STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

A District Census Hand Book for each of the 20 Districts in Andhra Pradesh

PRINTED BY THE BAHUJANA PRINTING PRESS, HYDERABAD, FOR THE DIRECTOR OF PRINTING, HYDERABAD

PREFACE

The District Census Handbook is an innovation introduced at the 1951 Census. The Handbooks are compiled by the Census Office but published by the State Government. They proved to be very popular and valuable publications in considerable demand by the public as well as the official users of the Census data. At the 1961 Census, therefore, it was decided not only to continue the publication of the District Census Handbook but to greatly improve upon its precursor of 1951.

The present District Census Handbook may be conveniently divided into four parts. The first part consists of a narrative description of the physical features and history of the district, the social and economic characteristics of the people and the progress made by the district in each field of administration over the past decades. This is supplemented by a Gazetteer of places. The second part consists of administrative statistics of various departments. The third part is based mainly on the present Census returns and consists of statistical tables giving the particulars of population, sex ratio, the economic composition, literacy, language and migration data, etc. The fourth part consists of Village and Town Directory which is perhaps the vital part of the Handbook giving villagewise and townwise particulars of area, households, population, Scheduled Castes aud Scheduled Tribes, literacy, broad categorisation of working population, etc. Against each village and town the educational, medical, public health and transport facilities, etc., if available, have also been indicated. At the end of the fourth part a tabular statement of fairs and festivals, information about which had been collected through the census enumerators will also be found. The pages of each part are numbered separately. The Handbook is enriched with two district maps, one showing the administrative divisions and important communications, rivers, etc., and the names of all important places of above 5,000 population and the other showing the talukwise density of population. In the Village Directory portion of the Handbook, before the statistics of each taluk are presented, a taluk map showing the village and town boundaries with the location code number of each village and town marked will also be found. Thus the District Census Handbook is a self-contained and convenient book of reference about almost all matters pertaining to the district.

The Handbooks are no doubt coming rather late, a few years after completion of the Census count. This delay, if at all it can be called delay, could not be helped. The very detailed sorting of Census slips and compilation of the elaborate 1961 Census tables were time consuming; the administrative particulars for incorporation in the Handbooks had to be collected from different departments and other sources on proformae that were finalised and circulated from this office; the preparation of the excellent maps of the district and the taluks, attempted this time, also required considerable time; and lastly the printing of these voluminous reports which had to be done very carefully was a laborious process. All the same it is hoped that these Handbooks will serve as valuable sources of reference about all matters pertaining to the district and help one to assess the impact of the Five Year Plans and the progress each district had made in its social and economic well being over the decades and also serve as a guide in planning for the future. The credit for the compilation of the Handbook goes chiefly to Shri P. S. R. Avadhany, Deputy Superintendent of Census Operations. A compilation of this type and magnitude could have taken a much longer time but for the diligent efforts of Shri Avadhany. The Handbook section of the Census Office under the Tabulation Officer Shri K. Narasimha Murthy, did a commendable work in the speedy and accurate compilation of the Village Directory and the other Statistical and Administrative Tables. Sarvashri G. Pandurangam, M. Hassan, M J. Sadiq, N. G. Swamy, and Y. Ali, of the Cartogaphic Section in my office did a magnificent work as will be evident from the quality of maps that have been produced.

A. CHANDRA SEKHAR
Superintendent of Census Operations
Andhra Pradesh

ADMINISTRATIVE STATISTICS

SERIES 1—VITAL STATISTICS

Table No.		
1.1	Births and Deaths and Deaths due to various causes for the decennium 1951–60	(1)
1.2	Registered Birth and Death Rates, Infantile and Maternal Mortality Rates	(2)

SERIES 2—AGRICULTURE

2.1	Rainfall	(3)–(7)
2.2	Temperature	(8)
2.3	Land Utilisation Statistics	(9)
2.4	Area under Principal Crops	(10)
2.5	Gross Area Irrigated	(11)
2.6	Sources of Irrigation	(11)
2.7	Irrigation Projects with particulars of their capacity and water spread area	(12)–(13)
2.8	Yield rates of the principal crops per area	(13)
2.9	Monthly wholesale price quotations in respect of staple food grains	(14)–(15)

Table No.		*Pages*
	SERIES 2—AGRICULTURE—*Concld.*	
2.10	Statistics of wages per worker (Average daily wages paid to Skilled and Agricultural Labour)	(16)-(18)
2.11	Government Experimental Farms	(19)
2.12	Grow More Food Campaign	(20)
	SERIES 3—ANIMAL HUSBANDRY	
3.1	Livestock and Poultry	(21)
3.2	Livestock Mortality due to contagious and other diseases ...	(22)
3.3	Government Veterinary facilities	(23)
	SERIES 4—INDUSTRIES	
4.1	List of Small Industries together with the number of establishments and persons employed in each of them in the various taluks of the district.	(24)-(25)
4.2	Total number of Artisans of each category working in the district together with their daily average earnings	(26)
4.3	List of Factories (Large Industrial Establishments) under the operation of the Factories Act, 1948 for the year, 1962	(27)-(32)
	SERIES 5—ADMINISTRATION	
5.1	Criminal Justice—Number of Criminal cases disposed off	(33)
5.2	Criminal Justice—Persons convicted or bound over in	(34)
5.3	Civil Justice	(34)
5.4	Number of Judicial Officers	(35)
5.5	Strength of Police	(35)
5.6	Major Crimes reported	(36)
5.7	Property stolen and recovered	(36)
5.8	Number of Jails with their capacity and number of prisoners lodged	(37)
5.9	Registered Motor Vehicles	(37)
5.10	Receipts realised under Motor Vehicles Act	(38)
5.11	Land Revenue Demand and Collections	(38)
5.12	Number of Registered documents and value of properties transferred	(38)
5.13	List of Collectors who worked in Nellore District from 1790 ..	(39)
5.14	List of Judges who presided over the Civil or District and Sessions Court of Nellore district from 1806	(40)

Table No.		*Pages*
	SERIES 6—PUBLIC HEALTH	
6.1	List of Medical and Public Health Institutions	(41)-(42)
	SERIES 7—EDUCATION	
7.1	Number of Primary, Secondary, Higher Secondary and other Non-Collegiate Educational Institutions together with their strength	(43)-(45)
7.2	List of Colleges and Technical Institutions together with their strength	(46)-(49)
	SERIES 8—PRINTING PRESSES	
8.1	Number of Printing Presses at work and Newspapers and Periodicals published	(50)
	SERIES 9—COMMUNICATIONS	
9.1	Major Roads	(51)-(52)
9.2	Roads maintained by the Municipalities	(53)
9.3	List of Travellers' Bungalows	(54)-(56)
9.4	Talukwise list of Railway Stations	(57)
9.5	Talukwise distribution of Post and Telegraph Offices	(58)
9.6	Number of Post and Telegraph Offices in Nellore Postal division	(58)
9.7	Number of Post Cards, Letters, Newspapers, Parcels and Packets handled in Nellore Postal Division	(59)
9.8	Number and value of Money Orders and Indian Postal Orders issued or paid in Nellore Postal Division	(59)
9.9	Receipts and Expenditure in Nellore Postal Division	(60)
	SERIES 10—LOCAL BODIES	
10.1	Number of Local Bodies	(60)
10.2	Receipts and Expenditure of Nellore Zilla Parishad	(61)
10.3	Receipts and Expenditure of Panchayat Samithis	(62)
10.4	Receipts and expenditure of Municipalities in Nellore District	(62)
	SERIES 11—COMMUNITY DEVELOPMENT	
11.1	Talukwise distribution of Community Development Blocks ...	(63)
11.2	Expenditure incurred in each of the Community Development Blocks from inception upto 31-3-1961	(64)
11.3	Blockwise Physical Achievements under Community Development from inception upto 31-3-1961	(65)
	SERIES 12—IMPORTANT HISTORICAL EVENTS	
12.1	Calendar of outstanding occurrences (Historical and Religious events)	(66)-(67)

PART I

INTRODUCING THE DISTRICT

NELLORE DISTRICT

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

G. P. RAMDAS

CHAPTER I

GENERAL FEATURES

Introduction

Nellore district, the southernmost coastal district of Andhra Pradesh lies between 13°30′ and 16° of the northern latitude and 70° 5′ and 80°15′ of the eastern longitude. It is bounded on the north by Guntur district, on the east by Bay of Bengal, on the south by Chittoor district and Chingleput district of Madras State, and on the west by Veligonda hills which separate it from Cuddapah and Kurnool districts.

Physical characteristics

The district extends over an area of 7,959.8 square miles and recorded a population of 2,033,679 persons (1,018,457 males, 1,015,222 females) at the 1961 Census. It comprises 1,626 inhabited villages, 116 uninhabited villages and 9 towns. Nellore City has a population of over one lakh persons. For Revenue administration the district is divided into four Revenue Divisions and 13 taluks. The following statement gives the names of each of the four Revenue Divisions, and the constituent taluks.

STATEMENT I-1

Name of the Revenue Division (1)	Names of taluks included in the Revenue Division (2)	Area in sq.miles (3)	No. of Villages		No. of Towns (6)	Total population at the 1961 Census (7)
			Inhabited (4)	Uninhabited (5)		
I Nellore Division	1. Nellore Taluk	504.0	121	1	1	303,745
	2. Rapur Taluk	594.0	107	9	..	105,122
	3. Atmakur Taluk	639.0	118	4	..	145,711
II Gudur Division	1. Gudur Taluk	463.0	131	18	1	141,128
	2. Sullurpet Taluk	573.0	140	3	2	113,125
	3. Venkatagiri Taluk	427.0	129	14	1	94,562
III Kandukur Division	1. Kanigiri Taluk	1000.0	181	28	1	170,885
	2. Podili Taluk	564.0	113	6	..	104,440
	3. Darsi Taluk	590.8	114	6	..	125,912
	4. Kandukur Taluk	781.0	167	17	1	232,846
IV Kavali Division	1. Udayagiri Taluk	871.0	135	10	..	125,465
	2. Kavali Taluk	568.0	81	..	1	156,736
	3. Kovur Taluk	385.0	89	..	1	214,002
District Total		7959.8	1,626	116	9	2,033,679

During the decade 1951-61, only one village viz., Kotikalapudi was transferred from Darsi taluk of this district to Ongole taluk of Guntur district and three villages viz., Krishnapuram, Pedda Uyyalawada and Chinna Uyyalawada of Ongole taluk were transferred from Guntur district to Darsi taluk of this district. Except for these changes the district did not undergo any major territorial changes during the decade 1951-61. The district is roughly rectangular in shape and is about 150 miles long and 60 miles wide. The district is generally flat and of low elevation and forms part of the Carnatic plains. It rises gently from the sea board upto the Veligonda hills in a westward direction. The eastern portions of the district are fairly fertile and prosperous. The western portions comprise wide stretches of barren treeless country containing only a few villages which are generally small and backward. In some parts of the western tract the soil is good. The surface near Veligonda hills is rocky. The sandy coastal belt extends from the sea for 3 or 4 miles into the interior. There are numerous backwaters along the coast and the best known among them is the Pulicat lake. Towards the extreme south-east is the Island of

Sriharikota, a low sandy tract lying between Pulicat lake and the sea, 35 miles long and 6 miles broad. The Buckingham canal skirts its whole length. The Sriharikota island is covered with jungle and is mostly inhabited by Yenadis.

The district can broadly be divided into two natural divisions from north to south i.e., the eastern half and the western half. The eastern half of the district comprises the coastal taluks, namely, Kandukur, Kavali, Kovur, Nellore, Gudur and Sullurpet adjoining the Bay of Bengal. The western half of the district consists of Darsi, Podili, Kanigiri, Udayagiri, Atmakur, Rapur and Venkatagiri.

The eastern alf adjoining the coastal belt is fairly fertile and prosperous with considerable expansion of paddy cultivation and the coast is fringed with large tracts of scrub jungle interspersed with coconut, palm, palmyra and casuarina plantations. The region adjoining the sand belt is fertile, the soil is deeper, the water supply is better, the surface more level and the country more open and free from jungle. Therefore, the land available for cultivation is being fully utilised. The eye ranges with pleasure over the rice plains of Nellore and Kovur taluks which are chiefly irrigated by the Sangam dam and the Nellore anicut. A luxuriant crop of cholam is grown on the rich red soils of Kandukur.

The western half of the district lies adjoining the coastal taluks and it rises as we go west presenting a very poor appearance. There are large tracts of low scrub jungle diversified with rocky hills and stony plains which form a d stinctive feature of the country. The villages are poor and rarely gladde the eye of the traveller. The small tanks obtaining an uncertain supply of water from local drainage, the irrigable land constantly thrown out of cultivation ard the stunted crops reared on hungry soil mark the difficulties against which the ryot strives to gain a precarious livelihood. The soil in some parts is, however, good and Kanigiri taluk has a large number of irrigation wells. The surface of t he country near the Veligondas is generally rocky but to the north-west the range breaks up and recedes much more to the west.

Hills

Of the mountain range s in the district, the eastern ghats locally known as the 'Veligondas' or outside hills run in north-west direction from the south of Venkatagiri to the north of the Kanigiri taluk. The highest point, Penchalakonda, has an elevation of over 3,000 feet. The slopes are covered with scrub jungle and in some places mixed with bamboo also. Towards the north the jungle is dense. In some parts timber of good size is to be found but it is of no great value. Totally disconnected with this range rises the Udayagiri Drug an isolated hill of 3,079 feet high. The granite of the Kanigiri hills provides excellent building stones; road roller stones and grinding stones are also made and exported.

Rivers

The principal rivers are the Pennar in the centre, the Kandleru and the Swarnamukhi in the south and the Musi,the Paleru and the Manneru in the north. They drain the district and after traversingit from west to east finally fall into the Bay of Bengal. All these rivers usually get dry for a major part of the year and carry heavy floods during the rainy season or whenever there is heavy rainfall on the hills. The Veligondas form the watershed for most of the rivers and receive not more than 12 inches of rain from the south-west monsoon while the north-east monsoon rains provide about 22 inches of rain on an average between October and December. The numerous minor streams are little more than mountain torrents and their beds lie so low beneath the adjoining lands that their water is seldom available for irrigation purposes. Wells are sunk in the beds of the streams and the water is raised by the usual bullock picottahs for cultivation purposes.

The Pennar or Penner river otherwise known as the Uttarapinakini is the most important of all the rivers in the district. Nellore city, the head-quarters of the district is situated on the bank of this river. It rises in the Nandidrug hills in Mysore State and after a course of about 285 miles in Anantapur and Cuddapah districts enters this district through a fine gorge in the Veligondas at Somasila in Atmakur taluk. The important tributaries to this river are the Jayamangali, Chitravati, Kunderu, Papaghni, Sagileru and Cheyyeru. It flows for about 70 miles in a generally eastern direction through Atmakur taluk and between Kovur and Nellore taluks dividing the district into two unequal parts and debouches into the sea by several mouths at Utukur about 18 miles below the town of Nellore. The river receives two important tributaries the Boggeru at Kolaguntla and the Biraperu at Sangam. It drains an area of 19,800 square miles and the maximum flood discharge in

the river is of the order of 5,20.000 cft / sec. It is larger than the Cauvery, both in respect of catchment area and maximum discharge, but by virtue of its watershed being situated in areas of very poor rainfall, the yield is as low as 3.68 million acre feet. The Pennar River Canal System consists of two anicuts one at Sangam and the other 20 miles below at Nellore and both are fitted with 2 feet falling shutters. A detailed account of this canal system is given in the Chapter on Irrigation and may be referred to.

The Swarnamukhi river rises in Chandragiri hills in Chittoor district and flows between Venkatagiri and Sullurpet taluks and across Gudur taluk enters the sea near Sidhavaram in Gudur taluk, a little north of Pulicat lake. It is joined by Rallakalva at Renigunta and Mamidi Kalva at Gudali. The Kandleru river flows across Rapur taluk and between Gudur and Nellore taluks and falls into the Bay of Bengal. The Manneru river flows across Kanigiri and Kandukur taluks. The Pillaleru river flowing across Udayagiri taluk and the Upputeru river flowing across Kavali and Kandukur taluks are its tributaries. The Paleru river flows across Kanigiri and Kandukur taluks. The Gundlakamma river flows on the western boundary of Podili taluk and on the northern boundary of Darsi taluk. The Katamanneru river, a minor drain, flowing through Atmakur taluk forms the source of supply of water to the Anantasagaram tank. The Kalleru is a rivulet flowing on the southern boundary of Rapur taluk. The Venkatagiri river is another minor hill-stream in Venkatagiri taluk.

Flora

The general aspect of Nellore district is barren and uninteresting, large trees being found only near villages, while there are immense tracts on the plains which present to the eye nothing but scrub jungles stunted in growth. On the Veligonda range of hills that separates the district on the western side from Cuddapah and Kurnool, trees of large size grow abundantly. Throughout the district, the margosa flourishes well in the laterite soil and also with different species of the ficus. The tamarind, the acacia and the mango also form the principal trees in the village topes and in the avenues along the public road side. The Reserve Forests are scattered in blocks of varying sizes all over the district in the plains and supply firewood for local consumption to towns such as Nellore, Gudur, Kavali and Kandukur. Firewood from the plain reserves is exported to Madras, Guntur, Tenali and other places outside the district and charcoal to distant places like Madras, Vijayawada and Rajahmundry.

Fauna

The Ongole breed of cattle, commonly called the Nellore breed (Ongole taluk having been at one time in Nellore district, hence the name Nellore cattle) have wide reputation throughout India and the East. In the past they were being exported to Java, Malay Straits, Sumatra, Jamaica and even as far as the Argentine. Cattle breeding is declining due to the introduction of commercial crops such as groundnut, tobacco and chillies The district presents little attraction for the Shikari. Big game is scarce. A tiger occasionally wanders over the Veligondas, but the stay is generally of very short duration, as it returns to more congenial haunts among the Cuddapah hills. Panthers, though not plentiful, are not uncommon. They are found chiefly on the slopes of the Veligondas and in the hills near Darsi and Podili. Cheetahs, hyaenas *(ibbandigandu)* are found in the scrub forests. Sambars, spotted deer, antelopes, wild bears etc., are found in the forests of the district. Nellore is a much coveted district for duck and snipe in the season. Peafowl is found in Rapur and Udayagiri forests.

Climate

The climate of the district is generally dry and salubrious. April and May are the hottest months and the hot winds generally last to the end of June, on account of the proximity to the hills. As the district is washed by the Bay of Bengal on the east, the sea breeze renders the climate moderate both in winter and summer.

Rainfall

The district lies in an area of precarious rainfall. With scanty rainfall, the district is subject to frequent famines. Famines occurred in this district in the years 1806-1807, 1823-24, 1832-34 1876-78, 1891-92, 1897-98 and 1926-27 while in several other years there had been scarcity of foodgrains. The famine that occurred in 1832-34 was a terrible one. It is generally known as the Guntur famine as it was most acute in that district. The most serious famine that afflicted the district was in 1876-78 owing to failure of successive monsoons from 1875. The district also suffered from devastating floods in some

years. There were heavy floods in the Pennar and other rivers in this district in the years 1804, 1852, 1874, 1882, 1902, 1903, 1906, 1927 and 1933 which caused widespread damage. In October 1804 a most disastrous inundation of the Pennar occurred. In 1852 the north-east monsoon broke with heavy freshes down the Pennar causing intensive inundation. In 1874 floods occurred and mainly affected the Atmakur, Nellore and Kovur taluks situated close under the Pennar and its confluents. The Nellore tank was breached and caused considerable damage to town and country. Again owing to excessive rainfall in 1906 in the upper basins of the Paleru and Musi rivers there were heavy floods, and the floods in Musi were more destructive. In 1927 the most destructive cyclone caught Nellore and its destructiveness was unprecedented in the annals of Nellore. Again in 1933 there was a cyclonic storm in Kovur taluk and parts of Kavali taluk. This district had thus undergone severe experience on account of the whimsical nature of the monsoon.

The district can be divided into two natural divisions by drawing a line through Kandukur and Kanigiri taluks from west to east. The influence of both the monsoons is felt north of this line and south of it the North-East monsoon is of greater importance and these two tracts have been distinguished as tracts of "Early and late Cholam". The former (early Cholam) is one of chief dry crops in the northern section and the latter (late Cholam) is the chief dry crop in the southern section. The rainfall is heaviest during the north-east monsoon averaging 28 inches and during hot weather (April and May) the average rainfall is about 2 inches. The average annual rainfall of the district is 36.1 inches and it is distributed seasonwise as follows:

Monsoon Season	Rainfall in inches
South-West Monsoon (June to September)	11.3
North-East Monsoon (October to December)	21.4
Winter Period (January & February)	1.4
Hot Weather Period (March to May)	2.0
Total	36.1

Soils

The soils of the different taluks vary according to the geological formation and position with reference to the sea board and the Eastern Ghats which respectively form the eastern and the western boundaries of the district and the soils are influenced in the same manner in respect of their proximity to hills and rivers. The heavy regar soils that form the distinguishing feature of Guntur district prevail and extend throughout some portions of Kandukur taluk which adjoins it. The loamy soils generally contain more gravel and sand, but land containing laterite soils are either unoccupied or are covered with casuarina plantation or contain mere scrub jungle. The soils may be classified broadly as black, red and sandy. Black clay is principally confined to the northern portion of Kandukur taluk. Red loam largely occupies the rest of the district but a belt of sand runs along the sea coast.

Land Utilisation

The economy of the district, like that of other delta districts of the State, leans on the primary sector i.e., agriculture. But the district is not as vulnerable economically as its adjoining Rayalaseema districts which experience famine conditions more frequently. Out of the total working population of 1,068,140 persons in the district, 728,999 persons are engaged in agriculture as cultivators or agricultural labourers. The crop conditions in the delta proper are usually fairly satisfactory. Paddy is the chief crop cultivated in the district. Cholam, cumbu, maize, ragi, korra and varagu are some of the other important food crops. Tobacco, cotton, chillies, groundnut, castor etc., are the commercial crops extensively grown. Kovur and Nellore are the paddy pots of the district. More particulars regarding agriculture of the district are given in some detail in Chapter IV. The land utilisation statistics of the district for the year 1960-61 are given below itemwise :

STATEMENT I-2

LAND UTILISATION IN 1960-61

Classification (1)	Area in acres (2)	Percentage of total area (3)
Total geographical area	50,83,246	100.00
Forests	5,43,477	10.7
Barren and uncultivable land	8,42,371	16.6
Land put to non-agricultural use	6,02,001	11.8
Cultivable waste	5,07,583	10.0
Permanent pastures and other grazing lands	4,64,030	9.1
Land under miscellaneous tree crops grown	57,252	1.1
Current fallows	3,40,175	6.7
Other fallow land	1,57,078	3.1
Net area sown	15,69,279	30.9
Area sown more than once	1,43,909	2.8
Total cropped area	17,13,188	33.7

The net area sown under all crops during 1960-61 forms 30.9% of the district area. Forests cover 10.7% of the district area, while barren and uncultivable land covers 16.6% of the district area. The area put to non-agricultural uses such as roads, buildings etc., constitutes 11.8% of the district area. The total fallow land during 1960-61 accounts for 9.8% out of which current fallows *(i.e.*, land left fallow in the current year only*)* constitute 6.7% and the other fallow land (*i.e.*, land left fallow for more than one year but less than five years*)* accounts for 3.1%. Cultivable waste land (*i.e.*, land left fallow for more than five years*)* accounts for 10.0% of the district area. Permanent pastures during 1960-61 cover 9.1% while the land under miscellaneous tree crops and groves accounts for 1.1% of the district area. The net area sown more than once works out to 2.8% only which however, is expected to increase after the successful completion of new irrigation projects under the Five Year Plans dealt within the Chapter V on Irrigation.

Industries

The district contains three important industries under the category of large and medium scale industries, namely the Ceramic Factory, the Glass Factory both located at Gudur and the Straw Board Factory located at Nellore. Further the district is famous for its mica mines and it is the third largest mica producing centre in India next to Bihar and Rajasthan. The mica mines are mostly situated in Rapur, Gudur, Kavali and Atmakur taluks. The mica obtained is of good quality and is exported to international markets. Copper and iron ore mines also exist in the district almost scattered. Lime shell is extracted abundantly from the Pulicat lake. Slate quarrying is a major industry in Rayavaram and neighbouring villages of Podili taluk and Ananthavaram village of Darsi taluk. Slate stone quarried in these two taluks are sent to the Slate Factories at Markapur of Kurnool district for manufacturing slates. The district contains quite a large number of small scale industries distributed at various centres. The important among these industries are rattan-cane industry, handloom weaving, rope making, *thunga* mat weaving, basket making, furniture making, beedi manufacturing, pottery making etc. Besides these a number of rice mills and groundnut oil mills also exist. Salt manufacture, fishing and curing are obviously the important industries in the coastal villages. For detailed particulars about industries in the district the reader may refer to Chapter VII on Industries.

Communications

The district is well connected both by rail and road. The Vijayawada-Madras line (Broad Gauge) of the Southern Railway passes through this district from north to south traversing Kandukur, Kavali, Kovur, Nellore, Gudur and Sullurpet taluks with its several important stations of which Gudur is a Railway junction connecting the Renigunta junction on the Madras-Bombay line. Gudur-Renigunta Broad Gauge line branching from Gudur affords railway communication facilities not only to the pilgrims going to Tirupati but also serves as a link with the Rayalaseema districts. In addition to the above the Guntakal-Guntur Metre Gauge line also passes through Podili and Darsi taluks of this district. With a view to clearing the traffic which is heavy on these lines in the district, the Vijayawada-Madras line is being doubled and the construction of the second line is also nearing completion. The Great Northern Trunk Road passes through this district *via.*, Naidupet, Gudur, Nellore and Ongole to Calcutta running through the whole length of the district from south to north. Its course lies at a short distance from the coast and over a plain slightly elevated above the level of the sea. In addition to these almost all the taluks and important villages are connected by major district roads on which buses ply regularly. Further the Buckingham canal runs along the coast throughout the entire length of the district and affords an easy and cheap mode of communication to Madras and even beyond 62 miles further south. Transport boats ply along the canal carrying fuel and other commodities from the district to Madras city. This is another means of communication for the heavy traffic up and down between Vijayawada and Madras city.

Famine rellief schemes have played a considerable part in the development of road communications in this district. The great famine of 1877 necessitated the opening of relief works on a large scale and as many as 19 roads were started. By 1881, about 230 miles had been completed. There were similar famine conditions in 1892 necessitating relief works and these were responsible for an addition of about 50 miles to the road mileage. Similar relief works were undertaken in 1898 and these were responsible for another 40 miles. Again, in 1927 to relieve the distress due to the complete failure of the monsoon in 1926 about 50 miles of new road was constructed

Educational facilities

The educational facilities have been greatly improved during the decade 1951-61. As regards collegiate education there are two Arts Colleges, one Training College and two Polytechnics in this district. Three more Arts Colleges have been started during 1965. Secondary School facilities are provided in all the taluk headquarters and big villages. Mostof the villages have Primary Schools.

Medical facilities

Nellore City contains a Government Headquarters Hospital, a Maternity Hospital, a T.B. Hospital and an Infectious Diseases Hospital besides two Mission Hospitals, one Municipal Dispensary and several private clinics. There are 8 Government hospitals and 5 Dispensaries located at the taluk headquarters. There is one Dispensary at Sriharikota. There are also 4 Local Fund Dispensaries, 3 Railway Dispensaries, one Local Fund Hospital and 12 Primary Health centres, 3 Mica Mine Labour Welfare Hospitals and Dispensaries besides a private Hospital in the rural areas of the district. The medical facilities of the district yet require improvement.

Places of interest

Some of the places of interest in this district which are worth mentioning are Penchalakona, Vedagiri Narasimhulu Konda, Jonnavada, Kasumuru, Anasamudrampeta, Udayagiri Kota, Krishnapatnam port, Pulicat Lake, Dugarajupatnam etc. A detailed account of all places of interest and importance in the district is given at the end of this part under the Chapter 'Gazetteer' and may be referred to.

Geology

A note prepared by the officers of the Geological Survey of India, Andhra Pradesh Circle on the Geology and Mineral Resources of Nellore district is reproduced below:

From the point of view of mineral wealth, the district of Nellore is endowed with a variety of minerals. As regards mica this district is the sole producer in the State of Andhra Pradesh and ranks third in production of this mineral in our country. Other important minerals occurring in this district include China Clay, Kyanite, Iron ore, Gypsum and limestone.

Geological History: The major part of the Nellore district is underlain by two types of the oldest rocks. They represent the roots of the ancient mountains, now exposed by erosion and weathering of millions of years. These rocks are the schistose series and the quartzites of the Dharwar System. In the south-western portion of the district the schistose rocks are injected by a number of basic traps mostly in the form of dykes and sills. They are now seen as diorite, dolerite, greenstone, chlorite schist and hornblende schist. Also intrusive into the schistose series are the peninsular gneiss, closepet granite and pegmatites. The north-western portion of the Dharwarian belt of Nellore is practically devoid of pegmatite intrusions but the south-eastern portion (Gudur and Rapur area) contains many such instrusions that contain workable deposits of muscovite mica.

The younger group of rocks-Bairenkonda Quartzites and Cumbum Shales and Slates of upper Cuddapah age are found in the western and north-western portion of the district. There is a definite time gap, as indicated by an unconformity, before these sediments were laid down over the older schists and gneisses. The rocks of the Cuddapah age were subjected to strong compressional forces due to which they have developed tight folds. The Veligonda range of hills forms the eastern edge of the Cuddapah basin and it is much disturbed as seen by intense crushing, folding, faulting and overthrusting effects. A few patches of upper Gondwana sandstone and shales are found around Janakammapet and Narsapur in Kandukur taluk.

Cuddalore sandstone is found as thin patches in and around Nellore town. They are characteristic of shallow water estuarine deposits.

Laterite cappings are seen almost all along the eastern margin from north of Kandukur to the southern parts of the district. East of the laterite patches, the recent alluvium and beach sand deposits are found all along the coast.

Structural Features: In the Nellore region south of Madras where some Dharwarian rocks with the characteristic trend are present, the Eastern Ghats belt seems to mould itself on the Dharwarian as it shows an eastward convex bend and again resumes its original direction (N.N.E and N.E) near Madras City. Hence, the Eastern Ghats orogeny may be inferred, to be younger than the Dharwarian. Bordering the Cuddapah basin in the Nellore region the Eastern Ghats show a sigmoidal curvature with a slight convexity to the east and finally veer to the south-west near Madras.

The effects of the Eastern Ghats orogeny are seen all along the eastern margin of the Cuddapah basin in Nellore district. This eastern margin shows evidences of overthrusting and crushing.

The ages for Samarskite from the Nellore pegmatite belt showed 830, 1550 and 1760 million years, as recorded by A.Holmes. The first figure is in conformity with the results obtained from the Post Delhi pegmatites of Rajputana or from the Post Satpura pegmatites of Gaya in Bihar. The other two figures give much higher values which indicate an Archaean (Dharwarian) age. If these results are to be relied upon it may be concluded that there must be two sets of pegmatites of distinctly different ages. Dr. M. S. Krishnan is of the opinion "...there is no field evidence to the best of my knowledge, for the existence of two sets of pegmatites separated by such large interval of time as the above results suggest".

Geological Formations: The major rock formations of Nellore district are in the form of broad belts disposed off in a N.N.W–S.S.E. fashion. The sequence of the rocks is as given below:

Age	Rock Formations
Recent & Sub-Recent	Recent deposits, older alluvium Laterite
Mio-Pliocene	Cuddalore sandstone
Mid-Triassic to Lower Cretaceous	Upper Gondwanas, Sandstones and Shales
Upper Pre-Cambrian	Upper Cuddapahs. Nallamalai Series: Cumbum shales and slates; Bairenkonda Quartzites.
Archaean / Dharwars	Closepet granite, Peninsular Gneiss and Pegmatite, Basic dykes - Hornblende Schists

Dharwars: W. King distinguished four types of gneisses in the Nellore region, two being schistose and two massive. Nearly half of the area is covered by such type of rocks. Intruded into the schistose rocks are a number of granitic rocks namely peninsular gneiss, closepet granites, pegmatites etc.

Peninsular Gneiss: These gneissic rocks consist of heterogeneous mixture of different types of granites intrusive into the schistose rocks. They include granites, granodiorites, gneissic granites and banded or composite gneisses.

Closepet Granite: This group of rocks includes a granite suite much younger than the peninsular gneiss.

Pegmatites: The Pegmatite is intruded into the hornblende schistose rocks generally conformable to the strike and dip of the enclosing rocks. There are two types of pegmatites, simple and composite. The former consists of a simple vein with well defined walls while the latter shows numerous branches.

Mineralogically the pegmatites consist of quartz-albite-oligoclase, microcline, orthoclase, microcline-perthite and muscovite. Garnet, tourmaline, biotite, beryl, apatite, ilmneite chalcopyrite and magnetite are the accessory minerals. The rare minerals found so far are samarskite, columbite, tantalite, rubellite automolite, allanite, cryolite etc.

Cuddapahs: The eastern margin of the Cuddapah basin extends into the Nellore district. The Cuddapah system is represented by Bairenkonda-quartzites, Cumbum shales and slates of the Nallamalai series and form a series of assymetrical tight folds. These rocks are unconformably overlying the older gneisses and schists. The Cumbum shales comprise shales and slates intercalated with thin bands of quartzite and limestone and are of varying shades of colour and degree of hardness.

Upper Gondwanas: Two small patches of Upper Gondwana rocks are exposed about nine miles west of Kandukur; one about 3 km. south-west of Narsapuram (Lat. 14°30′ and Long. 79°51′) and the other 0.8 km. south of Reddavaram (Lat. 14°59′30″ and Long. 79°54′30″). At places these rocks overlie clay deposits with which they generally show a gradation. The rocks include mostly sandstones which contain a hard, thin and compact ferruginous encrustation showing different shades of red, brown and yellow colours. They are also somewhat micaceous. In one pit dug for clay at Narsapuram village (14°59′: 79°51′) impressions of fossil plants of Upper Gondwana age were found at a depth of 3 to 4 metres.

Cuddalore Sandstones, Older Alluvium and Laterite: Almost all along the eastern border of the district the Cuddalore sandstone and related laterites are exposed in small irregular and intermittent outcrops. They are overlain in the coastal tract by coastal sands and deltaic alluvium. The sandstones are soft, red, yellow and mottled and ferruginous in nature. There are also sandy clays, clays and pebble beds. The rocks of this group have the characters of shallow estuarine deposits.

Mineral Resources

Mica: It is the most important economic mineral of the district. The mining for muscovite mica here dates back to 1889 A. D. The Nellore mica belt 60 miles long and 15 miles wide is the largest producer of mica next to Bihar and Rajasthan in India. There was a slight increase in the output of mica from Andhra Pradesh in 1961 as recorded by the Indian Bureau of Mines in its "Year Book" 1961. During 1961 the production from Andhra Pradesh of which the Nellore region is the chief producing centre was 7,000 tonnes or about 24.7% of the All India output, fetching Rs. 3,800,000. During the same year mica blocks produced in Andhra Pradesh and Madras which were exported under the name of Andhra Block Mica amounted to 339 tonnes valued at Rs.5.6 million. The productive mica pegmatites vary in length from about 30 metres to about a hundred metres and range in width usually from a few metres to about 15 metres and rarely to 60 or 70 metres. Most of the pegmatites dip steeply to either east or west. Generally they have a central quartz core and rim of quartz felspars with books of mica. The mica is generally of light greenish colour and is stained and spotted. Pale ruby mica is mined around Kalichedu, Mudugedu and Utukur of Rapur taluk. Generally the ruby variety of mica is priced high.

The books of mica vary in size and thickness on an average from 15 to 30 cms. across. Exceptionally large books 1.5 to 2 m. across are very rare. In thickness the books are generally 2 to 15 cms. Usually larger books are available from Nellore than from Bihar.

The occurrence of payable mica within the pegmatite is apparently irregular. However, concentrations of mica are found along the walls of the pegmatite. Where there is a quartz core, mica concentration is found between the felspathic body and the core.

Barytes: Two occurrences of barytes from Bandakindipalle, Udayagiri taluk, have been recorded. The mineral occurs as thin small veins and impregnations in quartz-hornfelse and quartzite. The barytes is massive and varies in colour from grey to pink with an average BaO content of 64%. Due to the distance from the railway head, the sporadic nature of the veins and the hardness of the host rock makes mining for the mineral a costly proposition.

Clays: Two types of clays occur in the district, one sedimentary bedded deposits in sandstones of upper Gondwana age and the other alteration product of pegmatites and felspathic schists. The former type occurs mainly in two localities, namely Janakammapeta and Narsapuram of Kandukur taluk. The clays occur as lenses and small pockets. In general they are light to dark pink or buff in colour. The clays are highly micaceous, fairly plastic and crack slightly on drying due to shrinkage. Reserves of Janakammapeta and Narsapur area are estimated to be of the order of 45,500 and 191,000 tonnes respectively. Clays formed as a product of alteration of pegmatite are reported from several places in Nellore district. Important among them are Prabhagiripatnam, Vallapadu, Kasumuru, Vobulayapalle, Sultanapuram etc.

PRABHAGIRIPATNAM : It has the largest clay deposit of its kind in the district in the mica belt. The thickness of the weathered pegmatite is about 5 metres and the clay content is estimated to be about 25%. The clay appears to be of good quality. Due to the highly irregular behaviour of the pegmatite, estimates of possible reserves could not be made.

KASUMUR: The kaolinised pegmatite is about 3 m. thick, the clay being confined to upper levels. The clay content is about 25%. As the depth extension is limited more clay can be won only along the strike of the pegmatite.

VOBALAYAPALLE: This deposit is in the Atmakur taluk and appears to be the product of decomposition of felspathic schists. Clay content is 20%. As a result of the long distance from lines of transport this occurrence does not seem to be of economic importance.

SULTANAPURAM: Kaolinised pegmatite and felspathic schists are exposed below a capping of Kankar in the Kanigiri taluk. The material is gritty and not of much importance.

Copper: Copper ores were worked in Garimanipenta, Nellore district during the Vijayanagar Empire (15th Century A.D.). Occurrences of copper are known at several localities, namely, around Garimanipenta and Somalaregada in Udayagiri taluk near Chamadala in Kavali taluk, Gogulapalle in Kanigiri taluk and at several places in Rapur taluk but none of them is of economic importance.

GARIMANIPENTA DEPOSIT: Signs of mineralisation are seen scattered over the area extending from Pillaperu river in the north to 2½ miles north-east of Vinjamur in the south. The presence of copper ore is manifested mainly through melachite and azurite

stains, streaks and stringers of chalcocite and a number of old workings associated with quartz veins and pegmatites in mica schists and amphibolites.

SOMALAREGADA: Old copper workings with stains of melachite and azurite on their walls extend to over a length of 400 metres and 20 to 30 metres width along the quartzite ridge one mile east of the village.

CHAMADALA: A recently opened propsect south of the village exposes bouldery outcrops of a highly limonitised and malachite stained pegmatite rock in schists.

GOGULAPALLE: About 0.8 km. east of the village, old workings for copper ore are found on a quartzite ridge. The material from the dumps around the workings streaks of malachite and azurite are found in the vein quartz and schist fragments.

RAPUR: Of late the presence of copper mineralisation has been recorded at several places, namely, Samaypalem, Tokanchi, Dachuru and Tirumalapadu. The economic value of these occurrences appear to be of no significance.

Felspar: The mica belt of this district is full of felspar-rich pegmatites. The felspars are various types. The most common is the milky white albite-oligoclase. Orthoclase of various shades of grey and pale, perthite and microperthite are the next common varieties. Pink or flesh-red microcline is the least common. The dumps around the mica mines contain huge reserves of felspar which increase year after year as the mines are developed. The Government Ceramic Factory at Gudur is thriving on a fraction of the felspar available in this district.

Gypsum: The occurrences of gypsum in the marine silts in the backwater alluvial flats of the northern edge of the Pulicat lake near Sullurpet, Nellore district, were recorded by Dr. B. C. Roy during 1940-41. The latest figure for reserves in Nellore district as compiled by the Indian Bureau of Mines is one million tonnes (Indian Minerals Year Book 1961, P. 272). In 1956, 325 tonnes of the mineral were exploited from this area. Gypsum is formed by the evaporation of the saline water in the lagoon area. Selenite a variety of gypsum occurs as crystals, irregular lumps and masses in the dark marine silt of the Pulicat lake upto an average depth of about one metre near Kothapeta near Sullurpet. The quantity of gypsum decreases rapidly by depth.

Iron Ore: Low grade iron ores are reported from the following localities in the district (1) Gollapalle in Podili taluk, (2) Vemperala in Darsi taluk and (3) Sanampudi in Kandukur taluk. By far the best among these is the Sanampudi occurrence. The ore is in the form of magnetite in a magnetite quartz schist band. The band is 0.8 km. in length, about 90 metres in width and 4.5 metres in thickness. The estimated reserves of this deposit are of the order of 99,000 tonnes. The other two deposits are not important from the exploitation point of view.

3,334 tonnes of ore worth Rs. 41,000 in the year 1960 and 3,828 tonnes worth Rs. 38,000 in 1961 were produced from Nellore district. During 1961, Nellore was the only district of Andhra Pradesh where the production did not fall compared to the previous year 1960.

Kyanite: Kyanite of workable grade is reported from Chundi, Kandukur taluk and Bandakindipalle in Udayagiri taluk of Nellore District.

CHUNDI DEPOSIT: Kyanite is found as a normal component of the schists or as veins associated with quartz. The mineral occurs as blue blades ranging from 0.6 to 10 cms. and seldom 30 cms. or more in length. The workable deposits occur as lenticular sockets or veins in quartz vein intrusive into the kyanite bearing schists. These segregations vary in size from one metre square upto as much as 60 metres square, in rare cases. These pockets pinch of at shallow depths. The presence of others however, at deeper level is not unlikely. Many of the apparently barren quartz veins intrusive into the kyanite schists may contain kyanite pockets at depth as workable segregations are found only in quartz veins.

The irregular and scattered nature of the mineral makes mining of the deposit uneconomical at present. No large scale exploitation has been carried out so far. The production of kyanite from the entire Andhra Pradesh was only 13 tonnes in 1957 (Indian Mineral Year Book, 1961).

BANDAKINDIPALLE DEPOSIT: Bladed crystals of kyanite about 2 cm. x 10 cm. are found in abundance in a quartz mica schist band 0.8 km. north of the village. It is not easy to extract the kyanite from the schists. Appreciable amounts of the mineral could be collected from the hill slope where it is scattered all over.

Lime Stone: Two crystalline limestone bands near Bandakindipalle in Udayagiri taluk are considered to be of industrial use. They are fine to medium

grained and pink to light grey in colour. The bands extend for about 3 kms. and their individual width is about 9 metres. The reserves are estimated to be of the order of 281,600 tonnes to a depth of about three metres.

A narrow zone of crystalline limestone intercalated with impure limestone over a strike length of four kilometres could be traced in the Dharwar schists, Garimanipenta Copper belt, west and south of Utukuru (14°25′: 79°32′). Good quality limestone bands with 1.5 to 3 metres in width extend discontinuously.

Building Stones: Massive types of granites from Nellore district are suitable for structural purposes. Vein quartz and quartzites are also used as road metal and railway ballast.

CHAPTER II

HISTORY

Nothing certain is known of the history of Nellore before the times of the Cholas. However, geologists assert that the early and middle palaeolithians flourished in the coastal area stretching from Orissa to South Arcot particularly in the Cuddapah, Guntur and Nellore districts. This area is rich in a particular kind of flint called quartzite out of which prehistoric man made his weapons and implements. As these have been discovered in soils which were formed in the earliest stages of the earth's evolution it has been concluded that the men who made them were the earliest inhabitants of India. The neolithic age in Nellore is more obscure than the palaeolithic age. It is not clear to what extent this district was occupied by the pre-Dravidians and the Dravidians. The geographical situation of the district and the completely Dravidian character of its vernacular seem to indicate that the district came under Dravidian occupations as early as other parts of the peninsula. These Dravidians must have come across the Yenadis, the Chenchus, the Yerukulas and the Dommaras who are still in great number in the district. This Dravidian colony must have existed some thousands of years before the Aryan emigration to the South. It is difficult to say to what extent this Dravidian colony was influenced by the Aryans. The Aryan conquest is pictured in the great Epic, the Ramayana. Nellore was (it is supposed) included in the Dandakaranya forest into which the Aryans first penetrated as adventurous sages and civilizers. With the rise of the Mauryan Empire Nellore also seems to have come under its influence and was part of the Asoka Empire in the third century B.C. The district was next included in the Pallava dominion between the fourth and sixth century A.D. With the dawn of the seventh century the political centre of gravity of the Pallavas shifted to the south and weakened their power in the north. Pulakesin I who founded the Chalukyan empire of the Deccan invaded the Pallava territories of Mahendravarman. One section of his army moved directly against the central Pallava country in the south and another attacked the northern section comprising Nellore and North Arcot district. Pulakesin I captured Conjeevaram but eventually was beaten by Mahendravarman and compelled to evacuate it. The Chalukyas however, proved more successful in the north and had taken the whole of Vengi under their control. This newly won territory was placed under Pulakesin's younger brother, Kubja Vishnuvardhana, who thus became the founder of the Eastern Chalukyan dynasty which was in power over the eastern coast of the Deccan for more than five centuries, before it was finally over run by the Cholas and annexed to their empire. Nellore district thus came under the Eastern Chalukyans on their rise into power though Mahendravarman and his successors continually disputed their power and engaged themselves in constant raids on it. The district was therefore a bone of contention in the seventh century between Pallavas and Chalukyas. In the eighth century the Pallavas again gained supremacy over the district. The growing weakness of the Pallavas in the succeeding years gave rise to the rival activities of the Pandyas and the Cholas for gaining imperial supremacy. After struggling for half a century the Cholas became supreme in this part of the country. By 907 A.D., when the Parantaka I succeeded to the Chola throne, the Pallavas had been completely supplanted by the Cholas in Tondamandalam. About 950 A. D., the Rashtrakuta King, Krishna III killed Rajaditya (Parantaka's son) in the battle of Takkolam, near Arkonam and won back Tondamandalam and became the master for 12 years. Later *i.e.*, in 985 A.D., Rajaraja the great (985–1013) A.D., ascended to the Chola throne and began a fresh era of struggle between the Eastern and Western Chalukyas and the Cholas.

Rajaraja the Great, having annexed the territories of the Gangas and Nolambavadi (the region round Bellary and Coorg) kept the Western Chalukyas in check and was able to advance against the Eastern Chalukyas in Nellore. The conquest of the Eastern Chalukya Kingdom of Vengi was an easy matter. Rajaraja appointed Saktivarman as his Viceroy and gave his daughter Kundavai, in marriage to Vimaladitya (brother of Saktivarman) and thus brought about the union of Chola and Eastern Chalukya dynasties. This Vimaladitya, surnamed Vishnuvardhana, ruled over Vengi from 1015 to 1022 A.D. and was succeeded by one of his sons, Rajaraja Narendra, who married the daughter of Rajaraja's son and successor Rajendra (1014–53). Narendra is generally regarded as a national hero of the Andhras and was a patron of the Telugu poet Nannayya Bhattu.

The Chola dynasty ruled long on account of which numerous Telugu Chola lines came into existence in Nellore and its neighbourhood about the middle of the 12th century. They inaugurated an era of much Telugu literary activity and under them Nellore came to be more a Telugu than a Tamil district. Men of letters were handsomely patronized. Politically the immediate result of the establishment of these numerous Telugu feudal houses was the beginning of the decline of the Chola power. This is obvious from the survey of the events which took place in the time of Vikrama Chola. Till 1118 A.D., he had been the Viceroy over Vengi and later on crowned as Emperor. By 1123-34 A.D., Vikrama Chola appers to have driven out the Chalukyan forces once again and then Cuddapah and Nellore were ruled by the Telugu Chola brothers Sidda and Beta I, who acknowledged the supremacy of Vikrama Chola. A certain Bhima rose at Kolanu (Kandukur) and he had to be subdued. Vikrama Chola seems to have partitioned the Andhra countre from Nellore to Simhachalam among a number of Telugu feudal nobles, chief of whom is believed to be the Velanadu dynasty of Pithapuram. Malla I of this dynasty is said to have been a friend of Trinetra Pallava and to have conquered the Aruvela (6,000) country which included the territory from North Nellore to the Krishna.

From the time of Rajaraja II (1146-71) the Chola decline in its hold over the Andhra country started. The Hoyasalas were in constant war with the Cholas for imperial supremacy and the Pandyas were simultaneously attempting to overthrow the Chola dynasty. Tikka I, the son of Manumasiddhi Rajendra claims to have successfully opposed the Hoyasalas. From the Nirvachanottara Ramayanam, we learn that Tikka also warred with the North Velanadu line, then in its last days, just before the Kakatiya conquest.

In the reign of Rajendra Chola III (1246-67) the Chola power came to an end. He tried to resist the supremacy of the Hoyasalas, but being vanquished lost for ever the Kongu Province. The breach between the Chola and Hoyasalas was availed of by Jatavarman Sundara Pandya (1257-64 A.D.) the greatest of the Pandyan line. He is said to have occupied Nellore and celebrated his *Vijayabishekham* there. The district next came under the political sway of the Kakatiyas until 1323. The Mohammadan conquest that started in the last quarter of 13th century created great confusions but they were soon ended with the rise of the Vijayanagar Empire. The Vijayanagar Empire included the Nellore district from the very beginning, Udayagiri being one of its viceregal centres and even as early as the thirties of 14th century the capital of Kampana I, one of the five sons of Sangama I, who took part in the foundation of that Empire. In 1336, the very year of the foundation of Vijayanagar Empire, Harihara I, made a grant of a village in Gudur taluk.

Ever since Udayagiri was regarded as a very important Rajya or Provincial division. It included almost the whole of the Nellore district as well as part of Cuddapah. One interesting fact to be noticed in regard to this period is that almost all the important taluk headquarters of the present day were headquarters of Seemas then. For instance, Atmakur formed a part of Pranganadu Seema, and Kanigiri, Rapur and Udayagiri were other Seemas figuring in inscriptions. The Governor of Udayagiri Rajya was given the title of the 'Lord of the Eastern ocean'. The province was considered so important that only princes related to the royal family or only very trustworthy generals or nobles were appointed to administer it. The Udayagiri Rajya was bounded on the north by Kondavidu Rajya, on the south by Chandragiri Rajya, and on the west by Penukonda Rajya. A small part of Nellore belonged to Kondavidu and Chandragiri provinces, while the main portion of it belonged to Udayagiri. Several records of Bukka I are found in this district. In 1377 Harihara II, son of Bukka I, figures in Kanigiri taluk. In 1382 Harihara II had for his representative in Udayagiri province his own son, the later Devaraya I. In 1386 the same monarch built at Udayagiri the temple of Siddheswara, besides excavating a holy tank "which resembled the Manasa Lake" for men to bathe in.

From 1390 onwards the province came under the reign of Prince Devaraya I, the son and successor of Harihara II. Apparently Devaraya was incharge of this province for atleast 12 years before he ascended the imperial throne at Vijayanagar. Devaraya I ruled over the country from 1406 to 1422 A. D. and he was succeeded by Ramachandra and Vijaya Bukka. Devaraya II who, succeeded his father Vijaya Bukka, reigned the country from 1422 to 1446 A.D.

The chief feature in the reign of Devaraya was the control he came to exercise over the celebrated lines of Reddi chiefs, who ruled over the different parts of the Vijayanagar in the east. The Reddi clans first came into prominence in the age of the Kakatiyas. The Bhimeswarapuranam, a Telugu poem dedicated to a chief Rajahmundry Reddi ruler of

the 15th century says that the earliest Reddi chiefs rose to power in the villages of Simhavikrama (Nellore), Duvvur and Gandavaram. Getting themselves first appointed as soldiers and generals under the Kakatiyas, the Reddis carved out for themselves small feudal principalities during the troublous times which followed the withdrawal of the Mohammadans after their invasions in the first quarter of the 14th century and after. After the death of Prataparudra II, in 1323 the local Nayaks or Chiefs in the Krishna, Guntur and Nellore districts carved out kingdoms for themselves in this manner. The Reddis were the most prominent of the Chiefs. According to one account they succeeded the Niyogi Brahmans in the Government of the country. It is clear from the inscriptions that the Reddi family which first rose to power belonged to the Pantakula and Pakanadu. The Panta Reddis still form an important class of the landed gentry of the district and Pakanadu is the land between Nellore and Ongole. When the Reddis became rulers, genealogies characteristic of the Kshatriya dynasties were framed for them. They all traced their political greatness to a common progenitor, Prolaya.

The earliest centre of the Reddi activity was Addanki, 21 miles to the north-west of Ongole. Vema Reddi, the son of Prola, established his hold over the strong strategic forts of Addanki, Kondavidu, Kondapalle and Dharanikota. Vema is generally claimed to have constructed the flights of steps to the otherwise inaccessible temples of Ahobilam and Srisailam. Vema Reddi ruled from 1340 to about 1369, the period when the Vijayanagar dynasty established itself in the Nellore district; but Vema Reddi did not recognise the Vijayanagar authority. The control over the Kondavidu Rajya therefore became slender. In the time of Vema's son and successor Anapota the capital was shifted northwardly from Addanki to Kondavidu, 13 miles to the south-west of Guntur. The Reddis were great patrons of Telugu literature and culture and of Brahmans and temples. Several of them were themselves eminent scholars and poets. Venkatagiri Zamindars were important feudals in this period. One of the early chiefs of Venkatagiri distinguished himself in the Court of Kakatiya King, Ganapathi, and was a man of great influence during the reign of Rudrama Devi. During the reign of Krishna Devaraya the family lived at Velugodu and thus came to use the title of Velugotivaru.

In the later part of the fifteenth century the control of Vijayanagar over the district slackened in consequence of the weakness of the emperors Mallikarjuna and Virupaksha. In the north Kondavidu Reddis declined from the time of Komati Vema onwads on account of aggression of their cousins Kataya Vema and others of Rajahmundy. Taking advantage of these circumstances King Kapileswara Gajapathi of Orissa, who inaugurated a new era of imperial greatness for his Kingdom, marched southward, subdued the Reddis and pushed his forces into the Nellore district. Kapileswara seems to have advanced far in the south. Udayagiri and Kondavidu became Viceroyalties under the Orissa Kings Kapileswara and his successor Purushothama. The Saluva general, Narasimha then tried to drive the Gajapathis out and in1474-75 A. D., actually reconquered the whole province upto Rajahmundry. Later on the district came once again under Kapileswara, Purushothama and Prataparudra. Throughout the period when Vijayanagar was under the four Narasimhas, *i.e.*, the two Saluvas and the first two Tuluvas, Nellore district was temporarily lost to Vijayanagar. A new epoch dawned with the accession of the great Krishnadevaraya in 1509. The greatest of his conquests was the recovery of the Nellore or Udayagiri and Kondavidu Rajyas from the Orissa Ruler Prataparudra, whose daughter he subsequently married. Krishnadevaraya as a prince had been first employed in Kondavidu province. The whole of the Nellore district was under the control of Krishnadevaraya throughout his reign and also of his successors Achutaraya (1530-42 A.D.) and Sadasivaraya (1543-70). With the disaster at the great battle of Tallikota in 1565 and the transfer of the capital to Penukonda the Moslems advanced into Bellary, Kurnool and Anantapur districts and asserted supremacy over the local chiefs who had hitherto been the vassals of the Vijayanagar empire. The Provincial Chiefs tried to assert independence and Nellore was not behind other northern districts in this respect. Tirumala I, who succeeded Sadasivaraya in 1571 had great trouble with the Moslems and his control over the northern parts of the Vijayanagar empire including Nellore became naturally weak. The growing pressure of the Musalmans' arms enabled Provincial Governors to act like independent princess. Channappa Nayudu,one of the generals of Sadasivaraya, otherwise known as Jagadevaraya, repulsed two invasions by the Moslems. A third invasion in 1573 by both Adil Shah and Qutub Shah was more disastrous. The latter swept the country from Peddapuram to the Krishna River, crossed that river and captured Kondavidu, while the rest of the Bijapur troops advanced towards the Nellore district. Prince Sri Ranga who was later known as Sri Ranga I who was incharge of this part of the

country checked the Moslems' activities. Many parts of the Nellore district were, however, still subject to frequent Moslem invasions.

Sri Ranga I (1572–85 A.D.,) succeeded Tirumala and continued in possession of the Nellore district throughout his reign. His accession to the throne was apparently followed by a desperate fight with the Moslem's in the country bordering on Nellore. His successor Venkata II (1585–1614) was in possession of this entire, district. Venkata II died in October, 1614 and from that time till 1616 there was a great war of succession, in which almost all the important Feudatory Rajas and Chiefs of the different provinces took part. Prince Ramadevaraya and Jaggaraya were the rival candidates. Yachamanayaka of Venkatagiri and Ragunathanayaka of Tanjore championed the claims of Ramadevaraya while Gobburi Jagadevaraya, Veerappa Nayaka of Madura, the Nayaka of Gingee, and the chief of Karvetinagar supported Jaggaraya. Yachamanayaka rescued Ramadevarraya from the fort of Vellore, where all his brothers had been imprisoned and killed by the orders of Jaggaraya. The decisive battle of the war was fought on the banks of Cauvery near the Grand Anicut where Jaggadeva and his partisans were completely routed, the leader himself being killed. The young prince Ramadevaraya was then proclaimed emperor by the party of Yachamanayaka and he ruled from 1617 to 1630. This led to the permanent occupation of the town of Venkatagiri by Yachamanayaka and his successors. It was previously in the possession of the Chiefs of Karvetinagar, relatives of Jaggadevaraya. The reign of Rama Devaraya IV (1617–30) was one of disasters so far as his control over Nellore district was concerned. The Sultan of Golconda imposed his yoke on the former feudatories of Penukonda and Chandragiri, and the Venkatagiri and Kalahasti Chiefs became subordinates to Muslims. Sultan Abdulla Badshah who ruled for the long period of fifty years from 1623 to 1672 became the virtual ruler of the district. The decline of the rule of Vijayanagar and the rise of the Muslims synchronised with the advent of the British power in this part of India. In the reign of Venkata II European Nations had begun to appear on the Coromandel coast and the eastern waters. In 1595 the Dutch first rounded the cape and within the next thirty years established settlements all along the sea coast from Africa to Japan. In 1609, they appeared at Chandragiri and obtained Venkatapathi's permission to erect a settlement at Pulicat, the great port which with its extensive backwater afforded a safe shelter for their shipping and by 1615 they had made themselves masters of coastal trade of Ceylon and Coromandel seas. The English were not so successful at first. Till 1611 they had for their objective the East Indies and not the main land of India. Only in 1611 they attempted to effect a trade settlement in India and touched at the several ports occupied by the Dutch. The Dutch scented a new danger, and immediately set intrigue afoot against the English who sought their fortunes in the Deccan and the East Indies in the reign of Venkata II. During the time of Ramadevaraya IV (1617–30) the European natives made further progress, but the Dutch, who had over thrown the English at Java in 1617, and built the city of Batavia, made a truce with the English in 1621 and allowed them to establish a settlement at Pulicat. They also established a factory at Masulipatnam. The fierce rivalry between the Dutch and the English soon revived and the English turned their attention to the mainland of India, particularly the Coromandel coast and desired to make Masulipatnam as the starting place for their progress. But there were serious difficulties in their way as the local Governor of Golconda was unfriendly and there was no protecting Firman from the Sultan. They therefore, looked for a more southern place which, while offering the same facilities as Masulipatnam would be more free from political and other troubles. They therefore, choose Dugarajupatnam, 40 miles north of Pulicat lake and 9 miles from the mouth of Swarnamukhi. The spot was situated within the Estate of Venkatagiri and was under the influence of a local Karnam, Armuga Mudaliar, who was instrumental in seeking it for the English. The place therefore, came to be called Armagaon after him. Armagaon was fortified by the East India Company presumably with the permission of the Rajah of Venkatagiri. It was the first instance of a fortified possession of the East India Company in India and was considered so secure that in 1628 Masulipatnam was abandoned in its favour. In 1632, however, the British obtained a Firman from the Sultan of Golconda and reopened the factory at Masulipatnam, but Armagaon was not finally abandoned till 1641 when Chennakuppam, the present Madras, took its place. Its abandonement was not due to any refusal on the part of the Rajah of Venkatagiri to give permission for its fortification but to the fact that by that time Madras was considered the most promising site for the Companys' headquarters. Venkatapathi III (1630–42) seems to have made some attempts to recover the southern part of the district. But the sovereignty of

Venkatapathi III was only temporary, owing to Golconda troubles from the Moghals. Sri Ranga succeeded Venkatapathi and it was with his formal permission that Damerla Venkatadri Naidu of Kalahasti gave Chennakuppam to Francis Day in 1639. From 1640 onwards Sri Ranga ceased to have any control over Nellore. The Nayakas of South *viz.*, Tirumala Nayak of Madura, Krishnappa Nayak of Gingee and of Vijaya Raghava Nayak of Tanjore rebelled against Vijayanagar and led to a great war in South Arcot district. The confedarates sought the assistance of the Muslims and made Sri Ranga who was at first successful, to abandon his ancestral throne and take refuge in Mysore where he died. The result of the suicidal call for Muslim help by the Hindu Estates of the South was that both Bijapur and Golconda united in despoiling them, and agreed, after a successful campaign to partition South India into two spheres of influence, Mysore, Tanjore, Gingee and Madura being subject to the supremacy of Bijapur and Nellore, Chingleput and North Arcot to that of Golconda.

The sovereignty of the Sultans of the Golconda over this district lasted from 1640 to 1687 when the dynasty was overthrown by the Moghals. Thus for the first time this part of India became subject to all the benefits and evils of the Muslim rule. Mosques and Tombs were erected in a number of places and the inscriptions regarding them were engraved in Persian and Arabic not only in purely Muslim buildings but also on the walls and pillars of Hindu temples. Sometimes temples were destroyed and the materials were used for the building of Muslim edifices. Forts were constructed and the Muslim Officers were appointed to them. As against these there were some agreeable features, and there are instances of Muslim Kings making grants to Hindu temples. An inscription at Pallavolu in Udayagiri taluk shows that Sayed Abdullah Sahib gave certain rent free lands to the local Avulamma temple. Donations for the preservation of tanks, canals and other utilitarian works were common. Till 1678, Golconda held uncontrolled possession of this portion of the Carnatic. Then came Sivaji's invasion and led to the assertion of Mahratta supremacy over the southern portion of Golconda territory. Nellore, however, does not seem to have been touched by this raid. In 1687, Moghal conquest took place and annexed the Golconda and its possessions in the Moghal empire. In 1689 the Mahratta King Sambhaji was captured and his successor Rajaram fled to Gingee which was besieged for eight years by the Moghal troops. During this siege their general, Zulfikar Khan, led his troops to the southernmost extremity of the peninsula, and reduced all the southern kingdoms to Moghal supremacy and the whole of the Carnatic then fell into the hands of the heads of Moghals and was oganised into the Province of Arcot which roughly extended from the Krishna to the Coleroon.

In 1701 Zulfikar Khan was succeeded by Daud Khan as the Nawab by which title the military commandant of the Carnatic came from this time to be known. The Nawab of Arcot was constitutionally subordinate to the Nizam of Deccan (who became independent of the Moghal emperor in 1724). In 1710 Daud Khan was succeeded by Saadut-ulla-Khan who governed the Province till his death in 1732. His nephew Dost Ali assumed the Governorship of Carnatic in 1732 without the orders of the Nizam and much to his resentment. The Nizam would have marched south to assert his power had not serious Moghal affairs called him to the north. On his return to the south he quitely allowed the Nawab of Carnatic to be subdued by the Mahrattas under Raghoji Bhonsle in 1741. Raghoji killed Dost Ali in battle, entered into terms with Safdar Ali, from whom he levied a tribute. He besieged Trichinopoly and took Chanda Sahib as prisoner in 1742. Safdar Ali was killed by his brother-in-law Murtuza Ali for power but Safdar Ali's minor was ultimately proclaimed as the Nawab. In 1743 the Nizam came from Hyderabad to enquire into that matter. The Nizam set aside the claims of Murtuza Ali and Chanda Sahib and appointed Anwar-ud-din as the guardian of the minor son of Safdar Ali whom he accepted as the Nawab of Carnatic. The young Nawab, however, was assasinated soon after and Anwar-ud-din succeeded him.

After the death of Nizam-ul-mulk in 1748 his second son Nazar Jung and his grandson Muzaffar Jung strove for the succession of the Subedarship of the Deccan. In Carnatic Anwar-ud-din was opposed by Chanda Sahib. At this time the English and the French were contending for supremacy in the East and each of the claimants secured the support of one of these powers. Nazar Jung and Anwar-ud-din were supported by the English while Muzaffar Jung and Chanda Sahib were supported by the French. In this struggle Muzaffar Jung fell prisoner and Nazar Jung became the ruler. But in 1750 when Nazar Jung was assasinated, Muzaffar Jung was proclaimed as the Viceroy of the Deccan by the French in consequence of which he recognised Dupleix, the

French Governor as the titular sovereign over the whole of South India from Krishna to Cape Comorin and Chanda Sahib as the Nawab of Arcot. Muzaffar Jung proceeded on his return march to Hyderabad from the south. The Nawabs of Cuddapah, Kurnool and Savanur who supported him were dissatisfied with the rewards bestowed on them by Muzaffar Jung. So, they killed him after a few weeks march in the territory now falling within the confines of Cuddapah district. The French then selected Salabat Jung, the third son of Nizam-ul-mulk as the successor. The French influence had this grown to prominence both in Hyderabad and in the Carnatic and had therefore, become paramount in Nellore also as elesewhere. The only place in the hands of Muhammed Ali and the English in the Carnatic was the fort of Trichinopoly. In the succeeding months of 1751-52 the fortunes of the French and their ally Chanda Sahib waned as the result of a series of reverses before the walls of Trichinopoly and in other battles. By the end of 1753 the English gained a gradual hold over the Carnatic proper and became its masters while the French continued to be supreme in the Deccan and Northern Circars. M. Bussy had to his credit not merely the reputation of an eminently skilful administrator, but the real triumph of acquiring from the Nizam the assignment of the Northern Circars for the payment of his troops. In 1753 Nazibullah, brother of Muhammed Ali the Nawab of Arcot, was appointed as the Governor of Nellore, the northernmost part of the Carnatic. Due to the increasing influence of the English in the Carnatic, Dupleix felt that his plan for a french Empire was but a dream and he opened negotiations with the English authorities at Madras. In 1754 a conference was held between the English and the French at Madras. On 14th October 1754, a suspension of hostilities by the English and the French was proclaimed but this lasted for only eighteen months. During this period the English were engaged in organising the administration of the territories of the Nawab of Arcot and in reducing the refractory Poligars of Madura and Tinnevelly and to break the siege of Trichinopoly by the Mysoreans. The result of the achievements was that by August, Muhammed Ali was secure in his possession of the Carnatic. Things having settled down at Arcot, Muhammed Ali set to work to reduce Nellore. He despatched his forces together with an English detachment to collect tributes from the Poligars. Bangaru Yachama the Poligar of Venkatagiri (1747-76) agreed to pay Rs. 1,40,000 and Damerla Venkatapathi, Poligar of Kalahasti agreed to pay Rs. 1,00,000 and to acknowledge Muhammed Ali as the Nawab.

But the establishment of Muhammed Ali at Arcot did not bring him immediate peace. One of his brothers Mafuz Khan who was administering the southern provinces rebelled. The same spirit of hostility was displayed by Nazibullah, his another brother and the Governor of Nellore. The Nawab required him to pay a subsidy of Rs. 1,00,000 above the usual tribute, on the ground that Nellore had suffered little in the recent wars. Nazibullah though apologetic, evaded payment. The Nawab therefore, deputed Iklas Khan, the brother of the Nawab's General to collect the tribute. His talks with Nazibullah were not successful and while he was returning with his escort he was ambushed at dark and one of his men was murdered. The Nawab then applied to the English for aid. The English accordingly despatched a force under the command of Lt. Col. Forde which joined the Nawab's army and the troops of the Poligars of Venkatagiri and Kalahasti at Sarvepalle and on 27th April 1757 they encamped before Nellore. The force was commanded by Abdul Wahab, the brother of the Nawab. Nazibullah on the approach of Abdul Wahab had retired with a small contingent leaving the town to be defended by the garrison. The English pitched their camp along the river bank and those of the Nawab and Poligars were encamped at a distance higher up. The attack was commenced on 29th, April 1757 and lasted for five days. The attack was abortive and many were wounded. The assault culminated in an unseemly retreat from the foot of the fort wall. Col. Forde did not renew the attack on Nellore. Abdul Wahab urged him to cross the Pennar in pursuit of Nazibullah who was reported to be in the neighbourhood. On 13th May, 1757 the army crossed the Pennar and proceeded further and reached Sangam, 18 miles northwest of Nellore on 15th May, but Nazibullah had quitted it sometime before to join the French at Kondavidu. Col. Forde therefore returned next day to Sarvepalle where he received express orders to come back with utmost expedition to Madras where the affairs became serious in view of the renewed French activities.

In June 1757 Nazibullah, the rebel Governor, returned from Masulipatnam accompanied by eighty French soldiers. On the departure of the troops of the Nawab to Arcot and those of the Poligars to Venkatagiri and Kalahasti, he opened a new campaign of incursions into the open country of the Poligars, and in the middle of August marched suddenly to Tirupati to seize the temple collections. He only reached the fort of Kadawa, 12 miles from Tirupati and there he deemed it wise to return to Nellore, as a force had

been sent against him from Madras under Captain Polier. He however, continued his control over the district, as the English troops were again recalled by disturbances in the South. In 1758 the matters became complicated by the invasion of the Mahrattas under Balvant Rao, who claimed to act in the name of the Nawab. He pretended to be angry with Nazibullah on the score that Nazibullah was about to march against the Nawab with a large body of French troops sent by Bussy. He subjugated Cuddapah district in 1757, advanced eastward into Nellore district. Dividing his troops into three sections, he sent one of his sections of his troops against the Poligar of Bomraj and another against Venkatagiri. He himself appeared at the Head of the third Section at Nellore. Nazibullah being unable to resist hastened to buy him off and at the same time cleverly persuaded the Mahratta general to intercede with the Nawab on his behalf. Meanwhile the other detachments plundered Venkatagiri and Kalahasti and exacted agreements from the Poligars for the payment of oppressive tributes. Matters might have become positively unpleasant for the Nawab but for the summons of Balavant Rao to Poona by the Peshwa Balaji Baji Rao.

In August 1758 Lally ordered M. Bussy to leave Hyderabad and to join the famous attack upon Madras. This order was fatal for the fortunes of the French in the Deccan, fortunes which had been kept intact for years by Bussy's masterful personality, diplomatic skill and loyalty to Salabat Jung against the machinations of his brothers Nizam Ali and Basalat Jung. With great unwillingness but with characteristic regard for discipline Bussy left for the south by way of Nellore district. Reaching Nellore through Ongole he received a warm reception from Nazibullah. Leaving M. Moracin at Nellore to establish, with Nazibullah's aid, the supremacy of French arms in the district, Bussy proceeded south and joined Lally in the siege of Fort St. George. The siege lasted for two months and ended in French discomfiture and retreat on 16th February 1759. This sealed the fate of the French for ever in the Carnatic. During this period Nazibullah had been friendly with the French, and had helped the establishment of French power over the Poligars of Venkatagiri and Tirupati, he even accompanied Moracin to Pondicherry. But when he heard that the siege of Madras was given up and that the besiegers had retreated, he declared entirely for the English and most treacherously put to death all the Frenchmen who were with him except their officer St. Denys. He even offered to pay a tribute of 30,000 pagodas a year in case they persuaded the Nawab to acknowledge him as his Governor of Nellore. The Nawab and the English advisers saw that this was the best arrangement under the circumstances and not only recognized him as the Governor but Abdul Wahab was rewarded with the confirmation of the districts of Chandragiri and Chittoor and the three Poligars of Venkatagiri, Kalahasti and Bomraj were ordered to guard their own hills and assist the administration of Chandragiri and Chittoor, if attacked. By the close of 1759 the district once again came entirely under British influence. An expedition from Bengal into the Northern circars had just resulted in the expulsion of the French from the Northern Circars.

In the middle of 1760 Basalat Jung, brother of Salabat Jung, the Subedar of the Deccan threatened the district. Crossing the Krishna he sent threatening letters to Nazibullah at Nellore, to the three great poligars as well as to all lesser ones along Pennar, and demanded an account of their arrears of tribute due to the Subah of Deccan. The tone of his letters and the approach of his forces deterred Nazibullah and the Poligars from helping the English in the recovery of Tirupati which had been seized by the Mahrattas. Taking advantage of this weakness, Basalat continued his march and passing through Ongole attacked the fort of Pellur. In great alarm Nazibullah and the Poligars pressed Madras for immediate assistance. The English could not go to their rescue as they were collecting their forces to march upon Wandewash. Basalat Jung, meanwhile advanced from Pellur against Nellore; but when he came near the Pennar, he quitted the southern road and turning to west encamped on the plains of Sangam on the north bank of the river. Here he summoned Nazibullah and the three great poligars to offer their personal obeisance and allegiance.

Nazibullah by making exaggerated reports of his forces as well as the reinforcements expected from Madras, engaged in civil communications with him. Basalat took strong steps against the three great Poligars who fearing to offend the English Government had avoided the visit by various excuses. Sending his horse over the river to forage in the arable lands, and to seize the cattle and grain for the army, Basalat Jung subsequently crossed the Pennar with his whole force and on October 1st, 1759, encamped at Saidapuram expecting the arrival of Bussy. Against him the English despatched from Conjeevaram a strong contingent under the command of Captain Moore. The arrangement was that

these troops were to be joined by six companies of sepoys from Tirupati and the army of Nazibullah and then to follow and harass Basalat Jung's troops in order to prevent them from effecting a meeting with Bussy. On the 15th October 1759 the Madras troops and the sepoys from Tirupati reached Kalahasti, but the Nellore contingent failed to appear. The arrival of the British was very timely for the Zamindars of Venkatagiri and Kalahasti, terrified by the cavalry of Basalat Jung within their borders and doubtful of the distant protection of the English troops, had temporized, visited Basalat in his camp, accompanied by Sampati Rao formerly the Diwan of the Nawab Muhammad Ali, and agreed to make each a present of Rs. 40,000. The appearance of the English at this stage at Kalahasti and the non-arrival of Bussy's troops, caused Basalat Jung to resolve upon retreat. He accordingly re-crossed the Pennar and marched towards Cuddapah. In February 1763 by the Treaty of Paris the French in return for the restoration of Pondicherry recognised Muhammad Ali as Nawab and Salabat as Subedar. In 1763 Muhammad Ali ceded to the English the Jagir districts yielding an annual revenue of 4½ lakhs of Pagodas as indemnity for the recent war expenses. Nizam Ali Khan, the fourth son of Nizam-ul-mulk obtained the support of the English on the promise of dismissing the French from his service. Salabat Jung was dethroned in 1761 and Nizam Ali Khan was proclaimed ruler. After Nizam Ali succeeded Salabat Jung as the Nizam of Hyderabad the Northern circars were ceded to the British in 1766 on the condition that the Nizam was to be furnished with a subsidiary force in times of war and should receive six lakhs of rupees annually when no troops were required and the Nizam on his part to assist the British with his troops.

In 1767 the first war between Haidar Ali and the English broke out and ended in 1769 with the Treaty of Madras on the basis of the mutual restitution of conquests. The Nawab, who had transferred all his military power to the English, was subsequently engaged in diplomatic overtures with the Mahrattas against Haidar Ali, the despoilment of Tanjore, and the arrangement for the lease of Basalat Jung's Jagir of Guntur, which offended both Haidar Ali and Nizam Ali who laid claims to it. In July 1780 Haidar Ali invaded the Carnatic and during the subsequent operations the forces from Madras to Guntur and from Bengal to Madras passed through the Nellore District. As a result of these operations the Government at Fort St. George had to bear the whole burden of military defence and applied for financial aid to the Nawab of Carnatic. The latter however, appealed in 1781 to the Bengal Government, and succeeded in concluding a treaty, by which he was exempted from all pecuniary demands beyond the expense of ten battalions of troops, was recognised as hereditary sovereign of the Carnatic, and received also promises of restoration of Tanjore and the restitution of certain districts occupied by Haidar Ali. The Madras Government remonstrated against this agreement and after many negotiations it was agreed on 2nd December 1781 that the revenue of the Carnatic should be transferred to the British Government for five years, the Nawab receiving one sixth for his private expenses. The Nawab did not allow to continue this arrangement for long. Taking advantage of the misunderstandings between the Supreme Government at Bengal and the Government of Madras he succeeded in obtaining in January 1783 orders for the restoration of his revenues. The Madras Government did not implement these orders as the agreement of the 2nd December 1781 had in the meantime been approved by the Court of Directors. The Board of Control which had just been created, took the management of the Carnatic affairs out of the hands of the Court of Directors, and ordered the restoration of the revenue to the Nawab, and the assignment by him of 12 lakhs of pagodas a year for the payment of the debts to the company and to private creditors. By this preliminary treaty of 1785 the Nawab had to pay 12 lakhs of pagodas a year towards debts besides meeting current charges, territorial security being assured in return for punctual payment. It was subsequently realised that no conditions could be enforced through the officers of the Nawab. It was therefore, resolved to undertake the direct management of the country during the war—a decision which was carried out with great delicacy. The Nawab however, did not see its necessity for the preservation of his country or interests and boldly circulated instructions to his Amins practically directing them not to co-operate with the English Government. Consequently Lt. Boisdaun, commanding at Nellore complained that the Nawab's managers seemed rather enemies than friends of his detachment and that His Highness's Fouzdar and Amildar at Nellore absolutely refused to submit to the Company's authority.

In 1790 the Government in order to discharge the new financial responsibilities which had fallen on their shoulders, appointed Collectors in the various districts of the Carnatic, each being armed with full powers to reduce the Poligars and other

dependent authorities to complete subjection and to evolve a sound and regular system of financial administration in place of chaos which had reigned under the Nawab's regime. In accordance with this plan Nellore, with its dependencies was placed under Mr. Dighton, while Ongole and Palnad were placed under Mr. Erskine. Mr. Dighton assumed charge as first Collector of Nellore in July 1790. He was instructed by the Board of Revenue to make enquiries regarding the state of affairs of the district and to endeavour by every means in his power to impress all ranks of people with confidence in Company's justice, to assure them of protection in all their just rights, and to encourage the ryots in the cultivation of the country. He was also asked to be careful to conciliate the attachment of the Poligars of the frontier and assure them that Government will notice in the most favourable manner such exertions as they shall make against common enemy.

The Carnatic remained under British management for two years. In 1792 the above temporary arrangement came to an end, and as the parties were dissatisfied with the treaty of 1787, a new one was concluded on the 12th July 1792 by which it was stipulated that the British Government should maintain a force, for the payment of which the Nawab should contribute 9 lakhs of Pagodas annually and that the country should be garrisoned by British troops. In the event of war the British Government should take the management of the entire country, paying to the Nawab one fifth of the revenues. The British Government should also collect tribute from the Poligars in the Nawab's name and give him credit for it in his contribution and in case of failure of payment the British Government should assume the management of certain specified districts. If the Nawab required additional troops he has to pay separately for it and he should renounce intercourse with other States as he should be included in all treaties relating to the Carnatic. By the end of August 1792 this district had been retransferred to the Nawab's officers.

Muhammad Ali died in October 1795 and was succeeded by his son Oomdat-ul-Oomrah. The experience of the previous three years had shown that the treaty of 1792 had most injurious and oppressive effects. Though the subsidy had been paid regularly the Nawab had contracted heavy loans to meet his liabilities and to liquidate them. He assigned the revenues of his country to the creditors, a system which resulted in cruel and grinding oppression. Several attemps were made to remedy this state of things but without success. On the fall of Srirangapatnam treacherous correspondence was discovered which had been begun by Muhammad Ali with Tippu Sultan shortly after the conclusion of 1792 treaty and even Oomdat-ul-Oomrah was concerned in it. As this trechery was a direct violation of the treaty obligations of 1792, the British Government declared itself released therefrom, and announced its intention of assuming the Government of the Carnatic making a provision for the family of the Nawab Oomdat-ul-Oomrah who died on 15th July 1801 before the conclusion of the proposed arrangements. The terms framed on the above basis were offered to his reputed son Ali Hussain who had been nominated by Oomdat-ul-Oomrah as his successor; but he rejected them. Negotiations were then opened with Azim-u-Dowla, a nephew of the Nawab Oomdat-ul-Oomrah, and on 31st July 1801 a settlement was arrived at by which he renounced the civil and military Government of Carnatic and received a stipendiary provision with the title of Prince of Arcot. The Nawabship of Carnatic thus ceased to exist and the British administration of the district commenced.

Since its acquisition by the British Government in 1801 the district has tasted the blessings of settled peace, the only event of any political importance being the sequestration in 1838 of the Jagir of Udayagiri, owing to its title holder's participation in a conspiracy, engineered by the Nawab of Kurnool, against the ruling power.

After the district came under the British administration the jurisdiction of the district did not undergo any major changes but for the transfer of Ongole taluk in 1904 to Guntur district when it was newly constituted. The former Zamindaries in the district *viz.*, (1) Venkatagiri, (2) Pamur (part of the former Kalahasti Estate) (3) Chundi and alienated villages and (4) Mutyalampadu covering nearly an extent of 3,538 sq. miles were taken over by the Government during 1949 and 1950 under the Madras Estates (Abolition and Conversion into Ryotwari) Act, 1948 and the Madras Estates Land (Reduction of Rent) Act of 1948. During the decade 1941-51 there was a transfer of few border villages between this district and Chingleput District. During the decade 1951-61 three villages *viz.*, Krishnapuram, Peddauyyalawada and Chinnauyyalawada of Ongole taluk of Guntur district were transferred to Darsi taluk of this district and Kotikalapudi village of Darsi taluk was transferred to Ongole taluk of Guntur district.

After the attainment of Independence on 15th August 1947 the district formed part of the composite Madras State till 1st October, 1953. When Andhra State was formed on 1st October, 1953 the district, along with the other ten predominently Telugu speaking districts of the composite Madras State, was transferred to the Andhra State. On 1st November, 1956 when the States were reorganised on linguistic basis this district came under Andhra Pradesh State. The district is now divided into four Revenue Divisions and thirteen taluks for Revenue administration.

After the country became a Republic on 26th January, 1950 the first General Elections under the new Constitution were conducted to the House of the People and to the Legislative Assembly in January 1952 in the constituencies delimited in 1951 by an order of the President of India under sections 6 and 9 of the Representation of the Peoples' Act, 1950. The term of both the House of People and the Legislative Assembly was to be for five years. But due to the no-confidence motion passed by the Legislative Assembly in the Ministry in 1954 and the consequential collapse of the State Government, mid-term elections had to be conducted in February, 1955 for the State Legislature. Based on the 1951 Census results, the Delimitation Commission had, in their order issued in 1954, delimited this district into a double member Parliamentary Constituency and 14 Assembly Constituencies of which three Assembly Constituencies of Buchireddipalem, Venkatagiri and Gudur were double member constituencies. In each of the double member constituencies one seat was reserved for a Scheduled Caste candidate. The mid-term elections for the State Legislature held in February 1955 were according to this redelimited constituencies. After the Reorganisation of States in 1956 the Assembly and Parliamentary Constituencies in the State were again redelimited under the order known as the Delimitation of Parliamentary and Assembly Constituencies Order, 1956. So far as Nellore district was concerned the constituencies were not affected and remained in tact. Again in 1961 the double member constituencies were abolished under Two Member Constituencies (Abolition) Act, 1961 and then a fresh order was issued in 1961 known as the Delimitation of Parliamentary and Assembly Constituencies Order, 1961 under which Nellore was delimited into two Parliamentary and 17 Assembly Constituencies. Podili, Darsi and Kanigiri Assembly constituencies were included in Markapur Parliamentary Constituency. One of the two Parliamentary Constituencies *i.e.*, Nellore and three of the Assembly constituencies *i.e.*, Buchireddipalem, Venkatagiri and Gudur were reserved for candidates belonging to Scheduled Castes only. Kavali Assembly Constituency was reserved for a candidate belonging to Scheduled Tribe. The third General Elections to the House of People and the State Legislative Assembly were held in February, 1962 according to these redelimited constituencies under the marking system of vote. The following statement shows the jurisdiction of the Parliamentary Constituencies and Assembly Constituencies of Nellore District as per the Delimitation Commission Order of 1961 and the names of candidates elected at the 1962 General Elections.

STATEMENT II—1

Name of the Constituency	Extent of the Constituency	Name of the candidate elected at 1962 General Elections
(1)	(2)	(3)
	PARLIAMENTARY CONSTITUENCIES	
1. Kavali	Udayagiri, Kandukur, Kondapi, Nandipad, Kavali, Kovur, Buchireddipalem Assembly Constituencies	Sri Bezwada Gopala Reddy
2. Nellore (S. C.)	Atmakur, Rapur, Venkatagiri, Nellore, Sarvepalli, Gudur, Sullurpet Assembly Constituencies	Sri B. Anjanappa
	ASSEMBLY CONSTITUECIES	
1. Darsi	Darsi taluk (excluding Pothakamur firka)	Sri Dirisala Venkataramana Reddy
2. Podili	Podili taluk and Pothakamur firka (excluding Krishnapuram, Peddauyyalawada and Chinnauyyalawada villages) in Darsi taluk	Sri Katuri Narayanaswamy
3. Kanigiri	Kanigiri taluk (excluding Chandrasekharapuram and Veligandla firkas and certain specified villages in Pamur firka and Veeraramapuram village in Thimmareddipalle firka)	Sri Kotapati Guruswamy Reddy
4. Udayagiri	Udayagiri firka and certain villages specified in Pedireddipalle firka and Appasamudram Village in Nandipad firka, in Udayagiri taluk, Chandrasekharapuram and Veligandla firkas and certain specified villages in Pamur firka and Veeraramapuram village in Thimmareddipalle firka in Kanigiri taluk	Sri Puli Venkata Reddy
5. Kandukur	Kandukur firka, Ponnalur firka (excluding Chinnipad village and Manginipad village except its hamlet Rajavolupad), Lingasamudram firka (excluding Dhappalampad hamlet of Parakondapad and Thurpurajupalem, hamlet of Viswanadhapuram) Nandanavanam, Nandanavanam Vavillavarikandriga, Palukur and Sannampudi villages in Singarayakonda	Sri Nalamothu Chenchu Rama Naidu

	firka, Ulavapad firka (excluding Chakicherla, Chevur, Karedu, Kollurpad, Sriranganayakulavari Kandrika, Mocherla, Ravur and Ramayapatnam villages), Baddipudi, Kothapeta and Annaboyinapalli villages in Gudlur firka and Mekapad and Uppaladinne villages in Kondapi firka, in Kandukur taluk	
6. Kondapi	Kondapi firka (excluding, Mekapad and Uppaladinne villages), Singarayakonda firka (excluding Nandanavanam, Nandanavanam Vavillavari Kandriga, Palukur and Sanampudi villages), Dhappalampad hamlet of Parakondlapad village and Thurupurajupalem hamlet ef Viswanadhapuram village in Lingasamudram firka Kollurpad, Sriranganayakulavari Kandrika, Chakicherla, Chevur, Karedu, Mocherla, Ravur and Ramayapatnam villages in Ulavapad firka Gudlur firka (excluding Baddepudi. Kothapeta and Annaboyinapalli villages), Chinnipad village and Manginipad village (except its hamlet Rajavolupad) in Ponnalore firka in Kandukur taluk	Sri Chaganti Rosaiah Naidu
7. Nandipad	Chakalakonda, Vinjamur, Varikuntapad and Nagineniguntа firkas, Nandipad firka (excluding Appasamudram village), Peddireddipalle firka (excluding certain specified villages of Pedireddipalle firka in Udayagiri taluk; Kondapuram firka and certain villages specified in Kaligiri firka in Kavali taluk	Sri Kovi Ramaiah Chowdary
8. Kavali (S.T.)	Kavali, Bogole and Jaladanki firkas and Kaligiri firka (excluding certain villages in Kavali taluk	Sri Yalampalli Penchalaiah
9. Kovur	Kovur and Kodavalur firkas in Kovur taluk and Indukurpet firka in Nellore taluk	Sri Rebala Dasaratharama Reddy
10. Buchireddipalem (S.C.)	Buchireddipalem, Allur and Duvvur firkas in Kovur taluk	Sri Swarna Vemayya
11. Atmakur	Atmakur taluk (excluding Koluvoyi firka except Thimmayapalem village)	Sri Anam Sanjeeva Reddy
12. Rapur	Rapur taluk (excluding Sydapuram firka) and Kaluvoyi firka (excluding Thimmayaplem village) in Atmakur taluk	Sri Anam Chenchu Subba Reddy
13. Venkatagiri (S.C.)	Venkatagiri taluk and Sydapuram firka in Rapur taluk	Sri Allam Krishnaiah
14. Nellore	Nellore firka and certain villages specified in Mulumudi firka in Nellore taluk	Sri Ganga China Kondaiah
15. Sarvepalli	Nellore taluk (excluding Indukurpet and Nellore firkas and certain villages specified in Mulumudi firka	Sri Vemareddy Venkureddy
16. Gudur (S.C.)	Gudur taluk	Sri Merlapaka Munuswami
17. Sullurpet	Sullurpet taluk	Sri Pasupuleti Siddaiah Naidu

This district like other parts of the country played an effective role in the struggle for National Independence. This district has the honour of producing great authors like Thikkana Somayaji, Yerra Pregada, Pillalamarri Pina Veerabhadra Kavi, Vedam Venkatraya Sastri, Nyapathi Subba Rao, Duvvuri Rami Reddy and lawyers like Alladi Krishnaswami Ayyar and the great patriot and social worker Shri Potti Sreeramulu who sacrified his life by taking fast unto death for the formation of Andhra State. A brief account of Shri Potti Sreeramulu is given below:

Shri Potti Sreeramulu (1901–1952) belonged to Vaisya community and his ancestral place is Padamatipalle village in Nellore district. Many of his relations are at Madras. He was born at Madras in 1901 and brought up there for 20 years. He had his early education at Madras and thereafter he proceeded to Bombay to study Sanitary Engineering. After completing the course successfully there he joined in the Great Indian Pensular Railway on a monthly salary of Rs.250. He lost his wife in his twenty fifth year and renounced all worldly enjoyments and decided to devote the rest of his life for the uplift and development of his countrymen. He therefore resigned his job in 1927 and joined the National. Movement led by Mahatma Gandhiji at Sabarmati Ashramam. From there he always advocated and propagated the principles of Mahatma Gandhi and led a very simple life. He was imprisoned thrice in the National Movement and impressed Mahatma Gandhi so much that he once said that if a few persons like Sreeramulu were there he could attain independence in an year. He rendered great service in the village upliftment programme in the Gandhi Ashramam at Komaravolu and in Rajkot and participated in the National Movement in many ways at different parts of the country. He offered Satyagraha in 1938 and 1942 and was sent to jail. From 1944 onwards he made Nellore the centre of his activity for propagating Khadi Development programme. In 1946 for the first time he undertook a fast and got the temple of Sri Venugopalaswamy at Mulapet thrown open for the Harijans. In the same year he undertook fast again for 23 days to get two enactments passed by the Madras Government for the upliftment of Harijans. In 1948 he fasted for the third time at Wardha for 29 days. Whatever movement he started or undertook it was only for the propagation and adoption of the Gandhian principles and not to achieve any personal fame or win laurels. He spent his last days in Nellore rendering yeoman

service in the Harijan upliftment programme. He carried placards containing the Gandhian principles from place to place in the scorching sun with only a khadi dhoti on his body and without either shoes or umbrella and eating food when offered and fasting at other times. Some people even considered him as mad.

In order to attain a separate State for Andhras with equal rights over Madras city he under took a fast for the fourth and the last time at the residence of Sri Bulusu Sambamurthi at Mylapore in Madras on the 19th of October 1952. He continued his fast un-interruptedly for 58 days and died on the 15th December 1952 while so fasting. In the history of the country perhaps Sreeramulu is the only person who had under taken fast unto death and sacrificed his life for a noble cause like the formation of a separate state for Andhras for which the Telugu speaking people were fighting for decades. Immediately on hearing the death of Sri Potti Sreeramulu serious and violent demonstrations began in the Andhra Districts. The Government of India have decided to establish an Andhra State consisting of the Telugu speaking areas of Madras State and the Prime Minister announced the decision in Parliament on 19th December, 1952. In pursuance of it the Andhra State came into being on 1st October, 1953 with Kurnool as capital. But for the sacrifice of Sri Potti Sreeramulu the Andhra State may not have been formed so early and even the further Reorganisation of States in 1956 might have been delayed. His name occupies an unique place in the history of Andhras.

CHAPTER III

POPULATION AND HOUSING

In this Chapter a brief review is made of the demographic, economic and social characteristics of population based on the 1961 Census data. The housing conditions in Nellore district as revealed by the data collected during the Houselisting just prior to the 1961 Census count are also outlined in this chapter. The detailed census tables in the third part of this Handbook give the fuller statistical data. The following statement gives an idea of the relative position of this district in comparison with the other districts of the State in respect of some basic demographic data.

STATEMENT III-1

State/District	Area in sq. miles	Population	Density of population (per sq. mile)	Percentage of growth of population 1951-61	Percentage of urban populatian	Sex Ratio (Females per 1,000 males)

Population

On the 1st of March 1961, the reference data of the 1961 Census, Nellore district recorded a population of 2,033,679 persons consisting of 1,018,457 males and 1,015,222 females. The major part of the population of this district also lives in the rural areas as is the case with all the other districts of the State. 1,810,002 persons or 89% of the population in the district are in the rural areas while 223,677 persons or 11% of the population live in the urban areas. This district comprising 13 taluks has an area of 7,959.8 sq. miles and ranks as the second largest district in the entire State. The urban area of the district is only 44.6 sq. miles and is distributed among the 9 urban units in the district. Nellore City, the district headquarters, is the largest urban unit with a population of 106,776 persons and the only Class I town (City) in this district. There are no Class II towns in this district with population ranging between 50,000 and 99,999. Gudur and Kavali towns have recorded a population lying between 20,000 and 49,999 persons, and are classified as Class III towns. There are three Class IV towns *viz.*, Venkatagiri, Kovur and Kandukur with a population between 10,000 and 19,999. The remaining three towns *i.e.*, Sullurpet, Naidupet and Kanigiri are Class V towns having population between 5,000 and 9,999 persons. There are no Class VI towns with less than 5,000 population. Naidupet is the smallest urban unit, from the point of view of population with only 7,273 persons. The largest town in the district according to area is Kanigiri with 12.82 sq. miles followed by Kovur occupying an area of 8.61 sq. miles. The smallest town, namely, Kavali has an area of 0.65 sq. miles.

Distribution of Villages by population sizes

There are in all 1,742 villages–1,626 inhabited and 116 uninhabited in the district. Kanigiri taluk contains the largest number of villages *i.e.*, 209 while Kavali taluk has the smallest number of 81 villages. 573 villages or 35.24% of the total inhabited villages have a population below 500 each. 407 villages or 25.03% of the total inhabited villages in the district belong to the population size of 500–999 persons. 406 villages or 24.97% fall in the population size of 1,000–1,999 persons. 215 villages or 13.22% of the total inhabited villages have population lying between 2,000 and 4,999 persons. 24 villages or 1.48% of the total inhabited villages have population lying between 5,000 and 9,999 persons. Atmakur, a taluk headquarters, is the only village with a population of over 10,000 persons. In almost all the taluks excepting Kovur, Nellore and Kavali villages belonging to the population size of 500–999 persons are predominant in member.

Houses and Households

The total population of 2,033,679 persons in the district occupied 419,132 residential houses constituting 426,826 households. The household has on an average 4.85 persons in this district. The following statement gives the average size of a household in each taluk.

STATEMENT III-2

Name of Taluk (1)	No. of persons per Household (2)
Nellore Taluk	4.46
Gudur Taluk	4.55
Sullurpet Taluk	4.55
Venkatagiri Taluk	4.94
Rapur Taluk	5.06
Atmakur Taluk	5.04
Udayagiri Taluk	5.04
Kanigiri Taluk	5.04
Podili Taluk	5.17
Darsi Taluk	4.91
Kandukur Taluk	4.96
Kavali Taluk	4.75
Kovur Taluk	4.33

Density of population

The density of population of the district as a whole is 255 persons per sq. mile, the rural and the urban figures being 229 and 5,021 persons per sq. mile respectively. Compared to the 1951 Census count, the density of population in the district has increased from 226 persons per sq. mile in 1951 to 255 persons per sq. mile in 1961. The district is one of the thinly populated districts in the State, more or less on par with the neighbouring districts like Cuddapah (226), Kurnool (207), Anantapur (239). The upland taluks like Darsi, Podili, Kanigiri, Udayagiri, Atmakur, Rapur and Venkatagiri constituting the western portion of the district are very thinly populated. Nellore and Kovur taluks which are benefited by the Pennar delta system are thickly populated in the district. Nellore taluk has recorded a density of 603 persons per sq. mile followed by the taluks of Kovur with 556 persons, Gudur with 305 persons, Kandukur with 298 persons and Kavali 276 persons. Atmakur, Venkatagiri, Darsi, Sullurpet, Podili, Rapur and Kanigiri taluks come next in order with a density ranging between 171 and 228 persons per sq. mile. The density of population is thus uneven in the district. As regards towns, Kavali and Nellore recorded a density of 31,606 and 20,223 persons per sq. mile respectively. Gudur has a density of 17,079 persons per sq. mile. The relatively higher density in this town is largely due to mica processing industries and its importance as a

railway junction and road transport centre. The other towns in the district recorded densities ranging from 743 persons per sq. mile in Kanigiri town to 5,702 persons per sq. mile in Sullurpet town. Too much reliance cannot however, be placed on the urban density figures, because it is not definitely known whether only the area used for habitation purposes is taken into account or even the agricultural lands etc., lying within the limits of the town have been included in the area figures furnished by the respective Municipalities or Panchayats.

Rural and Urban Population

89.0% of the population in Nellore district live in the rural areas and it is not surprising to note that the five barren taluks *viz.*, Rapur, Atmakur, Udayagiri, Podili and Darsi are purely rural in character and do not have any urban units. Among the other taluks excepting Nellore, all have recorded more than 80% of the population in the rural areas. Nellore city, the district headquarters is the largest town in the district with the largest urban population of 35.15% of the taluk population. It is followed by Gudur and Venkatagiri towns which account for 18.15% and 18.10% of the respective taluk populations. Kavali town recorded only 13% of urban population while the remaining towns have recorded less than 9% of urban population.

Sex Ratio

According to the 1961 Census count there are 997 females for every 1,000 males in this district and the sex ratio ranges between 945 in Venkatagiri taluk to 1,084 in Udayagiri taluk. In the rural areas of the district there are 1,002 females for every 1,000 males, while the corresponding figure for urban areas of the district is only 955 females. The sex ratio is more uneven in taluks which have a large proportion of urban population. In Nellore taluk due to the relatives large urban population in Nellore city the sex ratio is 958 only.

The sex ratio in the total, rural and urban areas of each taluk in the district are given below :

STATEMENT III-3

Age Distribution

The following statement indicates the proportion of persons, males and females in different age-groups in Nellore district.

STATEMENT III-4

Age-Groups	Percentage of population (Persons, Males and Females) in different Age-Groups		
	Persons	Males	Females
(1)	(2)	(3)	(4)
0-4	13.58	13.59	13.57
5-9	13.49	13.45	13.52
10-14	11.31	11.56	11.07
15-19	7.97	8.10	7.83
20-24	8.16	7.64	8.69
25-29	7.95	7.45	8.45
30-34	7.24	7.03	7.45
35-39	5.85	5.96	5.75
40-44	6.03	6 28	5.77
45-49	4.28	4.54	4.02
50-54	4.85	5 07	4.63
55-59	2.20	2.35	2.05
60-64	3.40	3.42	3.39
65-69	1.17	1.15	1.18
70+	2.50	2.39	2.62
Age not stated	0.02	0.02	0.01
All ages	100.00	100.00	100.00

Infants and children in the age-group 0–14 years form 38.38% of the total population while old people aged 55 years or more account for 9.27% of the total population. The population in the working age-group of 15–54 years constitutes the majority (52.33%) of the total population. The remaining 0.02% of the population come under the category of Age Not Stated, because these persons could not or did not furnish the age particulars to the Census enumerators.

The proportion of females aged 0–14 and 55 and above are slightly lower than the corresponding proportions among males. In the working age-group of 15-54 years the proportion of females is slightly higher than that of males. The proportion of females in every sub-group from 20–24 to 30–34 is higher than the corresponding proportion of males as also in the age-groups 65–69 and 70+ though the difference in the last two age-groups is quite negligible.

There is no significant development of the urban areas in this district. However the proportion of persons in the working age- group 15–54 years is higher in the urban areas compared to the corresponding proportion of rural areas as will be seen from the following statement.

STATEMENT III-5

Age-Group	Percentage of population in different Age-Groups	
	Rural	Urban
(1)	(2)	(3)
0–14	38.69	35.83
15–54	51.77	56.89
55+	9.52	7.26
Age not stated	0.02	0.02
All ages	100.00	100.00

Marital status

Of the total population of 2,033,679 persons in the district 964,083 persons are never married and 1,069,594 were married including those who are widowed, divorced or separated. The number of widowed, divorced or separated persons is 201,788. Thus 52.59% of the population were married sometime or the other of whom 18.87% are either widowed, divorced or separated.

Child marriages also seem to be prevalent in the district. About 6% of the females in the age-group 10–14 years are married. However, the corresponding proportion in the case of males is much smaller being only 0.3%. Among 1,000 married males there is roughly one person (0.08%) in the age-group of 10–14, while among females 11 out of every 1,000 married females belong to this age-group. It may however, be noted in this connection that children below 9 years were automatically treated as unmarried for Census purposes. In the higher age-groups naturally fewer women remain unmarried.

There is not much variation in the number of persons who are never married between the taluks excepting in the taluks of Udayagiri, Kanigiri, Atmakur, Kovur, Darsi and Nellore. In Kovur, Darsi and Nellore taluks the proportion of never married persons is comparatively lower while in Udayagiri, Atmakur and Kanigiri taluks this proportion is relatively high. It is also observed that there is not much variation of never married persons in the age-group 10-14 among the taluks of the district except in Podili and Darsi taluks where roughly a proportion of 6% was returned as married. Rapur, Atmakur and Kavali taluks recorded low proportion of married persons in the age-group 10–14. In fact taking the entire district not even 4% of the population in the age- group 10–14 is married.

STATEMENT III-6

District/Taluk	Percentage of persons never married to the Total population	Percentage of persons never married in the age-group 10-14 to the Total Population in the age-group 10-14

Kovur taluk	44.87	97.96

Literacy and Education

The percentage of literate population in Nellore district at the 1961 Census count is 21.13% while the State's average is 21.19%. Among cities of the State, Nellore City occupies the second place in literacy with 51.49% of literate population. The district is not so backward in literacy compared to other districts in the State. However, 78.87% of the total population in this district are illiterates. Among females 87.83% are illiterates as against the corresponding figure of 69.94% for males. But the bulk of the literate population do not have any educational attainment. 28.30% of the literates have junior basic or primary qualification while only 6.62% possess educational qualifications of the matriculation or higher level.

The position in the urban areas is better; 57.66% of the males and 34.93% of the females in the urban areas are literates. 38.33% of the literates have Primary or Junior Basic qualification, 11.89% Matriculation or Higher Secondary, 0.11% possess technical diplomas not equal to degress and 0.66% have non-technical diplomas not equal to degrees. Only 1.83% of the urban literates have a university degree or a post-graduate degree other than a technical degree while 0.76% have returned themselves as having a technical degree or diploma equal to a degree or a post-graduate degree; however, most of these technical degree or diploma holders possess only teaching qualification.

In the rural areas out of the total population 1,810,002 persons only 325,618 persons are literates forming only 17.99% of the total rural population. Among these literates nearly 71% do not have even the Primary or Junior Basic qualification. 25.10% of the literates possess Primary or Junior Basic qualification while only 3.86% of the literates are Matriculates or possess higher qualification.

The following statement shows the percentage of literates in different age-groups for persons, males and females in the total, rural and urban areas of Nellore district.

STATEMENT III-7

PERCENTAGE OF LITERATES BY AGE-GROUP

Age-groups	Percentage of literates among								
	Persons			Males			Females		
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	21.13	17.99	46.55	30.06	26.57	57.66	12.17	9.43	34.93
5-9	18.68	16.43	39.07	22.84	20.67	43.32	14.52	12.17	35.10

15-19	33.58	28.41	67.92	44.14	38.68	79.29	22.63	17.84	55.47
20-24	29.42	24.89	59.40	43.54	38.60	74.55	16.96	12.98	44.75
25-29	26.09	22.21	53.93	39.61	35.38	68.84	14.14	10.65	39.94
30-34	24.04	20.23	52.27	36.90	32.46	66.97	11.85	8.90	35.91
35-44	21.83	18.52	47.39	33.45	29.60	60.87	9.43	6.93	30.61
45-59	18.30	15.44	43.28	28.64	25.11	59.95	6.72	4.57	25.16
60+	12.55	10.60	34.48	21.84	19.06	55.25	3.52	2.29	16.55
Age not stated	17.55	15.23	30.43	23.50	20.00	42.86	8.40	7.92	11.11

Note: Persons of Age-group 0-4 are treated as illiterates

It is seen from the above statement that in the higher age-groups from 20-24 onwards the proportion of literates begins to decline both in the case of males and females. This would indicate that children have started attending schools in recent years while those in the higher age-groups did not get themselves educated in their younger age either because there were no educational facilities or out of disinclination to attend schools. It is also observed that the proportion of literates in the age-group 5-9 is higher than the corresponding proportion in the next higher age-group of 10-14 and this may be due to a larger number of children being enrolled in the primary schools. In all the age-groups percentages of literates as regards both males and females in the urban areas is higher than the corresponding percentages in the rural areas, for obvious reasons. The fairly high proportion of literates in the rural areas in the age-groups 20-24, 25-29 and 30-34 may be due partly to the successful implementation of the different adult education programmes in the community development blocks etc.

Workers and Non-Workers

The entire population was divided broadly into two categories *viz.*, Workers and Non-Workers at the 1961 Census. A person who was actually engaged in some productive work or in supervising or directing the operations thereof was treated as a worker irrespective of the fact whether he earned an income thereby or not. The concept of dependency as adopted at the earlier Census was given up at the 1961 Census. In the case of regular employment in any trade, profession, service, business or commerce, a person was treated as a worker if he was employed during any of the fifteen days preceding the day on which he was enumerated. A person who had regular employment but was temporarily absent from work due to illness or other causes was also treated as a Worker. Persons under training as apprentices with or without stipend or wages were regarded as Workers. Undertrial prisoners, temporary inmates of hospitals or other similar institutions were treated as Workers if they were workers before they were admitted to these institutions. In the case of seasonal work like cultivation, livestock, rearing dairying, household industry a person was treated as a worker, if he had some regular work for more than one hour a day throughout the greater part of the working season. Family Workers *i.e.*, those who do not directly receive any income but attend to work along with other members of the family are treated as Workers. All the persons, who

attributed to the Udayagiri wood works and mat works. Udayagiri taluk leads the district in the proportion of male workers in other services also. As there is practically no development of large scale industries in this district except for rice mills, the proportion of workers in Manufacturing other than Household Industry (Category-V) is not significant for both sexes. Household Industry accounts for more than 5% of male workers in all the taluks while in the case of females the proportion varies from 1.6% in Kavali taluk to 6.7% in Udayagiri taluk. The proportions for both the sexes are relatively high in Udayagiri, Kanigiri, Kandukur, Podili and Atmakur taluks. A considerable proportion of workers are also found in Gudur, Nellore, Venkatagiri and Kovur taluks. In Kandukur and Venkatagiri taluks Handloom Industry is important. The sarees woven at Venkatagiri with exquisite zari work are well known and command a good market. Udayagiri on account of the availability of light wood in the forests nearby is noted for the wood work in the entire district. Beedi making and splitting of mica are also prominent Household industries in the district which employ considerable number of female workers. The proportion of female workers is less than the proportion of male workers in all the industrial categories except in Category II—Agricultural Labourers in almost all the taluks. Among agricultural labourers the proportion of female workers is considerably higher in many taluks. This is generally true of all the districts in the State quite obviously because a distinctly large number of female workers participate in agricultural occupations such as sowing, transplanting, weeding and harvesting. Workers in Trade and Commerce constitute 3.1% of the males and 1.4% of the females in the district while workers in Transport and Communications are almost entirely males constituting 1.2% of the male population of the district. In Other Services male workers constitute 5.9% and female workers 2.8% to of the respective populations. In Categories I to IV the proportion of workers in the rural areas is higher than the corresponding urban proportion while in Categories V to IX the urban proportions are higher for obvious reasons.

Apart from the industrial classification discussed above, particulars relating to occupational classification of persons at work other than cultivation were also collected and tabulated at the 1961 Census. The occuptional classfication is quite distinct from the industrial classification. Occupational classification relates to the actual work a person does irrespective of the industry in which he is engaged *e.g.*, a person who is a clerical worker in occupational classification may be connected with industry, trade or service. Conversely in the same industrial category there may be persons following different occupations such as technicians, managerial workers, clerical, workers etc. The occupational particulars are given in Table B-V printed in Part III Statistical Tables in this book. It may, however, be mentioned here that according to this Table there are altogether 1,255 Physicians Surgeons and Dentists in this district including 60 females of whom 134 are Allopathic Physicians, 340 are Ayurvedic Physicians, 38 are Homeopathic Physicians and 684 other Physicians. These 684 other Physicians are mostly unqualified medical practitioners who have returned their occupations as Physicians in the Census enumeration. There are 332 Midwives and Health Visitors in this district. Civil Engineers including Overseers are 196 in number. There are 904 Electricians and related Electronics Workers in the entire district.

The following statement shows the broad age distribution of 1,000 workers of each sex under the different industrial categories in the total, rural and urban areas of Nellore district.

STATEMENT III-10

N: Negligible

It is observed that 47% of the workers are concentrated in the age-group 15–34 years; the figure for the urban areas being slightly higher (50.3%). The proportion of female workers in the age-group is higher than the corresponding proportion of male workers. The higher proportion of female workers is mainly due to preponderance of female workers among the industrial categories I to IV, VI and IX. The age-group 35–39 years accounts for 36.6% of the total workers. Workers in the age-group 0–14 form about 9.4% of the total workers and they are found mostly in Household Industry livestock, forestry and among agricultural labourers. However, the proportion of workers in this age-group is relatively low in the urban areas, the figure being only 4.8%. In the urban areas the age-groups 15–34 and 35–39 years together account for 90.1% of the total workers as against 81.3% in the rural areas. However, there is no significant variation in the proportion of workers in these two agegroups between rural and urban areas in the different industrial categories. On the other hand the proportion of workers aged 60 years or more is higher in the rural areas (7.1%) compared to the urban areas (5.1%) of the district. The rural proportions of workers above 60 years in Categories IV (Household Industry), VII (Trade & Commerce) and IX (Other Services) are considerably higher than the corresponding urban proportion the proportion of cultivators (Category I) in the age group 60+years is higher in the urban areas (13.5%) compared to the rural areas (8.9%), though in terms of absolute numbers the cultivators in rural areas far out number those in the urban areas. Most of such cultivators probably live in the urban areas of the district. Though the concentration of the workers in the age-groups 15–34, 35–39 years in the rural and urban areas is natural, the development of particular industries in the rural or the urban areas generally results in some significant variation in the proportion of workers in different industrial categories in the rural and urban areas. But in Nellore district this feature is not observed because there is no perceptible difference between the rural and the urban economy.

Non-Workers

The total non-working population of Nellore district is 9.65 lakhs of persons consisting of 3.81 lakhs of males and 5.84 lakhs of females. The Non-Workers constitute 47.5% of the total population. 37.4% of the males and 57.6% of the females are non-workers. The proportion

of Non-Workers in the urban areas is naturally higher than in the rural areas. The non-workers constitute 62.2%, 44.9% and 80.4% among total persons, males and females respectively in the urban areas of Nellore district compared to the corresponding figures of 45.7%, 36.4% and 54.8% respectively in the rural areas of the district. The following Statement shows the distribution of 1,000 males add 1,000 females among the non-working population according to the 8 categories of non-workers based on the type of activity.

N : Negligible

The category of dependants, infants and disabled constitute the largest proportion of male and female Non-Workers both in the district as a whole and in the rural areas. In the urban areas male Non-Workers in this category constitute the largest proportion while among females those engaged only in household duties represent the largest proportion of female Non-Workers. Among males the category of fulltime students occupies the second place both in the rural and urban areas. The last two categories which together represent the total unemployed in the district account for only 0.7% of male non-workers. The proportion is 0.5% in the rural areas and 2.5% in the urban areas. Among the female Non-Workers the proportion of unemployed is negligible both in the rural and urban areas mainly because they do not generally seek any work apart from household duties.

Household Schedule

A special feature of the 1961 Census was the introduction of the Household Schedule in addition to the Individual Enumeration slip. This schedule is primarily intended to collect data on cultivation and household industry of the house hold *i. e.*, as one identifiable socio-economic unit, distinct from the individual on which population Census is generally based. It is well known that cultivation or household industry involves more of household effort than individual labour or supervision and therefore the data based on the Household as a unit of measurement are very useful. The Household Economic Tables prepared on the basis of a 20% sample of the Household Schedules are published in a separate volume "Census of India 1961–Volume II Andhra Pradesh – Part III Household Economic Tables." However, one of these- Tables, namely "Sample Households in Cultivation classified by interest in land and size of land cultivated in total, rural and urban areas" of Nellore district is given on the next page because this table contains very useful infortmaion about the size of holding and will also give a rough idea about the extent of tenancy that is still prevalent.

STATEMENT III-12

Migration

Of the 20.34 lakhs persons that constitute the total population of the district, 14.43 lakhs or nearly 70.95% are born in the place of enumeration. 4.87 lakhs persons or about 23.99% of the district's population are born in the district itself but outside the place of enumeration. Only 77, 157 persons or about 3.79% of the total population are born in other districts of the State. Thus about 94.9% of the population represents those born within the district. Persons born in other States of India number only 25,213 persons forming 1.24% of the population of the district. It is significant to note that among those (i) born in the district but outside the place of enumeration (ii) born in other districts of the State and (iii) born in other States of India beyond the State of enumeration, the females outnumber the males, the proportion of females being about 66.71%, 60.43%, 52.20% respectively of the total number in each case. This indicates that a large number of females from outside the place of enumeration, from other districts and other States have moved in through marriage alliances *etc*. Guntur district has contributed the largest number of migrants to this district (30,814 persons), followed by Chittoor district (17,466 persons) and Kurnool district (10,858 persons). The number contributed by other districts is below 3,000 persons each. Among the female migrants also the districts of Guntur, Chittoor, Kurnool and Krishna have contributed a large number. There are 19,922 females born in Guntur district and enumerated in Nellore district as against the corresponding figure of 10,892 males. The number of females who have migrated to Nellore district from Krishna, Chittoor

and Kurnool is 1,667, 10,524 and 6,918 respectively. Of the 13,160 females who have moved into this district from other States of India as many as 11,725 females are from Madras State. This is mostly due to Madras being the border State and the long association Nellore district had with Madras State prior to the formation of Andhra State in 1953. The number of persons born outside India is only 299 forming a very insignificant proportion of the population of the district. Out of these 299 foreigners 211 are born in countries in Asia beyond India (including U.S.S.R.), 15 are born in Europe (excluding U.S.S.R.); 48 are born in Africa; 22 are born in America, and 3 are born in countries in Oceania. Among the 211 foreigners from Asian countries 68 are from Burma, 66 from Nepal, 35 from Malaya and 16 are from Pakistan. Among the 15 persons born in Europe 13 are from Netherlands. The pattern of distribution of persons according to birth place is more or less similar in the case of the rural and urban areas of the district except that those born outside the State of enumeration and other districts of the State constitute a higher proportion of the urban population compared to the corresponding proportion in the rural areas though in terms of absolute numbers such migrants are more numerous in the rural areas.

The following statements shows the number of persons born in other districts of the State and enumerated in Nellore district and those born in Nellore district and enumerated in other districts of the State.

It will be observed from the above two Statements that Nellore district has sent out to other districts of the State more than 1½ times the number of persons (139, 212) it has received from other districts (77,157). The number of emigrants from and immigrants to Guntur, Chittoor and Kurnool districts is considerable which is obviously due to the social and cultural affinity between those districts and Nellore due to their contiguity.

Religion

Hindus constitute 87.4% of the total population of the district—88.4% in the rural areas and 79.3% in the urban areas. The next numerous religious group is represented by Muslims who form 7.6% of the total population of the district—6.6% in the rural areas and 15.3% in the urban areas. Christians who come next in order account for 5% of the total population and also of the rural population and 5.3% of the urban population. Muslims are relatively more numerous in Kovur, Nellore and Atmakur while the Christians are found in significant numbers in Kanigiri, Darsi and Podili taluks. Followers of other religions in the district comprise 186 Jains, 14 Sikhs and 2 Buddhists.

Mother Tongue

Telugu is the predominant language of the district. 90.5% of the total population have recorded their mother tongue as Telugu. Next in order come Urdu and Tamil with a proportion of 6.8% and 2.0% respectively. All other languages constitute only a negligible proportion each.

Scheduled Castes and Scheduled Tribes

Scheduled Castes: The total Scheduled Castes population is 335,326 persons representing 16.49% of the total population of the district. This proportion is higher in the rural areas (17.58%) compared to

only (7.67%) in the urban areas of the district. Among the taluks the proportion of Scheduled Castes varies from 4.25% in Darsi taluk to 26.38% in Sullurpet taluk. Among the Scheduled Castes, Mala with a population of 167,187 is the dominant caste accounting for about 49.84% of the total Scheduled Castes population of the district. Madiga caste comes next in order with a population of 67,419 persons constituting about 20.1% of the total Scheduled Caste population of the district. Only four other castes, *viz.*, Adi Andhra, Arundhathiya, Mala Dasu and Adi Dravida have a population of more than 1,000 persons each. The percentage of literacy among the males of the Scheduled Castes in Nellore district is 16% while the corresponding figure among females is only 4%. As regards working population in the Scheduled Castes a greater part of the workers is found among Cultivation and Agricultural Labour.

Scheduled Tribes: The Scheduled Tribes population in the district is 131,509 persons forming 6.47% of the population of the district. In the urban areas they constitute 7.13% and in the rural areas the percentage is 6.38% The majority of the Scheduled Tribes are found in the rural areas. In the rural areas of Kovur taluk the Scheduled Tribes population accounts for 12.96% of the total population. In rural areas of Gudur and Rapur taluks they form 13.29% and 10.49% of the respective total populations. A majority of the Scheduled Tribes population is dominated by Yenadis and they are followed by the Yerukulas. Apart from Yenadis and Yerukulas there are a few persons of the Chenchu, Koya, Sugali and other tribes distributed in small number throughout the district. The percentage of literacy both among males and females of the Scheduled Tribes is very low being only 12% and 4% respectively. As in the case of the Scheduled Castes a very large proportion of workers among the Scheduled Tribes are engaged as Agricultural Labourers and Cultivators.

Further details about Scheduled Castes and Scheduled Tribes in the district are given in the Special Tables *viz.*, Series in Part III SCT Statistical Tables of this book and may be referred to.

Variation in Population during 1901–61

The following statement shows the absolute change and percentage variation from decade to decade in the population of each taluk in Nellore district during 1901–61.

STATEMENT III-15

VARIATION IN POPULATION DURING SIXTY YEARS [1901—1961]

NELLORE DISTRICT	1901	1,280,841	..	..	644,380	636,461
	1911	1,334,203	+53,362	+4.17	668,325	665,878
	1921	1,392,151	+57,948	+4.34	700,745	691,406
	1931	1,492,523	+100,372	+7.21	747,508	745,015
	1941	1,624,857	+132,334	+8.87	816,231	808,626
	1951	1,794,552	+169,695	+10.44	902,231	892,321
	1961	2,033,679	+239,127	+13.33	1,018,457	1,015,222

The district as a whole has recorded a population growth rate of only 13.3% which is lower than the State average of 15.65%; only six districts in the State *viz.*, Srikakulam, Visakhapatnam, East Godavari, Mahbubnagar, Hyderabad and Medak have recorded a lower growth rate during 1951–61. It is seen that only five taluks in the district *viz.*, Nellore, Gudur, Sullurpet, Rapur and Kandukur taluks have recorded population growth rate higher than that of the State average of 15.65% during the decade 1951–61; the highest rate of growth of 25.63% in the district is observed in Gudur taluk and it may be due to the industrial and commercial importance the town Gudur is gaining and also the expansion of the mica industry in the taluk. Generally the increase of population in the taluks mentioned above has been higher in the decade 1951–61 than in any of the previous decades perhaps due to the abolition of the Zamindaris under the Estates Abolition Act and the greater security afforded to the ryots on the land by the Government management of Estates since about 1952.

The belt of western taluks *viz.*, Darsi, Podili Kanigiri, Udayagiri and Atmakur have shown very poor growth rates in the decade 1951–61 as also in some of the previous decades. They have also shown a very low density of population which confirms that there are the most backward taluks in the district. Lack of irrigation facilities, poor soils, inadequate communication facilities, unsatisfactory health conditions seem to be responsible for the backwardness of this tract and the difficult living conditions prevailing in these taluks naturally compel the local labour to move out to places where the conditions are better. The northern taluks of this belt are likely to be benefited to some extent when the Right Canal of the Nagarjunasagar Project is fully executed but the southern taluks do not get any relief from this Project. Venkatagiri, Atmakur, Kavali and Kovur taluks have recorded a growth rate of more than 10% but below the State average of 15.65%. Among these taluks Kavali and Kovur are relatively more fortunately placed in respect of irrigation and communication facilities. Thus the backward belt of the westren taluks mentioned above and Venkatagiri taluk which has considerable area under scrub jungle apart from poor rocky soils deserve special attention in the matter of development activities.

Housing

During the 1961 Census an attempt was made for the first time in the history of Indian Census to collect Housing statistics, the lack of which has been keenly felt, on an uniform basis throughout the country.

Not only residential houses but also houses used for non-residential purposes such as workshops, schools, hospitals, restaurants were covered under the scheme providing a complete inventory of all types of houses. Data on the different uses to which occupied houses were put to, tenure status, wall and roof material, number of rooms and average daily employment along with the particulars of products made or services rendered in the case of workshops were collected. These data are analysed and discussed in detail in the volume entitled "Census of India 1961, Volume II – Andhra Pradesh Part IV A – Report on Housing and Establishments". Some of the importants features are briefly discussed here.

There are 501,183 Census houses in Nellore district of which 440,559 Census houses are in the rural areas. Not all these houses are occupied; 26,446 houses in the district (22,174 in the rural areas and 4,272 in the urban areas) were reported as vacant at the time of Houselisting. Thus 94.7% of the houses were occupied. The proportion of vacant houses in Atmakur, Udayagiri, Darsi and Kandukur taluk is above 6% and is more than the district average of 5.3%.

Dwellings: Houses used wholly or partly for dwelling purposes constitute 82% of the total number of houses in the district. Houses used purely for dwelling purposes account for 80.6% of the total houses while shop-*cum*-dwellings and workshop-*cum*-dwellings form only 1.4% of the total houses. Shop-*cum*-dwellings and workshop-*cum*-dwellings are naturally more common in the rural areas because petty traders and artisans and craftsmen engaged in traditional household industries like weaving, carpentry, pottery, goldsmithy and cobbling cannot afford to maintain separate and distinct establishments for trade or industry, away from the dwelling houses, nor do the scale and size of the trade or industry warrant such maintenance. The proportion of shop-*cum*-dwellings varies from 0.2% in Gudur, Sullurpet, Udayagiri, Kanigiri, Darsi, and Kavali taluks to 0.6% in Nellore taluk, the variation between taluks being negligible. However, in the case of workshop-*cum*-dwellings the varition between taluks is more pronounced; the proportion of workshop-*cum*-dwellings ranges from less than one percent in Udayagiri, Darsi, Kandukur and Kavali taluks to 4.6% in Venkatagiri taluk. The high proportion in Venkatagiri taluk may be due to the existence of the large number of handloom weaving establishments in Venkatagiri town.

Hotels, Sarais, Dharmasalas etc: Houses belonging to this category are very few in number in the district and account for 0.1% of the total number of houses. Their proportion is naturally higher in the urban areas of the district. In Podili and Sullurpet taluks they account for 0.2% of the total number of houses.

Shops excluding Eating Houses: This category constitutes only 1.2% of the total number of houses in the district. However, Nellore taluk and Nellore City have recorded relatively high proportions in this category *viz.*, 2.6% and 6.3% respectively. Excepting Atmakur, Udayagiri, Darsi and Kovur taluks, all the remaining taluks in the district have recorded more than 1% but below 1.5%.

Business Houses and Offices: The proportion of houses belong to this category is uniformly low in all the taluks—only 0.3% of the houses in the district are being used for business houses and offices. However 0.8% of the houses in Nellore City belong to this category because it is the district headquarters and has naturally a number of Government offices and other business offices. Gudur taluk has also recorded 0.5% of the houses in this category on account of business houses related to mica processing industries in Gudur town and adjoining places besides Gudur town being a Railway junction.

Factories, Workshops and Worksheds: The proportion of houses used as factories or workshops or worksheds is only 0.5% of the total number of houses, the actual number being 2,302. In the rural areas there are 1,385 houses of this category as against 917 in the urban areas of the entire district.

Schools and other Educational Institutions: The proportion of houses belonging to this category is 0.4% of the total number of houses in the district and their proportion varies from 0.3% in Nellore and Kovur taluks to 0.6% in Kanigiri and Podili taluks. Gudur, Sullurpet, Venkatagiri, Kandukur and Kavali taluks have recorded 0.4% and the remaining four taluks *i.e.*, Rapur, Atmakur, Udayagiri and Darsi have recorded 0.5%.

Restaurants, Sweetmeat Shops and Eating Places: The proportion of this category of houses is low in this district accounting for 0.1% only of the total houses. The number of such houses is generally more in the urban areas than in the rural areas. In Nellore City for obvious reasons the proportion is 0.5%. Atmakur, Udayagiri and Kavali taluks have recorded negligible percentages of such houses. The

proportion of this type of houses varies from 0.1% in Gudur, Venkatagiri, Kanigiri, Podili, Darsi, Kandukur and Kovur taluks to 0.2% in Sullurpet, Rapur and Nellore taluks.

Places of Entertainment and Community Gatherings: This category of houses represents 1.2% of the total number of houses in the district. Excepting for Kavali and Kovur taluks all the other taluks have recorded percentages ranging from 1% to 2%. Kavali and Kovur taluks have recorded both 0.9% only while Nellore City has recorded a still lower proportion of 0.8%.

Public Health and Medical Institutions, Hospitals etc.: This type of houses accounts for only 0.1% of the total number of houses in the district and in Nellore City only they form 0.3% of the total number of houses. Udayagiri, Kanigiri, Podili and Darsi taluks have recorded negligible percentages while the remaining taluks except Nellore have recorded 0.1%.

Others: Houses falling under this category are cattle sheds, cattle pounds, godowns, garages *etc.*, which are not included in any of the above categories. The proportion of houses under this category is 8.8%. The proportion of these types of houses is higher in rural areas than in urban areas in view of the large number of cattle sheds that are common in villages. Among the taluks the proportion of this type of houses is more than 10% in Venkatagiri, Atmakur, Udayagiri, Kanigiri, Podili and Darsi taluks. In other taluks the proportion is less than 10%.

Wall and Roof Material of Houses

Wall Material: The distribution of 1,000 households living in Census houses used wholly or partly as dwellings according to predominant wall material in the rural and urban areas of the district is given below:

STATEMENT III—16

	Number of Houses using wall material					
	All materials	Mud	Stone	Grass, leaves, bamboos etc.	Bricks	All other material
	(1)	(2)	(3)	(4)	(5)	(6)
Rural	1,000	655	274	18	52	1
Urban	1,000	523	134	2	341	N

N: Negligible

The main wall materials used in this district are mud, stone and bricks. Mud is used as wall material for a very large number of houses both in rural and urban areas of the district. Only a few houses have walls made of laterite stone in the district. Bricks are used as wall material largely in urban areas only. Grass, leaves *etc.*, are used as wall material by a small section and that too in the rural areas.

The majority of the houses have mud walls (65.5% and 52.3% respectively) in the rural and urban areas. In large portions of this district including the outskirts of Nellore City, the district headquarters, one comes across the miserable looking low huts mainly inhabited by the non-working class people and the Yanadis. These inhabitations can hardly be called as huts. They are just small low conical sheds hardly 6' or 8' *in diameter, made* up of palmyra leaves with a small entrance which a person cannot enter without kneeling down. These sheds have practically no walls.

The next important material used for walls in the urban areas of the district is bricks. Houses with such wall material account for 34.1% in the urban areas as against 5.2% in the rural areas. In the urban areas of Nellore, Gudur, Sullurpet, Venkatagiri, Kandukur and Kovur the proportion of houses with brick walls is high. In the rural areas of Kandukur, Kovur, Atmakur and Nellore taluks also such types exist but their proportion is comparatively low.

Houses with stone walls in the rural areas of the district account for 27.4% of the total number of houses as against 13.4% in the urban areas. Such houses are found mostly in rural areas of Rapur, Atmakur, Udayagiri, Kanigiri and Podili taluks and in the urban areas of Kavali and Kovur and Nellore taluks. Walls with grass, leaves, reads or bamboo are found in the rural areas of Nellore, Gudur, Sullurpet, Rapur, Kandukur and Kovur taluks and their proportion is higher in the rural areas than in the urban areas. In other taluks they are insignificant in number.

Roof material: The distribution of 1,000 households living in Census houses used wholly or partly as dwellings according to the predominant roof material in the rural and urban areas of district is given below:

STATEMENT III—17

	Number of Houses using roof material						
	All materials	Grass, leaves, thatch etc.	Tiles	Brick & lime	Concrete and stone slabs	C.I., Zinc or other metal sheets	Other material
	(1)	(2)	(3)	(4)	(5)	(6)	(7)
Rural	1,000	879	56	33	9	2	21
Urban	1,000	523	195	151	7	15	8

The materials predominantly used for roofing in this district both in the rural and urban areas, are grass, leaves, reeds, thatch, wood or bamboos tiles and brick and lime. Thatch, grass *etc.*, are largely used both in rural and urban areas. Such houses constitute 87.9% in the rural areas and 62.3% in the urban areas. The proportion of these houses in the rural areas varies from 69.8% in Darsi taluk to 96.3% in Venkatagiri taluk and 96.5% in Sullurpet taluk. In urban areas this type of roof material is very largely used in Kovur, Gudur, Sullurpet, Kanigiri and Kavali taluks where they account for more than 60% of the total number of houses in the respective urban areas.

Houses with roofs made of brick and lime are found largely in the urban areas of the district. The proportion of such houses is 15.1% in the urban areas and is less than the proportion of houses having tile roofing which account for 19.5%. Among the taluks brick and lime are used for roofing material largely in the urban areas of Nellore, Gudur, Sullurpet and Kanigiri taluks. Their percentages are 22.2%, 15.8%, 14.6% and 10.9% respectively. Houses with tile or slate roofing recorded the highest percentage (52%) in the urban areas of Venkatagiri taluk followed by the taluks of Kandukur 34.7%, Kavali 24.8% and Nellore 19.6%. Even in the rural areas of the district the proportion of houses with tiled roof is 5.6% and is greater than that of houses having brick and lime for roofing. The proportion of houses using other types of roofing material is only small.

Distribution of Households according to the number of rooms occupied

The following statement shows the distribution of 1,000 Households according to the number of rooms occupied in each taluk of Nellore district.

STATEMENT III-18

District Taluk	Number of Households occupying				
	1 Room	2 Rooms	3 Rooms	4 Rooms	5 Rooms & more
(1)	(2)	(3)	(4)	(5)	(6)
Nellore District	706	190	61	22	21
Nellore taluk	732	138	65	28	37
Gudur taluk	788	135	42	17	18
Sullurpet taluk	819	125	39	11	6
Venkatagiri taluk	655	231	74	26	14
Rapur taluk	641	250	78	19	12
Atmakur taluk	641	251	72	25	11
Udayagiri taluk	676	250	54	12	8
Kanigiri taluk	687	234	53	15	11
Podili taluk	775	178	38	6	3
Darsi taluk	639	253	50	32	26
Kandukur taluk	595	235	92	35	43
Kavali taluk	703	185	65	20	27
Kovur taluk	794	120	52	18	16

It is seen that in all taluks more than 59% of the Households occupy only one room. The proportion varies from 59.5% in Kandukur to as high as a figure as 81.9% in Sullurpet taluk. The proportion of households occupying two rooms ranges from 12.0% in Kovur taluk to 25.3% in Darsi taluk. The proportion in Venkatagiri, Rapur, Atmakur, Udayagiri, Kanigiri and Kandukur taluks ranges between 20% and 25%. Households occupying three rooms are largely found in Kandukur taluk (9.2%), followed by Rapur (7.8%), Venkatagiri (7.4%), Atmakur (7.2%) and Kavali and Nellore (6.5%) each. The remaining taluks with the exception of Gudur, Sullurpet, and Podili have recorded less than 5% of such households. The proportion of households occupying 4 rooms in the district as a whole is only 2.2% as compared to 2.1% of the Households occupying 5 rooms and more than five rooms. These two types of Households are found largely in Kandukur constituting 3.5% and 4.3% of the total number of households respectively. In Nellore taluk the proportions of these two types are 2.8% and 3.7% respectively.

The number of persons per room in households occupying 1 room, 2 rooms, 3 rooms, 4 rooms and 5 rooms or more respectively in total, rural and urban areas of Nellore district is given in the following statement:

STATEMENT III-19

District		Total	Households occupying				
			1 Room	2 Rooms	3 Rooms	4 Rooms	5 Rooms & more
		No. of persons per room	No. of persons per room	No. of persons per room	No. of persons per room	No. of persons per room	No. of persons per room
(1)		(2)	(3)	(4)	(5)	(6)	(7)
Nellore	T	3.20	4.39	2.69	1.99	1.64	1.11
	R	3.31	4.43	2.72	2.04	1.73	1.13
	U	2.48	3.99	2.40	1.72	1.38	1.06

Considering more than two persons per room as representing overcrowding it will be observed that in households occupying 4 rooms or more both in the rural and urban areas of the district, the housing conditions seem to be satisfactory while there is overcrowding in all other categories of households both in rural and urban areas and particularly in the case of households occupying two rooms or less.

CHAPTER IV

AGRICULTURE

Evolution of the Agriculture Department and present set up in the district

A practical interest in Agriculture was awakened in the composite Madras Province as early as 1863 A. D. by the representation to his Council of note by the Governor. In it the then Governor drew the attention to the continuous cropping, the deficiency of cattle manure and its consumption as fuel, the defective implements, lack of trees and the want of accurate knowledge and statistics. Then an order was placed in England for a steam plough, steam harrows, cultivators, seed drills, threshing machines, water lifts and chaff cutters. About 350 acres of land at Saidapet near Madras was acquired and entrusted in 1864 to a Committee which undertook to conduct full trial and exhibition of implements received from London, artificial manures, improved and unimproved systems of agriculture. The above Committee had done some work upto 1871 A. D. and it had failed due to lack of intimate knowledge of local conditions and of trained staff to conduct experimental and propaganda work.

The Government took over the Farm and the next decade was occupied in discussions of the policy ahead and in preparing a scheme of Agricultural education. An Agriculture College was established at Saidapet in 1876 and later transferred to Coimbatore in 1906. In 1905 the Agricultural Department was organised as an independent unit under the control of a Director of Agriculture with necessary subordinate staff. Before that, the Agriculture Department was a part of the Board of Revenue. The propaganda and publicity work was in charge of the District Agricultural Officer with his headquarters stationed at Nellore. Under him an Agricultural Assistant was in charge of a taluk. After the constitution of the Panchayati Raj *i. e.*, Zilla Parishads and Panchayat Samithis, Agricultural Extension Officers are appointed one in each of the Panchayat Samithis. Under each Agricultural Extension Officer or Agricultural Assistant as the case may be, there are Fieldmen and Demonstration Maistries in charge of smaller jurisdictions. The controlling officer for the District Agricultural Officer is the Deputy Director of Agriculture, who is in charge of a Division. The Deputy Director of Agriculture is also stationed at Nellore and he is in charge of Guntur, Nellore and Chittoor districts.

The District Agricultural Officer in charge of the District is to guide and supervise the departmental activities in the district. The District Agricultural Officer is given the assistance of a Personal Assistant who is a fairly senior technically qualified person to attend to office correspondence and to draft technical reports so as to enable the District Agricultural Officer to tour his jurisdiction.

In view of the increased work under various Plan schemes there are at present two District Agricultural Officers in charge of this district assisted by 5 Agricultural Assistants, and 28 Agricultural Extension Officers. As and when a taluk is covered entirely by two or more Samithis, the post of Agricultural Assistant is being merged with that of Agricultural Extension Officer and all functions, staff and institutions under the administrative control of the Agriculture Department are being transferred to the Panchayat Samithis. In each Block in addition to 10 Village Level Workers there are 4 or 5 departmental staff like Fieldmen and Demonstration Maistries. The District Agricultural Officer is also assisted at the district level by 4 Technical Assistants in various branches. One of these four is a senior man designated as Personal Assistant, two are Plant Protection Assistants stationed at Nellore and Kavali and the fourth is a Seed Development Assistant. The Plant Protection Assistant, attends to plant protection work *i. e.*, control of pests and diseases, advising the farmers on plant protection measures, supply of plant protection equipment and their upkeep, stocking and supply of pesticides at various centres and organising pest control campaigns *etc.* The Seed Development Assistant will attend to the multiplication and distribution of improved seeds, maintenance of State Seed Farms *etc.* There is another Assistant called Oilseeds Extension Assistant who attends to the multiplication and distribution of improved oilseeds in the district. These technical assistants in addition to their duties visit the various Blocks and give technical advice to the cultivators. The Agricultural machinery is under the control of

the Assistant Agricultural Engineer who is also in charge of the schemes relating to the erection of filter point tube wells. The Divisional Engineer, Soil Conservation, Chittoor attends to the contour bunding work and demonstrations for prevention of soil erosions.

Nellore district like other districts in the State is prominantly agricultural. The great majority of the population in the district is therefore, engaged in agriculture and its allied pursuits. Pady, jonna, sajja, ragi, korra, varagu, redgram and horsegram are the chief food crops raised in the district. Among non-food crops chillies, castor, groundnut are important while cotton and of bacco are raised in small extents.

The following statement shows the land utilisation pattern in the district during the decade 1951-52 to 1960-61.

STATEMENT IV-1

LAND UTILISATION PATTERN

(Area in acres)

Category (1)	1951-52 (2)	1952-53 (3)	1953-54 (4)	1954-55 (5)	1955-56 (6)
Forests	473,222	407,536	407,536	407,536	407,536
Land put to Non-agricultural uses	201,932	345,187	346,372	346,367	346,367
Barren and uncultivable land	1,750,640	1,726,808	1,726,007	1,726,007	1,726,007
Cultivable waste	11,207	417,335	243,927	243,239	218,136
Fallows other than current	1,193,544	491,605	127,148	101,876	89,764
Permanent pastures and other grazing land	9,614	9,614	377,306	377,306	377,306
Miscellaneous tree crops and groves not included under net area sown	37,177	80,285	82,475	49,786	49,783
Net area sown	1,383,110	1,274,719	1,463,865	1,541,030	1,606,863
Current fallows	26,754	334,111	312,564	294,053	272,436
Total Geographical Area	5,087,200	5,087,200	5,087,200	5,087,200	5,094,198

STATEMENT IV-1—*Concld.*

Category (1)	1956-57 (7)	1957-58 (8)	1958-59 (9)	1959-60 (10)	1960-61 (11)
Forests	459,589	459,589	544,865	544,865	543,477
Land put to non-agricultural uses	572,490	603,189	602,001	602,001	602,001
Barren and uncultivable land	897,788	867,788	842,371	842,371	842,371
Cultivable waste	394,636	423,657	544,620	537,521	507,583
Fallows other than current	121,890	184,401	181,060	191,183	157,078
Permanent pastures and other grazing land	456,185	456,437	441,145	444,147	464,030
Miscellaneous tree crops and groves not included under net area sown	49,786	75,918	57,252	57,252	57,252
Net area sown	1,576,669	1,492,386	1,545,234	1,520,061	1,569,279
Current fallows	342,954	308,622	324,698	343,845	340,175
Total Geographical Area	4,871,987	4,871,987	5,083,246	5,083,246	5,083,246

It may be seen from the above statement that during 1960-61 forests occupied 10.7% of the total area of the district. Barren and uncultivable land accounted for 16.6% while land put to non-agricultural purposes like buildings, roads, railways, rivers *etc.*, accounted for 11.8%. Cultivable waste land was 10% of the total area. Permanent pastures and land under tree crops *etc.*, accounted for 9.1% and 1.1% respectively. The fallow land accounted for 9.8% of which current fallows were 6.7% and other fallows were 3.1.%. The total cropped area was 33.7%.

The normal annual rainfall of this district is 36.1 inches distributed seasonwise as shown below :

STATEMENT IV-2

Month (1)	Period (2)	Rainfall (in inches) (3)
June-September	North-West monsoon	11.3
October-December	North-East monsoon	21.4
January and February	Winter period	1.4
March-May	Hot weather	2.0
	Total	36.1

The district receives two-thirds of the total rainfall during the North-East monsoon period between October and December.

The South-West Monsoon generally sets in the middle of June and is precarious, but brings some rain to the entire district upto the end of September. The North-East monsoon sets in October and prevails upto December. The scanty rainfall during the South-West monsoon period between June and September is generally available only to the taluks of Darsi, Podili, Kanigiri, Kandukur and Udayagiri. The heavy rainfall under North-East monsoon is mostly confined to the taluks of Kavali, Atmakur, Nellore, Gudur, Sullurpet, Rapur and Venkatagiri. These taluks receive only very little rainfall during the South-West monsoon. The North-East monsoon is some times heavier in the extreme south adjoining Chingleput district of the Madras State. Thus Nellore district can roughly be divided into two distinct zones according to the taluks receiving more rainfall during the South-West or North-East monsoons as the case may be and there are two harvests in a year. A major portion of the uplands *i. e.*, Kandukur, Kanigiri, Podili, Darsi and Udayagiri lying north of Pennar gets inadequate rainfall depending chiefly on the South-West monsoon, while the southern part of the district receives fairly good rainfall from the North-East monsoon.

Crops

The early crops (termed locally as '*punasa*' or '*muduru*' in Telugu) are sown during the South-West monsoon period and the late crops called *pairu* are cultivated during the North-East monsoon period. The '*muduru*' crops are greater in variety while the *pairu* crops occupy a greater area. The seasons of important cultivating operations for the several wet and dry crops are as fallows : '*Molagolukulu*' and other varieties of paddy, which take five to six months to grow are sown between the middle of July or in August and sometimes in September, the reaping being finished by February at the latest. This is the early or '*Muduru*, cultivation. If rains are late for the above crops' an intermediate crop of '*Iswarakora*' paddy is raised in October-November. Paddy in the *Pairu* season consists chiefly of '*Kesari*' a three months crop, and its cultivation starts between December and January, the harvesting being over by April. A second crop of paddy is raised when water is available after the harvest of *Molagolukulu*. For dry crops, under *muduru* cultivation, land is ploughed chiefly in June or July and the sowing season is in July or August and under *Pairu* the ploughing is done in September or October and is followed by sowing for garden crops. Sajja (cumbu) is sown in June-July, chillies in October-November. Ragi and tobacco are sown in November-December.

Types of soils

The soil of the district is made up of four varieties, namly the black clay, red loam, mixed soil and the arenaceous or sandy soil. Black clay is confined to the northern portions of Kandukur taluk, while red loam occurs in almost all the remaining taluks of the district. The arenaceous or the sandy soil occurs throughout the narrow coastal strip and alluvium is met with in the river valleys especially in the Pennar.

The general aspect of the entire coast is sandy with an extreme inland extension all along varying between three to four miles. It fringes with large tracts of scrub jungle interspersed with cocoanut palm, palmyra and casuarina plantations besides the island portion called the Sriharikota, at the tail end of the South-East corner of the district. It forms a low ridge of sand containing the jungle growth anp casuarina plantations. On account of the sand and saline nature of the soil, the coastal villages are practically unfit for cultivation.

The eastern half of the district lying near the sea tract, adjoining the narrow coastal strip, is fairly fertile and it is here the plains portion of the district with considerable wet cultivation is seen, covering the coastal taluks of Kandukur, Kavali, Kovur, Nellore, Gudur and Sullurpet, and of these the largest paddy cultivated area exists in Nellore and Kovur taluks, the land being composed of loam and clay of fair quality, where the laterite formation is not found, indeed forming a strong agricultural base.

The upland type of land, that is the stony plains and the rocky hills, exists in the taluks of Darsi, Podili, Kanigiri, Udayagiri, Atmakur, Rapur and Venkatagiri. Adjoining the coastal taluks or the plains portion. Among these taluks the soils are poor in fertility. Therefore, this tract largely depends for cultivation on precarious minor irrigation sources, wherein mostly dry crops are raised and agriculture is not as rewarding as in the plains portion of the district.

Cultivation methods

Cultivation in this district, as elsewhere, may be classified under the following three main heads, viz. wet, dry and garden. Wet cultivation either river-fed or canal-fed, is carried on by two distinct methods termed *veligada* and *kudapa* or the dry ploughing and wet ploughing systems respectively. The former is adopted to light soils only where land is ploughed when dry and the seed is sown. In the latter system land is ploughed while under water. The quality of the irrigation supply and the nature of the soil determine, therefore, the mode of cultivation. Heavy *regada* soils, for example, cannot advantageously be cultivated under the *veligada* system. As far as practicable *kudapa* is preferably adopted, but *Veligada* prevails in the easternmost taluks on the seaboard, and further when the monsoon is in deficit. The raising of paddy seed beds and the transplantation of paddy under Pennar is done only after the receipt of freshes in river Pennar, from July to September. In a greater part of the wet lands in the non-deltaic area, Iswara paddy is sown in October to November. Paddy is the most important wet crop in the district.

A number of varieties of paddy are cultivated in the district. The name Nellore is attributed to the abundance of the rice (Nellu) that is grown in it. The chief varieties are Molagolukulu, Pedda Sannavari, Vada Sannavari, Tiruvarangavari, Mosanum, Kalinga Sambavari, Iswara Kora, Pedda Kesari, Potti Kesari and Potti Nallavari. Of these the first, second and fourth take six months to continue to mature; the third, fifth and seventh, five months; the sixth and eighth four months; and the last two, two to three months. When water is abundant two crops are grown. Among the varieties of paddy grown now Molagolukulu, which was introduced for the first time in the district about 1890 is the main variety and has almost completely replaced Sannavari. It is a heavy yielder, the rice is white and fetches a better price in the market. The variety grown for the second crop is generally Kesari, sown broadcast in January or February but Sannavari and Potti Vallavari are still preferred in some parts.

The Research Farm located in Buchireddipalem aims at evolving suitable strains from Molagolukulu paddy which can resist and withstand blast disease. The important strains BCP I and BCP II released from the station have become popular and well established in the district covering an area of nearly two lakhs of acres. GEB 24 is another strain, which has become popular in some places. Other varieties like MTU 15 and 9, ADT 3 and SR 26 B, are under distribution. Besides these, strains like TMV 2 and TMV 3, groundnuts, GI chillies and AKP ragi strains are under distribution but they occupy a very small area.

Dry cultivation is carried in both the seasons *i.e.*, *punasa* and *pairu*. Nearly two-thirds of the cultivated area in the district is under dry cultivation. The common dry crops are cholam (jonna) cumbu (sajja), variga, arika, ragi, horsegram, castor, gingelly, cotton, groundnut and chillies. The best land is generally reserved for the cultivation of cereals, while less fertile soils are used for raising pulses. Cholam is grown to a large extent in all taluks except in the delta taluks of Nellore, Kovur and Gudur. In the essentially dry taluks like Udayagiri, Kandukur and Kanigiri, arika is grown extensively while in the two latter taluks cumbu, ragi and horsegram are also largely grown. Ragi predominates in Atmakur and horsegram is a popular crop in Kavali. Chillies are grown on a commercial scale in Gudur taluk. In the low lying lands on the east, paddy is cultivated on the dry or Veligada system being generally broadcast. In the sandy and light red soils groundnut has recently become favourite crop. The distinction between dry, garden and wet crops is not, however, immutable. Crops which depend on natural rainfall are generally spoken of as dry crops and include the millets, the grams, the oilseeds and cotton. They are frequently raised as mixed crops. Wet crops are those which require continuous irrigation, and paddy is the chief irrigated crop. When natural rainfall can be supplemented with lift or artificial irrigation garden crops are raised. Garden crops are mainly plantains, betel-vines, cocoanuts, limes and other local fruits and vegetables.

The practice of sowing mixed dry crops in unirrigated lands is common in the district. Such a system allows for some rotation of crops. It is more

marked in the case of soils containing *regar* clay. For example, blackgram or greengram is often sown mixed with cholam, and cotton is usually mixed with arika or korra; cotton, castor, hemp and redgram are generally sown in rows at regulated distances from one another with cholam. In *regada* soil 'late' cholam is grown year after year, now and then alternated with gingelly, arika or cotton. Red soils, however, do not stand similar cultivation unless well manured and poorer red soils are generally cropped with arika, gingelly or horsegram for a few years and then relinquished when the soil is exhausted. In the district two systems of mixed cultivations are in vogue. In one the seeds are mixed and sown broadcast and in the other one seeds are drilled or dibbled in parallel rows or furrows, the intervening space being occupied by one or other of the staple food grains. By sowing a short crop and a long crop together, labour and space are economised. The short crop matures in three or four months, without being hampered by the slower growing long crop; and after the short crop is reaped the longer crop has time and room to mature. In some of the rich lands with *regada* soil in good seasons, there is often a regular riot of contending crops. Such combinations are cholam, horsegram and arika, besides cotton and castor in Nellore, Gudur, Rapur, Atmakur and Udayagiri taluks. In Kandukur and Kanigiri taluks mixed cropping is popular in variety.

As in other districts rotation of crops is common in this district also. The rotation of crops is no doubt a kind of insurance against the vicissitudes of the season. Paddy is grown year after year on the same land. In regard to other crops, wet or dry, some rotation is observed, which differs widely in different places. Where cholam is largely cultivated every year rotation is not practicable. Under regada soils, *pairu* jonna (*i. e.*, the cholam grown after the North-East monsoon rains) is repeated year after year for considerable periods or alternated with castor or arika. The red soils will not similarly stand, being continuously cropped with jonna, unless they are well manured and the crop grown in such lands is therfore, generally changed each year. In the poorer red soils jonna is seldom sown, the land being put under arika, castor or horsegram for a few years and then allowed to be fallow. In Kandukur and Kanigiri taluks, with the variation of seasons, a complete system of rotation is recognised, and more or less universally practised. The chief rotation is between variga and jonna, which command the largest area. The continuous ploughing required by the castor crop admits of an early crop being put on the land the following year and this is therefore, succeeded by either jonna, sajja, korra or ragi and also for the same reason castor can be sown after any other crop, the whole of the early crops following variga. The ordinary rotation observed permits of each field being under variga every second or third year. Dry paddy is now and then rotated with variga but more often with coriander.

The prosperous deltaic portion of the district under the Pennar lies in the taluks of Nellore and Kovur, wherein rich variety of wet paddy is raised. However, taking into consideration the chief crops of the district, paddy is important in Nellore, Kovur, and Gudur taluks; cholam in Rapur, Venkatagiri and Sullurpet taluks; cumbu and ragi in Kanigiri, Kandukur, Udayagiri, Atmakur, Darsi and Podili taluks; oil seeds in Darsi, Kandukur and Kanigiri taluks; and cotton in Darsi, Kandukur, Kanigiri and Podili taluks.

Manures

The agricultural practices of this district are generally of the type more common to the State. Lands are manured before ploughing and sowing or transplantation. Garden lands under wells are manured every time a crop is raised. Wet lands are manured once in a year. Dry land is more or less extensively manured according to the area of wet and garden crop which the ryot has to provide for. Green manure crops such as sunnhemp, diancha, pillipesara and indigo are raised in wet lands in the deltaic area during the off season. The light soil sown under the *Veligada* system and ploughed dry requires to be more frequently manured than other soils. The dung of cattle and goat, ashes, leaves, oil cakes, indigo refuse, *patimatti* and silt from tanks and channels are the principal kinds of manure. In the coastal taluks of Gudur, Nellore, Kavali, and Kandukur, cattle are generally penned at nights in the fields from harvest time till the rains set in when a fresh crop is sown. Large number of sheep and goats are also penned in the upland taluks as the droppings and urine of sheep and goats are considered to have better feritilising qualities than the dung of the cattle. In the northern taluks, where the best dry lands of the district are situated and where there is very little wet or garden cultivation, cattle are usually picketed in the fields and a larger propor tion of dry land in these parts is treated with manure than in the southern taluks. The *guntaka* or harrow is used to tear up and to break up clods, the seed

drill for drilling seeds and the *Papatum* or bullock hoe for working between the lines of growing crops sown with the drill.

Cropping pattern and Calendar of sowing and harvesting seasons of the district

In normal years 90.0% of the total area sown in this district is covered by food crops and the balance of 10.0% by non-food crops. Paddy is the major food crop raised in the delta taluks. It accounts for 30.5% of the total sown area. The next important crop is Jowar which covers 26.3% of the total sown area. Sajja and Ragi account for 6.3% and 4.5% respectively of the total sown area. Among the non-food crops Groundnut is important but it accounts only 1% of the total sown area. The other non-food crops like castor, gingelly, cotton also account for a small proportion only of the total sown area. The sowing and harvesting seasons of important crops in Nellore district are given below.

STATEMENT IV-3

Name of crop (1)	Sowing months (2)	Harvesting months (3)
	Food Crops	
Paddy I Crop (Autumn)	August-October	January-February
Paddy II Crop (Winter)	January-February	April-May
Paddy III Crop (Summer)	March-April	June-July
Cholam (Jowar)	November-December	March-April
Sajja (Cumbu or Bajra)	June-July	October
Ragi (Kharif)	June-July	October
Ragi (Rabi)	December-January	March-April
	Pulses	
Bengal gram	November-December	February-March
Red gram	July-August	January-February
Greengram (Kharif)	August-October	January-February
Greengram (Rabi)	December	March
Blackgram (Kharif)	August-October	January-February
Blackgram (Rabi)	December	March
Horsegram	October-November	February-March
	Others	
Chillies	September	March
Coriander	November	February
Groundnut	September-October	December-January

The following are the effects of departures from normal seasonal conditions upon the time-table of agricultural operations.

STATEMENT IV-4

Month (1)	Normal Weather (2)	Effects unseasonable or abnormal weather on the various crops (3)
January	North-east monsoon rains still continue; light drizzles and cold nights, dewy season	Generally there is no rain in this month and the dry weather helps the harvest of paddy. If heavy rains occur, the harvest of early Molagolukalu paddy and jonna standing in flowers and mature crop of paddy or affected. Paddy is one of the staple food grains of the district; so if its harvest is in any way adversely affected, the prosperity of the district suffers. Paddy nurseries sown in this month will also be affected by heavy rain. Moderate rainfall will postpone harvesting of paddy but it will be beneficial to the tender and standing late paddy, Eswarakora, tobacco, ragi, etc.
		Absence of rainfall is favourable as far as the harvesting of paddy is concerned but affects cotton, tobacco and other standing crops.
February	Light showers continue; fine weather; hot days and cold nights; North-west winds commence	If February is rainless, dry weather helps the paddy harvest in the first fortnight of the month. If there are heavy or continuous showers, the paddy harvest in the month and the paddy crop ripening for harvest in March will be considerably affected. Threshing and drying of grain will also be interfered with.
		Absence of rain is favourable to the paddy harvest but necessitates the frequent irrigation of garden crop ragi.
		Moderate rainfall delays the paddy harvest slightly but is beneficial to tender standing crops like second crop paddy, tobacco, ragi, etc.
March	The first dry month after the monsoon rains; dew abating with ocassional showers; slight decrease in dew	March is rainless and the dry weather helps the harvests of paddy, dry and garden crops. If there are heavy or continuous showers, the paddy harvest in April will be affected. Paddy and jonna are among the chief staple crops of the district; so if their harvest is hampered, the prosperity of the district is affected. Continuous rainfall in the month will damage the cotton and chilli crops.
		Moderate rainfall in this month delays the paddy and jonna harvests slightly but is beneficial to tender and standing crops like second crop paddy, tobacco etc.
		Absence of rainfall necessitates frequent irrigation of garden crops though favourable to harvesting operations.

STATEMENT IV-4—*Contd.*

Month	Normal Weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
April	Dry weather; dew subsides; hot weather commences	The absence of rain favours the harvest of paddy and garden crops but necessitates the frequent irrigation of Palapu jonna in garden lands and postpones the ploughing of dry lands.
		Moderate and slight showers facilitate summer ploughing of fields. Standing crops are benefited.
May	Dry weather with occasional rains; the harvest month of the year; western winds commence	Excessive rainfall and occasional showers help the ploughing of wet and dry lands but affect the harvest of second crop paddy. If there is no rain in this month, ploughing is retarded. A severe summer will affect the yield of plantain and other fruit trees and garden crops.
June	Setting in of the South-West monsoon; light showers are revived; winds are high	Excessive continuous rainfall will interfere with the harvest of garden crops, but is necessary for ploughing of dry and wet lands; if rains fail, cultivation and sowing of early crops are delayed.
July	South-West monsoon in progress; winds continue with occasional showers	Excessive or continuous rainfall or occasional showers will help the ploughing of lands. Absence of showers postpones ploughing operations. Pennar river receives freshes in this month. Seed beds of paddy are raised with the small quantity of water received in the delta reservior.
August	This is a dry month. Winds continue. Agricultural season in delta area begins.	Practically no rain in this month. The Pennar river, however, receives freshes on account of rains in the western districts. Transplantation of paddy in delta area will be in full swing.
		Heavy or continuous rainfall will affect paddy transplantation in the delta area.
		Absence of rains postpones cultivation of wet and dry lands in the non-deltaic area.

STATEMENT IV-4—*Concld.*

Month	Normal Weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
September	Winds continue sometimes with moderate rains. Western winds abate	Transplantation of early paddy will be completed in this month; but the month is generally rainless. Broadcast sowing of Sannawari and Vadasanna paddy will be in progress.
		Absence of rainfall postpones the sowing and the non-deltaic area is adversely affected. weeding of paddy crop will be in progress.
		Heavy or continuous rainfall retards the progress of sowing of dry crops and injures the crops sown in August. It is beneficial to rainfed tanks and wet ayacuts under them.
		Moderate rainfall is useful for the tender and standing crops. Bright and clear weather facilitates weeding and hoeing of crops sown in dry areas in August.
October	Setting in of the North-East monsoon about the middle of the month; occasional heavy rains; Agricultural season in non-deltaic area begins.	Heavy rains in this month help the standing paddy crops. Transplantation in the delta and sowing of paddy in non-delta will be in progress.
		Moderate rains are beneficial to the tender and early dry crops. Heavy or continuous rainfall will interfere with the sowing of paddy, horsegram, arika and cotton.
		Absence of rainfall will retard cultivation of wet and dry lands.
November	North-East monsoon very active; cold weather with heavy rains	Very heavy rains blight the standing paddy crop, injure the tender crop, spoil dry crops and will postpone the sowing of cholam and grams but will help to fill tanks in the non-delta area.
		Moderate rainfall is beneficial to tender and standing crops. Absence of rain retards cultivation.
December	Bright weather generally with showers; dew begins to fall; North-East monsoon continues. Extreem cold weather.	Moderate rains in this month help the standing crops. Very heavy and continuous rains in this month injures the standing crops and also postpone the sowing of dry crops which has to be completed in this month.

The following table shows the talukwise time-table of agricultural operations in the district in normal years. The figures shown against each crop or variety represents the percentage of the area of the crop sown and harvested in the month to the total area of the crop sown and harvested in each year separately.

State Seed Farms

Multiplication and distribution of improved seeds is one of the important items of work in the programme of Agricultural Development under the Plan Schemes. Use of improved seed alone is expected to increase the production by 10% to 15%. Hence, State Seed Farms have been set up in the district also, for multiplication of improved seeds.

The following is the list of State Seed Farms maintained during the Second and Third Five Year Plans together with their extent, area cropped, produce obtained and the profit or loss incurred.

STATMENT IV-8

Location of the Farm	Extent of the Farm (in acres)	Area cropped (in acres)	Total produce obtained	Tons.	Lbs.	Profit or loss
(1)	(2)	(3)	(4)			(5)

During the Second Five Year Plan period the above Seed Farms were continued though they were found uneconomical perhaps due to the small extent in several cases. However, the improved seed supplied to the ryots generally resulted in an increase of 10% in the production. During the Third Five Year Plan period, however, such of those small unit Seed Farms which were below 50 acres and found uneconomical were abolished and only bigger farms were continued. These farms are established on Government lands and since they are *poramboke* lands, they have been heavily manured under improved agricultural practices. Owing to the delta portion which the district contains, the target for the district under Seed Farms was fixed at 280 acres of wet land and 140 acres of dry land. According to this target Seed Farms have been organised in the district. The target under dry land is yet to be improved, whereas under wet lands it is exceeded. Of all the State Seed Farms in the district, the Farm at Chinapavani is the largest wet farm in the entire State and it is also recording considerable profit. There are seven Agricultural graduates working as Farm Managers in this farm alone. One heavy tractor worth about Rs. 14,000/- has been purchased in order to run the farm effeciently. It is also reported that the produce obtained from the farm is over and above the requirements of this district and it can cater to the needs of other districts also. The foundation seed obtained from it is again multiplied on 'A' class registered seed farms and the produce obtained is distributed to the ryots in general.

Japanese Method of Paddy Cultivation

The Japanese Method of Paddy Cultivation is nothing but a combination of all improved methods of paddy cultivation. It invites the attention of farmers right from seed selection to harvest. There is, however, a misconception that Japanese Method of Paddy Cultivation is only planting in rows. There are certain difficulties in planting in rows. An apprehension has been expressed about line planting and intercultivation in heavy types of soils in Nellore and Kovur taluks of this district. The big sized paddy plots extending to an acre and more, heavy nature of soil, completion of transplantations in a very short time and the paucity of labour, render planting in rows rather a very difficult proposition for the delta ryots. Past experience by progressive ryots, who have adopted line planting indicates that extra yields contributed by line planting and push hoeing is not commensurate with the cost involved in the adoption of the Japanese method of cultivation. This apprehension, is, however, not correct. The extra cost involved is more than compensated in the saving of expenditure in weeding and harvesting. The labour may feel difficult to adopt this method of planting in the early stages. In course of time, this difficulty may not be experienced and they may become adept in planting in lines. In other taluks the soils are light and as the cultivation is under tanks, there cannot be much difficulty in adopting line planting. During the Second and Third Five Year Plan periods the targets achieved under the Japanese Method of Cultivation are 4,98,460 acres and 3,32,466 acres as against the targets originally aimed at 4,56,408 acres and 3,03,873 acres respectively in the two plan periods.

Crop competitions

The crop competitions are introduced in the district with a view to creating a sort of incentive among the ryots in the programme of agricultural improvement and simultaneously to bring home the need for improved techniques in the field of agricultural production. The following are the details of crop competitions which were held during the Second and Third Five Year Plan periods. The figures for the first plan period are not available

STATEMENT IV-9

Item	No. of Competitors enlisted	No. of plots harvested	Value of prizes Rs.
(1)	(2)	(3)	(4)
Second Five Year Plan			
Paddy	11,679	9,076	5,155
Jonna	1,886	1,432	1,285
Groundnut	961	732	50
Third Five Year Plan			
Paddy	5,102	3,971	1,315
Jonna	971	490	310
Groundnut	280	160	100

Chemical Manures and Fertilizers

These are very popular in this district, specially in the deltaic taluks such as Kovur and Nellore. In the non-deltaic taluks, they are being popularised by ocular demonstrations. The demonstrations are the only method of convincing the farmers of the advantages of their use and consequent improvement in the production itself. Further large scale free fertilizer demonstrations are also being laid out on the holdings of the ryots to work fertilizer schedules for different crops in various types of soils. Incentives are also being provided by way of loans and by supplying chemical fertilizer at reduced rates. The following are the details of the distribution of chemical fertilizers during the plan periods.

STATEMENT IV—10

Name of the fertilizer	Quantity distributed (in tons)	Area covered (in acres)	Addl. production (in tons)
(1)	(2)	(3)	(4)
First Five Year Plan			
Ammonium Sulphate	18,093	5,06,604	36,186
Urea	282	15,792	1,928
Superphosphate	567	15,876	472
(Average increased yield per acre was 300 lbs)			
Second Five Year Plan			
Ammonium Sulphate	15,455	4,32,740	30,910
Urea	2,741	1,53,496	18,964
Ammonium Sulphate Nitrate	1,247	34,936	2,494
Calcium Ammonium Nitrate	1,012	28,336	2,024
Superphosphate	471	13,188	942
(Average increase of yield per acre was 450 lbs)			
Third Five Year Plan			
Ammonium Sulphate	9,706	2,53,768	19,412
Urea	8,770	4,91,120	35,080
Ammonium Suluhate Nitrate	663	18,564	1,326
Calcium Ammonium Nitrate	3,021	84,588	6,042

The average increase of yield per acre was 550 lbs. During the Second Five Year Plan loans to the tune of Rs. 12,58,255 were given for purchasing chemical fertilizers in this district and during third plan an amount of Rs. 1,89,824 was given on loan basis.

Organic Manures

The popular organic manures in this district are cattle dung, urine, farm waste, green manure etc. These manures, not only add plant food to the soil but also improve the physical condition of the soil. The farm yard manure is being encouraged to be preserved in a better manner by way of improved head system and pit system. Further to enhance the nitrogen content and also the quantity of manure, compost is being manufactured from waste vegetable matter. The following are the quantities applied and additional production obtained during the first, second and third five year plans.

STATEMENT IV-11

	First Five Year Plan			Second Five Year Plan			Third Five Year Plan		
	Quantity (in tons) (1)	Area (in acres) (2)	Addl. produce (in tons) (3)	Quantity (in tons) (4)	Area (in acres) (5)	Addl. produce (in tons) (6)	Quantity (in tons) (7)	Area (in acres) (8)	Addl. produce (in tons) (9)
Compost manufactured	37087	7417	185	1935708	397141	9929	3790930	758186	18955

Plant Protection Schemes

The following statement shows the area covered under the scheme, the quantity of pesticides distributed and the higher yields estimated.

STATEMENT IV-12

Period	Quantity of pesticides distributed (in tons)	Area covered (in acre)	Estimated higher yield (in tons)
(1)	(2)	(3)	(4)
First Five Year Plan	429	429,373	10,734
Second Five Year Plan	532	800,210	20,000
Third Five Year Plan	219	475,205	11,880

Horticultural Development

The scheme aims at the development of fruits and vegetables. During the Second Plan period the scheme was sanctioned with a Horticultural Development officer in charge of two or three districts, one Horticultural Assistant for each district besides one Demonstration Maistry. Fruit Plants, vegetable seeds and seedlings are being supplied to the ryots on a no profit no loss basis in addition to technical advice. Further long term and short term loans under Fruit and Cashewnut Development Schemes are being sanctioned to the ryots to develop the area in non-forests. The following statement gives the amount disbursed during the two plan periods as long and short term loans to the ryots.

	Second Five Year Plan Rs.	Third Five Year Plan Rs.
Fruit Development Scheme	91,055	40,170
Cashew Development Scheme	10,980	5,900

Expanded Nutrition Programme

The Government sanctioned the above scheme during 1961 and Totapallegudur Block of this district was selected for this purpose. The scheme aims at increased production of nutritious foods such as poultry, eggs, fish, fruits and vegetables and these are to be distributed primarily to pregnant woman, nursing mothers and young children in order to improve their health. As per the programme, school gardens had to be established in

ten villages. But land was secured only at Venkanapalem, South Amalur and Mamidipudi villages and the programme is being implemented in these three villages only. Steps are also being taken to select the lands in the remaining seven villages also and establish these school gardens.

During 1961–62 an amount of Rs. 2,000 was provided under recurring expenditure and Rs. 3,000 were provided under non–recurring expenditure for the scheme and the entire amount was spent.

Minor Irrigation

Under this head increased allotments are being given every year. Loans for the purchase of oil engines and electric motors are provided and during the First, Second and Third Plan periods Rs. 5,32,200, Rs. 2,40,100 and Rs. 1,47,200 respectively were disbursed.

Land Development

Under this scheme agricultural machinery is being provided to the ryots through the Assistant Agricultural Engineer. There is a demonstration centre covering about 500 acres in Kavali taluk for contour bunding. The Divisional Engineer, Soi. Conservation, Chittoor, is in charge of this centrel Filter Point Tube Wells Scheme is under the control of the Assistant Agricultural Engineer, Nellore.

Festivals and Exhibitions

This is one of the items under the publicity programme for drawing the attention of the ryots to the activities of the Agriculture Department. Whenever possible exhibitions are being conducted every year during *Jamabandi* time and also during important festivals. The other methods of publicity are distribution of posters, journals and periodical exhibitions at several places. Important posters on agriculture and other allied subjects, published by the department are being fixed to the walls of public offices. The Agriculture Department publishes a monthly Telugu journal called 'Padipantalu' for the benifit of the ryots. The annual subscription rate is Rs. 2.25 only.

Kharif and rabi food production compaigns are being launched in the district. Every possible incentive like supply of improved seeds, fertilizers, credits, subsidised distribution of pesticides, improved implements, green manure seed packets, etc., is being given to the ryots under this scheme to enable the ryots to pool their resources and increase production. The results are very encouraging.

In addition to these, package programme in popular in the district. It implies the combination of all improved agricultural practices in each holding of the farmer and thereby increase production in selected villages in each Block. In these villages, family production plans are also being prepared and basing on them the requirements like seeds, manures, credit, *etc.*, are being worked out for their supply. Under these campaigns, as a sort of incentive, community prizes are being awarded to the district, which put up the best performance. The district which registers an increase of 15% over the average of the previous three years in respect of selected crops is eligible for a community award of Rs. 10,000.

In general with a precarious rainfall, areas outside the delta and reservoirs and tanks are exposed to an unusual degree to natural calamities. Seasons of drought and consequent scarcity occur frequently. There is sufficient agricultural labour in the villages which have irrigation facilities under rivers and tanks though in the delta region scarcity of labour is felt sometimes. The salt and mica industries attract the agricultural labourers. However, cultivation has extended rapidly in several taluks owing to the impetus given under the Five Year Plans.

CHAPTER V

IRRIGATION

Nellore district ranks fourth among the districts in the State in the extent of irrigated area. The net area irrigated in Nellore district during 1960–61 was 6,38,921 acres, area irrigated more than once in the same year being 1,43,909 acres. This net area is likely to be increased largely when the mighty Nagarjunasagar Project is completed and its benefits reach this district. The main sources of irrigation in Nellore district are the mighty Pennar river and other rivers, riverfed tanks and reservoirs, rainfed tanks, river channels, spring channels, spring *doruvus* and wells. Pennar River canal system, Mopad Project and Rallapadu Project are the major irrigation works in this district. Kanigiri reservoir fed by the waters of River Pennar from the anicut at Sangam is the biggest reservoir in this district with an ayacut of 83,400 acres. Nellore and Kovur taluks are largely benefited by the Pennar River canal system. Riverfed tanks are found in Nellore, Gudur, Atmakur, Kandukur and Kovur taluks. Rainfed tanks are found in large number in all the taluks but many of them, in the erstwhile zamindari areas are in disrepair and require great improvement. Spring *doruvus* are found on the coast line. The wells are the most common irrigation sources throughout the district. Paddy is the chief irrigated crop in this district.

The following statement shows the area irrigated under different irrigation sources during the year 1960–61.

STATEMENT V-1

Source of Irrigation (1)	Area irrigated (in acres) (2)
Government canals	1,55,674
Private canals	55
Tanks	3,33,739
Wells	1,18,920
Other sources (Spring channels etc.)	30,533
Total area	6,38,921

Irrigation Projects

The principal rivers which drain the district are the Pennar and the Swarnamukhi; other streams, occasional and torential in character, are the Musi, the Paleru; the Manneru, the Boggeru and the Kandleru. The Pennar river otherwise known as *Uttar Pinakini* takes its origin in the Chennakesava hills north-west of Nandidrug in Mysore State. It passes through Anantapur, Cuddapah and Nellore districts for a distance of 370 miles before it falls into the Bay of Bengal about 19 miles east of Nellore. it has during the course of the years, formed for Itself, a delta. The important tributaries are Jayamangalai, Chitravathi, Papaghni, Sagileru and Cheyyeru. It drains an area of 1,900 sq. miles. It is larger than Cauvery, both in respect of catchment area and maximum discharge. The waters of this mighty Pennar are harnessed in Nellore district for irrigation by constructing two anicuts one at Nellore and another at Sangam. The other sources of irrigation are the tanks, wells etc. The soil in Nellore district is alluvial, a mixture of sand and vegetable soil of a poor quality but peculiarly well suited for growing paddy.

The chief irrigation sources are briefly explained below :

The Pennar River Canal System

This system consists of the Nellore anicut system, the Sangam anicut system and the Nellore tank. The important reservoirs under the Pennar are the Nellore Tank and Kaligiri Reservoir. The Nellore Tank originally received its waters by a rhannel taken from the river Pennar in the neighcourhood of Mulumudi and which also acted as a batch channel to receive the water of Ludumu, which cises near Ayyagaripalle. In 1854–55 the Madras Government constructed the anicut at Nellore across the river to secure some supply of water for all the tanks in the southern delta and also sanctioned improvements to the Nellore Tank. After a few failures, the present structure designed by the famous engineer Sir Arthur Cotton, was completed in 1862–63 and has since stood admirably. The crest of this anicut at Nellore is 9.61 feet above the bed of the river and 42.65 feet above the sea level and its length is 2,040 feet. Another anicut at Sangam was constructed across the river Pennar higher up at a distance of 20 miles west of Nellore in 1882–1886. This project was commissioned in 1886–87. The Sangam anicut was later amalgamated with the Nellore anicut system and named as 'The Pennar River Canal System'.

Nellore Anicut

The Nellore anicut reconstructed in 1860 at Nellore across river Pennar is 2,040 feet long and has a main head sluice and also an auxiliary one. The main canal bifurcates at the third furlong into the Survepalle canal and Jafar Saheb canal. There is a scouring sluice at the right end.

The Survepalle Canal

The Survepalle canal which leads to Survepalle Reservoir is about 13 miles long and has an ayacut of 34,414 acres. It has a regulator at the second mile where the Krishnapatnam canal branches off. The Survepalle canal empties itself into the Survepalle Reservoir which is next in importance to the Nellore Tank. There are six sluices. The Idagali channel starts from the right flank of the tank. There is an excellent snipe shooting resort near the Survepalle Reservoir. Ipur fish farm is at the tail end of a branch channel.

Jafar Saheb Canal

Jafar Saheb Canal and its branches have an ayacut of 35,000 acres. At the second mile and first furlong is the Allipuram regulator with a middle vent for the irrigation of lands in Gudipallipadu village. The left or Leburu branch irrigates about 20,000 acres. At the third mile and fourth furlong of this channel, the Kudithipalem sub-branch canal takes off for irrigation of about 4,000 acres. At the fourth mile and sixth furlong, the main Leburu canal divides into three channels *viz.*, the Leburu channel, the Gangapatnam channel and the Maipad channel. The right or Kodur branch channel is about 7 miles long.

The Sangam anicut

Prior to the construction of the Sangam Anicut, an area of about 40,000 acres of land was irrigated directly by two large channels called Duvvur and Gandavaram channels. Water was taken off directly from the left bank of the Pennar river, a little below its junction with its last affluent, the Biraperu and indirectly with the aid of shallow tanks. The arrangements were unsatisfactory. Drains were used as irrigating ditches and cross bunds were being erected at various points. Irrigation was naturally interrupted constantly by these bunds being washed away in the monsoon. The uncertain freshes in the South-West monsoon also rendered cultivation precarious and speculative. On the other hand, by delaying agricultural operations till the character of the season would be fairly gauged, the ryots ran the risk of their crops withering for want of rains later on. The consequence was that large quantities of water were allowed to run to waste to the sea. This state of affairs attracted the attention of the Collectors of the district and of the Engineers. In 1865 for the first time a Special Officer was appointed to draw up the estimates for the Sangam anicut or the Northern Pennar delta.

The village Sangam is situated close to the northern bank of the Pennar at a distance of about 20 miles west of the Nellore. The off-take of the two old channels mentioned above was situated here and these channels had been improved and provided with head sluices after the British occupation. The success of the construction of the anicut at Nellore led to the construction of the one at Sangam between 1882 and 1886, at a cost of Rs. 37.52 lakhs. The anicut is 4,076 feet long. It was provided with falling shutters of 2 feet in the year 1937. The principal channels which take off from the Sangam Anicut are the Duvvur canal leading to Duvvur tank. The Kaligiri Main Canal leading to Kaligiri Reservoir from the left side of the Anicut and the Nellore Tank Supply channel from the right side leading to Nellore tank. The total ayacut under all these is about 96,000 acres.

Duvvur Canal

It branches off with separate head sluice on the left side of the Sangam Anicut and is a little over a furlong above the anicut. The canal feeds the Duvvur tank. There was direct irrigation of about 4,000 acres under a branch channel of this canal. It was later on transferred to a branch channel from the Kaligiri Main Canal. There is a combined regulator and a bridge constructed across this canal at the second mile where the Nellore-Dornal road crosses it.

The Kaligiri Canal

On the left of the Sangam Anicut the Kaligiri Main Canal also takes off just above the anicut which is four miles long and empties itself into the Kaligiri Reservoir. There is a masonry bridge of five spans constructed at third mile and second furlong across the canal where the Nellore-Dornal road crosses it. The branch canal providing direct irrigation for about 4,000 acres of land transferred from the Duvvur canal (known as the Duvvur branch) takes off at the second mile and sixth furlong and it is about 8 miles in length.

Kaligiri Reservoir

Also known as Kanigiri Reservoir is the main terminal storage reservoir under Sangam Anicut system. It gets supply not only from the River Pennar but also from its own catchment area which is about 70 sq. miles. The tank has a bund over 6 miles 2 furlongs long with a water spread area of 12,465 acres and a capacity of 6,392 million cubic feet and the F. T. L. is 21.45 feet over the sill of the lowest sluice. The ayacut under the reservoir is served mainly by two canals known as the southern and the eastern channels taking off at the fifth mile second furlong of the bund *i. e.*, at a point, a mile lower down the bund. The southern channel is about 24 miles long. The eastern channel is a little over 21 miles in length. The channels also supply water to sundry tanks. The surplus waters of the Kaligiri reservoir form the Maldevi drain, which in its course absorbs the field drainage and seepage and supplies water for irrigation on either side of it. The Vidavalur tank has a supply channel from the Eastern channel. In addition to the said channels some water is let down for irrigation through Pyderu surplus escape into the Pyderu river which ultimately flows into the Allur tank. Recently two canals namely the Vavveru and Yelamanchipadu canals were excavated from the foreshore of the Reservoir. The total ayacut under this reservoir is 83,400 acres and the entire ayacut lies in Kovur taluk.

The Nellore Tank Supply Channel

It takes off on the right side of thh Sangam Anicut and empties itself into the Nellore tank after a long course of about 18 miles. The tank with a capacity of 836 million cubic feet and an aycut of about 12,000 acres assumes importance next only to the Kaligiri Reservoir. The supply channel receives at the second mile a drainage stream from catchment of 84sq. miles, known as the London Vagu. Along the course of this supply channel necessary escapes have been built to pass off the local drainages. The Nellore tank contains four sluices of which the low level sulice and the Kambala sluice are the important ones. The channel taking off the Kambala sluice is known as the Uyyalakalava and it runs through the heart of Nellore town. The entire ayacut of this tank is in Nellore taluk.

Mopad Project

The taluks of Kanigiri, Kandukur and Kavali are subject to the capricious rainfall and famine and also to heavy floods of short duration. This tract has little or no spring supply running in the dry weather. The cultivation in this tract therefore, depends mainly on the monsoon. As early as in 1895 the Collector Nellore reported to the Government about the inability of this portion of the district to withstand the effects of even a partial failure of crops in an adverse season and urged the necessity of constructing protective works. The Government after careful consideration finally sanctioned the Mopad Project in July 1912. The work was started in December 1912 and was completed in 1921 at a cost of Rs. 22.90 lakhs.

The Mopad Project consists of a reservoir formed by obstructing the river Manneru at Mopad village in Kanigiri taluk. It has a free catchment area of about 250 sq. miles. At Mopadu the river Manneru runs south-west between two hillocks. The hill on the left bank has a saddle and on it a surplus weir of 1,500 feet long was constructed. The bund across the river is over a mile long rivetted in front throughout to a thickness of $1\frac{1}{2}$ feet at a slope of $2\frac{1}{2}$ feet to 1 feet extending right up to the top. The capacity of the reservoir is 2,091 million cubic feet. The main canal takes off from the head sluice in the south of the bund and is about 17 miles with 18 subsidiaries, whose ayacuts are not uniform. There are also four direct irrigation sluices and the total length of all the canals, including the main canal is about 98 miles. There is an aqueduct across the Pillaperu at the eighth mile and the main canal is carried across that stream over 17 spans of 40 feet arches. The Mopad Reservoir has an ayacut of 12,500 acres—5,600 acres in Kanigiri taluk, 2,900 acres in Udayagiri taluk and 4,000 acres in Kavali taluk.

Schemes taken up under Five Year Plans

During the First Five Year Plan period Rallapadu Project, a major irrigation project, was taken up at an estimated cost of Rs. 103 lakhs. Among the medium projects taken up in this district during the first Five Year Plan were the Nakkalagandi Reservoir, Paleru Reservoir Scheme and Upputeru Lower Anicut scheme at an estimated cost of Rs. 14.79 lakhs,Rs. 6.30 lakhs and Rs. 11.38 lakhs respectively. These four projects were completed in the first Plan period itself. In the Second Plan a scheme to construct a supply channel from Paleru to Bitragunta tank at an estimated cost of Rs. 17.588 lakhs was included. No major projects were included in the Second Five Year Plan. During the Third Plan the followiug irrigation schemes all of which are only medium projects were included.

STATEMENT V-2

Name of the scheme	Total estimated cost (in Rs.)	Ayacut to be benefited (in acres)
(1)	(2)	(3)
1. Gandipalem Project	30,00,000	13,000
2. Kanupur Canal Scheme	69,59,000	78,000
3. Providing 6 ' falling shutters to Nellore and Sangam anicuts	48,75,000	..
4. Cheyyeru Reservoir	100,85,000	10,200

Some of the important schemes taken up under the Five Year Plans are described below :

Rallapadu Project in Kandukur taluk: This project was taken up as a major project in the First Five Year Plan at an estimated cost of Rs. 103.00 lakhs. The project was constructed by laying a bund across Manneru River near Rallapadu village in Kaudukur taluk and the area to be benefited is 11,000 acres both in Kandukur and Kavali taluks. It is the biggest project in the district and is situated at a distance of about 23 miles south-west of Kandukur. There is a road bridge also across the river along the bund of the Project.

Kanupur Canal Scheme : The scheme contemplates the excavation of a canal taking off on the west of the Nellore tank supply channel head sluice above Sangam anicut through a head sluice capable of discharging about 1,400 cusecs for an ultimate ayacut of 78,000 acres. The ayacut lies mostly in Nellore and Rapur taluks. The total length of the canal will be about 24 miles and 2 furlongs. The scheme is estimated to cost Rs. 69.59 lakhs and to benefit a registered ayacut of 17,035 acres under 38 tanks. Detailed investigation of the scheme was completed and excavation of the canal was taken up and completed for a length of six miles. But the execution of the scheme is at present stopped for paucity of funds.

Scheme for providing irrigation facilities to Tatiparthi and Nallapalem tanks in Atmakur taluk : The scheme envisages assured supply of water to the ayacut situated under Nedurupalle, Nallapalem and Tatiparthi large and small tanks and direct irrigation under Bathulapalle channel by supplying water from Navur Vagu which is locally known as Lodum Vagu. The total ayacut expected to be benfited under the scheme is about 1,300 acres. The scheme has almost been completed except excavating a connecting channel between Tatiparthi small and big tanks. Water is also supplied to the ayacut temporarily.

Kullur Pumping Scheme in Atmakur taluk: The scheme envisages assured supply of water to the ayacut under Nallacheruvu of Kullur village in Atmakur taluk by pumping the water from river Pennar to Nallacheruvu. The main source of irrigation in Kullur village is the Nallacheruvu which has an ayacut of 352 acres. The catchment area of this tank is very small, even for which there is no adequate supply. Consequently crops fail resulting in heavy loss to the cultivator. On many occasions the Government had to grant remissions. Therefore, the Government considering the recurring loss sustained by the ryots due to failure of crops and poor yields *etc.*, sanctioned the scheme of pumping water from the River Pennar to augment supplies to the Nallacheruvu of Kullur village in Atmakur taluk. It ultimately facilitates an assured supply of water to an extent of 300 acres in addition to the already registered ayacut of 352 acres under Nallacheruvu. The scheme was completed in 1962 at a cost of Rs. 1,23,500 and began to function from 1st September, 1962 onwards.

Schemes taken up during the third Five Year Plan Period and under execution

Irrigation facilities to non-delta tanks in Kovur taluk : The scheme contemplates provision of irrigation facilitates to non-delta area situated in the tailt-end of Dagadarthi channel in Kovur taluk and is estimated to cost Rs. 4,81,500.

The Dagadarthi channel takes off from the Pyderu escape canal through a head sluice to feed an existing settled ayacut of 1,600 acres. The existing length of the channel is about 2½ miles only. It was considered that if the existing Dagadarthi canal is improved in length it can feed the rainfed non-delta tanks such as Dagadarthi tank, Tadakalu tank, Chowtaputhedu tank, Uchaguntapalem tank, Velamudi tank, Kothapalle Karunugunta tank, Kagollu big tank, Batrakagollu Khandriga tank, Racherlapadu tank, North Amalur tank and North Mopur tank, as the ayacut under these tanks is not having sufficient water supply either from ordinary flows or from their catchments. The Government accordingly sanctioned the scheme of extending the existing Dagadarthi canal upto 7/5 M + 550 feet as there is surplus water available in Sangam Anicut during the months of May to October and in the remaining period also if necessary through the Kaligiri Reservoire. The total ayacut proposed according to the scheme is 2,805 acres in addition to the new ayacut of 360 acres.

Padamati Kambhampadu Pumping Scheme in Atmakur taluk : The scheme envisages the pumping of water from Pennar to the Nallacheruvu of Padamati

Kambhampadu so as to have assured supply of water to the ayacut. The scheme was estimated to cost of Rs. 85,000. The main source of irrigation for the Padamati Kambhampadu village is its Nallacheruvu with an ayacut of 206 acres. Since the existing capacity of the tank is not sufficient to irrigate even the existing ayacut, the Government sanctioned the scheme of pumping water to the said tank from River Pennar by means of pump sets on the model of the Kullur pumping scheme. The total ayacut proposed is 472 acres including the additional ayacut.

Improvements to Atmakur Tank Supply Canal, Atmakur village : This scheme, estimated to cost Rs. 57,300, contemplates the widening of the tank supply canal so that it can draw more water from Boggeru River during floods which are of short duration. The existing capacity of Atmakur tank supply canal, which takes off from River Boggeru is 206 cusecs and is not adequate to feed the existing ayacut of 2,518 acres under Atmakur tank. The Government therefore, sanctioned the scheme. The surplus water is to be let down to the Vasili tank from Atmakur tank. Thus by improving the supply canal an additional extent of 1,000 acres are brought under cultivation. The excavation of the canal is under execution.

Remodelling of Kanuparthipadu Regulator in Nellore taluk : This scheme, estimated to cost of Rs.2,65,700, provides improvements to Survepalle Reservoir by increasing F.T.L, from 10.00' to 12.00' feet over Idagali head sluice and thereby for increasing its capacityto 1.740M.cft. and forminga foreshore bund to preventsubmersion of foreshore lands. It also provides improvements to Kanuparthipadu surplus weir head sluice and Survepalle canal. The additional extent that will be brought under cultivation is 4,000 acres in addition to the registered ayacut under the Survepalle Reservoir.

Formation of new Tank across Nallavagu near Pedagopavaram, hamlet of chinagopavaram in Rapur taluk : The scheme envisages the construction of a new tank in Peddagopavaram village, across Nallavagu. The scheme has been sanctioned by the Government. The total ayacut proposed under the scheme is 80 acres at an estimated cost of Rs. 70,700.

Nagarjunasagar Project : When the giagantic Nagarjunasagar is completed, the taluks north of Pennar *i.e.*, Atmakur, Udayagiri, Kanigiri, Podili, Darsi, Kandukur, Kavali and Kovur will be largely benefited by the Project waters and it is hoped that it will enable further economic development of the people in this area.

Tanks

The next important sources of irrigation are the rainfed and riverfed tanks. Riverfed tanks are found in Gudur, Kovur, Nellore, Atmakur, and Kandukur taluksonly,while rainfed tanks abound in every taluk. Most of the rainfed tanks are situated in the non-deltaic upland taluks of Rapur, Atmakur, Kandukur, Udayagiri and Venkatagiri. Ponnalur tank, Hajipuram tank, Anasamudram tank and Yerur tank are some of the large and important tanks in this district.

Wells

Well irrigation is very common in this district. Most of the garden crops are raised only under irrigation wells. In the coastal taluks of Sullurpet, Gudur, Nellore and Kavali spring wells are also found along the coast line. These spring wells dug in sandy soils have an almost unfailing supply of water and paddy is also raised under some of them. In the upland taluks the wells form the chief irrigation sources.

There are many hill streams in this district and if they are harnessed by constructing small anicuts or bunds across them to divert their waters to the innumerable small tanks the agricultural prosperity of the district may be improved many fold.

CHAPTER VI

FORESTS

Early History

According to the tradition the district covers the site of Dandakaranya which at the time of Ramayana was a dense jungle, while the town of Nellore which came into existence only several centuries later was known as Simhapuri (Lion's town), from the supposed existence of lions in the adjacent forests. Timber of large size belonging to species peculiar to the local forests are found in old buildings. The diary of Ananda Ranga Pillai, Dubash to the French Governor at Pondicherry from 1736 to 1761, records that several ship loads of red wood (*i. e.*, red sanders) were exported from Krishnapatnam. The Veligondas and Yerrakondas contain at present only young poles.

The wasteful system of felling and removal of wood, which was in force prior to 1816, was described by Mr. W.S. Whiteside, a former Sub-Collector of Nellore in a reference to the Collector. During the previous 30 years and probably for a much longer period, a brisk trade had been carried on with Madras in firewood, cut in the jungles of Baddepudi and Kavali taluks by local merchants, who applied for the right to fell for a specified time and to a specified amount. The *dharkhast* often for a very large quantity of timber, were never granted for a longer period than two months, and as soon as they had been accepted in the Sub-Collector's *cutchery*, the wood was expeditiously cut and carted to Ramayapatnam and Chennayapalem, for export by sea. There was no proper supervision of any kind excercised either over the felling or over the storage at the port; and it was only when vessels were being loaded that the sea custom's clerk was supposed to be present on the beach and count each bundle of wood as it was carried down to the boats. There was also no check whatsoever of the timber, appropriated for the local consumption, as it was never subjected to check by the clerk, nor did it appear in his accounts. This practice continued for many years and ruined the jungles. In 1860 Mr. Dykes, the Collector, had brought to the notice of the Board that the natural forests had receded from 20 to 30 miles round Nellore and that it was time that the Government took over the supply of firewood and timber to the people to prevent waste, and its inevitable consequence, a serious shortage. Dr. Cleghorn, the Conservator of Forests, at that time strongly supported the views of Mr. Dykes, who not only wanted to conserve the existing growth, but also to start plantations to repair the past damage. The Government, however, declined to accept the obligation of providing timber and firewood to the people. Mr. Dykes, thereupon urged the authorities atleast to understand the protection of jungles and further recommended that 200 acres of suitable land in the neighbourhood of Nellore should be acquired, upon which systematic experiments should be made to discover the best methods of raising timber trees. The Government agreed in principle with the suggestion and Mr. Dykes drafted rules for the preservation and management of the forests so constituted and submitted them for approval to the Board of Revenue. He also raised many palmyra and casuarina plantations. Mr. Boswell, his successor, extended the plantations and added considerably to the reserves. In 1867, the Government decreed that every village should be allowed, for communal purposes, jungle to the extent of 30% of the area under cultivation and a surplus only, if any, could be reserved. In 1872 Mr. Vans Agnew who assumed the charge of the district, appears to have been opposed to strict conservancy and threw open all the reserves except those on Sriharikota island and within 20 miles of Nellore and 10 miles of *Ramayapatnam*, to the villagers for the cutting of timber for building purposes, for fuel and for the manufacture of the agricultural Implements. In the year 1872, a seperate department called the Jungle Conservancy Department was formed.

In 1882, the control was transferred to the Forest Department and Mr. Vincent was appointed as the first District Forest Officer. After the enactment of the Madras Forest Act of 8882 formal proposals were called for the construction of reserves. Mr. Lee Warner, Collector of Nellore, submitted proposals in 1883 for constitution as resesves most of the areas protected under the jungle conservancy rules but no orders were passed till 1889 on account of the village forest scheme which was then under trial. Under this scheme the village communities

were permitted to cut wood for bonafide domestic consumption and for agricultural implements within the village areas. They were also allowed to cut wood for builbing purposes with the Collector's permission, besides, free grazing lands were allotted to each village upto 1½ times its occupied area. It was not until 1903 that the settlement of the reserves was completed. In 1911 as a result of complaints from the villagers that forest boundary lines were cut too close to their cultivation and that too many restrictions were placed on their requirements in the mattet of fuel, small timber and grazing, a Forest Committee was appointed at Nellore and the reserves were divided in to six classes. The policy of handing over of royts' forests to Panchayat management was inaugurated.

During 1924, Mr. Whitehead, the Conservator of Forests, was deputed to finally classify the forests in the Presidency. As a result of his classification the Chingleput forest district was abolished and the forests in the Tiruvallur and Ponneri taluks were brought under the control of the District Forest Officer, Nellore. In 1927–28 Kavali and Nellore ranges were abolished, and the handing over of ryots' forests to Panchayat management was completed.

In 1930, Kanigiri Range was transferred to Kurnool South Forest Division. The Nellore Forest Division then comprised the following four ranges, *viz.*, Sriharikota Range (25,317 acres), Rapur Range (74,946 acres), Udayagiri Range (86,884 acres), and Sathyavedu Range (51,012 acres). The District Forest Officer had his headquarters at Nellore and administered reserved forests whose extent was 317sq. miles and which were under the control of the Forest Department. He was assisted by four Rangers, ten Foresters and about 29 Forest Gaurds besides 31 Watchers.

The Government took over the degraded Panchayat and Estate forests in 1951–52 with a view to enforcing the Forest Act and to introduce scientifiic methods of management through Working Plans. In 1951 the Nellore Forest Division was bifurcated into two Divisions, *viz.*, Nellore North Division and Nellore South Division, on administrative grounds. Nellore North Division comprises the four ranges of Udayagiri, Kanigiri, Kavali and Podili. Nellore South Division administers the remaining ranges. The area under each division is given below:

Name of the Division	Area in acres
Nellore South Division	336,374
Nellore North Division	505,035
Total Forest Area	841,409

Types of Forests

The general growth for the most part consists of poor mixed scrub jungles of irregular height and density. More valuable species, such as, *Hardwickia binata* and *Pterocarpus santaeinus* occur here and there over the Veligondas. Pure crops of *Anogeissus latifolia* occur in patcheson the slopes of Yerrakondas. On account of the wholesale removals of timber of all valuable species and damage through graziers and fire in the past the crop is in a very degraded condition.

There are three distinct zones of forests varying with the geological formations of the district *i. e.*, the coastal zone, the laterite zone and the hill zone. The coastal zone is by and large confined to Sriharikota island, where the crop consists of a fairly dense growth of shrubs of both the evergreen and deciduous species with a large number of moderate sized trees. The important species are *Memecylon umbellata, Maba buxifolia, Hemicyelia, Sepioria, Eugenia Jambalona, Garcinia Spicata, Tamarindus Indica, Strychnos Nuxvomica, Sapindus Trifoliatus Pongamia Glabara* and Palmyras. The Laterite zone covers the plains and hills and consists of the dry semi-evergreen scrub jungle in which *Alibizzia amara, Limonia alata, Maba buxifolia, Hemicylon Sepioria, Mimosops hexandra, Bauhinia racemosa. Anogeissus latifolia, Chloroxylon swietenia* and *Erythroylon monogynum* are the most important species. These are intermixed with *acacias* and other thorny species and the inevitable prickly-pear. The last species is fast disappearing through cochineal infection. The hill zone comprises the principal ranges of hills like the Veligondas, the Yerrakonda and the Udayagiri Durgam hills. The Veligonda Range which separates the Nellore district from Cuddapah and Kurnool is the backbone of the Eastern Ghats. Starting from Nagari promontory in the Chittoor district, it runs in the northern direction along the western borders of the Nellore district, rising to an elevation of 3,626 feet at Penchalakona in Rapur taluk. The Yerrakondas (Yerra meaning red) are so called because these hills contain a number of *hardwickia binata* trees the young red leaves of which, in summer give a distinctive colouring to their general aspect. The Udayagiri Durgam Hill which are detached from the two other ranges rise to an elevation of 3,079 feet. Of these hills the Veligondas contain more valuable

species of which a description is given in the following notes written by Col. R. H. Beddome shortly after the passing of the Madras Forest Act of 1882 and the constitution of reserves.

"The forests are very similar to what are found on all our Eastern Ghats, though not to compare with some portions of the Nallamalais. The trees scarcely cover the ground, so as to form a leaf canopy to the exclusion of grass, except in ravines and some few favourable spots; and throughout the length and breadth the forests have been almost entirely denuded of all the more valuable timber of any size; but they are of great value and worth conserving, as containing a large quantity of the valuable red sanders and a considerable quantity of Thamba, also a fair amount of Yepi, Vengay and blackwood, though all the above trees are now only young and coming on; and to show how diligent the axe has been in former days, not a single Red Sanders or Thamba tree could be found fit for felling in all the portions of the ghats which one can traverse. The usual havoc of the graziers and of fire are both everywhere apparent, many Yepi, Red Sanders and *Anogeissus* trees being pollarded or much hacked about or entirely felled for grazing purposes."

Protection

After the Forest Department came in, operations were directed mainly towards the protection of Veligonda and Yerrakonda slopes which had suffered badly in the past and of the fuel forests in the plains and on Sriharikota Island. No timber has been extracted on any regular scale after the Forest Department assumed control.

Exploitation

The working is confined to the extraction of fuel from the areas conveniently accessible and well stocked with fuel species. The areas are worked under three different systems.

(*i*) *Simple coppice system :* This is followed in the dry fuel areas of the inland ranges with a rotation of about 30 years. The felling of trees is done as close to the ground level as possible to ensure an adequate growth.

(*ii*) *Coppice with Standers :* This system is followed in the fuel working circle of Sriharikota range with a rotation of about 25 years. Only such trees which yield minor forest produce are reserved from felling. The different species reserved are soapnut, *Nuxvomica,* tamarind, mango and palmyra.

(*iii*) *Clearfelling system:* In the case of casuarina plantations, the area is clearfelled, the stumps uprooted and then the entire area is planted up at a distance of 7 feet by 7 feet. The casuarina is felled once in ten years and the area is planted up once again. The young plantations are pruned in the fourth year and thinned in the sixth year.

Introduction of valuable species

Casuarina : It is eminently successful in Sriharikota island. After handing over the ryots, forests to the Revenue Department, planting of casuarina was taken up. During the First and Second Plan periods a scheme to extend the casuarina plantation was taken up to meet the increasing demand for fuel. During the Second Plan period a sum of Rs. 2.139 lakhs was incurred under this scheme and casuarina plantation was raised on 1,755 acres.

Sandal : Since 1930 attempts have been made to interduce this valuable species in Rapur and Udayagiri ranges. The method adopted is one of establishing a few trees in a small patch called propagation centre and distributing such centres in a number of localities. The idea is that when the trees bear fruit the birds will carry the fruit in their beaks to different parts, eat the pulp and drop the seeds thereby bringing about a natural dissemination of the species afterwards over the entire jungle.

Terminalia Chebula: An attempt to raise seedlings was made during 1931–32, but it ended in a failure. During 1936 another attempt with improved methods of sowing *etc.*, was also attempted in suitable localities of Kothur Reserved Forest and Udayagiri Durgam.

The forests of Nellore district are not of great importance except as the principal sources of firewood supply for the Madras market. The wants of the people are chiefly agricultural–small timber for ploughing implements, pasture for the cattle, and leaves for the manure. Their domestic wants are timber, grass and palmyra leaves for building purposes and firewood. Another important industry which calls for mention is the breeding of cattle. This industry is chiefly carried on in the coastal taluks but the breeders look to the rich pasture lands of the Rapur taluk for the sustenance of their cattle during the greater part of the year. Thus grazing forms an important source of revenue. The major marketable forest products of this district are described below.

Timber : Timber forests lie on the western borders of the district. The Rapur Veligondas may

yield considerable revenue as they contain chiefly red sanders, *Hardwickia* and *Anogeissus*. The timber is largely exported to places where there is a large and sustained demand such as in Madras.

Fuel: Firewood is the principal supply being made from the coupes of Sriharikota Reserve. Its transport is facilitated by the Buckingham canal. The proximity of Madras has widely increased the economic value of the forest in Sriharikota island. In Rapur fuel working has expanded a good deal of late. The fuel is partly consumed by the mica mines in Gudur and Rapur taluks and is also converted into charcoal and sent to Madras and Nellore.

Casuarina: Casuarina is an Australian fir and it grows luxuriantly all along the coast. It was first introduced in this district in 1861. The local demand for casuarina is insignificant and practically all the available produce is taken to Madras by the Buckingham canal.

Bamboos: These are confined to favourable valleys in the slopes of the Udayagiri Veligondas. Though it is an important product, the growth is scattered and admits of only one felling series.

Minor Forest Produce: The main items which form the minor forest produce are tamarind, soapnuts, *Nuxvomica*, rattans and sarasaparilla. In Sriharikota island, tamarind, canes, sarasaparilla abound in large quantity.

Schemes taken up under Five Year Plans

During the Plan period schemes like forest regeneration, extension of casuarina plantations, *etc.*, were taken up and a working plan was also drawn up for better production and maintenance of forest wealth. Important species like casuarina, cashew, eucalyptus, neem, *etc.*, were raised. During the Second Five Year Plan period, ten schemes were taken up at a total cost of Rs. 5.792 lakhs for the development of forest wealth in the district as detailed below.

To meet the increasing demand for fuel, casuarina plantations was raised in 1,755 acres at a cost of Rs. 2.139 lakhs. Eucalyptus plantations were raised on an extra area of 246 acres at a cost of Rs. 0.195 lakhs. In order to increase the cashew plantations, an amount of Rs. 1.733 lakhs was spent and 6,515 acres were covered under these plantations. To regenerate the forests, plants were raised in 2,285 acres at an estimated cost of Rs. 1.394 lakhs. With a view to increasing the economic value of the forests, commercial crops like pineapple, cane, bamboo, *etc.*, were raised on 30 acres at a cost of Rs. 0.64 lakhs. Sixteen acres of experimental plots were raised at a cost of Rs. 0.033 lakhs to carry out research and experiments. Eight *Thanas* were opened at a cost of Rs. 0.77 lakhs to have effective check over the removal of timber from one place to another. One jeep was purchased at a cost of Rs. 0.149 lakhs and supplied to the Divisional Forest Officer, Nellore South to enable him to tour intensively and check illicit felling of forests. One boat was purchased at a cost of 0.008 lakhs for transportation of timber through Pullicat lake.

CHAPTER VII

CO-OPERATION

The Co-operative Movement in the country chiefly aims at the elimination of middlemen between the actual producer and consumer besides protecting the ryots from the capacity of money lenders. After the counrty attained Independence the Co-operative Movement has come to occupy a prominent place in the social and economic life of the country and accordingly a great deal of impetus has been given to this movement in Andhra Pradesh also. The movement came into being about 60 years ago after the passing of the Co-operative Credit Societies Act of 1904.

At first the Credit Societies were started; the Societies in the rural areas were established on unlimited liability basis and those in the urban areas on limited liability basis. Subsequently Non-Credit Societies were also started in various forms like Consumer's Co-operatives, Loan and Sale or Marketing Societies, Weaver's Societies *etc.* After the passing of the Co-operative Societies Act of 1912, there was a spurt in the growth of the Consumer's Co-operatives due to the scarcity conditions existing consequent on the Second World War for consumer goods. A number of Handloom Weaver's Co-operatives were also organised in the State to relieve the distress of the weavers.

Administratively the department, till 1938 consisted of one Assistant or one Sub-Deputy Registrar of Co-operative Societies assisted by Senior and Junior Inspectors for audit and supervision with headquarters at Nellore and with jurisdiction over Chittoor district also. After the introduction of prohibition in 1938 a separate Deputy Registrar was appointed to Chittoor with headquarters at Chittoor. Later due to increase in the activities of the Department Nellore district was bifurcated into two Co-operative circles *viz.*, Nellore North Circle and Nellore South Circle, each incharge of a Deputy Registrar of Co-operative Societies. Due to further impetus received during the Second Five Year Plan period the district had to be trifurcated and Kavali Circle was newly constituted on 1st August 1959. The district is at present divided into three Co-operative Circles each being under the charge of a Deputy Registrar of Co-operative Societies.

During the decade 1951-61 the Co-operative Movement registered considerable expansion in all fields of its activities. The progress was more marked in the Second Five Year Plan period (1956-61). In order to give new impetus to the Co-operative Movement in the Second Five Year Plan period the National Development Council adopted a new policy according to which co-operatives had to be organised on the basis of village community and revitalised by ensuring their effective functioning. The policy is also intended to secure universal membership, and make substantial increase in the credit facilities, to expand facilities for co-operative marketing, storage, warehousing, processing, farming and training. To achieve all these it was decided to simplify the laws, rules and procedures and to remove rigidity by decentralising and delegating powers to lower authorities.

In Nellore district an amount of Rs. 11.13 lakhs was spent during the Second Five Year Plan period for the development of Co-operative Movement under the various schemes as detailed below:

STATEMENT VII-1

	Name of the Scheme (1)	Amount spent (Rs. in lakhs) (2)
1.	Expansion of Rural Credit Societies	3.997
2.	Development of Co-operative Marketing Societies	6.405
3.	Education of Members	0.257
4.	Research, Survey and Statistics	0.052
5.	Labour Contracts and Forest Coupe Co-operative Societies	0.260
6.	Co-operative Farming	0.160
	Total	11.131

The important achievements during the Second Five Year Plan period are (i) organisation of 31 Large Sized Co-operative Societies and 378 Small Sized Societies; (ii) revitalisation of 298 Small Societies (iii) issue of short term loans to the tune of Rs. 371.650 lakhs and medium term loans to the tune of Rs. 19.491 lakhs and (iv) construction of 29 godowns. Seven Marketing Societies were constructed and 3,505 members were educated. Out of the 29 godowns constructed, six are rural godowns, seven have been constructed by the Marketing Societies and the remaining sixteen have been constructed

by the Large Sized Societies. There were 58,372 members in this district with a share capital of Rs. 19,74,385 at the beginning of the Second Five Year Plan. At the end of the Second Five Year Plan the membership and the share capital increased to 154,499 persons and Rs. 61,94,926 respectively.

The following statement shows the various types of the Co-operative Societies that were functioning at the beginning and at the end of the Second Five Year Plan.

STATEMENT VII-2

Type of Society	Total Number at the beginning of the Second Five Year Plan (on 1-4-1956)	Total Number at the end of the Second Five Year Plan (on 1-4-1961)

(vii) Harijan House Sites Societies	1	1
(viii) Building Societies	7	18
(ix) Unions	3	5

The progress achieved by these Societies during the First and Second Five Year Plans is detailed below :

First Five Year Plan period

Multi-purpose Co-operative Credit Societies : There were 680 Village Agricultural Credit Societies in the district at the beginning of the First Five Year Plan *i.e.*, 1951–52 and the number increased to 709 by the end of the First Plan with a membership of 47,637 persons.

Large Sized Societies : There were no Large Sized Societies in the district during the First Plan period. Steps were taken to organise these societies during the Second Plan period.

Banks : There were three Co-operative Rural Banks at the end of the First Five Year Plan in this district with a membership of about 809 persons and a paid-up share capital of Rs. 184,140.

Loan and Sale Societies : There were eleven Loan and Sale Societies in the district at the end of the First Five Year Plan with a membership of 3,587 and a paid-up share capital of Rs. 51,685. These societies issued loans on the pledge of produce. A sum of Rs. 10,71,835 was outstanding against the members at the end of the First Plan period.

Milk Supply Societies : There were sixteen Milk Supply Societies with a membership of 1,271 persons and paid-up share capital of Rs. 18,972 at the end of the First Five Year Plan period. Besides these 16 Societies there was also one Milk Supply Union with 80 members (71 individuals and 9 societies) with a paid-up capital of Rs. 800.

Fishermen's Societies : There were thirteen Fishermen's Societies with a membership of 719 and a paid-up share capital of Rs. 5,197 at the end of the First Five Year Plan period. Out of the thirteen societies, two societies obtained lease of fishing in the inland water sources on average rental basis.

Feild Labour and Tenants' Co-operative Societies : There were eighteen Tenant's and Field Labour Co-operative Societies at the end of the First Five Year Plan period with a membership of 1,414 and paid-up share capital of Rs. 9,391. The District Collector, Nellore issued temporary permission to these societies for the cultivation of lands. An extent of 1,506 acres was cultivated by these societies during the First Five Year Plan period.

Land Colonisation Societies : There were two Land Colonisation Societies at the end of First

Plan period in the district, out of which one society was assigned an extent of 200 acres by the Government for cultivation purposes. The Government also provided loans and subsidies to one society for the purchase of he-buffaloes and agricultural implements.

Salt Manufacturing Societies : There were three Salt Manufacturing Societies with a membership of 1,095 persons and a paid-up share capital of Rs. 12,167 at the end of the First Plan period. During this period these societies produced 2,43,291 maunds of salt valued at Rs. 1,80,387 and sold the entire stocks earning a commission of Rs. 5,125.

Besides, these societies mentioned there were 3 Urban Banks, 31 EmPloyees' Societies, 26 Consumers' Stores, 83 Palm Jaggery Societies' one Co-operative Wholesale Stores, 61 Weavers' Societies' and 7 Students' Co-operative Stores, 10 Cottage Industrial Societies, 9 Labour Contract Societies, 2 Forest Co-operative Societies and 11 Housing Societies actively functioning at the end of the First Five Year Plan period.

Central Credit

The Nellore Co-operative Central Bank is the financing bank of the district both for Credit and Non-credit institutions affiliated to it. It was classified as "A" class Bank at the end of the First Five Year Plan. The share capital of the Bank was Rs. 5,36,708. The reserve fund of the Bank was built up to Rs. 2,95,176. The borrowing of the Bank amounted to Rs. 85.11 lakhs. The working capital was Rs. 93,44,348.

Second Five Year Plan period

The Co-operatives covered about 38.6% of the villages and 19.5% of the population by the end of the First Five Year Plan period. Under the scheme of reorganisation and intensive supervision of rural credit societies, the Government was very anxious to relieve the burden of indebtedness among the rural agricultural population through the medium of co-operatives. Since this object could not be achieved by the co-operatives satisfactorily the Government again planned atleast to provide employment for the landless agricultural labourers and relieve the unemployment problem among the agricultural workers in the rural areas. To achieve this end, much importance was given for organising the Tenant's Societies and Labour Contract Societies, during the Second Five Year Plan period.

During the Second Five Year Plan period, it was programmed to expand the activities of the Rural Credit Co-operative Societies to see that they cover about 86% of the villages and about 45% of the population by the end of the Second Five Year Plan period *i. e.*, by 1960-61. On the basis of the position existing at the close of the First Five Year Plan, it was proposed to increase the percentage of coverage of the villages and the population by intensifying the drive in the organisation of new Rural Credit Societies and enlarging the area of operation of the existing societies and also launch a special drive to increase the membership of the societies. It was also proposed to improve the loan transactions of the Multi-purpose Credit Societies considerably so that there should be an increase of 100% in the issue of short term loans and atleast 75% in the case of medium term loans with a view to meeting the entire agricultural requirements of the members of the Rural Credit Societies.

Further, it was also proposed to strengthen the rural credit structure by amalgamating small societies and starting large sized societies at convenient centres. Thus within the first three years of the Second Five Year Plan period seven Large Sized Societies were organised with a membership of 1,678 persons and paid-up share capital of Rs. 1,42,980 in the Nellore North Circle. Utmost importance was attached to the organisation of Rural Banks with a view to providing credit facilities to the rural population and to inculcate the habits of banking and thrift among them by tapping local deposits to the fullest extent possible. With this object in view one Rural Bank was organised at Allur. At the end of the year 1955–56 there were 314 members on the rolls with a paid-up share capital of Rs. 76,520. The Bank also issued loans to the extent of Rs. 7,38,089 and tapped rural deposits to the extent of Rs. 36,219.

Integrated Rural Credit and Marketing

The scheme aims at covering all villages by co-operatives and hereby bringing the entire population under co-operatives. During the Second Five Year Plan period it was programmed to expand the activities of the Rural Credit Societies to see that they cover 86% of the villages and 43% of the population atleast by the end of the second plan period *i. e.*, by the end of 1960-61. At the beginning of the Second Plan period, only 38.6% of the villages and 19.5% of the population was covered by the co-operatives. Due to the intensive drive undertaken during the Second Plan period about 62% of

villages were covered and 31.7% of the total population was brought into the Co-operative fold by the end of the Second Plan period *i. e.*, by 1960–61. Steps were taken to increase the enrolment of members in the societies.

Issue of Credit to Rural Population

Apart from the intensive drive launched during the Second Five Year Plan for the organisation of a number of village credit societies with a view to covering all the villages and to bring the entire population into co-operative fold. Due importance was also given to improve the loan transactions of the Multi-purpose Co-operative Societies considerably and to see that there should be an increase of 100% in the issue of short term loans and 75% in the case of medium term loans so as to meet all the agricultural credit requirements of the members. Importance was also attached to the organisation of Large Sized Societies and Rural Banks with a view to providing credit facilities to the rural population and to inculcate the habit of the thrift and banking among them. Steps were also taken to tap local deposits to the fullest extent thereby providing means to increase the working capital of these Large Sized Societies and Rural Banks.

During the Second Five Year Plan period 5 new Rural Banks and 4 Large Sized Societies were formed in the Nellore North Division with a view to stepping up the loan business in the agricultural sector. The business done by the Large Sized Societies and Rural Banks in respect of loans issued during the Second Plan period is furnished hereunder.

STATEMENT VII-3

Year	Loans issued in North Division			Loans issued in Nellore South Division
	Large Sized Societies	Rural Banks	Agricultural Credit Societies	
(1)	(2)	(3)	(4)	(5)
	Rs.	Rs.	Rs.	Rs.
1956-57	71,065	10,63,737	20,48,908	26,50,000
1957-58	1,73,783	21,48,475	20,33,000	25,22,000
1958-59	4,08,326	28,57,094	25,75,000	35,85,000
1959-60	8,16,885	32,35,785	24.63,000	29,35,000
1960-61	5,13,569	26,98,445	22,71,649	33,19,675

The credit facilities provided by the Agricultural Credit Societies including Large Sized Societies and Rural Banks were far below the requirements of the ryots when compared to their cost of cultivation and increasing wages. The District Financing Bank was not able to meet the demands of all the ryots as it was not able to borrow due to reduction of Reserve Bank of India credit limits on account of the change of its classification in audit. The weak financial position of the District Financing Bank had its own effect on the issue of loans to the credit societies on account of which better progress could not be achieved in this regared.

Revitalisation

In order to revitalise the existing village credit societies which were not properly working and to develop the activities of the newly registered village agricultural credit societies, the Government introduced "The Revitalisation Scheme". Under this scheme the selected societies were given subsidies towards the cost of maintenance of the part time clerks appointed by them. The work of the part-time clerks was to write the accounts of the societies as well as to attend to the collection of loans due from members and also to admit more members into the societies and to make the societies undertake non-credit activities. Under the scheme, the societies selected were given financial assistance to the extent of Rs. 900 in a period of five years as per a graded scale at the rate of Rs. 300 in the first year, Rs. 200 in each of the second and third years, Rs. 100 in the each of the fourth and fifth years. During the second Five Year Plan period a sum of Rs. 24,575 was disbursed to 91 societies in the Nellor North Division. The scheme was orginally proposed for the development of activities of the societies and improvement of their business. As some of the societies which received the grants could not show appreciable improvement in the working and development of these societies the scheme was later confined to the societies that were undertaking the non-credit business like distribution of manures and other essential commodities.

Dairy Development

At the beginning of the Second Five Year Plan period there were only 16 Milk Supply Societies in the district with a membership of 1,271 and a paid-up share capital of Rs. 18,972. The production of these societies amounted to Rs. 80,849 during the first year of the Second Five Year Plan. There was one Milk Supply Union in the district at the beginning of the Second Five Year Plan. On account of the trifurcation of this district into three Deputy Registrar's Circles during the year 1959-60,

The Nellore Co-operative Milk Supply Union was transferred from the administrative control of the Deputy Registrar, South Circle to the Nellore North Circle. By the end of the Second Five Year Plan, there were 21 Milk Supply Societies in the district with a membership of 1,333 and a paid-up share capital of Rs. 42,575. There were 127 members in the Milk Supply Union with a paid-up share capital of Rs. 2,175. The union purchased milk worth Rs. 92,441 from the affiliated societies and individual members and sold milk worth Rs. 103,864 during the year 1960-61.

The Milk Supply Societies were organised with a view to providing a subsidiary occupation to the agriculturists. On account of the lack of better transport facilities to procure milk from rural areas to urban areas where there is demand for milk, and also owing to the non-availability of standard preservation facilities to preserve the milk for longer duration, the society could not make better progress in the production of milk. The Nellore Co-operative Milk Supply Union was sanctioned Government aid to the tune of Rs.6 lakhs for the establishment of plant and its equipment for the presevation of milk with a view to increasing the supply. Besides, the Government also sanctioned an Intensive Milk Supply Scheme at a cost of Rs. 6.20 lakhs. After the complete construction of the building and the installation of the machinery it is hoped that the dairying activities would develop considerably.

Co-operative Education and Training

In order to educate the people about co-operation, its values, rules and regulations, the Government proposed to provide training and education on co-operation by conducting classes in the rural areas to the members and office bearers of the village co-operatives. The Development Officer, Central Co-operative Union, Hyderabad was made incharge of the project. During the Second Five Year Plan period this scheme was also extended to the Nellore North Circle and Thotapallegudur Panchayat Samithi was selected as the training centre. One Co-operative Sub-Registrar was appointed to conduct the classes and give training. About 1,295 members and 278 Panchayatdars and office bearers were imparted training. In the year 1962 the scheme was taken up by the Andhra Pradesh Central Co-operative Union.

Co-operative Farming

There were 2 Land Colonisation Societies, 13 Field Labour and Tenant Co-operative Societies and two Irrigation Societies in Nellore at the end of the Second Five Year Plan period. The working of these societies during the Second Five Year Plan period is described below.

Land Colonisation Societies

There were two land colonisation societies in Nellore North Circle at the end of the Second Five Year Plan period with a membership of about 252 persons and paid-up share capital of Rs. 3,772. An extent of 360 acres was alloted by the Government to these societies out of which the societies have reclaimed about 300 acres. Paddy was the main crop raised.

During the second crop season, horsegram, bengalgram, *pillipesara* were also grown. In addition to the allotment of land, Government also sanctioned free grants and loans to the societies for the purchase of cattle, ploughs and other agricultural implements. The details of the grants and loans are furnished below:

Loans for the purchase of buffaloes	Rs.	18,900
Subsidy for the purchase of buffaloes	Rs.	18,900
Loans for the purchase of agricultural implements	Rs.	6,000
Subsidy for the share capital of members	Rs.	2,520
Subsidy for the purchase of seeds	Rs.	2,670
Subsidy for the purchase of manures	Rs.	750
Subsidy towards repairs to wells	Rs.	14,000

In addition to the above financial aid the Government also sanctioned a loan of Rs. 2,625 to Siddipuram Co-operative Land Colonisation Society for the construction of godown to provide storage facilities to the colonists. House sites were also provided to them. During the year 1959-60 pucca houses at Rs. 750 each were constructed and given to them free of cost.

Field Labour and Tenant's Co-operative Societies : There were 13 Field Labour Co-operative Societies in Nellore North Circle at the end of the Second Five Year Plan period with a membership of 1,221 persons and a paid-up share capital of Rs. 875. The Government came forward and granted lands to the societies to the extent of 913 acres on a temporary annual rental basis.

In the Nellore South Circle the Co-operative Farming Societies increased from 8 at the beginning of the Second Five Year Plan to 12 at the end of the Second Plan period. The membership also increased from 309 to 723.

In the Kavali Circle there were 5 Tenant's Co-operative Societies and one Field Labour Co-operative Society at the end of the Second Five Year Plan with a membership of 647 and a paid-up share capital of Rs. 3,650. These Societies could not function on sound lines in this circle as they could not get lands on permanent assignment basis or on long term lease and as such the members hesitated to invest capital.

Irrigation Societies: There were two irrigation societies in the district at the end of the Second Five Year Plan period. Of the two societies only one society has been actively functioning with a membership of 118 persons and a paid-up share capital of Rs. 9,540. This society carried out irrigation works valued at Rs. 33,009 and irrigated a total area of 70 acres. Only dry crops were raised initially and attempts were being made to provide irrigation facilities to about 100 acres in order to raise paddy also in these areas.

Housing Societies (Urban & Rural): There were 15 Urbon and 7 Rural Housing Societies at the end of the Second Five Year Plan period in this district. The Rural Housing Societies were in a dormant condition during the Second Plan period.

Co-operative Marketing

Co-operative marketing primarily requires proper storage facilities. Hence, with a view to providing storage facilities to the agriculturists and enable them to stock their produce until a fair and reasonable price has been assured in the market, the Small Sized Co-operative Societies, Rural Banks, Large Sized Societies and Primary Marketing Societies were given Government aid by way of loan and subsidy to construct godowns.

Nellore North Circle: In this circle during the Year 1956-57 the Allur West Multipurpose Co-operative Society constructed a godown at a cost of Rs.23,460. The Government also provided a loan amounting to Rs. 5,000 and subsidy to the tune of Rs. 9,999 also. During the year 1957-58 the Allur Co-operative Rural Bank was sanctioned Rs. 15,000 as loan and Rs. 7,500 as subsidy for the construction of godowns. The Bank was able to complete the construction of the godowns during the Year 1958-59 at an estimated cost of Rs. 3,000. The Rural Banks at Buchireddipalem, Vovveru and Inamadugu had also constructed the godowns each at an estimated cost of Rs. 3,000. The Pedaputhedu Large Sized Co-operative Society also undertook the construction of godowns at an estimated cost of Rs. 30,000 and the Government sanctioned a loan of Rs. 15,000 and a subsidy of Rs. 7,500. The construction of the godown was under progress at the end of the Second Five Year Plan period.

The Ramannapalem Large Saized Co-operative Society also proposed to construct a godown at a cost of Rs. 30,000 during the year 1956-57. The society was sanctioned a State loan of Rs. 15,000 and a subsidy of Rs. 7,500. The construction was completed during the year 1958-59. In the same year three more large sized societies came forward for the construction of godowns. Government loan and subsidy were also sanctioned to them. But the societies could not complete the construction and they were still under construction at the end of the Second Five Year Plan period. During the last year of the Second Five Year Plan period *i.e.*, 1960-61, 9 Agricultural Credit Societies proposed to take up the construction of godowns with Government aid at a cost of Rs. 30,000 each. Each society was sanctioned a Government loan of Rs. 15,000 and subsidy of Rs. 7,500 towards the construction of the godowns. Out of the above nine societies only the Kovur Multipurpose Co-operative Society and North Mopur Multipurpose Co-operative society had completed their construction works and in the remaining cases the construction was under progress at the end of the Second Five Year Plan period.

In addition to the above societies, the Allur Co-operative Marketing Society started the contsruction of three sets of godowns at Allur and the Rural godown at Indupur at a cost of Rs. 80,000 and Rs. 10,000 respectively. The construction of these godowns was completed by end of the Second Five Year Plan period. Further, the Atmakur Marketing Society, Muthukur Loan and Sale Society and the Mypadu Loan and Sale Society started the construction of godowns. Government loan of Rs. 15,000 and a subsidy of Rs. 7,500 were sanctioned to these societies also. The construction of godowns by these societies was under progress at the end of the Second Five Year Plan period.

Nellore South Circle: In this circle Government sanctioned financial assistance for the construc-

tion of 8 godowns by the Co-operatives as detailed below :

STATEMENT VII-4

Name of the Society	Government Assistance	
	Loan (in Rs.)	Subsidy (in Rs.)
(1)	(2)	(3)
Jayampu L. S. C. S.	15,000	7,500
Chejerla L. S. C. S.	15,000	5,000
Chennur L. S. C. S.	15,000	5,000
Podalakur L. S. C. S.	15,000	7,500
Mamduru L. S. C. S.	15,000	5,000
Nidiguntapalem L. S. C. S.	15,000	5,000
Kota Loan & Sales Society	7,500	2,500
Venkatagiri Rural Bank	15,000	7,500

Kavali Circle: There were two Lown and Sales Co-operative Societies at the beginning of the Second Five Year Plan while one more was registered during the Second Plan period at Kanigiri thus increasing the number of Societies to three by the end of the Second Eive Year Plan. These societies did not undertake marketing of the member's produce but undertook the distribution of chemical fertilizers. Two of these societies undertook the wholesale distribution of rice and also ran fair price shops. Kavali Loan and Sale Co-operative Society was sanctioned one main godown at an estimated cost of Rs. 25,000 on the basis of 75% loan and 25% subsidy. Half of the amount was drawn and distributed to the society. The society was also sanctioned two auxiliary godowns at an estimated cost of Rs. 10,000 each, 25% being subsidy and 75% being loan. Half of the amount was drawn and distributed to the society at the end of the Second Five Year Plan.

The Kandukur Loan and Sales Co-operative Society was also sanctioned one main godown at an estimated cost of Rs. 25,000, 75% being loan and 25% being subsidiary. Half of the amount was drawn and disbursed to the society. This society was also sanctioned two auxiliary godowns at an estimated cost of Rs. 10,000 each. The construction of the main godown was commenced.

Palm Gur Development Societies : These societies were started with a view to rehabilitating ex-tappers who were thrown out of employment on account of the introduction of prohibition. Almost all of them had been employed in the tapping of sweet juice and manufacture of jaggery. Licenses were issued to these Societies for tapping toddy and manufacture of jaggery.

At the end of the Second Five Year Plan period there were 90 Palm Jaggery Societies with a membership of 8,442 persons.

Poultry Scheme : At the end of the Second Five Year Plan period there were two Egg Production and Sales Societies with a membership of sixty four persons and a paid-up share capital of Rs. 921. These societies were dormant during the Second Plan period.

Handloom Industry

Weavers' Co-operative Societies : With a view to increasing the production and stabilising the industry to the best advantage under the co-operative system, the Government approved a scheme for bringing all the weavers under the co-operative fold. The scheme gained momentum under the Five Year Plans.

At the begining of the Second Five Year Plan period there were about 61 Weavers Co-operative Societies in the district. During the Second Five Year Plan period the Government sanctioned assistance like rebate on the retail sale of Handloom cloth, share capital loans to the members in order to admit outside weavers into Co-operative Societies, subsides for opening sales depots by the Primary Weavers' Co-operative Societies, *etc.*, with a view to encouraging the industry. Registration of Handloom Co-operatives was also taken up during the Second Five Year Plan period with a view to bringing a larger number of outside weavers into the Co-operative fold. Thus at the end of Second Five Year Plan period there were only 64 Weavers' Co-operative Societies. The following statement shows the number of Societies at the beginning of the First Five Year Plan and at the end of the First Five Year Plan and Second Five Year Plan and the number of looms and weavers at the end of the Second Five Year Plan.

STATEMENT VII-5

No. of Weavers' Co-operative Societies :	
(a) At the beginning of the First Five Year Plan	44
(b) At the end of the First Five Year Plan	61
(c) At the end of Second Five Year Plan	64
No. of looms in the Co-operative pool at the end of the Second Five Year Plan	7,830
No. of weavers in Co-operative Societies at the end of the Second Five Year Plan	7,830

Varieties produced

The societies in this circle produce sarees, dhotis, shirtings, coatings, and other utilitarian varieties. The Kovur Weavers' Co-operative Society produces fine varieties of shirtings including check pattern shirting which commands a good demand. The Patur Weavers' Co-operative Society produces sarees of higher counts which are also sold in other States like Madras and Bombay. The Venkatagiri Weavers' Co-operative Society produces fine varieties of sarees of higher counts upto 250's and cloth for blouses. Sarees with zari work produced by this society are famous and are in great demand both

within this State and also in other States Yellayapalem and Narayanarddipet Weavers' Co-operative Societies employ expert weavers to produce dhotis of high counts which have a good demand in the State.

Madras Bleeding Variety

Almost all the societies in this district are producing the Madras Bleeding variety after entering into contracts with the Andhra State Handloom Weavers' Co-operative Society. There is seasonal demand for the cloth and this variety of cloth is mainly intended for export business and is not used locally. The district is also known for the Madras Handkerchiefs.

Research and Techniques

As a part of the cess fund scheme, improved weaving appliances were supplied to the societies by the Andhra State Handloom Weavers' Co-operative Society, The Kovur and the Stonehousepet Weavers' Co-operative Societies are maintaining the dye factories of their own and the Alaganipadu Weavers' Co-operative Society is maintaining its own dyeing factory with the aid of the Andhra Handloom Weavers' Co-operative Society. The entire yarn requirements of the Societies were purchased and got dye, in the dye factories of the societies according to the needs. At the instance of the Central Government, the All India Handloom Week is also celebrated in this district every year with a view to increasing sales and thereby encourage the small scale industrial establishments. During the exhibition elocution contests are conducted among the Secondary School students and several ways and means are discussed by them for the improvement of the Handloom Industry. Under the cess fund scheme, rebate shecmes were also introduced from April 1954. As per this scheme certain amount was allowed as rebate on the market price to all consumers of handloom cloth. This scheme, apart from being an inducement to the buyers had indirectly increased the production of handloom cloth which ultimately added to the development of the industry. During the First Five Year Plan period a sum of Rs. 4,742 was sanctioned to the weavers' co-operative societies towards reimbursement of rebate allowed by them on the retail sales of handloom cloth. A sum Rs. 455 as subsidy was also sanctioned to the societies towards the expenditure incurred by them durin the Handloom Week Celebrations. During the Second Five Year Plan period a sum of Rs. 2,86,388 was disbursed to the weavers' societies as subsidy towards the reimbursement of rebate allowed by them on the retail sales of handloom cloth.

Marketing

During the First Five Year Plan period it may be said that the marketing side of the handloom cloth in the Co-operative sector was not, however, encouraging. Only with the introduction of the rebate scheme under the cess fund scheme with effect from April 1954 some attempts were made for the development of the marketing of handloom cloth. Several depots were opened by the Andhra State Handloom Weavers' Co-operative Society in order to increase sales. During the Second Five Year Plan period under the cess fund schemes the Primary Weavers' Societies were also encouraged to open sales depots at all important places.

Housing Scheme

Two Weavers' Co-operative Societies *viz.*, the Alaganipadu Weavers' Co-operative Society and the Stonehousepet Weavers' Co-operative Society were sanctioned Housing Colony schemes under the cess fund schemes. The Alaganipadu Weavers' Co-operative Society started a housing colony scheme consisting of 40 houses for its members at an estimated cost of Rs. 1,58,400 upto the end of Second Five Year Plan. Rs. 1,20,000 was sactioned as loan and a sum of Rs. 38,400 as subsidy to this society. At the end of the Second Plan period 1960–61, the construction of all the 40 houses was nearing completion.

The Stonehousepet Weavers' Co-operaitve Society also started the construction of about 57 houses under the weavers' housing colony scheme at an estimated cost of Rs. 2,55,000. The society was sanctioned a sum of Rs. 71,3,000 as loan and a sum of Rs. 38,400 as subsidy for the construction work At the end of the Second Plan period the construction was making rapid headway.

CHAPTER VIII

INDUSTRIES

Nellore district is predominantly an agricultural district. There are no large scale and organised industries in this district apart from the mica mining industry in Gudur, Rapur and Atmakur taluks. Among the other industries, slate mining in Podili taluk, beedi industry in the Nellore and cigar factories in Naidupet, the Government Ceramic Factory and the Government Block Glass Factory at Gudur and the straw board factory at Nellore are important.

Mica Mining

While India remains the chief mica producing country in the world, Andhra Pradesh is the third largest Mica producing State in India next to Bihar and Rajasthan. 95% of the mica produced in the State comes from Nellore district.

The mica mines are found in a vast belt in Rapur, Gudur and Atmakur taluks of this district. The most productive mines are situated in Sydapuram (Sha-mine), Turpupundla, Tummalatalpur, Chaganam, Kalichedu and Inikurthi.

Mica industry in this district has been well established from the early part of this century though it sufferred a set back in 1957 owing to the restrictions of exports to U.S.A. Trade contracts were renewed with Japan, Far East and East European countries and the exports market now shows gradual signs of improvement. With growing demand for moulded micanite for electrical industries, a micanite factory was set up under the private sector in Gudur. This factory may be able to meet the requirements of the Heavy Electrical Machinery Project also.

Exports of mica from this district recorded the very high figures of 34,838 cwt. of block and spotted mica and splittings and 28,948 cwt. of scrap. The value of mica splittings averages Rs. 30 lakhs annually. The value of mica exported from the State in 1956 was Rs. 2,21,13,000 which was over 20% of the value of India's production of mica in 1956. The foreign exchange earned by the Andhra Pradesh State in 1956 by exports of mica was Rs. 17.5 million. In 1959–60 there were 97 mining leases of which 40 to 60 were under operation; the outturn during 1959–60 was about 3,020 tonnes.

Large and Medium Industries

There are three factories *viz.*, the Government Ceramic Factory, Gudur, the Block Glass Factory, Gudur and the Straw Board Factory, Nellore under the category of large and medium scale industries in this district. Of these three, the first two owned by the Government have been functioning from a long time. The third factory which is under private management was commissioned only in December 1962.

Government Ceramic Factory, Gudur: The Government Ceramic Factory, Gudur is one of the large commercial undertakings managed by the State Industries Department. The construction of the factory was completed by the end of 1948 and it began to function from 1949–50. In the initial stages the production in this factory was confined mainly to sanitary ware and crockery. To meet the requirements of the power projects undertaken during the Second Plan period, not only increased production was aimed at but the manufacture of porcelain insulators *etc.*, was also taken up as an additional line of production. The expansion scheme of this factory at a cost of Rs. 12.5 lakhs, was included in the Second Plan programme. The expansion programme of this factory has been completed and the production has increased from 5.5 lakh lbs. to 11 lakh lbs. per annum.

Government Glass Plant, Gudur: This plant was constructed at a cost of Rs. 1,01,200 in the public sector with the object of manufacturing block glass in various colours suitable for manufacture of bangles and beads in the State. As the demand for these products was not adequate and encouraging the production had to be closed down in October 1956 for some period. Later, the services of a Glass Technologist were secured and the factory was reorganised to diversify production and to take up manufacture of hollow-ware and pressed ware *etc.*, in addition to black glass.

Straw Boards : This industry was started in Nellore in 1962 in the private sector with Government aid. The buildings etc., have been constructed and the factory has gone into production.

Small Scale Industries

Regarding small scale and cottage industries the district has got vast potentialities. As agriculture is the major occupation of the people, efforts are being made to provide subsidiary occupations to the agriculturists during the off season.

During the First Five Year Plan period there were no small industrial units in the public sector in this district. In order to provide training facilities and to impart knowledge to the artisans in improved methods of manufacture of agricultural implements and standard furniture, production-*cum*-training centres in blacksmithy and carpentry were established in 1957, the beginning of the Second Five Year Plan period. The target of the scheme is to impart training to 12 trainees in each trade every year. During the Second Five Year Plan period the targets were successfully fulfilled by imparting training to sixty trainees in blacksmithy and sixty trainees in carpentry.

During the Third Five Year Plan period the above two schemes were converted into non-plan schemes. A production wing was attached to the training centre in carpentry during 1960 with a view to meeting the increasing demand for furniture in the region. Six skilled workers with a daily wage of Rs. 3 each are employed in the production wing. In order to help poor artisans engaged in village industries and cottage industries, loans are sanctioned every year for the purchase of improved tools as also for utilising as working capital.

The amounts disbursed under this head are detailed below :

STATEMENT VIII-1

Year		Amount (in Rupees)
1955-56	..	3,500.00
1956-57	..	5,250.00
1957-58	..	7,900.00
1958-59	..	17,30.00
1959-60	..	8,550.00
1960-61	..	N. A.
1961-62	..	31,000.00
1962-63	..	23,800.00

In order to improve the economic conditions of the Small Scale Industries in the district, loans are provided under the State Aid to Industries Act, to step up their production capacities. The details of the help rendered to the various small scale industrial units are as detailed below :

1.	Messrs. Technocastings, Nellore	Rs. 28,000
2.	R. C. C. Spun Pipe Engineering Works	Rs. 31,000

With a view to securing statistical information regarding the investments, machinery available, production capacities existing and items manufactured, all the small scale industrial units in the district are programmed to be registered and so far about 170 units are registered with the Industries Department. According to the Industrial Survey conducted during 1960 by the department the following are the main types of small scale industries existing in the district.

Rice Mills : There are about 212 rice mills with a capital investment of Rs. 93.5 lakhs and with 5,332 H.P. load employing about 1,250 regular workers. Paddy worth Rs. 5.82 crores is processed producing rice worth about Rs. 6.32 crores.

Flour Mills : There are about 28 flour mills with a capital investment of Rs. 3.3 lakhs and with 265 H. P. employing about 70 regular workers. Rs. 50 lakhs worth of rice, wheat, and pulses are handled in these mills.

Oil Mills : There are 9 oil mills with a capital investment of about Rs. 6.23 lakhs and with 358 H.P. employing about 90 workers and consuming different kinds of oilseeds worth of Rs. 12.57 lakhs and producing groundnut, gingelly, coconut and other oils worth about Rs. 17.56 lakhs annually.

General Engineering Works : There are about nine general engineering workshops worth mentioning, with a total capital investment of about Rs. 6.25 lakhs employing 200 workers on regular basis, either rendering services or used as maintenance workshops.

Iron and Brass Foundries: There are three foundries with a total investment of rupees three lakhs, a total load of about 75 H.P. employing 70 workers on regular basis with an annual output of Rs. 1.75 lakhs.

Ginning and Shelling Factories : There are two ginning and shelling factories with an investment of rupees 1.1 lakhs and with 97 H.P. employing about 130 workers on a regular basis. The annual output is about Rs. 11 lakhs.

Bone Meal: There is one unit at Kodavalur with a capital investment of Rs. 1.25 lakhs and a total

load of 25 H.P. and employing about 20 workers. The annual output is worth Rs. 1.25 lakhs. This unit caters to the needs of the agriculturists in the neighbouring area.

Printing and Dyeing Units : There is one printing and dyeing unit worth mentioning in the district with a capital investment of Rs. 1.5 lakhs, employing only skilled labour with an annual production valued at Rs. 5 lakhs.

Match Works : There are two match factories falling under the category of cottage industries, with an investment of Rs. 0.50 lakhs and employing about 70 workers. They also provide part-time employment to about 100 workers with an annual outturn worth Rs. 1.6 lakhs.

Cement Concrete Works : There are two fairly large cement concrete works apart from other small units, with an investment of Rs. 0.75 lakhs and a load of 25 H.P. They employ nearly 24 workers on regular basis. The annual production is estimated at Rs. 0.4 lakhs.

In addition to the industries mentioned above manufacture of micanite, saw mills, pen manufacture betel nut powder works, coffee grinding works, ink and cosmetics manufacture are the other importan industries of the district. Slate stone is extracted regularly from three fairly big quarries in the district. The district is famous for its mica mines and there are about 50 mines situated in Rapur, Gudur and Atmakur taluks. But the mica is exported in its raw form to foreign countries.

Village Industries

During the First Five Year Plan period, a Cottage Industrial Scheme in glazed pottery was started at Cherlopalle village in Venkatachalam Block. Eight trained artisans were employed in that project. During the Second Five Year Plan period considerable progress was achieved under the Community Development Programme in the development of improved skills among the rural artisans by starting 46 units of different trades of village industries and training for 1,289 artisans in new fields of industrial activities was provided. They were equipped with improved tools also.

The schemes relating to village industries started during Second Five Year Plan period in Block areas and the number of artisans trained are given below :

STATEMENT VIII-2

S. No. (1)	Name of the Block (2)	Name of the Scheme with location (3)	No. of Artisans trained (4)
1.	Venkatachalam	Production-*cum*-Training Centre in Blacksmithy, at Survepalle	19

Industrial Estate

In the industrial development of the country Small Scale Industries play a vital role as ancillaries to major and medium industries. Hence, several steps have been taken by the Government to develop Small Scale Industries. The setting up of production-*cum*-training centres, research units, model industrial units, establishment of small industries, service institutes, provision of marketing facilities, supply of machinery on hire purchase system and sanctioning of loans under the State Aid to Industries Act, are some of the important measures undertaken by the Government in this regard. Another very important step taken by the Government is the setting up of Industrial Estates to locate Small Scale Industrial units.

An Industrial Estate is a developed and planned site with properly designed and readily built factory buildings of different sizes conforming to Municipal and Factory Laws, available on modest rent or rent purchase basis to Small Scale Industries with roads and other communication facilities, water and electricity connections.

A small Industrialist with his meagre resources finds to difficult to find investment at different stages *i.e.*, from starting a factory building to equipment

and capital and even if he is able to find finances he has to face many hurdles like acquisition of site, approval of the plan for the construction of buildings, getting water supply and electricity connections *etc.* These difficulties and attendant delays discourage the enterpreneur. The industrial estates solve these problems. The advantages of an industrial estate are many. The small entrepreneur need not freeze his scarce capital in brick and mortar. He can avoid the usual hurdles of getting building plan approved and in securing licence. Electricity and water supply will be made available in abundance. Ready built work space in a well laid out area with roads is available to him as also common services like the bank, post office, telephone, first-aid creche, playground *etc.* He can utilise the servicing centre on the estate for processes such as heat treatment, electroplating, enamelling and other branches of specialised production. He can use the technical advice and technical library to advantage. Raw materials, especially steel and pig iron are easily procured. He can take the advantage of inter-trading and inter-servicing facilities among the units of the Estate, with a consequent reduction in the cost of production which will enable him to market his products at competitive prices.

The programme of Industrial Estates was started in Andhra Pradesh as in the rest of the country in 1957 with a modest proposal to set up five estates one each at Sanathnagar (Hyderabad), Visakhapatnam, Vijayawada, Samalkot and Nandyal at a cost of Rs. 70 lakhs. Due to the encouraging response for such Estates three more were started one in 1959 at Warangal, the second in Cuddapah and in 1960 the third at Chandulal Baradari (Hyderabad). The estates offer ideal factory accommodation of different sizes at moderate rents to entrepreneurs setting up small scale industries. Every estate has a Common Service Centre consisting of a tool room, heat treatment section *etc.* Raw material depots are also being established on the Estate to facilitate easy procurement of raw materials.

Assisted Private Industrial Estate, Nellore

Owing to the popularity achieved by the estates, there were demands from other parts of the State also for establishment of similar estates. It was not possible for the Government with its limited resources to establish estates at many places on the usual pattern. The Industries Department has, therefore, evolved a modified scheme known as the Assisted Private Industrial Estate for promoting these Estates at as many places as there is scope and demand. Under the modified scheme, the estate will be set up as a joint venture between the Government and the prospective occupant industrialists. The Government will finance the cost of all common items like the acquisition of land, provision of water supply, drainage, sanitary facilities, electric mains and construction of roads. Thus fully developed factory sites will be made available on long term lease to prospective occupant industrialists. The occupant industrialist will have to construct his factory building on the allotted site according to approved type design and procure and install machinery and equipment required for his enterprise. He can avail himself of liberalised loan assistance, upto 60% towards cost of land and building and 75% towards cost of machinery, from the Andhra Pradesh Financial Corporation. A special feature of the corporation loan is that it is repayable in ten to twelve years. Repayment will begin one year from the date the unit goes into production or two years from the date of disbursement of any portion of the loan whichever is earlier. The entrepreneurs in these Assisted Estates will, in other respects, enjoy all the previleges of tenants in the conventional Estates and will have all the common facilities also such as tool room, raw material depot *etc.* The Government sanctioned fourteen such Assisted Estates to be set up at Vizianagaram, Rajahmundry, Anantapur, Adoni, Eluru, Guntur, Chittoor, Amadalavalasa, Masulipatnam, Nellore, Jangaon, Proddatur, Hyderabad, Parkal and Tirupathi.

The scheme for establishing the Assisted Private Industrial Estate at Nellore under this modified scheme was sanctioned in G.O. Ms. No. 1167, Industries Department, dated 17-8-1961. An amount of Rs. 2,00,000 was sanctioned as non-recurring expenditure towards the cost of land and common services and Rs. 7,000 as recurring expenditure towards the salaries of the Estate staff.

An extent of 40.91 acres of Government land in Nellore town was alienated to the Industries Department in January 1962. An additional land of 13.58 acres is being acquired for marginal adjustment of lay out.

The construction of administrative buildings, formation of roads, drainage, water supply and other departmental works were taken up by the Special Civil Engineering Circle in January 1962.

As per the revised lay out of the Estate, the site is divided into 55 plots, as follows:

STATEMENT VIII-5

Type of unit (1)	No. of Blocks (2)
'A' Type factory Units	8
'B' do	10
'C' do	4
'D' do	8
'E' do	19
'F' do	16
Total	55

Thirtyseven plots were already aliotted to 37 entrepreneurs and some of them have started the construction of their factory units and making headway.

Handicrafts

Indian Handicrafts have a great antiquity and have come to us as a precious heritage. In Nellore district Venkatagiri and Udayagiri are reputed for the exquisite zari sarees and wood works respectively. The Handicrafts scheme in public sector in Nellore district was started only in the Second Five Year Plan. The following Handicrafts Schemes were implemented during the Second Five Year Plan period.

Udayagiri Wood Workers Industrial Co-operative Society, Udayagiri : The members of the Udayagiri Wood Workers Industrial Co-operative Society produce artistic woodenware, articles like fine engraved spoons, hand sticks, bowls, tumblers *etc.*, with great skill and workmanship. There is a good demand for these articles from the handicrafts emporia of Andhra Pradesh and Madras and the industry is progressing rapidly. The Society is given aid by Government for maintaining the post of a Salesman and a Senior Inspector as Manager.

Venkatachalam Thunga Mat Co-operative Society Venkatachalam : The members of this society produce thunga mats of medium size and coarse varieties and these products command very good demand in the State. This society is given aid for the post of a Manager and a working capital loan of Rs. 4,000.

Nellore Bamboc and Rattan Workers' Industrial Co-operative Society, Nellore : This society chiefly produces screens with bamboo chicks, curtains rattan chairs and is supplying them to offices on contract basis. This handicraft is encouraged by giving managerial assistance and a working capital loan of Rs. 3,000. In addition, a share capital loan of Rs. 1,000 also was given to this society.

Vellala Yanadi Colony Mat Weavers Industrial Co-operative Society, Vellala : The Scheme is introduced for the development of mat weaving by Yenadis in the colony. The society is aided by the Government from the handicrafts funds by way of providing a subsidy to the manager's post and granting a working capital loan of Rs. 3,000 besides a share capital loan of Rs. 500.

In addition to these assistances given to the Handicraft Societies for the development of various Handicrafts Industries, a training scheme has been introduced in artistic woodenware industry. A centre was opened at Udayagiri at an estimated cost of Rs. 10,440 during 1962-63. The scheme is intended to train a few batches of craftsmen under the existing master workers of the Udayagiri Wood Workers' Industrial Co-operative Society and thereby enable the industry to sustain and serve the needs of the future.

Training of Artisans

With a view to impart training to village artisans in improved methods of manufacturing quality furniture and agricultural implements, departmental centres were established in carpentry and blacksmithy in the district. The production-*cum*-training centres in carpentry and blacksmihty are located at Kondayapalem and Nellore. The period of training is for about eleven months and in each batch twelve trainees are trained. They are paid a stipend of Rs. 30 each per month. Attached to this training centre in carpentry, a production wing employing six skilled workers caters to the needs of all types of quality furniture required for the Government, quasi-Government and private institutions.

A peripatetic tanning demonstration centre is located in the district at Vinjamur in order to impart training to village artisans in improved methods of tanning. The centre trains 12 trainees in a batch with a stipend of Rs. 20 per month for each trainee. The period of training is eleven months.

Industrial Co-operatives and Khadi and Village Industries

The controi over Industrial Co-operative Societies was transferred from the Co-operative Department to the Industries Department as per G.O.Ms. No. 1273, dated 10-10-1958. twenty four Industrial Co-operative Societies were taken over by the

Industries Department on 15th November 1958 and from that date till the end of Second Five Year Plan eleven new societies were registered by the Industries department. Thus there were 35 Industrial Co-operative Societies with a membership of about 1,669 persons and with a paid up share capital of Rs. 30,805 at the end of the Second Five Year Plan.

Of these 35 Industrial Co-operative Societies, 19 Societies come under the purview of the Khadi Board for the purpose of financial assistance and the remaining 16 societies receive aid from the Government (Through Industries Department, All India Handicrafts Board and the Co-operative Central Bank). The Khadi Board has given loan to the extent of Rs. 73,143 and grant to the extent of Rs. 22,280 besides the Government aid of Rs. 34,090 in the form of loans to these societies.

Of these societies, the Kanakadurga Ghani Oil Society, Nellore, the Handmade Paper Society at Buchireddipalem received aid of Rs. 60,500 from the Khadi Commission and Rs. 30,000 from the Khadi Board respectively. The Udayagiri Wood Workers' Industrial Co-operative Society and the Venkatachalam Thunga Mat Weavers' Industrial Co-operative Society received aid from the Government in the form of managerial assistance and working capital loan. On account of the patronage of the Government, the Udayagiri Wood Workers' Industrial Co-operative society is making headway and it provides employment to nearly 50 workers.

In the beginning of the Third Five Year Plan 23 societies were registered with a paid up share capital of Rs. 8,095 with a membership of 631 persons. Of these 23 societies, eight societies come under the purview of the Khadi Board. The Khadi Board provided loans to the extent of Rs. 99,620 and a grant of Rs. 31,750. The Government has also provided loans amounting to Rs. 37,590. The target for the Third Five Year Plan was 50 societies of which 23 societies were already registered and the remaining 27 societies are expected to be registered before the end of the Plan period.

Amelioration of unemployment

Most of the schemes sponsored by the Government for developing small scale industries and village and cottage industries have Training-*cum*-Production Centres. The object is to create employment opportunities and to provide ways and means of imparting suitable training and providing the technical know-how to the artisans not only to increase production but also to improve the quality of the products to suit the modern market. The district has 1,433 people trained from the various centres maintained by the Industries Department. There are also trained workers in other Small Scale Industries that make stainless steel articles, iron and steel articles, camphor tablets etc. Taking these workers also into consideration it is likely that about 2,000 people might have been additionally employed because of these training schemes and small scale industries.

CHAPTER IX

EDUCATION

According to the 1961 Census, 21.13% of the total population in Nellore district are literate and educated. The percentage of literates among males is 30.06% while among females the percentage is 12.17% only. Among the rural population only 17.99% are literates and educated persons as against the corresponding urban proportion of 46.55%. The following statement gives the total population, the total number and percentage of literates by sex in the total, rural and urban areas of the district and each taluk.

Nellore district has recorded a slightly lower proportion (21.13%) than the State average of 21.19% literates. The educational facilities in the district do not seem to be quite adequate. The growth of the Education Department and the achievements made under the Five Year Plans are explained in the succeeding paragraphs.

Growth of the Education Department

In pre-British days Nellore was a backward tract in point of mass education. It was only after the region came under the control of the East India Company attempts were made to open schools for all classes of people and to replace the old pial schools. The old pial schools existed in large numbers in coastal taluks but were scarce in the western taluks and in them one could learn only to read and write and count. The above schools were conducted in verandahs or what are called pials and there were probably on an average ten pupils per teacher. The Government took no part in education in this district till 1856 when an Education Department was organised and Mr. Henry Morris, M.C.S. was appointed as Inspector of Schools of this Division. In 1857 four Government Taluk Schools were established at Addanki (now in Guntur District), Kavali, Devarayapalle and Kota; but they were abolished in 1859-60 owing to falling off in the number of pupils. Later on taluk schools were established at Gudur, Ongole (now in Guntur District) and Brahmankraka. In 1864 the Education Department introduced the village school improvement system, which was found so successful in the Coimbatore District, under which grants-in-aid were extended to pial schools. In 1868 the system of payments on the basis of results was brought into force. Schools were established under the Education Act at Kavali, Kanigiri, Brahmankraka, Chinna Annalur, Allur, Gudur, Varigonda, Rapur, and Kallur. There was one school maintained by subscriptions at Kandukur and another at Stonehousepet in Nellore town, designated as Nellore Town School. The school at Kandukur was later converted to a District Board School (now Zilla Parishad School); the place of Nellore Town School was taken over by the Municipal High School. The education in the district steadily advanced from that time. In 1870 there was only one Secondary School and a Mission High School in the district and the total number of pupils was about 5,000. The expenditure on elementary education in 1870 was Rs. 4,500 per annum while that of Secondary Education was Rs. 9,000. In 1880 a training school for masters was started at Nellore. A special school was started for the Yenadis in the Sriharikota Island in 1858 but the school had to be closed in 1877 due to a decline in the strength of pupils. The American Baptist Mission started a school in 1898 at Kavali in connection with the criminal settlement there. Some of the old educational institutions are described below.

Coles Ackerman Memorial High School, Nellore: This was started in 1840 by the Free Church Mission of Scotland but was taken over by American Baptist Telugu Mission in 1904. Dr. Coles of New York offered liberal donations with which fine buildings, well equipped laboratory and a good library were constructed. This is one of the leading educational institutions in Nellore City now.

Venkatagiri Rajah's High School and College: This was founded in 1875 by a Diwan of Venkatagiri, Mr. S. Narayanaswamy Chetty under the name of the Hindu High School. In 1879 the school was recognised by the Government and was presented with a spacious site with the building situated on it and the management was entrusted to a committee. In 1887 the Rajah of Venkatagiri gave a donation of Rs. 50,000 for the erection of a new school building and instituted an endowment of Rs. 15,000. In recognition of this liberality the name of the school was changed into "The Venkatagiri Rajah's High School". The building erected with Rajah's aid was completed in 1888 and was opened by His Excellency Lord Connemara, Governor of Madras. Additions were made in subsequent years with the aid of public subscriptions, donations and Government grants. The Maharajah of Venkatagiri provided funds for raising the High School to the status of a College. The college was formerly opened by him in July 1920.

Rajah's High School at Venkatagiri: This is the third oldest institution in the district. It was only a Middle School upto 1894 and higher forms were opened from 1895. It was recognised as a High School in 1901.

Kavali High School: This School was started in 1900 and was raised to the Secondary grade in 1908.

Sanskrit Veda Pathasala: This was started in 1927 in Mulapet, Nellore town and instruction is provided in the Vedas, Oriental Studies and Ayurvedic Medicine.

The Educational institutions have steadily grown up and by March 1937 there were 2,030 educational institutions in the district with a total

enrolment of 90,921. There were 19 Secondary Schools for boys, 2 for girls, 1,773 Primary Schools for boys and 188 for girls besides 36 unrecognised schools. Further, expansion in the field of education has taken place after independence and under the Five Year Plans. During the First Five Year Plan period much attention was not bestowed on improvement of primary education. In the Second Five Year Plan due importance for educational schemes was given and efforts were made to improve the educational facilities to the school-going age children and good progress was achieved. A sum of Rs. 30.365 lakhs was spent on various activities related to Education and a sum of Rs. 4.421 lakhs on Technical Education.

During the Second Plan period 26 Junior Basic Schools were opened and 62 Primary Schools were converted into Junior Basic Schools. One model school was opend in the Government Basic Training School, Venkatagiri and 51 Primary Schools were opened. Two High Schools were upgraded to Higher Secondary Schools. The following statement gives the number of Higher Secondary, Secondary and Primary educational institutions that were functioning in the district in March, 1961.

STATEMENT IX-2

Type of Educational Institution	Total strength in the district

Collegiate and Technical Education in the district

There was no college in this district prior to 1920. The Venkatagiri Rajah's College at Nellore was the first to be established in this district in July 1920 as a Second Grade College. Only in 1946 it was upgraded into a first grade college. Subsequently in 1953 another college was started in Kavali. Recently in 1965 two more arts colleges were started in Gudur and Vakadu. A training college was started in this district in 1955 at Nellore.

In the field of Technical Education there are no Engineering or Medical Colleges in this district. The Government started a Ceramic Institute at Gudur in 1954, a Mining Institute also at Gudur in 1957, an Industrial Training Institute and a Polytechnic at Nellore in the years 1957 and 1960 respectively. Thus there are at present four Arts and Science Colleges, one Sanskrit College and four Technical Education Institutions in this district.

Facilities for education at Primary, Middle and High School stages are better in the urban areas than in the rural areas. Elementary education has not yet spread completely. Compulsory elementary education is not yet introduced in the whole district. During the year 1959-60, the district was bifurcated into two educational districts *viz.*, (i) Nellore consisting the taluks of Nellore, Gudur, Kovur, Atmakur, Rapur, Sullurpet and Venkatagiri and (ii) Kanigir, comprising the taluks of Kanigiri, Kavali, Kandukuri Udayagiri, Darsi and Podili. On account of the implementation of the schemes as envisaged in the Five Year Plan every village with a population of 300 persons and above is being provided with a school. Provision was made in the Third Five Year Plan to establish Middle Schools in 55 villages and High Schools in 150 villages in Nellore circle. This scheme did not materialise fully due to lack of continuous financial assistance. During 1962-63 milk powder was distributed under what is known as 'CARE' scheme to about 30 schools in the Samithi and Non-Samithi areas. The distribution was under the direct control of the local authorities who were held responsible for the proper distribution of milk to school children. Besides this, free clothes were distributed to school children at Kanigiri. Such assistance is rendered now and then in other places also.

CHAPTER X

HEALTH

Public Health

The Public Health Department had its origin as early as in 1864 when a sanitary Commission was formed in the Presidencies of Madras, Bombay and Bengal. In 1869 the Sanitary Commissioner took over the functions of the commission. Vaccination was the earliest public health work undertaken by this new organisation. Later this work was entrusted to the Revenue and Medical Departments by turns and in 1922 after several experiments it was handed over to the Public Health Department. Registration of births and deaths became compulsory in the erstwhile Madras Presidency under the Births and Deaths Registration Act of 1899 and the Madras Municipalities Act. From 1895 to 1914 various courses were organised and several batches of Sanitary Inspectors were trained. In 1915 a 'Piligrim Committee' on fairs and festivals was formed and this Committee submitted proposals on the sanitary arrangements needed in future. The Health education drive was also organised in the State in the same year with a great deal of success. In 1911 a Malaria Board was started and towards the close of 1920 it was amalgamated with the Sanitary Board forming the 'Public Health Board' with the Minister for Health as President and the Sanitary Commissioner, the Sanitary Engineer and the Secretary to Government in the Public Health Department as members. The Sanitary Commissioner later on became the Director of Public Health assisted by a few Assistant Directors of Public Health, each incharge of subjects like vaccination, epidemiology, vital statistics *etc.* In 1919 Public Health became a transferred subject with the main responsibility relating to public health administration resting with the local bodies under the Local Boards Act and the District Municipalities Act.

In 1912 an epidemic of cholera caused great anxiety. Anti-cholera measures both preventive and curative proved ineffective in controlling and combating this epidemic. This unsatisfactory state of sanitary administration prompted the Government to constitute the District Health Scheme in 1922. Under this Scheme Assistant Health Officers were employed by the local bodies to work as District Health Officers in the urban areas. Health Officers were also attached to Municipalities. The Director of Public Health was to supervise the working of the District Health Schemes assisted by the Assistant Directors of Public Health each incharge of such subjects like vaccination, epidemics, fairs and festivals, vital statistics, maternity and child health, malaria *etc.* In April 1924 the Government provincialised and gazetted the posts of Health Officers The District Health Officer was charged with the duties prescribed in the Health Code Volume I of the Madras Public Health Code and he was made responsible to the Director of Public Health and to the President of the District Board. The Municipal Health Officer performed duties prescribed in the Public Health Code and was made responsible to the Director of Public Health and also to the Executive Authorities of the Municipality. In 1939 the Public Health Act came into force and revolutionised the the health set up. Under Sections 7 and 8 of this Act the Government vested the Director of Public Health with the control of the Public Health Administration under local bodies and as per Sections 8 and 9 the Government was to appoint Health Officers who were to work under the local bodies. These officers were vested with various responsibilities with statutory powers under the Public Health Act. The Director of Public Health was to exercise his powers through the Health Officers. The various special schemes such as the control of malaria and filaria, tuberculosis through B.C.G. vaccination campaigns, leprosy, mal-nutrition, health education *etc.*, further, strengthened the hands of the Health Administration. Since 1956 the Public Health Department has embarked upon implementation of various national programmes such as the National Malaria Eradication Programme, the National Small Pox Eradication Programme, the Extended Nutrition Programme, the Milk Feeding Programme, the Anti—Yaws Campaign, Family Planning Campaign, School Health Services *etc.* For efficient discharge of all these functions Nellore district has been divided into 11 ranges for purposes of Public Health Administration. Each range is incharge of one Health Inspector. Besides these Health Inspectors each of the Panchayat Samithis is having a Health Inspector working

under the Primary Health Centre of the Samithi and he is assisted by one Health Assistant. The Health Inspector of the Veligandla Panchayat Samithi has however, two Health Assistants under him. The work done under the various schemes is explained below :

Nutrition

Nellore district is considered to be a surplus district so far as food grains are concerned. But still malnutrition largely prevails as many people cannot afford to have a balanced diet. Even such of those who can afford to have balanced diet also suffer due to mal-nutrition since they are not quite aware of the benefits of balanced diet. To educate the people in the matter of balanced diets the Expanded Nutrition Programme has been taken up and is in force in Varigonda Panchayat Samithi in about ten villages.

Food Adulteration

The Food Adulteration Act is in force in this district also as in other parts of the State. But samples are permitted to be sent from the Major Panchayats alone owing to want of laboratory facilities. The defaulters are booked and prosecuted.

Birth and Death rates

The birth and death registration work is entrusted to the village officers. The birth and death rates for this district as worked out from the figures furnished by the Director of Public Health are as follows :

STATEMENT X-1

Year	Registered birth rate per 1,000 of Population	Registered death rate per 1,000 of Population
(1)	(2)	(3)
1951	26.1	14.6
1952	26.6	14.8
1953	19.4	13.1
1954	24.9	12.7
1955	26.4	11.4
1956	16.3	7.5
1957	20.0	7.2
1958	16.7	7.0
1959	9.9	4.0
1960	N.A.	4.3
1961	13.2	5.6

Maternity and Child Welfare

There are several Maternity and Child Welfare Centres working under the Zilla Parishad, Panchayat Samithis, Project Implementation Committee, Red Cross, Mica Mines, Welfare Schemes *etc.* The total number of Maternity and Child Welfare Centres in the district is 82. Most of the centres are managed by one Maternity Assistant only.

Primary Health Centres

There are at present 15 Primary Health Centres working under the various Panchayat Samithis.

Local Fund and other dispensaries

Besides the Government Hospitals at each of the taluk headquarters there are 92 Local Fund Aayurvedic and Allopathic Dispensaries in the district. Most of the dispensaries are managed by 'B' Class Ayurvedic Practitioners.

Environmental Hygiene

There are no special schemes under this subject. The District Health Officer inspects sites for the location of colonies for human habitation from the public health point of view and also recommends suitable sites for the location of any industrial or other installations.

Communicable diseases Control

The District Health Officer is responsible for the control of communicable diseases in the district. Whenever any epidemic breaks out the Public Health staff visit the infected villages promptly and take all preventive measures. The District Health Officer and Assistant to District Health Officer inspect the area and give necessary instructions to the Public Health staff working in the area. The main communicable diseases are cholera, smallpox, malaria, tuberculosis *etc.* There is a Special Health Officer for the eradication of malaria and a special B. C. G. unit which has completed B. C. G. vaccination in the district. Smallpox eradication programme is also in progress from the year 1962 and it has completed protecting the population against smallpox in about half of the district. The following statement gives the number of attacks and deaths due to cholera and smallpox for each of the years 1957-1961.

STATEMENT X-2

Year	Cholera		Smallpox	
	Attacks	Deaths	Attacks	Deaths
(1)	(2)	(3)	(4)	(5)
1957	563	175	550	84
1958	433	211	769	147
1959	135	75	341	60
1960	15	5	646	154
1961	182	79	315	82

School Health Service

School Health Service was started in this district during the year 1962 and it is functioning satisfactorily under a Special Health Officer.

Health Education and propaganda

There is no van with a projector for propaganda of health education in the district. But the Public Health staff during their visits to different places carry out propaganda on health subjects. In the N. S. E. Scheme one of the vehicles is fitted with mike and loud speakers and the Health Educators incharge carry out propaganda. There are two projectors, one in Venkatachalam Panchayat Samithi, and the other at Podalakur Panchayat Samithi which show films on health *etc.*, to the public. Whenever any epidemic assumes a virulent form the propaganda van attached to the region is requisitioned and used during that period for propaganda work.

Family Planning

There are 14 Health Visitors working in the various Primary Health Centres who attend to propaganda and distribution of contraceptives and sheaths and condoms. Family Planning Seminars are conducted in all the centres and several lay people are educated in the methods of family planning besides the advantages of family planning. There is good response in the district both for sterilization and vasectomy. Family Planning methods are being popularised even among the rural population by the propaganda undertaken by the public health staff, besides the Health Visitors primarily entrusted with that work.

Water Supply Scheme

There are no special water supply schemes in this district. The Panchayat Samithis and Panchayats are providing draw wells and tube wells for providing drinking water, wherever necessary. There is no scarcity of drinking water in this district except in a few upland taluks. Vavveru Panchayat has provided protected drinking water supply by constructing an over-head tank and pipe lines in the panchayat area.

Medical Facilities

There is a Government headquarters Hospital with a bed strength of 250 at Nellore, the district headquarters. Besides this, there is a Mission Hospital and a Maternity Hospital with bed strength of 150 and 120 respectively at Nellore. There are nine Government hospitals in the district, most of them being located in taluk headquarters. There are also seven Government Dispensaries, two Local Fund Dispensaries, one Local Fund Hospital and fourteen Primary Health Centres. In Kalichedu, a mica mining centre, there is a Mobile Dispensary besides a Base Hospital with X-Ray Plant and an Ayurvedic Dispensary. There are three allopathic dispensaries located at Talupur, Utukur and Sydapuram under Mica Mines Labour Welfare Fund Scheme. In Venkatagiri there is a Government Leprosy Subsidiary Centre. Sriharikota has a Mobile Medical Unit. In addition to these the Zilla Parishad maintains 45 Rural Dispensaries and the Panchayat Samithis maintain 50 Rural Dispensaries and these are managed by village vaidyas and not by doctors qualified in modern medicine.

Facilities for the treatment of special diseases like Leprosy, Tuberculosis, Venereal Diseases etc. The Government Headquarters Hospital at Nellore has an Eye Clinic, a Dental Clinic, a Family Planning Clinic, and a Blood Bank. There is a separate Government Welfare Fund T.B. and C.D. Hospital in Nellore town with a strength of 230 beds. A Leprosy Subsidiary Centre is located in Venkatagiri town with Sub-Centres at Mopur, Thimmayapalem, Gollagunta and Perimidi. The Government Hospitals at Gudur and Kovur have one Family Planning Clinic each.

Medical Education and training Programme

An Auxilary Nurse/Midwives Training Centre was started from 1st March 1958 in the Government Headquarters Hospital at Nellore. A Maternity Assistants Training Centre is functioning in the Government Hospital at Gudur.

Progress under the Five Year Plans

During the three Plans great improvement has been made in the Medical and Public Health facilities in this district. The bed strength has been increased considerably in the hospitals and clinics for treatment of special diseases have also been opened. Still the medical and health facilities cannot be considered as quite adequate. The statement X-3 on the next page gives the expenditure incurred and Achievements made during the Second Five Year Plan under Medical and Public Health activities.

STATEMENT X-3

CHAPTER XI

SOCIAL WELFARE

The Constitution of India recognised that there are certain sections of the Indian population which need special protection and adequate safeguards and that their welfare and advancement should be the special concern of the State. The four principal groups recognised for the purpose are the Scheduled Castes, Scheduled Tribes, Vimuktha-Jathis (ex-criminal tribes or denotified tribes) and other Backward Classes. Of the four groups, the Scheduled Castes alone suffer from the stigma of untouchability. Necessary constitutional provisions have been made after the country attained independence for the welfare of these classes. A two pronged attack, legislative and educational has been launched to eradicate the evil of untouchability among the Scheduled Castes and for this purpose '*Harijan Day*' is being observed in this district by the Government Officers and the public on the 30th of every month. The assistance of non-official agencies is also being utilised for this purpose.

The Harijan Welfare Department was first established in this district to look after the welfare activities of the Harijans. Later the welfare activities of other Backward Classes was also entrusted to this Department and the Department was renamed as Social Welfare Department. This department is attending to the Welfare activities of Scheduled Castes, Scheduled Tribes, Vimukthajathis and other Backward Classes. The Government is spending considerable amount of money for the welfare of these classes by providing educational, medical and other facilities. The Social Welfare Department is maintaining 91 schools exclusively for the education of Harijans. The pupils of the schools are being provided with mid-day meals and about a lakh of rupees are being spent per year on this account. The Government is also sanctioning boarding grants to the Scheduled Castes and Backward class pupils in the subsidised hostels in the district. An extent of 30,756 acres of land was ordered to be distributed among the landless Harijans in the district and a major portion of it has been distributed among them. Apart from the Harijans, Scheduled Tribes like Yerukula, Dommara, Kathera, Yenadi *etc.*, were provided with all possible assistance by the Government. One Higher Elementary School was established at Bitragunta and a sum of Rs. 20,000 was granted. The Scheduled Tribes at Allurpet were helped in the same way. The Yenadis at Siddipuram colony were given monetary help for housing, laying out roads, and for the construction of a school building. In addition to these free clothing was also supplied. The Yenadis at Sreeharikota Island were given enough aid for the eradication of Malaria and a school was constructed at Kothacheruvu for the education of their children. A residential hostel attached to this school was also opened at Sreeharikota. The Central Government sanctioned Rs. 50,000 for providing the above facilities at Bitragunta, Siddipuram and Sreeharikota. The Government is thus taking many ameliorative measures to improve the conditions of these classes of people.

From 1947-48 to 1950-51 the following amounts were disbursed for these classes of people for the purposes detailed below:

STATEMENT XI-1

S.No.	Item (1)	1947-48 (2)	1948-49 (3)	1949-50 (4)	1950-51 (5)
		Rs.Ps	Rs.Ps	Rs.Ps	Rs.Ps

9.	Lands for cultivation (in acres)	..	31,124.60	4,556.64	43,400.00

The various ameliorative measures undertaken by the Social Welfare Department during the First and Second Five Year Plan periods are outlined below:

First Five Year Plan

The following statement shows the schemes that were sanctioned and implemented during the

First Five Year Plan (1951-56) in Nellore District by the Social Welfare Department.

STATEMENT XI-2

Name of Scheme (1)	Expenditure incurred during the First Five Year Plan period (1951-56) (2)
	Rs.
1. Acqusition of land for house sites for Harijans	17,583.47
2. Mid-day meals to the pupils in Social Welfare Schools	3,39,647.69
3. Non-Residential scholarships	2,36,399.00
4. Clothing for deserving pupils	595.00
5. Monetary aid for books and stationery to pupils	7,967.00
6. Laying of pathways and roads to Harijanwadas	52,386.00
7. Construction and repairs of drinking water wells for Harijans	80,478.00
8. Boarding grants to subsidised hostels	8,73,075.00
9. Lands given for cultivation	11,748.00 acres

Second Five Year Plan

During the Second Five Year Plan period the Social Welfare Department took up several schemes to benefit the Backward Classes, Scheduled Castes and Scheduled Tribes in the district. The major items are (i) starting of mid-day meals centres for the Backward Classes and Scheduled Castes pupils in the schools in Rural areas; (ii) providing house sites for Harijans and aboriginal tribe people (iii) construction of school buildings and opening of schools in Harijanwadas (iv) sanctioning of stipends to poor Backward Class and Scheduled Tribe students (v) encouragement to cottage industries schemes (vi) providing sufficient work to the labour class people and skilled labour (vii) providing drinking water facilities in the Harijanwadas and (viii) supply of agricultural implements and also granting aid to agriculturists and aboriginal tribes.

A sum of Rs. 18.57 lakhs was spent during the Second Five Year Plan by the Social Welfare Department. A sum of Rs. 4.437 lakhs was spent on housing schemes for the Harijans and aboriginal tribes and Harijan and Yenadi Colonies were constructed in Anikepalle, Vellala and Allimadugu villages. Rupees two lakhs were spent in Sreeharikota Islands on Social Welfare activities.

Details of work done under (1) Centrally sponsored schemes, (2) Grant-in-aid schemes (3) Grant-in-aid schemes for Denotified Tribes (4) Centrally sponsored schemes for Scheduled Tribes and (5) Land colonisation schemes during the Second Five Year Plan in the district are given below schemewise.

Centrally sponsored schemes

Drinking water wells : An allotment of Rs. 1,07,829 was sanctioned under this scheme for construction of wells for the benefit of Scheduled Castes at Rs. 2,000 per well. In most cases the wells costed more than Rs. 2,000 each. 44 wells were constructed during the plan period.

Stenography : This is a State level scheme for Schedule Caste pupils undergoing training in stenography. A stipend of Rs. 500 per annum is paid to each pupil. 130 pupils were given training during the plan period. The Director of Social Welfare sanctions the stipends.

Dress Making Centre : 20 pupils were given training during each year of the plan period. The centre is being managed by the Assistant Director of Industries and Commerce, Nellore. Each candidate is sanctioned a monthly stipend of Rs. 25. At the end of the course each successful candidate is given a sewing machine free of cost, after executing the necessary agreement.

Housing Schemes : 90 houses were sanctioned for Scheduled Castes at a total cost of Rs. 90,000 during the plan period. The beneficiaries were given a subsidy of Rs. 750 each to construct a house at a cost of Rs. 1,000, each such beneficiary contributing labour to the tune of Rs. 250. Sanitary amenities like construction of roads, parks, drains, *etc.*, were provided under this scheme at Rs. 250 per house.

Supply of Bulls and Agricultural implements for Backward Classes : This is a new scheme introduced during the last year of the Second Plan period. There was an allotment of Rs. 15,000 for purchases of bulls at Rs. 400 per pair and agricultural implements at Rs. 50 per family. 35 Backward Class families were benefited under this scheme.

Aid to Cottage Industries practised by Backward Classes : Families belonging to artisan communities were given aid in the shape of craft materials at a cost of Rs. 50 per family. A sum of Rs. 4,000 was available under this head. 73 persons were benefited under this scheme.

Grants-in aid schemes

Sanitary amenities : A sum of Rs. 1,31,961 was allotted for the construction of 64 wells during the plan period at a cost of Rs. 2,000 per well. Generally the cost of a well exceeded Rs. 2,000 as most of

the wells were constructed in the upland taluks of the district where the soil is rocky.

Housing Scheme: An allotment of Rs. 1,95,400 was sanctioned during the plan period. 305 houses were constructed. Each beneficiary had to contribute Rs. 250 by way of *shramdan* or materials or cash. The rest is covered by a subsidy of Rs. 250 and an interest free loan of Rs. 500 to be recovered in 20 equal instalments of Rs. 25 each. The subsidy portion was raised to Rs. 300 during 1960-61 and the contributory portion to be borne by the beneficiary was reduced to Rs. 200.

Mid-day meals to Backward Classes: A sum of Rs. 53,620 was allotted during the plan period for supply of free mid-day meals to the School going Backward Class children of the Social Welfare Schools. There are 89 Social Welfare Schools in this district. The food is being served by a contractor in each case. He was paid 16 paise per head per meal. The meal consists of 1/8th seer of rice, 1 1/2 ounce of dhal and three ounces of vegetables with onions.

Land Acquisition: An allotment of Rs. 2,80,000 was sanctioned during the plan period for provision of house sites to Scheduled Castes. Land was acquired in 31 villages. 939 families were granted house sites at approximately eight cents per family.

School Buildings: A sum of Rs. 92,575 was allotted for the construction of school buildings for housing Social Welfare Schools. Eight buildings were constructed at a cost of Rs. 29,816.00.

Government hostel, Rapur: A sum of Rs. 18,600 was allotted from 1958 to 1961. Twenty pupils were given boarding and lodging facilities during each year in this institution. A part time warden on an honorarium of Rs. 20 per month was appointed for the hostel. A sum of Rs. 13,000 was spent during the Second Plan period.

Housing Scheme for Harijans: An amount of Rs. 1,95,400 was sanctioned for construction of houses for Harijans at Rs. 500 per house. The entire allotment was spent during the Second Plan period.

Grants-in-aid Schemes for Denotified Tribes

Education: An allotment of Rs, 4,300 was sanctioned for the purchase of slates and books for children of Denotified Tribes at Rs. 10 per pupil. A sum of Rs. 3,744 was spent during the Second Plan period.

Housing: An allotment of Rs. 46,040 was sanctioned for construction of houses at Rs. 100 per house. Rs. 30,815.00 were spent during the Second Plan period.

Public Health: A sum of Rs. 21,700 was sanctioned for the construction of wells at Rs. 2,000 per well. A sum of Rs. 11,474 was spent during the Plan period.

Medical aid: A sum of Rs. 1,780 was sanctioned under this head for purchase of medicines at Rs. 40 per head. A sum of Rs. 1,780 was spent during the Second Plan period.

Agricultural aid: A sum of Rs. 10,500 was sanctioned for the purchase of bulls at Rs. 300 per pair. A sum of Rs. 9,200 was spent during the Second Plan period.

Cottage Industries: A sum of Rs. 4,400 was sanctioned under this head for artisans for supply of implements at Rs. 50 per family. Rs. 4,048.64 were spent during the Second Plan period.

Centrally sponsored schemes for Scheduled Tribes

Clothing: A sum of Rs. 5,800 was sanctioned under this head for the supply of clothes to each pupil at Rs. 10 each. A sum of Rs. 5,387.42 was spent during the Second Plan period.

Supply of bulls: A sum of Rs. 90,000 was sanctioned under this head for the supply of implements at Rs. 50 per family. A sum of Rs. 24, 571 was spent during the Second Plan period.

Co-operative Societies: A sum of Rs. 6,800 was sanctioned under this head for starting Co-operative Societies at Rs. 500 each. A sum of Rs. 6,800 was spent during the Second Plan period.

Acquisition of House Sites: A sum of Rs. 19,000 was sanctioned under this head for providing house sites to Scheduled Tribes. A sum of Rs. 13,294.00 was spent during the Second Plan period.

Housing Schemes: A sum of Rs. 4,43,700 was sanctioned under this head for the construction of houses. A sum of Rs. 4,43,700 was spent during the Second Plan period.

Drinking water wells: A sum of Rs. 30,000 was sanctioned under this head for providing drinking water wells to Scheduled Tribes at Rs. 2,000 per family. A sum of Rs. 16,215 was spent during the Second Plan period.

Land Colonisation Schemes Anikepalle Colony: A sum of Rs. 1,69,103.37 was sanctioned under

this head during the Plan period. A sum of Rs. 1,17,409.33 was spent during this period.

Vellala Yenadi Colony : An allotment of Rs. 1,30,000 was sanctioned for the construction of 50 houses for Yenadis. A sum of Rs. 35,592 was spent during the Plan period.

Allimadugu Yenadi Colony : An allotment of Rs. 15,000 was sanctioned during 1960-61 for construction of 120 houses for yenadis. No expenditure was incurred during the Plan period as the allotment was received at the fag end of 1960-61.

Sreeharikota Islands : As against a total allotment of Rs. 6,00,000, a sum of Rs. 2,00,000 was spent during the Second Plan period.

The following statement shows the expenditure incurred on each item of work and the physical target achieved during the Second Five Year Plan under Social Welfare activities in the district.

Third Five Year Plan

A brief account of the activities of the department in the first year of the Third Five Year Plan *i.e.*, during 1961-62 is given below :

Educational Facilities

During 1961-62, the first year of the Third Five Year Plan period, there were about 57 Social Welfare Subsidised Hostels and 3 Government Hostels in Nellore District located at the following places.

1. NELLORE TALUK

1. Social Welfare Boys' Hostel, Subedarpet, Nellore
2. Social Welfare Orphanage Hostel, Nellore
3. Social Welfare Malayappan Yenadi Girls' Hostel, Nellore
4. Social Welfare T. M. Girls' Hostel, Nellore
5. Social Welfare Thakkarbaba Yenadi Boys' Hostel, Nellore
6. Social Welfare Boys' Hostel, Chinna Cherukur
7. Social Welfare Girls' Hostel, Chinna Cherukur
8. Social Welfare Boys' Hostel, Chinna Pallepalem
9. Y. M. C. A. Hostel, Indukurpet
10. Sevasadanam, Muduvarthipalem
11. Social Welfare Boys' Hostel, Muthukur
12. Social Welfare Girls' Hostel, Muthukur

2. GUDUR TALUK

1. Social Welfare Boys' Hostel, Vakadu
2. Social Welfare Girls' Hostel, Vakadu
3. Social Welfare Boys' Hostel, Kota
4. Backward Class Boys' Hostel, Kothapalem

3. SULLURPET TALUK

1. Social Welfare Boys' Hostel, Sullurpet
2. Sri Venkateswara Anandasramam, Mannar Polur

4. VENKATAGIRI TALUK

1. Social Welfare Boys' Hostel, Venkatagiri
2. Social Welfare Girls' Hostel, Venkatagiri

5. RAPUR TALUK

1. Social Welfare Boys' Hostel, Sydapuram

6. ATMAKUR TALUK

1. Social Welfare Boys' Hostel, Atmakur
2. Social Welfare Girls' Hostel Atmakur
3. Social Welfare Boys' Hostel, Kullur
4. Backward Class Boys' Hostel, Mohammadapuram
5. Social Welfare Orphanage Boys' Hostel, Kavali Yedavale

7. UDAYAGIRI TALUK

1. Social Welfare Boys' Hostel, Udayagiri
2. Social Welfare Boys' Hostel, Chakalakonda
3. Social Welfare Boys' Hostel, Varikuntapadu
4. Social Welfare Boys' Hostel, Narravada
5. Social Welfare Boys' Hostel, Kakolluvaripalle

8. PODILI TALUK

1. Social Welfare Boys' Hostel, Podili
2. Social Welfare Boys' Hostel, Tarlapadu
3. Social Welfare Harijan Girls' Hostel, Podili

9. DARSI TALUK

1. Social Welfare Boys' Hostel, Darsi
2. Social Welfare Boys' Hostel, Kurichedu

10. KANDUKUR TALUK

1. Social Welfare Harijan Boys' Hostel, Kandukur
2. Social Welfare Poor and Ashram Boarding Home, Kandukur
3. Social Welfare Babji Girls' Hostel, Kandukur
4. Social Welfare Harijan Boys' Hostel, Singarayakonda
5. Social Welfare Boys' Hostel, Kondapi
6. Social Welfare Boys' Hostel, Jarugumalli
7. Social Welfare Poor and Adimavasi Hostel, Kandukur
8. Social Welfare Backward Class Boys' Hostel, Sakhavaram
9. Social Welfare Venkateswara Boys' Hostel, Lingasamudram

11. KANIGIRI TALUK

1. Social Welfare Boys' Hostel, Kanigiri
2. Social Welfare Girls' Hostel, Kanigiri
3. Brock Memorial Boarding Home, Kanigiri

12. KAVALI TALUK

1. Harijan Boys' Hostel, Kavali
2. Harijan Girls' Hostel, Kavali
3. Social Welfare Backward Class Boys' Hostel, Kavali

13. KOVUR TALUK

1. Social Welfare Boys' Hostel, Kovur
2. Thakkarb aba Adimavasi Hostel, Gandavaram
3. Social Welfare Boys' Hostel, Buchireddipalem
4. Social Welfare Girls' Hostel, Buchireddipalem
5. Vijayalakshmi, Girls' Hostel, Buchireddipalem
6. Adimavasi Boys' Hostel, Allur

Government Hostels at Gudur, Rapur and Kanigiri : This is a State level scheme. The Director of Social Welfare sanctioned boarding grants to 2,131 Scheduled Caste and 245 Backward Class pupils during the year 1961-62. Each boarder was paid Rs. 150 for 10 months at the rate of Rs. 15 per month.

A sum of Rs. 3,19,650 for Scheduled Caste boarders and Rs. 36,750 for Backward Class boarders were spent by the managments of the 57 subsidised hostels towards maintenance. This scheme was not transferred to the control of Zilla Parishad and as such the work was administered by the Collector assisted by the District Social Welfare Officer.

Government Hostels under the control of Zilla Parishad

There were three Government Hostels under the control of the Zilla Parishad at Gudur, Rapur and Korimerla. Boarding and lodging charges were borne by Government. A sum of Rs. 26,867 was spent towards the maintenance of the hostels for about 134 boarders. The particulars of boarders admitted in each of the hostels are furnished below :

Hostel	No. of Boarders
Gudur	61
Rapur	23
Korimerla	50

Other educational facilities

About 91 Social Welfare Elementary Schools were maintained by this department. The strength of the School going children was about 8,041 and there were 189 teachers. Nearly 78 schools were housed in rented buildings and the rest were located in Government buildings. Out of 189 Teachers there were 8 Secondary Grade Assistants and 181 Higher Grade Trained Assistants. Books, slates and mid-day meals were given free of cost. A sum of Rs. 65,000 was spent towards mid-day meals for Scheduled Caste pupils and Rs. 20,688 towards teaching staff.

The grant of scholarships like residential scholarships and non-residential scholarships is one of the chief ameliorative measures undertaken by this department to promote education among the Scheduled Castes. This amenity created interest among the Harijans to take to education. Scheduled Castes were exempted from school fees at all stages of education. Students residing within a radius of five miles from the educational institutions were given non-residential scholarships at the following rates.

I Form to III Form Rs. 18.69
IV Form to VI Form Rs. 32.00
} Per annum

Others residing in recognised hostels were given residential scholarships to enable them to meet boarding and lodging charges in addition to the non-residential scholarships at the following rates per annum.

	Residential Scholarships	Non-Residential Scholarships
	Rs.	Rs.
I Form to II Form	150	18.69
IV Form to VI Form	150	32.00

The residential scholarships were sanctioned by the Director of Social Welfare and non-residential scholarships by the Zilla Parishad. A sum of Rs. 69,430 was spent towards non-residential scholarships, during 1961-62.

Economic Upliftment

Cottage Industries-Agricultural implements: There was an allotment of Rs. 10,000 and Rs. 6,000 for Scheduled Castes and Backward Classes respectively during 1961-62 towards aid to artisans who may apply for financial assistance either individually or through Co-operative Societies to carry on their crafts,

The aid was given in the shape of tools and raw materials worth Rs. 50 each in the case of individuals and as a share in the working capital in respect of societies. A sum of Rs. 14,450 was spent as against Rs. 16,000.

Drinking water facilities : During 1961-62 a sum of Rs. 49,000 was provided under this head, Rs. 25,000 under normal scheme and Rs. 24,000 as grants-in-aid, towards the construction and repairs of wells to cater to the needs of the Harijans. A sum of Rs. 32,239 was spent towards the construction and repairs of wells in the following villages.

STATEMENT XI-4

Acquisition of land for House Sites : An allotment of Rs. 34,000 was sanctioned during 1961-62 under the normal scheme for providing house sites to Harijans. A sum of Rs. 16,456.39 was spent for the acquisition of land benefiting 118 families. The total extent acquired was 9.77 Ac. and the acquisition was made in the following villages.

STATEMENT XI-5

Name of the Village (1)	No. of families benefited (2)	Area acquired (in acres) (3)
1. Chennappagaripalem h/o Gudali, Gudur Taluk	32	2.56
2. Kammavaripalem h/o Brahmana-kraka	35	2.93
3. Mundlamuru, Darsi Taluk	38	3.24
4. North Rajupalem, Kovur Taluk	13	1.04

Community Halls : There was an allotment of Rs. 4,000 under this head during 1961-62 and the community halls were sanctioned in the following places.

1. Kampalem, Venkatagiri Taluk
2. Chillakur, Gudur Taluk
3. Kothapallikavaragunta, Kovur Taluk
4. Kondareddipalle, Podili Taluk

Agricultural Aid : There was also an allotment of Rs. 13,200 under this head during 1961-62 for purchase and supply of bulls and agricultural implements at a cost of Rs. 300 each; about 44 persons were benefited through this scheme.

Womens' Welfare

A few women in Madras city joined together and undertook the task of social service with a view to promoting the cause of women whose sphere of life is confined to their homes. This group was known of Indian Civil Corps and it came into being in 1945 as a measure of post-war reconstruction. Later it gained recognition of the Government and came to be known as Womens Welfare Department, which spread itself to the districts in course of time.

The aims and objects of this Department are :

1. To promote with special reference to villagers, the welfare of families in all their aspects through educational, preventive and protective services and to gradually raise the standard of living consistent with their conditions.

2. To work for the community welfare in relation to the families and to show the close connection between the two and to assist each member to contribute to the general well being of each family.

3. To run Community Service Centres which provide facilities for such contacts and exchanges for leadership and citizenship training.

4. To provide facilities for economic relief by helping to secure employment, by supplementing family income through cottage industries in rural areas and, by giving special training in gainful trades in the society for urban candidates.

5. To provide child care both in homes, in pre-basic class and the children's sections in the special institutions, and

6. To give an intensive and sound professional training for field workers and develop skills and techniques necessary for such services.

In pursuance of these objectives and having in the forefront always the family and community welfare so dependent on each other, the work of this department comprises education, preventive and rehabilitation aspects of social service.

Training of field workers

It is obvious that much depends upon the workers, if the aims of the department are to be achieved. Hence, training is imparted periodically to select field workers and these form the backbone, so to speak, of the entire scheme by implementing the objectives of the department in general and more particularly in the rural areas.

The following are the subjects in which training is imparted to field workers.

General: Psychology, Sociology, Economics, Political Science, History of Social work *etc.*

Special: Medical Information, Child Care, Community and Group Organisations, Nutrition, Home Economics, Crafts, Administration and Public Relations besides cultural activities.

Field work: Family survey, case study, techniques of visits, investigation and special medical care works camps in villages, visits to institutions engaged in spinning and other crafts, community ervices centres, pre-basic classes *etc.*

There are six Women's Welfare Centres functioning in this district and they are located at Nellore city, Chemudugunta, Venkatachalam, Chittaloor, Bitragunta and Sreeharikota. Chemudugunta and Venkatachalam centres are located in the Venkatachalam Panchayat Samithi area while Chittaloor centre is located in the Samithi area of Podalakur. Bitragunta centre is mainly meant for the uplift of *Vimukthajathis* and is financed by the Social Welfare Department. The centre of Sreeharikota also works for the Welfare of the Backward Classes of Sreeharikota Island portion. It is a scheme under the Third Five Year Plan of the Social Welfare Department. Technical control over all the branches vests with the Assistant Women's Welfare Officer; but the administrative control rests with the Assistant Women's Welfare Officer only in respect of Nellore town, Bitragunta and Sreeharikota centres, while it rests with the Block Development Officer in respect of Chemudugunta, Venkatachalam and Chittaloor centres.

Administrative set up

The Director of Women's Welfare is the Head of the Department. The Assistant Women's Welfare Officer is the District Officer and in between them there is an Assistant Director stationed at Vijayawada who is incharge of all the schemes in the eleven districts of Andhra region. The Assistant Director supervises all the Women's Welfare Centres in the region. There is one Women's Welfare Organiser for each centre as also a conductress to assist the Women's Welfare Organiser in organising the community service centre and pre-basic classes. There is also a Maternity Assistant for all the Rural Centres.

Plan Schemes

The progress made under the First Five Year Plan is negligible. During the Second Five Year Plan period only two schemes, namely, the expansion of the administration and the improvement of existing branches were implemented. A Maternity Centre was started at Sreeharikota at a cost of Rs. 1,186. The total amount spent during the Second Five Year Plan in this district by this Department was Rs. 8,227 only. During the Third Five Year Plan period three schemes namely the establishment of Children's Home, Balavihar and the expansion of executive staff by appointing a Liaison Officer are implemented.

Children's Home

Orphans, destitutes and poor children of age, 7 to 18 years in the case of girls and 7 to 12 years in the case of boys are considered for admission into this Home. The executive staff of the department generally investigates the cases and recommends the deserving candidates. Basic principles as in the Basic Education Institutions are introduced in the Home. The Superintendent of the Home studies the child psychology and helps them to develop their own responsibility. Children's library, hobbies, recreational and cultural activities, gardening, excursions, film shows and practical demonstrations are arranged. The Home at Nellore is meant for the children of Scheduled Castes.

Balavihar

Located in Venkatagiri town, it is intended to promote children's activities on recreational and cultural side in general with a view to improving their talents. Every day in the forenoon the teacher conducts the pre-basic classes for the children of pre-school age. In the afternoon the staff organises a community welfare centre for women. Necessary equipment is provided for this purpose. In the evening from 3 P. M. to 6 P. M. the teacher engages the children of all groups, telling them stories, teaching them dramatic art, action and songs besides organising sports and games. They are also given citizenship training so as to enable them to form into a social service squad.

Expansion of executive staff by appointing Liaison Officer

Under this scheme one Liaison Officer of the cadre of Mukhyasevika is appointed for the district, with a view to intensifying the Women's Welfare activities in the Women's Welfare Centres and assisting the Mukhyasevikas in their programmes such as organising Mahilamandals and establishing local institutions besides getting the equipment necessary for organising exhibitions, Melas *etc.* The Liaison Officer also assists the Women's Welfare Organisers in giving training to the members of the centre in first aid, home nursing, home decoration, hygiene and sanitation and to develop every fifth house in the village into a model house. In addition to these the Liaison Officer extends technical assistance to the Assistant Women's Welfare Officer in the implementation of all the programmes both Plan and Non-Plan and is responsible for investigation of cases and submission of reports to the Assistant Women's Welfare Officer for admission into Children Home, Service Home, State After Care Home, District Shelter and other similar institutions of this department.

Grants-in-aid

The scheme provides grants-in-aid to non-official social welfare organisations which are devoted to the welfare of children, welfare of women, welfare of the handicapped and cases of deserving individuals.

Employment Exchange Service

The District Employment Exchange, Nellore came into existence in the year 1947 and upto 31st October 1956 it was under the organisation of the Director General of Employment and Training, Government of India. These exchanges were opened in the beginning for settling the ex-servicemen released on demobilisation after the Second World War and were thrown open to all during 1948 for the benefit of all categories of employment seekers. Since 1st November 1956, the administrative control of the Employment Exchanges was transferred to the State Government.

The Employment Market Information scheme was introduced in the public sector in this district with effect from the quarter ended 30th September 1958. It was extended to the private sector during the quarter ended 30th September 1961.

The statistical data pertaining to the registrations, placings, vacancies notified, vacancies filled, submissions made and the employers using the Exchange are furnished below for the period 1951 to 1961, yearwise.

STATEMENT XI-6

Year (1)	Registrations (2)	Placings (3)	Vacancies notified (4)	Vacancies filled (5)	Submissions made (6)	Employers using the Exchange (7)
1951	3,066	595	714	599	1,748	241

1961	6,393	941	1,215	938	4,410	327

At the beginning of the Second Five Year Plan period the District Employment Exchange confined its activities to bringing together the employment seekers and the employers. The activities of the Exchange considerably expanded during the Second Plan period. Pamphlets issued by the Government of India giving essential information about courses such as in nursing, compounders' training, library science, teaching, stenography *etc.*, indicating the employment, opportunities in each trade were widely distributed to the employment seekers. Group consulting and individual consulting by the Employment Officer had also increased. Besides these the collection of employment market information was also undertaken as a Plan scheme during the Second Plan. This employment market information shows periodically the employment capacity of each establishment, forecasts vacancies and probable retrenchment, reveals occupational structure in each establishment, and indicates the fluctuation in the employment. This scheme was introduced in the public sector in the first instance with effect from 30th September 1958 and after an year it was extended to the private sector also *i.e.*, with effect from 30th September 1959.

During the Second Five Year Plan period nearly 3,442 persons were shown employment opportunities. The following statement shows the number of registered applicants who were on the live register of the Employment Exchange awaiting jobs at the end of the First and Second Plan period.

District Soldiers', Sailors' and Airmen's Board

During the period 1951-61 this Board has established personal contact with ex-servicemen, their families, dependants of serving and deceased personnel. They have been assisted in obtaining Seats in various Technical Training Institutions. The children of ex-servicemen, are being helped to prosecute their education by obtaining scholarships, educational concessions etc. Free medical treatment has also been provided to the ex-servicemen and their dependants. In addition to these, efforts are being made to obtain lands for cultivation in

their favour and house sites free of cost. Some of the ex-servicemen have been assisted in settling their disputes and court litigations. Efforts are also being made to obtain medical treatment for tuberculosis and leper patients, if any, and financial assistance is being provided from the Indian Red Cross Society and other welfare institutions.

As many of the ex-servicemen and their dependants are poor, efforts are being made to provide short period grants for maintenance and in some cases lumpsum grants are obtained for opening small scale industries like poultry breeding, duck rearing, sheep and goat farming *etc.*, in order to settle them independently in civil life.

The following is the list of number of cases dealt by the District Soldiers', Sailors' and Airmens Board, Nellore for the period from 1951 to 1961.

STATEMENT XI-8

Sl. No. (1)	Nature of Subject (2)	No. of cases dealt with (3)

CHAPTER XII

PANCHAYATI RAJ

Historical Retrospect

Local Boards were non-existent till the middle of the 19th century when Road Funds were created by an executive order for the upkeep of roads, other than trunk roads and important district roads. The Collector and District Engineer were placed incharge of these works. This arrangement was put on a statutory basis by the District Road Cess Act, 1866, which authorized the levy of a cess of half an anna in the rupee on the rent value of occupied land for the construction and maintenance of local roads.

The origin of District Boards may be traced to the Local Fund Act of 1871, which was the outcome of the desire on the part of the Government to provide sound elementary education to the masses. The Act made specific provisions for declaring a district or part of a district as a circle and for constituting a Local Fund Board for every such circle, consisting of three or more non-official members, nominated by the Government and an equal number of official members appointed by the Government. The term of office of members was for three years. The non-official members were chosen from among owners or occupiers of lands or persons carrying on business and residing in the circle. The Collector of the district was the Ex-Officio President of the Board situated within his jurisdiction. Some of the important functions of the Board were as follows :

(1) the maintenance of public roads or streets ;

(2) management of hospitals, schools, choultries and markets ; and

(3) the employement and training of health staff, the inspection of sanitation in towns and villages, and the upkeep of other local works of public utility calculated to promote health and comfort of the people.

The Act authorized the levy and collection of land cess (at the rate not exceeding one anna in the rupee on the annual rental value of all occupied land), house tax (in villages or groups of villages or townships in which a school supported by Government grants-in-aid existed) and tolls on carriages, carts or animals making use of the roads within the circle.

Local Self Government as a conscious process of administrative devolution and political education dates back from the final reforms of Lord Mayo's Government. By a Resolution No. 3354, dated 14th December, 1871, the Government of India made over to the Provincial Governments certain departments of which, education, medical services and roads, deserve particular mention, as they still constitute the principal activities of Local Bodies. The beginnings of the system of Local Finances were to be found in the new scheme of Provincial Finances and many of the present day problems of Local Finance *vis-a-vis* Provincial Finance are similar to those which Provinces had to face in their dealings with the Government of India. Lord Ripon's Government desired that Provincial Governments should apply to their financial relations with Local Bodies, the principle of financial decentralization which had worked so satisfactorily between the Government of India and the Provinces. The more important services that were entrusted to the rural bodies were communications, education and sanitation.

The Madras Local Boards Act, 1884, conferred additional responsibilities on the Local Boards which for the first time came to be known as the 'District Boards' instead of the 'Local Fund Boards.' Under this Act, three classes of Local Boards, came into existence, *viz.*, District Boards, Taluk Boards and Unions. The Unions were of two classes—Major and Minor. The administration of local affairs was vested in the District Boards constituted for each of the revenue districts consisting of not less than 24 members who might all be appointed by the Government or might be partly so appointed and partly elected by the members of the newly created Taluk Boards from among their members or by the Union Boards and by the tax-payers of the rural parts of the district. The Collector continued to be the Ex-Officio President. The Act also provided for the election of the President of the District Board from among the members of the District Board, if the Government so directed.

The members were to hold office for three years. All the Revenue Divisional Officers were made Ex-Officio members. The Local Boards were empowered to levy with the approval of the Government any of the taxes authorized under the Act.

A Taluk Board consisting of a President and not less than 12 Members was constituted for each taluk or group of taluks. The term of office of the members was for three years. The Revenue Divisional Officer was made an Ex-Officio Member and President of the Board. The Taluk Boards' funds consisted of one-half of the proceeds of the tax levied by the District Board in the area and transferred to the Taluk Boards by the District Board and other fees such as licence for markets *etc.*, collected within the area of the Taluk Board. The revenues of the District Boards and the Taluk Boards were derived from land cess, from fees for the use of cart-stands, markets, slaughter-houses, *etc.*, and from tolls in the case of the maintenance of roads, bridges and other means of communications. The chief functions of these institutions, as has been stated earlier, were the construction and maintenance of hospitals and dispensaries, the diffusion of education, the enforcement of measures relating to sanitation and public health and the establishment and maintenance of relief works in times of famine and scarcity conditions.

An Union Board was constituted for a single village or for a group of villages. They consisted of not less than five persons, the headmen of the villages, constituting the Union being Ex-Officio Members. The Board levied house-tax varying from 4 annas to 4 rupees according to the classification of the house. The duties and responsibilities of this Board were the lighting and cleaning of public roads, the maintenance of drains, wells and other public places, the establishment and maintenance of dispensaries, schools *etc.*

In 1907 the entire subject to Local Self Government was taken up for consideration by the Royal Commission on Decentralization. The Commission brought to light that the resources of the Local Bodies were not sufficient for the proper discharge of the duties assigned to them. In order, therefore, to make Local Self Government really effective and responsible, the Montague-Chelmsford Report suggested that there should be as far as possible complete popular control in the affairs of the Local Bodies and the largest possible independence from outside control. In regard to rural boards the report stated that they should have full liberty to improve and alter taxation within the limits laid down by law. It further stated that whenever a board paid for a service, it should also control that service. If it was considered that control should be largely in the hands of the Government, then in such a case the service should be provincialized.

In the Government of India Resolution of the 16th May, 1918, the Government reviewed the question of Local Self Government and expressed the view that in order to give effect to the new policy, Local Bodies should be as representative as possible of the people whose affairs they were called upon to administer, the authority in the matter entrusted to them should be real and not nominal and that they should not be subject to unnecessary control but should learn, if necessary, by making mistakes and profiting by them.

With the coming into force of the Government of India Act, 1919, Local Self Government became a transferred subject and the implementation of the policy and the principles formulated in the resolution of May, 1918, thereupon devolved on the elected members.

Several amending Acts were passed by the State Legislature from time to time with a view to rectifying defects which were brought to light in the working of the Madras Local Boards Act, 1884. In 1920, the State Government thought that it was necessary to have a comprehensive legislation to give effect to the new policy of the Government and to consolidate and amend the law relating to the District Boards and this resulted in the passing of the Madras Local Boards Act (Act XIV of 1920). The Act gave an independent status to each class of Local Boards and increased not only their strength but also the proportion of elected members, their resources and their powers. The taxation powers of all the three categories of Local Boards were enlarged. The Boards were authorized to levy the pilgrim tax and also the profession tax on companies and firms. They were given a free hand in framing their budgets. Provision was also made for the appointment of a District Board Engineer and a District Health Officer. The Local Boards thus became more or less autonomous and the Collector and the Government were empowered to interfere only in cases of emergency and maladministration. In the same year, the Madras Village Panchayat Act was also passed with the object of developing the system of Self Government in rural areas. This Panchayat Act was, however, repealed in 1930 with the passing of the Madras

ActXI of 1930, which amended the Madras Local Boards Act, 1920, and was also comprehensive enough to include even the Panchayats constituted before the repeal of the Madras Village Panchayats Act, 1920. The Madras Local Boards Act, 1920, has been amended since then several times; the Taluk Boards having been abolished in 1934 and the Panchayats having been taken away from the ambit of the Act by the Madras Village Panchayats Act, 1950.

The following paragraphs illustrate in brief the trend in the amendments to the Act of 1920.

Provision was made for taking of oath by members of Local Boards. All roads and public markets were thrown open to all persons of whatever caste or creed. The main changes introduced by the amendment Act of 1930 were :

(i) inclusion of Village Panchayats within the scope of the Act; conversion of Union Boards into Panchayats; and the repeal of the Madras Village Panchayats Act, 1920;

(ii) abolition of the system of nomination to Local Boards;

(iii) direct elections to District Boards;

(iv) general triennial elections to Local Boards ;

(v) provision for a vote of no-confidence in Presidents and Vice-Presidents and for the removal of Presidents and Vice-Presidents by Government;

(vi) election of Presidents of District Boards;

(vii) empowering the Government to provincialize the services of officers and servants of Local Boards

(viii) alteration in the provisions relating to taxes and tolls with special emphasis on the levy of any tax suitable to the village with the sanction of the Panchayat, and

(ix) more effective supervision over the adjudication of disputes between local authorities *inter-se*, including, in particular, the vesting of power in the Local Government to constitute joint committees of local authorities for the purpose.

The levy of tolls and tax on motor vehicles by Local Boards was abolished in 1931. Specific provision was made for the constitution of District Boards, for altering their jurisdiction and for their abolition. The majority required for the passing of motion of no-confidence in Presidents and Vice-Presidents was reduced from two thirds to three fifths. Provision was made for the reservation of seats for Muslims and Indian Christians besides members of the Scheduled Castes. The Government took power to appoint District Engineers, Health Officers and Panchayat Officers. The amendment Act of 1934 abolished the Taluk Boards, the Village Development Fund, and made a provision for the splitting up of District Boards. The jurisdiction of Courts to grant injuctions in election proceedings of Local Boards was taken away by the amending Act of 1936. The amalgamation of bifurcated District Boards was made possible by the amending Act of 1937. The Act of 1938 provided for the inclusion of the names of persons found in the electoral rolls of the Madras Legislative Assembly Constituencies in the rolls prepared for Local Boards. Failure to pay arrears of any kind due to the Local Boards was made a disqualification for candidates standing for elections or for members continuing in office.

Certain safeguards were provided by the amending Act of 1942 in regard to the removal or the dismissal of Government servants employed by Local Boards. Act X of 1945 increased the rate of land cess leviable by Local Boards from 1¼ annas to 2 annas in the rupee. In the same year, provision was made in the Act for the levy of duty on transfers of property in the form of surcharge on stamp duty in respect of immovable property situated in the area under the jurisdiction of Local Boards. The formation of the Highways Department in 1946 resulted in certain amendments to the Act in that year. In 1947 provision was made for the inclusion in the electoral rolls of Local Boards of persons who were qualified to be included but were omitted to be included in the Assembly electoral rolls. The levy of duty on transfers of property in respect of leases in perpetuity of immovable property and exchange of immovable property was made possible by the Madras Act VII of 1950. The Madras Village Panchayats Act, 1950 removed Village Panchayats from the ambit of the Madras Local Boards Act, 1920, after which the provisions of the latter Act, which formerly related to Panchayats were restricted to Non-Panchayat areas. The name of the Madras Local Boards Act was altered into the Madras District Boards Act, 1920. The provision for the reservation of seats for Muslims, Indian Christians and Europeans in the Act was omitted by the amending Act of 1951. The Act also limited the total number of reserved

seats for the members of the Scheduled Castes, Anglo-Indians and women to one-fourth of the strength fixed for the District Board. By another Act of 1951, the adoption of Madras Legislative Assembly electoral rolls and the alteration thereto for purposes of elections to District Boards was provided for. Certain provisions of the Representation of the People Act, 1950, regarding the conduct of elections were embodied in the Madras District Boards Act by an Act of 1954.

The First Five Year Plan for the country was introduced in 1951. Planning led to an enormous increase in the activities of the Government. Large sums of money had to be spent on various schemes in short periods. It was, therefore, found essential that those who were to be benefited by these schemes should also have a say in their formulation. They must learn to express their felt needs and get them translated into programmes that can be implemented. Thus, the idea of the Panchayati Raj slowly began to take shape.

Panchayati Raj in Andhra Pradesh can, however, be said to have had its roots nearly one and a half decades ago. It is based on the Gandhian principle of rural rejuvenation to usher in a balanced development of the countryside. This idea was given effect to by late Sri. T. Prakasam, the then Chief Minister of the composite Madras State by his promulgation of the Firka Development Scheme in 1946. This was subsequently converted to the Rural Welfare Scheme in 1950. Besides the rural reconstruction work this scheme also covered Harijan Uplift Programmes as well as the Khadi Schemes. The three-pronged drive that this scheme gave to the economic and social reconstruction of rural life was in the direction of self-help, co-operative approach and State Aid. As in all nascent institutions, the issues at the beginning were not so clearly defined and so well crystallised as in the case of the Panchayati Raj institutions, but however, they formed the forerunners of a movement which has now got itself fully entrenched in the institution of the Panchayati Raj.

Community Development Programmes

The pattern of Community Development inaugurated on the 2nd of October, 1952 has been gradually modified to suit the needs of our rural communities. The central object of the Community Development Programme was to secure the fullest development of material and human resources of the local areas based on the fact that all aspects of rural life are inter-related and that no lasting results can be achieved if individual aspects of it are to be dealt in isolation. The approach was to step up the co-operative principle in its infinitely ranging forms for solving all problems of rural life. The experiment, therefore, in Community Development was started with the introduction of the Community Projects in the wake of the Rural Development Schemes. These Projects in a very short period achieved great popularity and people everywhere in other areas started to clamour for similar benefits in their respective villages. On account of these public demands and also considering the limited resources at the disposal of the Government the pattern of Community Projects had to be gradually changed over, to cover similar and lesser expensive Projects. These were known as the National Extension Service Blocks, each covering an area of about 150-170 square miles and involving an outlay of about Rs. 4.50 lakhs. The normal operational period of each of the N. E. S. Blocks was to be for three years. Any time within that period depending on the performance in the realm of people's participation, physical attainment and expenditure, the N. E. S. Block got converted into a Community Development Block with a bigger outlay of Rs. 15lakhs which also included the expenditure incurred during its N. E. S. stage. In June, 1957 the National Development Council decided that the Block should be treated as an unit for the purpose of planning and development and it should be made the agency through which the resources of the Government should flow to the people.

The study team for Community Development and National Extension Service headed by Sri Balwant Rai G. Mehta recommended certain changes in the pattern of Community Development. The Ministry of Community Development accepted these proposals and accordingly removed the distinction between the different types of Blocks and introduced the two stage system. Stage I was to be the intensive development phase with a provison of Rs. 12 lakhs and Stage II was to be the post-intensive phase with a provision of Rs. 5 lakhs. Both stages were to be of a duration of 5 years each. Great emphasis was laid on agriculture, and therefore, each Block had to pass through a Pre-Extension stage of one year devoted exclusively to agricultural development. On completion of this Pre-Extension Stage of one year the Block automatically entered the Stage I period.

With a view to achieving economy in expenditure consistent with efficiency in administration, without adversely affecting the tempo of developmental activities a High Power Committee was appointed in October 1963 to go into the question of reorganisation of Panchayat Samithi Blocks and allied matters. Pursuant to the recommendations of the High Power Committee, the then existing 447 Blocks in the State have been reduced to 321. With the Reorganisation of Blocks on the lines recommended by the High Power Committee, the distinction between Stage I, Stage II and Post Stage II of the Blocks has disappeared from 1st July, 1964.

After the disappearance of schematic budgets of Blocks of various stages, a new and more rational method of distribution of funds has been envisaged. As per the recommendations of the Committee, the Blocks have been categorised as 'Advanced' 'Ordinary' 'Backward' and 'Tribal' Blocks, on the basis of the following criteria with the weightages indicated against each:

	Weightage
(a) Per capita land revenue assessed within the Block	15
(b) Percentage of irrigated area to cultivated area	25
(c) Percentage of children of the age-group of 6-11 attending schools	10
(d) Districtwise Literacy	10
(e) Districtwise National Income	15
(f) Road mileage for 100 sq. miles within the Block	25
Total	100

The Community Development and other funds, after excluding establishment charges, are being released to Blocks on a varying per capita basis in inverse proportion to level of development of each Block, so that Blocks which are less developed will get larger funds compared to others which are better off, as shown below:

	Rupees per head of population in the Block
(a) Advanced Blocks	3/4
(b) Ordinary Blocks	1
(c) Backward Blocks	1 1/4
(d) Tribal Blocks	2

Decentralisation: Decentralisation of authority and the participation of people in administration have always been considered by great thinkers from the time of Socrates, as the chief embodiments of any democracy. In order that these two essential requisites find place in the fabric of the Indian democracy, on the recommendations of Sri Balwant Rai G. Mehta Committee team, Panchayat Samithis were constituted for each of the Community Development Blocks wherein the people are provided opportunities for participating in the process of administration. All developmental works beneficial to the community and coming within the ambit of Community Development were entrusted to the people's own elected representatives.

The idea of democratic decentralisation was thus conceived and the nucleus for this revolutionary movement was the age old village panchayat. The three tier system in which the Panchayati Raj institutions are linked one with the other consisting of Gram Panchayat at village level with its directly elected Sarpanch and members, the Panchayat Samithi at the Block level with the Sarpanches of Gram Panchayats, the Legislators of the State and six others to be elected in the prescribed manner as its members, and the Zilla Parishad at the district level consisting of the Presidents of all the Panchayat Samithis within the district, the District Collector, the Legislators of the State and the Centre, and six others to be elected in the prescribed manner, was evolved as the institutions in which the people's representatives will have their say in the formulation and execution of policies and programmes will be beneficial to the Community. The constitution of Gram Panchayats was, therefore, speeded up in order that the entire rural area came under one or the other of the Gram Panchayats.

The Andhra Pradesh Panchayat Samithis and Zilla Parishads Act was enatced in 1959 and except the areas within the jurisdiction of the Municipalities in the Andhra area, the areas within the jurisdiction of the City Municipalities in the Telangana area, the areas within the jurisdiction of the Municipal Corporation of the City of Hyderabad, the areas within the jurisdiction of Secunderabad Cantonment Board, the rest of the area constituting the State of Andhra Pradesh was brought under the ambit of this Act.

Panchayat Samithis: The Sarpanches of all the Gram Panchayats in a Block constitute the members of the Pannchayat Samithi. Two women members, one representative of the Scheduled Castes, one representative of the Scheduled Tribes, if their population in the Block is not less than 5% of the total population of that Block and if not, one more representative of the Scheduled Castes, two persons interested in rural development apart the Members of the Legislative Assembly of the State representing a constituency which comprises the Block are members of the Panchayat Samithis. A Member of the Legislative

Assembly representing a constituency which comprises more than one Block including a portion of any Block will be a member of the Panchayat Samithi of only one such Block which he chooses and he will have the right to speak in, and otherwise to take part in the proceedings of a meeting of any Standing Committee of such Panchayat Samithi, but he is not entitled to vote at a meeting of such Standing Committee unless he is also a member of that Committee. He will also have the right to speak in and otherwise to take part in the proceedings of a meeting of any Panchayat Samithi or any Standing Committee thereof constituted for the other Blocks comprised within the constituency, but he is not entitled to vote at any such meeting. The Members of the Legislative Council of the State specified by Government as members of the Zilla Parishads will become members of one of the Panchayat Samithis in the District. Such a Member of the Legislative Council will be a member of only one Panchayat Samithi in such district; and where he is a registered voter in any Block in such district, he will be a member of the Panchayat Samithi of only that Block; but if he is not a registered voter in any Block in the district, he will be a member of only one Panchayat Samithi of his choice in such district. Similarly the Revenue Divisional Officer, District Collector and such other officers as the Government may, by order, specify, have got the right to speak in and otherwise to take part in the proceedings of any meeting of a Panchayat Samithi or any Standing Committee thereof functioning within the local limits of their respective jurisdictions but they are not entitled to vote at any such meeting.

The Panchayat Samithi has been placed in complete charge of the implementation of the Community Development Programmes and in addition the Government have also entrusted to it the extension activities of the various development departments of the Government such as Agriculture, Animal Husbandry, Fisheries, Industries, Education, Co-operation, Social Welfare, Women's Welfare *etc.*

Every Panchayat Samithi has seven Standing Committees each of which has been placed incharge of a few specified subjects. The Panchayat Samithi with the approval of the State Government, is empowered to constitute one or more Standing Committees if necessary, for attending to any specific items of work. All the Standing Committees have independent powers of sanction within specified financial limits and may also execute works and schemes within those limits.

The Block Development Officer is the Chief Executive Officer of the Panchayat Samithi and he is assisted by the Extension staff. The President of the Panchayat Samithi exercises administrative control over the Block Development Officer for the purpose of implementation of the resolutions of the Panchayat Samithi and its Standing Committees.

Zilla Parishad :— At the District level there is the Zilla Parishad comprising the Presidents of all the Panchayat Samithis in the district, the District Collector, the Members of the Legislative Assembly of the State elected from the district, such Members of the Legislative Council of the State as the Government may by order specify, the Members of the House of the People elected from the constituency which forms part of the District, and such Members of the Council of States as the Government may by order specify. Two Women, one representative of the Scheduled Castes, and one representative of the Scheduled Tribes, if their population in the district is not less than five percent of the total population of that district, and if the population of the Scheduled Tribes is less than such percentage, another representative of the Scheduled Castes, and two persons interested in Rural Development have to be elected by the above categories of members.

The Chairman and the Vice-Chairman are to be elected by the members from among the non-officials who are not Legislators. The President of any Panchayat Samithi, if elected as the Chairman of the Zilla Parishad, will automatically cease to be the President of that Panchayat Samithi, but his right of membership on the Panchayat Samithi, will not be affected. A Secretary, appointed by the Government functions as the executive head of this organisation. He is entitled to attend the meetings of the Zilla Parishad or any of its Standing Committee meetings, and can take part in discussions, but is not entitled to vote. Like the Panchayat Samithis the Zilla Parishad also functions through its seven Standing Committees. In addition to these seven Standing Committees, the Zilla Parishad may, with the approval of the Government, constitute one or more Standing Committees if necessary, for specified purposes. The Chairman of the Zilla Parishad and the District Collector are Ex-Officio members of all Standing Committees while the remaining members are to be elected in

the prescribed manner by the members of the Zilla Parishad from among themselves. The District Collector is the Chairman of all the Standing Committees. The President or Chairman of the District Co-operative Bank or the Central Bank and the President of the District Marketing Society in the district have the right to speak in and otherwise to take part in the proceedings of any meeting of the Zilla Parishad but are not entitled to vote at any such meeting. The District Officers of various development departments, Regional and State Officers incharge of development activities, who are specified by the Government by an order, have the right to speak in and otherwise to take part in the proceedings of any meeting of the Zilla Parishad or any Standing Committees thereof functioning within the local limits of their respective jurisdiction but they, however, have no right to vote.

The Zilla Parishad co-ordinates and consolidates plans prepared in respect of all the Blocks in the District and prepares plans in respect of the entire district, supervises generally the activities of the Panchayat Samithis in the district. It also examines and approves the budgets of the Panchayat Samithis in the district.

The chief sources of finance for the Zilla Parishad are the Central and the State Government funds allotted to it, grant from All India Bodies and Institutions for the development of Cottage, Village and Small Scale Industries; such share of the land cess or local cess, State taxes or fees as may be prescribed; proceeds from taxes or fees which the Zilla Parishad may under any law levy, income from Endowments or Trusts administered by the Zilla Parishad, such income of the District Board as the Government may, by order, allot to it, donations and contributions from Panchayat Samithis or from the public in any form, and such contributions as the Zilla Parishad may levy from the Panchayat Samithis with the previous approval of the State Government.

Growth of Community Development programme in Nellore District

The Community Development Programme was first started in Nellore district in the year 1954. Venkatachalam and Podalakur National Extension Service Blocks were the first to be started in this district on 4th April 1954. Venkatachalam and Podalakur National Extension Service Block were converted into Community Development Blocks on 1st April 1955 and 1st April 1956 respectively. During 1956-57 four N. E. S. Blocks *viz.*, Indukurpet, Thotapalligudur, Udayagiri and Tallur (the first two on 1st April 1956 and the latter two on 2nd October 1956) were inaugurated. Thus by the end of the First Five Year Plan *i.e.*, on 31st March 1957 there were two Community Development Blocks and four National Extension Service Blocks in this district covering 290 villages having a population of 3,30,820 persons. The total area covered was 1427.00 square miles. During 1957–58 four more N. E. S. Blocks *viz.*, Bangarupeta (later known as Venkatagiri), Kurichedu (later known as Darsi) Chejerla and Gudur were inaugurated, the former two on 1st April 1957 and the latter two on 2nd October 1957. During 1958-59 the pattern of the Community Development Programme in the State was changed based on the recommendation of Sri Balwanta Rai G. Mehta's Committee. The new pattern of classification of the Blocks as Pre-Extension Blocks, Stage I Blocks and Stage II Blocks emerged from 1st April 1958 under the new classification. The eight N.E.S. Blocks were converted into Stage I Blocks while Venkatachalam Community Development Block was converted into a Stage II Block. Podalakur Community Development Block continued in the same status. On 1st April 1958 Naidupet Stage I Block and Kondapi Pre-Extension Block were started. Veligandla Pre-Extension Block was inaugurated on 2nd October 1958. During 1959-60 Kondapi and Veligandla Pre-Extension Blocks were upgraded into Stage I Blocks and Podalakur Community Development Block was converted into Stage II Block. Two new National Extension Blocks *viz.*, Atmakur and Podili were inaugurated on 1st April 1959 and 2nd October 1959 respectively. During 1960-61 four more N.E.S. Blocks *viz.*, Balireddipalem, Kavali, Kanigiri and Chinakraka were inauguarated, the first two on 1st April 1960 and the latter two on 2nd October 1960 and Atmakur and Podili Pre-Extension Blocks were upgraded into Stage I Blocks. Thus by the end of the Second Five Year Plan there were 19 Blocks in Nellore district covering 1,263 villages with a population of 11,55,985 persons and an area of 5,142.08 sq. miles. The following statement gives the particulars regarding the date of inception, stage on 1st April 1961, number of villages covered and the area of each Block in the district.

STATEMENT XII-1

Name of the Block	Date of inauguration of the present Block	Stage (as on 1-4-1961)	No. of villages in the Block	Area in sq. miles
(1)	(2)	(3)	(4)	(5)
Indukurpeta	1-4-1956	Stage I	27	104.29
Thotapalligudur	1-4-1956	do	38	121.64
Udayagiri	2-10-1956	do	64	410.11
Tallur	2-10-1956	do	53	238.21

STATEMENT XII-I—*Concld.*

Name of the Block (1)	Date of inaugration of the present Block (2)	(Stage as on 1-4-1961) (3)	No. of villages in the Block (4)	Area in sq. miles (5)
Darsi	1-4-1957	Stage I	67	311.44
Venkatagiri	1-4-1957	do	164	285.48
Chejerla	2-10-1957	do	53	294.43
Gudur	2-10-1957	do	74	246.98
Naidupet	1-4-1958	do	66	178.75
Kondapi	1-4-1958	do	53	194.76
Veligandla	2-10-1958	do	118	451.14
Atmakur	1-4-1959	do	64	346.07
Podili	2-10-1959	do	57	249.08
Podalakur	4-4-1954	Stage II	52	314.23
Venkatachalam	4-4-1954	do	57	245.40
Balireddipalem	1-4-1960	Pre-Extension	83	209.91
Kavali	1-4-1960	do	26	183.10
Kanigiri	2-10-1960	do	92	376.58
Chinakraka	2-10-1960	do	55	380.48

During the redelimitation of the Community Development Blocks done in 1964 all the above Blocks were redistributed as per the orders issued in G. O. Ms. No. 532 Panchayati Raj (Samithi I) Department, dated 15-5-1964.

The Panchayat Samithis were constituted in the district on 1st November 1959 and the Zilla Parishad was constituted on 1st December, 1959 on a statutory basis. Therefore, with the introduction of democratic decentralisation set up at the District, Block and Village levels, the responsibility, initiative in economic and social development in rural areas vested with the popular institutions-the Zilla Parishad at the District level, Panchayat Samithi at the Block level and the Village Panchayat at the Village level. The people are also getting themselves educated in the proper functioning of these institutions. Their interest is quite evident from the Panchayat elections held in the district in 1964. The expenditure incurred in each of the Community Development Blocks and the Blockwise physical achievements are given under Administrative Statistics in Part II of this book and may be referred to.

CHAPTER XIII

GAZETTEER

NELLORE TALUK

Among the taluks in Nellore district, Nellore taluk supports the largest population of 303,745 persons as per the 1961 Census count. It extends over an area of 504.0 square miles and has a density of 603 persons per square mile. It is bounded on the north by the river Pennar, on the east by the Bay of Bengal on the south by the Gudur taluk and on the west by the Atmakur and Rapur taluks. There are altogether 121 inhabited and one uninhabited village and one town *viz.*, Nellore City in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	7
200— 499	16
500— 999	17
1,000—1,999	43
2,000—4,999	37
5,000—9,999	1
10,000 and above	..
Total Inhabited Villages	121

Nellore Bit I (Rural) is the only village with more than 5,000 population in this taluk.

The principal rivers which drain the taluk are the River Pennar (Penneru) also called the Uttara Pinakini and the River Kandleru (Upputeru) in the lower reaches. The River Pennar falls into the Bay of Bengal about 18 miles east of Nellore City Two anicuts, one at Sangam in Atmakur taluk 20 miles west of Nellore, and another at Nellore were constructed across the River Pennar, to supply water to Nellore taluk. The anicut constructed across the River Pennar at Nellore has two main channels called the Jaffar Saheb channelwhich flows directly towards east and empties finally into Kodur tank and the other the Survepalle channel, flows south branching itself into three channels *viz.*, Survepalle, Krishnapatnam and Vallur channels. These channels feed a number of tanks and extend irrigation facilities to a large area of wet lands all along their course. The anicut constructed at Sangam supplies water to Nellore taluk. About three-fourths of the taluk is delta area fed by the Pennar canal system. The Survepalle Reservoir and the Nellore tank are the major sources of irrigation. The rest of the taluk is non-delta area under rainfed tanks mostly precarious but none the less important. The Jaffar Saheb channel and the Survepalle channel irrigate about 35,000 acres and 33,000 acres respectively. The Survepalle channel supplies water to Survepalle Reservoir which has an ayacut of 11,380 acres, while the Nellore tank which receives water supply direct from the Pennar from the anicut at Sangam has an ayacut of 12,000 acres under different villages. The proposed Kanupur canal scheme may be highly beneficial to the non-delta parts of this taluk. There are no special drainage facilities in this taluk. As the taluk is almost an uniform plain sloping towards the sea, all the surplus and drainage water flows into the Bay of Bengal without any difficulty. The crops in this region grow exceedingly well and due to rich deposits of alluvial soil and good water supply paddy is raised as the chief crop in the delta, besides, Jonna, Ragi *etc.*, in the non-delta area.

The climate of this taluk is generally dry. Hot weather continues right upto July. The South-West monsoon is not very important in this taluk as it does not bring good amount of rain. This taluk therefore, depends on the North-East monsoon mainly. The River Pennar usually receives freshes early in July under the influence of South-West monsoon. The average rainfall of this taluk is about 37 inches. There are no major worth mentioning forests in this taluk. The small extent of 19,807.49 acres covered by forests represents only sunk jungles and are intended mostly for fuel and grazing purposes.

This taluk being the headquarters taluk of the district is having good educational and medical facilities. Nellore City, the district as well as the taluk headquarters, has several educational institutions, *viz.*, the V. R. College, the Government B.Ed. Training College, the Government Polytechnic, the Industrial Institute, two Training Schools for Women ten Secondary and Higher Secondary Institutions one Sanskrit Pathasala, two Middle Schools and several Primary Schools. In the rural areas of the taluk, there are six High Schools, one Basic Training School, three Higher Elementary School besides

Several Primary Schools run by the Panchayat Samithi or Zilla Parishad. Almost all the villages are served by the Primary Schools maintained by the Panchayat Samithis. A Basic Training School is located at Pallipad village. As regards medical facilities, Nellore City contains a Government District Headquarters Hospital, the Victoria Jubilee Hospital, a T. B. Hospital, an American Baptist Mission Hospital, the Saint Joseph Maternity Hospital, besides Ayurvedic and Unani dispensaries maintained by the Municipality. In the Rural areas there are four Hospitals and seven dispensaries.

The taluk is well connected both by Rail and Roadways. The Madras–Waltair (Broad Gauge) line of the Southern Railway cuts the taluk into two halves. Nellore, Nellore South, Vedayapalem, Venkatachalam and Manubolu are the Railway Stations on the above line in this taluk. Close in the same direction runs the great Northern Trunk Road from Madras to Calcutta, parallel to the Railway line. The major district roads which run to the east and west of it connect many important villages. With the introduction of Panchayati Raj, the taluk contains three Samithis *viz.*, Venkatachalam, Indukurpet, and Thotapalli Gudur and under Samithi administration many villages have road facilities. There is good road transport facility as buses ply regularly from Nellore City to adjoining districts, taluk headquarters and nearby big villages. The Buckingham canal runs from south to north along the eastern boundary of the taluk. It is navigable throughout the year. Krishnapatnam village on the sea coast is a minor port. There are 21 Sub–Post Offices and 77 Branch Post Offices in this taluk including those at Nellore City which have telegraph and telephone facilities. Indukurpeta, a firka headquarters, has a public telephone call office.

All villages in this taluk are having protected wells for drinking water and no scarcity is normally felt for drinking water in any part of the year. Nellore City is having protected water supply system. Weekly shandies are not in vogue in this taluk. Annual festivals like the Mahasivarathri at Nellore and Kodur in the month of February, the Garudaseva of Sri Talpagiri Ranganadhaswamy at Nellore in the month of March, Garudaseva of Sri Vedagiri Narasimhaswamy at Narasimhapuram(Devarapalem) in the month of April, the Chamundeswary Utsavam at Gangapatnam in the month of May or June and Urs at Kasumur in the month of August or September are generally observed with great pomp.

There are no large scale industries in this taluk. An Industrial Estate is being established at Nellore. There are, however, many small scale and cottage industries. Among these industries, beedi and cigar making, stainless steel works, techno-castings, manufacture of cement pipes, handloom weaving, mat weaving and mica splitting figure prominently. There is also a straw board industry in the private sector by name Nellore Straw Boards. There are no mines or minerals in this taluk. Snipe shooting around Nellore and Survepalle, fishing at Krishnapatnam backwaters and duck shooting in tanks throughout the taluk are common.

Nellore— a Municipality has a population of 106,776 persons as per the 1961 Census count. It is the headquarters of the district as well as of the taluk by the same name with its usual complement of district and taluk offices. The town extends over an area of 5.28 sq. miles and contains in all 21,485 occupied residential houses. It is bounded on the north by River Pennar, on the south by a large extent of high level ground called the Dargamitta, on the west by the Nellore tank and on the east by paddy fields. The town is at a distance of about 108 miles north of Madras and 15 miles from the sea coast.

The derivation of the name "Nellore" is variously explained. The town itself boasts of a hoary antiquity in that it is said to lie in the Dandaka Aranyam of the Ramayana, the primeval forest into which Rama with his wife Sita and brother Lakshmana entered during their exile from Ayodhya and from which the wife was carried away by the Rākshasa king Ravana of Lanka. A large town is said to have once stood on the suburb of Nellore now known as Dargamitta, occupied by the houses of the European residents and the name of this town was Simhapuram (lion town) or Vikrama (brave) Simhapuram. The idea of lions may have come from the neighbouring forests being infested by lions and there is a legend that elephants which sleep in this locality always die because their rest is disturbed by dreams of lions and to this day a local prejudice exists amongst owners of elephants against bringing them to the town. Another story is that the town was built either by or during the time of Vikram Simha, a local chieftain of a remote date. Simhapuram has no apparent connection, however, with the name of the town that grew up later on its site.

Two interesting legends about this town are also cited below. According to Hindu mythology,

Maya, the architect of *Devas*, constructed a lovely and beautiful city in the middle of 'Dandakaranya" the abode of wild animals, for his two handsome daughters Karavalli and Suravalli. They were committed to the care and protection of the Godess Kali and other spirits. Vajra, the great grandson of Sri Krishna, who was on a hunting expedition overcome with fatigue, approached the city of Maya's daughters and rested under a 'Nelli' *(Phillanthus emblica)* tree. Maya's daughters delighted with and enamoured of Vajra's beauty carried him according to the story, to their mansion, and after spending an amorous night with him, killed him, and buried him under the 'Nelli' tree to avoid detection. Lord Krishna was informed of this infernal deed by Anirudha, the father of Vajra. Anirudha made frantic efforts to discover his missing son. He is said to have appeared in the guise of an old man and got from the daughters of Maya the body of Vajra as gift and burnt it. The ashes were washed in the waters of the Pinakini (Pennar), when they were transformed into bones again. Lord Krishna then brought Vajra back to life under the Nelli tree and blessed him. He further advised him to conquer the city of Maya's daughters. Vajra did so and named the place as Vikrama Simhapuri. The spot under the Nelli tree was given to Parvathi by Siva as a boon.

The other legend relates to the milking of a cow of Mukkanti Reddi upon a Lingam. The following account of the origin of the name 'Nellore' is stated in the *Sthala Purana* of Mulasthana Iswara: 'Once upon a time there was a chief named Trinetrudu or Mukkanti Reddy, who had a large herd of cattle and among the animals was a cow into which the soul of a Brahman woman was supposed to have passed. This cow had a revelation that Siva had appeared on earth in the form of a stone lingam. It daily resorted to this stone which was situated under a Nelli chettu (tree) *(Philanthus emblica)* and bedewed it with its milk. Mukkanti noticing the cow's loss of milk took the herdsman who watched the cow to task and when he (herdsman) saw the cow pour its milk on the stone, he struck the stone with a sword whereupon blood flowed. He reported what happened to Mukkanti, who had a vision in which he saw the lingam, and heard a voice telling him to build a temple on the spot, which he did giving it the appellation of Mulasthana Iswara.

The derivation of the name from the Nelli tree seems to have no bearing on the history of the place. Historical evidences are not wanting to give a faint clue to the origin of the name. In the thirteenth and fourteenth centuries, this village was under the domination of the Tamil Pandya Kings of Madura. It is possible that these Kings and their vassals obtained large quantities of paddy from the surrounding villages and the name 'Nelliuru' (mean Nelli—Paddy, uru—village), a paddy producing village, might have been given to it. It is even surmised by some that the goodness of the country in general and the convenience it offered to the Pandya Kings should have attracted their attention and won the appellation Nallauru (Nalla—good). The three other names given to the town are Lingapuri, Dhanyapuri (grain town) and Simhapuri (lion town).

This town originally formed part of Dandakaranya and later part of the Andhra Kingdom and finally passed on to the hands of the Pandyas of Madura. During the supremacy of the Pandyas, about the middle of the fourteenth century, the village consisted of not more than three streets as seen from a mutilated inscription in Tamil on the western wall of Sri Ranganayakulu temple. It is further learnt from the inscription that during the 10th year of the reign of Kullottunga Deva Chola, the head of Pandya Kings of Madura the Mudaliyars of the three streets of Nellore or Vikrama Simhapuri bestowed a munificent gift of 10 *chinnams* to a certain Perumal temple at Nellore. Other evidence shows that the village was under the rule of early Telugu Chola chiefs who were vassals under the powerful Kakatiya Kings of Warangal. Another inscription throws light on the several gifts of land made for specific purposes by the Pandya Kings to Sri Ranganayakuluswami temple. Kakathiya King, Sriman Mahamandaleswara Kakathiya Prathaparudradeva Maharajulu appears to have made a gift of land for the upkeep and maintenance of the temple of Irukalamma still preserved on the bund of the Nellore tank and worshipped by many. The temple pujari is even to the present day enjoying the 'manyam' granted in those ancient days. Later on, during the reign of Krishnadevaraya of Vijayanagar, the village came to be part of his dominion. The successors to the king appear to have held sway for some decades even after the fall of the empire. When the empire was nearing extinction, the country north of the Pennar passed into the hands of the Nizam of Hyderabad while the portion to the south of it was occupied by the Nawabs of the Carnatic.

The year 1625 is memorable in the history of the Nellore district, for in that year, the East India

Company settlers headed by one Mr. David and assisted by a Mudaliar of the locality settled at Dugarajupatnam which they finally abandoned in 1699 when the settlement was established at Fort St. George in Madras.

In 1753 this town appears to have been ruled by one Nazibulla, the brother of the Nawab of Arcot. He revolted against the Nawab in 1757. Nazibulla was closely watching the European settlers in and around the country and at one time seems to have invited the French to the village. Colonel Bussy, the French Commander, visited Nellore in September 1758, and was warmly received as friend and ally by Nazibulla. Soon after the defeat of the French at Madras, Nazibulla manifested his zeal for the English by killing every French man left at Nellore by Bussy. Delighted at this, the English appointed Nazibulla the Governor of Nellore, on the specific contract of getting 30,000 pagodas annually from him. The fort at Nellore probably constructed by Nazibulla about this time measured 1,200 yards from east to west and 600 yards in other directions. In the middle of the next year the Subedar of Deccan, appointed by the Sultan of Delhi threatened an invasion of the district. After the fall of Pondicherry in 1761, the Nawab of Arcot with the help of the English who despatched an army under Captain Colliend subjugated the Nellore district after storming the fort. Between the years 1768 and 1782 the English were engaged in the Mysore Wars and when Tippu Sultan fell in 1781, the revenues of the Carnatic were assigned to the English for a period of five years, the Nawab of Arcot receiving one-sixth of the revenues for his expenses. It was then that Nellore passed into the hands of the English for the first time; the management of the district however was completely taken over by them in 1790. Mr. Deighton, the then Collector spared no pains in fixing the Government share of produce to be collected from the ryots. There existed a dual Government till about 1801 when the Nawab finally ceded the district to the British and since then it has been under British control.

Nellore town stands unique among the other towns of the Andhra Pradesh as it is supposed to be the place where the greatest of Telugu poets Paturu Tikkana Somayaji, who translated into Telugu in an inimitable manner the Sanskrit Mahabharata, lived. In his translation, he makes mention in the Mangalaslokam of the temple of Sri Hari Hara which is supposed to have stood on the southern bank of the Pennar near the present temple of Sri Ranganayakulaswamy. No trace of the temple of Hari Hara is to be seen now. It is believed to have been washed away by the floods before the change of the river course towards north.

There are three big temples *viz.*, Ranganadhaswamy temple also known as Ranganayakula temple, Mulasthaneswaraswamy temple and Venugopalaswamy temple in Nellore City. Sri Ranganayakula temple is constructed on the right bank of the Pennar on rocky ground. No mention of this temple was made by any of the early Telugu poets. Presumably it is of recent origin. On the walls of the temple there are, however, inscriptions of Tamil Pandya Kings of Madura. This is a Vaishnavite temple and has large endowments. Many festivals are celebrated in this temple. The most important festival is the *garudothsavam* of Ranganadhaswamy in the month of March. Mulasthaneswaraswamy temple is an old one and the annual festival spreading over a period of 10 days is held during Sivarathri in the months of February and March every year. Many people from neighbouring places attend this festival. The Venugopalaswamy temple is of recent origin. The annual festival is held every year in Chaitra-(March and April months) with great pomp. Floating festival is held in the adjoining tank on the Vaikunta Ekadasi day in the month of December.

There is another small temple called Dharmaraja temple near Mulasthaneswara temple which is supposed to have been renovated by King Amboja, a ruler of Nellore. The festival of this temple is held once in three or five years. There is another temple called Irukulamma temple which has some historical importance. This temple is situated on the bund of the Nellore tank and the deity is supposed to have the power of protecting the crops and thereby promoting the prosperity of the town. Vemalasettibhavi (Vemalasetti well) in Durgamitta in the southern part of the city is another place of religious interest. A story associated with this well says that Vemalasetti, a Vaisya of Nellore had a long cherished desire to dig a well for the benefit of the people. He began to dig the well and even after digging very deep the spring of water was not found and in despair he abandoned the undertaking. He then dreamt that water would spring into the well, if a young couple was sacrificed to the well. Instead of offering some other innocent couple he offered himself with his wife to the well. The next day the corpses disappeared and water began to ooze in the well. The people even today believe that Vemalasetti

and his wife are staying in the well and fulfilling their desires. They have great reverence for the well and barren women pray for the attainment of motherhood. The Hindus offer jaggery to the well every year on Magha Purnima.

The city is growing to be an important centre of education. It contains one Arts and Science College under private management called the V. R. College, one Government Training College, one Government Polytechnic, one Industrial Training Institute, ten Secondary Schools and Higher Secondary Schools, two Secondary Grade Training School. for Women, two Middle Schools and one Sanskrit Pathasala besides a number of Primary Schools.

It is also important agriculturally as rich harvests of paddy are reaped in the delta nearby and is well known as a steady rice exporting centre. Its trade is mainly with the adjoining State of Madras. An Industrial Estate is being established in Nellore City. Though there are no large scale industries in this town there are several small scale industries of which Nellore Straw Boards and Technocastings are prominent. A stainless steel factory which is privately owned is making headway.

As regards medical facilities there are quite a number of private practitioners besides the Government Hospitals. There is a Government District Headquarters Hospital, a Government Victoria Jubilee Hospital, a T.B. Hospital, an American Baptist Mission Hospital and the Saint Joseph Maternity Hospital in the town. In addition to these institutions, the Municipality maintains two Ayurvedic dispensaries and one Unani dispensary.

The town contains a number of mosques, the biggest of them being the Jumma mosque. The Town Hall situated on the Trunk Road was built in 1915 by Sri Rebala Lakshminarasa Reddi for the benefit of the public in which generally public meetings and entertainments take place. The town has a clock tower, several private choultries, rest houses and parks.

Kasumuru— is situated at a distance of about five miles from the Venkatachalam Railway Station and supports a population of 3,169 persons as per the 1961 Census count. It covers an area of 14.14 square miles and in all it comprises 688 occupied residential houses. The village is said to be famous for its pasture lands (Kasuvu) and hence called Kasumuru. The village is also known for the Urs of the Muslim saint called Kaleshah popularly known as Mastanayya. The festival occurs annually on the 25th day of Rabbi-ul-aval in the Muhammadan month when a large gathering of about 20,000 people of all castes gather. It is locally believed that by offering prayers and using the sandal or *Chandanam* collected from the shrine on the Urs day people are cured of all physical ailments and that victims of evil spirits find relief here. The villagers regard Gangamma as their village deity; the Gangamma Jathara is celebrated once in five or six years.

Krishnapatnam — is a sea-coast village situated on the Coromandel coast about two miles east of Muthukur. The village has a population of 2,463 persons as per the 1961 Census count. It extends over an area of 1.12 square miles and there are altogether 593 occupied residential houses. The village is connected by a major district road which connects Muthukur and Krishnapatnam. Agriculture is the major means of livelihood and it is a canal irrigated village. A rest house called "Konamalla Bungalow" is situated between the Buckingham Canal and the sea-coast near the place where the Upputeru and the sea meet. The place is a fine tourist and picnic resort and provides boating, fishing and such other pastimes. Krishnapatnam was once a flourishing town and a sea port in the time of Krishnadevaraya as is evidenced by stone inscriptions in the Vishnu and Siva temples and other places. It is stated that many wells, old brick walls and other relics of an ancient mould were discovered in Krishnapatnam. With immense export potentialities of the State and the increased tempo of exports, the development of the minor port at Krishnapatnam is under the active consideration of the Government.

GUDUR TALUK

This is a coastal taluk covering an area of 463.0 sq. miles which lies bounded on the north by the Nellore taluk, on the south by the Sullurpet taluk, on the east by the Bay of Bengal and on the west by the Rapur and Venkatagiri taluks. According to the 1961 Census count the taluk has a population of 141,128 persons and a density of 305 persons per sq. mile. There are in all 131 inhabited and 18 uninhabited villages and one town *i.e.*, Gudur town in this taluk. Most of the coastal villages of this taluk are sandy but they are thickly populated.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than — 200	20
200 — 499	35
500 — 999	38
1,000 — 1,999	26
2,000 — 4,999	10
5,000 — 9,999	2
10,000 and above	..
Total inhabited villages	131

Kota and Chennur are the only two big villages which have population of over 5,000 in this taluk.

The climate of this taluk is generally dry and salubrious. April to June are the hottest months. The average annual rainfall of this taluk is 925.3mm. The river Swarnamukhi with its branches, the Challakalava and Mavidikalava flows across this taluk and enters into the sea near Siddavaram village. Besides this river the taluk is drained and watered by the river Kandleru also called the Upputeru in the lower reaches, Pambaleru river, Rapur river and Venkatagiri river. The river Kandleru borders between Nellore and Gudur taluks and projects into the interior towards the west touching the villages, Thammenapatnam, Homidi and Yerur as far as Tippaguntapalem. The taluk contains only about 21 acres of Reserve Forest area which contains inferior wood mostly fit for fuel.

The eastern part of this taluk, as it adjoins the sea, is generally sandy and is extensively utilised for casuarina plantations. The western portion is barren and therefore the area which lies between the sandy and barren tracts of this taluk is largely utilised for cultivation and is considered to be fertile. The soil is made up of black, red, mixed and sandy loams but most of the area of this taluk is under mixed loam. Sowings or the transplantation of paddy crop is mainly under the tanks, majority of which are rainfed. The success of the crops in this taluk therefore chiefly depends upon the North-East monsoon, which sets in generally in the month of October. The three big tanks in this taluk are Pennaki tank, Chennur tank and Gudur tank. There is an anicut across the Challakalava and it feeds the Pennaki tank of Kota and Kothapalem villages besides a few other minor tanks. The Chennur and Gudur tanks are fed by the Venkatagiri river across which an anicut is constructed. Throughout the coastal region of this taluk there are spring channels which irrigate about 2,000 acres. The taluk has about 183 minor irrigation works commanding an ayacut of 126,13 acres.

The taluk has good means of transport and communication facilities. Gudur town, the taluk headquarters, is well connected both by road and railways. It is an important Railway junction on Madras–Waltair (Broad Gauge) line of the Southern Railway from which starts the Broad Gauge line to Renigunta, which in turn is a junction on the Madras–Raichur (Broad Gauge) line. The Great Northern Trunk Road passes right through the taluk from south to north connecting Gudur to Nellore on the north and Madras on the south. Dugarajupatnam is connected with the Great Northern Trunk Road on one side and with the Naidupet Railway Station on the other. Gudur is also connected with Rapur and Venkatagiri by major district roads. The Buckingham Canal passes throughout the eastern portion of the taluk adjoining the sea and provides water transport facilities. The taluk contains three Post and Telegraph Offices, three Sub-Post Offices and 37 Branch Post Offices.

As regards medical facilities, there is a Government Hospital at Gudur with a bed strength of thirty and a Zilla Parishad Hospital at Kota with a bed strength of 15 only. The Zilla Parishad also maintains a Rural Dispensary at Vakadu and a Primary Health Centre at Chintavaram. Nidigurthi, Chittamur, Tikkavaram, Gunupatipalem Varagali and Odur have one Rural Ayurvedic Dispensary each. Besides these, there are Maternity Centres located at Chittedu, Pallamala, Vedicherla and Tipparal padu. People in villages drink water from the draw wells and the taluk has about 136 Rural Water Supply Scheme wells. Gudur town is however having protected water supply system.

The educational establishments of this taluk consist of a Zilla Parishad Higher Secondary School and Sheastly Memorial Girls' High School at Gudur, and Zilla Parishad High Schools at Chennur and Kota. There is a Sanskrit High School at Kothapalem maintained by the Zilla Parishad. At Vakadu there is a High School under private management. In addition to these the taluk has a Mining Institute and a Ceramic Institute at Gudur. Two Arts and Science Colleges, one at Gudur and another at Vakadu have been started during 1965-66.

As regards industries there are two Government factories in Gudur town *viz.*, the Government Ceramic Factory and the Government Glass Factory. Mica splitting and grading is the most important industry of this taluk. Rich deposits of Mica found in several adjacent places are brought to Gudur town

for processing like splitting, grading *etc.*, and exported to foreign countries. The entire splitting work is being done by the workers mostly employed on daily and monthly wages. Charcoal and firewood from the forest areas of Rapur taluk are exported to Madras from Gudur Railway Station. A Mat Weaving Centre is located at Vallipedu and rattan works centre at Varagali.

Gudur—a Municipality, has a population of 25,618 persons according to the 1961 Census count and is the headquarters of a taluk and of a Revenue Division of the same name. The town extends over an area of 1.50 sq. miles. There are 5,558 occupied residential houses in all. The density of population is 17,079 persons per square mile. It contains a number of mica exporting companies in the town which provide employment to a large number of labourers in each and the mica is intended only for export. There are also several mica depots where dressing and splitting of mica is done.

The town is now having good drinking water facilities with protected water supply system. The town has two High Schools, a Government Ceramic Institute and a Government Mining Institute besides a number of Primary Schools. An Arts and Science College was very recently established in this town (during 1965-66). There is a Government Hospital with a bed strength of thirty, a Maternity Child Welfare Centre and a Maternity Centre. There is a Government Veterinary Hospital and a Municipal Ayurvedic Dispensary. There are two reading rooms maintained by the Municipality and one big library. The town has a District Munsiff's Court, a Sub-Collector's Office, and other offices complementing a Divisional headquarters. There is a Sub-Post Office with Telephone and Telegraph facilities.

There are three major irrigation tanks and two minor irrigation tanks in this town. These tanks are fed by a river channel from the Venkatagiri river. The other minor irrigation tanks are rainfed. The majority of the people earn their livelihood by agriculture. Chillies and rice are exported in small quantities. Many people earn their livelihood by working in the mica depots. The town is a good business centre for mica.

As regards communication facilities the town is well served both by road and railway. The Great Northern Trunk Road passes through this town, connecting it with Nellore and Madras. The town is also connected by major district roads to Venkatagiri, Rapur, Podalakur, Dugarajupatnam and other important places. The Madras-Calcutta (Broad Gauge) line of the Southern Railway passes through this town. The Gudur-Renigunta(Broad Gauge) line branches off from this place.

The Venkateswaraswamy temple and the Dharmaraja temple are important temples of this town. The festival of the Dharmarajaswamy temple is celebrated once in ten or twenty years. The festival lasts for twenty three days and people from neighbouring villages attend the celebrations with great enthusiasm. Other important local deities are Thalamma and Mahalakshmamma. The jataras of these deities are held occasionally.

Chennur-II— a Major Panchayat, has a population of 6,062 persons according to the 1961 Census. It is situated at 3 miles from Gudur on Venkatagiri-Gudur road.

As regards educational facilities there is a High School and an Elementary School in this village. There is a Branch Post Office with telegraph facilities. It is noted for its betel vine gardens. There are a few mica depots in this village for grading and splitting the mica. Handloom weaving is one of the important cottage industries in this village. The important occupations of the people in this village are agriculture, handloom weaving and mica splitting.

Kattalamma, Gangamma and Savalamma are the village deities. The festival of Savalamma is occasionally celebrated by the weaving community of Devangas. There are temples for Someswaraswamy, Chennakeswarlu, Anjaneya swamy and Virabhadraswamy in this village. Chennakeswaraswamy temple is in a neglected condition. No festivals are celebrated in these temples.

Kota—Is situated towards the east of Gudur at a distance of about 20 miles, has a population of 5,436 persons as per the 1961 Census count. There are altogether 1,146 occupied residential houses in this village and it covers an area of 13.28 square miles. Agriculture is the major means of livelihood for a large number of people. Irrigation is facilitated by minor irrigation sources such as river channels, tanks and private wells. Chillies are largely raised in the irrigated lands. The principal deity of this village is Kotamma. There are also the temples of Sri Kodandaramaswamy, Sri

Anjaneya and Siva. The annual festival of Sri Kodandaramaswamy is celebrated in the month of August or September. All these temples are managed by private individuals of this village.

This village is connected with Gudur by a major district road and buses ply regularly from Gudur to Kota. There is a rest house, a general hospital, a veterinary hospital, a Sub-Registrar's Office, a Branch Post Office, a Rural Bank a Panchayat Office and a High School maintained by the Zilla Parishad.

SULLURPET TALUK

It is the southern most taluk of the district with a population of 113,125 persons as per the 1961 Census count. The taluk extends over an area of 573.0 sq. miles, and is bounded on the north by Gudur taluk, on the south by Chingelput district of Madras State, on the east by the Bay of Bengal and on the west by Kalahasti taluk of the Chittoor district. The density of population of the taluk is 197 persons per squar mile. In all it comprises 140 inhabited and 3 uninhabited villages and two towns *viz.*, Sullurpet and Naidupet.

The following statement shows the number of villages arranged according to the various population sizes.

Less than 200	24
200 — 499	46
500 — 999	39
1,000 — 1,999	21
2,000 — 4,999	10
5,000 — 9,999	..
10,000 and above	..
Total inhabited villages	140

The taluk is drained and watered by two main rivers *viz.*, the Swarnamukhi and the Kalangi which have a course of about 6 miles and 22 miles respectively. The river Swarnamukhi flows into the Bay of Bengal while the Kalangi enters into the Pulicat lake. The island portion of Sriharikota lies between the Bay of Bengal and the lake. Casuarina is extensively grown on Sriharikota Island and forms one of the chief sources of fuel supply to Madras through the Buckingham Canal. The Buckingham Canal runs between the Pulicat Lake and the sea connecting Madras with Dugarajapatnam of Gudur taluk in the north. The Sriharikota island is malarial throughout the year and is notorious for the elephantiasis disease.

Most of the tanks in this taluk are rainfed getting precarious supply. But the taluk has an important irrigation source called the Nerrikalava which takes its origin from a dam constructed across the Kalangi river. It feeds about fifteen tanks and has nearly 16,000 acres of wet and 5,000 acres of dry area irrigated under this channel. Another channel branching from the river Swarnamukhi flows into this *taluk* and feeds nearly seven tanks in Naidupet firka. Besides these, there are a number of Government and private spring *doruvus* in Sriharikota island under which paddy is extensively raised. The taluk has about 44 major irrigation sources and 356 minor irrigation tanks. Red loam, red sand, black regar, arenaceous sand and arenaceous loam soils exist in this taluk.

The average annual rainfull of this taluk is 1,163.2 mm. based upon the rainfall during the years 1959–61. There is a thick reserve forest in Sriharikota firka. There is also reserve forest in some other villages of this taluk but it is not thickly grown. As the sea is at a distance of less than 10 miles there will not be excess of heat even in summer or severe cold in winter season. The sea breeze renders the climate tolerable.

The Madras–Waltair (Broad Gauge) line of the Southern Railway passes through this taluk with its stations at Naidupet, Dhoravarichattram, Polireddi palem, Sullurpet and Tada. The Great Northern Trunk Road runs close a nd almost parallel to the Railway. At Naidupet three roads branch off from the Great Northern Trunk Road, one to Venkatagiri on the west, another to Kalahasti in the south-west and the third to Dugarajupatnam. The Buckingham Canal which runs all along the eastern part of this taluk between the Pulicat lake and the sea provides water transport and communication facilities. The country boats ply to Sriharikota, Irakam and Venadu from Tada and Arambakam warfs.

There are no major industries in this taluk. Salt manufacturing is an importent industy in this taluk. Handloom weaving and the manufacture of shell lime provide employment to a good number of labourers. People living in coastal villages are generally engaged in fishing. Rettamala is famous for boat building which is an ancient industry of this taluk. There is rattan and cane industry in Sriharikota island.

As regards medical facilities, the taluk contains Government Hospitals at Sullurpet, Naidupet and Kothacheruvu of Sriharikota Island. A mobile medical unit serves the entire Sriharikota Island. Besides these there are local fund dispensaries located at Venad, Tada, Andagundala, Arur, Venumbaka

and Kotapolur villages. Draw wells are the main source of drinking water.

The taluk has two High Schools, one at Naidupet and the other at Sullurpet besides Middle Schools at Naidupet, Mallam, Kotapolur and Tada villages. There are Primary Schools maintained by the Panchayat Samithis in most of the villages.

The annual festivals relating to goddess Changalamma in Sullurpet, Lord Manikyaswamy in Thummur and Subrahmanyaswamy in Mallam village are celebrated in this taluk with great pomp and during these festivals about four to five thousand people congregate from the neighbouring villages.

Sullurpet town — a Panchayat, is situated on the bank of the Kalingi river, at a distance of about 54 miles from Madras. It extends over an area of 1.72 sq. miles. It has recorded a population of 9,807 persons with 2, 152 households at the 1961 Census.

As regards communication facilities the town has both railway and road communications. Sullurpet is on the Madras—Waltair (Broad Gauge) line of the Southern Railway. The Great Northern Trunk Road passes through this town connecting it with Gudur and Madras. Buses ply regularly from Sullurpet to Madras, Naidupet, Kalahasti and other important taluks. As regards educational facilities there is a High School, and an Elementary School maintained by Zilla Parishad besides an Aided School. The town being the headquarters of taluk has the usual complement of offices of a taluk. There is a Sub-Post Office with telegraph and telephone facilities. The town has a Government Hospital and a Veterinary Hospital. There are no large scale or small scale industries worth mentioning, in this taluk.

Chengalamma temple is an important temple in this town. The jatara of the deity is celebrated once in a year in the months of June or July. People from distant places visit this place on the occasion.

Naidupet town—a Panchayat, extends over an area 1.78 sq. miles and has a population of 7,273 persons with 1,487 households as per the 1961 Census count. It is situated on the bank of the Swarnamukhi river.

Naidupet was once the taluk headquarters of Naidupet Division in the Venkatagiri Zamindari. It is a Railway Station on the Madras—Waltair (Broad Gauge) line. The town is connected by major district roads with Venkatagiri, Kalahasti and Dugarajapatnam. The Great Northen Trunk Road passes through this town connecting it with Madras on the south and Gudur on the north. Buses ply regularly from Naidupet to Kalahasti, Madras and other neighbouring places. As regards educational facilities there is an Higher Secondary School, two Middle Schools and an Elementary School. There is a Panchayat Office, an Estate Taluk Office and one Multi Purpose Co-operative Society. There is a Zilla Parishad Hospital. There is a Sub-Post Office with telegraph and telephone facilities.

There is one rest house and a library maintained by the Zilla Parishad and one choultry. The River Swarnamukhi and wells are the sources of drinking water.

Paddy is the important crop of this place. Irrigation is carried on mainly under tanks. There are two rice mills and one beedi factory. The important industries are handloom weaving and dyeing. Lace knitting is an important cottage industry. There are a few temples wich are not of much significance.

VENKATAGIRI TALUK

It is an inland taluk and lies towards the south-west corner of the district with a population of 94,562 persons as per the 1961 Census count. The taluk extends over an area of 427.0 sq. miles. It is bounded on the north by Rapur and Gudur taluks, on the south by Kalahasti taluk of Chittoor district, on the west by the eastern ghats which separate it from Cuddapah district and on the east by Gudur and Sullurpet taluks. The density of population of the taluk is 221 persons per sq. mile. There are in all 129 inhabited and 14 uninhabited villages besides one town *i.e.*, Venkatagiri.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than — 200	23
200 — 499	43
500 — 999	41
1,000 — 1,999	21
2,000 — 4,999	1
5,000 — 9,999	..
10,000 and above	..
Total inhabited villages	129

The taluk is drained and watered by the river Venkatagiri and the torrential Rapur river which is

unharnessed, besides a few rivlets. The Venkatagiri river starts from the south-west of Venkatagiri town and flows towards the north-east through the middle of the taluk. The river Swarnamukhi which rises in the Chandragiri hills flows between Venkatagiri and Sullurpet taluks while the Rapur river just bends towards the north of this taluk. The taluk is generally liable to famine as irrigation is facilitated only by the rainfed tanks, wells etc. It was part of Venkatagiri Zamindari till 1949 when it was taken over by Government under the Madras Abolition of Estates Act, 1949 the tanks were in a state of utter neglect. After the Government had taken over the villages they took up the repairs to the tanks but yet a great lot is to be done in this direction to improve the irrigation facilities in this taluk and to free it from the periodical famines. Paddy is the chief crop raised on irrigated lands while dry crops such as jonna, sajja and pulses are generally raised on the uplands. At times ragi is raised as an irrigated crop also.

Besides the chain of hills on the west there are a few scattered hillocks also within the taluk. Good wild game can be had in the western part of the taluk and in this forest region timber of considerable value is obtained on the upper reaches of the Veligondas. The rest of the forest area is of scrub type and the better deciduous fuel type.

The taluk is famous for orange and lemon gardens. Large quantities of lemon are being exported from this taluk to far off places, like Calcutta, Madras, Bangalore etc.,

The origin of the Venkatagiri Zamindari is traced to one Chenvi Reddy a cultivator of Anumagallu village of Telangana. It is said that he discovered a hidden treasure of Rs. 9 lakhs while ploughing. With the wealth thus obtained, the lucky cultivator gained access to the court of the king of Warangal where his descendants flourished for about 18 generations. About 1600 A. D. one of the members of the family was commissioned by the Warangal Raja to subdue Jaggaraju who was holding the Fort at Venkatagiri. Having succeeded in his errand, he took the Venkatagiri Fort. Since then it has been the headquarters of his family. The consolidation of the Zamindari took place in 1700 on the demise of two of the three sons of Bangaru Yachama Nayudu among whom the estate was divided and the zamindar had the hereditary title of Rajah.

The taluk is served by major district roads on which buses ply regularly. Of these the Venkatagiri–Naidupet road, Renigunta Gudur road, and the Venkatagiri Rapur road pass through Venkatagiri town. The Renigunta–Gudur (Broad Gauge) line of the Southern Railway passes through this taluk with its stations at Kondagunta, Vendodu, Nidigallu, Venkatagiri and Yellakaru.

Sreenatha, a well known Telugu poet adorned the court of the early Venkatagiri Zamindars. One of the early chiefs of Venkatagiri distinguished himself in the court of Kakatiya King Ganapati and was a man of great influence during the reign of Queen Rudrama. During the reign of Krishnadeva Raya this family lived at Velugodu and thus came to use the title of Veligotivaru. The 'Veligotivari Vamsavali' is an important and noted historical recorp containing the dates of various kings and poets. Poet Sreenadha is said to have completed 125 stanzas in an hour containing Samasyas or parts of stanzas which were proposed to him by the Raja. The then Raja was himself a talented man. Another poet Veturi Rangaraju flourished about 1850 in the time of Velugoti Rayanivaru. He was the author of Bhanumathi Parinayam' relating the marriage of Sahadeva one of the pandavas with Bhanumathi. The poet Gadiaram Bhaskara Sastri who flourished 150 years ago also lived in Venkatagiri. This poet wrote eight songs in Sanskrit in praise of Lord Siva.

Venkatagiri Town — is the only town in the taluk and has a population of 17,114 persons according to 1961 Census. There are in all 3,576 occupied residential house in the town. It extends over an area of 3.63 sq. miles and its density of population is 4,715 persons per sq. mile. The town is situated at a distance of about 22 miles from Naidupet Railway Station and about 2 miles from the Venkatagiri Railway Station. It is situated on the Gudur–Renigunta Major District Road. The town is said to have been distroyed by Haider Ali due to the alliance of the Rajas of Venkatagiri with the British during the Carnatic war. The town was again rebuilt during the British period.

The town is the headquarters of the taluk by the same name and is a Panchayat. It contains a Government Basic Training School, Venkatagiri Rajas High School and Zilla Parishad Girls' High School and several Elementary Schools. The town has a Post Office with telephone and telegraph facilities. As regards medical facilities the town has a Government Hospital a private Maternity Centre and a Veterinary Hospital. There is a

Travellers' Bungalow maintained by the Public Works Department and a choultry maintained by the Raja. There are two Libraries and a Park. It is also the headquarters of the Venkatagiri Panchayat Samithi Block. This town has the usual complement of Offices like a Tahsil Office, a Sub-Registrar's Office, a Judicial Second Class Magistrate's Court, Agricultural Demonstrators' Office etc., besides a few Co-operative Societies.

This town is famous for handloom weaving. There are a large number of *Padmasalis* chiefly engaged in spinning and weaving. The Venkatagiri sarees are famous both in Andhra Pradesh and Madras States. Fine lace bordered and zari bordered sarees and dhoties are woven and exported to different parts of the country. There are no large scale industries worth mentioning.

There are a few fine buildings constructed by the erstwhile Zamindars. The three buildings popularly known as Indra Mahal, Raja Mahal and Taj Mahal which still exists are of tourist interest. Poleramma is the local deity and the jatara is held annually in the month of July where many people from the neighbouring village congregate. There are two big temples dedicated to Kasi Viswanathaswamy (Siva) and Varadarajaswamy (Vishnu). The annual festival of Viswanthaswamy held in July attracts large crowds of people from the surrounding villages.

RAPUR TALUK

This taluk which is one of the backward taluks of Nellore disrtict is situated towards the south-west corner of the district and supports a population of 105,122 persons as per the 1961 Census count. The taluk extends over an area of 594 sq. miles and its density is 177 persons per sq. mile. The taluk is mostly hilly and an upland taluk of the district, bounded on the north by Atmakur taluk, on the south by Venkatagiri, on the east by Nellore and Gudur taluks and on the west by the Veligonda range which, forms the western boundary of the district as well. There are altogether 107 inhabited and 9 uninhabited villages in this taluk. There is no urban area in this taluk. The following statement shows the number of inhabited villages arranged according to the population sizes.

Less than 200	12
200 — 499	35
500 — 999	24
1,000 — 1,999	25
2,000 — 4,999	10
5,000 — 9,999	1
10,000 and above	..
Total inhabited villages	107

Rapur, the taluk headquarters, is the only village with a population above 5,000.

The Kandleru and the Kalleru are the two rivers that pass through this taluk but they are not perennial. The Kandleru flows across the Rapur taluk and between Gudur and Nellore taluks. This is the only river in this taluk which is of considerable dimensions and most of its supply is drained into the bay of Bengal. The soil of this taluk is made up of black mixed and red loams, the latter being predominant. The taluk is mostly dry. Irrigation is done through minor irrigation sources like rainfed tanks, wells etc. There are about 76 minor irrigation tanks and 12 Public Works Department tanks in this taluk. The total ayacut of wet lands irrigated by these minor irrigation tanks is about 4,443 acres and the ayacut under the major irrigation sources is about 3,245 acres. Dry irrigated crops are raised in garden lands with the aid of private wells also. Paddy, ragi, kambu (sajja), cholam, arika, horsegram, castor, groundnut, gingelly, tobacco and chillies are the important crops raised. The stapple food crop of this taluk is cholam. The climate of this taluk is generally dry. The average annual rainfall of this taluk is 1,180 mm. It has a forest area of 175 sq. miles of which the extent of the Reserved forest area is about 159 sq. miles while the private forest is only about 16 sq. miles. The Penchalakona in Veligondas on the west of this taluk where the Narasimhaswamy temple of great religious importance is situated, is the highest mountain range with an elevation of over 3,000 feet above sea level. The slopes of this range of hills are covered with low jungle in some places mixed with bamboo. The Penchalakona Thirunallu or the Penchala Narasimhaswamy festival which takes place on Narasimha Jayanthi day in the month of May attracts a large number of pilgrims from this district as well as from the neighbouring district of Cuddapah. This place is not easily accessible on account of the surrounding jungles and hence, pilgrims visit this place only occasionally.

The taluk is not connected by Railways and hence, the people have to depend only on road transport facilities. Rapur, the taluk headquarters, is connected with Nellore, the district headquarters, by two Major District Roads, one *via.*, Podalakur and another through Gudur. Rapur is also connected to Venkatagiri and Gudur by Major District Roads. The Veerampalle-Rapur road *via.*, Podalakur and the Nellore - Podalakur - Kalichedu - Gudur road are the other important roads the in taluk. Buses ply regularly on all these roads in and provide necessary transport facilities. There are two telegraph offices, three Public Call Offices

there Sub-Post Offices and a number of Branch Post Offices in this taluk.

As regards medical facilities the taluk contains a Government Hospital at Rapur and a Primary Health Centre at Podalakur. Ramapuram, Utukur, Dachur and Gonupalle have each one Medical Dispensary. Apart from these the taluk contains three Mica Mine Labour Welfare Hospitals one at Sydapuram, the second at Kalichedu, and the third at Thummala talupur. People drink water from the draw wells.

As regards educational facilities, there are three High Schools in this taluk—one at Rapur, another Sydapuram and the third at Podalakur—maintained by the Zilla Parishad besides two Middle Schools, one each at Chaganam and Dachur. There is also a Mica Mine Labour Welfare High School at Kalichedu.

The distinctive feature of this taluk is the rich mica deposits it contains at several places of the taluk such as Sydapuram (Sha-Mine), Kalichedu, Utukuru, Thalapur etc., which provide employment to a good number of labourers besides the technical and managerial persons. Cutting and splitting and grading of raw mica is the popular cottage industry, of this taluk and quite a large number of female workers are profitably engaged in it. Besides this, mat weaving industry on a small scale is being carried on in Mogallur and Kanuparthi villages. There are no other Large Scale Industries in this taluk.

Rapur—the headquarters of the taluk, by the same name has a population of 5,912 persons as per the 1961 Census count. The village extends over an area of 16.01 square miles and is situated towards the south-west corner of the taluk at the foot of Veligondas. It is about 22 miles away from the Gudur Railway Station and is connected by a major district road on which buses ply regularly both from Nellore and Gudur. It is also connected with Venkatagiri and Nellore by major district roads on which also buses ply regularly and provide necessary transport facilities. About five miles due west of this village, there is a pass over the Veligondas known as *Rapur Kanuma* which leads to Cuddapah district. There is a Zilla Parishad High School, a Government Hospital, a Local Fund Rest House, a Local Fund Choultry, a Taluk Office, a Sub-Registrar's Office and a Police Station. There are four Government sources of irrigation in charge of Public Works Department besides one minor irrigation tank. The majority of the people live by cultivation as their main occupation. There is a ruined fort with a ditch all round quite adjacent to the village and a tomb of a Muhammadan saint Masum Saheb, situated on Kakulakonda, a hillock lying half a mile to the west of the village. Many pilgrims visit the tomb every Thursday in the week. There is also a chapel of the South Andhra Luthern Church in charge of a pastor. The Muslims are in considerable number in this village.

Thokalapudi— a small village has a population of 254 persons as per the 1961 Census count. It covers an area of 2.10 sq. miles. It was once under the Maharaja of Venkatagiri. The late Jupalli Gopala Nayudu of the Jupalli Zamindari who owned this village gave it to Adhwannam Ramaiah, a Golla by caste. There is a legend about this grant. It appears that Ramaiah was discovered by Gopala Nayudu as an infant left by somebody in the village forest. He took him to his place at Potegunta and brought him up. When the child grew up and got educated, he became one of the Dewans of the Raja and was given this village of Tokalapudi, for his maintenance, in return for his services. The family name Adhwannam was given to the family of the grantee because he was found in a forest (Adhwannam).

Gonupalle— a small village with a population of 1,708 persons as per the 1961 Census count. The village covers an area of 11.20 sq. miles and there are altogether 248 occupied residential houses in this village. The village assumes religious importance on account of two temples *viz.*, the Penchala Narasimha temple and Ankamma temple. The former is situated at the foot of hill in the Veligondas and is said to have been founded by a sage called Kanva Maha Muni. Worship is done on every Saturday. Every year in the month of May the annual festival takes place at Penchalakona whichis about four miles west of the village. About 15,000 people from different parts of Cuddapah and Nellore districts attend the festival. At Penhcalakona temporary choultries are errected to accommodate pilgrims during the festival.

Molakalapoondla— situated at a distance of about 7½ miles from Gudur on Gudur-Rapur road, has a population of 4,944 persons as per the 1961 Census count. The place was once the headquarters of the old Sydapuram Zamindari of the Jupalli family. There are two temples in the village.

Once in a year Jatara is celebrated in honour of the village deities. There are mica mines in the vicinity of this village. Its chief importance lies in its having two soap stone (steatite) quarries at about three miles distance. Above those two quarries there is a small hillock called 'Siddalayya Konda' with an old cave like temple on it. There are three idols called the Navakotisiddhulu, the Navanadhasiddhulu and the Sarangadhara.

The legend about these idols says that the first two were great rishis doing penance on the hill. King Sarangadhara visited them as a devotee. On account of their greatness, idols were erected for worship and they are accordingly worshipped with great devotion every Monday. People from the neighbouring villages come here in large numbers on Mondays in the month of *Kartikam*. A great procession is conducted on the last Monday in the month. The majority of the people are engaged in the mica mines for their livelihood.

Podalakur — has a population of 3,189 persons as per the 1961 Census count and covers an area of 10.41 sq. miles. There are in all 661 occupied residential houses in this village. Handloom weaving is an important industry of this place and in the past it was famous for lungees (dhoties) woven by its expert weavers which were also exported to Rangoon. The village is well connected by major district roads on which buses by regularly to Nellore, Gudur and Rapur.

There is a Ganesa temple in this village, Tradition says that about 150 years ago, one Pakanati Basilingam of Kakarada, a cotton dealer, had his bales of cotton dumped here. But one of the bales miraculously got converted into a huge ant-hill by the next morning. On the eventful night, God Vinayaka appeared in a dream to the religiously bent dealer and warned him that He (Vinayaka) was incarnating himself in the ant-hill formed out of the cotton bale and that he (dealer) should endeavour to construct a temple at that place promising large profits from the remaining bales. Accordingly the cotton dealer had a small temple constructed over the ant-hill. Later on, one Thambireddi Venkata Reddi of Lingampalle had the whole temple reconstructed on a bigger scale and also had the ant-hill moulded into the shape of Vinayaka and artistically painted. Subsequently a Siva temple also was constructed in the same compound. On Mahasivarathri day this temple attracts many pilgrims from the surrounding villages. There are mica deposits about four miles south-west of this village. Irrigation is done by the rainfed tanks. The chief dry crop is jonna.

ATMAKUR TALUK

This taluk has a population of 145,711 persons as per the 1961 Census count and extends over an area of 639.0 sq. miles. The density of population is 228 persons per sq. mile. It is bounded on the north by Udayagiri and Kavali taluks, on the south by Rapur taluk, on the east by Kavali, Kovur and Nellore taluks and on the west by the Veligondas or the outer range of the Eastern Ghats. The country is a flat plain with low hillocks here and there and dense scrub jungles. There are in all 118 inhabited and 4 uninhabited villages in this taluk. The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than — 200	7
200— 499	26
500 — 999	32
1,000 — 1,999	39
2,000 — 4,999	12
5,000 — 9,999	1
10,000 and above	1
Total inhabited villages	118

Atmakur, the atluk headquarters village, has a population of 10,198 persons. The river Pennar flows through the Veligondasat Somasila and runs eastwards through the taluk dividing it into two portions. The river Boggeru drains the north-western portion of the taluk and empties itself into the Pennar, a few miles east of Atmakur town. The River Ketamanneru, Biraperu and the Nallavagu are other minor drains in this taluk. The Ketamanneru forms the chief source of supply to the Ananthasagaram tank while the Biraperu, flows into the River Pennar near Sangam. The Nallavagu also empties itself into the Pennar.

There are about 21 major irrigation and 99 minor irrigation sources in this taluk. Of the major irrigation sources, Ananthasagaram, Atmakur, Mahimalur and Kaluvoy tanks are of considerable importance. Ananthasagaram which is fed by the local drain Ketamanneru, irrigates about 2,500 acres in Ananthasagaram, Bedsupalle, Devarayapalle Minagallu, Revur and Varikuntapad villages. Atmakur and Mahimalur tanks which are fed by Boggeru river irrigate about 2,000 acres and 1,800 acres respectively. Kaluvoy tank is another big irrigation tank in the taluk and irrigates about 1,700

acres in several villages such as Kaluvoy, Brahmanapalle, Baddevolu, Nakkanapalle, Iskapalle and Telugurayapuram villages. A new irrigation project has been constructed across KaveruVagu, (near Gandlavedu) which is another important minor drain with an estimated ayacut of 618 acres. Apart from these there is direct irrigation under Pennar river channels towards the north of the river at Battepadu, Revuru, Minagallu, Devarayapalle villages and towards the south of the river at Kotitheertham, Chejerla, Thimmayapalem, Viruvuru Thatiparthi, Mamudur, Mahammadapuram, Pelleru, Surayapalem, Perumallapadu and other villages. A pumping scheme was sanctioned in 1958 for the benefit of the joint ayacut under Kullur, Nalla and Yerra tanks and the pumping set was installed on the left bank of Pennar river near Somasila. Another pumping scheme was sanctioned in 1962 for the benefit of the ayacut under Nalla tank of Padamatikhambampad. It is also located on the right bank of Pennar river near Somasila and is under execution. Lift irrigation is in vogue under Beeraperu and Boggeru in the taluk by means of oil engines. Wells are sunk in the beds of streams and water is raised by the usual bullock picottahs for cultivation purposes but it involves time and labour. There are also a number of smaller tanks mostly rainfed. The soils that occur in this taluk can generally be divided into three categories *viz.*, black clay, mixed and red loam. The mixed soil is a mixture of black loam, black sandy and red clay. But the red loam occurs in large proportions and predominates in this taluk. Paddy is largely cultivated along the river channels from the Pennar and also in the area under tanks Groundnut is raised extensively. Betel vines are grown on a large scale in the villages of Kaluvoy, Revuru, Minagallu, Battepadu, Atmakur and Thatiparthi. Turmeric and ginger are the two other important minor crops.

The climate of this taluk is generally dry. There is no sudden transition from extreme heat to cold. The western winds prevail from April to May with fierce burning heat and continue for sometime more with less intensity. There are no major forests in the taluk except the Veligonda forests on the west. The taluk has plenty of scrub jungle and pasture lands. No valuable timber is available in the forests of this taluk. The growth, for the most part, consists of poor mixed and shrub jungle of irregular height and density and fit for fuel only. The average annual rainfall of this taluk is about 36 inches.

This taluk has no railway communications and hence, the people have to depend on road transport only. Road communication facilities are also inadequate. Nellore—Bombay road also known as Nellore—Dornal National Highway passes through this taluk. It enters the taluk near Sangam and ends near Bommavaram connecting Atmakur with Nellore and other villages like Vasili, Kolagotla, Karatampadu, Dharmaraocheruvupalle *etc.* The major district roads connect almost all the important villages and provide transport and communication facilities. Hence, buses are the popular means of conveyance. The Atmakur—Somasila road branches off near Nellorepalem from the Nellore—Bombay road. The Sangam—Kaligiri road serves Chiramana firka. The other important roads are the Atmakur—Vinjamuru road, and the branch road from Atmakur—Anumasamudram—Chiramana—Hasanapuram linking with Sangam—Kaligiri road. The taluk south of Pennar river is covered by Sangam-Podalakur road and Nellore—Somasila road. Kaluvoy is on Nellore—Somasila road and Chejerla is served by a branch road which starts from Nellore Somasila road near Adurupalle. A new road has been formed by Chejerla Panchayat Samithi which branches off from Atmakur—Somasila road near Ananthasagaram to connect Nellore—Bombay road near Gangunta. Several small roads were formed by Chejerla and Atmakur Panchayat Simithis. Yet a large number of important villages still lie in the interior of the taluk and access to them is difficult particularly in the rainy season.

The taluk contains a Government Hospital at Atmakur besides two Primary Health Centres one at Ananthasagaram (Chejerla Panchayat Samithi area) and the other at Anumasamudram (Atmakur Panchayat Samithi area). There is a Local Fund Dispensary at Kaluvoy and Ayurvedic Dispensaries at Virur, Chiramana, Battepad, Mangupalle and Gumparlapad. People generally drink water from the Rural Water Supply draw wells and also from private step wells and draw wells. But people living in villages lying on the banks of Pennar, Boggeru and Beeraperu rivers take water from these rivers. In Atmakur water is pumped out, stored in an overhead tank and supplied to the people through pipes.

The educational establishments of this taluk consist of Zilla Parishad High Schools each one located at Atmakur, Kullur, Mohammadapuram and Ananthasagaram and Zilla Parishad Middle

Schools at Kamireddipadu, Vengampalle, Revuru, Chejerla, Thurupu Khambampad, Battepadu and Kaluvoy. There is a Social Welfare Government High School at Korimerla. In addition to these there are Elementary Schools in almost all villages maintained by the Chejerla and Atmakur Panchayat Samithis. Compulsory primary education has been introduced in these schools in recent years.

There are no large scale industries in this taluk. Handloom weaving is the chief cottage industry. 'Lungis' are manufactured in the villages of Hasanapuram, Talupurpadu, Atmakur, Dubagunta and Thatiparthi. Good lace clothes are produced at Nedurupalle and carpets of hemp fibre at Mangupalle. Straw mats of good quality are made by the *Dommaras* of Chiramana village. No weekly shandies are held in these taluk. Somasila, Kotitheertham and Anumasamudrampeta are some of the places of religious importance. Some of the important places are briefly described below.

Atmakur—a Panchayat and the headquarters of the taluk, is situated two miles south of Nellore—Dornal road. There is a branch road connecting it with Nellore—Dornal road. It covers an area of 18.33 sq. miles. The taluk recorded a population of 10,198 persons at the 1961 Census. There are altogether 1,992 occupied residential houses. It was the head. quarters of a Revenue Division till 1932 and after the abolition of the Division it was included in Nellore Revenue Division. As regards educational facilities there is a Zilla Parishad High School and several Elementary Schools. There is a Taluk Office, a Sub-Magistrate's Office, a Sub-Registrar's Office, a Sub-Treasury, a Panchayat Office, and an Office of the Assistant Inspector of Fisheries. There is a Sub-Post Office with telegraph facilities. There is one Government Hospital and a Veterinary Hospital. There is a Public Works Department Inspection Bungalow and a choultry.

The tank near Atmakur which is fed by Boggeru channel is said to have been constructed in 1471 A.D., during Sri Krishnadevaraya's reign. The main occupation of the people is cultivation. Irrigation is carried on under tanks and wells. The important crops raised are ragi, paddy and arika. There is a temple of Sree Rama built by the local Vaisyas and the annual festival is celebrated during Sree Rama Navami in *Chaitram* (March–April). There are two Choultries and an Inspection Bungalow.

Kaluvoy—situated on the south bank of Pennar on Nellore—Somasila road, is a Panchayat, extending over an area of 12.16 sq. miles and having a population of 6,114 persons. There are 1,261 occupied residential houses. There are two temples in this village *viz.*, Chennakesavaswamy temple and Siva temple. There are no special celebrations connected with these temples. As regards communication facilities the village is connected to Nellore, Somasila and Podalakur by major district roads on which buses ply regularly. It is an important business centre in the taluk. The tank near this village receives water from Veligonda Pedda Vagu and irrigates seven villages around it. The important crops raised are paddy, ginger, betel, turmeric, ragi and sajja. There are two rice mills in this village. As regards educational facilities there are three Elementary Schools. There is a Local Fund Rest House, a Police Station and a Sub-Post Office.

Anumasamudrampeta— a Panchayat has a population of 1,417 persons. It extends over 2.70 sq. miles and has 291 occupied residential houses. There is a Zilla Parishad School. The important crops raised are paddy, ragi and arika. There is an ancient mosque in this village and the 'Urs' of its founder Khaja Rahmathulla is celebrated annually. The trustee of the mosque has the title of 'Peerzada'.

Somasila— situated in the south-west corner of Atmakur taluk at the foot of Valigondas, extends over an area of 1.68 sq. miles and has 89 occupied residential houses. It has recorded a population of 452 persons at the 1961 Census. At Somasila, the river Pennar breaks through Veligondas from Cuddapah district and enters into the Nellore district. There is a Primary School and a Travellers' Bungalow maintained by Public Works Department. The Someswara temple in this village on the north bank of the river Pennar is of religious importance. The annual festival of this temple called Brahmothsavam which is celebrated in the month of May attracts many people even from distant places. According to a legend one Somanathudu saw the cow milking itself into an ant-hole. When he tried to drive it away from that place, he saw one of its hooves slipped into the ant-hole and found that there was a lingam in that ant-hole. In memory of this he erected a temple on this Lingam. It is believed that *Rishis* wander in the neighbouring Veligondas and visit this place in the nights and worship the lingam even to this day. It is also said that the Lingam in the temple has been installed by the Moon God.

Ananthasagaram—a Panchayat, situated on the Atmakur-Somasila road, has a population of 3,409 persons. It extends over an area of 14.19 sq. miles and has 650 occupied residential houses. There is an Elementary School and a Health Centre in this village. A Siva temple and an ancient mosque are the places of religious importance. The Ananthasagaram tank which is fed by the river Ketamanneru is the chief source of irrigation in this village and irrigates lands in some neighbouring villages also. The important crops raised are paddy and jonna.

There is a large stone slab on the bund of the Ananthasagaram tank which bears the name of the builder as Kondamurusu, the son of Timmarusu, the Prime Minister of Sri Krishna Devaraya of Vijayanagar empire. The tank has a natural basin and the water overflows when its depth exceeds 33 ft. There is a legend about the construction of this tank. The king Sri Krishna Devaraya appointed Kondamurusu to buy about five lakhs of horses. He took the money with him and halted at Vadlamudipalle, a hamlet of Devarayapalle of Atmakur taluk. There he realised the scarcity of water and the lack of irrigation facilities for the cultivation of paddy. This royal visitor spent the whole money to construct tanks at Ananthasagaram and Kaluvoy. The news about the misuse of the money reached the king who summoned Kondamurusu to appear before him. Realising his critical situation, Kondamurusu took shelter in Ramaswamy temple at Vontimetta and prayed for divine help. After securing divine help he went to the King and told him that he bought all the horses. According to his words, as night began to fall the horses filled the stables. Next morning they began to disappear. When he was asked to explain this situation he told the king that he spent the whole money for the construction of the tank. The king and his brother Anantadevaraya visited this place for inspecting the tank. It is said that the tank and the village are named after the latter's name Ananta Devaraya.

There is a small temple dedicated to 'Golla Bhama'. The following story is attributed to this temple. When the bund of the tank was being built it was found very difficult to close one particular breach. When a vision appeared and demanded human sacrifice, a *golla* woman volunteered herself for the sacrifice and the breach was closed. This temple is dedicated to her in view of her sacrifice and hence called 'Golla Bhama' temple. There is an inscription on a stone near the sluice of the tank between Manchalapalle and Mustafapuram dated A.D. 1628-29..."Princess Raghupati Ammavaru, Queen of Venkatapathi Nayaka built the 33 pillars on the weir with walls on the both sides of the steps."

UDAYAGIRI TALUK

Udayagiri is an inland taluk with a population of 125,465 persons as per the 1961 Census count. It extends over an area of 871.0 sq. miles, and the density of population is 144 persons per sq. mile. It is bounded on the north by Kanigiri taluk, on the south by Atmakur taluk, on the east by Kavali taluk, and on the west by Veligondas which separate it from Cuddapah district. The Veligondas are a long chain of hills which form a part of the Eastern Ghats. The country is mostly hilly in the western half of the taluk and the general slope of the country is from west to east. The taluk contains 135 inhabited and 10 uninhabited villages. There are no urban units in this taluk.

The following statement shows the number of villages arranged according to the various population sizes.

Less than 200	17
200 — 499	35
500 — 999	44
1,000 — 1,999	26
2,000 — 4,999	11
5,000 — 9,999	2
10,000 and above	..
Total inhabited Villages	135

Udayagiri and Vinjamuru are the two villages having a population of more than 5,000 persons.

The main rivers in the taluk are the Pillaperu and the Boggeru. The Pillaperu river takes its origin in the Veligondas and flows from west to east right across the taluk. It empties itself into the Manneru river near Iskadamerla. It drains the northern half of the taluk. Boggeru river also raises in the Veligondas and flows from west to east and drains the southern half of the taluk and joins Pennar. There are also other small rivers like Mullakanteru and Uppuvagu with a maximum width of one furlong. There are a number of minor streams which drain the taluk and finally empty themselves in Pillaperu and Boggeru rivers.

This taluk consists mostly of dry area. Lift irrigation is carried on all along the banks of the rivers. A few villages of this taluk are, however, benefited by the Mopad Project of Kanigiri taluk. The Nakkalagandi Project also serves this taluk. About 2,000 acres of land is benefited by these projects in this taluk. Irrigation facilities have been provided under the Boggeru and Pillaperu rivers by constructing dams across them and the supply position of the tanks has been improved in a few villages. The main occupation of the people is agriculture.

This taluk is economically backward. A major portion of the taluk is rocky and not fertile. The soils of this taluk consist of redloam, regarloam, and red sand which covers a major portion of the taluk. Only dry crops such as jonna, arika, castor, horsegram, ragi and sajja are grown generally. Paddy is grown to a small extent under tanks with a small ayacut.

This taluk is rich in natural vegetation. It consists of numerous *tangedu* plants (*Cassia auriculata*), the bark of which is used for tanning. It is exported to other countries. 'Charapappu' is prepared by removing the shells of the *chara* seeds collected from the forest in the Veligonda hill-range and is exported to Madras. It is collected at Seetarampuram, the western-most village of the taluk at the foot of the Veligondas. The Veligonda hill range in this taluk contains valuable timber. Red sanders (*Pterocarpus santalinus*), Yepi (*Hardwickia binata*), blackwood (*Gettiji*) and Bamboos are some of the types of wood found in the valleys of Veligondas. The timber is exported from here to the eastern taluks of the district where there is a great demand for cart poles, pestles and spokes. The climate of the taluk is moderate and the rainfall is not quite adequate.

The educational establishments of this taluk consist of four High Schools located at Udayagiri, Varikuntapadu, Narrawada and Vinjamuru and three Middle Schools located at Seetarampuram, Duttaluru and Chakalakonda villages. As regards medical facilities, this taluk has a Government Hospital at Udayagiri and a Primary Health Centre at Marripadu. There are Zilla Parishad Rural Dispensaries at Seetaramapuram, Varikuntapadu, Duttaluru, Chakalakonda, Peddireddipalle, Chenchuluru and Vinjamuru villages. Draw wells generally form the main source of drinking water. This taluk is not connected by Railways. The nearest railway station is Kavali which is about 50 miles east of Udayagiri and 30 miles east of Vinjamuru an eastern most village of the taluk. The people have, therefore, to depend upon road transport only. Though important places in the taluk are connected to Udayagiri, the taluk headquarters by road there is no well knit road system in the taluk. The Nellore-Atmakur-Udayagiri-Seetarampuram road runs from the south-east corner of the taluk to the north-west corner, while the Kanigiri – Pamur – Dornal road runs right across the taluk from north-east to south-west. Another important road runs directly from Udayagiri to Kavali. The total length of the roads in this taluk, is about 100 miles. There are regular bus services in this taluk on all roads.

There are no major industries in this taluk, but there are small scale and cottage industries which are found in several villages. There is a Wood Worker's Society at Udayagiri providing labour to skilled workers who engrave on the wood very dexterously. Udayagiri is famous for wood works and the finished products find good market in far off places. Tanning is another important industry at Udayagiri and Vinjamuru villages. There is mat weaving cottage industry at Pullayapalle village. The hill near Udayagiri is noted for different medicinal herbs used in Ayurvedic preparations and is therefore, locally known as Sanjiva Hill.

The important festivals celebrated are Vangamamba festival at Narrawada, Nallagonda Lakshmi Narasimhaswamy festival, Sri Vithaleswaraswamy festival at Seetarampuram, Sri Chennakeswaraswamy mahotsavam at Vinjamuru and the Urs at Udayagiri. The places of historical importance in this taluk are Dasarapalle village and Udayagiri. Near Dasarapalle village there is a small hill on which a cave is carved out of a solid rock in the crescent form. It has an inscription relating to the period of Sri Krishna Devaraya of Vijayanagar. Udayagiri is an ancient town and has a ruined fort of historical importance.

A brief description of Udayagiri, the taluk headquarters, and some other important places of the taluk is given below.

Udayagiri : the headquarters of the taluk with the same name, is situated about 60 miles from Nellore, the district headquarters and 50 miles from Kavali, the nearest Railway Station. Kondayapalem is the ancient name of this village. It has recorded

a population of 7,102 persons at the 1961 Census. There are 1,318 houses and 1,396 households. It is connected by road with Nellore, Kavali, Atmakur, and Seetaramapuram. Weaving, dyeing, pottery, bangle making and wood works are some of the important industries of this place. There is a Zilla Parishad High School besides one Higher Elementary School and a few Elementary Schools. There is a Government Hospital and a Veterinary Hospital. There are also the usual Government Offices that complement a taluk headquarters like the Taluk Office, Block Development Officer's Office, Sub-Registrar's Office, Health Office, Agriculture Demonstrator's Office, Sub-Treasury, Police Station, Office of the Deputy Inspector of Schools and Forest Range Office. There is a Library and also a Post Office with telegraph facilities. There is a Forest Bungalow, a Travellers' Bungalow, a Rest House and a choultry. Dry crops like ragi, sajja, jonna, and arika are mainly grown here. Irrigation is carried on mainly under tanks and wells.

Udayagiri is a place of considerable historical and archaeological importance and played an important role during the period of the Vijayanagar Empire and even earlier. It lies at the foot of a hill on which there is an ancient fort which is now in a ruined state. The hill is about 3,000 feet above the sea level. The hill fort is supposed to have been built by Langula Gajapathi, a Hindu King and appears to have been improved by his successors. The fort, owing to the formation of the hill is almost impregnable. On most of its sides, the fort is inaccessible but it may be reached by a jungle track on the eastern face of the hill and by a path-way along the ravine on the northern side. The latter is provided with flights of steps which seem to have been in existence from a very long time. The fort came under the sway of the Vijayanagar dynasty during the reign of Sri Krishna Devaraya and after the fall of the Vijayanagar empire, it was taken possession of by Muhammadan Kings. The last holder of the fort was Abbas Ali Khan from whom it passed to the English in 1839 A. D. It is said that during Sri Krishna-Devaraya's regime there was a big town here with a diameter of eight miles and after him it disintegrated into a small village leaving the traces of its old glory in a good number of ruined temples. On the hill there are two mosques built by the Muslim rulers. There are also ancient temples in the village. There are many archaeological ruins in the village which indicate that the place was once an extensive and populous town of great importance.

The temple of Lord Krishna situated on the southern part of the village belongs to the Pallava type with the *stupa* on the top of the *Garbhagudi* (Sanctum Sanctorum) and with the *prakarams* enclosed by high walls. A hundred yards from it are the ruined compound walls with entrance gate, tower and an unfinished *kalyanamantapam*. The *kalyanamantapam* is a peculiar feature of the Vijayanagar type of temple architecture. But the temple proper is an old construction which is the standing evidence of the fact that its greatness dated back to the eleventh century. The frame work of the *stupa* is still in good condition though the images have all disappeared. The remains of the compound wall and the entrance gate which are of the Chola type indicate apparently the existence of another temple on whose site the *kalyanamantapam* was built. The *mantapam* is a splendid type of architecture with finely carved pillars.

The Ranganayaka temple is of the Chola type with two high walled enclosures (*prakarams*) with long corridors. The eastern gate which was probably started during the regime of Sri Krishna Devaraya is left unfinished. The *kalyanamantapam* and some other structures are probably the later additions. The temple though large does not present any high style of architectural importance. After the fall of Vijayanagar empire, the image of Ranganayaka is said to have been transferred to Ranganayaka temple of Nellore.

There is one small temple (the Anjaneya temple) which is situated at the centre of the village and which contains some finely carved images of Vighneswara.

There is another temple on the hill, the Vallabhacharya temple named after the constructor who was apparently one of the Ministers or Governors of Sri Krishna Devaraya. There is a *koneru* (tank) by the side of the temple and the location is very picturesque.

The archaeological and historical ruins in and around Udayagiri and on the plateau abound in inscriptions. The earliest *viz.*, that of 1470–71 tells us that a certain Timmaraya built Vishnu and Siva temples on the hill. He was the successor to Bukka I (1352–76), the founder of the Vijayanagar empire. There is also another inscription of the same year which reveals that Timmaraya caused the town of Vijayawada to be built. A later inscription refers to the capture of Udayagiri by Sri Krishna Devaraya in 1514

after a prolonged siege of one year and the defeat of Tirumala Ratnaraya, one of the nobles or uncles of Prataparudra. It was apparently during the regime of Sri Krishna Devaraya that Udayagiri attained glory. Udayagiri seems to have been on the highway between the southern and the northern extremeties of the vast kingdom of Vijayanagar. Most of the inscriptions relate to the period of Sri Krishna-Devaraya and after.

The Udayagiri hill is noted for different medicinal herbs required for ayurvedic preparations. The local people therefore call this as the Sanjiva Hill.

On the hill at a height of about 2,000 ft. there is a cool spot where water falls down in drops from a height of 20 ft. These water drops trickle down from the boulders perched above. The mere taste of this water is invigorating and makes tired persons feel fresh and cool. This spot is called *tapaka*, which means oozing.

Vinjamuru—is situated to the south of Kavali-Udayagiri road with which it is connected by a branch road of about 4 furlongs. It is 45 miles from Nellore, 20 miles from Udayagiri and 30 miles from Kavali. It is the most populous village in this taluk. It covers an area of 27.51 sq. miles.

The total population of this village is 7,115 persons and it contains 1,459 occupied residential houses and 1,499 households as per the 1961 Census. It is a Panchayat and has one High School and 8 Primary Schools. There is one Local Fund Dispensary and a Veterinary First Aid Centre. It has a Police Station and an Office of the Junior Engineer of Public Works Department. There is also a Sub-Post Office in this village with telegraph and telephone facilities. There is a Rest House and a Library.

Vinjamuru village was originally in Pamur Estate. It is noted for betel leaves. They are exported to many distant places. Important cottage industries of this village are weaving of coarse cloth, dyeing and basket making.

The important crops are ragi, sajja, arika and horsegram. Irrigation is carried on by tanks and wells. There is a temple for Chennakeswaraswamy. The Brahmotsavam of this temple, the only important festival of this village, is celebrated annually. This village is connected by road to Kavali, Udayagiri and Atmakur.

Narrawada—is about 12 miles from Udayagiri and is situated on the Duttalur–Kanigiri road. At the 1961 Census it recorded a population of 3,231 persons with 567 occupied residential houses and 621 households. It extends over an area of 9.54 sq·miles. There is one Zilla Parishad High School and a Branch Post Office. The important cottage industry is weaving. There is one temple called Vengamma temple. Vengamma perantalu festival is celebrated annually and attracts many people from neighbouring villages.

Seetaramapuram—lying at the foot of the Veligonda hills and 16 miles north-west of Udayagiri, has recorded a population of 3,972 persons with 780 houses and 839 households at the 1961 Census. It is the terminus of the Nellore-Udayagiri-Seetarampuram road. It was formerly part of Pamur Estate. Weaving of coarse cloth, trade in cloth and grain, splitting of chara seeds are some of the important occupations of the people of this place. It has a Police Station, a Post Office, a High School and few Elementary Schools. There are three temples dedicated to Siva, Rama, and Kanyakaparameswari. There is also a mosque. An annual festival is held for the village deity Ankalamma.

KANIGIRI TALUK

Kanigiri taluk with an area of 1,000.00 sq. miles is the largest taluk in area in Nellore district. It is an interior taluk and lies towards the north-west of the district bounded on the north by Podili taluk, on the east by Kandukur taluk, on the south by Udayagiri taluk and on the west by the Veligondas which separate this district from Kurnool and Cuddapah. According to the 1961 Census count the taluk supports a population of 170,885 persons. The density of population is 171 persons per square mile. The country stretches barren and treeless with small and poor villages. The taluk in all comprises 181 inhabited and 28 uninhabited villages besides the only urban area of Kanigiri town. The following statement shows the number of inhabited villages arranged according to the different population sizes.

Less than 200	28
200— 499	55
500— 999	40
1,000— 1,999	39
2,000— 4,999	19
5,000— 9,999	..
10,000 and above	..
Total inhabited Villages	181

All the villages in this taluk are small and poor and there are no villages in this taluk with a population size of 5,000 or more.

The taluk is drained and watered by the rivers Paleru and Manneru, and some hill streams. They flow from west to east and ultimately empty themselves into the Bay of Bengal. The Manneru basin lies mainly in Kandukur, Kavali, Udayagiri and Kanigiri taluks. It serves an area of about 1,516 sq. miles as it flows down into the Bay of Bengal and is subject to heavy floods of short duration. The Mopad Project thrown across the river Manneru has an ayacut of 6,000 acres. Two other rivers are also harnessed and two reservoirs known as the Panduvagandi and the Nakkalagandi are constructed across them. They irrigate an area of 1,463.46 acres and 240.22 acres respectively. Paddy is raised in irrigated lands and jonna, korra are raised chiefly in dry lands. The taluk also contains a number of irrigation wells under which ragi and sajja are generally raised as garden crops. The soils are generally poor.

The climate of this taluk is dry and healthy and it is not subject to sudden variations of temperature. During the early months of the year there is seldom much rain, but in the month of May there are usually a few showers. The south-west monsoon which sets in by about the middle of June, brings some rain to the entire taluk. In October the north-east monsoon breaks and rains continue till December. However, the rainfall in this taluk is uncertain and inadequate. There are no worth mentioning forests in this taluk. The granite of the Kanigiri hill supplies excellent building stone which is exported to distant places.

The taluk was formerly called the "Durgam Samsthanam" from the remarkable hill or *droog* adjoining the Kanigiri town. It was also called "Durga seema" and "Marella seema". On the summit of the hill there is a level piece of ground of about a square mile, where it is said, a town once existed. The hill appears to have been fortified and the remains of some of the batteries still exist.

According to tradition, Kanigiri was taken by Kaketha Rudrudu of Gajapathi dynasty with capital at Cuttack in the 10th century. This dynasty is said to have held this part of the country *i. e.*, both Udayagiri and Kanigiri, for some 400 years. The fame of Kaketha Rudrudu is connected with his force of archers, which is said to have numbered 900,000. His son Pratapa Rudrudu is said to have built the town of Kanigiri and to have fortified the *droog* placing a strong force there for its defence. Pratapa Rudrudu's son was Purushottama Rudrudu who was a brave soldier and a wise ruler. His son Veera Rudrudu is said to have been the last sovereign who held power in the district. He was defeated by Sri Krishna Devaraya, into whose possession Kanigiri then fell. Later Kanigiri was occupied by Qutb Shahi dynasty of Golconda.

The Golconda rulers left the affairs of the taluk to be administered by *sthalakarnams*. They are said to have built a fort at Gogupalle. In due course they probably tried to become independent and so the Deshmukh of Udayagiri supported by the Nizam invaded Kanigiri and took the hill fort. The dispossessed rulers aided by the Raja of Venkatagiri recovered possession later and then, in lieu of debts, the Raja himself took over the taluk. In the 18th century, Hyder Ali of Mysore, who invaded the Nizam's dominions, took possession of Kanigiri taluk and destroyed the town and the fort of Kanigiri. On the defeat of Tippu Sultan this taluk reverted to the Nizam who afterwards gave it to the English with the ceded districts. Under the British, the taluk of Kanigiri was first attached to Cuddapah district, then transferred to Kurnool and finally made part of the Nellore district.

The taluk has no railway communications. But the Madras-Waltair (Broad Gauge) line of the Southern Railway passes through Kandukur taluk which lies adjacent to it on the east. Kanigiri town, the taluk headquarters, is connected with Singarayakonda Railway Station which is at a distance of about 39 miles. Donakonda Railway Station on Hubli-Guntur line (Metre Gauge) of the Southern Railway is at a distance of about 29 miles. Cumbum Railway station on the same line is at a distance of about 40 miles. Both are connected by bus. The interior villages of the taluk are mostly unconnected with roads and are lacking in proper communication facilities.

As regards medical facilities, the taluk has a Government Hospital at Kanigiri. The Veligandla Panchayat Samithi maintains a Primary Health Centre at Nagireddipalle village. Apart from these, there are Ayurvedic Dispensaries at Pamur, Kambhaldinne, Chandrasekharapuram, Darsiguntapeta, Pedda Alavalpad, Pedda Irelapad Doddichintala and Nandanavanam villages of this taluk. People normally drink water from the draw wells.

The educational establishments of this taluk consist of a Zilla Parishad Higher Secondary School, a Government Secondary Training School and a

Middle School for Girls at Kanigiri. Besides these, there are Zilla Parishad High Schools at Pamur and Veligandla and Middle Schools at Chandrasekharapuram, Gudipatipalle, Peddacherlopalle, Gurivayipeta and Hanumanthunipadu villages. The Panchayat Samithis *viz.*, Kanigiri and Veligandla maintain Elementary Schools in almost all villages of this taluk.

There are no Large Scale Industries in this taluk. The taluk contains a *beedi* factory at Kanigiri and also an Asafoetida depot. Stone quarrying is the popular industry of this taluk. The stone is hard and is used mostly for the construction of buildings and domestic articles such as grinding stones, mortars *etc.*, which are sold in several distant places of the district. Iron and steel agricultural implements are also made locally and supplied to the upland taluks nearby.

Kanigiri—the headquarters of the taluk by the same name, supports a population of 9,529 persons as per the 1961 Census count. The town extends over an area of 12.82 sq. miles and is connected by major district roads with Pamur on the south, Podili on the north, Kandukur on the east and Cumbum on the west. There are bus services all round. There are altogether 1,989 occupied residential houses in the town. The density of its population is 743 persons per sq. mile.

The name Kanigiri means golden hill. The full name is "Kanakagiri Vijaya Marthanda Durgam." The granite of the Kanigiri hill (within half a mile from the town), supplies excellent building stone which is exported to distant places also. Road rollers, grinding stones *etc.*, are also prepared and exported. There are two old temples on the Kanigiri hill which are not being maintained properly. There is an ancient temple dedicated to Markandeswaraswamy. The belief is that it was built by Markandeyamuni. There is also a mosque built in 1920.

The town contains several public institutions and offices. There is a Zilla Parishad Higher Secondary School, a Government Training School, a Government Hospital, a Veterinary Hospital, a Judicial Magistrate's Court, a District Munsif's Court, a Police Station, a Local Library and a Post Office with telephone and telegraph facilities. The town has no protected water supply at present but a scheme is under investigation.

Kanigiri is well connected by buses. The important bus routes are Singarayakonda-Kurichedu *via.*, Podili and Kanigiri, Kanigiri-Nellore *via.*, Pamur, Duttaluru and Vinjamuru and Kanigiri to Ongole *via.*, Podili. Cumbum, Donakonda and Kurichedu Railway Stations on the Hubli-Guntur (Metre Gauge) line and the Singarayakonda and Ongole Railway Stations on the Madras-Waltair (Broad Gauge) line of the Southern Railway are the proximate Railway Stations to this place though at a considerable distance. Singarayakonda Railway Station is about 39 miles away from this place.

Pamur—is situated on the Kanigiri–Duttalur Road in the junction where buses from Kanigiri, Kandukur, Udayagiri and Nellore meet. It was formerly the headquarters of the Kalahasti Estate Taluk Office. There are altogether 888 occupied residential houses and 890 households and the village has a population of 4,034 persons. There is a Zilla Parishad High School and an Ayurvedic Dispensary.

PODILI TALUK

This upland taluk lies on the north-west corner of the district, bounded on the north by Darsi taluk, on the south by Kanigiri taluk, on the east by Ongole taluk of the Guntur district and on the west by Cumbum and Markapur taluks of the Kurnool district. According to the 1961 Census count the taluk supports a population of 104,440 persons. The taluk covers an area of 564.0 sq. miles and the country is mostly barren and treeless interspersed with hills. The density of population is 185 persons per square mile. It comprises 113 inhabited and 6 uninhabited villages. There are no urban areas in this taluk. The following statement gives the distribution of the inhabited villages according to the different population sizes.

Less than 200	18
200— 499	23
500— 999	31
1,000—1,999	33
2,000—4,999	7
5,000—9,999	1
10,000 and above	..
Total inhabited Villages	113

Podili is the only village in this taluk having a population over 5,000.

The river Musi is the principal river that passes through this taluk. It takes its origin in the Veligondas within the limits of Garladinne. As the river flows it borders between Darsi and Podili taluks in the district and also between Ongole taluk of Guntur district and Podili taluk. The river is not an affluent to any other river but flows direct into the Bay of Bengal.

As it is an upland area, the soils in this taluk are mostly red loam and sandy. However, in a few villages surrounding Tarlupadu and Pedarikatla villages the regar variety is found.

Irrigation in this taluk is largely facilitated by minor irrigation sources such as tanks, wells, canals and kuntas and they are all rainfed getting a precarious supply. Of these, tanks and wells irrigate a considerable area. Ragi and cumbu are grown as irrigated crops under wells. The taluk has the following four major projects.

Name of the Project (1)	Location (2)	Estimated cost (in Rupees) (3)	Extent benefited (in acres) (4)
Vaddimadugu Tank	Across the river near Vaddimadugu village	4,70,000	660
Mukku Papaiah Tank	Across Gajjaleru at Vagemadugu	1,30,000	350
Gangapalem Tank	Across Atleru near Gangapalem	86,000	120
Mekaleru Project	Across Mekaleru near Gollapalli	5,00,000	475

Of these four works, Vaddimadugu tank is under construction and is expected to be completed in the near future.

The climate of this taluk is dry and healthy. It is not subject to sudden variations of temperature, but the taluk receives precarious rainfall. The south-west monsoon usually sets in about the middle of June and moderate rains continue upto September. In the month of October the north-east monsoon breaks and generally brings heavy rains throughout the taluk. October and November are usually the months of heavy rainfall. The rains brought in by north-east monsoon in this taluk continue till December. Seldom there is rainfall in the early months of the year.

The taluk is connected both by road and railways. Podili the headquarters of the taluk is connected only by Major District Roads which connect it with the Railway Stations on the Hubli–Guntur Metre Gauge Line of the Southern Railway at Tarlupadu and Markapur. The Railway line passes through this taluk only for a short length of about 10 miles. The State Highway passes through this taluk from west to east touching Podili and several other important villages of the taluk.

The taluk contains a Government Dispensary at Podili,the taluk headquarters. There are Rural Dispensaries at Tadivaripalle,Tarlupadu,Pedarikatla, Mungapadu, and Marripudi. A good number of wells in this taluk were constructed under the Rural Water Supply Scheme and they form the main source for drinking water. The drinking water in Podili and in some other neighbouring villages is said to contain flourine which is responsible for the bone disease called endenure flurosis affecting both men and cattle.

As regards educational facilities the taluk contains two High Schools and three Middle Schools. The Elementary Schools of this taluk are maintained by the Panchayat Samithi. Every village is having an Elementary School and certain big villages have more than one also.

Slate quarrying is the major industry in this taluk. There are slate mines at Rayavaram and its neighbouring villages. Slate stone quarried in hese mines is taken to Markapur for the manufacture of slates. The slates manufactured at Markapur are exported to places all over India. Mat weaving it the chief cottage and small scale industry of this taluk. The mats command a good market and are sens to different markets at Guntur, Nellore and Vijayawada regularly.

The taluk contains three important temples *viz.*, Podili Nirmamamaheswaraswamy temple, Podili Lakshmi Narasimhaswamy temple on the Podili hills, which are about five miles from Podili and three miles from Marripudi and Sri Velugondaswamy temple located on the Veligonda hillock which is about 2 1/2 miles away from Ongole–Markapur road from Garladinne. People in this taluk observe these festivals and quite a large number of people throng at these places on the festive days.

Podili—the headquarters of the taluk of the same name and a Panchayat, is situated on the Ongole–Cumbum road. It extends over an area of 16.94 sq. miles. It has a population of 8,569 persons as per the 1961 Census count and there are altogether 1,646 occupied residential houses in this village.

As regards the educational facilities, there is a Zilla Parishad High School, a Mission High School and four Elementary Schools. The usual complement of offices of a taluk headquarters like Taluk Office, a Police Station, Sub-Treasury, Forest Range Office, a Panchayat Office, Sub-Registrar's Office and an Agricultural Demonstrator's Office are located in this village.

A Government Hospital and Mission Hospital cater to the medical needs of the village and its neighbourhood. There is a Sub-Post Office with telephone and telegraph facilities and a Police Station headed by a Circle Inspector. This town has one Library. Only dry crops like ragi, redgram, greengram and chillies and cotton are grown in this place.

As regards communication facilities the place is connected by road only. Podili is connected to Nellore, Ongole, Markapur and Kurichedu by major district roads. There is a Travellers' Bungalow maintained by the Highways Department and a choultry. Podilamma is the name of the village deity of this place. There are five temples in the village. The Podilamma temple attracts many people even from other places throughout the year. The other temples are Konda Lakshminarasimhaswamy temple on the Podili hill which is six miles from Podili. The annual festival lasting for three days is celebrated in the month of March. This is one of the important festivals of this place. Sri Venugopalaswamy temple, Sri Anjaneyaswamy temple and Sri Veerabhadraswamy temple are also important. In addition to these there is one more important temple *viz.*, Nirmamamaheswaraswamy temple situated in Podili town proper. The chief deity of this place is Lord Sankara. The annual festival starts every year on Maha Sivaratri day and usually lasts for three days. This is the most important festival of this taluk.

Rayavaram—is situated at a distance of 26 miles to the west of Podili on Markapur-Ongole road. The Markapur Railway Station is within the revenue limits of this village. The slate quarries in this village and around it are famous. Raw slate stone quarried here is sent to Markapur for slate manufacturing. This is the major industry in this taluk.

DARSI TALUK

This taluk is the northern most taluk of the district and supports a population of 125,912 persons as per the 1961 Census count. Till recently it was an estate taluk under the control of Venkatagiri Zamin and it was taken over by Government in 1949. It is bounded on the east and north by Guntur district, on the west by Kurnool district, and on the south by Podili taluk. The taluk is roughly about 48 miles from east to west and about 14 miles from south to north. The country is barren and consists of isolated hills and ridges and stony plains presenting a poor appearance. The taluk extends over an area of 590.8 sq. miles and there are altogether 114 inhabited and 6 uninhabited villages. There are no urban units in this taluk. The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	9
200 — 499	23
500 — 999	31
1,000 — 1,999	39
2,000 — 4,999	12
5,000 — 9,999	..
10,000 and above	..
Total inhabited Villages	114

There are no villages in this taluk with a population of 5,000. The taluk is divided into six firkas *viz.*, Darsi, Kurichedu, Donakonda, Pothakamur, Thallur and Marella for Revenue Administration.

The river Musi flows towards the south of the taluk and forms a natural boundary between this taluk and Podili taluk. The river Gundlakamma flows along the north and western borders of this taluk and in its lower course it passes through the taluk to some distance touching the north-eastern tip of the taluk. The taluk contains many rivulets and of these the Dornapu Vagu and the Chilakaleru are of some importance. The former flows through Marella and Thallur firkas while the latter flows through Darsi, Pothakamur and Thallur firkas and they both join Gundlakamma river in Guntur district.

The irrigation sources of this taluk consist of [illegible] tanks. Some of the tank bunds were bre[illegible] in the floods of 1949. The Government have taken up the improvement of the tanks in the taluk and improved them largely and they are in good condition now. The minor irrigation sources of this taluk number about 120 and the maintenance of minor irrigation sources has been handed over to the Panchayat Samithis. There are six major irrigation tanks in this taluk. Mostly millet crops are irrigated under tanks and wells. The entire taluk except nine villages of Donakonda

firka is included in the first phase of Nagarjunasagar Project. When this project is commissioned the economic conditions of the people are likely to be greatly improved as almost all the dry land would be getting adequate irrigation facilities. The taluk contains black, mixed red and sandy soils. Red soil, however, covers a large area.

The climate of this taluk is generally dry and the average annual rainfall of this taluk is about 27 inches. There are small Reserve Forests in Kurichedu and Donakonda firkas. Only scrub jungle of thorny species is met with in the forests of the taluk. There is scattered growth of inferior deciduous species in them. The forest department of late has raised cashew plantations in the Vellala forest of Kurichedu firka.

The taluk is connected by both rail and road. The Hubli—Guntur (Metre Gauge) line of the Southern Railway passes through this taluk with its stations at Gajjalakonda, Donakonda and Kurichedu. Major district roads connect the taluk headquarters with the neighbouring taluks of the district. The following are the six main roads in this taluk.

1. Podili—Addanki Road
2. Darsi—East Gangavaram road *via.*,Pothakamur
3. Donakonda—Chinarikatla road *via.*Aravallipad
4. Darsi—Avulamanda road *via.*, Kurichedu
5. Venkatachalampalle—Donakonda Road *via.*, Chandalur
6. Pedda Vullagallu—Jammalamadaka Road

In almost all the villages the Panchayat Samithis have taken up the formation of roads from one village to the other. The taluk has three Sub-Post Offices with telegraph facilities and as many as 61 Experimental Departmental Branch Post Offices.

There is a Government Hospital at Darsi, the taluk headquarters, and Rural Dispensaries are located at Kurichedu and Marella villages. At Thallur village there is a Primary Health Centre and another at Kurichedu. There is a Railway Hospital at Donakonda. Apart from these the taluk contians an Ayurvedic Local Fund Dispensary at Chandalur and Subsidised Ayurvedic Rural Dispensaries at Pothakamur, Nagambhotlapalem, and Kocherlakota. Wells are the sources of drinking water in this taluk. The Thallur Panchayat Samithi has constructed nearly 98 drinking water wells and Darsi Panchayat Samithi about 37 wells.

This taluk has six High Schools and two Middle Schools both for boys and girls. Besides these there is a Higher Elementary School at Chandalur and another at Donakonda maintained by the American Baptist Mission. There are many Elementary Schools maintained by the Panchayat Samithi.

The slate mining industry located at Ananthavaram village is making headway and there are about 25 workers engaged in it. There are, however, no large industries in this taluk worth mentioning. Carving of idols from stone in Donakonda, and weaving of mats, coarse cloth and *cumblis* are the main occupations of some families. In Dekanakonda there is a stone about 12 cubits long and about 1½ cubits thick at the base, which stand loosely on a slab set in ground with only two opposite corners resting on the slab. This massive stone is said to have been cut and erected by a local sculptor long ago. It has withstood several cyclones. At the slightest touch of the hand or of the wind, it rocks to and fro but never falls. There are no important festivals in this taluk. Ganga festival at Donakonda and East Gangavaram in March or April and the Brahmothsavam of Sri Vallabharayaswamy at Kurichedu in February or March are some of the minor festivals. The raw slate material is sent to Markapur in Kurnool district for the manufacture of slates.

Darsi—a Panchayat, is the headquarters of the taluk and has a total population of 4,550 persons. It extends its area over 17.99 sq. miles and contains 935 houses with a total number of 964 households. The village is situated at the junction of three roads connecting Podili, Addanki of Guntur district, and Kurichedu Railway Station, the last of which is about 13 miles away from Darsi.

It consists of one High School and five Elementary Schools. There is a Sub-Registrar's Office, one Samithi Block Office and one Hospital. There is also one Block Veterinary Hospital. The Jubilee draw well is the source of drinking water for the village. There is a Travellers' Bungalow in addition to the village choultry. The climate of this place is very dry and dry crops like ragi, sajja, jonna and korra are cultivated here. Paddy is raised only in a small extent.

Kochcharlakota— is situated on the extreme west of the taluk and is about 23 miles from Podili.

According to the 1961 Census count it has a population of 2,179 persons and the village extends over an area of 2.74 sq. miles. There are in all 445 occupied residential houses in this village. Donakonda Railway Station is at a distance of about 10 miles from this place. The village has an old fort founded by a Gajapathi King. It was afterwards captured by Prataparudra of Warangal and remained in the possession of his successors till it passed into the hands of the Vijayanagar rulers. There is an old and dilapidated mud fort said to have been built by Mandapatirajulu round the village. There are two temples *viz.*, the Ramalingeswaraswami temple and the Varadarajaswami temple.

KANDUKUR TALUK

This coastal taluk is the second largest populated taluk in the district with a population of 232,846 persons as per the 1961 Census count. The taluk covers an area of 781.0 sq. miles and the density of population is 298 persons per sq. mile. It is bounded on the north by Podili taluk and Ongole taluk of Guntur district separated by the river Musi, on the south by Kavali taluk, on the west by Kanigiri taluk, and on the east by the Bay of Bengal. The name 'Kandukur' is derived from the sanskrit word 'Skandapuri' meaning the town of God Skanda. There are altogether 167 inhabited and 17 uninhabited villages in this taluk. Kandukur is the only urban area in the taluk. The following statement shows the number of inhabited villages arranged according to the different population sizes.

Less than	200	17
200—	499	22
500—	999	43
1,000—	1,999	52
2,000—	4,999	30
5,000—	9,999	3
10,000 and above		..
Total inhabited Villages		167

Pakala, Karedu and Kollurpadu (Rajupalem) are the three villages in this taluk which have population of more than 5,000 each.

The important rivers that flow in this taluk are Manneru also known as Upputeru in the lower reaches, Paleru and Musi besides, Thummaleru and Pandivagu, the two tributaries of Manneru. The Thummaleru and the Pandivagu feed the Machavaram and Mopadu tanks respectively. A supply channel from Manneru feeds the Karedu tank. The Gudisileru has been dammed for feeding the Ponnaluru tank. The taluk contains a major irrigation project at Lingasamudram which is called the Rallapadu Project and the villages Anneboyinapalle, Angirekulapalu, Puretipalle, Darakanipad, Basireddipalem, Venkampeta, Gundlapalem, Gudlur, Chinapavani, Pedapavani and Chinnalataripi are benefited by it. The project is constructed across the Manneru under the Five Year Plans at a cost of one crore rupees and is the biggest constructed in the district. It is situated at a distance of 23 miles south-west of Kandukur and there is a road bridge across the river along the bund of the project. The project site presents a beautiful view. There is an Inspection Bungalow at the project site.

There are ten medium irrigation projects at the following places.

Name of the Project (1)	Location of the Project (2)
1. Rallapadu Project Stage I	Veeraraghavunikota
2. Upputeru, Lower Anicut Scheme	Pedapavani
3. Paleru—Bitragunta Scheme	Jillellamudi
4. Karedu Anicut Scheme	Bhimavaram
5. Mogilicherla Tank	Mogilicherla
6. Ponnaluru Tank Supply Channel	Cherukuru
7. Supply Channel from Thummuleru to Pokuru Tank	Pokuru
8. Chinapavani Tank	Chinapavani
9. Chundi big Tank	Chundi
10. Cherukuru big Tank	Cherukuru

The taluk is mainly a dry tract of hilly region with a large portion covered by red loamy soil. Black clay is also found to an appreciable extent especially in the northern portion of the taluk. The climate of this taluk is dry and healthy. The rainfall during the year 1961 in this taluk was 865.4 mms.

The taluk is connected both by road and railways. The Madras—Waltair (Broad Gauge) line of the Southern Railway traverses through this taluk on the eastern side and the G. N. T. road passes in the same direction parallel and adjacent to the Railway line. The taluk headquarters Kandukur is not, however, connected by Railway. Only major district roads connect it with neighbouring Railway Stations of Singarayakonda and

Tettu. Telephone and Telegraph facilities are available at Kandukur, the taluk headquarters, and at Singarayakonda. Besides a Hospital at Kandukur there are Dispensaries at Singarayakonda, Ulavapadu Kondapi, Thangella, Kamepalle, Lingasamudram, Chundi, Gudlur, Ponnaluru, Uppalapadu and Pedapavani. Apart from these there are some private hospitals at Singarayakonda and Kandukur.

There are seven High Schools and seven Middle Schools in this taluk besides many Elementary Schools. There are no small scale or large scale cottage industries in this taluk. There are four oil expellers and five shellers and several huller rice mills in this taluk. There is a Salt Factory at Ullapalem. Ghee, charcoal and fuel are generally exported from here. There are two ancient temples in this taluk, one at Singarayakonda and another at Palakonda five miles west of Chundi.

Kandukur—is the headquarters of the taluk and it lies on Ullapalem—Kanigiri road and extends over an area of 8.56 sq. miles. The population of this town as per the 1961 Census count is 12,436 persons and the density of population is 1,453 persons per sq. mile. The usual offices like the Taluk Office, Police Station *etc.*, that are found in a taluk headquarters are located in this town. There is one High School in the town besides eleven Elementary Schools. There is also a reading room and a library. The Post Office has Telephone and Telegraph facilities. There is a Government Hospital, apart, from two private hospitals. There are two rice mills in the town. The important cottage industry is handloom weaving. Weaving is the hereditary occupation of some of the castes like Padmasali and Adi Andhra. Fine cloth is produced here.

There are the ruins of an old fort constructed during the Foujdari of Malik Alam Khan and another fort built during the reign of Sri Krishna Devaraya. There is a seven headed tomb on a small hillock in a pond situated in the heart of the town called Gunderukunta in commemoration of the seven warriors slain in the battle of Allinagar *alias* Gandavaram of Kovur taluk. Tradition says that seven headless corpses dropped down here from the backs of horses flying from the battle field. There is also a Darga of Saint Shahjehangir and two old Hindu temples of Someswara and Janardhana. The local deity of this town is Ankamma. The Ankamma festival is celebrated once in a year when the neighbouring villagers congregate at the temple to worship the deity.

The Singarayakonda Railway Station, which is the nearest is at nine miles from Kandukur. It is an important road junction. Ullapalem—Singarayakonda—Kandukur road, Kandukur—Chundi road and Kandukur — Boganampadu road meet at this place.

Tarlupadu—is a hamlet of Pedakandlagunta village. There is a small '*Matham*' (monastery) known as the Brahmamgari Matham in existence for the last 20 years. It is associated with the famous poet Pothuluri Veerabrahmam who wrote the 'Thathvageetha'. A big festival of this matham is celebrated every year on the Telugu New Year's day. Thousands of pilgrims from distant places, specially from Guntur and Nellore districts congregate here on the festival days.

Ayyavaripalle—a Panchayat, extends over an area of 5.55 sq. miles and has a population of 817 persons. There are altogether 112 houses and 129 households. There is an Elementary School and a Branch Post Office. The village is well known because of the Malakonda temple. The Lord of this temple is Lakshminarasimhaswamy. It is situated on the Malakonda hill in the eastern ghats at the south-east end of the taluk within the limits of the Ayyavaripalle village. The shrine as well as the Lord of this temple have been carved out of a huge rock. Close to this temple there is a pond in which water is found throughout the year. People from all parts of the district visit this place, specially on Saturdays and offer their prayers. The Hindu devotees name their children not only after the Lord but also after the name of the hill 'Malakonda'.

Singarayakonda—is an ancient village with some historical importance. It is a Railway Station on the Vijayawada—Madras (Broad Gauge) line and is nine miles east of Kandukur. The population of this village is 3,279. There are altogether 706 houses and 717 households. It is a Panchayat village. There is a School, a Branch Post Office and a Hospital in this village. There is a big private choultry. The village owes its importance due to the presence of a big temple of Lord Varaha Lakshmi Narasimhaswamy. This is an ancient temple constructed on a hillock even before Sri Krishna Devaraya's time. It is said that Sri Krishna Devaraya was a great devotee of this God and was paying visits to this temple occasionally. It is also said that he donated some villages of Kandullu taluk for the maintenance of this temple. Brahmothsavam is celebrated in the month of March every year in

this temple. At the foot of the hill there is a pond. The temple is situated at a distance of one mile from the Railway Station. The Great Northern Trunk Road from Madras to Calcutta and also the Ullapalem-Vemulapadu road pass through this village.

KAVALI TALUK

This is one of the sea coast taluks of the district bounded on the north by Kandukur taluk, on the east by the Bay of Bengal, on the south by Kovur taluk and on the west by Udayagiri and Atmakur taluks. According to the 1961 Census count the population of this taluk is 156,736 persons. It covers an area of 568.0 sq. miles. The density of population is 276 persons per sq. mile. There are in all 81 inhabited villages and one town *viz.*, Kavali in this taluk and it is mostly non-deltaic except for six villages *viz.*, Gudavallur, Nekunampeta, Veligandla, and Chintaladevi which are commanded by the Mopad Project and Allimadugu and Zuvvaladinne covered under the Sangam Project. The following statement illustrates the number of inhabited villages classified according to the various population sizes:

Less than 200	5
200 — 499	13
500 — 999	17
1,000 —1,999	20
2,000 —4,999	20
5,000 —9,999	6
10,000 and above	..
Total inhabited Villages	81

Chinna Annaluru, Tummalapenta, Zuvvaladinne, Brahmanakraka, Bhogavolu and Kovurpalle are the six villages which have population of more than five thousand. Kavali is the only urban area it contains.

There are no big rivers in this taluk. Only rivulets like Upputeru, Chikativagu, Chippaleru flow through this taluk. There is generally the prospect of facing famine and drought conditions in the event of failure of monsoons. A few villages of the taluk are served by Mopad, Sangam and Rallapad projects. The taluk is likely to be benefited by the Nagarjunasagar Project in the second phase. There are twentytwo reserve forests in this taluk with an area of 59.90 sq. miles.

The taluk is connected both by road and railway line. The Madras—Waltair (Broad Gauge) line of the Southern Railway and the Great Northern Trunk Road pass through this taluk in the eastern portion parallel to each other. Bitragunta, Musunur and Kavali are the Railway Stations in the taluk. Bitragunta Railway Station has a locoshed. The taluk is also well served by the major district roads *viz.*, Kavali-Udayagiri road, Bitragunta-Brahmanakraka road, Kavali-Pedapavani road, and Kavali-Thummalapenta road on which buses ply regularly connecting almost all the important villages besides the neighbouring taluks and Nellore, the district headquarters. The Buckingham Canal also passes through this taluk from north to south.

Medical aid is provided in this taluk through a Government Hospital at Kavali and eight Dispensaries maintained by the Zilla Parishad. There is a Railway Hospital at Bitragunta. Water from the draw wells is used for drinking purposes.

The educational establishments of this taluk consist of a college called the Jawahar Jyoti College at Kavali, five High Schools and about a dozen Middle Schools.

Palmyra jaggery is largely prepared in villages. There is a stainless steel industry and a radio manufacturing house at Kavali. There are 33 rice mills in the taluk. There is an ancient temple of Lord Venkateswara at Bitragunta and the annual festival of Sri Venkateswaraswamy is celebrated by the people with great pomp in March.

Kavali—is the headquarters of the taluk and of a Revenue Division. It has a Railway Station and the G. N. T. road passes through it. It extends over an area of 0.65 sq. miles. This town has recorded a total population of 20,544 persons with 4,321 houses at the 1961 Census. The density of population of this town is 31,606 persons per sq. mile. The sea is only six miles from this place. As regards the educational facilities, it has a college called Jawahar Jyoti College, a Multipurpose Higher Secondary School and several Elementary schools. There is a Government Hospital, a Panchayat Ayurvedic Dispensary and a Government Veterinary Hospital in this town. The Revenue Divisional Officer's Office, District Munsif's Court, Agricultural Demonstrator's Office, Settlement Office, Office of the Inspector of Fisheries and several other offices that are usually located in a Revenue Divisional Headquarters exist in this town. There is also a Post Office with Telephone and telegraph facilities, a Reading Room, two Choultries, and a Public Works Department's Rest House.

The main occupation of the people is agriculture. There are rice mills and oil mills in this town. This is a fairly big business centre.

The Kalugolamma temple is important and its festival is celebrated once in 20 years when people from all villages of this taluk congregate here.

Chinna Annalur—situated on the Kaligiri-Lingasamudram road extends over an area of 36.86 sq. miles. The population of this village is 5,491 persons according to the 1961 Census. There are altogether 1,026 houses and 1,028 households. The civic administration of this village is looked after by the Village Panchayat. There is an Elementary School and a Zilla Parishad dispensary. It has a Branch Post Office. The important crops of this village are paddy, ragi, sajja and cholam. Irrigation is carried on by tank water. There are two important temples in this village, *viz.*, Sivalayam and Ramalayam for which special festivals are not celebrated. Kavali-Kondapuram road passes through this village.

Thummalapenta—is situated on the sea coast at a distance of six miles from Kavali. It extends over an area of 20.52 sq. miles. The population of this village is 5,667 persons. There are altogether 1,239 houses and an equal number of households. Due to the proximity of the sea, this place has become a good fishing centre. Fish are exported to other places from this village. The people collect shells for making lime. It was formerly an important place for salt manufacture but after the formation of G. N. T. road and railway its importance gradually decreased.

The civic administration of this village is looked after by the Village Panchayat. It has got an Elementary School. The chiefcrops of this village are paddy and ragi. Irrgation is carried on under the tanks.

Zuvvaladinne—is a Panchayat and a coastal village with a population of 5,623 persons. There are altogether 1,314 houses and an equal number of households. It extends over an area of 11.67 sq. miles. It is connected to the Great Northern Trunk Road by a branch road.

There is an Elementary School, a Reading Room and a Branch Post Office. This village is at the tail end of the Sangam Project. Cultivation is the main occupation of the people. The important food crops are paddy and ragi. Irrigation is carried on under Sangam Project. As it is a coastal village fishing is an important occupation. Vadapalem, a hamlet of this village, was once asteamer station. Formerly salt was also being manufactured here. Casuarina is grown on the coastal side. The subsidiary occupation of the people is the collection of shell from the seacoast for the preparation of lime. There are two temples dedicated to Siva and Vishnu, *viz.*, the Sri Sambasivaswamivari temple and the Sri Kodandaswamivari temple besides Penugondamma temple. Penugondamma is the village deity and there is atemple dedicated to her.

Brahmanakraka—is a Panchayat and is at a distance of two miles from Kavali—Udayagiri road. It has recorded a population of 5,765 persons with 1,202 houses and an equal number of households at the 1961 Census. It extends over an area of 23.93 sq. miles.

There is a Middle School, an Elementary School and a Branch Post Office. The important crops are paddy, cholam, and arika. Irrigation is carried on under tank. Ramalingeswaraswamy temple and Venugopalaswamy temple are the two temples in this village. Ramalingeswaraswamy temple is of some archaeological interest. The village deity is Krakamma. Kavali—Udayagiri road passes through this village.

Bhogavolu—a Panchayat, is situated near Bitragunta and extends over an area of 9.97 sq. miles. The population of this village is 8,309 persons with a total number of 1,785 houses and an equal number of households. The village has an Elementary School and a Branch Post Office. Bitragunta Railway Station is near to this village. There is a choultry maintained by the Zilla Parishad. The main occupation of the people in this village is agriculture. The important dry crops are paddy, cholam and arika. Irrigation is carried on under tanks. Chennakesavaswamivari temple and Anjaneya Devasthanam are the two temples in the village. The Great Northern Trunk Road, Kapparallatippa-Jaladanki road and Bhogavolu-Rangasamudram road pass through this village.

Kovurpalle—a Panchayat, extends over an area of 3.08 sq. miles. The population of this village is 6,571 persons with 1,382 houses with 1,387 households. As regards educational facilities the village has a Zilla Parishad High School, an Elementary School, a Railway Higher Elementary School and a Social Welfare School. It has got a Branch Post Office.

Paddy, cholam and arika are raised in this village. Irrigation is carried on under a rainfed tank. The Great Northern Trunk Road passes through this village.

KOVUR TALUK

This is the third largest populated taluk in the district and supports a population of 214,002 persons as per the 1961 Census count. This taluk was formed from the old Nellore taluk in October, 1910 with the river Pennar as the natural boundary between the two. The taluk is bounded on the east by the Bay of Bengal, on the west by Atmakur taluk, on the north by Kavali taluk and on the south by Nellore taluk. The taluk extends over an area of 385.0 sq. miles and comprises 89 inhabited villages. Kovur is the only urban area in this taluk. The taluk is divided into five Revenue firkas *viz*.. Kovur, Alluru, Kodavalur, Duvvur and Buchireddipalem for revenue administration. The following statement shows the number of inhabited villages arranged according to the various population sizes:

Less than 200	6
200— 499	8
500— 999	10
1,000—1,999	22
2,000—4,999	36
5,000—9,999	7
10,000 and above	..
Total inhabited Villages	89

Allurupeta, Alluru, Iskapalle, Buchireddipalem, Yellayapalem, Vidavalur and Utukur are the seven villages which have a population ranging between 5,000 and 9,999 persons in this taluk. The country is mostly plain sloping from west to east. There is only a small hillock in Sangam village about 400 feet above the sea level.

The taluk lies in the Pennar delta area and the river Pennar, also called the Uttara Pinakini, borders between Nellore and Kovur taluks. It empties itself into the Bay of Bengal near Utukur of this taluk. There are, besides the natural drains, the Pyderu and the Maldevi flowing from west to east, the former joining the sea near Ponnapudi and the latter emptying itself into the Pennar river between Mudivarthi and Utukur villages. The Kaligiri main canal and the Duvvur canal take off from the left flank of the Sangam anicut across the river Pennar at Sangam village. The former canal feeds the Kaligiri Reservoir which commands an ayacut of 83,400 acres. The eastern channel and the southern channel which take off from the Reservoir are its two main distributaries. The surplus water of the Reservoir is let out by means of two natural drains, the Maldevi and the Pyderu. The Pyderu forms a supply channel to the Alluru tank besides being a direct source of irrigation to several villages in this taluk. The taluk is served by a good net work of channels commanded by the Sangam anicut across the Pennar.

There are 10 tanks in this taluk maintained by the Public Works Department and 13 minor irrigation tanks. The taluk is generally fertile and prosperous. Paddy of good variety is extensively raised. The taluk is famous for its rich and beautiful gardens of mangoes, limes, batavias, coconuts, plantains and betel vines. The soils of the taluk are of black clay, red loam and mixed variety. As this taluk adjoins the Bay of Bengal, a sand belt runs along the eastern coastal strip. There are no large forests in this taluk. The average annual rainfall of this taluk is 38.90 inches. Though the taluk lies in the rainfall zone of both the monsoons *i.e.*, the south-west and the north-east, it is largely influenced by the north-east monsoon.

The taluk is well served both by road and railways. The Great Northern Trunk Road and the Dornal Road pass through this taluk. The G. N. T. Road runs parallel to the Madras-Waltair (Broad Gauge) line of the Southern Railway. The Dornal road runs from east to the west of the taluk connecting Nellore district with Cuddapah district. The other important roads in the taluk are Rajupalem-Iskapalle road, Kovur-Utukur road, Kodavalur-Utukur road, Kodavalur-Buchireddipalem road, Buchireddipalem - Zonnawada road, Talamanchi-Ramatbirtham road, Yellayapalem branch road, Gandavaram branch road and Alluru-Bhogavolu road. Padugupadu, Kodavalur, Talamanchi, Racherlapad and Alluru Road are the Railway Stations in this taluk. Buses ply regularly on all the roads and afford necessary transport facilities. The Buckingham Canal provides water transport facilities as far south as Madras. It passes through the villages of Iskapalle, Varini and Utukur and is provided with three locks for boat traffic *viz*., the North Pyderu Lock, the South Pyderu Lock and the North Pennar Lock. Rice, fuel and salt are the chief articles of export to Madras along this canal.

There are three Hospitals and three Dispensaries in this taluk. Vidavalur, Buchireddipalem and Alluru have each one Government Hospital. There is also a Government Medical Dispensary at

Kovur. Local fund Dispensaries are located at Varini and Yellayapalem.

The educational establishments of the taluk consist of seven High Schools at Kovur, Gandavaram, North Rajupalem, Buchireddipalem, Alluru, Vidavalur and Yellayapalem and three Middle Schools at Utukuru, Pedaputhedu and Dagadarthi. Besides these there are a good number of Elementary Schools maintained by the Panchayat Samithis in most of the villages.

There are no major or important industries in this taluk. Handloom weaving however, forms the chief occupation of a few families. In the past Kovur was famous for lungis which were in great demand in far off places like Singapore. Buchireddipalem, Paturu and Yellapayalem were once important centres of handloom weaving but the industry has declined of late. Kovur and Kodavalur form the chief centres of rice export. From Utukur rice is exported to Madras through the Buckingham Canal by boats. Boat traffic along the Buckingham Canal to some extent has dwindled owing to the competition from the Railway and from Road Transport. Some of the people of Utukur are profitably engaged in salt industry also.

The annual festivals of Sri Kodandaramaswamy of Buchireddipalem and Sri Udayakaleswaraswamy of Gandavaram, Sri Sangameswaraswamy of Sangam and the Kamakshi Thayi and Sri Mallikarjunaswami of Zonnavada villages of this taluk are celebrated by the people with great pomp. Quite a large number of people gather at these places on these festival days.

Kaligiri Reservoir—the present Kaligiri Reservoir also called the Kanigiri Reservoir is one of the biggest irrigation sources in this district with an ayacut of 83,400 acres. It is only an improvement of the old Kaligiri tank, which goes after the name of its founder 'Kaligiri'. The reservoir gets its waters from the anicut constructed across Pennar at Sangam. There is a legend about the formation of this tank, which goes as follows:

About three miles north-west of Buchireddipalem there is a village called Munulapudi. This village got its name because of the existence in the olden times of God-devoted *Munis* (*Rishis* or Ascetics) who were doing penance in the village. In the foreshore of the present Kaligiri Reservoir, there is a large block of highly elevated land covered with thick growth of jungle trees which does not get submerged even in the rainy season and this locality is said to be the place, where the *Munis* (Ascetics) were doing penance. At that time there was a potter by birth named Kaligiri. He was a devotee of God similarly doing penance there. One day an idea struck him that something must be left behind him so that his name might be well remembered. He thought of the construction of a tank for this purpose and felt that some divine help was also required in this connection. He accordingly approached the *Munis* and explained his idea to them and requested them to pray to God to grant him this boon. They said that his desire would be fullfilled and directed him to proceed in the direction he liked to construct the tank and that by God's will the tank bund would be formed. They gave him a strict direction that he should not even under peril of life, turn back. He accordingly started with the idea of forming the grandest tank by joining the hillocks in Vangallu with the Narasimhulu hill in Nellore taluk, south of the Pennar. While he was proceeding, the divine angels were throwing behind him huge rocks creating fearful noise and forming the tank bund. When the man proceeded as far as the site of the present Vavveru village, he could not withstand the noise of the rocks and in violation of the command of the *Munis*, he turned back and instantly lost one of his eyes. He then proceeded again with a strong will. The noise of the rocks again became unbearable. With very great difficulty he proceeded as far as the place called Moolakattala *i.e.*, the place where the present southern channel starts from the reservoir and not being able to withstand the noise of the rocks, he again turned back and perished there. Thus ended the bund of the huge tank, which he thought of constructing and this tank was named Kanigiri after him. There are two main distributaries of the reservoir, namely, the Eastern channel and the Southern channel. The surplus of the reservoir is let out into the sea by means of the natural drains, the Maldevi and the Pyderu. The Pyderu forms also a supply channel to Alluru tank besides being a direct source of irrigation to several villages. This grand Reservoir is overhanging Vavveru village and is incharge of an Assistant Engineer assisted by suitable ancillary staff. There is also telephone connection from the bund to the Executive Engineer's Office at Nellore.

Kovur— a Panchayat, is the headquarters of the taluk by the same name and supports a population of 14,580 persons as per the 1961 Census.

It extends over an area of 8.61 sq. miles and in all it comprises 3,370 occupied residential houses.

The town is at a distance of about 2 miles north of Pennar and is connected by both rail and road. It is a Railway Station on the Madras—Waltair line and the G. N. T. Road passes through the heart of the town. It is also connected by a major district road to Utukur. A Sub-Registrar's Office, a Police Station, a Government Hospital, an Ayurvedic Dispensary, a Veterinary Hospital and a P.W.D. Rest House are located in this town apart from the Co-operative Institutions like the Rural Bank, Marketing Society and Multipurpose Societies. There is a Post Office with telegraph facilities. The town contains seven Elementary Schools, two Higher Elementary Schools and one Higher Secondary School besides a Muslim Girls' School. There are also two Reading Rooms in this town—one maintained by the Local Library Authority and the other by the Panchayat.

Alluru — commonly called Pantala Alluru, a name suggesting the rich crop yield, has a population of 7,141 persons as per the 1961 Census count. The village is situated about 13 miles to the north of Kovur on Rajupalem — Iskapalle road on which buses ply regularly. It extends over an area of 11.65 sq. miles and there are altogether 1,649 occupied residential houses in this village. Agriculture is the major means of livelihood in this village and the total number of agricultural workers of this village is 2 578 persons. Wet paddy is the chief food crop which is extensively raised and irrigation is facilitated by the Alluru tank. The village contains a Sub-Registrar's Office, a Government Hospital, an Ayurvedic Dispensary, one Higher Secondary School, two Higher Elementary Schools and four Elementary Schools. In addition to these it contains Co-operative Institutions like a Co-operative Marketing Society, a Rural Bank and a Multi-purpose Society. There is a choultry in this village which is called the Kotamreddivarisatram, and a Travellers' Bungalow maintained by the P. W. Department. There is a Vishnu temple in the heart of the village which is believed to be in existence from the time of the Chola Kings. A mosque lies by the side of the Rajupalem—Iskapalle road.

Iskapalle— a sea coast village, situated 18 miles south-east of Kovur, has a population of 6,502 persons as per the 1961 Census count. The village extends over an area of 9.77 sq. miles and contains 1,429 occupied residential houses. It is connected with Alluru and Kavali by road on which buses ply regularly. Cultivation is the main occupation of the majority of the population and there are 2,210 Agricultural Workers in this village. Paddy is the chief food crop raised and the Kothapalle—Karugunta tank provides irrigation facilities. There is a Government Salt Factory in this village. The Buckingham Canal passes through this village and affords boat traffic facilities to Madras. The village is at the tail end of the Sangam Project.

Buchireddipalem— also known as 'Buchi', is the largest populated village in the taluk and supports a population of 8,281 persons as per the 1961 Census count. Buchireddipalem is a hamlet of Vavveru but due to its becoming more populous and important it is treated as a separate Census village at the 1961 Census. It was classified as a town at the 1951 Census. Buchireddipalem is called after its founder Buchireddi, the ancestor of the well known Dodla family of the village. The village is situated on the 12th mile on the road leading from Nellore to Dornal. The village covers an area of 11.64 sq. miles and there are altogether 1,795 occupied residential houses. It is well connected by a major district road on which buses ply regularly. There is a Sub-Registrar's Office, a Police Station, a Zilla Parishad High School, a Local Fund Hospital, two Private Hospitals, a Veterinary Hospital, a Panchayat Office and a Post Office with telephone exchange. In addition to these there is a Paddy Research Station in this village known as the Buchireddipalem Research Station and the strains evolved at this station are known as the 'BCP' variety in the State. Paddy is the chief food crop raised and the Kaligiri Reservoir known for its dependability provides irrigation facilities. People in this village celebrate the Kodanda Ramaswamy festival with great pomp and glory in the month of Chaitram (March-April)

Yellayapalem— situated three miles north-west of Kovur town, has a population of a 5,322 persons at the 1961 Census count and the village extends over an area of 6.21 sq. miles. There are altogether 1,224 occupied residential houses in this village. It is accessible by Rajupalem—Buchireddipalem road on which buses ply regularly. This was once an important Handloom Weaving Centre. This industry is on the decline now. The village contains a Panchayat Office, a Branch Post Office, an Panchayat Samithi Elementary School and a Zilla Parishad High School besides a Reading Room maintained by the Panchayat.

Vidavalur — situated on the Kodavalur—Utukur road at a distance of about 5 miles from Kodavalur Railway Station has a population of 5,406 persons. There are altogether 1,262 occupied residential houses in this village. It covers an area of 6.65 sq. miles. Agriculture is the major means of livelihood for the great majority of its population and the total number of agricultural workers of this village is 2,194 persons. Paddy is the chief food crop raised by irrigation provided by canals under the Kaligiri Reservoir. The Maldevi drain flows to the south of the main village site. There is a Siva temple. A Panchayat Office, a Branch Post Office, a Hospital, a Zilla Parishad High School and a Local Fund Rest House are located in this village.

Utukur—a sea coast village, is situated at a distance of about 10 miles from Kodavalur Railway Station. According to the 1961 Census count it supports a population of 5,006 persons and occupies an area of 13.59 sq. miles. It comprises 1,293 occupied residential houses. The village is connected to Kodavalur-Utukur road on which buses ply regularly. It has an Elementary School, a Branch Post Office, a Panchayat Office and a Reading Room. There is also the temple of Sangameswaraswamy in this village. The Pennar Lock over the Buckingham canal lies in this village.

Patur— is situated at a distance of about three miles towards the west of taluk headquarters (Kovur). It is about a mile and a half north of the Nellore-Dornal road and extends over an area of 4.37 sq. miles. It suports a population of 3,007 persons. Like Buchireddipalem and Yellayapalem this village was once an important centre for the manufacture of handloom cloth of superior variety. The Kaligiri Reservoir provides irrigation facilities through a channel. Paddy is the chief food crop raised. There are many vegetable gardens in this village in which brinjals, sweet potatoes and chillies are grown extensively and exported to the Nellore market.

This village is the birth place of the famous poet Tikkana Somayajulu, the author of the major portion of Andhra Mahabharatam in Telugu verse. The descendant of the poet's family still live in this village. The wooden cover of the instrument with which the poet was writing his works on cadjan leaf is still preserved in his house while the instrument proper is said to be reserved in the house of another descendant of the same poet living in Indukurpet village of Nellore taluk. A draw well on the outskirts of the village is said to have been constructed by the famous poet and its water is still held sacred.

Sangam—situated at a distance of 20 miles from Nellore on Nellore—Dornal road has a population of 3,368 persons. It is situated at the foot of the hill and on the north bank of river Pennar. Biraperu from the south joins Pennar at this village. This village forms the western terminus of the taluk. An anicut constructed here across the river Pennar in 1886-87 supplies water to the Kaligiri Reservoir.

There is one ancient Siva temple on the left bank of the Pennar. It is said that the idol was installed by Parasurama. An annual festival is celebrated on the Telugu New Year's day which attracts people from different parts of the district. It is believed that freshes come in Pennar on this day. The 'Dwajasthambham' infront of the temple is a fine rock pillar. The village has a P.W.D. Rest House and two choultries.

Zonnavada—is situated on the left bank of Pennar at a distance of six miles from Nellore. The village is said to have got its name from the *Janam* (sacrifice) performed by Kasyapa Prajapati. It has an ancient Siva temple dedicated to Mallikarjunaswamy and Kamakshamma. The name of Kamakshamma is particularly famous. An annual festival is held in the month of June when people from different parts of the State assemble here with their offerings to the deities. There are two choultries for the use of pilgrims. Agriculture is the main occupation of this village and Kaligiri Reservoir provides irrigation facilities.

Note: 1. Prior to the establishment of Sri Venkateswara University the Colleges in Nellore district were affiliated to Andhra University

2. Due to the introduction of one year P.U.C. and three year Degree Course in place of 2 years Intermediate Course and 2 Year Degree Course from 1957-58 the strength under columns 7 to 10 under P.U.C. has gone down and that under columns 11 to 14 under Degree Course has gone up from 1958-59. The figures shown up to 1956-57 under columns 7 to 10 represent the strength of students studying Intermediate Course. The figures shown against 1957-58 under columns 7 to 10 represent those of P. U.C. and second year Intermediate. The figures shown from 1958-59 on wards under columns 7 to 10 represent those of P.U.C. only

PART III

STATISTICAL TABLES

NELLORE DISTRICT

[TALUKWISE DENSITY OF POPULATION]

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad

EXPLANATORY NOTE

A-SERIES

GENERAL POPULATION TABLES

General Population Tables prepared at the 1961 Census are the basic demographic tables and give information about the total population as recorded at the present census in the District/Taluk/Town, the territorial changes that have occured during the last decade from 1951-61, variation in population during the past six decades, distribution of villages and towns by population sizes and trends of urbanisation in the district. The data are presented under the following four tables.

A-I Area, Houses and Population

A-II Variation in Population during sixty years (1901-61)

A-III Villages classified by population

A-IV Towns (And Town-Groups) Classified by population in 1961 with variation since 1941

All the above Tables pertaining to Nellore district are reproduced in this Hand Book.

TABLE A-I—AREA, HOUSES AND POPULATION

This Table, the basic population Table, gives for the district and for each taluk as well as for each town in the taluk, area in square miles and also in square kilometres, persons per square mile, number of villages inhabited and uninhabited, number of towns, number of Occupied Residential Houses and population by persons, males and females. The figures have been given separately one below the other under Total, Rural and Urban. In this Table as in all other tables, the taluks have been arranged in the order of the Location Code Numbers adopted at the 1961 Census and not in an alphabetical order. For this purpose all the thirteen taluks in the district have been numbered off continuously in a clockwise order starting from the taluk in which the district headquarters is situated *i.e.*, from Nellore taluk as indicated below.

Name of Taluk	*Location Code Number*
Nellore	1
Gudur	2
Sullurpet	3
Venkatagiri	4
Rapur	5
Atmakur	6
Udayagiri	7
Kanigiri	8
Podili	9
Darsi	10
Kandukur	11
Kavali	12
Kovur	13

One of the main changes in the presentation of this Table since the last Census is that the particulars relating to each of the towns in the taluk are also given underneath the concerned taluk besides giving the number of inhabited and uninhabited villages in each taluk.

The district area shown against (x) in column (3a) is that supplied by the Surveyor-General, India. The difference noticed between the area figures furnished by the Surveyor-General, India and the figures given by the State Survey Department shown against (y) is on account of the different methods of computation of areas adopted by the two authorities. The area figures adopted generally for the district and the taluks are as furnished by the State Survey Department and the area figures of each of the towns are as furnished by the Local Authorities concerned and these are exhibited under column (3a). The urban area of each taluk has been worked out by adding the areas of all the urban units in the taluk and the rural area of the taluk is obtained by deducting the urban area of the taluk from the total area of the taluk.

The area in square kilometres under column (3b) is obtained by converting the area given in square miles corrected upto two places of decimals. The area figures for district Total/Rural/Urban, taluk Total/Rural and for each town have been first converted separately. In order to tally the totals of all the taluks with the district total, the converted Total/Rural/Urban area figures of the taluks have been

either added or chopped of, on *prorata* basis according to area ratios of the taluks. The area of each town both in square miles under column (3a) and in square kilometres under column (3b) have been given upto second decimal place while the Total/Rural/Urban areas of the taluks as well as of the district have been given only upto first decimal place.

The density of persons per square mile for the district and for each of the taluks and towns has been worked out according to the area figures exhibited under column (3a).

"Village" referred to in this Table and in all other Tables in this book is the Revenue administrative unit with well defined boundaries. A village having one or more groups of habitations is treated as an inhabited village and a village with no habitations at all is treated as an uninhabited village. The number of inhabited and uninhabited villages in each taluk and in the district are shown under columns 5 and 6 of this Table. In computing the number of villages in a taluk, the villages which are either completely included in an urban unit (town) or hamlets to a main revenue village, are not taken into account. All the revenue villages within the taluk are demarcated and numbered off continuously from North-West to South-East. The number so assigned to each village is the 1961 Census Location Code Number, distinct from the Revenue Survey Number and will be referred to hereafter as the Location Code Number.

"Town" is a place of usually having not less than 5,000 inhabitants, possessing distinct urban characteristics and also satisfying certain criteria prescribed.

For recognition of any place as a town at the present Census it was laid down that it should be either covered by a City Corporation, Municipality or a Cantonment Board or that it should generally satisfy the following criteria.

(i) It should have a minimum population of 5,000;

(ii) The density of population should not be less than 1,000 per square mile; and

(iii) Atleast 3/4ths of the adult male population should be non-agricultural.

The total number of towns in each taluk and in the district is exhibited under column 7 of this Table.

A Census "House" is defined as a structure, or part of a structure inhabited or vacant, a dwelling, a shop, workshop, or a factory, place of business, a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard, leading to a main gate or enjoying a separate entrance. Only houses used wholly or partly for the purpose of residence by one or more households are considered as residential houses and the number of such houses in the Town/Taluk/District have been given in column 8. Houses utilised wholly for purposes other than for residence are not therefore taken into account.

The total population figures, by persons, males and females for the district as well as for each taluk and town have been exhibited separately under columns 9, 10 and 11 in this Table.

Besides the main Table, there are also three Appendices to this Table.

Appendix I: In this Appendix the growth of the district and the taluks to the present area since the last Census has been traced by giving the territorial changes that have taken place during last decade together with the names of the units and the area involved in the changes. The net area gained or lost by each unit is also given in this Appendix.

Appendix II: One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. However, several places with a population of 5,000 and over did not qualify to be treated as towns. This Appendix gives the number of such places with their population. There are no towns with population under 5,000 persons at the 1961 Census in this district.

Appendix III: This Appendix shows the taluk-wise figures for the Houseless Population and the Institutional Population separately. Houseless Population comprises groups of people who have no fixed place of residence and no regular home to live in. Institutional Population represents groups of unrelated persons living and messing together, as in the case of boarding houses, messes *etc.*, under the management of a head of the household appointed either by rules governing the Institution or by common consent of its members. For the purpose of studying different characteristics, Institutional Population is also considered as Household Population.

TABLE A-II—VARIATION IN POPULATION DURING SIXTY YEARS (1901-1961)

This Table compares the population of the district as ascertained at the 1961 Census with the corresponding figures for the six previous Censuses. The figures revealed at the previous Censuses have been adjusted for subsequent territorial changes in order to afford a correct basis for comparison.

As this Table gives the growth of population from decade to decade, these data form the main source for the estimation of population in the absence of reliable Vital Statistics. One of the main changes in the presentation of this Table since the last Census is that the percentage of variation is also given from decade to decade. The variation of males and females from decade to decade has been omitted at the present Census.

During the last decade only a few minor changes in the jurisdiction of this district have taken place. Three villages *viz.*, Krishnapuram, Peddauyyalawada and Chinnauyyalawada were transferred from Ongole taluk of Guntur district and added to Darsi taluk. Kotikalapudi village of Darsi taluk has been transferred to Ongole taluk of Guntur district. Chelamcherla village of Kandukur taluk has been transferred to Kavali taluk.

The Appendix to this Table shows the 1951 population according to the territorial jurisdiction in 1951, changes in area and the population involved in the changes that have taken place during the last decade. The details of transfers of areas in each case together with the names and areas in square miles and the number and the date of Notification of each transfer to the extent available are also given in the foot note.

TABLE A-III—VILLAGES CLASSIFIED BY POPULATION

This Table shows the total number of inhabited villages in the district, arranged on population basis under the following groups:—

Less than 200 population
200 — 499
500 — 999
1,000 — 1,999
2,000 — 4,999
5,000 — 9,999
10,000 and above

The villages which are either uninhabited or wholly included in urban units are not taken into account in this Table. The following statement gives at a glance the break-up of all the inhabited villages of Nellore district classified by population in four broad groups *viz.*

Class Villages with population	*No. of inhabited villages*
Less than 499	573
500 — 1,999	813
2,000 — 4,999	215
5,000 and above	25
Total inhabited villages	1,626

For the definition of "Village" and "Inhabited Village" see Explanatory Note to Table A-I.

TABLE A-IV—TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

This Table shows the growth of each town since 1941. The civic status, area both in Sq. miles and Sq. kilometres, population with sex break-up, decade variation in total population and percentage of decade variation have been given for every town in the district.

For the definition of "Town" see Explanatory Note to Table A-I.

The towns have been classified into six classes according to their population in the 1961 Census as detailed below.

Class	*Limits of Population*
I	100,000 and above
II	50,000 — 99,999
III	20,000 — 49,999
IV	10,000 — 19,999
V	5,000 — 9,999
VI	Less than 5,000

Class I towns with a population 100,000 and above have been treated as cities. The total number of towns under each class in the district at 1961 Census are given below.

Class	*No. of Towns*
I	1
II	Nil
III	2
IV	3
V	3
VI	Nil
Total Towns	9

Three towns *viz.*, Buchireddipalem, Alluru and Udayagiri of 1951 Census have been deleted from the list of towns in the present Census in this district. No new place has been treated as a town for the first time at 1961 Census in this district.

The population of towns at each of the last seven Census years *i. e.*, since 1901 is given in Table A-IV of Part II-A General population Tables of Andhra Pradesh (State Volume). The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

The civic status of every town *i. e.*, whether the town is a Municipality, a Panchayat *etc.*, is indicated after the name of the town in the abbreviated letters M or P, according to the status of the town.

One of the main changes in the presentation of this Table since the last Census is that the area of towns and the percentage of decade variation of the total population of the towns have also been given.

The Appendix to this Table gives the names of towns recognised at the present Census together with the names of villages either fully or partly included *in* them.

Kovur (P) .	U	8.61	22.30	1,693	..	..	1	3,370	14,580	7,407	7,173

Note :— 1. Under columns (3a) and (3b), (x) represents the area figures furnished by Surveyor-General of India, and (y) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the Local authorities. The rural area for a district / taluk is obtained by subtracting the urban area from the total district/taluk area according to the State Survey Department.

2. The Sq. Km. and density figures of urban areas of taluk / district are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the taluk / district totals tally.

3. The following abbreviations have been used for the status of a Town :—

M : Municipality, P : Panchayat

APPENDIX I TO TABLE A-I

Statement showing the 1951 Territorial Units constituting the present set-up of Nellore District and taluks therein and details of net area gain or loss in the changed Territories during the decade 1951–1961

[Only those names areas which have undergone changes since 1951 have been shown in this Appendix.]

(a) (i) Kotikalapudi Village with an area 3.3 Sq. miles of Darsi taluk of this district merged in Ongole taluk of Guntur district *vide* G. O. Ms. No. 2388, Revenue, dated 31-10-1955.

(ii) 3 Villages with an area 3.2 Sq. miles of Ongole taluk of Guntur district were transferred to Darsi Taluk of this district *vide* G. O. Ms. No. 751, Revenue, dated 22-4-1959.

(b) Changes are as enumerated against symbol (a) (i) and (a) (ii).

(c) Chelamcherla Village with an area 20.0 Sq. miles was transferred from Kandukur taluk to Kavali taluk *vide* G. O. Ms. No. 274, Revenue, dated 5-2-1951.

(d) Changes are as enumerated against symbol (c).

Note:-1. Area figures given in columns 2 and 5 are as furnished by the State Survey Department and they represent the jurisdictions prevailing in 1961 and 1951 respectively.

2. The figures given in brackets in columns 5 and 6 represent the difference in area between 1951 and 1961 and the figures in brackets in column 7 show the difference in population between the areas as per the jurisdiction in 1951 and the present jurisdiction.

3. The difference of area in 1951-61 given under columns 5 and 6 of this Appendix does not agree with the area given in column 9 and 10 of Appendix I to Table A-I on account of revised computation.

4. The actual change in area as given against symbol in the footnote in the district taluk boundaries due to jurisdictional change does not agree with the net increase or decrease in the area figures given under columns 5 and 6 in brackets against the district and each taluk. The difference is perhaps due to computational error.

EXPLANATORY NOTE

B-SERIES

ECONOMIC TABLES

The Economic Tables for the 1961 Census are based on the principal work of a person and the concept of dependancy has been abandoned altogether for economic classification. The entire population has been divided into the following nine categories of workers, for broad economic classification based on the National Classification of Industries adopted by the Government and the Non-workers being shown as a separate category.

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

X Non-Workers

The following seventeen Economic Tables, the first nine of which relate to the General Population and the remaining eight relating to a 20% Sample of Households, have been prepared at the present Census.

(I) GENERAL ECONOMIC TABLES

B-I Workers and Non-Workers classified by sex and broad Age-groups

B-II Workers and Non-Workers in cities, town-groups and towns arranged territorially classified by sex and broad Age-groups

B-III *Part A*—Industrial Classification of Workers and Non-Workers by educational levels in *Urban areas only*

Part B—Industrial Classification of Workers and Non-Workers by educational levels in *Rural areas only*

B-IV *Part A*—Industrial Classification by sex and class of Worker of persons at work at Household Industry

Part B—Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service

Part C—Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than Cultivation

B-V Occupational Classification by sex of persons at work other than Cultivation

B-VI Occupational Divisions of persons at work other than Cultivation classified by sex, broad Age-groups and educational levels in *Urban areas only*

B-VII *Part A*—Persons working principally (i) as Cultivators (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer

Part B—Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry.

B-VIII *Part A*—Persons unemployed aged 15 and above by sex, broad Age-groups and educational levels in *Urban areas only*

Part B—Persons unemployed aged 15 and above by sex and educational levels in *Rural areas only*

B-IX Persons not at work classified by sex, broad Age-groups and type of activity

(ii) HOUSEHOLD ECONOMIC TABLES

B-X Sample Households (i) engaged neither in Cultivation nor in Household Industry (ii) engaged either in Cultivation or in Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry

B-XI Sample Households engaged in Cultivation classified by interest in land and size of land cultivated

B-XII Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers

B-XIII Sample Households engaged both in Cultivation and Household Industry, showing size of land cultivated classified by principal Household Industry

B-XIV *Part A*—Households classified by Major Groups of principal Household Industry and number of persons engaged

Part B—Households classified by Minor Groups of principal Household Industry

B-XV Sample Households engaged both in Cultivation and Household Industry classified by size of land

B-XVI Sample principal Household Industry classified by period of working and total number of workers engaged in Household Industry

B-XVII Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (a) neither in Cultivation nor in Household Industry (b) in Household Industry only and (c) in Cultivation Sub-classified by size of land cultivated.

Out of the above seventeen Tables only Tables B-I, B-III, B-IV Part C, B-V, B-VII, B-VIII and B-IX pertaining to the Nellore District are reproduced in this Hand Book.

The Household Economic Tables which are a special feature of this Census and which are prepared on the basis of a 20% sample of the returns in the Household Schedules filled up at the time of enumeration are published in a separate volume entitled "Census of India 1961-Vol. II" Andhra Pradesh-Part III-Household Economic Tables" and may be referred to.

The working population in each of the nine categories of workers and the non-working population is divided by broad Age-groups *viz.*, 0-14, 15-34, 35-59, 60 + and Age not stated in some of these Economic Tables.

TABLE B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table is prepared separately for Total, Rural and Urban population and is a summary Economic Table for the entire district. It gives the distribution of the population by sex among the nine Industrial Categories of Workers and also Non-Workers by the four broad Age-groups 0-14, 15-34, 35-59 and 60+ years. This is the basic Economic Table and the Age-groups correspond to the different stages of life which have special significance with reference to capacity to work *viz.*, children, young persons, middle aged persons and elderly persons. The classification of non-working population is made in other succeeding Tables.

This Table is prepared on the basis of the principal work of a person irrespective of the fact that the person may not be self supporting from the income derived by that work. In the case of persons who are engaged in more than one work, which are also productive activities, the principal work is taken as that one which has been declared by the person himself as the work on which he spends the longest time and not necessarily the work from which he derives the largest income. Thus the stress is on the concept of work and not income or dependancy. The following explanation makes it clear as to who is treated as a Worker.

Workers :

All persons who were engaged in some productive work during any of the 15 days preceding the

day on which enumerated, irrespective of the fact whether they derive any income or not, are treated as Workers. In respect of seasonal work like Cultivation, Livestock, Household Industry etc., if the person had some regular work for more than one hour a day throughout the greater part of the working season, he is recorded as a Worker. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other cause are also treated as Workers. An undertrial prisoner in prison during the Census enumeration is also treated as a Worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however, treated as Workers. Persons under training as apprentices with or without wages are recorded as Workers. Family Workers, *i e.*, who do not directly derive any income but attend to work along with other members of the family are treated as Workers. An adult woman who is engaged mainly in household duties and in no other economically productive work, *i.e.*, a housewife, is not, however, treated as a Worker. Work includes not only actual work but also effective supervision. A public or social service Worker who is actually engaged in public service activity or political activity is taken as a Worker. Thus all workers in any branch of productive work are netted as Workers.

Non-Workers:

All persons who are not Workers, *i.e.*, those falling under the following categories are treated as Non-Workers:

(i) Fulltime students or children attending schools and who do no other work;

(ii) Persons engaged in unpaid home duties such as housewife;

(iii) Any dependant including an infant or child not attending School or a person permanently disabled from work because of illness or old age;

(iv) A retired person who is not employed again, a rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work;

(v) Beggars, vagrants or independent women without indication of source of income and others with unspecified source of existence;

(vi) A convict in jail or an inmate of a penal, mental or charitable institution;

(vii) Unemployed persons seeking employment for the first time;

(viii) Persons employed before but now out of employment and seeking work.

TABLE B-III--INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

This Table is divided into two parts. *Part A* relates to Urban areas and *Part B* relates to Rural areas. The distribution according to different educational levels of each of the nine categories of Workers and also the Non-Workers is given in this Table.

In *Part A* which relates to Urban areas only, the data are given for all the Urban areas of the district put together and also for Nellore City separately by the following educational levels.

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical diploma not equal to degree
Non-technical diploma not equal to degree
University degree or Post-graduate degree other than Technical degree
Technical degree or diploma equal to degree or Post-graduate degree
Engineering
Medicine
Agriculture
Veterinary and Dairying
Technology
Teaching
Others

In *Part B* the data which relate to Rural areas only are given for the district, followed by taluks by the following educational levels.

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation and above

A "*Literate*" is a person who can, with understanding both read and write. He should be able to read any matter in print or manuscript and also be able to write a simple letter. A person who can

neither read nor write or can merely read and cannot write is considered as illiterate. All children aged 4 years and below are treated as illiterates. The test for education is that the person should have passed a recognised written examination or examinations as proof of the educational level attained. The highest examination passed is taken as the level of education.

TABLE B-IV—INDUSTRIAL CLASSIFICATION BY SEX, AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table is divided into three parts.

Part-A shows the Industrial Classification by sex and class of worker of persons at work at Household Industry for Total, Rural and Urban Population. The data are shown first for the Division followed by Major Groups in the order laid down in the Indian Standard Industrial Classification under that Division.

Part-B shows the Industrial Classification by sex and class of worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service for the Total and Urban population. In this part also the data are persented first for the Division followed by the Major Groups in the order laid down in the Indian Standard Industrial Classification.

Part-C shows the Industrial Classification by sex and Divisions, Major Groups and Minor groups of persons at work other than cultivation for Total and Urban population of the district. The data are presented first for the Divisions followed by Major Groups in the order laid down in the Indian Standard Industrial Classification. Under each Major group the corresponding Minor groups are shown.

Only *Part-C* is reproduced in this book upto district level. Minor groups having less than 1% of workers of the respective Divisions (0.5% in the case of Division 2 & 3) are not shown in this Table but shown in the Appendix to this Table.

"*Household Industry*" is an industry conducted by the head of the household himself and / or mainly by members of the household at home or within the village in the Rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory and should relate to production, processing, servicing, repairing or making and selling of goods.

An "*Employer*" is a person who has to employ other persons in order to perform the work. Such a person is not only responsible for his own personal work but also for giving work to others. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An "*Employee*" is a person who usually works under some other person for salary or wages in cash or kind. Persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers are not regarded as employers.

A "*Single Worker*" is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. Single workers also include persons who work in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is recorded as a "Single Worker".

A "*Family Worker*" is a member who works, without receiving wages in cash or kind, in an Industry, Business or Trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Such an Industry, whether run at home or away from home in town or village and even away from village in the Rural areas should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. Members of a family include those drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative. Members of the household who help solely in household duties are not treated as family workers.

Note :—In respect of Household Industry, by the very nature of the participation of the Workers in a Household Industry all the four categories of Workers are not recognised. Only the "employees", if any, in a Household Industry are categorised as such. The rest are clubbed together as "Others".

TABLE B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table shows, for the Total and Urban Population, the Occupational Classification of persons working in Non-Agricultural occupations. The data are presented first for the Division followed by the Occupational Groups in the order of the National Classification of Occupations. Under each Group the detailed Occupational Families are shown. Occupational Families, accounting for less than 1% of the Workers of the respective Divisions (less than 0.5% in cases of Families under Division 7-8) are not given in this Table, but shown in the Appendix to this Table. The particulars for the district are given down to the Occupational Family, while the talukwise and City particulars are given upto Division level only.

The Occupational Classification given in this Table is quite distinct from the Industrial Classification presented in Table B-IV Part C. Occupational Classification relates to the actual work a person does irrespective of the Industry in which he is engaged; *e.g.*, a person who is a clerical worker for Occupational Classification may be connected with Industry, Trade or Service. Conversely in the same Industrial Category there may be persons following different Occupations as, technicians, managerial workers, clerical workers, watch and ward etc., Therefore in this table under each Occupational Division, Group and Family the broad Industrial Category of the worker is also given.

TABLE B-VII—*PART A*-PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

PART 'B-INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This Table is divided into two parts:

Part-A shows the persons working principally as Cultivators, or as Agricultural Labourers, or at Household Industry and who have secondary work in the other two alternatives from among Household Industry or Cultivation or Agricultural Labour. The data for the district are given for Total, Rural and Urban population by Industrial Divisions and Major Groups. For the taluk, however, the particulars are given for Rural population and by Divisions only. Particulars for Nellore City are also presented separately.

Part-B shows the persons working principally in Non-Household Industry, Trade, Business, Profession or Service and also engaged at Household Industry as secondary work by Industrial Divisions and Major Groups. The data for the district are presented for the Total, Rural and Urban population by Divisions followed by the Major Groups of that Division. The talukwise data are presented only for Rural population and Nellore City data for its Urban population by Industrial Divisions only.

TABLE B-VIII—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS

This Table shows the distribution of persons unemployed aged 15 and above by sex and educational levels for Urban and Rural areas separately in two parts.

In *Part-A*, which gives data relating to all the Urban areas of the district taken together and separately for Nellore City, the unemployed have been sub-divided into two classes, *viz.*, (i) Persons seeking employment for the first time and (ii) Persons employed before but now out of employment and seeking employment and the data have been given by broad Age-groups and by educational levels. The first class of unemployed are divided into the Age-groups 15–19, 20–24, 25–29, 30–34, 35+ and Age not stated and the second class into the Age groups 15–19, 20–24, 25–34, 35–44, 45–59, 60+ and Age not stated.

Part B relates to Rural areas. The data in this part are given talukwise by educational levels. The data in this Table are not, however, given by Age-groups.

TABLE B-IX—PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This Table shows for the Total, Rural and Urban population, the persons not at work classified by sex, broad Age-groups and type of activity. The Non-workers are divided into eight categories

according to their activities *viz.*, (i) Fulltime students; (ii) those attending only to Household duties; (iii) Dependants, infants and disabled; (iv) Retired persons, Rentiers or persons of independent means; (v) Beggars, vagrants, etc., (vi) Inmates of penal, mental and charitable institutions; (vii) Persons seeking employment for the first time; and (viii) persons employed before but now out of employment and seeking work according to their activities. These eight categories are based on the recommendations of the United Nations. This Table provides information about those who have an income without working, about housewives, about school going children, besides other types of non-working population. The data for the district are presented for Total, Rural and Urban population. The talukwise data are, however, presented for the Rural population only. The data for Nellore City are also presented separately.

A total number of 310 males and 2 females have been returned as fulltime students in the Age-group 35–59 in this district. These elderly persons might be pursuing advanced studies in religion such as Christian missionary trainees, or in Vedas, Music or other Fine Arts etc., and hence classified as fulltime students.

A complete classification list giving the description of the Divisions, Major Groups and Minor Groups is given below for guidance. In the Tables B-IV Part C and B-VII Part B only the number of the Division, Major Group or Minor Group is shown. The description of the Industry, Business, or Service concerned can be found from the list below.

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The Divisions and Major Groups with their Code Numbers are listed below.

Divisions

0 *AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING*

1 *MINING AND QUARRYING*

2 & 3 *MANUFACTURING*

4 *CONSTRUCTION*

5 *ELECTRICITY, GAS, WATER AND SANITARY SERVICES*

6 *TRADE AND COMMERCE*

7 *TRANSPORT, STORAGE AND COMMUNICATIONS*

8 *SERVICES*

9 *ACTIVITIES NOT ADEQUATELY DESCRIBED*

Major Groups

DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

00 Field produce and Plantation crops

01 Plantation crops

02 Forestry and Logging

03 Fishing

04 Livestock and Hunting

DIVISION 1—MINING AND QUARRYING

10 Mining and Quarrying

DIVISION 2 & 3—MANUFACTURING

20 Foodstuffs

21 Beverages

22 Tobacco products

23 Textile—Cotton

24 Textile—Jute

25 Textile—Wool

26 Textile—Silk

27 Textile—Miscellaneous

28 Manufacture of Wood and Wooden products

29 Paper and Paper products

30 Printing and Publishing

31 Leather and Leather products

32 Rubber, Petroleum and Coal products

33 Chemicals and Chemical products

34–35 Non-Metallic Mineral products other than Petroleum and Coal

36 Basic Metals and their products except Machinery and Transport equipment

37 Machinery (all kinds other than Transport) and Electrical equipment

38 Transport Equipment

39 Miscellaneous Manufacturing Industries

DIVISION 4—CONSTRUCTION

40 Construction

DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES

50 Electricity and Gas

51 Water supply and Sanitary services

DIVISION 6—TRADE AND COMMERCE

60-63 Wholesale Trade

64-68 Retail Trade

69 Trade and Commerce Miscellaneous

DIVISION 7—TRANSPORT, STORAGE AND COMMUNICATIONS

70-71 Transport

72 Storage and Warehousing

73 Communications

DIVISION 8—SERVICES

80 Public Services

81 Educational and Scientific Services

82 Medical and Health Services

83 Religious and Welfare Services

84 Legal Services

85 Business Services

86 Community Services and Trade and Labour Associations

87 Recreation Services

88 Personal Services

89 Services (not elsewhere classified)

DIVISION 9—ACTIVITIES NOT ADEQUATELY DESCRIBED

90 Activities unspecified and not adequately described.

Classification and Code numbers at the 3 digit level in respect of Minor Groups are given below.

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups

Major Group (Code)	Description	*Minor Group (Code)*
	DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING	
00	Field Produce and Plantation crops	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	*000*
	Production of pulses, such as arhar, moong, masur, urd, khesari, other Gram	*001*
	Production of raw jute and kindred fibre crops	*002*
	Production of raw cotton and kindred fibre crops	*003*
	Production of oilseeds, sugarcane and other cash crops	*004*
	Production of other crops (including vegetables) not covered above	*005*
	Production of fruits and nuts in plantation, vines and orchards	*006*
	Production of wood, bamboo, cane reeds, thatching grass etc.	*007*
	Production of juice by tapping palms	*008*
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	*009*
01	Plantation Crops	
	Production of tea in plantation	*010*
	Production of coffee in plantation	*011*
	Production of rubber in plantation	*012*
	Production of tobacco in plantation	*013*
	Production of ganja, cinchona, opium	*014*
	Production of other plantation crops not covered above	*015*
02	Forestry and Logging	
	Planting, replanting and conservation of forests	*020*
	Felling and cutting of trees and transportation of logs	*021*
	Preparation of timber	*022*
	Production of fuel including charcoal by exploitation of forest	*023*
	Production of fodder by exploitation of forests	*024*
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	*025*
	Production and gathering of other forest products not covered above	*026*

Major Group (Code)	Description	Minor Group (Code)
03	Fishing	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and hunting	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
DIVISION 1— MINING AND QUARRYING		
10	Mining and Quarrying	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
10	Mining and Quarrying—*Concld.*	
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
DIVISION 2 & 3—MANUFACTURING		
20	Foodstuffs	
	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and food-grains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210

Major Group (Code)	Description	Minor Group (Code)
21	Beverages—*Concld.*	
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	Textile—Cotton	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	Textile—Jute	
	Jute pressing and baling	240
	Jute spinning and weaving	241
24	Textile—Jute—*Concld.*	
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk	
	Spinning and weaving of silk textile in mills	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275

Major Group (Code)	Description	Minor Group (Code)
27	Textile—Miscellaneous—*Concld.*	
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and Paper Products	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325

Major Group (Code)	Description	Minor Group (Code)
32	Rubber, Petroleum and Coal Products—*Concld.*	
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34-35	Non-metallic Mineral Products other than Petroleum and Coal	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
34-35	Non-metallic Mineral Products etc.—*Concld.*	
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by Code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their Products except Machinery and Transport Equipment	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products	368

Major Group (Code)	Description	Minor Group (Code)
36	Basic Metals and their Products except Machinery and Transport Equipment—*Concld.*	
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39) . . .	369
37	Machinery (All kinds other than Transport) and Electrical Equipment	
	Manufacture and assembling of machinery (other than electrical) except textile machinery . .	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors . .	371
	Manufacture of machine tools .	372
	Manufacture of textile machinery and accessories . .	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers .	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables . . .	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone .	378
	Manufacture of electric machinery and apparatus, appliances not specified above . . .	379
38	Transport equipment	
	Manufacture, assembling and repairing of locomotives . . .	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363 . . .	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines) . . .	382
38	Transport equipment—*Concld.*	
	Manufacture of motor vehicles engines parts and accessories . .	383
	Repairing and servicing of motor vehicles . . .	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear . . .	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines .	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines . . .	387
	Repairing of bicycles and tricycles .	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles	389
39	Miscellaneous Manufacturing Industries	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies .	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies . .	391
	Assembling and repairing of watches and clocks . . .	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals . .	393
	Manufacture and tuning of musical instruments . . .	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen . .	395
	Manufacture of sports goods .	396
	Manufacture and repair work of goods not assignable to any other group .	399
DIVISION 4—CONSTRUCTION		
40	Construction	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations .	400

Major Group (Code)	Description	Minor Group (Code)
40	Construction—*Concld.*	
	Construction and maintenance of roads, railways, bridges, tunnels	*401*
	Construction and maintenance of telegraph and telephone lines	*402*
	Construction and maintenance of water-ways and water reservoirs such as bund embankments, dam, canal, tank, tubewells, wells	*403*
	DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES	
50	Electricity and Gas	
	Generation and transmission of electric energy	*500*
	Distribution of electric energy	*501*
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	*502*
51	Water Supply and Sanitary Services	
	Collection, purification and distribution of water to domestic and industrial consumers	*510*
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	*511*
	DIVISION 6—TRADE AND COMMERCE	
60-63	Wholesale Trade	
	Wholesale trading in cereals and pulses	*600*
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuffs (not covered elsewhere)	*601*
	Wholesale trading in all kinds of fabrics, and textile products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	*602*
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	*603*
	Wholesale trading in intoxicants such as wines, liquors	*604*
	Wholesale trading in other intoxicants such as opium, ganja, etc.	*605*

Major Group (Code)	Description	Minor Group (Code)
60-63	Wholesale Trade—*Contd.*	
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	*606*
	Wholesale trading in animals	*607*
	Wholesale trading in straw and fodder	*608*
	Wholesale trading in medicines and chemicals	*610*
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	*611*
	Wholesale trading in toilets, perfumery and cosmetics	*612*
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	*613*
	Wholesale trading in wooden, steel and other metallic furniture and fittings	*614*
	Wholesale trading in footwear	*615*
	Wholesale trading in tyres, tubes and allied rubber products	*616*
	Wholesale trading in petrol, mobil oil and allied products	*617*
	Wholesale trading in other household equipment not covered above	*618*
	Wholesale trading in bricks, tiles and other building materials	*620*
	Wholesale trading in wood, bamboo, cane, thatches and similar products	*621*
	Wholesale trading in paper and other stationery goods	*630*
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	*631*
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	*632*
	Wholesale trading in all kinds of transport and storage equipment	*633*
	Wholesale trading in skins, leather and fur	*634*
	Wholesale trading in clocks, eye glasses, frames	*635*
	Wholesale trading in hardware and sanitary equipments	*636*

Major Group (Code)	Description	Minor Group (Code)
60–63	Wholesale Trade—*Concld.*	
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64–68	Retail Trade	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641

	Retail trading in straw and fodder	648
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobil oil and allied products	655
	Retail trading in wooden, steel and other metallic furniture and fittings	660

Major Group (Code)	Description	Minor Group (Code)
64–68	Retail Trade—*Concld.*	
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail Trading in electrical goods like electric fan, bulb etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	Trade and Commerce Miscellaneous	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending(indigenous)	694

Major Group (Code)	Description	*Minor Group (Code)*
69	Trade and Commerce Miscellaneous—*Concld.*	
	Banking and similar type of financial operation	*695*
	Auctioneering	*696*
	Distribution of motion pictures	*697*
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw etc.	*699*
	DIVISION 7–TRANSPORT, STORAGE AND COMMUNICATIONS	
70–71	Transport	
	Transporting by railways	*700*
	Transporting by tramway and bus service	*701*
	Transporting by motor vehicles (other than omnibus)	*702*
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	*703*
	Transporting by animals such as horse, elephant, mule, camel	*704*
	Trasporting by man such as carrying of luggage, hand cart driving, rick-shaw pulling, cycle rickshaw driving	*705*
	Transporting by boat, steamer, ferry etc., by river, canal	*706*
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	*707*
	Transporting by air	*708*
	Transporting by other means not covered above	*709*
	Services incidental to transport such as packing, carting travel agency	*710*
72	Storage and Ware Housing	
	Operation of storage such as ware-houses	*720*
	Operation of storage such as cold storage	*721*
	Operation of storage of other type	*722*
73	Communications	
	Postal, telegraphic, wireless and signal communications	*730*
	Telephone communications	*731*
	Information and broadcasting	*732*
	DIVISION 8—SERVICES	
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public Services in Union and State army including territorial corps and volunteer corps	*800*
	Public service in Navy	*801*
	Public service in Air Force	*802*
	Public service in Police	*803*
	Public services in administrative departments and offices of Central Government	*804*
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	*805*
	Public services in administrative departments and offices of State Governments	*809*
81	Educational and Scientific Services	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	*810*
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	*811*
	Scientific services and research institutions not capable of classification under any individual group	*812*

Major Group (Code)	Description	Minor (Group) (Code)
82	Medical and Health Services	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	Religious and Welfare Services	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities; this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	Legal Services	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	Business Services	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, bookkeepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
85	Business Services—*Concld.*	
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853

EXPLANATORY NOTE

C-SERIES

SOCIAL AND CULTURAL TABLES

Social and Cultural Tables prepared at the 1961 Census give information relating to composition of Sample Households, Age, Sex, Marital Status, Education, Mother-Tongue, Bilingualism and Religion of general population and also about Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers. The data are presented in eight Tables as indicated below:

C-I Composition of Sample Households by relationship to head of family classified by size of land cultivated

C-II Age and Marital Status

C-III Age, Sex and Education

Part A—All areas

Part B—Urban areas

Part C—Rural areas

C-IV Single year age Returns

C-V Mother-Tongue (in alphabetical order)

C-VI Bilingualism

C-VII Religion

C-VIII Scheduled Castes and Scheduled Tribes classified by Literacy and Industrial Category of Workers

Part A—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

All the above Tables pertaining to Nellore district except Tables C-IV-Single Year Age Returns and C-VI-Bilingualism are reproduced in this book.

TABLE C-I-COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

This Table, prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration, gives the composition of Households, separately for Total, Rural and Urban areas in the district. The Households in the Rural areas are further classified into three Economic Categories *viz.*, (i) Households engaged neither in Cultivation nor in Household Industry, (ii) Households engaged in Household Industry only and (iii) Households engaged in Cultivation. In respect of the third category of Households the data are furnished separately for each of the eleven classes of Households according to the size of land cultivated *viz.*, (i) Less than one acre, (ii) 1.0-2.4 acres, (iii) 2.5-4.9 acres, (iv) 5.0-7.4 acres, (v) 7.5-9.9 acres, (vi) 10.0-12.4 acres, (vii) 12.5-14.9 acres, (viii) 15.0-29.9 acres, (ix) 30.0-49.9 acres, (x) 50.0+ acres and (xi) Size of holding unspecified. The composition of the Households is given in terms of the heads of Households, spouses of heads of Households, married sons and other married relations, other relations and unrelated persons. This Table will thus indicate the strength of the joint family system and will therefore be of sociological interest.

TABLE C-II-AGE AND MARITAL STATUS

This Table prepared on full count gives the distribution of population both by Age-groups and Marital Status separately for Total, Rural and Urban population in the district, for the Rural population in each of the taluks and for Nellore City. This is a very important demographic table. A comparison of the data in this Table with corresponding data pertaining to the last Census will give an indication of mortality in different Marital Status and also in different Age-groups. The Age-groups, *viz.*, 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and Age not stated adopted in this Table conform to international requirements. Age-group 0-9 is automatically treated as 'Never Married' for the purpose of this Table. The proportion of increase or decrease in the various Marital Status since the last Census and the trends in the age at marriage can be studied from this Table. From the data on married females by Age-groups given under column 9 of this Table the future birth rates can also be forecast.

TABLE C-III-AGE, SEX AND EDUCATION

This Table gives the distribution of Total population by broad Educational levels, Sex and by broad Age-groups. This Table is divided into three parts.

Part A relates to all areas while *Part B* and *Part C* relate only to Urban and Rural areas respectively. The educational levels given for all areas and Rural areas in *Part A* and *Part C* are the same while in respect of Urban areas in *Part B* more detailed educational levels have been adopted. These educational levels are the same as those adopted in Table B-III for the Industrial Classification of Workers and Non-Workers by educational levels. This Table is useful in ascertaining the growth of literacy in the total population as well as in the different Age-groups since the last Census.

TABLE C-V—MOTHER-TONGUE

This Table exhibits separately for the Total, Rural and Urban population of the district and only for the Rural population of each taluk and for Nellore City, the number of persons, males and females speaking a particular language as Mother-Tongue. The languages returned at this Census are given in an alphabetical order.

'Mother-Tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the Household. If the mother died in infancy then the language mostly spoken in the Household is the Mother-Tongue. In the case of infants and deaf mutes the Mother-Tongue is the language usually spoken by the mother.

This Table is very important in view of the large number of languages and dialects spoken in the country and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the Constitution.

TABLE C-VII—RELIGION

This Table gives separately the distribution of Total, Rural and Urban population of the district, Rural population only of taluks and of Nellore City according to Religion. In Censuses earlier to 1941 the practice was to show the distribution of population Religion-wise down to the village level. Since the 1951 Census this practice has been discontinued.

TABLE C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

Part A—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

This is a general Table prepared for Scheduled Castes and Scheduled Tribes only and gives separately, the total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and by classification of Workers into different Industrial Categories and the total number of Non-Workers. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This is the first time that the number of literates amongst the Scheduled Castes and Scheduled Tribes are given separately. In addition to this Table some more Special Tables for Scheduled Castes and Scheduled Tribes pertaining to Nellore district have also been prepared and incorporated in this book under the series "SCT-TABLES".

EXPLANATORY NOTE

D-SERIES

MIGRATION TABLES

The Tables in this series show the migration trends analysed on the basis of the results of the 1961 Census. The data are presented in the following six Tables, which are reproduced upto district level and for all Cities and Town-Groups in the Publication "Census of India 1961-Volume II Andhra Pradesh—Part II-C-Cultural and Migration Tables" and these may be referred to for details.

D-I Non-Indian Nationals

D-II Place of Birth

D-III Migrants classified by place of birth and duration of residence in place of enumeration

D-IV Migrants to Cities classified by Sex, broad Age-groups, Educational levels and in case of Workers also by occupational Divisions and Groups

D-V Cities showing population born locally, migrants from Rural areas and migrants from other Towns and Cities

D-VI Distribution of Industrial categories of Workers and Non-Workers by place of birth

In this Handbook only Tables D-I and D-II showing the Non-Indian Nationals and other migrants in Nellore district are reproduced.

TABLE D-I—NON-INDIAN NATIONALS

This Table shows the number of Non-Indian Nationals sex-wise in the district. The Non-Indian Nationals for the purpose of presentation of the data have been broadly classified into five groups *viz.*,

(i) Nationals of Countries in Asia beyond India (including U. S. S. R.)

(ii) Nationals of Countries in Europe (excluding U. S. S. R.)

(iii) Nationals of Countries in Africa

(iv) Nationals of Countries in two Americas

(v) Nationals of Countries in Oceania

The name of the country of which the person is a National is given separately under each group. The persons who have not recorded any Nationality have been shown separately. Nationals of Goa, Diu, Daman and Pondicherry have been treated as 'Born in India'.

TABLE D-II—PLACE OF BIRTH

This Table, prepared as in all previous Censuses, gives the distribution of population by birth place. The data are presented both by the place of enumeration and by the place of birth classified separately into Rural and Urban areas. An important change in the presentation of the data at the present Census is that the place of birth has been classified separately as Rural and Urban. This two fold representation of the data enables one to study the migration trends not only within the district and from outside the district but also from Rural to Urban areas and *vice-versa*.

EXPLANATORY NOTE

E-SERIES

HOUSING TABLES

The Tables in this Series give information on Housing. At the present Census when House numbering was done a few months before the general Census enumeration, the various particulars relating to each Census House were collected on a standardised All India Schedule called the 'House List' which is reproduced below :

CENSUS OF INDIA, 1961

HOUSE LIST

Name of District.....(Code No.....)

Name of Island/Taluk Tehsil/Thana/Anchal/Town.....(Code No.....)

Name of Village/Ward Mohalla/Enumerator's Block.....(Code No.....)

Line No.	Building number (Municipal or local authority or Census Number, if any)	Building number (Col.2) with sub-numbers for each Census House	Purpose for which Census House used, *e g.*, dwelling, shop, shop-*cum*-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel etc.	If the Census House is used as an establishment, workshop or factory			
				Name of establishment or proprietor	Name of product (s), repair or servicing undertaken	Average No. of persons employed daily last week (including proprietor, or household members, if working)	Kind of fuel or power if machinery is used
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Description of Census House		Sub-number of each Census Household, with Census House number (Column 3)	Name of head of Household	No. of rooms in Census Household	Does the Household live in own or rented house? (a) Own (O), (b) Rented (R)	No. of persons residing in Census Household on day of visit			Remarks
Material of wall	Material of roof					Males	Females	Total	
(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)	(18)

The data have been collected uniformly for the first time at the present Census in the above form and are presented in the following five Tables.

E-I Census Houses and the uses to which they are put

E-II Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwellings

E-III Census Houses used as factories and workshops classified by Industry, *power* and *no power* used and size of employment

E-IV Distribution of Sample Households living in Census Houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof

E-V Sample Households classified by number of members and by number of rooms occupied.

All the above Tables givei nformation upto taluk level, (except Table E-III whichcon tains figures upto the district level only), and also in respect of towns having a population of 50,000 and more and are reproduced in the publication "Census of India, 1961, Vol-II-Andhra Pradesh-Part IV-B-Housing and Establishment Tables" and it may be referred to for full details. In this Hand Book only "Table E-I-Census Houses and the uses to which they are put" pertaining to Nellore district is reproduced.

TABLE E-I CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This Table shows the number of Census Houses and the different uses to which they are put. The data are given down to taluk level and also for towns having a population of 50,000 and more; the data are presented separately for Total, Rural and Urban areas.

"*Census House*" is defined in the present Census as a structure, or a part of a structure inhabited or vacant, or a dwelling, or a shop-*cum*-dwelling or a place of business, workshop, school, etc., with a separate entrance. If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase, or a common courtyard, leading to a main gate, they are considered as separate Census Houses. If within an enclosed or open compound there are separate buildings then each such building is treated as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with separate entrance is treated as a separate Census House.

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

District/Taluk/ Town with population of 50,000 or more	Total Rural Urban	Total No. of Census Houses	Census Houses vacant at the time of House-listing	Occupied Census Houses used as: Dwellings	Shop-cum-dwellings	Workshop-cum-dwellings	Hotels, sarais, dharmshalas, tourist homes and inspection houses	Shops excluding eating houses	Business houses and offices	Factories, workshops and worksheds	Schools and other Educational Institutions including training classes, coaching and shop classes	Restaurants, sweetmeat shops and eating places	Places of entertainment and community gathering (Panchayat Ghar)	Public Health and Medical institutions, Hospitals, Health Centres, Doctors' Clinics, Dispensaries etc.	Others

EXPLANATORY NOTE

SCT-SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This series of Special Tables for Scheduled Castes and Scheduled Tribes gives the population of each Scheduled Caste and Scheduled Tribe classified by Religion, Age, Marital Status, Education and distributed by Industrial Categories adopted in Table B-I. After the 1931 Census, the population figures of individual Scheduled Castes and Scheduled Tribes are being given only at the present Census. The data are presented in the following five Tables :

SCT-I Industrial classification of persons at Work and Non-Workers by sex for Scheduled Castes and Scheduled Tribes

SCT-II Age and Marital status for Scheduled Castes and Scheduled Tribes

SCT-III Education in Urban and Rural areas for Scheduled Castes and Scheduled Tribes

SCT-IV Religion for Scheduled Castes and Scheduled Tribes

SCT-V Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in *Rural areas only* for Scheduled Castes and Scheduled Tribes

All the above Tables except Table SCT-IV are reproduced upto district level in this book.

Besides the above five Tables, the following three Special Tables, relating to either Scheduled Castes or Scheduled Tribes exclusively are reproduced.

SC-I Persons not at work classified by sex, type of activity and educational levels for *Scheduled Castes only*

ST-I Mother-Tongue and Bilingualism for *Scheduled Tribes*

ST-II Persons not at work classified by sex and type of activity for *Scheduled Tribes*

These three Special Tables are also reproduced upto district level. The figures for all the taluks are also given in this book in respect of Scheduled Castes and in the case of Scheduled Tribes figures are given for the seven taluks in which their proportion is higher than the State average.

In view of the safeguards provided in the Constitution for these communities, the Tables in this series will be of much use and guidance, especially when the Government are taking measures for the improvement of the condition of these communities by suitable welfare schemes under the Five Year Plans. The total Scheduled Castes and Scheduled Tribes population is given talukwise separately for Total, Rural and Urban areas and for each Town under the State Primary Census Abstract. The villagewise particulars are given under Village Directory.

The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the Notification of the Ministry of Home Affairs, New Delhi, dated 29th October 1956. The list of Scheduled Castes in Andhra Pradesh is given below:

Note : Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions such as Christianity or Islam or Buddhism cease to belong to these castes.

(1) Throughout the State :

1 Chalavadi
2 Chamar, Mochi or Muchi
3 Madiga
4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts.

1 Adi Andhra
2 Adi Dravida
3 Arundhatiya
4 Bariki
5 Bavuri
6 Chachati
7 Chandala
8 Dandasi
9 Dom, Dombara, Paidi or Pano
10 Ghasi, Haddi or Relli Chachandi
11 Godagali
12 Godari
13 Gosangi
14 Jaggali

15 Jambuvulu
16 Madasi Kuruva or Madari Kuruva
17 Mala Dasu
18 Madiga Dasu and Mashteen
19 Matangi
20 Mundala
21 Paky or Moti
22 Pambada or Pambanda
23 Pamidi
24 Panchama or Pariah
25 Relli
26 Samban
27 Sapru
28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda :

1 Anamuk
2 Aray (Mala)
3 Arwa Mala
4 Beda (Budga) Jangam
5 Bindla
6 Byagara
7 Chambhar
8 Dakkal (Dokkalwar)
9 Dhor
10 Ellamalwar (Yellammalawandlu)
11 Holeya
12 Holeya Dasari
13 Kolupulvandlu
14 Mahar
15 Mala Dasari
16 Mala Hannai
17 Mala Jangam
18 Mala Masti
19 Mala Sale (Netkani)
20 Mala Sanyasi
21 Mang
22 Mang Garodi
23 Manne
24 Mashti
25 Mehtar
26 Mitha Ayyalvar
27 Samagara
28 Sindhollu (Chindollu)

The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule III of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the same Notification of the Ministry of Home Affairs, New Delhi, dated 29th October 1956. The list of Scheduled Tribes in Andhra Pradesh is given below :

Note : Members of Scheduled Tribes may belong to any Religion.

(1) Throughout the State :

1 Chenchu or Chenchwar
2 Koya or Goud with its sub-sects Rajah or Rasha Koyas, Lingadhari Koyas (Ordinary), Kottu Koyas, Bhine Koya and Rajkoya

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts :

1 Bagata
2 Gadabas
3 Jatapus
4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Kondareddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity Kondhs
10 Kotia-Bentho-Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 Reddi Dhoras
17 Rona, Rena
18 Savaras-Kapu Savaras, Maliya Savaras or Khutto Savaras
19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

(3) In the Districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam, and Nalgonda:

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (iucluding Mannervarlu)
6 Pardhan
7 Thoti

(4) In the Agency tracts :

1 Goudu (Goud)
2 Nayaks
3 Valmiki

As would be clear from the Tables, not all the above Castes and Tribes, will be found in all the taluks of the district.

An abstract of the total Scheduled Castes and Scheduled Tribes population in Nellore district and its percentage to the total general population is given talukwise in the statement below :

Name of the District/Taluk	Total Rural Urban	General Population	Scheduled Castes population together with percentage to General population	Scheduled Tribes population together with percentage to General population
(1)	(2)	(3)	(4)	(5)

TABLE SCT-I INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for the Rural and Urban areas of the district, the population of each Scheduled Caste and Scheduled Tribe classified by Industrial Category of persons at work and Non-workers by sex. The Table is divided into two parts. *Part A* relates to Scheduled Castes while *Part B* relates to Scheduled Tribes. This Table is important as it gives the strength of each of the Scheduled Castes and Scheduled Tribes, the working population among them and the sector of Industry in which the working population is engaged. The data are presented for the Rural and Urban areas separately.

TABLE SCT-II AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for each Scheduled Caste and Scheduled Tribe the total population by Age and Marital status. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This Table corresponds to Table C-II for the total population; however, the Age-groups are restricted to 0-14, 15-44, 45+ and Age not stated only in both the parts of this Table. This Table enables us to know the percentage of each of the Scheduled Castes and Scheduled Tribes to the total population in the corresponding Age-group. Such communitywise data by Age and Marital Status for Scheduled Castes and Scheduled Tribes are being given for the first time at the present Census. The Age distribution and Marital Status data will give an indication as to whether the population of a Caste/Tribe is growing or declining.

TABLE SCT-III EDUCATION IN RURAL AND URBAN AREAS ONLY FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows the literacy and educational levels for each Scheduled Caste and Scheduled

Tribe separately for Rural and Urban areas. This Table is divided into *Part A(i)* and *Part A(ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Urban areas and *Part B(i)* and *Part B(ii)* relating to Scheduled Castes and Scheduled Tribes respectively in Rural areas. In the case of Urban areas the educational levels adopted for giving the data are the same as those adopted in Table B-III *Part A* and in the case of Rural areas the data are given as in Table B-III *Part B.* This Table, therefore, enables us to know the proportion of each of the Scheduled Castes and Scheduled Tribes among the total population in different literacy and educational levels.

TABLE SCT-V SAMPLE HOUSEHOLDS OF SCHEDULED CASTES AND SCHEDULED TRIBES ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED *IN RURAL AREAS ONLY*

This Table shows the sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only, separately for Scheduled Castes and Scheduled Tribes. The Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. The sizes of landholdings and types of interest in land cultivated adopted in this Table are the same as those adopted in Table B-XI.

TABLE SC-I PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS *FOR SCHEDULED CASTES*

This Table shows persons belonging to the Scheduled Castes not at work classified by sex, type of activity *viz.*, fulltime students, persons seeking employment for the first time, persons employed before but now out of employment and seeking work and others, by educational levels. The broad educational levels adopted in this Table are illiterate, literate (without educational level), Primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary. This Table is prepared for total Scheduled Castes as a whole and not separately for each individual caste and the figures are exhibited for Total, Rural and Urban population. This Table will be very useful as it clearly illustrates the extent to which the Scheduled Caste children have taken to education and it also helps to plan employment for the unemployed members of the Scheduled Castes.

This Table has also been prepared for Rural areas of all Taluks in the district as the percentage of Scheduled Castes population in the Rural areas of most of the Taluks in the district exceeds the State's average proportion of 14.88%

TABLE ST-I MOTHER-TONGUE AND BILINGUALISM *FOR SCHEDULED TRIBES*

This Table shows exclusively the Scheduled Tribes classified by Mother-Tongue and subsidiary languages spoken by them. The data are given for the Total, Rural and Urban areas in the district and for the Rual areas of Nellore, Gudur, Sullurpet, Venkatagiri, Rapur, Kavali and Kovur Taluks as the percentage of the Scheduled Tribes population to total population in the Rural areas of these Taluks exceeds the State average of 4.27%. The Scheduled Tribes have their own peculiar languages and dialects and this Table gives the language or dialect of each Tribe. In respect of the members of the Scheduled Tribes who have moved out of their homes and as a result of contact with the local population speak some other languages also, those subsidiary languages are also shown in this Table. The number of male and female speakers of the subsidiary languages is indicated in brackets after the subsidiary language under column 7 of the Table.

TABLE ST-II PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY *FOR SCHEDULED TRIBES*

This Table shows for the district the persons not at work classified by sex and type of activity for each individual Scheduled Tribe. The types of activity under which the persons not at work are classified are the same as those adopted in Table SC-I *viz.*, fulltime students, persons seeking employment for the first time, persons employed before but now out of employment and seeking work and others. In this Table the particulars are given according to the individual Tribe while in Table SC-I similar particulars in respect of Scheduled Castes are given for Total Scheduled Castes as a whole by educational levels. The present Table, however, shows the number of unemployed persons in each individual Tribe without reference to the literacy levels.

The data in this Table are presented for the Total, Rural and Urban areas of the district and also for the Rural areas of Nellore, Gudur, Sullurpet, Venkatagiri, Rapur, Kavali and Kovur taluks as the percentage of the Scheduled Tribe population to Total population in the Rural portion of these Taluks exceeds the State average of 4.27%.

TABLE SCT-I Part A

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX *FOR SCHEDULED CASTES*

PART IV

VILLAGE AND TOWN DIRECTORY

EXPLANATORY NOTE

VILLAGE AND TOWN DIRECTORY

This Directory renders an account of each Village, as also each Ward and each Enumerator's Block of a town. It gives the Location Code Number and name of each village/town, area of the village/town, and where inhabited, the number of Occupied Residential Houses, Census Households, total population, population of Scheduled Castes and Scheduled Tribes, Literate population and Workers classified into the following nine Industrial Categories of Workers and Non-Workers :—

I Cultivator
II Agricultural Labourer
III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
IV Household Industry
V Manufacturing other than Household Industry
VI Construction
VII Trade and Commerce
VIII Transport, Storage and Comunications
IX Other Services; and
X Non-Workers

The data are presented talukwise, first for the rural portion in the "Village Directory" and next for the urban portion in the " Town Directory". In the Village Directory the villages have been arranged in the ascending order of the Location Code Numbers assigned to the villages within the taluk and in the Town Directory, in the ascending order of Location Code Numbers assigned to the towns in the taluk and also by each Ward and Enumerator's Block in the ascending order. The Taluk map given at the beginning of the Village Directory of each taluk showing the Location Code Number of each village and town and other particulars will help the easy location of the villages.

In the Village Directory, villages uninhabited and villages that have been completely merged in towns have been indicated accordingly. In respect of villages which are partly included within the town limits and partly fall outside the town limits, the particulars for that portion included in the town limits *i.e.*, "Urban portion" are clubbed with the particulars of the town and given in the Town Directory and for that portion outside the town limits *i.e.*, "Rural portion" the data are given in the Village Directory along with other villages. The term "Rural" is indicated immediately after the names of such villages to make the position clear. In the presentation of data for the towns, the particulars have been exhibited in ascending order of Municipal Wards or Blocks and also by Enumerator's Blocks and not according to the villages constituting the town. In order that each Enumerator's Block may be located, the jurisdiction of each Block *i.e.*, the houses covered by each Enumerator's Block in towns, is indicated at the beginning of the Town Directory.

Under column 8 the area is given for the villages and towns in square miles based on the information furnished by the State Central Survey Office, the Tahsildars and by the Municipal authorities concerned. In respect of certain villages for which the area particulars are not available the abbreviation "N. A." has been recorded in this column. As the area of a taluk comprises not only the area of the villages but also the area of Reserved Forests etc., within the taluk, the areas of all the villages put together may not be equal to the area of the taluk.

Under columns 9 to 41 the total population, Scheduled Castes and Scheduled Tribes population, Literate population, total number of workers under each of the nine categories and Non-Workers is given by sex for each village/town.

The Taluk map found at the beginning of the Village Directory of each taluk shows the boundaries of each village and town, the important roads and railway lines, the rivers, if any, in the taluk. In this map, the Location Code Number of each village is shown and the names of the towns and villages having more than 5,000 population, important tourist centres and places of great religious importance, etc., if any, are given. Urban areas have been shown by shading the area covered. Uninhabited villages and inhabited villages of different sizes of population *i.e.*, below 2,000, 2,000–4,999, 5,000 and above, are shown by distinct designs. An Alphabetical list of villages with the Census Location Code Numbers

indicated against them is given after the taluk map and before the Village Directory. This list enables one to find out the Location Code Number of any village and thereafter to get the required particulars of the village from the Village Directory.

The information relating to Educational facilities, Medical and Public Health facilities, Drinking Water facilities, Communication and Transport facilities and Electrification is also given villagewise in this section for the first time besides the population data. These facilities are shown by symbols as explained below immediately after the names of the villages under columns 3 to 7.

(i) Educational facilities are shown by the following symbols under column 3 :—

P : Primary School
M : Middle School
H : High School
C : Institutions of Higher Education including Colleges
T : Technical Institutions

(ii) Medical and Public Health facilities are shown by the following symbols under Column 4 :—

D : Dispensaries
Rhc : Rural Health Centres (Primary Health Centres)
Hos : Hospitals
Mcw : Maternity Child Welfare Centres

(iii) Drinking Water facilities are shown by the following symbols under column 5 :—

S : Safe or Protected water supply including Tube wells etc.
W : Well
Tk : Tank
Riv : River
C : Canal

(iv) Communication and Transport facilities are shown by the following symbols under column 6 :—

Po : Post Office
To : Telegraph Office or Public Call Office
Rh : Rest Houses and Choultries
R : Road
Rly : Railway

(v) Electrification facilities are shown by the following symbols under Column 7 :—

E : Electricity
E(I) : Electricity in Industrial use
E(A) : Electricity in Agricultural use
E(D) : Electricity in Domestic use

Where figures like 5P, 2H etc., occur they denote that the village or town has 5 Primary Schools, 2 High Schools etc.

Besides presenting the information relating to the above facilities in the Village and Town Directory, certain other important particulars *viz.*, sources of irrigation, crops raised, value of land, Co-operative Societies, Police Stations, Veterinary Hospitals, Reading Rooms, Places of Public Entertainments (Cinemas), Industrial Establishments and Rural Handicrafts are also given talukwise in separate Sub-Tables immediately after the Village and Town Directory.

The Sub-Tables are numbered as follows:—

Sub-Table 1	Source of Irrigation, crops raised and value of land
Sub-Table 2	Co-operative Societies
Sub-Table 3	Police Stations
Sub-Table 4	Veterinary Hospitals
Sub-Table 5	Reading Rooms
Sub-Table 6	Public Entertainments (Cinemas)
Sub-Table 7	Industrial Establishments
Sub-Tables 8, 9 & 10	Rural Handicrafts

In the Sub-Table 1 relating to the sources of irrigation, crops raised and value of land, the particulars relating to the high and low prices of dry and wet land, the various important crops raised and the sources of irrigation are given villagewise. Only the Location Code Numbers have been given in the Sub-Table without giving the names of the villages. Villages having land of same value are grouped together. The following abbreviations are used in this Sub-Table :—

Cereal crops	*Cereal Crops*-Contd.
A : Arika	K : Korra
J : Jonna or Cholam or Jawar	P : Paddy
	R : Ragi

Cereal Crops-Concld.

S : Sajja or Cumbu or Bajra

V : Variga

Pulses

Gg : Greengram

Hg : Horsegram

Rg : Redgram

Other Crops

Ch : Chillies

Cs : Castor Seeds

G : Groundnut

Gi : Gingelly

Other Crops-Concld.

Bl : Betel Vines

C : Cotton

T : Tobacco

Irrigation Sources

C : Canal

Sc : Spring Channel or Nala

TK : Tank or Kunta

Riv : River orStream

W : Well

In the Sub-Table 2 relating to Co-operative Societies, the various types of Co-operative Societies functioning in each village have been presented talukwise. The data for the district are given in the beginning followed by the particulars relating to taluks. If a village is served by a Co-operative Society of another village it has been indicated accordingly. The abbreviations used for the different types of Co-operative Societies are given below.

AGCS	Agricultural Co-operative Society
CICS	Cottage Industrial Co-operative Society
CS	Co-operative Society
FCS	Forest Co-operative Society
FICS	Fishermen' Co-operative Society
HBCS	House Building Co-operative Society
LCCS	Labour Contract Co-operative Society
LSCS	Large Sized Co-operative Society
L&SCS	Loan and Sales Co-operative Society
MPCS	Multipurpose Co-operative Society
MSCS	Milk Supply Co-operative Society
PJCS	Palm Jaggery Co-operative Society
PWCS	Pottery Workers' Co-operative Society
SSCS	Students' Stores Co-operative Society
TCS	Tenants' Co-operative Society
WCS	Weavers' Co-operative Society
XCS	Christian Co-operative Society

In the other Sub-Tables 3 to 6 relating to Police Stations, Veterinary Hospitals, Reading Rooms and places of Public Entertainments (Cinemas) also, the data are presented in the same form as explained above *i.e.*, first for the district and then for each taluk. Only the names of places where such facilities exist are given.

In the Sub-Table 7 relating to Industrial Establishments, the number of units under various industries existing in villages and towns are given. These particulars were mainly those collected through a schedule of industries and crafts issued to the village school teachers in connection with the Rural Crafts Survey. In this schedule the data were to be given by the numbers of families; and as such, the families which had members engaged in any of the industries had been taken as units for that industry. In respect of some villages where the schedules had not been answered, the information was compiled from the Houselists. Certain data were taken from other sources as well such as the Village Directory furnished by the Tahsildars and the survey of Industries conducted in the cities. It is, however, quite possible that there may be some villages for which the information could not be presented. Such omissions are, however, likely to be very few. The particulars are given separately for the rural and urban areas. Under the name of the district, the industries are arranged in the ascending order of Minor Groups of the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for Total, Rural and Urban areas separately. Then, the figures for the various taluks are presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each Village / Town are shown the Minor Group Code Numbers of the industries or crafts found in that village / town with the number of units engaged in that Minor Group in brackets against each of the groups.

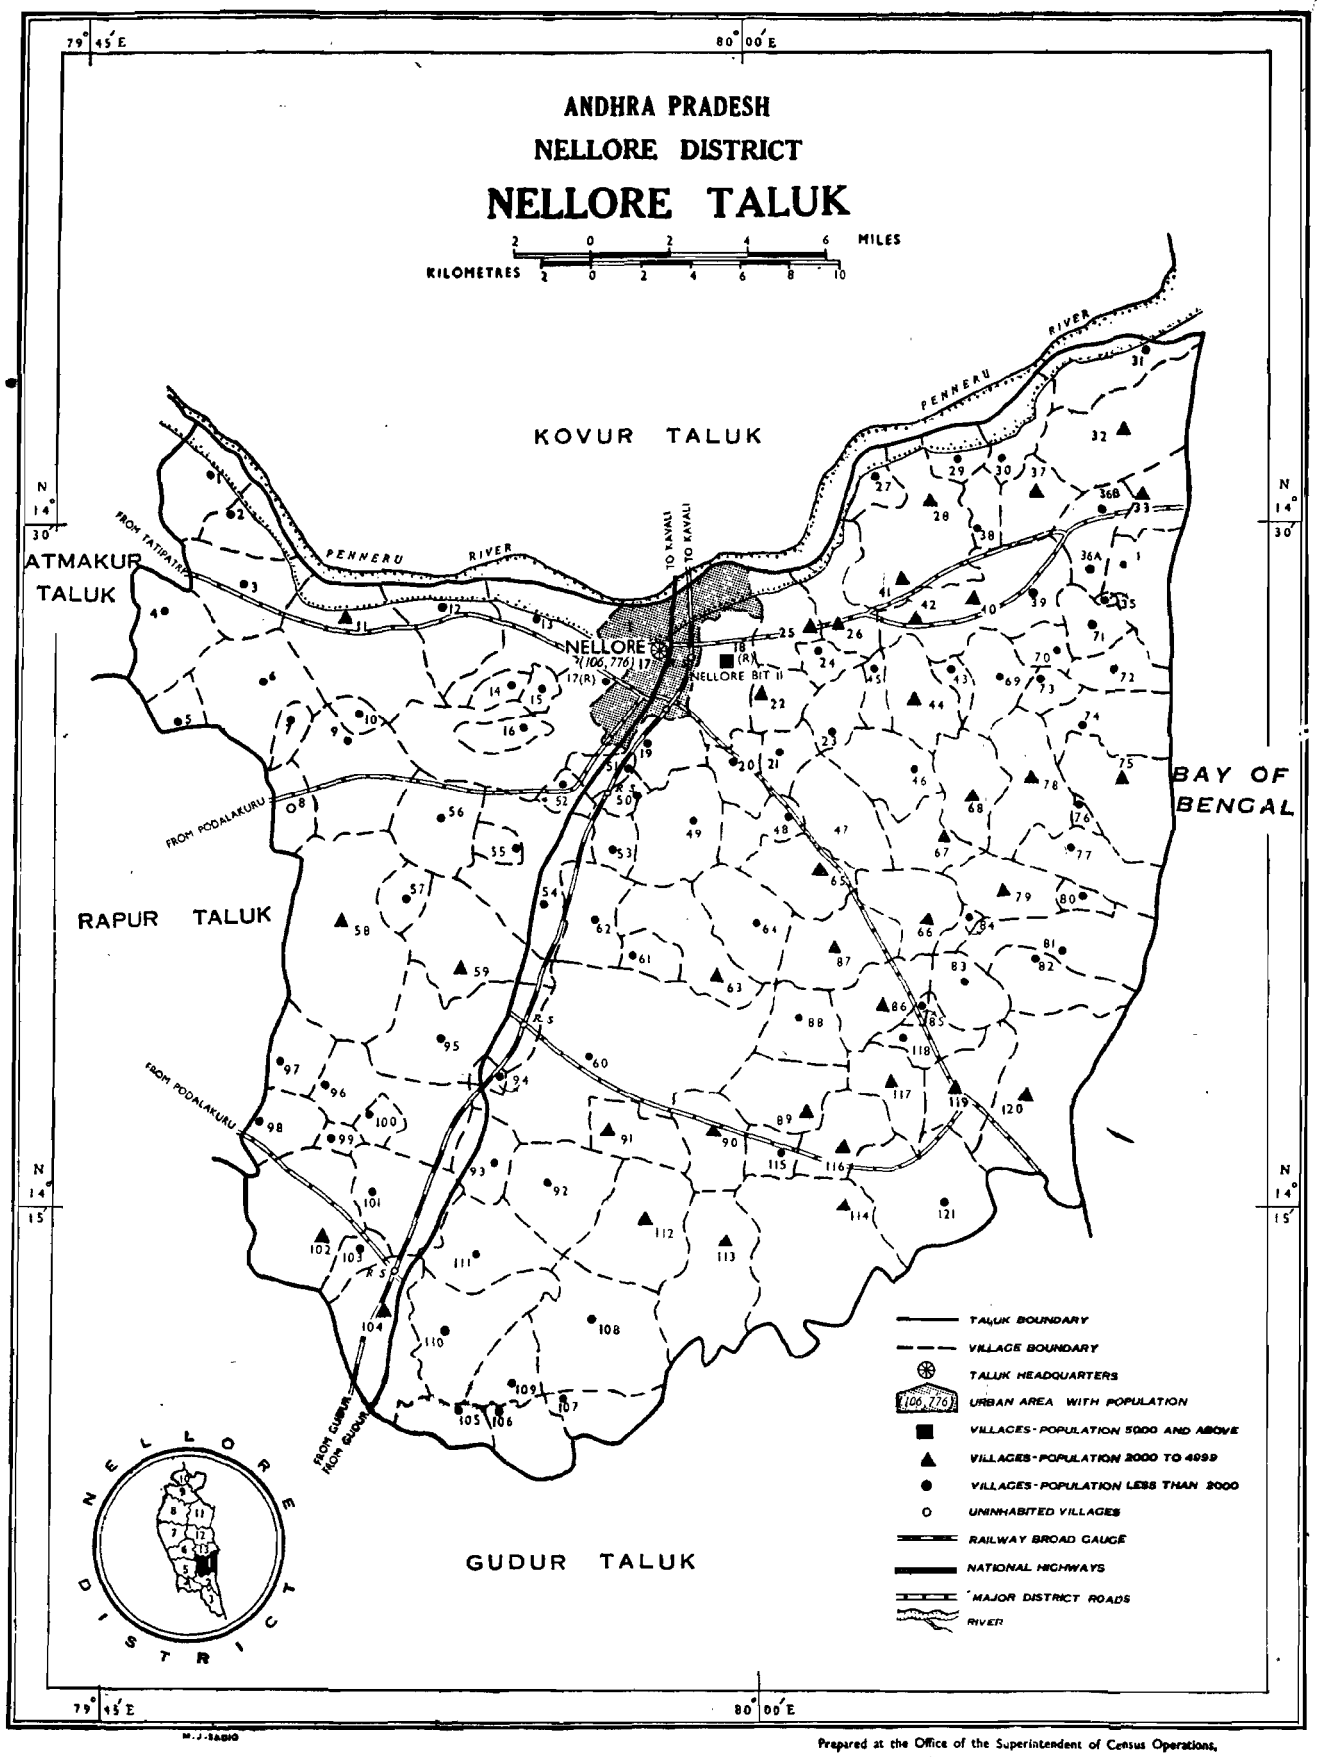

In the three Sub-Tables 8,9 and 10 relating to Handicrafts information is given about the various Crafts practised, the number of persons engaged, the distribution of Artisan Communities, the number of families engaged in the Handicrafts, and the names of highly skilled craftsmen of each community, and the distribution of articles of crafts by main material used, source of design, manufacture, marketing and earnings. These particulars were

mainly collected through a schedule of Industries and Crafts issued to the village school teachers in rural areas and to the Municipal Authorities in the Municipal areas. In respect of cities the information was collected through the staff of the Census Tabulation Offices specially appointed for the purpose. In respect of some villages where the schedules have not been answered the information was taken from the Houselists prepared at the time of House-numbering in 1960. A detailed report on the Handicrafts Survey is given in "Census of India, 1961 - Volume II - Andhra Pradesh - Part VII-A Handicrafts Survey Reports (Selected Crafts)" and may be referred to.

In the Sub-Table relating to Fairs and Festivals given at the end of this section, the important fairs and festivals that take place in the village, the month in which they take place, etc., are given for each village having such importance. A detailed report on the Fairs and Festivals is, however, given in "Census of India 1961 - Volume II - Andhra Pradesh-Part VII-B" Fairs and Festivals and may be referred to.

All the information given in the various Sub-Tables in this section are based on the information furnished by the Heads of Departments, the District Officers, the Tahsildars and the Municipal Authorities concerned.

NELLORE TALUK

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

Note :— The following abbreviations have been used in the Village and Town Directories :

N. A. : Not ascertainable

(*i*) *Educational facilities are shown by the following symbols under col. 3* :—

P: Primary School, M: Middle School, H: High School, C: Institutions of Higher Education including Colleges, T: Technical Institutions

(*ii*) *Medical and Public Health facilities are shown by the following symbols under col. 4* :—

D: Dispensaries, Rhc: Rural Health Centres, Hos: Hospitals, Mcw: Maternity Child Welfare Centres

(*iii*) *Drinking Water facilities are shown by the following symbols under col. 5* :—

S: Safe or Protected water supply including Tube Wells etc., W: Well, TK: Tank, Riv: River, C: Canal

(*iv*) *Communication and Transport facilities are shown by the following Symbols under col. 6* :—

Po: Post Office, To: Telegraph Office or Public Call Office, Rh: Rest Houses and Choultries, R: Road, Rly: Railway

(*v*) *Electrification facilities are shown by the following symbols under col. 7* :—

E: Electricity, E (I): Electricity in Industrial use, E (A): Electricity in Agricultural use, E (D): Electricity in Domestic use

GUDUR TALUK

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh

ALPHABETICAL LIST OF VILLAGES

GUDUR TALUK

1961 Location Code No.	Name of Village
50	Acharlaparlapalle
95	Addepalle
70	Aletipadu Chittamuru
106	Andalamala
87	Ankulapaturu
85	Annambaka
111	Arlampad
58	Ayyapareddipalem
27	Ayyavaripalem
96	Ballavolu
28	Bhuvanagiripalem
34	Boodanam
120	Budidalavagu
130	Cheemalapadu
18	Chemidthi
78	Chendodu
125	Chennappagarimitta
16	Chennuru I
15	Chennuru II
132	Cherukumulam
62	Chilamathur
5	Chillakuru
90	Chintavaram
45	Chittedu
145	Dugarajupatnam
131	Durgavaram
69	Eswaravaka
109	Ganganapalem
143	Gangupalem
144	Gollapalem
22	Gollapalle
126	Goondlu
77	Gudali
3	Gudur East
4	Gudur West
64	Gunupadu
100	Hukurpadu
119	Isakanattu
33	Kadivedu
42	Kalavakonda
59	Kallipedu
129	Kalluru
17	Kandali
25	Kandra
94	Kanupuru East
122	Kapparampad
60	Kapuluru
98	Karlapudi
72	Kasipuram
44	Kesavaram
134	Kodivaka
19	Kommaneturu
8	Kondagunta
49	Kondapallipadu
75	Kondapuram
121	Konduru
79	Kota
127	Kothacheruvu
80	Kothapalem
93	Kothapatnam
63	Kuchivada
23	Kundakuru
48	Kurugonda
74	Lakshmakka Khandriga
47	Maddali
61	Manamala
13	Mangalapuru
141	Mangalavanipalle
68	Mannemala
124	Manyalanattu (Tupili)
7	Mekanuru
76	Mettu
1	Mittathmakur
110	Molaganur
91	Momidi
142	Mukkidipalem
37	Muthyalapadu

6	Cheepinapi
22	Chinagopavaram
1	Chintalapalem
7	Chintalatmakuru
23	Chittaluru
86	Chuttupalem
19	Dachuru
51	Degapudi
52	Degapudi Rajupalem
48	Devaravemur
53	Duggunta
54	Duggunta Rajupalem
81	Edula Khandriga
64	Gandurupalle
9	Garimenapenta
65	*Gilakapadu*
112	Gokulabrindavanam
84	Gonunarasayapalem
10	Gonupalle
115	Griddalur
89	Gulimcherla
70	Gundavolu
30	Guravayapalem
15	Guruvindapudi
40	Inukurthi
98	Jabalapuram
97	Jogipalle
77	*Jorepalle*
79	Jorepalle Akkamambapuram
49	Kalichedu
56	Kambhalapalle
21	Kanupurpalle
35	Kanuparthi
13	Kasulanativari Khandriga
20	Kesamanenipalle
83	Komatiguntа Rajupalem
82	Kommipadu
74	Koturpadu
4	Koturpalle
90	Krishnareddipalle
17	Lingapalem
108	Lingasamudram
50	Malicheda
39	Marripalle Gopasamudram
45	Marupuru
101	Mittapalle
31	Mogalur
113	Molakalapoondla
88	Munagalavenkatapuram
92	Munagapadu
103	Nallabotlapalle
35	Nandivaya
85	Nayanipalle
68	Nellepalle
26	Nerneeru
94	Orupalle
46	Palicherlapadu
8	Pallakonda
105	Palur
72	Pangili
41	Parlapalle
104	Pathallapalle
12	Penubarthi
11	Penubarthi Gopasamudram
93	Perumallapadu
38	Podalakur
114	Pokkandala
80	Pothegunta
27	Pulikollu
116	Ramasagaram
111	Ranganayakapuram
73	Rapuru
33	Revilla Erraguntapalem
109	Samudralavari Khandriga
59	Sanayapalem
62	Sankurathripalle
76	Siddavaram
16	Suddamala
57	Tanamcherla
5	Tegacherla
61	Thatipalle
87	Thimmanaramapuram
110	Thippireddipalle
44	Thoderu
100	Thokalapudi
91	Tocham
58	Tokapalem
69	Tumaya
95	Turimerla
29	Uchapalle
60	Utlapalem
96	Utukur
2	Uyyalapalle
47	Vadlapudi
18	Vandluru
24	Vavileru
28	Vavintaparthi
66	Veerayapalem
102	Vemulachedu
63	Vepinapi Akkamambapuram
71	Yepuru
3	Yerrapalle
25	Yeturu

KANIGIRI TALUK

M. J. BADIG

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

KANIGIRI TALUK

1961 Location Code No. (1)	Name of Village (2)
68	Akkampeta
49	Ambavaram
2	Anandapuram
80	Anikalapalle
44	Anneboyina Krishnampalle
189	Anumulakonda
206	Appamambapuram
66	Arivemula
54	Ayalurivaripalle
172	*Ayyanakota*
142	Ayyanapalem
173	Ayyavaripalle
156	Balavenkatapuram
201	Balijapalem
99	Ballavaram
157	Ballipalle
153	Bhattupalle
209	Bodavada
57	Bodavuladinne
74	Bodavulapalle
144	Bommireddipalle
207	Bompeddupadu
123	Bonthaguntapalle
43	Bonthavaripalle
203	Botlagudur
36	Boyamadugula
85	Bukkapuram
118	Chakirala
107	Challagirigila
73	Chandrasekharapuram
128	Chennakesavapuram
45	Chennapanayudupalle
64	Cherlopalle
185	Chilakapadu
181	Chilamakur
120	China Alavalapadu
15	China Gollapalle
113	China Irlapadu
38	China Kotalapalle
161	China Varimadugu
166	Chintagumpalle
187	Chintalapalem
70	Chintalapalem (near Arivemula)
87	Chintapudi
133	Chirladinne
127	Chodavaram
147	Choutagogulapalle
182	Dadireddipalle
42	Darsiguntapeta
75	Darsi Thimmakkapalle
19	Dasallapalle
32	Devakimarri
108	Dirasavancha
12	Doddichintala
190	Dubagunta
95	Gandlaseetaramapuram
26	Ganesunipalle
52	Ganesunipalle
94	Gannavaram
105	Ganugapenta
90	Gogulapalle
141	Gosalaveedu
164	Gosigundla
146	Gudipadu
183	Gummalampadu
62	Gumminenipalle
59	Guntachennampalle

KAVALI TALUK

M J SADIQ

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

KAVALI TALUK

1961 Location Code No. (1)	Name of Village (2)
8B	*Adimurthipuram*
26	Ayithampadu
67	Allimadugu
22	Ananthapuram
54	*Anemadugu*
47	Annavaram
40	Bhimavarappadu
77	Bhogavolu
71	Bitragunta
31	Bodagudipadu
72	Brahmana kraka
61	Budamagunta
51	Chalamcherla
74	Chamadala
53	*Chennayapalem*
12	China Annaluru
34	Chinna kraka
10	*Chintaladevi*
49	*Chintalapalem*
45	Chodavaram
37	Dubagunta
24	Dundigam
7	*Ganugapenta*
46	Gattupalle
70	Gouravaram
4	Gudavalluru
23	Gudladona
48	Jaladanki
60	Jammulapalem
36	Kakuturu
14	Kaligiri
1	Kasturinaidupalle
30	Katrayapadu
58	Kavali (Bit I)
57	Kavali (Bit II)
44	Kesavaram
33	*Kodandaramapuram*
41	Kommi
50	Kothapalle
78	Kovurpalle
73	Krishnapadu
35	Kummarakonduru
42	Kunkuvaripalem
21	Lakshmipuram
29	Lingalapadu
59	Maddurpadu
65	*Mallayapalem*
56	Mannangidinne
28	Manubolupadu
25	Marellapadu
3	Marrigunta
68	Mungamuru
62	Musunuru
16	Nagasamudram
5	Nekunampeta
20	Parikota Agraharam
6	Parlapalle
18	Pedakonduru
43	Ramanujapuram
27	Rangasamudram
13	Ravulakollu
52	Rudrakota
69	Sambasivapuram
38	Sathyavolu
39	Sayipeta
9A	Settipalem
19	Siddanakonduru
66	Siddavaram Venkatesupalem
32	Somavarappadu
63	Thallapalem
76	Thalluru
11	Thellapadu
55	Thummalapenta
8A	Thurpu Brahmanapalle
9B	Thurpu Jangalapalle
79	Umamaheswarapuram
15	Veeranakollu
17	Venkanapalem
2	Veligandla
75	Zakkepallegudur
64	Zuvvaladinne

KOVUR TALUK

M J BADIGER

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

KOVUR TALUK

1961 Location Code No.	Name of Village
88	Alaganipadu
16	Alluru
77	Allurupadu
15	Allurupeta
44	Annareddypalem
26	Ananthabhotlavari Khandriga
8	Ananthavaram
82	Basavayapalem
25	Beeramgunta
13	Bhatrakagollu
51	Bodduvaripalem
46(B)	Buchireddipalem
58	Challayapalem
1	Chennavarapadu
3	Chennuru
84	Choukacherla
31	Choutaputhedu
4	Dagadarthi
66	Damaramadugu
7	Damavaram
83	Damegunta
21	Dampur
20	Dandigunta
45	Duvvur
50	Gandavaram
69	Gangavaram
18	Gogulapalle
49	Gotlapalem
14	Graddagunta
80	Gundalammapalem
72	Inamadugu
23	Indupur
17	Iskapalle
47	Iskapalem
38	Jangala Khandriga
62	Jonnavada
27	Kalambhotlavari Khandriga
65	Kalayakagollu
37	Kaligirikonduru
6	Kaminenipalem
59	Kavetipallam
53	Kodavalur
12	Kothapalle Kavurugunta
48	Kothavangallu
68	Kovur
	Leguntapadu
43	Maktapuram
75	Maneguntapadu
2	Marripadu
61	Minagallu
78	Modegunta
87	Mudivarthi
35	Munulapudi
56	Nagamambapuram
52	Nayudupalem
28	North Amuluru
24	North Mopur
54	North Rajupalem
30	Oochaguntapalem
42	Padamatipalem
71	Padugupadu
60	Panchedu
79	Parlapalle
67	Patur
32	Pedaputhedu
63	Penuballe
70	Pothireddypalem
22	Purini
76	Ramannapalem
57	Rebala
41	Sangam
10	Singapeta
64	Sreerangarajapuram
29	Talamanchi
40	Tarunivaya
36	Tiruveedhipad
33	Turumerla
9	Ulavapalle
89	Utukur
39	Vangallu
19	Varini
85	Vavilla
46A	Vavveru
74	Veguru
11	Velicherla
5	Velupodu
81	Venkanapuram
86	Vidavalur

The following abbreviations have been used in the above Sub-Table :—

N. A. : Not Ascertainable

Cereal Crops

A : Arika
J : Jonna or Cholam or Jawar
K : Korra
P : Paddy
R : Ragi
S : Sajja or Cumbu or Bajra
V : Variga

Pulses

Gg : Greengram
Hg : Horsegram
Rg : Redgram

Other Crops

Bl : Betel Vines
C : Cotton
Ch : Chillies
Cs : Castor seeds
G : Groundnut
Gi : Gingelly
T : Tobacco

Irrigation Sources

C : Canal
Sc : Spring channel
Tk : Tank or Kunta
Riv : River or Stream
W : Well

SUB-TABLE 7 TO VILLAGE AND TOWN DIRECTORY

INDUSTRIAL ESTABLISHMENTS

NELLORE DISTRICT

[Note:—In the Sub-Table below relating to Industrial Establishments, the units of various Industries existing in Villages and Towns are given. The particulars are given separately for the rural and urban areas. The Industries are arranged, first for the district total, in the ascending order of Minor Groups of Industries under the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for total, rural and urban separately. The figures for the various taluks are also presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the Villages and Towns in that taluk in the order of the Village/Town Directory. Against each Village/Town are shown the Minor Group Code Numbers of the Industries or Crafts found in that Village/Town with the number of units engaged in the Minor Group in brackets against each of the Groups.]

Total : 200 (382), 202 (411), 203 (2), 204 (1), 205 (10), 206 (1), 207 (72), 209 (37), 212 (69), 214 (80), 215 (2), 216 (3), 218 (3), 220 (240), 221(21) 222 (140), 224 (4), 225 (12), 226 (1),230 (24), 231 (272), 233 (79), 235 (6567), 237 (4) 238 (26), 239 (7) 244 (342), 272 (11), 273 (611), 274 (9), 280 (6), 281 (4), 282 (10), 284 (27), 288 (1731), 289 (1273), 292 (3), 301 (1), 302 (45), 303 (7), 310 (112), 311 (3977), 313 (82), 314 (141), 320 (11), 331(5), 332 (1), 333 (5), 334 (10), 335 (3), 336(14), 337(1), 338 (3), 339 (1), 340 (18), 341 (7), 342 (115), 343 (118), 344 (13), 348 (979), 350 (1460), 351 (3), 352 (1), 353 (11), 356 (2), 365 (19), 366 (4), 367 (6), 368 (22), 369 (579), 371 (13), 375 (1), 376 (1), 377 (5), 378 (5), 379 (6), 384 (26), 388 (89), 389 (5), 392 (15), 393 (449), 394 (4), 395 (31), 399 (61)

Detailed description of Industrial Code (Minor Group) Numbers under which the Industrial Establishments are arranged in the above Sub-Table is given below.

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
200	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and food-grains
202	Production of indigenous sugar, gur, from sugar cane or palm juice and production of candy
203	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits
204	Slaughtering, preservation of meat and fish and canning of fish
205	Production of bread, biscuits, cake and other bakery products
206	Production of butter, ghee, cheese and other dairy products
207	Production of edible fats and oils (other than hydrogenated oil)
209	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge
212	Production of indigenous liquor such as toddy, liquor from mahua, palm juice
214	Production of aerated and mineral water
215	Production of ice
216	Production of ice cream
218	Processing of coffee in curing works
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
222	Manufacture of cigarette and cigerette tobacco
224	Manufacture of snuff
225	Manufacture of jerda and other chewing tobacco
226	Manufacture of other tobacco products
230	Cotton ginning, cleaning, pressing and baling
231	Cotton spinning (other than in mills)
233	Cotton dyeing, bleaching
235	Cotton weaving in handlooms
237	Printing of cotton textile
238	Manufacturing of cotton nets
239	Manufacturing of cotton cordage, rope and twine
244	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta
272	Embroidery and making of crepe lace and fringes
273	Making of textile garments including rain coats and head gear
274	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags
280	Sawing and planing of woood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
284	Manufacture of other wooden products such as utensils, toys, artwares
288	Manufacture of materials from cork, bamboo, cane, leaves and other allied products
289	Manuracture of other wood and allied products not covered above
292	Manufacture of products such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp
301	Printing and publishing of books

SUB-TABLE 7 TO VILLAGE AND TOWN DIRECTORY—*Concld.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
302	All other types of printing, including lithography, engraving, etching, block making and other work connected with printing industry
303	All types of binding, stitching, sizing and other allied work connected with binding industry
310	Currying, tanning and finishing of hides and skins and preparation of finished leather
311	Manufacture of shoes and other leather foot wear
313	Manufacture of leather products (except those covered by code Nos. 311, 312) such as leather up holstery, suit cases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles
314	Repair of shoes and other leather foot wear
320	Manufacture of tyres and tubes
331	Manufacture of dyes, paints, colours and varnishes
332	Manufacture of fertilizers
333	Manufacture of ammunition, explosives and fire works
334	Manufacture of matches
335	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap
336	Manufacture of soap and other washing and cleaning compounds
337	Manufacture of turpentine, synthetic resin and plastic products and materials (including synthetic rubber)
338	Manufacture of common salt
339	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)
340	Manufacture of structural clay products such as bricks, tiles
341	Manufacture of cement and cement products
342	Manufacture of lime
343	Manufacture of structural stone goods, stone dressing and stone crushing
344	Manufacture of stonewares other than images
348	Manufacture of mica products
350	Manufacture of earthenware and earthen pottery
351	Manufacture of Chinaware and crockery
352	Manufacture of porcelain and its products
353	Manufacture of glass bangles and beads
356	Manufacture of earthen toys and artwares except those covered by code No. 355
365	Manufacture of brass and bell metal products
366	Manufacture of aluminium products
367	Manufacture of metal products (other than of iron, brass bell metal and aluminium) such as tin can
368	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products
369	Manufacture of sundry hardwares such as G. I. pipes, wire, net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in Major Groups 36, 37, 38 and 39)
371	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors
375	Manufacture of electric lamps and fans
376	Manufacture of insulated wires and cables
377	Manufacture of all kinds of battery
378	Manufacture of electronic equipment such as radio, microphone
379	Manufacture of electric machinery and apparatus, appliances not specified above
384	Repairing and servicing of Motor Vehicles
388	Repairing of bicycles and tricycles
389	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles
392	Assembling and repairing of watches and clocks
393	Manufacture of jewellery, silver ware and wares using gold and other precious metals
394	Manufacture and tuning of musical instruments
395	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen
399	Manufacture and repair work of goods not assignable to any other group
