INTRODUCTION

In the past, village statistics for each district used to be printed after the Census, giving the population of each village and showing the distribution of communities and of literate persons. In view of the importance of the 1951 Census, at which, in addition to the usual population data, valuable information was collected concerning the social and economic life of the people, it was decided to publish a District Census Handbook containing the more important Census abstracts and tables.

There are five general population tables of the 'A' series, three economic tables of the 'B' series, five household and age (sample) tables of the 'C' series, seven social and cultural tables of the 'D' series and one table 'E' giving summary figures for the district and tahsils. As far as possible, these tables furnish district data with break-up for Census tracts within the district.

Certain statistics about individual villages in the tahsils are contained in the Primary Census Abstract which gives the detailed distribution of the population in each village according to the economic classification of the people. It also contains particulars about the literates. A person who could write a simple letter and could read one in print or manuscript was regarded as a literate person for purposes of the Census.

The Primary Census Abstract is followed by a simple table giving distribution of the displaced persons and their means of livelihood in the different villages of the district at the time of Census.

Census statistics of the urban and rural population have a variety of important uses. They are of considerable help in studying the economic conditions, social and political changes and demographic trends as indicated by rates of population growth, family characteristics, mobility of population, age structure, size and composition of the economically active population, and the like. The results of such studies in comparing the conditions and characteristics of the urban and rural people in the matter of births, deaths, sex composition, sanitation, levels of living, etc., would be of great value in economic planning and development of social welfare work in the State and its different parts.

Each district was, therefore, divided for purposes of the Census into a number of rural and urban tracts according to the size of the population. Thus, in the Sagar district, as there is no city, one urban tract consisting of all the towns of the district, was constituted and is referred to in the tables as "the Sagar district non-city urban tract". The rural areas of the tahsils of the Sagar district form separate Census tracts and are referred to as "Sagar tahsil rural", "Damoh tahsil rural" tracts, etc.

At the 1951 Census, the economic classification was substituted for the classification based on religion. The people have been divided into two broad livelihood categories, namely, the agricultural classes and the non-agricultural classes. There are four agricultural classes defined as below:—

I. Cultivators of land wholly or mainly owened and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

There are similarly four non-agricultural classes defined as persons including dependants who derive their principal means of livelihood from—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

The above eight classes have been referred to as livelihood classes.

Each of the above eight livelihood classes has been divided into three sub-classes with reference to the economic status as below:—

(i) Self-supporting Persons;

(ii) Non-earning Dependants; and

(iii) Earning Dependants.

All non-earning dependants are economically passive. They include persons performing housework or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. Their contribution to economic activity is, however, taken into account in the tabulation of data in economic table B-II which gives details of persons having secondary means of livelihood including the details of the earning dependants.

All self-supporting persons are, ordinarily, economically active. But there are certain classes and groups which constitute an exception to this rule. These are mentioned below:—

(i) All self-supporting persons of Agricultural Class IV.

(ii) The following groups of self-supporting persons who are included in Non-Agricultural Class VIII, and derive their principal means of livelihood from miscellaneous

sources (otherwise than through economic activity):—

(a) Non-working owners of non-agricultural property,

(b) Pensioners and remittance holders,

(c) Persons living on charity and other persons with unproductive occupations, and

(d) Inmates of penal institutions and asylums.

All activities of which the result is the production of useful commodities or the performance of useful services are defined as economic activities This definition, however, does not include the performance of domestic or personal services by members of a family household to one another. The most important amongst all economic activities is the cultivation of land and it has been treated as a category by itself. All other economic activities are regarded as falling in another category referred to as "Industries and Services". All these activities are classified with reference to the nature of the commodity produced or service performed. According to the Indian Census Economic Classification Scheme, all industries and services are classified into ten divisions; and these divisions are subdivided into 88 sub-divisions.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers, and they are persons shown under sub-clause (i) of Agricultural Classes I to III in economic table B-I which gives particulars of the population classified according to the eight livelihood classes and three sub-classes mentioned above.

Economically active persons engaged in industries and services are classified in economic table B-III into the ten divisions and 88 sub-divisions mentioned above, and are further divided into three sections, namely:—

(i) Employers,
(ii) Employees, and
(iii) Independent Workers.

In addition to economic table B-III, a District Index of non-agricultural occupations has been prepared for the whole district and is included in this book. This Index is arranged according to the Divisions, Sub-Divisions and Groups of Industries and Services of the Indian Census Economic Classification Scheme, mentioned above.

The economic tables for the State as a whole with break-up for Natural Divisions, Sub-Divisions and Districts will be found in Part II-B of the Census of India 1951 Report, Volume VII, Madhya Pradesh. It also contains a full discussion of the Indian Census Economic Classification Scheme and its comparison with the International Standard Industrial Classification Scheme evolved by the United Nations Organisation.

Details of the occupations according to the Groups, Sub-Divisions and Divisions of Industries and Services in respect of the entire State, the Natural Divisions and all the districts of the State will be found in Part I-B of the 1951 Census Report.

The Age (Sample) tables were prepared from the original enumeration slips by taking a ten-per-cent sample in accordance with the following instructions which were given to the Sorters for taking out the sample slips from the enumeration pads:—

"Break each pad and stack the slips of the pad; and "cut" the stack as in a Card game. Place the lower portion above the upper portion and then deal the slips into the pigeon-holes. You should deal the slips into the pigeon-holes in the order 1, 2, 3, 4, 5, S, 6, 7, 8 and 9 respectively. All the time, you should watch the slips for the answer to question 6. If you come across any slip in which the answer to question 6 is different from 'O', deal it into the pigeon-hole for 'displaced persons'."

It will, therefore, be seen that the sample is not a sample of the total population but is that of the population excluding the displaced persons population. Separate figures for the displaced persons are given in the District Census Handbook in all important tables.

In considering the Age (Sample) tables, it is to be noted that in the past it was customary to apply a smoothing formula to the actual age returns. The published tables contained only the smoothed figures. This was done in order to offset the observed preference for particular digits (especially O) in actual age returns. At this Census, no smoothing formula has been adopted and the principle followed is that the Census should publish the information as actually furnished by the people. It will be observed that certain decennial groups recommended by the United Nations Population Commission which include all the digits with the most favoured digit (O) at the centre have been adopted in the age tables and are, therefore, likely to be most free from the effect of preferences for particular digits. Single-year age returns have also been published which may be used by actuaries or research workers for constructing any desired age groups and smoothing the figures by any desired formula.

The 'D' series social and cultural tables include table D-V relating to the displaced persons giving particulars about their arrival into India. Table D-VI gives details of the non-Indian nationals and table D-VII is designed to show the distribution of educated man-power among the different livelihood classes.

Important population data for the district and the tahsils have been summarised in table 'E' which also gives the classification of the people by livelihood classes.

Details about the method of taking the Census and particulars of the questionnaire would be found in the publication, "Census of India 1951—Madhya Pradesh Administration Report—Part I", which also deals with the question of the accuracy of the data collected and an account of the sample Census enquiry undertaken after the 1951 Census.

It is pointed out there that the figures give a good picture of the economic and social life of the people.

The main Census Report of the 1951 Census for Madhya Pradesh is divided into two parts and is published under the title "Census of India 1951—Volume VII—Madhya Pradesh". The first part contains discussion of the statistics collected at the Census for the State as a whole with break-up for the Natural Divisions, Sub-Divisions and Districts.

Part II of the report, which is divided into four volumes, contains the different tables of series 'A' to 'F' for the State, the Natural Divisions, Sub-Divisions and the Districts. Part II-A contains the general population tables of the 'A' and 'E' series, Part II-B all the economic tables as mentioned above, Part II-C the household and age (Sample) tables of the 'C' series as well as the social and cultural tables of the 'D' series, and Part II-D the fertility tables.

In addition to the above publications of the 1951 Census of Madhya Pradesh, the following manuscript records have also been retained for such study as might be required in future :—

(1) *The National Registers of Citizens.*—For every village or ward in Madhya Pradesh, a National Register of Citizens was prepared at the 1951 Census containing the answers to the more important Census questions asked to the people. These original registers have been duly preserved.

(2) *The Census Abstract of Sample Households.*—An abstract from the National Register of Citizens representing two separate 2 per cent samples of the households as contained in the registers have been prepared for every village and ward and have been bound into manuscript volumes for the Census tracts and would be available along with the National Registers of Citizens for purposes of reference and also to serve as a Sampling Base for Population Surveys in the inter-Census decade. One of the columns of this abstract is designed to facilitate the taking of sub-samples of the different livelihood classes separately.

During the year 1950, the Deputy Commissioners undertook a Census of Small-scale Industries with the help of the Land Records, Municipal and Janapada Sabha staff. The object of this enquiry was, as pointed out by the Census Commissioner, "to find out something about small industries, such as cottage and home industries, small establishments, workshops, etc., where articles are produced, repaired or otherwise treated for sale, use or for disposal, and small mines".

The enquiry was confined to cases where people were regularly associated together for work of the type mentioned above. Individuals who worked on their own and did not employ other people were ignored, except when they used looms, in which case the number of looms in use were recorded as also the purpose for which they were used. This Census was not intended to take note of establishments in which 20 or more people were employed or in which any engine power was used and if ten or more people were employed. Thus, all establishments, which submitted their regular returns to Government under the Factory Act or the Mines Act, were not taken into account. The information collected at the Census included name of the establishment or proprietor, nature of the business, number of owners, relationship, if any, amongst the owners, seasonal or perennial nature of the establishment, number of looms in textile establishment with details about material woven and number of persons employed in the establishment classified as adults (18 years and over), youths (15 to 18 years) and children (under 15 years).

From the data collected at the Census of the Small-scale Industries, three tables were prepared which are included in the District Census Handbook, giving village or ward distribution of small-scale industrial establishments, employment in textile establishments for Census tracts and employment in non-textile establishments for the same tracts.

While the accuracy in respect of the details actually recorded by the Enumerators during the Census of the Small-scale Industries has been reported to be good, the District Officers were of the view that there was tendency towards under-enumeration of the establishments, due to the failure of the enumerating staff to make intensive efforts to discover all establishments within the areas allotted to them. The figures in the tables for the Small-scale Industries should, therefore, be regarded as illustrative of the nature of small industries prevalent in the different parts of the district and should not be relied upon as giving accurate number of specific type of establishments in different localities.

In connection with the preparation of the main Census Report, the Deputy Commissioners were requested to collect and furnish statistics about classification of agricultural holdings by size in 1951 and opportunity has been taken to include the information in the District Census Handbook

A Calendar of Important Events in the district has also been added as it was found to be of use in ascertaining the age of ignorant people.

TABLE A-I

Area, Houses and Population

This table shows, for the district and the tahsils, the number of towns and villages, number of occupied houses and total, urban and rural population, Male and Female. The area figures given in this table were furnished by the Deputy Commissioner, and were rounded to the nearest integer. These area figures differ from the district figures supplied by the Surveyor-General of India, which have been adopted in the main Census Report. The Surveyor-General could not supply the area of the tahsils and, therefore, the Deputy Commissioner's figures have been adopted in this table.

2. The urban population of the district is 167,064 and the urban/rural ratio is 17 : 83.

THE ECONOMIC TABLES

The Indian Census Economic Classification Scheme, 1951, is briefly explained in the introduction to this Book. For a detailed exposition of the subject, "The Census of India 1951, Volume VII, Madhya Pradesh, Part II-B" may be referred to. Chapter V of "The Census of India 1951—Madhya Pradesh Administration Report, Part I" deals with the details of how the actual economic enquiry was made; while certain aspects of the results of the enquiry are reviewed in "The Census of India 1951, Volume VII—Madhya Pradesh, Part I—Report".

2. The economic tables show the figures of the entire population including the displaced persons, and also of the displaced persons separately.

ECONOMIC TABLE B-III

Employers, Employees and Independent Workers by Industries and Services, Divisions and Sub-divisions

The self-supporting persons in non-agricultural classes are classified according to their secondary economic status, namely, Employer, Employee and Independent Worker and are distributed in the various Divisions and Sub-divisions of Industries and Services in this table. Distribution of the self-supporting persons into the different groups of Industries and Services will be found in the District Index of Non-Agricultural Occupations at the end of this table.

2. The non-agricultural classes classified in Economic Table I correspond to the Divisions and Sub-divisions into which they are distributed in this table, as follows :—

(*a*) Non-Agricultural Class V (Production other than cultivation) corresponds to Divisions 0 to 4. (0—Primary Industries not elsewhere specified; 1. Mining and quarrying ; 2. Processing and manufacture—Foodstuffs, Textiles, Leather and Products thereof ; 3. Processing and Manufacture—Metals, Chemicals and Products thereof ; 4. Processing and manufacture not elsewhere specified).

(*b*) Non-Agricultural Class VI (Commerce) corresponds to Division 6 (Commerce).

(*c*) Non-Agricultural Class VII (Transport) corresponds to sub-divisions 7·0 to 7·4 of Division 7. (Transport, Storage and Communications).

(*d*) Non-Agricultural Class VIII (Other Services and Miscellaneous sources) includes Division 5 (Construction and Utilities), Division 7 (Transport, Storage and Communications) with the exception of Sub-divisions 7·0 to 7·4; Division 8 (Health, Education and Public Administration) and Division 9 (Services not elsewhere specified). This also includes other miscellaneous sources of livelihood from unproductive activities including —

(*a*) Persons living principally on income from non-agricultural property;

(*b*) Persons living principally on pensions, remittances, scholarships and funds ;

(*c*) Inmates of Jails, Asylums, Alms-houses and recipients of doles ;

(*d*) Beggars and vagrants; and

(*e*) All other persons living principally on income derived from non-productive activities.

The above sources of livelihood from non-productive activities are not, however, included in Economic Table No. III which is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the non-agricultural classes in Economic Table I and the total of this table.

The reconciliation is effected in a separate fly-leaf

TABLE C-I

Household, Size and Composition

This table is prepared from a four per cent sample of the households recorded in the National Register of Citizens relating to each village or ward. The selection of the sample was made as follows :—

The total number of households in the particular National Register for the village or ward was divided by 25 and to the remainder 1 was added. The number thus arrived at was taken as the first sample household and every 25th household was then marked off for purposes of selection.

TABLE C-II (Sample)

Livelihood Classes by Age Groups

This table is prepared from the data collected from the ten per cent sample slips separated at the time of initial sorting of the enumeration slips, as explained in the introduction to this Book. As mentioned there, no smoothing formula has been adopted in preparing the table and the figures have been tabulated as actually returned in suitable age-groups.

TABLE C-III

Age and Civil Condition

This table contains the information with regard to age and civil condition of the general population on the basis of the data collected for the ten per cent sample slips, as in the case of Table C-II. It also contains the figures for all the displaced persons in the district. The figures for the sample population and the displaced persons population are exhibited side by side and not in separate tables to effect economy.

2. The figures have been tabulated as returned without the use of any smoothing formula as in the case of Table C-II.

3. In this table, the figures for the divorced and widowed persons are shown together; the figures for divorced persons are separately given in the table below :—

TABLE C-IV

Age and Literacy

This table was also prepared on the basis of data collected from the 10 per cent sample slips of general population, as in the case of Table C-II. The figures relating to all the displaced persons in the district are also given side by side, as in the case of Table C-III. No smoothing formula has been made use of.

2. In this table the figures of illiterates include figures of partially literates ,that is those who can read a simple letter but cannot write one. The details of such persons are given below :—

TABLE E

Summary Figures of the District and Tahsils

In this table area, percentage variation, density of population and distribution of population by livelihood classes are shown for the district and all the tahsils with the corresponding rural and urban break-up.

2. The area figures adopted in this table are those supplied by the Deputy Commissioner. They are rounded to the nearest integer. In comparing the area figures with those given in the State Tables, the remarks contained in the fly-leaf to Table A-I should be remembered.

3. The density has been calculated on the actual area figures supplied by the Deputy Commissioner, but not on the figures shown in column (2) of the table.

4. In calculating the percentage variation in population, the actual adjusted population of rural and when areas at each Census was adopted.
