content is found in Jhalda police station.

The district derives its power from the West Bengal State Electricity Board. All the eight towns in the district have electricity. Of the 2449 inhabited villages of the district only 105 villages have the electricity. This accounts for 4.29 percent of the total inhabited villages of the district. The power generating in the district has undergone a great transformation with the setting up of the giant super thermal power station at Saontaldihi. In fact Saontaldihi has become the main source of power supply to the districts of West Bengal. But for coal mining and Saontaldihi Super Thermal Power Station Puruliya is essentially an agricultu al district. Lac industry, tassar-weaving, brass and bellmetal utensils. cutlery and bidi making are some of the impottant economic activities under the small scale industrial sector of the district.

The lac is an important old time industry of the district. In India the consumption of lack is about 10 percent only and the rest i. e. 90% is exported to the foreign countries. The different schemes have been worked out and are being operated under the Directorate of Cottage and Small Scale Industries of the Govt. of West Bengal for the benefit of the lac cultivators and traders. These schemes have been implemented through the State Broadlac farms. The lac artisans have formed 'Artisans' co-operative society. The schemes cover the training-cum-production Centre at Balarampur for the training of lac cultivators and setting up of a servicing co-operative for lac at Tulin. The servicing co-operative at Tulin is equipped with modern machinery.

Tassar silk weaving is an important old time industry in the district. Now the industry is on the decline. There is a Tassar silk co-operative society at Raghunathpur. The Raghunathpur Tassar Seed Station distributes tassar seeds to the growers of the district.

Although the brass and bell-metal industry is in decline but still there are some brass and bell-metal industrial units in the district. These units manufacture mainly utensils and building materials.

Some units of the cutlery industry can be found in the police stations of Jhalda, Puruliya and Jaipur. The main items produced by the cutlery industry of the district are auger, chisel, bevel chisel, pruning knife,

cutplane, top iron, augerbit rosebit and carpenter's bit. These articles have an extensive market throughout India. The Govt of West Bengal runs a cutlery training centre in Puruliya.

According to the available statistics, there were 51 registered working factories in the district in 1977. Of which, 16 pertain to manufacture of shellac, 7 were manufacturing bidi and 5 were engaged in rice milling (big power machine). The district had 2519 registered small scale units till March 1977. As per household census held in August-September 1980, factories, workshops and worksheds occupied 4885 census houses whereas the workshop-cum-residence including household industry covered 7175 census houses in the district of Puruliya.

The principal items of export is rice, paddy, straw, lac, vegetables etc. The imports of the agticultural produce into the district are consisted of pulse, jaggery, wheat and wheat products, mustard-oil, mustard-cake, fruits, potatoes, onions, tobacco spices etc. The wholesale markets of Puruliya, Jhalda, Balarampur, Manbazar, Bandwan and Hura deals with the agricultural produces. The bulk of the produce in respect of lack, rice and paddy etc. is marketed outside the district.

The existing roads in the district provide very important transport services. The National Highway 32 passes through the police stations of Puruliya, Jaypur and Balarampur covering a distance of 64 kms between Balararampur-Singbhum border and chas-Dhanbad border. Two state Highways, viz. Puruliya-Barakar road and Chasmore-Tulin Road also run through the district cover a total length of about 121 kms. The district had, in March 1977, 662 kilometers of Extra Municipal road under the management of Public Works and Public Works (Roads) Departments of the Govt. of West Bengal. There were 595.43 kilometres of roads in the district in 1977 which were maintained by the Zilla Parisad. The major portion i. e. 540.24 kilometers of road length of the Zilla Parishad were unsurfaced. The district has three municipalities and these municipalities together maintained 60.68 kilometers of roads in 1977, of which 31.78 kilometers were metalled.

The railway was introduced in the district on 14th December 1889 by the erstwhile Bengal-Nagpur Railway Company. Asansol, on the erstwhile East Indian Railway was connected with Puruliya in the first phase. The line further extends southwards from Puruliya to meet Sini and Chakradharpur on the main line of the old Bengal Nagpur Railway. In 1903 the Kharagpur-Gomoh section of the erstwhile Bengal-Nagpur line was opened for goods traffic upto Mulkera. The complete length upto Gomoh was opened for passenger traffic on 1st January. 1907. The next addition to the railway system of the district was the Puruliya-Ranchi line which opened on 15th November 1907. The district is at present served by the South-Eastern Railway. The district is directly connected with Calcutta by two trains. The district possesses 198 kms. of broad gauge and 35 kms. of narrow-gauge tracks. The police stations having no railway stations are Barabazar, Bandwan, Hura, Manbazar, Neturia and Puncha.

Places of religious, historical, archaeological and tourist interest.

The village Bagmundi in the police station of the same name has an 'at-chala' temple of Radha-Govinda which

dates back to 1733, There is a small, octagonal Rasmancha hereby with nine pinnacles, having terracotta figures on four out of the eight sides. The terracotta figures depict enthroned Rama and Sita with entourage and Krishna with the gopies. There is also a plain 'Pancharatna Siva temple'. All these were built by the Rajas of Baghmundi.

In the viilage Kushjuri of Kashipur P. S., there is an elaborately carved stone temple, which is perhaps the earliest of the temples in the district Puruliya. It is said that the temple belongs to the 7th century because of its close structural affinities ; with the Gupta period Whereas other consider that the doorjamb figures may not be far removed from the 12th century art of Khiching in Mayurbhang.

Balarampur, a small town in Puruliya has ruins of ancient Jaina temples. The ruins of a large Buddheswara Siva temple in the village Budhpur of Manbazar police station, the ruins of some fifteen temples in the village Deulghat of Arsha police station, and the ruins of the large number of temples in the village Pakbirra of Puncha police station have considerable archaeological values.

The ruins of the fort of the powerful Rajas of Panchet are descernible at the southern foot hills of the Panchet in the village Garh Panchakol in Neturia P. S.

Tulin, a village in the Bihar border, on Jhalda-Ranchi Road in Jhalda P. S. has a picturesque sight. The Subarnarekha river flows by the village. The Tapoban Park in the village is worth a visit.

Ajodhya Hills is a woody hill having table land above, with about twenty villages. It is a place of tourist interest. A hilli track winds for about 12 kms. from Baghmundi to the top of the hill. There are two picturesque falls by the side of the hill track.

TABLE—1 DISTRIBUTION OF VILLAGES ACCORDING TO

Sl. No.	Name of Police Station	No. of inhabited villages	No. (with percentage) of Education	No. (with percentage) of Medical
