MOTIF

Temples, mosques, churches, gurudwaras are not only the places of worship but are the faith centres to obtain peace of the mind.

Aundha-Nagnath is one of the 12 famous Jyotirlingas. This temple constructed at the time of Yadavas of Devagiri, probably in the 13th Century, has considerable historical importance. The name of Namdev, the saint-poet is linked with this temple in a legend, which tells that the Lord for the sake of his devotee moved the front entrance of the temple in the direction of Namdev.

Aundha is about 82 kms north of district headquarter town of Parbhani.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particulary in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approached to the village is to have an idea about the villages in the district which are inaccessible. A new column, " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and

according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi,
the 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook Project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.

Dated 26th January 1984 (Republic Day)

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 District Census Handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts, Part A related to the village and town directory. Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other State in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts-Part A and Part B. Part A includes village and town directory and Part B Village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health sub-centres and community health workers, has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

In ancient time the town Parbhani was known as Prabhavati on account of the existence of a beautiful temple of goddess Prabhavati and therefore, it is quite likely that the present name Parbhani is a corrupt form of Prabhavati.

Parbhani district forms a part of the greater tract known as Maharashtra and till 1853 was included in Berar along with Buldana, Akola, Amravati and Yeotmal districts. In 1853, a new treaty was concluded with the Nizam. By this treaty districts yielding a gross revenue of 50 lakhs a year were assigned to the British. The district thus ceded consisted, besides a major portion of Berar, of Osmanabad (Naldurg) and the Raichur Doab. From the remaining portion of Berar which was left to the Nizam, the district of Parbhani to which were added the tahsils south of the Godavari and the tahsil of Partur on the west. The most ancient history of this region could be traced to the legends recorded, in the Epics and Puranas, which state that the country to the south of the Vindhya was in those days covered by dense forests. The former is supposed to be the birth place of Valya Koli who later became the celebrated author of Ramayana. One of the sacred place of India is located here, i. e. temple of Lord Nagnath, popularly known as Aundha Nagnath which contains one of the famous Jyotirlingas. The temple was constructed at the time of Yadavas of Devagiri in the 13th century and hence has considerable historical importance.

In, 1905, the northern villages of Nanded taluka of Nanded district were added to Kalamnuri taluka. Eight villages from Ambad taluka of Aurangabad district were added to Pathri taluka in exchange six villages from Pathri taluka were transfered to Ambad taluka. There were no major changes in the boundaries of the district or its talukas during 1906 and 1948.

The district of Parbhani too had its share of public workers who fought and suffered. At last on September 13, 1948, the Government of India moved into the Nizam's state and after a brief but brilliant police action put an end to the intolerable conditions prevailing in the state. The state of Hyderabad acceded to the Indian Union. Palam taluka was a part of Nizam's own estate. This estate was abolished in 1949 under Sarf-e-Khas (Merger) Regulation of 1949. All other jagirs were also abolished under the Hyderabad Regulation, 1949 and their villages taken over under direct Government administration and consequently all taluka boundaries were reorganised in the year 1950. A new taluka was constituted with headquarters at Gangakhed. It included the erstwhile Sarf-e-Khas area from Palam taluka and villages from jagirs of Sonpeth and Gangakhed talukas. Partur was retained as a new taluka in the district. Rest of the jagir area and few villages transferred from Pathri and Jintur talukas. The Parbhani district divided in 8 talukas e. g. Parbhani, Jintur, Hingoli, Kalamnuri, Basmath, Gangakhed. Pathri and Partur.

With the re-organisation of state in 1956, the Parbhani became a part of the Bombay Statea Since 1960, it becomes a part of Maharashtr. State.

Parbhani district comprised of 8 talukas at the time of 1961 census which in themselves included 1,517 inhabited villages and 12 towns. Since then the number of tahsils and towns in the district has remained unchanged at the time of 1971

census and 1981 census also. However, there have been certain changes as to the number of villages within the tahsil during the 1971 and 1981 censuses the number of villages has changed due to up-grading of Hamlets/wadies in the district. At the time of 1971 census the number of villages, 1,577 (including 72 uninhabited) and in 1981 census the number of villages had gone upto 1,652 (including 37 uninhabited villages).

Location, Relief and Drainage

The district lies between 18°57' and 20°2' North latitude and 76°7' and 77°29' East longitude. Parbhani is a compact district and has natural boundaries of the Penganga river in the north-east and of the Godavari river in the south-west. It is surrounded by Buldana and Akola in the north, Yavatmal in the east and Nanded in the south by Bid and Osmanabad districts and Aurangabad district towards the west. The Parbhani is situated in the Godavari Peninsular basin.

The area of the district is 12,561.0 km^{-2} and its population in 1981 census is 1,829,378. In terms of area and population the district stands at 11 and 19 in rank among the 26 districts of Maharashtra State. Parbhani is one of the samllest districts in the State in respect of area and fairly on the high side in respect of population.

As a part of the Deccan Plateau, the land of the district has a general elevation of about 457.50 metres (1,500 ft) above the sea level, its highest and lowest levels being 579.73 metres (1,902 ft.) in the Jintur range about 12.87 km. (8 miles) north of Charthana and 366.0 metres (1,200 ft.) above sea level on the Godavari bank near the point where the river crosses over the district boundary.

There is only one main system of hills and that is the Ajanta hills. These hills run through Kalamnuri, Hingoli, Jintur and Partur talukas and form plateau in the north. The elevation of this area is 438 to 549 metres above sea level. The plateau slopes gradually towards the south to terminate in the valley of Dudna. A few other well known hills are Malhara and Balaghat which traverse with southern portion of the district.

Godavari itself drains the southern portion of the district forming a fertile valley in the talukas of Partur, Pathri, Parbhani and Gangakhed. Jintur and Basmath talukas are drained by Purna which is a tributary of Godavari and Dudna. Godavari is the most important river in this district. It runs for a stretch of about 152.88 km. draining south-central and southern belt of the district. Other important rivers are Penganga, Purna and Dudna. The Penganga flows along the northern border of the district. Purna which rises in the hills of Aurangabad district, enters the district from the north-west corner and flows first in a south-east direction and then to the south. The Dudna runs across the district for about 50 miles and join the Purna, The other improtant streams are Kaidhu, Kapra, Indrayani, Asna and Masoli. Draining the district from the west to the east, the rivers forms a boundary i. e. (i) Penganga basin consisting of Hingoli and Kalamnuri tahsils and ; (ii) Purna-Godavari basin consisting of the remaining six tahsils in the district.

Climate

The climate of the district is generally dry except during the mansoon. The year may be divided into three seasons. The rainy seasons starts from June and lasts upto the end of September. A cool dry season from October to February and hot season from March to May. Within the district, the seasons show local variations, the northern portion on the plateau has cooler and is not as damp during the rainy season as southern portion.

The temperature data is recorded only at the district headquarter i. e. Parbhani. The centre may be taken as representative of the climate conditions over the district as a whole. During summer season the maximum temperature crosses 44° centigrade and minimum temperature during the cold season goes down upto 8.5° centigrade.

The rainfall is not found uniform in all the ports in the district. The average rainfall increases as we go from west to east. The normal annual rainfall of the district is 827 mm. The talukas which lie in the east receive an average of 900 mm rainfall annually, while the talukas in the west (Partur and Pathri) get less than 900 mm. Out of 12 towns of the district, the highest annual rainfall in Kalamnuri town, i. e. 1,086.8 mm and the lowest annual rainfall in Gangakhed town, i. e. 717.2 mm. Usually the rains start about the first week of June till the end of September. From about mid-October to December it usually gets 110 mm to 130 mm rainfall through the north east monsoons. On the basis of records of rainfall and certain other factors such as soil, crop pattern, etc. reported that the district may be regarded as free from scarcity. The statement II of Town Directory indicates the maximum and minimum temperature and normal annual rainfall in town of Parbhani district.

Soil

Broadly, the district can be divided into three parts. The northern up-ghat areas having light and medium soils. The southern part of Gangakhed taluka has also lighter soils. The central parts consisting of Pathri, Parbhani and Basmath talukas and parts of Partur and Jintur talukas have medium and heavy black soils.

The soil of this district is known as 'Black cotton soil' or 'Regur' It is rich in plant material such as lime, magnesia, iron and alkalies. In this soil cotton and some dry crops also flourish well. While becoming dry it swells and becomes sticky on wetting by water. In the Godavari valley specially along the river side it is very deep and fertile.

Census Houses and Households

Columns 4 and 5 of the primary census abstract give total number of occupied residential census houses and the number of households. According to Indian Census, 'Census House' is a building or a part thereof having a main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant, residential,

non residential or both. A 'household' is a group of persons who commonly live together and would take their meals from common kitchen, unless the exigencies of work prevented them from doing so. A '*household*' *may be of persons related by* blood or unrelated persons or having a mix of both. There may be single member or more than one member household. Households of unrelated persons termed as 'institutional households' including boarding houses, messes, residential hotels, rescue homes, jails, ashrams etc.

Houseless population or houseless households include persons who do not have any fixed place of residence but do on moving from place to place, camp at night, or just live on the streets, in gardens or in open places.

In the district there are 332,067 houses and 337,854 households. This shows that some of the residential houses are shared by more than one household. Keeping in view the population of the district returned at 1,829,378 persons, the average size of the household works out to 5.4 persons which is equal to the state average size of 5.4 persons per household.

Distribution of population in Rural and Urban Areas

The total population of Parbhani district according to 1981 census is 1,829,378 including 929,638 males and 899,740 females. This shows 2.91 per cent of states population over 4.08 per cent of its areas. The population distributed over its eight tahsils is as under. The Parbhani tahsil 316,234, Jintur tahsil 196,714, Hingoli tahsil 241,588, Kalamnuri tahsil 198,472, Basmath tahsil 222, 611, Gangakehd tahsil 229,033, Pathri tahsil 237,958 and Partur tahsil 186,768. It seems that the Parbhani tahsil is the most populous among all the tahsils of the district.

TABLE 1

Population, Number of Villages and Towns. 1981

Serial No.	Name of tahsil	Population									No. of villages		No. of towns
		Total			Rural			Urban			Total	In habited

District Total	..	1,829,378	929,638	899,740	1,486,556	752,408	734,148	342,822	177,230	165,592	1,652	1,615	12

The basic unit for rural area is a revenue village. A 'village' may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas on the other hand are specially defined for census purposes. The criteria adopted for 1981 census is :

(a) All places with a municipality, corporation or cantonment board or notified town areas.

(b) All other places which satisfy the following criteria ;

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(iii) A population of at least 400 persons per km^2.

Out of 1,829,378 persons in the district, 1,486,556 (81.26%) live in the rural areas and the remaining 342,822 (18.74%) in the urban areas. Thus, in Maharashtra state (where 35.03% of the *total population is urban*) *Parabhani is one of the* less urbanised district.

Size Class and Status of Town

For the purpose of comprehensive analysis of varied demographic characteristics, towns have been divided into the following classes by population size :

Class I .. 100,000 and above
Class II .. 50,000—99,999
Class III .. 20,000—49,999
Class IV .. 10,000—19,999
Class V .. 5,000— 9,999
Class VI .. Below 5,000

All the 12 towns in the district have Municipal Committee functioning under the Hyderabad district Municipalities Act, 1956. The Partur Municipal council is the oldest in the district, being established in 1940 while the Sailu Municipal council is formed in the year 1954.

Of the 12 towns in the district, Parbhani is the class I city, six towns are (Basmath, Hingoli, Jintur, Manwath, Purna and Sailu) class III, four towns are (Gangakhed, Kalamnuri, Partur and Pathri) Class IV, one (Sonpeth) is class V town (Statement I). Only Parbhani is the big town and remaining 11 towns are medium size towns. The number of towns are remained almost unchanged from 1951 to 1981. In 1981, there has been no addition of new town and declassified town (Table 2).

TABLE 2

New Town/Towns declassified in 1981 Census

Name of the towns		Population 1981-Census
1		2
(a) Added	..	Nil
(b) Declassified-	..	Nil

Urban Agglomeration

There is no urban agglomeration in this district.

Standard Urban Area

Standard Urban Area (S. U. A.) concept introduced in 1971, has been followed in 1981 as well. The essential trequirements for the constitution of S. U. A. are ;

(i) It should have a core town of a minimum population of 50,000 ;

(ii) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(iii) In all probability this entire area should get fully urbansied within a span of two or three decades.

The constitutent units of Standard Urban area in Parbhani district are as follows :—

Parbhani SUA.—*Urban Components.*—(1) Parbhani City (M).

Rural Components.—(1) Kalegaon, (2) Khanapur T. Parbhani, (3) Wangi, (4) Raipur, (5) Balsa Kh.

Table (3) below provides villages by population ranges and their percentage to total inhabited villages in the district.

TABLE 3

Distribution of Inhabited Villages by Population Ranges

Range of population		No. of villages in each range	Percentages of villages in each range
1		2	3
—200	..	132	8.17
200–499	..	409	25.33
500–1,999	..	962	59.57
2,000–4,999	..	99	6.13
5,000–9,999	..	13	0.80
10,000+	..	—	—
All ranges	..	1,615	1,00.00

A village on an average has a population of 920 persons and 7.5 km.^{2} of area Out of 1,615 inhabited villages, 132 (8.17%) are small sized with a population below 200, 409 (25.33%) in the size Class 200–499, 962 (59.57 %) in the size class 500–1,999 ; 99 (6.13%) in the size class 2,000–4,999 13 (0.80 %) in the size class 5,000–9,999 and none of the village in the population size of 10,000 and above. For a broader generalisation the villages have been further grouped as samll sized (population below 500), medium sized (500–1,999), large sized (2,000–4,999) and exceptionally large sized (5,000+). Within the district samll sized villages share 33.50 per cent of the total inhabited villages and 10.90 Per cent of the rural population in the district medium sized 59.57 per cent of villages and 63.68 per sent of the rural population. large sized 6.13 per cent of villages and 19.66 per cent of the rural population and exceptionally large sized 0.80 per cent of villages and 5.76 per cent of the rural population.

Population Growth, Density and Sex Ratio

The Parbhani district registered a growth rate, of 21.41 per cent during the decade 1971–81. The decade added 322,607 persons to the 1971 population of the district. However, the growth rate of population in Parbhani district was slightly lower than that of Maharashtra State (24.54%). During the earlier decade of 1961–71, the growth rate of the district was 24.92 per cent but due to scarcity conditions the district population decreased by 3.51 per cent in the decade 1971–81. Within the district there are significant differences in the rates of growth of population in various tahsils. Parbhani records the highest growth rate of 38.69 per cent while partur has the lowest growth rate viz ; 11.31 per cent. The rates of variation in Parbhani Kalamnuri and Basmath thasils are above the district average and remaining tahsils are below the district average. The high growth rate in Parbhani tahsil is mainly due to the growth of Parbhani city. It is also observed that during 1971–81 the urban growth rate is higher than rural in 7 tahsils, except Kalamnuri tahsil (Table 4).

TABLE 4

Decadal Change in Distribution of Population

Name of Tahsil	Population						Percentage decadal (1971-81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
1 Parbhani ..	228,013	149,482	78,531	316,234	184,173	132,061	+ 38.69	+ 23.21	+ 68.16

7 Pathri ..	201,442	152,132	49,310	237,958	174,869	63,089	+ 18.13	+ 14.95	+ 27.94
8 Partur ..	167,793	154,041	13,752	186,768	170,334	16,434	+ 11.31	+ 10.58	+ 19.50
District Total ..	1,506,771	1,264,833	241,938	1,829,378	1,486,556	342,822	+ 21.41	+ 17.53	+ 41.70

Due to liberal use of urban criteria at the time of 1951 census, substantial urban growth rates were recorded both in the district (35.02 %) and the State (62.42 %) (Table 5).

TABLE 5

Growth, Density and Sex ratio of Urban population in the District in relation to the State

Census Year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per Km²)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per km)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	7	10	11	12	13

1961 ..	1,206,236	166,702	13.82	+ 8.02	722	927	39,553,718	11,162,561	28.22	+ 21.32	1,694	801
1971 ..	1,506,771	241,938	16.06	+ 45.13	1,093	915	50,412,235	15,711,211	31.17	+ 40.75	2,555	820
1981 ..	1,829,378	342,822	18.74	+ 41.70	1,548	934	62,784,171	21,993,594	35.03	+ 39.99	3,736	850

In 1961 census, it came down to 8.02 per cent in the district and 21.32 per cent in the State. During 1961-71, urban growth rate in the district and the State were 45.13 per cent and 40.75 per cent respectively. At the latest census of 1981, the district recorded an urban growth rate of 41.70 per cent as gainst the State averge of 39.99 per cent. Among the various towns in the district Parbhani recorded the highest (77.63%) growth rate (Statement I). Remaining towns except Basmath in the district are below the district average in growth rate. Sonpeth in Gaagakhed tahsil is recorded the lowest growth rate (13.70%) during 1971-81.

Parbhani district has an averge density of 146 persons per km². This is lower than the state average density of 204 persons per km.² Within the district the density varies from 223 persons per km² in Parbhani tahsil to 114 oersons per km.² in Jintur tahsil. The density of population decreases as we go from north to south.

Table 6 shows distribution of villges according to density ranges.

TABLE 6

Distribution of Villages by Density

501+ ..	8	0.50
Not Known ..	11	0.68
All density ranges ..	1,615	100.00

For convenient understandiag of patterns, villages have been grouped under eight different density ranges. Table reveals that about 1,471 of the inhabited villges recorded a density of upto 200 persons per km.2 Remaining 125 villages varied between 201 and 500 and only 8 villages recorded a very high density of more that 500 persons per km.2. For the remaining 11 villages density of population could not be worked out for want of their area figures. In conformity with the state pattern there has been consistent rise in the urban density of population in the district since 1961. It has increased from 722 persons per km2. in 1961 to 1,548 persons per km2 in 1981 (Table 5). Among the various towns in the district Partur recorded the highest density (21,069) and Kalamnuri recorded the lowest density (381) as per 1981 census (Statement I).

The followiag table shows the sex ratio's for the district and the State (number of females per 1,000 males) since 1901.

TABLE 6 (i)

Sex Ratio 1901-1981

Year		District	State
1901	..	996	978
1911	..	993	966
1921	..	978	950
1931	..	963	947
1941	..	960	949
1951	..	980	941
1961	..	972	936
1971	..	960	930
1981	..	968	937

1981 census recorded a sex ratio of 968 females per 1,000 males in the district. This is slightly higher than that of the state average (937).

The sex ratio in Parbani district has remained higher than that of the state since 1901 to 1981.

The following table shows the sex ratio for each tahsil in the district for total areas.

TABLE 6 (ii)

Sex Ratio by Tahsils, 1981

District/Tahsil		Females per 1,000 males,
Parbhani District	..	968
Parbhani tahsil	..	949
Jintur tahsil	..	982
Hingoli tahsil	..	964
Kalamnuri tahsil	..	967
Basmath tahsil	..	966
Gangakhed tahsil	..	978
Pathri tahsil	..	974
Partur tahsil	..	974

Within the district, the sex ratio varies from 982 in Jintur thasil to 949 in Parbhani tahsli. Higher sex ratios are generally obtained in the tahsils of Jintur (982), Gangakhed (978), Partur and Pathri (974).

The urban sex ratio (934) in the district is higher than that of the state (850). Trend over the past few decades (Table 5) reflects comparatively rise in the urban sex ratio of the district from 1971 and for the state since 1961.

Scheduled Castes and Scheduled Tribes

For evolving any suitable plan for socioeconomic uplift of the scheduled castes and scheduled tribes, the Government need to have the necessary data about them and for this, census is the main source. One of the highlights of 1981 census as that of 1971 and 1961 censuses, was the collection of detailed information on the socioeconomic characteristics of scheduled casts and scheduled tribe population.

There is no standard definition of scheduled castes or scheduled tribes. Scheduled castes include castes, races of tribes as are declared to be scheduled castes by the President of India by public notification under article 341 (i) of the Indian Constitution. Similarly, Scheduled tribes mean all such tribes of tribal community or part or group. Within such tribe of tribal community as a re declared by the President of India, to be treated as Scheduled Tribes under article 342 (i) of the Indian Constitution. For Maharashtra State, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes respectively and the list of scheduled castes and scheduled tribes in the state is given below.

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

At the time of 1981 census scheduled caste population in Parbhani district was 106,466 including 53,810 males and 52,656 females. They constitute 5.82 per cent of the total district population as against 5.64 per cent in 1971. Out of the total scheduled castes population in the district 87,416 live in rural and the remaining 19,050 in the urban areas. In the district, 245 villages have no scheduled caste population (Table 7).

TABLE 7

Proportion of Scheduled Caste Population to Total Population in the Villages

Parcentage range of scheduled caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. C. Population ..	245	15.17
—5 ..	847	52.45

16—20 ..	56	3.47
21—30 ..	29	1.79
31 + ..	10	0.62
All ranges ..	1,615	100.00

Among the remaining 1,370 villages, the share of scheduled castes population is less than 5 per cent in 847 villages ; 6 to 10 per cent in 312 villages, 11 to 15 per cent in 116 villages ; 16 to 20 per cent in 56 villages; 21 to 30 per cent in 29 villages and more than 30 per cent in 10 illages in the district.

Table 7 (i) shows tahsilwise proportion of scheduled caste and scheduled tribe population to the total population in the district for 1971 and 1981.

TABLE 7 (i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of Scheduled Caste population to Total population		Percentage of Scheduled Tribe population to Total population	
	1971	1981	1971	1981
1	2	3	4	5

Pathri tahsil ..	7.68	5.94	0.16	1.01
Partur tahsil ..	6.08	6.23	0.78	1.65

As per 1981 census, the scheduled tribe population in Parbhani district stands at 78,577 (39,892 males and 38,685 females) and they comprise 4.30 per cent as against 2.79 per cent in 1971. The proportion of scheduled tribe population in the district is predominantly very much less population. It is primarily the result of the removal of area restrictions for recognising the tribal population in the district. In Parbhani district 95.10 per cent of the scheduled tribe population is rural by residence and 4.90 per cent resides in the urban areas.

Out of 1,615 inhabited villages in the district, 872 villages have no scheduled tribe population (Table 8).

TABLE 8

Proportion of Scheduled Tribe Population to Total population in the villages

36—50 ..	30	1.86
51 + ..	63	3.90
All ranges ..	1,615	100.00

Among the remaining 743 villages, the proportion of scheduled tribe population is less than 5 per cent in 447 villages; 6 to 15 per cent in 114 villages; 16 to 25 per cent in 50 villages; 26 to 35 per cent in 39 villages, 36 to 50 per cent in 30 villages and above 50 per cent in 63 villages in the district.

In urban areas the scheduled castes and scheduled tribes constitute 5.56 per cent and 1.12 per cent of the total population respectively (Table 9).

TABLE 9

Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name and civic status of the town	Total population	Total scheduled caste population	Total scheduled tribe population	Percentage of scheduled caste population to total population	Percentage of scheduled tribe population to total population
1	2	3	4	5	6

Kalamnuri (M. Cl.) ..	11,845	343	165	2.90	1.39
Manwath (M. Cl.) ..	21,830	564	132	2.58	0.60
Parbhani City (M. Cl.) ..	109,364	5,746	975	5.25	0.89
Partur (M. Cl.) ..	164,34	1,031	160	6.27	0.97
Pathri (M. Cl.) ..	16,480	1,257	89	7.63	0.54
Purna (M. Cl.) ..	22,697	1,370	735	6.04	3.24
Sailu (M. Cl.) ..	24,779	1,192	237	4.81	0.96
Sonpeth (M. Cl.) ..	7,917	688	29	8.69	0.37
All towns ..	342,822	19,050	3,854	5.56	1.12

Concentration of scheduled castes is more than the district average in the towns of Gangakhed, Hingoli, Jintur, Partur, Pathri, Purna and Sonpeth and remaining towns are below the district average.

Literacy

Any person who is able to both read and write with understanding in any language is recorded as a literate by the Indian Census. The latest 1981 census revealed that 30.33 per cent of the total population in the dstrict is literate against the state average literacy rate of 47.18 per cent. Among the various district in the state, Parbhani district ranks 25th in the terms of literacy rate. Literacy rates by population ranges of villages are also indicated in Table 10.

TABLE 10

Literacy Rates by Population Ranges of Villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
—200 ..	132	21.18
200—499 ..	409	24.20
500—1,999 ..	962	25.00
2,000—4,999 ..	99	28.73
5,000—9,999 ..	13	35.74
10,000+ ..	—	—
All ranges ..	1,615	26.23

Within the district the literacy rate is maximum (35.26%) in Parbhani tahsil and the minimum (26.58%) in Gangakhed tahsil (Table 12). It is also observed that size of the villages and literacy rate are positively corelated (Table 10). Among the various towns in the district Hingoli recorded the highest literacy rate 52.16 per cent in 1981. By contrast the lowest literacy rate was in Sonpeth town (38.79%) (Table 11).

TABLE 11

Literacy Rates for Towns

Name and civic status of the town	Literacy rate
1	2
Basmath (M. Cl.) ..	47.26
Gangakhed (M. Cl.) ..	48.13
Hingoli (M. Cl.) ..	52.16
Jintur (M. Cl.) ..	43.01
Kalamnuri (M. Cl.) ..	46.26
Manwath (M. Cl.) ..	42.82
Parbhani City (M. Cl.) ..	50.62
Partur (M. Cl.) ..	44.34
Pathri (M. Cl.) ..	41.72
Purna (M. Cl.) ..	50.78
Sailu (M. Cl.) ..	48.35
Sonpeth (M. Cl.) ..	38.79
All towns ..	48.12

During the last 80 years (1901 to 1981) the literacy rate in the district increased from 2.50 per cent in 1901 to 30.33 per cent in 1981 [Table 11 (i)].

TABLE 11 (i)

Progress of Literacy 1901-81

Year	Total	Males	Females
1901 ..	2.50	4.93	0.06
1911 ..	2.45	4.70	0.19
1921 ..	2.56	4.28	0.81
1931 ..	3.82	6.67	0.87
1941 ..	7.11	10.75	3.31
1951 ..	7.40	12.90	1.90
1961 ..	15.37	25.27	5.19
1971 ..	24.31	36.85	11.25
1981 ..	30.33	44.67	15.53

The progress of literacy was very slow till 1921 when hardly 2.56 per cent of the district population was literate. Slow improvement upto 1951 and very rapid progress in 1961. The literacy rates have almost doubled during the year 1961. Literacy rose from 15.37 per cent in 1761 to 30.33 per cent in 1981. The district literacy rate (30.33%) is below the state average (47.18%).

The rapid improvement in 1961 may be the reason of expansion of educational facilities during the first two five years plan. The improvement in female literacy from 5.19 per cent in 1961 to 15.53 per cent in 1981 is noteworthy achievement. The scheme of compulsory primary education introduced in 1954 may be another contributing factor. In the males and females the literacy is differed very sharply. The literacty rate of females (15.53%) was almost one third of males (44.67%) in 1981. Sexwise literacy has thus been narrowing although it continues to be wide in itself.

Like male and female differentials there exists disparity in the literacy rates of rural and urban areas. As against 26.23 per cent of literates in rural areas and 48.12 per cent of literates in urban areas of the district as per 1981 population census. Between the two sexes, the differential is larger for females (11.07% rural, 35.28% urban) than for males (41.03% rural, 60.11% urban).

Working population

'Work' may be defined as participation in economically productive activity. The participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the worker at the 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961. However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered. conceptually, the main workers plus the marginal workers of 1981 are almost Comparable with the workers Plus non-workers with secondary work' of 1971 and 'workers of 1961. Further, for 1981 census on the recommendation of Planning Commission and Central Statistical Organisation, only four industrial categories of main workers i. e. cultivators, agricultural labourers, workers engaged in householed industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

For main workers major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked for sometime during the preceding year bur not for the major part have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non-workers. Persons engaged in household duties, students, dependants, retired persons, rentiers, beggars are some of the categories grouped as non-workers.

The Parbhani district recorded 44.32 per cent for the 1981 census population as a main workers 5.04 per cent as marginal workers and the remaining 50.64 per cent as non-workers (Table 12)

The corresponding figures for the State as such are 38.71 per cent, 3.85 per cent and 57.44 per cent. Thus nearly half of the population of the district and the State is engaged in economically productive activity, compared to 1971, there has been little rise in the work participation rate both in the district (37.41% in 1971 and 44.32% in 1981) and the State (36.48% in 1971 and 38. 71 % in 1981). Within the district the work participation rate recorded at 1981 census was the highest (49.15%) in Kalamnuri tahsil and the lowest (38.74 %) in Parbhani tahsil. Male participation rate 57.25 per cent is near about double than the female (30.97%) participation rate. The female participation rate in the district increased form 20.06 per cent in 1971 to 30.97 per cent in 1981 and in the State 19.70 per cent to 23.98 per cent. As such there was a marginal rise in the district male participation rate 54.07 per cent in 1971 to 57.25 per cent in 1981. In the State also there is a marginal rise 52.09 per cent in 1971 to 52.51 per cent in 1981.

1981 work participation rate is more in the rural (47.57%) than the urban (30.24%). Between the two sexes the differential is larger among the female in rural areas (35.37%) than the urban areas (11.43%). The participation rate of the males in rural areas (59.47%) is more than urban areas (47.82%).

1981 census results revealed that among the main workers in the district, 39.59 per cent are cultivators, 40.08 per cent are agricultural labourers, 1.62 per cent are engaged in household industry and the remaining 18.71 per cent are engaged in other services. The corresponding percentages for the State are 35.12 per cent, 26.63%, 2.55 per cent and 35.70 per cent. Evidently, more than two-third of the workers in the district are engaged in cultivators and agricultural labourers. Male participation as cultivators in the district is substantially higher than that of the State.

In the district, marginal workers were recorded 5.04 per cent of the total population. The participation of males is 1.25 per cent and females is 8.94 per cent. The high incidence of marginal workers among females as compared to males is understandable as the former besides, looking after their household duties and to engage themselves in some economically productive activity to lend support to their male counterparts.

Availability of Amenities — Education

96.41 per cent villages in the district have educational amenity available and these villages contain 99.56 per cent of the rural population of the district (Tables 13 and 14).

TABLE 13

Distribution of Villages according in the availability of different amenities

Serial No.	Name of Tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply

8	Partur	170,334	169,833 (99.71)	30,163 (17.71)	170,334 (100.00)	98,140 (57.62)	37,390 (21.95)	86,654 (50.87)	86,819 (50.97)	170,031 (99.82)
	Total of all tahsils	1,486,556	1,480,037 (99.56)	370,277 (24.91)	1,486,556 (100.00)	660,390 (44.42)	376,053 (25.30)	867,135 (58.33)	659,393 (44.36)	1,239,347 (83.37)

The circumstances regarding schools is good in all the eight tahsils i. e. Parbhani (95.38%), Jintur (98.21%), Hingoli (96.85%), Kalamnuri (95.13%), Basmath (90.29%), Gangakhed (99.51%), Pathri (98.17%) and Partur (97. 95%). 58 villages have not any educational facilities and these are distributed according to population ranges as follows : 55 villages are in the population range of less than 500, and only 3 villages are in the range of 500—1,999. In the remaining two population ranges, there is not a single village without educational facilities (Table 15).

TABLE 15

Distribution of Villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
	2	3	4	5	6	7	8	9	10
—500	541	486 (89.83)	12 (2.22)	541 (100.00)	15 (2.77)	14 (2.59)	185 (34.20)	147 (27.17)	291 (53.79)
500—1,999	962	959 (99.69)	78 (8.11)	962 (100.00)	213 (22.14)	78 (8.11)	454 (47.19)	326 (33.89)	748 (77.75)
2000-4,999	99	99 (100.00)	61 (61.62)	99 (100.00)	97 (97.98)	59 (59.60)	80 (80.81)	63 (63.64)	96 (96.97)
5,000 +	13	13 (100.00)	13 (100.00)	13 (100.00)	13 (100.00)	13 (100.00)	13 (100.00)	13 (100.00)	13 (100.00)
All ranges	1,615	1,557 (96.41)	164 (10.15)	1,615 (100.00)	338 (20.93)	164 (10.15)	732 (45.33)	549 (33.99)	1148 (71.08)

Among the villages without educational amenity, the same is available within the distance of 5 kms in respect of 35 villages, at the distance of 5-10 kms for 17 villages, at a distance of beyond 10 kms for 6 villages in the district (Table 16).

TABLE 16

Distribution of Villages not having certain amenities, arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at a distance of				
	— 5 Kms.	5—10 Kms.	10 Kms +	Distance unspecified in region	Total (Columns 2 to 5)
1	2	3	4	5	6
1. Education ..	35	17	6	—	58
2. Medical ..	468	644	339	—	1,451
3. Drinking water ..	—	—	—	—	—

V Sonpeth (M. Cl.)	..	1.26	2.53	2.53	2.53
All towns	..	1.23	1.17	1.40	2.57

On an average, the population to institution ratio in urban areas in the district is 10,000:1.23 Higher Secondary/Int/PUC/Junior Colleges; 10,000 : 1.17 Secondary/Matriculation Schools; 10,000: 1.40 Middle Schools and 10.000 : 2.57 Primary Schools. In other words, among urban areas, there is a Higher Secondary/Int/PUC/Junior College for every 8,162 persons, Secondary/Matriculation Schools for every 8,571 persons, Middle School for every 7,142 persons and Primary Schools for every 3,896 persons in the district.

Medical

Medical institution of any type specified in the village directory exist only in one out of every ten villages (10.15%) in the district and these villages contain 24.91 per cent of the rural population of the district. This situation is not very satisfactory. It is true, that in rural part of Maharashtra State, unwillingness on the part of medical personnel to work in the rural sector is one of the main causes. However, the establishment of primary health centres, opening of rural dispensaries and cottage hospitals are bound to steadily change the medical situation in near future.

Within the district, the position is good in Hingoli tahsil, where 38 (17.12%) of the villages are equipped with some kind of medical facility (Table 13) and 35.80 per cent of its population gets the benefit (Table 14). On the other hand, in Partur tahsil, just 10 (5.13%) of the villages covering 17.71 per cent of its population enjoy the facility in the villages itself. The position of the remaining tahsils is not so good. In these tahsils about 25 per cent of its rural population have medical facilities.

Among the 1,451 villages which do not have any medical facility, the same is available at a distance of upto 5 kms for 468 villages, at a distance of 5-10 kms in respect of 644 villages and beyond 10 kms for remaining 339 villages in the district (Table 16). It is also ovserved that all the big size 13 (100.00%) villages (5,000+) are equipped with some kind of medical facility within the village, while barely 12 (2.22%) villages in the population range below 500 have also avail this facility. (Table 15).

Table 19 gives the number of beds per 1,000 of population in the towns.

TABLE 19

No. of Beds in Medical Institutions in Towns

Class, name and civic status of the town			No. of beds in medical institutions per 1,000 population
1			2
III	Basmath (M. Cl)	..	0.60

V	Sonpeth (M Cl)	..	0.51
	All towns	..	1 74

On an average there are 1.74 beds per thousand of population in the urban areas of the district. Out of 12 towns only two towns namely Hingoli (1.88%) and Parbhani (3.78%) are above the district average and the remaining towns are below the district average for urban areas.

Drinking Water

It is heartening to note that all the villages in the district have drinking water amenity.

Post and Telegraph

Out of 1,615 inhabited villages more than one-fifth, 338 (20.93%) inhabited villages in the district have post and telegraph offices and these villages cover 44.42 per cent of the rural population of the district. Within the district, Partur tahsil is having the highest post offices, nearly one post office after three villages, 65 (33.33%) and those villages are covering about 57.62 per cent of its rural population. Apart from Partur tahsil, two other tahsils are above the district average i. e. Pathri (28.66%) and Gangakhed (21.95%). The remaining tahsils are below the district average. The lowest percentage of villages having post and telegraph offices is in Jintur tahsil (13.39%). The situation regarding post and telegraph offices in Parbhani district is not so good in most of the tahsils.

1,277 villages in the district do not have facility of post offices. Among them, it is available within a distance of 5 kms for 729 villages, at a distance of 5-10 kms for 458 villages and beyond 10 kms. for the remaining 90 village in the districts. Among the 338 villages, 15 villages are in the population range of less than 500, 213 villages in the range of 500-1,999, 97 villages in the range of 2,000-4,999 and the remaining 13 villages with a population range of above 5,000 have the availability of post and telegraph office with their respective villages.

Market/Hat

Market/hat is held in 164 (10.15%) villages in the district and these villages account 25.30 per cent of the rural population of the district. Within the district Hingoli tahsil has the highest markets 33 (14.86%) and the Kalamnuri tahsil has the lowest markets 12 (5.31%).

Among the 1,451 villages, were market/hat is not held, the same is available at a distance of upto 5 kms for 508 villages; 5-10 kms for 664 villages and beyond 10 kms in respect of 279 village in the district. of the 164 villages where market/hat are held, 14 are in the population range of less than 500, 78 in population range of 500-1,999, 59 in population range of 2,000-4,999 and 13 in the population range of above 5,000.

Communications

In the district, 732 (45.33%) villages have the availability of bus stop/railway station water way within the village and they serve more than half (58.33%) of the rural population of the district. Among the remaining 883 villages, where the communication facility is available within the distance of 5 kms in respect of 414 villages, at a distance of 5-10 kms in respect of 336 villages and beyond 10 kms for 133 villages. Among the 732 villages, 185 villages with this amenity are in the population range below 500, 454 villages with this amenity are in the range of 500-1,999,,80 villages in the range of 2,000-4,999 and the remaining 13 villages in the range of above 5,000.

Approach by pucca road

In the district 549 (33.99%) villages are approachable by pucca road and they serve 44.36 per cent of the rural population of the district. The position is very poor in Hingoli tahsil where only 19 (8.56%) villages are linked with pucca road. Among the 549 villages linked with pucca road, 147 villages are in the population range below 500, 326 villages are in the population range of 500-1,999, 63 villages are in the population range of 2,000-4,999 and the remaining 13 villages are in the range of above 5,000.

Power Supply

The rural electrification programme assigned importance from the third five year plan and this has resulted in accelerating the supply of power in the rural areas. 1,148 (71.08%) villages in the district now get the power supply which cover more than three fourth (83.37%) of its rural population. It is also observed that in Partur tahsil most of the villages get power supply

192 (98.46%). In Kalamnuri tahsil more than half of the villages get power supply 132 (58.41%). Among the 1,148 villages with availability of power supply, 291 villages are in the population range of below 500 ; 748 are in the range of 500-1,999 ; 96 are in the range of 2,000-4,999 and remaining 13 villages are in the range of above 5,000 population and their proportion to total villages under various categories are 53.79, 77.75, 96.97 and 100.00 per cent respectively.

Villages which do not have any amenity (except drinking water) are 36 in number (Appendix III) and they account for 0.15 per cent of the district's rural population. Tahsilwise break-up of these villages are Parbhani (2), Jintur (2), Hingoli (4), Kalamnuri (9), Basmath (17), Gangakhed (1) and Partur (1). Out of these 36 villages, 34 are in the population range below 200 and 2 villages are in the range of 200-499. The non-availability of any kind of amenity (except for drinking water) is in 36 villages, 58 villages without any schools, 1,451 villages with no medical facility, 1,277 villages not having postal facility, 1,451 villages have no market/hat, 883 villages without the facility of bus stop/railway station/ water way, 1,066 villages not approachable through pucca road and 467 villages not having power supply, is certainly shows a very poor progress of requisite amenities in the Parbhani district.

Land Utilisation

Columns 15 to 19 of the village directory give land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

The forest areas of the district include Jintur, Hingoli, Partur, Kalamnuri and Basmath tahsils. The total forest area in the district is 18,727.31 km The forests belong to mixed type consist of teak, tirman, salai, palas, khair and babul. However, the forests of the Parbhani district is open and of poor quality. The forests also has large grassy areas. Kusal and Shada species of grass are well represented. The Rosha grass is also fairly common.

Irrigated, Un-irrigated and Culturable Waste Areas

Data pertaining to irrigated area (by source), Un-irrigated and Culturable waste is given under columns 16, 17 and 18 respectively of the village Directory. In Parbhani district total cultivated area is 92.13 per cent. It is more than four-fifth of the total area. This shows that most of the area in this district is under cultivation (Table 20)

TABLE 20

Distribution of villages according to the Land Use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Parbhani ..	173	147,852.00	96.81	4.51
2	Jintur ..	224	165,874.44	88.14	2.50
3	Hingoli ..	222	182,023.62	88.12	2.16
4	Kalamnuri ..	226	142,476.18	90.59	1.40
5	Basmath ..	206	130,556.00	79.65	3.13
6	Gangakhed ..	205	163,909.31	99.89	0.08
7	Pathri ..	164	147,441.00	95.42	11.02
8	Partur ..	195	154,639.26	97.24	1.69
	Total of all tahsils ..	1,615	1,234,771.81	92.13	3.24

The four tahsils are above the district average in respect of percentage of cultivated area are Parbhani (96.81%), Gangakhed (99.89%), Pathri (95.42%) and Partur (97.24%). The remaining four tahsils are below the district average i. e. Jintur (88.14%), Hingoli (88.12%), Kalamnuri (90.59%), and Basmath (79.65%).

In Parbhani district 3.24 per cent of the cultivated area is irrigated. Pathri, Parbhani tahsils (11.02%), (4.51%) are the only exception having fair proportion of the cultivated land under irrigation. All other tahsils are below the district average of irrigated area.

Staple Food

As in other areas of the state, in this district also there are two agriculture seasons, viz ; Kharif and Rabi. But the district has much more area under kharif and rabi crops. While lighter soils suit kharif crops like jowar, bajra, groundnuts etc ; deep soils are favourable to rabi crops like cotton, jowar and grams.

In Parbhani district all the tahsils grow kharif crops viz. (1) Jowar, (2) Paddy, (3) Bajra and cotton, groundnuts, mug, tur, udid are the other side crops. Sugarcane is a perennial crop and its importance is gradually increasing.

TABLE 21

Main Staple Food in the Majority of Villages in each Tahsil

Serial No.	Name of tahsil	Main staple food
1	2	3
1	Parbhani ..	.. Wheat, Jowar
2	Jintur ..	.. Wheat, Jowar
3	Hingoli ..	.. Rice, Wheat
4	Kalamnuri ..	.. Jowar
5	Basmath ..	.. Wheat, Jowar
6	Gangakhed ..	.. Wheat, Jowar
7	Pathri ..	.. Wheat, Jowar
8	Partur ..	.. Wheat, Jowar

Among the food crops, jowar is the most important crop and it ranks first in the district. The second in order of importance is pulses. Rice and wheat is the third. Bajra and sugarcane are grown very rarely in the district. Table 21 shows that wheat and jowar are the main staple food in seven tahsils of the district and Rice and wheat in Hingoli tahsil only.

The following table shows the harvesting period for reference :—

Crop	Month	Harvesting period
(i) *Kharif*		
Paddy ..	May – June	October–November
Jowar ..	June–July	November–December.
Groundnuts	June	November–December.
Bajra ..	July	November
Mug ..	June	December
Tur ..	June	January
(ii) *Rabi*		
Jowar ..	September	February
Wheat ..	September	February
(iii) *Perennial*		
Sugarcane ..	November to January	

Municipal Finance

Table 22 gives per capita receipts and expenditure (in rupees) for every town in the district.

TABLE 22

Per Capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III Basmath (M. Cl.) ..	29.08	19.79	9.29	32.56	10.89	9.34	5.18	0.36	6.79
IV Gangakhed (M. Cl.)..	62.87	32.18	30.69	48.68	13.80	21.27	5.35	0.71	7.55
III Hingoli (M. Cl.) ..	29.77	3.41	26.36	100.75	12.46	12.88	29.68	0.58	45.15
III Jintur (M. Cl.) ..	60.51	30.52	29.99	60.85	13.38	13.38	23.70	0.69	9.70
IV Kalamnuri (M. Cl.) ..	43.94	20.86	23.08	47.98	13.47	4.50	17.97	1.13	10.91
III Manwath (M. Cl.) ..	70.51	48.79	21.72	67.16	3.33	16.75	23.23	1.56	22.29
I Parbhani City (M. Cl.)	125.23	45.95	79.28	75.36	8.05	8.78	16.52	0.10	41.91
IV Partur (M. Cl.) ..	51.78	21.79	29.99	33.88	11.34	6.54	1.08	0.80	14.12
IV Pathri (M. Cl.) ..	26.89	15.97	10.92	26.84	2.55	15.49	5.95	0.47	2.38
III Purna (M. Cl.) ..	42.96	24.67	18.29	45.51	2.64	9.43	14.14	0.71	18.59
III Sailu (M. Cl.) ..	66.75	32.12	34.63	52.30	12.91	16.43	16.50	0.08	6.38
V Sonpeth (M. Cl.) ..	34.82	21.98	12.84	29.58	12.63	11.99	—	—	4.96
Total ..	71.55	30.56	40.99	61.82	9.36	11.56	15.59	0.47	24.84

On an average the per capita receipts is Rs. 71.55, out of which Rs. 30.56 is received through taxes and the remaining Rs. 40.99 from all other sources. The total expenditure incurred per head is Rs. 61.82 of which Rs. 9.36 is on general administration, Rs. 11.56 on public health and conveniences, Rs. 15.59 on public works, Rs. 0.47 on public institutions and remaining Rs. 24.84 on all other aspects. Among all the towns, receipts received per head from all sources is the highest in Parbhani town and the expenditure incurred per head is the highest in Hingoli town.

Minerals

The district is covered mostly by Deccan trap. Generally material used for building construction is stones. Deposits of any kind of minerals are not reported anywhere in the district. Mining activity in the district is, therefore, restricted only to quarrying of stones.

Fisheries

Fishing activity in the district are naturally restricted to inland water only, rivers, tanks and ponds being the chief sources. There are five perennial and five seasonal tanks.

Fishing operations are seasonal and do not contain more commercial importance. The commercial important varieties of fish are found in the district are Balog, Murrel, Dokh, Kolus, Chatu, Selan, Ghegra, Tamboo, Gangaoli, Ghod Zinga, Mungarod Zinga, Matechkal Zinga. Fishermen in the district belong to the communities known as Dheemer, Bhoi, Kahar and Koli. Since industry has a limited scope. The nets are mostly made of cotton twine but in these days nylon s also being effectively used.

Industries

As per industrial policy of Government of India rapid development of small and village ndustries provide new job opportunities to the people to save the unemployment. Parbhani with a preponderance of agricultural population, is an industrially backward district. Ginning and pressing is the only important processing industry in the district. Lack of adequate power supply may have arrested the growth of industries.

Ginning and pressing factories were located at Parbhani, Hingoli and some are at Sailu, Partur, Manwath and Basmath towns. Among the organised industries, the oil industry stands next in importance to cotton ginning and pressing in Parbhani district. The first oil mill in the district was established in 1901. Oil mills are concentrated at Parbhani, Sailu, Purna, Hingoli, Manwath and Gangakhed. The oil mills are run seasonally.

The traditional crafts are conducted on household and cottage industries scale. They are mostly servicing and processing units of which wool weaving industry, leather goods, brick-making, pottery-making, quarrying, gur-making, basket-making, carpentry, oil-ghanis are important industries.

Tanning and leather working industries is next to handloom industry. Wool industry is another important industry in the district. The work of shearing, carding, spinning of wool and spinning of yarn are done by hand. Most of the industries run through the co-operative basis.

Trade and Commerce

The chief commodities of export from the district are jowar, other food-grains, cotton bales, sweet oil, chillies, bananas, gur, tobacco, udid, sugar etc. All the export produce is collected at certain important centres in the district and then distributed to nearby districts and Bombay city (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
III Basmath (M. Cl.)	.. Handloom cloth	Bananas	Raw cotton
IV Gangakhed (M. Cl.)	.. Murmura	Jowar	Cloth
III Hingoli (M. Cl.)	.. —	Cotton bales	Raw cotton
III Jintur (M. Cl.)	.. —	Raw cotton	Cloth
IV Kalamnuri (M. Cl.)	.. Shoes	—	Sweet oil
III Manwath (M. Cl.)	.. Groundnut oil	Jowar	Cloth
I Parbhani City (M. Cl.)	.. Wooden furniture	Cotton bales	Sugar
V Partur (M. Cl.)	.. Sweet oil	Sugar	Raw cotton
IV Pathri (M. Cl.)	.. Cotton bales	Jowar	Sugar
III Purna (M. Cl.)	.. Tiles	Sweet oil	Groundnut
III Sailu (M. Cl.)	.. Hosiery	Cotton bales	Raw cotton
V Sonpeth (M. Cl.)	.. Cotton bales	Cotton bales	Cotton cloth

The distribution of goods beyond the wholesale trade centres is done at market places and weekly bazars held at different places and on different days of the week. The main articles of import are raw cotton, sugar, salt, spices, copper, brass sheets, betel-nuts, stationery, cloth, sweet oil etc.

TABLE 24

Proportion of slums population in towns

Name and civic status of the town	Porcentage of the slums population to total population of the town	Density in slums (per $Km^2 \times 10-4$)
1	2	3
1 Parbhani (M. Cl.) ..	5.51	60,290
Total ..	5.51	60,290

Table 24 indicates the proportion of slum population to total population in towns and density of slum area. Proportion of the slums population to total population is 5.51 and density in slums is 60,2,90 km^2 of the town.

Places of Tourist's Importance

Parbhani is not a tourist place. There is no holiday resort or place of historical interest to attract tourists. Some important temples are in this district and some pilgrimage places are also in the district. But those places are not attractive for outsiders. Persons are attending these places for the purchase of some articles for daily use only.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown alongwith the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "un-inhabitated" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to all the above details following four appendices to Village Directory have also been included :—

Appendix (i) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (ii) Land utilisation data for census towns ;

Appendix (iii) Tahsilwise list of villages with no amenities available ; and

Appendix (iv) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (iii) and (iv), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in km.^{2}

Column 4, which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges viz., upto 5 km, 5-10 km, and 10+ km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/ centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village secondary school has middle and primary classes also the same has been counted as three schools i.e. secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities.—

Primary or Secondary School ..	P
Junior Secondary or Middle School ..	M
Matriculation or Secondary School ..	H
Higher Secondary/Intermediate/Pre-University/Junior Collage (PUC).	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C

Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5 - 10 kms and above 10 kms of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9 gives information on day or days of the market/hat in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weelky or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river canal and back-water etc.).	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information :—

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Waterway (Other than river or canal).	NW
Foot Path	FP

Column 12 gives the distance in Kilometers within brackets from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for All purpose listed above.	EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village durine, the major part of the year. This may be ricig wheat, jowar, maize, ragi etc. or a combinaton of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation—

(a) lands put to non-agricultural uses.

(b) barren and unculturable land.

(3) Other un-cultivated lands excluding fallow land.—

(a) permanent pastures and other grazing lands.

(b) lands under miscellaneous tree crops and grooves not included in the net area sown.

(c) culturable wastes.

(4) Fallow lands.—

(a) Fallow lands other than current fallows.

(b) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portions is included under the appropriate heading of cultivated or un-clutivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e. g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

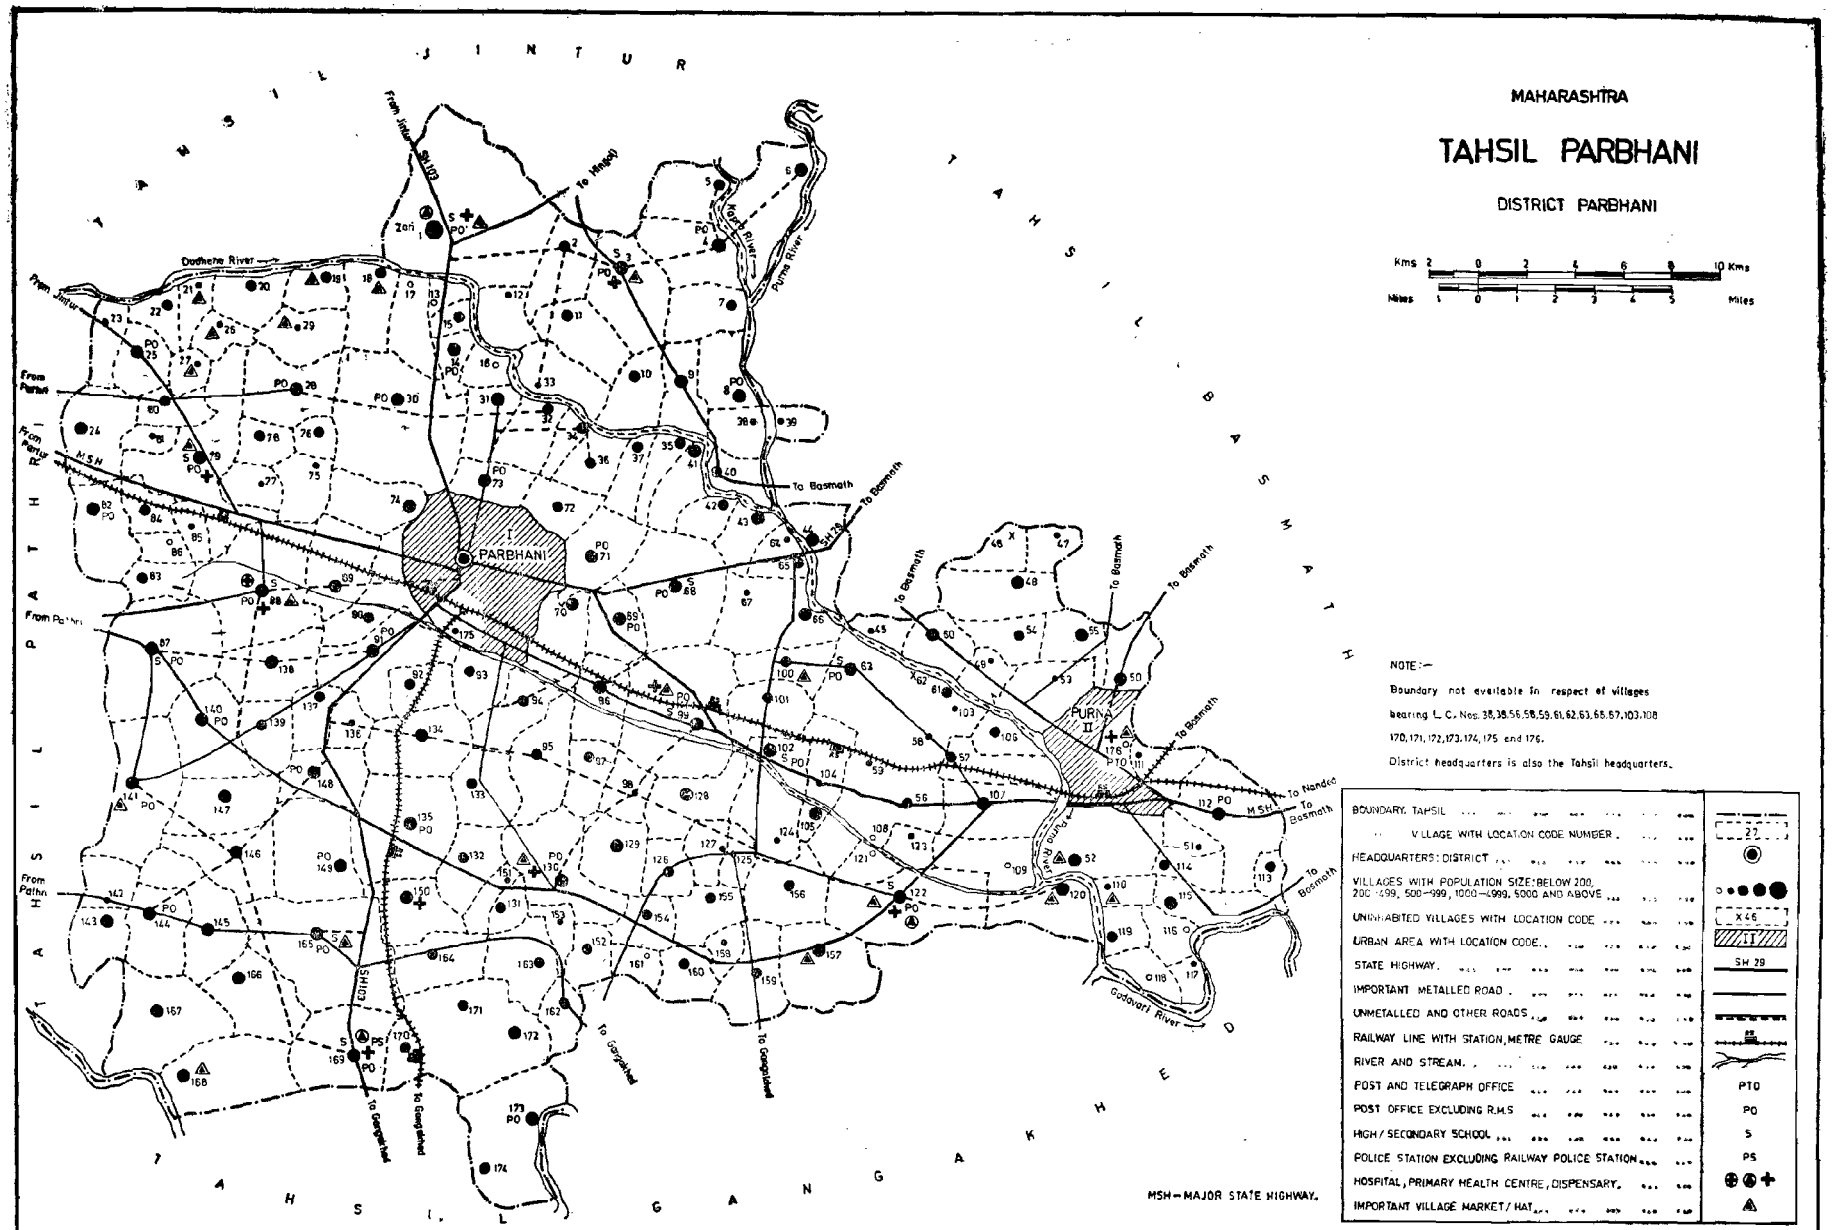

Government Canal	GC
Private Canal	PC
Well (without Electricity) ..	W
Well (with Electricity) ..	WE
Tube Well (without Electricity) ..	TW
Tube Well (with Electricity) ..	TWE
Tank	Tk
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching, grasses, bamboo, bushes and other grooves for fuels etc, which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very highcost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooters available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note explaining the Abbreviations used in Town Directory

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this Data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town :—

Municipal Corporation/Corporation ..	M. Corp.
Municipality ..	M.
Municipal Council ..	M. Cl.
Non-Municipal ..	N. M.
Cantonment Board/Cantonment ..	C. B.
Notified Area/Notified Area Committee/Notified Committee.	N. A. C.
Census Town ..	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in km^2. number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil head quarters and the nearest city (Urban area with a population of 1,00,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from minunicipality (except for the highways) Codes used are —

Pucca road ..	PR
Kuccha road ..	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night-soil,

Codes used are.—

Sewer/Sewerage ..	S
Open surface drains ..	OSD
Box surface drains ..	BSD
Sylk drains ..	SD
Cesspool method ..	CD
Pit system ..	Pt
Head Loads ..	HL
Baskets ..	B
Wheel Barrows ..	WB
Septic Tank Latrines ..	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used.—

Overhead Tank ..	OHT
Service Reservoir ..	SR
River Infilitration Gallery ..	IG
Borewell Pumping system ..	BWP
Pressure Tank ..	PT
Tubewell water/Hand Pump ..	TW
Tap water ..	T
Well water ..	W
Tank water ..	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain

to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (i. e. class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town, 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of follwoing codes.—

Hospital	..	H
Dispensary	..	D
Health Centre	..	HC
Family Planning Centre	..	FC
T. B. Clinic	..	TB
Nursing Home	..	NH
Ayurvedic	..	A
Unani	..	U
Homoeopathic	..	Hom
Others	..	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	..	A
Science only	..	S
Arts and Science only	..	AS
Commerce only	..	C
Arts and Commerce only	..	AC
Combined for all categories—Arts, Science and Commerce.		ASC
Law	..	L

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music/ dancing institute, nursing school, etc. Various codes used for indicating this data are.—

Shorthand	..	SH
Typewriting	..	Type
Shorthand and Typewriting	..	Sh. Type
Others	..	O

Keeping in view the 'Minimum Needs Programme of the Planning Commission, the information regarding adult literacy classes/centres etc., has also been collected and presented under column 15. Similarly, in veiw of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Status and Growth History

Sr. No.	Class, name and civic administration status of town	Location Code No.	Name of Tahsil	Area (in km2.)	Number of households including houseless households (in 1981 census)	Population and growth rate of the town at the censuses of									Density (1981 Census)	Sex Ratio
