1981 CENSUS—PUBLICATION PLAN

(1981 Census Publications, Series 11 in All India Series will be published in the following parts)

GOVERNMENT OF INDIA PUBLICATIONS

Part I–A	Administration Report-Enumeration
Part I–B	Administration Report-Tabulation
Part II–A	General Population Tables
Part II–B	Primary Census Abstract
Part III	General Economic Tables
Part IV	Social and Cultural Tables
Part V	Migration Tables
Part VI	Fertility Tables
Part VII	Tables on Houses and Disabled Population
Part VIII	Household Tables
Part IX	Special Tables on Scheduled Castes and Schedled Tribes
Part X–A	Town Directory
Part X–B	Survey Reports on selected Towns
Part X–C	Survey Reports on selected Villages
Part XI	Ethnographic Notes and special studies on Scheduled Castes and Scheduled Tribes
Part XII	Census Atlas
Paper 1 of 1982	Primary Census Abstract for Scheduled Castes and Scheduled Tribes
Paper 1 of 1984	Household Population by Religion of Head of Household.

STATE GOVERNMENT PUBLICATIONS

Part XIII–A&B District Census Handbook for each of the 45 districts in the State.
(Village and Town Directory and Primary Census Abstract)

प्राक्कथन

जनगणना संगठन द्वारा राज्य सरकारों की ओर से संकलित जिला जनगणना पुस्तिका जनगणना की एक बहुमूल्य उपलब्धि है। जिला जनगणना पुस्तिका की योजना निर्माताओं, प्रशासकों, विद्वानों और अनुसंधान कर्त्ताओं को बार-बार आवश्यकता होती है। अन्य बातों के साथ-साथ इस पुस्तिका का उपयोग निर्वाचन क्षेत्रों के परिसीमन, स्थानीय स्तरों के निर्धारण और क्षेत्रीय योजनायें बनाने में भी किया जाता है। यह पुस्तिका जिला प्रशासन चलाने में भी सहायक होती है। जिला जनगणना पुस्तिका ही एक मात्र ऐसा प्रकाशन है जिससे ग्रामीण क्षेत्रों के ग्राम स्तर तक के एवं प्रत्येक नगरीय क्षेत्र के वार्ड वार प्राथमिक जनगणना सार के आंकड़े उपलब्ध होते हैं। इसमें ग्रामों और नगरों आदि में उपलब्ध आंतरिक सुविधाओं के बारे में भी जानकारी मिलती है।

जिला जनगणना पुस्तिका की शृंखलाओं का प्रारम्भ 1951 की जनगणना में किया गया था। इसमें जिले के प्रत्येक ग्राम और नगर का प्राथमिक जनगणना सार और जनगणना की महत्वपूर्ण सारणियां थीं। 1961 के दौरान जिला जनगणना पुस्तिका के विषय क्षेत्र का विस्तार किया गया। इसमें जिले का विस्तृत ब्योरा, प्रशासनिक सांख्यिकी, जनगणना सारणियां और प्राथमिक जनगणना सार को मिलाकर ग्राम और नगर निर्देशिका भी शामिल की गई। 1971 की जिला जनगणना पुस्तिका की शृंखलाओं को तीन भागों में बांटा गया था। क-भाग में ग्राम और नगर निर्देशिका, ख-भाग ग्राम में ग्राम और नगर का प्राथमिक जनगणना सार और ग-भाग में विश्लेषणात्मक रिपोर्ट, प्रशासनिक सांख्यिकी, जिला जनगणना सारणियां, प्राथमिक जनगणना सार पर आधारित कुछ विश्लेषणात्मक रिपोर्ट और ग्रामों के बारे में वहां उपलब्ध सुविधाओं के आंकड़े शामिल थे। तथापि, कुछ राज्यों में इसमें केवल जिला जनगणना सारणियां ही दी गई थी। कुछ ऐसे भी मामले थे जहां संकलन और मुद्रण में देरी होने से उक्त पुस्तिका प्रकाशित ही नहीं की गई।

1981 की जिला जनगणना पुस्तिका के फार्म तैयार करते समय ग्राम और नगर निर्देशिका के फार्मों में कुछ नए कालम जोड़कर उन्हें फिर से तैयार किया गया। उक्त फार्म बनाते समय 1971 के आंकडे की तुलनात्मकता को भी ध्यान में रखा गया है। ग्रामों में बिजली की आपूर्ति के अलावा बाकी उपलब्ध सभी सुविधाओं को ग्राम निर्देशिका में इस अनुदेश के साथ दिखाया गया है कि यदि कोई विशिष्ट सुविधा किसी ग्राम में उपलब्ध नही है तो जिस भी निकटतम ग्राम में उक्त सुविधा उपलब्ध है, उसकी दूरी भी बताएं। ग्राम निर्देशिका के फार्मों को पुनः तैयार करते समय ग्रामीण क्षेत्र में उपलब्ध समस्त आंतरिक सुविधाओं, विशेषकर सुविधाओं और भूमि उपयोग की किस्मों के बारे में और व्यापक आंकड़े समाविष्ट करने से यह आशा की जाती है कि इससे माइक्रोस्तरीय योजना की आवश्यकता और पूरी हो सकेगी। इससे न केवल स्थानीय क्षेत्रों में योजना तैयार करने में सहायता मिलेगी अपितु माल और सेवाओं को भी विनियमित करने और विकास प्रक्रिया में क्षेत्रीय असंतुलन को कम करने मे भी सहायता मिलेगी। संशोधित न्यूनतम आवश्यकता कार्यक्रम की कुछ आवश्यकताओं की पूर्ति के लिये संबंधित जानकारी की कुछ नई मदें जोड़ी गई है। ये नई मदें है : प्रौढ़ शिक्षा केन्द्र, प्राथमिक स्वास्थ्य-उप केन्द्र ग्रामों में सामुदायिक स्वास्थ्य कार्यकर्त्ताओं संबंधित मदों को उक्त उद्देश्य को ध्यान में रखते हुए ग्राम निर्देशिका में जोड़ा गया है। किसी गाँव में आने-जाने के साधनों के बारे में जो नया मद जोड़ा गया है उसका अभिप्राय जिले के उन ग्रामों की जानकारी एकत्रित करनी है जिसमें आना जाना बहुत कठिन है अर्थात जो अगम्य है। एक नया कालम "कुल जनसंख्या और परिवारों की संख्या" को यह ज्ञात करने के लिये जोड़ा गया है कि उनके गांव की जनसंख्या और परिवार संख्या कितनी है और उनके अनुसार कितनी सुविधाएं उपलब्ध हैं। दो नये परिशिष्ट और जोड़े गए है जिनमे से एक उन ग्रामों के बारे में है जहां कोई सुविधा उपलब्ध नहीं है तथा दूसरी, कुल जनसंख्या के अनुपात मे अनुसूचित जाति और अनुसूचित जनजाति की जनसंख्या से संबंधित है।

नगर निर्देशिका के फार्मों में भी कुछ संशोधन किए गए है जिससे कि कुछ मदों के बारे में जानकारी मिल सके और न्यूनतम आवश्यकता कार्यक्रम की आवश्यकताओं की पूर्ति हो सके। इसी उद्देश्य को ध्यान में रखते हुए श्रेणी-I श्रेणी-II के कस्बों की गन्दी बस्तियों में नागरिक और अन्य सुविधाओं के बारे में एक नया विवरण (विवरण-IV क) जोड़ा गया है। आशा की जाती है कि इससे प्राप्त जानकारी आयोजकों को गन्दी बस्तियों के सुधार के लिये कार्यक्रम तैयार करने में सहयोग देगी। इसी बात को ध्यान में रखते हुए नागरिक और अन्य सुविधाओं के बारे में विवरण IV में अनुसूचित जातियों और अनुसूचित जनजातियों से संबंधित कालम और विवरण-V में शैक्षिक सुविधाओं के अंतर्गत प्रौढ़ शिक्षा कक्षाएं / केन्द्रों के बारे मे अन्य बातों के साथ-साथ

कालम जोड़े गए हैं । नगर निर्देशिका में एक महत्वपूर्ण परिवर्तन सभी सातों विवरणों में कस्बे की श्रेणी के बारे में है। देश के नगरीय क्षेत्रों, में उपलब्ध आंतरिक सुविधाओं की जानकारी का कस्बे की श्रेणी को ध्यान में रखते हुए सर्वोत्तम विश्लेषण किया जा सकता है । कुछ विवरणों में नागरिक प्रशासन की स्थिति और जनसंख्या के कालम जोड़ने से भी इस उद्देश्य की पूर्ति होती है ।

1981 की जनगणना में भरी गई व्यक्तिगत पर्चियों के आर्थिक और अन्य प्रश्नों में जो भी परिवर्तन किए गए, उन्हीं परिवर्तनों को ध्यान में रखते हुए ग्रामों और नगरों के प्राथमिक जनगणना सार के फार्म तैयार किए गए हैं ।

1981 की जिला जनगणना पुस्तिका के प्रकाशन में विलम्ब न हो, इस बात को ध्यान में रखते हुए उक्त खण्ड के भाग-क में ग्राम एवं नगर निर्देशिका तथा भाग-ख में तहसील / कस्बा स्तरों तक जनगणना का प्राथमिक सारांश के साथ अनुसूचित जातियों और अनुसूचित जनजातियों के प्राथमिक जनगणना सार को भी सम्मिलित किया गया है । जिला जनगणना पुस्तिका के महत्व को संवर्धित करने के लिये उसके प्रारम्भ में एक विस्तृत विश्लेषणात्मक टिप्पणी दी गई है जिसमें विभिन्न इनसेट सारिणियां सम्मिलित हैं जो प्राथमिक जनगणना सार और अन्य सुविधाओं से संबंधित गैर जनगणना आंकड़ों पर आधारित है । प्रकाशन को पुनः और उपयोगी बनाने की दृष्टि से उपयुक्त स्थानों पर जिला और तहसील/पुलिस स्टेशन/सामुदायिक विकास खण्डों आदि के मानचित्रों को लगाया गया है । मानचित्रों में इनकी सीमाएं और अन्य महत्वपूर्ण विशेषताए दिखाई गई हैं ।

यह प्रकाशन राज्य सरकार और जनगणना संगठन के संयुक्त प्रयास का फल है । राज्य में आंकड़ों का संकलन श्री के. सी. दुबे निदेशक जनगणना परिचालन, मध्यप्रदेश के मार्गदर्शन पर राज्य सरकार की ओर से किया गया है । राज्य सरकार ने ही इसके मुद्रण का खर्च वहन किया है । इस प्रकाशन की योजना, रूपरेखा और इसके समन्वय का कार्य मेरे कार्यालय में सामाजिक अध्ययन प्रभाग में उप महारजिस्ट्रार श्री एन. जी. नाग द्वारा किया गया । डा. बी. के. राय, उप महारजिस्ट्रार (मानचित्र) ने मानचित्रों को तैयार करने मे तकनीकी मार्गदर्शन किया । जनगणना निदेशालयों से प्राप्त आंकड़ों की संवीक्षा श्री एम. एम. दुआ, अनुसंधान अधिकारी के मार्गदर्शन में मुख्यालय के सामाजिक अध्ययन प्रभाग में की गई । इस परियोजना से संबंधित सभी कर्मचारियों को मैं धन्यवाद देता हूं ।

FOREWORD

The district census handbook (DCH), compiled by the census organisation on behalf of the State governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is inter alia used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables, village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objectives in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this

view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/police station/C D Block etc. level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri K. C. Dubey, the Director of Census Operations, Madhya Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in the project.

P. PADMANABHA
REGISTRAR GENERAL, INDIA

New Delhi
the 26th April, 1981.

PREFACE

One of the most important publications of the Census are the District Census Handbooks. This publication was begun in this caption since 1951 Census. But prior to this, a similar publication was released in the Census earlier than 1951. That publication was on the title of Village Statistics and it contains only village names and total population thereof. The 1951 Census could, therefore, be said to represent a significant step in the process of making detailed Census statistics available down upto the village level.

In fact the District Census Handbook is the most important publication at the Census and is also perhaps the most widely used. Also perhaps this is the only publication used at the micro-level down upto the tahsil and development block.

The form of the District Census Handbook has gone considerable change since 1951. This is basically due to the growing demand for more information. For the purpose of convenience as well as with a view of making the basic statistics available with the data users as early as possible the District Census Handbooks have been split into 2 parts, Part-A contains the Introductory Note on the district and Town/Village Directory. This volume will be found useful to get almost all the non-Census statistics available at one place. Part—B contains the Primary Census Abstract.

One of the innovation of the present Census has been in terms of allotment of Location Code numbers to the villages. In the earlier Censuses the location code system was such that the villages of a Patwari Circle were found at different serial numbers. Since the Patwari Circle still remains an important administrative unit the location code numbers have been so given in the present Census that it may be possible to locate all the villages of a particular Patwari Circle at one place one below the other.

When the planning for the present census was started in 1979 the tahsils were still revivable as an important unit of the administration, the whole planning was, therefore, done taking tahsil as the unit. It was during the course of the census that some requests were informally received for making blockwise data available. Since these requests were received very late and were also received only in an informal manner, it has not been possible to disturb the original planning of villages arranged according to the location code numbers taking tahsil as one unit. However, additional exercise has been done and in addition to the tahsil figures blockwise figures have also been indicated. It is hoped that the availability of these blockwise data will enhance the utility of this publication.

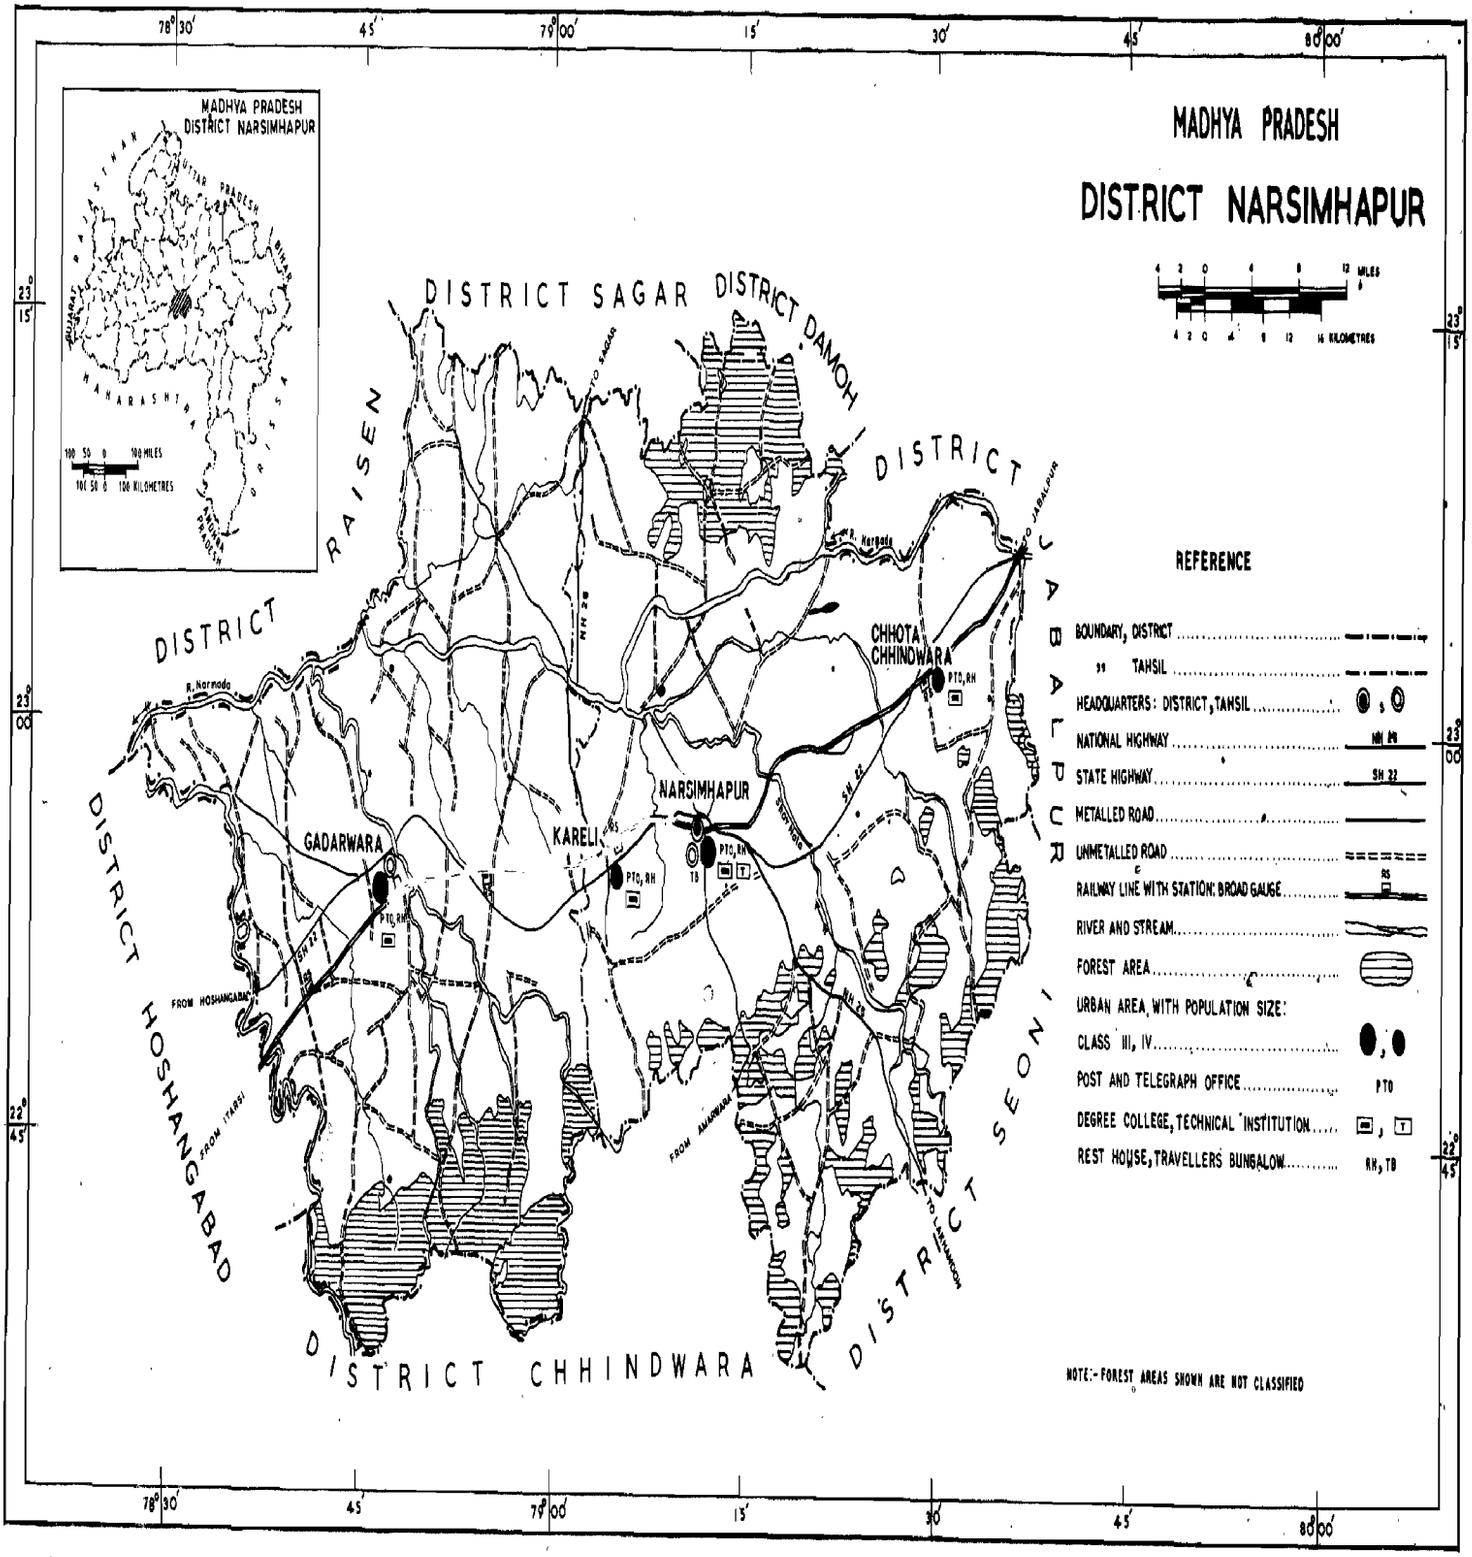

It is hoped that this handbook will provide the basic statistical support to executive and developmental administration. It is needless to state that the proper implementation of policy depends on the ability of the administration authorities concerned.

It may be remembered that the villagewise area figures given in the Primary Census Abstract and the Village Directory are those based on the village papers while the tahsil totals given in PCA are obtained from the Land Records deptt. which in many cases exclude forest area.

The statistics that are contained in the district census handbooks are the result of a massive and marathon exercise in the compilation and tabulation of voluminous statistics. The compilation of the statistics contained in this volume was carried out by 9 Regional Tabulation Offices each under a Regional Deputy Director of Census Operations. These Regional Offices were run with the help of purely temporary staff-roughly about 1,500 Tabulators, about 250 Checkers and about 80 Supervisors. I am grateful to my colleagues, the Regional Deputy Directors and those temporary staff for the speed and accuracy in the editing and basic compilation of more than nearly 522 lakh slips and nearly 1 lakh of household schedules. The compilation of village directory was taken up at the headquarters and I am equally grateful to the officers and staff who have worked whole heartedly on the job in a collective and co-operative venture. It is not possible nor fair to name in this. The maps contained in the handbook have been prepared in the Cartographic Section of my office. However, the analytical note included in this volume has been prepared by Shri M. L. Sharma, Deputy Director of Census Operations. I am thankful to all who have contributed to bring this publication possible. The census organisation is also grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these handbooks and to the Controller, Printing and Stationery, Madhya Pradesh, Bhopal and his staff for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri P. Padmanabha to whom we are all deeply grateful. Our thanks are also due to Shri N. G. Nag, Deputy Registrar General (Social Studies) for all the help that we received from him and his section.

K. C. DUBEY
Director of Census Operations
Madhya Pradesh.

Number of Towns			327	4

* Includes 77 inhabited villages which have been treated wholly as urban outgrowth of nearby City/Town.

** Includes 58 uninhabited villages of which Abadi Area have been merged in nearby City/Town.

विश्लेषणात्मक टिप्पणी

ANALYTICAL NOTE

NOTES AND EXPLANATIONS

This note gives the meanings and explanation of terms and concepts used in this handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, workers etc., it is not possible to appreciate the data presented in the handbook. Thus one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a bit less of a building than the Indian versions of the sky scrapers in one of the metropolitan cities, or that a central jail household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent.

Concepts and Definitions

Rural/Urban :

It has been the tradition of the Indian Census to present the census data for rural and urban areas separately. In fact, in all the Censuses throughout the world this classification of census data into rural and urban units is generally recognized. However, distinction between rural and urban is not yet amenable to a single definition which would be applicable to all countries.

The definition of an urban unit at the 1971 Census was as follows —

(a) All places with a municipality, corporation cantonment board or notified town area ;

(b) All other places which satisfied the following criteria.

(i) A minimum population of 5,000 ;

(ii) At least 75 per cent of male working population engaged in non-agricultural pursuits ; and

(iii) A density of population of at least 400 per sq. km. (1,000 per sq. miles).

The same criteria is retained at the 1981 census also that comparability with the previous census could be ensured and which would provide ba i; for analysing of figures and urbanisation in the country. But it has to be remembered that the urban criterion of 1961 and 1971 censuses is that the males working in activities such as fishing, logging, etc. were treated as engaged in non-agricultural activity and therefore contributed to the 75% criterion in 1961 and 1971 censuses, whereas in the 1981 census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Applying the criteria described above, a list of 327 towns was finalised and it is these 327 towns which are treated as urban areas for the purpose of 1981 census. The additional Secretary to the Govt. of India in the Ministry of Home Affairs sent a letter to the Chief Secretaries of the State Governments as back as 10th May, 1979, requesting them to ensure that no changes are made in jurisdiction and boundaries of municipalities and revenue villages, tahsils, sub-divisions and districts during the period from 1-1-1980 to 30-6-1981. However, subsequent to our finalization of rural and urban frame the State Government in the Local Government Department notified many places as notified areas and municipalities. Such places have not been treated as towns for the purpose of census and the secretary to Government in the Local Government Department had agreed to this arrangements. Similarly, the State Government raised the status of 6 municipal committees to that of municipal corporations. These new municipal corporations are also treated as municipal committees.

While dealing with the subject of rural and urban break up mention may be made of the area under the Special Area Development Authority. The Special Area Development Authority have been constituted under the Madhya Pradesh Nagar Tatha Gram Nivesh Adhiniyam, 1973 and they enjoy the power to function as a municipality so far as the municipal management of that area is concerned. The limits of these Special Areas include large portions of rural areas comprising number of villages

situated around the core town or village of such Special area. For example, Orchha is a SADA area in Tikamgarh district but there is no town in this area. Similarly, Malanjkhand in Balaghat district, Bheraghat in Jabalpur district, Mandav in Dhar district and similar other cases are SADA areas but there is no urban area within that. The objective of the SADA areas perhaps is to control the future development of these areas in a planned manner and that is all. It was, therefore, not considered desirable to treat such SADA areas at par with other urban bodies like municipal corporations, municipal committees etc. and only that part of it is treated as urban which is really so. As such in the Korba SADA area only Korba town has been treated as urban and rest of the area remains in the rural frame.

Urban Agglomeration:

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 census Very often large railway colonies, university campuses, port areas, military camps, etc. come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a contiguous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration'. An urban agglomeration may constitute :—

(a) A city with continuous outgrowth, (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ;

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Standard Urban Area :

A new concept of Standard Urban Area introduced in 1971 census will also be followed for the 1981 Census. The essential requirements for the constitution of a Standard Urban Area are—

(i) it should have a core town of a minimum population of 50,000, (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades. Certain Standard Urban Areas were determined on this basis in 1971 and some basic data were presented for 1951, 1961 and 1971 for such areas and their components. Similar data have been presented for the Standard Urban Areas in 1981 also. The idea is to present basic data for those areas for four to five decades so that the urbanisation process in these areas can be studied. However, there have been minimum changes in the constituent units of the Standard Urban Areas of 1981 Census as compared to those of 1971, but the list of SUA remained unchanged.

Size Class of Towns :

The urban areas are classified into 6 classes referred to as towns of Class I to VI. The classification is shown below—

Class I towns	100,000 and above
Class II towns	50,000 to 99,999
Class III towns	20,000 to 49,999
Class IV towns	10,000 to 19,999
Class V towns	5,000 to 9,999
Class VI towns	Less than 5,000

It is customary to treat a town having a population of 1 lac and above as a city.

Census House :

A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building had a number of flats or blocks which were independant of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they have been considered as separate census houses.

In some cases, however, it was difficult to apply the definition strictly. For example, in an urban area, a flat has five rooms, each having direct

entrance to the common staircase or courtyard which by definition had to be treated as five census houses. If all these five rooms were found occupied by single household entire flat was treated as one census house. In such cases singleness of use was taken into consideration to avoid undue proliferation of the number of census houses.

An occupied residential census house means a census house which is actually used for residential purposes, either wholly or partly by one or more households.

Household :

The term household in census is defined as a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any one of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, "Ashrams" etc., These are called institutional households. There may be one member households two member households or multi - member households. For census purposes, each one of these types is regarded as a 'household'.

There are three types of households viz, normal, institutional and houseless households. A houseless household is that which is normally found to be residing on the road side, pavements, in hume pipes under staircases, or in open, temple, mandaps, platforms and the like. Institutional households have been explained above. Those households which do not fall in the category of institutional household and houseless household have been categorised as normal households, The enumerator was required to indicate in the Household Schedule whether the household belonged to 'Institutional household' or 'Houseless household'. For institutional 'I' was written against the question 'Type of household' and 'O' was indicated in the case of houseless household. For normal household, no entry was required to be made.

The enumeration of institutional households was done in the manner the normal households were enumerated during the enumeration period from 9th February to 28th February, 1981. The houseless households were enumerated on the night of 28th February, 1981.

Scheduled Castes and Scheduled Tribes

Scheduled Castes and Scheduled Tribes are those found in the Notification of Scheduled Castes/ Scheduled Tribes Order (Amendment) Act, 1976 (108 of 1976). By this amendment, area restrictions for most of the Scheduled Castes and Scheduled Tribes have been removed. However, the area restriction still remains in respect of Dhobi (in Bhopal, Raisen and Sehore districts) : Kotwal and Pardhi (in Bhind, Dhar Dewas, Guna, Gwalior, Indore, Jhabua, Khargone, Mandsaur, Morena, Raigarh, Ratlam, Shajapur, Shivpuri, Ujjain and Vidisha Districts) and Kumhar (in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi and Tikamgarh districts) Scheduled Castes. Likewise Keer and Pardhi Scheduled Tribes are still restricted only in Bhopal, Raisen and Sehore districts ; Mina in Sironj sub-division of Vidisha district ; Panika in Chhatarpur, Datia, Panna, Rewa, Satna, Shahdol, Sidhi, and Tikamgarh districts; Pardhi, Bahelia, Bahellia, Chita Pardhi, Langoli Pardhi, Phanse Pardhi, Shikari, Takankar, Takia in (1) Bastar, Chhindwara, Mandla, Raigarh, Seoni and Surguja districts, (2) Baihar tahsil of Balaghat district, (3) Betul and Bhainsdehi tahsils of Betul district, (4) Bilaspur and Kotghora tahsils of Bilaspur district, (5) Durg and Balod tahsils of Durg district, (6) Chowki, Manpur and Mohala Revenue Inspector's Circles of Rajnandgaon district, (7) Murwara, Patan and Sihora tahsil of Jabalpur, district, (8) Hoshangabad and Sohagpur tahsils of Hoshangabad and Narsimhpur district, (9) Harsud tahsil of Khandwa district, (10) Bindra-Nawagarh, Dhamtari and Mahasamund tahsils of Raipur district.

Persons belonging to the castes/tribes mentioned above found in the districts other than those where Scheduled have not been treated as scheduled castes or scheduled tribes as the case may be. It may be mentioned here that scheduled castes can belong to the Hindu or the Sikh religion only, while the scheduled tribes belong to any religion. The list of Scheduled Castes and Scheduled Tribes relating to Madhya Pradesh relevant to 1981 census has been given immediately after this note as Annexure—I.

Literates and Educated Persons :

A person who can both read and write with understanding in any language is treated as literate.

person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

The test for literacy was necessary only when the enumerator had any doubt about any person returning as 'literate'. The test for literacy was ability to read any portion of the Enumerator's Instruction Booklet and to write a simple letter. Ability merely to sign one's name was not considered adequate to qualify a person as being able to write with understanding. If a person claimed to be literate in some other language with which the enumerator was not familiar, the respondent's word was taken as correct.

All children of the age of 4 years or less were treated as iiliterate even if they might be going to school and had picked up reading and writing a few words.

Classification of workers by Industrial Category :

At the 1981 Census, the question which were canvassed in the Individual slip to elicit information on economic characteristics of the population were as follows :—

(i) Q. 14A Worked any time at all last Year ?

Yes

(H/ST/D/R/B/I/O) No.

Q. 14B If yes in 14A, did you work for major part of last year ? Yes (1)/No (2)

ii Q. 15A Main activity last year ?

Yes in 14B (C/AL/HHI/OW)

No in 14B (H/ST/D/R/B/I/O)

15B Q. 15B Yes–Any other work any time last year ?
Q. 14B No—Work done any time last year ?

Yes (C/AL/HHI/OW)/No

C/AL/HHI/OW

iii Q. 16–If No in 14A or 14B, seeking/available for work ? Yes (1)/No (2).

The above questions were formulated after detailed discussion at the Data User's Conference and technical group. At the 1961 and 1971 Censuses, the economic questions were based on different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work, respectively. Current status approach was thought to be irrelevant in the context of our country where usual status of a worker is considered to be more appropriate.

The above questions are in three parts and have been designed in such a way that first of all it attempts to divide the population into two broad groups viz.,

(1) those who have worked any time at all during the last year, (2) those who have not worked at all.

The latter group consist of the non-workers. This information is obtained in Q. 14-A. Having classified the population into two groups, the next attempt has been to classify those who have worked any time into Main workers and Marginal workers, on the basis of time spent on work as well as secondary work, if any, of the Main workers. If a person had worked for six months or more (180 days or more) he was treated as Main worker and and if the period of work was less than six months he was regarded as a Marginal worker. In Q. 15B details of secondary work or marginal work are obtained. Finally an attempt has been made to determine whether those who are non-workers or marginal workers are seeking or are available for work.

It will thus be seen that these questions on economic aspects have been so designed as to identify all workers, full time workers or seasonal workers or marginal workers and non-workers with reference to the activities during the last one year period prior to the date of enumeration.

The various terms and definitions used in collecting the economic data have been explained briefly in the following paragraphs.

Definition of work :

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

For persons on regular employment or engaged in regular type of work, temporary absence during the reference period on account of illness, holiday, temporary closure, strike etc., was not a disqualification for treating them as workers.

Persons under training, such as apprentices, with or without stipends or wages were also treated as workers. In the case of a person who had been offered work but had not actually joined, he was not treated as a worker. Rent receivers, pensioners etc., were not treated as economically active unless they also engaged themselves in some economic activity.

In all these questions, the reference period is the one year ; preceeding the date of enumeration. Certain types of work such as agriculture, household industry like *gur* making etc., carried on either throughout the year or only during certain seasons or part of the year, depending on the local circumstance. In all such cases the reference period has been the broad time span of the agricultural seasons preceeding the enumeration.

Main Workers :

The main workers are those who have worked for a major part of the year preceeding the enumeration. Main activity was reckoned in terms of time disposition. For example, if a person had worked as daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months, he was treated as a Main worker on the basis of total time spent on work and his main activity have been reckoned as Daily Wage Labourer since he spent major part of his time on work in this activity than as cultivator or agricultural labourer.

Marginal Workers :

Marginal workers are those who have worked any time at all in the year preceeding the enumeration but have not worked for a major part of the year. For example, if a person who is mostly doing household duties, or is mainly a student, or a rentier or a beggar and the like who is basically a non-worker had done some work at some time during the reference period, he was treated as a marginal worker.

Non-Workers :

Non-workers constitute of householders, students dependents, retired persons or rentiers, beggars, inmates of institutions, unemployed persons etc. They are persons who have not worked any time at all in the year preceeding the enumeration.

Main activity of workers ;

The main activity of workers has been classified into four categories viz., cultivator, agricultural labourer, household industry and other work in the PCA at the 1981 census. A significant departure has, therefore, been made while presenting the data on economic activity which relate to only four broad categories indicated above as against nine industrial categories of the 1961 and the 1971 censuses. The nine categories of the 1971 census were—(i) Cultivator, (ii) Agricultural labourer, (iii) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, (iv) Mining, (v) Manufacturing, Processing and servicing with sub-categories—(a) At Household Industry and (b) Other than Household Industry, (vi) Construction, (vii) Trade and Commerce, (viii) Transport, Storage and Communications, and (ix) Other services. The correspondence between the categories of 1981 and 1971 are as under—

1981 Category	1971 Category
I	I
II	II
III	V(a)
IV	III,IV,V(b),VI,VII,VIII & IX

Cultivator :

For purposes of census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, groundnuts tapioca, etc. and pulses, raw jute and kindered fibre crop, cotton etc., and 'does not' include fruit growing, vegetable growing or keeping orchards or groves or working of plantation like tea, coffee, rubber, cinchona, opium and other medicinal plantations.

Agricultural Labourer:

Persons working in another person's land for wages in money, kind or share have been treated as agricultural labourers. An agricultural labourer has no risk in the cultivation and he has no right of lease or contract on land on which he works.

Household Industry :

Household Industry is defined as an industry conducted by the head of the household himself/ herself and or by the members of the households at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of registered factory which would qualify and has to be registered under the Indian Factories Act.

Household Industry relates to production, processing, servicing, repairing or making and selling (but not merely selling) of goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithing, tailoring etc. It does not include professions such as a pleader or doctor or barber or 'dhobi' even if such professions are run at home by members of the household.

Other workers :

All workers, i.e. those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in household industry are 'other workers'. The type of workers that come under this category include factory workers, plantation workers, trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc.

ANNEXURE I

MADHYA PRADESH

[The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976]

Dated the 18th September, 1976

Scheduled Castes :

1 Audhelia.
2 Bagri, Bagdi.
3 Bahna, Pahana.
4 Balahi, Balai.
5 Banchada.
6 Barahar, Basod.
7 Bargunda.
8 Basor, Burud, Bansor, Bansodi, Bansphor, Basar.
9 Bedia.
10 Beldar, Sunkar.
11 Bhangi, Mehtar, Balmik, Lalbegi, Dharkar.
12 Bhanumati.
13 Chadar.
14 Chamar, Chamari, Bairwa, Bhambi, Jatav, Mochi, Regar, Nona, Rohidas, Ramnami, Satnami, Surjyabanshi, Surjyaramnami, Ahirwar, Chamar Mangan, Raidas.

45 Sawar, Sawara.

46 Sonr.

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The History of the District Census Handbook could be traced from the 'Village lists' brought out for every district in 1901 and 'village statistics' for every district in 1911. But this was discontinued in 1921 and 1931. In 1941, however 'village statistics' were brought out by then Central Provinces and Berar Government. It was for the first time in 1951 the practice of bringing out a single volume known as the District Census Handbook, giving villagewise statistics and other census tables for the district at the cost of the State Government was initiated and is continuing since then.

The District Census Handbook, compiled by the Census Organisation on behalf of the State Government is one of the most important publications of the census and is widely used by planners, administrators, academicians and researchers.

The scope of the District Census Handbook has gone considerable change since 1951. In 1951 the District Census Handbook contained only the Primary Census Abstract and the Census tables. In view of the usefulness of this publication, improvements were made in 1961 by including non-census data like climate, agriculture, co-operation industry, education, health etc., as also an 'Introductory Note' for each district. Unfortunately, the desire to make the district census handbook more comprehensive delayed its publication. Therefore, in 1971, it was decided to publish the district census handbook in three parts in order to release the maximum data as and when finalised. Part A contained the Village Directory which gives villagewise non-census statistics of land use, area and amenities available within the village. Part B contained the villagewise Primary Census Abstract and Part C contained various administrative statistics. Part A and B were, however, published in one volume since it was economical to do so as data for both the parts became available early. Parts A and B were published separately in Hindi and English versions. Collection of data for Part C was cumbursome and it took unduly long time in its finalisation, and ultimately this publication had to be abondoned in view of the enormous delay in its printing.

In 1981 census, with a view to avoid delay in bringing out of DCH series, the part containing the administrative statistics has been dropped. Thus the present series of District Census Handbook consists of two volumes viz DCHB Part A and DCHB Part B. Part A contains the village/Town Directory and Part B contains the Town/Villagewise Primary Census Abstract of the concerned district.

Part A–Village Directory contains information about the name of village, total area of village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc.

In addition there are four appendices to the Village Directory as under—

(1) Tahsilwise abstract of educational, medical and other amenities.

(2) Land utilization data in respect of census towns.

(3) Tahsilwise list of villages where no amenities are available, and

(4) Tahsilwise list of villages according to the proportion of Scheduled Castes/Scheduled Tribes population by ranges.

The last two appendices have been included for the first time in 1981 census. Appendix III will be helpful for planning input in areas/villages where basic infrastructure is lacking and Appendix IV will be helpful for planning welfare programmes for Scheduled Castes/Scheduled Tribes at micro level, particularly in relation to area development orientation programmes.

Similarly the Town Directory contains seven statements as below—

Statement I—Status and growth history.

Statement II—Physical aspects and location of towns.

Statement III—Municipal Finance.

Statement IV—Civic and other amenities.

Statement V—Medical, educational, recreational and cultural facilities.

Statement VI–Trade, Commerce & Industry and Banking.

An additional statement IV-A is meant only for Class-I and Class-II towns giving the civic and other amenities in notified slums. This statement has been introduced for the first time in 1981 census.

Part B—The town/villagewise Primary Cenus Abstract gives the basic data like area of the village, occupied residential houses, total number of households, population by sex, as also the sexwise population of Scheduled Castes and Scheduled Tribes, literacy and population by sex into four broad industrial categories viz., cultivators, agricultural labourers, household industry and other workers, marginal workers and non-workers.

The inclusion of Primary Census Abstract relating to the Scheduled Castes and Scheduled Tribes at the tahsil/town level is another important feature of the DCHB series of 1981 census.

An appendix containing Development Block-wise—'Vikas Khandwar' totals of PCA figures has also been included.

ANALYTICAL NOTE

Narsimhapur District is situated in the central part of Madhya Pradesh and lies between the latitude 22° 45′ and 23° 15′N; and longitude 78° 38′ and 79 38′ East. The tropic of cancer passes about 27 km. above the northern-most point of the district. The district is surrounded by seven districts viz., Sagar and Damoh districts in the north, Jabalpur district in the north-east, Seoni district in the south-east, Chhindwara district in the south, Hoshangabad district in the south-west and Raisen district in the north-west.

The district gets its name from the headquarters town, Narsimhapur which owes its identity to the temple of Lord Narsimha (the God's incarnation in the form of lion-headed man, according to Hindu mythology) located in the town.

Narsimhapur district was reborn as a separate district on 1st November, 1956, with the formation of new State of Madhya Pradesh as a consequence of the Reorganisation of States on linguistic basis.

The district has suffered a series of setbacks. It was for the first time in 1818, Narsimhapur was formed as a separate district when this tract was annexed to the British territory. Originally, the district was known as Gadarwara but subsequently it was altered as Narsimhapur probably because the district headquarters was shifted to Narsimhapur. The first set-back was in 1836 when Narsimhapur district was abolished and annexed to Hoshangabad district as a sub-division. Its status was restored in 1843 but again it was abolished in 1932. Finally in 1956 it was reborn as a district and since then it continues to maintain its status. There has been no jurisdictional change in the district during 1971-81.

For revenue and general administration the present Narsimhapur district is diviaed into two tahsils viz., Narsimhapur and Gadarwara of which the former is situated on the eastern half and the later on the western half. Both the tahsils have the headquarters town of the same name. Both the tahsils from a separate sub-division in each.

Physiography :

The major part of the district is situated south of the Narmada river and a greater portion of it consists of the alluvial basin, in the upper half of the Narmada valley, about 20' in depth which is a continuation of the *haveli* of Patan tahsil of Jabalpur district. Within the limits of the district, the valley extends east to west across its length. The valley actually begins just beyond the marble rocks of Bheraghat (in Jabalpur) about 24 km. by road beyond the eastern boundary of the district and extends as far as Handia in Hoshangabad district. To the north, the valley is over-looked by the Vindhyan escarpments irregular in alignment, while to the south, the northern face of the Satpura range, overlooks the valley running almost in a line parallel to the Narmada river.

The alluvial tract south of the Narmada valley which forms the major portion of the district is most fertile. It is drained by the tributaries of Narmada, i.e. Sher, Shakkar, Dudhi rivers. The portion of the valley slopes towards north. It is plain and free from significant undulation except in the Chhaparwaha tract where frequent but isolated peaks shoot up in the very heart of black soil. There are, however, occassional mounds of gravel or *Kankar* which are ideally suited for village sites.

The valley north of the Narmada is rather narrow being closely bound in the north by the southern scarps of the Vindhyas, eroded and broken at intervals. This is somewhat a hilly tract. This valley is drained by the Biraj Nallah which flows to the south-west and joins the Narmada near Hirapur and Timarawan villages.

The Hill Ranges :

The Satpura and the Vindhychal are the two hill ranges passing through the district. The southern scarp belonging to the Vindhyan series of rocks consisting of hard masses of red standstone is a irregular alignment along the northern boundary of Chhaparwaha tract, north of the Narmada river, while to the south, the Satpura hill range runs almost in a line parallel to the Narmada river. It is mostly composed of sandstone and shales of very old origin. The highest peak in the district is Unchakhera peak which is 2,999 ft. Originally the whole range was covered with thick forests but the callous attitude towards these forests since recent past due to indiscriminate felling of trees, particularly for settlement, agriculture and grazing

cattle has destroyed the beauty and grandeur of the flora and fauna of the district.

Rivers :

The district is drained by Narmada and its tributaries the Sher, Shakkar, Dudhi, Soner, Berurewa, Hiran and Sindhor. The slope at the Narmada valley is towards west and the Narmada river forms the main channel of the drainage system which runs about 128 km. of its course through the district flowing from east to west. It is the important river of the district which rises in the plateau of Amarkantak (22° 40' : 81° 45') in Shahdol district. After flowing through Mandla and Jabalpur districts it enters Narsimhapur district. Narmada is fed almost entirely from the south by Dudhi, the Shakkar, the Berurewa, the Sher and Umar while Itiran river and Sindhor are the major feeders from the north. The Sher with its tributary Macha Rewa in Narsimhapur tahsil and the Shakkar and its tributary in Gadarwara tahsil rise from the Satpura range. These rivers have established themselves by deep rocky channels fringed on either side by a ravinous terrain, broken, occassionally by beds of alluvial deposits. The Dudhi forms the western boundary of the district with Hoshangabad.

The rivers and streams of the district get flooded during the peak period of July and August in the rainy season. The streams in the hill regions are turbulant but in the valley they are gentle. During the dry season most of the streams become dry and water is available only in the channels of the main streams.

Flora :

The district has a forest area of 1241.00 sq.km. which is 24.19 percent of its total geographical area. According to H G. Champion's classification, the forests in the district can be classified into two main groups viz. (i) the Tropical (dry) Mixed Deciduous forests and (ii) the Tropical Moist (Mixed) Deciduous forests. On the northern part of the district, the forests that are found aligned on the Vindhyas are most compact while on its southern part, the forests are most extensive on the Satpura hills. Considerable area under forests have been maintained under reserve categories and specially those on the slopes over 25° are protected forests mainly to obviate soil erosion due to their further exploitation. The reserve forests account for 660 sq. km. while those protected are spread over in an area of 581 sq. km.

The seasonal rainfall and the nature of the soil in the district provide a variety of vegetation ranging from grasses to deciduous trees. The principal trees in most forests are Teak (*Tectona grandis*), Saj (*Termialia Tomentosa*), *Khair* (*Acacia catechu*), *Kullu* and Bamboo. The other species which are also found in the district are *dhaura* (*Anogeissus latifolia*), Sal (*Shorea robusta*), *tendu* (*Deaspyras melanoxylon*), *Achar* (*Buchania lanzan*), *aonla* (*Emblica officinalis*), *seja* (*Lagerstroemia parviflora*), *bija* (*pterocarpus marsupium*), *mahua* (*Madhuca longifolia*) and *Salai* (*Boswelia serrata*).

Teak forests both of poor quality and superior quality, are found in Gotegaon, Narsimhapur and Khairi ranges in different patches. The best quality teak forests are, however, found around Salechauka village on the alluvial soil in Khairi range. Mixed forests are widely distributed and are generally of poor quality. In the mixed forests numerous species occur. Bamboo forests do not occur in isolation but are found in some of the teak forests of Khairi and Richhai ranges.

Fauna :

Prior to the enactment of the various Acts and rules for the protection of wild birds and animals, the species that were common in their occurence and were subjected to wild game in the district included tiger, panther, Sambhar, *Chital*, *Nilgai*, black buck, wild pig, sloth bear, *Chausingha* etc. Most of these species have now become rare in their occurence because of indescriminate shooting in the past. Monkeys, jackals and hyena are however very common and are found in all the forest ranges.

Climate ;

The climate of Narsimhapur district is generally pleasant except during the hot summer months of May and June when discomfort is felt. It has three distinguishable seasons : (i) The summer season which starts from or about the festival of Holi in March but the mercury rises to its peak during May and June ; (ii) the rainy season when the monsoon sets in by the third weak of June. July and August experience heavy downpour, and (iii) the winter season which starts from October but it is chara-

cterised by a bit hot and humid days during the first half and thereafter the temperature gradually falls.

Rainfall and temperature

The annual average rainfall in the district is is 1300.8 mm. About 90 per cent of the rainfall is received during June to September and the rest is received generally during winter. The rainfall records of the first half of this century indicate an average of 60 rainy days in a year in this district.

From about the Holi festival in March, the temperature begins to increase and ascends to its peak in May when the temperature varies between the minimum and maximum of 25°C to 41°C. On some days the temperature may even go up to 47°C. During December and January which are the coldest months, the maximum temperature of the day remains around 25°C while the mean daily minimum dips to 8°C to 9°C. During cold waves the night temperature may go down to even the freezing point.

History *

As far back in 1872, a chipped and oval shaped stone hand-axe, fashioned out of Vindhyan sandstone, was discovered at Bhutra (Bhatra), about 10 km. north of Gadarwara in the district. The hand-axe was found in gravels along with the fossils is believed to be the earliest pre-historic relic of man and is regarded as belonging to the pre-chellean Age. The recent archaeological explorations conducted in the Narmada basin form Barmanghat to Jhansighat in Narsimhapur district have also yielded a large number of palaeolithic tools and mammalian fossils of pleistocave period. Thus, these furnishes some of the far decisive pieces of evidence of human existence.

The rockshelter with some rudimentary paintings at Bijori gives evidence of the existence of primitive men.

There is a village known as Bilthari (1981 Census L. C. No. 114) in Gadarwara tahsil which was earlier known as Balisthali, the abode of Raja Bali. Here Raja Bali is said to have performed a sacrifice. The traditions also connects the district with the Pandavas. The Pandava brothers are believed to have spent a considerable part of their period of exile in this wilderness. Five *Kundas* still found in a nearby island in the Narmada are said to have been created by them for their use during their sojourn at Barman.

Thereafter the earlier history of the district is shrouded in oblivion untill this tract comprising Narsimhapur district came in possession of the Satavahana rulers in the beginning of the 2nd Century A.D. After the dismemberment of the Satawahana Kingdom the history of Narsimhapur district is mostly enveloped in darkness. However, as we enter the Gupta period, a number of corroborative records lead us to conclude that this region came under their survey in the 4th Century A.D. Samudra Gupta (C. 335-380 A. D.) the Indian Nepolean, as Vincent Smith calls him, is known to have carried his arms to the Southern and Central India. During the Gupta era, King Hastin is said to have ruled over Dabhala together with the eighteen forest Kingdoms between 475 and 517 A.D. The Dabhala was coterminous with the Chedi Country with its capital at Tripuri. Another Parivrajaka ruler, Samskshova (A.D. 518-528) also ruled over this region. These Parivrajaka rulers were feudatories.

With the downfall of the Gupta empire towards the second half of 6th Century A.D. we again enter an obscure period in the history of Narsimhapur district. Later in the 9th Century, the district became a part of the Kalchuri Kingdom. The Kalchuri rulers, (also known as Haihayas. an ancient race) claimed themselves as Chaidyas or lords of the Chedi Country. The early Kalchuris had their capital at Mahismati on the bank of Narmada. A branch of this dynasty succeeded in carving out a vast principality in the Chedi country, also as Dahala-Mandla, with their capital at Tripuri. It extended from the Gomti to the Narmada. The Vamareja undertook this enterprise at the end of seventh Century A.D. Kokalla I (C. 850-890 A.D.) was, however, the first king of the Tripuri line to raise its fortune and give it distinction. Fifteen more kings of this dynasty continued to rule from Tripuri till about the middle of thirteenth Century.

After the decline of the Kalchuri power, Narsimhapur flourished as a principality of Jashraj

---

*Based on the description given in Gazetteer of Narsimhapur, 1971, Chapter II, p.p. 39 to 72.

and Bachhraj, the father and uncle of Alha and Udal, the legendry Banapar heroes. They had their capital at Bohari villages, about 32 kms. west of Narsimhapur.

The advent of the Raj-Gond ruler marks a new epoch in the history of Narsimhapur. The origin of the Gond rulers of Garha-Katanga is commonly ascribed to one Yadavaraya also called as Yadurai or Yadorai, who established himself at Garha-Katanga towards the close of the 14th Century and initiated a long line of Kings, who were destined to play an important role in the history of Gondwana. Sangram Shah (1480-1541), the most well known ruler of the Gond Kingdom of Garha-Katanga (Garha-Mandla) country issued on a career of conquest and annexed to his kingdom 52 *garhas*. The construction of the fort of Chauragarh, 32 kms. south-west of Narsimhapur town, is attributed to Sangram Shah. A notable event of his reign was the marriage of his son, Dalpat Shah, with Durgawati, a princess of remarkable beauty.

Sangram Shah died in 1541 A.D. His son and successor Dalpat Shah had an uneventful reign of seven years. Then Rani Durgawati came into power and ruled over the reign with outstanding courage for next sixteen years (1548-1564 A.D.) But the decline commenced with the attack on Durgawati's dominion by Akbar's viceroy, Asaf Khan in 1564. The Rani fought with courage and at first she was victorious but Asaf Khan's continued repulsive attack eventually defeated the valarous queen at a pass near Narhi. She was severely wounded and preferring death to dishonour she snatched a dragger from the driver of her elephant and stabbed herself to death.

With the fall of the valourous queen, countless booty fell into the hands of the victorious general and an extensive territory was added to the Mughal dominion. Asaf Khan then proceeded to conquer Chauragarh, where the vast treasure of Gond rulers was kept and where Birnarain was staying after he was wounded in the battle. Birnarain came out of the fort to oppose him and after a short battle he was slain. There is however another version that Birnarain was trampled to death in the confusion that followed the seize of the fort by Asaf Khan.

For some years after this, Asaf Khan appears to have held Garha-Katanga as an independent principality. Garha-Katanga was incorporated in the Mughal dominion as a *Mahal* of the *Sarkar* of the same name in the *Subah* of Malwa. For the next 25 years it was placed under the direct charge of a succession of Mughal Officer. The kingdom was soon after restored to the Garha Kings.

Chandra Shah, the next ruler obtained recognition of Akbar to his succession. Chandra Shah's rule lasted for a few years. Chandra Shah's second son Madhukar Shah succeeded him by murdering his elder brother but subsequently feeling guilty of his crime. he burnt himself to death in the hollow of a dry *pipal* tree.

Madhukar Shah's son, Prem Narain took over the reign. In 1634 A.D. the Bundela King, Jujhar Singh of Orchha led an unprovoked attack on Prem Narain who took refuge in the fort of Chauragarh, where he was for some months closely beseiged. However, Jujhar Singh pretended at last to raise the seige on the terms that Prem Narain retires from Gondwana. Prem Narain came out of the fort in the faith of a solemn oath and proceeded to the tent of his enemy to discover that he was the victim of a foul treachery. Vindictive Jujhar Singh immediately ordered his enemy's head to be severed. The fort was thereafter occupied by Jujhar Singh. Jujhar Singh's triumph was, however, short lived. On a complain by Herde Shah, son of Prem Narain to the Emperor, of this unprovoked attack and brutal assasination of his father, Shahjahan gave and ultimatum to Jujhar Singh. He finally sent a large army of 20,000 with three eminent generals under the supreme command of Aurangzeb, who defeated the Bundela Army. Thus the district again became the scene of Gond activity, under the overall suzerainty of the Mughals. Thereafter. till 1781, the Mandla Gond power was declining. The last king, Narhar Shah was defeated by the Maratha Pandits of Sagar. The latter administered the country for about eighteen years, the Maratha Pandits were expelled by the powerful Bhonsla rulers of Nagpur and in 1785, Madhoji Bhonsla obtained the cessasion of Mandla and the valley of Narmada from the Poone Court in return for a payment of Rs. 27 lakhs of rupees.

Raghoji, the son and successor of Madhoji, however, obtained possession of nearly the whole of Garha-Mandla but he could not defend his new

acquisitions from the repeated plunder and pillage of the Nawab of Bhopal and the Pindari free-booters. In 1807, Narsimhapur and Hoshangabad were handed over to the Maratha Governor, Sadik Ali Khan for the support of the frontier force. In the time of this Governor the district was invaded by Amir Khan Pindari, Nawab of Tonk but he was defeated and Sadik Ali Khan followed up this victory by attacking Bhopal. To cope with these free booters and also to repulse the periodic invasion by the generals of Bhopal, Sadik Ali Khan had to incur a mounting expenditure which could be met by an exorbitant tax.

The year 1817 A.D. marks a turning point in the history of Narsimhapur district for it became a British territory under the agreement made after the Battle of Sitabuldi on 27th November of the same year. Ever since Appa Sahib assumed full powers as the ruler of the Bhonsla Kingdom, he had been contemplating to nullify the growing British influence and for the restoration of Maratha empire to its prestine splendour and glory. As soon as Appa Sahib started his intrigue at Nagpur, Lord Hastings sent an order to Brigadier-General Hardyman to immediately advance his force towards Nagpur. Leut. Colonel Macmorive who commanded the British forces stationed at Gadarwara attacked the Maratha Garrison fort of Srinagar (in Narsimhapur tahsil). The Maratha forces were defeated and the fort of Chauragarh was occupied by the British on the 13-5-1818. Appa Sahib escaped and was reported to have joined Chain Shah, the rebel Diwan of Harrai on 15th May.

In 1820, the charge of district was entrusted to a commission consisting of Lt. Montgomerie and Capt. Anbert. In the year 18 5 the two *mahals* viz. Chawarpatha and Tendukhera were placed under British management by Scindia in part payment of Gwalior contingent. In 1836, Narsimhapur was abolished as a separate district and was annexed to Hoshangabad but after the Bundela rising of 1842 the Narsimhapur restored to its status as a district.

The Bundela rising started in Sagar district in 1842 owing to the discontentment of the people at the jurisdiction of the new Civil court. The revolt spread like a wild fire over a vast area of the northern region which for about a year was in turmoil. The principal insurgent in the district was the Gond Chief, Delan Shah of Madanpur who captured Deori and Chawarpatha. The British troops continued to supress the revolt and by April, 1843, the disturbances practically ceased with decisive victory on neither side. At last a compromise was struck. But the smouldering discontent among the alienated landlords was further aggravated by a series of social changes and it ultimately burst into the great revolt of 1857 with an attempt to throw off the British yoke. The district of Narsimhapur was then garrisoned by four companies of the 28th Madras Infantry under the command of Captain Woolley. Excepting the three landlords, namely, the Raja of Hirdepur and Gond Chiefs of Madanpur and Dhilawar, who had their estates in the hilly tract bordering Bhopal or Sagar, the major portion of the district remained unaffected. In August 1857 inroads were made by the Sagar and Bhopal rebels into Chawarpatha *pargana* and the town and the police station of Tendukheda were plundered by them. By the middle of October the district was in great danger. The *pargana* north of the Narmada was again invaded by the Nawab Ali Khan of Bhopal with 150 pathans of Rahatgarh. About the same time two rebel leaders, Meherban Singh and Sheo Baksh Lodi entered the district from two different directions. In the encounter by the British cavalry under the command of Capt. Ternan and Captain Woolley the insurgents at Tendukheda quickly retired and the noted rebel Gangan Singh was killed. The Chawarpatha *pargana* was also cleared of all rebels and the absconding leader Delan Shah too was captured in May, 1858 and hanged.

The events of the Great Revolt of 1857, and its subsequent repercussions were so vivid on the general minds that the impact brought about a national awakening and a sense of patriotism. The growth of this national conciousness found active expression in the formation of the Indian National Congress in 1885. Nationalist leaders like Gaya Dutt, Manik Chandra Kochar, Shankar Lal Chaudhary etc. and the people of Narshimpur district joined the freedom struggle and whole heartedly supported the civil disobedience movement and the non-cooperation movement envolved by Mahatma Gandhi, the father of the nation and fought for the independence of the country. The Indian Independence Bill was passed by the British Parliament on the 1st July 1947 according to which the country attained Independence in the mid-night of August, 1947.

Distribution of Area and Population:

With an area of 5,133 sq. km. according to the figures supplied by the Surveyor General of India, Narsimhapur district contains 1.15 per cent of the total area of the State. This is slightly more than half of the average area of a district in the State (9,854 sq.km.) In terms of area, the district is 39th in rank. It is two and a half times bigger than Datia the smallest district in the State and about 7 times smaller in size as compared to the biggest district, Bastar.

According to the 1981Census, the population of the district is 650, 445 with 336, 981 males and 313, 464 females. 562,318 persons live in 1,029 inhabited villages and another 88,127 persons live in 4 towns of the district. The following table gives the area, population and density in the two tahsils and 4 towns of the district.

TABLE 1

Area and population of tahsils and towns, 1981

Tahsil/Town	Total/ Rural/ Urban	Area (sq. km².)	Population	Density per sq. km.
1. Gadarwara Tahsil	T	2,190.1	311,630	142
	R	2,182.3	288,103	132
	U	7.8	23,527	3,028
(i) Gadarwara (M)	U	7.77	23,527	3,028
2. Narsimhapur Tahsil	T	2,286.6	338,815	148
	R	2,243.5	274,215	122
	U	43.1	64,600	1,499
(i) Narsimhapur (M)	U	14.71	34,266	2,329
(ii) Kareli (M)	U	21.70	16,131	743
(iii) Chhota-Chhindwara (M)	U	6.68	14,203	2,126

Note—The totals of area figures of the tahsils re-present land use as supplied by Land Records Department, M.P. while for towns area figures have been supplied by the concerned local bodies.

The percentage of urban population to total population of the district is 13.55 which is much below the State average of 20.29 per cent. It follows that the district is predominantly rural in character. With the pace of urbanisation, though not very significant, the proportion of rural population in the district is slowly decreasing.

The following table gives the distribution of villages according to the availability of different amenities.

TABLE 2

Distribution of Villages According to the Availability of Different Amenities

Sl. No.	Name of Tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities: Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply
1.	Narsimhapur	573	310	35	573	77	22	39	94	256
			54.10	6.11	100.00	13.44	3.84	6.81	16.40	44.68
2.	Gadarwara	456	303	36	456	96	25	23	47	253
			66.45	7.89	100.00	21.05	5.48	5.04	10.31	55.48
	Total District	1,029	613	71	1,029	173	47	62	141	509
			59.57	6.90	100.00	16.81	4.57	6.03	13.70	49.47

It is heartening to note that drinking water facility is available in almost all the villages of the district. Educational facilities are available in 613 (59.57 per cent) out of 1,029 populated villages. 66.45 per cent of the villages in Gadarwara tahsil have this facility while in Narsimhapur tahsil it is available in 54.10 per cent of the total villages. But the literacy rate is found to be higher in Narsimhapur tahsil (30.83 per cent) as compared to that of Gadarwara tahsil (27.05 per cent).

Amenities like, medical, post and telegraph, market/hat and communications are too meagre. Only 6.90 per cent of the villages have medical facilities. Such villages are obviously large ones and about 24 per cent of the residents in them are better served while about 76 per cent of the population has to depend on other villages. The percentage of villages having this facility is found to be slightly higher (7.89) in Gadarwara than that of Narsimhapur tahsil (6.11).

16.81 per cent of the total villages in the district have this amenity of post and telegraph. Again, Gadarwara tahsil is better served, where the percentage of villages covered with this amenity works out to 21.05 as against 13.44 per cent in Narsimhapur tahsil.

Organised markets or hats are held in only 47 out of 1,029 villages in the district. Such amenities are available only in bigger villages and towns. Thus the residents of smaller villages have to walk longer distances either to sale their produce or to purchase their basic necessities which are not available in their villages.

Bus and rail are the important means of communications which amenities are available in only 6.03 per cent of the total villages in the district while the amenity like approach to pucca road is available in only 13.70 per cent of the villages. Economic development of an area depends directly on better communication facilities and approach by pucca roads. The district is poorly served with these amenities and therefore the pace of economic development is rather slow.

Nearly half the total number of villages in the district have been provided with electric connections either for agriculture or domestic purposes or for both. In terms of absolute numbers, Narsimhapur tahsil has more villages (256) having this facility as compared to that of Gadarwara (253) but proportionately the coverage is higher in Gadarwara tahsil (55.48 per cent) than in Narsimhapur tahsil (44.68 per cent).

The following table gives the proportion of rural population served by different amenities.

Table 3

Proportion of Rural Population Served by Different Amenities

Sl. No.	Name of Tahsil	Total Population of inhabited villages in the tahsil	Proportion of rural Population served by the amenity of							
			Educational	Medical	Drinking water	Post & telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	Narsimhapur	274,215	227,899	56,859	274,215	100,388	35,993	389,64	85,639	172,491
			83.11	20.74	100.00	36.61	13.13	14.21	1,323	62.90
2	Gadarwara	288,103	260,772	74,331	288,103	137,605	60,640	393,18	54,827	201,559
			90.51	25.80	100.00	47.57	21.05	13.65	19.03	69.96
	Total : District	562,318	488,671	131,190	562,318	237,453	96,633	78,282	140,466	374,050
			86.90	23.33	100.00	42.23	17.18	13.92	24.98	66.52

Practically every village in the district has some or the other source of drinking water and thus the entire population is better served with this facility. Well is the main source of drinking water in villages of this district. Most of the villages in this district are situated on the fertile alluvial basin of the Narmada and therefore the area is rich in underground water. Even tubewells are found to be most successful in this district.

Regarding medical facilities in villages, Gadarwara tahsil is found to enjoy a better position both in terms of the number of villages having medical institutions as also the population being served by them. In respect of other amenities like post and telegraph, market or hat and power supply, Gadarwara tahsil has an upper hand. Villages in Narsimhapur tahsil, however, have better amenities of communications and approach by pucca road.

The data given in the following table will further help elucidate the information given in tables 2 and 3.

TABLE 4

Distribution of villages not having certain amenities arranged by distance ranges from the places where these are available.

Village not having the amenity of		Number of villages where the amenity is not available and available at distance of			
		-5 Kms.	5-10 Kms.	10+Kms	Total (Cols. 2+4)
1		2	3	4	5
1	Education	384	27	5	416
2	Medical	459	371	128	958
3	Drinking water	--	--	--	--
4	Post and Telegraph	671	169	16	856
5	Market/Hat	405	396	181	982
6	Communication	379	358	230	967

There are 416 villages out of a total 1,029 villages where educational amenity is not available. But a majority of them have such an amenity within a distance of 5 km. 27 Villages(2.62%)have schools at5 -10 km. distance and only 5 villages have this amenity beyond 10 km. In the rural situation, it can be hoped that 40.4 percent of the non-school villages in the district can still take advantage of amenity located within 5 kms. of them.

93.10 per cent of the villages do not have medical amenity in them; 44.60 per cent have it within a distance of 5 kms; 36.06 percent have the amenity from 5-10 km. away and the rest 12.44 per cent have this beyond 10 km. Whatever medical amenity that exists in the district, though not adequate, but the situation is not that bad as is found in many tribal districts of the State.

83.19 per cent of the villages in the district do not have the amenity of post and telegraph. Of the 856 villages where this amenity is not available,671 (65.21%) villages can avail of it within a distance of 5 km. Another 16.42 per cent of the villages have this facility within a distance range of 5-10 km. There are only 16 (1.56%) villages in which the residents have to walk a distance of more than 10 km to avail of this amenity.

95.43 per cent of the villages do not have the facility of organised market or hat. This accounts for 82.82 per cent of the total rural population of the district. This is perhaps the gravest ills of the rural economy that suitable market facility is not available in the village or within easy reach to the farmers to sell

their produce. Even if they are required to go to some other village to avail of this facility, it is all the more difficult to carry their produce in the absence of proper communication facilities. There are about 93.97 per cent of the villages which do not have the amenity of communications.

As soon as a village grows in size and assumes the status of a town, it is to be hoped that invariably, it must have all the amenities indicated above and serves not only the population in the town itself but also those residing in villages located in its surrounding areas.

The following table, however, give the distribution of villages which are having one or more amenities according to distance range from the nearest town.

TABLE 5

Distribution of villages according to the distance range from the nearest town and availability of different amenities

Distance range from the nearest town (in kilometres)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communication	Approach by pucca road	Power supply
0–5	98	56 (57.14)	1 (1.02)	98 (100.00)	12 (12.24)	3 (3.06)	8 (8.16)	33 (33.67)	72 (73.47)

51+	7	3 (42.86)	—	7 (100.00)	1 (14.29)	—	—	1 (14.29)	2 (28.57)
Unspecified	—	—	—	—	—	—	—	—	—
Total	1,029	613 59.57	71 6.90	1,029 100.00	173 16.81	47 4.57	62 6.03	141 13.70	509 49.47

It may be seen from the above figures that majority of the villages having one or more of the amenity are situated 16-50 kms. away from the nearest town which is an indication of the fact that the pace of urbanisation in the district is very slow. There are only 4 urban centres in the district and that too not well distributed in different directions.

Amenities like post and telegraph, communications, approach by pucca road generally have a direct link with the nearest urban centre from a village. This is the reason that villages situated nearer to an urban centre do possess such amenities which is evident from the fact that as the distance range increases the number of villages having the amenities decreases.

The following table gives the distribution of villages according to population range and amenities available.

TABLE 6

Distribution of villages according to population range and amenity available

Population Range	Number of inhabited villages in each range	Number (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cation	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
-499	633	277 (35.86)	2 (0.32)	633 (100.00)	15 (2.37)	5 (0.79)	15 (2.37)	44 (6.95)	234 (36.97)
500-1,999	366	356 (97.27)	47 (12.84)	366 (100.00)	129 (35.25)	23 (6.28)	35 (9.56)	83 (22.68)	247 (67.49)
2,000-4,999	30	30 (100.00)	22 (73.33)	30 (100.00)	29 (96.67)	19 (63.43)	12 (40.00)	14 (46.67)	28 (93.33)
5,000+	—	—	—	—	—	—	—	—	—
Total	1,029	663 (59.57)	71 (6.90)	1,029 (100.00)	173 (16.81)	47 (4.57)	62 (6.03)	141 (13.70)	509 (49.47)

It may be noticed that the percentage of villages having one or more amenities is highest in the highest population range obviously because the amenities are generally available in large villages. Thus availability of amenity increases in relation to the increase in the population size of the villages.

As regards availability of amenities in villages of Narsimhapur and Gadarwara tahsils the situation is slightly better in the latter as it contains relatively large sized villages.

Wheat and Rice are main staple food of the population of the district as shown in the table given below.

TABLE 7

Main staple Food in the Majority of villages in each Tahsil

Sl. No.	Name of Tahsil	Main staple food
1	Gadarwara ..	Wheat, Rice
2	Narsimhapur ..	Wheat, Rice

The following table gives the distribution of villages according to land use.

TABLE 8

Distribution of Villages According to Land use

Sl. No.	Name of Tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total area
1	2	3	4	5	6
1.	Gadarwara	456	215,168.41	168,006.04 (78.08)	10,836.75 (6.45)
2.	Narsimhapur	573	222,929.32	174,300.40 (78.19)	9,264.45 (5.32)
	Total : District	1,029	438,097.73	342,306.44 (78.13)	20,101.20 (5.87)

53.19 per cent of the total land area in the district is used for cultivation as against the state average of 42.38 per cent. Except for some hilly areas and forests on the northern and southern parts of the district the major part of it consists of rich alluvial tract most suited for agricultuarl purposes and thus the percentage of area under cultivation in this district is high.

The district had been and is poor in the irrigation facilities. The percentage of irrigated area to total cultivable area is as low as 5.87. However, exploration from the tube-well irrigation in the fifties raised hopes for extension of irrigation in some parts of the district but the potential has not been exploited fully to bring substantial area under irrigation.

The following table gives the growth, density and sex-ratio of urban population in the district.

TABLE 9

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

	District						State					
Census year	Total Population	Urban Population	%Urban Population	Decadal Percentage variation in urban population	Density (Population per sq. km.)	Sex-ratio (No. of females per 1,000 males)	Total Population	Urban Population	%Urban Population	Decadal percentage variation in urban population	Density (population per sq. km.)	Sex-ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	339,110	37,136	10,95	+21.73	2,868	921	26,071,637	3,132,937	12.02	+33.16	2,034	907
1961	412,406	48,996	11.88	+31.94	980	890	32,372,408	4,627,234	14.29	+47.70	2,482	856
1971	519,270	67,324	12.97	+37.41	1,324	889	41,654,119	6,784,767	16.29	+46 63	2,378	868
1981	650,445	88,127	13.55	+30.90	1,733	898	52,178,844	10,586,459	20.29	+56.03	2,170	884

The pace of urbanisation in the district has been very slow. The proportion of urban population has gone up from 10.95 per cent in 1951 to 13.55 per cent in 1981 while the corresponding growth for the State as a whole has been from 12.02 per cent to 20.29 per cent. Urbanisation is a process in which existing towns grow in size and new urban units come up. In both this front the district is far behind as compared to the overall position of the State.

Density :

The density of population per sq. km. in Narsimhapur district has always been lower than that of the State but since 1961 the gap is reducing gradually,

Sex-ratio :

The sex-ratio i.e., number of females per 1,000 males of the urban population of the district showed a declining trend from 1951 to 1971 and in 1961 there has been a reverse trend while for the State as a whole there was a decline between 1951 and 1981 and thereafter an increasing trend is noticed.

The information in Table 10 given below is Nil since no, new town has been added in the district in 1981 nor there has been declassification of any old town.

TABLE 10

New Towns/added Towns declassified in 1981 Census

Name of Towns	Population 1981 Census
(a) Added	Nil
(b) Declassified	Nil

The following table gives the per capita receipt and expenditure in towns.

TABLE 11

Per capita receipt and expenditure in towns

Class, Name and civic status of the towns	Per capita								
	Receipt			Expenditure					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and convenience	Public works	Expenditure on public institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
IV Chhota-Chhindwara (M)	43.64	26.55	17.09	36.03	5.74	9.21	2.30	5.65	13.13
III Gadarwara (M)	72.64	10.92	61.72	72.46	6.39	20.56	34.30	0.89	10.32
IV Kareli (M)	48.77	28.03	20.74	44.59	6.32	16.27	13.69	0.54	7.77
III Narsimhapur (M)	35.51	9.71	25.80	33.81	4.97	17.95	1.35	0.68	8.86
Total	49.16	16.10	33.06	46.46	5.72	16.93	12.56	1.51	9.74

In all the 4 towns of the district, the per capita receipt is found to be higher than the per capita expenditure. Gadarwara municipality has the distinction of earning the highest per capita revenue. On the other hand the per capita expenditure of this town is also highest and that too under the head public works. Looking to the per capita earning and overall per capita expenditure of this municipality, the expenditure on public institutions like schools, hospitals, library etc. is very low. With its relatively poor earning Chhota-Chhindawara municipality had been spending a sizeable proportion on public institutions.

The following table gives the number of schools per ten thousand population in towns.

TABLE 12

Schools per ten Thousand population in towns

Class, Name and civic status of town		No. per ten thousand population			
		Higher Secondary/ Inter/PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary
1		2	3	4	5
IV	Chhota-Chhindwara (M)	1.41	..	2.11	4.22
III	Gadarwara (M)	1.90	..	2.12	2.55
IV	Kareli (M)	1.16	..	2.48	2.48
III	Narsimhapur (M)	1.17	..	2.04	3.21

Whereas the secondary and middle school do not seem to bear any corelation with population size and literacy rate, the primary school seems to have some relation as would be evident from the fact that Narsimhapur with highest literacy rate (63.13 per cent) is second highest in terms of the number of primary schools per ten thousand population (3.21) closely followed by Chhota-Chhindwara with literacy rate (61.18 per cent) and number of primary schools per ten thousand population being highest (4.22).

TABLE 13

No. of Beds in Medical Institutions in Towns

Class, Name and civic status of the town		No. of beds in medical institutions per 1,000 population
IV	Chhota Chhindwara (M)	0.70
III	Gadarwara (M)	1.53
IV	Kareli (M)	0.37
III	Narsimhapur (M)	4.08

Narsimhapur, being the district and tahsil headquarters town enjoys much better status in regard to the above facility because of its having the district hospital.

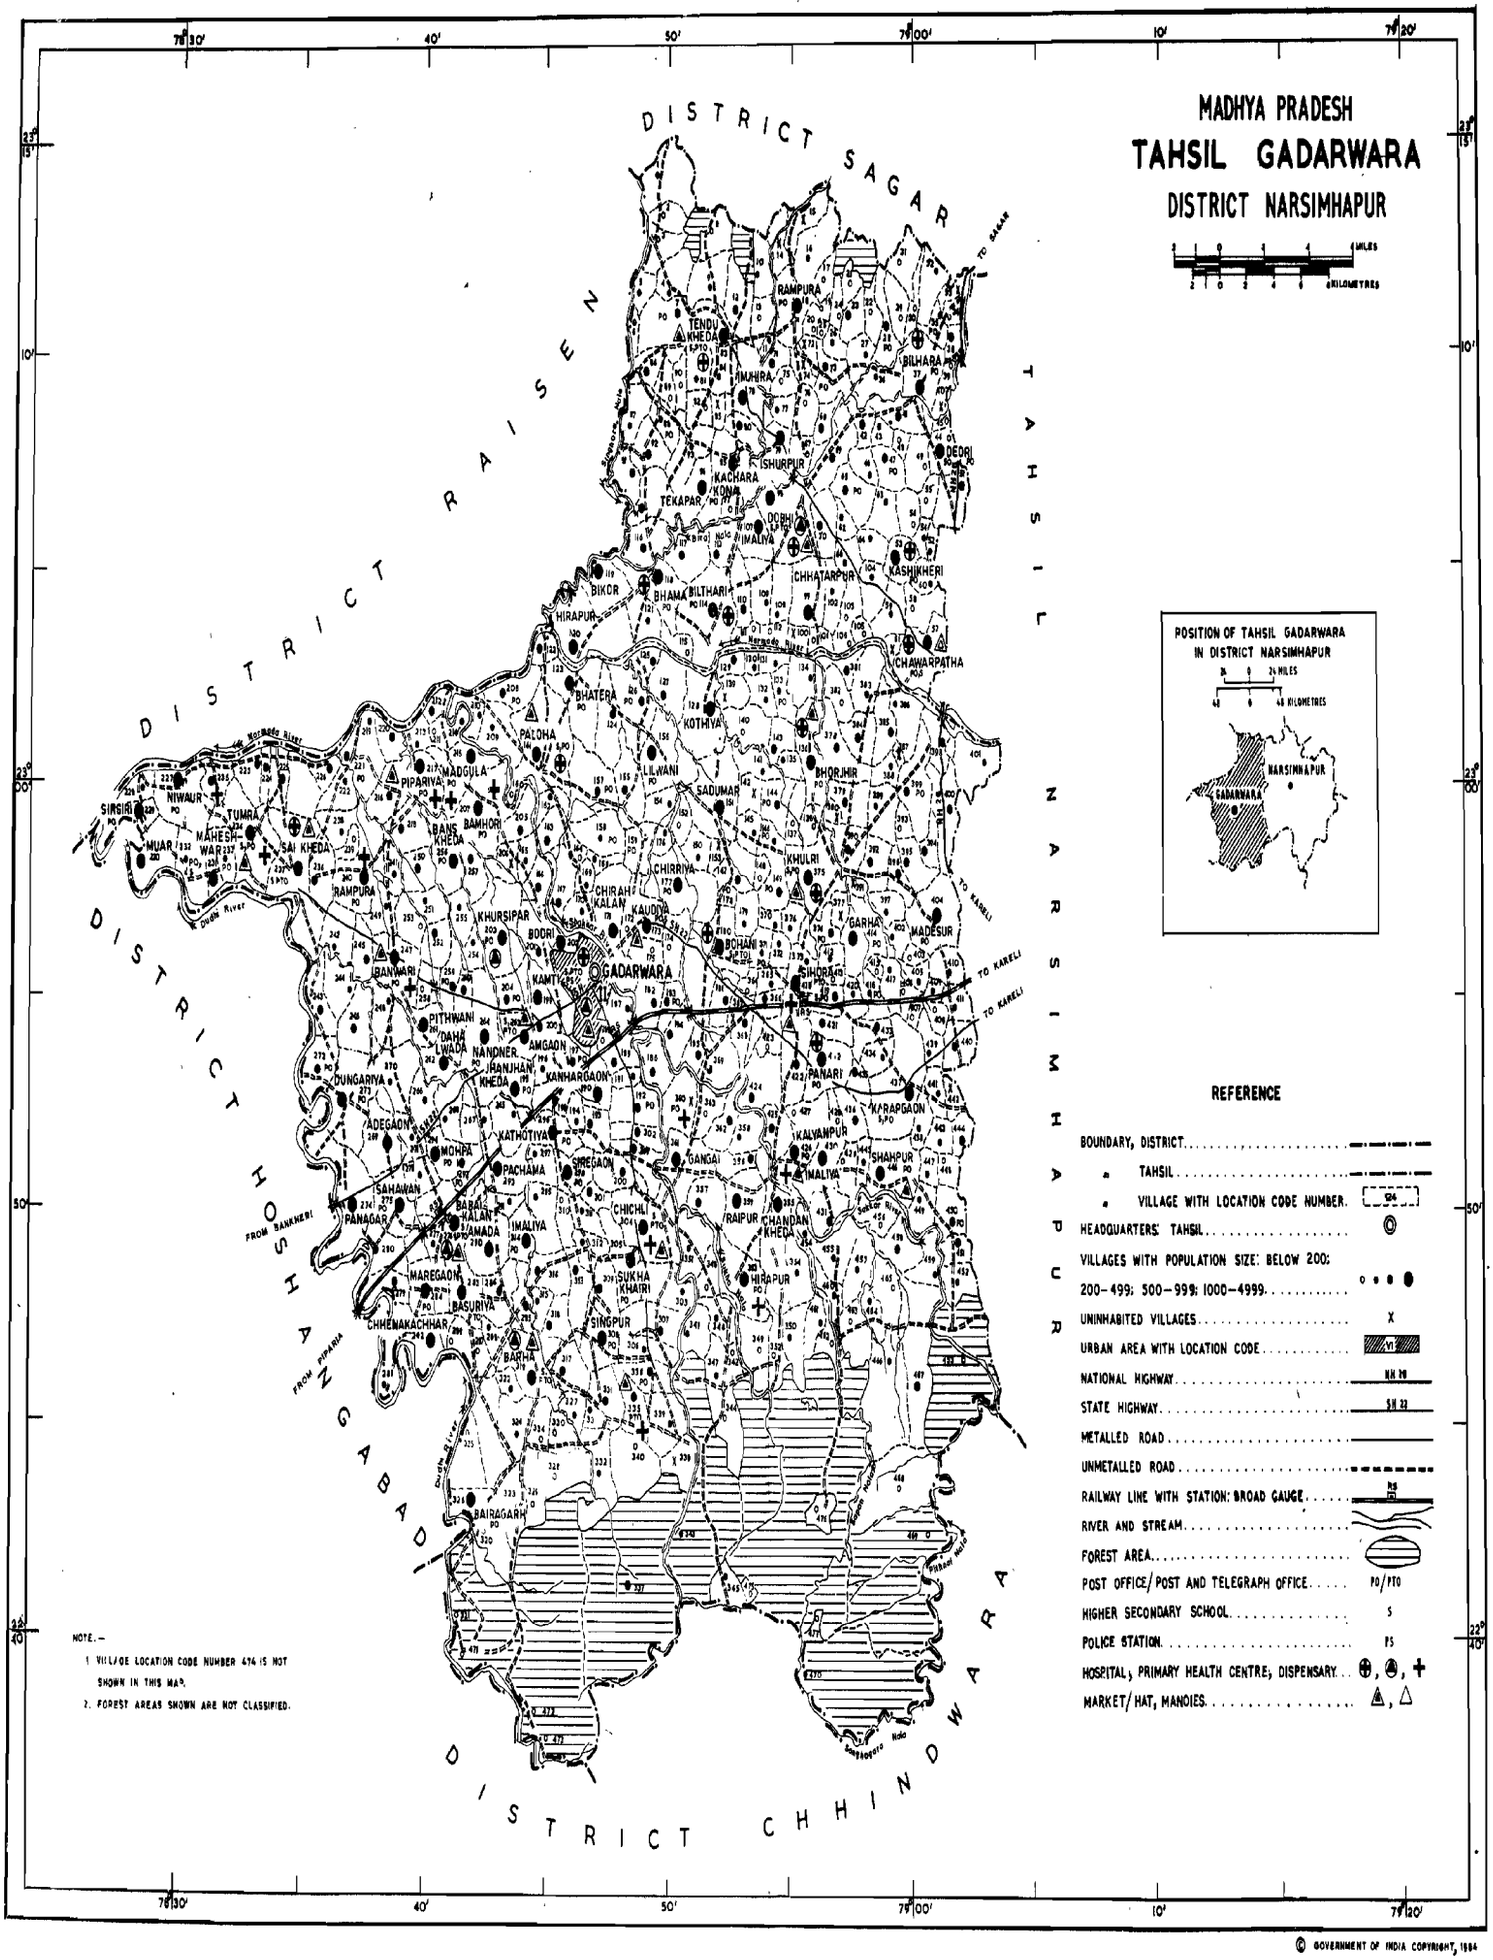

The information in Table 14 is Nil since there is no Class I & II towns in the district.

The following table gives the most important commodity manufactured, imported and exported in towns.

TABLE 15

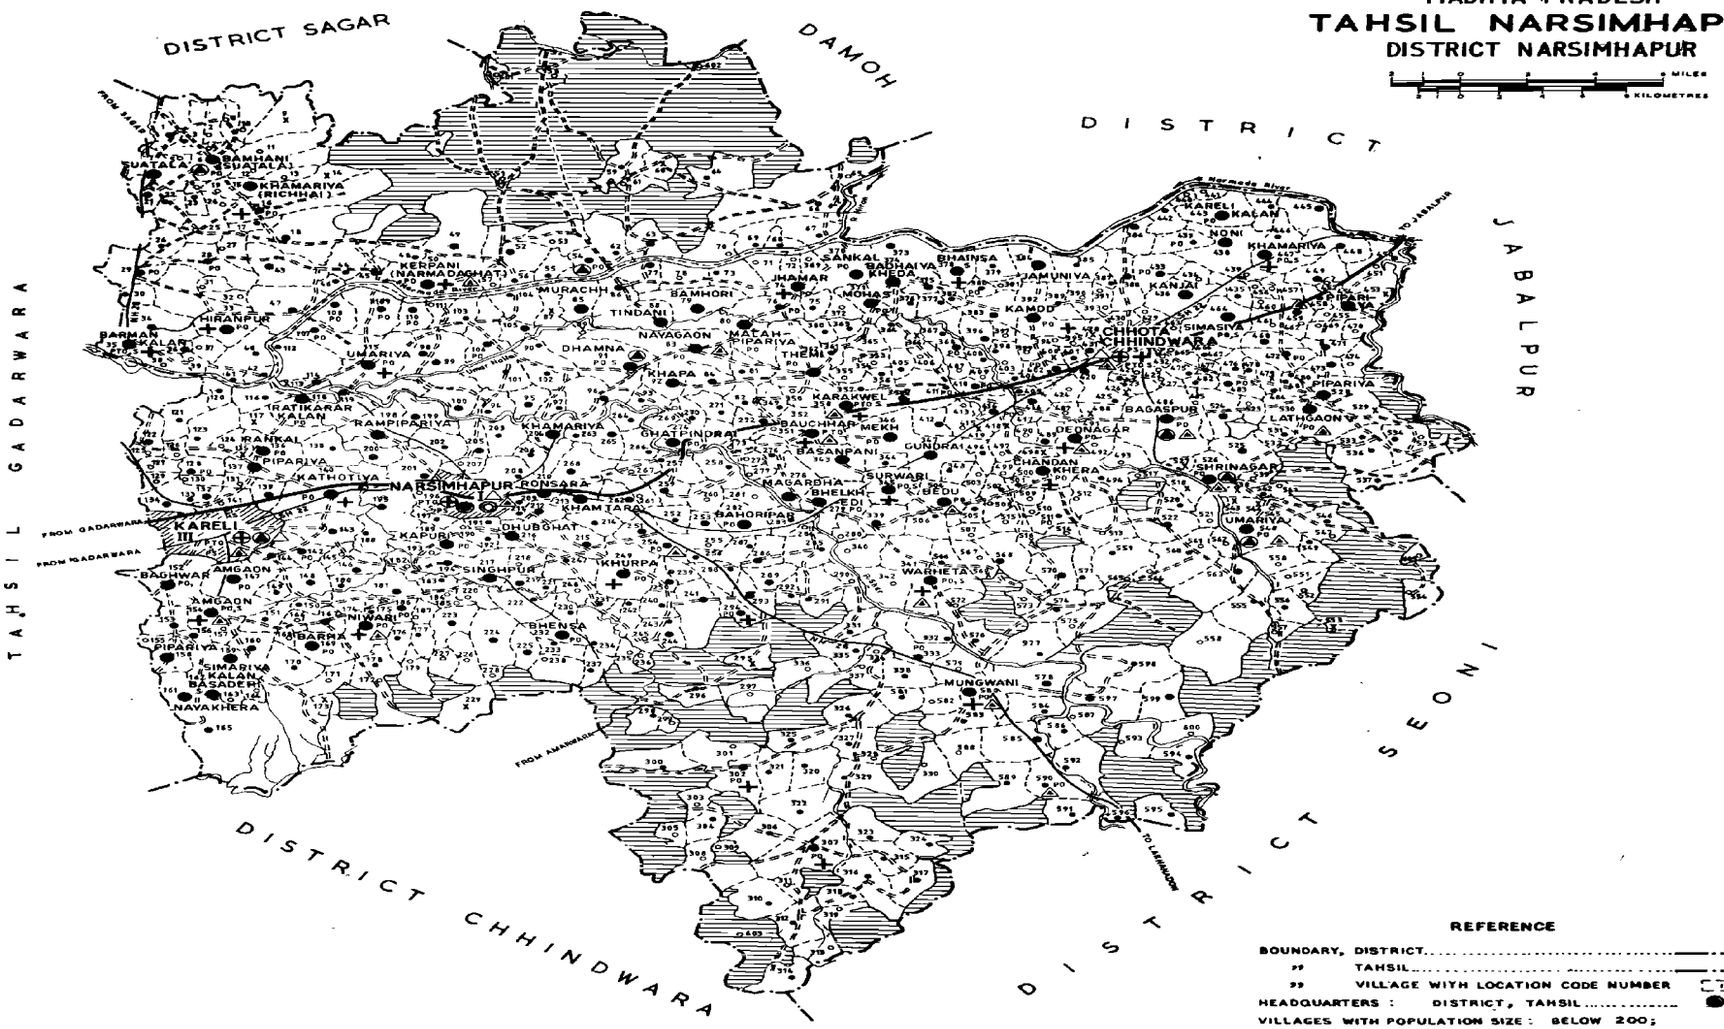

Mots important commodity manufactured, imported and exported in towns

Class, Name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
IV Chhota-Chhindwara (M)	Nylone Rope	Gram	Rice
III Gadarwara (M)	Pulse	Pulse	Cloth
IV Kareli (M)	*Gur*	*Batra*	Kerosene
III Narsimhapur (M)	Note-book	Tomatto	Rice

NOTE EXPLAINING THE CODES USED IN THE VILLAGE DIRECTORY

The Village Directory contains information about the name of village, total area of village, total population and the number of households in the villages, amenities like education, medical, drinking water, post and telegraph, market day, communications, approach to village, distance from the nearest town, power supply, staple food, land use, places of religious, historical and archaeological interest etc. This is further supplemented by information on copies of newspapers coming in the village, number of motor cycles/scooters/cars/jeeps and tractors available in the village.

Every village in a tahsil has been assigned a serial number which is the location code of the village to facilitate identification. Apart from the revenue villages, forest villages have also been listed. Villages that have been treated wholly or partly as urban outgrowths because of their being contiguous to an urban area have also been listed and a note indicating "included wholly or partly as urban outgrowth of such and such town" has also been given against each such village.

Information about the amenities available has been given in columns 5 to 10 of the Village Directory with the abbreviations used in different columns as indicated below: –

Where there are more than one institution of a type the number of such institutions has also been shown within brackets. If no facility or amenity is available within the village, a 'dash' is shown and next to it in brackets the distance in broad ranges viz., 5 km., 5-10 km. etc. of the nearest place where the facility/amenity is available has been indicated.

Column 5 : Educational facilities have been shown by adopting the following abbreviations :

P — Primary School
M — Junior Secondary or Middle School
H — Matriculation or Secondary School
PUC — Higher Secondary / Intermediate/Pre-University/Junior College
C — College (graduate level and above) like Arts, Science, Commerce etc.
I — Industrial School
Tr. — Training School
AC — Adult Literacy class/centre
O — Other Educational Institutions. These may include Sanskrit Pathshalas, Senior Basic School, Maktab, etc.

Where figures like P(3), M(2), H(1) etc. occur these denote that the village has three Primary, two Middle and one Higher Secondary School.

If there are composite schools like Middle school with Primary classes or Higher Secondary schools with Middle classes, these have been included in the number of Primary Schools and Middle schools as the case may be.

Column 6 : Medical facilities have been shown by the use of the following abbreviations:

H — Hospital
MCW — Maternity and Child Welfare Centre
MH — Maternity Home
CWC — Child Welfare Centre
HC — Health Centre
PHC — Primary Health Centre
PHS — Primary Health Sub-Centre
D — Dispensary
FPC — Family Planning Centre
TB — TB Clinic

NH — Nursing Home

RP — Registered Private Practitioner

SMP — Subsidised Medical Practitioner

CHW — Community Health Worker

O — Others

Column 7 : The types of the potable drinking water supply and the sources available in the village have been indicated by the following codes :

T — Tap Water

W — Well Water

TK — Tank Water

TW — Tubewell Water

HP — Hand Pump

R — River Water

F — Fountain

C — Canal

L — Lake

S — Spring

N — Nullah

O — Others

NA — Information not available

Column 8 : Post and Telegraph facilities have been shown by adopting the following abbreviations :

PO — Post Office

TO — Telegraph Office

PTO — Post and Telegraph Office

Phone — Telephone connection

Column 10 : Communication facilities have been indicated by the following codes:

BS — Bus Stop

RS — Railway Station

NW — Navigable Waterway (including river, canal, backwaters, etc.)

Only public transport like Bus, rail and waterway have been considered for this purpose.

Column 11 : Approach to village - This refers to the state of road etc. leading to the village.

This has been indicated by the use of following codes :

PR — Pucca Road

KR — Kachha Road

FP — Foot Path

Column 12 : Nearest town and distance - The distance in km of the nearest town (whether located in the state or in another state) has been given in brackets under this column.

Column 13 : Power supply : For this purpose, the following codes have been used under this column.

ED — Electricity for Domestic Purpose

EAg — Electricity for Agriculture

EO — Electricity for other purposes like industrial, commercial, etc.

EA — Electricity for all purposes listed above.

Column 15–19 : Land use : Break-up of area under different type of land use viz., forest, irrigated area, unirrigated area, culturable waste and area not available for cultivation has been furnished under columns 15–19.

(a) Forest - This includes all lands classed as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private, and whether wooded or maintained as potential forest land.

(b) Irrigated and unirrigated (land use) - The two columns (cols. 16 and 17)cover all agricultural land and include net area sown with crops and orchards or net cropped area and also current and other fallows. The latter implied all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than a year and more than five years. These columns do not include gross area sown or gross cropped area.

(c) Culturable waste - It includes lands fit for cultivation whether or not taken up for cultivation or once taken up for

cultivation but not cultivated for more than 5 years. Grazing land and land under groves have been included under culturable waste but this does not include 'orchards'. To be more precise culturable waste includes :

(a) Permanent pastures and other grazing lands,

(b) Land under miscellaneous trees, crops and groves,

(c) and cultivable lands not put to agriculture.

(d) Area not available for cultivation – This column gives the area of barren and uncultivable lands and lands put to non-agricultural uses like village sites, roads, water, rocks and hills etc.

Column 20 : This is a remark column but it has been used to indicate some important information relating to the village, For example, if there is any famous religious, historical or archaeological place in the village it has been indicated in this column. Some useful information like number of copies of news-papers coming in the village, number of motor cycles, scooters, jeeps, cars, tractors, etc., are available in the village has been given. The abbreviations used to indicate the above information relating to the village are as below:—

N – Copies of the news papers coming in the village.

M – Motor cycles/scooters available in the village.

C – Cars/Jeeps available in the village.

T – Tractors available in the village.

In case there is 'Nil' information for a village a 'dash' has been shown.

स्थानीय कोड नम्बर	ग्राम का नाम	ग्राम का कुल क्षेत्रफल (हेक्टेयर में)	कुल जनसंख्या एवं परिवारों की संख्या	उपलब्ध जन-सुविधाएं (यदि ग्राम मे सुविधाए उपलब्ध नही है तो कालम में (–) डैश लगाया गया है और उसके बाद ही कोष्ठक में ग्राम से जितनी दूरी पर सुविधाएं उपलब्ध है मोटे तौर पर वह दूरी इस प्रकार दर्ज की गई है -5कि.मी., 5-10 कि.मी. या 10+ कि.मी. Amenities available (if not available within the village, a dash (–) is shown in the column and next to it in brackets, the distance in broad ranges viz -5 kms, 5-10kms and 10+kms of the nearest place where the facility is available is given).

खंड II - नगर निर्देशिका

SECTION II - TOWN DIRECTORY

NOTE EXPLAINING THE CODES USED IN THE TOWN DIRECTORY

The details of statement presented in the Town Directory, 1981 are given below :—

Statement 1—Status and Growth History

This statement provides some basic data based on the Primary Census Abstract (PCA). In column 2 of the statement the class of the town has been indicated according to 1981 Census population of the core town as follows :—

Population	*Class*
100,000 and above	I
50,000 — 99,999	II
20,000 — 49,999	III
10,000 — 19,999	IV
5,000 — 9,999	V
Below 5,000	VI

The civic administration status of the town as in 1980 has been indicated. Where there is no civic body in the town it has been treated as *Census Town*. The following abbreviations have been used to denote the civic status of the town—

Municipal Corporation	M Corp.
Municipal Committee/Municipality	MC
Cantonment Board	CB
Notified Area Committee	NAC
Gram Panchayat	GP
Special Area Development Authority	SADA
Census Town	CT

Column 5 : Area (Sq. Km.) as supplied by the local bodies.

Statement II—Physical Aspects and Location of Towns

This statement gives for each town, physical aspect and location of towns. In colums 6 to 12 the name of and road distance in Kms. shown within brackets, from the State headquarters, District headquarters, Tahsil headquarters, nearest city with population 1 lac and above, Railway Station, Bus route, Navigable river Canal (if within 10 Km.) have been presented. If the name mentioned in these columns are the same as the referrent town itself the distance has been recorded as '0' (Zero). In case the railway station (Col. 10) or bus route (Col. 11) is not available in the referrent town, the name of nearest town where the facility is available with distance in Kms. from the referrent town has been presented. If navigable river/canal is passing within a distance of 10 Km. from the town the name of river / canal with distance has been presented in column 12. The abbreviation R and C stand for the River and Canal respectively.

Statement III—Municipal Finance, 1978-79

The data for this statement is collected from local administrative bodies and has been presented not only in respect of statutory bodies but also in respect of non-statutory bodies managing the civic administration of the town, if they have separate budgets and accounts of their own pertaining to the town.

Under column 12, the expenditure incurred by the civic authority on 'public safety' includes such items as fire fighting service, rescue operations during floods and fairs etc. Like wise, column 15 includes expenditures incurred on maintenance of schools, colleges and other institutions like public libraries, museum etc. The exact items covered, may however, vary from town to town, which would depend on the practice followed in this regard by each local authority.

Statement IV—Civic and other Amenities, 1979

The information given under columns 2 to 6

are new additions. Information under column 6 represents Pucca and Kachha roads for which abbreviations used are PR and KR respectively. In column 7 the various types of sewearge/drainage systems have been presented as given below—

Sewer	S
Open Surface Drains	OSD
Box Surface Drains	BSD
Sylk Drains	SD
Cesspool Method	CD
Pit System	PT

In Columns 8, 9 and 10 information collected from respective local bodies on different types of latrines has been presented. It includes public as well as private latrines.

In Column 11, the abbreviations used for the various prevailent methods of disposal of night soil are given below. Where more than one method is used, the information given upto two methods.

Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrine	ST
Sewerage	S

In Columns 12 and 13 the sources of protected water supply and the system of storage with capacity therein within brackets have been presented with the following abbreviations. Where more than one source or more than one system of storage exist, the information is restricted to two major sources of systems.

Colum 12

Tube well water/Hand pump	TW
Tape water	TA
Well water	W
Tank water	TK

Column 13

Overhead Tank	OHT
Service reservoir	SR
River infiltration gallery	IG
Borewell pumping system	BWP
Pressure tank	PT

In case of availability of fire-fighting service in a town 'Yes' has been indicated, otherwise the name of the nearest place where available and the distance in Km. within brackets, have been shown.

Statement IV (A)– Civic and other amenities in Notified Slums, 1979.

Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented.

Statement V—Medical, Educational, Recreational and Cultural Facilities, 1979.

In columns 4 and 5, the information collected from the State Health Department has been presented. The institutions run by private doctors have not been included. The information is limited for those institutions as are run by or aided by Government / Semi Government / Local bodies and charitable institutions or social service agencies like the missionaries. Where the family planning centres are attached to hospital or maternity and child welfare centres or primary health centres, those have been treated as independent unit and presented separately. The maternity and child welfare centres, veneral disease clinic, chest clinic leprosy clinic have not been given separately. These have been indicated alongwith other medical institutions in column 4. The following abbreviations have been used.

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	PC
T.B. Clinic	TB
Nursing Home	NB
Others	O

If there are more than one institutions of any type the number of such institutions have been

indicated within brackets e. g. dispensaries (2) nursing homes (4) etc.

All types of hospitals/dispensaries etc. whether allopathic or ayurvedic or unani or homeopathic have been covered in column 4. These institutions have been indicated with the following abbreviations :—

Ayurvedic	A
Unani	U
Homeopathic	Hom

In case of allopathic, no abbreviation is given.

If no medical facility is available in the referrent town the name of the nearest town with distance thereof has been given. In Columns 6 and 9, the information collected from the Educational Department has been presented with the following abbreviations.

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all Categories Arts, Science and Commerce	ASC
Law	L

If there are more than one institutions of a type the number has been given against each in brackets.

Column 10—The information has been collected from the Education Department. Where the institutions are found to be located just beyond the boundaries of the town but near the referrent town and for all purpose are considered as belonging to the referrent town only, such marginal cases have been included in the town directory. If there are more than one institutions of such type the number has been given against each in brackets. The following abbreviations have been used—

Shorthand	SH
Typewriting	Type
Shorthand & Typewriting	SH Type
Others	O

The vocational institutions like Applied Art/ painting College, Pharmacy College, B.Ed. College Teacher's Training Institutions, Music / Dancing School, Nursing School, etc. have been covered under 'Others'. However the type of institutions included under 'Others' have been described in the introductory note.

Columns 11 & 14—The information has been collected from the district Education Officers. The following abbreviations have been used—

Primary	P
Junior Secondary or Middle School	M
Matriculation or Secondary	Such type of institution does not exit in Madhya Pradesh
Higher Secondary/Intermediate/Pre-University/ Junior College / (10+2) System whether held in Schools or Colleges.	PUC

If there are composite schools like Middle schools with Primary classes, or Higher Secondary Schools with Middle classes, these have been included in the number of Primary and Middle schools respectively. For example, if in a town, there are two primary schools and one middle school with primary classes, the number of primary schools in the town have been given as three and that of middle schools as one even though there may be only three educational institutions. This also applies in the case of higher secondary schools.

If there are more institutions of a type in the town, these have been indicated with numbers within brackets against the abbreviations e.g. D(3), M (2), H (2), etc.

Column 15—The number of Adult literacy classes has been shown,
