DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy backlog of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inte-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services	Divisions 5, 8 & 9

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Schedule l Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:
Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used	
	Manufacture of all kinds of other for industrial purpose	322
	rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—

INTRODUCING THE DISTRICT

By
K. C. DUBEY
Deputy Superintendent of Census Operations

The district of Sagar, formerly spelt as Saugor, derives its name from the large lake it has in the headquarters town of the same name. Situated between 23° 10'--24° 27' North latitudes and 78° 4'--79° 21' East longitudes and with the Tropic of Cancer passing through the southern part of it, the district is centrally located in the Indian sub-continent.

Shaped roughly like a triangle with its base to the north and apex to the south-east, the district has an area of 3,961 square miles (10,259 km) according to Survey of India, being the 17th district in the State in size. The greatest length of the district is from north-west to south-east and is about 105 miles. The greatest width (75 miles) is in the north from east-west and is the base of the inverted triangle.

Jhansi District of Uttar Pradesh borders Sagar District on the north. On other sides districts of Madhya Pradesh surround this district: Narsimhapur and Raisen to the south, Vidisha to the west and Damoh to the east. Chhatarpur District forms the north-east boundary and Guna District comes to the north-west.

Sagar District has 4 tahsils viz. Khurai, Sagar, Rehli and Banda. In 1931 the two tahsils of the present Damoh District (Damoh and Hatta) were also included in this district. On 1-10-1956 Damoh and Hatta Tahsils were again reconstituted into Damoh District, the pre 1931 position being thus restored.

Rehli is the biggest tahsil in area but is the most sparsely populated and Banda is the smallest tahsil in area. Sagar is the most thickly populated of all the tahsils.

Sagar (population 104,676)** is the headquarters town of the district and of the Sagar Tahsil. It has a Municipality and a Cantonment Board. The Collectorate building is situated on the top of a hillock and the Circuit House is located near the Collectorate on a higher ground on this hill having a commanding view of the Sagar lake.

The Collectorate building was constructed in 1820 as a residence for the Governor General's Agent and in the same year a mint was built at Sagar and coins were minted here for 10 or 12 years after which the apparatus was shifted to Calcutta. the mint building is now the office of the Tahsildar.

The Collector is assisted by six Deputy Collectors which is the persent sanctioned strength of the district; but at present there are 8 Deputy Collectors working in the district and the distribution of work is as below :—

1 Additional District Magistrate and Additional Collector; 4 Sub-divisional Officers; 1 Treasury Officer; 1 Food Officer and 1 Officer in-charge Development and Land Acquisition. With the separation of judiciary, Sagar has become the headquarters of Sessions Judge and the present strength of judges is as below :—

District & Sessions Judge	1
Additional District Judges	2
Civil Judges Class I	2
Civil Judges Class II	8

(3 Sagar, 3 Khurai, 1 Rehli and 1 Banda)

The district has one Superintendent Police, one Executive Engineer (B & R), one Divisional Forest Officer and one Civil Surgeon. District Jail is located near the Tahsil Office.

Khurai (population 15,316), Rehli (population 6,442), and Banda (population 4,437) are the headquarters of the other three tahsils and except in Banda Sub-Divisional Officer (Civil) and Tahsildar have their Offices in each of these tahsils. The Sub Divisional Officer in charge of Banda Tahsil has his office at Sagar and he is usually in charge of the Development Section or some other sections of the Collectorate in addition.

GEOGRAPHY

Hills and Elevation :

Sagar District lies at the south-eastern edge of the great malwa plateau and is separated from the Narbada valley region, which lies to the south by a steep escarpment. The elevation of the district ranges from 1,160 feet in the extreme north to 2,240 feet in the south-west, the general elevation being from 1,300 to 1,900 feet. The highest point in the district is the top of the Naharmau hill (23° 30' North—78°49' East)

* (In the Census, this will be three because Sagar Municipality & Sagar Cantonment are treated as two towns though they are really one city).
** Including Sagar Cantonment.

in Rehli Tahsil. Other points of elevations are Tinsmal in Banda Tahsil (2,139 feet) which carries a trigonometrical survey station and the Patharia hill above the lake at Sagar Town (2,035 feet), Tora (2,108 feet), in Khurai Tahsil, Tanjudadar (2,182 feet), Dewalchouri (2,107 feet) and a hill one mile to the east of Chanda in Rehli Tahsil (2,203 feet).

The principal range of hills is in the north of the district, from north of Malthone (Khurai Tahsil) through Dhamoni to Panna District. Another range runs south from Malthone to Rahatgarh. A small and broken range runs from Lidhora through Banda and Sagar to Jabalpur. Other smaller ranges are the one running from Bhera through Dhana to Surkhi, one from Shahpur through Abchand and Naharmau to the south-western bordar and another, running south of Rehli through Baleh and Gaurjhamer. All these ranges are more or less parallel and lie in a north-east to south-west direction.

Rivers :

Separated from the Narbada valley by a steep escarpment and having a general slope towards the north, Sagar District forms the catchment of the river Ganges though the river Narbada is only 6 miles from the southern corner of the district. Only two small streams in the south-west *viz.* the Biranj and the Sindhor take their waters to the Narbada. The drainage of the district is towards the north and the north-east. The principal rivers are the Sonar, the Betwa, the Dhasan, the Bina and the Babas.

The Sonar river has its source in the south-western corner of the district and flowing through Rehli Tahsil past Gaurjhamer, Rehli and Garhakota, it passes into Damoh District. Its principal tributaries are Dehar which joins it at Rehli and Godheri at Garhakota. River Kopra is another tributary of Sonar and rising in the centre of the Rehli Tahsil flows into Sonar in Damoh District. River Babas enters the district on the southwest from Raisen district and flows north-east cutting the Sagar-Jabalpur road near Sanodha village (9 miles from Sagar). It is the source of water for the water works constructed on the Patharia hills at Sagar. River Dhasan, like Babas, enters the district from Raisen and following a more northly course than Babas, drains the central portion of Sagar Tahsil and north of Banda Tahsil. It forms the boundary between Sagar Tahsil and Jhansi District of Uttar Pradesh for the last 25 miles of its length in this district. River Bina has its original several miles to the south of the district and enters it near village Mahuna. It flows almost due north past Rahatgarh and then turns westwards, passing near Eran, and ultimately joins the river Betwa, forming in places the boundary between Sagar and Vidisha Districts. Above Rahatgarh village it makes a 50 feet high waterfall. River Betwa does not flow through the district but only forms the boundary between Sagar and Guna Districts.

These rivers like the Sonar the Godheri and the Babas sometimes submerge the bridges on the Sagar-Jabalpur road halting traffic during rainy season. The Sonar and the Babas with the Dehar similarly adopt threatening attitude on the Sagar-Narsimhapur road.

The large natural lake at Sagar, from which the district derives its name, is surrounded by the high outcrops of the Vindhyan rocks and possibly owes its existence to the removal of the Trap rocks overlying these Vindhyan out-crops. The lake now covers up an area of 394 acres and is gradually being silted up.

As the myth goes, a powerful Banjara, by the name of Lukka or Lakhi, first started digging of this Lake to provide water for his cattle but no water came out even at a great depth. Lukka had then a dream one night that if he wished for success, he would have to make a sacrifice of his only daughter. This he is said to have done. According to another version, Lakka had to sacrifice his daughter and the would be son-in-law and he walled them alive on the bed of the lake. As the Settlement Report of 1867 and the gazetteer of 1906 mention, the Banjaras do not drink the water from this lake. The lake was formerly much larger and covered the ground upto the present Tahsil Office and Town Hall.

Geology :

About two-thirds of the district is covered by the Deccan Trap rocks called Basalt which on erosion have given the flat-topped hills a prominent features of the landscape. This Trap or Basalt rock overlies the Vindhyan sand-stone or quartzite. the latter appears as two great inliers, one running down from the northern hills to the latitude of Sagar but a little west from it and the other trending south-west.

The Archaeans are the oldest rock formations of the district. These are represented by the so-called Bundelkhand Granite which occur as characteristic bouldery outcrops in the extreme north-west corner of the district around Hirapur and Shahgarh. These are succeeded by the rocks of the Bijawar series which overlie them with an unconformity and are found as Limestone, Hornstone breecia and green quartzite around Shahgarh and Hirapur. Resting unconformably over the Bijawars are the Vindhyan rocks which are comprised of two major divisions, the lower Vindhyans represented by sandstones and shales and the upper Vindhyans consisting largely of sandstones and shales with subordinate limestones. the sandstone rocks form the extensive plateaus and scarps like the one seen on the two sides of the Sagar-Bina Railway line. The Vindhyan sandstones and shales frequently show ripple-marks indicating their low-depth sedimentation. The Lameta limestone is largely developed to the east and south-east of Sagar. Garhakota and a narrow strip of country as far south as Rehli are on this limestone. The next younger rock is the Deccan Trap which comprises of ten or more flows of basaltic lava with an average thickness of 50 feet which were erupted in enormous quantities during Creataceous and Eocene periods of geological time-sequence.

generally more spirited and more free and independent in bearing than those of other parts of Central Provinces". Below is given a brief account of only some of the characteristic communities of the district. The Chamars are the low-caste village servants and agricultural labourers. They are generally of poor physique. Practically everywhere in the district, there is hostility between them and the other castes notably Lodhis, Dangis and Bundelas. The Dangis are of excellent physique and are somewhat rude and troublesome by nature. The Bundelas are a Rajput caste, independent by temperament and the Lodhis, another community of the district, have the same nature and have been reported in the past as always "ready for a fight". Ahirs are numerically an important caste. The fort of Rehli is believed to have been built by them. The men of this caste are fine, sturdy and tall and as independent in nature as the Lodhis and Dangis. The Saonr, an aboriginal people, though not scheduled in the district, are a poor lot on the whole.

Other castes are Gonds or Bhoi, Brahmin, Kayastha, Khedawal, Guzerati, Kurmis and Kachhis. The Kurmis and Kachhis are good cultivators and vegetable producers. Jains, who have strong hold in Sagar District, are the main business community while the Chadars and Khangars act as village watchmen.

The northen hilly and jungly tracts of the district have long been shelter of dacoits. The Settlement Report of the 1887-97 mentions that "Occasionally the turbulent spirit of people breaks out. An instance of this was seen a few years back when, in the north of the district, numerous dacoities were committed, the offenders being generally connections of professional dacoits in Lalitpur and the Bundelkhand States". The major part of the decade 1951-61 saw such dacoits in the northern regions and mention may be made here of the now liquidated gangs of Devisingh, Suratsingh Salitwala, Suratsingh Datyawala, and the notorious nose-cutter Charli Raja. The geography of the terrain and the turbulent, independent nature of the Dangis, Bundelas, Lodhis, Ahirs and Khangars, will nevertheless remain a potential source of such apprehension.

AGRICULTURE

961,814 acres of the district are under plough and the tahsilwise break-up as follows :—

Tahsil	Area under plough	Percentage of the total area
1 Khurai	280,837	53·80
2 Sagar	290,912	47·57
3 Rehli	253,381	43·07
4 Banda	136,684	41·24
Total	**961,814**	**46·84**

Khurai and Sagar Tahsils are the most closely cultivated areas.

The best cultivated and the richest tract of the district is the central part of the Khurai Tahsil and Dhamoni tract of Banda Tahsil has the least occupied area. At the time of De Brett's Settlement, a considerable area of land in Khurai Tahsil was unnecessarily left fallow owing to the prevalence of Kans weed (*Saccharum sponteneum*). A rapid survey of such land made in 1943-44 showed that no less than 4 lac acres of land was lying fallow as a result of Kans growth. Reclamation of such land was undertaken in the district in 1948 by the Central Tractor Organisation and the total area of land reclaimed till the end of 1957-58 was 246,279 acres (72,048 acres fallow and 174,231 acres cultivated) of which 171,699 (55,267 acres fallow, 116,432 acres cultivated) acres were reclaimed only in Khurai Tahsil. Rest of the area belonged to Sagar and Rehli Tahsils, the farmer having 59,781 (11,521 fallow, 48,260 cultivated) and the latter Tahsil having 14,799 (5,260 fallow, 9,539 cultivated) acres.

Shown below is a statement showing the area under crop an fallow lands from 1887 to 1960 :—

Sagar is a district of mixed farming. Wheat is the main crop with jowar, oilseeds and maize, rice, small millets, gram and ground-nut as other important crops. Local name for the rabi crops is *unhari* and *siari* is the term for the kharif. Other local term for the kharif is *kataki*, (*Kartik*=October-November when the crop is cut) and *baisakhi* (*Baisakh*= April-May). Cold and cloudy weathe in January sometimes spoils a bumper wheat harvest and the common rust (*Puccinia graminis*) locally known as *Gerua*, sets in. The gram crop is similary attacked by the (*Chloriden obsoleta*) in such weather. The other danger to rabi crops in the eleva-

ted tract of the district from the bitter cold winds and frost of *tushar*. Another disease of the wheat and gram is locally known as *ugra* a yellow rust. Diseases of jowar crop are locally known as *ratua*' and *dudki*. In the former the entire plant becomes red in colour and in the latter disease the plant, when small, is affected by an insect after which the disease is named.

Local wheat, of which there are several varieties, is roughly divided by the people into *gehun* and *pissi*. Another division into *Hansiya* also exists. *Gehun* is slightly reddish in colour and includes all the hard wheats (*Trit. sat durum*). It is usually grown in the district for home consumption. *Pissi* is the white, soft common wheat (*Trit. sat. vulgare*) which is usually exported. *Hansiya* is a variety of *gehun* suitable for preparing *dariya* (gruel).

In the Settlement Report, 1867, 6,891 acres of area is sown as irrigated and the number of wells is shown as 2,928. In the Settlement of 1897, total area irrigated stood at 7,972·50 acres (203·48 from tanks and 7,769·02 from wells). Number of irrigation wells in the district reported in 1897 settlement was 3,654. In the settlement of 1916 number of wells was 3,622 and total area irrigated was 5,296 acres. Irrigation made great headway in the district during the decade 1951-61 and by 1961, minor irrigation projects were completed. Total area irrigated in the district according to the Season and Crop Report for the year ending 31st May 1960 stood at 14,690 acres (4,218 from Government Canals, 455 acres from tanks, 9,475 from wells and 512 from other sources). Total number of irrigation wells in the district according to this report is 7,299.

COMMUNICATIONS

The district has 108 miles of railway line (71 miles on Bina-Katni line; 23 miles on Delhi-Madras and 14 miles on Bina-Kotah line). Bina-Sagar extension of the then Indian Midland Railway was counstructed in 1888, with Sagar Town as the terminus. This line was extended furthr on to Damoh in 1895.

Road connections exist for Jabalpur, Narsimhapur, Jhansi, Chhatarpur and Bhopal. All the roads are all-weather but the traffic is sometimes halted during the rainy season because of the bridges submerged by flooded rivers *e. g.*, Bila river on Chhatarpur road; Babas, Gadheri and Sonar on Jabalpur road; and Dehar and Sonar on Narsimhapur road. Banda Tahsil has recently been benefited by road construction for anti-dacoity operations. Connection between Sagar and Khurai is yet to be achieved by an all-weather metalled road.

Total mileage of roads at present is 445 miles 2 furlongs (344-4 miles) metalled and 100-6 miles unmetalled) as against 279 miles 117 metalled, 162 unmetalled) existing in 1904.

National Highway-26 Passes through the district, covering 91 miles 2 furlongs within the district. (Jhansi-Sagar 38-6; Sagar-Narsimhapur 52-4). 354 miles of road belonging to the State P. W. D. This road length does not include the road maintained by municipalities and the Cantonment Board. The length of roads under the management of the Sagar Municipality is 27 miles 5 furlongs of which 6 furlongs is unmetalled.

INDUSTRIES

There is no industry worth the name in Sagar district. Bidi-industry, which is largely worked as a Cottage Industry, can easily claim to be the most important industry of the district and as per 1961 Census was engaging 20,000 persons. The main Bidi Firms get the bidis manufactured through middlemen known as *Sattedar*. The rate of payment to bidi rollers ranges from Rs. 1·37 per thousand bidis but these have now been raised by the Government as 175 nPs. per thousand for the urban areas and 162 nPs. per thousand for workers in the rural area. There are 26 registered bidi factories in the district owned by 11 Firms.

12 Oil Mills are located at Sagar; in addition indigenous ghanis of villages Narioli and Deori villages have one co-operative society each. There are also about 50 saw mills engaging nearly 2,000 persons. It is estimated that sawn timber worth about Rs. 50 lakhs is exported annually from Sagar.

Handloom Cotton Industry exists at Sagar, Garhakota, Deori and Rahatgarh, but it is not a prospering one. There are 4 weavers co-operative societies in the district.

There are 7 Leather Workers Cooperative Societies of which two are located at Sagar proper. Brass and copper ware is made at Sagar, Deori, Khurai, Garhakota, Rehli and Shahgarh and about 300 workers are engaged on this. The industry has one co-operative society functioning at Deori.

Agarbatti or *Oodbatti* (Scented sticks) are also manufactured at Sagar Town. Other industries like carpentry, village blacksmithy and pottery are distributed throughout the district.

LITERACY AND EDUCATION

Out of the total population of the district *i. e.* 796,547, there are 163,412 literate persons: the percentage of literacy is thus 20·52. The percentage of literate males to total males is 30·52 and of literate females to total females is 9·64.

Captain James Paton of the Bengal Artillery can be said to be the founder of education in the district and in 1827, he opened 9 schools. A private school was started at Sagar Town in 1833 by one Rao Krishna Rao and this was also inspected by the then Governor General Lord William Bentinck. This school was raised to the status of a High School in 1836 and in 1860 affiliation was granted to it by the Calcutta University. In 1873 the high school classes were transferred to Jabalpur where they were the precursors of the Robertson College (now Mahakoshal Mahavidyalaya). Sagar, however, again had high school classes in 1855. In 1891, the new High School was affiliated to the Allahabad University.

The progress of education in the district can be seen from the following :—

Year	Pre-Primary Schools	Primary Schools		Middle Schools		High Schools		Colleges and University

Dr. Sir Harisingh Gour, by his first donation of Rs. 20 lakhs, founded the University of Sagar in 1946 and this University is now imparting higher education in 19 departments of studies. Two Basic Training Colleges—one at Sagar and the other at Rehli, were started in 1960.

THE POLICE TRAINING COLLEGE

Located in the Sagar Fort, the Police Training College of Sagar, was started in 1905, the first batch of 52 trainees passing out on 1st January 1906. It is one of the oldest Police Colleges in the country and provides education to Sub Inspectors and other Police Officers.

PUBLIC HEALTH

There are at present 16 hospitals and dispensaries in the district as against 7 existing in 1904. Apart from the Dufferin Hospital and Maternity Home, there are 6 other Family Planning Centres in the district. There are two Ayurvedic Hospitals. The district has 9 Veterinary Hospitals, 14 dispensaries and one A. I. Centre and one Cattle Breeding Farm. Sagar Veterinary Hospital was started in 1903 and the first outlying Veterinary Dispensary was started at Deori in 1939.

COMMUNITY DEVELOPMENT & CO-OPERATION

The district has been divided into 11 blocks for the implementation of the Community Development Programme. Of these 4 *viz.* Khurai, Banda, Rahatgarh and Rehli were started in 1953, Deori in 1956, Shahgarh in 1957, Jaisinagar in 1958, Malthone in 1960 and Kesli in 1961. Bina and Sagar are the shadow blocks at present.

The Sagar Co-operative and Land Mortgage Bank was started in 1911 (19-11-11) with a working Capital of Rs. 15,950. In 1930, there were 91 Primary Credit Societies affiliated to this Bank. In 1951-52 the number of these societies was 82, in 1956-57 the figure of such societies rose to 294 and in 1960-61, 341 societies were affiliated to this Bank. There are 4 Co-operative Marketing Societies of which Khurai was started first—on 3-2-1958.

There were 6 non-agricultural Co-operative Societies in 1930 which number rose to 8 in 1932, 29 in 1951-52, 31 in 1956-57 and shrunk again to 29 in 1960-61.

LOCAL BODIES

The district has 5 Municipal Committees and one Cantonment Board. The Municipal Committees of of this district can easily claim to be among the oldest committees in the State. The committees of Sagar, Deori and Khurai were set up in 1867 and Garhakota was a Municipal town till 1901-02.

4 *Janpad Sabhas* were constituted in the district on 14-8-1948 and of these the Sub Divisional Officers of the tahsil act as the Chief Executive Officers except in the Banda Janpad Sabha where the Tahsildar Banda works as the Chief Executive Officers.

The number of Gram Panchayat and Nyaya Panchayat in the district are shown in the table below :—

FAIRS AND FESTIVALS

There are held 36 fairs in the district, a list of which is appended to this Hand Book. mention may be made here only of two—Jhoola Festival of Sagar and the Cattle Fair of Garhakota.

The *Jhoola* celebrations of Sagar start from the 3rd of the first half of month of *Shrawan* (July-August) and goes on till the *Raksha Bandhan* day. This 'Jhoola Festival' is a characteristic feature of Sagar and people from the rural areas pour into Sagar Town in large numbers during these days. The celebrations are held on the lines of similar celebrations in Mathura of Uttar Pradesh with which Lord Krishna is believed to be connected and initially the *Jhoola* celebrations in Sagar were restricted to the temples devoted to the worship of Lord Krishna. As the celebrations are economically beneficial, the celebrations are hold in all the temples of the town now.

The celebrations consist of swinging the image of the deity on a plank (*Jhoola*) and the room where this 'Jhoola' is placed is profusely decorated *Jhanki*). The decoration done on the (*Ekadashi*) day is the most beautiful and on this day apart from the people pouring into town from the villages of the district, an appreciable number of persons come from the districts or Jhansi (U. P.), Narsimhapur, Damoh and Chhatarpur.

The town gets an influx of about a lac of persons on this day.

CATTLE FAIR OF GARHAKOTA

The fair is mentioned in the 1906 Gazetteer as "one of the most important in the Province". The fair is held from *Basant Panchami* to *Holi* i. e. for 40 days. About 50 to 60 thousand people assemble here at the fair and transactions for a large number of cattle are gone hrough. The fair is known as "Rahas" and was first started by one Raja Mardon Singh and during his time dances, in imitation of Lord Krishna's dances with the milk-maids (*Ras*), used to be held of which Raja was very fond. The dances are no longer held now.

IMPORTANT PLACES

With a rich history behind, which is only recently being revealed as a result of studies and excavations. the district has a number of places worth visiting, mention of all of which is not within the scope of this introductory note. A short description is, therefore given, of only a few of the places of general interest.

Eran (*Khurai Tahsil*) :—45 miles north-west of Sagar and about 50 miles north-east of Vidisha, Eran, now a village, is situated on the banks of river Bina. Its early name appears to be 'Erakanya' or 'Airikina'. A copper coin found here with the name of Dharmapal inscribed on it, is believed to be of about 200 B. C. Eran has also been referred to as 'Swabhoga-Nagar' (pleasure town) in an inscription of the Gupta period.

Remains of Mahavishnu temple are found half a mile from the present village. One inscription dated 510 A. D. refers to the *sati*-immolation of the wife of Gopa Raja, the Commander of Bhanu Gupta. This is the earliest epigraphical reference to the *sati*-system in Indian history.

Eran has a number of other remains of historical interest and the excavations undertaken by the Ancient History Department of the University are likely to throw more light on the ancient history and culture of Eran.*

Khimlasa (*Khurai Tahsil*):—Situated 41 miles north-west of Sagar Town, Khimlasa is said to have been founded during the Mughal Empire. Till 1834 it was the headquarters of Khurai tahsil. It is surrounded by a 20 feet high stone-wall. Within the fort of Khimlasa is a tomb with perforated screenwork. A building known as *Sheesh mahal* (glass palace) exists here. the upper story of which is said to have been made of mirrors. In the neighbourhood of the village are some *sati*-pillars.

Abchand (*Sagar Tahsil*):- 22 miles to the east of Sagar on the Sagar-Damoh road, the village is interesting from the point of view of rock-paintings done by early cave-man in the rock shelters on the northern and southern ridges of river Godhari. The paintings are done in red, white and cream colour and represent such sequences as domestic life, music, dances hunting, and riding.

Garhpahra (*Sagar Tahsil*):— Situated 6 miles north of Sagar on the Sagar-Jhansi road. Garhpahra is the 'Old Sagar' and was the capital of the territory in the days when the present settlement of Sagar Town did not exist. The fort, now in desolate condition, has a temple of Mahabir and remains of a building known as *sheesh mahal* (glass palace). This is a two-storied, small square building with coloured glasses stuck into masonry. This is said to be the summer residence of the Dangi Chief.

Rahatgarh (*Sagar Tahsil*):— Situated on the Bina river, 20 miles north-west of Sagar, Rahatgarh is a place of historical interest as well as picnic resort. The fore here stands on a lofty eminence and the outer wall consists of 26 towers. One building in the fort is known as *badal mahal* (Cloud Palace), another is *Jogan-Buri* (Executioner's tower) from where culprits were hurled down the precipice into Bina river. The eastern wall of the fort was breached by the guns of Sir Huge Rose who put down the Nawab of Garra-Nawapani who had risen against British rule. 3 miles away from Rahatgarh is a 50 feet waterfall of River Bina.

Sanodha (*Sagar Tahsil*) :— 12 miles from Sagar, on Sagar-Damoh road is importan because of an iron suspension bridge built here in 1830 over the Babas river. This bridge was constructed entirely of the iron manufactured in the district. This bridge may perhaps claim to be the first suspension bridge in the country. It was entirely damaged by a flood in the Babas about 1940.

Deori (*Rehli Tahsil*):—40 miles from Sagar on Sagar-Narsimhapur road, Deori stands on Sukhchain river. An old fort is enclosed by this river on three sides. The former name of the village was Ramgarh and the name Deori came to be used in the medieval period when a temple was built heir. Ruins of this temple are interesting and contain beautifully-carved door jambs. It is interesting from another point also. On *Aghan Sudi* 6, a fire-walking performance, is held here which lasts for five days.

Garhakota (*Rehli Tehsil*) :— 28 miles east of Sagar on Sagar-Damoh road Garhakota is situated on the junction of Sonar and Gadheri rivers. A ruined fort exists here, the most remarkable part of which is a 100 feet high tower. This tower was built by Mardan Singh for his wife who wished to see the lights of Sagar and Damoh from here.

Dhamoni (*Banda Tahsil*) :— 29 miles north of Sagar and situated in a forest tract, Dhamoni was once a great place and a market for the sale of elephants used to be held here during the Mohammedan period. It has now ruins of an extensive fort covering 52 acres. Another interesting feature is the old water supply system. There is a tank one mile from the fort which

* Prof. K. D. Bajpai has recently published a book 'Sagar through the Ages' incorporating his findings at Earn.

supplied water to it through a system of underground pipes. It is said that About Fazal, the renowned Minister of Akbar was born here. There are two tombe—one of Baljan Shah, the Guru of Abul Fazal and the other of Aintha Shah Wali. The later saint is said to have cursed Dhamoni and the surrounding country because he could not get water here. As per his curse the flourishing town became desolate and the haunts of wild animal and dacoits and this curse is believed to prevent the ground from being cultivated. As the myth goes, the curse of Aintha Shah would last till his *majar* is visible and Dhamoni would again flourish the day the *majar* reaches the ground level. The *majar* is said to be submerging and is at the present day about a feet high.

Wild life can best be seen in the district at the forest belt of Kamna and Titurpani in the Rehli Tahsil which may also be visited with profit for tiger shooting. Tigers and panthers are also found in the district in the northern forest belt of the district.

Sagar District has not only a rich historical background, but it has also proud privilege to be the birth-place of the first Chief Minister of the State (Late Pandit R. S. Shukla and of a great lawyer and educationist (Late Dr. Sir Harisingh Gour). With the incrased educational facilities, coverage of the district by the Development Blocks and extention of electricity to rural areas, the district may look to the future with hope and confidencce and 1971 and succeeding Censuses may bring out the district picture in a more colourful perspective.

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note :—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is. under the name of the district have been arranged the industries in ascending order of minor groups; showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code number with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above Note clear :-

Sagar District Total 200 (500) signifies that there are 500 establishments in Sagar District pertaining to Minor Group 200 which stands for "Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains".
