STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

A District Census Hand Book for each of the 20 Districts in Andhra Pradesh

PRINTED BY THE JYOTHI PRESS, HYDERABAD FOR THE DIRECTOR OF PRINTING, HYDERABAD

PREFACE

The District Census Handbook is an innovation introduced at the 1951 Census. The Handbooks are compiled by the Census Office but published by the State Government. They proved to be very popular and valuable publications in considerable demand by the public as well as the official users of the census data. At the 1961 Census, therefore, it was decided not only to continue the publication of the District Census Handbook but to greatly improve upon its precursor of 1951.

The present District Census Handbook may be conveniently divided into four parts. The first part consists of a narrative description of the physical features and history of the district, the social and economic characteristics of the people and the progress made by the district in each field of administration over the past decades. This is supplemented by a Gazetteer of places. The second part consists of administrative statistics of various departments. The third part is based mainly on the present Census returns and consists of statistical tables giving the particulars of population, sex ratio, the economic composition, literacy, language and migration data, etc. The fourth part consists of Village and Town Directory which is perhaps the vital part of the Handbook giving villagewise and townwise particulars of area, households, population, Scheduled Castes and Scheduled Tribes, literacy, broad categorisation of working population, etc. Against each village and town the educational, medical, public health, and transport facilities, etc., if available, have also been indicated. At the end of the fourth part a tabular statement of fairs and festivals, information about which had been collected through the Census enumerators will also be found. The pages of each part are numbered separately. The Handbook is enriched with two district maps, one showing the administrative divisions and important communications, rivers, etc., and the names of all important places of above 5,000 population and the other showing the talukwise density of population. In the Village Directory portion of the Handbook, before the statistics of each taluk are presented, a taluk map showing the village and town boundaries with the location code number of each village and town marked will also be found. Thus the District Census Handbook is a self-contained and convenient book of reference about almost all matters pertaining to the district.

The Handbooks are no doubt coming rather late, a few years after completion of the Census count. This delay, if at all it can be called delay, could not be helped. The very detailed sorting of Census slips and compilation of the elaborate 1961 Census tables were time consuming; the administrative particulars for incorporation in the Handbooks had to be collected from different departments and other sources on proformae that were finalised and circulated from this office; the preparation of the excellent maps of the district and the taluks, attempted this time, also required considerable time; and lastly the printing of these voluminous reports which had to be done very carefully was a laborious process. All the same it is hoped that these Handbooks will serve as valuable sources of reference about all matters pertaining to the district and help one to assess the impact of the Five Year Plans and the progress each district had made in its social and economic well being over the decades and also serve as a guide in planning for the future. The credit for the compilation of this Handbook goes chiefly to Shri K. M. Ahmad, I. A. S. and Shri P. S. R. Avadhany, Deputy Superintendents of Census Operations. Shri Ahmad took great pains to tour the district, contact the various officers of the district and dig out information from various sources. A compilation of this type and magnitude could have taken a much longer time but for the diligent efforts of Shri Ahmad and Shri Avadhany. The Handbook section of the Census Office under the Tabulation Officer, Shri K. Narasimha Murthy, did a commendable work in the speedy and accurate compilation of the Village Directory and the other Statistical and Administrative tables. Draughtsman Shri G. Pandurangam, Shri Mohiuddin Hassan and Shri M. J. Sadiq, Tracers of the Cartographic Section in my office did a magnificent work as will be evident from the quality of maps that have been produced.

A. CHANDRA SEKHAR

ADMINISTRATIVE STATISTICS

SERIES 1–VITAL STATISTICS

Table No.		
1.1	Births and Deaths and Deaths due to various causes for the decennium 1951-60	(1)
1.2	Registered Birth & Death rates, Infantile and Maternal Mortality Rates	(1)

SERIES 2-AGRICULTURE

2.1	Rainfall	(2)-(4)
2.2	Temperature	(5)
2.3	Land Utilisation Statistics	(6)
2.4	Area under Principal Crops	(7)
2.5	Gross Area Irrigated	(8)
2.6	Sources of Irrigation	(8)
2.7	Irrigation Projects with particulars of capacity and water spread area	(9)
2.8	Yield rates per acre of the principal crops	(9)
2.9	Monthly wholesale price quotations in respect of staple foodgrains	(10)

Table No.		Pages
	SERIES 2-AGRICULTURE—*Concld.*	
2.10	Statistics of wages (Average daily wages paid to skilled and Agricultural Labour)	(11)-(12)
2.11	Government Experimental Farms	(13)
2.12	Grow More Food Campaign	(14)
	SERIES 3-ANIMAL HUSBANDRY	
3.1	Livestock and Poultry	(15)
3.2	Livestock Mortality due to contagious and other diseases	(16)-(17)
3.3	Government Veterinary facilities	(18)
	SERIES 4-INDUSTRIES	
4.1	Growth of Factories and average daily number of workers employed in them	(18)
4.2	List of Small Industries together with the number of establishments and persons employed in each of them in the various taluks of the district	(19)
4.3	Total number of Artisans of each category working in the district together with their daily average earnings	(20)
4.4	List of Factories (Large Industrial Establishments) under the operation of the Factories Act, 1948, for the year 1962	(21)-(34)
	SERIES 5-ADMINISTRATION	
5.1	Criminal Justice—Number of criminal cases disposed off	(35)
5.2	Criminal Justice—Persons convicted or bound over in	(36)
5.3	Civil Justice	(36)
5.4	Number of Judicial Officers	(37)
5.5	Strength of Police	(37)
5.6	Major Crimes reported	(38)
5.7	Property stolen and recovered	(38)
5.8	Number of Jails with their capacity and number of Prisoners lodged	(39)
5.9	Registered Motor Vehicles	(39)
5.10	Receipts realised under Motor Vehicles Act	(40)
5.11	Land Revenue Demand and Collections	(40)
5.12	Number of Registered documents and value of properties transferred	(41)
5.13	List of Collectors that worked in Nizamabad District from 1950	(41)
5.14	List of Judges who presided over the Civil or District and Sessions Court of Nizamabad	(41)

Table No.		*Pages*
	SERIES 6-PUBLIC HEALTH	
6.1	List of Medical and Public Health Institutions	(42)
	SERIES 7-EDUCATION	
7.1	Number of Primary, Secondary, Higher Secondary and other Non-Collegiate Educational Institutions together with their strength as on 31-3-1961	(43)-(44)
7.2	List of Colleges and Technical Institutions together with their strength	(45)
	SERIES 8-PRINTING PRESSES	
8.1	Number of Printing Presses at work and Newspapers and Periodicals published	(46)
	SERIES 9-COMMUNICATIONS	
9.1	Major Roads	(47)
9.2	Roads maintained by the City Municipalities	(48)
9.3	List of Travellers' Bungalows	(49)-(51)
9.4	Talukwise list of Railway Stations	(52)
9.5	Talukwise distribution of Post and Telegraph Offices	(52)
9.6	Number of Post and Telegraph Offices	(53)
9.7	Number of Post Cards, Letters, Newspapers, Parcels and Packets handled in Nizamabad Postal Division	(53)
9.8	Number and value of Money Orders and Indian Postal Orders issued or paid in Nizamabad Postal Division	(54)
	SERIES 10-LOCAL BODIES	
10.1	Number of Local Bodies	(54)
10.2	Receipts and Expenditure of Nizamabad Zilla Parishad	(55)
10.3	Receipts and Expenditure of Panchayat Samithis	(56)
10.4	Receipts and Expenditure of City Municipalities	(56)
	SERIES 11—COMMUNITY DEVELOPMENT	
11.1	Talukwise distribution of Community Development Blocks	(56)
11.2	Expenditure incurred in each of the Community Development Blocks from inception upto 31-3-1961...	(57)
11.3	Blockwise Physical Achievements under Community Development upto 31-3-1961	(58)
	SERIES 12-IMPORTANT HISTORICAL EVENTS	
12.1	Calendar of outstanding occurrences (Historical and Religious events)	(59)

Table No.		*Pages*
	SERIES 13-BANKS AND INSURANCE	
13.1	Banks	(60)
13.2	List of Banks and their place of Business	(60)
13.3	Life Insurance Business	(61)
13.4	Achievements in National Small Savings Scheme	(61)
	SERIES 14-MARKETS	
14.1	List of Markets	(62)

PART I

INTRODUCING THE DISTRICT

NIZAMABAD DISTRICT

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

CHAPTER I
GENERAL FEATURES

Situation and physical characteristics

Nizamabad district is neither a geographical nor historical nor ethical entity but a creation of administrative convenience. The district formed part of erstwhile Hyderabad State till 1956 and at the Reorganisation of States in 1956 it was transferred to Andhra Pradesh along with the 8 other districts of the Telangana Region. Prior to 1905 it was known as Indur district and in 1905 when the administrative units of erstwhile Hyderabad State were reconstituted the name of Indur district was changed into that of Nizamabad district. At the time of Reorganisation of States, Bichkonda and Jukkal circles of Deglur taluk of Nanded district were transferred to Andhra Pradesh and included in this district and in 1958 constituted into a new independent sub-taluk called the Madnur independent sub-taluk with an area of 230.8 sq. miles. A detailed history of the district is given under Chapter II.

The present district of Nizamabad is bounded in the north by Adilabad and Nanded districts; on the east by Karimnagar; on the south by Medak district; and on the west by Nanded district. It lies between 18° 5′ and 19° of the northern latitude and 77° 40′ and 78° 37′ of the eastern longitude.

The district at present occupies an area of 3,105 sq. miles and has a population of 1,022,013 persons and a density of 328 persons per square mile according to the 1961 Census count. There are altogether 865 inhabited villages, 56 uninhabited villages and 6 towns in this district. The district is divided into three Revenue Divisions and seven taluks as detailed below for purpose of Revenue Administration.

STATEMENT I-1

Name of Revenue Division	Name of Taluk	Area in sq. miles	Population	Density per sq. mile
(1)	(2)	(3)	(4)	(5)
Nizamabad Division	Nizamabad Taluk	544·0	226,847	417
	Armur Taluk	758·0	221,461	292
Bodhan Division	Bodhan Taluk	307·2	157,330	512
	Banswada Taluk	458.4	103,693	226
	Madnur Ind. Sub-Taluk	232·0	73,722	318
Kamareddy Division	Kamareddy Taluk	449.0	156,289	348
	Yellareddy Taluk	364·2	82,671	227

The six towns in the district in the descending order of population are given below:

Towns	*Population*
(1)	(2)
Nizamabad	79,093
Bodhan	30,929
Armur	13,249
Kamareddy	10,318
Banswada	8,201
Domakonda	6,508

Details of the population and their vocations etc., are given under Chapter III–Population and Housing and it may be referred.

The district consists mostly of plains on the eastern side adjoining Karimnagar district and is dotted with large number of tanks. The canals and tanks with their blue waters and the green hills with boulders toppling one over the other and some times standing queerly balanced, present a picturesque spectacle. So do the vast patches of green paddy fields interspersed here and there with patches of garden-like country giving the district a natural beauty of its own. The climate is generally dry and healthy from February to the end of May but damp during the rains and cold season. The temperature ranges between 45°F. in December and 110°F. in May. The annual rainfall averages about 40 inches.

Hills

Being situated in the table land of the Deccan, hills of any considerable size are quite rare in this part of the country though isolated peaks and rocky clusters occur frequently which are so characteristic of the Deccan. The rocks are related to the Archean and Deccan trap formations but the Archean type occupies a very large area.

Rivers

The principal rivers flowing in this district are the river Godavari on the northern boundary separating it from Nanded and Adilabad districts and the Manjira, the chief tributary of the river Godavari. The river Manjira crosses the district from the south-west and joins the Godavari near Kandukurthi in Bodhan taluk after a course of 62 miles. The Nizamsagar Project constructed across

this river at Achampet in Banswada taluk forms a major source of irrigation with its splendid net work of canals. By this scheme an immense volume of water which before flowed aimlessly is now harnessed to irrigate a large area of land. Its vast blue expanse is grand and the surrounding country side presents a picture of unique scenic beauty. Apart from this a small stream, the Phulang, traversing the Nizamabad and Armur taluks also feeds some of the irrigation tanks. The Yadlakatta Vagu, a perennial stream flowing in the dry areas of Kamareddy taluk and Alair river are of considerable importance.

Climate

This district being situated at a considerable distance from the sea coast has the usual tropical climate. The temperature ranges between 45°F. in December and 110°F. in May. As it is favourably situated in the Deccan plateau at a fairly good elevation of about 2,000 feet above the sea level the climate is considered to be quite pleasant. It is dry and healthy from February to the end of May and damp during the rains and cold season.

Rainfall

Nizamabad district though lying in the middle of the Deccan Plateau and in the path of south-west and north-east monsoons has an average annual rainfall of only about 40 inches. The rainy season commences with the onset of south-west monsoon in the latter part of June and ends in the month of October with its closure. The normal rainfall of the district is above 40 inches. The maximum of rainfall occurs in the months of June, July, August and September during the south-west monsoon period. The following table exhibits the total annual rainfall received during each monsoon from 1954-55 to 1959-60 as well as normal rainfall:

STATEMENT I-2

RAINFALL

(in millimetres)

Year	South-West monsoon (June-September)	North-East monsoon (October-December)	Winter period (January-February)	Hot weather period (March-May)	Total annual rainfall	Percentage variation
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Normal Rainfall	834.80	72.80	23.30	44.20	975.01	...
1954-55	949.96	17.78	12.70	20.32	1000.76	2.6
1955-56	1343.66	38.10	2.54	78.74	1463.04	50.0
1956-57	1201.42	127.00	14.98	107.89	1451.29	48.8
1957-58	1090.40	64.51	...	26.10	1181.01	21.0
1958-59	1294.90	49.50	2.50	22.20	1369.10	40.4
1959-60	1436.90	85.10	3.30	71.00	1596.30	63.7

In the year 1961 during the south-west monsoon period (June-September) the district received a total rainfall of 844.4 mm., 834.8 mm., being the normal, representing an increase of one per cent. Again during the north-east monsoon period in the same year the district received a total rainfall of 125.5 mm.,the normal being 72.8 mm., representing a favourable increase of 72%. The total rainfall received in both monsoons including hot weather and winter periods is 1075.3 mm., the normal being 975.1, representing 10% of increase.

Soils

The soils in this district are made up of a variety like black cotton, chalka, red sandy loam, clay loams dubba and morrum. Of these chalka and black cotton are considered to be fertile. Owing to the extensive sugarcane cultivation the value of black cotton soils is greater than that of the other soils. Madnur, Banswada, Bodhan have considerable area of black cotton and chalka soils. In Kamareddy and Yellareddy taluks the soil is of four kinds viz., clay loams, black cotton, red sandy loam and ordinary sandy soil. Thus in almost all taluks black cotton soil known for fertility is predominant. The soils are mostly sandy in Nizamabad taluk but yet rice is extensively raised.

Land utilisation

The pattern of land utilisation in the district has been exhibited in the following statement, during 1950-51 to 1960-61.

STATEMENT I-3

TRENDS IN LAND UTILISATION

(Area in Acres)

Description	1950-51	Percentage to the total area	1951-52	1952-53	1953-54	1954-55	1955-56	Percentage to the total area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Total Geographical Area	**1,703,363**	**100.00**	**1,740,664**	**1,760,461**	**1,768,972**	**1,761,411**	**1,907,884**	**100.00**
Forest	263,451	15.47	262,158	289,935	276,001	300,513	359,746	18·86
Barren and uncultivable land	250,820	14·73	269,269	262,401	233,608	233,071	179,918	9.43
Land put to non-Agricultural uses	200,968	11·80	123,411	157,148	142,611	139,991	146,815	7·70
Cultivable waste	93,839	5·51	93,970	89,593	86,481	94,046	99,879	5·24
Permanent pastures	112,900	6.63	125,372	115,492	120,767	116,029	141,262	7·40
Miscellaneous tree crops	32,270	1·89	18,354	16,760	16,844	16,105	17,433	0·91
Current fallows	86,260	5.06	164,743	53,782	136,468	127,222	193,686	10·15
Other Fallows, i. e., Fallow land other than current fallows	102,061	5·99	60,717	106,535	92,140	98,448	73,528	3.85
Net area sown	560,794	32.92	622,670	668,815	664,052	635,986	695,617	36·46
Area sown more than once	28,460	1·67	39,956	11,343	59,141	54,128	53,962	2·83
Total cropped area	**589,254**	**34·59**	**662,626**	**680,158**	**723,193**	**690,114**	**749,579**	**39.29**

Description	1956-57	1957-58	1958-59	1959-60	1960-61	Percentage to the total area
(1)	(10)	(11)	(12)	(13)	(14)	(15)
Total Geographical Area	**1,907,884**	**1,907,884**	**1,907,884**	**1,907,884**	**1,907,884**	**100.00**
Forest	364,592	385,674	385,104	383,429	385,104	20·18
Barren and uncultivable land	181,602	181,602	167,093	159,115	167,093	8·76
Land put to non-Agricultural uses	142,577	146,414	146,826	146,304	146,826	7·70
Cultivable waste	92,036	92,475	96,317	91,340	96,317	5·05
Permanent pastures	119,094	135,332	120,990	123,047	120,990	6.34
Miscellaneous tree crops	15,560	25,507	20,210	20,368	20,210	1·06
Current fallows	183,760	155,824	176,318	172,597	171,081	8.97
Other fallows, i. e., Fallow land other than current fallows	69,837	76,014	60,806	68,167	55,001	2·88
Net area sown	738,826	709,042	734,220	743,517	745,262	39.06
Area sown more than once	78,710	82,305	32,287	56,670	50,327	2·64
Total cropped area	**817,536**	**791,347**	**766,507**	**800,187**	**795,589**	**41.70**

The above statement gives the classification of the geographical area under different categories of utilisation in the district for the years from 1950-51 to 1960-61. Percentage of area under each classification to the total area have also been shown for 1950–51, 1955–56 and 1960–61 i.e., the year before the commencement of the Five Year Plans, and at the end of the First and the Second Five Year Plans, for obtaining a comparative idea in the pattern of land utilisation before and after the implementation of the First and Second Five Year Plans. The net area sown under all crops during 1960–61 forms 39.06% of the district area. Forests account for 20.18% of the district area while uncultivable land covers 8.76% of the district total area. The area put to non-Agricultural use such as for buildings, roads etc., covers 7.70% of the district total area. The total fallow land during 1960–61 accounts for 16.89% of the district area of which current fallows (i.e., land left fallow in the current year only) covers 8.97%, other fallow land (i.e., land left fallow for more than one year but less than five years) covers 2.88% and culturable waste land (i.e., land left fallow for more than five years) accounts for 5.05%. During 1960–61 permanent pastures account for 6.34% while land under miscellaneous trees and crops and groves form 1.06% of the district. The net area under cultivation has increased from 695,617 acres in 1955–56 to 745,262 in 1960–61 but has decreased in 1957–58. In the entire Telangana region, the highest percentage of net area irrigated to the net area sown is recorded by this district, and this may largely be attributed to the benefits of Nizamsagar and other irrigation projects.

Irrigation

The major sources of irrigation in this district are the Nizamsagar Project, the Pocharam Project and the Ramadgu Project, besides a large number of rainfed tanks, wells, etc. Nizamsagar Project constructed across the river Manjira, a tributary to the Godavari at Achampet village of Banswada Taluk was originally estimated to have an ayacut of 2,75,000 acres. The actual area developed so far under this project is 2,07,000 acres only. The Pocharam Project which was constructed across Alair river, a tributary to the Manjira river, benefits 40 villages and has an ayacut of 9,063 acres. Ramadgu Project is a small project having an ayacut of 5,000 acres only. The following statement shows the area irrigated under different sources of irrigation during 1955-56 to 1960-61. Fuller details of irrigation facilities in the district are given under the Chapter 'Irrigation'.

STATEMENT I-4

AREA IRRIGATED UNDER DIFFERENT SOURCES OF IRRIGATION

(in Acres)

Year	Area irrigated under					Net area irrigated
	Govt. canals	Private canals	Tanks	Wells	Other sources	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1955-56	1,28,606	741	107,449	17,586	...	254,382
1956-57	1,25,909	105	125,465	16,622	...	268,101
1957-58	1,33,457	551	112,786	17,384	...	264,178
1958-59	1,33,907	316	135,346	17,532	...	287,101
1959-60	1,51,323	206	124,626	23,705	...	299,860
1960-61	1,51,315	1,140	120,814	14,635	...	287,904

Crops

As may be seen from the above statement this district is famous for canal irrigation. Large extents of sugarcane and paddy are grown in the taluks of Nizamabad, Bodhan, Banswada and Armur. This district is considered as the granary of the Telangana and also the sugar pot of Andhra Pradesh. The easternmost taluk of Kamareddy is mainly Kharif growing and produces maize and other millets. The chief oil seeds grown in this district are the groundnuts. A detailed account of the crops grown is given under the Chapter 'Agriculture'.

Living standards of the people

On account of the increasing prosperity due to better income from agriculture, the district in general has a very prosperous appearance. The living standards of the people of this district are quite appreciable, when compared to the standards prevailing in its counter parts of the entire Telangana region. The district is agriculturally rich and famous for Agro based industries. In fact some of the people from the Circar districts have migrated to this district; and have brought with them the wherewithal of agriculture and have settled down on fertile lands, where the splendid net work of Nizamsagar canals provide assured supplies of water. Kamareddy Taluk is famous for the manufacture of beedies and it contains many factories. At Kamareddy there is an Alcohol Factory, where power alcohol is manufactured out of 'mahua' (*Vippa*) flowers from the surrounding forests. There are a number of rice husking mills scattered all over the district, while groundnut and other oil seeds provide for oil expellers at Nizamabad. By far the most important large scale manufacture of the district is that of sugar in Nizam Sugar Factory at

Bodhan considered to be one of the largest in Wes Asia. The Bodhan Sugar Factory also manufactures large quantities of power alcohol as a bye-product out of molasses. The industrial and agricultural wealth of the district benefit a large number of low income families in the entire district.

Except in Nizamabad and Bodhan towns the general living standards of the people in the district are generally low compared to the coastal districts. The cost of living index numbers are issued for the district headquarters only. The table given below shows the consumer price index numbers issued for the working class of Nizamabad town as a representative centre for the district for the years from 1950-51 to 1960-61 with 1943-44 as the base year.

Working class consumer price index numbers for Nizamabad Town

(Base year : August 1943 to July 1944—100)

Year	General Index Number
1950-51	192
1951-52	210
1952-53	180
1953-54	185
1954-55	181
1955-56	155
1956-57	192
1957-58	201
1958-59	208
1959-60	222
1960-61	238

The indices show that the consumer prices for working classes in Nizamabad in 1960-61 have risen by 46 points over the price in 1950-51.

The table below at a glance exhibits the average daily wages of field labour, herdsmen and skilled labour as at the end of each year for the years 1958-1960. Agricultural wages have shown a decrease in 1958 but they have risen in 1959 and in 1960 :

STATEMENT I-5

AGRICULTURAL WAGES

(In Rupees and Paise per day)

	Field labour			Herdsmen	Skilled labour		
Year	Men	Women	Non-adult	Men	Carpenter	Black smith	Cobbler
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1958	1.50	1.00	0.50	2.25	3.50	3·00	N·R.
1959	1.25	0·83	0·71	1·50	2·92	2·92	1.83
1960	1.17	0.89	0·62	1·06	2·92	2.75	1.67

Flora

Forests and jungles are like sponges, which not only retain moisture in the soil but also help to render the climate more equitable. The district has a considerable area under jungles and forests, which fall under the category of southern tropical dry deciduous type. Teak, ebony, blackwood and timber are seen in thick forest belts. In the past the district was famous for teak forests but due to ravages of time, and irregular and unscientific exploitation much of the best tree growth was rooted out. Many schemes were formulated for the first time to protect preserve and reserve these forests even as early as 1915, but they were sporadic and not scientific. The actual scientific and systematic conservancy of these forests commenced with Dr. Dost Ali Khan's working plan, and extended upto Aplil, 1961 till the passing of a new working plan. In Yellareddy, Armur and Madnur Taluks large forest areas are available and wild animals are found in abundance especially in the dense forest belt of Armur. Tiger, panther, sambhar, spotted deer, wild boar etc., are some of the commonly occuring wild animals in the forests of this district. The forest produce chiefly constitutes timber, fuel, bamboo and beedi leaves which yield good revenue. Mangoes and custard apples have come up well in this district.

Fauna

The district possesses an enormous population of livestock totalling 9,93,278 according to the 1961 quinquennial Census, of which 4,79,004 are cattle and 1,65,677 are buffaloes. The numerical strength is very interesting indeed, but when we take a realistic view of the situation the picture at once becomes gloomy. The productivity of the cattle is absurdly low. Remarkable progress has been made in combating cattle diseases during the past few years and in this respect the research work carried out in genetics at the Indian Veterinary Research Institute at Izatnagar, and in the All-India Diary Research Institute can claim credit. Cattle diseases such as Rinderpest, Anthrax, Black Quarter and Foot and Mouth diseases which were highly prevalent causing enormous loss have been controlled considerably through effective Veterinary and Animal Health Services.

The number of livestock and poultry of different categories in Nizamabad district, as per the quinquennial Censuses of 1951 and 1961 can be seen from

the table under the chapter on "Animal Husbandry".

Geology and mineral resources

A note on the geology and mineral resources of Nizamabad has been compiled by the Geological Survey of India, Andhra Pradesh Circle, Hyderabad and this has been reproduced in the following pages.

The district is essentially composed of Peninsular granite complex with Deccan trap rocks in parts of the western half of the district. Small patches of lower Precambrian rocks have been reported from Armur taluk. The Peninsular granites consist of both massive and banded rocks with associated aplites, pegmatites and quartz, veins. The granites are essentially composed of quartz, pink or grey felspars, small quantities of mica or / and hornblende and apatite or sphene as accessory minerals. The pink and grey granites occur together or alone to the exclusion of the other. Generally speaking, pink granites are intrusive into the grey variety and each is associated with its own set of pegmatites and quartz veins. The granite rocks are light to dark grey and pink in colour, medium to coarse-grained in texture and sometimes porphyritic. They occasionally develop a binary character consisting of mostly quartz and felspars, with very little or no ferromagnesian minerals. The pegmatites are coarse rocks consisting of quartz and felspars, the latter sometimes occurring as bigcrystals 2–3 inches long. The quartz reefs and veins occur as numerous runs composed of white hungry looking, barren quartz. Numerous dark basic dykes-dolerite dykes-traverse the granitic country in various directions.

The Deccan trap rocks which cover small portions of Nizamabad, Banswada, Bodhan and Yellareddy taluks consist of massive or vesicular and amygdaloidal flows of basalt forming high table-top plateaux. The Deccan trap plateaux near Lingampet, Sangium, Pothangal, Diemey, Dhaggi etc., in Yellareddy and Banswada taluks are capped by reddish ferruginous laterites. In a few places like Rajampet in Kamareddy taluk some inter-trappean beds (infra in position) are exposed. They consist of siliceous shell stones, marls, sandstones and cherts which are fossiliferous.

Mineral resources

Iron ores

Lateritic iron ores from ferruginous laterites capping the Deccan trap rocks have been reported from the following areas :

1. Rajurgutta near Gadkal, Basiralagutta near Ravutla in Armur Taluk ;
2. Sangium and Pothangal hill in Banswada Taluk ;
3. Deimey, Erragutta near Kondapur, Thippapur, Dhaggi and Kyratlapalle in Yellareddy and Kamareddy taluks.

The percentage of iron oxide in the Nizamabad laterites varies from 13.9 to 60.98 and that of alumina from 0.55 to 36.0.

Precambrian banded, ferruginous quartzites and schists have been noted in Mallaram hills of Peddagutta and Bakulagutta, Soonkittah, Kamarapalle-Uskagutta and Lingapur–Metapalle–Dubba–Worsikonda area. Iron smelting has been an ancient industry in Nizamabad district. Konasamudram in Armur taluk was well known for its steel famed as Indian "Wootz" out of which the world famous Damascus swords were made. The old workings for iron and the associated slag heaps in the neighbourhood of the above areas testify to the active iron smelting industry in the past. This once prosperous cottage industry is now practically dead. The iron-ores which are poor in quality (29 to 42% Fe) do not warrant any development on a modern scale.

Manganese ore

Encrustions of pyrolusite were noted near Rajampet and Kondapur in Kamareddy taluk. The mineral occurs in association with calcareous nodules about 18 inches thick, resting upon hard kankar limestone and overlain by lithomarge and laterite soil. The occurrences do not warrant any economic exploitation.

Aluminous boles

Samples of aluminous bole from Goorjakuntla Kamareddy taluk and Kyrtlapalle in Yellaredd, Taluk assay 25.5 and 36.3 per cent A I_2 0_3 respectively. These boles are whitish to purplish blue in colour and consist of fine aluminous material from which most of the ironoxide has been iliminated.

At Godkal and Basiralagutta of Ravutla in Armur taluk bluish aluminous clay galls occur associated with lithomarge in latertitoid accumulations.

Clays

In some places, *e.g.*, south of Thippapur near Bhimur, Kupryal etc., at the base of the Deccan Trap in the cantact zone with the granite, white calcareous kaolinised earth is found in appreciable quantities. These may be useful for whiting. Fireclay from Konasamudram has been reported. Lithomarge and ochreous clays are sometimes found associated with laterites.

Decorative stones

Intertrappean cherts and silicified shell stone found in the Deccan Trap areas may be cut and polished into decorative articles.

Agates, chalcedony, plasma and other hydrated silica minerals found as geodes in the Deccan Trap areas may be cut and polished into semi-precious stones and cheep jewellery.

Building stones

Varieties of coloured granites and Deccan Trap rocks yield excellent material for heavy constructions, buildings and decorative work. Dyke rocks and quartz veins supply huge quantities of good material for road metal and ballast. Some of the purer varieties of quartz veins and felspars associated with coarse pegmatites may yield suitable material for ceramic industry.

Mica, soapstone and amethyst

Small books of muscovite mica have been noted in the pegmatites of Kamarpalle valley, and soapstone is reported from Choutpalli area. Stray occurrences of amethyst quartz and black tourmaline have been noted in Kamareddy taluk.

So far no mining operations have been conducted in Nizamabad district except for building stone and sand on a minor scale.

CHAPTER II

HISTORY

Nizamabad was known as Indur even till the early years of this century. Even Indur is a variation of Indrapuri, said to have been named after an ancient king. "This king, it is said, was Indradatta of the rebel Trikutaka dynasty Circa 388 A. D. who ruled over the lower region of Narbada and Tapati or the mighty Vishnukundin Indravaraman I Circa 500 A. D."[1] However, this derivation of the name is not based on any authentic record and so it is not possible to confirm the above statement. From 650 A. D. to 950 A. D. very little is known of the history of the Deccan, but for a few inscriptions discovered by the Archæological Department in and around the district. These inscriptions throw some light on the history of the district during this period. In the early part of the 8th century Rashtrakutas supplanted the Chalukyas, and ruled over the area for over two hundred years. The name Rashtrakuta had neither an ethnic, nor a tribal significance. As in the case of Deshmuks or Desais who were officers in charge of Desas or districts, so also Rashtrakutas, were officers in charge of territorial divisions called Rashtras, into which the Kingdoms were divided. "The founder of the Rashtrakuta dynasty was Dantidurga who ruled from A. D. 735 to A. D. 755."[2] After the death of Dantidurga, and probably in the reign of Nityavarsha Indra III who ruled from A. D. 915 to 917, Bodhan was made the capital[3] and the emperor founded a temple in "Bodana" dedicating it to the God Indra Narayana evidently so named after himself.[4]

Indur or Indrapuri in which Bodhan was situated probably indicates the connection of Emperor Indra with this locality. The Fort of Nizamabad in which the Central Jail is now located was probably constructed by the same king.[5] In about A. D. 807 Malkhed (the present city of Gulbarga in Mysore State) became the capital of the Rashtrakutas during the reign of Govinda III and continued to be so till the extinction of this dynasty. The Sangali grant of Govinda IV and the Karda grant of Karkka II make a mention of Malkhed as the capital of these kings.[6] It was during the reign of Karkka II (972-973) the last of the Rashtrakutas, that Malkhed was attacked by Taila II of the Chalukyan family. Karkka escaped from the battle field leaving Malkhed in the hands of Taila II. Consequently both Indur and Bodhan were annexed to the Chalukya Empire. "Jogaparayya one of the subjects of Trailokya-malladeva, a Chalukyan King, noticing the ruined condition of the Bodhan temple erected a fine Vishnu temple adorned with lofty towers."[7] Indur remained under the Chalukyan influence till about 1030 A. D., when it was captured by the western Chalukyan Kings under the able leadership of Prola I. Delighted by the military ability and unswerving loyalty of Prola I, the Chalukyan Emperor Ahavamalla Somesvara I granted him Anumakonda-Vishaya as a permanent fief. Prola I thus became the founder of the Kakatiya principality, which under his ambitious successors developed into a powerful kingdom in 1235 A. D., embracing the whole of the Telangana region. Indur must have therefore been under the Kakatiyas till it came under the sway of the Muslim rulers from the north. The Muslims first made their appearance in the Deccan about the middle of the 13th century when Allauddin Khilji led his expedition against the Telangana. In 1310 A. D. Malik Kafur, one of the ablest generals under Sultan Allauddin Khilji, marching towards Warangal conquered Indur and Bodhan and destroyed them.[8]

After the extinction of the Khilji dynasty, there was some political disturbance in the country and ultimately Ghiyasuddin Tuglaq, ascended the throne and proclaimed himself Sultan in 1320. After consolidating his authority he turned his attention to the south and in 1323 he sent an expedition against the Telangana under his son Mohammad Bin

Tuglaq who captured the forts of Qandhar and Indur and finally reached Warangal where he defeated and arrested King Prataparudra. Malik Maqbool was appointed as the Governor of the Telangana by Mohammad Bin Tuglaq. Thus Indur was also brought under the domain of the Tuglaqs.

In 1347 Zafar Khan, more popularly known as Hasan Gangu Bahmani, an able military officer under the Tuglaqs, declared independence, and established himself as the King of the Deccan with Gulbarga as his capital, under the title of Allauddin Bahmani Shah. His dominion included the forts of Bodhan and Indur and on the break up of that kingdom these fell into the hands of the Qutub Shahis of Golconda. De Thevenot, a French traveller, who visited Golconda gives a description about this district as follows: "We arrived at Indur which belongs to a Raja, who owns the Mughals no more than he thinks fit. He is maintained by the King of Golconda, and in the time of war he sides always with the strongest. He would have had us pay two Rupees a waggon; but after much dispute, we paid but one, and passed on. We came before a village called Basantpuri, and being informed, that near to that place, on the top of a hill, there was a fair Pagod we alighted and went on foot to see it." From the above descriptions it seems that Indur was under a Hindu Raja for some time during the Qutub Shahis of Golconda. As to who this person was and what was his name is not known.

In the year 1555 Indur was under the control of Akbar the Great, on account of the Berar province coming in possession of Prince Murad, Akbar's son, in which Nirmal, Balconda, Indur and Bodhan were included.[1]

Aurangazeb appointed Md. Kazim as the Risaldar of Indur fort under the supervision of Mubariz Khan, the Governor of Deccan province.[2] Mubariz Khan after some time was defeated by Nizam-Ul-Mulk, the Governor of Malwa, at the battle of Shakkar Khera in Berar in 1724 A. D. Consequently Indur and Bodhan fell into the hands of the Asif Jahi dynasty.

At the time of the Prime Ministership of Sir Salar Jung I, the districts in the Nizam's Dominions were reorganised. Whereupon Indur became a district headquarters of a district by the same name in the year 1876 A. D.

In 1905, the taluks of Nirmal and Narsapur were transferred to the newly created district of Adilabad, and Mudhol and part of Banswada to Nanded. The rest of Banswada was divided between Bodhan and Yellareddipet, while Bimgal was merged in Armur. Other changes were made in Yellareddipet and Kamareddipet, and this district in its new shape came to be known as Nizamabad.[1]

CHAPTER III

POPULATION AND HOUSING

In this Chapter a brief review is made of the demographic, economic and social characteristics of the Population as well as the Housing pattern as revealed by the 1961 Census Operations. The detailed tables in the third part of this Handbook will give the fuller statistical data. The following statement gives an idea of where the district stands in comparasion with other districts of the state in respect of certain basic demographic data.

STATEMENT III-1

State/District	Area (in sq. miles)	Population	Density of population (per square mile)	Percentage of growth of population 1951-61	Percentage of Urban population	Sex ratio (females per 1,000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)

Population

On the 1st March, 1961 the reference date of Census 1,022,013 persons were found in Nizamabad district. This means an increase of 22.36% over the 1951 population. There are 328 persons per square mile in the district as against 339 in the State as a whole. The density of urban population in the district is 3,196 as against the corresponding State average of 4,340. The density of rural population is 285, which is slightly more than the corresponding State average of 284. The urban density figures for the 1951 Census stood at 19,629 for the district and 4,074 for the whole State. Amongst the districts of the State, Nizamabad district, with an area of 3,112.8 square miles occupies 18th rank in regard to area and 19th rank as regards population.

Distribution and density of population

The district, comprises of only 6 taluks and one independent sub-taluk. The most populous taluk is the Nizamabad taluk with 226,847 persons living in it. The next taluk in the order of population is Armur (221,461) followed by the taluks of Bodhan (157,330), Kamareddy (156,289), Banswada (103,693) and Yellareddy (82,671) respectively. Madnur independent sub-taluk recorded a population of 73,722 persons. Yellareddy taluk and Madnur independent sub-taluk recorded the least number of persons. Bodhan taluk is the most densely populated one with 512 persons per square mile followed by the taluks of Nizamabad (417), Kamareddy (348), Madnur (318), Armur (292), Yellareddy (227) and Banswads (226) respectively.

Growth of population

During the past six decades i.e., from the turn of the present century Nizamabad is the only district in Telangana region which has recorded the smallest percentage (47.23%) in the growth of population as against the State average of 88.73%. In this regard this district stands next to Srikakulam district in the entire State. Unlike the other districts in the Telangana region in which there was decrease in the growth of population in the decade ending 1921, this district registered a decrease in the growth of population also in the first decade of the present century. This decrease was markedly higher in the first decade than in the second decade, as is evident from the respective decade percentages of 19.03 and 3.35. Thus this district recorded a decrease in the growth of population by 19.03% during the decade 1901 to 1911, when there was overall increase in the growth of population by 12.49% in the State and this can be considered as quite an unusual feature. In the second decade too (1911 to 1921) the district had recorded a decrease in the growth of population by 3.35% as against the State average decrease of 0.13%. This reduction in population was more pronounced in the urban areas (20.98%) than in the rural areas (1.94%) from which it is evident that the urban areas were more affected than the rural areas.

The reason for the decrease in the decade ending 1921 is that the great influenza epidemic adversely affected the district as in the case of the other districts in the Telangana.

Gradually the district recovered from this epidemic and has since exhibited a considerable increase in the growth of population during the decade ending 1931, the percentage being 20.71, which is higher than the percentage of the next two decades in which the rate of growth was rather steady. In the decade ending 1931 the urban areas alone had shown a marked increase by 106.80% in the district. It is notable that during the decade ending 1961 the district envisaged a high rate of growth (22.36%) in population when compared with the percentages of the previous decades. During this decade Nizamabad and Bodhan taluks recorded an increase of 33.66% and 24.77% respectively which is higher than the overall increase in the district (22.36%). The increase in the growth of population in this decade is understandable on account of the extending ayacut under the Nizamsagar and the other irrigation projects which has drawn considerable number of immigrants from amongst the experienced cultivating families of the delta districts of the State. The Nizam Sugar Factory at Shakkarnagar in Bodhan taluk and the other fast developing industries might also have attracted several immigrants from the neighbouring as well as from the delta districts.

The following statement will illustrate the growth of population and percentage decade variation in the district as well as in the taluks since the turn of this century.

STATEMENT III-2

VARIATION IN POPULATION DURING THE LAST SIXTY YEARS FROM 1901 to 1961

Name of the Taluk/ District (1)	Year (2)	Total Population (3)	Decade Variation (4)	Percentage decade Variation (5)	Males (6)	Females (7)

Rural and Urban population

This district consists of 6 towns and 921 (865 inhabited and 56 uninhabited) villages. 85.49% of the total population lives in villages and only 14.51% lives in towns. Nizamabad and Bodhan towns occupy the first and the second places respectively in the district as regards urban population.

Sex Ratio

For every 1000 males there are 1,007 females in the district. In the 1951 Census their number was markedly higher as there were 1,019 females for every 1000 males, in the district. In the urban areas of the district there are 934 females for every 1000 males which is prominently less than at the 1951 Census figure of 972 and in the rural areas there are 1,020 females for every 1000 males and this figure is also less than at the previous Census figure of 1,028. In general it may, therefore, be seen that there is an overall shortage of males in the district. But as elsewhere in the State the urban area recorded much less women than men.

Age structure

Able bodied persons of above 15 years and below 55 years constitute 53.39% of the total population, the remaining being accounted for by children and young persons of age below 15 years (38.52%) and old persons of 55 years and above (8.09%). The age distribution of every hundred persons in the population is shown below :

STATEMENT III-3

Age group	Persons	Percentage
0—4	141,002	13·80
5—9	142,452	13.94
10 14	110,228	10·79
15-24	175,637	17.18
25-34	168,978	16·53
35-44	114,609	11·21
45-54	86,460	8.46
55-64	50,450	4.94
65-69	10,167	0·99
70 and above	21,965	2·15
Age not stated	65	0·01

From this table it is seen that very few people survive to old age.

Marital status

As elsewhere in the country marriage is universal. Out of the total number of 738,559 persons (Males 369,327 and females 369,232) aged above 10 years 632,749 have been found to be married (85.67%) and this number includes 94,395 widowed (Males 19,089 and females 75,306) and divorced or separated persons being 10,870 (Males 4,975 and females 5,895). The marital status of 1 male and 1 female is unspecified. 14.33% of the age group ten years and above were found to be unmarried. 78.34% of males and 93.01% of females comprise the married persons in this age group. In the 0–14 age group Nizamabad has a pronouncedly larger proportion of married children. Out of the total number of 283,454 persons below 10 years of age no one either male or female was found to be married. In the age group 10–14, out of a total number 110,228 persons, 11,999 males and 29,884 females were found to be married. Amongst these married persons 100 males and 332 females were found to be widowed and 41 males and 484 females were found to be divorced or separated. Another strange phenomenon is revealed from the study of the tables on matrimonial status of the population of Nizamabad district. As per the 1961 Census there is a shortage of 3,647 men only as compared to the total number of women in the district. It is seen that the total number of women married (343,415) is more than the total number of married men (289,334). The percentage of unmarried men to the total male population of above 15 years is 10.77 and of above 10 years is 21.66. This imbalance of more married women than men may be either due to some men getting married to more than one woman or due to the females usually getting married in the early ages or men going to other places to seek their livelihood, leaving their wives at home or women coming to their parents for confinement and temporary stay. This problem is, therefore, likely to be an interesting subject for sociological study.

Literacy and Education

The development of a country largely depends upon the education of its people and hence great stress has been laid on education in our Five Year Plans. Education is the systamatic instruction, schooling or training given to young persons in preparation for the work of life, while literacy is the ability of a person to read and write in order that he can communicate with the outside world. During the Census enumeration information regarding literacy and educational levels of each person was collected and the particulars were so tabulated as to facilitate proper planning for the improvement of educational facilities with reference to the needs of the country in various fields.

At the present Census a person who can both read and write any language is taken as a literate. A person who can merely read but cannot write has not been treated as a literate. The test for reading is the ability to read any simple letter. Children aged 4 years and below have been automatically treated as illiterates. If a person has been successful in a recognised examination or examinations, the highest qualification so obtained has been taken as the level of education of that individual. Columns 18 and 19 of the Village and Town Directory given in Part IV of this Handbook indicate the number of literates among males and females in each village and in each ward/locality of the town. The following statement gives at a glance the total number of literates as well as their percentages to the population in the district and in each of the taluks of the district sex-wise for the total, rural and urban population.

STATEMENT III-4

District/Taluk		Total Population			Literates			Percentage of Literates		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)		(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

It may be seen from the above statement that 14.32% of the population of the district are literate against the corresponding figure of 21.19% for the State as a whole. The district percentage is very low as compared to the State percentage and this shows that the district is educationally backward. The incidence of illiteracy among females is very heavy. Only 5.73% of the female population are literate and the remaining 94.27% of females are literate. 22.98% of males, however, claim literacy.

STATEMENT III-5

The following table will illustrate the literacy in the district according to the different age groups.

The number of educational institutions and scholars reading therein in the year 1960-61 are given in a separate table under Administrative Statistics in Part II of this Hand Book.

Working Population

Persons engaged in productive work whether they derive income or not have been treated as 'Workers' in the 1961 Census. In respect of seasonal work like cultivation, livestock, household industry etc., if the person had some regular work for more than one hour a day throughout the greater part of the working season, he has been recorded as a worker. Persons temporarily incapacitated, undertrial prisoners, if they had been working before, have also been treated as workers. Those that were treated as 'Non-Workers' were wholetime students, housewives, dependants, persons permanently disabled from work, retired persons, people of independent means for which they need not work, beggars, convicts in jail, unemployed persons etc.

From the above classification of 'Workers' and 'Non-workers', it may be seen that the definition of a worker has been liberally conceived. Anyone who generally spends more than an hour a day on any particular productive occupation has been considered as a worker. 57.52% of the population is found to be economically active.

There are 252,680 persons between ages of 5-14 years, representing 24.72% of the total population. The recent trend has been to regard this age-group as representing the school going population. With the introduction of compulsory education this age group will henceforth be automatically eliminated from the working population. In 1961 Census, it is seen that 66,807 persons of this age group belong to the working population. That is 6.54% of the non-adults constituted the earning members of the population.

The figures of the district indicate that working women are not in keeping with their numbers. 50.52% of the females come under the inference of workers.

Persons engaged in Agriculture (Cultivation and Agricultural Labour) as their main work constitute 69.13% of the total working population. Women outnumber men in the category of Agricultural Labour. The following table based on 20% of sample of Household Schedules gives the figures of sample households engaged in cultivation classified by interest in land and size of land cultivated in total, rural and urban areas separately.

STATEMENT III-7

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED

Non-agricultural occupations provide employment to 30.87% of the total working population. The following table illustrates the broad categories of workers other than in Cultivation and Agricultural Labour and number of persons in each with their percentage to the total working population.

	Total persons	Percentage
	(2)	(3)
Household Industry (Category IV)	64,291	10·94
Other Services (Category IX)	44,007	7.49
Manufacturing other than Household Industry (Category V)	29,502	5·02
Trade and Commerce (Category VII)	18,997	3·23
Mining and Quarrying etc. (Category III)	15,232	2·59
Construction (Category VI)	5,124	0·87
Transport (Category VIII)	4,320	0·73

Though there is a Government General Hospital at the district headquarters the medical facilities in the district are miserably inadequate for the population of the district. As seen from the Census occupational returns, there are only 41 practitioners of modern medicine of whom only 2 are women. This means that there is one doctor for 13,056 males and one lady doctor for 256,415 women. Further, there are only 5 dentists, 79 nurses, 163 midwives and Health Visitors.

The following table illustrates the average number of beds, doctors, dentists, nurses, midwives and health visitors per 100,000 of tot population.

	Number	Per 1,00,000 population
	(2)	(3)
Beds	264	26
Doctors	41	4
Dentists	5	0.5
Nurses, Midwives & Health Visitors	242	24

There are about 365 persons who practise the Ayurvedic and Homeopathic systems of medicine. There are about 61 persons who profess to be physicians and have been classified under 'others'.

There are 328 Architects, Engineers and Surveyors in the district. Of these 127 are Civil Engineers, 26 Mechanical Engineers, 17 Electrical Engineers, 141 Surveyors and 12 others who have not been elsewhere classified.

On the educational side there are 48 University teachers, 163 Secondary School teachers, 808 Middle and Primary School teachers, 12 Nursery and Kindergarten School teachers and 1,395 teachers who have not been elsewhere classified.

On the juristic side there are 9 Judges and Magistrates, 96 Legal Practitioners and Advisers, 1 Law Assistant and 11 Jurists and Legal Technicians (including petition writers) who have not elsewhere been classified.

On the communication side there are 52 Railway Engine Drivers and Firemen. There are 829 Motor Vehicle and Motor Cycle drivers, 552 Cycle Rickshaw drivers and Rickshaw pullers and 1,147 animal drawn vehicle drivers.

Table B-V printed in the 'B' Series in Part III of this Hand Book gives full details regarding the people of various occupations among the working population of the district, classified by sex of persons. All these occupations have been classified according to the National Classification of Occupations. It provides an interesting field of study to the discriminating reader and will help to assess the requirements and the availability of resources and talent.

Scheduled Castes and Scheduled Tribes

The total Scheduled Castes population of this district is 163,104 persons representing 15.96% of the total population. The Scheduled Tribes population stands at 739 persons representing 0.07% of the total population. This district has a higher proportion of Scheduled Castes population (15.96%) than the State average (13.82%). The proportion of Scheduled Tribes population is quite negligible when compared to the State average. The highest concentration of Scheduled Castes is found in Madnur independent sub-taluk representing 20.08% of the general population of that taluk closely followed by Kamareddy taluk (19.21%), Armur taluk (16.67%), Yellareddy taluk (15.76%), Bodhan taluk (14.47%), Banswada taluk (14.23%) and Nizamabad taluk (13.58%).

As regards the Scheduled Tribes population, a large number of persons (264) are found in Nizamabad taluk (0.12%). The taluks that follow are Kamareddy with 188 persons, Bodhan 138 persons and Madnur independent sub-taluk 127 persons, while Armur and Yellareddy taluks record 11 persons each. There is not even a single member belonging to any of the Scheduled Tribes in Banswada taluk. On the whole the district average is 0.07% of the total population which is far below the State average of 3.68%.

Of the total population of Scheduled Castes 80,635 are males and 82,469 are females and this shortage of males is not different from the characteristics of the general population of the district. There is a shortage of 32 males for every thousand females in the Scheduled Castes population of the district. The extent of literacy among the Scheduled Castes population is low, more so among the females. Only 409 females (0.50%) and 5,068 males (6.29%) are literates.

107,657 persons are workers representing 66.01% of the total Scheduled Castes population. 55,794 men and 51,863 women come under this category. Their major occupation is working as Agricultural Labour and as usual women outnumber men in this field. Very few have taken to manufacture, construction, trade and commerce and transport and communications. This seems to be due to lack of appropriate training and orientation. There are very few persons who have reached even the Matriculation or the Higher Secondary stage. The actual figures for the stage are 90 males and 3 females representing 0.11% and 0.004% of their respective numbers. These figures by themselves aptly illustrate the need for the upliftment of these communities through more advanced education and technical training. It is also seen that though the percentage of workers among these communities

is higher than the district percentage, yet the sort of work that is being done by them is only of the lowest category.

The following Table illustrates the population particulars of the various Scheduled Castes enumerated in Nizamabad district at the 1961 Census.

STATEMENT III-8

Name of Scheduled Caste	Rural	Urban	Total
(1)	(2)	(3)	(4)
All Scheduled Castes	**149,135**	**13,969**	**163,104**

23 Mitha Ayyalvar	379	3	382
24 Samagara	87	120	207
25 Sindhollu (Chindollu)	159	11	170
26 Scheduled Castes not specified	292	197	489

The Scheduled Tribes population of the district is 739. More than one third of these persons live in Nizamabad taluk alone. Kamareddy and Bodhan taluks and Madnur independent sub-taluk share most of the remaining population while Armur and Yellareddy taluks accommodate each 11 persons and not even a single person is living in Banswada taluk. Their economic and social conditions are no better than those of the Scheduled Castes. Their educational achievements are hardly worth mentioning. Their main occupation is Agriculture and Agricultural Labour, and a few of them work in Mining and Quarrying etc., and in Household Industry.

The following table illustrates the population particulars of the various Scheduled Tribes enumerated in Nizamabad district in the 1961 Census.

STATEMENT III-9

Name of the Scheduled Tribe	Rural	Urban	Total
(1)	(2)	(3)	(4)
All Scheduled Tribes	**724**	**15**	**739**
1 Chenchu	59	...	59
2 Gond	628	15	643
3 Kolam	6	...	6
4 Thoti	18	...	18
5 Scheduled Tribes not specified	13	...	13

Social and Religious Groups

Hindus form the bulk of the population constituting 88.12% and this major religion is followed by the Muslims (10.38%), the Christians (1.41%) and the Sikhs (0.07%). There are only 178 Jains, 14 Buddhists, and 29 others also living in the district.

Migration

Migration of persons from one part of the country to another part is not uncommon and more so in between districts in the State. Generally migration is prompted by the economic conditions existing in a particular place like famine conditions, employment opportunities, trade and commerce etc., and the desire to improve the standard of living. Nizamabad district bounded by Medak on the south, Karimnagar on the east, Adilabad on the north and Nanded district of Maharashtra State on the north and west is economically better compared to the other districts in Telangana region and hence naturally attracts persons from the neighbouring areas. Amongst the three districts of this State that surround this district Adilabad is comparatively more backward, perhaps the poorest and least populated district in the State, than the other two. Due to the fertility of the soil in the district and better irrigation sources like Nizamsagar and Pocharam projects, good number of persons have emigrated from Karimnagar and Medak districts to Nizamabad district. A detailed study of the migration trends in this district reveals that 129,305 persons (60,485 males and 68,820 females) have immigrated into this district from other districts of the State and 35,669 persons (15,245 males and 20,424 females) from other States in this country. 429 foreigners are also found in this district. 38,597 persons (18,641 males and 19,956 females), have migrated from Medak district followed by migrants from Karimnagar

34,254 (15,364 males and 18,890 females), Adilabad 14,047 (3,277 males and 10,770 females), Hyderabad 12,351 (6,082 males and 6,269 females), Warangal 3,564 (2,111 males and 1,453 females), Nalgonda 3,510 (1,562 males and 1,948 females), Mahbubnagar 1,942 (1,128 males and 814 females), and lastly Khammam 1,130 (355 males and 775 females) in the Telangana region.

As regards immigration of people from the Andhra and Rayalaseema regions, Guntur and Krishna districts stand in the order of priority, as 8,298 (5,684 males and 2,614 females) and 5,021 persons (2,711 males and 2,310 females) have migrated into Nizamabad district respectively. The other districts that follow these two are East Godavari with 2,260 persons (1,384 males and 876 females), Nellore 1,512 (846 males and 666 females), West Godavari 1,180 (512 males and 668 females), Kurnool 909 (388 males and 521 females), Cuddapah 343 (243 males, and 100 females), Chittoor 163 (60 males and 103 females), Visakhapatnam 109 (62 males and 47 females), Anantapur 82 (54 males and 28 females) and lastly, Srikakulam 33 (21 males and 12 females). It is evident from the above that except from Warangal and Mahbubnagar districts, more number of women have immigrated into this district than men from the districts in Telangana region mainly on account of ties of marriage, while more male population than female population have migrated from all the coastal and Rayalaseema districts except from West Godavari, Chittoor and Kurnool from which more females have migrated than males. The majority of the workers among migrants have taken to cultivation and agricultural labour and a few of them are engaged in Household Industry, Trade and Commerce and in other services. About one third of the immigrants constitute non-workers most of whom are female housewives drawn into this district by ties of marriage.

Considerable number of persons have immigrated into this district from the other States in the country and they are as many as 15,245 males and 20,424 females. Amongst the immigrants good number of persons are from the neighbouring States of Maharashtra and Mysore.

As regards emigration of population it is noticed that 16,324 males and 26,355 females have gone out of this district to the other parts of the State, mostly to the neighbouring district of Medak, 12,302 persons (2,513 males and 9,789 females), Adilabad 10,173 (4,229 males and 5,944 females) followed by Hyderabad 9,795 (4,861 males and 4,934 females), Karimnagar 6,110 (2,253 males and 3,857 females), Nalgonda 814 (517 males and 297 females), Warangal 702 (322 males and 380 females), Mahbubnagar 576 (229 males and 347 females) and lastly Khammam 530 (351 males and 179 females). It is significant to note that Hyderabad district received comparatively more number of persons than Karimnagar district even though the latter is in proximity to Nizamabad district and it may be due to the obvious reason of its having the State Capital. It is also seen that amongst the emigrants also women out-number men except to the districts of Nalgonda and Khammam. Emigration of population to Coastal and Rayalaseema districts is of little significance as 1,677 persons only have migrated to all these districts. Amongst these districts which have received the bulk of the migrants are Guntur and Krishna with 365 (212 males and 153 females) and 343 persons (191 males and 152 females) respectively and this may be attributable to the fact that these persons may be the relations of those recently settled in Nizamabad district from these districts. These are followed by Visakhapatnam 272 persons (261 males and 11 females), Kurnool 272 (112 males and 160 females), West Godavari 229 (169 males and 60 females), East Godavari 78 (48 males and 30 females), Nellore 56 (33 males and 23 females), Cuddapah 41 (10 male, and 31 females), Chittoor 13 (10 males and 3 females) Anantapur 6 (2 males and 4 females) and lastly Srikakulam to which 1 male and 1 female have emigrated. It is generally observed that amongst the emigrants to the Coastal and Rayalaseema districts men outnumber women. This negligible number of out-migrants from this district to many of the districts in Andhra and Rayalaseema Regions may be in connection with business or to meet their relatives.

In general it is noticed that emigration of population is more pronounced from the rural areas of this district to the rural areas of the other districts which may be due to some persons going out to find some sort of employment for their livelihood.

Housing

Though next to food and clothing, man requires shelter as his necessity, it is a known fact that many people, specially in the urban areas, are deprived of even the barest shelter. It is an ordinary sight in urban areas to see many poor hunger stricken people living on pavements with no shelter to protect them.

The migration of the people from the rural areas to the urban areas for their livelihood has further accentuated this problem. The pressure on land in urban areas has become so great and the land so dear that it has gone beyond the reach of a common man and consequently slums and unhealthy localities have grown up resulting in sub-human living conditions.

With a view to improve the situation and for future planning of the housing programmes the Government of India suggested to the National Buildings Organisation working under the Ministry of Works, Housing and Supply to collect in collaboration with the Registrar General, India, during the 1961 Census operations basic data on housing required by the Planning Commission. A common questionnaire was, therefore, evolved for the entire country and an attempt was made during the 1961 Census operations to collect the required, comprehensive data on housing to meet the needs of the National Buildings Organisation. This data on housing does not merely confine itself to residential housing but brings under its fold places of business, workshops, schools, restaurants, places of entertainment, hospitals *etc.* From the information so gathered it has now become possible to assess not only residential housing requirements but also the adequacy or otherwise of the requirements of Industry, Commerce, Education, Public Health Institutions *etc.*

Dwellings

In Nizamabad district as elsewhere in this State houses used wholly or partly for dwelling purposes form the largest proportion of the Census Houses. 196,054 houses out of a total number 293,869 houses are used wholly as dwellings, 628 houses as shop-*cum*-dwellings and 3,460 houses as workshop-*cum*-dwellings. Some of the part dwellings like laundry-*cum*-dwellings, barbers' saloon-*cum*-dwellings have been included under the category of 'others'. If these houses are also taken into account the proportion of the houses used wholly or partly as dwellings will be higher. It is seen that the proportion of dwellings to population in the rural areas is more than in the urban areas. Thus for a rural population of 873,715 there are 170,715 dwellings, while for an urban population of 148,298 there are only 25,339 dwellings. This means in the urban areas there are 171 houses for every thousand population and in the rural areas 195 houses accommodate every thousand persons. It is obvious from these figures that there is over crowding in residential housing. Thus proportionate increase in residential accommodation has not kept pace with the growing needs of a fast developing population.

The proportion of Census Houses used as shop-*cum*-dwellings is very very small and is only slightly more than 2 per thousand houses in the district.

Workshop-*cum*-dwellings

Workshop-*cum*-dwellings are more than the shop-*cum*-dwellings and their proportion among total Census houses is about 12 per thousand houses in the district. This seems to indicate that separate workshop facilities are inadequate in this district. Out of 3,460 workshop-*cum*-dwellings, 2,905 are located in rural areas as against 555 in the urban areas of the district. This illustrates that rural areas of the district are also in the know of using machines and other mechanical implements.

Hotels, hostels and dharmasalas *etc.*

Hotels, Hostels and Dharmasalas *etc.*, account for about 0.15% of the total number of Census Houses in the district and their percentage is slightly higher than the State percentage of 0.14 for this category. The proportion is higher in urban areas than in the rural areas and it may be due to more number of hotels.

Shops excluding eating houses

Shops excluding eating houses are slightly more than 14 per 1000 in the district and this figure is slightly higher than the State average of 1.3%. The urban proportion as everywhere in the State is considerably higher than the rural proportion.

Business houses and offices

The proportion of business houses and offices to the total Census Houses is very small in the district *i. e.*, 679 out of a total number of 293,869 houses. In this category, though the number of houses in the rural areas is higher they are not in keeping with the proportion in urban areas.

Factories, Workshops and Worksheds

There are 2,533 Census Houses in the district which are used as factories, workshops and worksheds, 1,772 in the rural areas and 761 in the urban areas. There are about 9 houses used as factories, workshops and worksheds out of every 1,000 houses in the district. The proportion is higher in the urban areas than in the rural areas. The inference that can be drawn is

that the district is somewhat industrialised when compared to many of the districts in the Telangana area.

Educational Institutions

There are 554 Census Houses in the district which are used as schools and other educational institutions. Of these 462 are in the rural areas and 92 in the urban areas. For every 1,000 houses there are about 2 houses under this category in the district. The proportion is higher in the urban areas than the corresponding proportion in the rural areas. There is one school for every 1,891 persons in the rural areas, while it is one for 1,612 persons in the urban areas of the district.

Restaurants, sweetmeat shops and eating places

There are 795 restaurants, sweetmeat shops and eating places, out of a total number of 293,869 Census Houses. Out of this number 651 are in the rural areas and the remaining 144 in the urban areas. In this category there are 3 houses for every 2,000 houses in the rural areas, while in the urban areas there are 4 houses for every 1,000 houses.

Places of entertainment, recreation etc.

Places of entertainment, recreation *etc.*, including temples, mosques and churches constitute 3,114 houses, 2.865 in the rural areas and 249 in the urban areas. The proportion is higher in the rural areas than in the urban areas which shows that the rural areas are not lagging behind in recreational facilities.

Hospitals, Public Health Institutions, Dispensaries, Clinics etc.

There are 177 Census Houses used as Hospitals, Public Health Institutions, Dispensaries, Clinics *etc.*, in the district. Of these 104 are in the rural areas and the remaining 73 in the urban areas. This proportion to the population, therefore, in the urban areas is much higher as compared to the rural areas. It is a very well known fact that medical and public health facilities are grossly inadequate in our country, especially in the rural areas and hence no further comment is considered necessary on the existing state of affairs.

As explained earlier, the category of 'others' includes houses put to miscellaneous uses like cattle-sheds, garages *etc.*, Consequently no distinct pattern is discernible in this category of houses in the rural and urban areas of the district. The proportion of houses in this category is higher in the rural areas than in the urban areas.

Wall and roof material of the houses in the district

The type of housing in this district is generally similar to the pattern obtaining in the rest of Telangana region and is distinct from that observed either in the Coastal Andhra or the Rayalaseema districts. "Country tiled houses" are more common than thatched houses. Particularly in this district one comes across villages almost entirely made up of country tiled houses; but in the Nizamsagar Project area certain isolated villages present an entirely different picture from the other villages of the neighbourhood. The habitations make it appear as though an entire coastal delta village had been uprooted and planted in the midst of the wet lands of the project. These are the villages put up by the migrants from the delta districts of the State who have bought the lands of this area and settled down in the last decade or two. The roofs of these houses are mostly made up of paddy hay.

In a country of meagre financial resources like India, construction has to largely depend on the availability of the local building material. Therefore the scope for variety in construction gets very much limited. Further, climatic conditions, reasons of security, traditions *etc.*, also play a large part in evolving certain housing patterns. The great majority of the population who cannot think of more than a single meal a day can hardly invest anything substantial on a house. The villager has to depend on his own resources *i. e.*, the material he can get free or at a very nominal cost and the efforts he and his family muster in the form of labour *etc.* The wall material that he can readily procure is earth from his own field, while the roof material may be of thatch made up of palmyra leaves which he can cut from the trees on his field bunds or the dry stalks of the crop that he grows on his own field or the reeds and grass which he can collect from the jungle.

Wall material

Mud is predominantly used as wall material. The proportion of houses with mud walls in the rural areas is generally higher than the corresponding figure in the urban areas. The rural areas account for 72.2% of the houses with mud walls as against the State average of 61.0%, whereas the urban areas record 51.9% of these types of houses and this figure is much higher when compared with the State average of 39.8%. It is evident that the proportion of houses raised with mud walls is generally higher in the rural areas than in the urban areas. But it is surprising

to note that urban areas of Armur and Kamareddy taluks record more than 70% of the houses constructed with mud walls.

Houses built of brick walls account for 10.8% in the rural areas as against the State average of 38.3%. But it is significant to note that Armur taluk alone records over 20% of the houses having brick walls. It is generally observed that the proportion of houses with brick walls is less in the rural areas than in the urban areas. However, the rural proportion is more than the urban proportion in Armur taluk. The use of bricks as wall material is common in house building in the urban areas and more so in recent years. House building activity has increased in the urban areas to a considerable extent and Nizamabad town alone accounts for 49.6% of this type of houses.

Stone is not commonly used as wall material in this district. Nizamabad town only records the lowest proportion in the State, the percentage being 0.2 as against the State average of 14.3%.

Grass, leaves, reeds or bamboo are also used for constructing walls in the district. Generally these materials are extensively used in the rural areas than in the urban areas. The materials generally used are dried stalks of redgram in the district where it is grown and bamboo in the forest regions. The percentage of houses having this type of walls ranges from 7 to 9 as against the State percentage of 7.6. The urban areas also record less than 10% of the houses built up of these walls. This type of construction is usually found in the slums on the outskirts of towns or the temporary labour sheds.

Houses with walls made of timber or cement concrete are found in very meagre proportions of 2 and 1 respectively per thousand sample houses and this material is used for the construction of walls to the extent of 1.3% of the houses in Banswada taluk.

Roof material

In the rural areas of the district tiles are mainly used as roof material followed by grass, leaves, reeds, thatch, wood or bamboo. In addition to these materials, corrugated iron, zinc or other metal sheets and a very meagre percentage of concrete and stone slabs are also used for roofing purposes in the urban areas. The rural areas of the district record 27.1% of the house tops covered with thatches and allied products, as stated above, as against the State average of 62.7%. Almost all the taluks in the district record equal percentage of houses having this type of roof tops. The proportion is higher in the rural areas than in the urban areas.

Tiles are more commonly used as roof material in this district. It is quite revealing to note that tiled houses are greater in proportion in the rural areas than in the urban areas of this district. This seems to be quite contrary to the general pattern of housing as seen elsewhere in the State. In the use of tiles as roof materials this district occupies the fourth place accounting for 57.4% in the urban areas as against the State urban average of 33.6%. In fact Armur and Kamareddy taluks record a proportion of 85.80% and 80.6% respectively and the remaining taluks account for more than 40%. The rural proportion is higher than the urban proportion in the taluks of Nizamabad, Armur and Bodhan. The majority of tiled roofs are commonly seen in the taluks of Nizamabad, Armur, Kamareddy and Banswada. Nizamabad town alone records 55.3% of the houses roofed with tiles. It is notable that the Nizam Sugar Factory provides houses with roofs mostly made up of more durable materials like metal sheets, asbestos sheets or brick and lime. 72.1% of the houses in the rural areas and 57.4% of the houses in the urban areas are roofed with tiles.

Brick and lime are also used to a small extent for roofing purposes and such roofs are popularly known as the "Madras Terrace". In the Telanga region the "Jack arch" type of masonary roofs is also common. The proportion of houses with this type of roof is more in the urban areas than in the rural areas. The district, in general, records quite a negligible proportion of this type of houses.

Corrugated iron or zinc sheets are used to the extent of 6.7% of the houses in the urban areas as against the State average of 2.7%. These materials are hardly used in the rural areas. It is evident that these materials are more commonly used in the Telangana districts than in the Andhra districts. In Bodhan taluk these materials are used for more than 5% of the urban houses. It is noticed that a high proportion of houses with corrugated iron, zinc or asbestos sheets is recorded in this taluk and this high proportion is due to the location of the sugar factory at Shakkarnagar, where the workers are provided with such houses.

CHAPTER IV
INDUSTRIES

Large scale Industries :

Nizamabad district on account of abundant irrigation facilities is an agricultural district and is also considered as one of the granaries of Andhra Pradesh. A great deal of sugarcane is grown here. Therefore, most of the large scale and other industries are agro-based with the bias on the exploitation of the sugarcane resources in the district. At Shakkarnagar of Bodhan taluk of this district is located the largest sugar factory in the country and which ranks amongst the larger sugar factories in East Asia. Its production capacity is 425 tons of sugar per day. Most of its raw material *i. e.*, sugarcane is obtained from within the district. As an ancillary to this industry, a Power Alcohol Factory is also situated at the same place. Its production capacity is 18,00,000 gallons per annum. Both these large scale units are under the public sector. There is one other distillery under the public sector at Kamareddy in Kamareddy taluk. The production capacity of this factory is 1,84,000 gallons of liquor per annum.

Apart from these existing large scale industrial units a few other large scale industries are proposed to be established in this district. The construction work on the Nizamabad Co-operative Sugar Factory at Jankampet in Nizamabad taluk has almost been completed, and the machinery has also been installed in the factory. This factory has gone into production from 14th November, 1964. A site has been selected for the construction of Messrs. Venkatratnamba's Textile Lld. near Nizamabad. The construction work is likely to commence soon.

Khandsari Sugar Mills

During the beginning of the Second Plan period the following Khandsari Sugar Mills were functioning in the district :

1. Messrs. B. Kishanlal Khandsari Sugar Mills
2. Messrs. Bharat Khandsari Sugar Mills

By the beginning of the Third Plan period the following Khandsari Sugar Mills had come into existence and were functioning in the district :

1. Messrs. Hind Khandsari Sugar Mills, Sulaimannagar, Bodhan,
2. Messrs. Venkateswar Khandsari Sugar Mills, Banswada
3. Messrs. Andhra Khandsari Sugar Mills, Banswada
4. Messrs. Khedya Khandsari Sugar Mills, Thirmalapur, Bodhan
5. Messrs. Vishnu Khandsari Sugar Mills, Banswada
6. Messrs. Yellareddy Khandsari Sugar Mills, Yellareddy

Each of these mills has a capacity of crushing 100 tons of sugarcane per day. The finished product *i.e.*, Khandsari sugar is marketted both within and outside the district.

Small Scale Industries :

Cement Tile Units : These units were established during the Second Plan period. During and before the First Plan period no such units were in existence in this district. Cement tiles, drainage pipes, and well rings are being manufactured by these units. The total output of these units has been estimated at 5,00,000 tiles per annum. On account of the durability and on account of the fact that they are cheaper than the Mangalore tiles there is a heavy demand for these in the district. The following are the established cement tile manufacturing units in this district :

1. Messrs. Kisan Cement Tile Works, Kisannagar.
2. Sri P. Narsaiah & Partners Cement Tile Unit, Morthad.
3. Sri Gangadhar & Partners Cement Tile Works, Morthad.
4. Messrs. Konda Somiah Cement Tile Works, Kamareddy.
5. Messrs. Balaji Cement Tile Works, Kisannagar.
6. Messrs. Jaibharat Cement Tile Works, Borlam.

Agricultural Implements : Agricultural implements such as *powdas, karru, palgu, and rahats etc.*, are being manufactured. The *rahats* manufactured are being purchased by the agriculturists of this

district for irrigation purposes. Messrs. M. Rajeswar Industries, Nizamabad is the only firm manufacturing agricultural implements. Raw materials are obtained from the Director of Controlled Commodities, Hyderabad on half yearly basis. The total output of this unit has been estimated at Rs. 10,000 per annum.

Cycle Industry: The Ajanta Cycle Industry at Nizamabad was established in the beginning of the Third Five Year Plan period. It manufactures cycle components such as mudguards, frames, seat stays, chain stays and carriers. Other components such as rims, handles, seats, chains *etc.*, are imported from other parts of India and the 'Ajanta Cycles' are assembled here. The cycles so manufactured are being supplied to the various Government departments on rate contract basis.

Plastic Bangle Industry: This industry was established in the beginning of the Third Five Year Plan Period. The raw materials required for the manufacture of plastic bangles are cellulose acetate film scrap, cellulose acetate butterate moulding powder, aluminium foils, butter paper, cellulose nitrate sheets, diacetone-tetraclorathene, and accrelic plastic sheets. All these above raw materials have to be imported from outside India and hence import licences are being obtained from the Joint Chief Controller of Imports and Exports, Madras. So far this industry has been given permits for raw materials worth Rs. 26,000/-. The bangles manufactured by this unit are very attractive and they have considerable demand both within and outside the district. The total output of this unit is estimated at Rs. 24,000/- per annum.

Mangalore Tiles Industry: Work on the construction of Mangalore Tile Factory by name "Kisan Tile Works" at Kisannagar in Armur Taluk has almost been completed and the required machinery has also been installed. The production of tiles is likely to start very soon. The production capacity of the factory is expected to be 3,000 to 4,000 tiles per day.

Industrial Co-operatives: During the First Plan period five Industrial Co-operative Societies for tanning, shoe-making, carpentry, *etc.*, were registered with the total membership of 115 persons. No financial assistance was given to the Societies by the Government. During the Second Plan period 55 Cottage Industrial Co-operative Societies were registered with a total membership of 1,825 persons from various industries such as oil, handpounding, leather, carpentry, blacksmithy, gur and khandsari, pottery *etc.* The Andhra Pradesh Khadi and Village Industries Board provides, financial assistance to the societies coming within its fold while the other societies were given financial assistance by the Department of Industries and Commerce. During the Third Plan period 8 Industrial Co-operative Societies in different industries such as tanning, carpentry, gur and khandsari etc., with a total membership of 446 persons were organised. Financial assistance was also extended to these societies by the Andhra Pradesh Khadi and Village Industries Board.

Loans: During the Second Plan period an amount of Rs. 1,60,000/- towards loan under "State Aid to Industries" was disbursed to the deserving artisans and co-operative societies of this district for the development of carpentry, blacksmithy, brass-smithy, tinsmithy *etc.* On account of this assistance the artisans have been able to purchase improved types of tools, equipment and machinery and have thus been able to better their respective trades. During the Third Plan period an amount of Rs. 65,800/- was disbursed to the artisans as loans under the "State Aid to Industries" scheme. Co-operative Societies were also brought under the purview of this scheme for the grant of loans.

Industrial Estates

The scheme for the establishment of a Government Industrial Estate in this district during the Third Five Year Plan period was sanctioned in G. O. Ms. No. 6181, Industries Department dated 25-10-1962 at a total cost of Rs. 15 lakhs. A site measuring an extent of 56 acres and 12 guntas for the establishment of the estate has been selected on the Nizamabad-Bodhan road, 5 miles from Nizamabad at Jankampet village. The following buildings are nearing completion :

'B' type factory units	4
'C' type factory units	4
'D' type factory units	12
'E' type factory units	8

Administrative buildings and Watch and Ward quarters *etc.*

Arrangements were also being made for the supply of electricity to the estate area. 29 Industrialists of this district have come forward to start

industries in the estate. The following is the list of the industrialists with a line of manufacture approved by the Director of Industries and Commerce, Hyderabad.

Sl. No.	Name of the applicant	Type of building applied	Line of manufacture
(1)	(2)	(3)	(4)
1	Messrs. B. Kishanlal Bicycle Industry	B	Cycle parts and assembling
2	Messrs. Nizamabad Surgical Instruments Manufacturing	B	Surgical Instruments
3	Messrs. Thermometer (India)	B	Clinical Thermometer
4	Sri Mahboob Mirza	B	Steel furniture
5	Sri Shaik Imam & Sons	B	Rubber components and automobiles
6	Sri Shaik Imam & Sons	B	Printing ink
7	Sri B. Raghuveeriah	C	Block pressure instruments
8	Sri Konda Veeranna Polasambiah	C	Barbed wire
9	Sri Dayaram Metha Ram	C	Fertilizer mixture
10	Sri Hafiz Abdul Kareem	C	Umbrella ribs
11	Sri Sardar Welding & Turning Works	C	General Engineering Workshop
12	Sri Balkishan Harikishan	C	G. I. buckets & watch strap
13	Sri Laljee Mathurdas & Co.	C	Builders Hardware
14	Sri M. Rajeshwar Iron Works	E	Agriculture implements
15	Sri B. Seetharamaiah Ethonda, Bodhan	F	Wire Nails
16	Sri Man Mohan Reddy	F	Polythene plastic
17	Sri M. A. Waheed Suhag Bangle Industry	E	Plastic bangles
18	Sri Jhobar Mill, C/o Bharath Khandsari Sugar Mill	E	Copper wire
19	Sri Ratanlal	C	Plastic Buttons and Rain Coat
20	Sri Ghanshyam Das Malani	F	Fountain pens
21	Sri Ghanshyam Das Malani	F	Corrugated paper board and boxes
22	Sri Nathumal Ghanshyam Das	B	Washing Toilet Soap
23	Sri Mukandlal Rathi	F	Essential oils from extraction
24	Sri Satyanarayan Bajaj	F	Wooden Furniture
25	Vijaya Industries	C	Ferrous Foundry
26	Sri G. Rajareddy, C/o Radha Medical Store		Paints & Varnish
27	Sri B. Laxmi Raj R/o Nizamabad	D	Natural essential oils
28	Sri Hindustan Cement Pipe and Allied Industries	B	R. C. C. Pipes, R. C. C. Jallies and Cement Tiles
29	Sri Raja Reddy, C/o Raja Medical Store	C	Biscuits and confectionery

Rural Industrial Estates

The Government have sanctioned a scheme for the establishment of a Rural Industrial Estate at Kisannagar in their G. O. Ms. No. 1729, Industries Department, dated 7-11-1962 at a total cost of Rs. 3,15,000/- to be implemented during the Third Plan period. The site required for the establishment of this estate has been selected on the Hyderabad-Nagpur road at Kisannagar and about 20 acres of land has already been acquired. 26 industrialists have come forward to start industries in this rural industrial estate. The following is the list of industrialists with their respective lines of manufacture who are willing to start industries in this estate.

Sl. No.	Name of Industrialist	Type of unit	Name of industry
(1)	(2)	(3)	(4)
1	Sri Rajeshwar Reddy, Jalalpur	G	Wire nails
2	Sri Narsing Rao, Sangam	G	General Engineering
3	Sri Narsagoud, Renjerla	G	G. I. Buckets
4	Sri Bhoom Reddy, Annaram	E	Wooden furniture
5	Sri P. A. Jacob, Kisannagar	G	Fountain pen ink
6	Sri P. Ramloo, Kisannagar	F	Hosiery
7	Smt. R. Abraham, Kisannagar	F	Confectionery
8	Sri Narsingdas, Mupkal	A	Straw board
9	Sri Gangadhar Rao, Magdi	B	Steel furniture
10	Industrialists Association, Kisannagar	G	Paddy mixture
11	Sri Ramchander, Umda	A	Hard Board from saw dust
12	Smt. G. Laxmi Bai, Morthad	B	Enamel Copper wire
13	Sri Laxma Reddy, Vennel	E	Builders Hardware
14	Sri Narayan Linga Reddy, Velpur	B	Cement hollow pipe
15	Sri N. Venkaiah, Doodgaon		Paints & varnish
16	Sri Bhoom Reddy, Mothey	G	Conduit pipes
17	Sri K. Kishta Reddy, Renjerla	E	Agricultural implements
18	Sri K. Kishta Reddy, Renjerla	F	Soap Industry (washing)
19	Smt. Laxmi Bai, Perket	B	Wire drawing from M. S. Rods
20	Sri V. K. Reddy, Kisannagar	B	Roofing Tiles
21	Sri Venkat Narayan Reddy, Nizamabad	D	Electric accessories
22	Sri Satyanarayan Reddy, Nizamabad	A	Nuts, bolts and rivets
23	Sri Pratap Reddy, Nizamabad	E	Wood screws
24	Sri Ranga Reddy, Velpur	F	Glass bangles
25	Sri Bhoom Reddy, Sarangpur	G	Safety matches
26	Sri Venkat Narayan, Velpur	G	Aluminium utensils

Sericulture

There is a Government silk farm at Bhiknur in the taluk of Kamareddy. This scheme was started in the year 1955. Its administrative control was transferred from the Assistant Sericulture Expert, Manair to the Assistant Director of Industries and Commerce, Nizamabad in the year 1958. This farm at Bhiknur is in charge of the Sericulture-Training-*cum*-Demonstration Scheme and also Sericulture relating to basic Seed Farm. The first scheme envisages propaganda amongst the agriculturists for taking up mulberry cultivation and the rearing of silk worms as subsidiary occupation to agriculture. Under this scheme training is imparted to 12 prospective Sericulturists in silk worm rearing methods. Two batches are trained every year and the trainees are paid monthly stipends. Under the second scheme a mulberry garden of seven acres is being maintained at the farm and silk worms are being reared for the production of basic seed cocoons.

Rural Arts and Crafts

During the First Five Year Plan period one Rural Arts, Crafts and Industries Centre was established at Navipet. This centre has the following sections :

Carpentry section, blacksmithy section, tape-weaving section, leather goods section, wool weaving section, tanning section, dyeing and printing section and cotton weaving section. Over 500 candidates have been trained in the above centre in the various trades.

Community Work Centres

During the Second Plan period the following centres were established in the district under the

Community Development Programmes for imparting training in better methods to the artisans :

1. Rural Community Workshops at Armur and Madnur
2. Common facility centre in carpentry at Rudroor, and
3. Tailoring centres at Bodhan, Madnur and Armur

Over 262 trainees have been trained in the above centres.

During the Third Plan period the following centres were established.

1. Common facility centre in carpentry at Banswada.
2. Tunga mat weaving centre at Banswada.
3. Bamboo & Rattan centre at Dichpalle
4. Peripatetic demonstration-*cum*-training unit in tape weaving at Navipet
5. Common facility centre in carpentry at Yedpalle
6. Tunga mat weaving centre at Bodhan
7. Common facility centre in village pottery at Dichpalle
8. Peripatetic demonstration centre in tape weaving at Bodhan
9. Tunga mat weaving centre at Madnur
10. Tailoring centres at Bhimgal, Mupkal, Kamareddy, Yellareddy, Madnur and Armur.

Over 350 trainees have received the benefit of training in the above centres.

Source : Assistant Director of Industries and Commerce, Nizamabad

CHAPTER V

IRRIGATION

Nizamabad district on account of the several large and small irrigation projects has come to be considered as one of the more important food Producing centres in the State. The Nizamsagar Project, and the Pocharam Project which are the bigger irrigation projects in the district have a large ayacut under them. With the proposed Pochampad and the Ramadgu Projects fructifying another large extent of wet acreage would be added to the existing already substantial land under wet cultivation. In the following pages a brief description of the various irrigation sources and acreages under each is furnished.

Nizamsagar Project: A masonary dam has been thrown across the Manjira river which is one of the important tributaries of the river Godavari. Till the year 1916 the waters of this important tributary were hardly being made use of. This project was contemplated with a view to irrigate 2,75,000 acres and generate 15,000 Kws. of hydro-electric power. The work on this project was commenced in 1924 and completed in 1930 and irrigation commenced from 1932.

The masonary dam described above connects various hillocks between the villages of Achampet and Banjapalle of Banswada taluk. At the site of the dam the river drains an area of 8,376 square miles. With an average monsoon rainfall of 812.8 m.m. the total yield was estimated at 1,13,700 M. Cft. The net storage capacity of the reservoir at the time when the project was constructed was 25,600 M.Cft. However, on account of constant silting up the present net storage is estimated at only 16,099 M. Cft.

The masonary and composite dam runs to a total length of over 3 miles with a 14′ wide motorable road at the top. The maximum flood discharge has been computed to be 4.5 lakhs cusecs. This gets disposed off through 28 automatic gates of 40′ x 15½′ size each (16 are situated on the left flank and 12 on the right flank). Further there are nine scouring sluices of 8′ x 15′ size each on the right flank. There are also two free over-fall weirs. The head sluice is situated on the right flank of the dam. There are 11 gates of 8′ x 10½′ each. Water is regulated into the main canal either through the pen-stocks of the power house or through the irrigation sluices. The main canal at the head has 100′ bed width and 10½′ depth. It was originally designed to carry 3,400 cusecs. But it actually carries only about 2,700 cusecs. The canal has to pass through high spurs and valleys. Across the Narva river an aqueduct of 12 vents of 20′ x 24′ has been constructed. The main canal passes through the three lakes *viz.*, Alisagar at mile 54/4, Masani at mile 65, and Gupta at mile 90. These three lakes function as balancing reservoirs. They have also added a lot to the scenic beauty of the district. The main canal branches off into 82 distributaries totalling a length of over 660 miles. About 55 distributaries lie in the perennial zone.

According to the original estimate an area of 2,75,000 acres (2,20,000 Abi paddy, 30,000 Tabi paddy, 20,000 sugarcane and 5,000 Baghat) was proposed to be irrigated under the project. The above forecast was based on certain assumptions of data and carrying capacity of the canal based on empirical methods. In actual practice it was observed that these assumptions were on high side. This estimate was, therefore, revised to 1,24,975 acres in 1950. The actual area developed so far is 2,07,000 acres. Some of the minor distributaries have been remodelled.

The total cost of the project was Rs. 392.21 lakhs. The annual maintenance cost of the project inclusive of works and establishment was Rs. 8.5 lakhs, upto 1963. For the year 1964-65 a grant of Rs. 7 lakhs towards maintenance has been provided.

The following are the principal features of the Nizamsagar canal :

1.	Length of the main canal and branch canals .	96.50 miles
2.	Length of the distributaries and minors .	660 miles
3.	Bed width of thecanal .	100 feet
4.	Depth of the water in the canal .	10½ feet
5.	Discharge in the canal .	3,430 cusecs
6.	Number of villages it will finally irrigate .	354
7.	Cost of the canal .	209.09 lakhs

Pocharam Project: The construction of the Pocharam Project was commenced in 1916 and was completed in 1922 at a cost of Rs. 27.11 lakhs. The

near the Pocharam village on reservoir is sk and Nizamabad districts. The the border o ted in the Medak taluk of Medak head works whole of the canal system is in district w aluk of Nizamabad district. This the Yella en formed by throwing a masonary reservoir m with a over-flow section across the gravity The maximum height of the dam above Allair n level is 100' while it is only 49' above the fo e river. The maximum flood discharge the be secs which will be disposed off by the is 70, on measuring a length of 1,780'. The surpl rea of the system at the site of the dam catch e miles of which 148 square miles is free is 2 t intercepted. The yield at the site of the an 4 1 M.Cft. The storage capacity of the d was 2,216 M. Cft. at the time of construc- e due to silting the capacity has been reduced 0 M. Cft. The reservoir has a water spread 6.50 square miles.

he main canal which takes off from the head e is 36 miles in length with bed width of 26' and supply depth of 4'. The discharge capacity of canal is 227 cusecs. 72 distributaries take off m the main canal. The canal system benefits 42 lages in the Yellareddy taluk.

The original proposed ayacut under this project as 13,069 acres. However, on account of the Nizamsagar Project which was constructed subsequently a portion of the ayacut of Pocharam was submerged and therefore at present 9,063 acres are irrigated under this project. During the first crop season the whole ayacut receives full supply of water. About 700 acres of sugarcane crop are also being cultivated.

Ramadgu Project : This project is proposed to be constructed 8 miles east of Dichpalle Railway Station. A reservoir is to be formed at Ramadgu by constructing an earthen dam 10' wide at the top with front slopes of 2 : 1 and 2½ : 1, and rear slopes of 2 : 1 and 3 : 1 across a stream which drains an area of 154 square miles. This proposed reservoir will have a storage capacity of 636.50 M. Cft. and will irrigate 3,800 acres in Abi and 1,000 acres in Tabi. However the total yield from the catchment area has been computed as 1,170 M. Cft. for a monsoon rainfall of 750.8 m. m. (29.56"). The maximum flood discharge has been computed at 40,000 cusecs. The surplus arrangements will consist of a regulator in deep river portion to discharge 11,715 cusecs of water. A 1,000' long weirin the saddle on the left flank will discharge the balance of 28,285 cusecs. Two sluices have been proposed one on the left flank and the other on the right flank with suitable sills to command the ayacut. Two canals will take off from the reservoir to irrigate the ayacut on either flank. The project is estimated to cost Rs. 30.82 lakhs.

As per original proposals the ayacut proposed is 3,800 acres in Abi and 1,000 acres in Rabi.

Recently the ayacut estimate has been revised. This revised estimate is 5,000 acres Abi. *i.e.*, 1,400 acres on the left canal and 3,600 acres under the right canal. The left canal will benefit the villages of Sudlam, Koratpalle and Kaligote while the right canal will irrigate the villages of Ramadgu, Kasaram, Mailaram, Chintaloor, Chengal and Bhimgal.

Pochampad Project : This project when completed will benefit the districts of Nizamabad and Karimnagar. The scheme envisages the construction of a weir across the river Godavari at Pochampad village 3½ miles on the upstream of the Soan bridge in Nizamabad district. The bridge is on the Hyderabad-Nagpur road. A canal 68 miles long emanating from the right flank will irrigate 3.6 lakhs of acres in Armur taluk of Nizamabad district and the Karimnagar district. Further large possibilities and untapped potentialities are anticipated for this scheme to be developed at a later stage.

An earthen dam has been constructed to facilitate the progress of work. Foundation for the dam has been raised on one side and the work is in progress. The living quarters, workshops and offices have been constructed. A very comfortable guest house partly air-conditioned has been completed.

The following are the salient features of this project :

Catchment area of the river at site	...	35,425	sq. miles
Maximum flood discharge	...	10,20,000	cusecs
Length of weir	...	2,500	feet
(a) Left flank	...	7,500	,,
(b) Right flank	...	1,200	,,
Capacity (Top of shutter at plus 1023)	...	542	M.cft.
Carrying capacity of the canal	...	4,260	cusecs
Bed width	...	100	ft.
F. S. D.	...	12	ft.
Length of canal	...	68	miles

Apart from these above mentioned existing and proposed large size irrigation projects, Nizamabad district contains hundreds of other minor irrigation

Projects which irrigate thousands of acres in the district. The following statement gives particulars of tanks villagewise under each taluk of the district with ayacuts of more than 200 acres each and which are being maintained by the Public Works Department :

Sl.No.	Name of the Tank	Name of the Village	Ayacut Acs.	Ayacut Gts.

Minor Irrigation

There are several irrigation sources which have ayacuts of less than 100 acres and which are being maintained by the Zilla Parishad since the year 1961. Prior to this year the Revenue Department was in charge of maintenance and repairs of these minor irrigation sources. The following statement gives particulars of the yearwise expenditure from 1961 to 1964 incurred by the Zilla Parishad on these minor irrigation sources.

Year	Expenditure under normal maintenance and repairs	Expenditure under additional Minor Irrigation Programme	Total
(1)	(2)	(3)	(4)
	Rs.	Rs.	Rs.
1961-62	87,888	59,422	1,47,310
1962-63	1,00,000	1,75,000	2,75,000
1963-64	3,00,000	5,03,000	8,03,000

CHAPTER VI

AGRICULTURE

It can be seen from the Chapter on Irrigation that this district does not lack in irrigation sources. The Nizamsagar Project and the Pocharam Project have brought limitless benefits to this district while several hundreds of smaller irrigation sources both under the Public Works Department, as well as under the Zilla Parishad have brought more and more prosperity to the land and the people comprising this district. It is, therefore, obvious that paddy is the most important crop in this district and, therefore, it is in a position to export this commodity to the neighbouring districts in the State. In other words it is a surplus district as far as paddy is concerned. A large area is under sugarcane which also requires substantial quantities of water. In the upland areas of Kamareddy Revenue Division most of the land is under dry crops like jowar, maize, groundnut, cotton, turmeric *etc.*

Out of the total area under cultivation in the district, 2,94,605 acres is under paddy, 45,073 acres is under sugarcane, 1,75,249 acres is under jowar, 55,798 acres is under Maize, 15,740 acres is under groundnut, 12,312 acres is under cotton and 1,826 acres is under turmeric.

The soils of the district are mostly *chalka* soils (morram). However, the taluks of Banswada, Bodhan and part of Nizamabad contain a richer variety of soil which is a mixture of lime and *chalka.* The *chalka* or regar soil is a finely pulverised reddish soil with sand and traces of lime and is well suited for rainy season crops. The normal rainfall in the district is 38.5". The crops receive the maximum benefit from the south-west monsoon. As the district is at a considerable distance from the sea coast it derives very little advantage from the north-west monsoon. The climate of this district is warm and damp from March to the end of September and temperate all the rest of the year. Further, on account of its large area under forests and due to various tanks, wells *etc.*, the claimate of this district is considered to be otherwise quite pleasant.

Crops and crop rotation : There are two crop seasons namely, the *Abi* and the *Tabi* for rice; *Kharif*, *Rabi* and *Maghi* (late Kharif) for dry crops, the last being intermediate between the *Kharif* and *Rabi* Seasons. Where there is a smaller extent of *Rabi* land, the *Kharif* sowing proceeds as late as July closely followed by the *Maghi* sowings. Certain kinds of rice may be sown in the *Abi* as late as the beginning of August if the rains are late; and the *Tabi* or the hot season rice crop is sown from December upto the end of February. The cultivator begins preparing his land for the *Kharif* sowings in December or January and for the *Rabi* during the monsoon whenever there is a break in the rains. The soils being mostly sandy and finely divided, require only slight ploughing and harrowing. The land is ploughed first in one direction and the second ploughing is done at right angles to the first. The ploughing is repeated till the soil is perfectly pulverized and clean. *Kharif* sowings are commenced after the first shower or two on the breaking of the monsoon in June. As regards rice cultivation the land is ploughed by buffaloes after a few good showers have fallen and left for a few days. The seed which has been soaked before hand and has sprouted is now sown broadcast in the fields and ploughed in. But in fields irrigated from large tanks, the preparation of the wet lands begins even before the monsoon. For the *Rabi* sowings, the land, which has been ploughed during the breaks in the rainy season, is sown in September or October, as at this time there are usually autum showers which help the germination of the seed. For the *Tabi* or the hot season rice crop, the land is first soaked with water from tanks and wells. The sowings proceed for two and even three months from the beginning of December to the end of February. Yellow jowar, bajra, and the rainy season rice ripen about December; and white jowar, gram, *etc.*, and the hot season rice ripens any time from February to the end of May. As regards cotton, the short staple variety is the only kind which the cultivator grows as he finds it easiest to produce.

All the rice and sugarcane fields are manured, the latter very heavily. The manure generally used is that obtained from the village cattle and the sweeping from the village and from leaves and branches of trees. However, since a few years, chemical fertilizers are also being used in large quantities. Rotation of crops is followed in the inferior kinds of soils called *Chalka.* In lands of a better description, if the soil has become exhausted, jowar is followed by cotton. Yellow jowar, being a very exhaustive crop is never grown for two successive seasons on the same land. In rice lands no regular rotation is followed, but sugarcane and betel-leaf are sometimes rotated.

Administration : The district branch of the State Agricultural Department in charge of a District Agricultural Officer looks after the agricultural extension work as well as work relating to the imple-

mentation of other agricultural schemes and programmes in this district. The District Agricultural Officer is assisted in his work by the Agricultural Extension Officers who are responsible for the agricultural activities in each of the Community Development Blocks in the district. Further his Personal Assistant, and the technical assistants like the Plant Protection Assistant, Horticultural Assistant, Compost Inspector, Seed Development Assistant, Fertilizer Inspector and Oilseeds Extension Assistant also help him in the execution of the various agricultural schemes. The Five Year Plans sought to increase agricultural production by the implementation of the various schemes approved by the Planning Commission and enforced by the State Government through their agencies in the districts. The various schemes implemented during the first and second plan periods in Nizamabad District are briefly indicated below.

State Seed Farms : The Seed Farms were not established in this district till the beginning of the second plan period. In the year 1957–58 a large sized seed multiplication farm was started at Boppaspalle in Banswada Taluk, 52 Kms. from Nizamabad. The total extent of the farm is 200 acres out of which 100 acres is under wet cultivation and 28 acres is under dry cultivation. The remaining extent of 72 acres is yet to be reclaimed. The main object of this farm is the multiplication of the improved seeds for distribution to the various Community Development Blocks.

Improved Seeds: 1,18,567 mds. of paddy, 150 mds. of jowar, 289.23 mds. of wheat and 125.20 mds. of maize representing the improved variety of seed were distributed for cultivation during the first plan period. During the second plan period 57,010.89 Qtls. of paddy, 505.22 Qtls. of jowar, 152.53 Qtls. of wheat, 394.40 Qtls. of maize and 848.20 Qtls. of cotton were distributed in the form of improved seed to the cultivators.

Japanese Method : As elsewhere in the State, Japanese method of paddy cultivation was also introduced in this district. As is well-known this method requires inter-cultivation and intensive cultivation. During the first plan period 2,95,566 acres and during the second plan period 3,91,747 acres of paddy fields were cultivated by the Japanese method.

Crop Competitions : The idea behind the "crop yield competition" is to inculcate a sprit of healthy rivalry amongst the cultivators. These competitions are conducted by the Agricultural Department every year for paddy, jowar and sugarcane crops in the district.

Manuring Scheme : Under this scheme manures were supplied on takkavi short term basis. During the first plan period 41,464 tons of nitrogenous fertilizers and 272 tons of phosphatic fertilizers were supplied. During the second plan period credit facilities were made available for the purchase of fertilizers under the intensive manuring scheme. Under this scheme individual cultivators were sanctioned loans upto a maximum of Rs. 500/- each depending on the actual land possessed and the nature of crops grown *etc.*, 37,181 tons of nitrogenous fertilizers and 6,092 tons of phosphatic fertilizers in all were distributed during the second plan period.

Compost : This scheme aims at increasing manure production in the rural as well as in the urban areas by conserving all locally available resources and by converting them into compost by means of improved methods. Compost is prepared in the rural areas with the farm and kitchen waste using dung and urine as starters. In the urban areas, the Municipalities and the major Panchayats took up the work of preparation of compost, converting the town waste into compost using night-soil as the starter. During the first plan period 1,86,607 tons of rural compost and 25,300 tons of urban compost were thus prepared. During the second plan period the preparation of rural compost increased to 9,32,030 tons and the urban compost to 49,802 tons.

Soil Conservation : Soil conservation measures consist of adoption of various practices for increasing the productivity of the soil. They are not confined to dry land alone. In irrigated soils where the problems of water-logging and development of alkalinity and salinity are encountered, areas have to be reclaimed, and drainage programmes have to be undertaken as a part of soil conservation programmes. Considerable amount of soil conservation measures has to be taken each year in Nizamabad and Armur taluks due to the steep nature of land in these areas. Contour bunding, terracing, ploughing along the contours *etc.*, have been undertaken. An independent section of the engineering branch situated in Nizamabad undertakes bulldozing and tractor ploughing which are helpful in soil conservation works.

Plant Protection Schemes : The following statement gives particulars of the protection measures undertaken during each of the first and second plan periods :

Name of pesticides and insecticides (1)	Quantity supplied (2)	Area applied in acres (3)	Crop to which applied (4)	Estimated higher yield (extra production in tons) (5)
		First Five Year Plan		
Sulphur . .	4,425 lbs.	135,294	Jowar	3,019
BHC 10% . .	41,132 lbs.	15,666	Paddy	4,476
Perenox . .	747 lbs.	11,568	Paddy	1,650
		Second Five Year Plan		
Sulpur . .	6,435 lbs.	165,460	Jowar	3,693
BHC 10% . .	84,240 lbs.	26,240	Paddy	3,530
Agrosan . .	2,498 lbs.	115,364	Paddy	14,420
Endrin 20 Ec. .	9,470 tins	18,959	Paddy & Sugarcane	2,369

Horticulture : To step up fruit production the Department of Agriculture have advanced short-term and long-term loans to the cultivators for raising orchards, fruit gardens *etc.* No such loans were sanctioned during the first plan period. During the second plan period long-term loans to an extent of Rs. 88,300/- and short-term loans of Rs. 900/- were sanctioned to cultivators for raising orchards.

Expanded Nutrition Programme: This programme was put into operation from 1961-62 in Banswada Samithi for the production of nutritionally valuable foods such as fish, eggs, fruits and vegetables to combat malnutrition prevalent among the vulnerable groups of people, namely, pregnant and nursing mothers, pre-school and school children.

Under this programme, the villages *viz.*, Mirzapur, Durki, Desaipet, Borlam, Galipur, Mohammad Nagar, Burgul, Ryotnagar, Kodpagal and Nizampet were selected for the implementation of the programme. The village Nizampet has now been transferred to Medak district.

Establishment of School Gardens : Under the above scheme, school gardens were established in the above 10 villages for the production of nutritionally valuable vegetables and fruits for the mid-day meals of the school children. Under this scheme, five oil engines and one hand-pump were supplied by UNICEF to this Panchayat Samithi for installation in the school gardens. In addition, UNICEF have also supplied 8 sets of garden tools to be used by the school children for garden work in school gardens.

A quantity of 100 lbs., of vegetables were produced during 1961-62 and these have been made available in the mid-day meals of the school children. Being the first year of its implementation of the scheme, the production is low.

Improved implements : Under this scheme improved agricultural implements like paddy weeders, rahats *etc.*, were distributed to the cultivators. During the first plan period 256 rahats were distributed and during the second plan period 42 rahats and 325 paddy weeders were distributed.

Land Development and Ground Water : There is one sub-division located at Nizamabad for looking after the land and ground water development works in Nizamabad and Adilabad districts. There are 7 bulldozers, 4 crawler-tractors and 2 power drills which are given on hire to cultivators for reclaiming land, deep ploughing and putting down bores in wells or open grounds when there are prospects of getting water.

Loans for supply of pumpsets : During the first and second Five Year Plan periods, loans were issued to the farmers for purchase of 145 and 42 oil engine and electric motor pumpsets respectively for lifting water from wells and surface sources.

CHAPTER VII

FORESTS

"Nizamabad Revenue District consists of six taluks and one independent sub-taluk *viz.*, Nizamabad, Armur, Bodhan, Banswada, Kamareddy, Yellareddy and Madnur (I.S.T.) with a geographical area of 3,112.8 sq. miles as against 864.61 sq. miles of forest area, distributed over two Forest Divisions *i.e.*, Nizamabad and Kamareddy Divisions comprising of the Ranges with area detailed below :

1. Nizamabad Forest Division

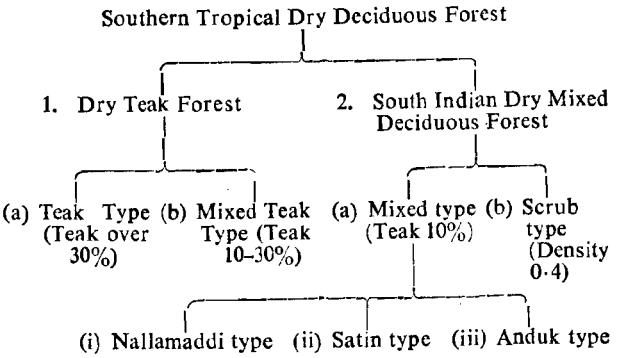

(i) Nizamabad Range	.	107·08 sq. miles
(ii) Kamarpalle Range	.	135·45 ,,
(iii) Banswada Range	.	138·84 ,,
(iv) Yellareddy Range	.	129·73 ,,
Total	.	511.10 ,,

2. Kamareddy Forest Division

(i) Kamareddy Range	.	90·23 sq. miles
(ii) Indalwai Range	.	126.02 ,,
(iii) Ramayanpet Range	.	64·41 ,,
(iv) Siddipet Range	.	72·85 ,,
Tctal	.	353 51 ,,

Prior to the year 1910 the valuable teak forests of this division were under the dual control of the Forest and Revenue Departments. At that time the permit system was in existence resulting in the exploitation and removal of the best tree growth. The method and system of exploitation of these forests was highly irregular and unscientific, if considered from the present standards of exploitation. In 1915 and 1916 the first Working Plan was sanctioned by the Nizam's Government for the forest blocks of Kesaram, Secundrapur, Bopaspalle, Yanampalle, Manchippa, Hajipur and Gouraram, under the Silvicultural system of coppice with standards. The actual scientific treatment of these forests commenced with the putting into effect Dr. Dosti Ali Khan's regular working plan upto April, 1961 when a new working plan came into force in this district.

Types of Forests : According to Champion's classification the forests of this division come under the "Southern tropical dry deciduous type". The dry deciduous forests are further classified into four sub-types which are further differenciated into local types based on the local classification in vogue. The diagrammatic sketch given below indicates the final classification of the forests :

(a) **Teak Type :** This is distributed almost throughout the division. The soil is on the whole shallow except in the valleys. The percentage of teak is considerably less in areas with deep soil and adequate moisture. The density* of the crop is 0.4 to 0.7. The height of the crop is between 25 and 55 feet and girth 15 to 30 inches. *Dendrocalamus strictus* is to be found scattered along nala banks and on the slopes of higher hillocks.

About the dry teak type Sri T. V. Subbarao, A.I.F.C., states that this is the climax vegetation for the locality. The general quality is low but teak forms a very high proportion of the crop usually 50% to almost pure but occassionally much less. Teak areas other than those under very dry teak types fall under this type with the associates *Terminalia tomentosa*, *Lagerstromia parviflora etc.* He further states that the mixed teak forests contain 10 to 30% teak in the mixture, prevailing mostly in plains extending to the foot of the hills and gentler slopes. According to the same writer the South Indian dry mixed deciduous forests occur wherever the rainfall is 35 to 45 inches on low hills and undulating ground with shallow soil. In this type teak is common but not as frequent as in "Dry Teak Forests". *Anogeissus latifolia* is very abundant and is a characteristic species of this type.

Teak is indigenous to this tract. Teak has been selectively removed with the result that the only malformed trees or young poles now exist. This depletion of teak is turning the forest into a mixed teak type with miscellaneous species in preponderance.

Note : It an area is completely covered with forests the density of the crop is regarded as 1 while an area with no trees at all is referred to as having a density.

The common dominant species found in association with teak in this forest division are :

1. *Lagerstromia parviflora* (Chennangi)
2. *Anogeisus latifolia* (Chirumanu)
3. *Cleotanthus collinus* (Kodise)
4. *Boswellia serrata* (Anduk)
5. *Diospyrous melanoxylon* (Abnus)
6. *Chloroxylon swietania* (Satin)
7. *Terminalia tomentosa* (Nallamaddi)

Bamboo (*Dendrocalamus strictus*) is also found scattered along the nala banks and higher slopes.

Felling Series : The forests are chiefly worked under two silvicultural systems *viz.*, coppice with reserves and improvement fellings. The annual area worked together with the yield and revenue realised are furnished below under both the systems:

System of working	Average annual area worked	Average yield per annum	Amount realised Rs.
(1)	(2)	(3)	(4)
Coppice with reserves	6,600 Acres / 2,900 hectares	373,555 Cft.	13,69,400
Improvement series	1,225 Acres / 490 hectares		1,57,800

Demand : The bulk of revenue is realised from these two working circles. Most of the timber is exported to the twin cities of Hyderabad and Secunderabad after meeting the local demands for house construction *etc.* Timber useful as fuel is in great demand in the urban areas of the district itself and, therefore, export to Hyderabad is very much limited. Fencing material is being supplied free of cost to the villages on permit system. The demand for green manure leaf has been on the increase owing to larger areas coming under irrigation year after year. A nominal fee of 0.25 Paise is charged for a cart-load of green manure leaf. Grazing facilities are available in all the forest blocks.

Forest Produce : Beedi leaf is a major item under minor forest produce, fetching an average annual revenue of over seven and a half lakhs of rupees. In 1962 the sale of beedi leaves fetched a record sum of Rs. 10,86,425/-. Other important minor forest produce are *Buchanania latifolia*, *Annona*, *Bassia etc.* The following statement gives particulars of the yield from the forest from 1957 to 1962 :

Name of the produce	1957-58	1958-59	1959-60	1960-61	1961-62
(1)	(2)	(3)	(4)	(5)	(6)
Timber (in cubic feet)	220,000	190,000	200,000	180,000	230,000
Fuel (in tons)	70,000	66,000	70,000	62,000	854,000
Bamboo (in tons)	150	170	160	80	124
Minor Forest Produce :					
Beedi leaves (in tons)	1,254	1,227	1,098	1,178	1,152
Grass (in tons)	325	450	304	238	273
Chironji in (Lbs.)	325	425	475	225	366
Bhilawan (in tons)	2½	1¼	3	2	2½
Hulda (in tons)	¾	1½	1	2	1¾
Sithaphal (in tons)	19	27	31	23	26
Oil grass (in lbs.)	26	18	22	42	28
Parka mohwa (in tons)	11	34	3	39	24
Lac (in Lbs.)	250	200	150	173	200

The following statement gives particulars of the revenue expenditure on the Nizamabad Forest Division from 1957 to 1962:

Item	1957-58	1958-59	1959-60	1960-61	1961-62
(1)	(2)	(3)	(4)	(5)	(6)
Revenue	20,59,016-00	17,55,691-00	19,09,936-00	21,43,827-00	25,89,606-89
Expenditure	2,47,807-00	2,38,645-00	3,04,763-00	2,80,700-00	2,80,736-92
Surplus	18,11,209-00	15,17,046-00	16,05,143-00	18,65,127-00	23,08,869-97

Plan Schemes : Upto the end of the First Five Year Plan period no efforts were made with regard to regeneration works. It was only during the second plan period that a modest beginning was made and teak was planted in 46 acres besides carrying out afforestation work in 269 acres which also included planting of Eucalyptus Hybrid and cashew. Under the Third Five Year Plan teak was planted in 57 acres during 1961-62 while in 1962-63 another plot of 80 acres was planted with teak. Further afforestation of denuded, understocked, and blank areas is being carried out at the rate of 50 acres annually in each of the six forest ranges of this forest division.

Wild life : Tigers, panthers, jungle cats, wild sheep, blue bulls, black bucks, samburs, spotted deer, wild boar, common deer, rabbits, hares, squirrels, porcupines *etc.*, are some of the commonly occuring wild animals in the forests of this district. Birds like ducks, teals, jungle fowls, peacocks, partridges, pigeons, lerones, snacks, snipes, night jars are also seen in the forests.

CHAPTER VIII

MEDICAL SERVICES

As seen from the Census occupational returns there are only 41 practitioners of modern medicine in this district of whom only two are women. This means that there is one male doctor for 13,056 men and one lady doctor for 256,415 women. Further there are only five dentists, 79 nurses, 163 midwives and health visitors. There are about 365 persons who practice the ayurvedic, homeopathic, unani *etc.*, systems of medicine. There are about 61 more persons who profess to be physicians and who have been classified under 'Others'. The total bed strength of all the hospitals in the district was 155 at the end of the first plan period and this number was increased to 312 by the end of the second plan period. From the above it is quite obvious that medical facilities are grossly inadequate for the population living in this district. This should be an eye-opener to the planners.

The Government Hospitals in this district are located at Nizamabad (Headquarters Hospital), Banswada, Bodhan, Armur, Kamareddy, Yellareddy, Bichkonda and Kotgir. Apart from these, Primary Health Centres were started at Pitlam, Varni and Nabipet during the first plan period. During the second plan period Primary Health Centres were established at Ranjal, Dharpalle, Madnur, Deogaon and Bhimgal.

Rural Subsidiary Dispensaries were started under the Zilla Parishad at Ibrahimpet, Birkur, Velutla, Nandipet, Gannaram, Mortad, Sirkonda, Vailpur, Magdi, Sadasivnagar and Reddipet.

Apart from the institutions of modern medicine there exist in this district a few Government Unani and Ayurvedic Dispensaries at various places. Unani Dispensaries are located at Nizamabad, Nizamsagar, Bibipet, Jukal, Nizampet, Mosra and Bhimgal and the Ayurvedic Dispensaries are located at Bhiknoor, Madnur, Domakonda, Ghandari and Chillergi.

Facilities for Special Diseases

In the year 1958 under the Second Five Year Plan a Leprosy Subsidiary Centre was established at Yellareddy with one Medical Officer, a Medico-Social Worker and four Social Workers together with some clerical staff. A vehicle was provided to this Centre for carrying out extensive survey and domiciliary treatment in the project area.

The Government Headquarters Hospital at Nizamabad has facilities for the treatment of Tuberculosis and Venereal Diseases. Further, a Dental Clinic, a Family Planning Clinic, an Eye Clinic and a Blood Bank are also attached to this hospital.

The Tuberculosis Domiciliary Clinic referred to above was sanctioned in the year 1956 and started functioning from July, 1957. The X-Ray equipment has been provided by the Central Government. The Dental Clinic started functioning from December, 1957, the Family Planning Clinic from February, 1959, the Eye Clinic from August, 1960 and the Blood Bank from October, 1959.

Training Programme

A training programme for Auxiliary Nurse Midwives was started during the year 1953–54 at the District Headquarters Hospital, Nizamabad with 12 trainees. The number of trainees has been raised to 40 for each taluk during the second plan period.

CHAPTER IX

ANIMAL HUSBANDRY

The Livestock Census of 1961 shows a total livestock population of 1,301,794 in the district. Out of this total figure cattle account for 479,004, buffaloes 165,677, sheep 218,099, goats 118,589, horses 1,045, donkeys 3,919, camels 47, pigs 6,898, poultry 3,02,268 and ducks 6,258. In order to provide Animal Health Services to these large number of quadrupeds a small veterinary establishment consisting of one District Veterinary Officer, 8 Veterinary Assistant Surgeons, 22 Veterinary Livestock Inspectors, 1 Laboratory Assistant, 2 Stock-men, 27 Compounders, 2 Vaccinators, 2 Poultry Attendants, 2 Duck Attendants, *etc.*, exists in this district. The following statement gives particulars of the veterinary institutions in the district :

Sl. No. (1)	Category of the Institutions (2)	Number (3)	Location (4)
1.	Veterinary Hospital	1	Nizamabad
2.	Stationary Veterinary Dispensaries	3	Bodhan, Armur and Bichkonda
3.	Minor Veterinary Dispensaries	7	Pitlam, Kamareddy, Yellareddy, Ranjal, Madnur, Madanapalle and Domakonda
4.	First Aid Centres	3	Nandipet, Chourpalle and Ramareddy
5.	Poultry Extension Centre	1	Dichpalle
6.	Duck Extension Centre	1	Makloor
7.	Touring Billet	5	Banswada, Darpalle, Kinsanagar, Lingampet and Bhiknoor
8.	A. I. Centre	1	Banswada
9.	A.I. Sub-Centres attached to A. I. Centre	2	Galipur and Mirzapur
10.	Urban A. I. Centre	1	Nizamabad
11.	R. P. Checkpost	1	Mirzapur
12.	Veterinary Dispensary	1	Dichpalle

The Five Year Plans heralded an era of better animal health facilities in the districts in order to provide not only curative but also preventive measures. During the first plan period emphasis was laid on the improvement of livestock, protection of animals from contagious diseases, improvement of poultry and artificial insemination work *etc.* During the second year (1957-58) of the second plan period a Stationary Veterinary Dispensary was established at Bichkonda and Rs. 11,000 was spent in the establishment of a *Gashala.* In the third year (1958-59, a Stationary Veterinary Dispensary was established at Bodhan and a Minor Veterinary Dispensary a) Pitlam. Three Murrah buffaloes, two Malvi bullst 68 exotic cocks and 11 Bellary rams were freely distributed for improving the existing stock. During the fourth year of the plan one Stationary Veterinary Dispensary at Armur and 2 Minor Veterinary Dispensaries at Kamareddy and Yellareddy were established. One Duck Extension Centre at Makloor was also established. A Veterinary Hospital building at Bodhan was constructed. Three Murrah buffaloes were freely distributed. In the fifth year (1960-61) of the Plan 3 First Aid Centres at Nandipet, Choutpalle and Ramareddy were established. Three Minor Veterinary Dispensaries at Ranjal, Madanapalle and Madnur were constructed. One Poultry Extension Centre at Dichpalle was started. 9 Malvi bulls, 10 Murrah buffaloes, 7 boars and sows, 63 birds and 42 rams and ewes were freely distributed for improving the existing stock. Veterinary hospital buildings were constructed at Nizamabad and Dharpalle. The following statement gives particulars of the work attended to by the staff of the Veterinary Department in the district from 1957 to 1962 :

Sl. No. (1)	Item (2)	1957-58 (3)	1958-59 (4)	1959-60 (5)	1960-61 (6)	1961-62 (7)
1.	No. of out breaks reported	57	115	100	113	145
2.	No. of out breaks attended	57	113	100	113	145
3.	No. of inoculations done in out breaks and in clean areas	44,756	1,26,806	2,01,299	2,49,826	3,28,171
4.	No. of cases treated					
	(a) On tour	1,097	9,987	16,561	18,788	48,470
	(b) At headquarters	22,583	38,093	50,827	66,384	71,235
5.	No. of castrations	1,904	3,126	3,334	5,267	6,161
6.	No. of operations					
	(a) Major	...	89	95	65	130
	(b) Minor	...	609	695	304	713
7.	No. of post-mortems conducted	...	95	24	19	10
8.	No. of villages visited	572	2,264	2,340	4,486	3,961
9.	No. of specimens submitted for microscopic examinations	152	111	5	79	90

CHAPTER X

Fisheries

The Nizamsagar Project constructed on the Manjira river, a tributary of the Godavari near Achampet village in Banswada taluk is now one of the richest fresh water fishery sources in Andhra Pradesh. The reservoir has a dead storage capacity of 40,000 million cubic feet and is 15 Sq. miles in area.

In the river zone the indigenous varieties of fish consist mainly of mahasheer and catfish like macronus, wallagonia *etc.* The Department of Fisheries after making complete survey of this area have now stocked the reservoir with quick growing fish like catla, cirrihina, mirgala and labeo fimbratus in a phased programme. Simultaneously, the department has introduced conservancy and licencing system in the reservoir by stipulating a closed season, mesh regulation in the nets *etc.* The deep water netting unit which started functioning on an experimental basis is now functioning on commercial lines. A fish seed-farm has also been constructed to supply seed to the pisiculturists and also for stocking them in the reservoir in order to avoid depletion of its fishery wealth.

The fishermen living in about 35 villages near and about Nizamsagar Project land about 400 tons of fish from the reservoir annually. A fishermen's Co-operative Marketing Society is in existence at Nizamsagar since 7th September 1962. Cold storage facilities and an ice plant, quick transport facilities *etc.*, have been provided by the Government to the fishermen.

Licencing Scheme : The reservoir presents certain special features in respect of the development of its fishery. The major carps which are of greater importance for commercial fishery in inland waters have a tendency to migrate to the upper reaches of the river during the breeding season for the purposes of breeding. Fishing at this time is very distructive because continuance of fishing operations of this type ends in the extinction of the fish in due course. It, therefore, becomes necessary to ensure the safety of breeders to preserve the future progeny and for the replenishment of fish stock in the reservoir. Therefore, the Department of Fisheries have formulated a scheme for conserving and regulating its fishery by permitting fishing by system of licences and by prohibiting fishing during the breeding season. Conservancy measures are therefore, adopted in the river Manjira upto two miles in Ghanpur anicut, below the dam gate and river Manjira upto Pitlam bridge; and the main canal throughout its length of 98 miles issuing from the Hydro-electric station. Fishing is prohibited in the reservoir from the 1st of July to the end of August every year. Nets with mesh of below one inch from knot to knot are prohibited. The number of licences issued and the amount realised towards the licensing scheme from Nizamsagar from 1957 to 1963 ara exhibited below :

Year	No. of licences issued	Amount realised
(1)	(2)	(3)
		Rs. P.
1957–58	182	4,597.86
1958–59	227	5,745.00
1959–60	225	5,625.00
1960–61	99	4,850.00
1961–62	393	7,407.75
1962–63	559	8,252.75

Deep Water Netting : The Nizamsagar Reservoir has recorded a maximum depth of 50 feet when soundings were taken. The Department of Fisheries have introduced modern methods of fishing since 1955. The fish landed by deep water netting units from 1955 to 1963 is exhibited below :

Year	Departmental production in Lbs.
(1)	(2)
1955–56	1,992½
1956–57	2,730½
1957–58	5,810½
1958–59	10,185
1959–60	24,368½
1960–61	87,104
1961–62	97,692½
1962–63	1,31,434

The Department of Fisheries has three boats and 200 terylene nets. Out-Board Motors have also been provided for quick movement of the boats for fishing operations. The fish caught here are sent to Hyderabad every day to be sold in public market.

Fish-Farm : Although the conservancy measures undertaken by the licensing system, closed season and mesh regulations by the Fisheries Department to ensure proper replenishment of fish stock, it is desirable to introduce every year some fish-seed of various varieties in the reservoir to balance any possible adverse condition of natural breeding. The fish fry are brought from various places in tin carriers and are reared upto the fingerling stage in the

fish farm and are then released into the reservoir. For this purpose a fish farm was constructed at Achampet at a cost of Rs. 52,000 in the year 1961. It is situated in an area of 1 acre and 20 guntas very close to the dam site. In this farm there are five nursery ponds, and eight rearing ponds. Induced breeding of major carp and minor carp is also being attempted at this farm.

Transport: A small quantity of fish landed from this reservoir is being disposed by the cycle vendors at Bodhan, Yellareddy, Shankarampet, Jogipet, Medak and Kamareddy. However, a large part of the catch cannot be disposed of either locally or in the immediate neighbourhood of the reservoir. It has to be sent to Hyderabad for marketing. The Department of Fisheries have therefore provided two vans under the scheme "quick transport facilities" at Nizamsagar. These vehicles ply regularly from Achampet to Hyderabad transporting the fish from Nizamsagar. The Department charges Rs. 2/- per maund of fish transported by the local dealers to Hyderabad.

Refrigeration : A two tons ice plant and a four tons capacity cold storage plant were installed in the year 1962 at a cost of Rs. 1,63,000 to provide storing and ice facilities for the fish landed by the licencees from the Nizamsagar reservoir. The ice plant and the cold storage have been constructed close to the reservoir and within easy reach of the neighbouring villages. Ice is made available at Rs. 50 per ton in summer season and at Rs. 30 per ton in other seasons to the fish merchants. Cold storage facilities are available to fishermen for keeping their fish till such time as the transport facilities are available to them. A rate of 0.50 Paise per hundredweight is being charged as hire for the use of the cold storage.

CHAPTER XI

PANCHAYATI RAJ

Historical Retrospect: Local Boards did not exist in the erstwhile Nizam's Dominions till the forties of this century. The Hyderabad Village Panchayats Act of 1940 was the first enactment relating to the village self-government and under this Act 442 Panchayats were established. The functions and scope of these Panchayats were very limited under the monarchical form of Government. They were nominated bodies and were not representative as we understand its meaning to-day. The resources of these local bodies were also insufficient.

After the Police Action and the merger of the Nizam's Dominions with the Indian Union the elected Government repealed the Act of 1940 and enacted the Hyderabad Village Panchayats Act, 1951. Under this Act, elections to Village Panchayats were held for the first time on the basis of adult franchise. The Government, however, retained the right to nominate some members including those of the Scheduled Castes. A village having a population of over 1,000 but below 5,000 was considered normally as suitable for the establishment of a Village Panchayat. There was, however, a provision to group together villages, if necessary, for this purpose. There was a provision in the Act for the delegation of Gram Panchayat powers to Rural Reconstruction or Co-operative Societies, though in actual practice, very few Rural Reconstruction Societies were so empowered. The functions of Village Panchayats were limited and were divided into obligatory and discretionary. As was the case during the Nizam's regime, even under the popular Ministry the resources of the Village Panchayats were grossly insufficient to meet even the limited power conferred on them. An enabling provision was made in the Act to provide for a Government grant upto 15 percent of the land revenue of the village and also 1/3rd of the local cess as contribution from the District Board. The Act also authorised the Panchayats to levy certain taxes and collect fees. In actual practice, however, the Government did not pay 15 percent of the land revenue to the Panchayats. In many cases this contribution did not exceed 7 percent. The Act had provided for the constitution of the Nyaya Panchayats but in actual practice none was constituted. In the very first year 1,224 Village Panchayats were constituted under the Act, but the process was stopped in the following year because of lack of finances. The sum total of all these efforts was that little was achieved. After a lapse of two years, the State Government once again undertook the constitution of Panchayats in 1955. In that year another 1,500 Panchayats were constituted bringing the total number of Panchayats to 2,724.

After the Local Self-Government Ministers Conference held at Simla in 1954, the State Government re-examined the entire issue. It was considered that the then existing enactment was defective and insufficient to fulfil the objectives. Shri Gopa Rao Ekbote, the then Minister for Local Self-Government and now a Justice of the Andhra Pradesh High Court, summarised the main features of this system as follows :

(i) It was not properly elective or representative

(ii) It was administrational and not self-governing

(iii) It was concerned with too narrow a range of the activities of the community

(iv) The boundaries were not drawn with reference to social requirements but purely on geographical grounds.

Another Act known as the Hydcrabad Gram Panchayats Act was enacted in 1956 considered to be an improvement over its earlier enactment.

This Act considerably enlarged the powers and functions of the Gram Panchayats and added to their resources. Its main features are described below :

Panchayats are to be constituted for villages with a population of not less than 1,000 and not more than 5,000 and the Government can group a number of villages for the purpose. In special cases, however, Panchayats can be constituted for villages with less than 1,000 population or with more than 5,000 population. All adult persons of a village, whose names are included in the list of voters, constitute the Gram Sabha. At least two meetings of the Gram Sabha must be held every year to consider the annual statement of accounts, a report on the work

done by the Panchayat in the preceding financial year, and a programme of work for the next year.

A village is divided into constituencies for the purpose. The representation of each constituency on the Gram Panchayat is on the basis of one Panch for every 150 of the population, provided that the total number of Panches in the Gram Panchayat shall in no case be more than 12 or less than 6. Seats are reserved in Gram Panchayat for Scheduled Castes and Scheduled Tribes on the basis of their population. The Panches, so elected, then elect a Sarpanch and an Upa-Sarpanch from amongst themselves in their first meeting. The term of office of the Panches is for three years, commencing from the date of the first meeting of the Gram Panchayat. The Government, however, has the power to extend the term of office by one year. The Gram Panchayat has the power to remove a Sarpanch by a 2/3rd majority and an Upa-Sarpanch by a bare majority.

The Sarpanch presides over Gram Panchayat meetings, as also Gram Sabha meetings and is responsible for the conduct of day-to-day administration of the Panchayat. The Gram Panchayat must meet at least once a month. The quorum is not less than one-half of the Gram Panchayat membership.

A Novel Feature :

There is a provision for the appointment of a *karobari* who will be in charge of preparing and maintaining assessment list, essential statistics, accounts and records, and will be entitled to recover dues of the Gram Panchayat. He will be the main Executive Officer, responsible for implementing all decisions of the Gram Panchayat. He is appointed by the Collector, but the Gram Panchayat has the power to remove him for misconduct or negligence of duties by two-third majority.

The duties, functions and powers assigned to the Gram Panchayat fall broadly into the following three classes.

Compulsory duties
Discretionary functions
Transferred functions

All these functions together cover a very wide field of activity. The Gram Panchayats can perform these functions subject to their resources and local requirements. In addition to the functions specified under the Act, the State Government has the power to delegate such functions as it may deem fit.

The statutory functions of the Panchayats can be considered under the following heads :

i. Administrative
ii. Civic
iii. Social
iv. Economic and Developmental
v. Statistics
vi. Judicial and
vii. Police

The Act provides for the vesting of the management of public property and other community buildings in the Panchayat. Gram Panchayats have not taken up the task of collection of land revenue, taxes and fees on behalf of the Government, though there is an enabling provision to that effect in the Act. This will enable the Government to gradually eliminate the system of *Vatandari*. Land revenue collection is at present done by Patels and Patwaris. The Panchayats may also maintain the land records which at present are being maintained by the village officers.

Civic functions include village sanitation, public health, water supply, transport and communications *etc.* The Panchayats have the powers to lay down rules and standards for sanitation and can impose penalties for their non-observance. There is provision for street drains and general drainage arrangements. Panchayats can construct public lavatories and bathing places. Other civic functions of the Panchayats are: filling up of unused wells, insanitary ponds, pools, ditches, hollows or pits, maintenance of public wells and tanks, preventing pollution of drinking water, maternity and child welfare; control of epidemics and contagious diseases; other medical facilities; control over slaughter houses; setting up of hospitals and dispensaries, construction and maintenance of village roads, streets, cart stands, market places and dharmasalas.

The social functions of Panchayats relate to the following : education, recreation, social welfare, development of libraries and reading rooms, organisation of fairs and public festivals, *Akhadas*, removal of untouchability, discouraging gambling and drinking, prevention of child marriage, steps

for the reduction of wasteful expenditure on marriages, funerals *etc.*

The powers conferred on the Gram Panchayats under the Act touch various aspects of rural economy, *e. g.*, agriculture, animal husbandry, subsidiary and cottage industries, marketing and co-operative movement, *etc.* Under agriculture are included supply of better seeds and manure, improvement of livestock, arrangements for co-operative and collective farming, control of pests and diseases, construction and supervision of minor irrigation works *etc.* The Panchayats can also arrange for the cultivation of common lands, lands under Government management, and lands which the owners are not able to cultivate. The object of the State Goverement is to make the Gram Panchayat the primary institution for development of rural economy.

The Panchayats under the Act have been assigned the duty of collection and maintenance of vital statistics. They are required to help in population and livestock Census and in the compilation of data on crops and agriculture.

The Judicial aspect

According to the Act, every village shall elect five members to act as Nyaya Panches for a Nyaya Panchayat established for a village, and to form a panel of Nyaya Panches for Nyaya Panchayats established for a group of villages. A person elected to the Nyaya Panchayat has to be a permanent resident of the village, and should be able to read and write. Nyaya Panches cannot be members of the Gram Panchayat. The Nyaya Panches elect a Pradhan and an Upa-Pradhan. The term of office of Nyaya Panches is three years, but the Government can extend the term by one more year. The Nyaya Panches are required to take oath of office. Panches guilty of misconduct and irregularities can be removed.

The Nyaya Panchayats have been vested with civil, criminal and revenue powers. They can try offences of a minor nature. In addition, they can try offences entrusted to them by the Government. They can order a person to furnish security for the maintenance of peace. They can refer some intricate cases to the Munsif's Court.

Regarding civil suits, Nyaya Panchayats shall have jurisdiction to hear a suit for money due on contracts except in respect of moveable property or for the value thereof. They have further jurisdiction to hear cases regarding damages to moveable property and suits under the Cattle Trespass Act. The monetary jurisdiction of the Nyaya Panchayat has been fixed at Rs. 100/-. The Government, however, can raise the pecuniary jurisdiction of any Nyaya Panchayat to Rs. 500/-. The villagers are entitled under the Act, to refer, for award any of their disputes of whatever value, to the Nyaya Panchayats for arbitration. Some of the disputes under the Hyderabad Record of Rights and Regulations and the Hyderabad Tenancy and Agricultural Lands Acts can be tried by the Nyaya Panchayats.

Conciliation Boards and Village Volunteer Force

A novel feature of the Hyderabad Act is the constitution of Conciliation Boards in the Gram Panchayats. Each party to the dispute can selecone Panch from among those who are elected members of the Gram Panchayats, and the third person on the Board is the Sarpanch or the Upa-Sarpanch. It has been specifically provided in the Act that no Nyaya Panchayat shall take cognizance of any dispute unless a certificate of failure of conciliation proceedings in respect thereof has been produced. It is expected that thus many disputes will be settled and there would be no need to go to Nyaya Panchayats.

The Act lays down detailed procedures for the conduct of Nyaya Panchayats. These are purposely kept very simple. No legal practitioner can appear before the Nyaya Panchayat. The parties, however, can be represented by agents. Fines imposed by Nyaya Panchayats, if not paid within the specified time, can be realised with the help of superior authorities. The Munsiff Magistrate or the Deputy Collector, has been authorised to revise any decision of the Nyaya Panchayats. In spite of the above provisions no steps were taken to establish either Nyaya Panchayats or Conciliation Boards.

The Act authorises the Village Panchayats to constitute a Village Volunteer Force for watch and ward, and to assist the Gram and the Nyaya Panchayats in the discharge of their functions, the services of summons and notices. The Government can empower a Gram Panchayat to take measures for maintenance of law and order and prevention of crimes in the village. The Panchayat is authorised to appoint a Chowkidar, also called a Kotwal in the Act, and one or more as his assistants for this

purpose. He is in-charge of the Watch and Ward section of the Gram Panchayat, and has the right to arrest without a warrant any person who is a proclaimed offender, or has been concerned in any cognizable offence, or is in possession of stolen property or is a deserter from the army. The Kotwal has also the obligation to inform the nearest police station of suspicious or sudden deaths or possible disputes.

Sources of Revenue

The Act provides for the constitution of a Panchayat Fund. The Gram Panchayat Fund consists of all the accumulated balances of the Gram Panchayat, all sums of taxes, tolls, fees authorised to be levied under the Act, and all interests and profits arising from any Gram Panchayat investment or transaction, and also all fees and fines payable under the Act. Compensation received by the Gram Panchayat under the provisions of the Act, gifts or deposits of private individuals or institutions and loans raised by the Gram Panchayat are also treated as parts of the Panchayat Fund.

The other sources of Revenue of Panchayats are aids and grants from the Government and Local Boards. The Government's contribution is 15 per cent of the land revenue of the village and also 50 percent of the local cess collected in the village under the District Boards Act.

The obligatory taxes to be imposed by the Panchayats are: (i) property tax, (ii) tax on professions, trades and callings, (iii) vehicle tax, (iv) a tax on transfer of immovable property. The discretionary taxes are: (i) pilgrim tax, (ii) general water tax, (iii) entertainment tax, (iv) animal tax (v) toll tax and other fees.

Section 86 of the Act authorises the Gram Panchayat, after obtaining the sanction of the Gram Sabha, for a specific period and for a specific purpose, to levy a cess at the rate of two annas on every rupee of land revenue. The Gram Panchayats can borrow after obtaining the sanction of the Government.

The Act provides for the preparation of annual budgets by the Gram Panchayats and lays down the procedure for its approval. The then District Boards were authorised to approve the budgets. The accounts have to be submitted to the Gram Sabha.

The Act empowers the Gram Panchayats to introduce compulsory manual labour for purposes of public utility. The approval of the Gram Sabha has to be obtained. The Gram Panchayat can specify the labour to be performed. A person is free to get labour assigned to him performed on his behalf by another person, or pay for its performance at such rates as may be determined by the Gram Panchayat. The Act prescribes penalty for non-performance of labour.

The former District Boards have generally powers of supervision over the Gram Panchayats. The Collector, the President of the District Board, District Panchayat Officer, Deputy Collector, Tahsildar, or any other Officer authorised by the Government can inspect any property or work undertaken by the Panchayats. The Collector has the power to stop a Panchayat from undertaking any work considered undesirable or improper. The Government has the power to dissolve a Panchayat for repeated dereliction of duty, but the grounds of dissolution have to be communicated to the Gram Panchayat which has to be given time to show cause against the proposal. In the period of dissolution, the District Board has the obligation to perform Panchayat functions in the village. Immediate steps have to be taken for the reconstitution of a Panchayat after its dissolution.

Thus the Hyderabad Gram Panchayats Act reveals that the erstwhile Government of Hyderabad have been very bold in conferring extensive rights on the Panchayats. In actual practice most of the provisions remained only on the Statute Book and not implemented.

The Village Panchayats have gained more importance with the introduction of the Panchayati Raj Administration from 1959.

Growth of Community Development Programme in the district

The general core of philosophy of Community Development is to create a strong desire on the part of the people for a better standard of living and to help to achieve their new goals largely on the principles of self-help and self-reliance. The Community Development Programme was introduced in this district for the first time at Nizamsagar on 2nd October

1952 as a Community Project. In 1957 the blocks were converted into N.E.S. Blocks, covering Banswada and Bodhan taluks. In the year 1953 the project was extended to cover the villages of Nizamabad taluk also. Subsequently four Stage II Blocks were constituted out of it. The movement gained momentum during the Second Five Year Plan period and by the end of this Plan there were 12 Stage I, Stage II and Pre-Extension Blocks in the district covering a population of 634,628 persons spread over an area of 2413.72 square miles in 788 villages. During the Third Five Year Plan period *i.e.*, by 1st April 1964 the movement gained further impetus in the district as this activity was extended to a population of 767,091 persons covering an area of 2,865.95 square miles in 899 villages. The following statement furnishes details of the number and names of the Blocks that were in existence in the district and also their dates of inception, number of villages covered *etc*:

Sl. No.	Name of Block	Date of inception	Present stage	No. of villages in the Block	Area in square miles
(1)	(2)	(3)	(4)	(5)	(6)
1	Armur	2-10—1957	II	64	218.70
2	Madnur	1—4—1958	I	112	257·92
3	Kamareddy	1—4—1959	I	67	203·10
4	Yellareddy	2-10—1959	I	107	380·30
5	Mortad	2-10—1962	I	48	188·13
6	Domakonda	2-10—1963	I	63	264·10
7	Nizamabad	2-10—1952	II	67	311.20
8	Navipet	2-10—1952	II	70	187.50
9	Bodhan	2-10—1952	II	67	139.73
10	Yedpalle	2-10—1952	II	45	115.60
11	Banswada	2-10—1952	II	124	304.70
12	Bheemgal	1—4—1961	I	65	294.97

During the recent delimitation of the Blocks the above number was reduced to 9 in this district with effect from 1-7-1964 *viz.*, Dichpalle, Yedpalle, Banswada, Madnur, Yellareddy, Kamareddy, Domakonda, Armur and Bheemgal.

In order to make the people feel more responsible in their developmental programmes and constructive activities the Government introduced the three tier system of Panchayati Raj; the Gram Panchayat at the village level, the Panchayat Samithi at the Block level and the Zilla Parishad at the district level. The first batch of Panchayat Samithis was constituted in this district on 1-11-1959 and the Zilla Parishad was constituted on 1-12-1959 on a statutory basis. After the introduction of the democratic decentralisation at the District, Block and Village levels respectively the responsibility and initiative in economic and social development in rural areas rested with these popular institutions-the Zilla Parishad, the Panchayat Samithi and the Gram Panchayat. As the Panchayats have to play an important role in the various developmental programmes the need not only to constitute the Panchayats for all the villages but also to strengthen their administration was keenly felt. For this purpose Divisional Officers were given the assistance of suitable ancillary staff. The Zilla Parishad is entrusted with heavy responsibility of Community Development and Planning in addition to Secondary Education and maintenance and formation of roads etc., in the district.

During the Second and Third Five Year Plans greater importance was given to agricultural programmes. Greater stress was also laid on irrigation, housing, accommodation for Scheduled Castes, education and communication facilities in the district. Agricultural production is proposed to be increased to the optimum during the Third Five Year Plan period in order that self-sufficiency is attained. It is hoped that the targets will be achieved by the end of the Third Five Year Plan period as programmed.

In order to have a uniform legislation for the entire State instead of having two separate Acts. i.e.. the Hyderabad Gram Panchayats Act in the Telangana area and Andhra Pradesh (Andhra area) Village Panchayats Act (in the Andhra area), the Government have brought forward an integrated Bill for Panchayats in the State (viz., The Andhra Pradesh Gram Panchayats Bill, 1963) which has been recently passed by both the Houses of the Legislature. The good points from both the enactments have been incorporated in the integrated Bill.

CHAPTER XII

GAZETTEER

NIZAMABAD TALUK

This taluk, formerly known as Indur taluk, has an area of 544.00 square miles. It is the largest populated taluk in the district. The population according to the 1961 Census is 226,847 persons as compared with 169,717 persons recorded in the previous Census. The taluk contains 134 villages out of which 128 villages are inhabited. It is bounded on the north by the river Godavari separating it from Adilabad district; on the south by Yellareddy and Kamareddy taluks; on the east by Armur taluk and on the west by Bodhan and Banswada taluks. Nizamabad Town is the headquarters of the taluk as well as of the district.

The taluk is agriculturally rich and prosperous. The river Manjira, the chief tributary of the Godavari, flows in this district and a big reservoir known as the Nizamsagar has been constructed at Achampet village in Banswada taluk and this is the most important source of irrigation in the whole district. Several irrigation channels take off from the Nizamsagar and supply water for irrigation purposes. In addition to the canal water, the taluk is served by tanks in some of the villages which form important sources of irrigation. A small stream called the Phulang also traverses through this taluk. The soils are mostly sandy, but yet a rich variety of paddy and jowar are extensively raised both under the canals and also under the tanks. Here sugarcane is abundantly raised and is an important cash crop. In this taluk can be found large Reserved Forest area providing cover to wild animals. The climate is dry and generally healthy during the greater part of the year. Secunderabad-Manmad (Metre Gauge) Railway Line of the Central Railway passes through this taluk. Bodhan-Nizamabad Railway line branches off at Jankampet junction. The Andhra Pradesh State Road Transport Corporation and a network of roads connect this with the other taluks.

Nizamabad taluk is of some commercial importance as it is the centre of general trade especially for those parts of the district not served by the railways. The principal exports consist of rice, sugar, jaggery, cotton, chillies, oil seeds and leather. Trade is mainly with the adjoining districts but cotton, oil seeds and leather are also exported to Bombay and Madras.

Nizamabad is a City Municipality with a total population of 79,093 as per the 1961 Census, as compared with 55,195 persons recorded in the year 1951 and is the headquarters of the district and taluk by the same name with its usual complement of district and taluk officers and offices. The town is extended over an area of 14.23 square miles and is situated on the Secunderabad–Manmad Railway line. From this place commences a branch line to Bodhan known as Nizamabad–Bodhan line (Metre Gauge). It has developed into an important centre of education with one Arts College, one Polytechnic and two Government High Schools besides several Middle-cum-High Schools and a number of primary schools. The town is also well connected with all important places in the district by roads on which buses ply regularly. There are two Post and Telegraph offices with telephone facilities.

As regards medical facilities there is one government Hospital and twenty private clinics. It is the headquarters of a Health Officer who is assisted by two Sanitary Inspectors besides several Health Visitors and Maternity Assistants. The water-supply system maintained by the City Municipality was originally a gift from the Rani of Sirnapalle. The entire town is covered with surface drains and pipes have been installed to provide protected drinking water which is being supplied from the Manchippa and the Raghunath tanks.

The town is important agriculturally as a rich harvest of paddy and sugarcane is reaped in the surrounding areas with the aid of Nizamsagar Project Canals but it is best known as one of the largest commercial centres in the district. It has a number of rice mills and several cotton-ginning and pressing factories. In fact the town contains 41 major industries and factories wherein large number of workers are gainfully employed. Thus it is assuming industrial character and is rapidly growing up to be an important industrial centre. There is an old fort on a hill to the south-west of the town which was originally a temple built by Raghunath Das. It was he who constructed the tank which now forms the main source of water supply and so the tank is named after him to commemorate the services of this person. Three Reading Rooms and one public garden (Tilak Garden) are located in this town for the benefit of the public. It has one

Municipal Travellers' Bungalow and one Inspection Bungalow maintained by the Public Works Department. A weekly market is held on every Thursday during which cattle are also brought for sale.

ARMUR TALUK

The taluk is bounded by Nizambad taluk on the west, Mudhole and Nirmal taluks of Adilabad district on the north and Sirsilla and Metpalli taluks of Karimnagar district on the east and Kamareddy taluk on the south. The total area of this taluk is 758.00 square miles, comprising of eight Revenue Administrative units *i. e.*, circles. The headquarters of the taluk is accessible by a road from the district headquarters Nizamabad and is adjacent to the Hyderabad-Nagpur National Highway. It is the second largest populated taluk in the district. According to the 1961 Census the total population of the taluk is 221,461 persons compared with 182,907 persons recorded in the year 1951. In all it has 185 villages out of which 6 villages are uninhabited. This is agriculturally a rich taluk. The soil is made up of black cotton, *chalka* (red and black), *Dubb* (sand) and *morum* and out of these varieties *chalka* and black cotton soils are considered to be fertile. There are a few rivulets and streams in Sirkonda, Bheemgal and Kammarpalle circles all merging to *Peddavagu* which in turn falls into the river Godavari which forms the northern boundary. Out of the eight circles of this taluk, five circles are served by the Nizamsagar Project Canals either directly or under the tanks fed by the canal water. This taluk being located at the tail end of the canal, the supply of Nizamsagar canal water is not adequate. There are 703 tanks which irrigate an area of 50,197 acres. Dense forests can be seen in Sirkonda and Bheemgal circles but the forests of Kammarpalle circle are sparse and stunted in growth. In the dense forest belts of this region wild animals such as tiger, bear, panther, sambur, and neel are found. The general climatic condition of this taluk barring the extremes in the mountainous region referred to above is good.

As regards transport and communication facilities, the taluk is not served by railways. It is entirely dependent upon road transport. Metal roads are limited. The National Highway (Hyderabad-Nagpur) cutting across the north intersects the district road at the taluk headquarters which in turn goes towards the eastern direction to enter the Karimnagar district. Many of the villages situated in the interior are not connected by regular bus services. Out of the 185 villages of this taluk only 30 villages are connected by buses. There is a Government Hospital at the taluk headquarters and two Primary Health Centres at Deogaon (in Armur Panchayat Samithi Block). There are a few Maternity Centres manned by qualified midwives. A few Unani Hospitals also exist. A few Ayurvedic doctors also function under the control of that Panchayat Samithi. Besides these, there are also two more full fledged hospitals at Dudgaon and Kisannagar, a hamlet of Vempalle village.

All the villages in this taluk have drinking water facilities. Velpur, Padgal, Munpalle and Kisannagar (hamlet of Vempalle) have safe protected water supply system. At Argul village the tap system is under way. In the sphere of educational development the taluk can boast of having seven High Schools including one Multipurpose High School at Armur besides two Junior Basic Training Centres at Armur and Balkonda villages. There are two Girls Schools at Armur and Mortad and there are a number of Primary Schools covering the entire taluk. Besides these Government institutions there is a Middle School managed by the Christian Missionaries at Dudgaon village. There are no large scale industries of any kind in this taluk, but the interesting feature of this taluk is that in almost all villages beedi manufacturing is the common and a flourishing household industry. Almost every house of low income is engaged in this industry. Handloom silk industry is common only at Armur where the Patakar community people are mostly engaged. In the past Armur silk was known for its quality sarees. The industry is on the wane due to competition from the foreign mill made cloth. However, owing to the standing readiness on the part of the Government to protect and improve the Khadi and Village Industries this industry is still surviving. At Kisannagar the tiles industry is progressing well but it is only on a very small scale. Puranipet and Balkonda villages are known for carpentry. On account of the interest, technical skill, and its allied aspects of improvement in handwork evinced by the people of these parts a Rural Industrial Estate is contemplated to be established at Kisannagar a hamlet of Vempalle village. Finally the hope of this taluk is the materialisation of the Pochampad Project, a medium sized one on the river Godavari at

Sonepet village which is expected to irrigate 14,570 acres of land. The taluk is also looking forward for the materialisation of a small sized project at Ramadgu village of Nizamabad taluk which is coming up. It is expected to provide irrigation facilities for about 5,000 acres of this taluk. The following are some of the important places in the taluk.

Armur a town municipality is the headquarters of the taluk and has 13,249 persons according to the 1961 Census. Armur is the headquarters of the Panchayat Samithi. The town is situated at a distance of 16 miles from the district headquarters, Nizamabad and, is connected by a regular bus service. This town is extended over an area of 9.58 square miles and in all it has 2,863 occupied residential houses. The density is 1,383 persons per square mile. It is the largest Town Municipality both in size and population in the district. On account of the establishment of Handloom Silk Weavers Co-operative Society, the handloom silk of this place is slowly coming to importance. Even in the past the town was famous for its silk sarees and silk cloth. There is a Sub-Post Office with Telegraph and Telephone facilities and the town enjoys electricity which is being supplied to this place from Nizamabad. As regards educational facilities it has to be stated that the Zilla Parishad High School has been upgraded into a Multipurpose High School. A Junior Basic Training School is also functioning here besides a Zilla Parishad Girls Middle School. It has a Government Hospital with a Maternity Ward.

The town is also famous for the manufacture of beedis. Hence majority of the farming families are resorting to it during their leisure as a House-hold Industry. Unfortunately these beedies are being gradually replaced by cheaper variety of cigarettes. Therefore in the long run this industry may not continue to offer employment opportunities. There is a Police Station, a Munsiff Magistrate's Court, a Government Hospital and a Veterinary Hospital in this town. It contains a Rest House maintained by the Public Works Department and has a Municipal Park and an Irrigation Branch Park.

Balkonda is situated at a distance of about six miles north-east of Armur town on the National Highway between Nagpur and Hyderabad with a regular bus service. According to the 1961 Census count the village recorded a population of 7,038 and it is the largest populated village in this taluk. The village is extended over an area of 8.15 square miles and in all it has 1,581 occupied residential houses. Agriculture is the major means of livelihood where people till the soil in the neighbourhood of the village. Here irrigation is mostly facilitated by minor irrigation sources such as tanks and canals. Paddy is the chief food crop raised besides a rich variety of maize. It is famous for the carpentry industry, and is gratifying to note that out of the total population of this place nearly 1,016 persons are engaged in Household Industry alone and this may largely be attributed to the growth and importance of the prevailing industry. The village has a Zilla Parishad High School and a Junior Basic Training School. There is a Government Hospital with a Maternity Ward attached to it. Balkonda is the Revenue Inspector's headquarters. It is a very old ex-Jagir town subsequently reduced to a village. There is an old fort near a large tank in the vicinity of the village. It contains four mosques one of which is built of stone and several tombs and shrines.

Kisannagar is a hamlet of Vempalle village situated on the Hyderabad-Nagpur National Highway at a distance of ten miles from Armur, the taluk headquarters. A Rural Industrial Estate is proposed to be established here being the first of its kind in this taluk. It has a private Nursing and Maternity Home known as 'Seva Mandir' sponsored by Sri V. K. Reddy, a constructive worker. There is a Tiles Industry by name Kisan Tiles Industries and a rice mill.

Mortad with a population 5,335 persons in 1961 Census is situated on the roadside of Nizamabad-Karimnagar road at a distance of fourteen miles from Armur. The village is extended over an area of 8.99 square miles and in all it has 1,298 occupied residential houses. From the population point of view Mortad is the second largest village in this taluk. Here mostly people live by cultivation as their main occupation and wet paddy is the staple crop raised although irrigation is by tank water to a very great extent. This village contains five rice mills. Jowar and maize are the dry crops raised generally. Beedi manufacture is the chief cottage industry of this place and as such a very large section of cultivating families are profitably engaged by resorting to it as their Household industry. This industry acts as a second string to the bow of farmer mostly during the slack season which results

in agricultural unemployment. This village is the headquarters of the Mortad Panchayat Samithi Block. It has a Middle-cum-High School maintained by the Zilla Parishad. There is a temple of Lord Venkateswara Swami.

Bheemgal Buzrug is situated at a distance of eighteen miles from the taluk headquarters with a population of 2,239 as per the 1961 Census. The village is extended over an area of 6.88 square miles and in all it has 483 occupied residential houses. It is the headquarters of the Bheemgal Panchayat Samithi Block and also of a circle. The village assumed religious importance as the famous Limbadri Narasimhaswamy Jatara is held from Kartika Sudha Tadiya to Triodasi every year. On this occasion a very big gathering of the Hindu community who esteem it as an important place of pilgrimage collect here. Bheemgal is an agricultural village. Paddy is the chief food crop raised followed by maize. There is a Primary School in this village.

Kushtapur with a population of 2,042 as per the 1961 Census is situated on the bank of river Godavari at a distance of about twenty miles from the taluk headquarters. The village is extended over an area of 5.90 square miles and in all it has 417 occupied residential houses. Majority of the people in this village are engaged in agriculture and its allied pursuits. Though it is situated on the bank of river Godavari, agriculture is carried on mostly through minor irrigation sources such as tanks, wells and canals. The Nizamsagar canal extends irrigation facilities to this place. Wet paddy is the chief food crop raised but now and then owing to the shortage of regular water supply mostly dry crops such as jowar and maize are raised. Here also beedi manufacture continues to provide subsidiary occupation and some of the people who cannot go out and withstand hard manual labour are profitably resorting to it as their main activitiy. The river Godavari takes its turn towards south at this village to which the orthodox Hindus attach much importance. A famous jatara known as the "Sri Ramaswamy Jatara" is held here every year from Magha Bahula Chaturdasi to Phalguna Suddha Chavithi which is participated by a large gathering of Hindu congregation. There is a regular bus service upto Gadepalle village which is about two miles away from Kushtapur. The village contains a Panchayat Office and a Primary School.

Sonepet is a small village at a distance of eighteen miles away from Armur. The village is connected to the Hyderabad-Nagpur National Highway which lies at a distance of about two miles. The population returned at the 1961 Census is 1,854 and the village is extended over an area of 3.12 square miles and in all it has 280 occupied residential houses. Here most of the people live by tilling the soil and pasturing the cattle. Paddy and maize are the chief food crops raised through tanks wells and canals, which are precarious sources. A medium sized project known as the Pochampad Project is under construction here on the river Godavari by the State Government. The expenditure for the construction of this project is estimated at Rs. 15.25 crores. The project is expected to be completed by the end of the Third Five Year Plan period and is expected to irrigate about 14,570 acres of land in this taluk and an area of 3,25,430 acres in a few taluks of Karimnagar district besides 20,000 acres of second crop. On account of the location of this project, this village has gained importance.

KAMAREDDY TALUK

The taluk lies at a height of 1,600 feet above the sea level situated between Medak and Nizamabad taluks. According to 1961 Census the total population of the taluk is 156,289 persons as against 136,298 persons in the previous Census count and it is extended over an area of 449.00 square miles comprising 135 villages, out of which 5 villages are uninhabited. The density of pupulation is 348 persons per square mile.

None of the big rivers flow through this taluk nor does it contain any worth mentioning rivers useful for irrigation. There is a small perennial stream called the Yadlakattu Vagu. Hence the whole taluk is completely dependent on minor irrigation sources such as tanks, kuntas, wells and other similar facilities. In fact the taluk is having 108 tanks, 204 kuntas and 140 wells but tanks and kuntas usually do not receive adequate supply of water on account of the vagaries of monsoons. If the monsoon is weak in any year they dry up and crops cannot grow at all. Here crops must be made independent of rains by a large scale provision of irrigation facilities. Spring channels and *nalas* also occur in this taluk. The climate throughout the year is moderate. The soil in this taluk is made up of clay loams, black cotton, red sandy loam and ordinary

sandy soil. The average rainfall ranges between 24 and 32 inches. Paddy, jowar, and maize are the chief food crops raised. Side drains are excavated in Kamareddy and Domakonda towns and in the other big panchayat villages of Bibipet, Bhiknur, Adloor and Yellareddy.

As regards medical relief the taluk is having a Government Hospital at Kamareddy and also a Malaria unit. Besides these there is a filaria unit functioning in the taluk. There are Ayurvedic Dispensaries at Kamareddy and Domakonda and Unani Dispensaries at Bibipet, Bhiknur and Rajampet. Apart from these the taluk contains five Maternity and Health Centres at Kamareddy, Reddipet, Kalwaral, Sadasivanagar and Bhiknur which are intended to treat ante-natal and post-natal cases. There is no protected water supply system anywhere in the taluk except at Domakonda where a reservoir is functioning. A waterworks tank is constructed at Kamareddy, but the wells and reservoir have not been completed. So far the survey work is in progress.

The Hyderabad-Nagpur National Highway passes through this taluk from the south, towards the north-west to a length of about 30 miles between Baswapur and Dhaggi. Close on the same direction the Secunderabad-Manmad Railway Line (Metre Gauge) also passes through the taluk by intersecting the Highway near Mallareddy village with its stations at Bhiknur, Talmadla, Kamareddy and Uppalwai. Again the district road which passes through this taluk from west to east joins at Kamareddy, the taluk headquarters almost bisecting the two roads while leading to Karimnagar on which buses ply regularly. The taluk has a telephone exchange office and a telegraph office situated at Kamareddy besides 61 Branch Post Offices covering the entire taluk.

Therefore next to Nizamabad taluk, Kamareddy taluk has better transport and communication facilities than any other taluk in the district.

In addition to these it is interesting to note that the taluk is progressing well in the sphere of education. It has three High Schools at Bhiknur, Bibipet and Kamareddy in addition to Basic Training Schools at Bhiknur and Kamareddy. Apart from these there are several Middle Schools, Community Centres and Junior Basic Schools which are shaping well. There are also 108 Primary Schools covering the whole taluk.

The taluk cannot boast of any large scale industries, but however, a silk farm at Bhiknur is progressing well. The Brass Factory at Bhiknur and Ramareddy provide employment opportunities to a few workers. Besides these, Beedi manufacture has become quite a popular cottage industry in several villages of this taluk. At Rajampet, Demi Kalan and Kamareddy there are rice hand pounding centres. A few of the more important places in this taluk are the following:

Kamareddy a town municipality is the headquarters of the taluk and has a population of 10,318 as per the 1961 Census. It is situated on the Hyderabad-Nagpur National Highway and is an important Railway Station on the Secunderabad-Manmad Railway line (Metre Gauge) of the Central Railways. The distinctive feature of this place is that it stands as the second largest populated town municipality in the district and is extended over an area of 2.68 square miles. In all it has 2,020 occupied residential houses.

The town is important agriculturally. Paddy is grown with the help of wells and tanks, besides redgram and greengram. This place is also well known as one of the busiest commercial centres in Nizamabad district owing to its convenient location *i.e.*, accessible both by railways and roadways connecting it to Secunderabad, Manmad, Nizamabad and Bodhan which in their turn are famous marketing centres.

Besides being an important commercial place Kamareddy is also growing into an important industrial centre. There is an alcohol factory, two beedi factories and several rice mills. The town is electrified but it lacks protected water supply and a proper drainage system.

There is a Zilla Parishad Middle-cum-High School, a Girls Primary School and a Basic Primary School catering to the educational requirements. A reading room and a public park provide recreation facilities. A Police Station, a Government Civil Hospital, a Minor Veterinary Dispensary and a Post Office with telephone and telegraph facilities are the other amenities available in this town. A weekly market is held on every Thursday. People of this town observe the festival of Ganesh Chavithi with great pomp. The Public Works Department maintains an Inspection Bungalow.

Domakonda a major panchayat supports a population of 6,508 persons as per the 1961 Census count. It is extended over an area of 6.94 square miles and in all it has 1,278 occupied residential houses. A very large section of the people here are depending upon agriculture as their main occupation and irrigation is facilitated by tanks and wells. The chief crops raised are paddy and maize. There is a beedi factory in this town and the industry still continues to be a cottage industry. It is interesting to note that a considerable portion of the town's community consists of beedi workers especially women who have taken to it as their household industry.

Domakonda is provided with side drains and protected water supply scheme through a reservoir which is functioning well. A Janatha College and a Middle School provide educational facilities to the local students. There is an Ayurvedic Dispensary. A weekly market is held on every Monday.

Bhiknur is the second largest village in this taluk with a population of 5,751 as per the 1961 Census. The village is extended over an area of 10.46 square miles and it has 917 occupied residential houses. It is also essentially an agricultural village as a large number of people are engaged in agriculture and its allied pursuits. Paddy and jowar are the chief food crops raised and irrigation is facilitated by a tank.

The village owes its importance to the Railway Station on the Secunderabad–Manmad line (Metre Gauge) of the Central Railways. The National Highway between Hyderabad and Nagpur also passes through this village. Thus the village is accessible both by rail and road. It has an Ayurvedic Dispensary and a Health Centre. Side drains provide the rudiments of sanitation.

Bhiknur has a brass factory and a silk farm where several workers are profitably employed. A weekly market is held on every Sunday. A Basic Training School, a Zilla Parishad High School and a Post Office are the other facilities available in this village. There is a beedi factory functioning on a small scale basis.

Bibipet is a fairly big village with a population of 5,132 persons as per the 1961 Census. The village is extended over an area of 6.14 square miles and in all it has 1,047 occupied residential houses. It is also an agricultural village and mostly people live b cultivation as their main occupation. Paddy an maize are the chief food crops raised with the aid c tank water. Bibipet contains a beedi factory and a such it offers subsidiary employment during th slack season especially to women who resort to i during their leisure hours. There is a High Schoo Police Station, Post Office, Unani Hospital and Dak Bungalow in this village. Sanitation facilitie are provided by the side drains of the village. A weekly market is held on every Friday.

YELLAREDDY TALUK

This taluk, situated 59 miles away from its dis trict headquarters surrounded, by the Nizamaba taluk in the north, the Andole taluk of Meda district in the South, the Kamareddy and Meda taluks in the east and the Banswada taluk of Nizam abad district in the west. According to the 196 Census count the total population of the taluk i 82,671 compared with 71,339 in the year 1951. Thi taluk is extended over an area of 364.2 square miles In all it consists of 110 inhabited villages.

People in this taluk mostly live by cultivation a their main occupation. River Manjira, the mai source of the Nizamsagar Project passes towards th western side of this taluk. Here the soil is made u of clay loams, black cotton, red-sandy loam an ordinary sandy soils. The Pocharam Project cana serves this taluk. However, irrigation is facilitate mostly by minor irrigation sources such as tanks kuntas *etc*. Paddy is the chief wet crop grow followed by sugarcane which is the most valuabl cash crop. Jowar, a dry crop is grown substantially As forests are quite considerable in this taluk the cover nearly 3/4ths of the area of the taluk resultin in the moderation of the climate. The average rain fall recorded in this taluk is about 46 inches.

As regards communications the taluk is no connected by railways but the nearest Railwa Station is Kamareddy, which can be reached by a regular bus service, situated towards the east o Yellareddy town at a distance of 26 miles. Th Hyderabad–Nizamsagar road passes through th headquarters, Yellareddy. Telephone and Telegrapl facilities have not yet been extended to this taluk However, there are two Post Offices and 37 Brancl Post Offices covering the entire taluk.

There is a Government Hospital at the talul headquarters to provide medical relief for the peopl

besides one Unani Dispensary at Lingampet and one Ayurvedic Dispensary and a Child Welfare Centre at Gandhari. In addition to these dispensaries there are four Maternity Centres at other villages for the entire taluk. The leprosy subsidiary centre at Yellareddy is an unique institution in the taluk which is worth mentioning. There is a branch of the Malarial and Filarial Eradication Scheme at the headquarters. Protected water supply is badly lacking.

As in other taluks the common features of interest in this taluk are the weekly shandies, which are held at Yellareddy, Gandhari, Gopalpet, Utnur and Lingampet. There is one High School, four Middle Schools and 101 Primary Schools covering the entire taluk. Besides these, there are 30 Adult Literary Centres, 12 Mid-day Meals Centres and five voluntary schools. There is also a Backward Class Hostel at Yellareddy. The Kandasari Sugar Factory at Gopalpet and Gur and Kandasari Factory at Gandimasanipet are the large scale industries besides the cottage industries such as weaving, country-rug making and pottery. The preparation of utensils with brass metal is also developing on a small scale basis in this taluk.

Yellareddy is the headquarters of the taluk by the same name and is also a Block heaquarters with a population of 5,435 persons according to the 1961 Census. The village is extended over an area of 4.10 square miles and in all it has 925 occupied residential houses.

Since it is a village having irrigation facilities fed by the Pocharam Project Canal and other tanks most of the people are engaged in agriculture and its allied pursuits. In fact there are 927 Cultivators and 419 Agricultural Labourers in this village as per the 1961 Census. Wet paddy is raised in this village besides substantial crops of jowar and maize. The village is rapidly taking up an urban personality. It is not connected with railways, but yet the place is accessible by a good road on which buses ply regularly from Hyderabad, Medak and Nizamabad. Yellareddy is not connected by Telephone but contains a Sub-Post Office. There is a Munsiff's Court, Block Development Office, Police Station, Civil Hospital and a Leprosy Hospital in this village. There is also a Traveller's Bungalow maintained by the P.W.D., and a Jubilee Bungalow of the Local Panchayat. A Veterinary Dispensary caters to the animal health service of the locality. The village enjoys a Zilla Parishad High School and Middle-cum-High School besides several Primary Schools which serve the educational needs. A weekly market is held on every Sunday. It contains a temple of Sri Ramaswamy at which Ramaswamy jathara is held once in a year in the month of April.

Pocharam Reservoir is located by the side of Hyderabad–Nizamsagar road. The dam is 12 miles away from Yellareddy. The construction of the dam was commenced in the year 1916 and was completed in 1922 at a cost of O. S. Rs. 32,12,493. Its settled ayacut is 9,063 acres. The main source of this reservoir is the river Alair.

The Pocharam Dam apart from being an irrigation project of some consequence, is also considered to be a place good enough as a beautiful picnic spot and should, therefore, interest any visitor to this district. There are two well furnished Travellers, Bungalows with gardens in each of them.

The Pocharam Dam, which was originally expected to command 40 villages, now serves only 34 villages.

BANSWADA TALUK

This taluk is bounded by the Bodhan taluk in the north, by the Yellareddy taluk in the east, by the Medak district and the Nizamsagar Project in the south and by the Madnur independent sub-taluk in the West. According to the 1961 Census count the total population of this taluk is 103,693 persons as against 86,801 persons in the year 1951. This taluk occupies an area of 458.4 square miles. It has been divided into six circles namely Banswada, Jakora, Ibrahimpet, Birkur, Nizamsagar and Pitlam. There are 122 villages out of which 13 villages are uninhabited.

The river Manjira divides the taluk into two major parts and on it the famous Nizamsagar Project was constructed at a distance of 16 miles from the taluk headquarters. Nearly half of the taluk is irrigated by the Nizamsagar Project covering about sixty villages and the rest of the villages are being irrigated by minor irrigation sources such as tanks and wells.

The soils of the taluk can be broadly divided into two categories, the black cotton and the chalka soils respectively. The average rainfall of this taluk is 43 inches and is higher than the average for the district.

Telephone facilities do not exist in this taluk though the postal facilities are adequate. Railways do not traverse through this taluk. However, the taluk headquarters is connected by a regular bus service, with the district headquarters and the neighbouring taluks. As regards medical facilities a Government Civil Hospital at the taluk headquarters serves the sick. There is a Primary Health Centre, two Unani and one Ayurvedic Dispensaries. Protected water supply is badly lacking. Such being the case the drinking water is obtained from either the wells or tanks or from canals whichever is convenient. A festival of some interest is that of a *jathara* held in honour of 'Betala swami' at Banswada consecutively for three days. About three thousand people collect at this *jathara*. During the *jathara*, cattle and handicraft exhibitions are held both by individuals as well as by the Panchayat Samithi. An urs of Hazarath Syed Sadulla Hussain is held at Jalalpur village and this is also known as the "Badapahad". This urs is observed for a period of two days and it is estimated that inspite of poor transport facilities nearly 6,000 persons, even from the distant places attend it. The Nizamsagar Project in the taluk is an excellent and importtant place of tourist interest. There are three Middle-cum-High Schools and three Middle Schools besides 90 Primary Schools covering the entire taluk.

Banswada Town Municipality is the headquarters of the taluk and is the second largest town municipality in the district which recorded a population of 8,201 at the 1961 Census count. The town is extended over an area of 4.30 square miles and in all it comprises 1,707 occupied residential houses.

This place is situated on the Nizamabad-Nizamsagar bus route and attracts large number of visitors. There are a few roads which connect some of the important places with the headquarters. There is a Police Station, a Sub-Post Office, a Civil Hospital and a Travellers, Bungalow maintained by the P.W.D. There is a Zilla Parishad High School besides three Primary Schools out of which one is for girls. People in this town observe Bethalaswami Jathara, Ganesh Seva and the Urs of "Nekbibi" with great pomp and reverence. The surrounding areas of this place are irrigated by the Nizamsagar canals. Wet paddy is the chief food crop raised. A weekly shandy is held on every Thursday.

MADNUR INDEPENDENT SUB-TALUK

This independent sub-taluknewly constituted in 1958 is on the border of Maharashtra State surrounded by the Narayankhed taluk of Medak district in the south, Banswada and Bodhan taluks of Nizamabad district in the east and Degloor and Biloli taluks of Nanded district of Maharashtra State in the north and west. It consists of 112 villages out of which 8 villages are uninhabited. According to the 1961 Census count the total population of this taluk is 73,722 and the area is 232.00 square miles.

In almost all villages the soil is made up of black cotton type which is valuable. In a few villages only there is chalka soil. The forest area of the taluk contains only a few villages *viz.*, Lingampalle, Kowlas, Pocharam, Jagannathpalle, Shivapur, Wadlam, Anjani, Kodapagal B. K. Malkapur, Shantapur, Seetarampalle, Rajapur, Lingapur and Pulkal covering a total extent of 6,502.36 acres. Here the climate is temperate and the rainfall on average is 39 inches.

No rivers worth a mention traverse through this taluk. Even the Manjira river which flows on the border of a few villages is not useful for irrigation. Therefore tanks and kuntas serve as irrigation sources and these come under the minor irrigation sources. There are no projects in this taluk nor does it contain any drainage facilities. On account of the precarious irrigation sources, agriculture sometimes becomes a gamble. The temperate climate of this taluk is mostly favourable for the dry crops like groundnut, jowar and cotton.

As regards communication facilities, railways do not traverse this tract. However the Hyderabad-Nagpur National Highway passes through this taluk. The interior roads are not very good. The Government Hospital at Bichkonda and a Primary Health Centre and a Government Ayurvedic Dispensary at the taluk headquarters are the important centres which provide medical aid. There is a Veterinary Hospital at Bichkonda and First Aid Centre at the taluk headquarters providing animal health services. There is no protected water supply throughout the taluk. Hence only wells, tanks and kuntas are the normal sources of drinking water. Weekly shandies are held at Madnur, Bichkonda and Jukkal on Monday, Wednesday and Thursday respectively, and there are important marts which

attract a large number of buyers and sellers of all commodities that become available at a lesser price. The Shivarathri Baslingappa jathara at Bichkonda, theRaki Punnam and Sri Rama Navami at Madnur proper and the Ananthagiri Jathara and Hanuman Jayanthi at Kowlas and Salabathpur respectively are generally observed with much interest. Besides these the Dasara, Diwali and Ugadi are the festivals mainly celebrated throughout the taluk. There are three Zilla Parishad High Schools and 101 Primary Schools serving the entire taluk. There are no large scale industries in this taluk.

Madnur, a small village, is the headquarters of the independent sub-taluk and supports a population of 4,462 persons according to 1961 Census. It occupies an area of 3.71 square miles and has 749 occupied residential houses in all.

Madnur is primarily an agricultural village and so most of the people here live by cultivation as their main occupation. In fact there are 616 cultivators and 664 agricultural labourers but yet the civic status of this place is on the increase owing to its convenient location. This village being the headquarters of a taluk there is a Tahsil Office besides a Post Office, a Police Station, a Government Ayurvedic Hospital, a Zilla Parishad High School and a Girls Primary School. In addition to these it enjoys a Public Park, Public Reading Room and a Rest House. Weaving is the chief cottage industry which employs some of the people. The village is also having a cobblers' society. There is an Arya Samaj Mandir and a Lakshminarasimha Swami Mandir in this village. People observe the Lakshminarasimha Swami jathara with great pomp. A weekly market is held here on every Monday.

Bichkonda is the more largest village in the taluk which supports a population of 5,332 as per the 1961 Census. The village is extended over an area of 6.66 square miles and has 851 occupied residential houses. Here most of the people live by agriculture and its allied pursuits and irrigation is facilitated by tanks and wells which are precarious sources. It is interesting to note that the population of this village is greater than that of Madnur which is the taluk headquarters. The village is equipped with all up-to-date requirements like a big Government Hospital, a Veterinary Hospital, a High School and a Sub-Post Office with Telegraph facilities. It is the headquarters of a Circle Inspector and Sub-Inspector of Police besides the Revenue Inspector. However, it lacks protected water supply but people drink water from wells and tanks which are well protected. The village contains a temple of Sri Kasi Vishwanath Swami. Every year a big Jathara is held in honour of Basalingappa Swami on Shivarathri day which attracts large number of Hindu devotees. A weekly market is also held on every Thursday.

BODHAN TALUK

This taluk occupies an area of 307.2 square miles. Mountains and sprawling forests are conspicuous by their absence. The river Manjira, a tributary of the Godavari flows on the north and west of the taluk which separates it from the Nanded district of Maharashtra State. On the east and south of the taluk is surrounded by the Nizamabad and Banswada taluks respectively. It is the third largest populated taluk in the district. According to the 1961 Census count the total population of the taluk is 157,330 as compared with 126,096 persons in the year 1951. The taluk comprises 113 villages out of which 8 villages are uninhabited.

It is a rich and a fertile taluk in the district and its major economic activity is agriculture. The taluk is served by the Nizamsagar Project and as must be obvious to the reader by now is a very important irrigation source. Further some of the villages in the taluk are also served by minor irrigation sources like tanks and kuntas. The chief crops are wet paddy which is most widely grown and a rich variety of sugarcane which is an important commercial crop. The special feature of this taluk is that it contains rice and flour mills in several villages. The Nizam Sugar Factory at Shakkarnagar near Bodhan is said to be the largest sugar factory in India and one of the largest in the whole of South-East Asia. Besides this there is also an Alcohol Factory and a Chemical Factory located at Bodhan.

As regards communications they are quite adequate when compared with similar facilities in the other taluks of the district. There is a regular bus service connecting almost all the headquarters of other taluks in the district. The Bodhan Branch Railway Line (Metre Gauge) passes through this taluk via Yedpalle Shakkarnagar and Bodhan Railway Stations. Post and Telegraph facilities are quite adequate. Shakkarnagar Post Office is provided with telegraph and telephone connections. The taluk headquarters also has telephone and telegraph facilities besides a

Sub-Office. Telephone facilities are also available at the Yedpalle station. It is interesting to note that a Veterinary Touring Billet caters to the animal health services of the entire taluk besides a Veterinary Dispensary at the headquarters.

Bodhan is the second largest City Municipality in the district and recorded a population of 30,929 persons at the 1961 Census. The city is extended over an area of 8.67 square miles and in all it has 6,530 occupied residential houses.

Bodhan is one of the most important sugar manufacturing centres in India. The Nizam Sugar Factory is constructed here which distinguishes itself as manufacturers of white crystal sugar and 'Nifa' brand confectionery. Enormous quantities of sugarcane which is received for this factory is grown mostly within the taluk and the rest of it is from within the district itself. The Nizamsagar Project provides assured supplies of water and so a rich variety of sugarcane is raised besides wet paddy. Bodhan presents a prosperous appearance and in recent years seems to have further increased in prosperity. Close to it lies Nizamabad, the district headquarters and it is connected with Nizamabad-Bodhan Branch Railway Line which is an important station on the Secunderabad-Manmad Line (Metre Gauge). Besides being a business centre the town is also growing to be an important industrial centre. Among the major industries found in this place the Hyderabad Chemical Factory, the oil mill in Gunj and a number of rice and flour mills are more prominent. Bodhan is connected by two telephone and telegraph exchanges including two Sub-Post Offices one at Shakkarnagar and the other at Bodhan. There is a Munsif Magistrate's Court, Revenue Divisional Officer's Office, a town police station, a rural police station, a Government Veterinary Hospital, a Municipal Jubilee Rest House and an Inspection Bungalow maintained by the Public Works Department. At Shakkarnagar there is one Nizam Sugar Factory Rest House. As regards medical facilities there is appreciable improvement. The town contains a Government Civil Hospital, and the Nizam Sugar Factory Hospital specially to provide medical facilities for the factory workers. Besides these there are several private dispensaries manned by qualified doctors. There is a Government High School, two Middle-cum-High Schools out of which one is for girls. There is a public park in front of Munsif Magistrate' Court. A weekly shandy is held on every Sunday. A Jumma Masjid and a famous temple of Lord Shiva are also situated in this town.

Ranjal is a fairly big village with a population of 5,293 as per the 1961 Census. The village is situated by the side of Nizamabad-Satapur Road and it occupies an area of 10.38 square miles. It is mostly an agricultural village and it has 1,025 occupied residential houses in all. Here irrigation is facilitated by the Nizamsagar Project. Therefore wet paddy is the chief food crop raised besides a rich variety of sugarcane which is an important cash crop.

Ranjal is the headquarters of a Revenue Inspector and a Health Inspector. There is a Primary Health Centre, a Sub-Post Office, a Middle School and a Primary School in this village. There is also an Inspection Bungalow maintained by the Public Works Department. The Nilakantha Swami temple is the only worth mentioning temple in this village.

Yedpalle is a very large village which recorded a population of 7,876 at the 1961 Census. The village is extended over an area of 6.24 square miles and it has 1,606 occupied residential houses. Agriculture is the main stay for a large section of the people in this village. In fact the village contains 1,061 cultivators and 2,125 agricultural labourers. The Nizamsagar canal is the main source of irrigation. Hence paddy and sugarcane are the important crops raised.

The village owes its importance to a busy Railway Station on the Nizamabad-Bodhan Line which branches off from the Secunderabad-Manmad Line at Nizamabad (Metre Gauge). It is also facilitated by a telephone exchange. The village is the headquarters of a Revenue Inspector and a Health Inspector. There is a Zilla Parishad Middle School, a Travellers' Bungalow and a Reading Room in this village. As regards medical facilities it contains a private dispensary. There is also a Nursing Home. Here a weekly market is held on every Thursday. It is interesting to note that this village enjoys a public park. People drink water drawn from the wells which are well protected.

Rudroor village which recorded a population of 5,670 at the 1961 Census is situated about 6 miles south of Bodhan on the Nizamabad-Nizamsagar road. The village is extended over an area of 3.28 square miles and it has 935 occupied residential houses. It is essentially an agricultural village.

The Nizamsagar Project canal system also irrigates this place. Paddy and sugarcane are the two important crops raised. The Government have opened an Agricultural Research Station and a Government Agricultural Farm. The village is known for its handloom industry but it is still being run on small scale basis owing to the severe competition from the mill made cloth. As such all the weavers of this village have joined together and started a Handloom Society called the "Handloom Sangham". This Village contains a Panchayat Office, a Sub-Post Office, a Police Station and a Travellers' Bungalow. There are several rice and flour mills. It has a Zilla Parishad Middle School. A weekly market is held on every Friday which attracts a large number of buyers and sellers.

Kotgir is the second largest village with a population of 5,888 inhabitants as per the 1961 Census. The village is situated about 11 miles south-west of Bodhan on the Nizamabad-Kotgir road. It is extended over an area of 5.37 square miles and it has 1,039 occupied residential houses. Here people live by cultivation as their main occupation and irrigation is facilitated by the Nizamsagar canal and two other canals within the taluk itself. Wet paddy and sugarcane are two chief crops raised. There is a hospital, a police station and a Zilla Parishad Middle School in this village. There is also a private library. A weekly market is held on every Wednesday. Kotgir contains a temple of Vithal Swami and a Dargah.

PART III

STATISTICAL TABLES

NIZAMABAD DISTRICT

(TALUKWISE DENSITY OF POPULATION)

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

EXPLANATORY NOTE

A-SERIES

GENERAL POPULATION TABLES

General Population Tables prepared at the 1961 Census are the basic demographic tables and give information about the total population as recorded at the present Census in the district/taluk/town, the territorial changes that have occured during the last decade from 1951-61, variation of population during the past six decades, distribution of villages and towns by population sizes, and trends of urbanisation in the district. The data are presented under the following four Tables:—

A-I Area, Houses and Population

A-II Variation in Population during sixty years (1901-61)

A-III Villages classified by population

A-IV Towns (And Town-Groups) classified by population in 1961 with variation since 1941

All the above Tables pertaining to Nizamabad district are reproduced in this Hand Book.

TABLE A-I AREA, HOUSES AND POPULATION

This Table, the basic population table, gives for the district and for each taluk as well as for each town in the taluk, area in square miles and also in square kilometres, persons per square mile, number of villages inhabited and uninhabited, number of towns, number of Occupied Residential Houses, and population by persons, males and females. The figures have been given separately one below the other under Total, Rural and Urban. In this Table as in all other Tables the taluks have been arranged in the order of the Location Code Numbers adopted at the 1961 Census and not in an alphabetical order. For this purpose all seven taluks in the district have been numbered off continuously in a clockwise order starting from the taluk in which the district headquarters is situated, i.e., from Nizamabad taluk. The Location Code Numbers allotted to the taluks are shown below.

Name of Taluk	*Location Code Number*
Nizamabad	1
Armur	2
Kamareddy	3
Yellareddy	4
Banswada	5
Madnur (Independent Sub-Taluk)	6
Bodhan	7

One of the main changes in the presentation of this Table since the last Census is that the particulars relating to each of the towns in the taluk are also given underneath the concerned taluk besides giving the number of inhabited and uninhabited villages in each taluk.

The district area shown against (x) in column 3 (a) in brackets is that supplied by the Surveyor-General, India. The difference noticed between the area figures furnished by the Surveyor-General, India and the figures given by the State Survey Department shown against (y) is on account of the different methods of computation of areas adopted by the two authorities. The area figures adopted generally for the district and the taluks are as furnished by the State Survey Department and the area figures of each of the towns are as furnished by the Local Authorities concerned and these are exhibited under column 3 (a). The urban area of each taluk has been worked out by adding the areas of all the urban units in the taluk and the rural area of the taluk is obtained by deducting the urban area of the taluk from its total area.

The area in square kilometres under column 3 (b) is obtained by converting the area in square miles, corrected upto two places of decimals, given under column 3 (a). The area figures for district Total/Rural/Urban, taluk Total/Rural and for each town have been first converted separately. In order to tally the totals of all the taluks with the district total the converted Total/Rural/Urban area figures of the taluks have been suitably adjusted on prorata basis according to area ratios of the taluks. The area of each town both in square miles under column 3 (a) and in square kilometres under column 3 (b) have been given upto second decimal place while the Total/Rural/Urban areas of the taluks as well as of the district have been given only upto first decimal place.

The density of persons per square mile for the district and for each of the taluks and towns has been worked out according to the area figures exhibited under column 3 (a).

"Village" referred to in this Table and in all other Tables in this book is the Revenue administrative unit with well defined boundaries. A village having one or more groups of habitations is treated as an inhabited village and a village with no habitation at all is treated as an uninhabited village. The numbers of inhabited and uninhabited villages in each taluk and in the district are shown under columns 5 and 6 of this Table. In computing the number of villages in a taluk, the villages which are either completely included in an urban unit (town) or hamlets to a main Revenue villages, are not taken into account. All the Revenue villages within the taluk are demarcated and numbered off continuously from North-West to South-East. The number so assigned to each village is the 1961 Census Location Code Number, distinct from the

Revenue Survey Number and will be referred to hereafter as the Location Code Number.

"Town" is a place of usually having not less than 5,000 inhabitants possessing distinct urban characteristics and also satisfying certain criteria prescribed.

For recognition of any place as a town at the the present Census it should be either covered by a City Corporation, Municipality or Cantonment Board or that it should generally satisfy the following criteria:—

(i) It should have a minimum population of 5,000;

(ii) The density of population should not be less than 1,000 per square mile; and

(iii) At least 3/4ths of the adult male population should be non-agricultural.

The total number of towns in each taluk and in the district is exhibited under column 7 of this Table.

A Census "House" is defined (for the purpose of 1961 Census) as a structure or part of a structure inhabited or vacant, a dwelling, a shop, workshop, or a factory, place of business, a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard, leading to a main gate or enjoying a separate entrance. Only houses used wholly or partly for the purpose of residence by one or more households are considered as residential houses and the number of such houses in the town/taluk/district have been given in column 8. Houses utilised wholly for purposes other than residence are not therefore taken into account.

The total population figures, by persons, males and females for the district as well as for each taluk and town have been exhibited separately under columns 9, 10 and 11 in this Table.

Besides the main Table, there are also three Appendices to this Table.

Appendix I: In this Appendix the growth of the district and the taluks to the present area since the last Census has been traced by giving the territorial changes that have taken place during the last decade together with the names of the units and the area involved in the changes. The net area gained or lost by each unit is also given in this Appendix.

Appendix II : One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. However, some places with a population of 5,000 and over did not qualify to be treated as towns. This Appendix gives the number of such places with their population. There are no towns with population under 5,000 persons at the 1961 Census in this district.

Appendix III : This Appendix shows the taluk-wise figures for the Houseless Population and the Institutional Population separately. Houseless Population comprises groups of people who have no fixed place of residence and no regular home to live in. Institutional Population represents groups of unrelated persons living and messing together, as in the case of Boarding houses, messes etc., under the management of a head of the household appointed either by rules governing the institution or by common consent of its members. For the purpose of studying different characteristics Institutional Population is also considered as Household Population.

TABLE A-II VARIATION IN POPULATION DURING SIXTY YEARS (1901 - 1961)

This Table compares the population of the district as ascertained at the 1961 Census with the corresponding figures for the six previous Census i. e., from 1901. The figures revealed at the previous Censuses have been adjusted for subsequent territorial changes in order to afford a correct basis for comparison.

As this Table gives the growth of population from decade to decade, these data form the main source for the estimation of population in the absence of reliable Vital Statistics. One of the main changes in the presentation of this Table since the last Census is that the percentage of variation is also given from decade to decade. The variation of males and females from decade to decade has been omitted at the present Census.

During the last decade, the following inter-district changes have taken place in this district:—

(i) Bichkonda and Jukkal circles were transferred from Deglur taluk of Nanded district of former Hyderabad State (now in Maharashtra State) to newly constituted Madnur independent sub-taluk.

(ii) Sawargaon village was transferred from Narayankhed taluk of Medak district (formerly of Bidar district of Hyderabed State) (now in Mysore State) to newly constituted Madnur Independent Sub-Taluk. For details of the villages involved in the transfers please refer to Appendix I to Table A-I.

Appendix : The Appendix to this Table shows the 1951 population according to the territorial jurisdiction in 1951, changes in area and the population involved in the changes that have taken place during the last decade. The details of transfers of areas in each case together with the names and areas in square miles and the number and the date of Notification of each transfer to the extent available are also given in the foot note.

TABLE A-III VILLAGES CLASSIFIED BY POPULATION

This Table shows the total number of inhabited villages in the district, arranged on population basis under the following groups :—

Less than 200 population
200 - 499
500 - 999
1,000 - 1,999
2,000 - 4,999
5,000 - 9,999
10,000 and above

The villages which are either uninhabited or wholly included in urban units are not taken into account in this Table. The following statement gives at a glance the break-up of all the inhabited villages of Nizamabad district classified by population in four broad groups *viz.*,

Class	*Number of inhabited villages*
Villages with population	
Less than 499	303
500 - 1,999	464
2,000 - 4,999	88
5,000 and above	10
Total inhabited villages	865

For the definition of "village" and "inhabited village" see fly leaf to Table A-1.

TABLE A-IV TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

This Table shows the growth of each town since 1941. The civic status, area both in sq. miles and sq. kilometres, population with sex break-up, decade variation in total population and percentage of decade variation have been given for every town in the district.

For the definition of "Town" see fly-leaf to Table A-I.

The towns have been classified into six classes according to their population in the latest Census as detailed below:—

Class	*Limits of Population*
I	100,000 and above
II	50,000 - 99,999
III	20,000 - 49,999
IV	10,000 - 19,999
V	5,000 - 9,999
VI	Less than 5,000

Class I towns with a population of 100,000 and above have been treated as cities. The total number of towns under each class in the district at 1961 Census are given below:—

Class	*Number of Towns*
I	Nil
II	1
III	1
IV	2
V	2
VI	Nil
Total Towns	6

Five towns *viz.*, Yedpalle, Balkonda, Yellareddy, Ranjal and Madnur of 1951 Census have been deleted from the list of towns in the present Census in this district.

Since the prime purpose of this Table is to show the growth of towns as towns and not how certain places have grown into towns from villages, the population of a place which at any particular Census year was not treated as a town is no given in this Table. The population of towns at each of the last seven Census years *i. e.*, since 1901 is, however, given in Table A-IV in Part II-A General Population Tables of Andhra Pradesh (State Volume). The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

The civic status of every town i. e., whether the town is a Municipality, a Panchayat *etc.*, is indicated after the name of the town in abbreviated letters C.M., T.M., P. *etc.*

One of the main changes in the presentation of this Table since the last Census is that the area of Towns and the percentage of decade variation of the total population of the towns have also been given.

Appendix to this Table gives the names of towns recognised at the present Census together with the names of villages either fully or partly included in them.

TABLE A-I

AREA, HOUSES AND POPULATION

Disrtict/Taluk/Town	Total Rural Urban	Area in Sq. miles	Area in Sq.Km.	Popu-lation per Sq.mile	No. of Villages Inha-bited	No. of Villages Unin-habited	No.of Towns	No. of Occupied Residential Houses	Population Persons	Population Males	Population Females

Bodhan (C.M.)	U	8·67	22·46	3,567	...	...	1	6,530	30,929	16,064	14,865

NOTE :—1. Under columns 3 (a) and 3 (b) (x) represents the area figures furnished by Surveyor-General of India, and (y) represents the area figures furnished by State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for a district/taluk is obtained by subtracting from the State Survey area, the urban area.

2. The square kilometre and density figures of urban areas of taluk/district are worked out using the area figures corrected upto two places of decimal obtained by adding the areas of the towns in the respective units and not using area figures given in the table. In addition to this the area figures relating to square kilometres are further adjusted to enable the taluk/district totals tally.

3. The following abbreviations have been used for the status of a town :—
C. M. : City Municipality; T. M. : Town Municipality; P. : Panchayat

APPENDIX I TO TABLE A-I

Statement showing the 1951 Territorial Units constituting the present set-up of each taluk of Nizamabad district and details of net area gain or loss in the changed Territories during the decade 1951-1961

(Only those names/areas which have undergone changes since 1951 have been shown in this Appendix.)

District/Taluk	1951 Territorial Units	Detailes of gain in Territories			Details of loss in Territories			Net Area (Gain '+' Loss '—')	
		Brief description	Area		Brief description	Area			
			Sq. miles	Sq. Km.		Sq. miles	Sq. Km.	Sq. miles.	Sq. Km.
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
NIZAMABAD DISTRICT	Nizamabad District		232.1	601.0	...	...	...	+ 232.1	+ 601.0
		(i) Bichkonda and Jukkal Circles transferred from Deglur Taluk of Nanded District of former Hyderabad State (now in Maharashtra State) to newly constituted Madnur Independent Sub-Taluk.	230.8	597.8					
		(ii) Sawargaon village (Code No. 137) transferred from Narayankhed Taluk of Medak District (formerly of Bidar District of Hyderabad State) (now in Mysore State) to newly constituted Madnur Independent Sub-Taluk.	1.3	3.2					
Madnur Independent Sub-Taluk	...	Newly formed by the following transfers.	232.1	601.0	...	...	...	+ 232.1	+ 601.0
		(i) Bichkonda and Jukkal Circles transferred from Deglur Taluk of Nanded District of former Hyderabad State (now in Maharashtra State).	230.8	597.8					
		(ii) Sawargaon village (Code No. 137) transferred from Narayankhed Taluk of Medak District (formerly of Bidar District of former Hyderabad State) (now in Mysore State).	1.3	3.2					

APPENDIX II TO TABLE A-I

Number of villages with a population of 5,000 and over and towns with a population under 5,000

(Taluks which do not have villages falling under this category are not included in this Appendix.)

District/Taluk	Villages with a population of 5,000 and over		
	Number of Villages	Population	Percentage to total Rural population of the District
(1)	(2)	(3)	(4)
NIZAMABAD DISTRICT	**10**	**58,750**	**6·72**
Armur Taluk	2	12,373	1·42
Kamareddy Taluk	2	10,883	1·24
Yellareddy Taluk	1	5,435	0·62
Madnur Independent Sub-Taluk	1	5,332	0·61
Bodhan Taluk	4	24,727	2·83

NOTE :— There are no towns with a population under 5,000 in this district.

3 Kamareddy	449·0	1,162·9	156,289	483·2 (—34·2)	1,251·5 (—88·6)	136,298	136,298	...
4 Yellareddy	364·2	943·3	82,671	438·4 (—74·2)	1,135·5 (—192·2)	71,339	71,339	...
5 Banswada	458·4	1,187·2	103,693	314·9 (+143·5)	815·6 (+371·6)	86,801	86,801	...
6 Madnur Independent Sub-Taluk (b)	232·0	600·9	73,722	... (+232·0)	... (+600·9)	... (+62,085)	62,085	+62,085
7 Bodhan	307·2	795·7	157,330	290·6 (+16·6)	752·6 (+43·1)	126,096	126,096	...

(a) Jukkal and Bichkonda circles with an area 230·8 sq. miles of Deglur taluk of Nanded district of former Hyderabad State transferred to this district under States Reorganisation Act, 1956 and constituted into Madnur independent sub-taluk, vide G. O. Ms. No. 1589 Revenue dated 25th August, 1958.

(b) In addition to changes enumerated against symbol (a) the following change took place. Sawargaon village with an area 1·3 sq. miles transferred from Narayankhed taluk of Medak district (formerly of Bidar district) to this taluk (formerly part of Banswada taluk) of Nizamabad district vide G. O. Ms. No. 1541 Revenue dated 19th August, 1958.

NOTE:-1. Area figures furnished under columns (2) and (5) are according to State Survey Department and they are according to the jurisdiction prevailing in 1961 and 1951 respectively.

2. The figures given in brackets under columns 5 and 6 represent the difference in area between 1951 and 1961 and the figures in brackets under column 7 show the difference in population between the area as per the jurisdiction in 1951 and the present jurisdiction.

3. The difference of area in 1951-61 given under columns 5 and 6 of this Appendix does not agree with the area given under columns 9 and 10 of Appendix to Table A-I on account of revised computation.

4. Though there are no changes in the jurisdiction of all taluks except Madnur independent sub-taluk since 1951 Census there is change in their area due to computational error.

EXPLANATORY NOTE

B-SERIES

ECONOMIC TABLES

The Economic Tables for the 1961 Census are based on the principal work of a person and the concept of dependency has been abandoned altogether for economic classification. The entire population has been divided into the following nine Categories of Workers, for broad economic classification based on the National Classification of Industries adopted by the Government and the Non-Workers being shown as a separate category.

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

X Non-Workers

The following seventeen Economic Tables, nine of which relate to the General Population and the remaining eight relating to a 20% sample of Households, have been prepared at the present Census.

(i) General Economic Tables

B-I Workers and Non-Workers classified by sex and broad Age-groups

B-II Workers and Non-Workers in cities, town-groups and towns arranged territorially classified by sex and broad Age-groups

B-III *Part A*-Industrial Classification of Workers and Non-Workers by educational levels *in Urban areas only*

Part B-Industrial Classification of Workers and Non-Workers by educational levels *in Rural areas only*

B-IV *Part A*-Industrial Classification by sex and class of worker of persons at work at Household Industry

Part B-Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service

Part C-Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than Cultivation

B-V Occupational Classification by sex of persons at work other than Cultivation

B-VI Occupational Divisions of persons at work other than Cultivation classified by sex, broad Age-groups and educational levels in *Urban areas only*

B-VII *Part A*-Persons working principally (i) as Cultivators (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural labourer

Part B-Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry

B-VIII *Part A*-Persons unemployed aged 15 and above by sex, broad Age-groups and educational levels in *Urban areas only*

Part B-Persons unemployed aged 15 and above by sex, and educational levels in *Rural areas only*

B-IX Persons not at work classified by sex, broad Age-groups and type of activity

(ii) Household Economic Tables

B-X Sample Households (i) engaged neither in Cultivation nor in Household Industry (ii) engaged either in Cultivation or in Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry

B-XI Sample Households engaged in Cultivation classified by interest in land and size of land cultivated

B-XII Sample Households engaged in Cultivation only classified by size of land cultivated, and number of family workers and hired workers

B-XIII Sample Households engaged both in Cultivation and Household Industry, showing size of land cultivated classified by principal Household Industry

B-XIV *Part A*-Households classified by Major Groups of principal Household Industry and number of persons engaged

Part B-Households classified by Minor Groups of principal Household Industry

B-XV Sample Households engaged both in Cultivation and Household Industry classified by size of land

B-XVI Sample principal Household Industry classified by period of working and total number of workers engaged in Household Industry

B-XVII Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (a) neither in Cultivation nor in Industry (b) in House-

hold Industry only and (c) in Cultivation Sub-Classified by size of land Cultivated.

Only Tables B-I, B-III, B-IV Part C, B-V, B-VII, B-VIII and B-IX out of the above Tables pertaining to the Nizamabad district are reproduced in this Hand Book.

The Household Economic Tables are a special feature of this Census and are prepared on the basis of a 20% sample of the returns in the Household Schedules filled up at the time of enumeration and are given in a separate volume entitled "Census of India 1961-Volume II-Andhra Pradesh-Part III Household Economic Tables" and may be referred to.

The working population in each of the nine categories of workers and the non-working population is divided by broad age-groups *viz.*, 0–14, 15–34, 35–59, 60+ and Age not stated in some of these Economic Tables.

TABLE B-I – WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table is prepared separately for Total, Rural and Urban population and is a summary Economic Table for the entire district. It gives the distribution of the population by sex among the nine Industrial Categories of Workers and also Non-Workers by the four broad Age-groups 0–14, 15–34, 35-59 and 60+ years. This is the basic Economic Table and the Age-groups correspond to the different stages of life which have special significance with reference to capacity to work *viz.*, children, young persons, middle-aged persons and elderly persons. The classification of non-working population is made in other succeeding Tables.

This Table is prepared on the basis of the principal work of a person irrespective of the fact that the person may not be self supporting from the income derived by that work. In the case of persons who are engaged in more than one work, which are also productive activities, the principal work is taken as that one which has been declared by the person himself as the work on which he spends the longest time and not necessarily the work from which he derives the largest income. Thus the stress is on the concept of work and not income or dependency. The following explanation makes it clear as to who is treated as a Worker.

Workers

All persons who were engaged in some productive work during any of the 15 days preceding the day on which enumerated, irrespective of the fact whether they derive income or not, are treated as Workers. In respect of seasonal work like Cultivation, Livestock, Household Industry etc., if the person had some regular work for more than one hour a day throughout the greater part of the working season, he is recorded as a Worker. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other cause are also treated as Workers. An undertrial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however treated as Workers. Persons under training as apprentices with or without wages are recorded as Workers. Family Workers i.e., who do not directly derive any income but attend to work along with other members of the family are treated as Workers. An adult woman who is engaged mainly in household duties and in no other economically productive work i.e., a housewife, is not, however, treated as a Worker. Work includes not only actual work but also effective supervision. A public or social service Worker who is actually engaged in public service activity or political activity is taken as a Worker. Thus all workers in any branch of productive work are netted as Workers.

Non-Workers

All persons who are not workers i.e., those falling under the following categories are treated as Non-Workers.

(i) Full time students or children attending schools and who do no other work;

(ii) Persons engaged in unpaid home duties such as housewife;

(iii) Any dependant including an infant or child not attending school or a person permanently disabled from work because of illness or old age;

(iv) A retired person who is not employed again, a rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work;

(v) Beggars, vagrants or independent women without indication of source of income and others with unspecified source of existence;

(vi) A convict in jail or an inmate of a penal, mental or charitable institution;

(vii) Unemployed persons seeking employment for the first time;

(viii) Person employed before but now out of employment.

TABLE B-III—INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

This Table is divided into two parts. Part A relates to Urban areas and Part B relates to Rural areas. In this Table each of the nine categories of Workers and also the Non-Workers is classified by different educational levels.

In *Part A* which relates to Urban areas only, the data are given for all the Urban areas of the district

put together by the following educational levels.

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation or Higher Secondary

Technical diploma not equal to degree

Non-Technical diploma not equal to degree

University degree or Post-graduate degree other than Technical degree

Technical degree or diploma equal to degree or Post-graduate degree

Engineering

Medicine

Agriculture

Veterinary and Dairying

Technology

Teaching

Others

In *Part B* the data which relate to Rural areas only are given for the district, followed by taluk by the following educational levels.

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation and above

"Literate" is a person who can, with understanding both read and write. He should be able to read any matter in print or manuscript and also be able to write a simple letter. A person who can neither read nor write or can merely read and cannot write is considered as illiterate. All children aged 4 years and below are treated as illiterates. The test for education is that the person should have passed a recognised written examination or examinations as proof of the educational level attained. The highest examination passed is taken as the level of education.

TABLE B-IV—INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table is divided into three parts.

Part-A shows Industrial classification by sex and class of worker of persons at work at Household Industry for Total, Rural and Urban Population. The data are shown first for the division followed by Major Groups in the order laid down in the Indain Standard Industrial Classification under that Division.

Part-B shows the Industrial Classification by sex and class of worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service for the Total and Urban population. In this part also the data are presented first for the Division followed by the Major Groups in the order laid down in the Indian Standard Industrial Classification.

Part-C shows the Industrial Classification by sex and Divisions, Major Groups and Minor groups of persons at work other than cultivation for Total and Urban population. The data are presented first for the Divisions followed by Major Groups in the order laid down in the Indian Standard Industrial Classification. Under each Major group the corresponding Minor Groups are shown.

Only Part-C is reproduced in this Book up to district level. Minor groups having less than 1% of Workers of the respective Division (0.5% in the case of 2 & 3 Division) are not shown in this Table, but given in the Appendix to this Table.

"Household Industry" is an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in the Rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory and should relate to production, processing, servicing, repairing or making and selling of goods.

An *"Employer"* is a person who has to employ other persons in order to perform the work. Such a person is not only responsible for his own personal work but also for giving work to others. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An *"Employee"* is a person who usually works under some other person for salary or wages in cash or kind, persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers, on behalf of their own employers are not regarded as employers.

A *"Single Worker"* is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. Single worker also includes a person who works in joint partnership with one or several persons hiring no employees, and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is recorded as a "Single Worker".

A *"Family Worker"* is a member who works, without receiving wages in cash or kind, in an Industry, Business or Trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an Industry, whether run at home or away from home in town or village and even away from village in the Rural area should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. Members of a family include those drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled

to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative. Members of the household who help solely in household duties are not treated as family workers.

Note :—In respect of Household Industry, by the very nature of the participation of the workers in a household Industry all the four categories of workers are not recognised. Only the "employees" if any in a Household Industry are categorised as such. The rest are clubbed together as "others".

TABLE B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table shows, for the Total and Urban Population the Occupational Classification of persons working in Non-Agricultural occupations. The data are presented first for the Division followed by the Occupational Groups in the order of the National Classification of occupations. Under each Group the detailed Occupational Families are shown. Occupational Families, accounting for less than 1% of the Workers of the respective Division (less than 0.5% in each of Families under Division 7-8) are not given in this Table but shown in the Appendix to this Table. The particulars for the district are given down to the Occupational Family, while the taluk-wise particulars are given upto Division level only.

The Occupational Classification given in this Table is quite distinct from the Industrial Classification presented in Table B-IV Part-C. Occupational Classification relates to the actual work a person does irrespective of the Industry in which he is engaged eg., a person who is a clerical worker for Occupational Classification may be connected with Industry, Trade or Service. Conversely in the same Industrial Category there may be persons following different Occupations as, technicians, managerial workers, clerical workers, watch and ward etc. Therefore in this Table under each Occupational Division Group and Family the broad Industrial Category of the worker is also given.

TABLE B-VII *Part A*—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

Part B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This Table is divided into two parts:

Part-A shows the persons working principally as Cultivator or as Agricultural labourer or at Household Industry and who have secondary work in the other two alternatives from among Household Industry or Cultivation or Agricultural Labour. The data for the district are given for Total, Rural and Urban population by Industrial Divisions and Major Groups. For the taluks, however, the particulars are given for Rural population and by Divisions only.

Part-B shows the persons working principally in Non-Household Industry, Trade, Business, Profession or Service and also engaged at Household Industry as secondary work by Industrial Divisions and Major Groups. The data for the district are presented for the Total, Rural and Urban population by Divisions followed by the Major Groups of that Division. The taluk-wise data are presented for Rural population by Industrial Divisions only.

TABLE B-VIII—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS

This Table shows the distribution of persons unemployed aged 15 and above by sex and educational levels for Urban and Rural areas separately in two parts.

In *Part-A*, which relates to the Urban areas, the unemployed have been sub-divided into two classes, viz., (i) Persons seeking employment for the first time (ii) Persons employed before but now out of employment and seeking employment. The data are given by broad Age-groups and by educational levels. The first class of unemployed are divided into the Age-groups 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and the second class into Age-groups 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated.

Part-B relates to Rural areas. The data in this part are given taluk-wise by educational levels. The data in this Table are not, however, given by Age-groups.

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This Table shows for the Total, Rural and Urban population, the persons not at work classified by sex, broad Age-groups and type of activity, The Non-workers are divided into eight categories according to their activities viz., (i) Fulltime students; (ii) those attending only to Household duties; (iii) Dependants, infants and disabled; (iv) Retired persons, Rentiers or persons of independent means; (v) Beggars, vagrants etc., (vi) Inmates of penal, mental and charitable institutions; (vii) Persons seeking employment for the first time; and (viii) Persons employed before but now out of employment and seeking work according to their activities. These eight categories are based on the recommendations of the United Nations. This Table provides information about those who have an

income without working, about housewives, about school going children, besides other types of non-working population. The data for the district are presented for Total, Rural and Urban population. The taluk-wise data are, however, presented for the Rural population only.

A total number of 4 males have been returned as fulltime students in the Age-group 35-59 in this district. These elderly persons might be pursuing advanced studies in religion such as Christian missionary trainees, or in Vedas, Music or other Fine Arts etc., and hence classified as fulltime students.

A complete list of the Standard Industrial Classification adopted by the Government of India giving the description of Divisions, Major Groups and Minor Groups is given below for guidance. In Table B IV Part C and Table B VII Part B only the number of the Division, Major or Minor Group is shown. The description of the Industry Business or Service concerned can be found from the list below.

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The Divisions and Major Groups with their Code Numbers e listed below.

Divisions

0	*AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING*
1	*MINING AND QUARRYING*
2 & 3	*MANUFACTURING*
4	*CONSTRUCTION*
5	*ELECTRICITY, GAS, WATER AND SANITARY SERVICES*
6	*TRADE AND COMMERCE*
7	*TRANSPORT, STORAGE AND COMMUNICATIONS*
8	*SERVICES*
9	*ACTIVITIES NOT ADEQUATELY DESCRIBED*

Major Groups

DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Livestock and Hunting

DIVISION 1—MINING AND QUARRYING

10	Mining and Quarrying

DIVISION 2 & 3—MANUFACTURING

20	Foodstuffs
21	Beverages
22	Tobacco products
23	Textile—Cotton
24	Textile—Jute
25	Textile—Wool
26	Textile—Silk
27	Textile—Miscellaneous
28	Manufacture of Wood and Wooden products
29	Paper and Paper products
30	Printing and Publishing
31	Leather and Leather products
32	Rubber, Petroleum and Coal Products
33	Chemicals and Chemical products
34-35	Non-Metallic Mineral products other than Petroleum and Coal
36	Basic Metals and their products except Machinery and Transport equipment
37	Machinery (all kinds other than Transport) and Electrical equipment
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

DIVISION 4—CONSTRUCTION

40	Construction

DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES

50	Electricity and Gas
51	Water supply and Sanitary services

DIVISION 6—TRADE AND COMMERCE

60-63	Wholesale Trade
64-68	Retail Trade
69	Trade and Commerce Miscellaneous

DIVISION 7—TRANSPORT, STORAGE AND COMMUNICATIONS

70-71	Transport
72	Storage and Warehousing
73	Communications

DIVISION 8—SERVICES

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services
83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

DIVISION 9—ACTIVITIES NOT ADEQUATELY DESCRIBED

90	Activities unspecified and not adequately described

Minor Groups

Classification and Code numbers at the 3 digit level in respect of Minor Groups are shown in the subsequent pages :

DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

00 Field Produce and Plantation crops

Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	*000*
Production of pulses, such as arhar, moong, masur, urd, khesari, other Gram	*001*
Production of raw jute and kindred fibre crops	*002*
Production of raw cotton and kindred fibre crops	*003*
Production of oilseeds, sugarcane and other cash crops	*004*
Production of other crops (including vegetables) not covered above	*005*
Production of fruits and nuts in plantation, vines and orchards	*006*
Production of wood, bamboo, cane reeds, thatching grass etc.	*007*
Production of juice by tapping palms	*008*
Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	*009*

Major Group (Code)	Description	Minor Group (Code)
01	Plantation Crops	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
DIVISION 1—MINING AND QUARRYING		
10	Mining and Quarrying	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
DIVISION 2 & 3—MANUFACTURING		
20	Foodstuffs	
	Production of rice, atta, flour, etc., by milling dehusking and processing of crops and food-grains	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy ...	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice.	215
	Production of ice cream.	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	Textile—Cotton	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching.	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236

Major Group (Code)	Description	Minor Group (Code)
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	Textile—Jute	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textiles	256
26	Textile—Silk	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and Paper Products	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and publishing	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312) such as leather upholstery, suit cases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326

Major Group (Code)	Description	Minor Group (Code)
33	Chemicals and Chemical Products	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34–35	Non-Metallic Mineral Products other than Petroleum and Coal	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by Code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their Products except Machinery and Transport Equipment	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products. (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardware such as G. I. pipe, wire net, bolt, screw, bucket, cutlery. (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	Machinery (All kinds other than Transport) and Electrical Equipment	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime movers and boilers, other than electrical equipment such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus appliances not specified above	379
38	Transport equipment	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles	389
39	Miscellaneous Manufacturing Industries	
	Manufacture of optical instruments and lenses opthalmic goods and photographic equipment and supplies	390

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
DIVISION 4—CONSTRUCTION		
	Construction	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund embankments, dam, canal, tank, tubewells, wells	403
DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES		
50	Electricity and Gas	
	Generation and transmission of electric energy	500
	Distribution of electric energy,	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
DIVISION 6—TRADE AND COMMERCE		
60–63	Wholesale Trade	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuff (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipments	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64—68	Retail Trade	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf) coffee (Seed and powder), aerated water	641
	Retail trading in other intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.,	643
	Retail trading in tobacco, bidi, cigarettes, and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals.	647
	Retail trading in straw and fodder	648

Major Group (Code)	Description	Minor Group (Code)
	Retail trading in fibres, yarns, saree, ready made garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	*650*
	Retail trading in toilet goods, perfumes and cosmetics	*651*
	Retail trading in medicines and chemicals	*652*
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	*653*
	Retail trading in tyres, tubes and allied rubber products	*654*
	Retail trading in petrol, mobil oil and allied products	*655*
	Retail trading in wooden, steel and other metallic furniture and fittings	*660*
	Retail trading in stationery goods and paper	*661*
	Retail trading in metal, porcelain and glass utensils	*662*
	Retail trading in earthenware and earthen toys	*663*
	Retail trading in other household equipment not covered above	*664*
	Retail trading in bricks, tiles and other building materials	*670*
	Retail trading in hardware and sanitary equipment	*671*
	Retail trading in wood, bamboo cane, bark and thatches	*672*
	Retail trading in other building materials	*673*
	Retail trading in agricultural and industrial machinery equipment, tools and appliances	*680*
	Retail trading in transport and storage equipment	*681*
	Retail trading in electrical goods like electric fan, bulb, etc.	*682*
	Retail trading in skins, leather and furs and their products excluding footwear and head gear	*683*
	Retail trading in clock and watch, eye glass, frame	*684*
	Retail trading in scientific, medical and surgical instruments	*685*
	Retail trading in precious stones and jewellery	*686*
	Retail trading in musical instruments gramophone record, pictures and paintings including curio dealing	*687*
	Book-selling	*688*
	Retail trading in goods unspecified	*689*
69	Trade and Commerce Miscellaneous	
	Importing and exporting of goods and commodities	*690*
	Real estate and properties	*691*
	Stocks, shares and futures	*692*
	Providents and insurances	*693*
	Money lending (indigenous)	*694*
	Banking and similar type of financial operation	*695*
	Auctioneering	*696*
	Distribution of motion pictures	*697*
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	*699*
	DIVISION 7—TRANSPORT, STORAGE AND COMMUNICATIONS	
70—71	Transport	
	Transporting by railways	*700*
	Transporting by tramway and bus service	*701*
	Transporting by motor vehicles (other than omnibus)	*702*
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	*703*
	Animal transporting by animals such as horse, elephant, mule, camel	*704*
	Transporting by man such as carrying of luggage hand cart driving, rickshaw pulling, cycle rickshaw driving	*705*
	Transporting by boat, steamer, ferry, etc., by river, canal	*706*
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	*707*
	Transporting by air	*708*
	Transporting by other means not covered above	*709*
	Services incidental to transport such as packing, carting travel agency	*710*
72	Storage and Ware Housing	
	Operation of storage such as warehouses	*720*
	Operation of storage such as cold storage	*721*
	Operation of storage of other type	*722*
73	Communications	
	Postal, telegraphic, wireless and signal communications	*730*
	Telephone communication	*731*
	Information and broadcasting	*732*
	DIVISION 8—SERVICES	
80	Public Services (This does not include Govt., Quasi Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public Services in Union and State army including territorial corps and volunteer corps	*800*
	Public service in Navy	*801*
	Public service in Air Force	*802*
	Public service in Police	*803*
	Public service in administrative departments and offices of Central Government	*804*
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	*805*
	Public services in administrative departments and offices of State Governments	*809*

Major Group (Code)	Description	Minor Group (Code)
81	Educational and Scientific Services	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinics as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	Religious and Welfare Services	
	Religious services renderd by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	Legal Services	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	Business Services	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisation of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, newspaper correspondent, columnist. journalists, editors, authors	853
86	Community Services and Trade and Labour Associations	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	Recreation Services	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individual including horse, motor, etc., racing	873
88	Personal Services	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants aud similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	Services (not elsewhere classified)	
	Services rendered by organisations or individuals not elsewhere classified	890
	DIVISION 9—ACTIVITIES NOT ADEQUATELY DESCRIBED	
90	*Activities unspecified and not adequately described including activities of such individuals who failed to provide sufficient information about their industrial affiliation to enable them to be classified*	900
	Fresh entrants to the Labour Market	999

EXPLANATORY NOTE

C-SERIES

SOCIAL AND CULTURAL TABLES

Social and Cultural Tables prepared at the 1961 Census give information relating to composition of sample Households, Age, Sex, Marital Status, Education, Mother-Tongue, Bilingualism and Religion of general population and also about Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers. The data are presented in eight Tables as indicated below:

C-I Composition of Sample Households by relationship to head of family classified by size of land cultivated

C-II Age and Marital Status

C-III Age, Sex and Education

Part A—All areas

Part B—Urban areas

Part C—Rural areas

C-IV Single Year Age Returns

C-V Mother-Tongue (in alphabetical order)

C-VI Bilingualism

C-VII Religion

C-VIII Scheduled Castes and Scheduled Tribes classified by Literacy and Industrial Category of Workers

Part A—Classification by Literacy and Industrial Category of workers and Non-Workers *among Scheduled Castes*

Part B—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

All the above Tables pertaining to Nizamabad district except Tables C-IV Single Year Age Returns and C-VI Bilingualism are reproduced in this book.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

This Table, prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration, gives the composition of Households, separately for Total, Rural and Urban areas in the district. The Households in the Rural areas are further classified into 3 Economic Categories *viz.*, (i) Households engaged neither in Cultivation nor in Household Industry (ii) Households engaged in Household Industry only (iii) Households engaged in Cultivation only. In respect of the 3rd category of Households the data are furnished separately for each of the eleven classes of Households according to the size of land cultivated *viz.*, (i) Less than one acre (ii) 1.0 - 2.4 acres (iii) 2.5 - 4.9 acres (iv) 5.0 - 7.4 acres (v) 7.5 - 9.9 acres (vi) 10.0 - 12.4 acres (vii) 12.5 - 14.9 acres (viii) 15.0 - 29.9 acres (ix) 30.0 - 49.9 acres (x) 50.0 + acres and (xi) Size of holding unspecified. The composition of the Households is given in terms of the heads of Households, spouses of heads of Households, married sons and other married relations, other relations and unrelated persons. This table will thus indicate the strength of the joint family system and will therefore be of sociological interest.

TABLE C-II—AGE AND MARITAL STATUS

This Table, prepared on full count gives the distribution of population both by Age-groups and Marital Status separately for Total, Rural and Urban population in the district, and for the Rural population in each of the taluks. This is a very important demographic Table. A comparison of the data in this Table with corresponding data pertaining to the last Census will give an indication of mortality in different Marital Status and also in different Age-groups. The Age-groups, viz., 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+, and Age not stated adopted in this Table conform to international requirements. The Age-group 0-9 is automatically treated as 'Never Married' for the purpose of this Table. The proportion of increase or decrease in the various Marital Status since the last Census and the trends in the age of marriage can be studied from this Table. From the data of married females by Age-groups given under column 9 of this Table the future birth rates can also be forecast.

TABLE C-III—AGE, SEX AND EDUCATION

This Table gives the distribution of Total population by broad Educational levels, Sex and by broad Age-groups. This Table is divided into three parts.

Part A relates to all areas while *Part B* and *Part C* relate only to Urban and Rural areas respectively. The Educational levels given for all areas and Rural areas in *Part A* and *Part C* are the same, while in respect of Urban areas in *Part B* more detailed Educational levels have been adopted. These Educational levels are the same as those adopted in Table B-III for the Industrial Classification of Workers and Non-Workers by Educational levels. This Table is useful in ascertaining the growth of literacy in the total population as well as in the different Age-groups since the last Census.

TABLE C-V—MOTHER-TONGUE

This Table exhibits separately for the Total, Rural and Urban population of the district and only for the Rural population of each taluk, the number of persons, males and females speaking a particular language as Mother-Tongue. The languages returned at this Census are given in an alphabetical order.

'Mother-Tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the Household. If the mother died in infancy then the language mostly spoken in the Household is the Mother-Tongue. In the case of infants and deaf mutes the Mother-Tongue is the language usually spoken by the mother.

This Table is very important in view of the large number of languages and dialects spoken in the country and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the Constitution.

TABLE C-VII—RELIGION

This Table gives separately the distribution of Total, Rural and Urban population of the District and Rural population only of taluks according to Religion. In Censuses earlier to 1941 the practice was to show the distribution of population Religion-wise down to the village level. Since the 1951 Census this practice has been discontinued.

TABLE C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

Part A—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

This is a general Table prepared for Scheduled Castes and Scheduled Tribes only and gives separately, the Total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and by classification of Workers, into different Industrial Categories and the total number of Non-Workers. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This is the first time that the number of literates amongst the Scheduled Castes and Scheduled Tribes are given separately. In addition to this Table some more Special Tables for Scheduled Castes and Scheduled Tribes pertaining to Nizamabad District have also been prepared and incorporated in this book under the series "SCT Tables."

EXPLANATORY NOTE

D-SERIES

MIGRATION TABLES

The Tables in this series show the migration trends analysed on the basis of the results of the 1961 Census. The data are presented in the following seven Tables, which are reproduced upto district level and for all Cities and Town-Groups in the publication "Census of India 1961 - Volume II Andhra Pradesh-Part II-C Cultural and Migration Tables" and these may be referred to for details.

D-I	Non-Indian Nationals
D-II	Place of Birth
D-III	Migrants classified by place of birth and duration of residence in place of enumeration
D-IIIA	Migrants from other States and outside India (less than 5 years duration) classified by Age-groups
D-IV	Migrants to Cities classified by Sex, broad Age-groups, Educational Levels and in case of Workers also by Occupational Divisions and Groups
D-V	Cities showing population born locally, migrants from Rural areas and migrants from other Towns and Cities
D-VI	Distribution of Industrial categories of Workers and Non-Workers by place of birth

In this Hand book only Tables D-I and D-II showing the Non-Indian Nationals and other migrants in Nizamabad district are reproduced.

TABLE D-I—NON-INDIAN NATIONALS

This Table shows the number of Non-Indian Nationals sex-wise in the district. The Non-Indian Nationals for the purpose of presentation of the data have been broadly classified into five groups *viz.*,

(i) Nationals of Countries in Asia beyond India (including U.S.S.R.)

(ii) Nationals of Countries in Europe (excluding U.S.S.R.)

(iii) Nationals of Countries in Africa

(iv) Nationals of Countries in two Americas

(v) Nationals of Countries in Oceania

The name of the country of which the person is a National is given separately under each group. The persons who have not recorded any Nationality have been shown separately. Nationals of Goa, Diu, Daman and Pondicherry have been treated as 'Born in India'.

TABLE D-II—PLACE OF BIRTH

This Table prepared as in all previous Censuses gives the distribution of population by birth place. The data are presented both by the place of enumeration and by the place of birth classified separately into Rural and Urban areas. An important change in the presentation of the data at the present Census is that the place of birth has been classified separately as Rural and Urban. This two-fold representation of the data enables one to study the migration trends not only within the district and from outside the district but also from Rural to Urban areas and *vice-versa*.

EXPLANATORY NOTE

E-SERIES

HOUSING TABLES

The Tables in this series give information on Housing. At the present Census when House numbering was done a few months before the general Census enumeration, the various particulars relating to each Census House were collected on a standardised All India Schedule called 'House List' which is reproduced below:

CENSUS OF INDIA 1961

HOUSE LIST

Name of District.....(Code No·.....)

Name of Island/Taluk/Tehsil/Thana/Anchal/Town.....(Code No·.....)

Name of Village/Ward/Mohalla/Enumerator's Block.....(Code No·.....)

Line No·	Building Number (Municipal or local authority or Census number, if any)	Building Number (Col· 2) with sub-numbers for each Census House	Purpose for which Census House used, *e.g.* dwelling, shop, shop-cum - dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel etc.	If the Census House is used as an establishment, workshop or factory			
				Name of establishment or proprietor	Name of product (s) repair or servicing undertaken	Average No. of persons employed daily last week (including proprietor, or household members, if working)	Kind of fuel or power if machinery is used
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Description of Census House		Sub-number of each Census Household with Census House number (Col· 3)	Name of Head of Household	No.of rooms in Census Household	Does the Household live in own or rented house? (a) Own (O), (b) Rented (R)	No· of persons residing in Census Household on day of visit			Remarks
Material of wall	Material of roof					Males	Females	Total	
(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)	(18)

The data have been collected uniformly for the first time at the present Census in the above form and are presented in the following five Tables.

- E-I Census Houses and the uses to which they are put
- E-II Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwelling
- E-III Census Houses used as factories and workshops classified by Industry, *power* and *no power* used and size of employment
- E-IV Distribution of Sample Households living in Census Houses used wholly and partly as dwellings by predominant material of wall and predominant material of roof
- E-V Sample Households classified by number of members and by number of rooms occupied.

All the above Tables give information upto taluk level, except Table E-III which contains figures upto the district level only, and also in respe of towns having a population of 50,000 and more and are reproduced in the publication "Census of India, Vol. II-Andhra Pradesh-Part IV-B-Housing and and Establishment Tables" and it may be referred to for full details. In this Hand Book only "Table E-I Census Houses and the uses to which they are put" pertaining to Nizamabad district is reproduced.

TABLE E-I--CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This Table shows the number of Census Houses and the different uses to which they are put. The data are given down to taluk level and also for towns having a population of 50,000 and more; the data are presented separately for Total, Rural and Urban areas.

"Census House" is defined in the present Census as a structure, or a part of a structure inhabited or vacant, or a dwelling, or a shop-cum-dwelling or a place of business, workshop, school etc., with a separate entrance. If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common stair case, or a common courtyard, leading to a main gate, they are considered as separate Census Houses. If within an enclosed or open compound there are separate buildings then each such building is treated as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with separate entrance is treated as a separate Census House.

EXPLANATORY NOTE

SCT-SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This series of special Tables for Scheduled Castes and Scheduled Tribes gives the population of each Scheduled Caste and Scheduled Tribe classified by Religion, Age, Marital Status, Education and distributed by Industrial Categories adopted in Table B-I. After the 1931 Census, the population figures of individual Scheduled Castes and Scheduled Tribes are being given only at the present Census. The data are presented in the following five Tables.

SCT-I Industrial classification of persons at work and Non-Workers by sex for Scheduled Castes and Scheduled Tribes

SCT-II Age and Marital Status for Scheduled Castes and Scheduled Tribes

SCT-III Education in Urban and Rural areas for Scheduled Castes and Scheduled Tribes

SCT-IV Religion for Scheduled Castes and Scheduled Tribes

SCT-V Sample Households engaged in Cultivation classified by interest in land and size of land cultivated *in Rural areas only* for Scheduled Castes and Scheduled Tribes

All the above Tables except Table SCT-IV are reproduced upto district level in this book.

Besides the above five Tables, the following three Special Tables, relating to either Scheduled Castes or Scheduled Tribes exclusively are reproduced.

SC-I Persons not at work classified by sex, type of activity and educational levels *for Scheduled Castes only*

ST-I Mother-Tongue and Bilingualism *for Scheduled Tribes*

ST-II Persons not at work classified by sex and type of activity *for Scheduled Tribes*

These three Special Tables are also reproduced upto district level. The figures for all the seven taluks are also given in this book in respect of Scheduled Castes *and for the District only in respect of* Scheduled Tribes as they are larger in proportion than the State average.

In view of the safeguards provided in the Constitution for these communities, the Tables in this series will be of much use and guidance, especially when the Government are taking measures for the improvement of the condition of these communities by suitable welfare schemes under the Five Year Plans. The total Scheduled Castes and Scheduled Tribes population is given talukwise separately for Total, Rural and Urban areas and for each Town under the State Primary Census Abstract. The villagewise particulars are given under Village Directory.

The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Castes in Andhra Pradesh is given below:

Note: Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions such as Christianity or Islam or Buddhism cease to belong these castes.

(1) Throughout the State:

1 Chalavadi

2 Chamar, Mochi or Muchi

3 Madiga

4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts:

1 Adi Andhra

2 Adi Dravida

3 Arundhatiya

4 Bariki

5 Bavuri

6 Chachati
7 Chandala
8 Dandasi
9 Dom, Dombara, Paidi or Pano
10 Ghasi, Haddi or Relli Chachandi
11 Godagali
12 Godari
13 Gosangi
14 Jaggali
15 Jambuvulu
16 Madasi Kuruva or Madari Kuruva
17 Mala Dasu
18 Madiga Dasu and Mashteen
19 Matangi
20 Mundala
21 Paky or Moti
22 Pambada or Pambanda
23 Pamidi
24 Panchama or Pariah
25 Relli
26 Samban
27 Sapru
28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilaabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

1 Anamuk
2 Aray (Mala)
3 Arwa Mala
4 Beda (Budga) Jangam
5 Bindla
6 Byagara
7 Chambhar
8 Dakkal (Dokkalwar)
9 Dhor
10 Ellamalwar (Yellammalawandlu)
11 Holeya
12 Holeya Dasari
13 Kolupulvandlu
14 Mahar
15 Mala Dasari
16 Mala Hannai
17 Malajangam
18 Mala Masti
19 Mala Sale (Netkani)
20 Mala Sanyasi
21 Mang
22 Mang Garodi
23 Manne
24 Mashti
25 Mehtar
26 Mitha Ayyalvar
27 Samagara
28 Sindhollu (Chindollu)

The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule III of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the same Notification of the Ministry of Home Affairs New Delhi, dated 29th October, 1956. The list of Scheduled Tribes in Andhra Pradesh is given below:

Note: Members of Scheduled Tribes may belong to any Religion

(1) Throughout the State:

1 Chenchu or Chenchwar
2 Koya or Goud with its sub-sects-Rajah or Rasha Koyas, Lingadhari Koyas (ordinary), Kottu Koyas, Bhine Koya and Rajkoya

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts:

1 Bagata
2 Gadabas
3 Jatapus
4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Kondareddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity Kondhs
10 Kotia-Bentho Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 Reddi Dhoras
17 Rona, Rena
18 Savaras-Kapu Savaras, Maliya Savaras or Khutto Savaras

19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda :

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (including Mannervarlu)
6 Pardhan
7 Thoti

(4) In the Agency tracts :

1 Goudu (Goud)
2 Nayaks
3 Valmiki

As would be clear from the Tables, not all the above Castes and Tribes, will be found in all the Taluks of the district.

An abstract of the total Scheduled Castes and Scheduled Tribes population in Nizamabad district and its percentage to the total general population is given talukwise in the statement below :

Name of the District/Taluk	Total Rural Urban	General population	Scheduled Castes population together with percentage to general population	Scheduled Tribes population together with percentage to general population

TABLE SCT-I—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for the Rural and Urban areas of the district, the population of each Scheduled Caste and Scheduled Tribes classified by Industrial Category of persons at work and Non-Workers by sex. The Table is divided into two parts. *Part A* relates to Scheduled Castes while *Part B* relates to Scheduled Tribes. This Table is important as it gives the strength of each of the Scheduled Castes and Scheduled Tribes, the working population among them and the sector of Industry in which the working population is engaged. The data are presented for the Rural and Urban areas separately.

TABLE SCT-II—AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for each Scheduled Caste and Scheduled Tribe the total population by Age and Marital status. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This Table corresponds to Table C-II for the total population, however, the Age-groups are restricted to 0-14, 15-44, 45+ and Age not stated only in both the parts of this Table. This Table enables us to know the percentage of each of the Scheduled Castes and Scheduled Tribes to the total population in the corresponding Age-group. Such communitywise data by Age and Marital status for Scheduled Castes and Scheduled Tribes are being given for the first time at the present Census. The Age distribution and Marital Status data will give an indication as to whether the population of a Caste/Tribe is growing or declining.

TABLE SCT-III—EDUCATION IN RURAL AND URBAN AREAS ONLY FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows the literacy and educational levels for each Scheduled Caste and Scheduled Tribe separately for Rural and Urban areas. This Table is divided into *Part A (i)* and *Part A (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Urban areas and *Part B (i)* and *Part B (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Rural areas. In the case of Urban areas the educational levels adopted for giving the data are the same as those adopted in Table B-III *Part A* and in the case of Rural areas the data are given as in Table B-III *Part B*. This Table, therefore, enables us to know the proportion of each of the Scheduled Castes and Scheduled Tribes among the total population in different literacy and educational levels.

TABLE SCT-V—SAMPLE HOUSEHOLDS OF SCHEDULED CASTES AND SCHEDULED TRIBES ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN *RURAL AREAS ONLY*

This Table shows the sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only, separately for Scheduled Castes and Scheduled Tribes. The Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. The sizes of landholdings and types of interest in land cultivated adopted in this Table are the same as those adopted in Table B-XI.

TABLE SC-I—PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

This Table shows persons belonging to the Scheduled Castes not at work classified by sex, type of activity *viz.*, fulltime students, persons seeking employment for the first time, unemployed but seeking work and others, by educational levels. The broad educational levels adopted are illiterate, literate (*without* educational level), Primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary. This Table is prepared for total Scheduled Castes as a whole and not separately for each individual Caste and the figures are exhibited for Total, Rural and Urban population. This Table will be very useful as it clearly illustrates the extent to which the Scheduled Caste children have taken to education and it also helps to plan employment for the unemployed members of the Scheduled Castes.

The data are presented for Total, Rural and Urban areas of the district and Rural areas of all the Taluks as the proportion of the Scheduled Caste population in Rural areas of some of the Taluks exceeds the state average of 14.88%.

TABLE ST-I—MOTHER-TONGUE AND BILINGUALISM *FOR SCHEDULED TRIBES*

This Table shows exclusively the Scheduled Tribes classified by Mother-Tongue and subsidiary languages spoken by them. The data are given for the Total, Rural and Urban areas in the district. The Scheduled Tribes have their own peculiar languages and dialects and this Table gives the language or dialect of each Tribe. In respect of the members of the Scheduled Tribes who have moved out of their homes and as a result of contact with the local population speak some other languages also, those subsidiary languages are also shown in this Table. The number of male and female speakers of the subsidiary language is indicated in brackets after the subsidiary language under column 7 of the Table.

TABLE ST-II--PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY *FOR SCHEDULED TRIBES*

This Table shows for the district the persons not at work classified by sex and type of activity for each individual Scheduled Tribe. The types of activity under which the persons not at work are classified are the same as those adopted in Table SC-I *viz.*, fulltime students, persons seeking employment for the first time, persons unemployed but seeking work and others. In this Table the particulars are given according to the individual Tribe while in Table SC-I similar particulars in respect of Scheduled Castes are given for Total Scheduled Castes as a whole by educational levels. The present Table, however, shows the number of unemployed persons in each individual Tribe without reference to the literacy levels.

TABLE SCT-I Part A

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX *FOR SCHEDULED CASTES*

PART IV

VILLAGE AND TOWN DIRECTORY

EXPLANATORY NOTE

VILLAGE/TOWN DIRECTORY

This Directory renders an account of each village, as also each ward and each Enumerator's Block of a town. It gives the Location Code Number and Name of each village/town, area of the village/town, and where inhabited, the number of Occupied Residential Houses, Census Households, Total Population, Population of Scheduled Castes and Scheduled Tribes, Literate Population and Workers classified into the following nine Industrial Categories and the Non-Workers :—

I Cultivator

II Agricultural Labourer

III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Household Industry

V Manufacturing other than Household Industry

VI Construction

VII Trade and Commerce

VIII Transport, Storage and Communications

IX Other Services; and

X Non-Workers

The data are presented talukwise, first for the rural portion in the "Village Directory" and next for the urban portion in the "Town Directory". In the Village Directory the Villages have been arranged in the ascending order of the Location Code Numbers assigned to the Villages within the taluk and in the Town Directory, in the ascending order of Location Code Numbers assigned to the towns in the taluk and also by each Ward and Enumerator's Block in the ascending order. The taluk map given at the beginning of the Village Directory of each taluk showing the Location Code Number of each village and town and other particulars will help the easy location of the villages.

In the Village Directory, villages uninhabited and villages that have been completely merged in towns have been indicated accordingly. In respect of villages which are partly included within the town limits and partly fall outside the town limits the particulars for that portion included in the town limits i.e., 'Urban Portion' are clubbed with the particulars of the town and given in the Town Directory and for that portion outside the town limits i.e., 'Rural Portion' the data are given in the Village Directory along with other villages. The term 'Rural' is indicated immediatedly after the name of such villages to make the position clear. In the presentation of data for the towns the particulars have been exhibited in ascending order of Municipal Wards or Blocks and also by Enumerators' Blocks and not according to the villages constituting the town. In order that each Enumerator's Block may be located, the jurisdiction of each Block i.e., the houses covered by each Enumerator's Block in towns are indicated at the beginning of the Town Directory.

Under column 8 the area is given for the villages and towns in square miles based on the information furnished by the State Central Survey Office, the Tahsildars and by the Municipal authorities concerned. In respect of certain villages where the area particulars are not available the abbreviation "N.A" has been recorded in this column. As the area of a taluk comprises not only the area of the villages but also the area of Reserved Forests *etc.*, within the taluk, the areas of all the villages put together may not be equal to the area of the taluk.

Under columns 9 to 41 the Total population, Scheduled Castes and Scheduled Tribes population, Literate population, total number of Workers under each of the nine categories and Non-Workers are given by sex for each village/town.

The Taluk map found at the beginning of the Village Directory of each taluk shows the boundaries of each village and town, the important roads and railway lines, the rivers, if any, running in the taluk. In this map the Location Code Number of each village is shown and the names of the towns and villages having more than 5,000 population, important tourist centres and places of great religious importance, etc., if any, are given. Urban areas have been shown by shading the area covered. Uninhabited villages and villages of different sizes of population *i.e.*, below 2,000, 2,000 – 4,999, 5,000 and above are distinguished by distinct designs. An alphabetical list of villages with the Census Location Code Numbers indicated against them is given after the taluk map and before the Village Directory. This list enables one to find out the Location Code Number of any village and thereafter to get the required particulars of the village from the Village Directory.

The information relating to Educational facilities, Medical and Public Health facilities, Drinking water facilities, Communication and Transport facilities Electrification is also given villagewise in this section, for the first time besides the population data. These facilities are shown by symbols as explained below immediately after the names of the villages under columns 3 to 7.

(i) *Educational facilities are shown by the following symbols under column 3:—*

P : Primary School

M : Middle School

H : High School

C : Higher Institutions including Colleges

T : Technical Institutions

(ii) Medical and Public Health facilities are shown by the following symbols under column 4:—

D : Dispensaries

Rhc : Rural Health Centres (Primary Health Centres)

Hos : Hospitals

Mcw : Maternity Child Welfare Centres

(iii) Drinking Water facilities are shown by the following symbols under column 5:—

S : Safe or Protected water supply inculding Tube wells etc.

W : Well

Tk : Tank

Riv : River

(iv) Communication and Transport facilities are shown by the following symbols under column 6:—

Po : Post Office

To : Telegraph Office and Public Call Office

Rh : Rest Houses or Choultries

R : Road

Rly : Railway

(v) Electrification facilities are shown by the following symbols under column 7:—

E : Electricity

E(I) : Electricity in Industrial use

E(A) : Electricity in Agricultural use

E(D) : Electricity in Domestic use

Where figures like 5P, 2H etc., occur they denote that the village or town has 5 Primary Schools, 2 High Schools etc.

Besides presenting the information relating to the above facilities in the Village/Town Directory, certain other important particulars *viz.*, sources of irrigation, crops raised, value of land, Co-operative Societies, Police Stations, Veterinary Hospitals, Reading Rooms, Places of Public Entertainment (Cinemas), Industrial Establishments and Rural Handicrafts are also given talukwise in separate Sub-Tables immediately after the Town Directory. The Sub-Tables are numbered as follows:—

Sub-Table 1	:	Source of Irrigation, crops raised and value of land
Sub-Table 2	:	Co-operative Societies
Sub-Table 3	:	Police Stations
Sub-Table 4	:	Veterinary Hospitals
Sub-Table 5	:	Reading Rooms
Sub-Table 6	:	Public Entertainment (Cinemas)
Sub-Table 7	:	Industrial Establishments
Sub-Tables 8, 9 & 10	:	Rural Handicrafts Tables

In the Sub-Table relating to the sources of irrigation, crops raised and value of land, the particulars relating to the high and low prices of dry and wet land separately, the various important crops raised and the sources of irrigation are given village-wise. Only the Location Code Numbers have been given in the Sub-Table without giving the names of the villages. Villages having land of same value are grouped together. The following abbreviations are used in this Sub-Table:—

Cereals

J : Jonna or Cholam or Jowar

K : Korra

M : Maize

P : Paddy

R : Ragi

W : Wheat

Pulses

Bg : Blackgram

Gg : Greengram

Rd : Redgram

Other Crops

C : Cotton

Ch : Chillies

Other Crops—Contd.

G : Groundnut

Ga : Garlic

O : Onions

Su : Sugar Cane

T : Tobacco

Tu : Turmeric

V : Variga

Irrigation Sources

C : Canal

Riv : River

Sc : Spring Channel or Nalas

Tk : Tank or Kunta

W : Well

In the Sub-Table relating to Co-operative Societies, the various types of Co-operative Societies functioning in each village have been presented talukwise. The data for the district are given in the beginning followed by the particulars relating to taluk. The abbreviations used for the different types of Co-operative Societies are given below. If a village is served by a Co-operative Society of another village it has been indicated accordingly.

ACS	Agricultural Co-operative Society
CCS	Co-operative Council Society
CS	Co-operative Society
ECS	Employers' Co-operative Society
FCS	Farming Co-operative Society
FICS	Fishermen Co-operative Society
HBCS	House Building Co-operative Society
LCCS	Labour Contract Co-operative Society
LMCS	Land Mortgage Co-operative Society

LSCS	Large Sized Co-operative Society
MCS	Marketing Co-operative Society
MPCS	Multipurpose Co-operative Society
MSCS	Milk Supply Co-operative Society
PLMCS	Primary Land Mortgage Co-operative Society
RRCS	Rural Re-construction Co-operative Society
RUCS	Rural Uplift Co-operative Society
SSCS	Social Service Co-operative Society
TTCS	Toddy Tappers' Co-operative Society
WCS	Weavers' Co-operative Society

In the other Sub-Tables relating to Police Stations, Veterinary Hospitals, Reading Rooms and places of Public Entertainment (Cinemas) also, the data are presented in the same form as explained above, *i.e.*, first for the district and then for each taluk. Only the names of places where such facilities are existing are given.

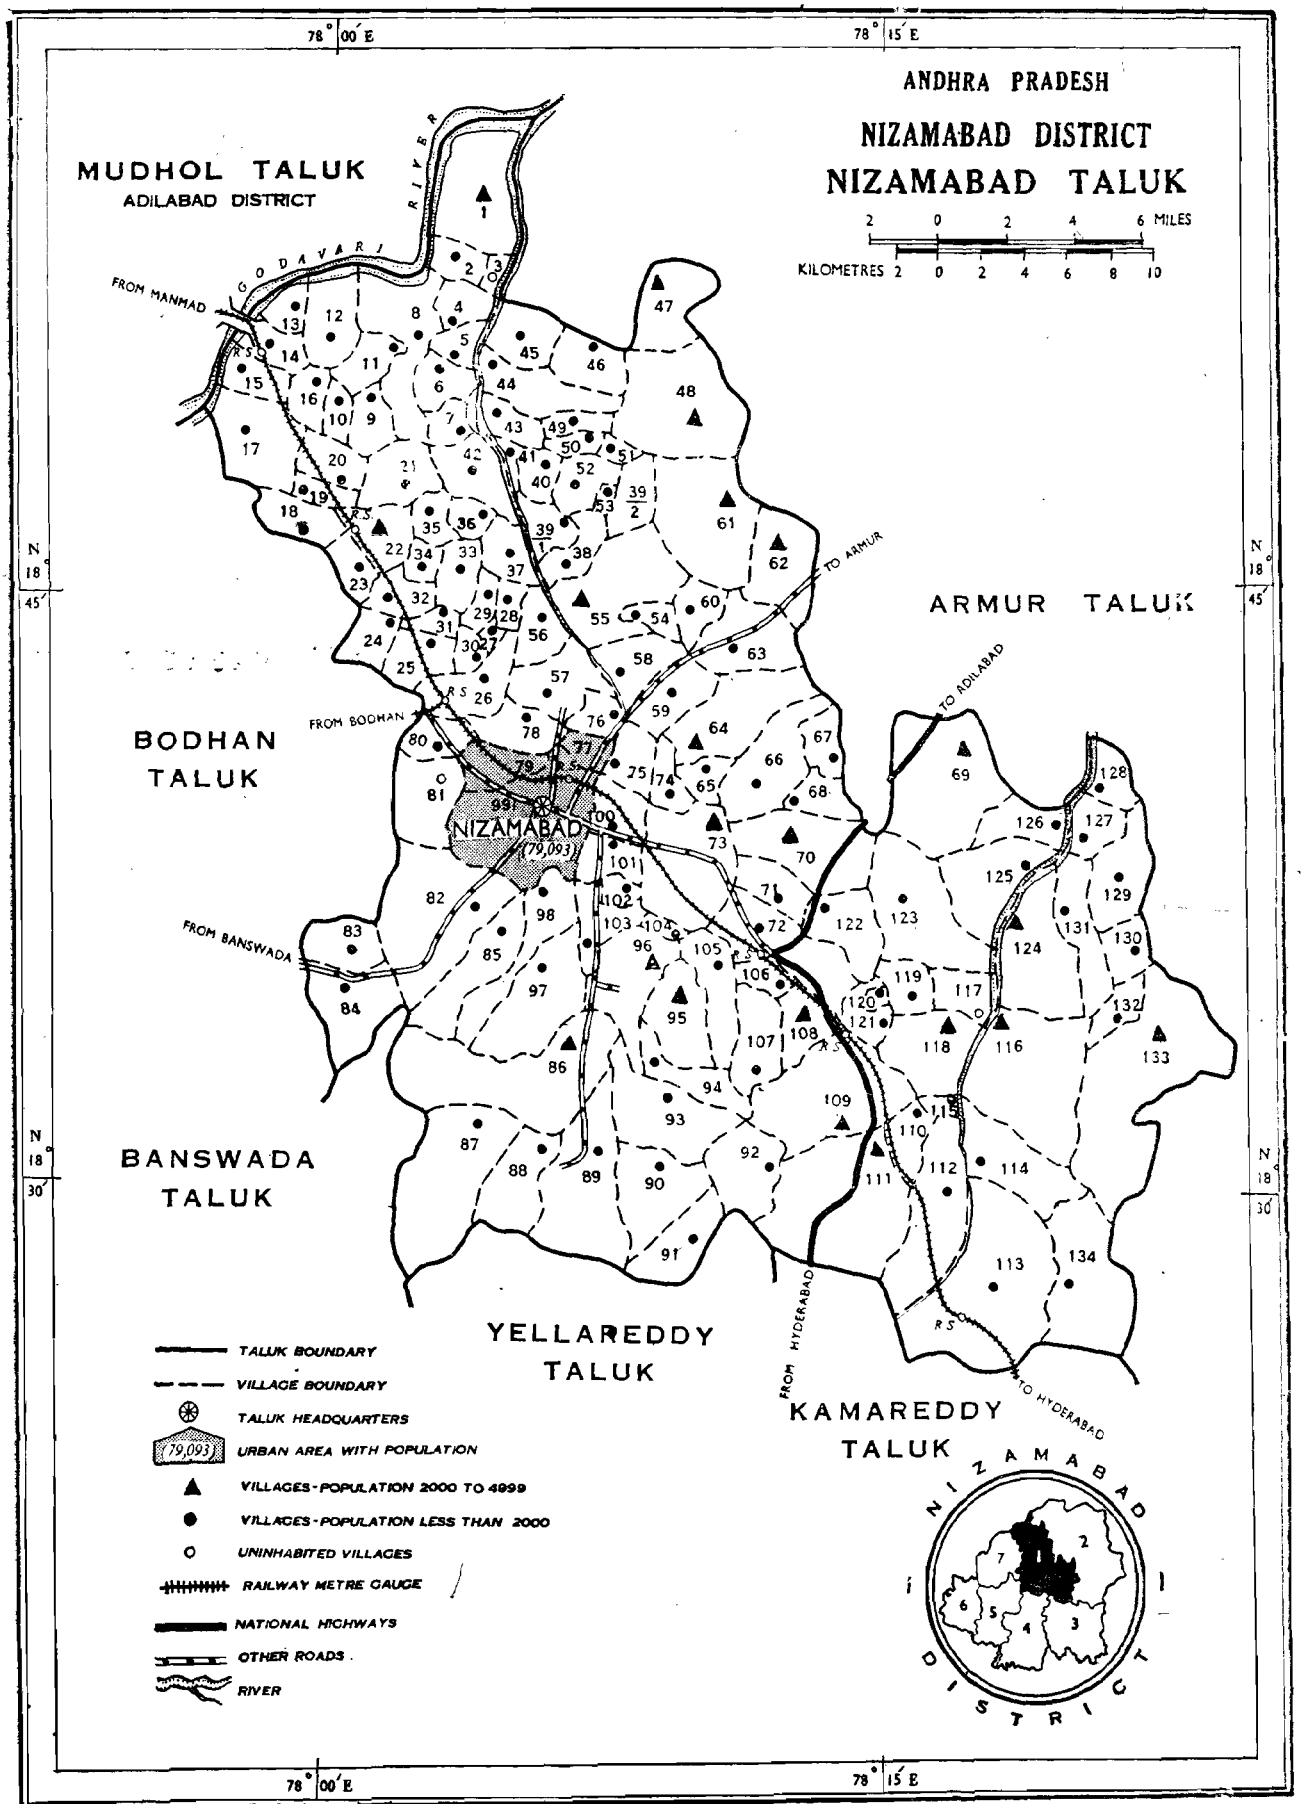

In Sub-Table relating to Industrial Establishments, the number of units under various industries existing in villages and towns are given. These particulars were mainly those collected through a schedule of industries and crafts issued to the village school teachers in connection with the Rural Craft Survey. In this schedule the data were to be given by the numbers of families; and as such, the families which had members engaged in any of the industries had been taken as units for that Industry. In respect of some villages where the schedules had not been answered, the information was compiled from the Houselists. Certain data were taken from other sources as well such as the Village Directory furnished by Tahsildars, and the Survey of Industries conducted in the cities. It is, however, quite possible that there may be some villages for which the information could not be presented. Such omissions are however, likely to be very few. The particulars are given separately for the rural and urban areas. Under the name of the district, the industries are arranged in the ascending order of Minor Groups of the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for total, rural and urban areas separately. Then, the figures for the various taluks are presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each village/town are shown the Minor Group Code Numbers of the Industries or Crafts found in that village/town with the number of units engaged in the Minor Group in brackets against each of the groups.

In the three Sub-Tables relating to Handicrafts information is given about the various Crafts practised, the number of persons engaged, the distribution of Artisan Communities, the number of families engaged in the Handicrafts, and the names of very skilled craftsmen of each community. These particulars were mainly collected through a schedule of Industries and Crafts issued to the village school teachers in rural areas and to the Municipal authorities in the Municipal areas. In respect of cities the information was collected through the staff of the Census Tabulation Offices specially appointed for the purpose. In respect of some villages where the schedules have not been answered the information was taken from the Houselists prepared at the time of Housenumbering in 1960. A detailed report on the Handicrafts Survey is given in "Census of India, 1961-Volume II -Andhra Pradesh - Part VII A" and may be referred to.

In the Sub-Table relating to Fairs and Festivals given at the end of this section, the important fairs and festivals that take place in the village, the month in which they take place, are given for each village having such importance. A detailed Report on the Fairs and Festivals is given in "Census of India 1961 - Volume II - Andhra Pradesh - Part VII B" and may be referred to.

All the information given in the various Sub-Tables in this section are based on the information furnished by the Heads of Departments, the District Officers, the Tahsildars and the Municipal authorities concerned.

NIZAMABAD TALUK

M. J. SADIQ

Prepared at the Office of the Superintendent of Census Operations,
Andhra Pradesh, Hyderabad.

The following abbreviations have been used in this Village Directory and in the Village and Town Directories to follow :—

N. A.: Not ascertainable

(i) Educational facilities are shown by the following symbols under column 3 :—

P: Primary School, M: Middle School, H: High School, C: Higher Institutions including Colleges, T: Technical Institutions

(ii) Medical and Public Health facilities are shown by the following symbols under column 4 :—

D: Dispensaries, Rhc: Rural Health Centres, Hos: Hospitals, Mcw: Maternity Child Welfare Centres

(iii) Drinking Water facilities are shown by the following symbols under column 5 :—

S: Safe or protected water supply including tube wells etc., W: Wells, Tk: Tank, Riv: River

(iv) Communications and Transport facilities are shown by the following symbols under column 6 :—

Po: Post Office, To: Telegraph Office or Public Call Office, Rh: Rest Houses and Choultries, R: Road, Rly: Railway

(v) Electrification facilities are shown by the following symbols under column 7 :—

E: Electricity, E (I): Electricity in Industrial use, E (A): Electricity in Agriculture use, E (D): Electricity in Domestic Use

ARMUR TALUK

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

ARMUR TALUK

1961 Location Code No.	Name of Village
122	Aklur
31	Alur
42	Amadapur
62	Ameenapur
127	Ankapur
64	Anksapur
14	Annaram
126	Argul
35	Armur
118	Babanagar
120	Babapur
143	Bachanpalle
11	Badgoni
55	Balkonda
49	Bardipur
107	Basheerabad
7	Bazaar Kothur
140	Bejjora
166	Belur
86	Bhattapur
121	Bheemgal
67	Bodepalle
37	Brahmanpalle
76	Busapur
138	Chaingal
79	Chakriyal
58	Chepur
169	Chimanpalle
4	Chimratpalle
155	Chinna Valgod
57	Chittapur
102	Choutpalle
95	Dammannapet
104	Dammanpet (Ameer-nagar)
22	Dattapur
29	Degaon
179	Devakkapet
181	Devanpalle
68	Dharmora
88	Domchanda
98	Donkal
108	Donkal
13	Donkeshwar
149	Dubbak
78	Dudgaon
56	Fatehpur
17	Gadepalle
159	Gadkol
32	Gagupalle
176	Gangarai
48	Gangasamandar
165	Gargepahad
151	Gongappul
60	Govindpet
168	Guddilingapur
89	Gumriyal
175	Guntepalle
101	Hasakothur
161	Honnajipet
157	Hussainnagar
183	Inayatnagar
34	Isapalle
116	Jagriyal
131	Jakranpalle
45	Jalalpur
124	Jankampet
25	Joorpur
135	Kaligota
94	Kammarpalle
180	Karepalle
51	Keshapur
43	Khanapur
24	Khudavandpur
80	Kodcherla
50	Kojankothur
46	Komanpalle
112	Komanpalle
10	Komatpalle
184	Konapur
105	Konasamandar
163	Kondapur
2	Kondur
154	Kondur
38	Kotha Armur
72	Kothapalle
136	Kothapalle
162	Kothalpalle
111	Kuknur
134	Kulpak
117	Kupkal
18	Kushtapur
59	Lakhora
6	Lakkampalle
103	Lakshmapur
129	Lakshmapur
141	Lingampur Chouth
26	Macherla
47	Magdi
172	Mailora
5	Mallaram
36	Mamidpalle
185	Manal
133	Manoharabad
41	Manthani
21	Marampalle
30	Mardepalle
9	Mayapur
81	Mendhora
106	Mendhora
99	Mortad
115	Moth
146	Muchkur
74	Mukpal
128	Munpalle
160	Musheernagar
71	Nagampet
54	Nagapur
93	Nagapur
75	Nallur
130	Narayanpet
16	Narkhoda
123	Narkhoda
182	Narsapur
12	Nikalpur
20	Noothpalle
173	Nyavandi
63	Padgal
167	Pakhal
97	Palem
142	Pallikonda
171	Pandimadugu
139	Pedda Bheemgal
153	Pedda Valgod
39	Perket
40	Pipri
145	Pipri
65	Pochampalle
152	Pothnur
119	Puranipet
144	Rahatnagar
158	Ramadgu
109	Ramannapet
33	Rampur
52	Ratnapur
174	Ravutla
178	Reachpalle
150	Rekulpalle
70	Renjerla
61	Sahebpet
147	Salampur
53	Sangam
82	Savel
8	Shahpur
69	Shetpalle
28	Siddapur
132	Sikandrapur
148	Sikandrapur
156	Sirkonda
15	Sirpur
77	Sonepet
19	Srirampur
110	Sunkat
44	Surbiriyal
90	Tadlarampur
87	Tadpakal
177	Thallapalle
3	Thalveda
170	Thatpalle
96	Thimmapur
125	Thorrikonda
85	Thurat
23	Tondkur
164	Tumpalle
1	Ummeda
92	Uploor
100	Vaddiyat
27	Vannel
66	Vannel Bashirabad
83	Velgutur
114	Velpur
73	Vempalle
84	Venchariyal
113	Venkatapur
137	Wadi
91	Yergatla

BODHAN TALUK

MOHIUDDIN HASSAN

Prepared at the Office of the Superintendent of Census Operations Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

BODHAN TALUK

1961 Location Code No.	Name of Village
43	Achanpalle
98	Adkaspalle
68	Akbarnagar
47	Ambam
107	Ambam
63	Amdapur
78	Amrapur
44	Bardipur
99	Bareedpur
97	Baswapur
10	Bhagepalle
41	Bhandarpalle
66	Bhavanipet
1	Bhiknelli
42	Bodhan
67	Boppapur
8	Boregaon
51	Brahmanpalle
106	Chikatpalle
17	Chinna Mavandi
76	Chinna Penta
112	Chintakunta
31	Domalyedga
13	Dupalle
82	Ekhlaspur
61	Erajpalle
101	Fakeerabad
22	Fathepur
95	Ganvaram
110	Ghanpur
111	Govur
5	Hangarga
89	Hangarga
86	Hegdoli
87	Humnapur
109	Humnapur
25	Hunsa
60	Ibrahimpur
40	Jadi Jamalpur
52	Jaitapur
93	Jallepalle
50	Jamlam
54	Jankampet
20	Kaldurki
94	Kallur
12	Kalyapur
88	Karegaon
6	Khandakurthi
2	Khandgaon
24	Khazipur
28	Koloor
36	Komanpalle
11	Konepalle
4	Kopperga
92	Kotcherla
80	Kotgir
100	Kottapalle
105	Kundapur
56	Kurnapalle
71	Ladmavandi
37	Lakmapur
45	Langadapur
72	Lingampalle
96	Lingapur
39	Machapur
83	Malkapur
58	Mallepahad
26	Mandharna
59	Mangalpahad
70	Minarpalle
84	Mirzapur
62	Mithapur
57	Mosra
38	Naganpalle
75	Nagora
48	Narsapur
7	Neela
64	Ootpalle
18	Pedda Mavandi
46	Pedda Penta
55	Pedda Thane
16	Pegadpalle
53	Pocharam
91	Pothangal
74	Raikoor
19	Rampur
104	Rampur
73	Ranampalle
14	Ranjal

The following abbreviations have been used in the above Village and Town Directories.

N. A.: Not ascertainable

(i) *Educational facilities are shown by the following symbols under column 3* :—

P: Primary School, M: Middle School, H: High School, C: Higher Institutions including Colleges, T: Technical Institutions

(ii) *Medical and Public Health facilities are shown by the following symbols under column 4* :—

D: Dispensaries, Rhc: Rural Health Centres, Hos: Hospitals, Mcw: Maternity Child Welfare Centres

(iii) *Drinking Water facilities are shown by the following symbols under column 5* :—

S: Safe or protected water supply including Tube Wells *etc*., W: Wells, Tk: Tank, Riv: River, C: Canal

(iv) *Communication and Transport facilities are shown by the following symbols under column 6* :—

Po: Post Office, To: Telegraph Office or Public Call Office, Rh: Rest Houses and Choultries, R: Road, Rly: Railway

(v) *Electrification facilities are shown by the following symbols under column 7* :—

E: Electricity, E (I): Electricity in Industrial use, E (A): Electricity in Agricultural use, E (D): Electricity in Domestic use

SUB-TABLE 7 TO VILLAGE AND TOWN DIRECTORY

INDUSTRIAL ESTABLISHMENTS

NIZAMABAD DISTRICT

[NOTE :—In the Sub-Table below relating to Industrial Establishments, the units of various industries existing in villages and towns are given. The particulars are given separately for the Rural and Urban areas. The industries are arranged, first to the district total in the ascending order of Minor Groups of Industries under the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group code number, for Total, Rural and Urban separately The figures for the various taluks are also presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village/Town Directory. Against each Village/Town are shown the Minor Group Code Numbers of the Industries or Crafts found in that Village/Town with the number of units engaged in the Minor Group in brackets against each of the Groups].

SUB-TABLE 7 TO VILLAGE AND TOWN DIRECTORY—*Concld.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
200	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and food grains
201	Production of sugar and syrup from sugarcane in mills
202	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy
205	Production of bread, biscuits, cake and other bakery products
207	Production of edible fats and oils (other than hydrogenated oil)
209	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge
210	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
212	Production of indigenous liquor such as toddy, liquor from mahua, palm juice
214	Production of aerated and mineral water
216	Production of ice cream
218	Processing of coffee in curing works
220	Manufacture of bidi
222	Manufacture of cigarette and cigarette tobacco
230	Cotton ginning, cleaning, pressing and baling
231	Cotton spinning (other than in mills)
233	Cotton dyeing, bleaching
235	Cotton weaving in handlooms
237	Printing of cotton textile
238	Manufacturing of cotton nets
239	Manufacturing of cotton cordage, rope and twine
244	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta
253	Wool spinning other than in mills
255	Wool weaving in handloom
264	Weaving of silk textile by handloom
272	Embroidery and making of crepe lace and fringes
273	Making of textile garments including rain coats and head gear
280	Sawing and planing of wood
281	Manufacture of wooden furniture and fixtures
283	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures
288	Manufacture of materials from cork, bamboo, cane leaves and other allied products
289	Manufacture of other wood and allied products not covered above
302	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry
310	Currying, tanning and finishing of hides and skins and preparation of finished leather
311	Manufacture of shoes and other leather foot-wear
314	Repair of shoes and other leather foot-wear
320	Manufacture of tyres and tubes
332	Manufacture of fertilizers
335	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap
336	Manufacture of soap and other washing and cleaning compounds
340	Manufacture of structural clay products such as bricks, tiles
341	Manufacture of cement and cement products
343	Manufacture of structural stone goods, stone dressing and stone crushing
345	Manufacture of stone images
350	Manufacture of earthen ware and earthen pottery
365	Manufacture of brass and bell metal products
367	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can
368	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products
369	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery. (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)
371	Manufacture and assembling of prime mover and boilers other than electrical equipment, such as diesel engines, road rollers, tractors
384	Repairing and servicing of motor vehicles
388	Repairing of bicycles and tricycles
392	Assembling and repairing of watches and clocks
393	Manufacture of jewellery, silver-ware and wares using gold and other precious metals
394	Manufacture and tuning of musical instruments
399	Manufacture and repair work of goods not assignable to any other group
