MOTIF

Temples, mosques, churches, gurudwaras are not only the places of worship but are the faith centres to obtain peace of the mind.

The sacred temple of goddess ' Bhavani ' whose antiquity goes back to the days of Prabhu Ramchandra whom she is believed to have blessed and guided in his search for 'Sita' is situated at Tuljapur town and lies about 45 km north of Solapur. It is this goddess again, the ' Kulswamini ' of Maharashtra, who is believed to have rewarded Chhatrapati Shivaji, the founder of the Maratha State, with the legendary Bhavani ' Talwar ' (sword) and inspired him to carve out the Maratha Kingdom.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi:
Dated the 26th April 1982

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this Directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay:
Dated 26th January 1984 (Republic Day)

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsil in the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not, therefore, strictly add upto the corresponding figures shown against the district.

APPENDIX 1 TO SUMMARY TABLE 1

Tahsilwise number of Villages with Population of 5,000 or over and of Towns with Population under 5,000

(Tahsils which have nothing to show for this statement have been omitted from presentation)

District/Tahsil	Villages with population of 5,000 or over			Towns with population under 5,000		
	Number	Population in the concerned Villages	Percentage to rural population of the respective District/Tahsil	Number	Population in the concerned towns	Percentage to urban population of the respective District/Tahsil

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 District Census Handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts, Part A related to the village and town directory. Part B to village and town-wise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other state in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health subcentres and community health workers, has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in class I and II towns are oriented to ' minimum needs programme ' especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

The old name of the Osmanabad district was Dharasiva. The district was temporarily coded to the British Government in 1853 and it was reverted to Hyderabad State in the year 1860, with its headquarters at Naldurg. The district was known as Naldurg district till 1904. Naldurg district was subsequently abolished and a new district of Osmanabad was carved out with headquarters at Osmanabad. 1905 witnessed the abolition of two tahsils with their headquarters at Wasi and Naldurg. The former was merged in Kalamb and the latter in Tuljapur. With the shifting of headquarters of Ausa tahsil to Latur, the tahsil was named as Latur tahsil. In the Nizam's our estate called Sarf-e-Khas, Osmanabad had the largest area. The Sarf-e-Khas was merged with the government area under the Sarf-e-Khas (Merger) Regulation in the year 1949. In the same year all the Jagirs were abolished and put under direct government administration. Consequent upon the abolition of Sarf-e-Khas and Jagirs, the boundaries of all the tahsils were reconstituted in 1950. Two new tahsils with headquarters at Ausa and Umerga and a new mahal with headquaters at Bhum were created. In 1950 again 11 enclave villages were transferred from Solapur to the district in return to 52 villages from the district to Solapur. With the reorganisation of states, the district became a part of Bombay state in 1956. Three tahsils viz., Ahmadpur, Nilanga and Udgir were transferred from the neighbouring Bidar district (Karnataka) to Osmanabad district. In 1960, the Bombay state was bifurcated into Maharashtra and Gujarat and Osmanabad became an integral part of Maharashtra state. Since then the district has 11 tahsils and 13 towns.

Location, Relief and Drainage

The district is located between 17°35' and 18°40' north latitude and 75°16' and 76°40' east longitude, It is bounded on the north by Bid and Parbhani districts on the east by Nanded district and Bidar district of Karnataka state, on the south by Solapur district and on the west by Ahmadnagar and Solapur districts. Greater portion of the district lies on the triangular Balaghat plateau. Average height of this plateau is 2,000 feet above sea level. It slopes towards south and east, and forms the water divide between the Godavari and Bhima valleys. The northern bounding scarp of the Balaghat plateau running generally eastwards across the middle of the Bid district enteres Osmanabad district near Degaon. In a subdued form it runs first southwards and than eastwards gaining in altitude. It again runs southwards to the east of Chakur and then south-eastwards and after passing by Udgirc ontinues the south-easterly course and passes out of the district. The southern bounding scarp of this plateau backed by a chain of hills enters the district west of Malewadi and Pakhurd villages and runs in a general south-easterly direction. Passing just west of Yermala, Yedsi, Osmanabad and Tuljapur, it runs nearly due south-eastwards passing west of Naldurg. After the gap at Naldurg it continues in a subdued form and passes outside the district. The northern most divide in the district is between Manar river and the Godavari. The next divide is on the Balaghat plateau behind its northern scarp. It enters the district near Langarwadi and runs south-eastwards passing through Udgir. The main divide between the Manjra and the Bhima drainage systems,

enters the district just north of Malewadi. It continues to run west of Terkhed in a south-easterly direction upto to the south-estern scarp of the Balaghat plateau as far as Bawi to the west of Dharur.

But for the southern and western parts of the district, which are drained by the tributaries of Bhima system, the rest of the district is drained by the Manjra and its tributaries belongng to the Godavari drainage system. The Manjra itself along with its tributaries drains the Balaghat plateau portion, while its three other tributaries viz; the Manar, the Tiru and the Landi, drain the area to the north of plateau.

The main rivers of the district are Manjra and Terna. The Manjra river rises above Godavari near the northern edge of the Balaghat plateau in Bid district and flows in the south-easterly direction towards Osmanabad district. It forms the district boundary for the greater part of its easterly course. Apeart from the Rena with a small part of its lower most course within the district, the Girna is the only river of some consequence flowing as a left bank tributary of the Manjra draining the Balaghat plateau. About 40 kms. long, the river joins the Manjra river near Jawalga. The chief right bank tributaries of the Manjra are the Tawarja and the Terna. Tawarja is about 50 kms. long and rises near Murud railway station and has a general easterly course till it joins Manjra near Seoni village. The Terna. on the other hand, is over 150 kms. in length from the source of its confluence with the Manjra. It has the longest course of all the rivers lying entirely within the district.

The Benithora river is a tributary of Bhima and rises on the slopes of Deobat hill and flows in a south westerly direction. The Bori river again a tributary of Bhima rises in the west of Dharur and takes a south-easterly course east of the ridge from Tuljapur to Naldurg. The Harni is a tributary of Bori and it flows west of Tuljapur-Naldurg ridge with a course of 25 kms. within the district. The Sina river is a major tributary of river Bhima. It runs along the western boundary and receives many tributaries draining the Bhum and Paranda tahsils.

The Manar river rises on the north-eastern slopes of the Balaghat plateau near Dharmapuri in the Bid district and flows within Osmanabad disriet for about 40 kms. with a north-easterly course. The Tiru river rises on the eastern edge of the plateau near Chakur and has a course of about 56 kms. within the district. It generally takes an eastwardly course. Similarly the Landi rises on the edge of the plateau near Udgir and has a small course within the district.

Climate

Except for monsoon season, the climate of the district is generally dry. At times the variations in temperature are large. Being at a higher altitude, summer season is cooler in Osmanabad district than other districts of the Marathwada region. Thunderstorms occur in summer and monsoon months. Dust raising winds occur during the summer season. The tahsils situated on the plateau are cooler than those lying in the southern plains.

The year may be divided into four seasons. The cold season from December to middle of February is followed by summer which last till the end of May. The south-west monsoon season is from June to September and the post-monsoon season from October to November.

The average annual rainfall in the district is 882.1 mm (34.73)". The rainfall increases from the south-west towards the north-east. About 84 per cent of the annual rainfall is received during the south-west monsoon season. July is the rainiest month of the year. On an average there are about 51 rainy days in a year in the district.

Soil

The soil of the district may be divided into the following three zones :—

(*i*) The eastern part comprising of Ahmadpur, Udgir and parts of Latur and Ausa tahsils.

(*ii*) Osmanabad and Kalamb tahsils and parts of Latur, Ausa and Umarga tahsils.

(*iii*) Tuljapur, Paranda and Bhum tahsils.

The first zone, in general, consists of light and light medium soils of inferior type. They are not retentive of moisture and are, therefore, suitable only for the cultivation of kharif crops. The soils in some parts of Nilanga are of laterite type.

Heavy deep black cotton soils are found in the second zone. Owing to this peculiarity of the soil, both rabbi and kharif crops are grown in this zone. In fact eastern parts of Osmanabad, Latur, Ausa and Kalamb grow more of Kharif crops than rabbi ones. Against this western parts of these tahsils grow mainly rabbi crops.

The third zone consists of heavy soils which are more retentive of moisture. As such rabbi crops are the major crops of this area. The mountainous ranges in this zone have found typical strips suitable for paddy cultivation.

Census Houses and Households

Column numbers 4 and 5 of the primary census abstract depict the total number of occupied residential houses and households in the district, as returned at 1981 census. To start with, it would be relevant to define a 'house' or a 'household' as adopted in census. A 'Census House' is a building or a part thereof having a main entrance from the road or a common courtyard or staircase etc. It may be occupied or vacant, residential or non-residential or both.

A 'household' has been defined as a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. The members of the household may or may not be related by blood or

else it can have a mix of both. It may be a single member or more than one member household, The household comprising of unrelated persons are, however, called 'institutional households'. Such households include boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. There is yet another category of households known as 'houseless households.' Such households do not have a fixed place of residence. They move from place to place, camp at night at their own choosing or just live on streets, pavements, gardens and in the open places.

As returned at 1981 census there are 382,054 occupied residential census houses and Households number 385,912.

The average size of the household works out to 5.78 persons at the district level as against 5.37 persons at the state level.

Distribution of Population in Rural and Urban Areas

The population of the district, as returned at 1981 census, stands at 2,230,620 persons comprising of 1,139,197 males and 1,091,423 females. Thus the population of the district accounts for 3.55 per cent of the population of the Maharashtra state.

A village is the basic administrative unit in the rural areas of the country. It is a statutory recognised unit having definite boundaries and separate land records. A village can be both inhabited and uninhabited. On the contrary an urban area is specifically defined for purposes of census. Following criteria have been adopted for 1981 census.

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria:

(*i*) A minimum population of 5,000;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities;

(*iii*) A population of at least 400 persons per km^2.

There are 1,554 villages in the district of which 1, 527 are inhabited by 1,887,383 persons and the remaining 27 are uninhabited ones. The sex differentials in population at the district level as also at the state level are, by and large, similar. The rural population constitutes 84.61 per cent of the total population. Against this the corresponding proportion of rural population at the state level stands at 64.97 per cent. As regards urban areas, 13 towns of the district cover 343,237 persons. This gives out urban proportion of population in the district as 15.39 per cent against the state average of 35.03 per cent. This leads to the conclusion that the district is comparatively less urban than the state taken as whole'. Sex differentials in the rural and urban population both at the state and the district are almost identical.

In the district, down at the tahsil level, it may be seen from Table-1.

TABLE 1

Population Number of Villages and Towns, 1981

Serial No.	Name of tahsil	Population									No of Villages		
		Total			Rural			Urban			Total	Inhabited	No. of towns
		P	M	F	P	M	F	P	M	F

10	Paranda ..	116,467	59,261	57,206	105,573	53,638	51,935	10,894	5,623	5,271	117	115	1
11	Bhum ..	102,329	52,088	50,241	92,035	46,747	45,288	10,294	5,341	4,953	95	94	1
District Total	..	2,230,620	1,139,197	1,091,423	1,887,383	959,644	927,739	343,237	179,553	163,684	1,554	1,527	13

Latur tahsil is the most populous of all the tahsils (275,379). It is in fact above two and half times more than the least populous tahsil viz; Bhum (102,329), Udgir takes second place (274,636) and Ahmadpur the third (246,956). Osmanabad the district headquarte-ranks sixth with a population of 214,681 persons. The remaining tahsils in order of their population are:- Nilanga (240,782), Umarga (230,048), Ausa (182,089), Kalamb (175,191), Tuljapur (172,062) and Paranda (116,467) (Table 1).

As regards the rural-urban differentials at tahsil level, Latur is more urban than any other tahsil of the district. The urban population in this tahsil works out to about 40.67 per cent. Udgir and Osmanabad rank second and third respectively with an urban population of 18.41 per cent and 18.20 per cent. The remaining tahsils are mostly rural.

Size Class and Status of Towns

The towns in the country have been divided into the following categories by virtue of their population :—

Class I	..	100,000 and above
Class II	..	50,000—99,999
Class III	..	20,000—49,999
Class IV	..	10,000—19,999
Class V	..	5,000 –9,999
Class VI	..	Below 5,000

On the basis of above classification only one town namely, Latur with a population of 111,986 i.e. above 100,000, qualifies to be a class I town. Udgir is the other solitary town qualifying to be class II town (50,564). Similarly there is only one class III town viz; Osmanabad (39,068). There are, however, 9 class IV towns. They are.—Ahmadpur (16,537), Ausa (16,761), Bhum (10,294), Kalamb, (13,788), Murum (13,451), Nilanga ((17,201), Paranda (10,894), Tuljapur (16,941) and Umarga (16,087). The only class V town is Naldurg (9,665). There is, however, no class VI town in the district. No new town has been added in the district nor has any one been declassified during 1971-81 (Table-2).

TABLE 2

Naw Towns/Towns declassified in 1981 Census

Name of the towns	Population 1981 census
(*a*) Added— Nil	Nil
(*b*) Declassified—Nil	Nil

Urban Agglomeration

There is no urban agglomeration in this district.

Standard Urban Area

Standard Urban Area (S.U.A) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A are:

(*i*) It should have a core town of a minimum population of 50,000;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Latur Standard Urban area in Osmanabad district are as follows :—

Latur SUA: Urban Components:

1 Latur City (M).

Rural Components :

(1) Nandgaon. 2. Borwati. 3. Hanumant-wadi. 4. Kasargaon. 5. Latur (Rural). 6. Arwi. 7. Baswantpur. 8. Warwanti. 9. Harangool. 10. Khadgaon. 11. Kanheri. 12. Sikandarpur. 13. Sarola. 14. Kolpa. 15. Katpur. 16. Khopegaon. 17. Chande-shwar. 18. Peth. 19. Wasangaon. 20. Pakharsangvi.

TABLE 3

Distribution of Inhabited Villages by population Ranges

Range of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
—200 ..	52	3.41
200—499 ..	274	17.94
500—1,999 ..	984	64.44
2,000—4,999 ..	195	12.77
5,000—9,999 ..	18	1.18
10,000 + ..	4	0.26
All ranges ..	1,527	100.00

Table-3 shows that there are 1,527 inhabited villages in the district. 52 constituting 3.41 per cent of all the villages have less than 200 population each. On the other hand, there are 4 villages which have a population of more than 10,000 persons each. The highest number of villages (984) accounting for 64.44 per cent of all the villages have a population between 500 and 1,999. The second largest number of villages (274) forming 17.94 per cent of all the villages fall in the population range 200-499. The remaining 195 and 18 fall in the population range of 2,000—4,999 and 5,000—9,999 respectively.

To elucidate further villages may be grouped as; small (less than 500), medium (500—1,999), large (2,000—4,999) and exceptionally large (5,000+). Accordingly there are 326 small sized, 984 medium sized, 195 large sized and 22 exceptionally large sized villages in the district.

Population Growth, Density and Sex Ratio

Against the 1971 population of 1,896,687 persons, the district has returned the same at 2,230,620 persons

at 1981 census. Thus, there has been a net increase of 333,933 persons during the decade. In other words the district has registered a growth rate of 17.61 per cent during the decade. This rate of growth is much lower than the state growth rate of 24.54 per cent during the same period. Within the district the highest growth rate of the order of 39.60 per cent has been registered in Latur tahsil. Udgir follows, though not closely. with a growth rate of 22.50 per cent. Ahmadpur and Nilanga are two other tahsils which have also experienced a growth rate above the district average. The same has been recorded at 19.24 per cent and 19.18 per cent respectively. All other tahsils reveal a growth rate lower than the on returned at district level and lowest of 7.91 per cent have been given out by Paranda tahsil(Table 4).

TABLE 4

Decdal Charge in Distribution af population

Name of tahsil	Population						Percentage decadal (1971–81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10

5. Udgir ..	224,187	193,540	30,647	274,636	224,072	50,564	+22.54	+15.78	+64.99
6. Nilanga ..	202,037	189,516	12,521	240,782	223,581	17,201	+19.18	+17.97	+37.38
7. Ausa ..	155,608	142,131	13,477	182,089	165,328	16,761	+17.02	+16.32	+24.37
8. Umarga ..	211,019	186,439	24,580	230,048	200,510	29,538	+ 9.02	+7.55	+20.17
9. Tuljapur ..	156,924	137,184	19,740	172,062	145,456	26,606	+9.65	+6.03	+34.78
10. Paranda ..	107,933	99,135	8,798	116,467	105,573	10,894	+7.91	+6.49	+23.82
11. Bhum ..	91,344	83,508	7,836	102,329	92,035	10,294	+12.03	+10.21	+31.37
District Total ..	1,896,687	1,659,699	236,988	2,230,620	1,887,383	343,237	+17.61	+13.72	+44.83

Again, the rural-urban differentials in the rate of growth are revealing. At the district level, the country-side has revealed a growth rate of 13.72 per cent during the decade. On the contrary, the urban rate of growth has been of the order of 44.83 per cent. This proportionanately higher rate of growth in the urban side explicitly implies the price factor of migration that works in favour of urban areas of the district. This is further substantiated by the fact that Udgir and Latur towns which are class II and I towns respectively have returned comparatively a higher growth rate during the decade. The growth rate in the two cases has been recorded at 64.99 per cent and 59.62 per cent respectively. In fact the urban pull is discernable in all the tahsils of the district in as much as the urban rate of growth is significantly higher than the rural one. Urban pull factor is not confined to 1971-81 decades only. It is also visible during the decade of 1961-71 (Table 5).

TABLE 5

Growth, Density and Sex-Ratio of Urban population in the District in relation to the State

Census year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per Km^2)	Sex ratio (No.of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per Km.^{2})	Sex ratio (No. of females per 1,000 males)

N.A. = Not Available.

A population of 2,230,620 persons of the district is spread over an area of 14,210 kms.^{2} This yields a density of 157 persons per km.^{2} Compared to the density 204 persons per km^2. for the state density of the district is much lower. In the various tahstils of the district large variations in the density are discernable. Not to speak of density, of the district, Latur tahsil has returned a density higher than found at the state level even (253 persons per km.^{2}). Other tahsils with a higher density than found at district level are: Osmanabad (186), Nilanga (174) and Udgir (168) . The remaining tahsils with a density lower than the district are: Kalamb (143), Ahmadpur (156), Ausa (150), Umarga (154), Tuljapur (110), Paranda (111) and Bhum (116).

TABLE 6

Distribution of villages by Density

Range of density (per km.^{2}) 1	Total No. of villages in each density range 2	Percentage of villages in each density range 3
—10 ..	9	0.59
11-20 ..	5	0.33
21-50 ..	49	3.21
51-100 ..	335	21.94
101-200 ..	853	55 86
201-300 ..	154	10.08
301-500 ..	32	2.09
501+ ..	14	0.92
Not known ..	76	4.98
All density ranges ..	1,527	100.00

As would be seen from Table 6, there are 9 villages in the district as have a density of upto 10 persons per km.^{2} only. Against this, there are 14 villages with a density of more than 500 persons per km.^{2} The highest proportion of villages (55.86 per cent) have a density of 101-200 persons per km^2. followed by 335 villages with a density 51-100 persons per km^2. The urban density, as returned at 1981 census, stands at 1,086 persons per km.^{2} This is much higher than the one found in 1971 (606) (Table 5).

There are 13 towns in the district and the most densely populated town in Latur. In its case a density of 15,817 persons per km.^{2} has been found. In fact this town has been experiencing phenomenally a higher rate of growth since 1961. During 1961-71 it registered a growth rate of 71.48 per cent and during 1971-81 the same has been found at 59.62 per cent. Ausa town ranks second with a density of 4,342 persons per km.^{2} followed by Osmanabad town with a density of 3,391 persons per km.^{2} Murum is the least dense town (248) (Statement I).

Sex ratio is defined as the proportion of females per 1,000 males is higher in the district than observed at the state level. Against 1937 females per 1,000 males, the district has returned the same as 958 females per 1,000 males at 1981 census.

The following table reveals the trend of sex-atio both at the state as also at the district level since 1981:—

TABLE 6(i)

Sex Ratio 1901—1981

Year	District	State
1901	980	978
1911	964	966
1921	939	950
1931	942	947
1941	941	949
1951	947	941
1961	949	936
1971	944	930
1981	958	937

As would be seen from the above table, the males have are along outnumbered females ever since 1901. At the state level as also at the district level, the sex ratio has fluctuated and no steady upward or downward trend is discernable in either case. In 1901 there was no significant difference in the sex ratio between the state and the district. The same has appreciable drifted apart in1981.

Within the district at tahsil level, males outnumber females everywhere. Out of 11 tahsils as many as 8 have returned a sex ratio higher than found at district level. Those returning lower than the district sex ratio are: Osmanabad (933), Latur (928) and Udgir (957).

The following table reveals the sex ratio for each tahsil of the district.

TABLE 6(*ii*)

Sex Ratio by Tahsils, 1981.

District/Tahsil	Females per 1,000 males,
Osmanabad District	958
Osmanabad tahsil	933
Kalamb tahsil	965
Latur tahsil	928
Ahmadpur tahsil	970
Udgir tahsil	957
Nilanga tahsil	977
Ausa tahsil	963
Umarga tahsil	970
Tuljapur tahsil	959
Paranda tahsil	965
Bhum tahsil	965

The trend in the urban sex ratio is not different. While the state sex ratio is showing the signs of increasing trend since 1961, increase can be noticed only in 1981 in case of the district sex ratio.

Scheduled Castes and Scheduled Tribes

To improve the socio-economic conditions of the scheduled castes and scheduled tribes, there are various agencies of the government which have been formed to draw up plans for the purpose. Development plans and schemes can be drawn up only when data on socio-economic and demographic characteristics of this-population are available. In this regard census is the main source that can be relied upon because it reaches the threshhold of each individual of the country. One of the highlights of 1971 and 1981 censuses has been to collect detailed information about the socio-economic and demographic characteristics of the member of these two backward communities. To start with, there is no standard definition of a scheduled caste or a scheduled tribe. Scheduled castes, however, are such of the castes among hindus and sikhs, as have been declared so by the President of India through a public notification under article 341 (*i*) of the constitution. Similarly, Scheduled tribes are such of the tribes as are declared so by the President by a notification under article 342 (*i*) of the constitution. In Maharashtra state 59 castes and 47 tribes have been declared as scheduled castes and scheduled tribes respectively and the same are given below.

Scheduled Castes and Schcduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia. Chamar, Chamari, Chambhar, Chamgar, Haralayya. Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana Halakhor, Laibegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari.
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda, Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Hals r, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (*in* Akola, Amravati, Bhandara, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig Dankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala. Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Beed, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.
17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti Gaita, Gond Gawari, Hill Maria , Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod,, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son-Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.

25. Kokna, Kokni, Kukna.
26. Kol.
27. Kolam,Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Nakda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Beed, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

At 1981 census, the scheduled caste population of the district has been returned at 342,461 persons comprising of 174,475 males and 167,986 females. Thus the scheudule scheduled caste population constitutes 15.35 per cent of the total population of the district. The proportion is more than double the one observed at state level (7.14%).

Of the 1,527 inhabited villages in the district, there are 47 as have no scheduled caste population at all. 204 villages have it upto 5 per cent each. Against this, there are 116 villages each with 31 and above per cent population belonging to scheduled castes. Highest number of villages (321) has such population in the percentage range of 11-15 . The second largest number of villages (293) has this population between 21-30 per cent (Table 7).

TABLE 7

Proportion of scheduled caste population to total population in the villages.

Percentage range of scheduled caste population to total population	No. of Villages in each range	Percentage of villages in each range
1	2	3

31+ ..	116	7.59
All ranges ..	1,527	100.00

The following table shows the proportion of scheduled caste and scheduled tribe population to the total population of the district for 1971 and 1981 at tahsil level.

TABLE 7(i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of Scheduled caste population to total population		Percentage of Scheduled tribe population to total population	
	1971	1981	1971	1981
1	2	3	4	5
Osmanabad District	15.04	15.35	0.14	2.33
Osmanabad tahsil ..	15.98	12.92	0.24	2.85
Kalamb tahsil ..	18.40	14.62	0.52	2.18
Latur tahtil ..	13.96	13.28	0.06	2.37
Ahmadpur tahsil ..	13.81	17.28	0.24	2.63
Udgir tahsil ..	17.30	20.53	0.19	2.76
Nilanga tahsil ..	14.07	16.29	..	4.06
Ausa tahsil ..	14.35	13.74	0.05	1.72
Umarga tahsil ..	13.81	15.45	Nil	2.09
Tuljapur tahsil ..	16.12	15.50	0.04	0.85
Paranda tahsil ..	12.88	12.50	0.09	1.08
Bhum tahsil ..	13.36	12.20	0.04	1.03

The scheduled tribe population of the district has been returned at 52,013 persons comprising of 26,482 males and 25,531 females. Thus the population of this community constitutes 2.33 per cent of the population of the district much lower than the state average of 9.19 per cent. The increase in the scheduled tribe population has been significant since 1971. As against 0.14 per cent in 1971, the same has increased to 2.33 per cent in 1981. The highest increase is discernable in Nilanga and Umarga tahsils. The former had no such population in 1971, but in 1981 it constitutes 4.06 per cent of the total population of the tahsil. Similarly against a negligible proportion in Umarga tahsil in 1971, the same has increased to 2.09 per cent in 1981. Increasing trend is seen in all the tahsils of the district.

There are 758 villages in the district as have no scheduled tribe population at all. Against this 9 villages have 51 and above per cent of such population. 591 villages (38.70 per cent) have upto 5 per cent scheduled tribe population and 126 villages (8.25 per cent) have it between 6.15 per cent (Table 8).

TABLE 8

Proportion of scheduled tribe population to total population in the villages

36-50 ..	5	0.33
51+ ..	9	0.59
All ranges ..	1,527	100.00

The scheduled caste and scheduled tribe population is dispersed over all the town of the district. Proportions are given in Table 9.

TABLE 9

Proportion of Scheduled Castel|Scheduled Tribes population in towns

Name and civic status of the town		Total population	Total scheduled caste population	Total scheduled tribe population	Percentage of scheduled caste population to total population	Percentage of scheduled tribe population to total population
1		2	3	4	5	6
Ahmadpur	(M, C.I)	16,537	2,340	125	14.15	0.76
Ausa	(M.Cl.)	16,761	1,505	55	8.98	0.33
Bhum	(M, Cl.)	10,294	890	163	8.65	1.58
Kalamb	(M, Cl.)	13,788	881	336	6.39	2.44
Latur City	(M. Cl.)	111,986	11,026	1,585	9.85	1.42
Murum	(M. Cl.)	13,451	2,664	103	19.81	0.77
Naldurg	(M. Cl.)	9,665	781	47	8.08	0.49
Nilanga	(M. Cl.)	17,201	1,995	225	11.60	1.31
Osmanabad	(M. Cl.)	39,068	2,947	616	7.54	1.58
Paranda	(M. Cl.)	10,894	981	40	9.00	0.37
Tuljapur	(M. Cl).	16,941	1,581	93	9.33	0.55
Udgir	(M. Cl.)	50,564	8,318	912	16.45	1.80
Umarga	(M. Cl.)	16,087	2,202	251	13.69	1.56
	All towns	343,237	38,111	4,551	11.10	1.33

All towns together absorb scheduled castes to the tune of 11.10 per cent of total urban population. As against this proportion scheduled tribes absorb only 1.33 per cent of total urban population. Higher proportions of scheduled castes is observed in Murum and Udgir towns, whereas Kalamb town indicates higher proportion of scheduled tribes.

Literacy

Literate person in census has been defined as one who is able to read and write with understanding in any language. The 1981 census has returned 35.36 per cent of the population of the district as literate. This is, however, lower than the state average of 47.18 per cent. Among the various district of the state, the district is on the tail end ranking at 22 position. Sex-differentials in Literacy reveal that while 48.73 per cent of males are literate, the average is just 21.40 per cent in case of females. The corresponding average at the state level stands at 58.79 per cent and 34.79 per cent respectively. The rural-urban differentials are wide apart. The literacy rate in urban areas stands at 51.80 per cent, the same has been returned at 32.37 per cent in case of rural areas. Again, 64.38 per cent urban male literates, the corresponding proportion in rural male literates works out to 45.80 per cent only. The gap is more wide in case of females, as against 38.00 per cent females urban literates, there are only 18.48 per cent female rural literates.

Among the various tahsils of the district Latur stands out with the highest literacy rate of 41.21 per cent. It has a covetous position in male and female literacy also and leads with a male literacy of 54.51 per cent and female literacy of 26.88 per cent. Other tahsils with a literacy rate above the district average are: Osmanabad (39.70 per cent), Kalamb (38.36 per cent) and Bhum (35.83 per cent) (Table 12).

TABLE 10

Literacy rates by population ranges of villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
–200	52	30.15
200–499	274	29.09
500–1,999	984	30.77
2,000–4,999	195	33.94
5,000–9,999	18	38.40
10,000+	4	41.31
All ranges	1,527	32.27

As would be seen from Table 10, in general a correlation exists between the size of the village and rate of literacy. Larger the village, higher is the rate of literacy.

But for population size class 200-499, in all other higher size classes, the correlation turns out to be correct. Among the various towns in the district, Osmanabad recorded the highest literacy rate of 59.26 per cent in 1981 (Table 11).

TABLE 11

Literacy rates for towns

Name and civic status of the town			Literacy rate
1			2
Ahmadpur	(M.Cl)	..	49.58
Ausa	(M.Cl)	..	45.65
Bhum	(M.Cl)	..	45.11
Kalamb	(M.Cl)	..	50.92
Latur city	(M.Cl)	..	52.91
Murum	(M.Cl)	..	42.18
Naldurg	(M.Cl)	..	44.06
Nilanga	(M.Cl)	..	46.53
Osmanabad	(M.Cl)	..	59.26
Paranda	(M.Cl)	..	44.28
Tuljapur	(M.Cl)	..	56.41
Udgir	(M.Cl)	..	54.69
Umarga	(M.Cl)	..	49.16
	All towns	..	51.80

Lowest rate (42.18 per cent) was found in Murum town.

The district seems to have made appreciable progress in the field of literacy since 1901. It has increased from 3.09 per cent in 1901 to 35.36 per cent in 1981. The following Table 11(i) reveals the progress in this field for the last 80 years.

TABLE 11(i)

Progress of Literacy, 1901-81

Year			Total	Males	Females
1901	..	..	3.09	6.00	0.12
1911	..	..	2.62	4.95	0.19
1921	..	..	2.53	4.77	0.11
1931	..	..	2.44	4.23	0.51
1941	..	..	7.82	11.58	3.81
1951	..	..	10.06	18.61	2.96
1961	..	..	17.05	27.52	6 02
1971	..	..	27.88	40.34	14.70
1981	..	..	35.36	48.73	21.40

Since independence, it can be seen from the above table, literacy in the district has increased by three and a half times. Progress in female literacy is significantly appreciable. The same has increased by over seven times. Against this the male literacy has improved by two and a half times only. This rapid development may be due to the extension of educational facilities during the five year plans. The compulsory education introduced in 1953 may have had its own effect.

Working population

Work, in census, has been defined as participation in an economically productive activity. The participation may be physical or mental in nature. Work involves not only actual work but effective supervision and direction also. At 1981 census there has been a conceptual change in defining the worker. A trichotomy of main workers, marginal workers and non-workers has been adopted against dichotomy of workers and non-workers as adopted in 1961 and 1971. While accepting the conceptual change the feasibility of making the data comparable with previous censuses was, however, duly considered. Conceptually the main workers plus the marginal workers of 1981 are, more or less, comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Moreover, on the recommendation of the Planning Commission and Central Statistical Organisation, only four industrial categories of main workers viz; cultivators, agricultural labourers, workers engaged in household industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

A main worker was defined as one who worked for the major part of the preceding year (at least 6 months or 183 days). Against this a marginal worker was one who just worked for sometime during the preceding year, but not for the major part of the preceding year. All others who did not work at all during the preceding year were treated as non-workers. Persons engaged in household duties, students, dependants, retired persons, rentiers, beggars etc. are some of the categories grouped as non-workers.

TABLE 12

LITERATES, WORKERS, NON-WORKERS, SCHEDULED CASTES/SCHEDULED TRIBES POPULATION IN THE DISTRICT

As would be seen from table 12 at the 1981 census, the total workers (main+marginal) constitute 44.92 per cent of total population of the district. This proportion of workers is higher than the state average of 42.56 per cent. The sex differentials of total worker reveal that male and female workers account for 55.01 per cent and 34.39 per cent respectively of the male and female population of the district. The corresponding proportions at the state level have been returned at 53.73 per cent and 30.63 per cent.

As regards the main workers, they constitute 38.87 per cent of the population of the district. This average is a little higher than corresponding state proportion of 38.71 per cent. As compared to 1971 census, there is some rise in the work participation rate both in the district (33.79 per cent in 1971 and 38.87 per cent in 1981) and the state (36.48 per cent in 1971 and 38.71 per cent in 1981). However, rise in the female participation in the district from 15.20 per cent in 1971 to 23.41 per cent in 1981 is noteworthy. Within the district the highest proportion of main workers (41.87 per cent) has been found in Ausa tahsil. Other tahsils with higher than the district average of such workers are : Kalamb (41.43 per cent), Nilanga (40.82 per cent), Bhum (40.81 per cent), Paranda (40.71 per cent), Tuljapur (40.17 per cent) Umarga (39.65 percent) and Osmanabad (39.50 per cent).

A significant proportionate change is seen in the marginal workers of 1981 census. The marginal workers in the district work out to 6.05 per cent of the population against 3.85 per cent in the state. The proportion of male marginal workers stands at 1.33 per cent in the district against 1.22 per cent in the state. A wide variation is, however, observed in female marginal workers. In the district they form 10.98 per cent of the population against 6.65 per cent at the state level. This implies that female population of the district engages itself more in the marginal work as compared to the state average. From the above the natural inference is that the district has proportionately less non-workers than the state and the same has been substantial by the figures.

The main workers have been sub-divided into cultivators, agricultural labourers, workers engaged in household industry and other workers. Against 35.12 per cent in the state, 42.18 per cent of main workers in the district have been returned as cultivators. Proper tionately male cultivators of the district outnumber those in the state but the female cultivators of the state outnumber those in the district.

38.13 per cent of the main workers are agricultural labourers in the district. The corresponding proportoin of such labourers in the state stands at 26.63 per cent. The proportion of female agricultural labourers as compared to male is higher both at the district as also at the state level. In the district against 27.86 per cent male agricultural labourers, the female agricultural labourers account for 62.70 per cent. The corresponding proportions at the state level stand at 18.51 percent and 45.61 per cent respectively.

Normally an agrarian economy yields enough space for the development of household industry. This does not appear to be the case with the district. At 1981 census hardly, 1.69 per cent of the main workers are engaged in household industry. The corresponding proportion of main workers engaged in household industry has been returned at 2.55 per cent in the state.

18.00 per cent of the main workers in the district fall under the category of ' other workers '. In fact this is half the proportion of such workers in the state (35.70 per cent). Almost the same is the case with male other workers (district 23.47 per cent and state 45.19 per cent). However, the proportion of female other workers (4.92 per cent) is much lower than found at the state level (13.51 per cent).

Availability of Amenities—Education

There are 1,527 villages in the district inhabited by 1,887,383 persons. The educational facilities are available in 1,505 villages encompassing a population of 1,877,217 persons. In other words, the amenity is available in 98.56 per cent villages covering 99.46 per cent population. Within the district 100.00 per cent schooling facilities are available in Kalamb, Latur, Udgir and Bhum tahsils. There are, however, Nilanga, Tuljapur and Paranda tahsils where the proportion of villages having this amenity is lower than the district average (Tables 13 and 14).

The distribution of villages possessing the educational amenity in various population ranges shows that there are 312 villages which have less than 500 population. Against this 22 villages have more than 5,000 population. The remaining 976 and 195 villages fall in the population size class of 500–1,999 and 2,000–4,999 respectively (Table 15).

TABLE 15

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat.	Communications	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10

All ranges ..	1,527	1,505 (98.56)	261 (17.09)	1,527 (100.00)	525 (34.38)	145 (9.50)	695 (45.51)	536 (35.10)	1,059 (69.35)

22 villages do not have the amenity available at all. The inhabitants of 19 have to tread a distance of up to 5 kms. to reach a school, while the inhabitants of 2 have to travel 5-10 kms. for obtaining this facility. There is yet another village whose inhabitants have to travel more than 10 kms to a nearby school (Table 16).

TABLE 16

All towns ..	1.72	1.51	1.57	2.24

Table 18 gives out the proportion of various categories of educational institution to 10,000 urban population of the district. The urban population and the institutions bear the ratio :—10,000 : 1.72 Higher Secondary/Inter/PUC/Junior Colleges; 10,000 : 1.51 Secondary/Matriculation Schools; 10,000 : 1.57 Junior Secondary/Middle Schools and 10,000 : 2.24 Primary Schools. To make it more comprehensible it can be said that there is a Higher Secondary/Inter/PUC/Junior College after every 5,818; a Secondary/Matriculation School after every 6,601, Middle School after every 6,356 and a Primary School after every 4,458 urbanities in the district.

Medical

From the point of view of provision of medical amenities the district appears to be in a bad shape. Hardly 261 villages (17.09 per cent) have been provided with the medical amenities and barely 35.45 per cent of the rural population benefits from it. Osmanabad tahsil, the district headquarter has the amenity available to 44 villages of its 115 villages (38.26 per cent). Umarga ranks second with 33.83 per cent of its villages having the benefit of medical facilities. Other tahsils with medical facilities available to their villages above the district average are : Ausa (23.20 per cent), Kalamb (17.65 per cent) and Tuljapur (17.50 per cent). It is disheartening to see that out of its 192 villages, Nilanga tahsils has medical amenities available in just 12 villages (Table 13 and 14). Of the 261 villages provided with one or the other medical amenity, 22 have less than 500 population and another 22 have more than 5,000 population. The remaining 110 and 107 fall in the population size class of 500—1,999 and 2,000—4,999 respectively (Table 15).

1,266 villages do not have the medical facilities at all. Villagers of 337 can avail of it within a distance of about 5 kms, whereas those of 507 have to travel 5-10 kms. for obtaining the same. There are another 422 villages whose inhabitants have to tread more than 10 kms. in search of a medical amenity (Table 16).

In the various towns, on an average the ratio between the urban population and availability of beds stands rate 1,000 : 1.80. In other words one bed is available after every 556 urbanities (Table 19).

TABLE 19

All towns ..	1.80

Drinking Water

All the villages in the district have been provided with the drinking water amenity.

Post and Telegraph

525 villages in the district have been provided with the post and telegraph amenities. The post and telegraph facilities are available in 34.38 per cent villages and to 59.62 per cent rural population of the district. With regard to the availability of this amenity, Osmanabad leads with 60 of its 115 villages covered by it. Tuljapur ranks second with this amenity available to 62 of its 120 villages. Other tahsils having this facility above the district average are Umarga (44.36 per cent), Latur (37.93 per cent) and Kalamb (36.13 per cent) (Tables 13 and 14).

From amongst the villages having the net work of post and telegraph amenity; 23 have less than 500 population. There are another 22 villages, on the other hands, as have more than 5,000 population. The remaining 297 and 183 fall in the population range of 500-1,999 and 2,000-4,999 respectively (Table 15).

From Table 16 it is seen that the amenity is not available in 1,002 villages. Of these, the inhabitants of 608 have this facility at a distance of upto 5 kms. The inhabitants of another 305 villages have to travel 5-10 kms to obtain this amenity. There are yet another 89 villages whose inhabitants have to tread more than 10 kms in search of this facility.

Market/Hat

Market/hat is held in 145 villages (9.50 per cent) of the district. Within the district the same is held in 22 villages of Tuljapur and 21 of Umarga tahsils. Villages of these tahsils where these markets/hats are held to constitute 18.33 per cent and 15.79 per cent respectively of the total villages. Tahsils with proportions above the district average are:—Kalamb (16.81 per cent), Osmanabad (11.30 per cent) and Paranda (11.30 per cent). Only 24.88 per cent of the rural population benefits by these markers/hats (Table 13 and 14).

Of the 145 villages with the amenity of market/hat, 10 have less than 500 population, while 22 have more than 5,000 population. 42 and 71 fall in the population range of 500–1,999 and 2,000-4,999 respectively (Table 15). 1,382 villages do not have this amenity. The inhabitants of 400 villages have to travel upto 5 kms to reach the nearest market/hat. The inhabitants of 595 have this amenity available at a distance of 5–10 kms. The population of remaining 387 has to cover a distance of more than 10 kms to the nearest market/hat (Table 16).

Communications

Communication facilities which include availability of a bus stop/railway station/waterway are available in 695 villages. Thus 45.51 per cent of the villages covering about 54.95 per cent population of the district have this amenity. Kalamb tahsil has communication facilities available in 68.91 per cent villages as against this its availability is in only 32.29 per cent villages of Nilanga tahsil. Other tahsils with the proportion of villages with this amenity above the district average are: Umarga (65.41 per cent), Bhum (63.83 per cent), Tuljapur (55.83 per cent) and Udgir (48.37 per cent) (Table 13 and 14).

Of the 695 villages in the district having one or the other means of communication, 107 have less than 500 population while 21 have more than 5,000 population. 433 and 134 that remain a fall in the population range of 500–1,999 and 2,000-4,999 respectively (Table 15).

832 villages do not have any of the means of communication. The inhabitants of 403 have one or the other communication amenity available at a distance of upto 5 kms, while those of 291 have the same at a distance of 5–10 kms. There are another 138 villages whose population has to trend more than 10 kms to avail of a communication facility (Table 16).

Approach by pucca road

The position connecting the villages by pucca roads does not look encouraging. Hardly 536 villages (35.10 per cent) in the district have been connected by pucca roads and they cater to 46.54 per cent of the population of the district. Within the district Kalamb tahsil has comparatively a larger network of pucca roads. 71 (59.66 per cent) of its 119 villages are accessible by pucca roads. Paranda occupies second place with such roads avilable in 52 (45.22 per cent) villages. Other tahsils with a higher than the district proportion of villages connected by pucca roads are Ahmadpur (41.12 per cent), Ausa (39.20 per cent) and Nilanga (38.54 per cent) (Table 13 and 14).

Of the villages approachable by pucca roads 85 have less than 500 and 19 have more than 5,000 population. 327 and 105 fall respectively in the population range of 500–1,999 and 2,000–4,999 (Table 15).

Power Supply

Supply of electricity in the rural areas of the district is some what encouraging, 1,059 villages have been electrified. In other words about 7 of the 10 villages have the amenity of electricity. In Latur tahsil, 9 out of 10 and in Osmanabad, Ausa and Umerga 8 of the 10 villages have been electrified. Nilanga ranks at the bottom with 5 out of 10 villages electrified. As regards the population having the benefit of electricity 81.18 per cent of the district population is covered by electric supply (Tables 13 and 14).

From amongst the electrified villages in the district 162 have less than 500 whereas 22 have more than 5,000 population. 691 and 184 fall in the population range of 500–1,999 and 2,000–4,999 respectively (Table 15).

In general it may be obseved that availability of various amenities is directly proportional to the size of the villages. Larger the size of the village, more the possibility of different amenities.

Land Utilisation

Columns 15 to 19 of the village directory give land use pattern of each village in the district. The classification of land use adopted in this publication corresponds to the recommendations of the Ministry of Food and Agriculture.

Forest

There are very few forests in the district. The same are scattered in Tuljapur, Kalamb and Udgir tahsils. The area under forests is just 0.34 per cent of the total area of the district. Mostly these forests are of thorny scrub type and the common species found are Khair, Hivar, Hankal, Aroni, Apta, Bor, Babhul and Neem. These forests have extensive grassy areas in undulating places. Sale of Tendu leaves and grass in plantation areas are the items of income to Forest Department.

Irrigated, Un-irrigated and Culturable Waste Areas

The district has an area of 1,418,591.08 hectares. The cultivable area constitutes 93.42 per cent of the total area. The culturable waste and forest claim 6.76 per cent and 0.35 per cent respectively of the total area of the district. Within the district Osmanabad tahsil has the largest cultivable area (97.69 per cent). Ausa ranks second with a cultivable area of 97.01 per cent. The proportion of cultivable area to total area is given in respect of each tahsil in Table 20.

TABLE 20

Distribution of villages according to the land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Osmanabad	115	129,399.45	97.69	3.64
2	Kalamb	119	131,858.00	93.06	5.16
3	Latur	116	94,497.99	95.65	1.03
4	Ahmadpur	214	159,652.00	90.45	1.08
5	Udgir	184	146,757.15	94.74	0.83
6	Nilanga	192	128,957.85	95.67	1.32
7	Ausa	125	121,798.06	97.01	1.91
8	Umarga	133	140,057.15	93.18	3.39
9	Tuljapur	120	162,340.22	92.18	4.60
10	Paranda	115	113,636.04	88.69	8.13
11	Bhum	94	89,637.17	89.14	7.85
	Total of all tahsils ..	1,527	1,418,591.08	93.42	3.34

As would be seen from the same table, the proportion of irrigated area to total cultivable area in the district stands just at 3.34 per cent. Within the district the largest irrigated area (8.13) has been found in Paranda tahsil and the least (0.83 per cent) in Udgir tahsil.

Staple Food

As would be seen from Table 21, wheat and jowar comprise the staple food in almost all the tahsils of the district. Nilanga is the only exception where jowar and bajra are the staple food of the people.

TABLE 21

Main staple food in the majority of villages in each tahsil

Serial No.	Name of the tahsil	Main staple food
1	Osmanabad	Wheat, Jowar
2	Kalamb	Wheat, Jowar
3	Latur	Wheat, Jowar
4	Ahmadpur	Wheat, Jowar
5	Udgir	Wheat, Jowar
6	Nilanga	Jowar, Bajra
7	Ausa	Wheat, Jowar
8	Umraga	Wheat, Jowar
9	Tuljapur	Wheat, Jowar
10	Paranda	Wheat, Jowar
11	Bhum	Wheat, Jowar

Municipal Finance

Table 22 reveals the per capita receipts and expenditure in respect of all the towns of the district. The average per capita receipt is Rs. 57.22. Of this Rs. 28.12 are realised through taxes and the remaining Rs. 29.10 from all other sources. The highest per capita receipt of the order of Rs. 86.12 has been found in Osmanabad town and the lowest of Rs. 27.89 in Murum town. The per capita expenditure is Rs. 53.03. Out of this general administration claims Rs. 8.87. Expenditure on public health and conveniences works out to Rs. 17.28 Rs. 12.17 is the expenditure on pubic works. Expenditure on public institutions and other aspects stands respectively at Rs. 1.72 and Rs. 12.99. It may be seen that though Osmanabad has the highest per capita income, it is Kalamb town that has the highest per capita expenditure (Rs. 72.32).

TABLE 22

Minerals

The district does not possess any minerals of significance. The minerals, however, found are limestone, clay, sand and stone.

Fisheries

The district is not greatly blessed with fluorial water and it is drained mainly by the Maryia and the Sina rivers. It is these two rivers only that have the scope for the development of fisheries activity. Needless to say, the reservoirs built for irrigation facilities under Five Year Plans have enhanced the prospects of fisheries in the district. There are a few perennial tanks also. Existing resources in the district are 73 irrigation tanks and 271 Zilla Parishad tanks. Water spread area covered by the tanks 7,760 hectares. Pisciculture in all these rivers reservoirs and tanks has been taken up on scientific lines and efforts are made by the fisheries department to exploit the available water resources for this purpose. Commercially important varieties of fish found in the district comprise of Chela, Gane or Kanheri, Potiah/ Gadar/Karveri, Kolus, Mahaseer, Poshti, Tambir, Gurutchi, Teli/Mura/Banta, Waghoor, Singhee, Padim, Ganguli Shingula, Shingata, Tengra, Bodh Masa, Ahir, Phool Murrel, Bhadkya, Botri, Bilona and Chandri.

Industries

May be due to inadequate supply of cheap electric power and transport facilities, there has been no industrial development of significance in the district. The only large scale industries using power are two sugar factories, one spinning mill, one dairy project and one oil mill. Some more large scale units coming up are in the field of moped, spinning and sugar. In addition to these there are some small scale indusrties manufacturing confectionary, oil, oil cakes, hand made paper, chemical manures, engineering goods, rubber and plastic goods and tanned leather etc.

Trade and Commerce

The goods and commodities exported from the district comprise of hides, handmade paper, leather, jowar and milk. On the other hand the district imports machinery, stationery, raw iron, cotton cloth, wheat and groceries (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
IV Ahmadpur (M.Cl)	Tanned leather	Hides	Groundnut
IV Ausa (M.Cl)	Handmade paper, Khadi cloth	Handmade paper	Stationery
IV Bhum (M.Cl)	Milk products	Jowar	Wheat
IV Kalamb (M.Cl)	Confectionery	Leather	Machinery
I Latur City (M.Cl)	Hydrogenated oil	Gur	Groundnut
IV Murum (M.Cl)	....	Jowar	....
V Naldurg (M.Cl)	Chemical manures	Milk	Food grains
IV Nilanga (M.Cl)	Handloom cloth	Groundnut	Jowar
III Osmanabad (M.Cl)	Enginnering goods, Rubber and Plastic goods.	Textiles	Raw Iron
IV Paranda (M.Cl)	Sweet oil	Jowar	Tur seeds
IV Tuljapur (M.Cl)	Rice	Jowar	Grocery
II Udgir (M.Cl)	Iron pots, furniture	Jowar	Raw cotton
IV Umarga (M.Cl)	Leather	Groundnut oil	Groundnut

Handarguli, Deoni, Latur, Kalamb, Osmanabad, Udgir, Ahmadpur, Nilanga and Murum are important trade centres for collection and export of agricultural produce. Latur is the most important trade centre. Its annual turn overs are highest in the district. It is followed by Osmanabad.

Places of touris'ts importance

Andora.—The place is known for an ancient shrine of Khandoba. Legend goes that Sankar descended on earth in Khandoba incernation to destroy two demons, Pani and Palla, who were harassing the innocent inhabitants. He killed the two demons with a 'Khadga' (Sword) and the diety came to be known as Khadgoba which later degenerated into Khandoba. The temple held 'inam' lands from Chhatrapati Sahu. The diety is held in deep veneration by the village folk and on Sundays many devotees pay visit to the temple. All the major Hindu festivals are celebrated at the temple. The temple premises are also used for solemnising marriages and other ceremonies.

Ausa.—In Ausa the centre of attraction is a huge historical fort covering a little over five hectares of land. The fort is situated in a depression surrounded by high grounds on all the sides so that from its highest point one can have a view of the approaching armies even at a great distance while the main parts remain hidden from the latter. Almost square in shape, the fort has a moat or 'Khandakh (ditch)' around, nearly 36.58 metres in width, now nearly dry, some parts of it being used for washing, bathing and some for growing crops.

Another attraction of the town is the temple of Virnath Malkenath Maharaj. In the temple there is a 'mandap' hall 35 feet square with a sort of platform on the sides. It is lined with ten pillars bearing some fine carvings. The arches formed in between these pillars are similarly decorated. Above, is a double storey of galleries lined with smaller pillars forming some 30 arches on each storey. These pillars and arches are also ornamented with designs.

A fair beginning from 'Jyestha Sudha Dvadashi' and lasting for 7 days is held at this temple and is attended by over 20,000 people.

Kate.—Kate is famous for Kanithesvar temple, Cincubai's Vihar and Jamia masjid. Situated on the western fringe of the village, the 'Hemadpanthi' shrine of Khanthesvar is held deeply in reverence by village folk.

In the environs of Kate is a square shaped well known as Cincubai's Vihar. It is said to be quite ancient. The

village folk use the well water for cooking on auspicious occasions in the credulous belief that the food would fall short otherwise.

The Jamia masjid is said to have been built during the reign of Aurangzeb. The mosque is the most attractive of all the objects in the village. It stands in the centre of a huge courtyard encircled by 180′ x 150′ protective wall with 15 feet square water tank in its front. The entrance approached by a small tapering flight of five steps is crowned by two shapely minars. A rounded dome adorned with a crescent and four minars in the four corners, crown the top of the mosque. The construction of the mosque building is in the traditional Mohammedan style and, though a little over two centuries old, is in a good state of repair.

Latur.—The place has temples dedicated each to Siddhesvar, Ram Lingesvar, Papvinasa Bhutesvar, Rama, Kesavraj, Datta and Ambebai. Of these the first is the most important believed to have been bulit during the reign of Tamradhvaji presumably of Puranic times. Here, a fair is held for 9 days on Mahashivratra and is attended by over 20,000 people from all over Marathvada and many other places.

Naldurg.—Naldurg is renowned for its fort. Ibrahim Adil Sah II constructed a dam across the river Bori to supply the fort garrison with water and also built the ' Pani Mahal ' for his own pleasure. ' Pani Mahal ' is the major attraction in the fort and during the monsoon the over flowing waters of the river pass from over the palace, but the arrangement is such that it does not enter inside. It calls for a tribute to the engineering skill of the builder. Hardly one and half kilometres from Naldurg, on high banks of Bori, its eminent picturesque scenery and over looking it are three temples dedicated to Rama, Mahadev and Hanuman. It is supported by ' Anand Ramayana ' that the temples have been built on the spot where Rama in exile had halted on his way to Naldurg from Akkalkot. And to prove this, his foot prints are shown on a shaft of a rock.

Another important feature of the town is the yatra of ' Khandoba ' in whose honour a shrine has been built. It is popularly believed that ' Khandoba ' came down to Naldurg from a village ' Mailar ' by name on account of the devotion of ' Damayanti ' to be celebrated as ' Nala Damayanti Romance '. A yatra is attended by over 25,000 persons held on ' Pausa Suddha Paurnima ' in honour of the diety and lasts for fifteen days.

Osmanabad.—Osmanabad is the district headquarter, and only second to Latur in size as well as in other aspects including trade and commerce. This inhabition of growth may be attributed to lack of railway connections which has proved to be a major handicap. Of many Hindu shrines that of "Dhrutarashtra Nagesvar" claims antiquity as well as religious importance. Situated on the banhs of Bhogavati, it is said to be the 108th and the last trith on the hilly place along the Bhogavati from its source somewhere in the hills of ' Dharasiv ". Another place of importance is Dargah of Khvaja Samsuddin at which a largely attended urs is held in the month of Rajab. A persian inscription in the ' Dargah ' gives the date of Khavaja's death as 720 hijri. Said to have been erected during the period of Mohammad-Bin-Tughlug, the Dargah stands in the midst of the courtyard having entrances on three sides. Dargah looks majestic and is excellent specimen of mediaeval Mohammedan sculpture.

Tuljapur.—The famous temple of Tulja Bhavani is at Tuljapur town of Osmanabad district which is a taluka place. Tulja Bhavani is not only the goddess of Maharashtra but she is also the ' KULSWAMINI ' of Hindu families of other states. Thousands of people from Karnataka, Andhra, Tamil Nadu and other states come to Tuljapur for pilgrimage during the whole year. Tulja Bhavani, therefore, is considered and reverred as the mother Goddess of the whole India.

Tuljapur is 22 kms from Osmanabad district headquarter and 45 kms. from Solapur district headquarter. Solapur is the railway station on Bombay-Madras broad guage line. Pilgrims from Bombay and Madras side can approach Tuljapur by railway upto Solapur. From Solapur there is regular bus service of Maharashtra State Transport and journey is of about one hour. Yedshi is another railway station which is about 40 kms from Tuljapur situated on Latur-Miraj narrow guage line. From Yedshi also there are regular buses to Tuljapur run by M.S.R.T.C. Thousands of pilgrims visit Tuljapur during ' NAVRATRA ' and Dassera festival for the darshan of Tulja Bhavani. Tulja Bhavani was also the goddess of Chhatrapati Shivaji Maharaj. It is said that she gave the famous Bhavani Sword to Shivaji. Recently the tourism Department of Government of Maharashtra has started a tourist home for tourists. In addition to this there are Dharmashalas, Lodges and ashram for pilgrims and also a Government Rest House.

Kunthalgiri.—Kunthalgiri is famous for Digamberpanthi Jain temple in Bhum taluka of Osmanabad district. There are direct buses from Solapur *via* Osmanabad. Thousands of persons belonging to Jain Pantha from all over India visit this holy temple.

Thair.—Thair village in Osmanabad taluka is favour from the point of view of archeology. This is the native place of saint Goroba Kumbhar. There is is temple of Gora Kumbhar and thousands of pilgrims visit Thair to have a darshana of the ' Samadhi ' of Gora Kumbhar, during Chaitra and Kartih (Marathi) months. There is also a temple of Trivikrama. From the archeological point of view Thair is very famous. There is a museum of State archeological department. From the articles available in the museum it is said that there was direct trade with the Greek and Roman countries from Thair.

Paranda.—There is a famous historical fort at Paranda which was the capital of Nizamshahi emperior. It is

said that the famous Malikmaidon Gun kept at present at Bijapur fort originally pertains to Paranda fort. The same was shifted to Bijapur by Adilshahi commander Murar in 1632 A.D. Besides, this there is a Math of Shri Hansraj Swami a famous saint poet of 18th century.

Udgir.—There is a famous historical fort at Udgir. There is also a samadhi of Udgir Buva in the fort.

Nilanga.—At Nilanga there is a famous Dargha of Peer Quadri from 17th century. There is also a famous temple of Nilkantheshwar i.e. Mahadev built in 12th to 13th century.

Ahmadpur.—In Ahmadpur, taluka Malegaon is famous for Khandoba temple. Khandoba Yatra at Malegaon was famous for horse market. Besides, the above historical and religious places there are Jain and Brahmin caves pertaining to 5th to 6th centuries. At Kharosa village of Nilanga taluka also there are Brahmin and Budha caves.

Sonari Temple.—At Sonari village in Paranda taluka there is a famous Bhairavnath temple.

Domgaon.—A Domgaon village of Paranda taluka there is a sacred place of a disciple of Samarth Ramdas.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory.

The ' Village Directory' gives the list of villages, their area, population, amenities such as educational ,medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available, there will further help the readers in identifying any village in the tahsil.

'Village ' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The " un-inhabitated " villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included:—

Appendix (*i*) Tahsilwise abstract of educational, medical and other amenities;

Appendix (*ii*) Land utilisation data for census towns;

Appendix (*iii*) Tahsilwise list of villages with no amenities available, and

Appendix (*iv*) Tahsilwise list of villages according proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Columns 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in Km^2.

Column 4, which gives population and the number of house holds in each village has been introduced for 1981 census to examine the correlation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village, a dash(—) is shown in the column and next to it, in brackets the distance from the village in broad ranges viz., upto 5 km., 5-10 km. and 10 + km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/-junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskritpathshala, senior basic school, makhtab etc.].

If in a village, secondary school has middle and primary classes also the same has been counted as three schools i.e secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets agains

the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities:

Primary or Secondary School	P
Junior Secondary or Middle School	M
Matriculation or Secondary School	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC).	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C
Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6, provides data on medical facilities available in the village. If in a village no medical facility is available ' dash ' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5-10 kms and above 10 kms. of the nearest place where the most modest medical amenity such as dispensary/community health worker is available; has been indicated. Various types of medical institutions included and codes used for them are as follows :

Houspital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-Centre	PHS
Dispensary	D
Family Planning Centre	FPC
T.B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village—

Tap water	T
Well water	W
Tank water	TK
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	N.A.

Column 8, shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9, gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-wekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail, and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and back-water etc.).	NW

Column 11, refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Waterway (Other than river or canal).	NW
Foot Path	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for All purposes listed above	EA

In case the power supply is released only for specific purpose say agriculture or other it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation:—
  (*a*) lands put to non-agricultural uses.
  (*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land.
  (*a*) permanent pastures and other grazing lands.
  (*b*) lands under miscellaneous tree crops and grooves not included in the net area sown.
  (*c*) culturable wastes.

(4) Fallow lands :—
  (*a*) fallow lands other than current follows.
  (*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or un-cultivated land.

Column 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e.g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)	WE
Tube Well (without Electricity) ..	TW
Tube Well (with Electricity) ..	TWE
Tank	Tk
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other grooves for fuels etc., which are not included under orchards or forest, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

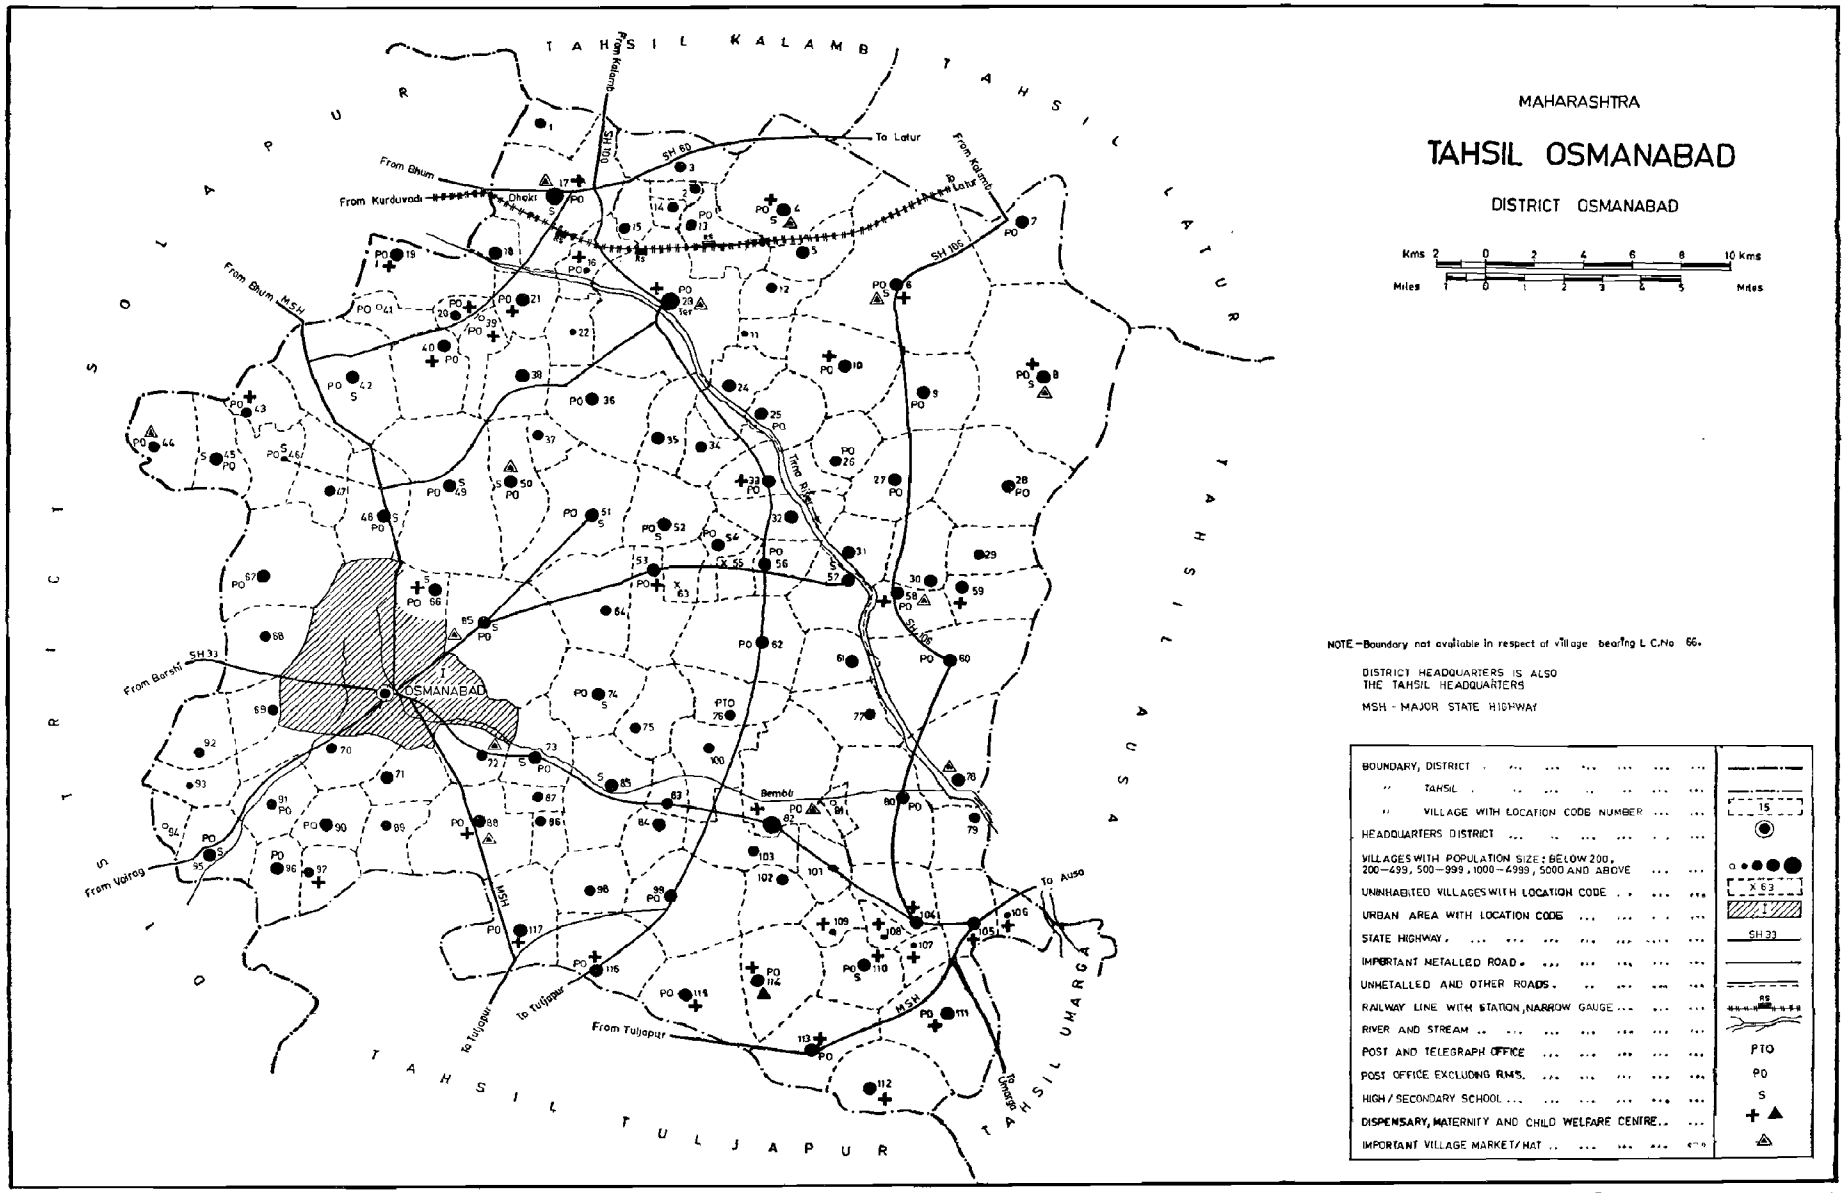

N .. Copies of Newspapers coming in the village.

M .. Motor cycles/scooters available in the village.

C .. Cars/jeeps available in the village.

T .. Tractors available in the village.

PS .. Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note explaining the Abbreviations used in Town Directory

The ' Town Directory ' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry, and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this columns has been introduced to facilitate the analysis of town directory data at the State and the National level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town :—

Municipal Corporation/Corporation	M.Corp.
Municipality	M.
Municipal Council	M.Cl.
Non-Municipal	N.M.
Cantonment Board/Cantonment ..	C.B.
Notified Area/Notified Area Committee/Notified Committee.	N.A.C.
Census Town	C.T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in Km, number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the State and the National level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director-General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the State, District and Tahsil headquarters and the nearest city (Urban area with a population of 1,00,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amentities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage number of latrines and method of disposal of night soil.

Code used are :—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt
Head Loads	HL
Baskets	B
Wheel Barrows	WB
Septic Tank Latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and

capacity under column 13. For stating this information following codes have been used :—

Overhead Tank	OHT
Service Reservoir	SR
River Infiltration Gallery ..	IG
Borewell pumping system ..	BWP
Pressure Tank	PT
Tubewell water/Hand pump ..	TW
Tap water	T
Well water	W
Tank water	TW

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (i.e. class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes:—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	FC
T. B. Clinic	TB
Nursing Home	NH
Ayurvedic	A
Unani	U
Homoeopathic	Hom
Others	O

In case more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only ..	AC
Combined for all categories— Arts, Science and Commerce.	ASC
Law	L

Column 10 pertains to the number of recognized shorthand, typerwriting and vocational training institutes (grouped as others) which include applied art/ painting college, pharmacy college, B.Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are :—

Shorthand	SH
Typewriting	Type

Keeping in view the 'Minimum Needs Programme' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Column 17 to 20 show. recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town Information on number of banks available in the town. appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Note.– The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsil in the State Land Records Department. The total areas, as also the rural areas, for the tahsils in the district may not, therefore, strictly add up to the corresponding figures shown against the district.

Names of towns treated as such for the first time in 1971 which continue as towns in 1981 have been marked with an asterisk (*).

APPENDIX TO DISTRICT URBAN PRIMARY CENSUS ABSTRACT
