## FOREWORD TO THE D.C.H. SERIES

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The District Census Handbook series was initiated during the 1951 census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part–B to village and town PCA and Part–C comprised of analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states Part–C was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land–use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the village in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of Scheduled Caste and Scheduled Tribe population to population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added inter alia with this view. A significant addition is class of town in all the six statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serve this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series, it has been so designed that Part–A of the volume contains village and town directory and Part–B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tehsil/ Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non–census data in relation to the infrastructure has been introduced to enhance its value. The district and tehsil/police station/CD block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Sri M. Vijayanunni, Director of Census Operations, Kerala on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Sri N. G. Nag, Deputy Registrar General, (Social Studies) of my officee Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Sri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

## PREFACE TO THE D.C.H. SERIES

The District Census Handbooks (DCH) constitute an important set of census publications brought out by the census organisation which are widely made use of by the State Government and its district-level and lower officials for planning, development and administration purposes as well as by a large cross-section of data users like academicians, scholars, researchers and other non-governmental agencies.

This volume presents the Village and Town Directories under Part A and the Primary Census Abstract under Part B. The Village Directory gives for each village the area, population, educational, medical, civic and other amenities and land-use. The Town Directory gives for each town the area, population characteristics, physical aspects, communications, municipal finance, educational, medical, civic and other amenities and trade, commerce, industry and banking facilities. The Primary Census Abstract presents certain other basic data like number of residential houses and households, literates, Scheduled Caste and Tribe population, workers by main categories, marginal workers and non-workers.

The data presented under Village and Town Directories were furnished by the Village Officers through the Tahsildars in respect of rural villages and by the Commissioners or Executive officers concerned in respect of urban areas respectively. The data presented under Primary Census Abstract were collected during the census operations by the census field organisation consisting of Enumerators, Supervisors, Charge Officers and District Census Officers. Thanks are due to all these field officials who have provided the basic data required for the compilation of this volume.

The preparation of the statements and tables for this volume was undertaken in the Census Directorate of Kerala, Trivandrum by M. K. Vilasini, Statistical Assistant and S. Radhamoni, M. Parvathi Ammal, E. Rahima Beevi and B. Prasannakumari, Computor. A. Sadasivan Achari, V. Thulaseedharan and Michael Gomez, Draughtsmen and S. Krishna Pillai, Artist drew the maps and art work. C. Sarojini Amma, U.D. Clerk typed the manuscript and M. P. Raghunadhan, Printing Inspector attended to the printing aspects. P. M. Rugmini Amma, Investigator wrote the preliminary draft and S. Jayashanker, Assistant Director prepared the final draft and attended to the production of the volume at all stages. I record my appreciation for the painstaking and dedicated services rendered by all my colleagues in giving shape to this volume.

While the collection and tabulation of data and the designing, compilation and production of these District Census Handbook volumes were undertaken by the census department at its own expense, in keeping with the past practice, the State Government agreed to bear the cost of printing which is only appropriate since the State Government Departments and offices are the major users of these handbooks and the bulk of the copies are made available to them free of cost. It is hoped that all data-users will find the format and contents of the 1981 DCH series convenient and useful.

Trivandrum,
July 1983.

M. VIJAYANUNNI,
*Director of Census Operations, Kerala.*

## REFERENCE DATES ADOPTED FOR THIS VOLUME

The Village Directory and Town Directory data were gathered as on 1st October 1979 and hence relate to the position as on that date. The Primary Census Abstract (PCA) data and general statistics were collected during the census operations as on 1st March 1981 which was the reference date for the 1981 census and hence this volume presents census and statistical data on the district, taluks, villages, towns, panchayats and development blocks as per their jurisdiction on 1st March 1981 without reference to the subsequent changes, if any, in the jurisdiction of these units. However, if changes in jurisdiction had occurred in the case of any unit during the period after 1st March 1981, an indication to that effect has been given, for information, against the administrative units concerned which have undergone changes.

# ANALYTICAL NOTE

## GENERAL

### Evolution and scope of the District Census Handbook

The District Census Handbook was introduced for the first time in the 1951 census. The lay-out of the volume comprised of a short account of the district and the people, important census tables, rural statistics and urban statistics separately covering details of area, houses, population, number of literates, distribution of livelihood classes, the number of institutions and general information on amenities etc. in respect of each village. The data for the area forming part of the present Kerala State were included in the District Census Handbooks of South Kanara and Malabar of Madras State and in the District Census Handbooks for the districts of Trichur, Kottayam, Quilon and Trivandrum of the erstwhile Travancore-Cochin State.

2. A detailed procedure was adopted for the preparation of the District Census Handbooks in the 1961 census. The District Census Handbook was divided into three parts viz. Part-A dealing with the general description of the district, progress made during the last decade, review of population, literacy, employment, unemployment, household economic data and gazetteer; Part-B covering census tables; and Part-C consisting of Village and Town Directory showing the amenities, Primary Census Abstract (PCA) and the number of industrial establishments according to type. At the time of the 1961 census there were 9 districts in the state viz. Cannanore, Kozhikode, Palghat, Trichur, Ernakulam, Kottayam, Alleppey, Quilon and Trivandrum and for each district a separate volume was published.

3. In the 1971 census, the content of District Census Handbook was modified. It comprised of three parts—Part-A comprising of the Town and Village Directory, Part-B Village and Town Primary Census Abstract and Part-C Census tables. Of these, Parts A and B were combined and published as one volume and Part-C as another volume. The presentation of Panchayat and Community Development Block PCA was a special feature of the DCH of 1971. There were 10 districts (Cannanore, Kozhikode, Malappuram, Palghat, Trichur, Ernakulam, Kottayam, Alleppey, Quilon and Trivandrum) at the time of the 1971 census (i.e. 1st April 1971). On 26th January 1972, a new district, Idukki, was formed carving out portions of Ernakulam and Kottayam districts. To cater the needs of the data users, a special volume on Idukki was also published subsequently.

4. In the 1981 census, the District Census Handbook for each district is brought out in one volume comprised of two parts—Part-A Village and Town Directory and Part-B Primary Census Abstract. At the outset, an analytical note is given which depicts a general background on the district and the analytical results on the statements and tables included in the volume. It is hoped to serve as a useful reference book for administrators, planners and scholars.

### Village Directory

5. The Village Directory included in this volume gives the amenities available in each village in respect of educational, medical, drinking water, markets, power supply, post and telegraph, communications, approach to villages, places of archaeological and religious interest and distribution of land use area. A consolidated abstract of all these amenities for each taluk is presented as an Appendix in Section I. Land utilisation data in respect of census towns (villages), list of villages where no amenities are available and taluk-wise list of villages according to the proportion of SC/ST population by ranges are the other appendices included in Section I.

6. The amenities available in the rural areas of the district are presented in the Village Directory. If an amenity is not available in the referent village, the distance, in broad ranges, from the nearest place where the amenity is available is given. The restructuring of the formats for the 1981 District Census Handbook is intended to incorporate more data on infrastructural aspects in relation to amenities useful for rural planning. Some new items of information such as adult literacy centres, primary health subcentres etc. have been added in the present volume as compared to 1971.

### Town Directory

7. The Town Directory data are presented in six statements in which the towns are arranged in alphabetical order within the district. These statements include status of towns (i.e. corporation, municipal, cantonment, township, non-municipal), population

for the period 1901 to 1981, physical aspects, location, municipal finance, civic and other amenities, educational, medical, recreational and cultural facilities and trade, commerce, industry and banking etc.

8. Part-B consists of the Primary Census Abstract (PCA). PCA comprises of basic population data (i.e. population, number of SC and ST, literates, workers and their categories and non-workers) up to the level of desom for rural areas and wards for census towns. Another salient feature of the 1981 census is the introduction of an additional PCA on Scheduled Castes and Scheduled Tribes. In addittion, the Community Development Block and Panchayat PCA are also presented in the DCH volumes of Kerala.

**Census Concepts**

RURAL URBAN AREAS

9. The classification of rural and urban areas adopted in census is as follows. Urban areas comprise of statutory towns and non-municipal towns (census towns). It may, however, be noted that panchayats include non-municipal towns also. The concepts of urban and rural adopted in the 1981 census are given below :

URBAN

(*i*) *Statutory towns*—all places with local authority like corporations, municipalities, cantonments, notified town areas etc, irrespective of whether they satisfy the criterion laid down under item (ii) below :

(*ii*) *Census towns*—all other places which satisfy the following criteria :

(*a*) A minimum population of 5,000;

(*b*) A density of population of at least 400 per sq. km. (1000 per sq. mile) and

(*c*) At least 75 per cent of the male working population engaged in non-agricultural pursuits.

10. Accordingly, in the 1981 census in Kerala, all statutory towns were treated as towns irrespective of whether they satisfied the three-fold criteria or not. The criteria were then strictly applied to all revenue villages based on the 1971 census data and all villages which satisfied the criteria were treated as Census Towns. Census Towns (Non-Municipal Towns) are places treated as towns only for the purpose of Census. In the present census, industrial category III comprising of activities like fishing, livestock, hunting, plantations and orchards etc. was treated as allied agricultural activity and was not treated as a non-agricultural occupation for the purpose of the third criterion mentioned above. Thus, the third criterion was calculated with reference to the figures for working categories IV to IX given in the Primary Census Abstract of the 1971 census.

RURAL

11. It is rather difficult to give a precise definition for rural area. The urban areas were defined in each census and all the residuary portion is treated as rural. Since varying definitions were followed for urban areas in each census, the composition of rural areas also varied from census to census.

URBAN AGGLOMERATION

12. The concept of urban agglomerations adopted for the first time in the 1971 census was an improvement of the concept of *town group* adopted in the 1961 census. The same urban agglomeration concept has been continued in the 1981 census. An Urban Agglomeration is a continuous urban spread consisting of a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognized urban outgrowths, if any, of such towns. For example, around acore city or statutory town there might have come up sizable and well-established urban appendages like railway colonies, university campuses, ports, military camps etc. which are part of a continuous urban spread though outside the statutory limits of the core city or town. While such outgrowths will fall in the adjoining revenue village, it will not be realistic to treat such urban outgrowths as rural units. At the same time, each such individual area by itself may not satisfy the minimum population limit to qualify to be treated as an independent urban unit. Such areas deserve to be reckoned along with the core town and the continuous urban spread including the core town and such urban outgrowths are treated as an urban agglomeration. The constituents of an urban agglomeration should satisfy the conditions of urbanisation, contiguity and viability. These are the general principles based on which urban agglomerations are formed.

13. The following are the possible different situations in which urban agglomerations would be constituted :

(*i*) A city or town with a continuous growth which is outside the statutory town limits but coming within the boundaries of the adjoining village or villages-

(*ii*) Two or more adjoining towns with their outgrowths

(*iii*) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread

14. The area constituting an urban agglomeration may keep on changing from census to census depending upon the changing boundaries of the statutorily notified main urban unit as well as the extent of other

urban outgrowths. However, only those which are actually contiguous are treated as part of an agglomeration and not areas which are not contiguous now but which are expected to form a continuous urban spread some time in the future. The intention in delineating the urban agglomeration is to take into account the present urban spread only (The potentiality of development of urban growth in the next decade or two is covered separately under the concept of *Standard Urban Area*).

15. Urban Agglomerations were formed for the first time in Kerala in the 1981 census. Palghat urban agglomeration is the only agglomeration in this district. The Constituent units are given below :—

| *Urban agglomeration* | *Constituent units* |
|---|---|
| Palghat urban agglomeration | (*i*) Palghat (M) |
| | (*ii*) Palghat Railway Colony (OG) |

STANDARD URBAN AREA

16. Another concept developed in the 1971 census for tabulation of census data was that of the standard urban area. The essential requirements of a standard Urban Area are:

(*i*) it should have a core town of a minimum population size of 50,000;

(*ii*) the contiguous areas made up of other urban as well as rural administrative units should have close mutual socio-economic links with the core town, and

(*iii*) the probabilities are that this entire area will get fully urbanized in a period of two to three decades

The intention was if data for the standard urban area were to be made available upto 1991, it is likely to yield much more reliable and meaningful picture to study urbanization around large urban nuclei. In the 1971 census, 13 standard urban areas were formed in the state. All these SUAs continued in the 1981 census. Details of SUA are available in Part II-A-General Population Tables.

CENSUS HOUSE

17. A census house is a building or part of a building having a separate main entrance from the road or common court yard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

HOUSEHOLD

18. A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called 'Institutional house, holds'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'.

SCHEDULED CASTES AND SCHEDULED TRIBES

19. The 1956 order was amended by the Scheduled Castes and Scheduled Tribes orders (Amendment) Act, 1976 (No. 108 of 1976) and it was this revised list which was adopted in the 1981 census. The revised list is given below:

30. Palleyan (പളൈയൻ)
31. Palliyan (പള്ളിയൻ)
32. Palliyar (പള്ളിയർ)
33. Paniyan (പണിയൻ)
34. Ulladan (ഉള്ളാടൻ)
35. Uraly (ഊരാളി)

20. Substantial changes have occurred in the 1981 list as compared to the 1971 list by way of addition of new castes/tribes which satisfy the prescribed criteria, deletion of certain castes/tribes which do not satisfy the criteria, transfer from the caste list to the tribe list and *vice versa*, removal of area restrictions etc. The following are the changes between the lists adopted in the 1971 census and 1981 census.

(*i*) 7 Scheduled Castes (Boyan, Chakkiliyan, Kuravan or Sidhanar, Nayadi, Pallan, Pararіyan or Parayan or Sambavar and Valluvan) and 6 Scheduled Tribes (Irular or Irulan, Kadar, Kammara, Malayan, Marati and Muthuvan or Mudugar or Muduvan) have no change in the areal restrictions from 1971 to 1981 while the remaining 61 Scheduled Castes and 29 Scheduled Tribes have undergone changes in areal jurisdiction as per the revised list.

(*ii*) In the lists of S.C. and S.T. adopted in the 1971 census, 'Ulladan' was a Scheduled Caste and 'Ulladan (Hill dwellers)' was a Scheduled Tribe. As per the revised list, Ulladan has been deleted from the S.C. list and the name of the tribe 'Ulladan (Hill dwellers)' has been changed as 'Ulladan'.

(*iii*) Uraly was a Scheduled Caste as well as a Scheduled Tribe in 1971. But Uraly has now been deleted from the list of S.C. and retained only under S.T.

(*iv*) 2 Scheduled Tribes viz. Malayekandi and Vishavan which had no population in 1971 have now been deleted from the list of S.T.

(*v*) While 'Pulayans' came under both S.C. and S.T. in 1971, they no longer come under S.T. as per the 1976 revised list and are only S.C.

21. On a comparison of the figures of S.C. and S.T. for 1971 with those of 1981, it can be seen that the deletion of Pulayan from the list of Scheduled Tribes and the removal of the area restriction for Pulayan under S.C. have resulted in a substantial fall in the S.T. population and increase in the S.C. population in the state, especially in the erstwhile Malabar region.

### Literacy

22. A person who can both read and write with understanding in any language was taken as a literate. A person could merely read but could not write was not a literate. It was also not necessary that a person

who was a literate should have received any formal education or should have passed any minimum educational standard. All children below the age of 4 years or less were treated as illiterates, even if they are school-going children and might have picked up reading and writing a few odd words.

ECONOMIC QUESTIONS IN THE 1981 CENSUS

*(a) Questions in the Individual Slip (Universal)*

23. Following are the economic questions in the Individual Slip (Universal) which were canvassed in all areas and filled up for all individuals at the time of the 1981 census.

Q. 14A. Worked any time at all last year?

Yes

No (H/ST/R/D/B/I/O)

Q. 14B. If yes in 14A, did you work for major part of last year? Yes (1)/No (2)

Q. 15A. Main activity last year?

Yes in 14B (C/AL/HHI/OW)

No in 14B (H/ST/D/R/B/I/O)

If HHI/OW in 15A

(*i*) Name of establishment
(*ii*) Description of work
(*iii*) Nature of industry, trade or service
(*iv*) Class of worker

Q. 15B. 14B Yes—Any other work any time last year?

Yes (C/AL/HHI/OW)/No

14B No—Work done any time last year? (C/AL/HHI/OW)

If HHI/OW in 15B

(*i*) Name of establishment
(*ii*) Description of work
(*iii*) Nature of industry, trade or service
(*iv*) Class of worker

Q. 16. If No in 14A or 14B, seeking/available for work?

Yes (1)/No (2)

*(b) Questions and their implications*

24. The first question 14A in 1981 is intended to divide the population into two basic streams based on a liberal definition of work. Work was defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involved not only actual work but also effective supervision of work. The reference period was the preceding one year. Question 14A was intended to find out whether a person had done any work at all during the last year or whether he did not work at all and if it was the latter, how the person spent his time as a non-worker. The question was expected to net all workers irrespective of the quantum of their contribution to economic activity. In other words, full-time workers, part-time workers and marginal workers were netted by this question. This question also gave the number of persons who belong to the non-worker category of H (Household duties), ST (Students), D (Dependents) R (Retired or rentier persons,) B (Beggars, vagrants etc.), I (Inmates of institutions) and O (Other non-workers) recorded in Question 14A, to ascertain whether the person had worked for the major part of the year. All persons who had worked for 183 days or six months or more were treated as having worked for the major part of the year. Question 15A was intended to elicit information on the details of the main activity (working or non-working) in which he was engaged during the major part of the year. In Q. 15B, details of secondary work, if any, for workers (Yes in 14B) and marginal work for all persons did not work for the major part (No in 14B) were collected. Q. 16 i.e. 'seeking work or available for work' was asked of all persons who had no work at all for the entire year (No in Q. 14A) and no work during major part of the year (No in 14B). In order of the questions was designed after a pilot study (in 1978) and two pretests (in 1978 and 1979), the intention being to net all full-time workers, marginal workers, persons having secondary work and persons seeking or available for work.

25. The concepts of main workers, marginal workers and non-workers are briefly indicated below.

(*i*) *Main Workers.*—The main workers are those who have worked for major part of the year preceding the enumeration. In other words, those for whom the answer would have been 'yes' in Q. 14A and 'yes (1)' in Q. 14B of the Individual Slip (Universal) are categorised as main workers. Workers are further divided into cultivators, agricultural, labourers, those engaged in household industry and other workers based on the information available in Q. 15A.

(*ii*) *Marginal Workers*: Marginal workers are those who have worked any time at all in the year preceding the enumeration but have not worked for the major part of the year. In other words marginal workers would be those for whom the entry in Q. 14A of the Individual Slip (Universal) is 'yes' and the entry in Q. 14B of the slip is 'No(2)'. The type of the work in which the marginal workers were engaged is collected through Q. 15B of the Individual Slip (Universal) but at this stage data on such marginal workers have not been generated.

(*iii*) *Non-Workers.*—Non-workers are those for whom the answer is 'No' in Q. 14A of the Individual Slip (Universal). They are persons who have not worked any time at all in the year preceding the enumeration period.

(*iv*) *Work-Participation Rate.*—The term 'work participation rate' used in this census refers to the proportion of workers to total population and *not* the proportion of the labour force to total population, though the latter is often the conventional usage. This distinction has to be noted while referring to the figures given in this volume. Again, as per the definitions of main workers, marginal workers and non-workers, these are exclusive categories and hence if the number under the 3 categories are added together one will arrive at the total population itself.

(*c*) *Relationship with the Industrial Categories adopted in the 1981 and 1971 Censuses*

26. The correspondence of the respective categories of workers in the 1981 and 1971 Censuses for the presentation of PCA in the 1971 Census are given below:

| *1981 Census* | *Related Industrial Category adopted in the 1971 Census* | |
|---|---|---|
| Cultivator (C) | Category | I |
| Agricultural Labourer (AL) | ,, | II |
| Household Industry (HHI) | ,, | V(a) |
| Other workers (OW) | ,, | III, IV, V (b) and VI to IX |

## INTRODUCTION TO THE DISTRICT

27. Lying between north latitude 10° 20′ and 11°14 and east congitudes 76°20′ 'and 76° 54′, Palghat district is bounded on the north by Ootacamund taluk of Nilgiri district and on the east by Mettupalayam, Coimbatore and Pollachi taluks of Coimbatore district of Tamil Nadu, on the south by Mukundapuram taluk of Trichur district and on the west by Trichur and Talappilly taluks of Trichur district and Ponnani, Perintalmanna and Ernad taluks of Malappuram district.

**Brief history of the district**

28. The history of the district is obscure. The materials for giving a chronological and narrative Political history of the district are scanty. However, in the succeeding paragraphs, a brief outline of the important political events that shaped the destiny of the district is given from the available sources.

29. The history of the district is closely associated with the mythical hero Lord Parasurama who created Kerala and divided into 64 gramams. Then came the reign of Perumals, who ruled the country for quite a long period, the last being Cheraman Perumal. The emergence of royal dynastics and Principalities in this tract came only after the break-up of the Perumal's empire. Of these Nedumpurayur Swaroopam and Tanur Swaroopam, Kollengode kingdom, Valluvanad and Kavalappara are important. A brief outline of these Principalities are given in the following paragraphs.

30. The earliest dynasty which is believed to have ruled the area falling in this district was the Nedumpurayur Swaroopam. The Palghat Rajas who were supposed to be the descendents of this Swaroopam had their orginal seat in Athavanad amsom (Ponnani taluk) but later they exchanged their lands with Azhuvancheri Thamprakkal and established their headquarters in Akathethara Village of Palghat taluk. Palghat Rajas, who are considered as offsprings of Namboothiri Brahmins and Kshatriya women, also owned the titles 'Vadakke Naikkans' and 'Thekke Naikkans.' However, very little is known about the activities of these Rajas. An earliest account available is the encounter of the forces of Palghat Rajas, with the help of Ernad, Valluvanad and Perumpadappu forces, with the forces of Kongu rulers who were instigated by the Rashtrakutas. However, the army of Nedumpurayur won the onslaught of the Konguppada. To commemorate this victory, a unique festival, known as Konganpada, is conducted every year in the month of Kumbham in the Bhagavathi Temple of Chittur. Consequent on the dissolution of Chera empire, small principalities were emerged in the political scene of Kerala and Udayavars or Naduvazhis became independent rulers. Nedumpurayurnad later became Tharavur or Tarur Swaroopam, which had its seat at Tarur village of Alathur taluk, about 40 km. south-west of Palghat. The Palace is known as *Edam* and members of the royal house called as *Achans.* During the thirteenth century, the Tarur Swaroopam had no male members and the princesses had to take their partners from the Perumpadappu Swaroopam (Cochin Royal house). This matrimonial relationship necessitated the Tarur Swaroopam to support Perumpadappu in their fight against Zamorins of Calicut. The Palghat Rajas were always subjected to military and political pressures from the Zamorin and it was on their request Haider Ali invaded south Malabar in 1756. When the British supremacy was established, Palghat Raja was pensioned off by the East India Company.

31. Another small kingdom which existed in this tract was the Kollengode kingdom extending over eight villages in and around Kollengode which was later absorbed by the Zamorin. The Raja of Kollengode was also became a pensioner of the English East India Company.

32. The Valluvanad (known as Vattabhakshoni in Sanskrit and also as Arangottur Swaroopam) kingdom was founded by one Rajasekhara who lived in the 10th century A.D. with its capital at Valluvanagaram i.e., Angadipuram (in Perintalmanna taluk of Malappuram district). The kingdom extended over to Perintalmanna, Mannarghat and Ottappalam taluks and parts of Ponnani, Tirur and Ernad taluks. According to earlier tradition, Chera emperors presided over the Mamankam festival which was held once in 12 years i.e., a *Vyazhavattam*. The Presidency of Valluvakonatiri in Mamankam festival caused envy in other rulers of Kerala Particularly the Zamorin. This resulted in constant conflicts between the two and ultimately Zamorin succeeded in evacuating Valluvakonatiri from Triunavaya and declared himself as the Rakshapurusha or Protector of Mamankam. During the time of Mysore invasion, the territory of Valluvanad Raja was confined to Attappadi valley and Portion of Ottapalam taluk. At the time of Tipu's invasion, he sought asylum in Travancore and later when Malabar was ceded by the British, he entered into an agreement with the East India Company and became a Pensioner.

33. Kavalappara was a small territory owned by a Nair chief, known as Kavalappara Muppil Nair who owned a sort of allegiance both to Cochin Raja and Zamorin. The East India Company eventually settled the claims of Kavalappara chief by paying him Malikhana in return for his allegiance to the company.

34. Palghat, being an upcountry, had little contacts with the western countries. The major intervention in the affairs of Palghat Raja was from the Zamorins of Calicut. His expansionist policies resulted in series of conflicts. The annexation of Naduvattom (which formed part of the territory of Palghat Raja) in 1756–57 compelled Komu Achan, the Raja of Palghat, to seek the help of the king of Mysore. The Mysorean ruler deputed Haider Ali who was the Faujdar of Dindigul, to help the Palghat Raja but he had to leave for Seringapatam. In his place his brother-in-law Mukudam Ali led the forces and the combined army put the Calicut forces to flight. The Zamorin had to give Rs. 12 lakhs as war indemnity. Haider ascended the throne of Mysore in 1761 but his conquests were confined to Central Malabar region. After Haider's death, Tippu occupied his father's throne. In November 1783 the English army under Col. Fullerton captured the Palghat fort and Zamorin was entrusted with the administrative control over the region. But Tippu's forces soon reoccupied the fort and extended his territory to almost all the South of Malabar. In November 1789, Tippu decided to invode Travancore and moved his forces via Palghat, his southern headquarters. But the conquest had to be suspended due to onslaught of Monsoon. Hearing the marching of British forces to Seringapatam, Tippu decided to withdraw his forces from Kerala and left via Coimbatore in May 1790. Soon Cochin declared their allegiance to the British. The British forces under Col. Stuart besieged the Palghat fort on 22nd September 1790. By Seringapatam treaties signed on 22nd February and 1st March 1792, Tippu formally ceded Malabar to the British.

35. The British Government decided to revamp the administration of the newly ceded areas and for this purpose a commission known as "Joint Commissioners appointed to inspect into the state and condition of the province of Malabar". They submitted their report on 14th October 1793. The primary task of the commission was to settle the claims of the local Rajas and chieftains. They included Rajas of Palghat, Vellattiri and Kavalappara Nair. On 21st May 1800 Malabar became part of the Madras Presidency and administered by a Principal Collector, stationed at Calicut.

36. Under British administration, the district achieved significant progress in various spheres. However, the period also witnessed some of the violent disturbances, known as 'Mappila riots'. These outbreaks also took place in various parts of the then Valluvanad, Palghat and Ponnani taluks, major portions of which now forms the Palghat district. According to Malabar District Gazetteer, the Mappila outbreaks may be attributed to three main causes 'poverty, agrarian discontent and fanaticism'.

37. The formation of congress organization in 1910 in Malabar paved the way for the national movement in the district. The first National Conference in the State was held at Palghat on 4th and 5th May 1916 under the presidentship of Annie Besant. The Malabar District Conference held at Ottappalam on 23rd April 1921 was an important turning point in the political movement of the country. The police excesses could not suppress the national awakening of the freedom loving people. Two publications, Mathrubhumi (started by K. P. Kesava Menon and other congressmen) and Al-Amin (under the editorship of Mohammed Abdur Rahiman) which were brought out in 1923 and 1924 respectively, fostered spirit of nationalism. Their impact on the masses deserve special mention. During the same period a movement for tenancy reform was started in Malabar under the leadership of Mannath Krishnan Nair, K. P. Raman Menon, G. Sankaran Nair and others

and eventually it led to the passing of the Malabar Tenancy Act of 1930. Many freedom fighters boycotted the Simon Commission (1928) and participated in the Salt Satyagraha (1930) and Civil Disobedience Movement. The emergence of Communist Party in 1939 had its effect and influence among the working classes. The active participation of the people in the freedom struggle continued till the achievement of Indian Independence on 15th August 1947.

**Jurisdictional changes since 1956**

38. As per the State Reorganization Act on 1st November 1956, Kerala State was formed comprising Malabar District (excluding Laccadive and Minicoy islands) and Kasaragod taluk of South Kanara District of Madras State and Travancore-Cochin State (excluding Thovala, Agastheeswaram, Kalkulam, Vilavancode and Shenkottah taluks). With this enactment, Kasaragod taluk of South Kanara District was formed part of the new Malabar District. On 1st January 1957, Malabar District was trifurcated into three districts viz. Cannanore, Kozhikode and Palghat. The Palghat District thus formed consisted of old Valluvanad taluk, Palghat taluk and portion of Ponnani taluk of Malabar District and Chittur taluk of the erstwhile Travancore-Cochin State. On the same date, the Valluvanad taluk was bifurcated into Perintalmanna and Ottappalam taluks. The old Palghat taluk was trifurcated into Palghat, Alathur and portion of Chittur taluk. The present Chittur taluk thus covers the Chittur taluk of erstwhile Travancore-Cochin state and 14 villages of old Palghat taluk of the erstwhile Malabar district. The old Ponnani taluk of Malabar district was also trifurcated to form Ponnani, Chavakkad and portion of Tirur taluk. Of these, Palghat district was formed comprising of 6 taluks viz. Perintalmanna, Ponnani, Ottappalam, Palghat, Alathur and Chittur. Consequent on the formation of Malappuram district on 6th June 1969, the boundaries of Palghat district underwent some further changes. Mannarghat taluk was newly formed comprising of 19 reorganised villages (viz. Alanellur I, Alanellur II, Alanellur III, Thachanattukara I, Thachanattukara II, Kottopadam I, Kottopadam II, Kottopadam III, Kumaramputhur, Mannarghat I, Mannarghat II, Pottasseri I, Pottasseri II, Karakuriss, Karimba I, Karimba II, Attappadi I, Attappadi II and Attappadi III) of the erstwhile Perintalmanna taluk. Paradur village of Tirur taluk was transferred to the Ottappalam taluk, Ponnani taluk which was hitherto formed part of Palghat district was transferred to the Malappuram district. Palghat district thus left with 5 taluks viz. Ottappalam, Mannarghat, Palghat, Alathur and Chittur. After the 1971 census, there were no major changes in this district. The changes were confined to the renaming of 3 villages (viz. Attappadi I, Attappadi II and Attappadi III of Mannarghat taluk as Agali, Pudur and Sholayar respectively) as per G.O. 28442/C2/72RDI dated 9th May 1972 and addition of Silent Valley Reserve forest of Karuvarakundu village of Ernad taluk to the newly renamed Pudur village of Mannarghat taluk [G.O. (Ms.) 1122/76RD dated 17th August 1976].

**Administrative units**

39. The revenue and the local self Government are the two administrative systems followed in this district. Of the two revenue sub-divisions in this district, Palghat division has three taluks (Palghat, Alathur and Chittur) and Ottappalam revenue division 2 taluks (Mannarghat and Ottappalam). There are 146 villages in the district sub-divided into 447 desoms. Under the local self Government system, the district has 12 Development blocks and 3 municipal towns. These 12 development blocks have 91 Panchayats.

**Topography**

40. Palghat, one of the interior district of the state, is unique in many respects. The continuity of majestic western ghats, which stretches over 1,000 km. is broken at Palghat, known as Palghat Gap with a width of 32 km. On either side of the Gap are the giant Nilgiris and Anamalais. The climates of the district is greatly influenced by this Gap as it enables

the north-east winds to blow spreading its wings right upto the cost throughout the breadth of the gap. Since the district gets the benefit of south-west and north-east winds, rainfall is heavy in both the seasons and consequently Palghat district has extensive paddy fields and aptly known as the granery of Kerala. The eastern region of the district has high mountains, extensive ravines and dense forests. In the southern part, there are number of orange estates. To the west of this region, is the plains broken here and there by some isolated hills and drained mainly by Bharathapuzha and its tributaries. There are extensive paddy fields in this tract. There is no lowland region in this district.

MOUNTAIN

41. The mountains of all the taluks in this district ranging from 914 to 2132·7 metres forming the western ghat. It forms a formidable fortress on the eastern side of the district. Anginda is the highest peak (2,383 metres) followed by Karimala (1,998), Nellikotta or Padagiri (1,585) and Karimala gopuram (1,440). Other important peaks with an average height of 1,220 metres are Kalladikode, Vellachimudi, Valiyavana ridge, Myanmudi, Valvachan, Mulankunnu, Kavayali, Vembalakavala and Pannimudi while those with an average height of 940 metres are Sheruneli, Valiyalavara and Thothivara. Besides all these mountains, there are several hills scattered here and there in the plains also.

RIVER SYSTEM

*(a) Bharathapuzha or Ponnani river*

42. Originating from Anamalai hills at about 610 metres above the mean sea level, Bharathapuzha (also known as Ponnani river or Neelanadi), the longest river in the state, traverses through the Pollachi taluk of Coimbatore district of Tamil Nadu, before entering in Palghat district. The main river passes through Palghat and Ottappalam taluks and finally it empties into the sea at Ponnani in Malappuram district. Its main tributaries are Kalpathi (or Korayar), Kannadi (Chitturpuzha or Amaravathi), Gayathri (Kollengode or Cheerakuzhi) and Thuthapuzha (Pilanthol river. All these rivers are formed by number of streams. Kalpathi originates from Chenthamarakulam, in the hills of north of Walayar. It is formed by four streams viz. Karai river, Varattar, Walayar and Malampuzha. Karai river and Varattar (both take their source in Anamalai hills) flow westwards before it is joined by Walayar near Thampalam. This combined river is known as Korayar flows again in the same direction till it is joined by Malampuzha at about 5 km. down stream of Malampuzha dam. Kannadi river, another main tributary of Bharathapuzha, also orginates from Anamalai hills is formed by three streams known as Palai, Alyar and Uppar. Kalpathi and Kannadi rivers join at Parli and the combined river flows westward. Gayathri river, another tributary formed by five streams of Mangalampuzha, Aylurpuzha, Cherukunnapuzha, Vandazhipuzha and Meenkara river, joins the main river at Kuthiampalli, near Thiruvilwamala. Thuthapuzha (formed out of the waters of Kunthipuzha, Kanhirappuzha, Ambankadavu thodu and Thuppanadpuzha joins the Bharathapuzha about 1 km. west of Pallippuram railway station. Bharathapuzha empties itself at Ponnani after traversing a distance of about 250 km. of which 40 km. is navigable.

*(b) Bhavani river*

43. Bhavani river rises from the Kunda mountains near Bhawaniar Betta in Nilgiris. After flowing circuitiously for about 18 km. through the Attapady valley, it takes a north-eastern direction and enters into Tamil Nadu. Before entering into Kerala, two streamlits join the main stream. Few more streams originating in Kerala also joins the river. Siruvani, an important tributary of Bhavani, originates from the hills on the northern edge of the Palghat Gap and flows through Agali and Sholayur villages and finally joins the main river at Koottampally near the bountary of Coimbatore district. The catchment area of the river in Kerala comes to 569·8 sq. km. yielding an annual run off of 764,640,000 cubic metres.

*(c) Siruvani river*

44. Just after its origin, Siruvani river flows into a deep and legendary lake called Muthukulam at an elevation of about 1,219 metres above the mean sea level. A diversion canal constructed here takes water for drinking purposes to the people of the Coimbatore district. A project financed by the Government of Tamil Nadu has been implemented here by the Government of Kerala for providing drinking water to Coimbatore.

*(d) Backwaters canals and springs*

45. There is no backwaters or lakes or navigable canal system in this district. However, there are few spirings of mythological origin. They include Thenari Thirtham (formerly known as Rameswaram Thirtham) located in Thenari desom of Elappally II village of Palghat taluk which is believed to have been created by lord Sree Rama by an arrow shot into the ground for obtaining Ganga water to expiate the sin committed by Lekshmana. It is said that the water level of this spring remains almost at uniform level in all seasons. There is a small tank known as Brahmakundam in the tail end of this spring which is believed to

have been created by Brahma to offer sacrifices. Besides there are two small springs called Govinda Thirtham and Sitakundu in Tenmala hills of Chittur taluk and a natural perennial spring in a large cave in Alathur hills.

**Climate**

46. The climate of this district is slightly different from the rest of the state, as it is influenced by the presence of Palghat Gap. The district has a tropical climate with an oppressive hot season and plentiful seasonal rainfall. Summer starts from February onwards and temperature rises steadily till the end of May. It is followed by the south-west monsoon which lasts till September. During this season, there is abundant rainfall. The north-east or retreating monsoon winds blow during October and November. Because of the Palghat Gap, the district experience heavy rainfall and winds during the north-east monsoon season. The period from December to February is generally dry in this district. The mateorological observatory at Palghat records that March and April are the hottest months, the highest maximum temperature during 1979 being 39·4° C. The peculiar feature in this district, particularly the region facing the Palghat Gap, is the hot wind which rushes from the burning plains of the neighbouring Coimbatore district of Tamil Nadu. It dries up every greenery of the region. Alathur, Palghat, Parali, Ottappalam, Cherpulassery, Mannarghat, Chittur and Pattambi are the rain-gauge stations. There is irregularity and fluctuation in the precipitation of rainfall over the years. However, the annual average rainfall in the district is 2,398 mm. Normal rainfall varies from centre to centre and it is the highest in Mannarghat with 2,890 mm. The average number of rainy days is also highest in Mannarghat with 121.8 and lowest in Chittur with 92.5. Generally in all centres rainfall is highest in the months of June and July.

**Forests**

47. The forests of this district can be classified as temperate forests, tropical wet evergreen (shola) forests, tropical moist deciduous forests and tropical dry deciduous forests. Of these temperate forests are found at an elevation of 1,500 metres in the silent valley and some blocks of Attappadi reserves. The shola forests, characterised by the great luxuriance of vegetation having lofty trees (about 46 metres) often with plank buttresses at the base and evergreen shrubby undergrowth, are found in higher ups of Attappady valley. The tropical moist deciduous forests occur in the plains upto 500 metres on westerly or southerly slopes of Chenat Nair Reserve, Puliampulli reserve and the Kumrid slopes in Attappadi block I and II. The main species found in these forests are teak, rose wood, venteak, poomarudu, karumarudu or matti. The tropical dry deciduous forests can be seen in the Walayar reserve. This supports a good type of mixed deciduous species with a good proportion of teak, poomarudu, vengai, etc.

**Soils**

48. The soils of this district is divided into three classes such as laterite soil, forest soil, and black soil. The soil conditions varies from place to place. Laterite soil which is formed by weathering mainly acidic rocks under alternate wet and dry tropical conditions occurs in the major portions of Mannarghat, Ottappalam, Palghat, Alathur and Chittur taluks. The typical laterite soil is characterised by a vesicular structure and accumulation of hydrated oxides of iron and aluminium. Most of the bases has been removed by drastic leaching. The soil is soft near water table and this material is used for making bricks for building purposes. This soil is porus and has poor retentive capacity and fertility. The principal crops are rubber, cocoanut, pepper etc. Forest soil occurs on the portion of Mannarghat taluk, the eastern region of Ottappalam taluk and a narrow strip of land along the western boundaries of Palghat and Alathur taluks and along the southern boundary of Chittur taluk. This soil is composed of organic matter derived from forest growth. It is rich in nitrogen but extremely poor in base due to leaching. When the forests are cleared this soil undergoes laterization. The black soil is found in the eastern sector of Chittur taluk and a small region of Palghat taluk. This soil is deficient in organic matter. The principal crops of this area are rice, sugarcane cotton, groundnut and millets.

**Geology and Economic minerals**

49. The district is divided into (*i*) undulating region (western part of the plateau), (*ii*) gorge region (central part of the plateau) and (*iii*) plain at the foot of the ghats. The high mountainous belt made up of Archaean rocks consists of gneiss, charnockites and dykes. The major type within Archaean group is the biolite granite gneiss consists of quartz and felspar with variable amount of biolite (black mica). Hornblende-biolite gneiss are found near Thathamangalam (Chittur taluk) and near Walayar railway station (Palghat taluk) while Grey granite gneiss (with biolite) occur in the Mangalam damsite area and in the Sholayar valley. Grey porphyritic gneiss is met within Meenakshipuram (Chittur taluk) and Calc-granulite pockets in the upper Sholayar area. Charnockites, characterised by the presence of hypersthene, bluish grey quartz and felspar, are seen

in Palghat taluk, Mangalam damsite area, Walayar, Oorukumbankutty and Athikad. The dolerite dykes which ophitic texture, containing basic or intermediate felspars together with orthopyroxenes as essential minerals is seen in Mangalam damsite area. A dyke composed of felspar, hornblende and abundant magnetite is seen just south of Pandalar hills as far as Ottappalam in the southern slope of the ridge running eastward from Pursumala peak north of Mannarghat. Pegmatites occurs mostly in Chittur taluk. Laterite is found in the plains at the foot of the ghats.

50. The important mineral found in this district is the Kankar limestone in Valiavallampathy, Ozhalappathy, Eruthempathy, along the Varattar river near Attappady. Limestone deposits are also found at Pandarethu in Walayar reserve forests. A large area of lime for the entire district is supplied from Vannamadai area. Muscovite mica is reported to occur in Sholar Magnetite quartzite bands are seen in Perumbaderi, Vendakurissi, Valluvanpara, and Tachambara near Mannarghat. Crystalline rocks are used for building purposes and as road metal. Laterite is also used as building material in this district. Low quantity of monozite, ilmenite, epidote and a few grains of tungsten ore are seen in the samples of heavy minerals from Siruvani river and its tributaries in Attappady valley.

**Agriculture and land use**

51. Palghat district is said to be the granary of Kerala State. Though rainfall is comparatively less, the district has a good number of water resources and has the highest percentage of irrigated lands. Paddy is the principal crop. It is cultivated in three seasons viz. Autumn (Kanni or Viruppu), Winter (Kumbham or Mundakam) and Summer (Punja). The summer crop is confined to certain localities. Sugarcane, another important crop, is cultivated in a large scale in Chittur taluk. Mangoes, banana and plantains are the important fresh fruits cultivated in this district. A notable cash crop cultivated in this district is groundnut. It is largely grown in Chittur, Palghat and parts of Mannarghat taluks. Arecanut and sesamon are the other cash crops of this district. Cashewnut is mostly cultivated in Ottappalam and Mannarghat taluks. Cotton is largely grown in Chittur taluk and it occupies an important place in the economy of the district. Coffee is grown in the Nelliampathy hills of Chittur taluk and parts of Alathur taluk. Tea plantations are located in Nelliampathy hills and Sholayar. Rubber is also grown in Mannarghat, Ottappalam and parts of Alathur taluk. Cardamom is cultivated in Nemmara block. The other crops in this district are pepper grown in Mannarghat block, jowar and ragi in Chittur block, chillies, pulses, sweet potato, tapioca and cocoanut in Trithala, Pattambi and Ottappalam blocks.

52. The soil testing laboratory, the agricultural information unit, farmer's training centre at Pattambi, the agricultural research station (formerly known as vegetable farm) at Nelliampathy, central orchard, Pattambi and the horticulture development farm at Malampuzha are some of the important institutions meant for the development of agriculture. The village land use pattern, classified by forest land, irrigated and unirrigated cultivable land, culturable waste and the area not available for cultivation, based on the Village Directory is discussed later.

**Irrigation**

53. Irrigation projects in the district were launched only after attainment of independence, though some investigation work on the Malampuzha project was initiated as early as 1914. Malampuzha project was inaugurated on 27th March 1949. The work of Mangalam dam was started in 1953 and the work of Walayar project during the Second Five Year Plan period. Gayatri projects comprises of 2 schemes viz. Meenkara dam and Chulliar dam. Other notable projects were the Chitturpuzha project, Pothundy project and Kanjirapuzha project. Thus this district has the largest number of irrigation projects with a network of canals. All these projects have considerably enhanced the agricultural production of the district.

**Tenancy**

54. Land tenures as on 1st March 1961 are Jenmum, Inam, Kanam, Kanam-kuzhikkanam, Kuzhikanam, Verumpattam, Customary verumpattam, Kudiyiruppu, Kudikidappukars, Cultivating verumpattam, Ulkudi, Protected ulkudi, Pandaravaka verumpattam, Pandaravakakanam, Puravaka and Danam. The Kerala Land Reforms Act, 1963 repealed the Kerala Agrarian Relation Act, 1960, the Malabar Tenancy Act, 1929, the Cochin Verumpattamdar's Act VIII of 1118 M.E., (1942–43 A.D.) the Madras Cultivating Tenants Act, (Payment of Fair Rent), 1956 and the Travancore-Cochin Prevention of Eviction of Kudikidappukars Act, 1955 and enacted a single statute between landlord and tenant throughout the State.

55. The main objects of the Kerala Land Reforms Act, 1963 are

(1) to confer fixity of tenure on tenants

(2) to fix the fair rent in respect of holding

(3) to confer the right of purchase of the landlord's right, title and interest on culitivating tenants

106/541—10

(4) to define the rights and liabilities of Kudikidappukars and

(5) to place a ceiling on the ownership and possession of land and provide for the disposal of excess land.

The Act has given full proprietorship to the holders of Kudikidappu lands subject to the purchase price and they are given all the benefits of a tenant. This Act was implemented from early 1970. This Act has amended from time to time and it helped the tenant to become owners of the tenancy land. Many hutmen dwellers could purchase their home-steads with all the appurtenants thereto. The excess land above ceiling area was also distributed. Another notable impact of these reforms was the reduction in the number of landless agricultural households and the abolition of absenteelandlordism.

**Animal husbandry**

56. This district is not far behind in the development of livestock. The Government has provided all facilities for cattle breeding, fodder production, milk marketing and veterinary aid. The supply of livestock products have been improved considerably. As per the livestock census conducted in 1977, Palghat district stands in the third place in the number of livestock. One peculiar feature is its sheep population which works out to 87·9 per cent of the total sheeps in the state. The Government has undertaken certain measures to the development of the livestock. There are 8 veterinary hospitals and a number of other veterinary institutions such as 2 artificial insemination centres at Chittur and Alathur, one Regional artificial insemination centre at Palghat, 31 regional sub-centres, one intensive cattle development project, one clinical laboratory, one veterinary polyclinic, one mobile veterinary hospital and one mobile farm aid unit at Mannarghat.

**Fisheries**

57. Palghat district has no sea coast. However, inland fishing is done and Malampuzha is the headquarters of the inland fisheries activities of Kerala. The inland fishing is confined to the fresh-water fishing available in six reservoirs viz. Malampuzha, Mangalam, Pothundy, Meenkara, Chulliyar and Walayar. Besides reservoirs, inland fishing constitutes in rivers, canals and tanks. It is calculated that during 1978–79, the total out-turn of fish from the reservoirs was 32·63 tonnes. Olavakkode, Palghat, Ottappalam, Shoranur, Chittur and Sholayar are some of the major fishing markets in this district. The common fishes generally found in inland waters are Viral, Attuvala, Paral, Poochootta, the frog fish, Pampumeen, Karimeen, Kolan, etc. The Government has implemented composite fish culture, a fish developing programme by stocking the fingerlings of quick growing species produced at Malampuzha. The fresh water biological station at Malampuzha to produce fish seeds of quality fish is the important research institute on inland fishing undertaken by the Government.

**Electricity and power**

58. Pykara Electricity System in Tamil Nadu is the main source of electricity for this district. This is done under an arrangement with the then Madras State. There is no generating station in the district. Palghat is the main receiving sub-station of Pykara System. The other important sub-stations are located at Kanjikode, Shoranur, Kozhinjampara and Nemmara. The Shoranur sub-station is also connected with Viyyur sub-station.

**Industry**

59. Palghat is predominantly an agricultural area and industrially backward due to lack of power supply and communication facilities. However, recently, an industrial complex is coming up in the eastern region of Palghat town. Of the industrial units, Instrumentation Ltd., a unit of instrumentation, Kota, the Indian Telephone Industries which produces electronic exchanges, the F.A.C.T. Regional mixing centre and Modern Rice Mills (F.C.I.) owned by Central Government, the Kerala Electricals and allied engineering company, Malabar Cement Ltd., L and P Feed Factory, Malampuzha owned by Govenrnment of Kerala and Keltron Van Sters under Corporation, Carbonandum universals, British Physical Laboratories, Premier Cotton spinning mills, Madras Spinners, Sri Bhagavathy Textiles Ltd., Premier Breweries, Rallies India Ltd. and Kumar industries are important. The Co-operative Sugar Mill, Chittur is one of the three sugar factories in Kerala.

60. Handloom weaving is a traditional industry of this district. There are 31 Weavers' Co-operative Societies having 5,425 looms in the Co-operative sector and 612 looms in the private sector. This industry has not developed considerably. Nemmara is an important centre of cotton weaving. Chittur is famous for its Kora grass mat making. There are also some units on lapidary work (producing artificial diamonds), manufacture of clay, wooden toys, musical instruments, bamboo weaving, tanning and leather industries, manufacturing palmyra products, soaps and handmade papers and mat weaving, etc. Metal industries are concentrated around Shoranur. Some electronic and electrical industrial units are located in Pattambi, Palghat and Shoranur. There are few established units of manufacturing bricks and tiles

located in this district. Granite carving, a rare craft, is also seen in Chittur taluk. Palghat and Ottappalam blocks are the comparatively better developed industrial areas in the district.

**Transport**

61. In ancient times, the chief communication and trades of the district was carried on through waterways. Subsequently road and rail facilities were developed. There is no aerodrome or port in the district.

**(a) Roads**

Only after the Mysorean invasion under Hyder Ali and Tippu Sultan roads were began to exist. Of the seven gun roads originated by Tippu Sultan 3 roads passes through this district. In 1807, Mr. Thacheray, the Collector of South Division of Malabar wrote that 'Malabar was intersected by better roads perhaps than any province in India". The coast road and the roads from Palghat to the sea and Palghat to Kuttiadi (via) Tamarasseri were the important roads of that period. There is a rapid progress in the construction of roads in the period that followed especially after the formation of Kerala State. The National Highway 47 connecting Salem with Kannyakumari passes through this district. The State Highways are Shoranur-Perintalmanna road, Calicut-Palghat road via Mannarghat, Thathamangalam–Chittur road, Nattukal–Velamthavalam road and Palghat–Meenakshipuram road via Thathamangalam. The main district roads are Palghat–Ponnani road, Palghat–Chittur road, Palghat–Pollachi road, Pudunagaram–Kollengode road, Nemmara–Nelliampathy road, Karapara road, Kaikatty–Pulayampara road, Nemmara–Olipara road, Mudappallur–Mangalam road, Kollengode–Kunissery road and Koduvayur–Thripalur road. Besides the above roads, there are several village roads.

**Railways**

Palghat district came under the railway map as early as 1861 when the Kuttippuram–Pattambi line was opened for traffic on 23rd September 1861. On 14th April 1862, Pattambi–Pudur line was opened while on 2nd June 1902 Shoranur–Ernakulam line was commissioned. Nilambur–Shoranur line was opened on 1st October 1927 and the Palghat–Pollachi line on 14th April 1932. Thereafter there was no addition to the railway line excepting the changing of Ernakulam–Shoranur line as broadgauge and laying double-lines. The passenger-traffic, however, has considerably increased over the last 120 years.

(ii) POPULATION

85. The population of Palghat district as on the reference date, i.e. the sunrise of 1st March 1981, is 2,044,399 of which 994,196 are males and 1,050,203 are females. 8·03 percent of the total population in the state live in this district. Ottappalam is the most populous taluk with 6·26 lakh persons followed by Palghat (4·48 lakhs). All the villages in the district are inhabited. Of the towns in the district, there are 3 municipalities viz. Shoranur, Palghat and Chittur–Thathamangalam. The only census town is Ottappalam. Among the taluks, the percentage of urban population is highest in Palghat taluk with more than one fourth of the total population of the taluk (26·34 percent).

(iii) SEX RATIO

86. The sex ratio (females per 1,000 males) in Palghat district is 1,056 which is greater than the sex ratio for the state (1,032) and that of the northern districts. In all the previous censuses, the same phenomena was prevalent, the sex ratio for earlier censuses being 1,042 in 1901; 1,057 in 1911; 1,069 in 1921; 1,079 in 1931; 1,079 in 1941; 1,085 in 1951; 1,077 in 1961 and 1,056 in 1971. The rural sex ratio (1,059) is higher than the urban sex ratio (1,034). Among taluks Ottappalam has the highest sex ratio (1,101), while the lowest is in Mannarghat taluk (1,013). Palghat and Chittur taluks have sex ratios almost similar to that of the state. In the urban areas Ottappalam taluk tops (1,074) followed by Chittur taluk (1,042) which are greater than the state urban sex ratio of 1,021.

(iv) DENSITY OF POPULATION

87. At the turn of this century, the density of population of the district was only 171 persons per sq. km. It gradually increased (183 in 1911, 191 in 1921, 210 in 1931, 229 in 1941, 271 in 1951, 306 in 1961 and 456 in 1971). The density of population of this district in the 1981 census is 456 persons per sq. km. which is far below the state density of 655. In urban

areas the density is 2,186 persons per sq. km. as against 419 persons in the rural areas. All the taluks in the district have a density of less than 1,000 persons. Of which, Ottappalam has the highest density of 740 persons per sq. km. followed by Palghat (622) and Alathur (617). Mannarghat, the hilly taluk has the lowest density (212).

(v) GROWTH OF POPULATION

88. Decennial growth rates of population in all the earlier decades from 1901 indicate lower rates as compared to corresponding state growth rates. The percentage decadal variation in population for earlier decades are 7·31 in 1901–11, 4·18 in 1911–21, 10·22 in 1921–31, 8·90 in 1931–41, 18·45 in 1941–51, 12·79 in 1951–61 and 23·06 in 1961–71. The growth of population during the present decade 1971–81 is 21·30 as compared to 19·24 for the state. Compared to earlier decade the growth rate in the present decade has gone down. Among the taluks, the growth rate is highest in Mannarghat with 35·95 percent followed by Palghat (21·40) and lowest in Chittur taluk with 17·41. Due to declassification of towns and change in jurisdiction of towns over the census, the rural–urban growth rates are not strictly comparable. However, the figures are presented in Table 3.

(vi) SCHEDULED CASTES AND SCHEDULED TRIBES

89. There are 376,424 Scheduled Castes and 28,794 Scheduled Tribes in the District in the 1981 census as against 210,765 Scheduled Castes and 25,594 Scheduled Tribes in the 1971 census. The large increase in Scheduled Castes is due to the revision of the list of Scheduled Castes and Scheduled Tribes as per the Scheduled Castes and Scheduled Tribes Orders (Amendment Act) 1976. According to the revision, the principal Scheduled Tribe 'Pulayan' in Malabar area has been changed as Scheduled Castes. 18·41 per cent of the total population of the District is returned as Scheduled Castes which accounts for 14·77 per cent of the total Scheduled Castes in the State. About 95 percent of the Scheduled Castes in the District leave in the rural areas. In all taluks, except Mannarghat, there is no wide variation in the proportion of Scheduled Caste population as compared to the District average. All the taluks in the District have Scheduled Caste population of above 13 percent of the concerned taluk population. Ottappalam taluk has the highest percentage of Scheduled Castes (22·26 per cent) followed by Alathur taluk (20·38 per cent) and lowest in Mannarghat taluk (13·50). In Chittur and Palghat taluks, the proportion of Scheduled Caste population are 16·24 percent and 16·04 percent respectively which are lower than the District average of 18·41 per cent.

*N.*—Negligible

90. The Scheduled tribe population constitute 1.41 per cent of the total district population as against 1.03 per cent for the state. Mannarghat taluk stands unique in the district with 8.74 per cent. Chittur which comes second has a percentage of 1.74 per cent while the remaining 3 taluks fall in the category of less than 0.5 per cent.

(vii) LITERACY

91. Among the districts of Kerala, Palghat has the lowest literacy rate with 58 per cent of the total population. Though the literacy is increased in this district by 11 points over 1971, it is far below the state literacy rate of 70.42. Compared to the increase in male literacy rates, female literacy rate in 1981 had shown higher increase during the decade 1971–81. Literacy rate is highest in Ottappalam taluk with 63.21 per cent followed by Palghat taluk (61.14) and lowest in Chittur taluk (50.88). The literacy rate of Mannarghat and Alathur taluks are lower than the district average. The urban literacy is highest in Palghat taluk with 71.96 per cent closely followed by Ottappalam taluk (71.49). The male literacy rate is highest in Palghat taluk (69.08) while Ottappalam

taluk (59.53) tops in female literacy rate. In Mannarghat, Chittur and Alathur taluks, the female literacy rate is less than half of the respective taluk female population. In the urban areas male literacy rate is maximum with 77.54 per cent in Palghat taluk as against the highest female literacy rate of 67.68 percent in Ottappalam taluk.

(viii) WORKERS

92. The change in concept of workers since the 1971 census has already been explainad earlier. Of the total 722,948 workers 667,618 are main workers and 55,330 marginal workers. The total work participation rate is 35.36, while main workers comes to 32.65 per cent, marginal workers 2.71 per cent. The total work participation rate is found to be higher in rural areas as compared to urban areas. Male participation rates are higher in total rural and urban areas in respect of total workers and main workers. However, in regard to marginal workers, female work participation rates are slightly higher as compared to male rates for total and rural areas.

93. According to the 1981 census, 667,618 persons are returned as main workers which works out to 32.65 percent of the total population of the district as against the work participation rate of 26.68 percent for the state. There are 442,663 males and 224,955 females returned as main workers, the percentage being 44.53 and 21.42 respectively. Work participation rate is more in rural areas than in urban areas in the case of total and females. In the case of males, there is only nominal difference between rural and urban areas.

94. The proportions of marginal workers are 2.71 percent for total population, 2.56 percent for males and 2.84 per cent for females. Marginal workers are larger in rural areas (2.83 percent) than in urban areas (1.61). Chittur taluk with 2.87 percent has the largest number of marginal workers closely followed in Ottappalam taluk (2.82) and lowest in Palghat taluk (2.44). The proportion of male marginal workers is highest in Ottappalam taluk with 3.06 per cent while Chittur taluk leads other taluks in respeet of female work participation rate with 3.21 percent.

95. Coming to the taluks work participation rate of main workers is more in Chittur taluk with 39·12 percent followed by 36·23 percent in Alathur taluk and lowest in Ottappalam taluk with 26·76 percent which is almost equal to that of the state (26·68). In Mannarghat and Palghat taluks the work participation rates are 33·11 per cent and 32·52 percent respectively. In rural areas and urban areas also work participation rate is higher in Chittur taluk with 39·91 per cent and 30·36 percent respectively In the urban areas of Ottappalam and Palghat taluks, work participation rate is almost same to that of the district. In all taluks the male work participation rate is much higher than that of females. Chittur taluk records highest male and female work participation rates with 48·78 percent and 29·80 percent respectively. The female work participation rates is lowest in Ottappalam taluk with 14·66 percent.

(ix) NON-WORKERS

The village having very low density i.e. below 50 persons per sq. km. is Pudur of Mannarghat taluk (25 persons per sq. km.). The other villages having a density of less than 200 persons per sq. km. are Sholayar (106) and Agali (136) villages of Mannarghat taluk and Malampuzha I (172) village of Palghat talk. There are 12 villages having a density of more than 1,000 persons per sq. km. of which Koduvayur I village of Chittur taluk has the highest density with 1,521 persons. The other villages which cross the density of 1,000 and above are Thiruvegapura (1,062) and Pattambi (1,160) of Ottappatam taluk, Pudupariyaram II (1,102), Marutharode (1,282) and Pirayiri (1,289) of Palghat taluk, Nalleppilly (1,064), Vallanghi (1,302) and Kollengode I (1,055) of Chittur taluk and Puducode (1,014), Kannambra II (1,343) and Alathur (1,079) of Alathur taluk.

(iii) SCHEDULED CASTE AND SCHEDULED TRIBES

99. All the villages have Scheduled Castes. 20 villages have Seheduled Castes which constitute less than one-tenth of the concerned village population. Three villages viz. Pudur (3·74 percent) and Agali (5·68 percent) of Mannarghat taluk and Eravattaparapathy (3·86 percent) of Chittur taluk are the villages with low proportion of Scheduled Caste population. The percentage of Scheduled Caste population is highest in Vaniyamkulam I village of Ottappalam taluk (43·33 percent). The other villages having the proportion of Scheduled Caste population above 35 per cent are Vellinezhi (40·50), Sreekrishnapuram II (36·73), Ambalappara I (35·47) and Vaniyamkulam II (41·98) of Ottappalam taluk Kongad II village (37·97) of Palghat taluk Thathamangalam village (35·57) of Chittur taluk and Peringottukurissi I village (36·41) of Alathur taluk.

**Analysis of village directory**

104. The analysis of the amenities available in villages is based on the data presented in the village directory statements supplied by the village officials as on 1st October 1979. The village directory statements are presented for each taluk showing the number of educational and medical institutions and other amenities available in each village and taluk-wise abstract showing the number of each amenities in each taluk is also presented in this volume. The following table presents the distribution of villages according to the availability of amenities such as educational, medical, drinking water, post and telegraph, market, communication, approach to village by pucca road and power supply.

TABLE 12

**DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES**

105. Except Attampathy Village of Chittur Taluk, all the remaining villages in the district have educational facilities. Some of the colleges in the district are located in the villages also. Majority of the villages have medical facilities. All villages in Ottappalam and Mannarghat taluks have medical institutions of one type or the other. Two villages (viz. Pudupariyaram I and Kannadi II) of Palghat taluk, 4 villages (viz. Thathamangalam Portion), Thekkedesom, Attempathy and Kunnamkattupathy of Chittur taluk and 2 villages (viz. Kottayi II and Kavasseri I) of Alathur taluk do not have any kind of medical institutions. All villages have drinking water facilities. In 1979 there are 7 villages of Chittur taluk [viz. Thathamangalam (portion), Chittur (portion), Attempathy, Valiyavallampathy, Kuttipaliam, Kairady and Moolathara] have no post and telegraph offices. Of these, the people of Thathamangalam and Chittur villages can utilize the facilities available in the remaining portions of these villages which fall in the Chittur–Thathamangalam Municipal town. Like other districts there is lack of market facilities in this district also. Only 39 per cent of villages have markets. However, in half of the villages in Ottappalam and Chittur taluks markets are located. All the villages in the district possess facilities like communication, approach to village by pucca roads and power supply.

106. The entire rural population of this district are served by the facilities of drinking water, communication, approach to village by pucca roads and power supply. 99·94 per cent of the total population get the educational facilities. Less than 5 per cent of the population of Palghat, Chittur and Alathur taluks do not have medical facilities within their village limits. Only 88·53 per cent of the rulal people of Chittur taluk enjoy the facility of Post and Telegraph. Though market facility caters only 45 per cent of the rural folk of the district, as a whole, more than half of the village dwellers of Ottappalam, Mannarghat and Chittur taluks get this facility. Only one-fourth of the people in Alathur taluk get any type of market facility. In this context, it can be mentioned that small retail dealers of vegetables, groceries, are spread over the district and they cater the general needs of the people.

107. In the case of one village where educational facility and 8 villages where medical facility are not available, these facilities are available within a radius of 5 km. Similarly of the 7 villages, 6 villages get the Post and Telegraph facility within a radius of 5 km. and one village within 10 km. Out of 89 villages which are not having the markets, 34 villages are having within 5 km., 25 can have within 5–10 km. and 30 villages can get the facility at a distance of more than 10 km.

109. Palghat is the granary of the state. As in other parts of the state, rice is the important staple food of the district.

**Land use**

110. The Ministry of Food and Agriculture has recommended adoption of the following categories under land use in the presentation of data.

1. Forests
2. Not available for cultivation
   (a) Land put to non-agricultural uses
   (b) Barren and uncultivable lands
3. Other uncultivated lands excluding fallow lands
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands
   (a) Fallow lands other than current fallows
   (b) Current fallows
5. Net area sown

111. According to the village papers, there are 438,123·76 hectares of land use area in the district. 31·22 per cent of the total area is under forests. Of this, 624·8 sq. km. lie within the village limits and 742·8 sq. km. outside the village boundaries but within the district limits. Out of 62,483 hectares of forest land distributed in the villages 46,342·71 hectares lie in Mannarghat taluk especially in Agali (21,635·72 hectares) and Pudur (13,834·38 hectares) villages. 15 villages of Ottappalam taluk, 10 villages of Mannarghat taluk, 16 villages of Palghat taluk, 8 villages of Chittur taluk and 15 villages of Alathur taluk have forest areas within the village boundaries. More than half of the land use area are forests in Kottoppadam I (60·60) and Agali (82·45) villages of Mannarghat taluk. Other villages which are having forest area more than one-fourth of the total landuse area are Thrikkadeeri I (25·06) of Ottappalam taluk, Kottoppadam III (38·41), Mannarghat I (33·73), Pudur (33·46) and Sholayur (34·82) of Mannarghat taluk, Akathethara (P) (40·76) village of Palghat taluk, Kairady (33·74) and Kollengode II (30·91) villages of Chittur taluk and Peringottukurissi II (28·67), Kuthannur II (45·35), Tarur II (40·32) and Vandazhi I (40·56) of Alathur Taluk.

*The total area is according to village papers and do not agree with the area figures under rural areas derived from the area figures supplied by the Surveyor General of India.

Irrigation facilities are available in almost all villages except Sreekrishnapuram I, Kappur and Nagalassery villages of Ottappalam taluk, Thachanattukara, Kottappadam I, Mannarghat I, Sholayur and Pottasseri II of Mannarghat taluk, Kongad I of Palghat taluk, Vadakarapathy, Ozhalapathy and Attempathy villages of Chittur taluk. It is noticed that 98·19 per cent of the total area of Kottappadam II village of Mannarghat taluk and 83·95 per cent of Peruvamba village of Palghat taluk are irrigated. Other villages having irrigated area more than half of the total area are Kannadi I (66·39), Kannadi II (70·01) and Pelpully (55·75 per cent) of Palghat taluk, Thathamangalam (P) (52·17 per cent), Chittur (P) (50·21) Thekkedesom (54·96), Vadavannur (59·95 per cent), Vallanghy (50·78), Ayilur (57·08), Kollengode I (57·35) and Pattancheri (54·09) of Chittur taluk and Kottayi II (52·36 per cent), Mathur I (67·02 per cent), Mathur II (58·86 per cent), Kuzhalmannam I (53·03), Kuzhalmannam II (64·50) and Erimayur II (55·30 per cent) of Alathur taluk.

**Analysis of Town Directory Data**

113. Though the urban population has shown an increase, the proportion of urban population showed a fluctuating trend, which is mainly due to the criteria adopted for declaring a town.

N.A.—Not available

The urban density of population shows a steady increase from 1,667 persons per sq. km. in 1961 to 1,841 persons in 1971 and then to 2,186 in 1981 though these figures are well below the average urban density for the state. In all decades females out number males in the urban areas of the district, the sex ratio of 1981 being 1,034 females per 1,000 males.

114. None of the towns were newly added while four towns viz. Hemambikanagar, Mannarghat, Nemmara and Pattambi were declassified in the present census. Hemambikanagar and Mannarghat were treated as census towns for the first time in 1971, while Nemmara and Pattambi were treated as towns from 1911 and 1961 respectively. Though Hemambikanagar census town was declassified, it is renamed as Palghat railway colony and treated as an urban outgrowth and as an appendage to Palghat municipal town.

0—The absence of figures

Though no higher secondary or junior college is seen in these towns, the degree colleges provide the facilities. Chittur-Thathamangalam municipal town has the largest proportion of secondary schools (1·64) followed by Ottappalam with 1·30 and lowest in Palghat municipal town (0·59). The number of middle schools per 10,000 population is maximum in Chittur-Thathamangalam with 3·29. The second position is held by Shoranur municipal town with 2·28. The number of primary schools per 10,000 population is also highest in Shoranur (5·69). In Ottappalam census town and Chittur-Thathamangalam, Primary schools per 10,000 population are 4·32 and 4·28 respectively. Though Palghat municipality has maximum number of schools in all categories, the rate of schools per 10,000 population is the lowest among all towns of the district.

117. Coming to the medical facilities available in the urban areas, there are 4 Government allopathic hospitals, 3 ayurvedic hospitals and several other medical institutions. It is noticed that the number of medical institutions given in the statement are considered to be owned by government, quasi government, co-operative or charitable institutions, private medical institutions are omitted. Out of 795 beds included in the various hospitals other than private institutions located in this district, 513 are in Palghat municipality. Altogether there are 3·9 beds for
