POCHAMPAD PROJECT

Pochampad Project across the River Godavari is a multipurpose major irrigation project being constructed in Nizamabad district. The project site is situated about three miles upstream of Soan Bridge across Godavari River on Hyderabad-Nagpur National Highway at its 125th mile near Doodgaon, a village in Armur taluk of Nizamabad district. The foundation for the project was laid by Prime Minister Sri Jawaharlal Nehru on 26-7-1963.

The Godavari River at the project site forms the boundary between Nizamabad and Adilabad districts. The dam and the flood banks, therefore, extend over both the districts on either side. The right flank of the flood bank lies in the villages of Nallur and Mupkal of the Armur taluk of Nizamabad district and the left flank lies in the villages of Yellamalla and Pochampad in Nirmal taluk of Adilabad district.

This irrigation-cum-power project consists of a masonry dam of 2,550 ft. length and an earthen dam of 41,300 ft. and excavation of canal system to irrigate Nizamabad and Karimnagar districts. The height of the dam will be 1,108 ft. above sea level. The water spread area of the reservoir at MFL+1,093.00 is 174.90 Sq. Miles (1,11,936 acres) submerging 64 villages of which 28 are in Nizamabad district and 36 in Adilabad district. The project will have a capacity to store 112.0 TMC ft. of water and will benefit an extent of 5.70 lakh acres. One third of this ayacut constitutes the extent under wet cultivation and the remaining two thirds is dry. The estimated cost of the project is about Rs. 90.25 crores (Revised) and is expected to be completed by 1975.

It is anticipated that the project on its completion will yield 10.6 lakh tons of food grains valued at Rs. 73.60 crores. Besides, 36.0 million watts of electricity are expected to be generated.

A unique feature of the Pochampad Project is the utilisation of its water for irrigation even during the early stages of its construction. It is expected to solve to a large extent the perpetual food problem of the area where " the cultivators seldom reap a paying harvest and do not even get what they spent due to the frequent failures and scarcity of rains in the crop period ". Verily this project that had been dreamt of and demanded by the people is a major achievement of the decade.

PREFACE

The District Census Handbooks which were first published at the 1951 Census proved to be very useful to the State and Central Government Departments, private agencies and academic bodies like Universities and Research Institutions. The scope of these Handbooks was enlarged to make them more useful during the 1961 Census. Considering the delay in the publication of these Handbooks due to difficulties in finding suitable presses which could undertake huge printing work of this kind, it was considered desirable to split up the 1971 Census Handbooks into three parts viz., Part A–Village and Town Directory, Part B–Village and Town Primary Census Abstract and Part C–Analytical Report, Departmental Statistics and District Census Tables. This was done mainly with a view to publishing Parts A and B which contain not only the population data upto the village and town level but also the particulars about the basic amenities *etc.*, available in the towns and villages, as early as possible for public use. The scope and contents of these three parts are elaborated in the introduction of this volume. I am glad to record here that Parts A and B of the 1971 Census Handbooks of all the 21 districts in the State have been finalised already and I expect that before the end of 1973 Parts A and B for all the 21 districts would have been published.

The compilation of these Handbooks is being done from the 1951 Census in the Office of the Director of Census Operations while the cost of paper, printing, *etc.*, required for these volumes is being borne by the State Government. The Andhra Pradesh State Government have readily agreed to bear the cost of printing and paper for the 1971 Census Handbooks. I am grateful to the Andhra Pradesh State Government and in particular to the Additional Chief Secretary to the Government of Andhra Pradesh, Shri S. A. Quader, IAS., for their co-operation and encouragement. I am thankful to the Director of Printing, Government of Andhra Pradesh for assisting me by selecting suitable presses for undertaking the printing of the Handbooks. The data presented in the Village and Town Directories are obtained from different State Government and Central Government Departments but for whose co-operation Part—A of the Handbooks could not have been compiled. I am thankful to all of them for furnishing me the required data.

I am extremely grateful to Shri A. Chandra Sekhar, I.A.S., Registrar General, India and Dr. Roy Burman, Deputy Registrar General, India who formulated the contents of these Handbooks in detail and rendered spontaneous help and encouragement to me at all stages.

The following staff of my Office worked on the present volume of Nizamabad District Census Handbook under the guidance and supervision of Shri P. S. R. Avadhany, Deputy Director of Census Operations and Sri K. Narasimha Murthy, Assistant Director of Census Operations of my Office.

Sri P. B. Sunder Raj, Tabulation Officer „ T. Brahmiah, Statistical Assistant	Drafting, Scrutiny and Supervision of Printing
Kumari B. Tarakeswari Rao, Computor Sri V. Babu Rao, Assistant Compiler „ S. Ramakrishna, Assistant Compiler „ P. V. Prabhaker, Assistant Compiler	Compilation
„ J. Venkateswara Rao, Proof Reader „ K. Vijendra Rao, Computor	Proof Reading
„ A. Venkateswara Rao, Assistant Compiler	Scrutiny & Printing of Maps

Sri M. N. Ram Mohan, Artist	Supervision of Mapping work
,, Syed Ahmed, Senior Draughtsman	
,, M. J. Sadiq, Draughtsman	
,, N. G. Swamy, Draughtsman	
,, Moinuddin Hassan, Draughtsman	Preparation of Maps
,, M. Shankariah, Draughtsman	
,, Md. Yakub Ali, Draughtsman	
,, B. Raghuram. Draughtsman	
Smt. Daya Saxena, Draughtsman	

I am grateful to their services.

I trust that this humble effort on the part of the Census Organisation would meet with the appreciation it deserves.

INTRODUCTION

GENERAL BACKGROUND OF THE DISTRICT CENSUS HANDBOOK

District Manuals and District Gazetteers

Prior to 1905, the erstwhile composite Madras Government compiled and published a District Manual for each district. It contained not only particulars of items of more or less a permanent character such as physical characteristics, history, religion and ethnography but also a few statistical tables including those relating to population which became obsolete within a few years of their publication. The Madras Government, therefore, replaced these District Manuals by another publication known as the District Gazetteer consisting of two Volumes 'A' and 'B'. Volume A contained descriptive matter and such general tables as might be necessary to explain the text and Volume B contained detailed statistics. They decided that Volume B should be brought out periodically after each decennial census so that they contain the latest statistics. Volume A was published for some districts between 1905 and 1927 in the composite Madras State. The publication of Volume A was discontinued in 1927. Volume B was published for all the districts of the composite Madras State between 1906 and 1915. The publication of Volume 'B' was also stopped after 1931 Census. Due to the II world war, the District Gazetteers were not published after the 1941 Census.

In the erstwhile Hyderabad State also the Gazetteer Volumes were brought out for some of the districts.

The scheme of publication of revised District Gazetteers was started in 1958 by the State Governments and in this State, the Gazetteers of some districts like Cuddapah and Anantapur have been published already.

The Village Statements

Apart from these District Manuals and Gazetteers the census data upto village level used to be published in a brochure called "Village Statement" for each district immediately after every census from 1872 upto 1941.

The Village Statements merely showed the number of occupied houses and population by religion of each village and town and they did not contain any more details. From the 1951 Census, Village Statements were replaced by the District Census Handbooks.

District Census Handbooks

The idea of compiling the District Census Handbooks for each district in place of Village Statements was first entertained and put forward at the 1951 Census by Sri R. A. Gopalaswamy, I.C.S., the then Registrar General, India and *ex-officio* Census Commissioner of India as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the District Census Tables and Census Abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume called the "District Census Handbook" and suggested to the State Governments that the Handbook with or without the addition of other useful information relating to the district should be printed and published at their own cost, in the same manner as the village statistics of the past censuses. This suggestion was accepted by most of the State Governments. Both the composite Madras State and the erstwhile Hyderabad State accepted this suggestion and published the District Census Handbooks for all districts at their own cost. In the erstwhile Hyderabad State, the District Census Handbooks were brought out in two Parts, Part I containing Administrative Statistics and Part II the Census Tables. In the composite Madras State, the Handbooks were brought out in one single volume only for each district.

Pattern at 1961 Census

At the 1961 Census, the scope of the District Census Handbooks was significantly enlarged by Sri Ashok Mitra, I.C.S., the then Registrar General, India. The District Census Handbooks of 1961 Census of Andhra Pradesh were divided into four parts. The first part contained narrative description of the Physical features, History, Social, Economic, Demographic characteristics, the progress made in each field of administration over the past decades and a brief gazetteer of places. The second part contained the Administrative Statistics of various departments. The third part contained the 1961 Census Tables *viz.*, General Population Tables, Economic Tables, Cultural and Migration Tables, Special Tables on Scheduled Castes and Scheduled Tribes. The fourth part consisted of Village and Town Directory which was the most vital part of the Handbook, giving villagewise and townwise Primary Census Abstract *i.e.* particulars of area, households, population, Scheduled Castes, Scheduled Tribes, literates, broad categorisation of working population, etc.

Important amenities such as educational, medical, public health and communication facilities available were also indicated against each village and town. Nine Sub-Tables containing villagewise particulars such as irrigation sources, important crops raised, value of land, co-operative societies, industrial establishments, police stations, list of skilled craftsmen, etc. were given after Village and Town Directory. A tabular statement on Fairs and Festivals in the district was given at the end of the volume. All these four parts were bound in a single volume and published at the cost of the State Government.

Pattern at 1971 Census

The District Census Handbooks proved to be very useful and valuable publications and had considerable demand by public as well as the official users of the census data. At the 1971 Census, it was therefore, decided not only to continue the publication of the District Census Handbooks but also to enlarge its scope further.

At the last Census, there was some delay in the publication of the District Census Handbooks due to the inadequate printing facilities. In order to avoid delay in publication & also to make available the more important census data to the planners, administrators, and other users who may be not only eager but in dire necessity to use the information in their respective spheres, it has been decided to bring out the District Census Handbooks in three parts *viz.* Part A, Part B and Part C. Part A contains Village and Town Directory. Part B contains Village and Town Primary Census Abstract. Part C contains Administrative Statistics and Analytical Report. Parts A and B of the District Census Handbooks of this State are being brought out in one volume and Part C will be brought out in a separate volume for each district a little later.

A brief outline on the scope of each of these three parts is given below.

Part A : Village and Town Directory

In this part, the Village Directory is given first and then the Town Directory.

Village Directory : It is arranged talukwise and gives for each village, particulars of amenities available in respect of educational and medical institutions, power and drinking water supply, post and telegraph facilities, communications, particulars of land use, markets, places of religious, historical or archaeological interest in the village.

Town Directory: The Town Directory portion contains data in seven statements. Particulars like the civic administration status, its origin, the growth and decline of its population, functional category, physica aspects and location, municipal finances, civic and other amenities, medical, educational, recreational and cultural facilities, trade, industry, commerce and banking facilities and lastly the religious composition of the town and the Scheduled Castes/Tribes population inhabiting are presented in seven statements. They are given for each town in the district arranged in alphabetical order.

Part B : Primary Census Abstract

This part gives for each revenue village and also for each enumerator's block and ward of a town, the Primary Census data *i.e.*, area, occupied residential houses, number of households, total population and its break up by sex, Scheduled Castes, Scheduled Tribes population, literate population, working population by nine broad categories of cultivators, agricultural labourers, those working in livestock, forestry, fishing, plantations etc. in mining and quarrying, in manufacturing, in construction, in trade and commerce, in transport, storage and communications and in other services and the non-working population as per the 1971 the Census.

Part C : Administrative Statistics and Report

This part comprises the various administrative statistics pertaining to the district with special reference to the development taken place during 1961–70 in different spheres and also the 1971 Census Tables relating to the General Population, Economic Characteristic, Cultural and Migration features, Housing and Establishment tables and data pertaining to the district regarding language and religion. A write up, indicating the changes in the socio-economic and demographic characteristics of the district and the developmental activities that have taken place in the decade in the various fields like Agriculture, Industries, Trade and Commerce, Education, Medical and Public Health, Community Development etc., is given at the beginning of this part. In view of the elaborate write up already given in the 1961 District Census Handbooks, the present write up will be brief and it will cover the present decade only.

Rural and Urban classification of areas

It is customary to classify the population of every country at a census as Rural and Urban. Such a classification has considerable significance and is necessary from the point of assessing the differentials in the social, economic, cultural and demographic characteristics of the population. Hence at the beginning of each census, the criteria for treating a place as town (*i.e.* urban) or

rural are evolved and the areas are then classified accordingly as per the definition so evolved.

From the year 1891, the Census definition of a town in this country was more or less the same till 1941 and it was slightly modified in 1951. The towns broadly comprised all Municipalities of whatever population and every other continuous collection of houses, permanently inhabited by not less than 5,000 persons, which the provincial Directors of Census Operations having regard to the character and relative density of population, their importance as centres of trade decided them to be towns. In the application of this definition there was some variation from State to State according to the local conditions. It was only at the 1961 Census that a fairly strict definition was sought to be applied throughout the country in order to determine a place as an urban unit. The same definition was followed at the 1971 Census also. The following criteria are adopted for treating a place as a town at the 1971 Census.

1 All places with a Municipality, Corporation or Cantonment or Notified Town Areas, and

2 All other places which satisfied the following criteria:
(*a*) a minimum population of 5,000
(*b*) a density of population of at least 1,000 persons per Sq. mile (400 persons per Sq. Km.) and
(*c*) at least three fourths (75%) of the male working population is non-agricultural.

In respect of marginal cases, the Directors of Census Operations of the States were given discretion to decide a place as town or village.

The Towns are distributed into six classes as detailed below :—

Classification of Towns		*Population size*
Class I	..	1,00,000 and above
Class II	..	50,000–99,999
Class III	..	20,000–49,999
Class IV	..	10,000–19,999
Class V	..	5,000– 9,999
Class VI	..	Below 5,000

The Class I Towns are termed as Cities.

Besides classification of all places into Rural and Urban areas, two new concepts *viz.* Urban Agglomeration and Standard Urban Area were newly evolved at the 1971 Census. They are briefly explained below.

Urban Agglomeration

In several areas around a core city or statutory town have come up fairly large and well recognised Railway Colonies, University Campuses, Port areas, Military Camps etc. Even though they are outside the statutory limits of a Corporation, Municipality or Cantonment, they fall within the revenue boundary o the place by which the town itself is known or in the revenue boundary of the neighbouring village. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units and at the same time each such individual area by itself may not satisfy the minimum population limits to qualify to be treated as an independent town. Such areas deserve to be reckoned along with the main town and the continuous spread including such urban outgrowth would deserve to be treated as an integrated urban area. At the 1971 Census such continuous urban spreads have been treated as integrated urban areas and defined as Urban Agglomerations. This concept of Urban Agglomeration replaced the concept of Town group followed in the 1961 Census. Urban agglomerations can be constituted in the following situations:

(*a*) A city with continuous outgrowth (the part of outgrowth being out of the statutory limits but falling within the boundaries of the adjoining village or villages).

(*b*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (*a*) and

(*c*) A city and one or more adjoining towns with their outgrowths all of which forming a continuous spread.

Thus the Urban Agglomeration represents wholly the urban population only. In Andhra Pradesh, the following four places are treated as Urban Agglomerations.

Name of the Urban Agglomeration	*Constituent units in the Urban Agglomeration*
(1)	(2)
1 Visakhapatnam Urban Agglomeration	(*a*) Visakhapatnam City (i) Visakhapatnam Municipality. (ii) Gajuvaka (Outgrowth) (*b*) Gopalapatnam
2 Rajahmundry Urban Agglomeration	(*a*) Rajahmundry Municipality (*b*) Rajahmundry Non-Municipal Area

Name of the Urban Agglomeration	*Constituent units in the Urban Agglomeration*
(1)	(2)
3 Vijayawada Urban Agglomeration	(*a*) Vijayawada Municipality
	(*b*) Patamata Town
	(*c*) Gunadala Town
4 Hyderabad Urban Agglomeration	(*a*) Hyderabad Municipal Corporation
	(i) Hyderabad Division
	(ii) Secunderabad Division
	(*b*) Secunderabad Cantonment
	(*c*) Malkajgiri
	(*d*) Alwal
	(*e*) Uppal Khalsa
	(*f*) Balanagar
	(*g*) Fatehnagar
	(*h*) Machabolarum
	(*i*) Osmania University
	(*j*) Lalaguda
	(*k*) Kukatpally
	(*l*) Moosapet
	(*m*) Bowenpalle
	(*n*) Zamistanpur

The Standard Urban Area (S.U.A)

The concept of the Standard Urban Area has been evolved for the first time at the 1971 Census to give out a more meaningful picture of the urban growth. The town-group concept adopted at 1961 Census did not effectively tackle the problems involved in reporting urban statistics apart from lacking a uniform application throughout the country. It also did not bring out a spatially contiguous territory of urban-rural settlements but merely bound up loosely clustered population popularly known as the satellite towns or the constituent units whose jurisdictions were subjected to frequent changes and thus lacked in stability. The intervening rural areas were also left out of the account. Consequently the conclusions drawn became not only invalid over a time but also lost spatial comparability with similar data processed both within the country and outside. These short-comings reduced considerably the utility of the town-group concept which was also found somewhat inadequate for the purpose it was developed. To enable the presentation of urban statistics on a uniform basis and also to ensure comparability of the census data from one decade to another and with similar data available from other countries, the concept of Standard Urban Area has been envisaged and adopted at the 1971 Census.

The Standard Urban Area is defined as the projected growth area of a city or town as it would be in another three decades taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. The tract includes all extra Municipal urban outgrowth such as the suburbs (industrial and residential), Railway Colonies, Civil Lines, Cantonments and also such of those villages that are likely to be urbanised during the next three decades. The Standard Urban Area is thus an area which extends well beyond the chief core city or town and contains all likely developments over the next 30 years. It will remain a statistical reporting unit for the next three successive censuses, irrespective of the jurisdictional changes of the local administrative units within the tract. The Standard Urban Area will be identified by the administrative units that it encompasses namely the city, the town, the village. The boundaries of the Standard Urban Area will be the administrative boundaries of the peripheral units.

In demarcating the Standard Urban Area the following criteria are followed:

(*i*) The core town should have a minimum population of 50,000,

(*ii*) The contiguous areas should be made up of other urban as well as rural administrative units having close and mutual socio-economic links with the core town and

(*iii*) The entire area included in the Standard Urban Area is likely to be urbanised in a span of two to three decades.

In Nizamabad District, only Nizamabad Town with its surrounding villages is treated as a Standard Urban Area.

PART A

VILLAGE AND TOWN DIRECTORY

SECTION I Village Directory

SECTION II Town Directory

SECTION I

VILLAGE DIRECTORY

The main purpose of the Village Directory is to indicate the available important facilities like educational, medical, drinking water supply, communications and electricity supply in each village. The collection and presentation of such data was first attempted at the 1961 Census and the different facilities available were shown by abbreviated letters under five columns along with the Primary Census Abstract. But at the 1971 Census it was decided to present such particulars in greater detail in the Village Directory and to give the Primary Census Abstract separately. Besides presenting the data on basic amenities like educational, medical, electricity, drinking water supply, communications, posts and telegraphs, the particulars about the staple food commonly used by the majority of the people, land utilisation, the name and distance of the nearest town, the market/shandy days, historical or religious or archaeological or tourist importance, if any, of the villages have also been collected and presented in the Village Directory. The Villagewise Primary Census Abstract is presented separately in Part B of this Volume.

In the Village Directory, the revenue village is taken as the lowest unit for presentation of data. The villages are arranged in the ascending order of Location Code Numbers assigned to the villages. Unlike the Town Directory the Village Directory contains only one statement. An Alphabetical List of villages with the Location Code Numbers against them is given at the beginning of the Village Directory and Primary Census Abstract of each taluk. This facilitates the reader to select the required village from the Alphabetical List and after knowing its Location Code Number, to obtain the necessary particulars from the Village Directory. The Village Directory is broadly divided into four broad sections *viz.*, location particulars, basic amenities like educational, medical, etc., land utilisation and distance from urban area and the importance of the village as a religious or tourist centre.

Columns 1 to 3 deal with the location code number, name and the total area of the village. The area given under Col. 3 is as per the data furnished by the Tahsildar and the State Survey Department. Columns 4 to 9 give the basic amenities available in the village such as the educational, medical, electricity, drinking water, communications and postal facilities.

The educational facilities are shown by the following symbols under column 4.

P : Primary or Elementary School
M: Middle School
H : High School or Higher Secondary School
C : College
T : Technical Institution

If there are more institutions than one of a type in the village, the number of institutions precedes the abbreviations *e.g.*, 3P, 2M, 3H, etc.

Medical and Public Health facilities existing in the village are shown by the following symbols under Column 5.

H : Hospital
D : Dispensary
Mcw: Maternity and Child Welfare Centre
Fpc : Family Planning Clinics
Phc : Primary Health Centre

If the village is electrified then it is indicated by the letter E under column 6.

The types of drinking water supply sources available within the village are indicated as below:—

T : Tap
W : Well
Tk : Tank
Tw : Tube well
R : River
C : Canal

If there are any other sources of drinking water other than the above, then such sources have been spelt out.

If the village is served by one or more of the following means of communications within a distance of one mile from the village, then the communication facilities of the village under column 8 have been indicated as below:—

PR : Pucca Road
KR : Katcha Road
T : Train
R : River
C : Canal

The postal facilities, if any, existing in the village are indicated under column 9 by the following symbols:—

PO : Post Office
TO : Telegraph Office
PTO : Post & Telegraph Office
Ph : Telephone

If a village does not have any of the above facilities then "..." is indicated against such village under relevant column.

The staple food of the majority of the population of the village during the major portion of the year is indicated under column 10 as given below. If there is variety of grains mainly used in a village then they have been indicated accordingly.

Ri : Rice
W : Wheat
J : Jowar
B : Bajra (Cumbu, Sajja)
Ra : Ragi
M : Maize

Columns 11 to 15 relate to the land utilisation statistics. Under column 11 the extent of the forest area is given. Under columns 12 and 13 the extent of the cultivated area in the village is given. The extent of area irrigated together with area irrigated under different irrigational sources such as canals, tanks, wells, tube wells, etc. are given, wherever available under column 12 while under column 13 the extent of land unirrigated is given. Column 14 gives the extent of cultivable waste. The area not available for cultivation such as village site, rivers, canals, tanks, wells, etc. is given under column 15.

The various types of land use given under each of the columns 11 to 15 are listed out and the concepts explained below.

1 Forests (Col. 11) — These include all actually forested areas and the lands classed or administered as forests under any legal enactment dealing with forests whether State owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

2 Cultivated area with break up-irrigated & unirrigated (Cols. 12, 13). — This includes the land under the following three categories.

(i) *Net Area sown:*

The net area sown represents the area sown to crops counting areas sown more than once in the same year, only once.

(ii) *Current fallows:*

This class comprises cropped areas which are kept fallow during the current year. If any seedling area is not cropped again in the same year, it is also treated as current fallow.

(iii) *Other fallows:*

This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be either due to poverty of the cultivators or inadequate supply of water or malarial climate or silting of canals or rivers or unremunerated nature of farming, etc.

3 Culturable waste (Col. 14) — This includes the land under the following three categories.

(i) *Miscellaneous tree crops, groves not included in the area sown:*

Under this class is included all cultivable land which is not included under net area sown but is put to some agricultural use. Lands under casuarina trees, thatching grass, bamboo bushes and other groves for fuel etc. which are not included under "Orchards" are classed under this category.

(ii) *Culturable waste:*

This includes lands available for cultivation but not taken up for cultivation or abandoned after a few years for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or not assessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category.

(iii) *Permanent pastures and other grazing lands:*

These cover all grazing lands whether they are permanent pastures and meadows or not. Village common and grazing lands within forest areas are included under this head.

4 Area not available for cultivation (Col. 15) — This Includes the land under the following two categories.

(i) *Barren and uncultivable land:*

This covers all barren and uncultivable land like mountains, etc. *i.e.*, which cannot be brought under cultivation unless at a high cost whether such land is in isolated blocks or within cultivated holdings.

(ii) *Land put to non-agricultural uses:*

All lands occupied by buildings, roads and railways or underwaters, *e.g.*, rivers and canals and other lands put to uses other than agricultural.

Under column 16 the distance of the village from the nearest town in Kms. is given. The days on which weekly market/shandies, if any, held in the village are given under column 17. If the village has any historical/religious/archaeological & tourist importance, it has been indicated under column 18.

All the above particulars are based on the data obtained from the Tahsildars and local bodies concerned and also from the concerned departments like Postal, Medical, Education, Electricity.

INHABITED AND UNINHABITED VILLAGES:

There are 915 villages in this district at the 1971 Census out of which 52 are uninhabited and 863 are inhabited. The following statement gives the distribution of the 863 inhabited villages according to broad population sizes.

STATEMENT 1

VILLAGES CLASSIFIED BY POPULATION SIZE

Population Size	*No. of Inhabited Villages*
(1)	(2)
Less than 200	59
200–499	175
500–999	231
1,000–1,999	239
2,000–4,999	141
5,000–9,999	18
Total	863

More than half of the inhabited villages are in the population size of 500-1,999.

VILLAGES CLASSIFIED BY GEOGRAPHICAL AREA:

The following statement gives the distribution of villages (inhabited and uninhabited) according to broad groups of geographical areas.

STATEMENT 2

VILLAGES CLASSIFIED BY GEOGRAPHICAL AREA

Area (in acres)	*No. of villages*
(1)	(2)
50 or less	..
51–100	4
101–200	9
201–500	64
501–1,000	177
1,001–2,000	294
2,001–5,000	313
5,000 and above	50
Unspecified	4
Total	915

About two thirds of the villages have area between 1,001 to 5,000 acres. Roughly one fifth of the total number of villages have area between 501 to 1,000 acres. Only 50 villages have area of 5,000 acres or more while 77 villages have area of less than 500 acres each. Area figures of four villages are not available.

EDUCATIONAL FACILITIES:

Facilities for primary education exist in a large number of villages but middle and secondary school education facilities exist only in a few villages. In the rural areas of the district there are no collegiate or technical educational facilities at all. The following statement shows the educational amenities available in the rural areas of Nizamabad District.

STATEMENT 3

EDUCATIONAL FACILITIES

Distance from nearest town in Kms.	Total No. of inhabited villages	No. of villages having				
		Primary Schools	Middle Schools	High or Higher Secondary Schools	Colleges	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 or less	46	32	5	5	..	..
6–10	114	89	9	10	..	..
11–15	126	98	11	46	..	..
16–25	265	206	22	22	..	..
26–50	309	240	27	14	..	..
51–200	3	..	1	..	..	..
Total	863	665	75	67	..	..

It may be seen from the above statement that 198 villages or approximately one fourth of the total number of inhabited villages do not have even Primary education facilities. Only 75 have Middle School facilities while Higher Secondary educational facilities are available only in 67 villages. The villages nearer to urban areas are having better educational facilities than those that are remote.

MEDICAL FACILITIES :

There are in all 136 medical institutions of various categories in the rural areas of Nizamabad District. There are 29 Hospitals, 33 Dispensaries, 25 Primary Health Centres, 27 Family Planning Centres and 22 Maternity Child Welfare Centres in this district. Hospitals, Dispensaries, Primary Health Centres and Family Planning Centres exist in all the taluks. Maternity Child Welfare Centres exist in all the taluks except Kamareddy Taluk. There is on an average nearly one Medical Institution for every 65 Sq. Kms. of area in the rural parts of this district.

The following statement gives the number of medical institutions in each taluk:

STATEMENT 4

NUMBER OF MEDICAL INSTITUTIONS

Name of the Taluk	No. of Medical Institutions		
	Hospitals	Dispensaries	Others (Phc, Fpc & Mcw)
(1)	(2)	(3)	(4)
Nizamabad	4	6	14
Armur	5	8	17
Kamareddy	8	4	5
Yellareddy	3	2	7
Banswada	1	5	6
Madnur	4	7	14
Bodhan	4	1	11
Total	29	33	74

ELECTRIFICATION :

Out of 915 villages in the district only 135 villages are electrified. A larger number of villages close to the urban areas have been electrified than remote villages. The following statement shows the distribution of electrified villages of Nizamabad District.

STATEMENT 5

NUMBER OF VILLAGES HAVING ELECTRICITY

Distance from the nearest town in Kms.	Total No. of inhabited and uninhabited villages	No. of villages with electric power supply
(1)	(2)	(3)
5 or less	51	10
6-10	124	28
11-15	137	29
16-25	277	33
26-50	323	35
51-100	3	..
Total	915	135

The following statement shows the break up of the 135 electrified villages in the district by taluks:

STATEMENT 6

DISTRIBUTION OF ELECTRIFIED VILLAGES BY TALUKS

Name of Taluk	Total No. of villages	No. of electrified villages	Percentage of electrified villages to total No. of villages
(1)	(2)	(3)	(4)
Nizamabad	131	21	16.0
Armur	184	45	24.4
Kamareddy	136	18	13.2
Yellareddy	120	7	5.8
Banswada	119	18	15.1
Madnur	112	6	5.3
Bodhan	113	20	17.7
Total	915	135	14.7

Yellareddy and Madnur taluks are not adequately electrified compared to other taluks of this district inspite of the power generating plant at Nizamsagar in Yellareddy Taluk.

COMMUNICATION FACILITIES :

In regard to communications the following statement shows the communication facilities available with reference to proximity to urban areas.

STATEMENT 7

COMMUNICATION FACILITIES

Distance from the nearest town in Kms.	Total No. of villages	No. of villages connected by				
		Pucca road	Katcha road	Pucca road & train	Katcha road & train	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 or less	51	32	12	2	..	7
6-10	124	64	41	1	1	19
11-15	137	59	50	..	..	28
16-25	277	97	118	5	..	62
26-50	323	81	153	1	1	89
51-100	3	..	2	..	..	1
Total	915	333	376	9	2	206

Out of 915 villages only 333 villages are having pucca road facilities. Only a few villages are having railway facilities. More than 20% of the villages are not connected either by pucca or katcha roads.

POSTAL FACILITIES :

Out of 863 inhabited villages 406 villages only have post offices. There are only 3 villages having telegraph offices and 2 villages having post and telegraph offices (combined). Four villages have got telephone facilities also. The following statement shows the total number of villages having post and telegraph offices and phone facilities in each of the taluks of Nizamabad District.

STATEMENT 8

POSTAL AND TELEGRAPHIC FACILITIES

Name of the Taluk	No. of villages having				No. of Post offices per 100 Sq. Kms.
	Post offices	Tele-graph offices	Others		
			PTO	Phone	
(1)	(2)	(3)	(4)	(5)	(6)
Nizamabad	72	..	2	..	5.2
Armur	120	1	..	1	6.2
Kamareddy	54	..	..	..	4.7
Yellareddy	33	1	..	1	3.5
Banswada	47	..	..	..	4.2
Madnur	20	1	..	2	3.3
Bodhan	60	..	..	..	7.8
Total	406	3	2	4	5.1

There are 5 post offices on an average for every 100 Sq.Kms. in rural areas of this district. A large number of villages in Armur Taluk have post offices while very few villages in Madnur Taluk have such facilities. There are only 72 villages having post offices and 2 villages having post and telegraph offices in the rural portions of the headquarters taluk of Nizamabad. There are no telegraph facilities or telephone facilities in the rural portions of Kamareddy, Banswada and Bodhan Taluks.

STAPLE FOOD :

The main staple food of the rural population in this district are rice and jowar.

CULTIVATED LAND :

In the context of the land reforms under active consideration, the data on the extent of land which could have been brought under the plough but is lying unploughed, and the land cultivated in each village are important. A statement showing the average cultivated land and the average cultivable waste per village classified by the distance to the nearest town is given below:

STATEMENT 9

PERCENTAGE OF AVERAGE CULTIVABLE WASTE TO AVERAGE CULTIVATED LAND PER VILLAGE

Distance from the nearest town in Kms.	Number of villages	Total cultivated land (in Acres)	Average cultivated land per village (in Acres)	Total cultivable waste (in Acres)	Average cultivable waste per village (in Acres)	Percentage of average cultivable waste per village to average cultivated land per village
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 or less	51	59,955	1,176	8,997	176	15.0
6–10	124	123,752	998	30,871	249	25.0
11–15	137	126,804	926	39,800	290	31.3
16–25	277	283,660	1,024	87,144	315	30.8
26–50	323	259,951	805	143,014	443	55.0
51–100	3	2,196	732	1,110	370	50.6
Total	915	856,818	936	310,936	340	36.3

It may be noticed from the above statement that on an average 936 acres per village is under cultivation while 340 acres is accounted as cultivable waste, which could be cultivated with some efforts.

It may be seen from the several particulars given in the Village Directory that most of the rural parts of Nizamabad District are still very backward specially in the fields of education, medical facilities and agricultural practices and require special attention for improvement.

SECTION II

TOWN DIRECTORY

Town Directory

In the Town Directory, the towns in the district are arranged alphabetically and the several particulars relating to them are given in the following seven statements:—

Statement I : Status, Growth History and Functional Category of Towns

Statement II : Physical Aspects and Location of Towns

Statement III : Civic Finances

Statement IV : Civic and other Amenities in Towns

Statement V : Medical, Educational, Recreational and Cultural Facilities in Towns

Statement VI : Trade, Commerce, Industry and Banking Facilities.

Statement VII: Population by Religion and Scheduled Castes/ Scheduled Tribes in Towns.

The following six places have been treated as Towns in Nizamabad district at the 1971 Census.

1. Nizamabad
2. Armur
3. Pochampad Project Township Right Flank Colony
4. Kamareddy
5. Banswada
6. Bodhan

Of these 6 towns, Pochampad Project Township Right Flank Colony is the only place which is classified as a town for the first time in the 1971 Census. Banswada and Kamareddy are classified as towns from 1931 and 1941 respectively. All other towns *viz.*, Nizamabad, Armur and Bodhan are classified as such from 1901. Domakonda of Kamareddy taluk which was a town at the 1961 Census had been declassi fied as rural in 1971 as it did not fully satisfy the criteria laid down for treating it as a town. None of the towns in this district has been treated as Urban Agglomeration.

Nizamabad district is considered to be one of the important food producing centres in the Telangana region of Andhra Pradesh. Among its urban units, Nizamabad town—the District Headquarters is the biggest town and has crossed 1 lakh population at the 1971 Census. It has recorded a population of 115,640 persons at the 1971 Census and has become a Class I town or city for the first time. Bodhan, the second biggest town in the district and one of the large sugar producing centres in Andhra Pradesh is a Class III town with a population ranging between 20,000 and 49,999. The remaining towns, *viz.*, Kamareddy, Armur, Pochampad Project Township Right Flank Colony and Banswada come next in the order and are Class IV towns with a population ranging between 10,000 and 19,999 each. The District Headquarters town *viz.*, Nizamabad with population of 115,640 persons along with some of the surrounding villages as detailed below, is treated as Standard Urban Area. The urban population of the district is 209,382 persons, out of a total district population of 1,313,268 persons, and constitutes 15.9% of the total population of the district. The corresponding proportion on 1961 was 14.6%. However, the number of urban entres was 6 both in 1961 and 1971,

Standard Urban Area	*Component units*	
	Urban	*Rural*
(1)	(2)	(3)
Nizamabad	Nizamabad	(1) Gundaram
		(2) Gopanpalle
		(3) Mubaraknagar
		(4) Khanapur
		(5) Sarangapur
		(6) Pangra
		(7) Borgaon
		(8) Thana

The details given in each of the 7 statements of the Town Directory are explained below:—

Statement I — Status, Growth History and Functional Category of Towns

In this statement the civic status, the population recorded at each of the Censuses from 1901 or from the Census in which it was treated as urban for the first time till the 1971 Census and the functional category of each town are given.

Teh civic status of the town *i.e.,* whether the town is a Municipality or a Panchayat is indicated under column 5 by abbreviated letters like M, P. etc. Nizamabad and Bodhan are the only two Municipalities in this district while Armur, Kamareddy and Banswada are Panchayats only. The town Pochampad Project Township Right Flank Colony is under Project Administration and has no separate civic body. The population of the town recorded at each of the Censuses from 1901 to 1971 is given in the columns 6–13. If a place is treated as a town from a Census later than 1901 the population is given from that Census only from which it was treated as urban. In columns 14 and 15 the functional characteristics of each town *i.e.,* whether the town is an industrial town or a service town or a trade and commerce town etc., at the 1961 Census and at the 1971 Census are given.

The growth of the population in the district particularly during the early decades of the present century is considered to be low compared to other districts in the State. A remarkable decrease in the population is seen in all the towns during the decade 1921 which was due to the great epidemic of influenza. But gradually, after 1941, the towns in the district recovered and registered considerable population increase. Nizamabad, Bodhan and Kamareddy towns have registered large increase in population than the other towns due to their commercial and industrial importance. In the Telangana region Nizamabad, is a rapidly growing town next to Hyderabad and Warangal.

Functional Category

By the very nature of urban development, the towns are bound to serve a variety of purposes. In order to know to what extent the functions are diversified or the predominant characteristic is accentuated, a scheme of statistical classification was evolved at the 1961 Census. Accordingly each town can be classified broadly under the following categories, *viz.,*

(i) *Primary Activity:* Agriculture, Mining and Fishing (Census Industrial Categories, I, II and III of 1961 Census and Categories I. II, III and IV of 1971 Census)

(ii) *Industrial:* Industry including Construction (Census Industrial Categories IV, V and VI of 1961 Census and Categories V(a), V(b) and VI of 1971 Census)

(iii) *Commercial:* Trade and Commerce (Census Industrial Category VII of 1961 & 1971 Censuses

(iv) *Transport:* Transport (Census Industrial Category VIII of 1961 & 1971 Censuses) and

(v) *Services:* Other Services (Census Industrial Category IX of 1961 & 1971 Censuses)

The predominant functional character of a city/town is determined on the basis of the following principles:

(*a*) If the proportion of working population is more than 40% of the total working population of the city/town in any one of the above five characteristics then the city/town was designated by that characteristic.

(*b*) If the proportion is not more than 40% in any one of the characteristics, then the next predominant characteristic was taken into account and if the first two predominant characteristics combined together have a proportion of over 60% then the town was designated as having the two characteristics and was termed as Industrial-*cum*-Services or Industrial-*cum*-Commercial, etc.

(*c*) If the combined proportion of the first two predominant characteristics is less than 60% then the third predominant characteristic is also taken into consideration in designating the functional type of the city/town. Such cases are recorded as Industrial-*cum*-Commercial-*cum*-Services or Industrial-*cum*-Services-*cum*-Primary Activity, etc.

Examined against this background the six towns of this district can be classified as follows, in 1961 and in 1971.

Functional Category	Name of Town	
	1961	1971
(1)	(2)	(3)
1. Primary Activities	. Banswada	Banswada
2. Industry .	. Bodhan, Armur	Pochampad Project Township R.F.C.
3. Primary Activities-*cum*-Services	. Kamareddy	..
4. Industry-*cum*-Services-*cum*-Primary Activities	. Nizamabad	..
5. Primary Activities-*cum*-Industry	. ..	Bodhan
6. Primary Activities-*cum*-Trade & Commerce-*cum*-Industry	..	Kamareddy, Nizamabad
7. Industry-*cum*-Primary Activities	. ..	Armur

Pochampad Project Township Right Flank Colony was not a town at the 1961 Census. it has sprung up as a

town only due to the project works and hence it is classified under Industrial category.

Statement II—Physical Aspects and Location of Towns

This statement deals with Physical Aspects and Location of Towns in the district. There are 13 columns in the statement. Under columns 3 to 5 in the statement data relating to the average annual rainfall and the maximum and minimum temperatures recorded in 1969 are given. If this information was not available for any town then the particulars available for the nearest town have been given against such town.

Under column 6 the name of the nearest city with population of a lakh or more is given. Under columns 7 to 9 the name of the State Headquarters, the District Headquarters, Revenue Divisional Headquarters and the Taluk Headquarters together with the distance therefrom are given. Under the columns 10 and 11 the nearest railway station and bus stand and the distance therefrom are given. If navigation and sea port facilities are available to the town they are also given under the columns 12 and 13. All the six towns in Nizamabad District, are linked by bus services. The district is served by South Central Railway on Metre-Guage system but the railway service is inadequate to meet the needs of passenger and goods transport of this region. Only Nizamabad, Bodhan and Kamareddy towns are connected by rail while Armur, Banswada and Pochampad Project Township Right Flank Colony are not connected by rail and they are in a reach of 29, 50 and 54 Kms. distance respectively, to the nearest station. None of the six towns has navigation or sea port facilities. The Godavari river on the northern boundary of the district and the Manjeera within the district are being crossed at a few places by boats of primitive type.

Statement III—Civic Finances

Since the introduction of the democratic decentralisation, popular institutions like Panchayats have an important role in the various developmental programmes. The effective run of these institutions would depend on their financial soundness. The receipt of revenue from various sources of these Municipalities and Panchayats are presented under columns 3 to 8 and their total under column 9. The broad items of the expenditure are given under columns 10-15 with their total under column 16. It may be seen from the statement that revenue receipts of all the towns, except Nizamabad, are not adequate to meet their expenditure.

Statement IV—Civic and other Amenities of Towns

The various amenities being provided to the citizens by the Civic Administration in the towns are given in this statement under 16 columns. The amenities include internal road facility, existence and nature of drainage system, protected water supply, availability of fire fighting services, and electrification particulars relating to domestic, industrial and commercial spheres and road lighting services and others. The different abbreviations used in columns 4, 8 and 9 are expanded in the foot note to the statement.

Pochampad Project Township Right Flank Colony is the only town having sewerage facility while the other towns are having open surface drainage system. Water borne latrines are available in Nizamabad and Pochampad Project Township Right Flank Colony. All the towns are having the facility of protected water supply. In respect of Banswada the required information is not available. Power supply is also available in all the towns. Fire fighting service is available only in Nizamabad and Kamareddy towns.

Statement V—Medical, Educational, Recreational and Cultural Facilities in Towns

Medical, educational, recreational and cultural facilities available in the towns are given in this statement under 17 columns. The following abbreviations are used under column 3 to show the type of medical facilities available in the town.

Medical Facilities

H	:	Hospital
D	:	Dispensary
NH	:	Nursing Home
MCW	:	Maternity and Child Welfare Centre
FPC	:	Family Planning Clinic

In all the towns in the district there are 43 medica, institutions which include Government Hospitalsl Dispensaries, Family Planning Clinics, Nursing Homes, Maternity and Child Welfare Centres etc., with a total bed strength of 417 in all, to cater the needs of total urban population of 209,382 persons inhabiting in the six towns in the district. It is seen that only 1.99 beds are available per 1,000urban population.

Nizamabad, the District Headquarters, Bodhan and Banswada are having more number of beds compared to other towns in the district.

Educational Facilities

The following abbreviations are used to indicate the type of educational facility available in the town.

A	:	Arts College
AS	:	Arts and Science College
AC	:	Arts and Commerce College
ASC	:	Arts, Science and Commerce College
SH.	:	Shorthand Institution
TW.	:	Typewriting Institution

There are three combined colleges imparting instructions in Arts, Science and Commerce subjects in this district, one at Nizamabad, the second at Kamareddy and the third at Armur. There is also one Arts and Science College for women at Nizamabad. There are no Medical and Engineering colleges in the district. There is one Polytechnic in Nizamabad. Shorthand and Typewriting Institutions are available only at Nizamabad while at Bodhan there is a Typewriting Institution only. In other towns there are no Typewriting and Shorthand Institutions.

There are 17 Higher Secondary or Secondary Schools, 17 Middle or Upper Primary Schools and 47 Junior Secondary or Primary Schools in the Urban areas of the district. The following table shows the gross inadequacy of the educational facilities available in the urban areas of the district.

Name of the Town	Number of Schools per 10,000 population		
	Higher Secondary or Secondary	Middle	Junior Secondary Primary
(1)	(2)	(3)	(4)
Armur	0.6	0.6	3.5
Banswada	1.9	..	3.8
Bodhan	0.8	..	2.4
Kamareddy	1.1	2.2	1.7
Nizamabad	0.7	1.0	2.1
Pochampad Project Township Right Flank Colony	0.9	..	0.9
District Urban Average	0.8	0.8	2.2

The picture is equally bleak on the recreational and cultural side. There are no stadia in the whole of the district. There are only 15 cinema halls and 9 libraries including the reading rooms in all the 6 towns put together.

Statement VI—Trade, Commerce, Industry and Banking Facilities

In this statement, data on trade, commerce, industry and banking facilities available in each town are given under fourteen columns. Under columns 3 to 5 three most important commodities imported into the town are given while under columns 6 to 8 the three most important commodities exported from the town are given. Under columns 9 to 11 the three most important articles manufactured in the town are given. Columns 12 to 14 are devoted to present the banking and co-operative credit facilities available in the town.

The three most important commodities under imports, exports, and manufacture were decided in terms of the estimated volume of the commodities transacted and in terms of the volume of total output of the commodities concerned respectively in each of the towns and not on the basis of the value. However, the uniqueness of a town which exhibited special characteristics in the spheres of either industry or manufacture or mining etc., has been retained by indicating those items of production or manufacture as the case may be in the concerned columns although such commodities did not stand a comparison with the other commodities in sheer terms of their estimated volume of transaction.

Nizamabad district has a large Paddy and Sugarcane growing area. Therefore most of the large scale industries and other industries are agro-based and relate to the processing of paddy and sugarcane. Iron ore, mica, quartz and manganese are the different minerals available in the district. Besides, the district is famous for building materials particularly the coloured granites and the Deccan Trap Rocks which are excellent for buildings and decorative works.

Nizamabad and Kamareddy are important commercial centres of general trade especially for those parts of the district which are not served by the railways. In addition to commercial importance they are also having industrial importance due to the existence of several rice and oil mills, beedi factories, sugar and khandasari factories and the distilleries and Power Alcohol Factory at Kamareddy.

Imports

The principal imports into the district are beedi leaves, tobacco, silk yarn, gunny bags, agricultural implements, medicines, auto parts, machine parts, etc.

Exports

The important commodities exported from the district are rice, sugar, jaggery, cotton, chillies, oil seeds, leather, alcohol, beedies and silk cloth. Trade is mainly with the adjoining districts but cotton, oil seeds and leather are also exported to Bombay and Madras.

Manufacture

On the side of manufacture, sugar predominates and the sugar factory located in Shakkarnagar (Bodhan) is one of the largest sugar factories in the country. Alcohol is also being manufactured at Bodhan as ancillary to sugar industry. Nizamabad, Armur and Kamareddy are famous for beedi manufacture which is facing keen competition recently by the cheap variety of cigarettes.

All the towns except Pochampad Project Township Right Flank Colony are Taluk Headquarters besides being noted marketing centres where the wholesale markets known as 'Mandis' are located. For obvious reason these centres are also serving as the link markets for several commodities coming in from the neighbouring taluks. Nizamabad and Kamareddy are the chief commercial headquarters of the district with the biggest wholesale and retail markets and play a prominent role in trade sector by virtue of their having rail and road communications. A substantial volume of wholesale business of the district in rice, sugar, jaggery, cotton, chillies, oilseeds is transacted at these two trade centres. Besides the commercial importance of these two important centres, they are rapidly growing into important industrial centres also.

The district is served by a net work of 14 banks of which 8 are located at Nizamabad, 2 at Bodhan, 1 at each of the remaining towns. The district with a good potential for development in the agricultural sector, the eo-operative credit facilities available in the towns seem to be very inadequate to meet the requirements of the district.

Statement VII: Population by Religion and S. C./S. T. in Towns

The details of the population, as per 1971 Census count, by Religion, Scheduled Castes and Scheduled Tribes with sex break up are shown for each of the towns in the district under columns 3 to 22. Only important religions whose population is not less than 10% of the, total population of the town are given in the statement, while other religions which account for less than 10% of the total population of a town are grouped together and shown under the ctegory, *viz.*, "Others" in columns 15 and 16. The Scheduled Castes and Scheduled Tribes population in a town are shown under columns 19–22. 17,600 persons are reported as belonging to Scheduled Castes in the urban areas of this district accounting for 8.8% of the total Scheduled Castes population in the district, while only 131 persons are reported under Scheduled Tribes in the urban areas constituting 22.7% of the total Scheduled Tribes population in the district.

The particulars presented in the statements II to VI are based on the data obtained from the Tahsildars and Local Bodies concerned and also from the concerned departments like Medical, Educational, Electricity etc., while the particulars furnished in State ments I and VII are based on the Census data.

PART B

PRIMARY CENSUS ABSTRACT

In this part of the District Census Handbook the Primary Census Abstract of 1971 Census on the following aspects is presented for each revenue village in respect of rural areas and for each ward and each Enumerator's Block of a town in urban areas.

1 Location Code No. and Name of the village/ town and area

2 Total number of occupied residential houses and total number of households

3 Total population and its sex breakup

4 Population of Scheduled Castes and Scheduled Tribes by sex breakup

5 Literate and educated persons by sex

6 Total workers and the breakup of the workers into nine categories and also the total non-workers by sex as below

Category	I	Cultivators
Category	II	Agricultural Labourers
Category	III	Livestock, Forestry, Fishing, Hunting and Plantations, Orchards, and allied Activities
Category	IV	Mining and Quarrying
Category	V	Manufacturing, Processing, Servicing and Repairs a) Household Industry b) Other than Household Industry
Category	VI	Construction
Category	VII	Trade and Commerce
Category	VIII	Transport, Storage and Communications
Category	IX	Other Services
Category	X	Non-Workers

A District Abstract containing the Primary Census Abstract data for the district as a whole together with rural aud urban breakup and also for each taluk and for each town is first presented. It is followed by the data for each of the villages and towns in the first taluk. The data for the second and subsequent taluks are presented consecutively thereafter. The villages under each taluk are arranged in the ascending order of Location Code Numbers. In the urban areas the data are arranged in the ascending order of Location Code Numbers of towns and also in the ascending order of the ward number. The uninhabited villages and villages which have been fully included in a town have been indicated accordingly. In respect of villages which are partly included in towns the word "Rural" has been added in italics and in brackets after the name of the village and the particulars relating to the rural portion only have been given against such villages. At the beginning of each taluk an Alphabetical List of Villages together with their Location Code Numbers. This Alphabetical List of Villages given in the P.CA acilitates the reader in locating the required village and its Location Code Number and thereafter to know the Primary Census Abstract particulars. The taluk map showing all the village and towns with their boundaries givan in village Directory facilitates the location of the required village/town. The jurisdiction of each Enumerator's Block is given before the urban/ blockwise Primary Census Abstract.

The population data presented in the Primary Census Abstract relate to all persons alive at Sunrise on 1st April, 1971 and were present within the territory of Nizamabad District whether they lived in normal residential houses or in institutions such as hospitals, hostels, asylums, boarding houses, hotels etc., or whether they were merely houseless persons like the wandering tribes, tramps, pavement dwellers, or those living in boats, etc. They were all enumerated at the 1971 Census and their basic characteristics have been presented in this Primary Census Abstract.

The total population of Nizamabad District as on 1st April, 1971 recorded at the census enumeration is as follows:

	Total	*Rural*	*Urban*
Persons	1,313,268	1,103,886	209,382
Males	657,089	548,696	108,393
Females	656,179	555,190	100,989

The criteria adopted for classifying a place as rural or urban and the concepts of Urban Agglomeration and

Standard Urban Area have already been explained in the beginning of this volume.

Columns 1 and 2 of the Primary Census Abstract indicate the Location Code Number and Name of the Village or Town concerned. In respect of towns the Ward/Block/Locality numbers and the Enumerator's Block Numbers are indicated under Col. 2.

Location Code is the method by which every village and town in a taluk in every district of a State is identified. Each district in this State has been given a separate code number, serially numbering the districts in a clock-wise order starting from Srikakulam District and ending with Nalgonda District. Nizamabad District, in this process, is assigned Location Code No. 16. Within each district the taluks had similarly been allotted location code numbers, the taluk in which the district headquarters lies being allotted Location Code No. 1 and the other taluks are numbered in a clock-wise order. The revenue villages within each taluk are assigned separate serial numbers starting from the north-west corner of the taluk and ending with the south-east corner in a serpentine order. All the towns within a district were assigned Location Code Nos. in one serial order starting from the town in which the district headquarters is located and in the ascending order of taluk Location Code Numbers. If any taluk has more than one town, then the town in which the taluk headquarters is located is assigned Location Code No. first and then the other towns in the taluk in a clock-wise order. The Location Code Nos. of villages are indicated in Arabic numerals while those of towns in Roman numerals.

Under Column 3 the area of each village and town is given in square miles based on the information furnished by the State Central Survey Office, the Tahsildar and the Municipal authorities concerned. In respect of certain villages, where the area particulars are not available, the fact is noted as "NA". As the area of the taluk comprises not only the area of villages but also the area of reserved forests, hills, etc., within the taluk, the area of all the villages and towns in the taluk put together may not be equal to the area of the taluk. The rural area of the taluk is obtained by deducting the total urban area of all the towns in the taluk from the total area of the taluk furnished by the State Survey Department. Similarly the rural area of the district is obtained by deducting the total urban area of all the towns in the district from the total area of the district. It may be pointed out in this connection that the total district area adopted is that furnished by the Survey of India Department and is provisional. The area of the taluks is furnished by the State Survey Department. Hence the total area of all taluks put together may not tally with the district area.

Under Col. 4 the total number of occupied residential houses in each village and in each ward and enumerator's block of a town are given. These figures include those of partly residential houses also but not of the completely non-residential houses. The total number of households including houseless households and institutional households is given under Col. 5.

The total population including houseless and institutional population with sex breakup is given under Cols. 6 to 8.

Under Cols. 9 to 12 the population of Scheduled Castes and Scheduled Tribes by sex is given.

The Scheduled Castes and Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I and Schedule II respectively of the Scheduled Castes and Scheduled Tribes lists (Modification Order 1956) published in the Notification of the Ministry of Home Affairs, New Delhi dated 29th October, 1956. A copy of the list of Scheduled Castes and Scheduled Tribes in Andhra Pradesh is given below.

4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Konda Reddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity Kondhs
10 Kotia-Bentho Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya, Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 *Reddi Dhoras*
17 Rona, Rena
18 Savaras, Kapu Savaras, Maliya Savaras or Khutto Savaras
19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

III In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam, and Nalgonda

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (including Mannervarlu)
6 Pardhan
7 Thoti

IV In the Agency tracts:

1 Goudu (Goud)
2 Nayaks
3 Valmiki

The number of literate and educated persons is given under Cols. 13 and 14. A person who could both read and write any language with understanding was treated as a literate at the 1971 Census. A person who could merely read but could not write or *vice versa* was not treated as a literate. The test for reading was ability to read any simple letter either in print or in manuscript. Children aged 4 years and below were treated as illiterate. The test for education was that the person should have passed a recognised written examination or examinations as proof of educational level attained. The highest examination passed was taken as the level of education.

The details of workers and non-workers are given under Cols. 15 to 38. At the 1971 Census the population has been broadly divided into two sections based on the main activity *viz.*, (*i*) Workers and (*ii*) Non-workers.

The definitions and concepts adopted in the economic classification of the population at the 1971 Census are explained below:

Worker

A 'worker' was a person whose main activity was participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

A man or woman who was engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who was primarily a student attending institution, even if such a person helped in the family economic activity but not as a full time worker was not treated as a worker for the main activity. On the other hand, if a person was primarily engaged in some economic activity but at the same time attended to some household chores or attended a night school etc., he or she was treated basically as a worker for the main activity and categorised accordingly.

A person who was working may be either working as a cultivator, as an agricultural labourer or at a household industry or may be doing any otherwork.

Reference period

The reference period was one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this had been returned as his main activity the person was categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness, travel, holiday, temporary breakdown or strike etc., was treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages were considered as economically active and recorded as workers. A person who had merely been offered work but had not actually joined it was not treated as engaged in work. There are certain types of works which are not carried on throughout the year *e.g.* cultivation, livestock keeping, plantation work, some types of household industry, etc. A person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior to the date of enumeration, the main activity of the person may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year.

Cultivator

For purposes of the Census a person is working as cultivator if he or she is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and pulses, raw jute and kindred fibre crops, cotton, etc., and other crops such as sugarcane, groundnut, tapioca, etc., and does not include fruit growing, vegetable growing or keeping orchards or groves or working plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

A person who merely owned land but had given out land to another person or persons for cultivation for money, kind or share of crop and who did not even supervise or direct cultivation of land, was not treated as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share was not treated as cultivator.

Agricultural Labourer

A person who worked in another person's land for wages in money, kind or share was regarded as an 'Agricultural Labourer'. He had no risk in the cultivation but he merely worked in another person's land for wages. The labourer had no right of lease or contract on land on which he worked.

Household Industry

For a person who returned his main activity as engaged in some production or processing of goods such as, say, handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, dairying, cycle repairing, blacksmithy, tailoring, etc., it was ascertained if it was a household industry.

A Household Industry was defined as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not have been run on the scale of a registered factory.

The main criterion of a household industry was the participation of one or more members of a household. This criterion was applied to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence the household industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves ran an industry but at a place away from the precincts of their home, it was not considered a household industry. It should have been located within the precincts of the house where the members lived.

A household industry related to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It did not include professions such as pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc., or merely trade or business, even if such profession, trade or services were run at home by members of household.

Some times it is likely that the person who may not be working in his own Household Industry may be working as a petty employee in another Household Industry. It was, therefore, enquired whether the person who was not working in his own Household Industry was working in any other Household Industry as an employee.

Other Workers

A person who gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry was recorded under the category of 'Other Workers'. The type of workers that may come under the 'Other Workers' category are factory workers, those working in trade or transport, all government servants, municipal employees, teachers, mining workers, political or social workers, building labourers, etc. In effect, all types of economic activity not covered by cultivation, agricultural labourer or household industry were recorded under this residual category. Workers engaged in plantation or forestry were not treated as cultivators or agricultural labourers but as 'Other Workers'.

According to the 1971 Census there were 238,796 residential houses and 269,084 households in Nizamabad district compared to 194,634 residential houses and 219,606 households in 1961. Thus there were 1.13 households per residential house both at the 1971 Census and at the 1961 Census.

The total number of persons returned at the 1971 Census enumeration in Nizamabad district was 1,313,268 as against 1,017,987 at the 1961 Census recording an increase of 29.0% over the population of 1961. The proportion of rural and urban population to the total population in the district works out to 84% and 16% respectively in 1971 Census compared to 85% and 15% in 1961. There were 999 females for every 1,000 males at the 1971 Census as against 1,007 females per 1,000 males in 1961 Census. 225,749 persons were reported as literates and educated in 1971 Census compared to 145,988 literate and educated persons in 1961 accounting for 17.19% of total population in 1971 as against 14.34% in 1961. The proportion of literates and educated among males was 26.14% while among females it was 8.23%. In the rural areas the percentage of literates and educated among the total population was 13.33% while in urban areas, the literates accounted for 37.51% of the total urban propulation. 598,514 workers were returned in 1971 as against 585,377 workers in 1961 Census, thus constituting 45.57% of the total population in 1971 and 57.50% in 1961. Among males, the workers constituted 59.54% while among females only 31.59% were workers. The decrease in the proportion of working population in 1971 compared to 1961 Census proportion was mainly due to the change in the definition adopted at the present Census.

Detailed analysis of demographic at the 1971 Census is given in the write up in Part-C of District Census Hard Book.
