INTRODUCING THE DISTRICT

1. GENERAL

The district of Muzaffarpur extends from North Latitude 25°29′ to 26°53′ and East Longitude 84° 53′ to 85° 50′. Forming part of the North Bihar plains, it is located centrally in the Tirhut division. The district is bounded on the north by Nepal, on the south by the district of Patna, on the east by the district of Darbhanga and on the west by the districts of Champaran and Saran. The river Ganges forms its natural boundary on the south, while the Gandak separates it from Saran on the south-west.

The district as well as the divisional headquarters are located at Muzaffarpur which is the principal city.

The district has three subdivisions, 25 police stations and 40 anchals as follows :

Subdivision	Number of	
	Police stations	Anchals
1. Muzaffarpur Sadar	9	14
2. Sitamarhi	10	15
3. Hajipur	6	11

A statement showing the inter-relationship among subdivisions, anchals, police stations and revenue thanas is given at page 9 of Part I of this Handbook.

2. BRIEF HISTORY

The district of Muzaffarpur was created in 1875 for the sake of administrative convenience by splitting up the earlier district of Tirhut. It was named after its principal city, Muzaffarpur, founded in the 18th century by Muzaffar Khan, an *amil* (revenue farmer).

Early History

Little is known about the original inhabitants of the ancient land of North Bihar. Glimpses of its early history can, however, be had from the accounts and legends preserved in the *Vedic* literature. According to an account, the Videhas of Aryan stock, accompanied by *Agni*, the God of fire, marched eastwards from the banks of the river Saraswati. On reaching the banks of the Gandak they were told by *Agni* to settle to the east of that river, which they did. They cleared the marshes and took up cultivation. They also founded a powerful kingdom which later came to be ruled by the great King Janak, whose daughter Sita was married to Lord Rama. The kingdom of Janak, known as Mithila, was the most progressive of the contemporary kingdoms. The court of the king of Mithila was a great centre of learning to which scholars from different parts of the country were drawn. Yajnavalkya, the famous sage who undertook the revision of *Yajurveda*, was the chief priest of King Janak.

The recorded history of the district dates back to the rise of the Vrijjian Republic which replaced the Videhan monarchy. The centre of power also shifted from Mithila to Vaishali, the capital of the republic, which is identified with the modern Basarh in Hajipur subdivision. The Vrijjian Republic was a confederation of eight clans, of which the Lichchhavis were the most important. They gradually gained strength and came in conflict with the powerful kingdom of Magadh. Bimbisar (*Circa* 519 B.C.), the founder of Magadh imperialism, had secured his position by concluding matrimonial alliances with the neighbouring Estates of the Kosalas and the Lichchhavis. But after he was assassinated by his son Ajatsatru, Vaishali was invaded and Ajatsatru extended his sway over Tirhut. It was at this time that the foundation of Pataliputra (the modern Patna) was laid at the village Patali on the banks of the river Ganga. Ajatsatru built a fortress here to keep watch over the Lichchhavis on the other side of the river.

The Rise of Jainism and Buddhism

Vaishali was a centre of religious renaissance. Lord Mahavir, the founder of modern Jainism, was born in about 599 B.C. near Vaishali. Like Lord Buddha, he also came of an aristocratic family. His father was the chief of the *Nata* or *Naya* clan of *Kshattriyas*, and married to the daughter of Chetaka, a ruling chief of the republic. Mahavir became an ascetic at the age of 30 and revived the religion founded by Parsvanatha.

I wish to place on record my grateful appreciation of the useful services rendered by the following members of my staff in the preparation of this volume:

1. Shri R. N. Misra	..	Deputy Superintendent of Census Operations
2. Shri U. P. Shrivastava	..	
3. Shri K. K. Chakravorty	..	
4. Shri R. B. Singh	..	Tabulation Officer

11. Shri Safi Ahmad	..	Draughtsman
12. Shri A. K. Mathur	..	Artist
13. Shri R. K. Sinha	..	Investigator

PREFACE

Though compiled in the Census Office, District Census Handbooks are actually State Government publications. They were published for the first time in the 1951 Census. So varied have been their uses and so great their value that there can be little doubt that the Handbooks have come to stay as a regular feature of every census. In 1961, while the tradition has been continued, efforts have been made to enlarge the scope and enrich the contents of the Handbook in several ways. Much of it is, of course, due to the able guidance and inspiration from Sri Asok Mitra, the Registrar General of India, to whom no words of gratitude can really do full justice.

The main attraction of the District Census Handbook lies in the portion relating to Village Statistics which presents primary census data for each village in the district. To facilitate reference, this table has been supplemented by a Village Directory which apart from cataloguing some additional information, gives an alphabetical list of villages in each Anchal. The arrangement of villages in the Village Statistics portion is according to the jurisdiction of Panchayats and Anchals. No authentic list of villages comprised in each Panchayat or Anchal was readily available before the Census of 1961. Much pioneering effort had, therefore, to be made in the preparation of these lists. It is possible that some errors, particularly in the delineation of Panchayat jurisdiction, might have crept in because of these limitations or subsequent modifications in boundaries. It may be noted also that the statistics reproduced here are generally related to March, 1961 unless otherwise indicated.

The Anchal maps are a special feature of the Handbook this time. They have been prepared from 1″=1 mile Anchal maps which were traced from the old Revenue Thana maps. Though revenue thanas had long ceased to be of much significance in day-to-day administration, no attempt appears to have been made in the past to prepare police station or anchal maps delineating the village boundaries. The Census of 1961 in Bihar can justly claim the preparation of these anchal maps, both on 1″=1 mile scale as well as on the reduced scale in which they are presented in this book, among its major achievements. Of course, this was made possible mainly because of the keen interest and helpful attitude of the State Government which not only placed the relevant materials at my disposal but also agreed to meet the entire cost of the scheme. For all this, I am greatly indebted to Sri S. J. Majumdar, the then Chief Secretary, Sri S. K. Chakravorty, the then Revenue Secretary, and Sri J. P. Shrivastava, the then Director of Land Records, Bihar. I owe a special debt of gratitude to Sri M. P. Singh, Deputy Director of Surveys, Bihar, who not only helped with some of his experienced staff but also provided valuable technical supervision from time to time.

The Village Statistics and the Village Directory, together with the Anchal maps, should provide a complete index and statistical guide to each village in the district. Among other items of interest, mention may be made of the note introducing the district, brief gazetteer of places, glossary of ancient monuments and official statistics. These are, of course, in addition to the census tables for the district. It is regretted that paucity of space stood in the way of reproducing a good many of the other census tables in the Handbook. For instance, Migration and Housing Tables have been excluded completely. These may be looked for, if necessary, in the relevant State volumes.

This Handbook is the product of hard toil and patient labour of several persons and agencies. No list can really be comprehensive enough to include them all. An acknowledgement appears elsewhere mentioning some of those who were associated with this work in the Census Office. Outside sources and agencies have been mentioned, as far as practicable, at appropriate places in the book itself.

My thanks are also due to Job Printers, Allahabad for the care and interest taken in printing this volume.

INTRODUCING THE DISTRICT

1. GENERAL

Situated between North Latitude 26°.34′ and 25°.30′ and East Longitude 86°.19′ and 87°.8′, the district of Saharsa borders Nepal in the north while Bhagalpur and Monghyr districts lie to its south. It is bounded on the east by Purnea and on the west by the districts of Darbhanga and Monghyr. Saharsa is a constituent district of Bhagalpur Division. It has three Subdivisions, viz., Saharsa Sadar, Supaul and Madhepura, with headquarters located in towns bearing the name of the respective subdivisions. The town of Saharsa is the headquarters of the district.

There are 21 anchal-*cum*-community development blocks and 16 police stations in the district, distributed in the three subdivisions as follows :

Number of anchals and police stations in the different subdivisions of Saharsa district, 1961

Subdivision	Number of Anchals	Number of Police Stations
1. Saharsa Sadar ..	5	4
2. Supaul ..	9	7
3. Madhepura ..	7	5
Total	21	16

The following police stations of the district comprise two anchals each :

Name of police station	Name of anchal
1. Supaul	(*i*) Supaul
	(*ii*) Pipra
2. Kishanpur	(*i*) Kishanpur
	(*ii*) Marauna
3. Murliganj	(*i*) Murliganj
	(*ii*) Kumarkhand
4. Alamnagar	(*i*) Alamnagar
	(*ii*) Chausa

Dharhara Police Station comprises three anchals, viz., Kahara (excluding Saharsa Notified Area), Nauhatta and Mahishi.

Out of a total of 1,355 *mauzas* or revenue villages in the district, 145 are uninhabited. 14 *mauzas* are wholly included in towns, which are six in number.

2. BRIEF HISTORY

Saharsa was constituted into a separate district on the 1st April, 1954. The whole of the erstwhile Bhagalpur district, lying to the north of the Ganges with the exception of Bihpur, Naugachhia and Gopalpur police stations, are included in the district of Saharsa.

Early History

There are hardly any ancient historical sites or remains in Saharsa. The vagaries of the capricious and disastrous Kosi in the last half a century or so, has left no trace of them. Thanks to the efforts of some early Europeans, however, some important historical objects or landmarks have been preserved here and there and it is on the basis of these that some kind of a connected account of the district's early history can be woven out. In ancient times Vaishali was the strongest republic in North Bihar and beyond that lay the famous territory of Anguttarap. There was a small Janapada, named Apana, in Anguttarap and it included a portion of the district of Saharsa. Whether this was a republic or not, it is difficult to say, but this much is certain that the people of this area were outside the influence of the Lichchavis. Various sites in the district, now completely eroded and destroyed by the Kosi, viz., Bitarpur, Budhiagarhi, Budhmaghat, Buddhadi, Pithahi and Mathahi, are associated with Buddhism. Before the advent of of Kosi in this district, these sites supplied important materials, and during the period of erosion

big buildings and huge construction from beneath the earth were noticed falling into the river. Local legends confirm that Lord Buddha and Lord Mahavira passed through the district in course of their missionary travels and delivered important sermons.

Both Anga and North Bihar (including Saharsa) continued to be independent till the early part of the sixth century B.C. For some time Magadha remained an integral part of Anga. But soon the prosperity of Anga declined. Bimbisar, King of Magadha, annexed Anga to his empire. Though Anga seems to have passed into the hands of the Magadhan Sovereign, Anguttarap seems to have continued as an independent Janapada and the western portion of Supaul as a part of Mithila continued to enjoy independence. This was characteristic of the whole of North Bihar till it was finally conquerred by Ajatasatru. It was Ajatasatru who finally defeated the Lichchavis and other independent republics of North Bihar and annexed the whole territory to the kingdom of Magadha. The Magadhan empire was growing rapidly and the whole of Bihar was brought under the sway of Magadhan rule by the Nandas and the Mauryas.

In the first decade of this century a hoard of 58 punch-marked coins of the Mauryan period was discovered from Gorhoghat. Later, the same type of coins were found at Patuaha by Prof. R. K. Choudhary in 1958. He also came across some pieces of northern black polished ware near Mahishi and its surroundings. The Mauryan rule in this area stands firmly confirmed by a Mauryan pillar at Sikligarh on the Banmankhi-Forbesganj Road, and another in the Kishanganj police station. Since Saharsa was a border district even in those days, the Mauryan rulers apparently took special care to guard its frontiers.

The Mauryans were supplanted by the Sungas and the Kanvas and there does not seem to have been any major political change in the district. Whether the Khushans conquerred this portion or not cannot be determined.

Between 320 and 1097 A.D.

Under the Guptas (from 320 A.D.) the entire North Bihar was consolidated as a Tirabhukti (province) with its capital at Vaishali. Henceforward provinces came to be known as Bhuktis and district as Vishayas. In North Bihar there were two Bhuktis, viz., Tirabhukti (practically whole of North Bihar) and Pundravardhanbhukti (included portions of Saharsa, Purnea and a portion of North Bengal). The extent of Saharsa during the period under review was up to the confines of Pundravardhanbhukti which included some of its present areas.

After the decline of the Guptas the political gap came to be utilised by all contemporary chiefs. Taking advantage of the situation, the Varmans of Kamrupa (Assam) extended their authority up to the confines of the Kosi. The rule of Purnavarman over North Bihar included the present district of Saharsa. The rise of Harsha in 7th century A.D. was an event of great importance. He brought under his sway the whole of Northern India. But the death of Harsha in 647 A.D. once again let loose the forces of disintegration.

The Palas of Bihar and Bengal (8th century A.D.) again gave a stable administration to the district. The Bangaon Copper Plate of Vigrahapala is a rare find from village Bangaon. As South Bihar was pressed by the Kalachuris, the Palas apparently shifted to North Bihar and Saharsa may have been their headquarters during the time of Vigrahapala III. Quite a few villages in Saharsa district are associated with the names of the Pala rulers and it was through this district that the Palas could establish contact with Nepal. From the geographical point of view Saharsa was the most strategical place for being the Jayaskandhavar (temporary capital) of the

Palas at a time when they were surrounded on all sides by enemies.

Between 1097 and 1765 A.D.

The decline of the Pala authority in Bihar and Bengal was followed by the establishment of the Karnatas in Mithila and the Senas dynasty in Bengal. Both the Karnatas and Senas claimed authority over the portions of Saharsa and often entered into armed conflict.

Nanyadeva, the first of the Karnatas, extended his influence from Champaran to Purnea. Probably the two chiefs (Nanyadeva of the Karnata dynasty and Vijayasena of the Sena dynasty) were allies who fell into disagreement over division of territory. The Deopana inscription of Vijayasena indicates that Nanyadeva was defeated and imprisoned somewhere in Supaul subdivision. It was Gangadeva, his son, who liberated him. The Sanokhar inscription of Vallalasena proves that his rule extended up to the district of Bhagalpur.

The two sons of Nanyadeva Malladeva and Gangadeva—apparently drove the Senas further east as indicated by the setting up of Gangapur Rajani (named after Gangadeva) in *pargana* Nishankpur Kurha and Maldiha (named after Malladeva) on the Saharsa-Purnea border. Village 'Malhad' near Supaul is also associated with Malladeva. Gangadeva was succeeded by Narasimhadeva during whose reign Mithila and Nepal were separated. The last king of the line was Harsimhadeva who lost to Ghiyas-ud-din Tughlaq in a protracted struggle.

Gradually the Tughlaq authority in Mithila stood weakened. Haji Illyas of Bengal taking advantage of this situation, invaded Tirhut and defeated its ruler. He divided the Tirhut Kingdom into two parts. The territories north of the Gandak remained under the Oinwara and territories south of Gandak and north of Ganga came under the sway of Jai Illyas. As a result of this division the district of Saharsa continued to be under the control of the Oinwara rulers. The most famous king of this line was Shivasimha, who issued gold coins. Vidyapati, one of the greatest poets of India was his court poet. It is of interest to note that Vidyapati was also connected with the district of Saharsa as his daughter was married to a renowned Brahmin family of Mahisi village. After Shivasimha, another king of importance was Narasimhadeva whose dated inscription on the sun temple of Kandaha (Saharsa) is yet extant. Narasimhadeva had to face a lot of trouble with the rulers of Bengal and it is believed that he had his temporary capital at Khandaha with a view to check the advance of Bengal army.

After the fall of the Oinwaras, there was virtual chaos. The Gandhavariya Rajputs are said to have acquired power and ruled during this period of confusion. The Gandhavariyas trace their descent from the ruling chiefs of Tirhut. The whole district of Saharsa was dotted with small chieftainships created both by the Hindus and the Muslims. Even in the early part of the Mughal rule they could venture to oppose the central authority as the Bihar Afghans were opposed to the establishment of Mughal authorty. The Karranis and the Afghans in collusion with the local Rajput rulers and petty chief had made this district the centre of revolt.

Raja Todarmal made the revenue settlement in Subah Bihar in 1582. The very fact that most of the existing *parganas* of the district of Saharsa were assessed during the time of Akbar shows that the district had acquired sufficient importance. In the Kishanganj police station there is a mosque in village Sarandi, said to be the fort of Raja Bairisal (possibly a Gandhavariya Rajput). The site is associated with the reign of Akbar in local tradition and folklore.

During the course of the Mughal rule, the present district of Saharsa seems to have formed parts of Sarkar Tirhut, Sarkar Monghyr and Sarkar Purnea. The Muslim rule naturally had

its influence on the life and culture of people. Some of the Rajput *zamindars* also became converts. The Muslims of Nawhatta circle in the district of Saharsa are said to have been originally Rajputs and their conversion is traced to the Mughal times. The Rajputs of this district are historically important but there is no connected history of their dynasties. It is said that in 1654 Shahjehan bestowed the title of Raja on Kesri Sinha (ancestor of Sonbarsa Raj). Raja Fateh Sirgh of the same line is said to have sided with the English East India Company against Mir Kasim in the battle of Udhuanala in 1763.

In 1764 Saharsa passed with the rest of Bengal to the East India Company. In the Movement of 1857, the people in revolt remained unchecked by the administration of Purnea and Bhagalpur and they moved unchecked through the *terai* area. They were very active in different parts of the district of Saharsa which was in the midst of great turmoil. Since then it continued to be an important centre for various kinds of political agitations directed against the British administration.

The part played by the district of Saharsa in the freedom movement was of immense importance. The Home Rule Movement of Annie Beasant in 1917 and the *Satyagrah* of Gandhijee in 1921 received widespread support in the district. The district played an important role in the Non-Co-operation Movement of 1931 and the Quit Inida Movement of 1942.

3. PHYSICAL FEATURES

Natural Divisions

The entire district lies north of the Ganges and is comprised of plains. The southern portion of the district is comparatively more fertile and densely populated. The deposits left by the turbulent Kosi have left an impact on the fertility of the soil but progressive implementation of the Kosi Project is expected to turn the district into veritable granary.

Topography

The topography of the district has been affected due to the ravages of floods. *Kans* and *pater* jungles have sprung up in the western part of the district. Large tracts of fertile lands have become uncultivable by the deposits of thick sand brought in by the Kosi. The eastern part is less affected. After the construction of the Kosi Barrage and several embankments, the areas of Sonbarsa, Madhepura, Singheshwar, Murliganj and Kishanganj thanas are now free from Kosi ravages and the sandy tracts are being reclaimed. The areas of waste-land, full of *kans* and *pater*, lying mostly in Supaul and Madhepura subdivisions have been largely reclaimed and are yielding crops. A number of canals have been constructed under the Kosi Project which provide irrigational facilities to the districts of Darbhanga, Purnea and Saharsa, besides some parts of Nepal.

Rivers

The most important river of the district is the Kosi, also kown as Kaushiki. It rises in the Himalayas. Its three tributaries—Sun Kosi, Arun and Tamur meet at Tribeni and form the Sapt Kosi. It enters the plains at Chatra. Tiljuga, Bhati Balan, Sugarwe, Sonior Jangar Balan, Kamla and Bagmati join the Kosi on its right bank in the plain. The Kosi is notorious for its vagaries, and was known as "Bihar's River of Sorrow". During rainy season it swells and inundates large tracts of the district. It is changing its course gradually in a westerly direction. In 1937 the river used to flow just near Supaul joining the Bagmati near Bhamharaghat and thence eastward up to Kursela where it joined the Ganges. But at present it has shifted its course

to the west and flows near Nirmali and Madhepur.

Most of the other important rivers of the district emerge from the Himalayas and fall into the river Khagri which itself joins the Kosi. Among these are the Tiljuga, the Bati, the Dhimra, the Talaba, the Parwan, the Dhusan, the Chalausi, the Loran, the Katna, the Daus and the Ghaghri.

Tiljuga : Rising in the hills of the *terai* of Nepal, it enters Saharsa at Pargana Naredigar after which it forms the western boundary between Saharsa and Darbhanga. It serves as a waterway meeting the Kosi.

Bati : Formerly it originated from the Tiljuga but now has its source in the north of Pargana Naredigar. It falls into the Tiljuga at Gopalpur.

Dhimra: This river rises in Nepal. It divides the Parganas of Dhaphar and Naredigar in the district of Saharsa and joins the Tiljuga at Tilkeshwar.

Talaba : Formerly it was an important river of the district, but now its upper course dries up just after the rains. The bed is then cultivated and is fertile. It forms the western boundary of Pargana Nisankpore Kusha. It joins Parwan and Loran and becomes famous by the name of Katna.

Parwan and Dhusan : Parwan originates from Talaba and Dhusan from a spring near Belarhata village. After three miles, both meet at Singheshwarnath where a great fair is held annually in the month of February near the temple of Lord Shiva. From here onward it is known by the name of Parwan alone, and is navigable.

Geology and Minerals

The district has alluvium both old and new. In the Kosi affected zones thick layers of sand have accumulated. The district has been affected by earthquakes several times, viz., in 1803, 1833 1897 and 1934.

There are no mineral resources.

Soils

Fertile alluvial soil found in the district yields paddy and wheat. The Kosi affected zones contain sandy soil which is less fertile.

Flora and Fauna

Paddy and wheat are grown in the alluvial and reclaimed soils. Kosi-affected areas still contain *kans* and *pater* forest, though reclamation is in progress. Small trees like *babul*, *jhaua*, *harjora*, etc., and water berries like *makhana*, *ramdana* and *motha* grass are also found. *Sabai* grass, *munj* and varieties of cane, etc., are also found in the district. Though the Kosi has destroyed a large number of fruit-bearing trees, the district still produces a large quantity of mangoes. Other common trees are *mahua*, jack fruit, plantain, tamarind, *bair*, *jamun* and *kathjamun*. *Khajur*, *sal*, *sesum* and *semal* trees are found. *Lichi*, guava, lemon, water-melon, cocoanut and betel-nut are also grown.

The denudation of the forest, the reclamation of the *kans* and *pater* infested waste-lands, and indiscriminate *shikar* in the past have led to the decline of tiger, panther, hog-deer, *chital*, wild-boar, etc. *Nilgai*, hares, and *khikhir* are still found. Jackals, monkeys, wolves and flying foxes are also common. Several deadly species of reptiles like cobra and *karait* and various kinds of lizards and inguanas are also found.

The following birds have been noted in the district of Saharsa :

Jungle crow, house crow, freepic, crow-pheasand, grey hombill, little brown dove, grey partridge, white breasted waterhen, bronze-winged jacana, curlew-stint black ibis, glossy ibis, white-

necked stork, cattle egret, pond heron, pink-headed duck, silli or cotton teal, lesser white fronted goose, large whistling teal (*dendrocygna bicolor*), brahminy duck, eastern grey duck, marbled teal and eastern goosander.

The reclamation of water pools and indiscriminate shooting have led to the extinction of pink-headed duck, marbled teal, copper-breasted tael and floricans. Various species of ducks, mallard, *nakta* comb duck and geese do not come out now so profusely. Visitors have declined very perceptibly. Drainage of the *Chaurs*, reclamation of water-logged areas and shrubs, indiscriminate butchering of the birds are some of the reasons.

Climate and Rainfall

Saharsa has a humid climate. It is cold from November to February while summer prevails from March to May. June to September is the monsoon season, October being the transitional month. January is the coldest while April is the hottest month, the maximum temperature being 42° to 43° C (109° F).

Rains start from June, the maximum rainfall occurring in the month of July in which it is nearly one fourth of the total annual rainfall.

4. COMMUNICATIONS

Roads

Due to the vagaries of the Kosi river, the communications, viz., roadways, railways and waterways of the district have been affected greatly. Prior to 1948, when the Saharsa District Board was formed, the Bhagalpur District Board was incharge of road construction in the district and communications by road was deplorable. After 1948, however, about 14 miles of metalled and 812 miles of unmetalled roads were improved. Out of 147 miles of metalled road, 132 miles were completed by the P. W. D. in the First Five-Year Plan and the rest 15 miles in the Second Five-Year Plan. Details of the roads completed in the First and Second Five-Year plans are given below :

First Five-Year Plan

Name of road	Mileage of the road completed
1. Bihpur-Birpur Road	57
2. Madhepura-Murliganj Road	13½
3. Supaul-Pipra Road	10
4. Saharsa New Government Colony Road	6½
5. Saharsa-Madhepura Road	12
6. Saharsa-Supaul Road	21
7. Baijnathpur-Sourbazar Road	5½
8. Simarhi-Partapganj Road	6½

Second Five-Year Plan

Name of road	Mileage of the road completed
1. Sourbazar-Sonbarsa Raj Road	11
2. Supaul-Kishanpur Road	2
3. Sourbazar-Patharghat Road	2

The following roads have been proposed to be completed during the Third Five-Year Plan :

Name of road	Mileage
1. Bangaon-Mahishi	4½ miles
2. Panchgachhia-Nauhatta Road	9 miles
3. Parsarma-Bakaur	4½ miles
4. Tribeniganj-Balua Road *via* Jadia	32 miles
5. Karma-Alamnagar Road	3 miles 2,100 feet
6. Chausa-Laulagaon-Bijoyghat Road	5 miles
7. Simri-Bakhtiarpur-Sonbarsa Raj Road	8 miles 50 feet

Moreover, three roads are to be constructed under the Central Road Fund. These are—(1) Singheshwar Asthan-Supaul Road (18 miles); (2) Tribeniganj-Purnea Border Road (to be improved from Jadia to Khajpusi) (6 miles); and (3) Simrahi-Bhabtiahi Road (8 miles).

Besides, a number of bridges have been constructed in different parts of the district.

Railways

A branch line of N. E. Railway running from Mansi to Supaul enters in this district at Sonbarsa

Kachery station and covers a distance of 37 kilometres. Another branch line of the same Railway goes from Saharsa railway station to Purnea Junction, covering a distance of 42 kilometres in the district. A third section of N. E. Railway coming from Banmankhi (Purnea) goes to Behariganj (Saharsa). The fourth section of the N. E. Railway from Sakri to Nirmali passes through Saharsa covering two miles.

The 76-mile narrow gauge line of the Kosi Project administration runs in this district for only 16 miles.

No expansion of the railway line has taken place in this district in the recent past. On the other hand, the line connecting Nirmali with Supaul, Pratapganj and Kanwa Ghat, etc., has been dismantled due to ravages of the Kosi river.

Rivers

The district lacks the navigable rivers. However, small country boats serve the purpose of navigation. The District Board controls 28 public ferries while 137 public ferries work at different points in important rivers, mostly in the rainy season.

Airways

There are only two air-ports in the district. One is located at Birpur under the control of the Kosi Project Department and the other in at Saharsa, maintained by the Public Works Department.

5. DISTRICT ADMINISTRATION

General Administration

The District Magistrate and Collector is incharge of the civil, revenue and criminal administration of the district. He is also the chief pilot of all development and welfare activities in the district. The Commissioner, Bhagalpur division, having his headquarters at Bhagalpur, exercises general supervision and control over him. The Collector is assisted by an Additional Collector and a District Development Officer, both of Additional District Magistrate's rank. A number of Deputy Collectors and Sub-Deputy Collectors and other officers are posted at the district headquarters to assist the Collector.

For general administrative purposes, Saharsa is divided into three subdivisions, each in charge of a Subdivisional Officer who is drawn from the Indian Administrative Service or the Bihar Civil Service. The Subdivisional Officer works under the direct control of the Collector. He is assisted by a number of Deputy and Sub-Deputy Collectors. The Sadar subdivision was created only after Saharsa, hitherto a part of Bhagalpur district, was given the status of a full-fledged district in 1954. Madhepura and Supaul subdivisions existed from before.

Each subdivision is divided into a number of Anchal-*cum*-Development Blocks. The district has 21 such blocks, each in charge of an Anchal Adhikari who is also the Block Development Officer. These officers belong either to the Bihar Civil Service or the Bihar Junior Civil Service. The Anchal Adhikari-*cum*-Block Development Officer is incharge of all revenue, development and welfare activities in the area and works under the direct control of the Subdivisional Officer. His services as a Magistrate are also utilised when a law and order situation arises. He has a team of workers drawn from different departments of Government to assist him in development work. As Anchal Adhikari, he is also the Chief Revenue Officer at the Anchal level and collects rent, cess and other miscellaneous dues of Government.

Judicial Administration

The judicial administration of Saharsa is under the Judgeship of Bhagalpur. The District and Sessions Judge of Bhagalpur, therefore, exercises full control over the judicial administration of the district. Only Subordinate Judges and Munsifs are posted in the district.

Police Administration

Though the District Magistrate is in overall charge of the criminal administration, the Superintendent of Police is the head of police force in the district. He has his headquarters at Saharsa and works under the Deputy Inspector-General of Police, Eastern Range, Bhagalpur. He is assisted by a number of Deputy or Assistant Superintendent of Police, Police Inspectors, Sergeants-Major, Police Sub-Inspectors and Prosecuting Inspectors. In every subdivision, there is a Deputy or Assistant Superintendent of Police; and below him, Inspectors and Sub-Inspectors of Police incharge of circles and police stations respectively. The total number of police stations in the district is 16. The officer incharge of a police station is assisted in his work by a team of Sub-Inspectors, Assistant Sub-Inspectors, Literate Constables and ordinary constables. 1,342 Chowkidars and Dafadars constitute the rural police force. Their duties include night patrol, watch over the movement of strangers and suspects, and reporting the occurrence of crimes.

6. AREA, VILLAGE AND TOWNS

Area

The area of Saharsa district is 2,105.5 sq. miles (or 5,453.2 sq. kms.) according to the Bihar Survey, and 2,093 sq. miles (or 5,421 sq. kms.) according to the Surveyor General of India. The small difference of about 13 sq. miles may be attributed to the different methods of computation adopted by the two agencies.

The area of Saharsa is about half the average area (3,937 sq. miles) of a district in the State. Next to Dhanbad (1,108.8 sq. miles) the area of Saharsa is the lowest among the districts of Bihar and accounts for only 3.14 per cent of the State's total area. Among the 328 districts in the country, it ranks 236th in area. Its area is nearly one and a half times the area of Goa, Daman and Diu (3,706 sq. kms.) a little less than three fourths the area of Sikkim (7,299 sq. kms.) and more than half the area of Tripura (10,660 sq. kms).

Villages

The term 'village' has the same meaning in census as a revenue *mauza*. The Code of Census Procedure, 1961 defined it as follows :

> "A *mauza* means a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all or on the other hand, several hamlets each bearing a different name."

Total number of villages in the district of Saharsa is, 1,355, of which 1,195 are inhabited, 145 uninhabited, 15 villages are wholly and 3 villages partly included in towns. Among the districts of the State the number of villages is lowest in the district of Saharsa.

The average area of a *mauza* in the district is 1·55 sq. miles which is much above the average (0.85 sq. mile) for the State. In fact, after Ranchi (1.80 sq. miles), the average area of a village in Saharsa is largest in the State.

The average population per village in the district is 1,272 persons against the State average of only 588 persons per village. No district in

the State has higher average population per village than the district of Saharsa. It may be noted that the average area and average population have been worked out here by taking into account all villages, inhabited, uninhabited or wholly included in towns.

The following statement shows for the district and the State the distribution of 1,000 inhabited villages by different size-classes of population as well as the proportion of population per 1,000 of rural population in each size-class of villages :

Villages classified by population range, 1961

Village containing	Saharsa district		Bihar State	
	Proportion per 1,000		Proportion per 1,000	
	Villages	Population	Villages	Population
Less than 500 persons	294	53	627	216
500—999 persons	247	130	204	228
1,000—1,999 persons	245	246	113	247
2,000—4,999 persons	176	380	49	228
5,000—9,999 persons	35	163	6	68
More than 10,000 persons	3	28	1	13

(Detailed figures up to anchal level are given in Table A-III.*)

The above statement reveals that about one fifth (18.3 per cent) of the population of Saharsa district live in small villages with less than 1,000 inhabitants in each. The corresponding proportion for the State is more than double (44.4 per cent) the district figure. Even in regard to number, the proportion of small size villages in Saharsa (54.1 per cent) is much below the State average (83.1 per cent). Medium size villages (population 1,000 to 1,999), though much greater in number, have a proportion of population in them which is almost the same as in the State. As regards large size villages (having 2,000 persons or more), Saharsa is ahead of State both in regard to number and proportion of population. There are only four villages in the district of Saharsa with population more than 10,000 in each. These are—

Village	Anchal	Thana no.	Population
1. Bangaon	Mahishi	137	12,048
2. Siripur	Kumarkhand	243	11,374
3. Moura	Singheshwar	213	13,847
4. Alam Nagar	Alamnagar	72/1	10,017

Towns

According to the definition adopted at the 1961 Census a town includes—

(*i*) every municipality ;

(*ii*) all civil lines not included within municipal limits ;

(*iii*) every cantonment ; and

(*iv*) such other places which have (*a*) population of not less than 5,000, (*b*) density not less than 1,000 persons per sq. mile, (*c*) at least three fourths of the adult male population engaged in non-agricultural livelihood, and (*d*) have been declared to be town for census purposes by the Superintendent of Census Operations.

Towns are usually divided into six classes according to their population sizes. Saharsa has 6 towns, in all, distributed into different size-classes as follows :

Class	Population range	Town	Population
I	Over 100,000	Nil	Nil
II	50,000—99,999	Nil	Nil
III	20,000—49,999	Nil	Nil
IV	10,000—19,999	1. Supaul	17,460
		2. Saharsa	14,803
		3. Madhepura	11,832
V	5,000—9,999	4. Murliganj	9,848
		5. Birpur	8,061
		6. Nirmali	5,423
VI	Below 5,000	Nil	Nil

All the 6 towns of Saharsa district have been treated as such for the first time in 1961. Four of them, viz., Supaul, Saharsa, Madhepura and Murliganj have notified area committees.

* Census of India 1961, Bihar, Vol. IV, Part II-A, General Population Tables.

7. POPULATION

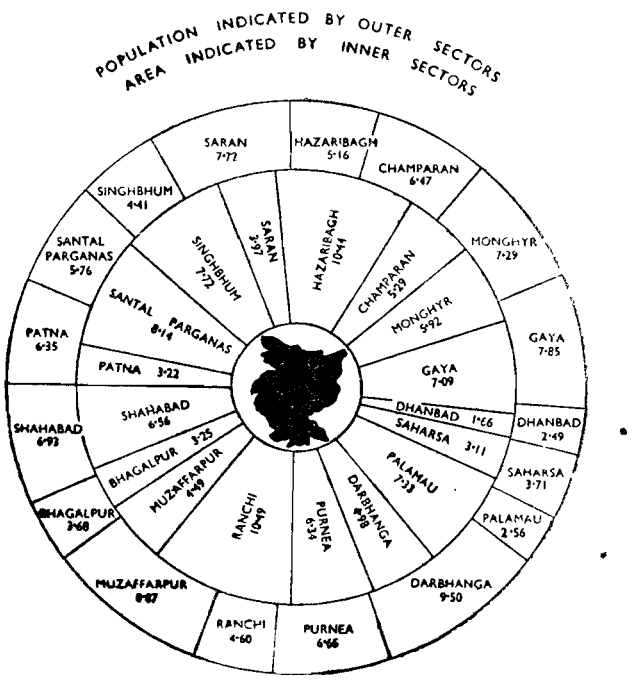

General

The district of Saharsa contained 1,723,566 persons at sunrise on the 1st March, 1961. Its population is much below the average of 2,732,683 persons per district in Bihar. Comprising only 3.71 per cent of the State's population, Saharsa ranks 14th among the districts of Bihar in order of population. The three districts having smaller population than Saharsa are Bhagalpur, Palamau and Dhanbad. Among the 328 districts of India, Saharsa ranks 86th in order of population.

Compared to some other countries of the world, the population of Saharsa is higher than that of Jordan (1.69 millions, 1961) as well as Albania (1.63, millions, 1960), more than two thirds of New Zealand (2.41 millions, 1961) and about one fourth of Ghana (6·73 millions, 1960).

The population of the district and each anchal/ town is given in Table A-I at page 7 of Part I. The diagram below compares the percentages of area and population of different districts in Bihar.

PERCENTAGE OF POPULATION AND AREA OF DISTRICTS

Distribution of Population

Among the three subdivisions of Saharsa, Supaul subdivision is easily the most populous containing 39 per cent of the district population. The other two subdivisions, Madhepura and Sadar, contain 37 per cent and 24 per cent respectively of the district population.

Among the anchals, Kishanganj has the highest population (122,523), and Marauna the lowest (34,608). Apart from Kishanganj, the following four anchals have population exceeding one lakh each.

Name of anchal	Population
1. Supaul	112,802
2. Sour Bazar	108,758
3. Madhepura	105,637
4. Singheshwar	102,589

The average population of an anchal in the district is 82,075. As many as 10 anchals out of 21 or 48 per cent of the total, have higher population than the average indicated above. They contain as much as 59 per cent of the total district population.

Density of Population

The density of population in Saharsa district is 819 persons per sq. mile which is much higher than the State average of 694 persons per sq. mile and more than double the all-India average of 358 persons per sq. mile. Among the districts of the State, it ranks 8th in order of density; in Bhagalpur division, it is next only to Monghyr.

Among the subdivisions, Madhepura is the most thickly populated area (930 per sq. mile) followed by Sadar (908) and Supaul (720).

Considering anchals, only three have densities exceeding 1,000 persons per sq. mile. Kahara anchal

which contains Saharsa town is at the top with 1,091 persons per sq. mile. The other two anchals are Kishanganj (1,054) and Sonbarsa (1,004). Both are contiguous to each other. As many as 10 anchals have densities varying between 800—1,000. These are—Madhepura, Chausa, Supaul, Sourbazar, Murliganj, Singheshwar, Kumar Khand, Alamnagar, Pipra and Tribeniganj. All of them except Chausa and Alamnagar form a compact block in the middle of the district. Five anchals, viz., Nauhatta, Raghopur, Mahishi, Chhatapur and Kishanpur, have densities varying between 600—800. Only three anchals have less than 600 persons per sq. mile. These are Basantpur (566), Marauna (537) and Nirmali (521). They comprise one block in the northern portion of the district. The anchals lying on the western and northern parts of the districts have generally low densities, as they are in the Kosi belt.

Growth of Population

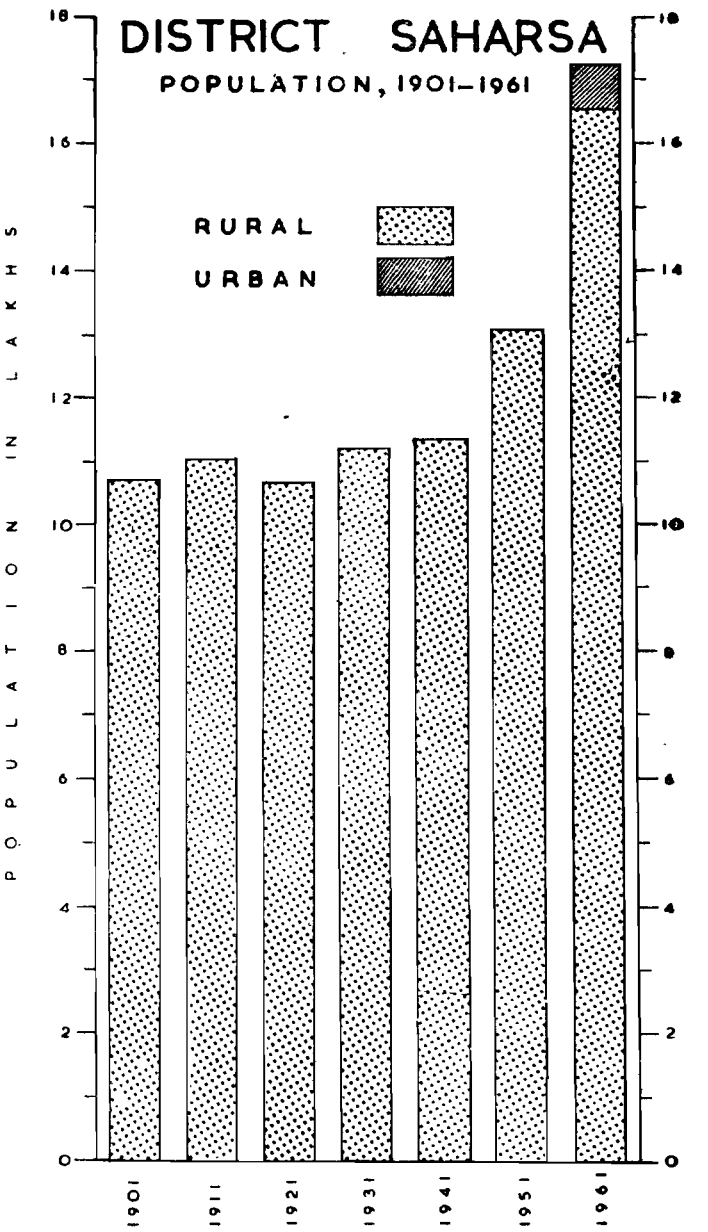

The Saharsa district was constituted in 1954 by carving out Supaul and Madhepura subdivisions from the Bhagalpur district. The table below delineates since 1872 the growth of population of these two subdivisions. Per cent variations in the State population have also been indicated below for comparison :

Growth of population in Saharsa 1872—1961

Year	Population	Variation	Per cent variation	
			Saharsa district	Bihar State
1	2	3	4	5
1872	956,833*	..	..	..
1881	998,880*	+42,047	+4.39	+15.56†
1891	1,057,067*	+58,187	+5.83	+5.94†
1901	1,070,210	+13,143	+1.24	+0 22†
1911	1,103,281	+33,071	+3.09	+3.67
1921	1,067,125	—36,156	—3.28	—0.66
1931	1,120,668	+53,543	+5.02	+11.45
1941	1,135,818	+15,150	+1.35	+12.20
1951	1,303,198	+172,380	+15.18	+10.27
1961	1,723,566	+415,368	+31.75	+19.77

* Taken from respective census reports.
† Unadjusted for changes in territory after 1951.

The diagram below depicts the growth of rural and urban population of the district since 1901.

The district is well on way to doubling its 1872 population within ninety years. The bulk of the increase has, however, taken place after 1921. In fact, the increase in population during the decade 1921—31 was itself nearly half the net accretion to it during the preceding five decades. The excerpts from the Census Report of 1951 appearing on the next page give a succinct

account of the trends and factors operating behind the growth of population during the entire period 1872—1951 :

> "Saharsa recorded an increase of only 4.4 per cent at the 1881 census. In all probability, the population remained more or less stationary during the 1872—80 period. The Kosi had started on a westward swing between 1850 and 1875, and was moving more and more into this district. In the 1881—90 decade the population increased by 5.8 per cent, the main increase being in the Supaul and Bangaon thanas while due to the ravages of the Kosi, there was a sharp fall in the population of Kishanganj thana and only small increases in Madhipura and Pratapganj thanas. During the next decade (1891—1900), the population increased by 1.2 per cent only, the increase being mainly in the Pratapganj thana, while at the same time, there was a fall in the population of Kishanganj and Madhipura thanas which were greatly affected by the Kosi at this time. In the next decade (1901—10), the population increased by 3.1 per cent, but the Kosi having moved further west, the population of Kishanganj thana which had suffered a large fall during the two previous decades now increased by nearly 40 per cent, while Pratapganj, Bangaon and Supaul lost in population. As in other districts, the growth of population received a severe set-back in the next decade (1911—20). There were severe outbreaks of cholera in 1915 and 1916 ; cholera took a heavy toll of lives also in 1911 and 1918. The 1918 epidemic of choelra was followed by the great influenza epidemic. The 1921 census showed a decrease in population of 3.2 per cent. There was fall of population in every thana except Kishanganj which again recorded a substantial increase owing largely to migration from other thanas under pressure of the Kosi floods.

In the 1921—30 decade, climatic conditions were generally favourable. There were very heavy and persistent floods in the Kosi in 1927, but conditions were better than normal in the remaining years though malaria and bowel complaints were very prevalent in the Kosi affected tracts. There was no severe epidemic of cholera or small-pox, and plague had disappeared completely. The 1931 census showed an increase in population of 5 per cent, the main increase being in Bangaon, Supaul and Madhipura thanas, while there was actual decrease in the population of Pratapganj and Kishanganj thanas which were most affected by the Kosi. In the following decade (1931—40), the population increased by only 1.4 per cent though as in the preceding decade, there were no serious epidemics of cholera or plague during this period. The decline in the rate of growth appears to have been due solely to the ravages of the Kosi in the Supaul subdivision of which the population declined by 12.3 per cent while at the same time the population of Madhipura subdivision increased by 12.7 per cent. Part of the increase in Madhipura was no doubt due to the movement of population from the Kosi affected areas in Supaul. Probably there was also movement of population from the Kosi affected areas in Supaul into the adjoining Nepal territories and Darbhanga district. In the last decade

(1941—50) the population of the Saharsa sub-district has increased by 15.1 per cent, which is the highest recorded increase during this period for any district in North Bihar. The Madhipura subdivision accounts for the whole of this increase and Supaul has once again decreased in population though as the Kosi has been moving further west, the decrease this time is only 3.3 per cent as compared with 12.3 per cent in the preceding decade. There can be no doubt, however, that part of the increase in Madhipura subdivision is due to migration of population from Supaul subdivision and from affected parts in Darbhanga district."

The rate of growth in Saharsa's population during the last decade has been the highest ever on record. This rate (31.75 per cent) is more than 1½ times the State average of 19.77 per cent and is also the highest among the districts except Purnea (37.02 per cent).

The main reason behind the big spurt of population all over the country during the last decade is believed to be a significant fall in the death rate. Improved public health conditions, better arrangements for medical treatment, the utilisation of modern techniques in surgery and the discovery of wonder drugs have gone a long way towards lowering the death rate in general and the infant mortality rate in particular. Without any corresponding lowering of birth rate, therefore, a high rate of increase of population is but natural. Unfortunately, because of the admitted deficiencies in registration of vital statistics relating to births and deaths, there is not much scope for testing the correctness or otherwise of the above postulates, with reference to the actual figures of births and deaths.

Nonetheless, it will be pertinent to observe from the statistics in Table VS-II at page 86 of Part I that epidemics were largely controlled during the last decade. Out of a total of 801 deaths from cholera during the decade, 605 persons died during 1953 and 1954. Small-pox took a toll of 2,882 lives, of whom only 64 related to the years 1959 and 1960. It would thus appear that the later years of the decade were comparativly free from epidemics of cholera and small-pox. Even deaths from fever showed a declining trend.

Another factor having an important bearing on the growth of population is migration which is dependent upon general economic conditions prevailing in the district. From an economically backward district like Saharsa, it is expected that there will be outward movement of population in search of employment. The trend is reverse when there is affluence at home. Unfortunately, a complete picture of migation trends at the district level is not available, for data relating to inter-State emigrants have not been sorted by the districts of origin for any census except 1921. However, some indication of the general trend can be had from the following figures. In 1951, as against 57,062 immigrants in Saharsa district there were 119,572 emigrants from Saharsa to other districts of the State. In 1961 the position is entirely changed. As against 140,823 immigrants from other districts of the State, there were only 96,580 emigrants to other districts. The change appears to have been brought about by the control of river Kosi which played great havoc with the life and property of inhabitants of the district in the past. This has also led to a striking improvement in the general healthiness and climate of the area. A significant portion of the increase is also due to the increase in the Muslim population, which might have occurred as a result of the return of those who had left in the wake of post-partition disturbances. It is noteworthy that in 1951, the Muslim population had registered a steep fall. Lastly, the creation of Saharsa as an independent district must have also contributed to its increase in population by extending the avenues for employment and other economic activities.

Increase in population during the last decade for the district, subdivisions and anchals is shown in the following statement :

Per cent variation in population of Saharsa, 1951—1961

District/Subdivision/ Anchal	Population		Decade variation	Per cent decade variation
	1961	1951		
1	2	3	4	5

Chausa	68,190	53,951	+14,239	+26 39

NOTE : 1951 populations of anchals have been taken from the E-Summary Tables of 1951 Census. Where a police station of 1951 has been split into two or more anchals, the 1951 population of the police station has been distributed among the anchals in the same proportion as in 1961.

The map given between pages XIV and XV shows the percentage variation in different anchals of the district during 1951—61. Among the subdivisions, Supaul subdivision registered the highest growth rate of 53.71 per cent. Madhepura and Sadar subdivisions (21.46 and 20.15 respectively) had lower growth rates than the district average of 31.75 per cent.

Among the anchals, Nirmali (166.31 per cent), Kishanpur (161.06 per cent) and Marauna (161.05 per cent) have each registered abnormally high growth rates. All these three anchals fall in the north-western end of the district and are contiguous to each other. Basantpur (88.24 per cent), Pipra (64.79 per cent) and Supaul (64.78 per cent) are the other three anchals showing high rates of increase in the same belt. Kahara, Nauhatta, Mahishi on the south-west corner of the district and Chhatapur on the north-east have shown growth rates varying between 36—39 per cent. Out of the remaining 11 anchals, 4 have shown growth rates between 26—28 per cent, 6 between 9—19 per cent, and Sour Bazar is the solitary anchal showing a small decrease of 0.98 per cent.

The Rural and Urban Populations

Till 1951, the district of Saharsa was entirely rural. In 1961, however, six places were brought on the urban list. These are—Supaul (17,460), Saharsa (14,803), Madhepura (11,832), Murliganj (9,848), Birpur (8,061) and Nirmali (5,423). The district has an urban population of 67,427 which works out to 3.91 per cent of its total population but a mere 1.72 per cent of the State's urban population. It is significant to note that this district, even now, is the least urbanised in the State.

Saharsa town, though headquarters of the district is less populous than Supaul, a subdivisional headquarters. Both these towns are mainly service towns with 38.08 and 28.19 per cent respectively of their working population engaged in 'other services'. The areas of these towns are 5.43 and 8.50 sq. miles respectively.

Madhepura, another subdivisional headquarters, is also a service town with 35.67 per cent of its working population engaged in 'other services'. The area of this town is 3.06 sq. miles. Murliganj and Nirmali are important centres of trade, particularly for food grains. Employment in the former town is, however, highest in agriculture (42.19 per cent) while in the latter it is so in 'other services' (33.36 per cent). The area of these towns are 4.94 and 2.04 sq. miles respectively.

Birpur with an area of 5.19 sq. miles and 37.04 per cent of the working population engaged in 'other

services' has come into prominence as the chief operational township of the Kosi Project. It is provided with urban amenities and is similar to new project townships like Maithon and Panchet.

8. MIGRATION

In Indian census, migration is determined solely by the concept of place of birth. Thus, a person born at a place other than the village or town of enumeration is treated as an immigrant. Immigrants can be suitably classed according to their place of birth as intra-district immigrants (those born elsewhere in the district of enumeration), inter-district but intra-State immigrants (those born in other districts of the State), inter-State immigrants (those born in other States of India) and international immigrants (those born outside India). Emigrants from the district are those who were born in the district but were enumerated outside it. They may also be suitably classed in the manner indicated above as intra-State, inter-State and international emigrants. Information is however, not available for the very few persons who were born in this district but migrated outside the country.

The distribution of population enumerated in Saharsa district in 1961 by place of birth is given in the following statement :

Distribution of population in Saharsa district by place of birth

Birth place	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10
Total Population	**1,723,566 (100.00)**	**886,440 (100.00)**	**837,126 (100.00)**	**1,656,139 (100.00)**	**848,831 (100.00)**	**807,308 (100.00)**	**67,427 (100.00)**	**37,609 (100.00)**	**29,818 (100.00)**
Born—									
(i) At the place of enumeration	1,178,832 (68.39)	722,545 (81.51)	456,287 (54.51)	1,144,305 (69.09)	701,829 (82.68)	442,476 (54.81)	34,527 (51.21)	20,716 (55.08)	13,811 (46.32)
(ii) Elsewhere in the district of enumeration	387,789 (22.50)	103,726 (11.70)	284,063 (33.93)	372,413 (22.49)	97,060 (11.44)	275,353 (34.11)	15,376 (22.80)	6,666 (17.73)	8,710 (29.21)
(iii) In other districts of Bihar	140,823 (8.17)	52,733 (5.95)	88,090 (10.52)	126,238 (7.62)	44,346 (5.22)	81,892 (10.14)	14,585 (21.63)	8,387 (22.30)	6,198 (20.78)
*(iv) In other States of India	7,041 (0.41)	4,227 (0.48)	2,814 (0.34)	5,127 (0.31)	3,058 (0.36)	2,069 (0.26)	1,914 (2.84)	1,169 (3.11)	745 (2.50)
(v) Outside India	9,081 (0.53)	3,209 (0.36)	5,872 (0.70)	8,056 (0.49)	2,538 (0.30)	5,518 (0.68)	1,025 (1.52)	671 (1.78)	354 (1.19)

*Includes birth place 'Unclassifiable'

NOTE : Figures within brackets indicate percentages.

68.39 per cent of the population of the district was enumerated at the place of birth, a proportion almost equal to that for Bihar (69.31 per cent). Those born elsewhere in the district accounted for less than a quarter (22.50 per cent), while one out of every 12 persons enumerated in the district was immigrant from other districts of the State. Immigrants from other States of India comprised 0.41 per cent of the district population, while those coming from outside India accounted for 0.53 per cent. As this district does not border any State, the immigrants from other States to this district numbered only 7,041. On the other hand, Nepal which adjoins this district had sent as many as 8,106 immigrants to this district.

The bulk of migration among females is occasioned by movement consequent upon their marriage which is generally contracted outside the place of birth. Thus, while 81.51 per cent of the males

in Saharsa were enumerated at the place of birth, the corresponding proportion among females was 54.51 per cent only of which, no doubt, a considerable portion comprised unmarried girls. Marriage migration is, however, confined mostly to the district of birth. This is obvious from the fact that the proportion of females born and enumerated within the district is as high as 88.54 per cent. It may be noted, however, that inter-district immigrants comprised as much as 10.52 per cent of the female population of the district. 94.2 per cent of them came from the adjoining districts of Darbhanga, Monghyr, Bhagalpur and Purnea. These figures are indicative of the fact that the district boundaries are no barrier to marriages being freely contracted across the borders.

The immigration of both sexes from other districts and other States is proportionately higher in urban areas than rural areas.

It may be of interest to ascertain the extent of immigration to, and emigration from, Saharsa in relation to other districts of Bihar. The statement below gives the distribution per 1,000 of each separately for males and females :

Distribution of migrants to, and from, Saharsa in relation to other districts of the State 1961

Immigrants to Saharsa from—			Emigrants from Saharsa to—		
District	Males	Females	District	Males	Females
Total	**1,000**	**1,000**	**Total**	**1,000**	**1,000**
Patna	24	9	Patna	14	4
Gaya	9	3	Gaya	2	1
Shahabad	13	4	Shahabad	3	1
Saran	36	8	Saran	3	1
Champaran	8	3	Champaran	2	1
Muzaffarpur	49	21	Muzaffarpur	8	5
Darbhanga	246	274	Darbhanga	83	118
Monghyr	264	270	Monghyr	74	205

Distribution of migrants to, and from, Saharsa in relation to other districts of the State 1961—*concld.*

Immigrants to Saharsa from—			Emigrants from Saharsa to—		
District	Males	Females	District	Males	Females
Bhagalpur	185	130	Bhagalpur	49	80
Purnea	156	268	Purnea	723	575
Santal Parganas	8	8	Santal Parganas	8	3
Palamau	N	N	Palamau	1	N
Hazaribagh	1	1	Hazaribagh	6	2
Ranchi	1	1	Ranchi	4	1
Dhanbad	N	N	Dhanbad	8	1
Singhbhum	N	N	Singhbhum	12	2

N—denotes negligible figures

The bulk of in-migration to Saharsa is from the adjacent districts only which account for 94.2 per cent of females and 85.1 per cent of males among inter-district immigrants to Saharsa. There is no other district which contributes even 5 per cent of such immigrants. The emigration from this district is also mostly to the bordering districts. The adjoining districts have absorbed as much as 97.8 per eent of emigrant females and 92.9 per cent of emigrant males from this district. Purnea, a contiguous district, is famous for jute cultivation. Thus the largest proportions of male emigrants (72.3 per cent) and female emigrants (57.5 per cent) from this district are found in the Purnea district.

So far the influx of immigrants from other States of India is concerned, males (4,227) predominate, their number being more than one and a half times that of females (2,814). Among the States, U. P. has sent the largest number (M—1,267, F—544), followed by West Bengal (M—918, F—613), Rajasthan (M—837, F—468), and Punjab (M—345, F—158). These four States taken together contribute nearly three fourths (73.14 per cent) of the total number of such immigrants. Similar information in respect of emigrants from Saharsa to other States of India is not available.

9. AGE, SEX AND MARITAL STATUS

Age

Single year age returns have been presented in Table C-IV of 1961*. This table has not been reproduced in the present volume for want of space. Among the Census tables published in this volume, however, is Table C-II which classifies the population of either sex in quinquennial age groups and also by marital status. Broad age groups are also shown in Tables B-I and C-III included in this volume.

*Census of India, 1961, Bihar, Vol. IV, Part II-C, Social and Cultural Tables.

Heapings into quinquennial age groups result in better appreciation of data relating to age structure as inconsistencies apparent in single year age returns are largely eliminated in the heaped age groups. While the five-year age groups have their own importance, particularly in regard to evaluation of sex ratios for the purpose of assessing economic characteristics, four broad age-groups indicative of children (0—14), young persons (15—34), middle aged persons (35—59) and elderly persons (60+) are more revealing.

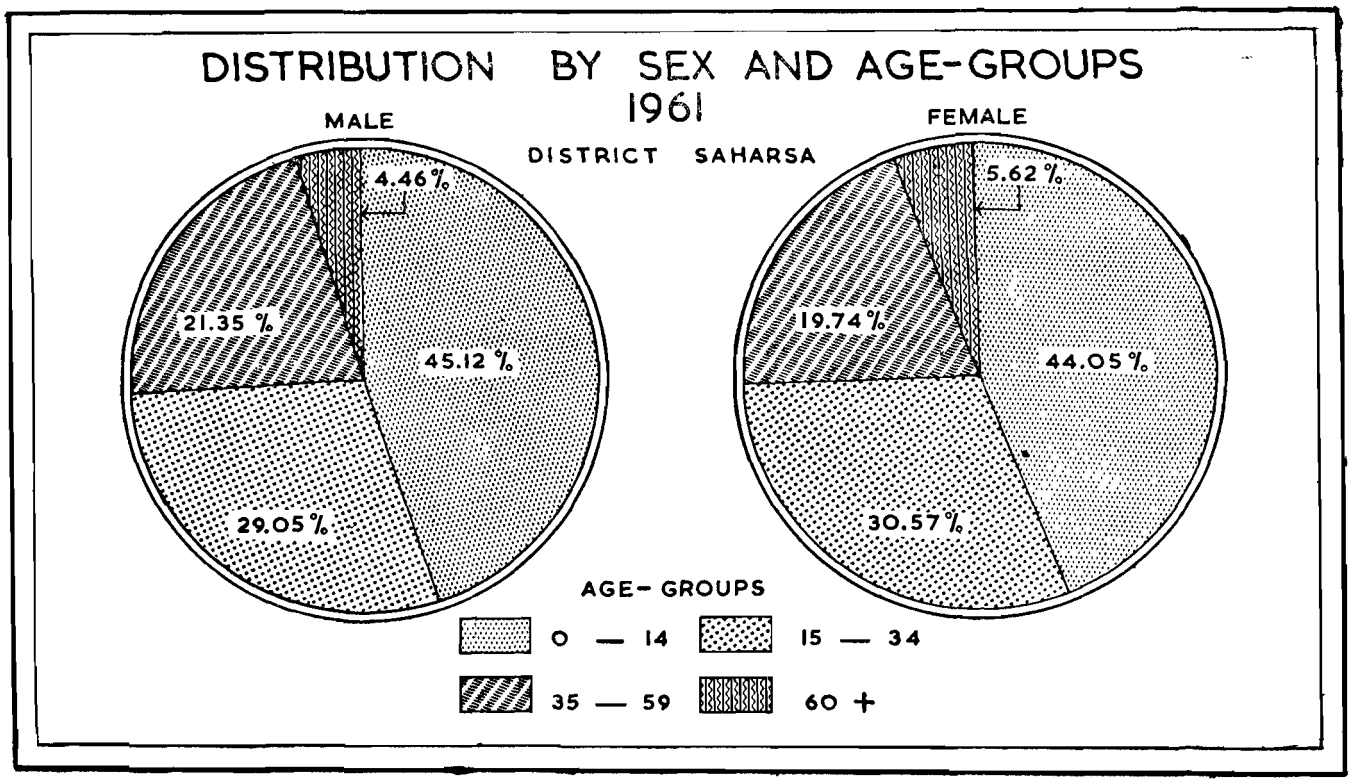

The following statement shows the distribution of population by sex and four broad age groups in Saharsa district and Bihar State :

Distribution of 1,000 persons, males and females in Saharsa district and Bihar State by broad age groups, 1961

Age groups	Saharsa district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All ages	**1,723,566 (1,000)**	**886,440 (1,000)**	**837,126 (1,000)**	**46,455,610 (1,000)**	**23,301,449 (1,000)**	**23,154,161 (1,000)**
0—14	768,693 (446)	399,936 (451)	368,757 (441)	19,653,328 (423)	10,112,846 (434)	9,540,482 (412)
15—34	513,410 (298)	257,511 (291)	255,899 (306)	14,335,615 (309)	6,976,349 (299)	7,359,266 (318)
35—59	354,526 (206)	189,226 (213)	165,300 (197)	9,845,764 (212)	5,006,949 (215)	4,838,815 (209)
60+	86,590 (50)	39,556 (45)	47,034 (56)	2,608,218 (56)	1,197,596 (52)	1,410,622 (61)
Age not stated	347 (N)	211 (N)	136 (N)	12,685 (N)	7,709 (N)	4,976 (N)

NOTE : Figures within brackets give the distribution per 1,000 persons, males and females. N—denote negligible figures.

The diagram below shows the distribution of male and female population separately by the four broad age groups :

It is evident that a little over one half (50.4 per cent) of the total population is in the working age group 15—59 years. The corresponding proportions among males (50.4 per cent) and females (50.3 per cent) are almost identical. These are indicative of the fact that the district does not send many males in the working age group to places outside the district in pursuit of employment. The pressure of population on land is low (819 persons per sq. mile) in this district. There is, therefore, sufficient land available in the district to keep a major portion of the working males engaged in agriculture. The proportion of children (age group 0—14) is higher in Saharsa than in the State. This may be attributable partly to the higher rate of population increase in the district (+31.75 per cent). The proportion of elderly persons is naturally low.

According to Sundburg "half of the total population is always made up of persons between 15 and 50 years of age, while the fluctuations in the lower and higher categories respectively indicate whether the population is progressive, stationary, or retrogressive"*. Thus a proportion of 40 per cent or more in the age group 0—14 is indicative of the population being progressive, 33 per cent of its being stationary and 20 per cent of its being retrogressive. By these criteria it would seem that Saharsa district and Bihar State have highly progressive populations and, comparatively, the former is more so than the latter.

Another interesting feature is the high proportion as well as number of elderly females, both in Saharsa and Bihar. This would seem to indicate greater longevity among females.

Sex Ratio

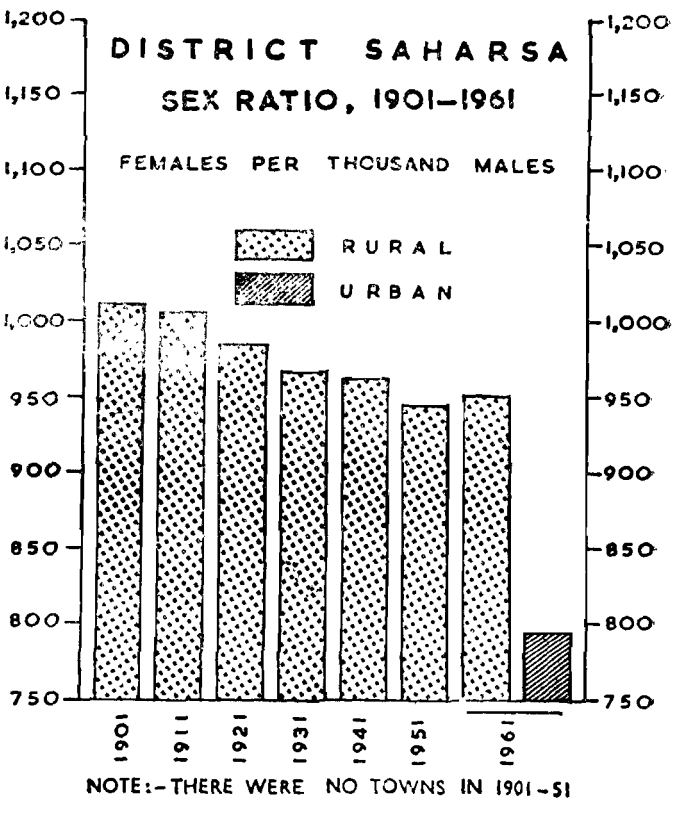

Sex ratio is determined by the number of females per 1,000 males. The district of Saharsa has a sex ratio of 944 as against 994 in the State of Bihar. Only three districts in the State have lower sex ratios than Saharsa. They are—Patna (937), Purnea (922), and Dhanbad (792).

The following statement traces the changing pattern of sex ratios in the district and the State, 1901—61 :

Variations in sex ratio in Saharsa district and Bihar State separately for total, rural and urban, 1901—61

Census	Number of females per 1,000 males					
	Saharsa district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1901	1,010	1,010	..	1,054	1,057	997
1911	1,006	1,006	..	1,044	1,048	936
1921	984	984	..	1,016	1,023	869
1931	966	966	..	994	1,003	813
1941	962	962	..	996	1,006	828
1951	945	945	..	990	1,001	841
1961	944	951	793	994	1,012	811

The diagram below depicts the above statistics for the district by means of a graph separately for rural and urban populations :

*Census of India, 1931, Vol. VII, Bihar & Orissa, Part I, Report by W. G. Lacey, page 122.

It is of interest to note that the *de facto* population of Saharsa has never shown any surplus of females after 1911. The trend in the district has always been towards falling sex ratios since the Census of 1901. Such trend is also noticed in the State as a whole up to the year 1931. A declining sex ratio may imply that the extent of emigration of male workers from the district has been on the wane. This is understandable in view of several factors such as general improvement at home in public health and agriculture, political unrest and non-co-operation movement detracting potential emigrants from leaving their kith and kin.

It is natural that the rural areas, which provide the bulk of emigrants, should have higher sex ratio than the urban areas. This is true of the State for all censuses since 1901. Since there was no town in the district of Saharsa prior to 1961, comparison between rural and urban sex ratios within the district is possible for 1961 only. The 1961 Census figures reveal that the sex ratio in rural areas is much higher than that in urban areas. The urban areas, in fact, suffer from a chronic shortage of females. This is a feature common to most towns in northern India. Evidently, the towns serve only a limited purpose as the population is mainly agricultural with its moorings in villages. People take to towns only for certain specific purposes such as employment, education, trade, business, profession, etc. Most of these avocations concern men only, who come to or live in towns only as a sort of makeshift arrangement. They continue to keep contact with their village homes where they leave behind their families and make frequent visits to look after cultivition, observe festivals and so on. Of course definite signs of change in the pattern of living are discernible now, and an increasing number of people are making towns their permanent abode. Even so, the old order takes long to change.

Sex ratios by the broad age groups give more illuminating picture of the factors at work. The following statement does so for Saharsa district and Bihar State :

Sex ratio by broad age groups in Saharsa district and Bihar State

Age group	Numer of females per 1,000 males	
	Saharsa district	Bihar State
0—14	922	943
15—34	994	1,055
35—59	874	966
60+	1,189	1,178

As in the State so in Saharsa, the sex ratio among children (age group 0—14) is adverse. Migration is not likely to influence the sex ratio in this age group. It follows, therefore, that the deficit of females among children is mainly the outcome of biological and natural causes. Sex ratios are adverse in the age groups 15—34 and 35—59 also. The reasons for this have been alluded to earlier.

Marital Status

Table C-II at page 42 of Part I furnishes relevant statistics on marital status of the population of Saharsa. The following statement gives the distribution of 1,000 persons, males and females by marital status :

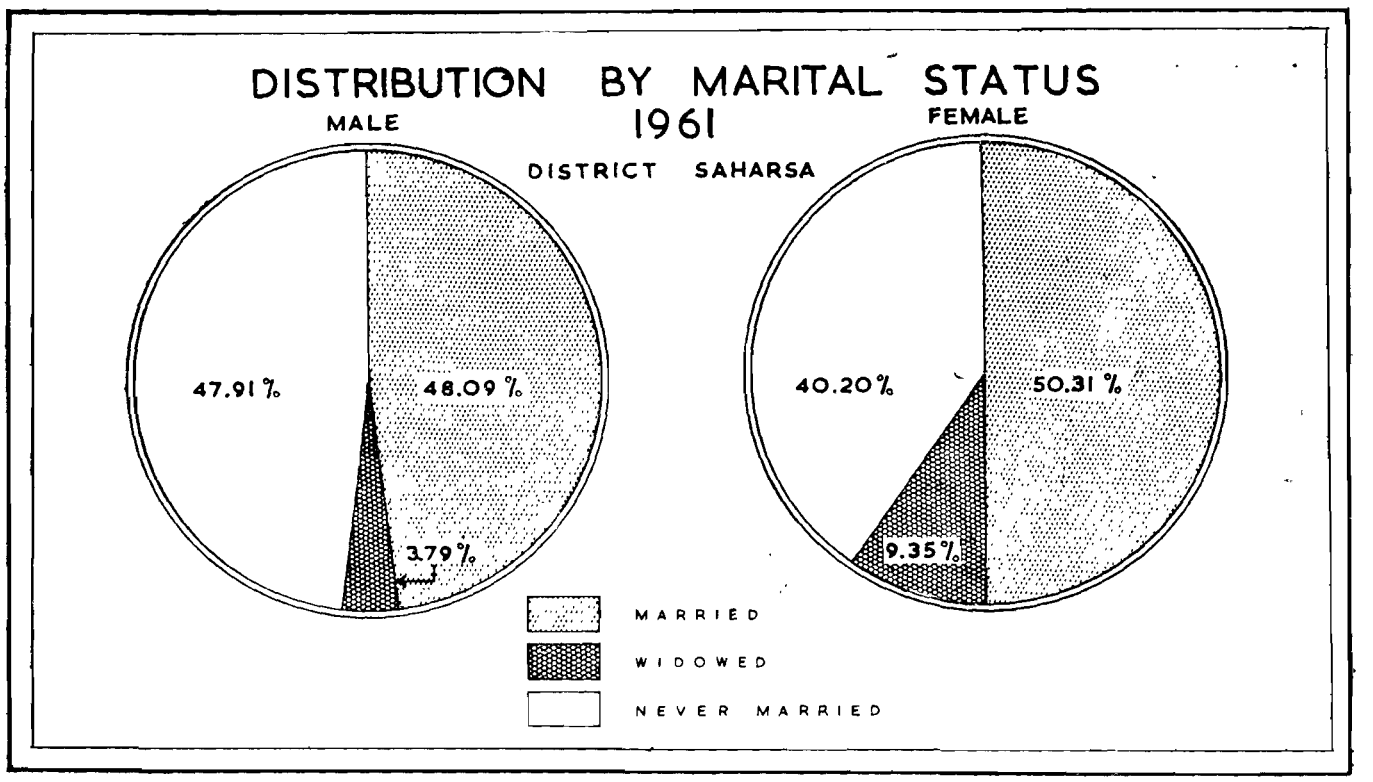

Distribution of population in Saharsa district and Bihar State by marital status, 1961

Marital Status	Saharsa district			Bihar State		
	P	M	F	P	M	F
Total	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Never married	441	479	402	447	498	396
Married	492	481	503	476	459	492
Widowed	65	38	93	74	39	109
Divorced or Separated	1	1	1	3	3	2
Unspecified status	1	1	1	N	1	1

N—denotes negligible figures.

NOTE : All persons in the age group 0—9 have been treated as 'never married' irrespective of the actual returns.

The diagram below gives for Saharsa the per cent distribution of never married, married and widowed persons separately for males and females. The figures for divorced or separated persons and those of unspecified status are too small for diagram matic representation:

Like other districts of Bihar, Saharsa has a relatively higher proportion of 'never married' males and 'married' females. This is explained by the fact that girls get married at much younger age than boys. As against 47.9 per cent of 'never married' males in Saharsa, the corresponding proportion among females is 40.2 per cent only. The proportion for males is lower, and for females higher, than the corresponding proportions in the State. The proportion of married females in Saharsa (50.3 per cent) is also slightly higher than that of the State (49.2 per cent). Saharsa has, however, a slightly lower proportion of widows (9.3 per cent).

A better appreciation of marital status can be had from an analysis of marital status by broad age groups as in the following statement :

Distribution of 1,000 persons of either sex in broad age groups by marital status in Saharsa, 1961

Marital Status	Males				Females			
	0—14	15—34	35—59	60+	0—14	15—34	35—59	60+
Total	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Never married	947	168	13	9	887	35	2	1
Married	53	814	897	653	113	940	762	279
Widowed	N	14	87	334	N	23	234	717
Divorced or separated	N	1	2	3	N	1	1	2
Unspecified status	N	3	1	1	N	1	1	1

N—denotes negligible figures.

Notwithstanding the fact that all persons aged 0—9 were treated as 'never married' irrespective of the actual returns made by them, as much as 5.3 per cent of males and 11.3 per cent of females in the age group 0—14 have been returned as married. The corresponding proportions for the State are 3.5 and 8.2 per cent respectively. These tend to show that child marriages, particularly among females, are quite common in the district. Compared to other districts of the State, Saharsa ranks third and second respectively so far as the proportions of married males and married females in the age group 0—14 are concerned. The districts having higher proportions of married males in this age group are Gaya (6.1 per cent) and Darbhanga (5.9 per cent). Monghyr is the only district with higher proportion (11·4 per cent) of married females.

The universality of marriage, particularly among females, is established by the fact that only 0.2 per cent of females in the age group 35—59 and 0.1 per cent in the age group 60+ belong to the category 'never married'. It is also significant that only 3.5 per cent of females in the age group 15—34 are 'never married'. The corresponding proportions among males are very much higher.

In regard to widowed persons, it is only natural that with the restrictions prevalent among the Hindus on widow re-marriage, the proportions of widows should be appreciably higher than those of widowers in each age group.

10. LITERACY AND EDUCATION

In the district of Saharsa, 241,410 persons comprising 14.01 per cent of its total population are able to read and write or have attained higher educational level. The corresponding percentage for Bihar State is 18.40. The district has, therefore, much lower literacy rate than the State as a whole.

Children up to 4 years of age are, by definition, treated as illiterate. The effective literacy rate is, therefore, mesaured by the proportion of literate and educated persons to persons aged 5 or more. The following table illustrates the effective literacy rate per 10,000 of population in Saharsa district and Bihar State, separately for persons, males and females, and for total, rural and urban population.

Effective literacy rates for Saharsa district and Bihar State, 1961

Category of population	Persons Males Females	Number of literates per 10,000	
		Saharsa district	Bihar State
Total	P	1,669	2,175
	M	2,764	3,519
	F	494	817
Rural	P	1,577	1,909
	M	2,648	3,219
	F	438	613
Urban	P	3,902	5,021
	M	5,336	6,363
	F	2,023	3,310

In regard to total population, the effective literacy rate in Saharsa district (16.69 per cent) is lower than that in the State (21.75 per cent). Only two districts, viz., Palamau (16.41 per cent) and Champaran (15.46 per cent) have lower literacy rate than Saharsa. The literacy rate in urban areas of Saharsa is nearly two and a half times the rate in rural areas. The difference is particularly marked in case of females. While one out of every five urban females in Saharsa is literate, the corresponding proportion among rural females is one out of every twenty three. It is noteworthy that more than 53 per cent of males in urban areas are literate. The corresponding proportion in rural areas is a little less than 27 per cent.

A break-up of literate population by various educational level shows the backwardness of the district in regard to educational progress. Among the literates, 75.4 per cent can merely read and write; 19.2 per cent have crossed the primary or junior basic standard; and only 5.4 per cent have passed the matriculation or higher examinations. The classification of literate and educated persons by broad educational levels, separately for total, rural and urban areas is given below :

Classification of literate and educated persons in Saharsa district by broad educational levels, 1961

Educational levels	Total Rural Urban	Number of literates			Proportion per 1,000 of total Population			Proportion per 1,000 of all literates		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10	11
Literate (without educational level)	T	181,892	151,627	30,265	126	203	43	754	733	878
	R	168,451	142,109	26,342	121	198	39	769	749	894
	U	13,441	9,518	3,923	236	294	159	603	551	785
Primary or Junior Basic	T	46,445	42.592	3,853	32	57	6	192	206	112
	R	41,641	38,661	2,980	30	54	4	190	204	101
	U	4,804	3,931	873	84	121	35	216	228	175
Matriculation and above	T	13,073	12,716	357	9	17	1	54	61	10
	R	9,050	8,894	156	7	12	N	41	47	5
	U	4,023	3,822	201	70	118	8	181	221	40

N—denotes negligible figures.

NOTE : Total population excludes population in the age group 0—4

The contrast between rural and urban areas as also between males and females is most significant among matriculates while 11.8 per cent of urban males in Saharsa district are at least matriculates, the corresponding figures among urban females, rural males and rural females are 0.8, 1.2 and negligible respectively.

The diagram at page XXIII indicates the literacy and educational level for males and females separately for rural and urban areas.

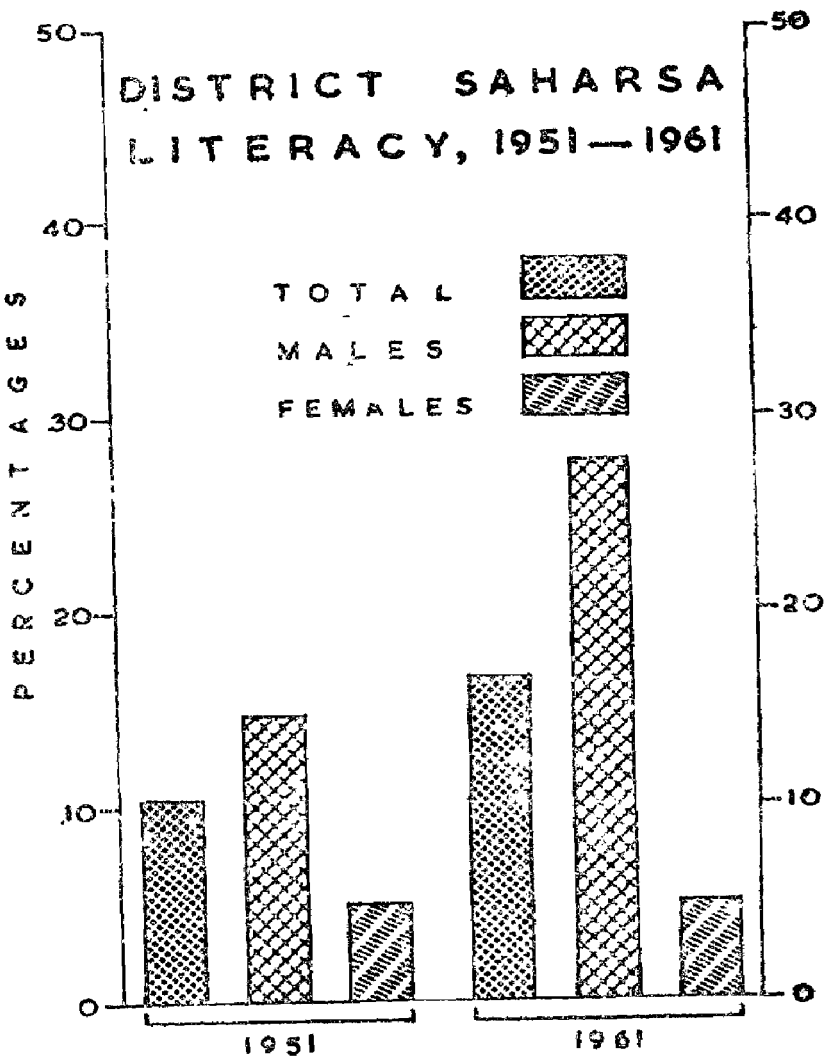

The statement below compares the literacy rates in Saharsa district and Bihar State during the period 1951—1961.

Growth of literacy in Saharsa district and Bihar State, 1951—1961

Census	Literacy rate per 10,000 of total population* in					
	Saharsa district			Bihar State		
	P	M	F	P	M	F
1	2	3	4	5	6	7
1951	1,026	1,465	499	1,345	2,194	474
1961	1,669	2,764	494	2,175	3,519	817

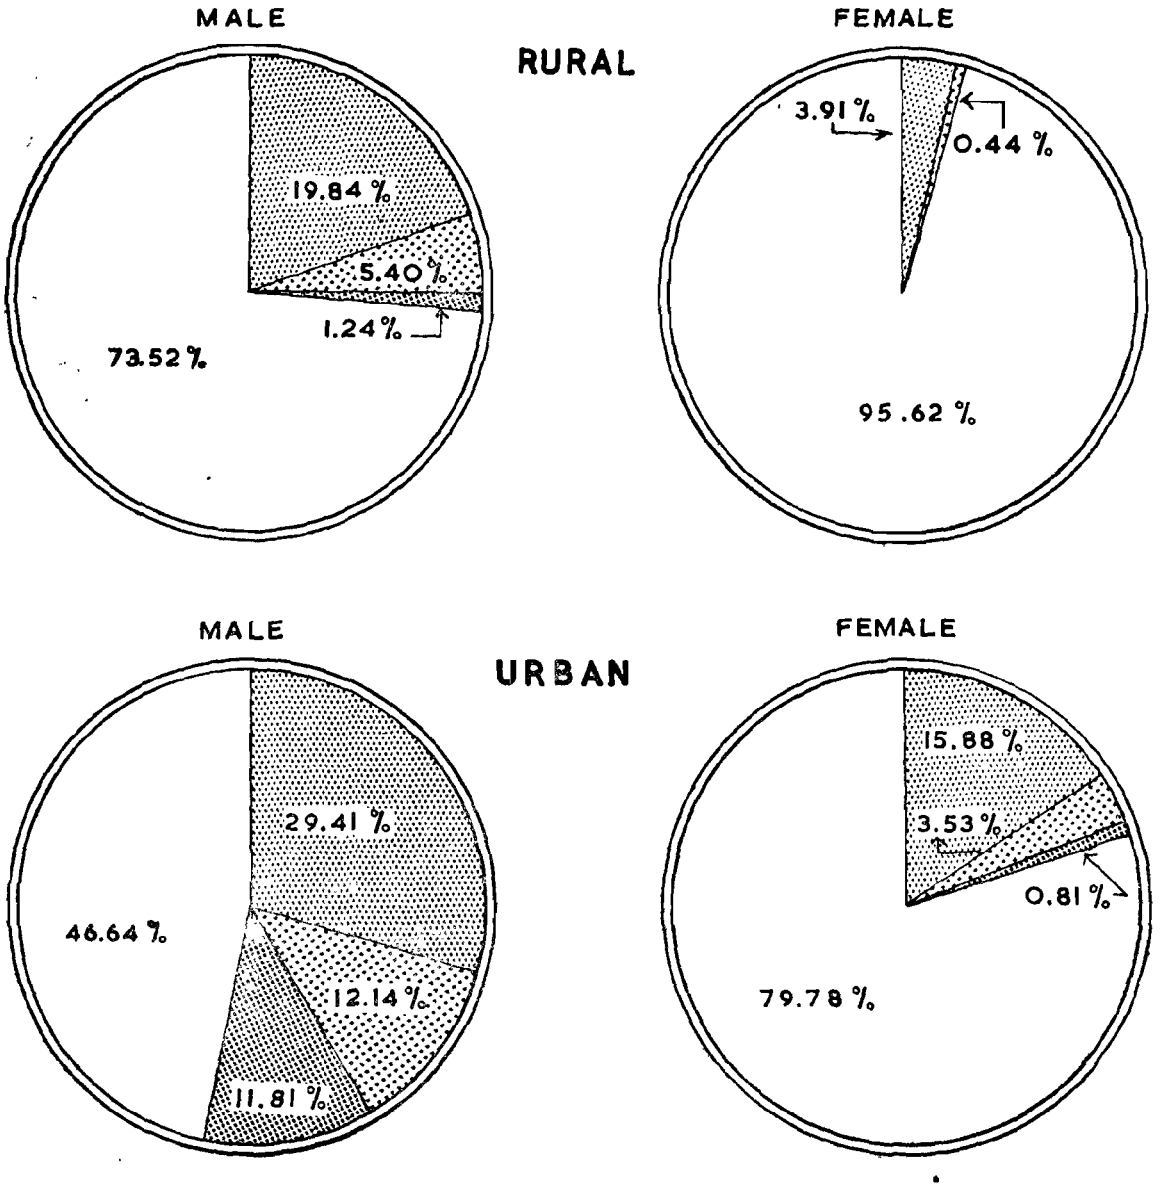

*Excluding persons in the age group 0—4

A graph illustrating the foregoing statistics for Saharsa is also given below :

LITERACY AND EDUCATIONAL LEVELS 1961

DISTRICT SAHARSA

It is evident that in 1951 the literacy rate in the distlict of Saharsa was lower than that in the State. Considering both the sexes separately, while the literacy rate among males in this district was lower than the State, opposite was the case among females. The 1961 Census reveals a gloomier picture, the literacy rates among both males and females being lower in the district than in the State. However, during the decade 1951—61, the literacy rate among total population in the district has increased by over 62 per cent, and among males it has, nearly doubled. It is distressing, however, to find that the literacy rate among females has slightly come down.

The extent of literacy among different categories of workers (*vide* economic classification given later) also throws interesting light on this subject. Relevant statistics will be found in Tables B-III Part A and B-III Part B printed elsewhere in this book. In Saharsa district, literacy is highest among workers engaged in Trade and Commerce (54.75 per cent) followed by those in Transport, Storage and Communications (48.26 per cent). As is expected, the literacy rate is lowest among agricultural labourers (3.77 per cent). Considering all workers together, the bulk of literates among them is comprised of cultivators (64.16 per cent) because of their large share in the total working population.

An idea of distribution of literacy in different parts of the district can be had from the literacy map given between pages XXIV & XXV.

The table below gives literacy rates for each subdivision, anchal and town :

Effective literacy rates in subdivisions, anchals and towns of Saharsa district, 1961

Subdivision/Anchal/Town	Literacy per 10,000
1	2
Sadar Subdivision ..	**1,789**
1. Kahara ..	2,262
Saharsa (N) ..	4,709
2. Nauhatta ..	1,520
3. Mahishi ..	1,604
4. Sour Bazar ..	1,697
5. Sonbarsa ..	1,836
Supaul Subdivision ..	**1,632**
6. Supaul ..	1,851
Supaul (N) ..	3,006
7. Pipra ..	1,469
8. Nirmali ..	1,473
8. Nirmali Town ..	3,058
9. Tribeniganj ..	1,533
10. Kishanpur ..	1,267
11. Marauna ..	1,160
12. Raghopur ..	1,849
13. Basantpur ..	2,575
Birpur Town ..	5,078
14. Chhatapur ..	1,334
Madhepura Subdivision ..	**1,628**
15. Madhepura ..	1,820
Madhepura (N) ..	4,677
16. Murliganj ..	1,846
Murliganj (N) ..	2,830
17. Kumarkhand ..	1,379
18. Singheshwar ..	1,446
19. Kishanganj ..	1,733
20. Alamnagar ..	1,502
21. Chausa ..	1,518

Basantpur, with a little over one fourth of its population literate, tops the list of anchals in literacy. The high proportion of literacy in Birpur town falling within this anchal has evidently pushed up the literacy rate of this anchal. Kahara follows next with 22.62 per cent. Here too, the explanation lies with Saharsa town falling within the anchal.

Educational Institutions and the number of Pupils.

Table EDN-I at page 111 of Part I gives the number of educational institutions of various types in the district and the number of pupils in 1960-61. There has been an appreciable increase in both enrolment and the number of educational institutions of all types during the last

86° 15′ E of GREENWICH 86° 30′ 86° 45′ 87° 0′ 87° 15′ 87° 30′

decade. The number of Primary and Junior Basic Schools rose from 679 (34 for girls) to 1,349 (90 for girls) in 1961. There were 86,562 boys and 20,720 girls on the rolls in 1961. The number of Middle and Senior Basic Schools rose from 55 (1 for girls) to 155 (6 for girls) in 1961. The number of enrolment was 17,882 (2,193 girls).

During the decade the number of High Schools, Higher Secondary and Multipurpose Higher Secondary Schools also rose from 17 to 54. In 1951 there was no High School for girls but in 1961 there were 2 girls High Schools. The enrolment in these schools was 13,031 (304 girls) in 1961.

College education has also got a fillip during the decade. As against no institution for education beyond matriculation in 1951, in 1961 there were 4 colleges with 1,674 students.

Table EDN-II at page 112 of Part I gives the location of all educational institutions of and above the level of Middle Schools.

11. LANGUAGE

Table C-V at page 48 of Part I gives the number of speakers of different languages and dialects in the district and its anchas. The statement below shows the distribution of major mother-tongues (having more than 1,000 speakers) in the district separately for total, rural and urban areas. The mother-tongues have been arranged in descending order of their numerical importance :

Distribution of major mother-tongues in Saharsa district, 1961

Mother-tongue	Number of speakers			Percentage of speakers of each language in	
	Total	Rural	Urban	Rural	Urban
1	2	3	4	5	6
All languages	**1,723,566 (100.00)**	**1,656,139 (100.00)**	**67,427 (100.00)**	..	..
Maithili	1,136,268 (65.93)	1,104,848 (66.71)	31,420 (46.60)	97.23	2.77
Hindi	435,270 (25.25)	411,189 (24.83)	24,081 (35.72)	94.47	5.53
Urdu	126,312 (7.33)	118,434 (7.15)	7,878 (11.68)	93.76	6.24
Bengali	7,975 (0.46)	7,147 (0.43)	828 (1.23)	89.62	10.38
Santali	5,690 (0.33)	5,648 (0.34)	42 (0.06)	99.26	0.74
Bhojpuri	5,091 (0.30)	4,248 (0.26)	843 (1.25)	83.44	16.56
Nepali	2,109 (0.12)	1,819 (0.11)	290 (0.43)	86.25	13.75
Rajasthani	1,608 (0.09)	784 (0.05)	824 (1.22)	48.76	51.24
Marwari	1,204 (0.07)	763 (0.05)	441 (0.65)	63.37	36.63
Others	2,039 (0.12)	1,259 (0.07)	780 (1.16)	61.75	38.25

NOTE :-Figures within brackets indicate percentages.

Maithili, the main mother-tongue of the district, has been returned by 65.93 per cent of the population. One, out of every four (25.25 per cent) persons has returned Hindi and one out of every 14 persons (7.33 per cent) Urdu as mother-tongue. The three languages taken together account for 98.51 per cent of the total population of the district. Since mother-tongue returns are to some extent indicative mainly of individual preferences rather than of any precise linguistic classification no firm conclusion can be drawn from these proportions. As a matter of fact, the whole of Saharsa district lies in a predominantly Maithili-speaking tract and a great many of the persons who returned Hindi or Urdu as their mother-tongues actually speak Maithili at home. There returns were, however, influenced by certain extraneous considerations to which a reference will be found in the General Report on 1961 Census.

Speakers of Bengali (0.46 per cent), Santali (0.33 per cent), Bhojpuri (0.30 per cent), Nepali (0.12 per cent), Rajasthani (0.09 per cent) and Marwari (0.07 per cent) taken together comprise 1.37 per cent of the district population. It is noteworthy that the speakers of all the major mother-tongues except Rajasthani were mostly enumerated in rural areas of this district.

12. RELIGION

The distribution of population by religion is given up to anchals in Table C-VII at page 52 of Part I. The following statement shows the number and per cent distribution of population by religion in total, rural and urban areas of the district.

Distribution of population by religion in Saharsa district, 1961

Religion	Number of followers			Per cent of each religion in	
	Total	Rural	Urban	Rural	Urban
1	2	3	4	5	6
All Religions	**1,723,566 (100.00)**	**1,656,139 (100.00)**	**67,427 (100.00)**	..	..
Hindus	1,533,663 (88.98)	1,478.919 (89.30)	54,744 (81.19)	96.43	3.57
Muslims	187,402 (10.87)	175,388 (10.59)	12,014 (17.82)	93.59	6.41
Christians	**1,416** (0.08)	1,247 (0.08)	169 (0.25)	88.06	11.94
Jains	784 (0.05)	366 (0.02)	418 (0.62)	46.68	53.32
Sikhs	241 (0.02)	171 (0.01)	70 (0.10)	70.95	29.05
Buddhists	42 (N)	30 (N)	12 (0.02)	71.43	28.57
Others	18 (N)	18 (N)	0	100.00	0

N—denotes negligible figures ; 0—denotes nil.
NOTE : Figures within brackets indicate percentages.

The Hindus comprise 88.98 per cent of the population and the Muslims 10.87 per cent. Other religious groups together constitute a mere 0.15 per cent.

The rural-urban break-up indicates that all religious groups except Jains flourish mainly in rural areas. The adherents of Jain religion, mostly from Rajasthan, are engaged in trade and commerce. They had, it seems, established themselves in large numbers in important areas which have been treated as towns in 1961. Of the Hindus and Muslims, who are found mostly in rural areas, the latter are comparatively more urbanised.

The table below shows the growth of each religious group in the district during the decade 1951—61.* The figures for Christians, Jains, Sikhs and Buddhists are, however, small and have been given separately in the foot-note below the table:

Variations in population of each religious group, 1951—61

Census	Hindus		Muslims	
	Number	Percentage decade variation	Number	Percentage decade variation
1951	1,224,616	..	83,235	-
1961	1,533,663	+25.24	187,402	+125.15

NOTE : Absolute figures for Christians, Jains, Sikhs and Buddhists are given below :

Religion	1951	1961
Christians	251	1,416
Jains	96	784
Sikhs	..	241
Buddhists	-	42

The Hindus comprised 93.61 per cent and the Muslims only 6.36 per cent of the district population in 1951. But during the last decade, while the Hindus have suffered slight diminution by 4.63 per cent in their proportion, the Muslims have registered an increase by 4.51 per cent. The reasons will become apparent by a reference to the section on growth of population.

The Hindus are the most numerous religious group in the district. During the last decade their population increased by 25.24 per cent as against 31.75 per cent increase in the total population of the district. The Muslim population increased by 125.15 per cent during the same period.

Among the minor religious groups, the Christians showed an abnormal increase in 1961. While the Jains have multiplied eight times during the last decade, the Sikhs and the Buddhists have appeared for the first time in 1961.

*Figures relating to religious groups for censuses prior to 1951 are not available.

The sex ratios for different religious groups in the district are—Hindus-947 ; Muslims-931 ; Christians-757: Jains-712; Sikhs-289; Buddhists-273. The lowest sex ratio is among the Buddhists. This is explained by the fact that their population consists generally of monks and mendicants who are males. The low sex ratio among the Sikhs is indicative of the immigrant nature of their population.

13. THE SCHEDULED CASTES AND SCHEDULED TRIBES

According to the 1961 Census, the total population of scheduled castes in Saharsa district was 296,130. They comprised 17.18 per cent or a little more than one sixth of the total population of the district. The corresponding percentages in previous c nsuses were—15.66 in 1951 ; 13.68 in 1941 ; and 14.68 in 1931. The above statistics show that th re has been continuous rise in the proportion of scheduled castes in the district since 1941. The proportion in 1941 was, however, lower than the p oportion in 1931.

In the State as a whole, the scheduled castes account for 14.00 per cent of the total population. Saharsa ranks twelfth among the districts of Bihar in the population of scheduled castes but its position is elevated to third if the proportions of scheduled castes only in each district are taken into account. Only Palamau (25.93 per cent) and Gaya (24.54 per cent) have higher proportio s of scheduled castes in their population.

The greatest concentration of scheduled castes in the district is in Chhatapur anchal of Supaul subdivision where they constitute 22.2 per cent of the population. Other anchals having 20 per cent or more scheduled caste population are—Murliganj (21.6 per cent) ; Sonbarsa (21.0 per cent); Kumarkhand (20.5 per cent) and Tribeniganj (20.0 per cent). Marauna anchal of Supaul subdivision has only 9 per cent scheduled castes in its population. This is the lowest proportion among the anchals of the district. It is noteworthy that the anchals with highest and lowest proportions lie in the Supaul subdivision. In other anchals, the proportions are between 11—19 per cent.

The statement below lists the scheduled castes having more than 1,000 persons in the district :

Population of scheduled castes having more than 1,000 persons in Saharsa district, 1961

Name of Scheduled Caste	Population 1961	Number per 1,000 of	
		Total scheduled caste population in the district	Total population of the respective scheduled caste in the State
1. Musahar	127,027	429	126
2. Chamar or Mochi	64,667	219	34
3. Dusadh including Dhari or Dharhi	56,597	191	33
4. Bantar	24,091	81	535
5. Dhobi	9,484	32	29
6. Dom or Dhangad	4,533	15	28
7. Pasi	2,254	8	9
8. Hari, Mehtar or Bhangi	1,235	4	14
Total	289,888	979	55

The above eight castes comprise 97.9 per cent of the total scheduled caste population of the district. The Musahars account for nearly 43 per cent. The district also had a concentration of Bantars (53.5 per cent), more than half of them being found here.

Among the remaining scheduled castes (*see* Table SCT-I Part A at page 60 of Part I) 4,911 persons have been returned under the category 'Unclassified'. It relates to cases in which vague entries such as Harijan, Achoot, etc., were made without specifying the exact name of the scheduled caste to which the person belonged.

The population of scheduled tribes in Saharsa district in 1961 is 7,605 and they form a little less than 0.5 per cent of the district population.

In previous censuses, their population and percentage to total population were as follows :

Year	Population	Percentage
1951	28,366	2.17
1941	23,194	2.04
1931	2,666	0.24

The drop in the population of scheduled tribes from 28,366 in 1951 to 7,605 in 1961 may appear to be somewhat surprising. But it may be noted that in 1941 Census, while the bulk of scheduled tribes was comprised of Santals (21,809), the number of Santals returned in 1961 Census is only 5,311. It appears that a large number of Santals left this district after 1951.

The concentration of scheduled tribes is in Madhepura subdivision which contains 61 per cent of the total population of the scheduled tribes in the district. Murliganj anchal has the highest population of scheduled tribes (2,117) followed by Kishanganj anchal (1,020). Both these anchals lie in Madhepura subdivision.

14. HOUSING

Tables E-I, E-II, E-IV, and E-V, published in Part IV-B of the 1961 Census Publications relating to Bihar, contain information on various characteristics of housing in rural and urban areas of the district and anchals.

Use of Houses

The total number of houses in Saharsa district, according to the houselisting operations conducted in September-October, 1960, was 334,313. It ranked fourteenth among the districts of Bihar in the number of houses. The three districts with smaller number of houses are Bhagalpur (289,435 houses), Dhanbad (236,984 houses), and Palamau (230,994 houses). As against 3 per cent in the State, as much as 8.3 per cent of the houses in Saharsa were found vacant, that is, they were not put to any specific use. It follows that 91.7 per cent of the houses in Saharsa were occupied. In comparison to other districts of the State, the proportion of occupied houses in Saharsa is the lowest. It is noteworthy that 80.5 per cent of the houses in Saharsa were used solely for the purpose of dwelling or shop-*cum*-dwelling or workshop-*cum*-dwelling. The corresponding proportion for the State is 79.8 per cent.

An idea of the different kinds of uses to which census houses are put in Saharsa district can be had from the followirg table which also gives comparative figures for Bihar State :

Number and distribution of 1,000 census houses in Saharsa district by kinds of uses, 1960

Kinds of uses	Number	Proportion per 1,000 census houses	
		Saharsa district	Bihar State
Total Census houses	**334,313**	**1,000**	**1,000**
A. Vacant during houselisting	27,845	83	30
B. Occupied census houses used as—			
(i) Dwellings (including shop-*cum*-dwellings or workshop-*cum*-dwellings)	269,283	805	798
(*a*) Dwellings	261,357	782	765
(*b*) Shop-*cum*-dwellings	4,915	14	13
(*c*) Workshop-*cum*-dwellings	3,011	9	20
(ii) Hotels, Sarais, Dharamshalas, tourist homes and inspection houses	263	1	1
(iii) Shops excluding eating houses	3,215	10	15
(iv) Business houses and offices	1,080	3	4

Number and distribution of 1,000 census houses in Saharsa district by kind of uses, 1961—*concld.*

Kinds of uses	Number	Proportion per 1,000 census houses	
		Saharsa district	Bihar State
(v) Factories, workshops and worksheds	1,190	4	8
(vi) Schools and other educational institutions includirg training classes, coaching and shop classes	1,564	5	5
(vii) Restaurants, sweetmeat shops and eating places	86	N	1
(viii) Places of entertainment and community gathering (Panchayat *Ghar*)	3,726	11	10
(ix) Public health and medical institutions, hospitals, health centres, doctor's clinics, dispensaries, etc.	229	1	1
(x) Others	25,832	77	127

N—Negligible

The category 'others' is a residuary groups and includes uses which could not be fitted into any of the other prescribed categories and includes entries such as *goshala, baithka, bhoosaghar*, cemetery, lavatory, kitchen, garage, pigeon house, pig house, etc.

Density of Houses

There were 154 houses per square mile in rural areas and 508 houses per square mile in urban areas of the district. The rural density is low because large areas are covered by agricultural fields, orchards, etc., which comprise the bulk of the land mass. If the areas of village settlements only were taken into account, the density of houses in rural areas would be equally high. Such a study is, however, handicapped because relevant figures are not available. The density of census houses in the rural areas of Saharsa is higher than the corresponding density (120 houses per sq. mile) for the State as a whole, but in urban areas the density is lower than that in the State (1,016 houses per sq. mile). Compared to other districts of the State, this district occupies the seventh and last place in order of density of census houses in rural and urban areas respectively. Districts having higher rural densities are—Muzaffarpur (231), Saran (219), Darbhanga (215), Patna (204), Champaran (179), and Dhanbad (162).

Status of Occupancy

99.4 per cent of households in rural areas and 76.6 per cent in urban areas of Saharsa live in owned houses. It follows that the proportion of households living in rented houses is quite insignificant (0.6 per cent) in rural areas and less than one fourth of the total households (23.4 per cent) in urban areas. The corresponding proportions for the State as a whole (2.5 per cent in rural and 43.5 per cent in urban areas) are much higher.

Material of Wall

To facilitate a study of the type of materials that comprise the structure of houses, a statement comparing the distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant material of wall, separately for rural and urban areas, in Saharsa district and Bihar State, is given below :

Distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant wall material in Saharsa district and Bihar State, 1960

Material of wall	Number per 1,000 households			
	Saharsa district		Bihar State	
	Rural	Urban	Rural	Urban
Grass, leaves, reeds or bamboo	835	584	225	88
Timber	1	1	3	6
Mud	121	74	663	289
Unburnt bricks	3	20	7	30
Burnt bricks	40	312	99	579
C. I. sheets or other metal sheets	N	7	1	3
Stone	0	0	2	3
Cement concrete	0	1	N	1
All other materials	0	1	N	1

N—Negligible ; 0—Nil.

Grass, leaves, reeds or bamboo are the most common materials of wall in rural areas of the

district of Saharsa. One of the reasons for the popularity of these materials is the frequency of floods in this district. In the State as a whole, however, mud is the most common wall material. The use of burnt bricks is confined mainly to urban areas. About one out of every three urban households in Saharsa lives in houses with walls made of bricks, the corresponding proportion for the State being a little more than one out of every 2. Obviously, it is an index of comparative backwardness of the district.

Material of Roof

Considering next the material of roof, the table below shows the distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant roof material in total, rural and urban areas of Saharsa district as well as Bihar State :

Distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant roof materials in Saharsa district and Bihar State, 1960

Material of roof	Number per 1,000 households			
	Saharsa district		Bihar State	
	Rural	Urban	Rural	Urban
1	2	3	4	5
Grass, leaves, reeds, thatch, wood or bamboo	911	573	446	125
Tiles, slate, shingle	68	168	522	524
Corrugated iron, zinc or other metal sheets	10	92	8	41
Asbestos cement sheets	2	50	1	21
Brick and lime	8	113	22	283
Concrete and stone slabs	1	4	1	6
All other materials	N	0	N	N

N—Negligible ; 0—Nil.

The above statement further confirms the picture of comparative backwardness of the district. Both in rural as well as urban areas, a much higher proportion of households have thatched roofs in preference to tiles, etc. While the proportion of the households having roofs made of corrugated iron, zinc or other metal sheets is higher in the district than in the State, opposite is the case with regard to roof made of brick and lime.

Living Accommodation

For obvious reasons, the enquiry conducted by the census at the time of houselisting did not concern itself with the exact area of accommodation available to each household. It was decided to remain content with information relating to number of rooms occupied by each household.

A 'room' was defined as follows :

> "A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, *i.e.*, it should be atleast 6 ft. long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room."

The statement below gives the distribution of households by number of rooms occupied, separately for total, rural and urban areas in Saharsa district and Bihar State :

Distribution of 1,000 census households by number of rooms occupied in Saharsa district and Bihar State, 1960

Number of rooms	Number per 1,000 households in					
	Saharsa district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
No regular room	2	1	2	2	2	4
1 room	432	433	410	363	356	441
2 rooms	321	320	342	293	296	264
3 rooms	152	153	133	155	157	127
4 rooms	61	62	59	83	84	73
5 rooms or more	32	31	54	104	105	91

Even in the matter of living accommodation, the people of Saharsa are handicapped in comparison to the State as a whole. Comparing columns 2 and 5 of the above table, we find that while in Saharsa the proportions of those living in one or two rooms are higher than those for the State, the former lags behind if proportions of those living in three to five rooms or more are taken into account. Barring the category relating to those living in 3 rooms in urban areas, this observation holds good for both rural and urban areas.

15. HOUSEHOLDS : THEIR SIZE AND COMPOSITION

Size of Households

A household means "the entire group of persons who commonly live together in the same census house and take their meal from a common mess unless the exigencies of work prevent them from doing so". A census house is "a structure or part of a structure, a dwelling, a shop, a workshop, factory or a place of business, or a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance". It follows that while the concept of census house relates to a physical unit, that of census household extends to a social unit.

The average size of a household in Saharsa district is 5.53 persons, which is almost the same as the average for the State (5.49 persons per household). The statement below compares the average size of households in total, rural and urban areas of the district and the State :

	Number of persons per households	
	Saharsa district	Bihar State
Total	5.53	5.49
Rural	5.55	5.51
Urban	5.18	5.33

In Saharsa the average size of a household in rural areas is larger than in urban areas, a pattern similar to that in the State.

Lest the overall average give an erroneous impression about the size of households, the following table shows the distribution of 1,000 households by different sizes.

Distribution of 1,000 households in Saharsa district and Bihar State by their size, 1961

Size of the household	Saharsa district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
All sizes	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Single member	50	48	113	57	53	99
2-3 members	189	188	208	211	209	232
4—6 members	453	454	404	436	442	376
7—9 members	229	231	193	202	203	191
10 members and above	79	79	82	94	93	102

The most common size of households accounting for 45.3 per cent of the households in Saharsa district consists of 4—6 members. Large households (having 7—9 members) comprise more than one fifth (22.9 per cent), while small households (having 2-3 members) cover nearly one fifth (18.9 per cent) of the total households in the district. Thus these two sizes of households taken together account for more than two fifths (41.8 per cent) of the households.

A comparison of the district proportions with those of the State would reveal that very large households (having 10 members or more), or small (having 2-3 members) and very small (having single member) households have lower proportions in the district of Saharsa. The proportion of households having 7—9 members is higher. As between rural and urban areas, the former has higher proportion of large size households except in case of the category '10 members and above' for the State. Perhaps, this is indicative of wider prevalence of the joint family system in rural areas.

Composition of Households

The statement below gives the composition of households (20 per cent sample) by relationship to the heads of households:

Composition of households in Saharsa district, 1961

Relationship to head of household	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
Total	**100.00**	**100.00**	**100.00**	**100.00**	**100.00**	**100.00**
Heads of households	33.23	2.07	33.22	2.07	33.49	2.01
Spouses of heads of households	0.04	29.05	0.04	29.01	0.03	30.02
Married sons	12.60	..	12.79	..	8.31	..
Other married relations	5.05	22.23	5.04	22.35	5.28	18.99
Never married, widowed and divorced or separated relations	46.61	46.51	46.67	46.46	45.11	47.91
Unrelated persons	2.47	0.14	2.24	0.11	7.78	1.07

In Saharsa 33.23 per cent or one out of every three males is head of household as against a mere 2.07 per cent or one in every 50 among females. The very small proportion of female heads of households should not cause any surprise because the patriarchal system of family is almost universal throughout the State. Even the small proportion of female heads of households presumably relates to the elderly widows, mothers of minor sons, or such other females. In some cases, the continued absence of husbands for long period on work elsewhere may also have resulted in their wives having been treated as heads of households.

The category 'never married, widowed and divorced or separated relations' has the highest proportion both in rural and urban areas of the district as well as the State. 'Married sons' and 'other married relations' taken together have higher proportion in rural areas than in urban areas. It is perhaps another indication of the joint family system being more common in the rural areas. The proportion of 'unrelated persons' of either sex is, however, higher in urban areas. This is because the practice of engaging domestic helpers, private tutors, professional clerks, etc., on salary-*cum*-food basis is more common in urban areas.

16. ECONOMIC CHARACTERISTICS

Workers and Non-workers

The economic classification of 1961 Census envisages a broad division of the entire population into two categories, viz., workers and non-workers. A 'worker' is a person who is engaged in some kind of economic activity. For example, he may be working as a cultivator, or as an agricultural labourer, or at household industry, or doing any other work of productive and/or gainful nature. Work includes not only actual work but effective supervision or direction of work. Persons engaged in seasonal work like cultivation, livestock, dairying, household industry, etc., were deemed to be workers if they had regular work for more than an hour every day for the greater part of the last working season. Persons engaged in trade, profession, business or service were treated as workers if they were employed during any of the fifteen days preceding the date of enumeration. A person who is not working is a 'non-worker'. Non-workers may be full time students or children doing no other work, housewives or other persons engaged in household duties only, infants or disabled persons incapable of doing any work, retired persons (not re-employed), rentiers, beggars, vagrants, convicts in jails, inmates of penal, mental or charitable institutions, and unemployed persons. For a fuller understanding of these concepts, reference may be made to the flyleaf to the Primary Census Abstract in Part II-A (General Population Tables) or to the Introductory Note in Part II-B(1) (General Economic Tables) of the 1961 Census Publications relating to Bihar.

The Primary Census Abstract gives the distribution of workers by nine categories of economic activity.

Participation Rates

The participation rate (also called labour participation rate) refers to the number of workers per 1,000 of population. The following statement gives the participation rates separately for persons, males and females, as well as for total, rural and urban areas in Saharsa district and Bihar State according to the 1961 Census. Workers have been classified by the three broad sectors of economy, viz., primary, secondary and tertiary:

Participation rate of workers in Saharsa District and Bihar State by different sectors of economy, 1961

District/State		Total population	Total	Workers			Non-workers
				Primary sector	Secondary sector	Tertiary sector	
1		2	3	4	5	6	7
			TOTAL				
Saharsa	P	1,000	456	393	24	39	544
	M	1,000	571	479	30	62	429
	F	1,000	334	301	17	16	666
Bihar	P	1,000	414	326	41	47	586
	M	1,000	556	421	57	78	444
	F	1,000	271	231	24	16	729
			RURAL				
Saharsa	P	1,000	459	403	22	34	541
	M	1,000	572	494	27	51	428
	F	1,000	340	309	16	15	660
Bihar	P	1,000	422	352	34	36	578
	M	1,000	560	458	45	57	440
	F	1,000	285	248	23	14	715
			URBAN				
Saharsa	P	1,000	379	129	67	183	621
	M	1,000	554	148	104	302	446
	F	1,000	158	106	20	32	842
Bihar	P	1,000	332	46	114	172	668
	M	1,000	517	59	180	278	483
	F	1,000	104	29	32	43	896

In Saharsa district, there are 456 workers out of every 1,000 persons, a proportion higher than the State average of 414. As is expected, males have higher participation rate than females. It is seen that the order of difference between male and female rates in Saharsa is lower than that in the State. However, the male rate in Saharsa is higher than the State average by 2.7 per cent, while the female rate is higher by as much as 23.2 per cent.

As in the State so in the district of Saharsa, the rural areas have higher participation rate (459) than the urban areas (379), though the difference between the rural and urban rates in Saharsa is slightly lower than in the State. Considering both the sexes separately also, the rural areas have better participation rates. Thus the participation rates for males are 572 and 554 respectively in rural and urban areas while the corresponding participation rates for females are 340 and 158 respectively. There is greater concentration of students, rentiers and retired persons in urban areas who have been treated as non-workers. On the other hand, agriculture and household industry provide better scope for employment in rural areas.

The distribution of workers by the three broad sectors of economy, as presented in the above table, gives a more vivid picture of the factors influencing participation rates. The *primary sector* includes workers in cultivation, agricultural labour, livestock, forestry, fishing, hunting, plantations, orchards and allied activities. The *secondary sector* comprises workers engaged in mining and quarrying, household industry, manufacturing, construction and gas and electricity. The *tertiary sector* relates to workers in trade and commerce, transport, storage and communications and other services.

It is at once evident that as compared to the State, Saharsa has a higher proportion of workers in the primary sector. Thus against 326 persons per 1,000 engaged in primary sector in Bihar, the proportion in Saharsa is 393. The participation rates in secondary and tertiary sectors, however,

are lower in Saharsa than in the State. This pattern holds good both in rural and urban areas except in case of tertiary sector in urban areas.

In line with the State pattern, the primary sector in Saharsa claims the largest proportion of workers in rural areas, while the tertiary sector does so in urban areas.

Industrial Categories of Workers

Workers have been classified into nine industrial categories depending on the sector of economic activity in which they are engaged. In the case of a person doing more than one kind of work, such classification has been done on the basis of principal work determined as the one which consumed the greater part of his working time.

The statement below shows the distribution of 1,000 workers in Saharsa district and Bihar State by the nine industrial categories, separately for persons, males and females :

Distribution of 1,000 workers in Saharsa district and Bihar State by industrial categories, 1961

Working		Proportion per 1,000 workers					
		Saharsa district			Bihar State		
		Persons	Males	Females	Persons	Males	Females
1		2	3	4	5	6	7
I	As Cultivator	527	552	481	539	534	547
II	As Agricultural labourer	292	231	401	230	199	294
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	43	55	21	34	42	18
IV	At Household Industry	39	35	46	55	46	73
V	In Manufacturing other than Household Industry	8	11	4	22	30	6
VI	In Construction	4	6	N	5	8	1
VII	In Trade and Commerce	23	31	10	27	35	12
VIII	In Transport, Storage and Communications	4	6	N	12	17	N
IX	In Other Services	60	73	37	76	89	49

N—Negligible

Thus, 81.9 per cent of the workers in Saharsa district are engaged in cultivation and agricultural labour. The corresponding proportion for the State is 76.9 per cent. The extent of agricultural employment in Saharsa is, therefore, above the State average. it is depressing to find that although the proportion of cultivators in Saharsa (52.7 per cent) is slightly lower than the State (53.9 per cent), the proportion of agricultural labourers (29.2 per cent) is much higher. Agricultural labourers are persons who work in other persons' land for wages in cash, kind or share without having any kind of right, title or interest in such land. These proportions are, therefore, quite revealing in regard to the State of agriculture in the district. It is also significant that the proportion of agricultural labourers is relatively high among females. A good proportion (43.38 per cent) of female agricultural labourers belong to Scheduled Castes.

Employment in category III (mining, quarrying, livestock, forestry, etc.) is higher in the district than in the State (mainly because of livestock raising and dairying), while in category IV (household industries) it is lower for both the sexes. The details of household industries will be found later. In other categories, viz., manufacturing

other than household industry, construction, trade and commerce, transport, storage and communications, and other services, the proportions of workers in Saharsa district are comparatively lower than those in the State.

Female Participation

An idea of female participation in economic activities can be had from a consideration of sex ratio among workers in each industrial category. The following statement gives the relevant figures for Saharsa district and Bihar State separately for total, rural and urban areas as well as for each industrial category, total workers and total population :

Number of females per 1,000 males among workers in different industrial categories in Saharsa district and Bihar State, 1961

Category of workers	Saharsa district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Total population	944	952	793	994	1,012	811
Total workers	552	566	226	485	515	163
I Cultivators	481	481	452	496	497	380
II Agricultural labourer	958	957	1,010	716	717	650
III Workers in Mining, Quarrying, etc.	209	207	284	204	210	169
IV Workers in Household Industry	720	746	392	755	801	407
V Workers in Manufactur ing other than Household Industry	198	257	61	105	162	59
VI Workers in Construction	11	14	4	91	88	95
VII Workers in Trade and Commerce	170	198	44	166	218	77
VIII Workers in Transport, Storage and Communications	11	17	2	12	11	13
IX Workers in Other Services	283	326	112	267	302	181

In the State as well as the district, household industry and agricultural labour provide the greatest scope for female participation in economic activity. For every 1,000 males working in categories II and IV in Saharsa, there are 958 and 720 females respectively working in them. The corresponding proportions for the State are 716 and 755 respectively. Almost 48.92 per cent of the workers among agricultural labourers are females, the corresponding proportion engaged in household industry being 41.86 per cent. Female participation in construction as also in transport, storage and communications, is almost insignificant. The proportion in the former category is much, lower than that in the State while in the latter it is almost similar. It is noteworthy, however, that Saharsa has better participation rates in categories II, III, V, VII and IX than the State. Another notable feature is that the participation of females in rural areas is lower than that in urban areas in categories II and III.

Participation Rates in Anchals

The participation rates at lower levels, *e.g.*, subdivisions and anchals may now be considered, for they give a better idea of the regional differences within the district. The statement below gives the relevant information :

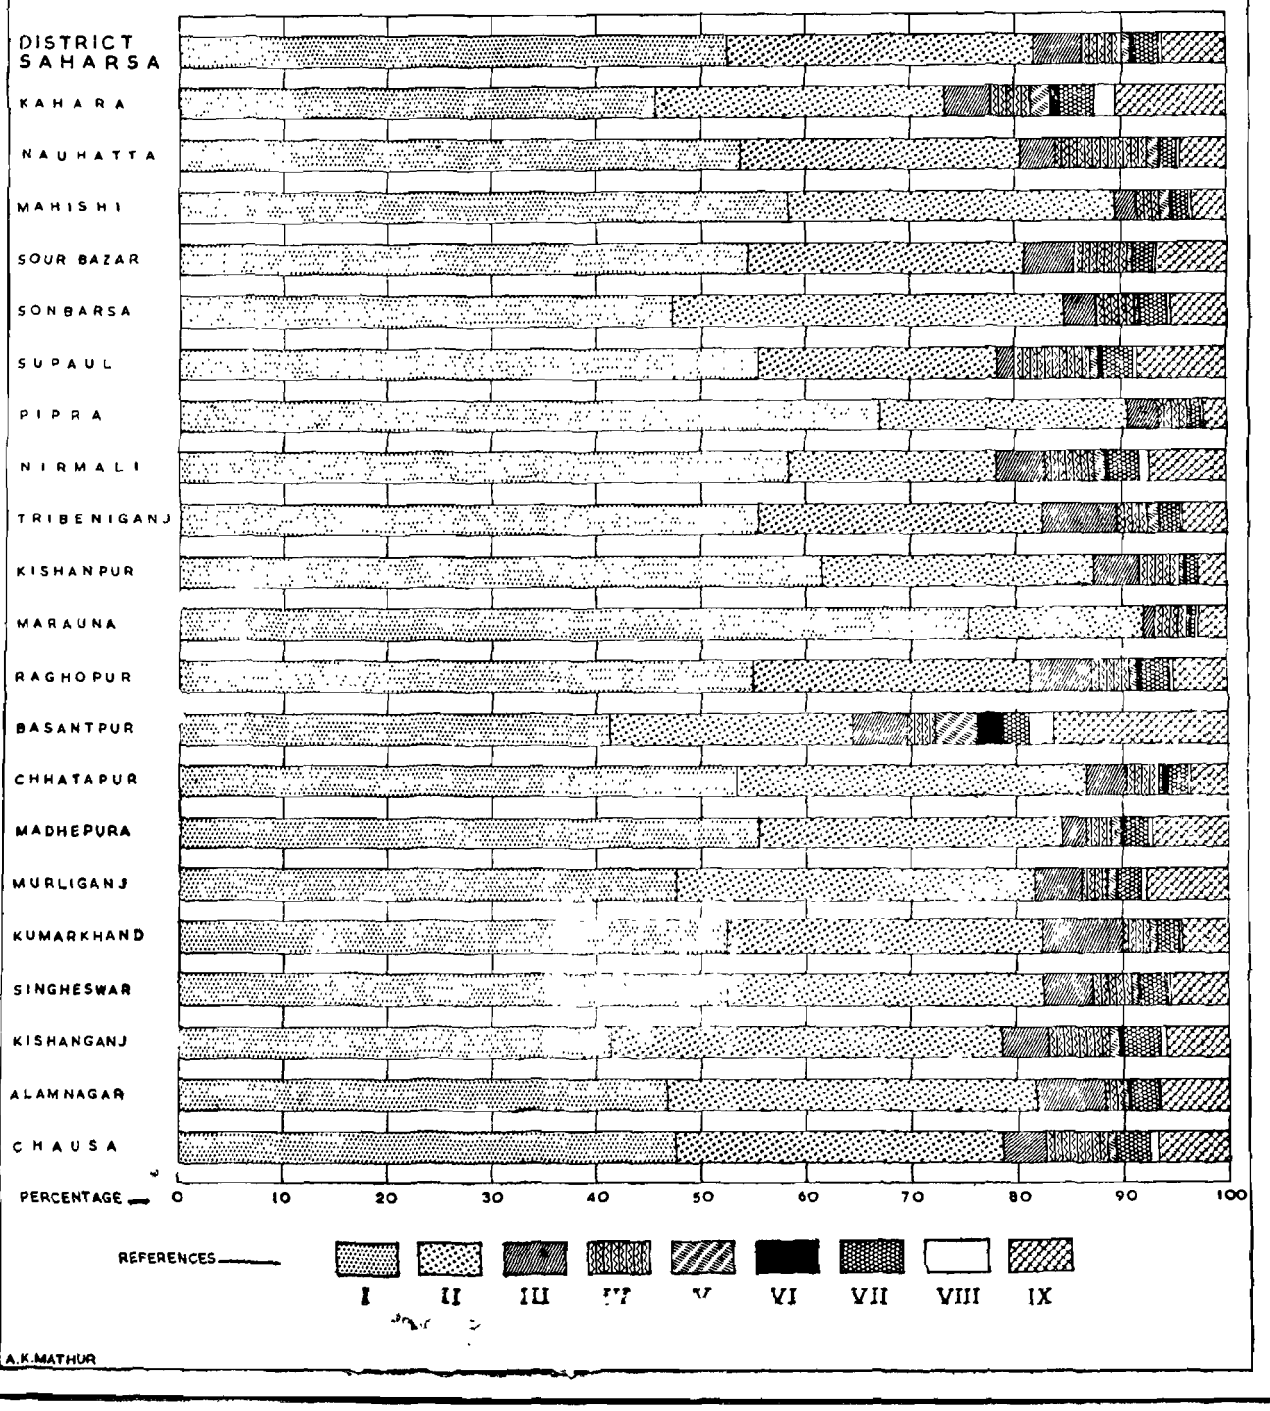

Number of workers per 1,000 males and females in subdivisions and anchals of Saharsa district, 1961

District/Subdivision/Anchal	Number of workers per 1,000 population	
	Males	Females
1	2	3
SAHARSA	**571**	**334**
Sadar Subdivision	**557**	**311**
1. Kahara	561	313
2. Nauhatta	555	345
3. Mahishi	538	216
4. Sour Bazar	564	327
5. Sonbarsa	565	362

DISTRICT SAHARSA

ANCHALWISE DISTRIBUTION OF WORKERS

1961

Number of workers per 1,000 males and females in subdivisions and anchals of Saharsa district, 1961—*concld.*

District/Subdivision /Anchal	Number of workers per 1,000 population	
	Males	Females
1	2	3
Supaul Subdivision	**575**	**365**
6. Supaul	534	304
7. Pipra	549	479
8. Nirmali	595	375
9. Tribeniganj	584	407
10. Kishanpur	575	286
11. Marauna	629	465
12. Raghopur	567	389
13. Basantpur	626	253
14. Chhatapur	579	366
Madhepura Subdivision	**576**	**317**
15. Madhepura	553	283
16. Murliganj	565	344
17. Kumarkhand	588	345
18. Singheshwar	559	311
19. Kishanganj	579	291
20. Alamnagar	611	337
21. Chausa	604	330

So far as male participation is concerned, there is not much variation among the subdivisions. The rates vary between 557 in the Sadar subdivision and 576 in the Madhepura subdivision. Among the anchals also the variations are not very wide. Marauna anchal has the highest participation rate (629) and Supaul the lowest (534). Both these anchals are contiguous to each other. Besides Marauna, three other anchals have participation rates above 600. These are—Basantpur (626), Alamnagar (611) and Chausa (604). As many as 14 out of 21 anchals have male participation rates varying between 550–600. In remaining three anchals the rates vary between 534 and 550.

Among females there is greater fluctuation. The rates vary from 216 in Mahishi anchal to 479 in Pipra anchal. Only three anchals, viz., Pipra (479), Marauna (465) and Tribeniganj (407) have participation rates above 400. As many as 13 out of 21 anchals have female participation rates varying between 300—400, and the remaining have rates below 300.

Workers by Age groups

The following statement shows the percentage of workers in each broad age group in Saharsa district and Bihar State, separately for persons, males and females :

Percentage of workers in broad age groups in Saharsa district and Bihar State, 1961

Age group	Proportion of workers					
	Saharsa district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All ages	**45.59**	**57.12**	**33 38**	**41.40**	**55.60**	**27.12**
0—14	10.75	13.07	8.24	7.84	9.64	5.94
15—34	72.61	91.50	53.60	63.90	87.65	41.39
35—59	80.42	98.02	60.27	73.29	97.40	48.34
60+	52.03	82.90	26.07	50.26	82.26	23.09
Age not stated	44.67	54.98	28.68	42.84	56.13	22.25

The proportion of child workers (age group 0–14) in Saharsa district is appreciably higher than in the State for boys as well as girls. Since the overall participation rates are higher in Saharsa, the proportions of workers among the young and the middle-aged are also higher. It is, however, seen that as in the State, so in Saharsa, the age group 35—59 contains the largest proportion of workers. This is easily explained by the fact that the age group 15—34 includes a considerable proportion of students as well as fresh entrants in the employment market. It is significant that in all the age groups and both the sexes, the proportions of workers exceed those for the State.

Workers by Literacy and Educational Levels

The statement on the next page gives an idea of the distribution of workers by literacy and educational level for Saharsa district and Bihar State.

Workers by literacy and educational level in Saharsa district and Bihar State, 1961

Educational level	Percentage of workers in	
	Saharsa district	Bihar State
1	2	3
Total workers	**100.00**	**100.00**
Illiterate	83.68	78.45
Literate	16.32	21.55
(i) Literate (without educational level)	11.92	15.84
(ii) Primary of Junior Basic	3.20	3.86
(iii) Matriculation and above	1.20	1.85

It has been observed earlier that the extent of literacy in Saharsa district is lower than that in the State. This is true in regard to workers also. Thus the proportion in Saharsa is lower than the State not only in respect of mere literates (without educational level) but also for those who have attained the primay or junior basic and matriculation standards and above.

Status of Employment

Workers in industrial categories III and V to IX have been classified further by four kinds of employemnt status, viz., employer, employee, single worker and family worker. An *employer* is a person who has to employ other persons in order to perform the work in which he is engaged. An *employee* is a person who usually works under some other person for salary or wages in cash or kind. A *single worker* is a person who works by himself, i.e., he is not employed by anyone nor does he employ anyone, not even members of his household except casually. A *family worker* is a member who works without receiving wages in cash or kind in some industry, trade or business conducted mainly by members of the family, and ordinarily does at least one hour of work every day during the working season. For further elucidation of these terms a reference may be made to the flyleaf to Table B-IV Part B*.

*Census of India, 1961, Bihar, Vol. IV, Part II-B (i), General Economic Tables.

Distribution of 1,000 workers (other than those in agriculture and household industry) in Saharsa district and Bihar State by employment status, 1961

Class of workers	Number per 1,000 workers					
	Saharsa district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Total workers	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Employers	32	28	57	41	30	67
Employees	325	296	502	463	407	590
Single workers	435	447	360	377	419	280
Family workers	208	229	81	119	144	63

The comparative backwardness of Saharsa district in regard to employment in large industrial establishments or other business concerns is reflected in the lower proportions of both employers and employees. Single workers and family workers comprise nearly two thirds of the workers (other than in agriculture and household industry) in this district, underlining its essentially rural economy largely confined to the primary sector. Their proportion is naturally higher in rural areas. Large numbers of single workers have been returned in rural areas under the minor groups 040 (dairying), 640 (retail trading in cereals, pulses, etc.) as well as the major groups 40 (construction), 70-71 (transport), 82 (medical and health services), 83 (religious and welfare services), 88 (personal services) and 89 (services not elsewhere classified).

Households and their Economic activities

It is well known that the main economic activities of households in Saharsa as in the State are cultivation and household industry. The information collected on the basis of Individual Slips has, therefore, been supplemented in 1961 by further data in Household Schedules on the aforesaid two economic activities of the household as a unit. Tables B-X, B-XI, B-XVII, and C-I given in this volume are based on 20 per cent sample of Household Schedules. Other Household Economic Tables have been published in Parts III(i) and III(ii) of the 1961 Census Pub-

lications relating to Bihar. The following statement gives the distribution of sample households according to their participation in cultivation and household industry :

Distribution of househods by their economic activity, 1961

Kind of activity	Saharsa district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
All Households	**100**	**100**	**100**	**100**	**100**	**100**
Households engaged—						
(i) Neither in cultivation nor in household industry	27	25	67	28	23	81
(ii) In cultivation only	65	67	26	64	68	13
(iii) In household industry only	2	2	5	2	2	5
(iv) Both in cultivation and household industry	6	6	2	6	7	1

Cultivating households with or without household industry comprise 71 per cent of the households—a proportion slightly higher than the State average of 70 per cent. It may be noted, however, that these figures do not take into account households whose members work merely as agricultural labourers. In rural areas the proportion of cultivating households is naturally higher (73 per cent).

27 per cent of the households in the district are engaged neither in cultivation nor in household industry. This proportion is slightly lower than the average for the State (28 per cent). A mere 2 per cent of them is engaged exclusively in household industry both in the district and the State. If all households engaged in household industry with or without cultivation are taken into account, the proportions in the district and the State are the same. As between rural and urban areas of the State and the district, the proportions in Saharsa are lower for rural areas and higher for urban areas.

Nature and Size of Land holdings

43 per cent of the cultivating households in Saharsa district cultivate lands owned by them. 17 per cent of them cultivate unowned lands held from private persons or institutions for payment in money, kind or share. This category evidently includes households of share-croppers and lease-holders. The remaining 40 per cent have mixed tenancies in the sense that they cultivate land partly owned by them and partly held from others. The possibility of concealment in furnishing information relating to the extent of share-cropping cannot be rul d out completely. In the State as a whole, 68 per cent of the households cultivate owned land while 7 per cent cultivate lands held from private persons.

The following statement shows the distribution of sample cultivating households in rural areas by the size of land cultivated by them :

Distribution of cultivating households in rural areas of Saharsa district and Bihar State by the size of their holdings, 1961

Size of land (in acres)	Percentage of cultivating households to total cultivating households in rural areas	
	Saharsa district	Bihar State
1	2	3
All sizes	**100.00**	**100.00**
Less than 1	11.16	21.51
1.0—2.4	22.73	26.65
2.5—4.9	29.22	23.34
5.0—7.4	15.64	12.20
7.5—9.9	7.00	5.10
10.0—12.4	4.04	3.70
12.5—14.9	2.41	1.80
15.0—29.9	5.62	4.21
30.0—49.9	1.50	1.01
50+	0.67	0.42
Unspecified	0.01	0.06

It follows that 63.11 per cent of the households have land holdings below 5 acres each. The corresponding proportion for the State is higher (71.50 per cent). It is significant to note that out of every 100 cultivating household, only 14 have holdings of 10 acres or more. Of the remaining

86, as many as 34 have less than 2.5 acres each and 11 less than one acre each. Holdings over 50 acres are owned by a mere 0.67 per cent of the households.

Non-workers

Table B-IX at page 28 gives the classification of non-workers by different kinds of activity. It is to be noted that 54.4 per cent of the population of Saharsa district consists of non-workers. This is a proportion lower than the State average of 58.6 per cent. For obvious reasons the proportion of non-workers among males (42.9 per cent) is much lower than among females (66.6 per cent). An idea of the different categories of non-workers can be had from the following statistics :

Distribution of 1,000 non-workers in Saharsa district and Bihar State by the kind of their activity, 1961

Kind of activity	Number per 1,000 non-workers					
	Saharsa district			Bihar State		
	P	M	F	P	M	F
1	2	3	4	5	6	7
1. Full time students	110	233	26	126	273	36
2. Engaged in household duties	215	8	356	270	3	435
3. Dependants, infants and disabled persons	670	752	615	596	709	526
4. Retired persons, rentiers or independent means	2	3	2	2	3	1
5. Beggars, vagrants, etc.	1	1	1	2	3	2
6. Inmates of institutions	N	N	N	1	2	N
7. Persons seeking employment for the first time	1	2	N	2	4	N
8. Persons employed before but now out of employment and seeking work	1	1	N	1	3	N

N—denotes negligible figures.

Dependants, infants and disabled persons comprise the largest component (67.0 per cent) of non-workers. 75.2 per cent of non-workers among males and 61.5 per cent among females belong to this category. The next important category among males consists of students who in Saharsa district, account for over one fifth (23.3 per cent) of the non-working population. This proportion is lower than the State average of 27.3 per cent. Among females 35.6 per cent of the non-workers are engaged in household duties. This proportion is also lower than the State average of 43.5 per cent. The proportion of retired person, rentiers, etc., in Saharsa is of the same order as in Bihar, while that of beggars and vagrants is lower.

The figures relating to unemployed persons give the impression of well-nigh full employment in the district as well as the State. An explanation for this unusual feature will become obvious if the basis of economic classification at the 1961 Census is taken into account. Much of the unemployment in this country, particularly in the rural sector, is in the nature of under-employment. A reference to the concepts and definitions discussed earlier would show that most of the underemployed persons would have been returned in the census as workers. Even students and other categories ordinarily listed among non-workers would have figured as workers if engaged in some kind of work or the other. By definition, non-workers are only those who are not engaged in any kind of economic activity. The number of such persons is naturally very small and limited.

17. VITAL STATISTICS

The two vital events of life are birth and death. Statistics relating to these are collected in Bihar under the Bengal Births and Deaths Registration Act, 1873 which makes the registration of births and deaths compulsory. This Act extends over the whole of Saharsa district. In the past, village Chowkidars were the primary reporting agency in rural areas. Since 1959-60, however, the work has been entrusted to the Panchayat Sewaks who are now the registering authority. Compilation of data is done by the Junior Statistical Supervisors at the anchal level and by the District Statistical Officer at the district level. In municipal areas, the municipal body is supposed

to maintain the necessary records and transmit the information to higher authorities. Compilation and analysis of data for the State is done by the Directorate of Statistics, Bihar. Since the beginning of 1965, however, these data are directly transmitted to the State headquarters from the anchals for further processing.

The Decade, 1951—61

During the intercensal period of 1951—60, 83,610 male and 74,104 female births were registered in he Saharsa district. The number of deaths recorded during the same period was 32,456 males and 27,403 females. Thus, the net addition to the population of the district on account of natural events was 51,154 males and 46,701 females. According to the Census of 1961, however, the increase over the 1951 population of the district was 213,763 males and 201,605 females. This was of course based on the *de facto* population which included immigrants. It has been stated earlier that Saharsa gains in the balance of migration (that is, the difference of immigration over emigration). In the category of inter-district migration alone, the order of gain was 20,757 for males and 23,486 for females. The order of actual increase in population in the last decade was, however, considerably more than what is revealed by the registered figures of births and deaths and the extent of under-reporting is enormous.

18. NATURAL CALAMITIES

The following is a chronological list of natural calamities in the district :

1865 — Flood
1866 — Scarcity
1874 — Scarcity
1888 — Drought
1889 — Scarcity
1891 — Drought
1892 — Scarcity
1896, 1897 — Scarcity particularly in Supaul subdivision
1906 — Flood
1908, 1909 — Drought and Flood
1918 — Flood particularly in Madhepura subdivision
1919 — Drought
1921 — Flood
1923, 1924 — Drought
1927 — Flood
1930, 1931 — Flood (severe)
1934 — The great earthquake
1938-39 — Flood
1939-40 — Flood particularly in Supaul subdivision
1953-54 — Flood (extremely severe)
1954-55 — Drought and Flood
1956-57 — Scarcity
1957-58 — Scarcity
1958-59 — Drought and Flood
1959-60 — Flood
1960-61 — Flood

19. AGRICULTURE AND IRRIGATION

Table AS-III at page 90 of Part I gives the statistics on land utilisation. Out of a total area of 13.48 lakh acres, the cultivated area (consisting of net area sown and current fallows) is 8.62 lakh acres or about 64 per cent of the total area. This represents an increase of 0.80 lakh acres over the cultivated area (7.82 lakh acres) in 1951, due largely to an increase in the area under net area sown by about 0.82 lakh acres.

The *per capita* availability of land in the district has declined from 1.05 acres in 1951 to 0.78 acre in 1961. This is considerably lower than the corresponding State average of 0.92 acre in 1961. A better idea of the pressure on land can be had by considering the proportion of net area sown to the total population. This is known as agricultural holding *per capita* which, in Saharsa district, is 0.38 acre as compared to 0.43 acre for the State. The average size of agricultural holding per cultivating household is 6.07 acres in Saharsa district as against 4.85 acres in the State. Thus, Saharsa is better off than the State as a whole in regard to availability of agricultural land.

So far as intensity of cropping is concerned, the index for Saharsa is 117.93 as against 138.28 for the State (assuming the net area sown to be 100). This is so mainly because a mere 3.1 per cent of the net area sown in Saharsa district is irrigated, the corresponding percentage for the State being 18.56. Only Ranchi district (114.69) has a lower intensity of cropping than Saharsa.

Rice is the main crop of the district. It accounts for 34.08 per cent of the gross area sown. Maize is also an important crop for the district. In 1960-61, the area under maize in Saharsa was 1.25 lakh acres. Non-food crops are grown in abut 18 per cent of the gross area sown and include mainly fibres (jute and mesta) and, to some extent, oil seeds. The cropping pattern is indicated in Table AS-III at page 90 and its subsidiary tables at pages 94-98 of Part I. The gross irrigated area in the district has risen from 9,417 acres in 1951 to 20,452 acres in 1961, an increase of over 117 per cent.

After independence in 1947, considerable attention has been paid to the provision of irrigation facilities in the district by means of flood control measures as well as irrigation channels, etc. The gigantic Kosi Project is almost complete and has resulted in complete transformation, as it were of the district. In addition to this, irrigation facilities have been extended in the district during the decade through 353 minor irrigation schemes, 300 surface percolation wells, 213 open borings, 9 tube-wells, 5 *rahat* pumps, 92 pumping sets and 46 Bihar handpumps.

Notwithstanding the expansion of irrigation facilities and provision of other facilities, e.g., improved seeds, more fertilisers and better agricultural practices, the yield rates of principal crops (Table AS-VI at page 91 of Part I) do not show commensurate results. Wide variations are noticed from year to year. Of course, there are too many gaps in the data available and it will be hardly safe to draw any firm conclusions.

The dependence of the bulk of population on agriculture has been alluded to earlier. Every 100 acres of net area sown provides employment to 64 cultivators and 35 agricultural labourers. The latter consist mainly of field workers whose daily wages decreased from Rs. 1.95 in 1957 to Rs. 1.38 in 1960 for males, from Rs. 1.95 in 1957 to Rs. 1.38 in 1960 for females and from Rs. 1.23 in 1957 to Rs. 1.19 in 1959 for children. Table AS-VII at page 92 of Part I gives data relating to average daily wages. It needs to be stated here that some of the trends revealed by the statistics are *prima facie* unacceptable. Judging by common experience, one is inclined to think that the daily wages of labourers, including those in agriculture, have been going up. But the above mentioned figures tell a different story.

20. LIVESTOCK

The district of Saharsa has a comparatively small livestock population. Only Patna, Bhagalpur, Palamau and Dhanbad have lower figures. According to the Livestock Census of 1961, Saharsa had a livestock population of 1.31 million, and 0.14 million birds (fowls and ducks).

Table LVT-II at page 99 of Part I gives the figures relating to livestock and poultry by five-year periods, and also indicates the variation from one census to another. It is seen that there has been decline in the population of he-buffaloes and sheep. The shortfall in the number of buffaloes, however, has been more than made up by the increase in the number of she-buffaloes. The net accretion to the cattle population during the last forty years is of the order of about 30 per cent. A census of poultry (fowls and ducks) was taken for the first time in 1945, and in the last fifteen years their number has almost doubled, though the number of ducks has declined. Poultry development has received considerable attention in the

community development blocks, and the rapid increase in their number is apparently due to such efforts.

Table LVT-I at page 98 of Part I gives the number of veterinary hospitals, dispensaries and doctors in each year of the last decade. There are 3 veterinary hospitals and 20 dispensaries in the district. These are manned by 23 veterinarians. Though the number of veterinary dispensaries has increased from 5 to 20 in the last decade even the present number is rather small for the livestock population of the district.

21. INDUSTRIES

Registered Factories

According to records maintained by the Chief Inspector of Factories, Bihar, there are 119 registered factories in Saharsa district. These provided employment to 893 workes daily on an average in 1960. 42 factories are located in towns and the remaining 77 in rural areas. There are no large industrial establishments in the district except a few rice and oil mills.

Houselist figures of Industrial Establishments

During the houselisting operations preceding the 1961 Census, an attempt was made to assess the number and nature of industrial establishments, registered or otherwise, engaged in any kind of "production, processing, repair or servicing or where goods or articles are made and sold". The enquiry revealed that Saharsa has, in all 4,201 industrial establishments—3,601 in rural areas and 600 in towns. Oil-crushing accounted for the largest number (786), followed by the manufacture of earthenware and earthen pottery (631). Making of sweets, *muri*, *chira*, etc., engaged 527 establishments and making of textile garments, 279. Manufacture of other wood and allied products, covered 264 establishments. The following statement gives the subdivisionwise break-up of five major industries in the district :

Major industrial establishments in Saharsa district by subdivisions, according to houselisting in 1960

Sl. No.	Industrial Code no. (Minor Group) of I.S.I.C.	Particulars of the industry	Number of Industrial Establishments			
			District total	Sadar subdivision	Supaul subdivision	Madhepura subdivision
1	2	3	4	5	6	7
1	207	Oil-crushing	786	212	192	382
2	350	Manufacture of earthenware and earthen pottery	631	143	234	254
3	209	Making of sweets, *muri*, *chira*, etc. ..	527	128	190	209
4	273	Making of textile garments including rain coats and headgears	279	44	90	145
5	289	Manufacture of other wood and allied products not classified elsewhere	264	97	64	103

Household Industries

In view of the great importance of household industries to the economy of this country, the number of persons engaged in household industries was separately recorded and tabulated in the census of 1961. A household industry was defined thus—

> "An industry conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be at the scale of registered factory. A household industry, relates to production, proceessing, servicing and repairing and includes making and selling of goods."

In the district of Saharsa, 30,722 persons were found engaged in household industries. They compised 3.91 per cent of the total working population of the district. The number of persons engaged in the five numerically important household industries is indicated alongside.

Sl. No.	Industrial Code no.	Particulars of the industry	No. of persons at work
1	2	3	4
1	040	Production and rearing of livestock (lager heads only) mainly for milk and animal power such as cow, buffalo, goat.	9,496
2	231	Cotton spinning (other than in mills)	4,602
3	288	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	2,405
4	207	Production of edible fats and oil (other than hydrogenated oil).	1,505
5	206	Production of butter, ghee, cheese, and dairy products.	1,345

22. TRADE AND COMMERCE

In Saharsa district, trade consists mainly of exporting jute and mesta and of importing iron and iron products, coal, cotton textiles, foodgrains and consumer goods.

According to 1961 Census, 18,163 persons out of a total working population of 785,763 in the district were engaged in trade and commerce. In other words, only 2.3 per cent of the working population was returned as working in trade and commerce. Their distribution by sex and employment status is given blow :

Employment states	Males	Females
1	2	3
Total persons at work in trade and commerce	**15,529**	**2,634**
Employer	1,636	79
Employee	1,905	55
Single worker	7,536	1,260
Family worker	4,452	1,240

According to the houselists prepared on the eve of the 1961 Census, Saharsa had 3,215 shops excluding eating houses, 4,915 shop-*cum*-dwellings and 1,080 business houses. Their break-up by rural and urban areas is given below :

Census houses and the uses to which they are put	Number of establishment	
	Rural	Urban
1	2	3
Shop-*cum*-dwellings	4,121	794
Shops excluding eating houses	2,491	724
Business houses	711	369

A list of banking offices will be found in Table ADM-X at page 110 of Part I. In addition to the district and subdivisional headquarters, the State Bank of India has a branch at Murliganj also.

23. POWER

The Government Power House at Saharsa supplies electric power in the district. The Kosi Project Power House generates electricity mainly for its own use.

All the six towns of Saharsa district have electricity now. In rural areas, however, the pace of electrification is very slow inasmuch as only 14 out of 1,195 inhabited villages in the district were electrified up to March, 1961.

24. LAND REFORMS AND REVENUE ADMINISTRATION

As in other districts of the State, Saharsa contained a large number of intermediaries and *tauzis*. With the enactment of the Bihar Land Reforms Act, 1950 and its subsequent amendments all these estates vested in the State Government. In the beginning, the estates and tenures of big proprietors having an income of above Rs. 50,000 each were taken over. Later, in pursuance of

Government notification no. 631-LR, dated the 26th January, 1955 all intermediary interests also vested in the State.

After the abolition of *zamindari* in the district, a vast machinery for collection of rent had to be built up. It consists at present of an Additional Collector, 3 Land Reforms Deputy Collectors (one in each subdivision), and 21 Anchal Adhikaris and Circle Inspectors (one for each of the anchals). At the village level, there are *Karmacharis* for each of the *halkas* (on an average 10 *halkas* constitute anchal). In suitable cases rent collection has been entrusted to Gram Panchayats also.

The following table shows the revenue demand of the district:

Period	Year	Demand (in rupees)
Pre-zamindari abolition	..	As Saharsa district formed part of Bhagalpur, separate figures for Saharsa, as now constituted, not available.
After vesting of estates with income of Rs. 50,000 and above.	1954-55	Rs. 2,176,514
After total vesting	1955-56	Rs. 3,253,987
	1956-57	Rs. 3,224,159
	1957-58	Rs. 4,465,438
	1958-59	Rs. 5,702,008
	1959-60	Rs. 6,425,533

25. PUBLIC HEALTH AND MEDICAL FACILITIES

Public Health

The preventive and curative branches were combined in the early fifties to ensure better co-ordination and control. The Senior Executive Medical Officer of Health is in overall charge of the medical programme of the district. He is assisted by the District Medical Officer of Health and Assistant Health Officers on preventive side and Deputy Superintendents of Hospitals and Civil Assistant Surgeons on curative side

Malaria, which was a much dreaded disease at one time has now been almost completely eradicated, thanks to the sustained efforts of the State Anti-Malaria Units. Kalazar centres were located at Basbilti, Chailarh, Lalganj and Gamharia. But these centres were abolished during the First Five-Year Plan period, as incidence of Kalazar was effectively controlled in the district.

Cholera and smallpox often break out in the district in epidemic form. The Health Unit of the district comprising of Sanitary Inspectors, Health Inspectors, Disinfectors and Vaccinators carry out preventive work such as disinfection of wells, inoculation against cholera, vaccination against smallpox, etc. They are often aided by additional staff when epidemics break out. During the decade 1951—60, 801 persons died of cholera in the district. The number of deaths was highest (316) in the year 1954—in 1953 also 289 persons died of cholera. Smallpox took a heavier toll during the corresponding period, having claimed 2,882 lives. In 1951 and 1958, the number of deaths exceeded one thousand but in other years it remained below 205. The least number of deaths (10 only) was reported in 1960. Table VS-II at page 86 of Part I shows how the mortality from cholera and smallpox has generally declined over the years.

Medical Facilities

There are three full-fledged hospitals in the district including the district and subdivisional hospitals but excluding the Police Hospitals. Medical facilities below the subdivisional level are available at 32 dispensaries of which 30 are now State-managed. Besides these, there are 13 Primary Health Centres set up in the Community Development Blocks and manned by qualified allopathic doctors. 3 sub-centres are attached to each of interior villages. These primary centres are provided with the tyre-fitted bullock carts.

The total number of beds provided at these hospitals and dispensaries is 269. This gives an average of one bed for every 6,407 persons in the district. Similarly, the average area served

by a hospital or dispensary is 52.64 sq. miles. The 13 Primary Health Centres have not of course been taken into account in this calculation.

The District Hospital has a Family Planning Centre. Maternity and Child Welfare Centres are located at Kumarkhand, Mahishi and Alamnagar, besides the two subdivisional headquarters (Madhepura and Supaul). The State Dispensaries and Primary Health Centres are also meant to propagate birth control measures and distribute contraceptives.

The District Hospital has a T.B. Clinic and the Supaul Subdivisional Hospital a 10-bedded T. B. Ward.

The district has 77 allopaths and 212 homeopaths in rural areas besides 80 *vaidyas* and 19 *hakims*. Thus, there is one medical practitioner for every 4,268 persons in the rural areas of the district.

Table PH-I at page 113 of Part I gives the details of medical facilities. In Part A of the table is shown the number of degree or diploma holding medical practitioner registered in the district each year during 1951—60.

The number of persons engaged in medical and public health work as returned in 1961 Census, is given below :

Family of National Classification of Occupation	Category of workers	Persons	Males	Females
1	2	3	4	5
030	Physicians and Surgeons, Allopathic	68	63	5
031	Physicians, Ayurvedic	168	168	..
032	Physicians, Homeopathic	122	122	..
033	Physicians, Other	94	94	..
034	Physiologists	6	6	..
035	Dentists	16	16	..
039	Physicians, Surgeons and Dentists, not elsewhere classified	11	11	..
040	Nurses	2,508	1,966	542
041	Midwives and Health Visitors	187	32	155
042	Nursing Attendants and Related Workers	88	64	24
043	Pharmacists and Pharmaceutical Technicians	111	110	1
044	Vaccinators	41	40	1
045	Physiotherapists, Masseurs and Related Technicians	10	..	10
046	Sanitation Technicians	51	47	4
047	Opticians	24	24	..
049	Medical and Health Technicians, not elsewhere classified excluding Laboratory Assistants (091)	117	114	3

BRIEF GAZETTER OF PLACES IN SAHARSA DISTRICT

[Compiled from village notes prepared by enumerators during the 1961 Census ; accuracy of the information has not been checked in every case]

Alamnagar

A very large village (pop. 10,017) situated 16 miles south of Bihariganj. Headquarters of an anchal.

Arrar

A village situated 20 miles south-west of Murliganj on the Madhepura-Bihpur road. A large annual fair which lasts for about 15 days and known as 'Pus-Purnima Sankrant Mela', or 'Kosi Arrar Mela' is held here.

Bakunia

A medium sized village (pop. 827) lying on the bank of the Tiljuga, about 6 miles south-west of Nauhatta. A 14-mile embankment constructed by the Banaili-Srinagar Estate starts from just south of the village and used to protect the area from the flood ravages of the Tiljuga. Now it is defunct.

Baljora

A large *tola* of Thala-garhia, (pop. 6,546) situated 4 miles from Tribeniganj. The place has attained some importance as a centre of American aided missionary activities and the farm attached to the mission. Some foreign agricultural students come for research in agriculture in the farm of the mission which is equipped with modern implements. The school, run by the mission, is also providing education to both boys and girls there.

Bangaon

A large village, headquarters of Mahishi anchal, situated 9 miles west of Saharsa town, to which it is connected by road. It has many Maithil Brahmin families. It has a high school, a Sanskrit high school, and a veterinary dispensary.

Bihariganj

A very large village (pop. 5,116) in Kishanganj anchal. It is a terminus station on the Banmankhi-Bihariganj branch line of the N. E. Railway. The village is an important business centre for raw jute, the annual export value of jute being about Rs. 20 lakhs. Its wholesale market of consumers goods attracts retail dealers of Alamnagar, Chausa and Kishanganj anchals. A big cattle *hat* is held here on every Sunday.

Birpur

A town in the northern border of the district having a population of 8,061 persons. Headquarters of Basantpur anchal. The town owes its existence to the offices and staff of the Kosi Project.

Chandiasthan

A religious place situated 5 miles north of Murliganj railway station. The village, famous throughout the district on account of its temple of Goddess 'Chandika', which draws a large number of devotees. A large fair is held on the occasion of *Durgapuja.*

Chhatarpur

A large village (pop. 3,394), situated 18 miles west of Forbesganj railway station in Purnea district Headquarters of an anchal.

Chausa

A very large village (pop.7,554), situated in the south-eastern part of the district. Headquarters of an anchal.

Dharahara

A large village (pop. 2,985) and an important religious place. Its hamlet, "Mahadeosthan", has a temple of Lord Shiva which is regarded as a very holy temple. A large annual fair is held on the occasion of *Shivaratri.* On Sundays also,

small fairs are held when devotees come for worship.

Jadia

A large village (pop. 4,540) situated at a distance of about 9 miles south of Tribeniganj. An important market for jute next to Tribeniganj. It has a police outpost.

Jorgama

Situated at a distance of 6 miles north-west of Murliganj, the village is noted for a five-day fair held annually on the eve of *Basant Panchami.*

Kishunpur

A very large village (pop. 5,471), situated 9 miles north of Supaul. Headquarters of an anchal.

Kishanganj

Situated five miles from Bihariganj on the N.E. Railway, the large village (pop. 3,261) is an anchal headquarters. A Deputy Superintendent of Police with jurisdiction over Alamnagar, Sonbarsa and Murliganj police stations is also posted here. It has a Khandsari Sugar mill. There is a degree college. Kishanganj serves as a commercial centre for the jute and sugarcane produced in the area.

Koriapatti

A very large village (pop. 5,240) stuated 8 miles east of Tribeniganj. Formerly the seat of the Korispatti Estate. A fair lasting about a week is held annually on the eve of '*Dussehra*' It has a dispensary.

Kumarkhand

A large village (pop. 4,641) situated 8 miles north of Murliganj railway station. Headquarters of an anchal.

Kunali

A very large village (pop. 5,201) situated about 22 miles north of Nirmali. Two miles to the north-west lies Sakhara, a village in Nepal famous for the temple of Goddess Chhinmasta Bhagwati, which draws many pilgrims.

Latauna

A large village (pop. 6,535), situated at a distance of about one and a half miles west of Tribeniganj, has one of the oldest Catholic Mission churches in the district. A primary school, is run by the mission. Presently lying on the road from Tribeniganj Bazar to Singheshwarsthan in Madhepura Subdivision, its importance may diminish with the construction of a P.W.D. road from Madhepura and Singheshwarsthan to Triveniganj *via* Pipra.

Maheshpur

A large and important village (pop.2,401), situated six miles from Pipra on the metalled road to Birpur. It has a police out post, a middle school and a health sub-centre. Blanket weaving is practised by shepherds. The village lies in a rich paddy producing area.

Marauna

A large village (pop. 4,234), the headquarters of an anchal, situated in the western part of the district. The western Kosi embankment runs through the village and provides the only route of communication. The village has a temple of Lord Shiva which draws devotees from far and near. Formerly renowned as a seat of a landlord, Sri Urdh Babu Tapeshwari.

Muradpur

A large village (pop. 2,658) predominantly inhabited by Maithil Brahmins. It lies four miles south of Nauhatta anchal. Noted for production of '*makhana*'. At the All-India market of '*makhana*' at Kanpur, "Muradpur Makhna" is considered the best in quality. Traders of this village are the largest suppliers of '*makhana*' to the Kanpur market.

Murliganj

A jute trading town and anchal headquarters with a population of 9,848. It has a 'Goshala' on Saharsa-Purnea road managed by a local committee. It supplies milk to the local market. A 3 days fair is held here annually on the occasion of *Gopastmi*.

24. Nauhatta

A very large village (pop. 8,131) situated 7 miles west of Panchgachia railway station. It is an old village, important since the time of the *Mughals, presently the headquarters of an anchal.* It has an indoor hospital and a high school. The eastern Kosi embankment runs at a distance of one and a half miles west of the village.

The village has a 'Shiva temple', about 80 feet in height. Damaged in the earthquake of 1934, it was reconstructed by Raja Srinand Singh of Srinagar Estate.

There is a grave of Madho Singh on an earthen mound about 40 feet high. Madho Singh became a martyr in the battle of Ladari Ghat. Offerings are made on the grave both by Hindus and Muslims.

Nirmali

The town (pop. 5,423) is the headquarters of an anchal. The place was named after Nirmal Baba, an ancient sage, who is yet venerated at his memorial in the town. Nirmali has a large rice market with three rice mills. It is a terminus station of the N.E. Railway, on the Nepal border, whence it is known as the gate-way to Nepal. It has a Divisional Office of the Kosi Project.

Paina

A village in Chausa anchal, noted for the tomb of Maula Peer.

Pipra

A large village (pop. 2,130) the headquarters of an anchal. It has a Subdivisional office of the Kosi Project. A metalled road connects it with the Subdivisional headquarters and another road runs to Madhepura, the administrative Pipra is also connected with Birpur, the headquarters of the Kosi Project. It has a dispensary and a grains-godown. There is an old temple of Tara Devi, which is in dilapidated condition. A fair takes place annually on the eve of *Dussehra*.

Pratapganj (Bhawanipur)

A very large village (pop. 8,247), headquarters of an anchal and an important trade centre for jute. The Murliganj Branch Canal passes through the village.

Raghopur

A large village (pop. 2,923), situated 28 miles north-east of Supaul. Headquarters of an anchal, it is connected to Saharsa and Supaul by *pucca* road.

Ram Nagar

A large village in Kumarkhand anchal, situated 10 miles from Murliganj N.E. Railway Station noted for the Kali temple. A large fair is held on the occasion of *Kalipuja* every year.

Saharsa

The town, with a population of 14,803, is the headquarters of the district since its creation. It is primarily an administrative town, and has attained urban status for the first time in 1961. It is covered by a Notified Area Committee. Besides the usual administrative offices, the town has a degree college and many schools. Saharsa is a rail-head on the Mansi-Purnea section of the N.E. Railway.

Sataur

An ancient village (pop. 1,576) located 7 miles south-west of Nauhatta. During the reign of Hari Singh Deva, this village was inhabited by scholarly Maithil Brahmins who later migrated to Darbhanga district.

Sour Bazar

A medium sized village (pop. 1,640) situated 4 miles from Baijnathpur railway station. Headquarters of an anchal.

Simrahi

A large village (pop. 3,091) situated on the P.W.D. Bihpur-Birpur road about one mile away from Raghopur. It is a good jute and timber market.

Singheshwar

A medium sized village (pop. 1,255), situated 4 miles north of Madhepura. Headquarters of an anchal.

The place is noted for its temple of Lord Singheshwar (*Mahadeo.*) The month-long fair on the occasion of *Shivaratri* is one of the largest in the State.

Sonbarsa

A large village (pop. 4,393) situated in the south-west corner of the district, the headquarters of an anchal. The Tilawe river flows by the western side of the village from north to south, demarcating the boundaries of Saharsa and Monghyr districts. It is an important jute market. The well known *zamindar* of this village was Sri Hariballabh Prasad Singh, who donated *zamindari* worth Rs. 2,200 in Sonbarsa High School along with a large building with a compound of 12 *bighas* of land. A *hat* (market) is held here once in a week.

Supaul

It is the biggest town of the district with a population of 17, 460 persons. A subdivisional headquarters, it is connected by rail to Saharsa by a 28-mile branch line. It has a degree college and two high schools for boys and girls separately.

Thumha

A large village (pop. 2,448), situated on the Supaul-Pipra mettaled road. It has a Government hospital and a middle school and a weekly village market is held here.

Tribeniganj Bazar

An important business centre for jute, located 7 miles east of Pipra and also an anchal headquarters. There is a high school, a full-fledged dispensary, a class I veterinary dispensary. A sub-post office with arrangement for telegrams and telephone. A fair is held here on the eve of *Ramnavami* which lasts for about a month.

This village is the one of the most important business centres for jute ranking with Murliganj and Supaul. A regular traffic of trucks and bullock-carts laden with jute runs between Madhepura railway station and Triveniganj *via* Pipra Bazar and Singheshwarsthan. During the rainy season, the transport is arranged from Murliganj railway station through the Lachminia and Chilounia Dhars or water channels.

A GLOSSARY OF THE BETTER KNOWN ANCIENT MONUMENTS IN THE DISTRICT OF SAHARSA

NOTE

Along with the houselisting operation conducted in October, 1960, a village note was also prepared by enumerators for each *mauza* or enumerator's block. The enumerators were required to record information on ancient monuments according to the following instructions:

"**Part B(3) Ancient Monuments**

A monument means 'anything that preserves the memory of a person or an event, a building, pillar, tomb, tablet, statue, mound, etc.' The idea here is to collect information about monuments which are of some importance and antiquity. By antiquity, the idea is that the period to which the monument relates should not be less than 150 years old. Religious shrines of some antiquity will be noted under this head as well as item 11 of Part A."

Admittedly, the extent of details collected in this survey is rather meagre and, perhaps, not very authentic. This could not have been otherwise, considering the severe limitations and general handicaps of the enumeration agency. Even so, the comprehensive coverage has yielded some significant data which are presented below for further investigation and research by interested persons.

The list is presented in the same order of subdivisions and anchals as in the Village Directory and Village Statistics. Within an anchal, the villages are arranged in alphabetical order.

SADAR SUBDIVISION

Anchal—Kahara

Ukahi (Thana no. 174)—It has an ancient image of goddess Durga discovered on excavation. According to legend one Sone Lall Jha was instructed in his sleep to excavate a particular place. The image was found at that very spot and later established in a temple. Devotees throng here from long distances.

Anchal—Nauhatta

Bara (Thana no. 15)—Contains the remains of a fortress of King Koele, known as 'Kop Garh'. According to local tradition, the king died in the reign of Aurangzeb.

Deonban (*Barhampur*) (Thana no. 38)—Some 4 miles south west of Nauhatta, there is a small Shiva temple of considerable mythological importance. It is said that the great sage Kaushik Muni founded this temple at the western side of river Kosi. According to a legend, river Kosi, being the sister of Kaushik Muni in her westward swing, reaches up to this point to worship Lord Shiva established by her dear brother. And then, she returns back to the east to meet her sister Mahananda in Purnea district.

Actually, now-a-days, the main channel of Kosi, flows a mile and a half west of the temple.

Anchal—Mahishi

Ara (Thana no. 86)—On excavation some stone pillars have been found with inscriptions on them.

Mahisi (Thana no. 105)—This village is noted for its temple of Bhagwati 'Tara' 12 miles west of Saharsa town. It is said to have been established by the sage Vashistha about 1,100 years back. The learned Mandan Mishra who had taken part in the debate with Sankaracharya, was a resident of Mahishi.

Murli (Thana no. 145)—Contains a memorial of Ramna Devi. According to local tradition, she used to live at this place sometime in the Muslim period when the area was full of forests. A memorial of bricks and tiles has been erected for her.

Anchal—Sour Bazar

Bansi Rauta (Thana no. 125) Contains some stone images believed to be about 2,000 years old and recovered on excavation.

Anchal—Sonbarsa

Biratpur (Hamlet of Thana no. 26)—Named after the King Birat mentioned in the Mahabharata, the village has a temple of Chandi Bhagwati. Devotees from different parts of the State come to worship the goddess.

Gazi Paita (Thana no. 22)—It has a temple of goddess 'Chandi' which is said to be 1,500 years old. This temple is built of bricks and wood. Inscriptional stone pillars have not been deciphered.

Khasurha (Thana no. 28)—Contains a big earthen mound which believed to cover the remains of the fortress of King Ali Khan on excavation, some bricks, stones and stone images have been found.

Maura (Thana no. 60)—There is a temple of Goddess Durga in which some ancient images have been established. The temple now in a dilapidated condition, was, according to tradition ravaged in the Muslim period.

Soha (Thana no. 9)—Contains a memorial to Madhav Baba. Local tradition holds that the head of Madhav Baba fell down at this place when he was killed in a riot. But this headless body moved as far as 18 miles.

SUPAUL SUBDIVISION

Anchal—Supaul

Baruari (Thana no. 204)—Contains a 'Shivling' with some indecipherable inscriptions believed to have been established by Kapildeo Muni.

Karanpur (Thana no. 185)—Has an ancient mound said to be some 5,000 years old. Local belief is that it was the abode of King Karna. No excavation has been carried so far.

Anchal—Kishanpur

Arraha (Thana no. 88)—The village has a temple with an ancient image of Goddess Lakshmi recorded after excavation. There are some engravings on the images but they have not been deciphered.

Anchal—Raghopur

Dharahara (Thana no. 128)—Contains the ruins of a fortress which is said to have been built by Raja 'Karna'. There are high mounds. Some old bricks and stones have been found.

Ram Bishunpur (Thana no. 117)—There is a mound from which a vessel, full of valuable articles, was found on excavation. It is believed that some more valuables may be found if further excavation is carried out.

Anchal—Chhatapur

Khuti (Thana no. 174) —The village has the grave of saint Kamdeo. Its walls are built of straw and bamboo splits. Local tradition holds that the saint meditated at this place some 165 years ago.

MADHEPURA SUBDIVISION

Anchal—Madhepura

Bhelwa (Thana no. 58)—Contains a mound covered with trees. On excavation, bricks have been found indicating ruins of a fortress believed to be 1,000 years old.

Anchal—Kumarkhand

Siripur Milik (Thana no. 242)—The village is important because of the ancient monuments which were found in excavation. About 10 years earlier, two vessels full of *'Chitti-Kauri'* and one

copper elephant were found in excavation undertaken by the Maharaja of Sonbarsa. A large chair 20 cubits in length and 11 cubits in breadth, and a deity of Goddess Parwati were also found. A mound on being dug yielded bones and ashes. These bones when touched turned into ashes. Local tradition holds that the grave belonged to some big personality.

There is the bed of a tank where, the horse-race used to take place and because of that, as it is believed, the place is yet called by the name 'Ghor-Daur'.

Besides, some statues with engravings on them, have also been found. At one place, three riders have been shown along with three guards with umbrellas.

Anchal—Singheshwar

Babhani Bholwa (Thana no. 4)—Also known as 'Bhava Babasthan', after Bhava Baba, a reputed social worker of the village who lived here about 350 years ago. A memorial has been erected to him.

Gamharia (Thana no. 5)—Contains a memorial in the shape of a simple house erected some 200 years ago. It was built in the memory of Maharaja Sonath, a social worker and religious preacher of this village.

Gauripur (Thana no. 203)—The village has a temple of Singheshwar Mahadeo built of baked bricks. Local tradition holds that God Vishnu had erected this temple.

Lalpur (Thana no. 208)—The village has a memorial of Bhatu Dass in the shape of earthen built house which is about 200 years old. Bhatu Dass, who belonged to this village, was a great sage.

Rampur (Thana no. 202)—There is a 'Brahmasthan' which is worshipped as local deity. It is believed to be 200 years old.

Singhesarasthan (Thana no. 21)—The village has been named after 'Shringi Rishi', an ancient sage of Hindu mythology. He worshipped God 'Shiva' on the top of the mountain which is said to be underground these days. The very *Ling* of God 'Shiva' is attached with the mountain which could not be devastated by the frequent floods of Kosi, although the entire area has been ravaged badly. Since then, it has become a famous seat for Hindu pilgrimage. On every Sunday, there is a great rush of local people for worship of God Shiva. On the occasion of *Shivaratri* in the month of *Phalgun*, there is a big fair which ranks next to Sonepur fair in Bihar. People from far and near come and participate.

Anchal—Kishanganj

Nayanagar (Thana no. 188)—It has an ancient temple of Goddess Durga. On every Monday and Friday, a large number of Hindus assemble here to worship the Goddess.

Anchal—Chausa

Naya Tola urf *Hamidpur* (Thana no. 156/1)—The village has two tanks, still in good condition, built by the Sirajudaula. A field of about 200 acres of land in area is there. On excavation some coins of about 200 years old have been found.

Pachrasi—The village has an old temple which is famous for curing the sufferings of milch cattles. Maunds of milk are poured in the temple on every Monday. A big fair of one day's duration is held every year on the occasion of *Ram Navami*.

PART I

CENSUS TABLES, OFFICIAL STATISTICS AND VILLAGE DIRECTORY

NOTE

The Census tables have been published in Parts II to V (with their various sub-parts) of the 1961 Census Publications for Bihar. However, many of the important Census tables are also being reproduced in the District Census Handbooks, and some of these give information for units upto the anchal.

The Census tables are classified into different series according to the nature of information presented in them. These are :

A-Series—General Population Tables;

B-Series—Economic Tables, comprising:

(*i*) General Economic Tables, and

(*ii*) Household Economic Tables;

C-Series—Social and Cultural Tables;

D-Series—Migration Tables;

E-Series—Housing Tables ; and

SCT-Series—Special Tables for Scheduled Castes and Scheduled Tribes.

Selected tables from all the above Series except D and E are being reproduced in this Handbook. Each series of tables is preceded by a brief explanatory note indicating the contents of the tables and the concepts used.

EXPLANATORY NOTE

A-Series comprises 4 General Population Tables, *viz.*:

A-I—Area, houses and population;

A-II—Variation in population during 60 years;

A-III—Villages classified by population; and

A-IV—Towns (and Town-groups) classified by population in 1961 with variation since 1901.

Only Tables A-I (together with Appendices and Annexures) and A-IV (with Appendices) are being reproduced in this Handbook, and for the latter, the variation of population has been shown from 1941 instead of from 1901.

The particulars of these tables are given below :

Table A-I—Area, Houses and Population

This table furnishes for each subdivision, anchal, town-group and town, the area (in sq. miles and sq. km.), density (number of persons per sq. mile), number of occupied residential houses and population classified by sex. It also gives the numbers of villages (inhabited or uninhabited) and towns upto anchals. The terms and concepts used in this table are defined below :

Town

A town includes every municipality, notified area, civil lines or cantonment. Certain other selected places were also treated as towns for the 1961 Census provided that they ordinarily fulfilled the following criteria, *viz.*, (i) having a population of not less than 5,000 persons, (ii) density of not less than 1,000 persons per sq. mile, and (iii) at least 3/4th of the adult male population were engaged in non-agricultural activities.

Town-group

If two or more towns are contiguous and so constituted that they form together a compact block, each part having separate civic bodies, the entire area is treated as a town-group. There is, however, no town-group in the district of Saharsa.

Village

A village means a revenue *mauza* which is defined as follows :

> "A *mauza* means a parcel of land which, as a rule, is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of cadastral survey or at the time of revenue survey. It may contain no houses at all, or on the other hand, several hamlets each bearing a different name."

House

A house is a structure or part of a structure inhabited or vacant, a dwelling, a shop, a workshop, factory or place of worship or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. The term "occupied residential houses" refers only to such houses as are used for dwelling purposes or where any other purpose of use is accompanied by the element of dwelling, *e.g.*, shop-*cum*-dwelling, workshop-*cum*-dwelling, etc.

Appendix I to Table A-I shows the 1951 territorial units constituting the district of Saharsa and indicates the changes in their jurisdiction after the 1951 Census.

Annexure I to Appendix I to Table A-I shows the inter-relationship among revenue thanas, police-stations and anchals.

Appendix II to Table A-I gives the number of villages with a population 5,000 and above and of towns with a population under 5,000 upto the level of anchal. It is seen that in Saharsa district, only 46 villages have a population of more than 5,000 while not a single town has a population under 5,000.

Table A-IV—Towns (and Town-groups) classified by population in 1961 with variations since 1941

This table shows the growth of towns since 1941. Since there was no town in this district prior to 1961, the figures relating to earlier Censuses and figures under column 8 (Decade Variation) and column 9 (Percentage Decade Variation) for 1961 have not been presented. In 1961, six places were treated as towns. The area of each town is given in sq. miles as well as in Sq. Km. The towns are divided into six classes according to their population sizes as under :

Class I	..	100,000 and above
Class II	..	50,000—99,999
Class III	..	20,000—49,999
Class IV	..	10,000—19,999
Class V	..	5,000— 9,999
Class VI	..	Less than 5,000

The towns of this district however, belong to Classes IV and V only.

The details of all the six towns treated as such for the first time in 1961 are given in the Appendix to Table A-IV.

Explanatory Note A to Appendix to Table A-IV gives the names and areas of the villages constituting the new towns.

Special Appendix to Table A-IV prepared in two parts, gives details of the units constituting the towns together with their status and boundaries.

TABLE A-I—AREA, HOUSES AND POPULATION

District/Subdivision/ Anchal/Town-group or Town	Total Rural Urban	Area		Population per Sq. mile†	Number of villages		Number of towns	Number of occupied residential houses	Population

20	Alamnagar	R	78.0	202.0	838	36	2	..	12,101	65,377	34,449	30,928
21	Chausa	R	73.1	189.3	933	20	46	..	12,226	68,190	35,675	32,515

NOTES : 1. †The Sq. Km. and density figures of urban areas of Anchal/Subdivision/District are worked out using the area figures corrected up to 2 places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Anchal/Subdivision/District totals tally.

2. Towns treated as such for the first time in 1961 are printed in *italics*.

3. The following abbreviation has been used for the status of town, *e. g.* :
(N)—Notified Area.
Where no symbol occurs but the place is shown as Urban, it means that the place has been treated as town for Census purposes.

4. The rural areas of units smaller than the district do not add up to the total rural area of the district, because the rural areas of units smaller than district have been computed from Thana Jurisdiction Lists, while the total rural area of the district has been arrived at by subtracting the total urban area of the district as supplied by the District Officer, from the total area of the district as supplied by the State Survey Office.

APPENDIX I TO TABLE A-I

Statement showing 1951 *Territorial Units constituting the present set-up of Saharsa*

1. Only those names/areas which have undergone changes since 1951 have been shown below.
2. The areas of the transferred units have been taken from the Thana Jurisdiction Lists, and so they may not necessarily agree with the areas appearing in the 1951 District Census Handbooks.

District/Subdivision/ Police Station	1951 Territorial Unit	Details of gain in territories			Details of loss in territories			Net area Gain (+) Loss (—)	
		Brief description	Area		Brief description	Area			
			Sq. miles	Sq. Km.		Sq. miles	Sq. Km.	Sq. miles	Sq. Km.

										Chausa	73.08	20	46	68,190

NOTES : 1. Figures within brackets following each Revenue Thana in col. 1 indicate the number of villages in it according to actual counting of entries in the Thana Jurisdiction List.

2. Villages included wholly within towns have been shown against them. But villages included partly in towns have been excluded therefrom and counted entirely in the rural portion.

3. Figures shown against Anchals include those for urban areas within the Anchals.

4. (N) or Town has been mentioned against each town according as it is a "Notified Area" or a Town without status.

APPENDIX II TO TABLE A-I

Number of villages with a population of 5,000 *and over and towns with a population under* 5,000

EXPLANATORY NOTE

I. General Economic Tables

There are 9 Economic Tables (excluding sub-parts) compiled from information collected in the Individual Slips. Termed collectively as the General Economic Tables, these are :

B-I—Workers and non-workers classified by sex and broad age-groups.

B-II—Workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups.

B-III Part A—Industrial classification of workers and non-workers by educational levels in *urban areas only*.

B-III Part B—Industrial classification of workers and non-workers by educational levels in *rural areas only*.

B-IV Part A—Industrial classification by sex and class of workers of persons at work at household industry.

B-IV Part B—Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service.

B-IV Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.

B-V—Occupational classification by sex of persons at work other than cultivation.

B-VI—Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in *urban areas only*.

B-VII Part A—Persons working principally (*i*) as cultivators, (*ii*) as agricultural labourers or (*iiii*) at household industry classified by sex and by secondary work (*i*) at household industry, (*ii*) as cultivator or (*iii*) as agricultural labourer.

B-VII Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry.

B-VIII Part A—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *urban areas only*.

B-VIII Part B—Persons unemployed aged 15 and above by sex and educational levels in *rural areas only*.

B-IX—Persons not at work classified by sex, broad age-groups and type of activity.

Of these, the following tables have been reproduced in this hand book :

B-I	..	Up to district.
B-III Part A	..	Up to district.
B-III Part B	..	Up to anchals.
B-VIII Part A	..	Up to district.
B-VIII Part B	..	Up to anchals.
B-IX	..	Up to anchals.

The Economic Classification adopted in 1961 is based on the division of the entire population in two basic groups, namely, workers and non-workers. Workers are persons engaged in the production of goods and/or exchangeable services. The concept of work is not tied to the securing of an income, hence even family workers who do not receive any wages in cash or kind (but supplement the family income by engaging in any kind of productive work) have been treated as workers. On the other hand, persons who have earnings, but do not work (*e. g.*, beggars, rentiers and pensioners) are classed as non-workers. The workers have been further classified into nine industrial categories according to the sector of economic activity in which they are engaged. This classification, therefore, is entirely industrial, and based upon the Indian Standard Industrial Classification Scheme adopted by the Government of India. It may be noted that occupational classification has also been done, in Tables B-V and B-VI [printed in Part II-B (*ii*) of this State] which, however, are not reproduced in this volume. The nine industrial categories are :

I	..	Working as Cultivator
II	..	Working as Agricultural labourer
III	..	Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
IV	..	Working at Household Industry
V	..	Working in Manufacturing other than Household Industry
VI	..	Working in Construction
VII	..	Working in Trade and Commerce
VIII	..	Working in Transport, Storage and Communications
IX	..	Working in Other Services

In previous censuses, the non-working or non-earning section of the population was tagged on to each livelihood class so that the total number of dependants of each livelihood class was easily determinable. In 1961, all non-workers have been pooled together into one category and it is no longer possible to say what is the extent of dependancy among persons, say, engaged in cultivation. However, in accordance with the recommendations of the United Nations, the non-workers have for the first time in the Indian Census been further classified into the following 8 groups :

1. Full time students,
2. Housewives and persons engaged in unpaid home duties,
3. Infants and other dependants including permanently disabled or old persons,
4. Retired persons, rentiers and others who are in receipt of income without any work,
5. Beggars, vagrants or independent women and others of unspecified source of existence,
6. Convicts in jail, inmates of a penal, mental or charitable institution,
7. Persons not employed before but now seeking employment for the first time, and
8. Persons employed before but now out of employment and seeking work.

The particulars of the tables, being reproduced herein, are given below :

Table B-I—Workers and Non-workers classified by Sex and Broad Age-groups

This table gives for each industrial category of workers and also non-workers the classification by sex and broad age-groups, 0—14, 15—34, 35—59 and 60+, besides the rubric "age not stated".

Cultivation involves production of crops like cereals and vegetables on land owned or held on lease. Thus, tenant cultivators are included, but not plantation growers.

An agricultural labourer is a person who works on another person's land for wages in cash, kind or share without having any right on the land. He has also no right to take a decision as to which crop will be sown and when.

Household industry means an industry, not on the sale of a registered factory, conducted by the head of the household himself and/or members of the household at home or within the village in rural areas, and only at home in urban areas.

Table B-III Part A—Industrial Classification of Workers and Non-workers by Educational Levels in *Urban Areas only*

Table B-III Part B—Industrial Classification of Workers and Non-workers by Educational Levels in *Rural Areas only*

These tables give the classification of workers and non-workers by sex, literacy and educational levels separately for urban and rural areas. All persons in the age-group 0—4 are, by definition, illiterate. The classification of persons with some educational standard is common upto the stage of Matriculation or Higher Secondary for both rural and urban areas. However, in urban areas, persons with qualifications above Matriculation or Higher Secondary have been further classified into (*i*) persons holding technical diploma not equal to degree, (*ii*) non-technical diploma not equal to degree, (*iii*) University degree and (*iv*) technical degree or diploma equal to degree or post-graduate degree in Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and others.

Illiterate means a person who can neither read nor write or can merely read but not write in any language.

Literate means a person who can both read and write a simple letter.

For a literate person who had also passed a written examination or examinations as proof of the educational standard attained, the highest examination was noted in the Individual Slip. This formed the basis for grouping under the different educational levels.

Table B-VIII Part A—Persons Unemployed Aged 15 and above by Sex, Broad Age-groups and Educational Levels in *Urban Areas only*

Table B-VIII Part B—Persons Unemployed Aged 15 and above by Sex and Educational Levels in *Rural Areas only*

These tables give figures of unemployed persons aged 15 and above by sex and the same educational standards as in Table B-III. The unemployed persons given in these tables are those (*i*) seeking employment for the first time and (*ii*) having been employed before, but now out of employment and seeking work. Table B-VIII Part A also shows classification by age-groups.

Table B-IX—Persons not at Work classified by Sex, Broad Age-groups and Type of Activity.

This table gives the figures of the non-working population classified by sex and broad age-groups (0—14, 15—34, 35—59 and 60+) into the 8 different categories of non-workers, *viz*,

1. Full time students or children attending school who do no other work, such as make articles at home for sale, nor even help part-time their own family cultivation, industry, trade or business.

2. Persons engaged in unpaid home duties (like housewives or other adult females) but doing no other work, such as make articles at home for sale or wages, nor helping regularly even part-time in family cultivation, industry, trade or business.

3. Dependants, including infants or children not attending school, persons permanently disabled from work because of illness or old age.

4. Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work.

5. Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence.

6. Convicts in jails (undertrial prisoners were treated as workers if they used to work before being apprehended) or inmates of penal, mental or charitable institutions.

7. Persons who had not been employed before but were seeking employment for the first time during enumeration.

8. Persons employed before but out of employment and seeking employment at the time of enumeration.

II. Household Economic Tables

The Household Economic Tables have been prepared from the data collected in the Household Schedule canvassed for each and every household in the State. In preparing the tables, however, a 20 per cent systematic sample was drawn separately for rural and urban areas. Thus, all the tables in this series are based on a 20 per cent sample. The tables are :

B-X .. Sample Households (*i*) engaged neither in cultivation nor in household industry, (*ii*) engaged either in cultivation or household industry but not in both and (*iii*) engaged both in cultivation and household industry for *all areas.*

B-XI .. Sample Households engaged in cultivation classified by interest in land and size of land cultivated in rural and urban areas separately.

B-XII .. Sample Households engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers in rural and urban areas separately.

B-XIII .. Sample Households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry in rural and urban areas separately.

B-XIV .. Sample Households engaged only in Household Industry classified by Principal Household Industry in *all areas.*

B-XV .. Sample Households engaged both in cultivation and household industry classified by size of land in rural and urban areas separately.

B-XVI .. Sample Principal Household industry classified by period of working and total number of workers engaged in household industry in *all areas*

B-XVII .. Sample Households classified by (*i*) number of male and female members by size of households and (*ii*) Engagement (*a*) neither in cultivation nor in industry, (*b*) in household industry only and (*c*) in cultivation sub-classified by size of land cultivated.

The Household Economic Tables being reproduced in this Handbook are :

Table B-X—Sample Households (i) Engaged neither in Cultivation nor in Household Industry (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for *all areas*

This table gives the classification of sample households by the following four types of economic activity :

(*i*) households engaged neither in cultivation nor in household industry ;

(*ii*) households engaged in cultivation only ;

(*iii*) households engaged in household industry only ; and

(*iv*) households engaged both in cultivation and household industry.

Cultivation involves "ploughing, sowing and harvesting and does not include fruit-growing or keeping orchard or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations".

Household Industry means "Industry (not on the scale of registered factory) conducted by the head

of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas".

Table B-XI—Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban Areas separately.

This table gives the classification of sample cultivating households by the following 10 size-ranges of land cultivated in acres :

Less than 1; 1.0 to 2.4 ; 2.5 to 4.9 ; 5.0 to 7.4; 7.5 to 9.9; 10.0 to 12.4; 12.5 to 14.9; 15.0 to 29.9; 30.0 to 49.9 ; 50+and 'unspecified'.

The information is cross-tabulated with reference to the following 3 kinds of interest in land ;

(*i*) owned or held from Government ;

(*ii*) held from private persons or institutions for payment in money, kind or share ; and

(*iii*) partly held from Government and partly from private persons or institutions for payment in money, kind or share.

Table B-XVII—Sample Households classified by (i) Number of male and female members by Size of Households and (ii) Engagement (a) neither in Cultivation nor in Industry, (b) in Household Industry only and (c) in Cultivation subclassified by size of land cultivated.

This table gives the distribution of sample households by the following size-classes : (*i*) 1 member (*ii*) 2-3 members, (*iii*) 4-6 members, (*iv*) 7-9 members and (*v*) 10 members or more. For urban areas the figures are for total sample households. For rural areas, however, the size-class of household is cross-tabulated with reference to the economic activity of the household, *viz.*,

(*a*) households engaged neither in cultivation nor in household industry ;

(*b*) households engaged in household industry only ; and

(*c*) households engaged in cultivation only.

These are further categorised into 10 size-classes by the extent of holdings.

EXPLANATORY NOTE

The following tables constitute the C-series :

C-I—Composition of sample households by relationship to head of family classified by size of land cultivated.

C-II—Age and Marital Status.

C-III Part A—Age, Sex and Education in *All Areas.*

C-III Part B—Age, Sex and Education in *Urban Areas only.*

C-III Part C—Age, Sex and Education in *Rural Areas only.*

C-IV—Single year age returns.

C-V—Mother-tongue.

C-VI—Bilingualism.

C-VII—Religion.

C-VIII Part A—Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Castes.

C-VIII Part B—Classification by Literacy and Industrial Category of Workers and Non-workers among Scheduled Tribes.

Table C-I has been prepared from the data collected in the Household Schedule on the basis of a 20 per cent sample. The remaining tables of this series have been prepared from information gathered in the Individual Slips.

The tables reproduced in this Handbook are given below, along with the unit upto which they have been furnished :

Table C-I—For district classified by total, rural and urban.

Table C-II—Upto subdivisions classified by rural and urban.

Table C-III Part B—For district only.

Table C-III Part C—For district only.

Table C-V—Upto Anchals for total only.

Table C-VII—Upto Anchals.

Table C-VIII Part A—Upto Anchals.

Table C-VIII Part B—Upto Anchals.

Relevant particulars of the above tables are given below :

Table C-I—Composition of Sample Households by relationship to head of family classified by size of land cultivated

The table gives separately for total, rural and urban areas, the composition of sample households by heads of households, their spouses, relations (separately for married and never married widowed and divorced or separated), and unrelated persons. The information relating to rural areas is cross-tabulated with reference to (*i*) households engaged neither in cultivation nor in household industry, (*ii*) households engaged in household industry only, and (*iii*) households engaged in cultivation, the last named category being further classified by the size of holding into 10 size-classes.

Table C-II—Age and Marital Status

This table gives, separately for rural and urban population, the marital status of males and females for the entire population and also for quinquennial age-groups beginning from 10—14 years. All persons up to 9 years of age have been treated as 'unmarried'.

'*Married*' implies a living spouse, whether of the first or a subsequent marriage and includes any husband-wife relationship customarily recognized by society as well as *de facto* union.

'*Widowed*' means married but spouse dead, no remarriage having taken place.

'*Divorced*' means a person divorced in a lawful manner either by a decree of a law court or by a regular, social or religious custom, but not remarried and '*Separated*' means a person separated from wife or husband and living apart with no apparent intention of living together again.

'*Age*' means number of completed years on the 1st March 1961, the reference day for the 1961 Census. Infants below one year have 0 year as their age.

Table C-III Part B—Age, Sex and Education in *Urban Areas only.*

Table C-III Part C—Age, Sex and Education in *Rural Areas only.*

In both the tables, educational standards of the population (classified by sex) are given for all ages and quinquennial age-groups commencing from 5—9 years to 30—34 and broader age-groups thereafter. Those within 0—4 years of age were, by definition, treated as illiterate.

Table C-V—Mother-tongue

This table gives the number of speakers of each mother-tongue returned in the Census. The mother-tongues have been given in alphabetical order and are classified by the Linguist in the Office of the Registrar General, India, on the basis of Grierson's Linguistic Survey. They have been marked appropriately to indicate—

(*i*) mother-tongues of countries outside the Indian sub-continent (printed in *italics*);

(*ii*) mother-tongues unclassified in the Linguistic Survey of India (with asterisk);

(*iii*) mother-tongues though classified in the Linguistic Survey of India, either tentatively reclassified by the Linguist or considered by him to be unclassifiable (with dagger);

(*iv*) mother-tongues unclassified by the Linguistic Survey of India but tentatively classified by the Linguist (with asterisk and dagger).

In 'Nagpuri-Eastern Magahi', the hyphenated words have been inserted by the Linguist to indicate the affiliations of the mother-tongue.

Mother-tongue is the language 'spoken in childhood by the person's mother to the person or mainly spoken in the household'.

Table C-VII—Religion

This table gives figures for the following six main religious groups, arranged in alphabetical order:

(i) Buddhists,

(ii) Christians,

(iii) Hindus,

(iv) Jains,

(v) Muslims, and

(vi) Sikhs

There is a residuary group 'other religions and persuasions' as also a group comprising of persons who did not state their religion.

Table C-VIII—Scheduled Castes and Scheduled Tribes, classified by Literacy and Industrial Categories of Workers and Non-workers

Part A of the table furnishes data for the combined population of all Scheduled Castes and *Part B* for the combined population of all Scheduled Tribes.

The population is categorised by sex into (*i*) illiterate, and (*ii*) literate and educated, and also by the nine industrial categories of workers and non-workers.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20% sample)

EXPLANATORY NOTE

Special tables for the Scheduled Castes and Scheduled Tribes, separately for each caste or tribe are an innovation of the 1961 Census. The tables in this series are the following :

SCT-I Part A—Industrial classification of persons at work and non-workers by sex for Scheduled Castes.

SCT-I Part B—Industrial classification of persons at work and non-workers by sex for Scheduled Tribes.

SCT-II Part A—Age and marital status for Scheduled Castes.

SCT-II Part B—Age and marital status for Scheduled Tribes.

SCT-III Part A (i)—Education in urban areas only for Scheduled Castes.

SCT-III Part A (ii)—Education in urban areas only for Scheduled Tribes.

SCT-III Part B(i)—Education in rural areas only for Scheduled Castes .

SCT-III Part B(ii)—Education in rural areas only for Scheduled Tribes.

SCT-IV Part A—Religion for Scheduled Castes.

SCT-IV Part B—Religion for Scheduled Tribes.

SCT-V Part A—Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Castes.

SCT-V Part B—Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Tribes.

SC-I—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes.

ST-I—Mother-tongue and Bilingualism for Scheduled Tribes.

ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes.

The tables being reproduced in this Handbook and the levels up to which they are reproduced, are indicated below :

SCT-I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Part A) and Scheduled Tribes (Part B)—For the district as a whole.

SC-I—Persons not at work classified by sex, type of activity and educational level for Scheduled Castes—For the district as a whole and rural areas of such anchals in which the combined Scheduled Caste population is higher than the average Scheduled Caste population per anchal in the district.

ST-I—Mother-tongue and bilingualism for Scheduled Tribes—For the district and selected anchals in which the combined strength of Scheduled Tribes is higher than the average population of Scheduled Tribes in an anchal.

ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes—For the district and selected anchals in which the Scheduled Tribe population is higher than the average Scheduled Tribe population per anchal.

The Scheduled Castes and Scheduled Tribes have been notified as such under Notification no. SRO-2477-A, dated the 29th October, 1956, issued by the Government of India, Ministry of Home Affairs in accordance with the provisions contained in Articles 341 (1) and 342 (1) of the Constitution of India. The list of Scheduled Castes and Scheduled Tribes, thus notified, for the district of Saharsa is given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Chamar or Mochi
5. Chaupal
6. Dabgar
7. Dhobi
8. Dom or Dhangad
9. Dusadh inlcuding Dhari or Dharhi
10. Ghasi
11. Halalkhor
12. Hari, Mehtar or Bhangi
13. Kanjar
14. Kurariar
15. Lalbegi
16. Musahar
17. Nat
18. Pan or Sawasi
19. Pasi
20. Rajwar
21. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Binjhia
7. Birhor
8. Birjia
9. Chero
10. Chik Baraik
11. Gond
12. Gorait
13. Ho
14. Karmali
15. Kharia
16. Kharwar
17. Khond
18. Kisan
19. Kora
20. Korwa
21. Lohara or Lohra
22. Mahli
23. Mal Paharia
24. Munda
25. Oraon
26. Parhaiya
27. Santal
28. Sauria Paharia
29. Savar

Table SCT-I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Part A) and Scheduled Tribes (Part B) for the district as a whole

Part A gives the same information for each of the Scheduled Castes as given in Table B-I, *i. e.*, industrial classification of workers and non-workers. However, the data are not classified by broad age-groups. Information is also given of the number of males and females of each caste engaged in the unwholesome occupations of (*i*) tanning and currying of hides and skins, and (*ii*) Scavenging.

Part B of this table gives the industrial classification by sex of each Scheduled Tribe into nine categories of workers and non-workers.

Appendix to Table SCT-I shows the population of Scheduled Castes and Scheduled Tribes in each Anchal of Saharsa district.

Table SC-I—Persons not at work classified by Sex, Type of Activity and Educational Levels for Scheduled Castes.

This table gives for the Scheduled Castes as a whole, the classification of non-workers by sex, type of activity and also educational levels. Instead of 8 detailed groups of activities relating to non-workers vide Explanatory Note to General Economic Tables, at page 16, the groups are restricted to four, namely, (*i*) fulltime students, (*ii*) persons seeking employment for the first time, (*iii*) persons employed before but now out of employment and seeking work, and (*iv*) others:

> 'Others' include persons engaged in unpaid home duties (such as housewives), dependants, retired persons, beggars, and inmates of penal and mental institutions.

The classification by educational levels is by illiterate, literate without educational level, primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary.

Table ST-I—Mother-tongue and Bilingualism for Scheduled Tribes

This table gives the extent of prevalence of tribal languages spoken as mother-tongue by each of the Scheduled Tribes and the number of speakers of subsidiary language in each tribe.

Table ST-II—Persons not at work classified by Sex and Type of Activity for Scheduled Tribes.

This table gives information similar to that in Table SC-I, in respect of the Scheduled Tribes. However, information about the four types of activities of non-workers, though given separately for each Scheduled Tribe, is not, as in the case of Scheduled Castes, classified by educational levels.

TABLE SCT-I PART A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES

EXPLANATORY NOTE

Information relating to the nature and number of houses was collected during the period of houselisting in September-October, 1960 in the Houselist Form. The data processed from these lists were compiled under the E-Series tables. Although none of the E-Series tables is reproduced in the Handbook, the information collected in the houselists is given in two tables : (i) Classification of rural population by size-class of villages determined by the numbers of houses in them, and (ii) villagewise industrial data.

Classification of rural population living in villages of various sizes

The villages are classified into seven categories by the size-class of number of houses contained in each. These are :

(*i*) 5 and below

(*ii*) 6—15

(*iii*) 16—25

(*iv*) 26—35

(*v*) 36—50

(*vi*) 51—100

(*vii*) Above 100

Villagewise Industrial data

This table gives information about the number of industrial establishments in each village. The name of the village is followed by the three-digit code number of the industrial establishment indicating the Division, Major Group and Minor Group of the Indian Standard Industrial Classification. A list of the Divisions, Major Groups and Minor Groups together with their code numbers occuring in the table is reproduced in the Annexure to this note. Figures within brackets indicate the number of establishments relating to the industry concerned in the village. Data relating to towns have been given separately.

ANNEXURE

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 & 3—Manufacturing	
20	*Foodstuffs*—	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and foodgrains.	200
	Production of indigenous sugar, *gur* from sugarcane or palm juice and production of candy.	202
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of other food products such as sweetmeat and condiments, *muri*, *murki*, *chira*, *khoi*, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages*—	
	Production of indigenous liquor such as toddy, liquor from *mahua*, palm juice.	212
	Production of aerated and mineral water	214
22	*Tobacco Products*—	
	Manufacture of *bidi*	220
	Manufacture of *hookah* tobacco	223
23	*Textile—Cotton*—	
	Cotton spinning (other than in mills)	231
	Cotton dyeing, bleaching	233
	Cotton weaving in handlooms	235
	Printing of cotton textile	237
24	*Textile—Jute*—	
	Jute pressing and baling	240
	Dyeing and bleaching of jute	242
25	*Textile—Wool*—	
	Wool weaving in handloom	255
27	*Textile—Miscellaneous*—	
	Making of textile garments including raincoats and headgear	273
	Manufacture of Umbrellas	278
28	*Manufacture of Wood and Wooden Products*—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares.	284
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products*—	
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from—paper, paper board and pulp	292

Major Group (Code)	Description	Minor Group (Code)
	Division 2 & 3—Manufacturing—concld.	
30	*Printing and Publishing*—	
	Printing and publishing of books	301
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products*—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of leather products (except those covered by code Nos. 311, 312) such as leather upholstery, suitcases, pocket-books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear	314
32	*Rubber, Petroleum and Coal Products*—	
	Manufacture of tyres and tubes	320
33	*Chemicals and Chemical Products*—	
	Manufacture of ammunition, explosives and fireworks	333
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
34	*Non-Metallic mineral Products other than Petroleum and Coal*—	
	Manufacture of structural clay products such as bricks, tiles.	340
35	Manufacture of earthen ware and earthen pottery	350
	Manufacture of glass bangles and heads	353
36	*Basic Metals and their Products except Machinery and Transport Equipment*—	
	Manufacture of iron and steel including smelting refining, rolling, conversion into basic forms such as billets, blooms tubes rods	360
	Manufacture of brass and bell metal products	365
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	*Machinery (all kinds other than Transport) and Electrical Equipment*—	
	Manfacture of textile machinery and accessories	373
	Manufacture of electronic equipment such as radio, microphone	378
38	*Transport Equipment*—	
	Repairing and servicing of motor vehicles	384
	Repairing of bicycles and tricycles	388
39	*Miscellaneous Manufacturing Industries*—	
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments	394
	Manufacture and repair work of goods not assignable to any other group.	399

EXPLANATORY NOTE

Besides giving the Census tables, the District Census Handbook of 1951 contained information on vital statistics, rainfall, agriculture, livestock, industries, and wholasale prices. The present Handbook seeks not only to continue the tradition but also to enlarge its scope by furnishing official statistics on several other topics. The data contained in the following pages are complementary to the Census tables, and attempt to give a complete statistical picture of the district.

The materials in this section have been obtained from various sources indicated in the tables. They can be broadly divided into eight groups, namely, Vital Statistics, Agricultural Statistics, Livestock, Industry, Administration, Education, Public Health and Communications.

The salient features of the tables under each group are briefly summarised below:

VITAL STATISTICS

Table VS-I—Registered Births and Deaths with Mid-year Rates

This table gives for the district as a whole the number of births and deaths registered during the years 1951-1960. The birth and death rates have been calculated both on the 1951 Census and the estimated mid-year population, i.e., the population on the 30th June of each year.

Table VS-II—Deaths and Death rates due to selected causes

This table furnishes the figures of death by selected causes for 1951-1960. The death rates have been calculated for 1951 on the figures for the Census of that year, and in other cases on the estimated mid-year population. Data in respect of four causes of death could be had for 1960 only, therefore, they have been presented separately in the supplement to the table.

AGRICULTURAL STATISTICS

Table AS-I—Rainfall

Monthly rainfall data for the years 1951-60 are presented for the four selected rainfall recording stations at Madhepura, Supaul, Pratapganj, and Bhimnagar. The district average has also been given.

Table AS-II—Highest and Lowest Temperatures

This is a table on temperature.

Since there is no temperature recording station in the district of Saharsa, this table is not being presented.

Table AS-III—Land Utilisation and Area under different crops

This table presents land utilisation statistics for the district as a whole. The figures relate to the Census years 1951 and 1961. Figures for the Census years 1911, 1921, 1931, and 1941 are included in the district of Bhagalpur. The manner in which the figures have been worked out is indicated in a note appended to the table.

The terms and concepts used in the table are defined below:

Geographical area : It represents the total land area of the district.

Forests: All actually forested areas on the lands classed or administered as forest under any legal enactment dealing with forests, whether State-owned or private.

Barren and unculturable land : All barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation unless at a high cost is classed as unculturable, whether such land is in isolated blocks, or within cultivated holdings.

Land put to non-agricultural use: All lands occupied by buildings, roads and railways or under water, e.g., rivers and canals and other lands put to uses other than agricultural.

Culturable waste : All lands available for cultivation, whether or not taken up for cultivation or abondoned after five years for one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Permanent pastures and other grazing lands : All grazing lands, whether they are permanent pastures and meadows or not. Village common and grazing lands within forested areas are included under this head.

Miscellaneous tree crops and groves : All cultivable lands, which are not included under net area sown, but are put to some agricultural use. Lands under casuarina trees, thatching grass, bamboo bushes and other groves for fuel, etc., which are not included under 'orchards' are classed under this category.

Other fallow land : All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

Current fallows : Lands which are left fallow during the current year only.

Net areas sown : The net area sown represents the area sown to crops, counting areas sown more than once in the same year only once.

Cultivated area : The sum of net areas sown and area under current fallows gives the cultivated area.

Section B of the table furnishes details of the area covered by different crops. The total area sown under all crops is in fact the gross cropped area, which term means "the sum of areas under all crops and represents the sum of net sown area and area sown more than once in the year".

The cropped area is divided into three main groups, viz., under food crops, non-food crops and miscellaneous crops. The food crops have been further subdivided into basic food crops and other food crops. The former includes rice, wheat, pulses, fruit and vegetables, and the latter sugarcane condiments, and others. Non-food crops have also been likewise subdivided into oilseeds, fibres (which term includes cotton, jute and other fibres) and tobacco. Miscellaneous crops cover fodder and other non-food crops.

Table AS-IV—Gross Area Irrigated by crops

This table gives the gross cropped and irrigated areas under different crops for the district as a whole. The breakup of the irrigated area by crops (food and non-food) has also been indicated.

Table AS-V—Gross Area Irrigated by sources

This table shows the gross area irrigated in the district by different sources for the Census years 1951 and 1961. Figures for the Census years 1911-41 are included in the district of Bhagalpur.

Table AS-VI—Yield rates of principal crops

This table furnishes the average yield in maunds per acre in respect of the principal crops of the district for the period 1952-53 to 1959-60.

Table AS-VII—Statistics of skilled and unskilled Agricultural labourers

This table indicates the average daily wages paid to skilled and unskilled agricultural labourers during the *rabi* and *kharif* seasons.

Skilled labourers include carpenter, blacksmith and *mochi* (cobbler). Among the unskilled are the field labourers, herdsmen and other agricultural labourers. Separate figures have been given for men, women and children so far as the unskilled labourers are concerned.

Tables AS-VIII—Monthly ruling wholesale prices of staple foodgrains

The wholesale prices of staple foodgrains, namely, rice (medium), wheat (red) and gram for all the twelve months during the years 1952-60 are presented in this table for the district. Figures for the year 1951 could not be had.

Subsidiary Tables

Seven subsidiary tables have been prepared. They are all subsidiary to Table AS-III

Subsidiary table AS-III. 1 *Land utilisation.*—It gives the breakup of 1,000 acres of the land area in the district by area under forests, etc., and total cultivable area. The net area sown per 1,000 acres of the land area has also been indicated. The distribution of every 1,000 acres of the total cultivable area in the district by the net area sown and area of fallow and other uncultivated land has also been given. The proportion of the cultivable area, net area sown, net area irrigated etc., in the district to every 1,000 acres in the state has also been worked out to facilitate comparative study.

*Subsidiary Table AS-III.*2—*Progress of cultivation during the last decade.*—This table traces the progress of cultivation since 1951 in terms of area under foodgrains and other crops, net area shown and area sown more than once.

*Subsidiary Table AS-III.*3—*Components of land area cultivable and cultivated area per hundred persons during the last decade.*—It shows the incidence of land area, area cultivable, net area sown, etc., per 100 persons in the district. The figures relate to the last decade.

*Subsidiary Table AS-III.*4—*Cropping pattern.*—The table indicates the cropping pattern as in 1951 and 1961. The crops have been grouped under two heads, namely, food and non-food. The area covered by different crops per 1,000 acres of the gross area sown in the district as also their proportion to every 1,000 acres in the State as a whole, has been shown.

*Subsidiary Table AS-III.*5—*Density of total/rural population per hundred acres of area under food grains and net area sown.*—This table furnishes the density of total and rural population per 100 acres of area under foodgrains, other crops, net area sown and area shown more than once for the census years 1951 and 1961.

*Subsidiary Table AS-III.*6—*Density of cultivators and Agricultural labourers per hundred acres of net area sown in* 1951 *and* 1961.—This table gives the density of cultivators and agricultural labourers per 100 acres of net area sown in 1951 and 1961. Separate figures have been furnished for the total and rural population.

*Subsidiary Table AS-III.*7—*Rainfall, area sown and irrigated, density, etc.*—This table furnishes data on rainfall and gross area sown and irrigated by different crops together with yield rates. The density per 100 acres of the cropped area and the area under foodgrains has also been given.

LIVESTOCK

Table LVT-I—Government Veterinary Facilities

Veterinary facilities existing in the district during the years 1951-52 to 1960-61 are indicated in this table. The number of hospitals, dispensaries and veterinary doctors has been given year by year.

Table LVT-II—Livestock and Poultry

This table presents the population of livestock and poultry for eight livestock censuses beginning from 1920. The variation in the numbers from census to census has also been indicated. Figures preceded by a plus (+) sign denote increase, and those by minus (—) sign denote decrease from previous figures.

Livestock means all domesticated animals of economic importance and includes cattle, buffaloes, sheep, goats and pigs.

Poultry means domestic avian such as fowls and ducks.

INDUSTRIES

Table IND-I—Employment in Textile and Non-Textile Industries (As on 31st December 1960)

The number of industrial establishments in the district with daily average employment in each has been furnished in this table. The industries have been divided into two broad groups—textile and non-textile. While the former category has none in this district, the latter embraces 8 industries detailed in the table. The rural and urban breakup of the industrial establishments has also been given.

Table IND-II—Name of Industry with number of Households and persons employed in Rural Areas only

This table furnishes anchalwise industrial data for all the rural areas of the district. These have been extracted from the Houselists prepared during September-October, 1960, as a preliminary step to the 1961 Census. Here also the industrial establisments have been grouped into two broad divisions —textile and non-textile. The textile establishments include weaving and spinning. Non-textile establisments cover shoe-making and repairing, black-smithy, carpentry and furniture making, pottery, gold and silver ornaments making, laundry, tailoring, bamboo products making, bidi making, manufacture of lac bangles, manufacture of oils, manufacture of butter and cream, preparation of sweetmeats, etc. The number of villages where the particular type of industrial establishment is found, along with the number of households and number of persons engaged in it, has been indicated anchalwise.

ADMINISTRATION

Table ADM-I—General results of trial of Criminal Cases.

General results of trial of criminal cases in the district for the period 1951-60 have been shown in this table. Section A gives the manner of disposal of criminal cases in terms of persons affected in the lower courts, while section B deals with the results of appeals and revisions.

Table ADM-II—Punishments Inflicted in Criminal Cases.

This table gives for the district data on punishments inflicted in criminal cases during the period 1951-60.

Table ADM-III—Strength of Police

The strength of the Police force in the district during the years 1951-60 has been shown in this table for every category of policemen.

Table ADM-IV—Places of confinement and distribution of convicts by Age-groups and Literacy

This table gives the average daily number of prisoners in the three jails of Saharsa district. The number of convicts and their distribution by age-groups and literacy has also been indicated. The figures relate to the years 1951-60.

Table ADM-V—Co-operative Societies

The data regarding Co-operative Societies are presented in this table for the years 1950-51 to 1959-60. The Societies have been grouped into four broad categories, namely, Primary Agricultural Societies, Non-agricultural Societies, Provincial and Central Credit Socities and Central Co-operative Banks and Unions. The first two have been further subdivided into Non-credit and Credit Societies. For each type of Co-operative Society, information is given about the number of societies, number of members, working capital (in rupees), and profit or loss. Figures preceded by plus (+) sign denote profit, and those by minus (—) sign indicate loss.

Table ADM-VI—Receipts of Excise Revenue, Sales Tax, Entertainment Tax, Motor-Spirit Tax, Stamps, etc.

This table gives for the district details of collections made under various heads such as excise, sales tax, entertainment tax, motor-spirit tax, etc., during the years 1951-52 to 1960-61. Figures for registeration fee relate to the calendar years 1951-60.

Table ADM-VII—Land Revenue/Rent

Figures relating to the demand and collection of land revenue/rent for the district, along with the percentage of collection to the demand, have been given in this table. The State Government started taking over the *zamindari* interests under the Bihar Land Reforms Act, 1950 in 1954-55. Prior to this, the *zamindars* paid land revenue to Government and the *raiyats* generally paid rent to the *zamindars*. The demand and collection for the years 1951-52 to 1953-54 are not available. The collection of rent by Government started in 1954-55 consequent upon the vesting of the *zamindari* interests in the State.

Table ADM-VIII—Number of registered documents and value of properties transferred

Registration statistics are presented in this table for the decade 1951-60. The number of instruments registered and the value of property transferred are given in this table along with gross receipts and expenditure for the district as a whole.

Table ADM-IX—Sale and discharge under Small Savings Scheme

This table furnishes data relating to the sale and discharge of certificates under the Small Savings Schemes. Figures have been given separately for the Treasury Savings Deposits, Post-Office Savings Bank, 15-Year Annuity Certificate and National Plan Savings Certificate for the period, 1956-57 to 1960-61.

Table ADM-X—List of Banks

It contains a list of Banks in the district. Column 1 gives the names of places where banking facilities exist, while column 2 indicates the names of Banks.

Table ADM-XI—Progress of Life Insurance

This table traces the progress of Life Insurance in the district from the year 1957 onwards.

Table ADM-XII—Number of Motor Vehicles

The number of motor vehicles in the district during the period 1950-51 to 1960-61 is shown in this table. Separate figures have been given for different types of automobiles. State figures have also been given to facilitate comparison.

EDUCATION

Table EDN-I—Educational Institutions and Pupils, 1960-61

This table gives the number of various types of educational institutions with pupils therein. Column 10 of the table shows the population in the relevant age-group the pupils of which generally receive schooling in the institutions noted against it in column 1. Column 7 furnishes figures of enrolment in 1960-61. The percentage of the pupils enrolled to the total population in the relevant age-group has been given in column 13. Since enrolment in schools for professional and special education is open to pupils belonging to a very wide age-group, no figures similar to column 8 onwards have been furnished for such institutions.

Table EDN-II—List of Educational Institutions

The table gives a list of middle and higher educational institutions. Column 1 shows the type of institution and column 2 the location in alphabetical order. Where two or more educational institutions exist the names of such institutions have been indicated within brackets immediately after the name of the locality

Table EDN-III—Press and Journals

This table shows the number of printing presses in the district, and the publications brought out by them during the period 1951-61.

Table EDN-IV—List of Cinema Houses

It gives a list of cinema houses in the district.

PUBLIC HEALTH

Table PH-I—Medical Facilities

This is a table on medical facilities. Part A of the table gives the number of degree or diploma holding medical practitioners registered in the district at each year during 1951—60. Part B indicates the number of hospitals and dispensaries. Part C is a list of other health institutions, viz., Family Planning Centres, Maternity and Child Welfare Centres and T. B. Clinics/Ward/Centres.

COMMUNICATIONS

Table CMN-I—Mileage of extra municipal roads maintained by Public Authorities

The mileage of various types of roads in the district maintained by the Public Works Department indicated in this table.

Table CMN-II—List of Inspection/Dak Bungalows

This is a list of Inspection/Dak Bungalows with details of amenities existing in each.

Table CMN-III—Polymetric Table of distances (in miles)

This is a polymetric table of distances in miles. The district, subdivisional and anchal headquarters, numbering 22 find place in the table. Each place is connected with the remaining ones by a vertical line. The road distance between any two places on the table can be read along the vertical line connecting the two places. Rail distances are given within brackets for places connected by rail as well.

VITAL STATISTICS

TABLE AS-III—LAND UTILISATION AND AREA UNDER DIFFERENT CROPS

(*Area figures in acres*)

Classification of area	1951	1961
1	2	3
A. Total geographical areas	**1,371,520**	**1,347,840**
Forests	2,471	2,345
Area not available for cultivation	167,597	233,527
Land put to non-agricultural uses	120,019	139,664
Barren and unculturable land	47,578	93,863
Area cultivable	419,669	249,885
Culturable wastes	356,497	148,494
Miscellaneous tree crops and groves	..	..
Pastures and grazing land	23,162	18,302
Other fallows	40,010	83,089
Area cultivated	781,783	862,083
Current fallows	214,698	212,694
Net area sown	567,085	649,389
B. Total area sown under all crops	**677,512**	**900,433**
Area under food crops	612,599	733,314
Basic Food Crops	609,011	729,724
Rice	259,179	306,899
Wheat	40,168	47,378
Pulses	NA	NA
Fruit and vegetables	24,045	35,848
Other food crops	3,588	3,590
Sugarcane	1,966	1,238
Condiments	724	1,113
Others	898	1,239
Aras under non-food crops	61,453	165,915
Oil seeds	24,279	10,059
Fibres	35,677	155,324
Cotton	..	66
Jute	33,971	114,737
Other fibres	1,706	40,521
Tobacco	1,497	532
Area under miscellaneous crops	3,460	1,204
Fodder	..	233
Other non-food crops	3,460	971

NOTES : (i) Figure for the census year 1951 gives the average of five crop years with the census year as the mid-year. 1961 data are the average of the five crop years including and preceding 1960-61.

(ii) Figures for the years 1911 to 1941 are included in the district of Bhagalpur.

TABLE AS-III.1—LAND UTILISATION

(Subsidiary Table I)

(Area in acres)

Serial no.	Classification of land	Year 1961	1951
1	2	3	4
1	Total land area according to the Surveyor General	1,338,880	1,334,632
2	Total area for which village papers are available	1,347,840	1,371,520
3	Per 1,000 acres of the land area in the district—		
	(i) Under forests or otherwise not available for cultivation	175	124
	(ii) Total cultivable area	825	876
	(iii) Net area sown	482	413
4	Per 1,000 acres of total cultivable area in the district—		
	(i) Net area sown	584	472
	(ii) Area under fallow lands	266	212
	(iii) Area under other uncultivated land excluding fallow land	150	316
5	Proportions per 1,000 acres of the State—		
	(i) Total cultivable area	39	39
	(ii) Net area sown	33	27
	(iii) Net area irrigated	NA	NA
	(iv) Area sown more than once	38	24
	(v) Area irrigated more than once	NA	NA

NOTE : Figure for the census year 1951 gives the average of five crop years with the census year 1951 as the mid-year. The 1961 data are the average of the five crop years including and preceding 1960-61.
NA—Not available

SOURCE: Directorate of Statistics, Bihar.

TABLE AS-III.2—PROGRESS OF CULTIVATION DURING THE LAST DECADE

(Subsidiary Table II)

(Area in acres)

Particulars	1961	1951
1	2	3
Area under foodgrains	693,874	584,967
Area under crops other than foodgrains	206,559	92,545
Net area sown	649,389	567,085
Area sown more than once	260,368	128,186

NOTES : (1) Figures for the census years 1951 give the average of five crop years with the 1951 census year as the mid-year. The 1961 data are the average of the five crop years including and preceding 1961.

(2) Figures for the census years 1931 and 1941 are included in the district of Bhagalpur.

SOURCE : Directorate of Statistics, Bihar.

TABLE AS-III.3—COMPONENTS OF LAND AREA, CULTIVABLE AND CULTIVATED AREA PER HUNDRED PERSONS DURING THE LAST DECADE

(Subsidiary Table III)

(Area in acres)

Particulars	1961	1951
1	2	3
Land area	78	105
Area cultivable	65	92
Net area sown	38	43
Net irrigated area	NA	NA
Area sown more than once	15	18
Area irrigated more than once	NA	NA
Area under foodgrains	40	45
Area under crops other than foodgrains	12	7

Land area—Total geographical area according to the Surveyor General, India.

Area cultivable—Includes (i) Net area sown, (ii) Current fallows, (iii) Cultivable wastes, (iv) Fallows other than current, (v) Pastures and grazing land, (vi) Miscellaneous tree crops and groves not included under net area sown.

Net area sown—Represents the area sown counting area sown more than once in the same year only once.

Net irrigated area—Represents the area irrigated from different sources, counting area irrigated more than once, in the same year, only once.

Area irrigated more than once—Represents area which receive irrigation more than once in raising the same crop again or other crops in the same year.

NOTES: (1) Figure for the census year 1951 gives the average of five crop years with the relevant census year as the mid-year. The 1961 data are the average of the five crop years including and preceding 1961.

(2) Figures for the census years 1931 and 1941 are included in the district of Bhagalpur.

CMN III

POLYMETRIC TABLE OF DISTANCES

(IN MILES)

(FIGURES WITHIN BRACKETS INDICATE RAIL DISTANCES)

NOTE:— THE DISTANCE BETWEEN ANY TWO PLACES IS INDICATED AT THE INTERSECTION OF THE VERTICAL AND HORIZONTAL LINES CONNECTING THEM.

EXPLANATORY NOTE

The Village Directory is primarily an Anchalwise list of villages arranged in alphabetical order. While serving this purpose, it also gives certain information about gross cropped and irrigated areas (cols. 5 and 6), irrigation facilities (cols. 7—11), drinking water-supply (cols. 12—14) and availability of transport (cols. 15 and 16) for each village. The 1951 Census population of each village has also been shown in col. 4 for comparative purposes. All such information should have been actually gone into the Village Statistics portion (*see* Part II), but this could not be done for want of space. However, the Village Directory read with the Village Statistics should give detailed information for each and every village. Cols. 2 and 3 of the Village Directory give the cross reference to the Village Statistics.

The data relating to irrigation facilities, drinking water-supply and transport have been compiled from the Village Note prepared for every village at the time of the Houselisting (September-October, 1960) for the 1961 Census. The gross cropped and irrigated areas noted in cols. 5 and 6 respectively have been obtained from the District Statistical Officer, Saharsa.

The term '*mauza*' (col. 1) has the same meaning as a 'Revenue village' (*see* page 2 of Part II).

The different abbreviations used in this Table are explained below :

Cols. 7 *to* 14 :

B—Bandh (including *Ahar*, *Pyne* and *Nala*)

C—Canal

K—*Kacha* well

Ors—Others, such as river, waterfall, etc.

P—*Pukka* well

Riv—River

T—Tank (including *Garha*)

Tw—Tube-well

Cols. 15 *and* 16 :

B—Bullock-cart

C—Cycle

Figures under cols. 7, 9, 10, 12, 13, 15 and 16 indicate numbers, while figures under col. 8 give the distances in miles. The figures preceding the abbreviations in cols. 11 and 14 denote the number relating to it.

NA means not available and U denotes uninhabited.

PART II

VILLAGE AND TOWN STATISTICS

EXPLANATORY NOTE

Village Statistics containing a reproduction of the Primary Census Abstract were presented for the first time in 1951 in Part II of the District Census Handbooks. This innovation has been followed in 1961 with certain improvements. The main object of this table is to furnish for every village certain basic data such as area, number of occupied residential houses and households, general population as well as population of Scheduled Castes and Scheduled Tribes, literate and educated persons, and workers and non-workers classified into various industrial categories separately for each sex.

Definitions

Village : The term "village" has the same meaning as a revenue *mauza*. A *mauza* means "a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all or, on the other hand, several hamlets each bearing a different name".

House: A "house" means "a structure or part of a structure inhabited or vacant, a dwelling, a shop, workshop, factory, a place of worship or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance".

"Occupied residential house" refers only to such houses as are used for dwelling purposes either wholly or in part.

Household : A "household" means "a group of persons who commonly live together in the same house and take their meal from a common mess unless the exigencies of work prevent them from doing so".

Workers : Workers are those who are engaged in some kind of economic activity. They have been classified into the following nine industrial categories :

I Cultivator.

II Agricultural labourer.

III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

IV Household Industry.

V Manufacturing other than Household Industry.

VI Construction.

VII Trade and Commerce.

VIII Transport, Storage and Communications.

IX Other Services.

Non-worker : A person who is not working is a non-worker. The following is the list of non-workers of different kinds :

(1) Full time students or children doing no other work, such as make articles at home for sale nor even help part-time in their own family cultivation, industry, trade or business ;

(2) Housewives or such other persons engaged in unpaid home duties, doing no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business ;

(3) Dependents such as infants or children not attending school, persons permanently disabled from work because of illness or old age ;

(4) Retired persons (not employed again), rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work ;

(5) Beggars, vagrants or independent women without indication of sources of income and others of unspecified source of existence ;

(6) Convicts in jail (undertrial prisoners were treated as workers if they used to work before being apprehended), inmates of a penal, mental or charitable institution ;

(7) Persons not employed before but now seeking employment for the first time ; and

(8) Persons employed before but now out of employment and seeking work.

Column Headings

Col. 1 [*Serial no.* (*Thana no.*)] : The figure within brackets immediately after the serial number under this column is intended to indicate the revenue thana number of the village. The name of Revenue Thana has been shown in bold capital letters above the village names in column 2.

Col. 2 (*Name of village*) : Within an Anchal, villages have been arranged according to the Gram Panchayat (where constituted at the time of census arrangements for 1961) to which they belong; or according to their thana numbers in blocks of 5, where no Gram Panchayat was then constituted.

If the Gram Panchayat bears the name of one of its constituent villages, it has been indicated by printing the name of such village in *italics*. Where this is not so, the name of the Gram Panchayat has been printed in *italics* at the head of its constituent villages.

It may be noted here that at the time of preliminary arrangement for 1961 Census, the jurisdictions of many Gram Panchayats were not finally settled. Some were in the process of proposed changes. Great difficulty was also experienced in obtaining a complete and authentic list of Gram Panchayats with the names of their constituent villages. Efforts were no doubt made to verify the lists with those maintained in the District Gram Panchayat Offices. But it is possible that in some cases the jurisdiction as indicated herein is not in strict conformity with the actual position. However, this is the first time that such information is being made available in print and few discrepancies here and there may be excused.

Several symbols and abbreviations have been used under this column to the left or right of the village names. These indicate various kinds of amenities found in the village. For full explanation of these, a reference may be made to the relevant section below.

Col. 3 (*Area in acres*): Village areas have been reproduced from the Thana Jurisdiction Lists. Unsurveyed villages (whose area figures are not available) have been shown as such. The Anchal area is the arithmetical total of village areas. In following cases, however, the areas differ from those published earlier in Part II-A, Vol. IV, Bihar, Census of India, 1961, which are presented in the Appendix to Village Statistics. The differences are due to copying or computational errors which have been detected subsequently:

Cols. 6 *to* 36: In these column headings, P stands for Persons, M for Males, and F for Females.

Dots under columns 9 to 36 indicate 'nil' figures.

Sources of information

Information about village amenities, other than post offices and post and telegraph offices, have been compiled from the Village Notes prepared by the census agency at the time of houselisting, which operation was conducted in September-October, 1960. Locations of post offices and post and telegraph offices have been shown on the basis of the information obtained from the office of the Postmaster General, Bihar Circle.

Figures relating to occupied residential houses and households (columns 4 and 5) have been obtained from the Household Schedules filled in at the time of census enumeration between the 10th February and 5th March, 1961.

All other data have been processed from the Individual Slips, which were prepared separately for each individual at the time of enumeration.

Symbols and Abbreviations

The various symbols and abbreviations used under column 2 of the table relate to the existence of certain amenities in the village concerned. Their significance is explained below:

Symbols

+Post Office.

†Post and Telegraph Office.

‡Electrified village.

*Rest House, Inspection Bungalow, Dak Bungalow, etc.

Abbreviations

A—Allopathic medical practitioner

B—Senior Basic School

C—Community Building

Cc—Cane-growers' Co-operative Society

G. P.—Gram Panchayat

H—Homeopath

h—High School

Hos—Hospital/Dispensary

Ic—Industrial Co-operative Society

K—Makhtab

L—Public Library

M—Middle School

m—Madersa

Mc—Multipurpose Co-operative Society

Oc—Other Co-operative Societies

P—Primary School

Rhc—Rural Health Centre

Rvc—Rural Vaccination Centre

S—Sanskrit Pathshala

T. no.—Thana number

U—Unani Hakim

V—Vaidya

Where the amenities existing in the village exceeded one, their number has been given immediately after the abbreviation.

APPENDIX TO VILLAGE STATISTICS

This appendix shows the differences in anchal areas from those already published in Part II-A, Vol IV, Bihar, Census of India, 1961. The differences are due to copying or computational errors which have been detected subsequently.

Subdivision/Anchal	Area published in Part II-A (in sq. miles)	Correct Area (in sq. miles)
1	2	3
Sadar		
Nauhatta	77.4	77.8
Mahisi	108.0	109.1
Sonbarsa	81.4	81.3
Supaul		
Supaul	114.3	115.1
Tribeniganj	122.4	122.8
Basantpur	88.9	92.2
Chhattapur	115.3	124.1
Madhepura		
Madhepura	107.9	107.5
Murliganj	101.9	100.7
Kumarkhand	90.8	95.4
Kishanganj	116.3	115.4
Alamnagar	78.0	79.5
Chausa	73.1	72.9

EXPLANATORY NOTE

Town Statistics give the same data as Village Statistics, but for urban areas.

According to the definition adopted for the 1951 Census a town includes "(*i*) every municipality ; (*ii*) all civil lines not included within municipal limits ; (*iii*) every cantonment ; and (*iv*) such other places which have (*a*) a population of not less than 5,000, (*b*) density not less than 1,000 persons per square mile, (*c*) at least 3/4th of the adult male population engaged in non-agricultural livelihood, and (*d*) which have been declared to be a town for census purposes by the Superintendent of Census Operations because of the historical or administrative importance of the place, or such other factor".

As areas of individual wards were not available, only the town areas have been given.

Other concepts and explanations are the same as in the case of Village Statistics.
