MOTIF

Oranges of Nagpur are famous all over India. It has market not only in India but also abroad. This fruit was introduced for cultivation in Nagpur district some time around the end of 18th century by Raghuji Raje Bhosale. Its continuance since then confirms that soil and climate is suitable for growing oranges in this region.

The two varieties of oranges grown are 'Ambiya Bahar' and 'Mrug Bahar' and the area under production of this fruit is more than 10% of the total area of the distirct. The success story of oranges can be judged by the fact that more than 1.5 lakh tonnes of oranges worth Rs. 18 crores are grown these days. It is an economic boon to the people of the region.

Fruits are essential to the body for getting natural glucose. Let us grow more fruits.

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part–A related to village and town directory, Part–B to village and town PCA and Part–C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they

serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April 1982.

P. PADMANABHA,
Registrar General, India.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day)

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory, Part B to village and town-wise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other states in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health sub-centres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scolars and planners alike.

Brief History of the District

District Nagpur, named after the present city of Nagpur, was founded at the beginning of the 18th century by the Gond Raja, Bakht Buland. It subsequently became the capital of the Bhosles. It grew with the growth of the Bhosle kingdom and was considerably improved by the 'Rajas' of that dynasty. In 1817, the battles of Sitabuldi and Nagpur secured British influence in these territories and in 1853 it lapsed with the kingdom to the British Raj to become the capital of the Central Provinces in 1861. The growth and importance of the town was quickened by the advent of the then Great Indian Peninsula Railways (now called the 'Central Railway') in 1867. With the attainment of Independence in 1947 and the formation of Madhya Pradesh State it becomes and continued to be the capital of that state till the re-organisation of states in 1956. At present it forms one of the most important cities of Maharashtra State. It is also called the second capital of Maharashtra as at least one session (usually winter season), of the state legislative assembly is held at Nagpur every year.

The district previously included areas which now are partly in Wardha and partly in Bhandara districts. The area now constituting Wardha district was separated in 1862. Upto 1908 there were only four tahsils. Another tahsil was created with its headquarters at Savner. These five tahsils continued to be the parts of the district till 1981 census. As stated earlier with the re-organisation of states in 1956, the district was transferred from Madhya Pradesh to Bombay State. The district forms a part of Maharahstra since 1st May 1960.

Location, Relief and Drainage

Nagpur district lies between 20° 35′ and 21° 44′ north latitude and 78° 15′ and 79° 40′ east longitude at the southern base of the Satpuda hills. Chhindwara and Seoni districts of Madhya Pradesh State fall in its North. Bhandara district flanks it in the East and Chandrapur to the South. Wardha and Amravati districts are contiguous with its boundaries in the West.

The greater part of the district is an undulating plateau with a variation in height between 652.70 metres above sea level on the upland ridges in the North and about 274.50 metres near the kanhan river. This plateau surface of the district falls into three distinct drainage basins. The north-eastern and east-central portion (which is about two-third area of the district), is drained by the river Wainganga and its tributaries; the central and southern portion by the Wunna system which is itself a tributary of the river Wardha. The north-western fringes are drained by the Wardha and its tributaries, the Jam and the Kar. The terraced landscape of the Deccan lavas on the West has several flat topped hills well-furrowed on their sides by streams. In the North, the upland ranges are an extension of the Satpuda ranges. These are narrow in the West but wider to a breadth of about 19 kms. towards the East.

The western border of the district is marked by a low hill range extending more prominently from the environs of Mohli to the south of Umred, with the break of Wunna river almost in the middle.

The Wardha and Wainganga are the two main rivers of the district flow along a part of the

western and the eastern borders respectively and the drainage of the district is divided between them. The waters of the north-western and western areas are carried to the Wardha by the Jam and the Kar; and of the south-eastern portion by the Wunna and other minor streams. The north-eastern and east-central portion is drained by the Pench and Kanhan rivers, which is flowing south through the Satpuda hills, unite above the Kamptee when they are also joined by the Kolar; from here the Kanhan carries their united waters along the northern boundary of the Umred tahsil to join the Wainganga on the Bhandara border. To the east a few small streams flow direct to the Wainganga. The richest part of the district is the western half of the Katol tahsil. It possesses a soil profusely fertile and teems with the richest garden cultivation.

The Wunna rises near the hill of Mahadgad in the Pilkapar range and flows along the northern base of the Kauras plateau past Hingra and Bori where it is crossed by the Central Railway. It leaves the district at Ashta. The Jam rises among the hills south of Kondhali and flowing northwards into the centre of the Katol tahsil, takes a westerly turn past Katol and joins the Wardha at Jalalkheda. The Kar rises in the same range but flows directly south-west, reparting the Wardha and Nagpur districts till it joins the Wardha river at Khargad. The Nand flows across a small strip in the south of the district and joins the Wunna beyond the border of Wardha.

The chief rivers of eastern tract are the Pench and the Kanhan, both of which flow down from the Satpuda range in the Chhindwara district, and meet near Kamptee when they are also joined by the Kolar. The Kanhan entering the district near Bargaon takes a south-easterly course past Khapa to Kamptee, where it receives the Pench and Kolar. In its subsequent course it marks the boundary of the Ramtek tahsil, and after receiving the Nag river near the hills of Bhivakund, finally empties itself is into the Wainganga at Gondpipri in Bhandara.

The Kolar rises in the north-east corner of the Katol tahsil, and after passing through the rocky country of Lohgad in the Pilkapar range, emerges into the fertile plain of Savner and separates the Nagpur from the Ramtek tahsil until its place as a boundary river is taken by the Kanhan.

Other rivers of importance are those draining the eastern half of the Ramtek tahsil, the Bhawanthari, Sur and Gaotala-Sand. Most of the large rivers, where they flow through plain are characterised by high banks and rapid streams, but in the hot weather there are more rivulets with deep pools here and there.

Climate

The climate of the district is dry and salubrious. In fact Nagpur is one of the hottest places in India and May is the hottest month of the year. The cold season from December to February is followed by hot season from March to May. The south-west monsoon season is from June to September, while the period October to November constitutes the post-mansoon season. It may be added that the cold weather is of a short duration and the climate during this season is extremely pleasant. In the summer although the days are hot, the nights are comparatively cool. The average annual rainfall in the district is 1,161.54 mm. (45.73 inches). The rainfall generally increases from the west to the east in the district. The south-west monsoon usually reaches the district in the second week of June. The rainfall during the period, June to September constitutes about 90 per cent of the annual rainfall, July being the month with the highest rainfall.

Soil

The main soils of the district are kali (medium deep, black cotton), morand (comparatively light depth, light brown in colour), khardi (shallow, much mixed with sand and hence of greyish colour) and bardi (red gravel with boulders). Medium deep black soil is found around Kalmeshwar and Savner, the Wardha valley; and in the Nagpur and Kamptee plains. The principal soil of the district is that known as morand soil. It is very suitable for cotton and jowar and is found in all tahsils. In the northern part of Ramtek tahsil and especially in the valley of Sur river, the morand soil is of very light colour. Khardi is the regular rice land in the eastern part of the district. Bardi is found on the summits and slopes of hills, principally in the Katol tahsil.

Census Houses and Households

Columns 4 and 5 of the primary census abstract reveal the number of occupied residential census houses and the number of households. To start with a 'Census House' according to Indian Census is a building or a part thereof having a main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant, residential, non-residential or both. A 'household' is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. A 'household' may be of persons related by blood or unrelated persons or having a mix of both. There may be single member or more than one member households. Another category of households is comprised of unrelated persons and are termed as 'institutional households'. They include boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. Yet another category is of houseless population. Houseless households include persons who do not have any fixed place of residence but go on moving from place to place, camp at night or just live on the streets, in gardens or in open places.

At 1981 census the number of occupied residential houses in the district has been returned at 471,510 providing accommodation to 490,793 households. Obviously there are some residential houses which are accommodating more than one household. The population of the district, returned at 2,588,811 persons is dispersed over 490,793 households yielding an average size of the household at 5.27 persons. This is lower than the average size of the household found at the state level *i. e.* 5.37.

However, number of households per km² is 49 which is higher than the state average of 38 households per km².

Distribution of Population in Rural and Urban Areas

At 1981 census the population of Nagpur district has been found at 2,588,811 persons comprising of 1,345,377 males and 1,243,434 females. Thus the population of the district constitiutes 4.12 per cent of the population of the state spread over 3.23 per cent of its area. From amongst the five tahsils of the district, Nagpur tahsil is the most populous one (1,550,698) (Table 1)

TABLE 1

Population, number of villages and towns, 1981

Sr. No.	Name of Tahsil	Population									No. of Villages		No. of towns
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Nagpur ..	1,550,698	811,451	739,247	246,861	128,863	117,998	1,303,837	682,588	621,249	388	341	4
2	Katol ..	236,593	121,673	114,920	189,711	97,395	92,316	46,882	24,278	22,604	342	301	3
3	Savner ..	224,611	116,352	108,259	168,755	87,354	81,401	55,856	28,998	26,858	236	215	6
4	Ramtek ..	293,233	151,999	141,234	264,439	137,020	127,419	28,794	14,979	13,815	390	376	2
5	Umred ..	283,676	143,902	139,774	249,766	126,450	123,316	33,910	17,452	16,458	518	425	1
	District total ..	2,588,811	1,345,377	1,243,434	1,119,532	577,082	542,450	1,469,279	768,295	700,984	1,874	1,658	16

Remaining tahsils in order of the size of their population are : Ramtek (293,233), Umred (283,676), Katol (236,593) and Savner (224,611). It is seen that most populous tahsil is about seven times larger than the least populous one.

In the rural areas the basic administrative unit is a village. A 'village' may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas on the other hand are specially defined for census purposes. The criteria adopted for 1981 census is :

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000 ;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(*iii*) A population of at least 400 persons per km².

As would be seen from Table 1, out of a population of 2,588,811 of the district, 1,469,279 persons (56.75%) live in the 16 towns of the district and the remaining 1,119,532 persons (43.25%) live in 1,658 inhabited villages of the district. Thus the proportion of urban population to total population in the district is much higher than the one observed at the state level (35.03%). From amongst the various tahsils of the district, Nagpur is the only tahsil where urban population (84.08%) out numbers the rural one. In other tahsil the proportion of urban population is significantly very low. As a matter of fact the highest proportion of urban population in the Nagpur tahsil tilts the balance in favour of urban population of the district as a whole.

Size Class and Status of Towns

To study the varied demographic characteristics, towns have been divided into the following classes by population size :

Class I	..	100,000 and above
Class II	..	50,000—99,999
Class III	..	20,000—49,999
Class IV	..	10,000—19,999
Class V	..	5,000— 9,999
Class VI	..	Below 5,000

For 1981 census, three towns *viz.* Bina, Chicholi and Davlameti have been added as new towns and no existing town has been declassified (Table 2).

TABLE 2

New Town/Towns declassified in 1981 Census

Name of the town 1		Population 1981-Census 2
(*a*) Added—		
(*i*) Bina (C. T.)	..	3,183
(*ii*) Chicholi (C. T.)	..	8,541
(*iii*) Davlameti (C. T.)	..	1,771
(*b*) Declassified—Nil	..	Nil

Of the 16 towns in the district Nagpur only qualifies as a class I town with a population of 1,219,461 persons. Similarly Kamptee Municipality claims to be the only class II town. Two class III towns are Katol and Umred. There are six class IV towns namely–Kamptee Cantonment, Narkhed, Savner, Khapa, Ramtek and Kanhan (Pipri). Another four towns qualify as class V towns and they are Mowad, Kalmeshwar, Mohpa and Chicholi and remaining two towns are class VI towns *i. e.* Bina and Davlameti.

Urban Agglomeration

As in 1971 the concept of urban agglomeration has been adopted for 1981 census too. An urban agglomeration may constitute ;

(*a*) A city with contiguous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of adjoining village or villages);

(*b*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(*c*) A city and one or more adjoining towns with their outgrowths all of which form a contiguous spread.

In Nagpur district, there is only one urban agglomeration (U.A.) *i. e.* Nagpur U. A. and its constituent units are :

(*a*) Nagpur City (M. Corp.)

(*b*) Kamptee (M)

(*c*) Kamptee Cantonment.

Standard Urban Area

Standard Urban Area (S.U.A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A. are :

(*i*) It should have a core town of a minimum population of 50,000 ;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Kamptee and Nagpur standard urban areas in Nagpur district are as follows :—

Kamptee SUA :

Urban Components :

1. Kamptee (M).
2. Kamptee Cantonment.
3. Kanhan (Pipri).

Rural Components :

1. Yerkheda.
2. Ajani.
3. Kandri.
4. Tekadi.
5. Juni Kamathi.
6. Sihora.

Nagpur SUA :

Urban Components :

1. Nagpur City (M. Corp).
2. Davlameti.

Rural Components :

1. Yerla.
2. Digdoh.
3. Nildoh.
4. Nagalwadi.
5. Wadi.
6. Lava.
7. Bodhala
8. Chicholi.
9. Khadgaon.
10. Drugdhamana.
11. Surabardi
12. Waddhamana.
13. Pandhari.
14. Dorli (Gangaji).
15. Sahuli.
16. Nanda.
17. Sonegaon (Nipani).

In all there are 1,874 villages in the district and the inhabited are 1,658. On an average an inhabited village has a population of 675 persons which is much smaller than the state average of 1,037 persons. Table 3 indicates the dispersal of the inhabited villages of the district in various population ranges.

TABLE 3

Distribution of inhabited villages by population ranges

Range of population 1	No. of villages in each range 2	Percentage of villages in each range 3
—200	384	23.16
200—499	556	33.53
500—1,999	646	38.96
2,000—4,999	50	3.02
5,000—9,999	18	1.09
10,000+	4	0.24
All ranges ..	1,658	100.00

As would be seen from the above table, there are 384 villages (23.16%) with a population of less than 200 each. Against this 4 (0.24%) villages are with a population of more than 10,000 each. However, the largest chunk of villages numbering 646 (38.96%) fall in the population range of 500–1,999. The remaining 556 (33.53%), 50 (3.02%) and 18 (1.09%) fall in the size class of 200–499, 2,000–4,999 and 5,000–9,999 respectively. For a broader generalisation the villages have further been grouped as : small sized (population below 500), medium sized (500–1,999), large sized (2,000–4,999) and exceptionally large sized (5,000+). Accordingly there are 940 small sized, 646 medium sized, 50 large sized and 22 exceptionally large sized villages in the district.

Population Growth, Density and Sex Ratio

Nagpur district returned a population of 2,588,811 persons at the 1981 census. To the 1971 population of 1,942,688 persons there has been an increment of 646,123 persons. In other words an increase of 33.26 per cent or 3.3 per cent per annum. This rate of growth is far higher than the one found at the state level (24.54%). Nagpur being a traditional, industrial and business centre which has consequently a pull for migration. This is substantiated by the fact that about 60 per cent of the population of the district has been found in Nagpur

tahsil alone and again about 84 per cent of the total urban population of the district is seen in Nagpur municipality only. Within the district, Nagpur tahsil has registered the highest growth of 40.00 per cent followed by Ramtek with 36.78 per cent. The remaining tahsils have recorded growth rates below the district average of 33.26 per cent. Table 4 reveals in detail the decadal growth rate for 1971–81 in respect of all the tahsils of the district.

TABLE 4

Decadal change in Distribution of population

Name of Tahsil	Population						Percentage decadal (1971–81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10

N. A.—Not Available

As would be seen from Table-5, the proportion of urban population to the total population of the district has been steadily growing up since 1951. A larger leap is, however, discernable from 1951 to 1961 when the proportion of urban population jumped from 46.94 per cent to 52.22 per cent. Thereafter the proportions have been increasing in a steady manner. It reached the level of 56.75 per cent in 1981 which is significantly higher than the state average of 35.03 per cent. The decadal percentage variation on the other hand has shown a downward trend at least till 1971. The same declined from 38.13 per cent in 1951 to 33.98 per cent in 1971 but has filled in 1981 is strikingly significant (39.22%).

From amongst the various towns in the district Kanhan (pipri) has revealed the highest growth rate of 82.73 per cent during 1971–81. In fact this town came into existance in 1971 only with a population of 6,600. At 1981 its population was recorded of 12,060 persons, thereby registering a growth rate of 82.73 per cent. Nagpur has registered the highest growth rate of 40.80 per cent in 1981 (Statement I).

The average density of population in the district has been found at 261 persons per km². This is higher than the state average of 204 persons per km². Within the district, Nagpur tahsil has the highest density of 756 persons per km² and Umred

has the lowest of 113 persons per km². Density of population per km² in respect of Katol, Savner and Ramtek tahsils has been found at 147, 195 and 116 respectively.

Table 6 reveals the distribution of 1,658 inhabited villages of the district into various density ranges to yield a broader understanding of the same (Table 6)

TABLE 6

Distribution of villages by density

Range of Density (per km²) 1	Total No. of villages in each density range 2	Percentage of villages in each density range 3
—10	103	6.21
11—20	44	2.65
21—50	213	12.85
51—100	401	24.19
101—200	595	35.89
201—300	174	10.49
301—500	79	4.76
501+	49	2.96
Not known	..	..
All density ranges	1,658	100.00

As would be seen there are 103 villages in the district (6.21%) each with a density of less than 10 persons per km². Against this 49 villages have a density of more than 501 persons per km² each. However, the largest number of villages (595) have a density of 101–200 persons per km². Another big chunk of villages numbering (401) fall in the density range of 51–100 persons per km². It is seen that more than 60 per cent of the villages fall in the density range of 51–200 persons per km². The rest of the villages fall in the remaining density ranges. As regards the density in the urban areas of the district, Mowad town has the highest density of population. It has a population of 6,971 persons spread over an area of just 0.42 km² which gives out a density of 16,598 persons per km². Kamptee town follows closely with a density of 15,776 persons per km². Nagpur town ranks third in the field of density. Its population of 1,219,461 persons spread over 217.56 km²., yields a density of 5,605 persons per km². Newly carried out census town Davlameti is the least dense town with a density of 413 persons per km². Statement I reveals in detail the density figures in respect of other towns of the district.

Sex ratio implying the proportion of females per 1,000 males has been found at 924 in the district at 1981 census. This is, however, lower than the state average of 937 females per 1,000 males. A look at the behaviour of sex ratio at the state as also at the district levels. Since 1901 reveals that till 1951 the latter had a sex ratio higher than one found in the former. Since 1961 the district has registered a lower sex ratio than the state. However, apart from some ups and downs in sex ratio, in both the cases there is a general decline in the sex ratio since 1901. Some increase recorded in sex ratio for both the district and the state at 1981 census, give some hope for the equality of both the sexes in the coming decades.

TABLE 6 (i)

Sex Ratio 1901–1981

Year	District	State
1901	991	978
1911	981	966
1921	967	950
1931	953	947
1941	955	949
1951	956	941
1961	929	936
1971	922	930
1981	924	937

Within the district, except for Nagpur tahsil (911) all other tahsils have returned a sex ratio higher than the one found at district level is given in Table 6 (ii).

TABLE 6 (ii)

Sex Ratio by Tahsils, 1981

District/Tahsils	Females per 1,000 males
Nagpur District	924
Nagpur tahsil	911
Katol tahsil	944
Savner tahsil	930
Ramtek tahsil	929
Umred tahsil	971

Urban sex ratio found in the district is significantly higher than found in the State. In the case of the district the same has been found at 912 females per 1,000 males as against 850 in the urban areas of the state. Except for Bina (C.T.), Chicholi (C.T.), Kanhan (Pipri) (C. T.), Mohpa and Kamptee Cantonment, all other towns have an urban sex ratio higher than the district over all urban sex ratio. Being a cantonment area, Kamptee Cantonment has just 451 females per 1,000 males.

Scheduled Castes and Scheduled Tribes

For evolving any suitable plan for socio-economic uplift of the scheduled castes and scheduled tribes, the government need to have the necessary data about them and for this census is the main source. One of the highlights of 1981 census as that of 1971 and 1961 censuses was the collection of detailed information on the socio-economic characteristics of scheduled caste and scheduled tribe population.

There is no standard definition of scheduled castes or scheduled tribes. Scheduled castes include castes, races of tribes as are declared to be scheduled castes by the President of India by public notification under article 341(i) of the Indian Constitution. Similarly, scheduled tribes mean all such tribes of tribal community or part or group. Within such tribe or tribal community as are declared by the President of India, to be treated as scheduled tribes under article 342(i) of the Indian Constitution. For Maharashtra State, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes respectively and the list of scheduled castes and scheduled tribes in the State is given below:—

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda, Ganda
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (in Akola, Amravati, Bhandara, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Megnval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati
17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gawari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.
25. Kokna, Kokni, Kukna.

26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).

47. Vitolia, Kotwalia, Barodia.

At 1981 census the number of scheduled caste in the Nagpur district was returned at 182,395 persons comprising of 94,494 males and 87,901 females. Thus scheduled caste population constitutes 7 05 per cent of the total population of the district. This proportion is, however, slightly lower than the proportion of 7.14 per cent found at the state level. Looking at the growth of scheduled caste population during the decade 1971-81, it is seen that the same has increased from 4.13 per cent in 1971 to 7.05 per cent in 1981. Rural-urban differentials reveal that while 46.16 per cent of the scheduled caste population has been found in rural areas. 53.84 per cent has been located in urban areas of the district (Table 7).

TABLE 7

Proportion of Scheduled Caste Population to total Population in the Villages

Percentage range of Scheduled Caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. C. Population	508	30.64
—5	542	32.69
6—10	259	15.62
11—15	126	7.60
16—20	72	4.34
21—30	84	5.07
31+	67	4.04
All ranges	1,658	100.00

As would be seen from Table 7; 508: (30.64%) villages in the district do not have scheduled caste population at all. 542 (32.69%) villages have less than 5 per cent of such population. Against this there are 67 villages constituting 4.04 per cent of the total inhabited villages of the district have more than 31 per cent scheduled caste population. The remaining 259 (15.62%), 126 (7.60%), 72 (4 34%) and 84 (5.07%) villages have such population in the percentage range of 6-10, 11-15, 16-20 and 21-30 respectively.

The following table shows tahsilwise proportion of scheduled caste and scheduled tribe population to total population of the district for 1971 and 1981.

TABLE 7 (i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of scheduled caste population to total population		Percentage of scheduled tribe population to total population	
	1971	1981	1971	1981
1	2	3	4	5
Nagpur District	4.13	7.05	.	13.65
Nagpur tahsil	3.88	6.42		11.41
Katol tahsil	4.62	8.78	.	18.27
Savner tahsil ..	6.91	9.99		13.07
Ramtek tahsil ..	4.96	8.64	.	19.16
Umred tahsil ..	2.71	5.03		16.81

At 1981 census the scheduled tribe population in the district stands at 353,303 persons comprising of 181,887 males and 171,416 females. Thus scheduled tribe population forms 13.65 per cent of the total population of the district. There was no scheduled tribe population in the district, in 1971. The sudden spurt appears to be the result of the removal of area restrictions for recognising the tribal population as scheduled tribe in the State / district. 52.34 per cent of the scheduled tribe population resides in rural areas and the remaining 47.66 per cent in the urban areas of the district.

Of the 1,658 inhabited villages in the district, 253 villages do not have the scheduled tribe population at all. Against this 282 villages have more than 51 per cent of scheduled tribe population. The largest number of villages (383) have such population to the extent of less than 5 per cent. Second largest group of villages (319) have it between 6 to 15 per cent. The remaining 175, 127 and 119 villages fall in the percentage ranges of 16 to 25, 26 to 35 and 36 to 50 respectively (Table 8).

TABLE 8

Proportion of Scheduled Tribe Population to Total Population in the Villages

Percentage range of scheduled tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. T. Population	253	15.26
—5	383	23.10
6—15	319	19.24
16—25	175	10.55
26—35	127	7.66
36—50	119	7.18
51+	282	17.01
All ranges	1,658	100.00

In an urban population of 1,469,279 persons of the district, the number of scheduled caste and scheduled tribe communities are 98,204 and 168,392 persons respectively. Thus scheduled caste population constitutes 6.68 per cent and scheduled tribe population 11.46 per cent of the urban population of the district. Proportionately the highest concentration of scheduled caste population to the extent of 12.60 per cent has been observed in Kanhan (Pipri) town. Scheduled tribes on the other hand, have their concentration of the order of 39.61 per cent in Khapa town. Table 9 reveals in detail the dispersal of scheduled caste and scheduled tribe population in various towns of the district (Table 9).

TABLE 9

Proportion of Scheduled Castes/Scheduled Tribes Population in towns

Literacy

For census purposes any person, who is able to both read and write in any language with understanding is treated as literate. At 1981 census it has been found that the district is second only to Gr. Bombay in so far as the rate of literacy is concerned. 54.56 per cent literacy rate in the district is also higher than the State average of 47.18 per cent. Among the various tahsils of the district, Nagpur has the highest literacy percentage of 62.17. In fact it is the only tahsil with a literacy percentage higher than the district average. In case of other tahsils the same ranges between 38.88 per cent and 48.26 per cent (Table 12). Sex differential reveals male literacy at 63.74 per cent and female literacy at 44.62 per cent. Here again Nagpur tahsil ranks at the top with a male and female literacy of 70.10 per cent and 53.46 per cent against the corresponding district average

of 63.74 per cent and 44.62 per cent respectively. It may be pointed out that Nagpur is an ancient town and has been a hub of trade and commerce in the Vidarbha region. As such a higher rate of growth in every activity and more so in literacy does not appear unexpected.

Rural-urban differentials reveal a literacy rate of 64.60 per cent in urban areas against 41.38 per cent in the rural areas of the district. A wide gap is discernable in the female rural-urban differentials than the one found in case of males. Against 56.03 per cent urban females, the proportion of rural females works out to only 29.88 per cent. On the other hand literacy in urban males is of the order of 72.42 per cent and that of rural males is 52.18 per cent. Of the 1,658 villages in the district, 384 villages with a population of less than 200 each have a literacy rate of 29.21 per cent. Against this there are 4 villages each with a population of over 10,000 revealing a literacy rate of 47.69 per cent. Largest number of 646 villages fall in the population range of 500–1,999 with a literacy rate of 40.13 per cent. Thus it can safely be inferred that larger the villages in size, higher is the rate of literacy (Table 10).

TABLE 10

Literacy Rates by Population Ranges of Villages

Range of population 1	No. of villages in each range 2	Literacy rate 3
—200	384	29.21

500—1,999	646	40 13
2,000—4,999 .	50	46.39
5,000—9,999	18	51.16
10,000+	4	47.69
All ranges	1,658	41.38

From amongst the 16 towns in the district, Kamptee Cantonment has returned the highest literacy rate of 75.68 per cent. Here Nagpur City trails behind with a literacy rate of 65.81 per cent (Table 11).

TABLE 11

Literacy Rates for Towns

Name and civic status of the town 1	Literacy rate 2
Bina (C. T.)	31.86
Chicholi (C. T.) . ..	58.51
Davlameti (C. T.)	44.55
Kalmeshwar (M. Cl.) ..	58.85
Kamptee (M. Cl.)	60.22

Savner (M. Cl.) ..	61.31
Umred (M. Cl.) . ..	54.98
All towns .	64.60

Table 11(i) reveals the growth of literacy in the district since 1901.

TABLE 11(i)

Progress of Literacy 1901–81

Year	Total	Males	Females
1901 ..	4.92	9.15	0.65
1911 ..	5.36	9.81	0.84
1921	7.16	12.43	1 72
1931 ..	9.40	15.68	2.82
1941 .	13.95	22.33	5.18
1951 .	24.43	33.86	14.40
1961 ..	35.15	48.06	21.26
1971 ..	45.26	56.09	33.51
1981 ..	54.56	63.74	44 62

It may be seen against a literacy rate of just 4.92 per cent in 1901, the same has progressed to 54.56 per cent in 1981. In other words the rate of literacy has progressed by about 11 times. Very sharp strides are seen since the dawn of independence. Against a literacy rate of 13.95 per cent in 1941, 1951 revealed a literacy rate of 24.43 per cent. Ever since it has been increasing by about 10 points at each census. The strides taken by female literacy are not less appreciable. Against a female literacy of just 0.65 per cent in 1901, the same has been found at 44.62 per cent in 1981. Male literacy has similarly progressed from 9.15 per cent in 1901 to 63.74 per cent in 1981.

Working Population

'Work' may be defined as participation in economically productive activity. Such a participation may be physical or mental in nature. It involves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the worker at 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted against the dichotomy of workers and non-workers in 1971 and 1961. The feasibility of comparing the data with the previous censuses has been kept in view while introducing this conceptual change. Conceptually, the main workers plus the marginal workers of 1981 are almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Again for 1981 census on the recommendation of the Planning Commission and Central Statistical Organisation, only four industrial categories of main workers *i. e.* cultivators, agricultural labourers, workers engaged in household industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

For main workers major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked for sometime during the preceding year but not for the major part have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non-workers. They included persons engaged in household duties, students, dependents, retired persons, rentiers, beggars etc.

As would be seen from Table 12, at 1981 census the population of the district comprised of 35.59 per cent main workers, 2.58 per cent marginal workers and 61.83 per cent non-workers. The corresponding proportions for the State have been found at 38.71 per cent, 3.85 per cent and 57.44 per cent respectively. When compared with 1971, there appears to be no change in the work participation rate for main workers in the district (35.48% in 1971 and 35.59% in 1981). However, at the state level, an upward trend, though of not much significance has been observed (36.48% in 1971 and 38.71% in 1981). Within the district, the highest participation rate for main workers of the order of 45.92 per cent has been found in Umred tahsil in 1981. The lowest participation rate of 29.78 per cent has been returned from Nagpur tahsil. This lowest rate of participation can be attributed to the urban character of this tahsil. Needless to say urbanisation implies lesser reliance on agriculture and at the same time larger number of youngsters pursuing education and other vocational trainings. A glance at rural and urban participation rates substantiates the above contention. Sex differentials in the work participation rate for main workers show the male participation rate of 49.12 per cent against female participation rate of 20.95 per cent. Almost identical is the state of affairs at the state level (male participation rate 52.51% and female 23.98%).

Main workers of the population of the district have been sub-divided into four industrial categories *viz.* cultivators, agricultural labourers, workers engaged in household industry and other workers; and these categories respectively claim 20.81 per cent, 26.24 per cent, 5.42 per cent and 47.53 per cent. The corresponding proportions at the state level have been found at 35.12 per cent, 26.63 per cent, 2.55 per cent and 35.70 per cent. It is evident that 47.05 per cent of the main workers are dependent on agriculture either as cultivators or agricultural labourers. Almost the same proportion has been found under the category ' other workers '. Household industry does not seem to be a lucarative persuit (5.42%). Conditions are some what different at the state level where the agriculture sector absorbs 61.75 per cent of the main workers while other workers claim only 35.70 per cent. Proportion of male workers engaged in the household industry is very less (2.61%) in the state. Sex-differential of cultivators reveal almost no disparity at the district level. In case of agricultural labourers the proportions are more startling. Against 51.68 per cent female agricultural labourers, there are only 16.22 per cent male agricultural labourers. The corresponding percentages at the state level have been found at 45.61 per cent female and 18.51 per cent male. Not much disparity is discernable in the field of household industry. In the category of other workers males play a dominant role *i. e.* 57.69 per cent male and 21.75 per cent female. Corresponding proportions at the state level are 45.19 per cent male and 13.51 per cent female.

Marginal workers constitute 2.58 per cent of the total population of the district and the proportion of such workers at the state level has been returned at 3.85 per cent. The proportion of male marginal workers at both the levels is almost the same (*i. e.* state 1.22%, district 1.15%). The proportion of female marginal workers is, however, higher in the state than in the district. In the former case they work out to 6.65 per cent state against 4.12 per cent in the district.

Availability of Amenities–Education

Of the 1,658 inhabited villages in the district, 1,243 have been provided with one or the other educational amenity. In other words 7 out of the 10 villages have the schooling facilities for their population (74.97%). As regards the population covered by this amenity, it has been found that 94.22 per cent of the rural population benefitting from the same (Tables 13 and 14).

TABLE 13

Distribution of Villages according to the availability of different amenities

5.	Umred	249,766	236,793 (94.81)	84,697 (33.91)	249,766 (100.00)	109,648 (43.90)	78,887 (31.58)	105,535 (42.25)	96,234 (38.53)	190,148 (76.13)
	Total of all tahsils ..	1,119,532	1,054,876 (94.22)	388,556 (34.71)	1,119,532 (100.00)	495,151 (44.23)	371,470 (33.18)	550,375 (49.16)	635,369 (56.75)	964,944 (86.19)

From amongst the five tahsils of the district, Ramtek has the largest network of educational institutions catering to 77.39 per cent of its villages followed by Umred where such amenities are available in 76.24 per cent villages. Nagpur, the district headquarter ranks third with schools available in 75.07 per cent of its villages. From the population point of view Katol ranks at the top with 95.50 per cent of its rural population having the benefit of this amenity. Umred ranks second with 94.81 per cent of the rural population benefitting from the same. As already mentioned educational amenity is available in 1,243 villages in the district. Of these 539 villages have a population of less than 500 each. On the other hand 22 villages have 5,000 or more population. The remaining 632 and 50 villages fall in the population range of 500–1,999 and 2,000–4,999 respectively. There are, however, 415 villages devoid of this amenity. The inhabitants of 351 such villages have schooling amenity available within a distance of less than 5 kms. Inhabitants of another 54 villages have to tread a distance of 5–10 kms. to reach a school and the people of another 10 villages have to travel a distance of beyond 10 kms. to reach a school or such sort of educational institution (Tables 15 and 16).

TABLE 15

Distribution of Villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of

In the various towns of the district, on an average, the population and educational institution ratios are 10,000 : 1.40 Higher Secondary/Inter/ PUC/Junior Colleges; 10,000 : 1.37 Secondary / Matriculation Schools; 10,000 : 1.46 Junior Secondary/ Middle Schools and 10,000 : 3.67 Primary Schools. To have a tangible view it can be said that there is a Higher Secondary / Inter / PUC / Junior College for every 7,132 persons; Secondary / Matriculation Schools for every 7,310 persons; Junior Secondary/ Middle School for every 6,834 persons and Primary Schools for every 2,726 persons in the urban areas of the district (Table 18).

Medical

Nagpur despite being the winter host, of the Maharashtra legislature wears a bleak view from the medical point of view. In all just 168 villages with a population of 388,556 have been provided the medical amenities. In other words 1 out of 10 villages have the benefit of some kind of medical facility within the village itself. It is agonising to see that out of the 341 villages in the Nagpur tahsil hardly 52 villages have been provided with one or the other medical amenity. More remorseful is the fate of the other tahsils as would be seen from the Table 13. From the coverage of population we see that Nagpur tahsil has a population of 246,861 and 99,471 persons in its countryside have the availability of some kind of medical facility. In other words 4 out of 10 persons have such amenity available in the village itself. No better is the position in the remaining tahsils of the district (Table 14). Of the 168 villages with the medical amenity available, 22 villages have a population of less than 500 each. Against this, there are 20 villages with a population of 5,000 or more. The remaining 86 and 40 villages fall in the population range of 500–1,999 and 2,000–4,999 respectively (Table 15).

1,490 villages in the district are devoid of any medical amenity. Of these the inhabitants of 770 villages have some kind of such amenity available within a distance of 5 kms. Against this the people of 531 villages have to negotiate a distance of 5–10 kms. in search of such amenities. Again there are 189 villages whose population has to travel beyond 10 kms. to avail this amenity (Table 16).

In the urban areas of the district the population to beds in the medical institutions bear a ratio of 1,000 : 2.63. In Nagpur municipal corportion a bed is available for every group of 344 persons. Savner town reveals a little better bed–population ratio. In this town a bed is available for every 243 urbanites. Mowad town has the lowest ratio. There a bed is available for every 2,324 urbanites. Three small census towns viz. Bina, Chicholi and Davlameti do not have any provision of beds for their population (Table 19).

Drinking Water

This facility is available in all the inhabited villages of the district.

Post and Telegraph

The post and telegraph amenities are available in 255 villages out of the 1,658 inhabited villages of the district. In other words 15.38 per cent villages of the district are catered by this amenity. The rural population covered by the network of this amenity constitutes 44.23 per cent of the entire rural population of the district. Amongst the tahsils Savner looks somewhat better catered. As much as 17.67 per cent of its villages are covered by this amenity. From the population point of view it is Katol tahsil that ranks at the top with 48.31 per cent of its rural population having the availability of this amenity (Tables 13 and 14).

From amongst the 255 villages possessing the amenity, 24 villages have a population of less than 500 persons each. Against this 21 villages have a population of 5,000 or more. The remaining 168 and 42 villages fall in the population range of 500–1,999 and 2,000–4,999 respectively (Table 15). Of the 1,403 villages devoid of this amenity, the inhabitants of 963 villages have it available within a distance of about 5 kms. However, the villagers of 371 villages have to cover a distance of 5–10 kms. to find a post/telegraph facility. There are yet another 69 villages whose inhabitants have to negotiate more than 10 kms. to reach the nearest post/telegraph office (Table 16).

Market/Hat

For the sale and purchase of goods and commodities markets/hats are held in 185 villages in the district. In other words such market/hat is conducted after about every 9 villages in the district. 33.18 per cent of the rural population of the district is covered by such markets. In Nagpur tahsil, however, such markets/hats are available after almost every 6th village and 38.40 per cent of the rural population benefits from the same (Tables 13 and 14).

Of these 185 villages, 38 villages have less than 500 population whereas, 18 villages have 5,000 or more population. The remaining 92 and 37 villages are found in the population range of 500–1,999 and 2,000–4,999 respectively. Such markets are not available in 1,473 villages and the inhabitants of 711 villages have this amenity within a distance of 5 kms. Inhabitants of 562 villages have such market/hat at a distance of 5–10 kms. while the remaining 200 villages have to tread more than 10 kms. to reach such market/hat.

Communications

Communication facilities involving bus stop/railway station/water way are available in 450 villages of the 1,658 inhabited villages of the district, covering a population of 550,375 persons. In other words this amenity is available in 27.14 per cent villages involving 49 16 per cent rural population of the district (Tables 13 and 14).

These 450 villages with communication facilities fall in different population ranges. 143 villages fall in the population range of less than 500, whereas, 19 villages fall in the population range of 5,000 or more. The remaining 249 and 39 villages are in the population range of 500–1,999 and 2,000–4,999 respectively. 1,208 villages are devoid of any communication facility and the inhabitants of 728 villages have one or the other such facility available within a distance of 5 kms, 377 and 103 villages are at a distance of 5–10 kms, and more than 10 kms. respectively from the nearest means of communication (Tables 15 and 16).

Approach by Pucca Road

649 villages encompassing a population of 635,369 persons are connected by pucca roads in the district. In other words about 4 out of 10 villages are connected by such roads and about 6 out of 10 villages benefit from them. Umred tahsil of the district has just 106 (24.94%) out of its 425 villages connected by pucca roads. Conditions are somewhat better in Savner tahsil where 51.16 per cent of its villages are connected by such approach roads and three-fourth of the rural folk are served by these roads (Tables 13 and 14). From amongst the 649 villages having the pucca road facility, 277 villages have less than 500 population each and 20 villages have 5,000 or more population. The remaining 314 and 38 villages lie in the population ranges of 500–1,999 and 2,000-4,999 respectively.

Power Supply

In the district electricity was introduced by a private firm as early as 1905. Later in 1950 a thermal power station with an installed capacity of 30,000 Kw. was set up at Khaparkhede near Nagpur. This station is supplying electricity not only to the district in the Nagpur Division but also to three districts in Madhya Pradesh and is interconnected with Ballarshah power station in Chandrapur district. A turbo-alternator was set up in 1960 to raise the capacity of this unit from 30,000 Kw. to 60,000 Kw. The electricity generated at the above thermal station is distributed to the consumers in the district partly by the Nagpur Electric Light and Power Company and partly by the Maharashtra State Electricity Board through its grid system.

In the district 72.68 per cent villages are electrified encompassing 86.19 per cent of the rural population. Savner tahsil ranks at the top with 94.88 per cent of its villages electrified. Katol tahsil ranks second with 87.71 per cent villages having the benefit of electricity. Nagpur tahsil has this amenity available in 72.14 per cent villages. Ramtek and Umred tahsils ranks 4th and 5th with 67.02 per cent and 56.24 per cent respectively of their villages electrified.

From amongst the 1,205 electrified villages in the district, 570 are with a population of less than 500 each. On the other hand 21 villages have 5,000 or more population. The remaining 569 and 45 villages lie in the population ranges of 500–1,999 and 2,000–4,999 respecitively.

There are 168 villages in the district as are devoid of any amenity (except drinking water). Surprisingly Nagpur tahsil, the district headquarter also has as many as 33 villages devoid of any amenity except drinking water. The largest number of villages (65) without any amenity are found in Umred tahsil. Savner tahsil appears somewhat better placed inasmuch as out of 215 of its inhabited villages only 8 villages are devoid of any amenity. Katol and Ramtek tahsils have 18 and 44 such villages respectively (Appendix III).

The non-availability of any kind of amenity (except for drinking water) in 168 villages, 415 villages without any school, 1,490 villages devoid of medical facility, 1,403 villages not having postal facility, no market/hat in 1,473 villages, 1,208 villages without the facility of bus stop/railway station/water way, 1,009 villages not approachable through pucca road and 453 villages not having power supply, is certainly not a happy situation. A positive relationship between the size of village and amenity provided is observed.

Land Utilisation

Columns 15 to 19 of the village directory reveal the land use pattern of each village in the district. Classification of land use adopted here corresponds to the one recommended by the Ministry of Food and Agriculture.

Forest

Forest area in the district has considerably dwindled and covers about 5 per cent of the total area of the district. Part of the forest area is situated on the foot hills of the Satpudas on both sides of the Pench river in Ramtek tahsil, while others are scattered blocks extending from the west of Katol to the south and east of Umred. The southern and central portions of the Umred and part of Nagpur have scanty trees. The existing forests are of the " broad southern tropical dry deciduous " type. Teak is the most valuable of the different species found in the forests. Other species of constructional value are bija, dhaw etc. Salai used for packing cases is an important soft wood species. Other important forest products are : Tendu leaves used in bidi industry, dhaw for gum, palas for propagation of lac, khair for manufacture of kath and bamboo for manufacture of mats, dholies etc.

Irrigated, Un-irrigated and Culturable Waste Areas

Column numbers 16, 17 and 18 of the village directory reveal the data pertaining to irrigated area, un-irrigated area and culturable waste respectively. The cultivable area in the district works out to 623,598.18 hectares. The proportion of cultivable area to total area works out to 80.31 per cent and that of irrigated area to cultivable area is 7.36 per cent. Amongst the various tahsils, Savner has the largest cultivable area of the order of 83.05 per cent and Ramtek the lowest of 76.67 per cent. Proportion of irrigated area is, however, highest in Ramtek tahsil 12.37 per cent followed by Katol tahsil with 9.62 per cent. The least irrigated area is in Nagpur tahsil with 4.84 per cent. Table 20 reveals in detail the proportion of cultivable and irrigated area in respect of each tahsil of the district.

TABLE 20

Distribution of Villages according to the Land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Nagpur	341	163,121.17	82.53	4.84
2	Katol	301	136,457.87	78.77	9.62
3	Savner	215	102,466.00	83.05	5.97
4	Ramtek	376	165,032.95	76.67	12.37
5	Umred	425	209,386.75	81.11	4.87
	Total of all tahsils ..	1,658	776,464.74	80.31	7.36

Staple Food

Food habits differ in the tahsils of the district. In Nagpur and Savner tahsils, rice and jowar constitute the main staple food of the people while in Katol, Ramtek and Umred tahsils it is wheat and jowar (Table 21).

TABLE 21

Main Staple Food in the Majority of Villages in each Tahsil.

Serial No.	Name of the tahsil	Main staple food
1	2	3
1	Nagpur	Rice, Jowar
2	Katol	Wheat, Jowar
3	Savner	Rice, Jowar
4	Ramtek	Wheat, Jowar
5	Umred	Wheat, Jowar

Municipal Finance

In all there are 16 towns in the district.

TABLE 22

Per capita receipt and expenditure in towns

III Umred (M. Cl.) ..	69.30	27.84	41.46	68.07	10.59	13.59	4.89	16.06	22.94
Total ..	118.53	57.50	61.03	107.79	14.28	27.35	18.46	12.86	34.84

As would be seen from Table 22, the total per capita receipts average to Rs. 118.53 and the per capita expenditure amounts to Rs. 107.79. Out of Rs. 118.53 per capita receipt, Rs. 57.50 are raised through taxes and another Rs. 61.03 through other sources. An average aggregate of Rs. 107.79 is spent as : general administration Rs. 14.28, public health and conveniences Rs. 27.35, public works Rs. 18.46, public institutions Rs. 12.86 and other aspects Rs. 34.84.

Amongst the towns, Kamptee municipality has the highest per capita receipts of Rs. 144.35. Nagpur municipal corportion ranks second with per capita receipts of Rs. 123.61. Least per capita receipts of Rs. 3.51 have, however, been found in Chicholi census town. On the expenditure side Nagpur municipal corportion leads with a per capita expenditure of Rs. 115.84 and Davlameti is found on the lowest ebb with Rs. 2.82.

Minerals

The district is rich in mineral wealth. coal, manganese, iron ore, limestone and clay deposits are the main minerals found. From Kanhan (Pipri) towards Savner in the north-westernly direction a large area of coal deposits is found. The coal fields are known as Kamptee coal fields. Four miles north of Nagpur lies Bokhara where also coal has been discovered. Umred coal field is yet another coal field in the district.

Nagpur and Bhandara districts have some of the largest deposits of manganese ore in India. The most important deposits of manganese in Nagpur district lie in a belt about 25 kms. wide stretching from Khapa in Savner tahsil and passing through Ramtek tahsil. Iron ore occurs at Bhiwapur in Umred tahsil. The ore contains 55–58 per cent iron. In fact it is a low grade ore and as such has not been exploited. At number of places in Savner and Ramtek tahsils limestone is found. The good quality limestone occurs near Kandri, Patgowari and Deolapar. While clay occurs at Shemda, Chorkhairi, Khairi, Khapri and Bajargaon. Other minerals are not of much consequence found in the district are mineral pigments, felspar, quart, tungsten ore, antimony, building material etc.

Fisheries

Fishing activity is confined to inland waters only. Rivers, tanks and ponds are the chief sources for fish. The perennial river length in the district is about 260 kms. Wainganga, Wardha, Kanhan and Pench are the only important rivers from the fishery point of view. There are number of perennial and seasonal tanks and ponds providing a large water spread area reasonably adequate for the development of fishing industry. The commercially important species of fish found in the district are : Murrel, Dhadkya, Botri, Padhan, Tambu, Karvadi, Poshti, Dhoara, Gane or Kanheri Chela, Katva, Seenghan, Chandri, Mahaseer, Kolus, Magur, Zinga and Chandan Catla.

Industries

Nagpur city is an important industrial, commercial centre in Maharashtra. Industrial development has remained mostly confined to urban areas only Rural areas are not industrialized and depend mostly on agriculture. The non-agricultural employment is, however, in traditional crafts worked with locally available raw material and by and large for local demand. The large scale units comprise of cotton textile, cotton ginning and pressing, saw milling, paper and straw-board, ceramics, ferromanganese, steel re-rolling etc. Of the Cotton textile Mills, the Empress Mills and Model Mills located in Nagpur city are the largest composite mills employing more than 12,000 workers. Besides there are six large scale cotton ginning and pressing units. There is a unit manufacturing gray board from waste paper.

Government Printing Press, Shivraj Fine Art Litho Works, Shakti Off set Works and All India Reporter Press are the four large units employing over 1,200 workers. The unit manufacturing safety fuses for blasting gun powder is located at Kamptee Road.

Small pox and Cholera vaccines are manufactured at the vaccine Institute, Nagpur.

At Itwari there is a unit manufacturing stoneware, jars, cups and saucers.

There is one ferro-manganese unit at Kamptee. Bus bodies are built at the Government Central Workshop at Nagpur. Again, at Kamptee Road there is the South-Eastern Railway narrow guage workshop. Leaf springs and other ancillaries are also manufactured by the Canara Workshops Ltd. Nagpur.

Traditional Crafts are conducted on household and cottage industries scale and include Handloom weaving, oil ghanies, tanning and leather goods manufacture, pottery and bricks, cane and bamboo works, dyeing and printing etc. Nagpur handloom saries are famous and have a market all over the State. The well-known silk-bordered cloth is exported to various parts of the country.

Mining industry is of considerable importance in the district because of its rich manganese ore deposits. There is also a colliery at Kamptee. The other units of importance are : cement pipes manufacturing units, sulphuric acid, carbon-dioxide, paints, varnishes and boiled oils units at Kanhan-Kamptee area glass factory, engineering workshops, foundaries, match factory, rope manufacturing and saw milling units at Nagpur; Hemp matting units at Kamptee, Nagpur and Gauri and earthern vessels units at Ramtek.

Trade and Commerce

The chief articles of export from the district contain cotton bales, gas cylinders, steel pipes, handloom saries and cloth, hides and skins, minerals like coal and manganese and oranges. The district against this imports steel plates, thread, wheat and rice, machinery, cotton yarn, plastic materials, salt, sugar, kerosene oil, spices etc. (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
VI Bina (C. T.) ..	Tur dal	Vegetables	..
V Chicholi (C T.) ..	Cotton bales	Cotton bales	Foodgrains
VI Davlameti (C. T.)	Information not available		
V Kalmeshwar (M. Cl.) . .	Gas cylinders	Gas cylinders	Steel plates
II Kamptee (M. Cl.)	Bidi	Bidi	Thread
IV Kamptee Cantonment (C. B.) ..	Earthen ware	Sand	Wheat
IV Kanhan (Pipri) (C T.) ..	Steel pipes	Steel pipes	Machinery
III Katol (M. Cl.) ..	Sweet oil	Cotton bales	Raw cotton
IV Khapa (M. Cl.)	Handloom sarees & cloth	Handloom sarees & cloth	Cotton yarn
V Mohpa (M. Cl.) . ..	Woolen blankets	Cotton bales	Rice
V Mowad (M. Cl.) ..	Handloom cloth	Handloom cloth	Foodgrains
I Nagpur City (M. Corp.) .	Textile cloth	Leather	Plastic materials
IV Narkhed (M. Cl.) ..	Boxes(for exporting oranges)	Oranges	Kirana goods
IV Ramtek (M. Cl.) . ..	Rice	Rice	Cloth
IV Savner (M. Cl.) ..	Sweet oil	Sweet oil	Raw cotton
III Umred (M. Cl.) . ..	Tiles and Bricks	Chilli	Cotton yarn

Katol, Nagpur, Umred. Bhiwapur, Savner, Kalamb, Kalmeshwar, Kohli and Narkhed are the important trade centres. Due to availability of easy communication facilities, Nagpur has become the most important assembling and distributing centre.

Slum Population

Slum population has been found in Nagpur municipal corporation. The proportion of such population works out to. 13.16 per cent of the total population of the town. The approximate density of population has been found at 60,340 persons per km.^{2} (Table 24).

TABLE 24

Proportion of slums Population in Towns

Name and civic status of the town	Proportion of the slums population to total population of the town	Density in slums (per km.^{2})
1	2	3
1 Nagpur (M. Corp).	13.16	60,340
Total ..	13.16	60,340

Places of Tourist's Importance

In addition to Nagpur city itself which is famous for oranges, sitabuldi fort, ambazari lake etc. Other places of tourist interest include Adasa village in Savner tahsil for Ganapati temple; Khapa for rich natural surroundings and temples; Mansar village located north of Kamptee for pilgrim place and for beautiful orange and deep-orange spessartite crystals found in the pit known as the "Kamptee Lady"; Paradsinga village in Katol tahsil for oranges and other fruit gardens and Ramtek for its location round the foot of a detached hill with its fractured stones appearing almost blood red; for its betel leaf and for number of temples on the hill. The hill is attached with the belief that legendary Ram took up his residence here and hence invested with special sanctity.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "un-inhabited" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i. e. the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (i) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (ii) Land utilisation data for census towns ;

Appendix (iii) Tahsilwise list of villages with no amenities available ; and

Appendix (iv) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (iii) and (iv), added in *1981*, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :-

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns, however, the area figures are in km^2.

Column 4 which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges viz., upto 5 km., 5–10 km., and 10+km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, Junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala. senior basic school. makhtab etc.)

If in a village, secondary school has middle and primary classes also the same has been counted as three schools i.e. secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :-

Primary or Secondary School	P
Junior Secondary or Middle School	M
Matriculation or Secondary School	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC)	PUC
College, any college (graduate level and above) like Arts, Science. Commerce etc.	C
Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms., 5–10 kms. and above 10 kms. of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

Tap water	T
Well water	W
Tank water	Tk
Tube-well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relates to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like, bus, rail, and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and back-water etc.)	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Water-way (Other than river or canal)	NW
Foot path	FP

Column 12 gives the distance in kilometres within bracket from the nearest town. In case, the nearest town is located in another State the name of the State has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for All purposes listed above	EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests

(2) Not available for cultivation—
  (a) lands put to non-agricultural uses.
  (b) barren and unculturable land.

(3) Other uncultivated lands excluding fallow lands.
  (a) permanent pastures and other grazing lands.
  (b) lands under miscellaneous tree crops and groves not included in the net area sown.
  (c) culturable wastes.

(4) Fallow lands
  (a) Fallow lands other than current fallows.
  (b) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e.g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

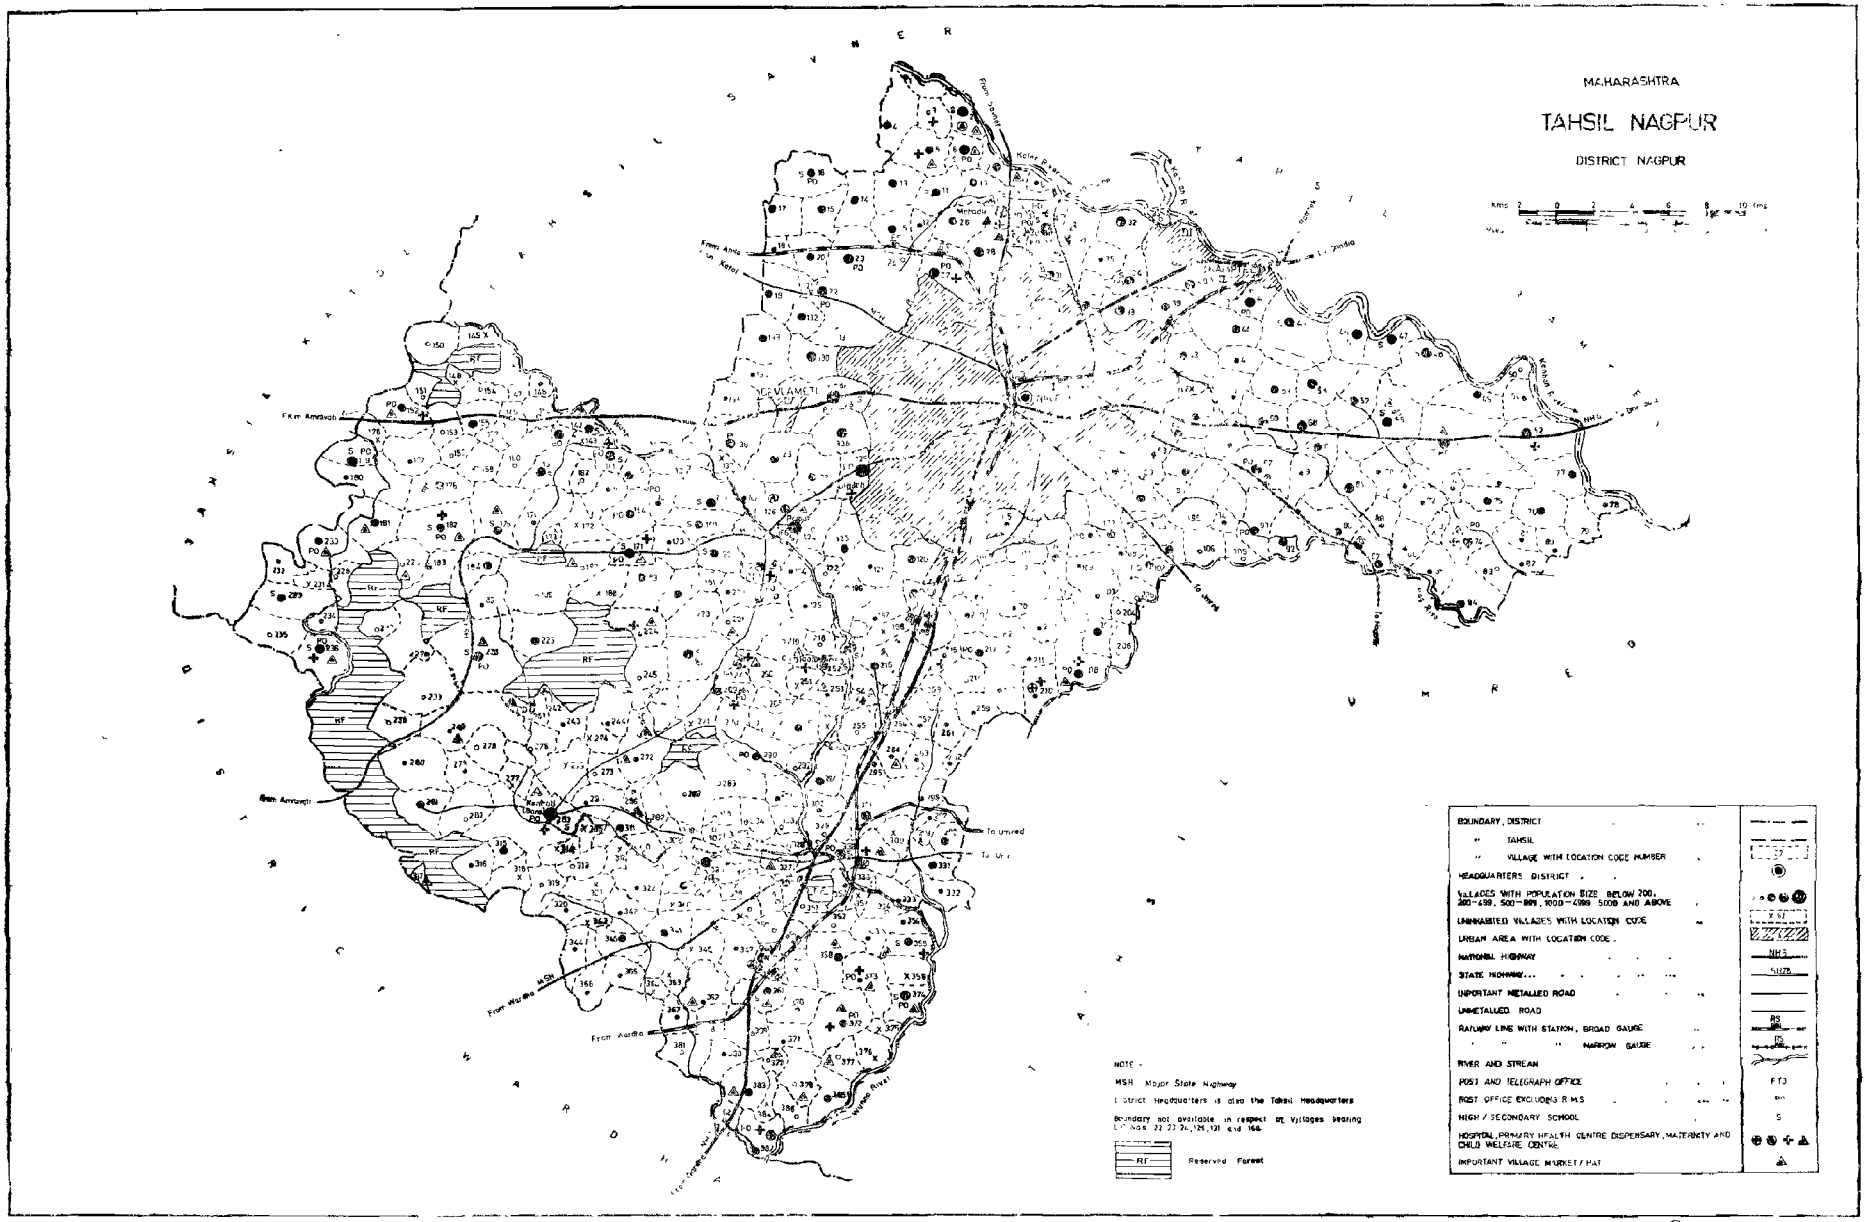

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)	WE
Tube Well (without Electricity) ..	TW
Tube Well (with Electricity) ..	TWE
Tank	Tk
River	R
Lake .. .	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable waste lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooters available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

(N. B.—Ranges with 'nil' entries, have been omitted.)

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note Explaining The Abbreviations used in Town Directory

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town :—

Municipal Corporation/Corporation ..	M. Corp.
Municipality	M.
Municipal Council	M. Cl.
Non-Municipal	N. M.
Cantonment Board/Cantonment ..	C. B.
Notified Area/Notified Area Committee/ Notified Committee.	N. A. C.
Census Town	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in Km^2, number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil head-quarters and the nearest city (Urban area with a population of 100,000 +) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil. Codes used are :—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt
Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used :—

Overhead tank	OHT
Service reservoir	SR
River infiltration gallery	IG
Borewell pumping system	BWP
Pressure tank	PT
Tubewell water/Hand pump ..	TW
Tap water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (*i. e.* class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	FC
T. B. Clinic	TB
Nursing Home..	NH
Ayurvedic	A
Unani	U
Homoeopathic..	Hom
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :—

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all categories—Arts, Science and Commerce.	ASC
Law	L

Column 10 pertaints to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are :—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting ..	Sh. Type
Others	O

Keeping in view the 'Minimum Needs Programme' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employmen of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the gingle working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Status and Growth History

Note :–The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsils in the State Land Records Department. The total areas as also the rural areas, for the tahsils in district may not, therefore, strictly add up to the corresponding figures shown against the district.

Names of towns treated as such for the first time in 1971 which continue as towns in 1931, have been marked with an asterisk (*).

Names of towns treated as such for the first time in 1981 have been printed in italics.
