SECTION I

INTRODUCTION

INTRODUCTION

The territory, now known as district Nagaur, used to be a part of the former Jodhpur State. On the merger of the Jodhpur State into the United States of Greater Rajasthan in the year 1949, a separate district of Nagaur was formed which continues to date.

Location and Formation

2. District Nagaur lies between the parallels of 24°37′ and 26° north latitudes and 73°5′ and 75°22′ east longitudes. It is bounded on the north by Bikaner and Churu districts, on the south by Pali and Ajmer districts, on the east by Jaipur and Sikar districts on the west by Jodhpur district.

3. The area of the district as reported by the Surveyor General of India is 6,884 Sq. miles and according to village papers it is 6,821.5 Sq. miles or 17,667.7 Sq. Kms. The district covers 5.17% of the total area of the State and stands 6th in rank amongst the other districts of the State.

4. The district is composed of eight tehsils *viz*; Didwana, Nagaur, Nawa, Parbatsar, Merta, Ladnu, Jayal and Degana. The first five of these tehsils continue their names and forms ever since the formation of the district. Ladnu, Jayal and Degana tehsils were, however, created during the inter-censal period 1951–61. Ladnu was created by taking out 93 villages and one former Ladnu town–an area of 436.8 Sq. miles from Didwana tehsil, Jayal tehsil was constitued by taking out 113 villages having an area of 1,135.8 Sq. miles from Nagaur tehsil while Degana tehsil was formed out of 170 villages with an area of 732.9 Sq. miles from Merta tehsil.

Topography

5. Some parts of Nawa, Parbatsar and Merta tehsils are hilly which have some offshoots of the Aravallis. The hills in region around Makrana town provide good quality of marble in various shades which is famous throughout the country.

6. The only river that flows through the district is Luni. It starts from hills near Pushkar in Ajmer district and passes through Merta tehsil. There are a few streams in tehsil Parbatsar which flow in rainy season. There are salt lakes at Didwana and at Nawa.

7. The northern part of the district comprising Ladnu, Didwana, Nagaur and Jayal tehsils is sterile and sandy while the remaining portion of the district comprising Parbatsar, Nawa, Degana and Merta tehsils in the south is fertile where light loam type of soil is found. As the soil in the northern part of the district is rich in salt, it is used mostly for grazing and for cattle breeding.

8. The water level in the district is generally 200 feet below the surface. It differs from tehsil to tehsil and even place to place within the tehsil. In Merta tehsil water is found from 50 ft. to 60 ft. below. In Parbatsar tehsil the water level is between 100 ft. to 120 ft. below in its northern half 25 ft. to 40 ft. in its southern half and between 50 ft. to 70 ft. in its central part. In Nawa tehsil the water level varies from 20 ft. to 200 ft.

Climate

9. The overall climate of the district is dry and healthy. Tehsils Nawa and Parbatsar have extreme weather – very hot in summer and very cold in winter. The district lies in the belt having an average minimum temperature of 15°.0C and an average maximum temperature varying between 30°.0C to 32°.5C. The normal annual rainfall of the district is 31.93 cms. Generally the rainy season is from July to September.

Geology and Minerals

10. Various types of minerals *viz.* gypsum, marble, lime stone, sand stone, sodium sulphate, clay, tungsten-ore etc. are found in the district. The district is one of the chief producer of gypsum. The important mines of gypsum are located at Bhadwasi in Nagaur tehsil and at Kherat, Manglod etc. in Jayal tehsil. The district produced over 63 thousand tons of gypsum during the year 1958. As already stated the district produces good quality of marble which is quarried extensively in the Makrana region. There are quarries of lime stone at Mundwa in

Nagaur tehsil and at Gotan and some other places in Merta tehsil. Stones for building purposes are quarried at Khatu Khurd in Didwana tehsil, at Ladnu, Bankliya and Dujar in Ladnu tehsil and at Bhuni and Kuchaman town in Nawa tehsil.

11. Sodium sulphate is found in its natural form near Didwana salt lake. Most of this mineral is consumed by the various paper mills in the country. A scheme for establishing a paper plant in this area is now said to be under the consideration of the State Government. Good quality of clay is found at Khajwana in Nagaur tehsil, Indawar in Merta tehsil and at Nimbri in Degana tehsil. Tungsten ore is found at Rawat hills near Degana.

12. The district is a large producer of common salt. Nawa salt lake which is an extension of the well known Sambhar lake, is located in the district. Near Didwana town there is another salt lake. The salt produced here is considered to be of good quality.

Forest, Flora and Fauna

13. Practically the whole of the district is sandy and thus there is no good forest. According to village papers the forest area, reported in the district during 1960–61, is only about 2 thousand acres which is nearly 0.04% of the total geographical area. Only scattered trees and shrubs are found in the forest area. The common trees found in the district are Nim (Melia azadiracht), Babul (Acacia arabica), Khejra (Prosopis specigera), Pipal (Ficus religiosa), Siras (Albizzic lebbek) etc. The main shrubs are Aak (Calothropis procera and ' Pala ' (Beri leaves) which grow in abundance in the district. Moonja is also seen very common and its roots, and the twigs prepared from it, are used for making huts. Deer, hare, jackal, pig and wild cat constitute the fauna of the district.

General Administration

14. For the purposes of administration, the district is divided into four sub–divisions, eight tehsils and one sub–tehsil as mentioned below :–

Name of Sub–division	*Name of Tehsil*	*Name of Sub–Tehsil*
1 Nagaur	1 Nagaur	
	2 Jayal	
2 Merta	1 Merta	
	2 Degana	
3 Parbatsar	1 Parbatsar	1 Makrana
	2 Nawa	
4 Didwana	1 Didwana	
	2 Ladnu	

15. The Collector is the administrative chief of the district who is also the District Magistrate. Each Sub–division is under the charge of a Sub–divisional Magistrate who is vested with the 1st class Magisterial powers. Each tehsil is under the charge and supervision of a Tehsildar who is vested with IInd class or IIIrd class Magisterial powers, as the case may be, and the sub–tehsil is under the charge of a Naib–tehsildar with IIIrd class Magisterial powers. There is a District & Sessions Judge Court at Merta in addition to Civil Courts at Nagaur and Merta and Munsif Magistrates Courts at Didwana and Nawa. A Munsif Court also functions at Parbatsar.

16. With the advent of democratic decentralization, 11 Panchayat Samities have been formed out of which 9 are Community Development Blocks. The Panchayat Samities are guided by the Zila Parishad under the Chairmanship of the Pramukh and supervised by the Collector of the district who is also the District Development Officer. The Rajasthan Panchayat Samities and Zila Parishads Act, 1959, devolves on these Panchayat Samities the complete charge of the administration of the Block including the implementation of the Community Development programmes. For imparting the technical guidance to the villagers the Government has deputed its representative from various departments to the Block so that an all round progress may be achieved. The ultimate aim of the Government is to make these Panchayat Samities the sole agency of all developmental activities at the Block level.

17. There are sub–jails at Nagaur, Merta, Parbatsar and Didwana which are under the charge of respective

Sub-divisional Officers. The office of the Superintendent of Police is located at Nagaur and that of Deputy Superintendents of Police at Nagaur and Makrana. 23 Police Stations and 28 Police out-posts functioned in the district during the year 1960-61.

Land Use

18. The classification of the land use in the district during 1960-61 was as follows :-

		Percent
1	Forests	0.04
2	Land put to non-agricultural use	3.90
3	Barren and uncultivable land	5.17
4	Other uncultivated land excluding fallow land	3.31
5	Culturable waste	0.66
6	Fallow land	27.72
7	Net area sown	59.20
	Total	100.00
	Area sown more than once	0.25

Crop Pattern

19. Out of the total area sown under principal crops during 1960 61, 68.2% of the area was utilised for cereals, 24.9% for pulses, 6.8% for oilseeds and the rest of the area was used for growing other crops. Out of the total production of the principal crops in the district, 79.1% consisted of cereals, 17.3% of pulses, 1.0% of oilseeds and the rest was of other crops. The important crops of the district in order of production are bajra, Kharif-pulses, barley, wheat and jowar.

20. The district ranked second in the production of bajra, fourth in Kharif pulses and fifth in sesamum amongst the other districts of the State and contributed 11.9% of bajra, 9.5% of Kharif pulses and 5.0% of sesamum of the total production of the State during 1960-61.

Irrigation

21. Wells are the principal source of irrigation, the number of which during 1960-61 was about 8 thousand. The water from the wells is drawn out by means of 'Charas' and Persian wheel - locally called 'Rahat'.

22. About 50.6 thousand acres of land was under irrigation during 1960-61 out of which 90.7% was under food crops. A sum of Rs. 3.93 lakhs was spent on irrigation facilities in the district during the second five year plan period.

Animal Husbandry

23. The total livestock population in the district was over 1,388 thousand heads according to the livestock Census, 1961 as compared to around 1,735 thousand in 1956. Out of the total livestock, 41.1% were cattle, 28.6% sheep, 19.9% goats, 8.0% buffaloes and the rest comprised of horses, ponies, mules, donkeys, camels and pigs. The total poultry in the district was about 6.6 thousand out of which 99.3% were fowls and the rest were ducks and others.

24. There are veterinary hospitals located at Nagaur, Merta, Parbatsar, Ladnu, Makrana and Nawa and dispensaries at Didwana, Kuchaman, Jayal, Degana, Kuchera, Mundwa, Ren and Deh. There is a branch of Mass Immunisation Unit and a Government cattle breeding farm at Nagaur. An artificial insemination centre functions at Didwana under the scheme of Community Development and National Extension Service while a Key Village Scheme Centre is run at Nagaur. Besides 10 cattle breeding farms, 44 sheep breeding farms and 8 poultry farms are run by private agencies in the district. Sheep and Wool Extension Centres are run under I. C. A. R. Scheme at Nagaur, Merta, Ladnu, Kuchaman, Parbatsar, Merta Road, Degana and Mundwa. Such centres are also run at Ladnu and Didwana under Community Development Blocks. A sum of Rs. 2.47 lakhs was spent during the second five year plan period for the development of animal husbandry facilities in the district.

Agricultural Implements

25. During 1961, there were about 104 thousand ploughs, 47 thousand bullock-carts, 709 'Ghanies', 8 electric-pumps, 67 tractors, 34 sugarcane crushers and 51 oil engines in the district.

Agricultural Improvements

26. During the second five year plan a sum of

Rs. 21.87 lakhs was spent in the district on agriculture sector alone. About 16 thousand Mds. of improved seeds, 1 thousand ton of fertilizers, 10 thousand tons of manure and over 600 agricultural implements were distributed during the plan period under the schemes carried out by the Agriculture Department. Around 12 thousand manure pits were dug and 8 thousand acres of land was brought under the plough. 476 new wells were constructed and 504 wells were deepened with necessary repairs and improvements.

Irrigation Development

27. No major or medium irrigation work was taken up in the district during the first two plans. A minor irrigation work i.e. Harsore Dam was, however, taken up and completed during the first five year plan. Six more minor irrigation works, *viz*; Bherunda project, Peerji-ka-Naka, Poonlotsar and the construction of tanks at Harsolao, Bhakhari and Peepliya, were sanctioned by the State Government in the second five year plan but only one was completed during the period.

Industries and Labour

28. By the end of 1961, there were 24 registered factories in the district employing around 800 persons. The largest factory of the district is Associated Marble Industries at Makrana which provided employment to 187 persons during the year under review.

29. There are many small scale industries relating to brassware and hardware in Nagaur town. 'Multani Luhars' of the town prepare the tools specially those which are required by the goldsmiths. Nearly 150 families are engaged in this occupation. Mohammedan families of the town are also popular for dyeing and printing of ' Chundries' and ' Saries '. A number of parts used in the sewing machine are made in the town. Merta is famous for its ivory articles. Clay toys, handloom cloth, blankets, 'Kheslas', and wooden articles are prepared in rural areas of Merta tehsil. Khas is also grown which is utilised for making articles such as fans and purses.

30. An Emery Stone Manufacturing Company started functioning at Kuchaman road in 1957. It provided employment to 40 persons in 1961. It maufactures emery stone 'Chakkies' (handmills) and various types of tools utilised for domestic uses. During 1960-61, the company produced over 600 handmills valued at Rs. 19 thousand approximately. The emery stone chakkies produced by the company are also exported to foreign countries.

31. There is a flourishing industry at Makrana town where various units are engaged in producing marble slabs, tiles, chips, powder and handicrafts. Besides, carpentary, cotton ginning, dyeing and printing, goldsmithy, black-smithy, snuff making, wool weaving, stone crushing, 'Biri', shoe and bracelet making are other industries of urban areas while industries such as pottery, oilseed pressing, weaving, tannery, brick and rope making are common in rural areas of the district. An Industrial Workshop is run at Nagaur since 1958 where training to the people is imparted in different trades specially in black-smithy tools. Training facilities in other trades such as handloom weaving, leather tanning, carpentary etc. are also provided by the Government for which centres are run at various places in the district.

32. Since April, 1956, a branch of the State Industries Department has also been functioning in the district which helps in procuring raw material for industries and provides loans to individual parties and co-operative societies. A sum of Rs. 6.76 lakhs was spent on industrial development during the second five year plan comprising of loans to co-operative societies, subsidies, rebates etc.

33. There is a labour welfare centre at Makrana which provides facilities of reading room, library and recreational activities including indoor and outdoor games.

34. The district has an employment exchange located at Nagaur which was started in the year 1960. During 1961, the total number of registrations in the district was over three thousand.

Trade Unions

35. Two trade unions are functioning in the district *viz*; Gypsum Mine Workers Union at Bhadwasi and Nagaur Zila Municipal Karamchari Sangh at Nawa (Kuchaman Road).

Power

36. There was no state owned power house in the district till 1960 and Kuchaman and Ladnu were then receiving electricity from private under-takings. Under the scheme of installation of new small power stations, three state owned power houses were started in the district at Nagaur, Didwana and Kuchaman City in the year 1960 with the installed capacity of 250 Kw., 200 Kw. and 35 Kw. respectively. Merta town is also now electrified under the administration of the Municipal Board, Merta. Rs. 30.37 lakhs were spent on power in the district during the second five year plan.

Trade and Commerce

37. The main articles of internal trade consist of handloom cloth, oil, ghee, grain, oilseeds and chillies etc. The articles that are exported out of this district are grain, cotton, salt, chillies, ivory articles, wool, animal bones, oil and marble articles while cloth, sugar, spices, Gur, ivory, iron articles, wood, soap, woollen-cloth, dry fruits, medicines and other general merchandise goods are imported into the district.

38. Merta is the main mandi for grain, ivory articles and handloom cloth. Other mandies in the district are Parbatsar for moong, bajra, moth and til (linseed), Didwana and Nawa for salt and Makrana for marble articles. Besides, fairs held in honour of deities Parasnathji and Charbhujaji provide occasions for commercial transactions in shoes, leather, handloom clothes and dry-fruits and other articles for daily use. Facilities of local markets also exist in certain villages which have been shown in the Primary Census Abstract elsewhere in this book.

39. The State Bank of Bikaner has got its branches at Nagaur, Didwana, Ladnu, Merta, Degana and Makrana. Jodhpur Commercial Bank Ltd., has also got its branches at Nagaur, Merta, and Kuchaman while Didwana Industrial Bank Ltd., has got its office at Didwana.

40. There were 61 shops dealing in country liquor and 28 in hemp drugs at the various places in the district during 1960-61.

41. There are three permanent and three temporary Cinema houses in the district with a seating capacity of about 2.7 thousand persons.

Education

42. During 1951 there was one Intermediate College in addition to 6 High Schools, 21 Middle Schools and 125 Primary Schools including 12 Girl Schools in the district. During the inter censal period the number increased to 2 Colleges, 20 High/Higher Secondary Schools, 59 Middle Schools and 665 Primary Schools. Besides, 57 Junior Basic Schools, 2 Professional Schools and 128 Schools for special education were functioning in the district. The total number of students in all type of institutions during 1960-61 was around 61 thousand. A sum of Rs. 32.85 lakhs was spent on this head during the second five year plan in the district.

Medical and Public Health

43. During 1950-51, there were 9 allopathic hospitals and dispensaries with 60 beds. By the end of 1960, there were 20 allopathic hospitals and dispensaries including aid posts with 124 beds and 5 primary health centres with 24 beds.

44. There are maternity and child welfare centres at Nagaur, Merta, Didwana, Makrana and Ladnu. Special maternity facilities have also been provided in the Govt. Hospital at Nagaur where laboratory and X-Ray facilities are also provided.

45. There are four family planning centres. The one at Nagaur is under Government control and the remaining three at Ladnu, Didwana and Molasar are controlled by the Panchayat Samities. Out of 15 small-pox vaccination centres in the district, 4 are controlled by the Govt. and the rest are under the control of the Panchayat Samities. Dental facilities are provided in Government Hospital, Nagaur.

46. The outdoor and indoor patients treated in Government medical institutions of the district in the year 1960 were around 377 thousand and 2 thousand respectively. A sum of Rs. 5.15 lakhs and Rs. 9 thousand was spent on Medical & Public Health and Ayurvedic facilities in the district respectively during the second plan period.

Drinking Water Facilities

47. During the second five year plan period, an urban

water supply scheme was started for Nagaur town with an estimated cost of Rs. 10 lakhs over which Rs. 1.09 lakhs was spent during the period and the work was carried over to the third five year plan. Besides, various rural water supply schemes are under the control of Panchayat Samities. Water from tanks is also utilised for drinking purposes at various places in the district.

Housing

48. Low Income Group Housing Scheme was started in the district during the first five year plan. A sum of Rs. 25 thousand was disbursed under this scheme during 1955–56 and during the second five year plan a further sum of Rs. 2.64 lakhs was disbursed to the public under L.I.G.H and another Rs. 16 thousand under M.I.G.H Schemes for the construction of houses as a result of which 188 houses were constructed under L.I.G.H. while the work on 83 houses under L.I.G.H. and one under M.I.G H. Schemes was in progress.

Transport and Communication

49. The district had only 458 miles of roads in 1950–51 which increased to 940 miles by the end of March, 1961. 80.6% of the roads were gravelled, 16.9% painted and metalled and the rest were fair weather and dressed-up tracks. 9 road works were completed and a sum of Rs. 36.69 lakhs was spent on road development in the district during the second five year plan.

50. There were 354 motor vehicles on the road in 1954 which increased to 497 by the end of 1961.

51. The district is connected mainly by Metre Gauge of the Northern Railway. Three main lines and two branch lines of this railway pass through the district. A line connects Phulera with Merta Road and is the biggest line of the district. Another line connects Degana with Ratangarh. The third line connects Merta Road to Bikaner and passes through Nagaur town. A branch line connects Merta Road with Merta City while the other connects Makrana town with Parbatsar. All the important places of the district are connected with bus routes. There were 197 post offices, 17 telegraph offices, 2 telephone exchanges and 9 public call offices in the district during 1960–61.

Local Bodies and Co-operation

52. There are Municipal Boards in the district at Ladnu, Didwana, Nagaur, Makrana, Nawa, Merta, Kuchaman and Parbatsar. The main sources of revenue of the municipalities are rent of shops, octroi duty on imports and exports, vehicle tax, house tax and water tax etc.

irs and Festivals

60. Some of the important fairs of the district are follows

(i) Tejaji Cattle Fair, Parbatsar :—

This Cattle fair is held at Parbatsar and is organised by the Animal Husbandry Dapartment in the month of Bhadra Pada (August-September). About 50,000 people assemble in the fair from the various districts of the State as well as from other neighbouring States of the Punjab, U. P. and Gujarat for the worship of Tejaji and for the purchase and sale of Cattle. Nagauri breed of bulls is mainly brought in the fair which is considered as one of the best breeds in the country. In the cattle fair of 1958-59, about 49 thousand animals were brought for trade.

(ii) Ramdeoji Cattle Fair :—

This fair is also organised by the Animal Husbandry Department at Nagaur in the month of Magha (Jan.-Feb.) every year. About 50,000 people assemble in the fair from far and near. The trade in the fair is mostly done in Nagauri bullocks and cows. During the cattle fair held in 1958-59, around 83 thousand animals were brought to this fair for transaction out of which over 34 thousand were sold. The fair of Ramdeoji is also held at Baswani in Nagaur tehsil.

(iii) Merta Cattle Fair :—

A Cattle fair is held at Merta which too is organised by the Animal Husbandry Department during the begin- ing of the month of Vaisakha (April-May). The place is at a distance of one mile from the Merta railway station. Nearly 20, 000 traders visit this fair every year for the purchase and sale of cattle. During the cattle fair held in 1958-59, about 28 thousand animals were brought for trade.

(iv) Parasnathji-ka-Mela :—

A beautiful temple of Parasnath has been construc- ted at Merta Road near the railway station. A fair is held on Bhadra Pada Sudi 10 (Aug.-Sept.) every year where people, specially Jains, congregate in order to pay their homage to the deity of Shri Parasnath.

(v) Charbhujaji-ka-Mela :—

This fair is held at Merta in the month of Shravana

(July-Aug.) every year. There is a temple dedicated to deity Charbhujaji (Lord Krishna). About 10,000 people assemble in the fair who pay their homage to the deity and sing songs of Mirabai whose statue in white marble is also installed in the temple.

(vi) Rolpeer Sahib-ka-Mela :—

A fair is held at Rol in Jayal tehsil in honour of Rolpeer Sahib on Kartika Sudi 1 (Oct.-Nov.) every year. People of Mohemmadan community assemble here to worship the peer. At this occasion the personal belongings of the great peer, which have been preserved in mosque, are exposed for the visitors.

61. The main festivals amongst Hindus are Deewali, Dashera, Holi, Raksha-Bandhan, Sheetla Ashtami and Basant Panchami while Muslims observe Idulfitre, Idul Zuha, Moharrum and Barawafat.

Places of Historical & Archaeological Importance.

62. Following are the places of interest in the district:-

Nagaur :—

Nagaur is the main town of the district having a population of over 24 thousand, which is 20.1% of the district's urban population. It is an ancient and historical town having various places of historical interest. Among them mention may be made of the fort situated in the heart af the town, Sufi-Tarkingis Dargah, the cenotaph of Rao Amarsingh, Gyani Talab and the temples of Barmayan and Bansiwala. The cenotaph of Appaji Scindhia is also located near the town. At some places there are beautiful paintings and stone inscriptions.

Merta :—

Merta town has a population about 13 thousand persons and covers 10.8% of the district's urban population. It is a Sub-divisional head-quarter of the district. There is a famous temple of Charbhujaji (Lord Krishna) in the town. Besides, other places worth visiting are a mosque, Malkot fort and the temple of Barwasen Mata.

Parbatsar :—

Parbatsar is the smallest town of the district having a population of a little over 5 thousand persons. Gingoli-ki-Ghati at a distance of 3 miles from the town and the temples of Tejaji & Kinseria Mata are the places of interest.

63. Apart from the places mentioned above, there are other historical places *viz*; a mosque at Basni village and Lakhola tank at Mundwa village in Nagaur tehsil, Dadhi Mata's temple at Goth Manglod village and Jama Masjid at Kathoti village in Jayal tehsil. Some forts considered important from archaeological point of view are located at Maroth, Kuchaman, Shyamgarh, Mithri, Palri, Panchwa and Sargoth in Nawa tehsil.

Electoral Participation and Preferences

64. In the first general elections there were 8 constituencies in the district with a voting population of about 392 thousand persons and 8 seats in the State Vidhan Sabha. 54.7 percent voters exercised their right of franchise. The highest percentage of polling was 58.9% recorded in Nawa constituency, the lowest was in Nagaur East where only 47.2% votes were polled. 4 seats were captured by the Congress while the rest were taken by the Ram Rajya Parishad. For elections to the one seat allotted to the district in the House of the People, in which some portion of Pali district was also combined, 51.9% voters came to vote. The seat was won by an independent candidate securing 47% of the popular votes.

65. During the second general elections in the year 1957, there were 7 constituencies in the district with a voting population of over 450 thousand persons and 8 seats in the State Vidhan Sabha. 50.1% voters (57.8% of men and 41.5% of women) exercised their right of franchise. The highest percentage of turn-out was 59.6% in Degana constituency while the lowest was in Jayal constituency where only 44.4% voters came to vote. All the eight seats were captured by the Congress. One seat was allotted to the district in the House of the People for which the electorate constituted around 446 thousand persons. 49.6% votes were polled and the seat was won by the Congress candidate securing 64.8% of the total votes.

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract furnishes the population figures for 1961 Census and is presented in three parts viz. District, Rural and Urban Primary Census Abstracts. These abstracts contain the data in respect of area, number of occupied residential houses and households, total population and its breakup by sex, literacy, Scheduled Castes and Scheduled Tribes, workers and non-workers. The workers have further been classified into following nine industrial categories:—

I As Cultivator,
II As Agricultural Labourer,
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities,
IV At Household Industry,
V In Manufacturing other than Household Industry,
VI In Construction,
VII In Trade and Commerce,
VIII In Transport, Storage and Communications and
IX In Other Services.

2. The District Primary Census Abstract furnishes the data for the district total, rural and urban areas, each rural tehsil and for each town separately. The Rural Primary Census Abstract presents the data for the villages while Urban Primary Census Abstract furnishes information for the municipal wards of all the towns in the district.

3. A Revenue Mauza (including its hamlets) is treated as a village while a town is a place having either a Municipality or Cantonment or satisfying the following factors:—

(a) having a minimum population of 5,000 and
(b) having three-fourth of its male adult population engaged in non-agricultural pursuits, or
(c) having a density of approximately 1,000 persons per sq. mile.

Hamlets falling into the revenue areas of the towns but not administered by the municipality are treated as the non-municipal area of the town. The villages in the Rural Primary Census Abstract are presented tehsilwise and within a tehsil in order of their Census location code numbers.

4. In the Urban Primary Census Abstract, the data has been presented for each municipal ward of the towns. The blockwise figures for towns could not be presented here for want of space. This information, however, is available in the office of the Superintendent, Census Operations, Rajasthan. The data for non-municipal areas attached to a town has been shown just after the wards while for special charges, the figures have generally been included in the respective wards.

5. A special column (2a) in the Rural Primary Census Abstract has been provided for showing some of the basic amenities which existed in the villages. These amenities have been shown by means of symbols as under:-

P—Primary School
M—Middle School
H—High/Higher Secondary School
C—College
D—Dispensary
Hos—Hospital
Tmw—Trained Midwife
V—Veterinary Hospital/Dispensary
Pw—Pucca well
Kw—Kutcha well
Tk—Tank
B—Baori (stepped well)
Rly—Railway Station
Po—Post Office
To—Telegraph Office
Lm—Local Market

6. Village marked with an asterisk (*) indicates the location of a Gram Panchayat.

7. The area figures shown in column (3) of the Rural Primary Census Abstract are collected from the Revenue Authorities while this column of the Urban Primary Census Abstract has been left blank as area figures for the wards are not available.

8. Column (4) of the Abstract includes houses used as dwellings or partly as dwellings.

9. Column (5) shows the number of households. A "household" has been defined as a group of persons who commonly live together in the same house and take their meals from a common kitchen. A servant, friend or a guest (related or unrelated) residing and eating with the household during the census period has been treated as a member of the household. On the other hand, a son or a daughter residing in a hostel is not treated as a member of the household.

10. Columns (6) to (8) of the Abstract show the total population and its sex-wise breakup. This also includes houseless and institutional population. Houseless person has been defined as (i) a person who might be doing domestic service or some other work with one or more households but who does not reside in any house and sleeps in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, etc. or residing without any such huts just on the open ground; and (iii) beggar, vagrant, tramp, sadhu, fakir, etc. who is found in the foot-paths, streets, in places like parks, gardens, railway yards, etc. Institutional population includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

11. Columns (9) to (12) of the Abstract show the population of Scheduled Castes and Scheduled Tribes and their sex-wise breakups. The further breakups of individual Scheduled Castes/Tribes are given in Table SCT—I.

12. Columns (13) & (14) of the Abstract give the number of literate and educated persons. A "literate" is defined as a person who knows both reading and writing. This also includes the persons having higher education. Detailed information on educational levels has been given in Table B—III and C—III.

13. Columns (15) & (16) give the total number of male and female workers. A person is classified as "worker" if in case of seasonal work like cultivation, livestock, dairying, household industry, etc. he has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household . A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined, has been treated as non-worker. "Work" includes not only actual work but effective supervision and direction of work also.

Persons under training as apprentices with or without stipend or wages are regarded as workers. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, or any such work, she has been treated as a worker. Similarly persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work, are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

The population classified as workers here is the economically active population including family workers but not including unemployed persons.

14. Columns (17) to (34) furnishes the sex-wise distribution of workers into nine industrial categories. The explanations for these categories are given below:—

Category I

This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work in land are also included persons who are engaged in supervision or direction of cultivation. The term 'cultivation' involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations.

Category II

All other persons working on land as labourers on wages without exercising any supervision or direction and without holding any right upon the land are classified as agricultural labourers and are included in this category.

Category III

Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

A "Household Industry" is an industry conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory but may use machinery and employ power like steam engine or oil engine or electricity to drive the machinery. Thus, in a rural area, the household industry can be located either at home or within the village but in urban area, the household industry or at least the major part of its work must be located at home. A household industry relates to production, processing, servicing or repairing and includes making and selling of goods but should not be confined simply to buying and selling. It does not include profession such as pleader, doctor, barber, waterman or astrologer, etc. Persons working in other person's household industry as paid employees, are also treated as workers in household industry.

Category V

'Manufacturing' includes all types of production, processing, servicing or repairing of goods which does not

include production or processing under category IV.

Category VI

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, water-ways, reservoirs, etc.

Category VII

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stock and shares, insurance, money lending banking, etc.

Category VIII

This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraph, telephones, wireless signalling, information and broadcasting are also included in this category.

Category IX

This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, recreation services, etc.

15. Columns (35) & (36) give the total number of male and female non-workers. The following persons have been classified as non-workers:—

1. Full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.

2. Person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.

3. Dependant, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.

4. Retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.

5. Beggar, vagrant or independent woman without indication of source of income and others of unspecified source of income.

6. Convict in Jail (an under-trial prisoner has been shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.

7. Person who has not been employed before but is seeking employment for the first time.

8. Person employed before but now out of employment and seeking employment.

OTHER CENSUS TABLES

GENERAL POPULATION TABLES

(Note on A-Series)

There are four Tables and five Appendices in this series. These tables, being the basic population tables, furnish information about area, sexwise population and its variation during sixty years, classification of villages and towns by population and the trends of urbanisation in the district.

Table A-I

2. This is the basic population table showing area, density, number of villages and towns, occupied residential houses and population by persons, males and females. The data has been presented for the district as well as for each tehsil for total, rural and urban areas separately. The town figures have been shown immediately after the entries of the tehsil in which they are situated. The abbreviation just after the name of the town has been used to denote that the particular town has a Municipality or a Cantonment.

3. It may be noted that in the previous censuses the density of population and other urban break-ups upto the town level were not mentioned in this table which have been shown separately now for 1961 Census besides furnishing the number of inhabited and uninhabited villages in each tehsil.

4. The area figures both for rural and municipal towns have been obtained from the State revenue authorities. Though the area figures have been collected originally in acres yet these figures have been shown in Sq. miles and Sq. Km. in columns 3 (a) and 3 (b) respectively after converting them into the respective units. Further, the area figures have been given upto one decimal place in case of the district as well as for each tehsil but such presentation is made upto two decimal places in case of towns.

5. The density of persons has been worked out according to the area shown under column 3 (a) and has been presented separately for the district and for each of the tehsils and towns under column 4.

6. A village and a town has already been defined in para 3 of the note on Primary Census Abstract.

7. For the purpose of 1961 Census, a 'House' is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school etc., giving out on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. 'Occupied residential houses' are those houses which are used wholly or partly for the purpose of residence by one or more households.

8. In addition to this main table, there are three appendices which were not prepared in the last censuses.

Appendix I

9. This appendix is helpful in finding out the growth of the district to the present area since the last census. The appendix shows the territorial changes that have taken place during the last decade. A brief description of gain and loss of territory in those tehsils which had changes in area during the period is also shown in this appendix. A list of such transferred areas has been given in the annexure to this appendix.

Appendix II

10. One of the criteria for a place to be declared as town is that it should normally have a population of 5,000 and above. For various reasons, several places with a population of 5,000 and over have not been recognised as towns. This appendix gives the tehsilwise number of such places with their population. Further, it also shows the percentage contribution of total rural population of the district of such places.

Appendix III

11. This appendix shows the sexwise figures for houseless and institutional population for the district and each tehsil for total, rural and urban areas separately. Houseless and Institutional population has already been defined in para 10 of the note on Primary Census Abstract.

Table A-II

12. This table compares population figures of the district as ascertained at the 1961 Census with the corresponding figures for the six previous censuses. The

figures presented for the six previous censuses in the table, have been adjusted after taking into consideration the territorial changes taken place in the district so as to afford a correct basis for comparison. This is an important table as it gives the growth of population from decade to decade. It further provides a basis for estimating the population especially in the absence of reliable data for vital statistics. The main change in this table over 1951 Census is that the percentage variation has also been mentioned from decade to decade.

13. The appendix attached to this table shows the population for the district as well as for each tehsil according to their territorial jurisdiction in 1951 besides furnishing the changes in area and the population involved in those changes that have taken place during the last decade. The details of transfers of areas and population in every case have been given in the footnote separately.

Table A-III

14. This table furnishes the sexwise total rural population together with the number of inhabited villages for the district as well as for each tehsil arranged into seven population size groups *viz.*, less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above.

15. The main changes in this table over 1951 Census are (i) the group less than 500 has now been split up into two groups *viz.*, less than 200 and 200-499 and (ii) it relates only to villages while in 1951 Census it related to villages and towns both.

Table A-IV

16. This table shows the growth of each town in the district since 1901 together with its sexwise population. It further furnishes the information regarding decade variation in population and its percentage. For the purpose of this table all the towns have been classified into the following six classes according to population:-

Class I	1,00,000 and above
Class II	50,000 — 99,999
Class III	20,000 — 49,999
Class IV	10,000 — 19,999
Class V	5,000 — 9,999
Class VI	Less than 5,000

17. The district totals for a class have been given followed by the various towns in that particular Class. Column No. 2 of the table presents the name of the town and just under it the area of that town has been given both in Sq. miles and sq. Km. The status of the town is separately shown in column No. 3 in an abbreviated form.

18. The main object of this table as indicated above is to show the growth of towns as towns and not how certain places have been converted into towns from villages as such the figures against towns have been shown for those decades only in which they were recognised as towns. The district population for all classes during the previous decades has been arrived at after adding the population of those places which were treated as towns in the corresponding decade but now declassified. As such if a town had not been treated as town in all the previous censuses, it is indicated as declassified in those particular censuses. Towns treated for the first time in 1951 Census have been asterisked*.

19. The change in this table over 1951 Census is that the areas of towns as well as the percentage of decade variations of total population of the towns have been additionally shown in the present census.

20. The appendix to this table shows the area and population of towns of 1951 Census which have been declassified in the present census. Such appendix was not prepared in the previous censuses.

21. A separate volume—Part II-A incorporating the General Population Tables for the State and the districts have been issued in which the concepts used have also been discussed.

Note :-

1 The Sq. Km. and density figures of urban areas of Tehsil/District are worked out using the area figures corrected upto 2 places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Tehsil/District totals tally.

2 The following abbreviations have been used for the status of a town e.g.

(M)= Municipality

@ = Entirely Rural

Note:- The district totals for each class of town relating to the years 1901 to 1951 do not correspond with the totals that would be arrived at by adding of the population figures of various towns relating to each census year. This is because that the district figures relating to the past census years also contained the population of those places which were classified as towns in the various censuses.

Town treated as such for the first time in 1961 is printed in italics. M = Municipality.

ECONOMIC TABLES

(Note on B-Series)

In 1951 Census Reports, the population was classified on the concept of 'dependency' which has been changed to that of 'workers' and 'non-workers' at the current Census. The change in the concept will be helpful in finding out the realistic picture of the economic activity of those important sections of household workers who otherwise have been left out of account in the past censuses.

2. This series has been divided into two parts *viz.*, (i) General Economic Tables and (ii) Household Economic Tables.

(i) GENERAL ECONOMIC TABLES

3. There are 9 General Economic Tables in this series. The first 3 tables distribute the working and non-working population by economic activity correlated with sex, age and educational levels. A more elaborate classification of workers by industry according to the Standard Industrial Classification is presented in Table B-IV while it has been shown by occupation in Table B-V. Table B-VI provides information about those occupations of National Classification which attract educated personnel in urban areas. Another Table B-VII shows the classification of workers by secondary work and the last two tables distribute the non-workers by sex, age and eight broad classes according to the activities pursued by them.

Table B-I

4. This is a basic economic table prepared on the basis of Primary Census Abstract. In this table the population has been divided into nine industrial categories of workers based on Indian Standard Industrial Classification and a separate category of non-workers (detailed classification of which are available in Table B-IX in Part II-B (ii) of State Census Report) further classified into sex and broad age-groups *viz.* 0-14, 15-34, 35-59 and 60 +. The classification of workers and non-workers by specific age-groups, is a special feature of 1961 Census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work *viz.*, children, young persons, middle aged and elderly persons. Detailed classification of non-workers is, however, given in Table B-IX.

5. This table presents data separately for total, rural and urban population of the district while those for tehsils for rural areas only. Another Table B-II showing such information for each town is not reproduced in this book and has been given in Part II-B (i) of State Census Report.

Table B-III

6. This table has been compiled into two parts. Part A deals with urban population of the district classified into nine industrial categories of workers and a separate category of non-workers cross tabulated by literacy and various educational levels. Part B refers to rural population of the district as well as for each tehsil where educational levels have been confined only to two categories *viz.*, Primary or Junior Basic and Matriculation and above. It is an important table indicating employment of persons of different educational standards amongst the various categories of workers. The educational qualifications of available man-power can be assessed with the help of this table.

Table B-IV

7. This table has been presented in three parts. Part A deals with the industrial classification of worker of persons at work at household industry separately for total, rural and urban parts of the district, showing the figures for divisions and major groups of Indian Standard Industrial Classification. Divisionwise figures for each tehsil in case of its rural areas are also shown.

8. Part B of this table provides the data regarding industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service for total and urban areas of the district by divisions and major groups.

9. In Part C of this table the data has been furnished for industrial classification by sex and divisions, major and minor groups of persons at work other than cultivation for total and urban areas of the district. Such data for rural part of each tehsil is also presented in the supplementry table to B-IV Part-C by divisions only.

10. This table is quite important as it furnishes employment position in respect of various sectors of economy not only indicating the class of the workers *viz.*, employer, employee, single worker, family worker but also by different branches of industry according to divisions and major groups is Parts A and B and also by minor groups of Indian Standard Industrial Classification in Part C.

11. As the information included in Part C of this table is quite voluminous, the minor groups having figures less than 1% of the total workers of the respective division (less than 0.5% in case of division 2 & 3) have been excluded and relegated to the Appendix attached to this part of the table.

12. The Standard Industrial Classification, reproduced as an appendix at the end of note on this series describes in detail the various codes used for divisions, major and minor groups.

Table B-V

13. This is a new table and has been compiled for total and urban population by sex in order to provide information regarding occupational classification in the district engaged in production other than cultivation, further classified into divisions and groups on the basis of the National Classification of Occupations. Under each group the detailed occupational families are shown. Families having less than 1% of workers of the respective division (less than 0.5% in case of families under division 7-8) are not given in this table but are shown in an appendix attached at the end of this table. A fly leaf showing appropriate industrial category is also given in place of industrial category appearing in the table due to insufficient description given in the enumeration slip for industry or coding mistake. The occupational classification of persons engaged in non-agricultural pursuits has been further detailed according to various categories of workers. The categories of workers are same as adopted for Primary Census Abstract.

14. In this table cross tabulation of industry and occupation has been made for the first time while such information was combined in the previous censuses.

Table B-VI

15. This is a new table prepared for the first time in 1961 Census and provides information about those occupations which attract educated personnel. It has been prepared only for urban areas of the district upto divisional level of the National Classification of Occupations. The workers under each occupational division have been classified by broad age-groups *viz.*, 0-14, 15-34, 35-59 and 60 and above. The age-groups have been further classified according to educational levels as adopted in Economic Table B-III Part A. However, the figures for total workers under each occupational division have been provided for total only and not for different age-groups. It may be noted that total workers for each occupational division in this table corresponds to the total workers of urban areas in Table B-V.

Table B-VII

16. This table has been compiled into two parts. Part A presents persons working principally (i) as cultivators (ii) as agricultural labourers or (iii) at household industry classified by sex and by the nature of thire secondary work (i) at household industry (ii) as cultivator or (iii) as agricultural labourer. Such data has been presented in this part by divisions and major groups separately for the total, rural and urban parts of the district and by divisions only in case of rural part of each tehsil.

17. In case a worker is engaged in two or more kinds of work, the work consuming the larger portion of time has been treated his principal work while another consuming larger portion of his time considered his secondary work.

18. Part B of this table presents the industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry. Such data has been presented in this part of the table by principal work and additional work based on divisions and major groups for the district as a whole while it has been shown by divisions only in case of each tehsil for its rural areas.

Table B-VIII

19. This is a new table prepared for the first time in the current Census. This table presents the distribution of unemployed persons aged 15 andp above by sex and educational levels. It has been comiled into two parts. Part A relates to urban areas and is presented for the district as a whole. Part B relates to rural areas and is presented upto tehsil level.

20. The number of unemployed in Part A of this table have been further split up by (i) persons seeking employment for the first time and (ii) persons employed before but now out of employment and seeking work. The age-groups in the first case are 15-19, 20-24, 25-29, 30-34 and 35+ which are modified in the second case as 15-19, 20-24, 25-34, 35-44, 45-59 and 60+.

21. The break-up of educational levels is much elaborate in Part A which is the same as given in Table B-III Part A while such educational levels are confined only to (i) Primary or Junior Basic and (ii) Matriculation and above, in Part B of this Table.

Table B-IX

22. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers based on the recommendation of the United Nations Organisation. In this table data has been shown for total, rural and urban areas of the district separately and upto tehsil level for rural areas only. Such information on the non-working population had never been compiled before.

(ii) HOUSEHOLD ECONOMIC TABLES

23. There are 8 Household Economic Tables in this series compiled in the current Census which is a first attempt for collecting economic data on the basis of households in addition to what is collected for each individual. In a predominantly agricultural State where most of the population is in rural areas and where much of the goods produced are consumed by the population itself, collection of information purely on the

basis of individuals tends to go slightly out of focus unless such information is supplemented by information on economic activities of the household as an entity. A decision was, therefore, taken that the information relating to the economic activities of the majority of households *viz.*, cultivation activities and household industry should be collected at the current Census.

24. A household Schedule was used at the Census 1961 for this purpose. In the Part I of this Schedule, information on the extent of land cultivated by the household, either owned or held from Government or held from private persons or institutions for payment in money, kind or share, and extent of land given to private persons for cultivation for payment in money, kind or share was collected. Besides, nature of household industry conducted by the household and the duration of the industry in a year alongwith number of family workers and hired workers engaged in cultivation or household industry or in both was also collected.

25. All these tables have been prepared on the basis of 20% sample of households.

Table B–X

26. This table is prepared on a 20% sample of households and is presented for the district total, rural and urban areas separately and upto tehsil level for rural areas only. The sample households have been classified into four categories *viz.*, (i) households engaged neither in Cultivation nor Household Industry, (ii) households engaged in Cultivation only, (iii) households engaged in Household Industry only and (iv) households engaged both in Cultivation and Household Industry. Thus, the table divides all the households in three important sectors of economic activity.

27. Cultivation includes ownership, tenancy cultivation and agricultural labour. The Household Industry relates to production, processing, servicing or repairing and includes making and selling of goods.

Table B-XI

28. This table presents data for the district total, rural and urban areas separately and upto tehsil level for rural areas only. In this table a more detailed examination of the cultivating households, which have been separated in the previous table, has been made. Such households have been classified according to the size of land cultivated and cross tabulated by the interest in land cultivated. The sizes of land in acres are given as less than 1, 1.0-2.4, 2.5-4.9, 5.0-7.4, 7.5-9.9, 10.0-12.4, 12.5-14.9, 15.0-29.9, 30.0–49.9, 50+ and unspecified.

29. The interest in land cultivated has been classified into the following three categories :—

(a) entirely owned or held from Government,

(b) entirely held from private persons or institutions for payment in money, kind or share, and

(c) partly held from Government and partly from private persons for payment in money, kind or share.

30. Abbreviations (a), (b) and (c) have been used in place of legends for interest in land cultivated under column 1 of the table and the same have been spelt out at the bottom of the table.

Table B–XII

31. In this table the data has been shown for the district total, rural and urban areas separately and also up to tehsil level for rural areas only. The table will facilitate a further study of households which are engaged only in cultivation, as each household having a particular size of holding mentioned in Table B-XI has been cross tabulated with reference to the number of persons working in cultivation. The holding has been grouped into the following size ranges (in acres); less than 1, 1.0–2.4, 2.5–4.9, 5.0–7.4, 7.5–9.9, 10.0–12.4, 12.5–14.9, 15.0–29.9, 30.0–49.9 and 50+ and unspecified.

32. In case of household where more than one person is working, the number of family workers and hired workers have been separated. Family workers have also been separately tabulated by sex.

Table B-XIII

33. This table is presented separately for rural and urban areas of the district. The table shows the distribution of sample households engaged both in Cultivation and Household Industry classified by size of land cultivated and by size of Household Industry. The Household Industries have been classified according to the code numbers of divisions 0, 1, 2 & 3 and their major groups of Indian Standard Industrial Classification (for detailed description see Appendix at the end of the note on this series). It throws light on Household Industries which are carried on as an ancillary to cultivation in different parts of the district.

Table B–XIV

34. In this table the data has been presented for the total, rural and urban households separately for the district and relates to households engaged only in Household Industry. The table has been prepared in two parts:—

Part A:—It relates to households classified by major groups of principal Household Industry and number of persons engaged in each, grouped under 1, 2, 3–5, 6–10 and more than 10 persons. The Household Industries

have been classified according to the code number of divisions 0, 1, 2 & 3 and their major groups of Indian Standard Industrial Classification (for detailed description of code numbers see Appendix at the end of the note on this series).

Part B:—It relates to households classified by minor groups of principal Household Industry. In cases where there are more than one Household Industry under a minor group, sub-minor group numbers in four digits have been given.

Table B-XV

35. This table has been prepared for households engaged both in Cultivation and Household Industry. The data has been shown separately for total, rural and urban areas of the district. Tehsilwise break-ups for rural areas only could not be given here due to short of space, however, the same is available in Part III of State Census Report. In this table, an analysis has been made of persons working in these households with reference to size of holding. In cases where more than one person is employed, the number of family workers and hired workers are separately given. Similar data in respect of households engaged in Cultivation only has already been given in Table B-XII. A comparison between this table and Table B-XII will show how the combination of Household Industry with Cultivation effects the employment position. This table helps to establish a co-relation between the Household Industry and the scale of Cultivation.

Table B-XVI

36. This table is confined only to Household Industry and the data has been presented separately for the district total, rural and urban areas. The data in respect of Households engaged in Household Industry only or both in Household Industry and Cultivation are given separately. Household Industry is classified according to period of working of the industry grouped under 1–3 months, 4–6 months, 7–9 months and 10 months to one year, and under each category number of households, number of family workers and number of hired workers are given. This table thus, furnishes important data on the seasonality of various household industries and yields inferences on the seasonality of Household Industry with seasonality of Cultivation.

37. The major groups of Household Industry having less than 10% of the figures of the respective division which have been omitted from the table are shown in the Appendix at the end of the table. For detailed description of divisions and major groups of Household Industry see Appendix at the end of the note on this series.

Table B-XVII

38. The data in this table has been presented separately for the district total, rural and urban areas. The family sizes of sample households have been classified according to single member, 2–3 members, 4–6 members, 7–9 members and 10 members and over. It may be noted that although the 'Census Household' is not exactly the same as 'Family' to the extent that it may also include unrelated persons residing with the family during the census count, yet this table gives a general idea of the family sizes as in the majority of families outsiders are likely to be insignificant.

39. The sample households have also been classified by economic activity by work in cultivation or household industry. Households engaged in cultivation have been further classified by size of land holding. Classification by economic activity as well as by size of land holding is presented only for rural areas while classification by size of households is presented for total and urban areas.

40. Separate volumes Part II–B (i) & (ii) for General Economic Tables and Part III for Household Economic Tables have been issued in which the various concepts used, have been discussed in detail.

APPENDIX TO TABLE B-XVI

The major groups of household industry having less than 10 percent of the respective divisions marked with an asterisk have been excluded from the main table and have been shown in run-on-lines in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table while alphabets given in brackets are meant for showing the different ranges of period of working in the household industries 'with' or 'without' cultivation as explained below. The numerical figure shown after the alphabets denotes the number of households in that particular range indicated by that alphabet.

SOCIAL AND CULTURAL TABLES

(Note on C-Series)

There are 8 tables in this series relating to Social and Cultural aspects. Table C-I has been prepared from Household Schedules on the basis of 20 per cent sample. All the other tables in this series are based on full count and give data regarding age, sex, marital status and education, separately for rural and urban areas, single year age returns, mother tongue in alphabetical order, religion and classification by literacy and industrial category of workers and non-workers among Scheduled Castes and Scheduled Tribes for the district.

2. All the tables of this series have been reproduced in this book except Table C-VI on Bilingualism which can be seen in Part II-C (i) of the State Census Report wherein all tables of this series are contained.

Table C-I

3. This table is prepared on 20% sample from the Census Population Record Part II of the Household Schedule separately for the total, rural and urban areas of the district. The table is of sociological interest as it indicates the strength of the joint family system. It gives the composition of a household by family and non-family members. The family members have been classified into heads of household (who could be males or females) and their spouses, married sons and other married relations and never married, widowed and divorced or separated relations. As the definition of a census household also included outsiders residing with the family during enumeration, such persons have been shown in the table as unrelated persons.

4. The sample households of the rural areas have been classified into 3 categories *viz.* households engaged neither in cultivation nor in household industry, engaged in household industry only and engaged in cultivation. The households engaged in cultivation have further been classified by size of land holdings.

Table C-II

5. This is an important demographic table prepared on full count. It distributes the population by sex, age and marital status. The data has been presented for the district separately for rural and urban areas while those for tehsils for rural areas only. The population has been distributed into 14 age-groups which is further classified into four types of marital status *viz.* never married, married, widowed, divorced or separated. The age-groups followed in this table largely conform to the international requirements recommended by the United Nations Organisation.

6. This table is likely to be useful for studying the trends in the age of marriage. The data compiled here can be very well used for studying mortality in different marital statuses and also in different age-groups. The data on married females by age-groups can be utilised for forecasting the future births from age specific birth rates. All the persons falling in age-group 0–9* have been treated as 'Never Married' for the purpose of this table.

Table C-III

7. This table distributes the total population by age, sex and educational levels. The population has been distributed in to quinquenial age-groups upto the age of 34 and the age-groups 35–44, 45–59 and 60+. The table has been compiled into three parts. Part A relates to all areas, Part B for urban areas of the district while Part C deals with rural areas down to tehsil level. In Part 'A' and 'C' the educational levels are confined only to (i) Primary or Junior Basic and (ii) Matriculation & above while in Part 'B' these educational levels are much more elaborate as shown in Table B-III Part 'A'.

8. This table can be utilised to measure the growth of literacy in the population as a whole as well as in urban and rural areas separately and in the different age-groups since the last Census. The table is of special interest to the educational authorities for future planning and also to study the public attitudes towards adult education. In 1951 Census data was provided only about illiterate and literate classified into different age-groups on 10 per cent sample.

Table C-IV

9. This table has been prepared on full count and presents the distribution of population by single year ages (0 to 100) and by sex. The age in year completed on 1-3-1961 has been given but the infants who could not complete one year on 1-3-1961 have been shown under the age 'o' while all old persons aged above hundred have been clubbed together and are shown against item 'Over hundred.' The data has only been presented for the district as a whole, its urban and rural breakups can be seen in Part II-C (i) of State Census Report.

10. The data presented in this demographic table is useful for the Census Actuary for computing mortality rates from the age data of the earlier censuses and for the preparation of life tables. It also provides data for studying bias in age returns at the Census.

Table C-V

11. This table presents data separately for total, rural and urban population of the district and only for total for tehsils classified by sex of persons speaking a particular language or a dialect as mother tongue. The mother tongues are arranged in this table in an alphabetical order.

*Marital Status of this group finds place in a separate monograph-Child Marriages in Rajasthan.

12. According to Census 1961 'Mother Tongue' is the language or dialect spoken in childhood by the person's mother to the person or mainly spoken in the household.

13. This table is of great interest to philologists in view of a large variety of languages and dialects spoken in the district and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the constitution.

Table C-VII

14. In this table the population has been distributed in six main religions and the figures of all other religions including the figures of those having 'Indefinite belief' such as Atheists and Agnostics have been clubbed together and noted under heading 'Other Religions and Persuasions'. Separate heading 'Religion not stated' has also been provided for those who do not follow any religion and have given out only their nationalities such as Goans, Israelists, Italians etc.

15. The data of this important sociological table has been presented separately for total, rural and urban areas of the district and also for each tehsil.

Table C-VIII

16. This is a new table compiled in the 1961 Census and presents data separately for total, rural and urban areas of the district and further upto tehsil level for rural areas only. It has been prepared into two parts A & B. Part A presents the data of Scheduled Castes and Part B of Scheduled Tribes.

17. It gives the distribution of population by literacy, classification of workers into different industrial categories based on the Standard Industrial Classification and non-workers. Literacy figures of these communities given for the first time in the present Census.

18. In 1951 Census data for Scheduled Castes and Scheduled Tribes was provided only about total number of persons belonging to Scheduled Castes and Scheduled Tribes classified by sex for the districts and upto sub-division.

HOUSING TABLES

(Note on E-Series)

There are five tables in this series prepared for the first time in this census which have been extracted from the House List prepared at the time of house numbering and house listing operations in 1960. Out of these, four tables *viz.* E-I, E-II, E-IV, E-V relate to housing conditions and furnish data for the purposes for which the houses are used, the tenure on which they are occupied by the households, material of construction of walls and roofs and the households classified by number of members and by number of rooms occupied by them. The data in these tables has been shown for the district as well as for each tehsil separately for total, rural and urban areas.

2. Another table (E-III) on industrial establishments also prepared from the house lists gives a break-up by industry and the fuel used cross-tabulated by the size of establishments, is not presented here for want of space and can be seen in Part IV-B of the State Census Report which presents all the tables of this series. However, the data regarding number of establishments contained in this table is separately compiled down to village level which has been presented in a separate list of industrial establishments.

Table E-I

3. This table has been prepared on full count and furnishes figures of census houses separately for total, rural and urban areas of the district and tehsils classified into different categories according to the uses to which they are put. The houses which were found vacant at the time of houselisting have also been shown separately as such. The following are the various types of houses into which occupied houses have been classified :—

Dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, hotels, hostels, sarais, dharamshalas, tourist homes and inspection houses, shops excluding eating houses, business houses and offices, factories registered under the Factories Act and worksheds and workshops not so registered, schools and other educational institutions including training classes, coaching and shop classes, restaurants, sweetmeat shops and eating places, places of entertainment and community gathering (Panchayat Ghar), public health and medical institutions, hospitals, health centres, doctors clinics, dispensaries, etc.

4. Occupied census houses which do not fall in any of the above categories have been classed as 'Others', e.g. temple, mosque, church, cowshed, motor garage, water-hut, engine room, store room, grass shed.

5. The concepts and definitions of the terms occuring in the table are given below :—

A "Census house" is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling, or a place of business, workshop, school, etc. with a separate entrance.

A "Census household" is a group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so.

A "shop" or a "workshed" is a place where articles are sold for cash or for credit.

A "Workshop" is a place where some kind of production, processing, repair or servicing such as paper-making, shoe-making tailoring, cycle-repairing, motor-servicing, halwai's shop, pottery-making, goldsmithy, blacksmithy, etc., are undertaken or where goods or articles are made and sold, and is not a factory registered under the Factories Act.

A "Factory" is a large workshop which has been registered under the Indian Factories Act.

"Business houses" are those premises where transactions in money or other articles take place such as banks etc.

Table E-II

6. This table has been prepared on the basis of 20 per cent sample of households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings and dwellings with other uses. Shop-*cum*-dwellings and workshop-*cum*-dwellings are census houses which are partly used for residential or dwelling purposes and partly used as a shop or workshop. Dwellings with other uses are census houses such as offices, schools, temples, mosques etc. which are partly used for residential purposes by watchmen or attendents. The total number of households given in column 4 of this table gives the total of such samples classified into the aforementioned four categories of dwellings, which have been further classified according to their tenure status, whether owned or rented, separately for the total, rural and urban areas of the district and also for tehsils.

7. The following concepts and definition have been used in respect of tenure status :—

The term 'owned' was considered to be a situation when a household was living in its own house or a house duly mortagaged to it by some of its debtor.

The term 'rented' meant a situation when a household was found living in a house taken on rent from a landlord or in a house that was taken on lease or in a house for which no rent was being paid with the consent of the landlord.

Table E-IV

8. This table has been prepared on 20 per cent sample of households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings and dwellings with other uses.

The total number of houses given in column 3 of this table gives the totals of all such sampled household. The material out of which most of the walls are made or where a house consists of separate structures, each made of different materials, the material out of which the walls of the main bedrooms, are made has been classified into the following nine categories :—

(1) Grass, leaves, reeds or bamboo
(2) Timber
(3) Mud
(4) Unburnt bricks
(5) Burnt bricks
(6) C. I. Sheets or other metal sheets
(7) Stone
(8) Cement concrete
(9) All other material

9. The material out of which most of the outer roof exposed to the weather is made, i.e., tiles, thatch, corrugated Iron, zinc or asbestos cement sheets or concrete, etc., or in the case of multistoreyed building, the material out of which the intermediate floor or floors is made, has been classified into the following seven categories :—

(1) Grass, leaves, reeds thatch, wood or bamboo
(2) Tiles, slate, shingle
(3) Corrugated iron, zinc or other metal sheets
(4) Asbestos cement sheets
(5) Brick and lime
(6) Concrete and stone slabs
(7) All other material

10. This table has been presented separately for total, rural and urban areas of the district and also for tehsils.

Table E-V

11. This table has been prepared on 20 percent sample of households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellnigs and dwellings with other uses. The figures given in column 3 of this table are the totals of all such sampled households. The sex break-up of the total number of members occupying such sampled households have been further classified into the following six categories showing the number of households and number of occupants by sex in each category:—

(i) no regular room
(ii) one room
(iii) two rooms
(iv) three rooms
(v) four rooms
(vi) five rooms or more

12. This table has been prepared separately for the total, rural and urban areas of the district and also for tehsils.

List of Industrial Establishments

13. This table gives the number of establishments and the number of workers in each branch of industry classified by minor groups of Indian Standard Industrial Classification (for detailed description see appendix to the Explanatory Note on B-Series). The data is presented in the ascending order of the minor groups showing the figures in the brackets first for the number of establishments and second for the number of workers employed. The information has been extracted from the house list prepared at the time of house numbering and house listing operations in 1960.

14. The data is presented for the district and each tehsil for total, rural and urban areas as well as for each village and town separately. A summary of number of industrial establishments by workers employed has been given separately for the district, tehsils and towns in the begining of this table. The table has been presented in run-on-lines and the villages are shown both by their names and Code numbers. The Code number of the villages will be helpful in finding out the location of the village in the tehsil maps. Villages which do not have any industrial establishments as well as those industry minor groups for which there are no figures in village or town or tehsil have been excluded from the list.

15. The data for some seasonal industries which were not actually working during the period of house listing has not been included. The number of workers also includes the proprietor and the other household members who were working in the industry during the week preceeding the enumerators' visit.

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

(Note on SCT, SC and ST Series)

There are 8 Tables in this series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. No special table was prepared for these classes during 1951 Census. The only information collected at that time was the aggregate strength of Scheduled Castes and Scheduled Tribes for the district and sub-divisions. However, together more information for these communities which have been safeguarded in the constitution, special tables have been devised and presented in this series. Part V-A of the State Census Report gives information for the State on this subject.

Table SCT-I

2. This table presents the industrial classification of persons of Scheduled Castes and Scheduled Tribes at work and non-workers by sex. In other words, this table presents caste/tribe wise (arranged in alphabetical order) break-up of the data shown in Table C-VIII. This table has been compiled in two parts. Part A deals with the Scheduled Caste population showing the data for each Scheduled Caste separately in rural and urban areas of the district.

3. Special study regarding the number of persons of Scheduled Castes engaged in unwholesome occupations like tanning, currying of hides and skins, seavenging is also conducted. The number of workers shown in these occupations as well as in other industrial categories is on the basis of their principal work.

4. Part B of this table refers to Scheduled Tribes population and presents the data for each Scheduled Tribe separately in rural and urban areas of the district.

5. A fly-leaf showing the sexwise break-up for Scheduled Castes and Scheduled Tribes in the district as well as for each tehsil is also attached which presents data separately for total, rural and urban areas. Figures of such Scheduled Castes and Scheduled Tribes have also been given for each village and town in the Primary Census Abstract.

Table SCT-II

6. This table distributes the population of Scheduled Castes and Scheduled Tribes according to their marital status of never married, married, widowed, divorced or separated and unspecified status under the age-groups of 0–14, 15–44 and 45+. The total population of these classes acccording to their marital status is also shown separately of all age-groups.

7. This table has been presented in two parts. Part A gives such information for each Scheduled Caste and Part B relates to each Scheduled Tribe providing such information for the district.

8. This is an important demographic table. The age marital status data in the case of Scheduled Tribes give an indication whether the tribal population is decreasing, stable or increasing.

Table SCT-III

9. This table presents the distribution of the population of Scheduled Castes and Scheduled Tribes by sex and educational levels. The table has been compiled in two parts. Part A has been further classified in two parts. Part A (i) provides such type of data for each Scheduled Caste in urban areas only while Part A (ii) presents similar data for urban areas for each Scheduled Tribe.

10. Part B of this table provides the similar information as in Part A for rural arear only, being classified in two parts. Part B (i) deals with Scheduled Castes while Part B (ii) refers to Scheduled Tribes.

11. In case of urban areas the data has been given for educational standards as in Table B-III Part A while such data has been shown for mere literate primary or junior basic and matriculation and above in case of rural areas as in Table B-III Part B.

12. This is an important table, the data of which can be proved very useful for the education department as it throws light on the spread of education among these communities in the rural and urban areas separately. The data will also be helpful to the department for awarding scholarships to the members of these communities.

Table SCT-IV

13. This table presents a distribution of the population of Scheduled Castes and Scheduled Tribes according to their religion. This table is compiled in two parts. Part A provides religionwise data for each Scheduled Caste in the district showing the rural and urban figures together. Similar type of information has been presented for Scheduled Tribes in Part B of this table. It may be noted that the members of Scheduled Castes can be either Hindus or Sikhs while members of Scheduled Tribes may profess different religions.

Table SCT-V

14. This table presents a detailed examination of the rural cultivating households of the Scheduled Castes and Scheduled Tribes and is based on 20% sample. Such households have been classified in various groups according to the size of land cultivated and cross tabulated by the interest in land cultivated.

15. This table is similar to that of household economic table B-XI and is compiled in two parts. Part A presents such data for Scheduled Castes while Part B provides such information for Scheduled Tribes.

Table SC-I

16. This table presents data for students and unemployed persons in non-working population of Scheduled Castes. This is further classified according to the broad educational levels consisting of literates, primary or junior basic and matriculation and above.

17. The data has been shown separately for the district total, rural and urban areas and further down to tehsil level in case of rural areas only. It is very useful table at it indicates the numerical strength of students and unemployed persons among the Scheduled Castes.

Table ST-I

18. Scheduled Tribes have their own peculiar languages and dialects. This is due to the fact that this table is prepared showing the number of speakers of that subsidiary language of those members of Scheduled Tribes who have moved out of their homes and as a result of contact with the local persons speak some other subsidiary language to the mother tongue. The number of persons speaking such subsidiary languages have been shown sex-wise in run-on-lines. The data has been presented separately for the district total, rural and urban areas for the each Scheduled Tribe.

Table ST-II

19. This table presents data for students and unemployed persons in the non-working population for each individual Scheduled Tribe. The data has been shown separately for district total, rural and urban areas. This table is an important one as it throws light on the progress of education and the unemployment position for each individual tribe.

SECTION III

VILLAGE DIRECTORY
&
SOME OFFICIAL STATISTICS

VILLAGE DIRECTORY

(*Note*)

Data collected for the Census 1961 at the village level has already been presented in the Primary Census Abstract. As an ancillary project, some additional information was also collected through a Village Information Schedule, specially designed by this office, and is presented in this Village Directory. Information in this directory and what has been presented in the official statistics and the maps may in certain cases be found to be conflicting. The reason obviously lies in the fact that data has been collected from different sources.

The Directory gives information about the major crop, the distance in miles from the nearest Primary School, Hospital or Dispensary, Railway Station, Post Office, Bus Stand and Police Station for each village. Such information was not collected for unpopulated villages. Where information was not received for a particular item an indication to this effect has been made by putting a '—'.

With a view to assist the reader to locate the villages easily, they have been presented here alphabetically. The names of the villages have also been given in the Devnagri Script. The names of the villages found to be printed wrongly in the Primary Census Abstract have been corrected here.

Crop which has the largest area under cultivation has been treated as the major crop of a village and the following abbreviations have been used to indicate it in Column No. 2 :—

W — Wheat
G — Gram
J — Jowar
B — Barley
Bj — Bajra
M — Maize
R — Rice
P — Pulses
T — Til
WG — Wheat Gram (Gochana)
WB — Wheat Barley (Gojara)
BG — Barley Gram (Bejar)
Md — Mustard
C — Cotton

SOME OFFICIAL STATISTICS

SOME OFFICIAL STATISTICS

(Note)

Presented in this section are some tables relating to statistics collected from various official agencies. They cover subjects like rainfall, land utilisation, area and production under crops, irrigational facilities, livestock, agricultural implements, factories, employment situation and power. Information about consumption of intoxicants, educational and medical facilities, motor vehicles, progress of co-operative societies, development blocks and panchayat samities is also given in this section. A list of fairs celebrated in the district and the data relating to the electoral participation and preferences for the first two general elections also form a part of this section.

SECTION IV

DISTRICT & TEHSIL MAPS

DISTRICT AND TEHSIL MAPS

(Note)

The district and tehsil maps presented in this section have been prepared and presented for the first time. They form a part of the Census Atlas and have been reproduced here specially with a view to help the reader to locate the places mentioned in the Primary Census Abstract and the Village Directory. The villages have been shown by code numbers in the tehsil maps.

The maps have been photographically reduced to their present size from the original revenue maps and the scale and graticules have been worked out as approximately as possible.

The following is the list of references used for all the maps :—
