NAGPUR DISTRICT

MAHARASHTRA CENSUS, BOMBAY.

D.PZ P POONA-H293-650

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;

(ii) The four-coloured map of the district ;

(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;

(iv) Supplementary information showing basic amenities available for each village ; and

(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof-reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande, Shri D. G. Pansare and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

BOMBAY :
The 30th May 1965.

THE DISTRICT IN MAHARASHTRA

FIG. 2

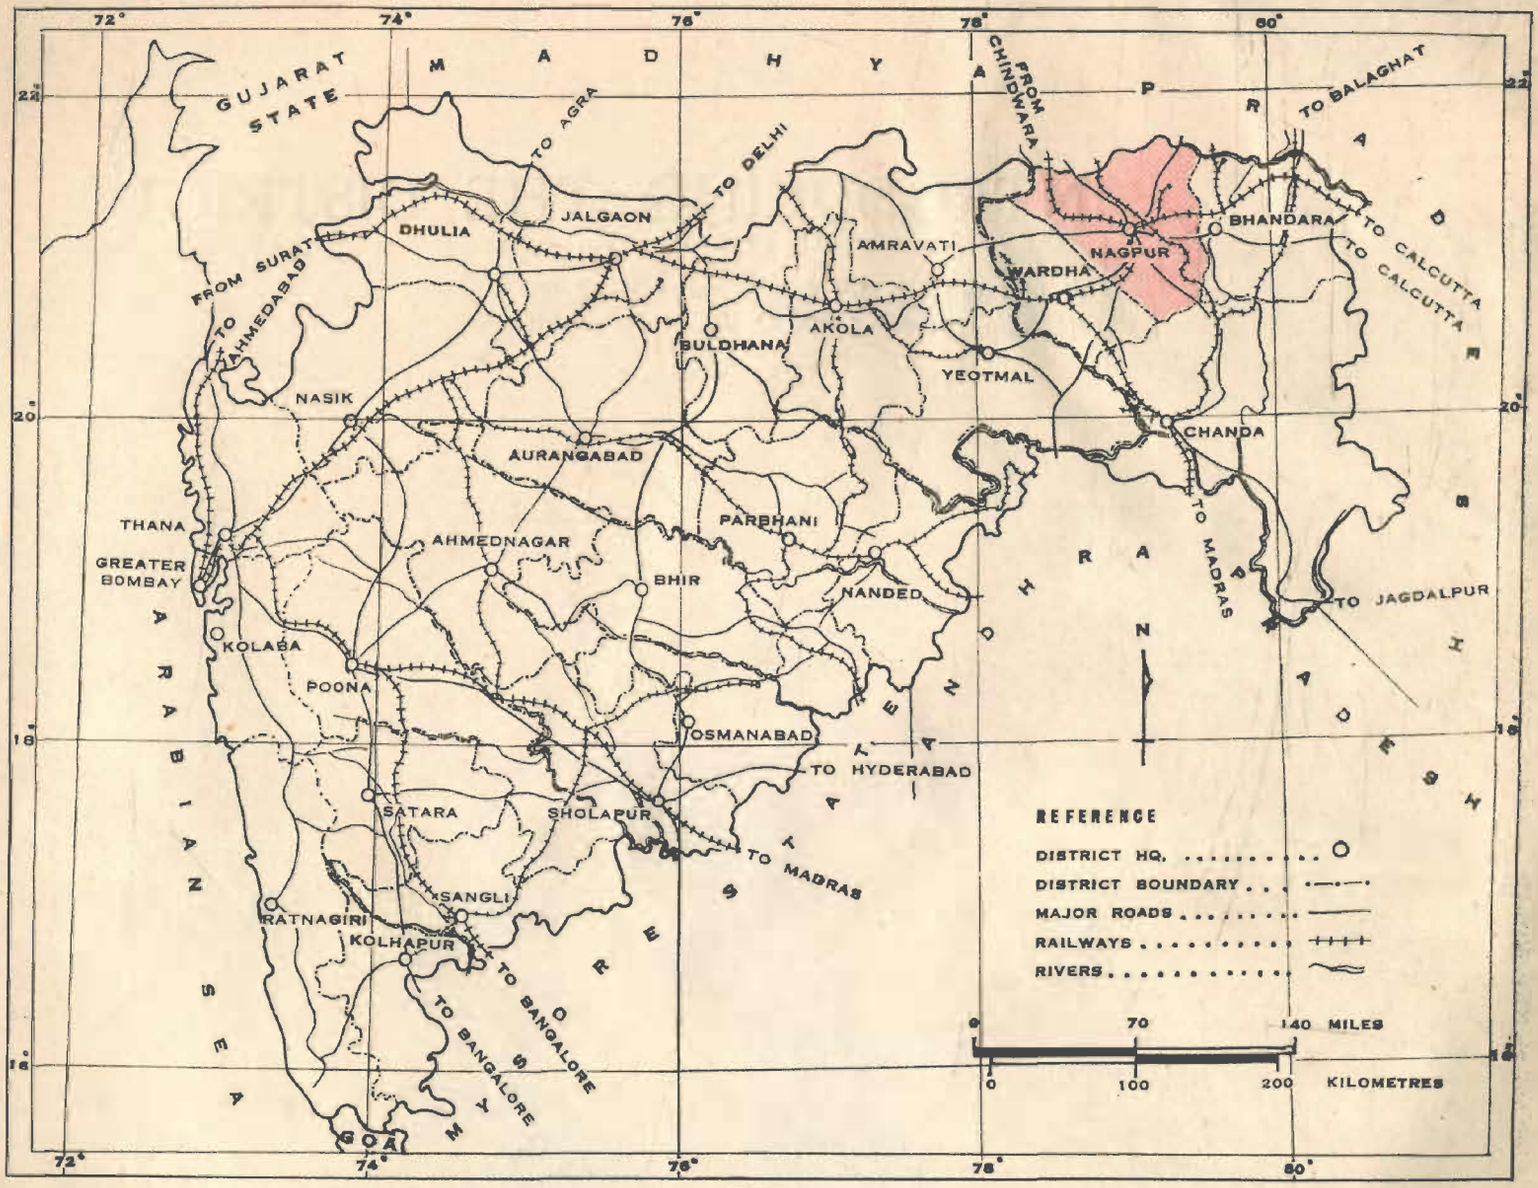

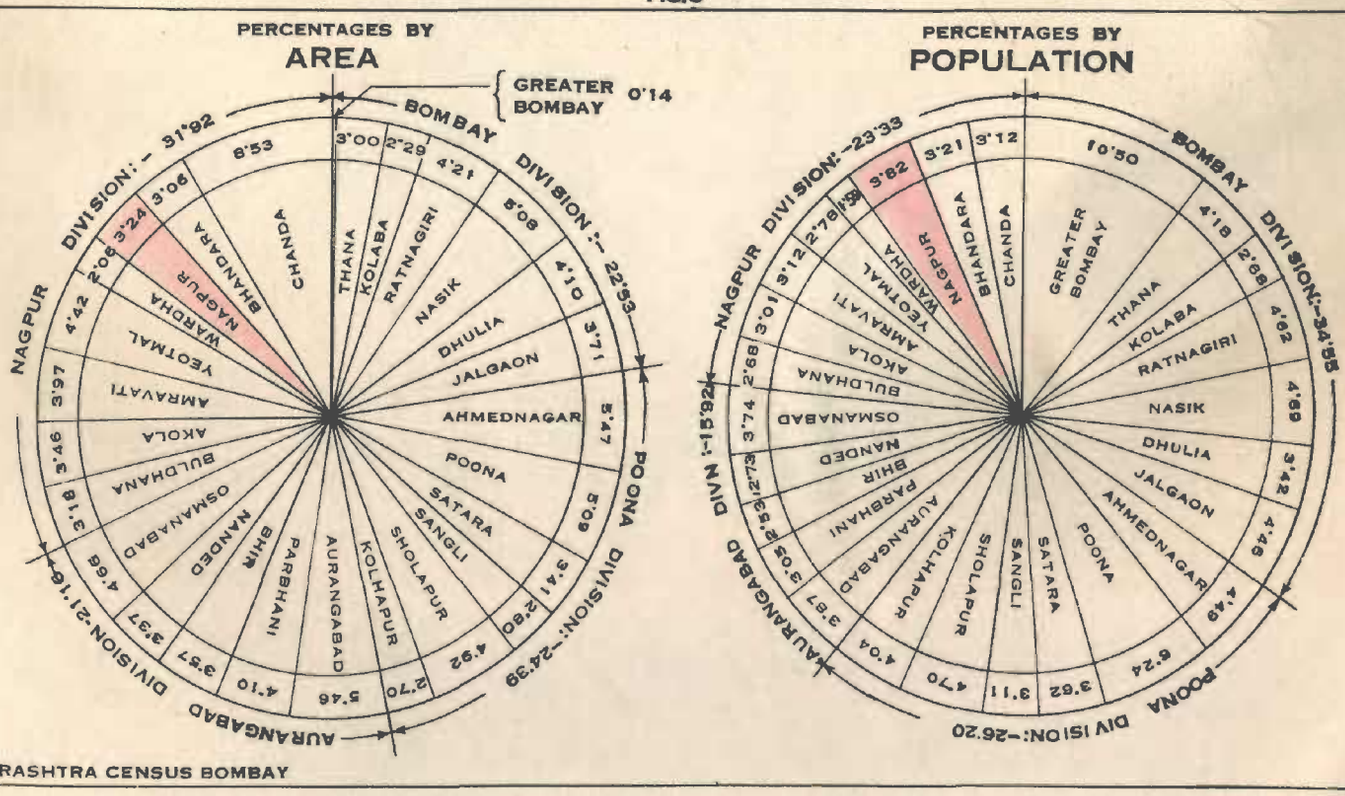

FIG. 3

MAHARASHTRA CENSUS BOMBAY

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

One-third of the district lies in the Wardha basin and two-thirds in the Wainganga basin. The Wardha flows along the part of the western border and the Wainganga flows along the part of the eastern border.

Katol tahsil on the west is drained by Jam river which is a tributary of the Wardha. About half of Nagpur tahsil and part of Umrer tahsil in the western zone are drained by Wunna and its tributaries. Wunna itself is a tributary of the Wardha.

The central and eastern portions of the district comprising parts of Nagpur and Umrer tahsils and Saoner and Ramtek tahsils are drained by Kanhan and its tributaries Tundia, Sur and Amb, all of which are tributaries of the Wainganga.

The district lies between 20° 36′ and 21° 43′ N. latitude and 78° 15′ and 79° 57′ E. longitude. It is surrounded by the Chhindwara district of Madhya Pradesh on the north, Bhandara district on the east, Chanda district to the south and Amravati and Wardha districts towards the west.

The area of the district is 3,834 sq. miles and its population in 1961 is 1,512,807. In terms of area and population the district forms 3·24 per cent and 3·82 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

The main system of hills is the Satpuda and its offshoots.

In the north, a strip of the Satpuda hills is included within the district, narrow on the west, but widening to a breadth of twelve miles or more towards the east.

A few miles to the south of the main Satpuda range are two minor lines of hills to the west and east of the Pench river. Those to the west lie between Bhingarh and Parsivni, terminating in the peak of Tekari. East of the Pench are the Mansar hills and after a gap of a few miles come the well-known Ramtek hills, rising to 1,400 feet at Ramtek. Three miles east of Ramtek, the Sur river has forced a passage through the hills, but beyond it they continue as the Ambagarh range of Bhandara.

The second main hill range extends along the south-east of the district from Khargarh on the Wardha river to the junction of Wardha and Chanda with Nagpur. It separates the valley of the Kar from that of Jam up to Kondhali and further south-east forms the watershed between the latter river and the Bor.

The third main range runs northwards through the Katol tahsil from Kondhali to Kelod, separating the Wardha and Wainganga valleys. The highest part of it is at Pilkpar.

The general slope of the district except in Katol tahsil is towards east or south-east. The slope in Katol is, however, towards the west.

Important Rivers

The Wardha and the Wainganga are the chief rivers of the district. The Wardha flows along the part of the western border and controls the drainage system of the western part of the district. The Wainganga flows along the part of the eastern border and controls the drainage system of the central and eastern portions of the district. It forms the district boundary with Bhandara district for some distance.

Among the important tributaries of the Wardha are the Jam and the Wunna. Jam flows through the Katol tahsil and joins the Wardha on its border at Jalalkheda. The Wunna flows along the northern base of the Kaurās plateau in Nagpur tahsil. It then takes southern course and leaving the district at Ashta joins the Wardha river in Wardha district.

Kanhan is the most important tributary of the Wainganga. It rises in the Satpuda hills in the north and after flowing south-east joins the Wainganga on the eastern border of the district at Gondpipri. It receives the Pench, the Kolar and the Nag rivers in its course. Pench, Kolar and Nag are important tributaries of the Kanhan river. The Kanhan river provides water to Nagpur City. The lands situated on its banks are very fertile.

Climate

Monthly temperature records are available only for one station at Nagpur (Table 1 in Part III).

The climate of the district is dry and salubrious. Nagpur is, however, one of the hottest places in India. May is the hottest month of the year.

The rainy season starts from the second week of June and lasts up to the end of September. It is followed by sultry weather in October, cold season from November to February and hot weather from March to May. Though the cold weather is of a short duration, the climate during this season is extremely pleasant. In the summer, although days are hot the nights are comparatively cool.

Rainfall

Table 2 in Part III shows the figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall is not uniform in all parts of the district. It is comparatively light in the west and heavy in the east. The rainfall gradually increases from west to east. The average rainfall in the westernmost tahsil, *viz.*, Katol is 995·26 mm. while that of the easternmost tahsil, *viz.*, Ramtek is 1,103·92 mm.

The rains start in the second week of June but they are very weak at the outset. Occasionally there are long breaks in July and August. September rains have never failed in any part of the district during the last ten years. October rains are, however, local in nature.

Hail falls occasionally in January, February and early part of March, sometimes in large stones, causing damage to the spring crops.

The seasonal distribution of rainfall is more or less uniform in all parts of the district. About 85 per cent of rainfall is received during the period from June to September. The cold weather rains are advantageous to the rabi crops, provided they are light and well distributed. Showers in hot months are accompanied by dust-storms of considerable severity.

Dependability of Rainfall and Scarcity Areas

Mean rainfall at Nagpur is 1,236·98 mm. Standard deviation is 285·50 mm. The coefficient of variability is 23·09 per cent. As the coefficient of variability at Nagpur is 23·09, the degree of reliability may be said to be slightly high.

The district has very rarely suffered on account of shortage of rains. The Fact-Finding Committee appointed by the Government of Bombay in 1960 had opined that no part of the district need be regarded as a scarcity-affected area.

Soils

The main soils of the district are *kali* (medium deep black cotton), *morand* (comparatively light depth light brown in colour), *khardi* (shallow, much mixed with sand and hence of grayish colour) and *bardi* (red gravel with boulders). Medium deep black soil is found around Kalmeshwar and Saoner, the Wardha valley and in the Nagpur and Kamptee plains. The principal soil of the district is that known as *morand* soil. It is very suitable for cotton and jowar and is found in all tahsils. In the northern part of Ramtek tahsil and especially in the valley of the Sur river, the *morand* soil is of very light colour. *Khardi* is the regular rice land in the eastern part of the district. *Bardi* is found on the summits and slopes of hills, principally in the Katol tahsil.

Minerals

The district is rich in minerals. The details are as follows :—

Coal.—The fields extend in a north-westerly direction from Kanhan towards Saoner and covers a very large area. The possible reserves of these fields (called Kamptee coalfields) are likely to be of the order of 1,000 million tons. Coal has also been discovered at Bokhara, four miles north of Nagpur. Another important coalfield in this district is the Umrer coalfield. The probable reserves of the field have been estimated to be of the order of 70 million tons of which two-thirds may be of first grade.

Manganese.—Nagpur and Bhandara districts of Maharashtra have some of the largest deposits of manganese ore in India. The most important deposits of manganese in Nagpur district lie in a belt about 15 miles wide which stretches from Khapa in Saoner tahsil and passes through Ramtek tahsil.

Iron ore.—It occurs two miles north of Bhiwapur in Umrer tahsil. The ore contains 55 to 58 per cent iron. The deposit is small and has not been exploited as it is of low grade.

Limestone.—It occurs in Ramtek and Saoner tahsils at a number of places. Among these deposits, the dolomitic limestones occurring near Kandri, Patgowari and Deolapar are of good quality.

Clay deposits.—White clay occurs at five places—Shemda, Chorkhairi, Khairi, Khapri and Bajargaon.

Other minerals found in Nagpur district are mineral pigments, felspar and quartz, tungsten ore, antimony, building materials, etc.

Forests

The total forest area in the district is 28 per cent of the total area of the district. Forests comprise two main tracts. The first is situated on the foot hills of the Satpudas on both sides of the Pench river in Ramtek tahsil and is divided into east and west Pench ranges; while the second consists of a series of scattered blocks extending from the west of Katol to the south and east of Umrer being divided into Umrer and Kondhali ranges. The central and southern portions of Umrer and a part of Nagpur have scanty trees, but the remaining area of the district, especially Katol, is well wooded. Among the forest produce are included teak, grass and timber.

Natural Zones

The district can be broadly divided into the following three zones : (i) The hilly area in the north, (ii) the plateau region in the west and (iii) the Kanhan and Wunna basins in the centre, south and

east. The western zone comprises mainly Katol tahsil and accounts for 16 per cent of the total geographical area of the district. Low rainfall and light soils help the growth of major crops such as cotton and jowar. The north west region of the tahsil is in particular suitable for orange cultivation. The central portion of the two river basins is known for its deep black soils and wheat cultivation. The hilly zone in the north comprising Ramtek tahsil has heavy rains and *khardi* soil, where rice is cultivated.

ADMINISTRATIVE SET-UP

Brief History

Nagpur district previously included areas which now are partly in Wardha and partly in Bhandara districts. The area now constituting Wardha district was separated in 1862. There were only four tahsils up to the year 1908 when a new tahsil was created with headquarters at Saoner.

There were no major changes in the boundaries of the district or its tahsils between 1911 and 1955.

With the Reorganisation of States in 1956, the district was transferred from Madhya Pradesh to Bombay State. The district forms a part of Maharashtra since 1st May 1960.

Present Set-up

For administrative purposes, the district is at present divided in five tahsils. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each tahsil are as follows:—

District/Tahsil	Name of Headquarters	Area (in sq. miles)	Number of inhabited villages	Number of towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
NAGPUR DISTRICT.. ..	Nagpur ..	3,834.0	1,653	12	1,512,807	100·0	100·0
1 Katol Tahsil	Katol ..	614.0	291	3	167,850	16·0	11·1
2 Saoner Tahsil	Saoner ..	543.0	217	4	149,172	14·2	9·8
3 Ramtek Tahsil	Ramtek ..	897.0	383	1	175,153	23·4	11·6
4 Nagpur Tahsil	Nagpur ..	811.0	334	3	828,455	21·1	54·8
5 Umrer Tahsil	Umrer ..	969.0	428	1	192,177	25·3	12·7

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and five Sub-Divisional Officers of the rank of Deputy Collector. They hold charge of five revenue divisions and have their headquarters at five tahsil headquarters. The Sub-Divisional Officer is assisted by one Tahsildar in administrative work. Each tahsil is divided into four or five circles of Revenue Inspectors. A Naib-Tahsildar in Tahsildar's office looks after the revenue and other work of a circle which is in charge of a Revenue Inspector.

Land Revenue Settlements

During the Maratha rule which preceded the British administration, annual settlements of land revenue were made with the help of Paragana Officers (Kamavisdars). The total assessment was distributed over the villages in consultation with Patels, who in turn distributed the burden according to capability of the individual cultivator.

During the early British management (1818 to 1830) annual settlements were made. After 1854 summary settlements were made and the ryots were protected against any enhancement of their rents.

The regular settlement operations began in 1858, each field being measured and classified by its soil. The settlement was introduced in 1863-64 and guaranteed for 30 years. The first revision settlement was made between 1893—95 and the second revision settlement in 1913—15 and guaranteed for 20 years. Since then the rates have not been revised.

The method of land revenue assessment in the four C. P. districts, merged in Maharashtra, is different from that of the other districts. During the original settlement, the idea was to assess by valuation or appraisement. The Settlement Officer had the land measured up and classed. He then framed for each class of soil a rate which expressed its revenue paying capacity and by multiplying the annas by his rates, he obtained the revenue which was *prima facie* fair.

The settlement operation consisted of the following three stages :—

(1) Collection of data.

(2) Determination of forecast of revised demand.

(3) Its distribution.

After the forecast was approved, Settlement Officer worked out detailed proposals for the fixation of rates by holdings and villages. Unlike the Bombay system, there was no distribution of aggregate demand, but the Settlement Officer worked out from details to aggregate. This was the reverse of the Bombay system which works from the aggregate to details.

Table 24 in Part III shows demand and collection of land revenue during the 10 years 1951—60 for the district and each tahsil separately.

In 1909 Saoner tahsil was formed out of portions of Nagpur, Ramtek and Katol tahsils.

The table below shows the average land revenue rates per acre :—

	Tahsil	Original settlement or Revision settlement	Year	Guarantee period	Number of villages	Average land revenue per acre
	(1)	(2)	(3)	(4)	(5)	(6)
				Years		Rs. nP.
1	Katol	Original	1863-64	30	NA	NA
		I Revision	1894-95	20	343	NA

		I Revision	1894-95	20	516	NA
		II Revision	1915	20	NA	1 21

NA=Not available.

* The tahsil was newly established in 1909. At present it consists of 242 villages, Some of them were surveyed and settled in 1863-64. There were Revision Settlements one in 1894-95 and another in 1914. The period of guarantee of assessment given under all these settlements has, however, expired long time back in the case of all these villages.

Assembly and Parliamentary Constituencies

Since 1957 the district has 10 Assembly seats. In 1957, Nagpur constituency was double-member constituency with one of the two seats reserved for Scheduled Castes. After abolition of the double-member constituencies in 1961, the seat from Nagpur III and Kamptee is reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as shown in the next column.

In the 1962 General Elections, the Assembly constituencies of Nagpur I, Nagpur II, Nagpur, Nagpur III, Umrer and Kamptee together made one Parliamentary constituency called Nagpur constituency and the remaining Assembly constituencies of Katol, Kalmeshwar, Saoner and Ramtek combined with Assembly constituencies Achalpur and Morsi from Amravati district made another Parliamentary constituency called Ramtek constituency.

Assembly Constituency	Number of voters on rolls
(1) Nagpur I	85,156
(2) Nagpur II	84,465
(3) Nagpur	76,325
(4) Nagpur III	89,444
(5) Umrer	73,648
(6) Kamptee	82,667
(7) Katol	71,839
(8) Kalmeshwar	76,570
(9) Saoner	70,588
(10) Ramtek	71,421
Total	782,123

The total number of voters on rolls in the district in 1961 was 782,123. The total population aged 21 years and above according to 1961 Census is 766,251. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Tahsildars are vested with magisterial powers. But those powers are limited to those specified in Schedules III-A and IV to the Code of Criminal Procedure, 1898, and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other magistrates who try criminal cases in the district. This separation of the judiciary from the executive has been brought about in the district in 1959.

The District and Sessions Judge is assisted by one Assistant and Additional Sessions Judge and two Extra Assistant and Additional Sessions Judges. They have jurisdiction over the entire revenue district. The first two judges attend to civil and criminal work both original and appellate, while the third has civil appellate jurisdiction and he tries offences punishable with a sentence of imprisonment for a term not exceeding ten years.

There are also three Civil Judges of the Senior Division who attend to original civil suits in the whole district in which value of subject-matter is above Rs. 10,000.

There are ten Civil Judges of the Junior Division with headquarters at different tahsil places six being at Nagpur. They deal with original civil suits of value of subject-matter below Rs. 10,000.

There are also 17 First Class Judicial Magistrates, 13 of which are at Nagpur. They deal with criminal cases and proceedings under the Prohibition Act, the Insurance Provident Fund Act and the Central Provinces and Berar Children Act, 1928, arising within their respective jurisdictions.

Police

The Police force in the district works under the (District) Superintendent of Police, who is assisted by one Additional District Superintendent, five Deputy Superintendents and 13 Circle Inspectors. There are 20 Police Stations in the district. Their headquarters and jurisdictions are as shown below :—

	Police Station Headquarters		No. of villages
Katol Tahsil ..	1	Katol	108
	2	Narkhed	73
	3	Kondhali	95
	4	Jalalkheda	88
Saoner Tahsil ..	5	Saoner	72
	6	Khapa	62
	7	Kalmeshwar	110
	8	Kelod	51
Ramtek Tahsil ..	9	Ramtek	120
	10	Mauda	136
	11	Parsvni	91
	12	Deolapar	81
Nagpur Tahsil ..	13	Kamptee	56
	14	Bori	83
	15	Hingna	127
Umrer Tahsil ..	16	Umrer	96
	17	Kuhi	131
	18	Veltur	115
	19	Bela	91
	20	Bhiwapur	94

Average number of villages and population per Police Station in the district is 95 and 75,640 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

Eleven out of 12 towns in the district have Municipal Committees established under the C. P. and Berar Municipal Act of 1922. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and Scheduled Tribes and for women are shown below for each municipality separately :—

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 population	Total number of Municipal Councillors	Seats reserved for		
							Scheduled Castes	Scheduled Tribes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1	Ramtek	1867	1959	5	11,758	10	1	..	1
2	Umrer	1867	1962	5	22,682	18	1	..	..
3	Khapa	1867	1961	5	9,536	14	1	..	..
4	Narkhed	1948	1961	5	10,442	13	..	..	..
5	Mohpa	1953	1961	5	5,647	10	..	..	..
6	Kamptee	1927	1959	5	40,859	23	1	..	2
7	Kalmeshwar	1865	1958	5	6,725	12	1	..	1
8	Mowad	1867	1959	5	5,841	12	1	10	1
9	Saoner	1867	1959	5	10,186	13	1	..	1
10	Katol	1919	1959	5	14,581	16	1	..	2
11	Nagpur City (Mun. Corporation)	1864	1962	5	643,659	57	..	..	..

Nagpur City Municipality was converted into a Municipal Corporation in March 1951. It is the oldest municipality which was established a century ago. Five out of the remaining 10 municipalities were also established about a century ago.

The 11 municipalities together cover 99·27 per cent of the urban population or 51·69 per cent of the total 1961 population of the district. The remaining town, *viz.*, Kamptee has a cantonment.

The taxation level of each of the municipalities is shown in the next column.

The *per capita* municipal tax in Mohpa, Katol and Kalmeshwar appears to be high. These are important trading centres.

Name of the Municipality	1961 population	Year 1961-62		
		Total receipts	Receipts from Municipal taxes	*Per capita* Municipal tax
		Rs.	Rs.	Rs.
(1) Ramtek ..	11,758	1,78,282·56	84,230·05	7·16
(2) Umrer ..	22,682	3,18,724·46	1,26,125·58	5·56
(3) Khapa ..	9,536	1,80,206·00	63,783·00	6·69

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promoting development of democratic institutions and securing greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 16 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and block boundaries except in the case of municipal towns which are not included in its purview. Kamptee Cantonment which does not have a municipal committee is, however, not included under the jurisdiction of the Zilla Parishad and Panchayat Samiti concerned. The jurisdictions of the Panchayat Samitis extend over only parts of the tahsils concerned. There are six Panchayat Samitis in Umrer tahsil and three each in Ramtek and Nagpur tahsils and two each in Katol and Saoner tahsils. The Zilla Parishad covers 96·64 per cent of the area and 47·93 per cent of the total population of the district. The population covered includes total rural population of the district in 1961. The number of villages and population included under the Zilla Parishad and each Panchayat Samiti are shown below.

The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of population in 1961.

——	Name of Headquarters	Number of inhabited villages	Number of non-municipal towns	Population in 1961	Percentage by population
(1)	(2)	(3)	(4)	(5)	(6)
Zilla Parishad, Nagpur	Nagpur	1,653	..	725,107	100·00
1 Narkhed Panchayat Samiti	Narkhed	146	..	74,994	10·3
2 Katol Panchayat Samiti	Katol	145	..	61,992	8·6
3 Saoner Panchayat Samiti	Saoner	114	..	65,404	9·0
4 Kalmeshwar Panchayat Samiti	Kalmeshwar ..	103	..	51,674	7·1
5 Parsivni Panchayat Samii	Parsivni	114	..	54,448	7·5
6 Ramtek Panchayat Samiti	Ramtek	135	..	52,334	7·2

10 Kamptee Panchayat Samiti	Kamptee	78	..	46,295	6·4
11 Umrer Panchayat Samiti	Umrer	149	..	48,050	6·6
12 Kuhi Panchayat Samiti	Kuhi	155	..	69,466	9·6
13 Bhiwapur Panchayat Samiti	Bhiwapur	30	..	17,716	2·4
14 Kargaon Panchayat Samiti	Kargaon	29	..	11,206	1·6
15 Gondbori Panchayat Samiti	Gondbori	16	..	4,885	0·7
16 Nand Panchayat Samiti	Nand	49	..	18,172	2·5

Constitution

The Zilla Parishad has 44 directly elected councillors. Out of these 44 seats, one seat has been reserved for Scheduled Castes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of all Panchayat Samitis are also *ex-officio* councillors.

At the Block level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a Chairman of a Co-operative Society conducting the business of purchase or sale of agricultural produce in the area of the Block as an associate member and a Chairman of a Co-operative Society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of Village Panchayats are also elected members of the Panchayat Samiti. The number of Sarpanchas elected is at the rate of two for each electoral division in the area of the Block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as a Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two Subject Committees are presided over by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the Subject Committees is achieved through the Standing Committee which includes the Chairmen of all the Subject Committees as members.

The Panchayat Samitis do not have subject committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now, with the creation of these democratic bodies at the district and Block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities, at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishad have been absorbed as employees of the Parishad. The village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayats, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as Janapad Sabhas and District Panchayat Mandals. The functions of non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan schemes.

If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in the Block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 150·6 lakhs. The major portion of the receipts is of receipts from Government. They are 94·2 per cent and the Zilla Parishad receipts are 5·8 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 148·8 lakhs. Following are the major items of expenditure :—

	Per cent
General Administration	5·1
Education	50·0
Community Development Projects ..	8·7
Buildings and Communications ..	6·8
Miscellaneous	6·7
Other items	22·7

Per capita expenditure on various developmental heads is as follows:—

	Rs.	nP.
General Administration	1	05
Education	10	26
Community Development	1	78
Buildings and Communications ..	1	39

Taxation

The Zilla Parishad has raised the rate of cess on land revenue to 50 nP. per rupee of land revenue.

Establishment

The establishment of the Zilla Parishad comprises the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 6 Class I and 27 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV categories is 1,121. Moreover an establishment of 103 gram sevaks, 375 talatis and 109 village panchayat secretaries has been transferred from the Revenue Department to the Zilla Parishad.

VILLAGE PANCHAYATS

The number of independent village panchayats, group village panchayats and the number of villages covered by group village panchayats as on 23rd April 1964 are shown below :—

Tahsil	No. of inhabited villages	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1 Katol ..	291	82	94	335
2 Saoner ..	217	57	73	244
3 Ramtek ..	383	77	110	398
4 Nagpur ..	334	69	124	388
5 Umrer ..	428	65	107	515
Total ..	1,653	350	508	1,880

NOTE.—As the figures in column 5 include hamlets, the total of columns 3 and 5 does not tally with the figures in column 2.

The break-up of the total annual income of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000) Rs.	Percentage of total income
Grants	366	49·46
Taxes on houses and properties	110	14·86
Octroi	2	0·27
Other taxes	179	24·19
Total taxes	291	39·32
Income from other sources	83	11·22
Total Income	740	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The village panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

The break-up of the total annual expenditure of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000) Rs.	Percentage of total expenditure
Administration	124	18·02
Health and Sanitation	67	9·74
Public Lighting	63	9·16
Other Items	434	63·08
Total Expenditure	688	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of panchayat ghars, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

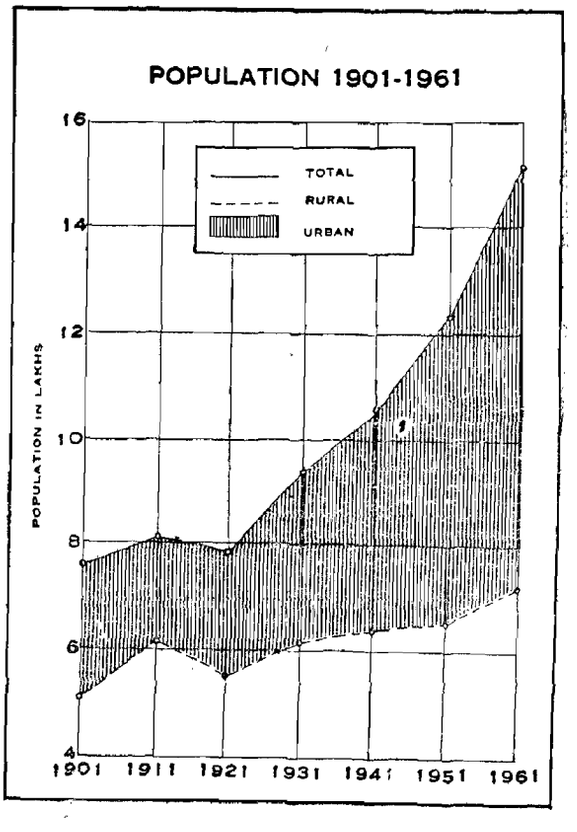

Table A-I in Part II shows the 1961 population of the district and each tahsil for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each tahsil during 1951—61.

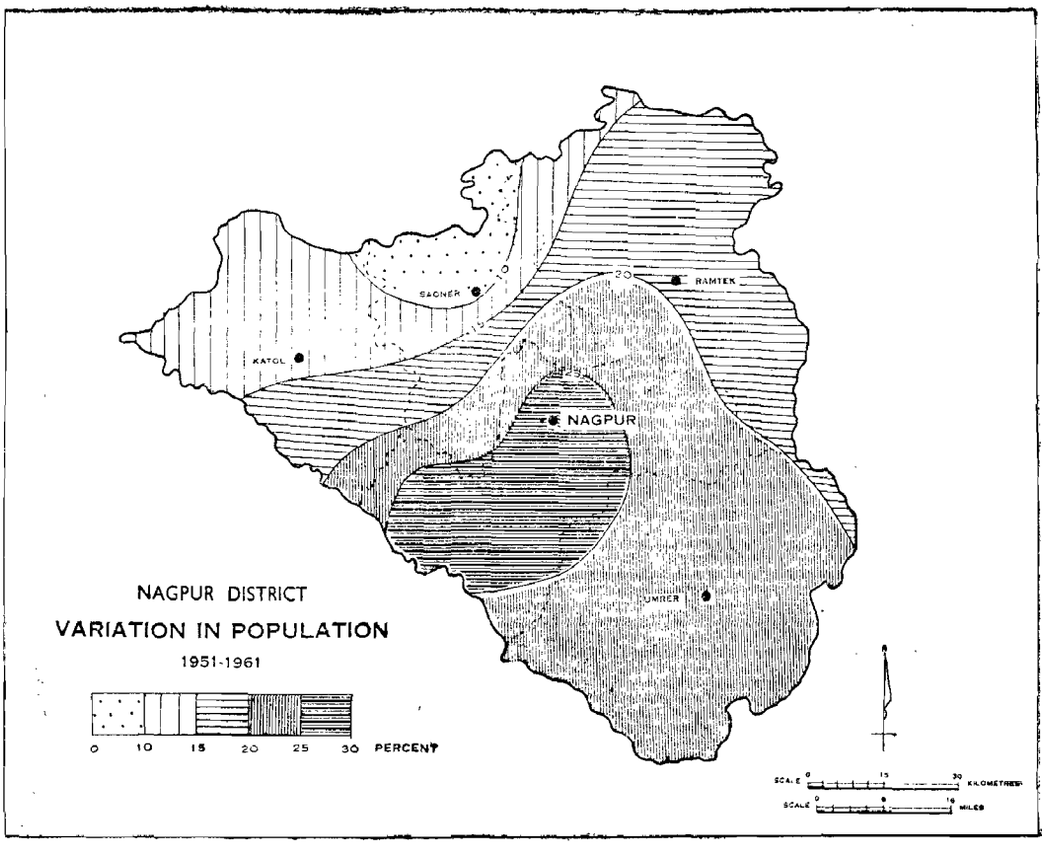

Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Decade variation	Rate of variation
1901 ..	750,935	..	..
1911 ..	808,922	+57,987	+7·72
1921 ..	792,521	—16,401	—2·03
1931 ..	940,049	+147,528	+18·62
1941 ..	1,059,989	+119,940	+12·76
1951 ..	1,234,556	+174,567	+16·47
1961 ..	1,512,807	+278,251	+22·54

Figure to the right shows the total, rural and urban population of the district for the last seven Censuses.

Because of the persisting plague epidemic the population of the district increased only by 7·72 per cent in the decade 1901—11. In the following decade in addition to the crop failures in some years, the influenza epidemic of 1918-19 took a heavy toll of life which is revealed by the decrease of the population by 2·03 per cent. Conditions improved after 1921 and there had been a distinct change in the trend of variation since then. The population increased by 18·62 per cent in 1921—31, 12·76 per cent in 1931—41 and 16·47 per cent in 1941—51. In the decade 1941—51, the partition of the country brought a large number of displaced persons, particularly to Nagpur City. The decade 1951—61 has witnessed spectacular growth of population at the highest rate (22·54 per cent). In 1961 the population is more than double of the district population in 1921.

The high increase in the population during the decade 1951—61 is partly the result of control of epidemics and other diseases since 1951. Malaria which used to be a major public health problem in the district has now been controlled by DDT spraying. This has led to an improving survival rate. The death rate has thus been reduced and is reflected in the high growth rate.

The 1951—61 decade variation for the district and each of the tahsils is as follows :—

	Percentage Variation 1951—61
NAGPUR DISTRICT	22·54
1 Katol Tahsil	13·17
2 Saoner Tahsil	10·56
3 Ramtek Tahsil	19·19
4 Nagpur Tahsil	28·23
5 Umrer Tahsil	21·42

Figure above shows the areawise pattern of 1951—61 growth of population within the district.

There are wide differences in the decade rates of variations of different tahsils. Nagpur tahsil has recorded the highest increase (28·23 per cent) while Saoner tahsil has had the lowest increase (10·56 per cent) over 1951. Only Nagpur tahsil is above the district average and the other tahsils below the average. Saoner and Katol tahsils have had very low rates compared to the other tahsils in the district. The high growth rate in Nagpur tahsil is mostly due to the increase in the population of Nagpur town-group which accounts for 83·32 per cent of the total population of the tahsil.

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Nagpur District	Maharashtra
1901—1961	101·46	103·97
1921—1961	90·89	89·71
1951—1961	22·54	23·60

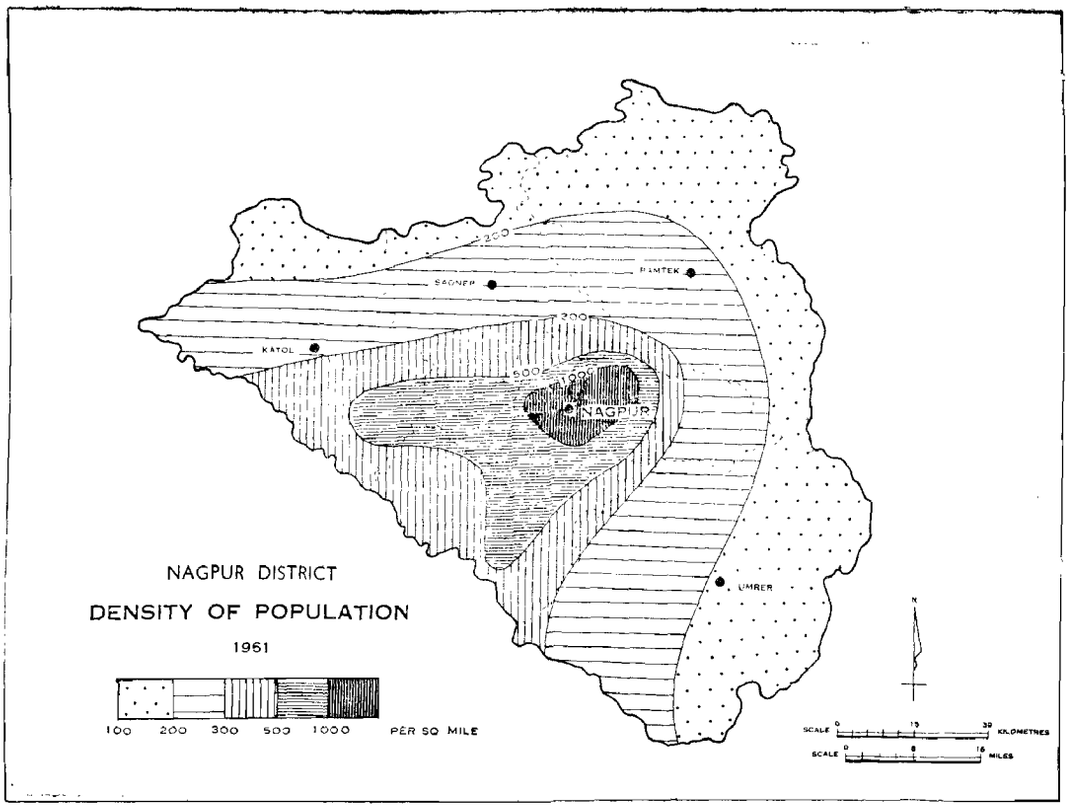

The district growth rates have always been a little lower than the State averages. The net increase during the last forty years (1921—61) was however slightly higher for Nagpur district (90·89 per cent) than the Maharashtra average (89·71 per cent).

Density of Population

The densities for Maharashtra, Nagpur district and its tahsils for 1951 and 1961 are as follows :—

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
NAGPUR DISTRICT ..	322	395	100·00
1 Katol Tahsil	242	273	11·10
2 Saoner Tahsil	248	275	9·86
3 Ramtek Tahsil	164	195	11·58
4 Nagpur Tahsil	797	1,022	54·76
5 Umrer Tahsil	163	198	12·70

Figure to the right shows the approximate contours of density of population in 1961 within the district.

The density of population of the district has increased sharply from 207 per square mile in 1921 to 395 per square mile in 1961. The district density has always been higher than the State average mainly because of its relatively larger urban population.

Density of population varies from 1,022 persons per square mile in Nagpur tahsil to 195 persons per square mile in Ramtek tahsil. High density in Nagpur tahsil is mostly due to the growth of Nagpur City. Density in Katol and Saoner tahsils is larger than that in Ramtek and Umrer tahsils. These differences are due to the existence of forests.

Because of Nagpur City the concentration of population is the highest in Nagpur tahsil which alone contains more than one-half of the district population.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

Year	Nagpur District			Maharashtra		
	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901 ..	12	..	32·01	219	..	16·59
1911 ..	12	—18·92	24·09	232	+0·99	15·13
1921 ..	12	+23·13	30·28	238	+18·72	18·50
1931 ..	13	+34·74	34·40	258	+15·54	18·60
1941 ..	13	+29·33	39·45	266	+27·11	21·11
1951 ..	13	+38·13	46·79	383	+62·42	28·75
1961 ..	12	+36·36	52·07	266	+21·32	28·22

In the Figure on page (9), the actual urban population of the district since 1901 is shown by the shaded portion between the two lines.

The net growth in urban population of the district over that of 1901 is 227·68 per cent as against 246·96 per cent for the State.

Nagpur district is relatively more urbanised than the State. The proportion of urban population had decreased in the district because of severe plague epidemics during the decade 1901—11. Since then it has gradually increased up to 1961. There were 12 towns up to 1921. There was one addition in 1931. In 1961 their number has again fallen to 12 due to declassification of one town, *viz.*, Katol, because of the re-definition of urban areas. If the population of the declassified town is excluded from the 1951 urban population, the 1961 urban population would be larger by 37·54 per cent than that in 1951. In spite of the declassification of that town in 1961 the urban population has shown an increase of 36·36 per cent over last.

Nagpur is the most important city and dominates over a wider region. The population of Nagpur town-group has increased by 314·29 per cent over that of 1901 and by 317·31 per cent over that of 1921. The other towns have not been growing very fast and their combined population increased by 32·04 per cent since 1901 and by 30·62 per cent since 1921.

The urban population in Nagpur makes the second largest (52·07 per cent) proportion in the district population in the State. The largest proportion is that (100 per cent) of Greater Bombay. This large urban population influences all demographic, social and economic characteristics of the district. Comparison of corresponding values between Nagpur district and any other district should therefore be made with a little caution.

Rural Population

The rates of variation in rural population and the percentages of rural population to tatal population of the district and the State since 1901 are as follows :—

Year	Nagpur District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	..	67·99	..	83·41
1911	+20·27	75·91	+12·68	84·87
1921	—10·01	69·72	—6·77	81·50
1931	+11·61	65·60	+14·77	81·40
1941	+4·07	60·55	+8·54	78·89
1951	+2·35	53·21	+7·72	71·25
1961	+10·38	47·93	+24·51	71·78

The net increase in rural population of the district has been 42·03 per cent over that of 1901 and 31·23 per cent over that of 1921. The same figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The rates of variation in rural population have never followed any trend. The urban population had grown faster at the expense of rural population. As a result, the percentage proportion of rural population has gradually declined from 75·91 per cent in 1911 to 47·93 per cent in 1961.

Size of Villages

Table A-III in Part II shows for the district and for each tahsil the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Nagpur District		Maharashtra	
	Percentage of the No. of villages to total No. of villages	Percentage of population to total rural population	Percentage of the No. of villages to total No. of villages	Percentage of population to total rural population
Less than 500 ..	73·32	36·75	47·72	15·02
500—999 ..	19·12	29·50	28·55	25·71
1,000—1,999 ..	5·26	16·15	16·62	28·55
2,000—4,999 ..	2·06	14·34	6·18	22·40
5,000 and over ..	0·24	3·26	0·93	8·32

The number of villages with less than 500 population are 73·32 per cent of the total number of villages and have 36·75 per cent of the district rural population. For Maharashtra as a whole such villages make 47·72 per cent of the total number of villages and account for only 15·02 per cent of the total rural population. Villages with more than 500 population are 26·68 per cent of the total number of villages and account for 63·25 per cent of the rural population. Larger villages though they are less in number account for larger population.

The area, number of inhabited villages, total rural population, average population per village and the number of villages per 100 sqare miles are shown below for the State, district and each tahsil separately :—

State/District/Tahsil	Area in square miles (Rural)	Number of inhabited villages	Rural population	Average population per inhabited village	Number of inhabited villages per 100 sq. miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31
NAGPUR DISTRICT	3,705·0	1,653	725,107	439	45
1 Katol Tahsil	596·8	291	136,986	471	49
2 Saoner Tahsil	529·5	217	117,078	540	41
3 Ramtek Tahsil	894·8	383	163,395	427	43
4 Nagpur Tahsil	718·9	334	138,153	414	46
5 Umrer Tahsil	965·0	428	169,495	396	44

J-1977—iii-B (Nagpur).

Average population per village in 1961 is 439 in the district as against 792 in Maharashtra. An average village in the district thus has much less population than an average village in the State.

The average population per village within the district varies from 396 in Umrer tahsil to 540 in Saoner tahsil. The number of villages per 100 square miles is 45 in the district against 31 in Maharashtra. Among the tahsils of the district, Saoner has 41 villages per 100 square miles compared to 49 in Katol tahsil.

It may be added that the above discussion is based on villages with their administrative boundaries and does not, take into account the existence of wadis, padas, majras or hamlets within those boundaries.

Age Distribution

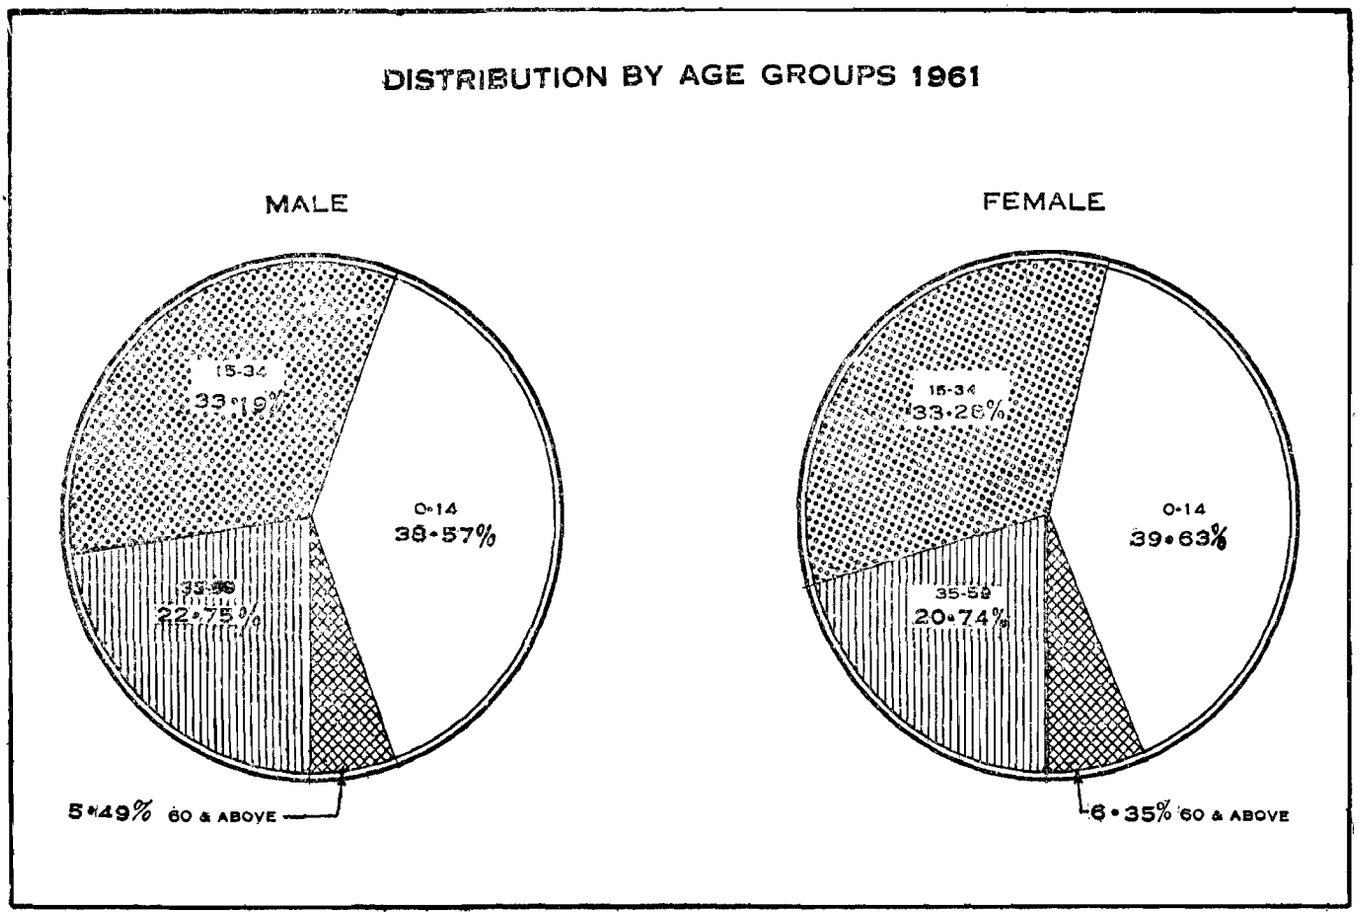

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 are shown in the next column separately for males and females compared with the corresponding proportions for 1951 with 1961 figures for Maharashtra.

Percentages of population by age-groups

Age-groups	1951 District Total		1961 District Total		1961 Maharashtra	
	Males	Females	Males	Females	Males	Females
0—4 ..	12·77	13·69	14·76	15·36	14·65	51·39
5—14 ..	24·02	24·38	23·81	24·27	25·55	25·77
0—14 ..	36·79	38·07	38·57	39·63	40·20	41·16
15—34 ..	33·00	32·61	33·19	33·28	32·70	33·13
35—59 ..	23·89	22·62	22·75	20·74	22·09	20·16
15—59 ..	56·89	55·23	55·94	54·02	54·79	53·29
60+ ..	6·32	6·70	5·49	6·35	5·01	5·55
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Figure below shows the distribution of the district population by broad age-groups for males and females separately.

During the last decade, the proportion of children aged 0—4 increased from from 12·77 to 14·76 per cent for males and from 13·69 to 15·36 per cent for females. The same trend is observed for age-group 0—14. The proportion of persons in older age-group has decreased both for males and females though it is seen more for males. Consequently the proportion of persons in the age-group 15—59 has decreased both for males and females. The proportion of persons of age-group 15—59 is larger in the district than the State average both for males and females. This difference may be partly due to Nagpur City which attracts more working age in-migrants.

Dependency Ratio

The ratio between dependants (age-groups 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State separately :—

	Nagpur District			Maharashtra		
	Youth	Aged	Total	Youth	Aged	Total
1951 Total	66·7	11·6	78·3	69·9	9·3	79·2
1961 Total	71·0	10·7	81·8	75·2	9·7	84·9
Rural	73·5	12·4	85·8	80·6	10·8	91·4
Urban	68·9	9·3	78·2	63·1	7·3	70·4

The dependency ratios are lower in the district than those for Maharashtra. It is because there is a net in-migration of working age population in the district especially in Nagpur City. The dependency ratios for the State and the district are both higher in 1961 than those of 1951. During the last decade the youth dependency has increased while the other component, *viz.*, aged, has declined in the district. The increase in dependency may be the result both of high fertility and declining mortality. The 1961 population in the district thus has a larger load of dependants than that of 1951. The dependency load is moreover more in rural than urban areas. It is the effect of the difference in age structure of rural and urban population resulting from the migration of working age (15—59) people from rural to urban areas within the district.

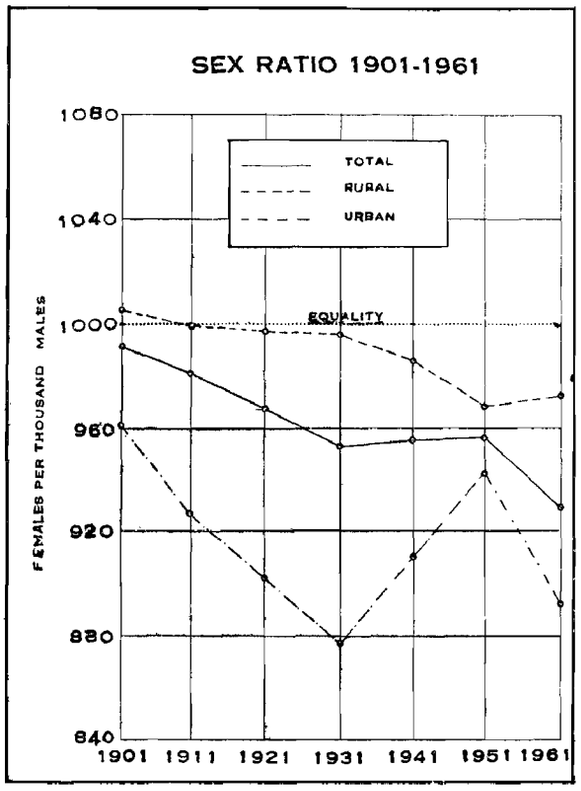

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

Year	Nagpur District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	991	1,005	961	978	1,002	866
1911 ..	981	999	926	966	1,000	796
1921 ..	967	997	902	950	994	776
1931 ..	953	996	877	947	987	790
1941 ..	955	986	910	949	990	810
1951 ..	956	968	942	941	1,000	807
1961 ..	929	972	892	936	995	801

Figure in the next column shows the variation in the sex ratios since 1901 for the district total, rural and urban areas separately.

Since 1901 the sex ratio of the population of the district varied between 929 and 991 while that of Maharashtra varied between 936 and 978.

At each Census except the present one, the district has recorded a higher sex ratio than the State, *i.e.*, for all the previous Censuses the district had comparatively more females than the State average. The sex ratio of 991 in 1901 was the highest ever recorded in the last sixty years. The urban sex ratio of the district was consistently higher than the urban sex ratio of the State. Rural urban differentials of sex ratio within the district were significant enough to suggest out-migration from rural areas to urban areas of the district. There has been a substantial fall in the sex ratio of the district during the last decade. It is seen depressed only in urban areas and suggests a fresh sex selective in-migration to urban areas of the district from outside.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas separately :—

Age-groups	Total	Rural	Urban
0—14	955	977	934
15—34	932	995	882
35—59	847	897	800
60+	1,077	1,103	1,047
All ages	929	972	892

Sex ratio is the lowest in the age-group 35—59 both for rural and urban areas. It is higher than equality for the older age-group. The rural urban differences in the sex ratio for age-groups 15—34 and 35—59 also suggest migration of males from rural areas to urban areas of the district.

The sex ratios for each tahsil in the district for total, rural and urban areas separately are as follows:—

	Total	Rural	Urban
NAGPUR DISTRICT	929	972	892
1 Katol Tahsil	946	953	917
2 Saoner Tahsil	957	961	943
3 Ramtek Tahsil	965	967	948
4 Nagpur Tahsil	901	981	886
5 Umrer Tahsil	984	992	926

Urban sex ratio is lower than rural in all the tahsils. Excepting the highly urbanised Nagpur tahsil all the other tahsils have a sex ratio higher than the average of the district. The urban sex ratio is naturally the lowest in Nagpur tahsil.

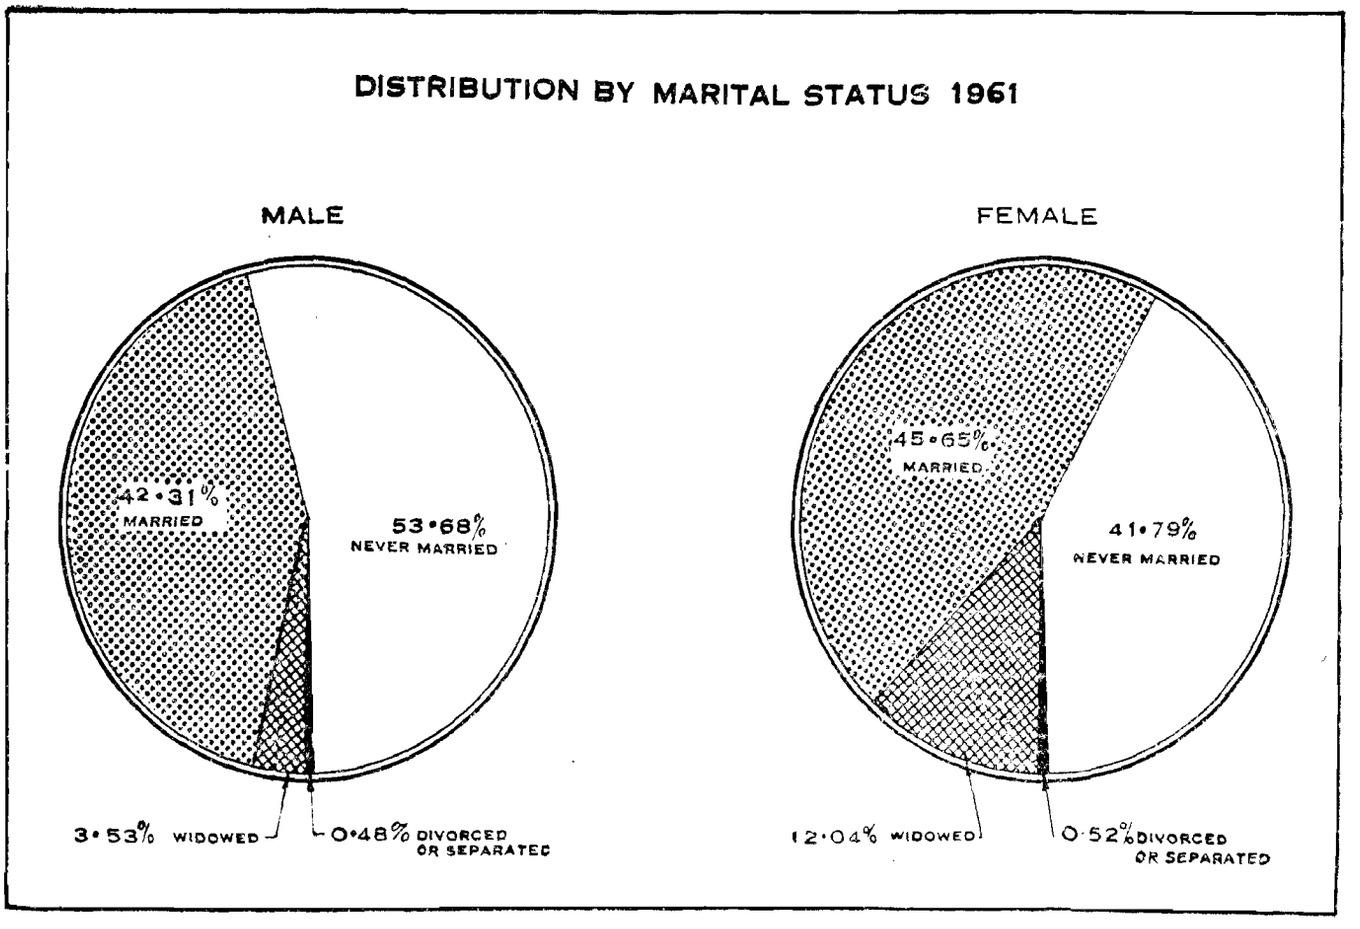

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951.

Figure below shows the distribution of the district population by marital status for males and females separately.

Year	Age-group	Total	Marital Status							
			Never Married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951 ..	0—14 ..	100	94·92	93·69	4·97	6·14	0·11	0·12	N	0·05
	15—34 ..	100	34·99	7·29	62·96	88·52	1·74	3·66	0·31	0·53
	35—54 ..	100	4·30	0·48	86·88	73·13	8·15	25·97	0·67	0·42
	55+ ..	100	2·69	0·50	72·80	27·08	23·91	72·05	0·60	0·37
	All ages ..	100	47·63	38·17	47·62	48·44	4·45	13·08	0·30	0·31
1961 ..	0—14 ..	100	99·70	97·23	0·30	2·73	N	0·02	N	0·02
	15—34 ..	100	44·34	9·44	53·55	87·10	1·40	2·48	0·71	0·98
	35—54 ..	100	1·93	0·39	90·46	73·00	6·71	25·74	0·90	0·87
	55+ ..	100	1·01	0·27	76·76	24·69	21·38	74·75	0·85	0·29
	All ages ..	100	53·68	41·79	42·31	45·65	3·53	12·04	0·48	0·52

N=Negligible.

During the last decade the proportion of never married has increased both for males and females. There has been a decrease in the proportion of widowed both for males and females. The proportion of divorced or separated showed an increase but it was hardly of any numerical importance. Consequently the proportion of married decreased both for males and females. The rise in the age at marriage may be seen from the marital status distribution by age-groups. The proportion of married has decreased for age-groups 0—14 and 15—34 both for males and females.

Child Woman Ratio

The following are the child woman ratios for 1951 and 1961, *i.e.*, the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows to 1,000 married women of 15—44 years age-group is also shown for comparison :—

	Number of children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	616	711	83
1961 District Total ..	709	826	67
Rural ..	741	835	76
Urban ..	681	817	58

The child woman ratio for rural areas is higher than that for urban areas. When it is standardised for married women of 15—44 years age-group, the rural urban differences are substantially narrowed. This may indicate a slightly higher fertility rate in rural areas. Over the decade, the child woman ratio has increased from 616 to 709. The increase may be due both to a higher birth-rate and somewhat reduced infant mortality.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 83 in 1951 to 67 in 1961. The incidence of widowhood is higher in rural areas than in urban areas.

Migration

The 1961 Census showed the proportions of population enumerated at places of birth and other places as shown in the table below.

58·97 per cent of the population was enumerated at places of birth. This percentage for males is 67·68 but for females it is only 49·60. The difference is due to women married outside their places of birth. This movement of females again appeas to be mostly within the district and outside the district but within the State, because the proportions of female population in those two groups are higher than the corresponding proportions of males.

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows :—

Age-group	Sex ratios		
	Total	Rural	Urban
All ages	929	972	892
0—4	967	982	952
5—9	982	1,013	952
10—14	907	924	892
15—19	852	925	797
20—24	1,018	1,169	914
25—29	989	1,019	964
30—34	857	861	852
35—39	832	882	787
40—44	857	924	801
45—49	851	902	800
50—54	857	901	817
55—59	843	870	810
60+	1,077	1,103	1,047

The rural urban differentials of sex ratios are less in younger and older age-groups though rural sex ratio is almost always higher than urban sex ratio. These differences are more significant in adult age-groups, among which the age-group 20—24 has the highest ratio. The high rural sex ratio in the age-group 20—24 may be due to the movement of young adult males in search of jobs or for higher education in the urban areas of the district. The high sex ratio for age-group 60 and over may partly be due to misreporting of age as 60 by women of near age 60.

Proportions of Population by places of birth

	(1)	Total population (2)	In place of enumeration (3)	Elsewhere in the district (4)	Outside the district but in Maharashtra (5)	Outside Maharashtra (6)
Persons		1,512,807	890,452	323,822	164,981	130,713
Males		784,161	529,826	110,945	73,921	68,144
Females		728,646	360,626	212,877	91,060	62,569
Percentage to total population—						
Persons		100·00	58·97	21·44	10·93	8·66
Males		100·00	67·68	14·17	9·44	8·71
Females		100·00	49·60	29·28	12·52	8·60

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52.

The proportion of non-workers is smaller in the population born at places other than the place of enumeration. The proportion of cultivators is higher among those born at the place of enumeration. The proportion of agricultural labourers is higher among those born elsewhere in the district. It is observed that people coming from outside the district are engaged more in the tertiary sector in the categories VII, VIII and IX.

——	Categories of Workers									Non-Workers
	I	II	III	IV	V	VI	VII	VIII	IX	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total ..	15·09	8·30	2·67	5·86	6·74	1·34	4·86	3·81	7·46	43·87
Born at place of enumeration.	18·57	8·41	2·20	6·07	4·15	0·69	3·22	1·90	4·14	50·65
Elsewhere in the district.	13·77	13·72	3·87	6·28	11·03	2·36	5·53	5·44	10·77	27·23
Outside the district	3·20	3·68	3·42	4·78	13·06	2·95	10·43	9·69	17·29	31·50

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member	9·02	8·84	9·20
2—3 members	26·97	27·53	26·41
4—6 members	43·24	45·19	41·30
7—9 members	15·96	14·89	17·02
10 members and more ..	4·81	3·55	6·07
All sizes	100·00	100·00	100·00

Among the different size groups, households with 4 to 6 members are more common (43·24 per cent) than others. The percentage distribution of rural and urban households by their size shows that single and small size households are more (36·37 per cent) in rural areas than in urban areas (35·61 per cent). Households of very large size are more in urban than rural areas. The average size of the household is 4·7 persons for the district. It is 4·5 for rural areas and 4·9 for urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is shown below :—

——	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	37·37	4·03	38·72	4·64	36·16	3·43
(2) Spouses of heads of households	0·08	33·34	0·08	33·63	0·08	33·07
(3) Married sons	6·04	..	7·34	..	4·87	..
(4) Other married relations	3·90	11·86	3·50	12·56	4·26	11·17
(5) Never married, widowed or divorced relations	51·56	50·49	49·80	48·98	53·14	51·96
(6) Unrelated persons	1·05	0·28	0·56	0·19	1·49	0·37
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

37·37 per cent of the males are heads of households as against 4·03 per cent for females. Married sons are 6·04 per cent of the total males. 51·56 per cent males and 50·49 per cent females which incidentally form the largest groups are never married, widowed or divorced relations. Proportion of unrelated persons is 1·05 per cent for males and only 0·28 per cent for females. 33·34 per cent females are spouses of heads of households. High proportion of females in other married relations includes the daughters-in-law and daughters or sisters of the heads. The heads of the households and their spouses have a higher proportion in rural areas. The proportion of married sons is less in urban areas. It may indicate that the joint family is being replaced by the biological family more in urban areas. Unrelated persons have a higher proportion in urban areas. Domestic servants are included in this category and they appear to be staying with the households more in urban than in rural areas.

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has, on our request, worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown below :—

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951	1,235	*179	*692
Actual 1961	1,513	227	832
Projected 1966	1,726	244	931
Projected 1971	1,949	282	1,062
Projected 1976	2,202	309	1,222
Projected 1981	2,494	333	1,410

* Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V in Part II shows the population by nine major languages for the district and each tahsil and town separately. The distribution of languages by rural and urban areas of the district is as follows :—

Language	Percentage to total Population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Gondi ..	3·14	5·54	0·93	84·66	15·34
(2) Gujarati ..	0·86	0·10	1·55	5·45	94·55
(3) Hindi ..	11·41	7·14	15·35	29·98	70·02
(4) Marathi ..	75·96	85·96	66·76	54·24	45·76
(5) Punjabi ..	0·49	0·03	0·92	2·68	97·32
(6) Sindhi ..	1·06	0·01	2·03	0·34	99·66
(7) Tamil ..	0·47	0·02	0·87	2·62	97·38
(8) Telugu ..	0·94	0·17	1·66	8·64	91·36
(9) Urdu ..	4·68	0·57	8·45	5·90	94·10
(10) Others ..	0·99	0·46	1·48	22·09	77·91
All languages ..	100·00	100·00	100·00	47·93	52·07

Marathi is the principal language and is the mother-tongue of 76 per cent of the population. In rural areas Marathi speakers account for 86 per cent of the population. They make only 66·8 per cent of the population in urban areas. Hindi has the second largest number of speakers. It makes 11·4 per cent of the total population of the district. It is spoken more in urban areas where its speakers make as much as 15·4 per cent against only 7·1 per cent for rural areas. The speakers of Gondi are concentrated in rural areas whereas in urban areas concentration of Urdu speakers is more. The speakers of all other languages are similarly concentrated in urban areas.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Gondi	5·38	3·62	3·14
(2) Gujarati	0·19	0·75	0·86
(3) Hindi	14·82	12·73	11·41
(4) Marathi	76·45	75·19	75·96
(5) Punjabi	..	0·48	0·49
(6) Sindhi	..	0·84	1·06
(7) Tamil	0·46	0·54	0·47
(8) Telugu	1·12	0·77	0·94
(9) Urdu	..	3·96	4·68
(10) Others	1·58	1·12	0·99
All languages	100·00	100·00	100·00

The percentage of Marathi speakers has slightly decreased from 1901. But it is more or less the same in 1951 and 1961. The proportion of Hindi speakers has decreased from 1901. So also that of Gondi speakers. The percentage of Gujarati speakers has increased from 1901. The proportions of Tamil and Telugu speakers have remained fairly constant. The proportion of Urdu, Sindhi and Punjabi speakers has increased in the last decade. They were not represented in 1901 Census. It should, however, be noted that the 1901 proportions shown here are for the district boundaries as they existed in that year.

RELIGIONS

Table C-VII in Part II shows the population by religions for the district and each tahsil and town separately. The distribution of religions by rural and urban areas of the district is as follows :—

	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	15·48	16·73	14·32	51·81	48·19
(2) Christians ..	0·90	0·09	1·65	4·97	95·03
(3) Hindus ..	76·96	81·44	72·84	50·72	49·28
(4) Jains ..	0·50	0·16	0·81	15·71	84·29
(5) Muslims ..	5·82	1·55	9·75	12·78	87·22
(6) Others ..	0·34	0·03	0·63	2·56	97·44
All religions ..	100·00	100·00	100·00	47·93	59·07

Nearly 77 per cent of the population is Hindu. Hindus make 81·44 per cent in rural areas and 72·84 per cent in urban areas. Buddhists account for 16·73 per cent in rural areas and 14·32 per cent in urban areas. Muslims are only 1·55 per cent in rural areas but make as much as 9·75 per cent in urban areas. Christians and followers of other religions are almost entirely urban groups. The Hindus and Buddhists are more numerous in rural than urban areas.

The comparative position of the religions in 1901 and 1961 is as follows :—

	Percentage to total population	
	1901	1961
(1) Buddhists	..	15·48
(2) Christians	0·82	0·90
(3) Hindus	87·91	76·96
(4) Jains	0·36	0·50
(5) Muslims	5·66	5·82
(6) Others	5·25	0·34
All religions	100·00	100·00

The proportions of Christians, Jains and Muslims have slightly increased over the last sixty years. The percentage of Hindus has substantially fallen from 87·9 per cent in 1901 to 77 per cent in 1961 because some persons belonging to Hindu Scheduled Castes returned their religion as Buddhist or Nav-Bauddha. The combined proportion for Hindus and Buddhists is however 4·5 per cent larger in 1961 than that in 1901. It is because about 40,000 persons who were shown as Animists in 1901 have returned their religion as Hindu in the 1961 Census.

Sex ratio in 1961 for each religion is as follows :—

Buddhists 966, Christians 927, Hindus 926, Jains 942, Muslims 882, All religions 929.

High sex ratio for Buddhists indicates that more of their males are going out of the district for work. Sex ratio for Muslims is the lowest among all religions.

SCHEDULED CASTES

Table SCT-I-Part A in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste for the district and each taluka separately. Actually, 16 castes are notified as Scheduled Castes in the district but only 15 are reported in the 1961 Census.

The distribution of these 15 Scheduled Castes by rural and urban areas of the district is as follows :—

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Castes	27,906	26,482	3·60	42·60	57·40
(1) Bahna	5	6	N	81·82	18·18
(2) Balahi	17	20	N	5·41	94·59
(3) Basor	551	457	0·07	9·33	90·67
(4) Bhangi	3,708	3,426	0·47	5·24	94·76
(5) Chambhar	7,215	6,768	0·92	53·90	46·10
(6) Dohor	25	19	N	90·91	9·09
(7) Dom	720	690	0·09	2·20	97·80
(8) Ganda	4	..	N	25·00	75·00
(9) Ghasi	4	1	N	..	100·00
(10) Kaikadi	25	13	N	23·68	76·32
(11) Katia	53	55	0·01	100·00	..
(12) Khatik	1,206	1,186	0·16	22·16	77·84
(13) Madgi	18	10	N	100·00	..
(14) Mahar	8,064	7,413	1·02	41·98	58·02
(15) Mang	6,257	6,373	0·84	62·06	37·94

*Inclusive of persons from the Scheduled Castes who have not reported their individual caste. "N" indicates negligible entry.

The one remaining Scheduled Caste for which no one was returned in the district in 1961 is "Sansi".

Out of the fifteen Scheduled Castes enumerated in the district, the largest number is of Mahars. The second largest group is of Chambhars and the third and the fourth are Mangs and Bhangis respectively. Khatik, Dom and Basor have their respective populations 2,392, 1,410 and 1,008. The remaining eight Scheduled Castes have together 275 population and make less than 0·02 per cent of the total population.

The comparative position of the Scheduled Castes population in 1951 and 1961 within the district is as follows :—

	Percentage to total population in		
	Total Area	Rural Areas	Urban Areas
All Scheduled Castes—			
1951	18·11	20·15	15·98
1961	3·60	3·20	3·96

The proportion of Scheduled Castes has decreased from 18·11 per cent in 1951 to 3·60 per cent in 1961. It is the result of a large number of persons from Mahar caste returning their religion in 1961 Census as Buddhist or Nav-Bauddha. Due to the change of religion they are not enumerated as Scheduled Castes, as the Constitution recognises Scheduled Castes from Hindu and Sikh religions only. The combined population of the Scheduled Castes and Buddhists makes over 19·08 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (i) and B (i) in Part II show the literacy and educational levels for each Scheduled Caste. The percentages of literacy for the district population, for all Scheduled Castes and each Scheduled Caste are shown below.

The Scheduled Castes in this district appear to have come out of their educational backwardness as the gap between their literacy rates and the district average is considerably reduced now. They seem to be taking full advantage of the educational facilities and concessions available in the district.

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	20·92	33·20	8·28	48·25	61·48	33·75
All Scheduled Castes	16·99	28·90	4·91	32·85	47·47	17·02
(1) Bahna	No literates			No literates		
(2) Balahi	No literates			51·43	70·59	33·33
(3) Basor	25·53	43·14	4·65	32·28	46·60	14·98
(4) Bhangi	20·05	32·12	7·18	29·29	46·03	11·16
(5) Chambhar	15·13	25·58	4·14	23·18	35·14	10·21
(6) Dohor	25·00	43·48	No literates	25·00	50·00	No literates
(7) Dom	29·03	52·94	No literates	29·37	46·66	11·39
(8) Ganda	No literates			100·00	100·00	..
(9) Ghasi	..	..	..	20·00	25·00	No literates
(10) Kaikadi	22·22	40·00	No literates	3·45	5·00	No literates
(11) Katia	17·59	32·08	3·64	..	..	..
(12) Khatik	27·74	45·19	9·62	36·84	54·17	19·33
(13) Madgi	14·29	22·22	No literates	..	..	..
(14) Mahar	22·87	37·23	8·14	47·78	62·00	31·63
(15) Mang	12·87	23·36	2·74	22·43	35·77	9·00

J-1977—iv-B (Nagpur).

Economic Activity

The industrial classification of persons at work and non-workers for the district average, all Scheduled Castes and for each Scheduled Caste is as follows :—

	Percentage of workers in categories			Non-Workers
	Cultivation	Agricultural Labour	All other activities	
District Average	14·87	10·10	21·50	53·53
All Scheduled Castes	5·46	8·87	30·71	54·96
(1) Bahna ..	9·09	54·55	18·18	18·18
(2) Balahi ..	..	2·70	29·73	67·57
(3) Basor ..	0·40	0·20	48·71	50·69
(4) Bhangi ..	0·08	0·09	39·47	60·36
(5) Chambhar ..	6·03	9·53	31·76	52·68
(6) Dohor ..	..	4·55	45·45	50·00
(7) Dom ..	..	0·21	39·65	60·14
(8) Ganda ..	..	..	75·00	25·00
(9) Ghasi ..	..	..	40·00	60·00
(10) Kaikadi ..	..	2·63	50·00	47·37
(11) Katia ..	54·63	2·78	7·41	35·18
(12) Khatik ..	5·43	3·30	26·09	65·18
(13) Madgi ..	7·14	10·72	50·00	32·14
(14) Mahar ..	10·78	10·17	21·44	57·61
(15) Mang ..	1·83	14·20	34·64	49·33

The labour participation rate for the Scheduled Castes is more or less the same as the average for the district. However, the proportion in cultivation is lower and that in other activities is higher than the district average. This is due to the association of Scheduled Castes with certain services as well as to a fewer persons owning lands amongst them.

Size of Land Cultivated

A broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Castes in rural areas is as follows :—

Size of land cultivated	District Rural population		All Scheduled Castes	
	No. of sample households	Percentage	No. of sample households	Percentage
All sizes	18,864	100·00	3,542	100·00
Less than 5 acres	4,347	23·04	915	25·83
5—9·9 acres ..	4,841	25·66	929	26·23
10—29·9 acres ..	7,856	41·65	1,377	38·88
30 acres and over	1,820	9·65	321	9·06

Out of a sample of 18,864 cultivating households, 3,542 or 18·78 per cent households are from the Scheduled Castes in rural areas as against their population which is 3·20 per cent of the total rural population of the district. 25·83 per cent of the cultivating households of the Scheduled Castes are cultivating less than five acres of land as against the corresponding average of 23·04 per cent for the district. The percentage of households cultivating land above five acres among Scheduled Castes is 74·17 per cent as against the corresponding average of 76·96 per cent for the district. The proportion of cultivating households is thus more or less the same for both the Scheduled Castes and the total population, even though their participation as agricultural labourer is slightly more.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of Standing Committee which is the most powerful Committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the Subject Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(1) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, Nomadic and semi-Nomadic tribes, Vimukta Jatis and the Backward Classes. The concession is awarded in the Primary Schools, High Schools or Technical Schools. 15,180 students benefited from and Rs. 3,97,404 were spent on these schemes during the year 1962-63. Rs. 1,21,398 were spent on 17 Backward Class hostels and 4 cosmopolitan hostels in the district during the year 1962-63. In addition building grant of Rs. 13,566 was given for the construction of two Scheduled Caste hostels.

(2) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for cottage industries and professions and of assistance for purchase of milch cattle to the Scheduled Castes and other Backward Classes. Under the scheme of loan-*cum*-subsidy for cottage industries and professions, Rs. 19,100 were given to 74 beneficiaries from the Scheduled Castes and Backward Classes from underdeveloped rural areas. During the year 1962-63, Rs. 3,466 were spent on 20 beneficiaries under the scheme of assistance for purchase of milch cattle.

(3) *Housing.*—Twenty-two housing societies of Backward Classes have been formed in the district. These societies construct houses for their members. Financial assistance in the form

of loans and subsidies is given to these societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other Backward Classes is also provided. Under this scheme Rs. 7,100 were incurred on 59 beneficiaries during 1962-63. This included an amount of Rs. 2,400 spent on building sites for 12 beneficiaries from Backward Classes.

(4) *Drinking Water Wells.*—An amount of Rs. 8,750 was spent under this scheme. Rs. 5,250 were incurred for drinking water wells for Scheduled Castes for three beneficiaries.

(5) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to the Scheduled Castes and Rs. 1,000 were spent during the year on 12 beneficiaries.

(6) *Agricultural.*—Financial assistance to poor deserving agriculturists from Scheduled Tribes, Vimukta Jatis, underdeveloped rural areas and other Backward Classes to purchase ploughs, bullocks, implements, seeds, carts, etc., is given.

(7) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film shows are exhibited and gatherings are addressed at fairs and other places. Kirtan programmes and Melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability. Rs. 3,590·45 were spent under this scheme during the year 1962-63.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan schemes.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes".

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Caste converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

The growth in the number of educational institutions and the improvement in literacy rates in the district have been remarkable in the last 30 years. By literacy the district is second only to Greater Bombay.

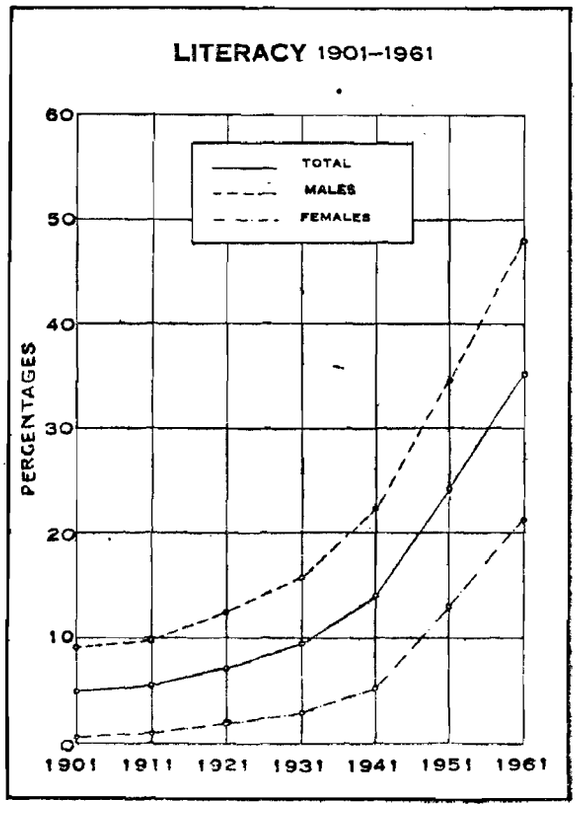

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is as follows :—

	Total	Males	Females
1901	4·92	9·15	0·65
1911	5·36	9·81	0·84
1921	7·16	12·43	1·72
1931	9·40	15·68	2·82
1941	13·95	22·33	5·18
1951	24·43	33·86	14·40
1961	35·15	48·06	21·26

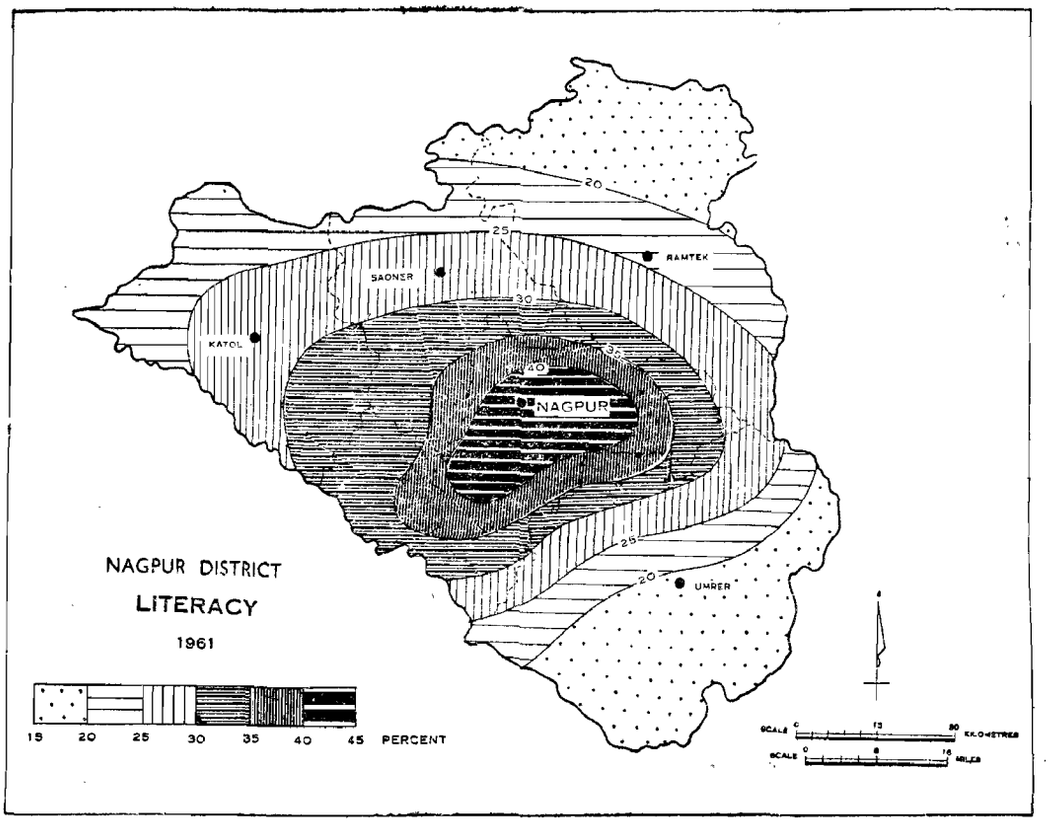

Figure to the right shows the growth of literacy in the district for total population, males and females separately.

Literacy percentage has increased nearly four times during the last thirty years. Female literacy in particular has increased at a very rapid rate since

1941. While the male literacy has improved more than three times during 1931—61, female literacy increased more than seven times during the same period. The scheme of compulsory primary education introduced in the post-independence period might be one of the factors which helped to raise the level of literacy.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each tahsil separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately.

Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each tahsil separately.

Figure above shows the spread of literacy in the district by isopleths. The central portion of the district roundabout Nagpur town is naturally the most literate area in the district. Literacy rates drop down as we move away from this central region. They are lowest in the hilly regions of Satpuda in the north of Ramtek tahsil and in the south-east region in Umrer tahsil. Within the district, Nagpur tahsil has the highest literacy for total population as well as for males and females separately. Katol tahsil has the highest literacy for total and for females in rural areas. But literacy for males is highest in Saoner tahsil. For urban areas also Nagpur tahsil has highest literacy for total, males and females.

Comparison of rural and urban literacy rates shows that both for males and females the district literacy is lower in urban and rural areas than the corresponding averages of the State. The district literacy rates for total get substantially higher than the State averages because the proportion of the urban population in the district is relatively very much larger than the State average.

State/District/Tahsil	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
NAGPUR DISTRICT	35·15	48·06	21·26	29·92	33·20	8·28	48·25	61·18	33·75
1 Katol Tahsil	27·90	40·32	14·76	25·17	37·05	12·69	40·01	54·58	24·14
2 Saoner Tahsil	28·14	42·93	12·69	25·13	39·14	10·55	39·13	56·62	20·57
3 Ramtek Tahsil	20·22	32·84	7·16	18·81	31·01	6·19	39·80	57·94	20·66
4 Nagpur Tahsil	44·81	57·44	30·81	21·16	33·75	8·33	49·55	61·95	35·55
5 Umrer Tahsil	18·87	30·79	6·77	16·41	27·53	5·21	37·26	54·32	18·84

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are as shown below. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

Literacy rate for males is higher in the age-group 15—34 than that in 5—14. For females the literacy rate in age-group 5—14 is higher than that in 15—34. These differences indicate comparative recency of efforts of female education.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Female
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	35·15	48·06	21·26	20·92	33·20	8·28	48·25	61·18	33·75
0—4	..	..	..	..	..	..	..	..	..
5—14	47·83	55·98	39·23	32·42	44·01	20·53	61·98	66·71	56·87
15—34	47·06	65·41	27·36	26·88	44·71	8.96	63·68	81·50	43·49
35—59	31·53	48·74	11·21	17·79	31·85	2·13	44·99	64·45	20·67
60+	19·60	35·40	4·92	10·88	22·00	0·79	29·83	50·70	9·89

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each tahsil in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as follows :—

	Total	Basic			Non-Basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV multi-teacher	Middle I-VII
Total number of schools	1,095	5	1	..	331	677	81
Central Government	4	..	..	..	3	1	..
State Government	21	5	1	..	1	9	5
Zilla Parishad	746	..	..	..	325	346	75
Municipal	229	..	..	..	..	229	..
Private	95	..	..	..	2	92	1

There has been a very rapid growth in the number of primary schools during the last ten years. The number rose from 393 in 1950-51 to 659 in 1955-56 and to 1,065 in 1960-61. On 31st March 1962, it stood at 1,095. Out of the 1,095 primary schools, 767 or 70 per cent (including 21 schools handed over by the State Government to the Zilla Parishad) are managed by the Zilla Parishad and only 95 or 9 per cent are managed by private institutions. The State Government's share (in the year 1961-62) was 57·3 per cent of the total expenditure. The expenditure on primary education is incurred by the State Government through grants-in-aid to the Zilla Parishad and building loans and grants to Primary Teachers' Training Colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes get free education at the cost of the Government. Scholarships are given to students from Scheduled Castes at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes.

On 31st March 1962 there were only six basic schools in the district.

By 31st March 1962, 12 towns and 720 villages in the district had primary schools and 564 villages had schooling facilities, *i.e.*, primary schools situated within a mile from the village. 369 villages did not have even schooling facilities. Total number of teachers was 4,286. Out of them, 3,737 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Nagpur District	Maharashtra
Average population served by a primary school	1,397	1,135
Average area served by a primary school (square miles)	3·5	3·4
Pupils per teacher	33	38
Pupils per school	130	127
Average annual salary per teacher (Rs.)	1,435	1,250
Average annual expenditure per school (Rs.)	6,482	4,903
Average number of teachers per school	3·9	3·3
Percentage of trained teachers	67·2	64·8

In 1951, compulsory primary education was in force in some areas in the Nagpur Corporation limits and five other villages. The scheme of compulsory education has now been extended to the whole of Nagpur Corporation area and to most of the other municipal towns.

One of the Third Plan Schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11. A provision of Rs. 84·76 lakhs has been made for primary education in the Third Plan of the district. During the Plan period, 2,520 additional teachers would be appointed in primary schools. The number of students is expected to rise by 76,000. Similarly, 202 class-rooms are proposed to be built during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools		Middle Secondary Schools
			Multi-purpose	Ordinary	
State	7	1	1	3	2
Municipal	7	..	..	4	3
Private	147	..	16	85	46
Others (Janpad Sabha) (now Zilla Parishad).	9	..	..	2	7

Total number of students on roll in the secondary schools on 31st March 1962 was 72,381. Out of them, 50,441 were boys and 21,940 girls. Total number of teachers was 2,925. Out of them, 1,661 were trained teachers. Percentage of trained teachers was thus 56·8. Other indices of secondary education compared to the State averages are as follows :—

	Nagpur District	Maharashtra
Population served by each secondary school ..	8,996	13,805
Area served by each secondary school (square miles)	22·6	40·8
Pupil-teacher ratio	25	25
Pupils per secondary school	426	338
Average annual salary per teacher .. (Rs.)	1,882	1,870
Average annual expenditure (direct) per secondary school .. .. .. (Rs.)	44,010	39,543
Average number of teachers per secondary school	17·2	13·7

Figure on page (26) shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

The progress of secondary education in the district has also been quite rapid. The number of secondary schools increased from 63 in 1950-51 to 83 in 1955-56 and to 139 in 1960-61. This figure stood at 170 on 31st March 1962. The secondary schools are dispersed throughout the district. Nagpur tahsil has the highest, *i.e.*, 104 secondary schools while Ramtek tahsil has nine which is the smallest number for any tahsil in the district.

Private institutions alone manage a very large proportion of the secondary schools in the district. The Government share in the total expenditure on secondary education is, however, 71·0 per cent (in 1961-62) and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes or other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools the number of pupils in the secondary schools may rise to 1·15 lakh by 1965-66 and to 2·13 lakhs by 1970-71.

S. S. C. and Higher S. S. C. Examinations

Vidarbha Board of Secondary Education, Nagpur, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October and Umrer, Saoner, Katol, Narkhed, Ramtek, Kamptee and Nagpur are the examination centres in the district. The number of candidates who appeared and passed from those centres during the year 1962 are as follows :—

21991

	Appeared	Passed
S. S. C. Examination held in—		
March 1962	7,430	3,470
October 1962	2,028	596
Higher S. S. C. Examination held in—		
March 1962	1,745	1,032
October 1962	388	140

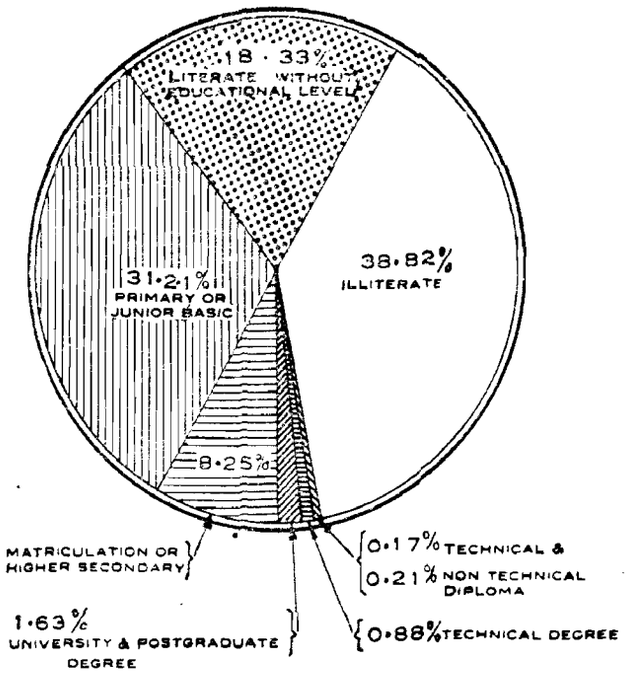

Higher Education

Tahsilwise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. There were 21 colleges in the

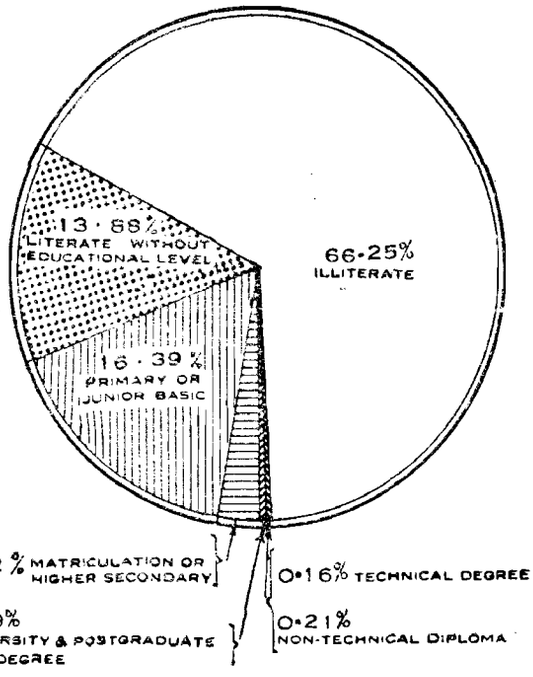

LITERACY AND EDUCATIONAL LEVEL 1961.

URBAN

MALE

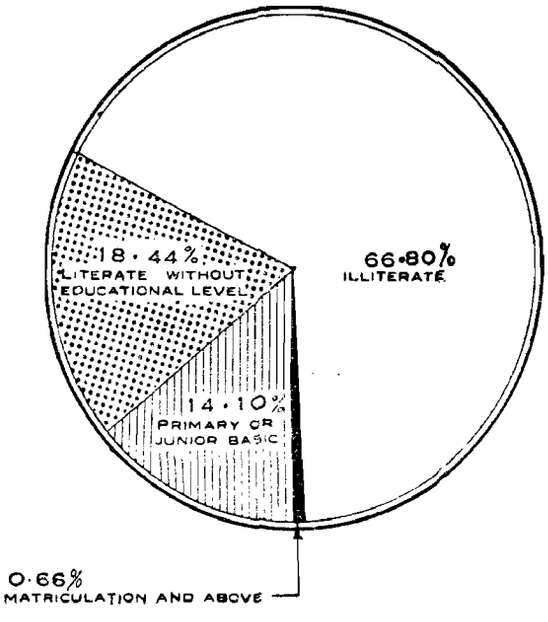

FEMALE

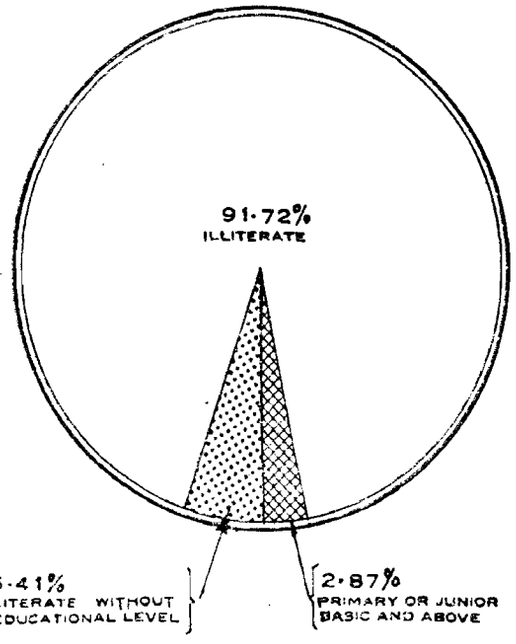

RURAL

MALE

FEMALE

district in 1960-61. The number of college students was 12,833. In 1963-64 the number of colleges and institutions stood at 26. Out of these, seven are managed by the State Government and seven by the Nagpur University. The remaining colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government. The colleges now provide education in Arts, Science, Commerce, Teaching, Engineering, Agriculture, Veterinary, Law and Medicine. The Nagpur Medical College has a very big and well-equipped hospital attached to it. The annual in-take capacity of the Medical College is 150. Additional courses are provided in Ancient History and Culture, Library Science, Statistics, Pharmacy, etc.

Technical Education

There is one Government Vocational High School where courses are provided in Carpentry, Smithy, Leather-work, Electrician and Tailoring. There is one occupational institute attached to the Anatha Vidyarthi Griha at Nagpur. It is run exclusively for the orphan children. There is also one Industrial Training Centre at Nagpur.

The Government Polytechnic at Nagpur provides for diploma courses in Civil, Mechanical and Electrical Engineering and in Art and Automobile. There is also a degree course in Architecture. The total number of students studying for diploma courses is 195 and for degree course 30.

The Laxminarayan Institute of Technology at Nagpur provides courses in Chemical Engineering and Oil Technology for the degrees B.Tech. and M.Tech. It was established in 1942 according to the terms of the will of late Rao Bahadur D. Laxminarayan of Kamptee and the expenditure on the Institute is met partly from the annual income of his estate, bequeathed to the Nagpur University. The in-take capacity of the Institute is 60.

The Engineering College at Nagpur was started in 1956-57 where students are trained for degree courses in Civil, Mechanical and Electrical Engineering. In 1960 it has been converted as Vishweshar-ayya Regional College of Engineering and the annual in-take capacity raised to 150. The expenditure of the college is borne by the Government of India and the State Government on fifty-fifty basis.

Libraries

There are 21 libraries in Nagpur district which are recognised by the Government of Maharashtra. The amount of Rs. 5,242 was sanctioned as grant-in-aid for these libraries during 1963-64.

Printing Presses, Journals and Newspapers

There are 67 Printing Presses in the district. The number of journals and newspapers is 69 Out of them 11 are dailies, 16 weeklies, 24 monthlies and 18 other periodicals.

Radio Licences

The number of radio licences in the district increased from 9,180 in 1955-56 to 15,277 in 1959-60 and fell to 14,049 in 1960-61.

Cinema Theatres

On 21st December 1963 there were 31 permanent cinema theatres in the district.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health activities in the district.

Drinking Water Supply

Column (5) in the Village Directory in Part I shows the sources of supply and adequacy of drinking water for each village in the district.

Two towns have piped water-supply. Out of the remaining towns and villages, 44 villages draw drinking water from rivers, three villages from tanks, 14 villages from nallahs, three towns and 1,275 villages from wells and seven towns and 317 villages have more than one of these sources of water. The water-supply is not adequate in summer in five towns and 214 villages.

Malaria Eradication

A Malaria Eradication Centre is functioning at Nagpur having jurisdiction over the entire district. Every year, DDT is sprayed in every household of all the villages in the district.

Anti-T.B.

There are four B.C.G. teams operating in the district. The teams have covered all the schools in the district. In 1957 over 50,000 persons were vaccinated. An anti-T.B. centre has been started at the Medical College, Nagpur, in collaboration with the World Health Organisation. The centre provides for specialised training in treatment of T.B. and has accommodation for T.B. patients.

Leprosy Control

A leprosy control centre has been started at the Mayo Hospital at Nagpur. Second leprosy control centre has been established at Parsivni in Ramtek tahsil.

Leprosy units are established at Mauda, Narkhed, Katol and Saoner. In addition, there is a leprosy subsidiary centre at Umrer.

Control of Smallpox

A Vaccine Institute is functioning since long in Nagpur. It manufactures smallpox vaccine. The number of deaths due to smallpox was 151 in 1950. It decreased to 119 in 1960. In order to strengthen the establishment for vaccination against smallpox in the Third Five-Year Plan a unit of 21 vaccinators was proposed to be appointed involving an outlay of Rs. 1.91 lakhs.

Family Planning Centres

There are six family planning centres in the district at Kalmeshwar, Kuhi, Mauda, Narkhed, Saoner and Kelod. It was proposed to set up one mobile vasectomy unit in the Third Five-Year Plan with an outlay of Rs. 4.04 lakhs.

Medical Facilities

Medical facilities available in the district are shown in Table 17 in Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The numbers of private hospitals, dispensaries and medical practitioners are not shown there.

The number of beds was 1,712 in 1960. The number of in-door and out-door patients was 30,313 and 1,047,205 in 1960, respectively. The number of doctors and nurses was 134 and 163, respectively, in 1960.

Hospitals.—In 1960, there were in all 17 Government or Government-aided hospitals in the district. The main hospital is the Mayo Hospital (now called the Mayo General Hospital) at Nagpur. It is equipped with the most modern equipment. It was established in 1863. The Medical College Hospital at Nagpur was established in 1947. It is attached to the Medical College and has all the facilities and specially qualified personnel on the staff. The Daga Memorial Hospital is entirely for females. It was recently taken over by Government. The Mure Memorial Hospital for Women and Children is an old institution run by the Scottish Mission.

Dispensaries.—In 1960, there were 22 Government or Government-aided dispensaries in the district, out of which 10 are municipal and 12 belong to the Zilla Parishad.

There are also 52 Ayurvedic dispensaries in the district, out of which 15 are Government aided.

The number of Rural and Primary Health Centres in 1960 was 29. There were two Maternity Homes in the district.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 3,461.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classifications by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 81 as against 54 in Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each tahsil separately.

63·5 per cent of all the houses are used as dwellings, 17·5 per cent as cattle-sheds etc., 7·7 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 64·4 in 1951 to 81·4 in 1961. The number of persons per residential house has, however, decreased from 5 in 1951 to 4 in 1961. This may indicate an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by " owned " and " rented " categories, 65 per cent of the dwellings in the district are owned and 34 per cent are rented. The proportion of " owned " in rural areas is much higher (87 per cent) and lower (45 per cent) in the urban areas. Even this low proportion of 45 per cent for the urban areas in the district is higher than the average of 30 per cent for all urban areas in Maharashtra.

Out of the various materials used for walls, mud appears to be predominant in all the talukas of the district with a proportion of 58·8 per cent for the district. Mud is not used as much in urban as in rural areas. Its proportion is only 36·2 per cent in the urban areas against 81·6 per cent in the rural areas. Burnt bricks appear to be predominant in urban areas with a proportion of 37·7 per cent. Their proportions

in the tahsils of Katol and Umrer are a little lower and the difference is made up by grass, leaves, reeds, etc. This material for the walls is used in 10·9 per cent dwellings in rural areas and 18·5 per cent dwellings in urban areas.

Out of the materials of roofs, tiles are predominant in almost all the parts of the district with a proportion of 79·06 per cent. Tiled roofs are, however, more common in rural areas. Their proportion in the rural areas is 85·27 per cent as against 72·91 per cent in the urban areas. Grass, leaves, reeds, thatch, etc., and corrugated iron sheets are next in predominance to tiles. C. I. sheets are used more for roofs in Saoner and Nagpur tahsils. They are used more in urban areas than in the rural areas and have a proportion of 10·70 per cent in urban areas as against 2·68 per cent in the rural. Grass, leaves, etc., are more common in the rural areas (10·99 per cent) than in the urban (3·87 per cent).

Classified by the number of rooms occupied, 49·60 per cent of the households are occupying one-room dwellings and 29·99 per cent are occupying two-room dwellings. Households occupying larger number of rooms are more in urban areas than in rural areas. Average number of persons per room is 2·60 for total, 2·72 for rural and 2·50 for urban areas.

AGRICULTURE AND IRRIGATION

In spite of the large urban population, agriculture engages as much as 53·74 per cent of the working population in the district. Many others also work in industries related to processing of agricultural produce or trade, transport and services ancillary to agriculture.

Cultivating Seasons

As in the other areas of the State, in this district also there are two agricultural seasons, *viz.*, Kharif and Rabi. But the district has much more area under kharif than rabi crops. Kharif jowar, cotton, groundnuts, tur and rice are the main crops grown in kharif and wheat, rabi jowar, gram and linseed are the principal crops of rabi season.

Jowar is grown in both seasons. But compared to rabi jowar the district has much larger area under kharif jowar, 79·84 per cent of the total jowar being grown in kharif season. Among the kharif varieties, Dukartondi, Jagdan, Motichur and Dudhwani are more common. Dukartondi is the most esteemed of them all.

A crop calendar showing monthwise agricultural operations in respect of principal crops may be seen on page (30).

Land Utilisation

The Figure on page (31) shows the land utilisation pattern for the year 1959-60 for the district and each tahsil separately.

The pattern of land utilisation in the district and each of its tahsils is shown on page (32) compared with the State average. All the figures are based on average for three years from 1957-58 to 1959-60.

The proportion of net area sown to the total geographical area in the district (53·38 per cent) is slightly less than the average of 57·69 per cent for Maharashtra. Compared to the State averages the district has considerably lower proportion of areas under barren and unculturable waste and old and current fallows. The proportion of permanent pastures to the total geographical area in the district is however more than double the State average.

Within the district the proportion of net area sown to the geographical area ranges between 40·05 per cent for Ramtek tahsil and 68·08 per cent for Saoner tahsil. Ramtek tahsil has very high proportion of areas under forests (37·42 per cent) hence its proportion of net area sown is substantially low. The proportion of fallow lands is low in almost all tahsils. On the other hand the proportion of culturable waste is very high in all except in Saoner tahsil (2·21 per cent).

Because of changes in the classification of land utilisation effected in 1950-51, it is not possible to determine if there has been any shift in the pattern of land utilisation over the last 40—50 years. The District Gazetteer reports that in 1905-06 out of the total geographical area, 66 per cent were occupied for cultivation. This included 14 per cent of area under fallows. Thus it seems that although the area under fallows has considerably decreased, the proportion of net area sown has not increased appreciably. The proportion of area under forest has however increased from 14 per cent to 18·64 per cent, perhaps because the Malguzari forests had not been included in the forest area before their vesting in the State.

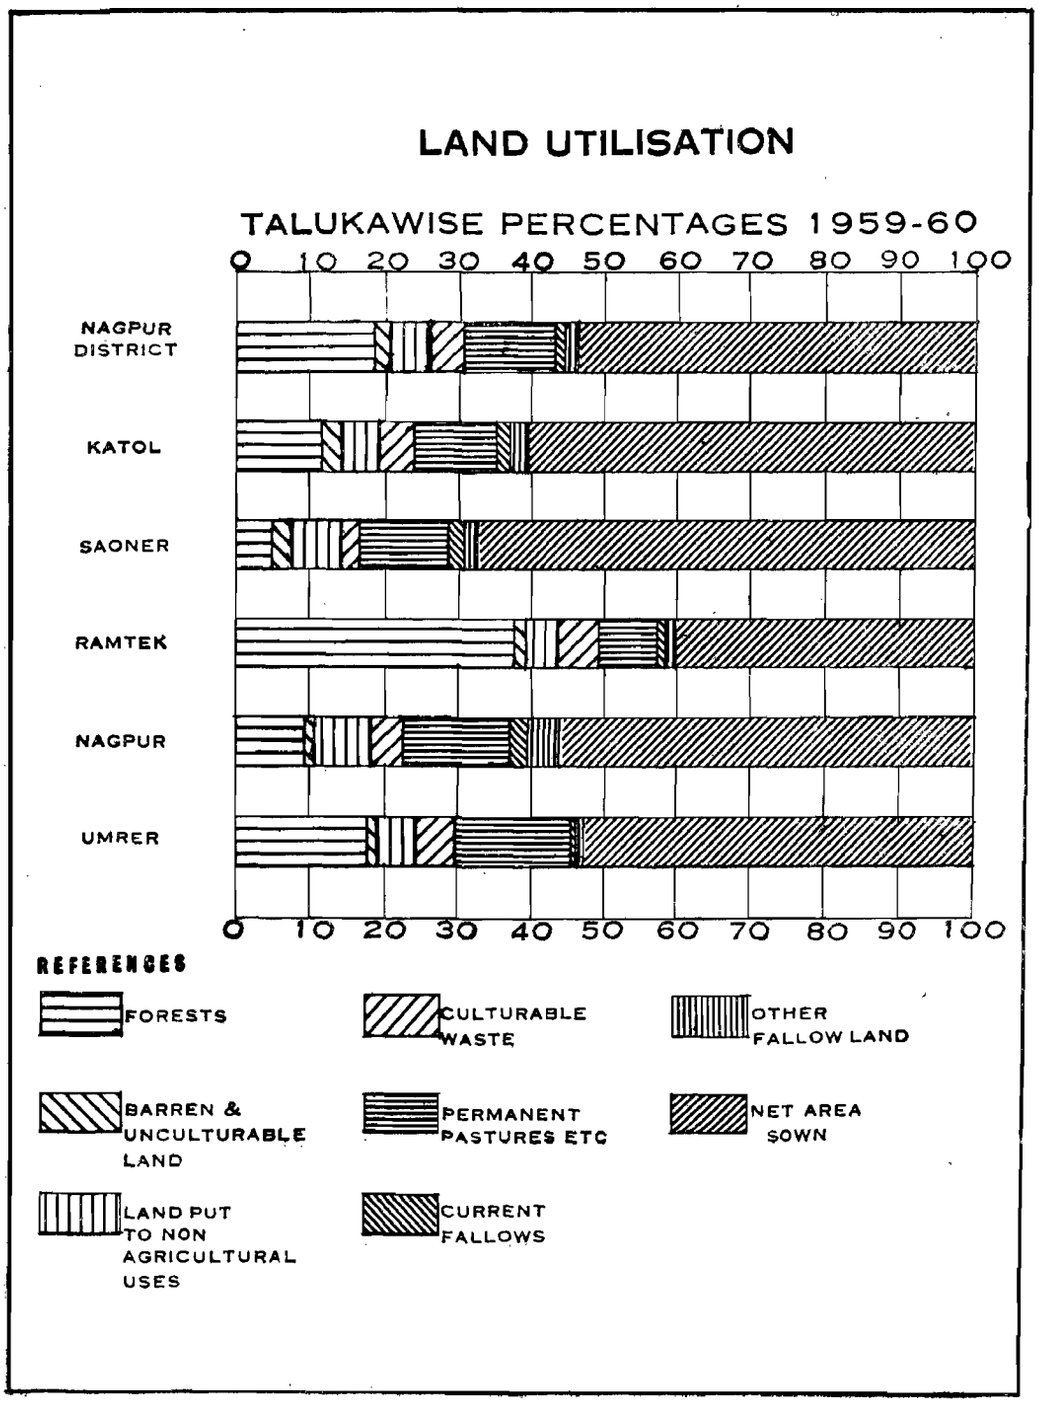

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its tahsils are shown on page (32) compared with the corresponding figures for Maharashtra State. All figures are averages for three years 1957-58 to 1959-60.

Figure on page (34) shows the crop pattern for the district and each tahsil separately. 78·55 per cent of the gross cropped area is under food crops. This proportion is substantially higher than the State average (69·88 per cent). Amongst the food crops, jowar ranks first and has 41·41 per cent of gross cropped area which is considerably higher than the average for Maharashtra (30·95 per cent). Bajri (0·05 per cent), other cereals (0·07 per cent) and sugarcane (0·01 per cent) are rarely grown. Compared to the State averages the district has larger proportion of area under pulses and smaller proportion of area under "rice". The district proportion of wheat is nearly three times as great as the State average. Other food crops (constituting mainly fruits, vegetables, condiments and spices

have slightly lower proportion (5·48 per cent) than the State average (5·59 per cent). But they are perhaps the most valuable crops of the district. Oranges from this district are famous all over the country. Chillies from Bhiwapur are also renowned. More than 60 per cent of the total area under oranges in Maharashtra is found in this district alone. The district also occupies more than 10 per cent of the State total area under chillies.

Cotton with 12·61 per cent of the gross cropped area is the most important non-food crop. It occupies more than half the area under non-food crops. The proportion of area under oilseeds (8·62 per cent) is slightly higher than the State average (8·18 per cent). Linseed is the most important oilseed covering nearly 70 per cent of the total area under oilseeds. Sesamum covers another 18 per cent and groundnuts the remaining 12 per cent.

From 1950-51 to 1959-60 there is a slight drop from 81·27 per cent to 78·10 per cent in the proportion of food crops to the gross cropped area and corresponding rise in the proportion of non-food crops. Amongst the food crops, the proportion of cereals has decreased from 63·25 per cent to 59·90 per cent and the proportion of pulses from 13·18 per cent to 12·96 per cent. The proportion of area under condiments and spices has, however, increased from 2·13 per cent to 2·97 per cent during the same period. The increase in the areas under different crops amongst the food crops is—Wheat 102·52 per cent, rice 12·74 per cent and pulses 10·43 per cent. The area under jowar has reduced from 571,900 acres to 513,200 acres (or by 10·26 per cent). The area under fruits and vegetables has also reduced by 7·26 per cent. The area under condiments has increased more than 50 per cent. The area under groundnuts has also more than doubled and that under cotton has increased by 70 per cent.

Comparable statistics are not available for the entire district for years prior to 1950-51. The proportions of areas under different crops reported by Imperial Gazetteer in 1903 were—Jowar 50·66 per cent, wheat 6·46 per cent, bajri 5·81 per cent, rice 1·61 per cent, cotton 22·81 per cent and sugarcane 0·08 per cent.

Generally speaking, the crop pattern in the district is superior to the average for the State. The State's crop pattern is poor in the all-India setting because of high proportion of jowar, bajri and other low value crops. The district proportion of jowar is in fact higher and that of rice is considerably lower than the State averages. But the district also has a very high proportion of high value crops like wheat and pulses. Average yields for most of the crops in the district are also better than the corresponding State averages. Sizable areas under rich garden crops like oranges and chillies seem to partly set off the slightly lower proportion of area under irrigation.

Within the district, the cropping pattern varies according to soil types and rainfall. The high proportion of area under food crops is somewhat even for all tahsils. It is however very high in Ramtek tahsil (87·86 per cent). All the tahsils have high proportion of jowar but it is extremely high in Saoner (51·80 per cent) and Katol (48·10 per cent) tahsils. The Saoner variety of jowar is very famous because of its purity, size and taste. The eastern tahsils of Umrer and Ramtek receive heavy rainfall. Consequently their proportions of rice are high. Ramtek tahsil also has a large net-work of canals which irrigate rice and wheat. Wheat is grown in abundance in the eastern tract of Ramtek, Umrer and Nagpur tahsils. Umrer tahsil has very large areas under spices and condiments chiefly chillies. Chillies from this area are known as Bhiwapur chillies and are very famous in the State. Oranges are grown in all tahsils but Katol and Saoner tahsils have very large areas under them.

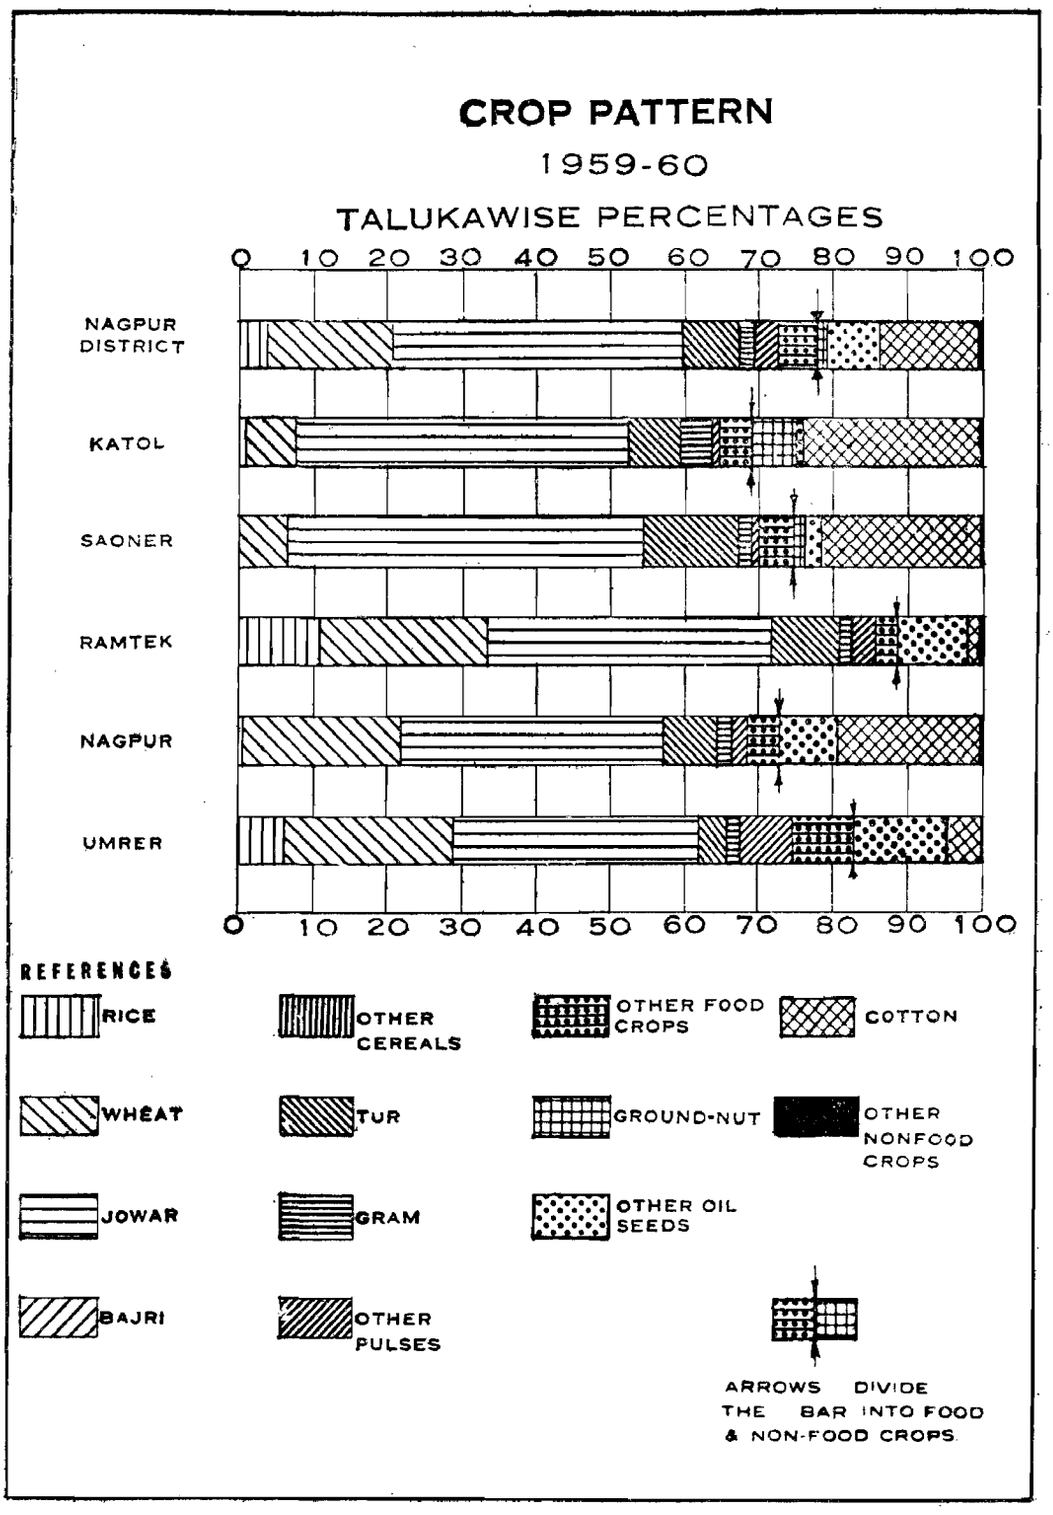

In the eastern tahsils of Ramtek and Umrer, cotton is scarce. Its proportion is large in the remaining talukas. Only Katol tahsil has substantial area under groundnuts. The other oilseeds consisting of linseed and sesamum are however grown in large proportion in the eastern tract.

Nine-year average yields and 1958-59 acreages and outturns of important crops for the district are shown below taking corresponding figures for Maharashtra as 100:—

	Nine-year average yield per acre	1958-59 area	1958-59 outturn
MAHARASHTRA	100.00	100.00	100.00
Rice	92·49	1·59	1·46
Wheat	109·35	7·77	6·79
Jowar	104·62	3·98	3·33
Tur	145·67	8·51	9·67
Gram	113·40	2·02	1·66
Cotton	89·39	2·59	1·79
Groundnut	101·24	0·58	0·40
Sesamum	124·74	8·90	11·25
Rape, mustard and linseed ..	108·95	9·55	10·34

Except for rice and cotton the district average yields are higher than the State averages. The difference is substantial for tur and sesamum.

The Techno-Economic Survey of Maharashtra has estimated the gross value of output per acre of cropped area in 1955-56 at Rs. 87 for the district as against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportion of workers on land to total workers, gross area sown per worker on land and the proportion of irrigated area to gross cropped area are shown below for the district and each of its tahsils compared with the State averages :—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land in acres	Percentage of irrigated area to gross cropped area
MAHARASHTRA	334	69·91	3·50	6·23
NAGPUR DISTRICT	395	53·74	3·50	5·07
1 Katol Tahsil ..	273	85·51	3·03	6·19
2 Saoner Tahsil ..	275	72·32	3·23	4·70
3 Ramtek Tahsil ..	195	72·48	3·66	8·10
4 Nagpur Tahsil ..	1,022	23·97	3·81	3·17
5 Umrer Tahsil ..	198	79·98	3·73	3·73

53·74 per cent of the total workers work on land. 32·00 per cent are cultivators and 21·74 per cent are agricultural labourers. The proportion of workers working on land is much lower than the State average (69·91 per cent), because of the relatively larger proportion of urban population in the district and the relatively larger size of its non-agricultural employment. The gross area sown per worker on land (3·50 acres) is, however, the same as the State average (3·50 acres).

Within the district the proportion of workers working on land to the total workers ranges from 23·97 per cent for Nagpur tahsil to 85·51 per cent for Katol tahsil. The proportion is somewhat even for all tahsils except Nagpur. The proportion is very low in Nagpur tahsil because of its large urban population. The gross area sown per worker on land ranges between 3·03 acres for Katol tahsil and 3·81 acres for Nagpur tahsil.

The proportion of net area sown under double crops to the total net area sown in the district in 1959-60 (1·64 per cent) is substantially lower than the State average (5·05 per cent). The proportion varies from year to year depending upon the rainfall and its distribution. In 1950-51 the proportion was reported as 0·74 per cent, in 1954-55 as 1·10 per cent and in 1957-58 as 1·23 per cent. The net area sown more than once was largest (21,300 acres) in 1959-60. The District Gazetteer reports that such area cropped more than once in 1905-06 was only 6,000 acres. Within the district, the proportion of net area sown more than once to the net cropped area varies as 2·29 per cent in Umrer and only 0·73 per cent in Saoner tahsil.

J-1977—vi-A (Nagpur.)

Irrigation

The proportion of gross irrigated area to gross cropped area for the district (5·07 per cent) in the year 1959-60 is lower than the State average (6·23 per cent). The gross irrigated area in 1959-60 is 7,000 acres more than that in 1950-51. The gross cropped area has itself increased by 12·32 per cent. The proportion of gross irrigated area to gross cropped area has therefore actually decreased from 5·10 per cent in 1950-51 to 5·07 per cent in 1959-60. The District Gazetteer reports that the area irrigated during the years 1892 to 1905 ranged between 10,000 and 25,000 acres. Thus during the course of 55 years the irrigated area has increased by about 42,000 acres. Ramtek tahsil which has a large net-work of canals has the largest proportion of gross irrigated area to the gross cropped area (8·10 per cent). Katol tahsil also has large areas (15,200 acres or 6·19 per cent) under irrigation.

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation for the district and for each tahsil separately. Wells are the major source of irrigation irrigating 35,600 acres or 54·02 per cent of the net irrigated area. Tanks irrigate another 21·40 per cent, canals 18·21 per cent and other sources 6·37 per cent. The entire canal irrigation (12,000 acres) is in Ramtek tahsil where a dam has been built across the river Sur. Tanks are predominant in Umrer (73·60 per cent) and Ramtek (22·49 per cent) tahsils. Nagpur tahsil has about 200 acres irrigated by tanks. The entire area in Katol tahsil and 98·80 per cent area in Saoner tahsil is irrigated under wells. The net irrigated area declined by 500 acres from 1950-51 to 1956-57 but increased thereafter. The increase during 1951—60 has been mainly under canals (3,400 acres or 39·53 per cent) and under tanks (2,200 acres or 18·49 per cent). A recent but remarkable improvement is in the number of oil engines and electric pumps used for irrigation. The number of oil engines has increased from 724 in 1956 to 1,079 in 1961 and the number of electric pumps from 705 in 1956 to 1,714 in 1961. Nagpur tahsil has the largest number (375) of oil engines and Katol tahsil has the largest number (704) of electric pumps.

Crop Pattern under Irrigation

Table 5 in Part III shows the crop pattern under irrigation. In the year 1959-60, 96·72 per cent of the irrigated area was under food crops and 3·28 per cent under non-food crops. Among food crops rice occupied 39·49 per cent, wheat 11·18 per cent, jowar 0·15 per cent, sugarcane 0·15 per cent, pulses (gram) 3·87 per cent and other miscellaneous food crops consisting mainly of chillies and garden crops like orange orchards 41·88 per cent. Among

non-food crops, cotton occupied 2·24 per cent and the remaining 1·04 per cent was covered by fodder crops. Nearly half of the total area under rice is irrigated. Entire area under sugarcane is irrigated, while the extent of irrigation of wheat, jowar and gram is respectively 3·33 per cent, 0·02 per cent and 8·78 per cent. Of the 171,600 acres under cotton only 1,500 acres are irrigated.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains, oilseeds and cotton from 1951 to 1956 and from 1956 to 1960 compares with the production of 1951-52 as follows :—

Crop	Average production in hundred tons per year during		
	1951-52	1951—56	1956—60
Rice	134	153	188
Wheat	290	287	310
Jowar	1,216	1,240	962
Other cereals	2	2	2
Total cereals	1,642	1,682	1,461
Total pulses	787	899	346
Total foodgrains	2,429	2,581	1,807
Groundnut	41	48	24
Sesamum	22	26	26
Rape, mustard and linseed	52	53	72
Cotton (in bales of 392 lbs. each).	282	284	216

Such a comparison taking single year as a base may not be very much conclusive as that base year itself might perhaps have been a very favourable or a very bad agricultural season. Even such a comparison, however, brings out some very interesting results.

In the First Plan period the average annual production of total foodgrains increased by 6·26 per cent over the 1951-52 production. During the Second Plan period however the annual production has dropped down by 25·61 per cent. The production of total cereals during the Second Plan period is lower by 11·02 per cent than the 1951-52 production. The production of pulses increased by 14·23 per cent than that of 1951-52 during the First Plan period but during the Second Plan period it decreased by 56·04 per cent over 1951-52 production. The average production of rice, sesamum and other oilseeds during the Second Plan period is more than the 1951-52 production. A substantial decrease has however occurred in the average annual production of groundnut and cotton in the Second Plan period.

J-1977—vi-B (Nagpur.)

Agricultural Implements

The number of agricultural implements for the district and for each of its tahsils for the years 1951, 1956 and 1961 are separately shown in Section ' C ' of Table 9 in Part III.

The remarkable increase in the number of oil engines and electric pumps used for irrigation purposes has already been described earlier. Between 1956 and 1961, the number of iron ploughs has increased by 14·54 per cent and the number of wooden ploughs by 13·74 per cent. Both the types together increased by 13·76 per cent. The number of sugarcane crushers operated by power decreased from 219 in 1956 to 79 in 1961. The number worked by bullocks also declined from 88 in 1956 to 27 in 1961 (*i.e.* by 69·32 per cent). The number of tractors sharply decreased from 205 in 1956 to 38 in 1961.

By using standard average prices to the agricultural implements shown in Table 9 in Part III, the total outlay on them for the year 1961 may be estimated at Rs. 187 lakhs or Rs. 14·36 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 17 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A subject committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as Secretary to that committee. There are Agricultural Extension Officers at tahsil level working under the Block Development Officer. The latter works as a Secretary to the Tahsil Samiti. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There are four Agricultural Research Centres in the district. The Government Experimental Farm established at Tarsa in 1910 has an area of 122·87 acres. Research is done here on wheat, paddy and sugarcane as main crops and jowar as a subsidiary crop.

The Government Experimental Farm at Nagpur, was established in 1871. It has an area of 244·76 acres. Experiments are conducted on cotton, groundnut and wheat as main crops and til and linseed

as subsidiary crops. Two Citrus Fruit Research Stations have been established in 1948, one is known as the Fruit Research Station, Tarsa (Farm area 20·55 acres) and the other as Pedigree Nursery Scheme, Kodimbaug Nursery (Farm area 14·14 acres).

Agricultural Improvement

(*i*) *Increasing the Area under Irrigation.*—The most important single item of increasing the agricultural production is enlarging the area under irrigation. A number of irrigation schemes have, therefore, been included in the Five-Year Plans. Construction of new wells and renovation to the old ones offer the cheapest and quickest means of increasing irrigation potential. In the First Five-Year Plan period schemes of construction and renovation of wells were mainly implemented. During the Second Plan period in addition to such schemes, one irrigation tank was constructed at Dahegaon with irrigation potential of about 300 acres. Besides this, the construction of Sattighat and Khursapur tanks has been included as spillover in the Third Plan. These projects will add 2,500 acres under irrigation. The Third Plan envisages new minor irrigation schemes irrigating about 9,000 acres, construction of 1,300 new wells and installation of 1,500 pumping sets.

In the Second Plan period construction of a tank at Pindrabodi was started as a medium irrigation project. The work has been carried over to the Third Plan. On completion it will create irrigation potential of 5,050 acres. Another project called "the Wunna River Project" has been taken up in the Third Five-Year Plan. It is expected to irrigate 15,000 acres.

With the increasing facilities for irrigation the question of full utilisation of potential will also assume importance. The statistics of current utilisation are however not available separately for the district.

(*ii*) *Improved Seeds.*—Another item of improving food production is the adoption of improved varieties or strains of crops.

Seed farms have been established at nine places to provide improved seed to farmers. The combined area of all the seed farms is 573·28 acres.

(*iii*) *Soil Conservation or Bunding.*—Schemes of contour bunding 0·58 lakh acres of land have been included in the Third Five-Year Plan. They involve an outlay of Rs. 30·80 lakhs.

Livestock

The number of livestock for the years 1951, 1956 and 1961 has been shown separately for the district and for each tahsil in Table 9 in Part III.

The total livestock as per 1961 Livestock Census in the district is 8·13 lakhs. This makes 61·44 livestock per 100 acres of cultivated area. The corresponding average figure for the State is 139.

The total bovine population in the district in 1961 is 80·56 per cent of the total livestock. The number of male bovines over three years is 2·14 lakhs. The area cultivated per pair of male bovines over three years is thus 12·34 acres, as against 5·48 acres for Maharashtra. There are 2·30 lakhs female bovines over three years in the district. That makes 152 female bovines over three years per 1,000 population in the district as against the State average of 159.

There has been a general reduction in all the types of livestock between 1956—61 except cattle. The previous five years had witnessed a substantial increase. There has been a net increase of 13·25 per cent in the total livestock during the decade. Horses and ponies and other livestock have declined from 3,600 to 2,000 and 9,700 to 7,400 respectively. The number of cattle and buffaloes increased by 10·28 per cent and 12·55 per cent respectively. The increase in the number of sheep and goats during the same period is 36·20 per cent and 32·49 per cent respectively. The number of poultry has multiplied by one and half times.

Veterinary Facilities

There is a Veterinary Hospital at Nagpur and nine other Veterinary Dispensaries located at the following places in the district: (1) Nagpur, (2) Katol, (3) Umrer, (4) Ramtek, (5) Saoner, (6) Narkhed, (7) Kalmeshwar, (8) Kuhi and (9) Mauda. In addition to this, there are veterinary aid centres located at 31 places in the district. Treatment of animal diseases, control of epidemics, castration of bovines and control and destruction of animal parasites are the main services rendered at these dispensaries and aid centres.

Apart from these dispensaries and aid centres, there are two Disease Investigation Laboratories: one for sheep, goats and cattle and the other for poultry. Investigations on various cattle diseases are undertaken at these laboratories.

Majority of cattle found are of non-descript type. Gaolao breed is observed to some extent. Shahiwal breed is largely seen in the area around Nagpur City. The latter type has been recommended for the area within a radius of 20 miles from Nagpur City and the former (Gaolao) breed for the remaining area of the district. The buffaloes are of Nagpur type. Of late, a large number of Murra buffaloes are also found.

An Artificial Insemination Centre works at Telankhedi for development of livestock. An Animal Geneticist Section with a well-equipped laboratory has been established at Telankhedi, Nagpur tahsil, and arranges supply to the Artificial Insemination Centre and sub-centres. Breeding bulls are located for selective breeding at the five key village centres under the key village scheme. Natural services as well as artificial insemination method are practised at these centres. Cattle development work is also done by Gosadan at Sillari, Pendhari and Nagpur.

The cattle breeding farm at Telankhedi is an old institution working for over 35 years. The farm works for the selective breeding of the Shahiwal breed. The farm has a capacity to maintain 500 cattle.

There is a Central Poultry Farm located at Telankhedi which undertakes poultry breeding, management and research in Poultry Science. There are poultry demonstration centres at Mauda and Kalmeshwar.

AGRARIAN STRUCTURE AND LAND REFORMS

Vidarbha consists of eight districts, four of which formerly belonged to Berar and four to Central Provinces. In the Berar districts (Amravati, Akola, Buldhana and Yeotmal) the Ryotwari system was prevalent, while in the C. P. districts (Nagpur, Chanda, Wardha and Bhandara) the main land system was the Malguzari.

During the Maratha rule which preceded the British administration, annual settlements of land revenue were made with the Pargana Officer who distributed the assessment over the villages in the Pargana in consultation with the Village Patels. The Village Patels, in turn, distributed the burden on the ryots. The districts lapsed to the British and summary settlements were made after 1854.

Malguzari System

Under the Malguzari system (1854) the Malguzar was allowed to manage the village on payment of revenue to Government leaving about 30 per cent of the gross rental as his remuneration. The proprietary right was gifted to the Malguzars without prejudice to the rights of others. The district had no Zamindari estates.

With a view to abolishing intermediaries between the State and the peasants, the Malguzari System was abolished in the district from 31st March 1951 by the Madhya Pradesh Abolition of Proprietary Rights (Estates, Mahals, Alienated Lands) Act, 1950.

Record of Rights

Due to the existence of the Malguzari system of land tenure, the system of land records is different in C. P. districts.

The Record of Rights consists of—

(1) *Khewat.*—A statement showing the names of persons possessing proprietary rights, including inferior proprietors or lessees or mortgagees in possession specifying the nature and extent of interest of each ;

(2) *Khasra.*—A field-book containing names of persons cultivating land, rent, etc. ;

(3) *Jamabandi.*—A list of persons cultivating or occupying land ;

(4) Field map of the village ; and

(5) Village administration paper.

Record of Rights entries carry a legal presumption of accuracy.

Ownership Rights to Tenants

Tenancy rights are regulated under the Vidarbha Tenancy and Agricultural Lands Act, 1958, which is in force since 30th December 1958. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "Land to the Tiller" policy the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1961. This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1963, about 8,096 tenants are deemed to be owners of land measuring 56,015·40 acres. 32 tenants had mutually agreed with the landholders on the price to be paid by them. In the remaining cases the prices have not been fixed by the Revenue Officers. The cases of transferring the ownership rights under the provisions of sections 46 and 49-A of the Bombay Tenancy and Agricultural Lands (Vidarbha Region and Kutch Area) Act, 1958, have recently been started.

Size of Land Holdings

Census Table B-X in Part II of this volume shows that 33·99 per cent of the total number of households cultivate land and the remaining 66·01 per cent do not cultivate any land.

Census Table B-XI in Part II shows the break-up of cultivating households by size of land cultivated and by the interest in the land. 90·84 per cent of the cultivating households cultivate their owned lands only. 1·94 per cent of the households cultivate tenanted lands only and the remaining 7·22 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown on page 39.

The distribution of households in Table B-XI and the same shown in percentage in column 2 below, is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of these ownership holdings is also shown in column 3 below :—

Area	1961 Cultivation holdings	1952-53 Ownership holdings
Less than 1 acre	0·95	10·84
1·0 to 4·9 acres	22·92	40·65
5·0 to 9·9 acres	25·14	22·65
10·0 to 14·9 acres	18·87	10·36
15·0 to 29·9 acres	21·77	10·24
30·0 to 49·9 acres	6·84	3·11
50+ acres and more	3·51	2·15
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 15·01 acres. Average size of the ownership holding in the district was 9·73 acres in 1952-53 against the average of 11·95 acres for the State.

Ceiling on Holdings of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Four local areas, *viz.*, Saoner, Nagpur, Umrer and Ramtek have been notified in the district with different ceiling areas for dry crop land, *viz.*, 96, 108, 114 and 126 acres, respectively. In the case of irrigated lands, the ceiling area is the same in all the local areas, *viz.*, 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district from 1st April 1959. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to end of March 1963, consolidation work in 146 villages had been completed and the area consolidated is 131,462 acres, involving 27,293 holdings.

The standard areas specified as minimum necessary for profitable cultivation under the Bombay Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

	Acres
(1) Dry crop land and *warkas* ..	2·0
(2) Bagait lands	0·5
(3) Rice lands	1·0

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to byelaws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The co-operative movement started in the year 1920. But it lacked popular enthusiasm till the attainment of independence. Concentrated efforts made during the last decade have resulted in a rapid progress in the movement throughout the district. Almost all the villages in the district are now covered by rural co-operatives. In addition to agricultural credit, the co-operative activities are now extended to processing of agricultural products, dairying, farming, marketing, fisheries, etc.

The following description is based on the report for the year 1960-61.

Co-operative Credit

(*a*) *Agricultural Credit Societies.*—The membership and working of the agricultural credit societies have rapidly increased during the last decade and especially during the Second Plan period.

The position of agricultural credit societies in 1957-58 and 1960-61 is as under :—

		1957-58	1960-61
(1) Number of Agricultural Credit Societies	.. .. ..	616	649
(2) Number of members	.. ..	25,434	41,777
(3) Share Capital	.. (Rs. in lakhs)	8·93	24·39
(4) Reserve and other funds	(Rs. in lakhs)	2·02	3·48
(5) Working Capital	.. (Rs. in lakhs)	63·53	158·76
(6) Number of members to whom loan was advanced.	.. ..		37,328
(7) Amount advanced	.. (Rs. in lakhs)	55·17	93·88
(8) Amount recovered	.. (Rs. in lakhs)	34·28	81·59
(9) Loans outstanding	.. (Rs. in lakhs)	55·33	137·05
(10) Overdues	.. (Rs. in lakhs)	5·18	37·52

Average membership per primary society in the district is 64 against the average of 96 members for Maharashtra. 99·22 per cent villages in the district have been covered.

Total owned funds (share capital *plus* reserve funds) of the primary agricultural credit societies amounted to Rs. 27·86 lakhs and formed 17·55 per cent of their working capital against 26 per cent for Maharashtra.

The loan operations of all the primary agricultural societies in the district amounted to Rs. 93·88 lakhs. The average amount of loan per borrowing member worked out to Rs. 252 as against Rs. 329 for Maharashtra.

During the period of three years (1958 to 1961), the membership of the agricultural credit societies increased by 64·26 per cent, and the share capital by Rs. 15·46 lakhs. The working capital multiplied by two and half times. The societies advanced loans of Rs. 94 lakhs in 1961 as against Rs. 55 lakhs in 1958. These are some of the indices of the progress made by the agricultural credit societies within a period of only three years. The proportion of overdues to the outstanding loans has, however, shot up to 27·38 per cent in 1961. This points out the need for taking steps to improve the recoveries immediately.

Good progress has also been made by the agricultural credit societies in the sphere of services to agriculturists such as distribution of agricultural requisites (seeds, manures, etc.), marketing of agricultural produce, etc.

(*b*) *Central Co-operative Bank.*—The Central Co-operative Bank was established at the district headquarters in 1911 and has been working as a federal financing agency catering for the credit requirements of all the primary credit socie tiesin the district. Since 1962, the Zilla Parishad also transacts its financial business through the bank.

In the year 1960-61, the position of the Central Co-operative Bank was as follows :—

(1) Number of members—		
(*a*) Individuals	.. ..	702
(*b*) Societies	.. ..	788
(2) Paid-up share capital	.. .. (Rs. in lakhs)	23·71
(3) Reserve and other funds	.. (Rs. in lakhs)	4·05
(4) Deposits—		
(*a*) Individuals	.. .. .. (Rs. in lakhs)	16·15
(*b*) Societies and Banks	.. (Rs. in lakhs)	23·03
(5) Borrowings—		
(*a*) State Co-operative Bank and the Reserve Bank of India	.. (Rs. in lakhs)	93·07
(*b*) Government	.. .. (Rs. in lakhs)	0·30
(*c*) Other sources	.. .. (Rs. in lakhs)	1·65
(6) Working Capital	.. .. (Rs. in lakhs)	161·96
(7) Cash—		
(*a*) On hand	.. .. .. (Rs. in lakhs)	2·27
(*b*) At Banks	.. .. .. (Rs. in lakhs)	7·56
(8) Investments— Government and other Trustee securities	(Rs. in lakhs)	0·60
(9) Percentage of cash in hand to deposits	..	5·79
(10) Percentage of investment to deposits	.. ..	1·53
(11) Loans outstanding—		
(*a*) Individuals	.. .. .. (Rs. in lakhs)	3·58
(*b*) Societies	.. .. .. (Rs. in lakhs)	134·93
(12) Percentage of loans outstanding to deposits	..	353·52
(13) Percentage of loans outstanding to working capital	.. .. ..	85·52
(14) Overdues	.. .. .. (Rs. in lakhs)	30·85
(15) Percentage of overdues to loans outstanding	..	22·27
(16) Cost of management	.. .. (Rs. in lakhs)	2·37
(17) Percentage of cost of management to working capital	.. ..	1·46
(18) Profit	.. .. (Rs. in lakhs)	1·86
(19) Number of branches and pay offices in the district	.. .. ..	10

In 1960-61, the individual membership of the Bank has decreased by 38·20 per cent but society membership has increased by 9·44 per cent over 1959-60. The owned fund increased by Rs. 2·78 lakhs and deposits by Rs. 11·97 lakhs. There was, however, a small drop in the working capital. Recovery was also not quite satisfactory as the proportion of overdues to outstanding loans increased from 15·76 per cent to 22·27 per cent. The profit made by the Bank during the year was also Rs. 52,000 less than that in the previous year.

(*c*) *Land Mortgage Bank.*—With a view to providing long term finance to the cultivators, the Primary Land Mortgage Bank was established at Nagpur in 1935. The number of members of the Land Mortgage Bank is 3,608, share capital Rs. 47,000 and working capital Rs. 13·36 lakhs. In 1960-61 the bank advanced loan of Rs. 2·48 lakhs. The outstanding amount at the end of year was Rs. 12·40 lakhs.

(*d*) *Urban Banks and Credit Societies.*—There are in all 58 urban credit societies in the district. Eleven of them are urban credit societies, 43 are salary earners' societies, two factory workers' societies and two millhand societies. Their combined membership is 70,360, share capital Rs. 28·16 lakhs and working capital Rs. 41·05 lakhs. Fifty-four of these societies made a profit of Rs. 1·57 lakhs and four suffered a loss of Rs. 1,000.

Agricultural Processing Societies

One cotton ginning and pressing society was organised by 235 societies and six individual members during 1960-61. Share capital of the society is Rs. 3·06 lakhs. Government has contributed Rs. 1·50 lakhs towards its share capital. There is also one paddy husking society in the district organised by 18 societies. Its share capital is Rs. 70,000. Government has contributed Rs. 35,000. That society has yet to start operations.

Industrial Societies

There are 173 weavers' co-operative societies and 115 other industrial societies in the district. Out of the 173 weavers' societies, 158 are handloom weavers' societies, 6 wool weavers' societies, 7 silk weavers' societies and 2 khadi weavers' societies. Their combined membership is 18,595, share capital Rs. 7 lakhs and working capital Rs. 46·89 lakhs. The societies produced goods worth Rs. 56·98 lakhs during the year.

The other types of industrial societies include 14 oil ghanis, 3 cane and bamboo works, 3 tanning works, 13 leather works, 8 carpentry and smithy, 4 metal works, 18 pottery works, 3 neera and palm gur and 49 miscellaneous societies. The combined membership of these industrial societies is 4,893, share capital Rs. 2·02 lakhs and working capital Rs. 6·68 lakhs. The gross production of all these societies during the year was of Rs. 4.78 lakhs.

Forest Labourers' & Labour Contract Societies

There are 12 forest labourers' co-operative societies and 26 labour contract co-operative societies in the district with memberships of 579 and 1,334, respectively. Their respective paid-up share capital is Rs. 24,000 and Rs. 44,000 and working capital is Rs. 27,000 and Rs. 89,000, respectively. The forest labourers' societies received Rs. 11,000 as subsidy from the Government. The labour contract societies received a loan of Rs. 6,000 and a subsidy of Rs. 2,000.

Co-operative Farming Societies

There are two collective farming, three joint farming and five other co-operative farming societies organised in the district. The collective farming societies have 23 members, share capital of Rs. 1,000 and working capital of Rs. 1,000. The societies have 175 acres of area under command.

The joint farming societies have 47 members of which 38 are landholders and 9 landless labourers. Their share capital is Rs. 18,000 and working capital Rs. 1·08 lakhs. The societies cultivated 687 acres out of 866 acres under their command.

Dairy Societies

One milk supply union has been organised in the district. Its membership consists of one society and 18 individuals, its share capital is Rs. 1,800 and working capital Rs. 2,000.

This union has 37 feeder milk supply societies in the district. Their combined membership is 1,309, share capital Rs. 39,000 and working capital Rs. 2·82 lakhs. The total sale value of milk supplied by the societies during the year was Rs. 8·11 lakhs. Nineteen societies made a profit of Rs. 58,000, 10 suffered a loss of Rs. 3,000 and 8 others showed neither loss nor profit.

Fishery Societies

There are seven fishermen's co-operative societies in the district. Their combined membership is 1,183. share capital Rs. 14,000 and working capital Rs. 99,000, The societies have been granted loan of Rs. 17,000. The catch value of fish by the societies during the year was Rs. 95,000. Four societies made a profit of Rs. 21,000, one suffered a loss of Rs. 1,000 and two did not start any activity for want of tank on lease.

Purchase and Sales Societies and Unions

There are 2 central co-operative marketing societies in the district. Their combined membership is 217 societies and 288 individuals and their share capital is Rs. 17·18 lakhs of which Government contribution is Rs. 14·04 lakhs. Agricultural requirements worth Rs. 82·67 lakhs were distributed by these societies during the year. The societies also earned Rs. 1·12 lakhs by way of commission and earned a profit of Rs. 2·75 lakhs during the year.

There are nine primary agricultural marketing societies. These societies cover all the regulated mandies in the district. Their combined membership is 210 societies and 1,339 individuals and share capital is Rs. 86,000. Government has contributed Rs. 22,000 towards their share capital. The purchases made by these societies during the year amounted to Rs. 26·61 lakhs. Six of these societies made a profit of Rs. 20,000 and three suffered a loss of Rs. 10,000.

Consumers' Movement

There are 266 consumers' stores in the district which flourished during the days of control. Most of them are now stagnant. Their combined membership is 12,305, paid-up share capital Rs. 4·46 lakhs and working capital Rs. 6·07 lakhs. During the year consumer goods worth Rs. 83·62 lakhs were purchased by them. The sales during the same period amounted to Rs. 86·61 lakhs. Sixty-eight of these stores made a profit of Rs. 99,000, 42 suffered loss of Rs. 29,000 and 156 others neither showed loss nor any profit.

Housing Societies

There are 69 primary housing co-operatives in the district. Their combined membership is 8,045, share capital Rs. 18·42 lakhs and working capital Rs. 67·08 lakhs. The societies also advanced Rs. 42·35 lakhs as loan to members during the year for construction. Twenty-seven societies made a profit of Rs. 1·97 lakhs, 8 suffered a loss of Rs. 4,000, and 34 others neither showed loss nor any profit.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

Type of Society	No. of societies classified as				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Cooperative Bank	1	..	..	..	..	..	1
(2) Agricultural Credit Societies ..	6	151	446	23	10	13	649
(3) Non-agricultural Credit Societies	5	16	21	2	4	10	58
(4) Land Mortgage Bank ..	..	..	1	..	..	..	1

FORESTS

The district has an area of 1,091·52 square miles under forests, of which 882·88 square miles are in charge of the Forest Department and the remaining 208·64 square miles are in charge of the Revenue Department. The forest area is 28·47 per cent of the total geographical area of the district as against 17·56 per cent for the State.

Out of the forests in charge of the Forest Department, 512·11 square miles are treated as reserved forests and are one of the valuable forests of the State. The remaining area comprising protected forests represents the ex-proprietary (malguzari) forests vested in the State in 1951. These are not in proper state of preservation and are being gradually brought under planned management.

The jurisdiction of the Nagpur Forest Division coincides with the district boundary. The forests have been further divided into six ranges. The Divisional Forest Officer in charge of the forests has his headquarters at Nagpur and works under the Conservator of Forests, Nagpur Circle.

The forests in charge of the Revenue Department are looked after by the Collector of the district.

The forests are of the "broad southern tropical dry deciduous" type.

Teak is the most valuable of the different species found in the forests. The other important species having high constructional value are bija, dhaw, etc. Salai is an important soft wood species and is used for manufacture of packing cases. The other commercially important associates found in forests are: (1) Tendu leaves useful in Bidi industry, (2) Dhaw for Gum, (3) Palas for propagation of Lac, (4) Khair for manufacture of Kath and (5) Bamboos which are chiefly used in the manufacture of mats, dholies, etc.

Forest produce is transported in bullock carts to several forest depots. From these depots the produce is carried by trucks to the market centres of Umrer, Ramtek, Paoni, Katol, Khapa and Nagpur. Of these, Nagpur is the most important timber market. From Nagpur, sawn timber is exported to Poona, Mysore, Gujarat State, etc., either by trucks or by rail. The total forest revenue realised during 1961-62 was Rs. 28·74 lakhs.

1,057 persons are according to the 1961 Census working in forestry and logging. 939 of them are males and 118 females. Their distribution for industry minor group is shown in Table B-IV-C in Part II.

The exploitation of the reserved forests is done under scientifically managed working plan. Under the plan, the forests are divided into three working circles: (i) Protection working circle, (ii) Pench high forest conversion working circle, and (iii) High forest working circle. This working plan is under revision. The protected forests are in the infant stage of management and the preparation of a scientific working scheme is in progress.

A number of schemes were implemented for development of forests during the first two Plans. Nearly 40 miles of forest roads were improved and four miles of new road construction work was undertaken. Plantation of teak, semal, etc., has been raised in 523 acres. The Third Five-Year Plan includes the following important schemes :—

(1) *Plantation of valuable trees.*—Plantation of teak, semal and eucalyptus trees in 750 acres involving an outlay of Rs. 0·99 lakhs.

(2) *Survey and demarcation of forests.*—100 sq. miles area to be surveyed for which outlay sanctioned is Rs. 1·12 lakhs.

(3) *Afforestation for soil conservation.*—1,000 acres to be afforested with an outlay of Rs. 0·74 lakhs.

The district forests abound in wild game also. The game which is usually found is tiger, panther, bear, sambhar, chital, four-horned deer, wild dog, blue bull, etc.

FISHERIES

Fishing activities in the district are naturally restricted to inland waters only, rivers, tanks and ponds being the chief sources. The total length of perennial rivers in the district is about 260 kms. There are also 37 perennial and 241 seasonal tanks and ponds which provide 13,534 acres of water-spread area, which is quite adequate for development of fishing industry.

The commercially important varieties of fish found in the district are : Murrel, Dhadkya, Botri, Padhan, Tambu, Karvadi, Poshti, Dhoara, Gane or Kanheri Chela, Katva, Seenghan, Chandni, Mahaseer, Kolus, Magur, Zinga and Chandan Catla.

These varieties are however not of the fast growing type. As such, under Five-Year Plan schemes, quick growing " Bengal Carps" are stocked annually in the perennial tanks. The varieties stocked are Catla-Catla, Rohu, Mrigal and Cyprinus carpio. About 35·62 lakhs of Fry was stocked during the Second Five-Year Plan while during only the first two years of the Third Plan period the quantity stocked amounted to 21·56 lakhs.

2,781 persons are reported in the 1961 Census, as engaged in fishing as principal work. 2,627 of them are males and 154 females. Fishermen in the district belong to the communities known as Dheemer, Bhoi and Kahar. Since fishing industry has limited scope, some of the fishermen take up jobs in workshops and few others in seasonal agriculture. Fishing is generally done with the help of Gill nets known as Udan or Tangar, Cast nets called Bhawan Jal, Drag nets or Odhe Jal and Long lines (Dawan). The nets are mostly made of cotton twine but these days nylon is also effectively used. Under the fishery requisites scheme subsidy is given for purchase of nylon and cotton twine.

Eight co-operative societies of fishermen have been organised in the district. Fishing rights and the stocking work of the Ramsagar lake are granted to the co-operative fishery society at Ramtek. The co-operative societies are given financial assistance in the form of loans and subsidy. They are also helped to secure tanks and ponds for purposes of pisciculture.

MINING AND QUARRYING

The district is rich in minerals. It is endowed with large deposits of manganese ore of both high and low grade. It also has rich deposits of coal of non-coking type, limestone, dolomite, clays and ochres. Deposits of iron-ore are very small and of low grade.

Following is the brief account of the important mineral deposits found in the district :—

Coal

The coal fields geologically belong to the Barakar stage of Damuda series of Gondwana system.

There are two groups of coal fields in the district : (1) the Kamptee coal fields and (2) the Umrer coal fields. The Kamptee coal fields extend in north-westerly direction from Kanhan towards Saoner and cover a very large area. Existence of four workable seams has been proved of which the third and the fourth seams which are 10 feet and 25 feet thick, respectively, are first grade. Coal has been proved to exist over a strike length of about six miles and reserves are now indicated at about 300 million tonnes of which about 150 million tonnes would be of first grade quality. The coal bearing rocks of Umrer fields extend over an area of about 4 sq. kms. Four major coal seams are indicated within a depth of less than 400 feet from surface. The first two seams are of selected grade to first quality and other two are of second to third grade quality. The estimated reserves are of the order of 70 million tonnes of which two-thirds may be of first grade. Coal has also been discovered at Bokhara four miles north of Nagpur. There are good prospects of its being discovered at Bajargaon, about 20 miles west of Nagpur. Detailed prospecting and drilling for coal has been undertaken by the State Department of Mining. Work completed so far indicates that the area. although containing inferior type of coal, is promising.

At present there is only one colliery in the district in Kamptee coal fields. During 1960, the colliery exploited 89,421 metric tonnes of coal worth Rs. 18·79 lakhs as against 70,539 metric tonnes valued at Rs. 14·04 lakhs in the previous year. At present the entire production is consumed by the Khaparkheda Thermal Power Station.

Manganese Ore

The deposits are considered to be magnaniferous sediments of Archaean age which have undergone intense regional metamorphism and subsequent alteration and weathering. They are generally associated with rock formations termed "Gondites" characterised by the presence of spessartite garnet and quartz or rhodonite and quartz. Some low grade ores also occur in association with crystalline limestone. The most important deposits lie in a belt about 15 miles wide stretching from Khapa in Saoner tahsil, passing through Ramtek tahsil and then into Bhandara district.

The important centres of manganese mining are: Gumgaon, Ramdongri and Kodegaon from Saoner tahsil and Mansar, Kandri, Junewani, Satak, Beldongri, Goguldoh, Mandri, Parsivni and Pali from Ramtek tahsil. In 1960-61, 232 mining leases were given to different mining companies for exploitation of manganese ore. The production during the year was 88,515 tonnes valued at Rs. 84·88 lakhs as against production of 93,887 tonnes worth Rs. 118·25 lakhs during the previous year. The fall in production was due to the decline in the demand from foreign buyers resulting from recession in world steel industry and competition from Brazilian manganese ore in the U. S. market.

The manganese ore that is recovered from all the mines is of two types, *i.e.*, bed ore which is associated with the parent rock called "Gondite" and the detrital ore.

In addition to the high grade manganese ore that is exploited in the district, extensive deposits of low grade ore occur in forest area lying between Kanhan and Pench rivers to the north of Khapa and west of Ramtek. Several large occurrences of low grade ore are seen associated with parent rock "Gondite". The reconnaissance survey carried out by the State Department of Geology and Mining has revealed many promising areas in Ramtek and Saoner tahsils containing low grade manganese which after beneficiation could conveniently be used for purposes of export or for internal consumption. Investigations made at the National Metallurgical Laboratory, Jamshedpur, have clearly indicated that the low grade ores found are amenable for beneficiation.

Limestone and Dolomite

Limestone occurs at a number of places in Ramtek and Saoner tahsils. It belongs to older geological formations. The deposits of dolomitic limestones occurring near Kandri, Patgowari and Deolapar are of good quality and have been exploited to a small extent. In 1960-61, 169 tonnes of limestone worth Rs. 1,206 was exploited. In the same year 4,511 tonnes of dolomite was exploited as against 2,569 tonnes in the earlier year.

White Clay

Clay deposits suitable for potteries, earthenware, refractory materials, etc., occur at Semda, Chorkhairi, Khairi, Khapri and Bajargaon. The quality of clay found has medium to good plasticity, little shrinkage and give light cream colour after firing. The reserves have not been estimated. There was no production of clays during the year 1960-61.

Ochres

Ochres—the naturally coloured mineral pigments—occur near Kalmeshwar, Khairi and Bajargaon areas. The deposits are associated with Gondwana formations. The yellow ochres near Nagpur are being exploited on a small scale for local use. The reconnaissance survey carried out by the State Department of Geology in the area around Kalmeshwar has revealed that extensive deposits of red and yellow ochres occur associated with the Kamptee sandstone. The ochres are inferior in quality but by a simple process of pulverising and lavigation these ochre deposits can be economically and profitably exploited.

Apart from the deposits of minerals described earlier, occurrences of mica, tungsten, gold, antimony, etc., are reported at different places in the district. Mica is found in the pegmatites at Koradi (Nagpur tahsil) and in some pegmatites in Ramtek tahsil. They have not proved to be of any economic value so far. Tungsten ore occurs at Agargaon (Umrer tahsil) about 30 miles to the south-east of Nagpur. The reconnaissance survey has, however, revealed that the percentage of recovery of wolfram of the gangue rock (which is a quartz) is much low. However it is felt that intensive survey and geochemical exploration of the area would give a clear indication of its potentiality. Gold has also been reported to occur in the mineralised belt between Bhiwapur in Umrer tahsil (Nagpur district) and Pauni (Bhandara district).

Antimony is reported to occur at Kolari in Umrer tahsil. It seems that there is very poor disseminated antimony mineralisation. The deposit at present does not seem to have much economic importance. The pegmatites of crystalline areas in the district contain potash felspar. This can be used as a source of potassium. Building

materials like building stones, boulders, brick-earth, ordinary sand, etc., are observed at a number of places. The quantities and values of different minor minerals extracted during 1959-60 are as follows:—

	Quantity (M. tonnes)	Value Rs.
Brick earth	64,350	683,732
Boulders	11,323	93,855
Building stones	3,508	7,384
Sand	643	797

The preliminary geological mapping and mineral investigation has been done by the Geological Survey of India in many areas of the district and further work is in progress. A systematic survey of these areas may reveal many more deposits and may offer opportunities for further development of mining in the district.

In the 1961 Census, 10,546 persons are reported as engaged in mining and quarrying activity: 6,695 of them are males and 3,851 females. Their distribution for industrial minor groups are shown in Table B-IV-C in Part II.

INDUSTRIES

Nagpur City is an important industrial centre in Maharashtra. The industrial development has taken place mostly at Nagpur proper and at a few smaller towns. The rural areas do not have industries and the general pattern of non-agricultural employment is in traditional crafts worked with locally svaliable raw materials or for local demand.

There are a number of large-scale units such as cotton textile, cotton ginning and pressing, saw milling, paper and straw-board, ceramics, ferro-manganese, steel re-rolling, etc. With the availability of increased transport facilities, power, etc., the prospects for further growth of industrial development appear to be very bright.

There are in all 135,701 workers engaged in manufacturing industries : 74,324 or 54·77 per cent are in household industries and 61,377 or 45·23 per cent are in non-household industries. The total number of workers in the registered factories in 1961 is 31,298 which makes 23·06 per cent of all workers engaged in manufacturing industries or 21 factory workers per thousand of total population against the average of 20 per thousand for the State.

The distribution of workers engaged in each industry major and minor groups is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from houselists are also shown separately for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

There are 48 large-scale registered factories working with 50 or more workers, using power and together employing about 20,000 workers. These include units of cotton textiles, cotton ginning and pressing, canning and fruit preservation, saw milling, paper board and straw-board, wood working, printing and bookbinding, safety fuses for blasting gun powder, medicines (Ayurvedic), vaccines, ceramics, R.C.C. pipes, ferro-manganese, general and electrical engineering, etc.

Of the cotton textile units, the Empress Mill and the Model Mills located in Nagpur City are the largest composite mills employing more than 12,000 workers. They together have 3,054 looms and 167,596 spindles. There are six large-scale cotton ginning and pressing units employing about 550 workers in the district. There is a unit manufacturing gray board from waste paper.

Government Printing Press, Shivraj Fine Art Litho Works, Shakti Offset Works and All-India Reporter Press, all located at Nagpur, are the four large units together employing over 1,200 workers.

At Kamptee Road, there is the only unit in India manufacturing safety fuses for blasting gun powder and employing about 150 workers.

Smallpox and cholera vaccines are manufactured at the Vaccine Institute, Nagpur.

Stoneware, jars, cups and saucers are manufactured at Itwari (Nagpur) where about 500 workers are employed.

There is one ferro-manganese unit at Kamptee. Bus bodies are built at the Government Central Workshop at Nagpur where about 500 workers are employed. The South-Eastern Railway narrow gauge Workshop at Kamptee Road employs about 1,000 workers. Tea packing is done by the Brooke Bond India Pvt. Ltd., at Kamptee. Leaf springs and other ancillaries are also manufactured by the Canara Workshops Ltd., Nagpur.

The following units have been licensed: (1) Nagpur Weavers' Co-opatierve Spinning Mills Ltd., Nagpur, for cotton yarn; (2) Hindustan Paper Mills Ltd., Kamptee, for paper; (3) Cawnpore Chemical Works, Kamptee, for sulphuric acid and alumina ferric; (4) Abdulhusain Mulla Alabaxi, Itwari, for blasting powder; (5) Khandelwal Ferro Alloys, Kanhan, for steel casting and pipes.

Small-scale Registered Factories

There are 287 registered smaller establishments employing 5,700 workers. These units are engaged in the manufacture of rice from paddy, dal, cotton textiles, art silk, handloom weaving, carpet weaving, cotton ginning, timber sawing, wooden frames, printing and binding, tiles, foundry, castings, repairing of motor vehicles, etc.

The total number of registered factories has increased from 281 in 1956 to 329 in 1961. The number of workers in the registered factories has, however, decreased from 31,814 in 1956 to 31,298 in 1961.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 9·69 crores and a working capital of Rs. 2·35 crores. The total value of annual production was Rs. 10·61 crores and the value added by manufacturing was Rs. 2·45 crores. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1959 is 0·97 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

The traditional crafts are conducted on household and cottage industries scale. They are mostly servicing and processing establishments, catering for the requirement of local population. The principal cottage industries are handloom weaving, oil ghanies, tanning and leather goods manufacture, pottery and bricks, cane and bamboo works, dyeing and printing, etc. Cotton weaving in handlooms engages the largest number of workers in the district. The Nagpur handloom *saris* are famous and have a market all over the State. The well-known silk-bordered cloth used to be exported from Nagpur to various parts of the country. Dhotis and "dupattas" (head-cloths) with red silk or gold lace borders are made at Umrer, and are still considered a wear of distinction on ceremonial occasions.

In May 1961, out of a total of 60,376 cotton handlooms registered in Nagpur Division, 36,784 were located in Nagpur district alone. There are also 15 non-cotton registered handlooms in the district. Cotton weaving in handlooms engages 48,159 workers in the district. 15,859 workers are engaged in cotton spinning and weaving in mills. 38,950 workers have their occupation as drawers and weavers and 5,785 are working as spinners in the district.

Production and rearing of livestock engages 11,472 workers. According to the Livestock Census of 1961, the district has a livestock population of 8·19 lakhs. The establishment of the Nagpur Milk Scheme in 1958, has encouraged rearing of milch cattle in the district.

Bidi industry engages 10,288 workers in the district, while 9,774 are engaged as chiroot, cigar and bidi makers.

8,351 workers are engaged as carpenters. Wood carving of some artistic merit is also executed. These also include carpenters who manufacture, fix or repair doors, door frames, wooden roof beams, etc. 7,275 workers have their occupation as tailors.

Mining industry is of considerable importance in the district because of its rich manganese ore deposits. There is also a colliery at Kamptee. The total number of persons engaged in mining and quarrying in the district is 10,546, out of which 7,592 are working in mining of manganese ore.

There is a glass factory at Nagpur. The clay deposits of Bhandak in Chanda district are used by the pottery works at Nagpur. Cement pipes are manufactured at Kanhan and Nagpur. Sulphuric acid, carbon-dioxide, paints, varnishes and boiled oils are also manufactured in the Kanhan-Kamptee area. Because of the concentration of other major industries at Nagpur, engineering workshops and foundries have also been mostly established there. These workshops are primarily repair-shops. A few are engaged in fabrication of structurals required for the State Electricity Board and the steel plants at Bhilai. A small-scale wood screw manufacturing unit is established at Nagpur. The match factory at Nagpur utilises match-wood from Chanda and Bhandara districts and manufactures about 50 gross boxes per day. Saw-milling is also concentrated in Nagpur as it is the main distribution and consuming centre. Hemp matting is woven at Kamptee, Nagpur, and at Gauri in Ramtek tahsil. Ropes from sun-hemp and thick screens are made at Nagpur. Baskets, chicks, mats, fans and sieves are made from bamboos in the towns in the district. Best earthen vessels are produced at Ramtek. There are 843 flour mills engaging 1,394 workers.

The proportion of different groups of artisans to one lakh of total population in the district are as follows :—

Blacksmiths 236; Carpenters 552; Shoemakers and repairers 174; Potters 306; Tailors and dress-makers 481; Spinners and weavers 2,957; Basket weavers 219.

The Industries Department has started an Industrial Institute at Nagpur. It provides training facilities in fruit preservation, chemical industries

like ink, sealing wax, cosmetics, soap, manufacture of fibre articles like rope-making, handmade paper, *newar* and *dari* making, stationery articles, ceramic articles, etc. One Textile Training Institute is also proposed to be established at Nagpur. One unit for manufacture of blankets was opened at Umrer in 1956-57. Thirty improved sleighs have been supplied to weavers. Peripatetic demonstration parties provide training in carpentry, blacksmithy, leather goods manufacture, fruit preservation, soap-making, rope-making, *dari*-making and tailoring.

The " Master Plan " prepared by the Industries Department in 1960 had indicated scope for establishment of the following new industries in the district :—

(i) Spinning mill; (ii) Surgical cotton; (iii) Paints, varnishes, boiled oils, etc.; (iv) Cold storage plant, refrigeration van service for vegetables, fruits and fish; (v) Ferro-manganese; (vi) Beneficiation of low grade manganese ore; (vii) Low temperature carbonisation; (viii) Hardboards and chip boards; (ix) Sulphuric acid, phosphatic fertilisers and alums; (x) Steel re-rolling; (xi) Electrical motors, transformers and control switch gears; (xii) Machine tools; (xiii) Caste iron pipes and (xiv) Scientific instruments.

A Government Industrial Estate at Nagpur was started during the Second Five-Year Plan. Another Functional Industrial Estate was similarly started at Kamptee for light engineering.

In the Third Five-Year Plan it is proposed to establish at Umrer a new estate, consisting of worksheds, on co-operative basis.

POWER

There were 272 electrified towns and villages in 1961. Their tahsilwise lists are given in Table 31 in Part III. The total population of these electrified places is 67·22 per cent of the total population of the district.

The district consumption of electricity on different items is shown for eight years in Table 30 in Part III.

The *per capita* consumption is naturally much higher than the State average as two-thirds of the population is in electrified towns and villages and there has also been a rapid growth of industries in the district.

Electricity was introduced in Nagpur as early as 1905 by a private undertaking. A thermal power station with an installed capacity of 30,000 kw. was set up at Khaparkheda near Nagpur in 1950. This station is supplying power not only to the districts in Nagpur Division but also to three districts in Madhya Pradesh and is inter-connected with Ballarshah power station in Chanda district. To meet the rapid increase of the load on the system, the capacity of Khaparkheda unit was raised from 30,000 kw. to 60,000 kw. from June 1960 with the help of an additional 30,000 kw. turbo-alternator set. It is proposed to further raise the capacity to 120,000 kw. to meet the anticipated increase in the load at the end of the Third Five-Year Plan.

The electricity generated at the above thermal station is distributed to the consumers in the district partly by the Nagpur Electric Light and Power Company and partly by the Maharashtra State Electricity Board through its grid system. During the first two Plans a number of rural electrification schemes have been completed. About 1,300 lift irrigation electric pumps have been installed in the district.

TRADE AND COMMERCE

The chief articles of export from the district are commodities like raw cotton, handloom goods, oilseeds, hides and skins, pulses, other grains, betel-leaves, oranges, minerals like manganese and coal, catechu, glassware, etc. Handloom goods and oranges are sent to Bombay and other parts of the countries. Betel-leaves from Ramtek are exported to Northern India. Salt, cocoanuts, betelnuts, groceries, mill-made cloth and other piece-goods, stationery, kerosene oil, sugar, gur, tobacco, spices, etc., are the chief articles of import. Salt is brought from Bombay. Cocoanuts and betelnuts are brought from Ratnagiri and Orissa.

Agricultural produce is collected from the producers mainly at trading centres. The distribution of foodgrains and other articles of trade is through shops and pedlars or hawkers and in addition through the very well-established institution of weekly markets and fairs where sellers and buyers meet on fixed days of the week or the year.

Shops

Shops are found in almost all villages except the smallest. These provide the inhabitants with their day-to-day requirements and the articles sold are grains, salt, oil, chillies, sugar, spices, etc. There are in all 12,489 shops in the district. 2,651 are in rural areas and 9,838 in urban areas. This does not include shops temporarily set up in weekly markets or fairs. The number of shops per 1,000 dwellings is 38·6 for the district as a whole, 16·2 for rural areas and 62·3 for urban areas. It will be seen that the

urban areas have nearly four times more shops than rural areas. The number of shops per 1,000 dwellings for the district (38·6) is more than the State average of 36·4. Tahsilwise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These markets or "bazars", as they are popularly known, are distributing rather than collecting centres. The articles sold at these markets are all sorts of grains, salt, oils, chillies, various articles of clothing, cattle, miscellaneous articles such as pots, pans, vegetables, oilseeds, betelnuts, etc. Pedlars and hawkers set up booths on market days. Agriculturists from nearby villages bring their farm produce. Moreover the traders and shop-keepers belonging to the market place also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. Some of these markets serve as feeder markets for larger markets of the district or in the adjoining districts. The weekly markets start in the morning and after a slack of an hour or so in the afternoon close by six in the evening to enable both the buyers and sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and if so, on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 226 shows the location of all these markets and also the days on which each bazar is held. The map will show that five or six weekly markets cluster as satellites around a central village. Each has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or other.

There are altogether 126 weekly and bi-weekly markets in the district. Out of these, six are also cattle markets. Twenty-three weekly markets are held on Sunday, 21 on Monday, 13 on Tuesday, 16 on Wednesday, 21 on Thursday, 17 on Friday and 19 on Saturday.

Fairs

As far as trade is concerned, fairs differ little from the weekly markets except that they are attended by unusually large number of persons. They are also chiefly distributing centres. Several temporary shops are opened and articles of various kinds are sold. A list of fairs held in the district showing their locations, duration, dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 227 shows the location of the fairs in the district, having 1,000 or more gatherings. A volume giving details regarding fairs and festivals in Maharashtra is also issued separately.

Trade Centres

Apart from weekly markets and fairs, (1) Katol, (2) Bhiwapur, (3) Umrer, (4) Nagpur, (5) Narkhed, (6) Kalambha, (7) Saoner and (8) Kalmeshwar are important trade centres in the district as far as collection and export of agricultural produce are concerned. Agricultural produce markets at these places are regulated under the Central Provinces and Berar Agricultural Produce Markets Act, 1935, and the Central Provinces and Berar Cotton Markets Act, 1932, and they are known as principal market yards.

The combined turnovers of commodities (by value in rupees) in Katol cotton market alone during the year 1958-59 was Rs. 7,07,388.

Trading in oranges in the district is done on a very large scale, as these have a market in all parts of the country and to a small extent in foreign countries also. The figures of arrivals and exports (despatches) from different markets and stations in the district during the year 1958-59 are as follows :—

Market or station	Arrivals in carts (1 cart = 8 mds. approx.)	Exports in wagon loads (1 wagon = 450 mds.)
(1) Nagpur	59,296	679
(2) Kalmeshwar	5,568	88
(3) Kohali	5,302	81
(4) Katol	31,363	404
(5) Kalambha	10,331	..
(6) Narkhed	24,930	378
(7) Mentpanjara	..	31
(8) Kamptee	..	48
(9) Kanhan	..	10
(10) Ramtek	..	25

In addition, the export of oranges " smalls " from different stations in the district during the year 1958-59 are as follows :—

Station	Export (in mds.)
(1) Nagpur	874,930
(2) Kalmeshwar	3,495
(3) Kohali	1,031
(4) Katol	40,662
(5) Kalambha	7,796
(6) Narkhed	40,505
(7) Kamptee	3,551
(8) Kanhan	1,379
(9) Ramtek	595
(10) Tarsa	788

The other commodities having large turnover at the regulated markets in the district are cotton, chillies and grains.

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district is 43,583 out of which 5,601 or 12·85 per cent are in rural areas and 37,982 or 87·15 per cent are in urban areas. The number of workers in trade and commerce makes 6·20 per cent of all workers in the district. More than three-fourths of the district number are in Nagpur tahsil alone.

Only 6 per cent of the workers in trade and commerce are in wholesale trade. 87·38 per cent are in retail trade and 6·62 per cent are in miscellaneous trade and commerce. Ninety-seven per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is only 158. Mostly the wholesale trade of cereals and pulses appears to be combined with the wholesale trade of sugar, spices, oil, etc., the number for which is 767 for the district

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 in Part III. Their break-up by tahsils and type are shown below :—

	Number of Banking Offices			
	Scheduled	Non-scheduled	Co-operative	Total
DISTRICT TOTAL ..	17	1	9	27
1 Katol Tahsil	1	..	2	3
2 Saoner Tahsil	..	..	2	2
3 Ramtek Tahsil	..	..	2	2
4 Nagpur Tahsil	15	1	1	17
5 Umrer Tahsil	1	..	2	3

Nagpur tahsil containing the large city is naturally leading in banking activities in the district. The Central Co-operative Bank has at least one branch office in each tahsil.

The Reserve Bank of India has a branch at Nagpur. The State Bank of India works for the treasury and has branches at Katol, Nagpur, Kamptee and Umrer.

COMMUNICATIONS AND TRANSPORT

The district is well connected by rail. The Central Railway has a broad gauge mileage of 81·78 miles while the South-Eastern Railway covers 152·29 miles of broad gauge and 82·02 miles of narrow gauge. The district has thus a total railway line of 316·09 miles. The broad gauge line traverses through the tahsils of Nagpur, Katol, Ramtek and Saoner and the narrow gauge line passes through Umrer and Saoner tahsils. Local passenger transport is mainly handled on the narrow gauge line. The Bombay-Calcutta rail line cuts across the district touching the important junction of Nagpur. Grand Trunk route also passes breadthwise through Nagpur. Nagpur is thus advantageously situated on both the routes and is nearly midway between Calcutta-Bombay and Delhi-Madras, facilitating easy movement of goods from or to any part of the country.

Existing railway mileage in the district is 8·24 miles per 100 sq. miles of area against 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page shows all these roads.

The district is also well connected by roads with the adjoining districts of Wardha, Chanda, Bhandara, Amravati and Madhya Pradesh. The district headquarters is also connected with all the tahsil headquarters. But many villages and towns are not easily accessible from the tahsil or block headquarters. Two National Highways of 134·19 miles, one starting from Dhulia to Calcutta and the other from Madhya Pradesh to Hyderabad, traverse lengthwise and breadthwise and pass through Nagpur City.

During the period 1951—61, the National Highways increased by 0·01 mile, State Highways by 21·88 miles, major district roads by 5·77 miles, other district roads by 22·08 miles and village roads by 27·48 miles. The total increase in all types of roads (excluding municipal roads) is 77·22 miles.

Under the Nagpur Plan the district should have 1,390 miles of roads on 31st March 1961. It was short of that target by 903·41 miles.

New Roads

Construction of the following new roads is in progress (as on 31st March 1962) :—

(1) Sawargaon-Chicholi road; (2) Ramtek-Tumsar road; (3) Jalalkheda-Tumsar road; (4) Girad-Umrer road; (5) Hingna-Hingni road; (6) Narkhed-Sawargaon road; (7) Panchgaon-Kuhi road;

(8) Kalmeshwar-Dhapewada-Saoner road; (9) Godhani-Zilpa road; (10) Zilpa-Pipla road; (11) Gondkhairi-Ghogali road; (12) Hingna-Kanholi road; (13) Mohpa-Dhapewada road; (14) Saoner-Kodegaon road.

The following roads are being improved (as on 31st March 1962) :—

(1) Bori-Wardha road; (2) Nagpur-Katol road; (3) Kodegaon-Khapa road; (4) Amdee Naikund-Parsivni road; (5) Umrer-Mokardhokda road; (6) Mansar-Ramtek road; (7) Nagpur-Bori-Hinganghat-Jam Section of National Highway No. 7; (8) Great Eastern road, National Highway No. 6, Nagpur-Bhandara Section.

Posts, Telegraphs and Telephones

The district is included in the Nagpur Postal Division. Head Post Office is situated at Nagpur and sub-offices at tahsil headquarters and towns. The bigger villages have branch post offices. During the year 1961-62 there were 56 sub-post offices and 175 branch post offices in the district.

There are Telegraph Offices at the following ten places :—

(1) Nagpur, (2) Bhiwapur, (3) Kamptee, (4) Kalmeshwar, (5) Khapa, (6) Katol,(7) Narkhed, (8) Ramtek, (9) Saoner and (10) Umrer.

The following ten places have Telephone connections :—

(1) Nagpur, (2) Bhiwapur, (3) Kamptee, (4) Kalmeshwar, (5) Khapa, (6) Katol, (7) Narkhed, (8) Ramtek, (9) Saoner and (10) Umrer.

Passenger Road Transport

Passenger road transport in the district has been nationalised as early as 1946 when the State Government took over from the Central Provinces Transport Service and finally purchased it in 1955. After the reorganisation of States in November 1956, the transport organisation used to function as one of the Government departments. It has been amalgamated in the Maharashtra State Road Transport Corporation since 1st July 1961. By the end of the Second Five-Year Plan the extent of nationalisation of passenger road transport was 34 per cent. It is proposed to extend it to 53 per cent by the end of the Third Five-Year Plan. It is proposed to construct additional bus stations, pick-up stands, and provide other facilities for the travelling public during the Third Five-Year Plan.

The district is included in the jurisdiction of Nagpur Division of State Road Transport Corporation. There are four depots in the district. There are also two permanent and two temporary bus stations. No separate figures of passenger transport are available for the district. The four depots together run buses on 90 routes which make 870 single trips per day. This includes city bus services which operate in Nagpur City.

Goods Transport

The goods transport is totally managed by private transport agencies which also provide godowns and 'cash on delivery receipt' facilities in important centres. Separate figures for lorries operated in the district are not available as the Regional Transport Officer working at Nagpur keeps combined records for his region including Nagpur, Wardha, Buldhana, Akola, Amravati, Yeotmal, Bhandara and Chanda districts.

Workers in Transport and Communications

28,333 persons are engaged in transport and 5,028 in postal, telegraphic and telephone communications in the district. Out of the workers in transport, 8,951 are in railway transport, 3,419 in motor and bus transport and 15,963 in other kinds of transport like bullock-carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a Railway or a Road or has a Post Office or not.

CONSTRUCTION

The total number of persons engaged in construction is 13,656: 10,485 are males and 3,171 females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

Only 3·04 per cent of the workers are engaged in construction and maintenance of dams, waterways, canals, etc., 17·46 per cent in construction and maintenance of roads, bridges, etc., and 79·02 per cent in construction and maintenance of buildings. The large proportion engaged in the construction of buildings includes mainly persons employed on the construction of educational institutions, administrative offices, residential quarters both in Government and private sectors including Low Income Group Housing Scheme and the Labour Housing Scheme in urban areas of the district.

All the workers engaged in construction together make 1·94 per cent of the total workers in the district.

OTHER SERVICES

72,923 persons are engaged in the district in "Other Services". 58,542 are males and 14,381 are females. The major categories out of them are: (i) Public services; (ii) Educational services; and (iii) Personal services. Public services include administrative employees of Central, State and Local Governments. Educational services include all classes of teachers and Personal services include domestic servants as well as barbers, washermen, and others rendering services to persons or households. The distribution of the workers in other services by minor groups is shown in Table B-IV-C in Part II.

10·38 per cent of the total workers in the district are engaged in "Other Services" as against 8·54 per cent in the State. 25·60 per cent of the total workers in "Other Services" in the district are engaged in public services and 15·88 per cent in educational services. Both these proportions are higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This may be due to the presence of defence service personnel and special reserve police force from Kamptee Cantonment area and the existence of a large number of educational institutions. The proportion of personal services in the district is 25·72 per cent which is slightly lower than the State average of 27·15 per cent.

The number of domestic servants is 7,123 or one for about 212 population. The number of barbers is 3,119. The number of persons in laundry services (including washermen) is 2,066.

There are 559 legal practitioners and 3,951 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is 1,356 and that in other schools and colleges is 10,101.

The number of State Government employees including those now working under the Zilla Parishad is 12,123.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rate

The proportions of workers to total population, males and females for the district and each tahsil are as follows:—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA	47·91	57·09	38·10
NAGPUR DISTRICT	46·47	56·13	36·07
1 Katol Tahsil	56·49	60·58	52·16
2 Saoner Tahsil	55·57	59·91	51·03
3 Ramtek Tahsil	56·35	61·19	51·33
4 Nagpur Tahsil	37·92	52·57	21·66
5 Umrer Tahsil	58·51	60·56	56·44

Labour participation rates in the district are a little lower than those for Maharashtra for total and both for males and females. It is mainly due to a large proportion of urban population in the district. Within the district participation rates vary from 58·51 in Umrer tahsil to 37·92 in Nagpur tahsil. Male participation is highest with 61·19 per cent in Ramtek tahsil and the female participation is highest with 56·44 per cent in Umrer tahsil. Nagpur tahsil has lowest participation rates both for males and females because of its very large urban population.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows:—

	Total workers	Primary	Secondary	Tertiary
MAHARASHTRA—				
Total	100·00	72·25	12·34	15·41
Rural	100·00	88·73	5·68	5·59
Urban	100·00	11·97	36·69	51·34
NAGPUR DISTRICT—				
Total	100·00	56·12	22·53	21·35
Rural	100·00	85·78	8·93	5·29
Urban	100·00	11·18	43·14	45·68

The secondary sector is relatively larger in the district than the corresponding State average for both rural and urban areas. Nagpur itself is a great manufacturing centre and urban areas in the district consequently have a larger proportion of workers engaged in the secondary sector. Even the rural areas in the district are better off than the corresponding average for the State. The tertiary sector also engages a larger proportion of the total workers though that proportion is lower than the State average both in rural and urban areas. It is so because the proportion of urban population in the district is substantially larger than the State average.

Categories of Economic Activity

The distribution of workers, males and females, by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			NAGPUR DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46.11	40.69	54.79	32.00	26.89	40.55
II Agricultural Labour ..	23.80	18.12	32.90	21.74	14.78	33.39
III Mining, Quarrying, Livestock, Fishing, etc.	2.16	2.97	0.86	3.67	4.76	1.85
IV Household Industry ..	4.39	4.80	3.74	10.57	10.44	10.80
V Manufacturing other than Household Industry.	6.88	10.22	1.54	8.73	12.00	3.25
VI Construction	1.24	1.69	0.53	1.94	2.38	1.21
VII Trade and Commerce ..	4.52	6.61	1.17	6.20	8.66	2.09
VIII Transport, Storage and Communications.	2.36	3.65	0.29	4.77	6.79	1.39
IX Other Services	8.54	11.25	4.18	10.38	13.30	5.47
Total ..	100.00	100.00	100.00	100.00	100.00	100.00

Both the cultivators and the agricultural labourers in the district have smaller proportions than those for the State averages. They are so because of the very large proportion of urban population in the district. All other categories have higher proportions in the district than the State averages. The proportions are substantially higher in Household Industry, Manufacturing Industry, Other Services Trade and Commerce, and Transport, Storage and Communications.

Tahsilwise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and district are also shown for comparison.

Distribution of workers by nine categories of economic activity is also shown in the Figure on page (53) for the district and each tahsil separately.

The proportions both of cultivators and agricultural labourers differ considerably from tahsil to tahsil. The proportion of cultivators varies between 49·17 per cent for Umrer tahsil and 13·40 for Nagpur tahsil. The proportion for agricultural labourers varies between 36·83 per cent for Katol tahsil and 10·57 for Nagpur tahsil. Very low proportions for both cultivators and agricultural labourers are found in Nagpur tahsil which includes Nagpur city having a large number of textile mills and other industries. Very high proportion in category III (Mining, etc.) are in Ramtek tahsil (10·60 per cent), which has many manganese mines. Nagpur tahsil has 17·76 per cent of workers engaged in manufacturing, 17·16 per cent in other services, 11·01 per cent in trade and commerce and 9·91 per cent in transport, etc.

State/District/Tahsil	I Cultivator	II Agricultural labourer	III Mining, quarrying, livestock, fishing, hunting, etc.	IV Household industry	V Manufacturing other than Household industry	VI Construction	VII Trade and Commerce	VIII Transport, Storage and Communications	IX Other services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA	46.11	23.80	2.16	4.39	6.88	1.24	4.52	2.36	8.54	100.00
NAGPUR DISTRICT ..	32.00	21.74	3.67	10.57	8.73	1.94	6.20	4.77	10.38	100.00
1 Katol Tahsil	48.68	36.83	1.36	4.01	0.88	0.29	2.52	0.55	4.88	100.00
2 Saoner Tahsil	43.04	29.28	3.73	10.74	3.07	0.43	2.71	0.79	6.21	100.00
3 Ramtek Tahsil ..	46.34	56.13	10.60	7.26	1.47	0.35	1.98	0.83	5.04	100.00
4 Nagpur Tahsil	13.40	10.57	2.41	13.91	17.76	3.87	11.01	9.91	17.16	100.00
5 Umrer Tahsil	49.17	30 81	3.00	9.56	0.68	0.46	2.14	0.38	3.80	100.00

Labour Participation by Age

The labour participation rates by age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

	Nagpur District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All ages ..	46·47	56·13	36·07	47·91	57·09	38·10
0—14 ..	7·78	7·12	8·47	8·72	8·62	8·84
15—34 ..	67·77	82·60	51·85	74·53	87·45	60·90
35—59 ..	81·24	96·48	63·24	81·57	96·86	63·68
60+ ..	54·52	73·44	36·95	49·13	72·82	26·28

Participation rates are lower for the district than the State average for total, males and females in all age-groups except the age-group 60+. These differences are mainly due to the existence of a large urban centre with a sizable volume of organised employment in the district.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III in Part II is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or junior basic	Matriculation and above
Maharashtra	68·65	14·11	13·91	3·33
Nagpur District	64·97	12·47	17·54	5·02

AGRICULTURAL LABOURER
MANUFACTURING OTHER THAN HOUSEHOLD INDUSTRY
TRANSPORT, STORAGE AND COMMUNICATIONS
MINING, LIVESTOCK ETC.
CONSTRUCTION
OTHER SERVICES

Literacy percentage of workers of the district is higher than the State average. The proportion of workers who are literates without educational level (12·47 per cent) is less than the State average (14·11 per cent). The percentage of workers who are educated up to primary or junior basic level is higher than the State average. Much higher proportion of workers with Matriculation and above (5·02 per cent) in the district is seen to that of State average of 3·33 per cent. This is so because the services in the district (Government and Industries) require skilled and highly educated workers.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage proportions of employers, employees, single workers and family workers in the district for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II :—

	Total workers	Class of workers			
		Employers	Employees	Single workers	Family workers
Maharashtra—					
Total ..	100·00	3·96	62·18	26·52	7·34
Rural ..	100·00	1·57	46·47	38·58	13·38
Urban ..	100·00	4·98	68·90	21·37	4·75
Nagpur District—					
Total ..	100·00	4·69	58·14	32·16	5·01
Rural ..	100·00	1·32	55·34	35·17	8·17
Urban ..	100·00	5·50	58·81	31·43	4·26

Family workers have lower proportion in the district than the State average but single workers have higher proportion in the district particularly in urban areas. This is a reflection of the traditional crafts and small shops or pedlars dominating the scene even in urban areas. The proportion of employers is higher in the district and particularly in urban areas. The proportion of employees is lower for the district, it is much lower in the urban areas to that of the State average. This may indicate the prevalence of numerous small establishments.

Percentage Distribution in Household Industry by Employees and Others

The proportion of employees, *i.e.*, hired workers and others in household industries in the district total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

	Total workers	Employees	Others
Maharashtra—			
Total	100·00	8·18	91·82
Rural	100·00	4·91	95·09
Urban	100·00	16·35	83·65
Nagpur District—			
Total	100·00	7·34	92·66
Rural	100·00	6·10	93·90
Urban	100·00	7·94	92·06

Household industries in the district work more with household members than the State average. The proportion of employees are lower in the district than the State for total and urban areas. The household industries in the rural areas of the district, however, engage a larger proportion of employees than the State average for rural areas.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II):—

Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work		
		I	II	IV
MAHARASHTRA—				
I Cultivation ..	Total ..	..	17.85	1.97
	Rural ..	..	18.03	1.98
	Urban ..	..	10.54	1.32
II Agricultural Labour ..	Total ..	13.17	..	0.94
	Rural ..	13.46	..	0.97
	Urban ..	7.12	..	0.31
IV Household Industry ..	Total ..	14.78	6.97	..
	Rural ..	19.61	9.38	..
	Urban ..	2.70	0.95	..
NAGPUR DISTRICT—				
I Cultivation ..	Total ..	..	27.40	2.45
	Rural ..	..	28.02	2.51
	Urban ..	..	18.28	1.55
II Agricultural Labour ..	Total ..	12.59	..	1.04
	Rural ..	12.44	..	1.11
	Urban ..	14.26	..	0.25
IV Household Industry ..	Total ..	6.57	2.21	..
	Rural ..	15.96	5.85	..
	Urban ..	1.97	0.42	..

The proportion of cultivators also working as agricultural labourers as secondary work is larger for the district than the State average. Agricultural labourers also working as cultivators are in a smaller proportion than the State average.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The

percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

	Occupational Division	Maharashtra	Nagpur District
0	Professional, technical and related workers.	6·42	5·84
1	Administrative, Executive and Managerial workers.	3·89	3·00
2	Clerical and related workers ..	9·13	8·10
3	Sales workers	12·23	11·11
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	5·20
5	Miners, quarrymen and related workers.	0·75	2·38
6	Workers in transport and communication occupations.	3·57	4·12
7-8	Craftsmen, production process workers and labourers not elsewhere classified.	45·99	51·21
9	Service, sports and recreation workers.	10·27	9·02
X	Workers not classifiable by occupation.	0·11	0·02
	Total ..	100·00	100·00

The proportion for the occupational division 7-8 Craftsmen, etc., is quite higher in the district than the State average. The proportion in the occupational division Miners, etc., is 2·38 in the district compared to the State average 0·75. All other occupational divisions have lower percentages than the State averages.

Non-workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below:—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	41.30	15.57	33.26	9.60	46.90	18.70
(2) Household duties	0.31	38.46	0.22	21.17	0.37	47.54
(3) Dependents, infants and disabled	53.49	45.39	64.85	68.72	45.58	33.14

(8) Unemployed but seeking work..	1.28	0.06	0.34	0.03	1.93	0.08
Total ..	100.00	100.00	100.00	100.00	100.00	100.00

*Negligible.

There is a marked difference in the distribution pattern for non-workers among males and females. 41·30 per cent out of male non-workers are full-time students while the corresponding proportion for females is 15·57. The reason is that 38·46 per cent females who are engaged in household duties are also included as non-workers. The rural urban differences are similar both for males and females. In urban areas the percentage of full-time students is higher and that for dependants is lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 3·69 and 0·74 for males in urban and rural areas and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower also because the group of non-workers contains a large number of adult women engaged in household duties. Other categories have less than a per cent in each of them both for males and females.

PART I

VILLAGE DIRECTORY

This Directory renders an account of each Village and each Word of Town

J-1977-I—1-A—(Nag.)

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with words "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 , and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown in roman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from Census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

X *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

EXPLANATORY NOTE

THIS PART contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (e.g., A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (e.g., B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least ¾ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. There have been no territorial changes during the decade 1951—1961. Appendix I does not, therefore, appear here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season ; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The "household" is slightly different from a "family". A "household" is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. Since there are no Scheduled Tribes notified for this district columns (11) and (12) are blank. The figures relate only to the group totals of all Scheduled Castes. Their break-up by individual Scheduled Caste will be found in Table SCT-I.

40. The limitations in coverage of Scheduled Castes may be mentioned here. They do not include all backward castes living n the district but only those declared as Scheduled Castes in the district. In cases where a caste is declared as a Scheduled Caste for a specified area that caste has been separatel presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A "literate" is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I As Cultivator.
II As Agricultural Labourer.
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV At Household Industry.
V In Manufacturing other than Household Industry.
VI In Construction.
VII In Trade and Commerce.
VIII In Transport, Storage and Communications.
IX In Other Services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, washerman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water-supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows:—

	Category	Industry Division
I	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II	Agricultural Labourer ..	
III	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V	Manufacturing	Division 2 & 3.
VI	Construction	Division 4.
VII	Trade and Commerce ..	Division 6.
VIII	Transport, Storage and Communications.	Division 7.
IX	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes " employer ", " employee ", " single worker " and " family worker ".

An " employer " is a person who employs other persons in order to perform economic activity in which he is engaged.

An " employee " is a person who usually works under some other person for salary, or wages in cash or kind.

A " single worker " is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A " family worker " is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group, is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii) even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivator and II-Agricultural Labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in column (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry;

(ii) engaged in cultivation only;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry (Appendix I). The table shows the

sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of Households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part III of the Maharashtra Census Report.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. This table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0—9 years and 70 and over. The entire population in 0—9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Table C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top-ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table deals with the total population of Scheduled Tribes classified by literacy and by economic activity. It is not presented as there are no Scheduled Tribes notified in this district.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies. No Scheduled Tribes are notified for this district. No special tables for Scheduled Tribes are, therefore, presented in this Part.

96. These special tables for Scheduled Castes have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste separately.

97. These tables relate to economic activity, education, and classification of persons not at work. Material is presented for each Scheduled Caste separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes notified for the district and in case he belonged to one of them he was asked the name of his caste. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Bauddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V of the Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104, 105 and 106. This table is not presented in this Part as there are no Scheduled Tribes notified in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table is not presented in this Part as there are no Scheduled Tribes notified in the district.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table is not presented in this Part as there are no Scheduled Tribes notified in the district.

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;

(ii) entirely held from private persons or institutions for payment in money, kind or share; and

(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This table is not presented in this Part as there are no Scheduled Tribes notified in the district.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table is not presented in this Part as there are no Scheduled Tribes notified in the district.

Table ST-II

115. This table is not presented in this Part as there are no Scheduled Tribes notified in the district.

E SERIES

HOUSING TABLES

116. There are five tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, courtyard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124. This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly,

the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I
STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—
9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0 Agriculture, livestock, forestry, fishing and hunting
1 Mining and Quarrying
2 & 3 Manufacturing
4 Construction
5 Electricity, Gas, Water and Sanitary Services
6 Trade and Commerce
7 Transport, Storage and Communication
8 Services
9 Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00 Field produce and Plantation crops
01 Plantation crops
02 Forestry and Logging
03 Fishing
04 Livestock and Hunting

Division 1—Mining and Quarrying

10 Mining and Quarrying

Division 2 and 3—Manufacturing

20 Foodstuffs
21 Beverages
22 Tobacco Products
23 Textile—cotton
24 Textile—jute
25 Textile—wool
26 Textile—silk
27 Textile—miscellaneous
28 Manufacture of wood and wooden products
29 Paper and paper products
30 Printing and publishing
31 Leather and leather products
32 Rubber, Petroleum and coal products
33 Chemicals and chemical products
34-35 Non-Metallic Mineral Products other than petroleum and coal
36 Basic Metals and their products except machinery and transport equipment
37 Machinery (all kinds other than Transport) and Electrical equipment
38 Transport Equipment
39 Miscellaneous Manufacturing Industries

Division 4—Construction

40 Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50 Electricity and Gas
51 Water-supply and Sanitary Services

Division 6—Trade and Commerce

60—63 Wholesale Trade
64—68 Retail Trade
69 Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71 Transport
72 Storage and Warehousing
73 Communications

Division 8—Services

80 Public Services
81 Educational and Scientific Services
82 Medical and Health Services

Division 8—Services—*concld.*

83 Religious and Welfare Services
84 Legal Services
85 Business Services
86 Community Services and Trade and Labour Associations
87 Recreation Services
88 Personal Services
89 Services (not elsewhere classified)

Division 9—Activities not adequately described

90 Activities unspecified and not adequately described (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, musur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms.. ..	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, ponds.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting—*concld.*	
04	*Livestock and Hunting—*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry-farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling ..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms ..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar types of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made-up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil-cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of wood and wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys, artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block-making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes..	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven ..	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products ..	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical Equipment*—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment*—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal-drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries*—	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction*—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railway bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas*—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-supply and Sanitary Services*—	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade*—	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textile products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
63	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverware and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade—*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, ready-made garments of cotton, wool, silk and other textiles and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobil oil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper..	661
	Retail trading in metal, procelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous—*	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money-lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport—*	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport—*	
	Such as packing, carting travel agency.. ..	710
72	*Storage and Warehousing—*	
	Operation of storage such as warehouses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication—*	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).—	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services—*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homoeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisation operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating-houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair-dressing, other services rendered by organisations and individuals such as those by barber, hair-dressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individulas who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market.. ..	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note.—n. e. c.=not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

5 Miners, quarrymen and related workers

6 Workers in transport and communication occupations

7-8 Craftsmen, production process workers and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, Surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists and Related Workers
08 Artists, Writers and Related Workers
09 Draughtsmen, Science and Engineering Technicians, n. e. c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators, and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

20 Book-Keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trade
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Moneylenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, Ship
61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen.
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers, Road Transport
65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors, Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n. e. c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n. e. c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters, Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations

X0 Workers without occupations
X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
X9 Workers not Reporting Occupations

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note—n. e. c.=not elsewhere classified

Industrial Code Number	Household Industry
	Major Group 00—Field Produce and Plantation Crops
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date, Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
	Major Group 01—Plantation Crops
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
	Major Group 02—Forestry and Logging
023·1	Production of Charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·1	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above.
	Major Group 03—Fishing
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries.
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
	Major Group 04—Livestock and Hunting
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep-breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry-keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds, *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee-keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog-breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses.
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.
	Major Group 10—Mining and Quarrying
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
	Major Group 20—Foodstuffs
200·1	Production of flour by village chakkies or flour mills by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill.
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and food-grains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashewnut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweetmeats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
	Major Group 21—Beverages
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date palm fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
Major Group 27—Textile—Miscellaneous	
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*concld.*	
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including raincoats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of waterproof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread), batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandalwood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld.*
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of cartwheels
289·4	Manufacture of other wood and allied products n.e.c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags.
292·2	Papier-mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
	Major Group 30—Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry
	Major Group 31—Leather and Leather Products
310·1	Flying, processing of hides and skins including taxidermy.
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals)
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of eather and fur
313	Manufacture of leather products such as leather upholstery suitcases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths, etc.
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335·6	Manufacture of maccara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products —*concld.*
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemical products n. e. c.
	Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
246·1	Making of images from soap stone
346·2	Manufacture of images, toys and other articles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n. e. c.
366·1	Making of aluminium utensils.
366·2	Making of other aluminium products n.e.c.
367·1	Making of tin utensils.
367·2	Making of articles from tin sheets.
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products.
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets.
369·4	Making and repairing of locks and trunks.
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n.e.c.
	Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n. e. c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
	Major Group 38—Transport Equipment
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
	Major Group 38—Transport Equipment—*concld.*
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
	Major Group 39—Miscellaneous Manufacturing Industries
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n. e. c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlaywork with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacutre of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc., n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n.e.c.

J-1977—III—26-B (Nagpur)

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. "Normal rainfall" [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India ".

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, river beds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste* : This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years ;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by "cereals, pulses and others". Non-foodcrops are similarly shown under "oilseeds and others".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1956-57 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area and the gross irrigated area are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tabacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crop are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, *i.e.*, calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word " factories " here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
