DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy backlog of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services ..	Divisions 5, 8 & 9

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38, and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & *operation of financial institution* each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately descirbed:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	**999**

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers

Administrative, Executive and Managerial Workers
- 0X3 Librarians, Archivists and Related

Workers:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

Sales Workers:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

Service, Sports and Recreation Workers.

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

by

G. N. Tiwari

Deputy Superintendent of Census Operations, Madhya Pradesh

Rewa district lies between 24°18′ and 25°12′ north latitudes, and 81°2′ and 82°18′ east longitudes in the north-east of the division of the same name. The district with its present constitution came into existence in 1950 after the promulgation of the Provinces and States (Transfer of Enclaves) Order 1950. Prior to August 1947 the district along with the Raghurajnagar tahsil of the erstwhile Rewa State corresponded to the North Rewa district of that State. It takes its name from Rewa town, which in its turn is so called from Rewa, which is another name for Narmada.[1] In shape, one could compare the district to an isosceles triangle, with its base along the Satna border and the two, longer arms converging towards Mauganj in the east. In the north, the boundary of the district marches with that of the State of Uttar Pradesh, in the west with the Amarpatan and Raghurajnagar tahsils of Satna district, in the south with the Sidhi district and in the east again with Uttar Pradesh. With the exception of the uppermost Teonthar tahsil, the district lies entirely on the great Vindhyan plateau.

Comprising in its 2,428 square miles of territory only 1·4% of the State's geographical area, the district cannot advance any claim to dimensions; in fact,it is much smaller than the average area of a district in the State. It occupies thirty-third rank in descending order of size in the State. Only four districts in the State, namely Panna, Ujjain, Rajgarh, and Shajapur have their areas comparable (i. e. lying within±5% of the area of Rewa district) with the area of the district. By way of an interesting comparison, it may be stated that Bastar the biggest district in the State is more than six times as big as Rewa, while the latter in its turn is more than three times as big as Datia, the smallest district

Though Rewa is much below the average in size, it is slightly above average in populousness among districts in the State, its 1961 population of 772,602 being 2·4% of the State's population. Only thirteen districts in the State are more populous than Rewa district. The most populous district in the State–Bilaspur–is about $2\frac{1}{2}$ times as populous as Rewa district, while the latter itself is more than $3\frac{1}{2}$ times as populous as the least populated Datia district in the State.

For administrative purposes Rewa district has been divided into four tahsils, Teonthar in the north, (with its southern boundary marching with Sirmour and Mauganj tahsils), Mauganj in the east, Huzur in the west and south, and Sirmour in the west and north. These tahsils, except for internal variations of a minor character have been existing since 1921. At 1911 census, only three out of these four tahsils had existed; Sitalha (which was the old name of Teonthar tahsil), Huzur and Mauganj, differing considerably in constitution from the present tahsils bearing these names. The Sirmour tahsil came in the intercensal decade 1911-21, to form which "275 villages were taken from Huzur tahsil, 144 from Raghurajnagar and 90 villages from Sitlaha."[2] At the same time, 16 villages were added to Mauganj from Bardi (old Deosar tahsil which included most of the present Sidhi district) tahsil, and 50 villages from Huzur tahsil. The administrative pattern of the district during the Rewa State days was quite different from the pattern adopted after independence. Prior to 1947, there were no districts, but only tahsils which used to be in charge of tahsildars. After independence, the administration was reorganised on the pattern of the old British districts. The pattern continues today also. The Sub-divisional Officers (Revenue) however do not reside at the tahsil headquarters, but only at the district headquarters. Judiciary was separated from the executive even in the old State days, and the separation continues today. There is a District and Sessions Judge stationed at Rewa, whose jurisdiction extends to other districts also. The district does not have much forest, so that for the purposes of administration of forests, Rewa and Satna districts have been constituted into one division under a Divisional Forest Officer, stationed at Rewa. Rewa town is also the headquarters of the Rewa Commissioner's division. The headquarters of the forest department of the State Government (on census day, the agriculture department also was located in Rewa town) is located in Rewa town. Besides these the district has the usual hierarchy of district level officers of the various departments and their subordinates, all working more or less under the control of the District Collector and Magistrate.

Physical Aspects :

Rewa district is bounded by the Kymore on the south. The Huzur, Sirmour and Mauganj tahsils lie between the Kymore on the south and the Vindhyachal locally known as *Binjh Pahar* on the north and form what may be called the Rewa plateau or *Uparihar*. These three tahsils have common physical characteristics. Below Sirmour and Mauganj, to the north of the Vindhyachal in the *tarihar*, lies the Teonthar tahsil, which is in many respects quite different from the three plateau tahsils. Except in the extreme east, in the Mauganj tahsil where a number of hills relieve the monotony of the plain, and in a strip in the extreme south lying along the Kymore ridges the plateau is a wide alluvial plain of about 1,000 ft. height, relieved

1. Rewa State Gazetteer (1907), page 1.
2. Rawa State Census Report, 1921, page 1.

here and there by low scrolls. A few miles to the east of Govindgarh, the Kymore ridge bifurcates into another, lower ridge which more or less runs parallel to the Kymore. In the strip of country enclosed by these two ridges flows river Adh from west to east. The western part of Mauganj tahsil also contains numerous low ridges.

Rivers :

The Kaimur ridge forms the watershed for the district and most of the rivers in the district flow north to join the Tons or Tamasa which is the principal river of the Rewa plateau or *Uparihar*. The Tons enters the north-western part of Sirmour tahsil from the Raghurajnagar tahsil of Satna district. At Purwa, it falls 220 ft. below to the level of the Teonthar plains. After the falls the river flows through high banks for a few miles and then enters the Teonthar, where its bed is ravinous. Bihar river which rises in the Kaimur hills and flows past Rewa town through a ravinous course is an important affluent. Near Rewa town it is joined by the Bichia river. At Chachai, about five miles to the southwest of Sirmour the Bihar falls 370 feet below into the plain and joins the Tons after about another mile or so. The lower part of the course of the river is full of ravines, but in the upper portion in Sirmour tahsil, it flows through an even country. Mahanadi–another affluent of the Tons–falls below at Kewati from a height of 331 feet. It flows through a ravinous course in Teonthar tahsil and joins the Tons. Further east is the Odda river which rises from the northern branch of the Kaimurs and flows through a ravinous course till it falls over the edge of the plateau below 465 feet and meets the Naina river. Earlier in the Mauganj tahsil, the Odda is joined by the Silar and the Nihai. Gorma a small river which flows in the eastern part of the Mauganj tahsil also has a drop of 340 feet before it reaches the *Turihar*.

Rainfall :

The district receives moderate rainfall,starting generally towards the middle of June. The downpour gains in intensity till August and then declines and completely stops sometime in the month of October. July and August are the months of the heaviest rainfall. The district average (ignoring the Govindgarh recording station) comes to 1,102·8 mm. (43·4″). Downpour is evenly distributed in the tahsils; the average for the last 10 years being Rewa 1,118·5 mm. (44·1″); Teonthar 1088·1 mm. (42·8″), Sirmour (1,090·1 mm. (42·9″) and Mauganj 1,075·5 mm. (42·3″). Year 1956 appears to be the year of maximum rainfall, the district average in that year being 1503·9 mm. (59·2″). The maximum rainfall of 1,675·8 mm. or (66 0″) in that year was registered at the Mauganj station. Year 1960 was also a year of heavier than normal rainfall all over the district. If we disregard the exceptionally high rainfall of 1956, the district average shrinks to 1,058·3 mm. (41·7″). Year 1957 appears on the whole, to have been a year of poor rainfall, the district average in that year being as low as 803·5 mm. (31·6″). Individually, however, Mauganj tahsil had very poor rainfall consecutively in 1953 (625·6 mm. or 24 6″) and in 1954 (605·8 mm. or 23·8″).

Climate :

As in other parts of the State, the district has a monsoon type of climate, with the year broadly divided into three seasons of more or less equal duration. The following table gives the mean variation in the maximum and minimum temperatures from month to month. It gives the averages for the last ten years of the monthly mean maximum (A), maximum (B), mean minimum (C), and minimum (D) temperatures.

TABLE

Average mean maximum (A), maximum (B), mean minimum (C) and minimum (D) temperatures in each month of the year.

Month	Temperature in centigrade			
	A	B	C	D
1	2	3	4	5
January	17·3	28·5	7·4	4·8
February	25 0	33·0	11·7	5·1
March	37·0	39·1	2>·0	15·8
April	39·1	41·9	25·5	21·6
May	40·4	43·2	28·0	21·9
June	42·3	44·6	27·0	22·5
July	33·4	35·2	25·1	22 1
August	32·0	31·5	22·8	22·6
September	31·1	33·6	22·6	20·5
October	33·5	36·1	22·2	13·1
November	27 8	31·1	13·8	4·9
December	22·6	26·9	8·0	4·7

January seems to be the coldest month in the year, with both the mean maximum and mean minimum temperatures having the least average values. After January the temperature starts rising. The hot weather begins from the month of March, the mean maximum and mean minimum temperatures in that month being, on an average about 12°C higher than the corresponding temperatures in February. The rise in temperature continues uninterrupted, but in a gradual manner, till the mean maximum and mean minimum temperatures attain their average peak values of 42·3°C (108·1°F) and 28·0°C (82·4°F) in June and May respectively. The total increase in mean maximum temperatures from March to June is 5·3°C, which gives us a rise of roughly 1·8°C per month. The average increase in the mean minimum temperature from March to May is 3°C,which gives an increase of 1·5°C per month. The evidence before us shows that June days are on an average warmer than May days, but the reverse is the case with nights, which are slightly cooler in June than in May. The hot weather thus tends to be severe, but the heat is mostly clean, dry heat. The mean maximum temperature starts falling after May, and the mean minimum starts falling after June, the month in which the monsoon makes its first appearance. The drop in mean-maximum temperature is rather sudden i. e. about 9°C from June to July, though the night temperature drops only by 2°C. Thereafter, though

the mean maximum and mean minimum temperatures continue to fall, such fall is gradual. The fall of mean maximum temperature continues till September but rises slightly in October. The mean minimum temperature however continues to drop even in October. This is the well-known phenomenon of warm days but cooler nights that characterise the month of October witnessing the transition of rainy season to the cold season. The heat though not as intense as May or June heat is still oppressive because of the prevailing humidity in the atmosphere. After October the mercury resumes its downward trend, even as regards the mean-maximum and maximum temperatures; December and January are the coldest months. The days and nights seem on an average, to be cooler in January than in December, though the latter month perhaps has some very cool days and nights. In fact, the second half of December and the first half of January is the coldest period of the year. The lowest temperature of 4·4°C was touched several times during the months of December and January over the last ten years. The highest temperature of 45·6°C (114°F) was, however, reached only in June 1958.

History :

As may be inferred from the great *Bharhut Stoop* erected by Ashok, the territories now included in the district were held by the imperial Maurya dynasty which ruled in the 3rd and 2nd centuries B C. After the subversion of that dynasty by the Sungas, the latter perhaps exercised authority over the district, one of the gates of the *Bharhut Stoop* bearing an inscription referring to its erection during the rule of Sunga dynasty.[3] During the fourth and fifth centuries A. D., the district was in the hands of the great Gupta dynasty of Magadha as is indicated in the inscriptions found at Kho belonging to the kings of Uchchakalpa (Identified with Unchehra in Nagod tahsil) and Parivrajak kings who were feudatories of the Guptas. The Guptas (through their feudatories) were followed in the district by the Kalchuri, Chedi or Haihaya kings. This tribe, which became of some importance in A. D. 249,the year marking the beginning of their era, initially ruled in the west with their capital at *Mahishmati* (now Maheshwar) in West Nimar district. Driven eastwards by some more powerful tribe, Krishna Chedi captured the fort of *Kalanjar* after slaying "an evil-minded king who practised cannibalism". Mangalisa, the Chalukya king of Badami, in his Mahakuta (Bijapur) inscription of A. D. 598 refers to his victory over Buddhavarman Kalatsuri (Kalchuri) during a campaign in the northern regions.[4] The *Vrihat Samhita* written in 6th century, also mentions the Cheidya (Chedi) as a people of the Madhya desh or middle region of India.[5]

After the death in 648 A.D. of Harshavardhan who perhaps had subjugated the tribes that must have ruled the district before the advent of the Kalchuris, the latter, with Kalanjar as their base, extended their sway over the Baghelkhand, the tract becoming known as *Chedi desh* after them. From the 9th to the end of 12th century, there is a line of Kalchuri kings ruling in this tract. The first serious blow to the Kalchuri supremacy came in the tenth century, when they were defeated by the Chandellas of Bundelkhand and lost the Kalinjar fort to them. It appears that after the advent of the Muhammadans had broken the power of the Kalchuris, the Baghelkhand country fell to the Bhars, Chauhans, Sengars, Gonds and other clans. Of these, the Bhars are the most interesting. They appear to have held Kalanjar in the 13th century and to have been able to oppose even the Muhammadan forces. Their descendents still inhabit the Mauganj, Huzur, Raghurajnagar and Bardi (Gopad-banas) tahsil in Rewah.[6]

The Baghela kings, after whom the country east of river Ken is known as Baghelkhand, first appeared in the region in the 13th century, driven eastwards by Ulugh Khan, brother of the emperor Alauddin. Vyaghradev Baghela is said to have obtained possession of the fort of Marpha, 18 miles north-east of Kalanjar, sometime in 1233–34. His son Karnadeva married the daughter of the Kalchuri king of Ratanpur (in Bilaspur district) and got the fort of Bandhogarh in dowry. Karnadev moved his residence to Bandhogarh fort, which remained the Baghel capital till 1597. Until the fifteenth century the Baghels were engaged in extending their possession and were not, perhaps, of sufficient political importance to attract the attention of Delhi emperors. First mention of the Baghel kings occurs in the time of Bahlol Lodhi in 1488, when the Baghel king Bhira of *Bhata* (that was the name given by Muhammadans to the Baghel country) assisted Hussain Shah of Jaunpur, who was pursued by Bahlol Lodi. In 1494 Sikandar Lodi advanced against Raja Bhira, who had captured Mubarak Khan, governor of Panna. The Raja was defeated and died during his retreat, while Sikandar proceeded as far as Paphund, 20 miles north of the capital town of Bandhogarh. In 1498–99 again Sikandar Lodhi attacked Salivahan, Bhira's son for refusing to give him a daughter in marriage. Among later chiefs of the Baghel house, mention may be made of Ram Chandra, who was a contemporary of Akbar. The famous musician Tansen was the court musician of Ram Chandra, and he was summoned by Akbar later on. Ram Chandra died in 1592 and his son Virbhadra died soon after as a result of a fall from his palanquin on way to Bandhogarh from Delhi. The succession of Vikramaditya, minor son of Virbhadra, was followed by intrigues and disturbances at Bandhogarh and Akbar had to depute Raja Patradas to restore peace. The latter captured the fort after a siege of more than eight months and was governor of Bandhogarh country till 1602. The kingdom was, however, restored to Vikramaditya who shifted the capital to Rewa. Later kings of the Baghel house were troubled by the Bundela rulers of Orchha and Panna, and the Baghels were able to retain possession of their kingdom with the help of Mughal empe-

6. Rewa State Gazetteer, Page 10

ror at Delhi. The Rewa country was attacked by the Marathas in 1796, and the latter exacted a tribute of a lakh of rupees from the Baghels. The finances of the Baghel kings had by this time deteriorated considerably and it was with great difficulty that the payment was arranged. The Marathas had, however, seized the Bandhogarh and country to the south from the Rewa king. During the war against the Marathas in 1803–04, a British force was stationed at Makundpur to prevent the Marathas striking southwards through this region. In this year, overtures for a treaty were made by the British but they were turned down by king Ajit Singh. In 1812, when Jaisingh was the ruler of Rewa, a body of Pindaris raided Mirzapur from Rewa territory and the king was believed to have abetted or at least countenanced the raid. He was, therefore, compelled to accede to a treaty with the British, by which he acknowledged British protection, to whose arbitration all disputes with the neighbouring chiefs were to be referred, and to allow British troops to march through or be cantoned in the Rewa territory.

During the mutiny of 1857, Raghuraj Singh was the ruler of Rewa. He helped the Britishers in suppressing the mutineers and placed a force of 2,000 men under their command. For this good service, Raghuraj Singh was granted the Sohagpur and Amarkantak districts which had been seized by the Marathas and which had passed into British hands. Thereafter the Baghel kings continued to rule the Rewa territory as a treaty State, till in August 1947, after the country became independent, the Rewa ruler acceded to the Union of India. The present Rewa district came into existence in 1950.

Distribution of Area and Population :

Distribution of the district's area and population among its four tahsils is presented in the inset below :

Percentage Distribution of Area and Population, 1961.

District/Tahsil	Area	Rank in area	Population	Rank in Population
1	2	3	4	5
Rewa District	100·0	...	100·0	...
1 Teonthar Tahsil	25·2	2	19·2	4
2 Sirmour Tahsil	23·9	3	24·3	3
3 Mauganj Tahsil	29·7	1	27·0	2
4 Huzur Tahsil	21·2	4	29·5	1

Mauganj, the biggest tahsil, occupies second rank in respect of population. Most populous tahsil in the district, though the smallest, is Huzur. This contrasting situation has arisen from its containing Rewa, the only town in the district. Sirmour and Teonthar tahsils contain more or less equal proportions of the district's area ; but in respect of population Teonthar, the bigger one, is relegated to a lower rank It may be noted that only Sirmour tahsil occupies identical ranks in respect of population and area ; in fact it contains very nearly equal proportions of the district's area and population.

Figures in the above table give only a broad indication of the relative populousness of each tahsil; for a clearer picture, we must consider the population density index i. e., population per square mile in each tahsil. This is done in the table below, which also gives the changes in density since 1951. The density figures both for 1961 and 1951 have been calculated from the 1961 area of the district and each tahsil.

Density of Population, 1961 and 1951

District/Tahsil	Population per square mile: 1961	Rank in 1961	1951	Rank in 1951	% increase since 1951
1	2	3	4	5	6
Rewa District	318	...	261	...	21.8
1 Teonthar Tahsil	242	4	195	4	24.1
2 Sirmour Tahsil	323	2	272	2	18.8
3 Mauganj Tahsil	290	3	237	3	22.4
4 Huzur Tahsil	443	1	361	1	22.7

As expected, the most densely populated tahsil in the district is Huzur, while the northernmost Teonthar has the least density. Sirmour and Mauganj tahsils, in this order, occupy intermediate positions. The relative positions of the tahsils in respect of population density remain unchanged since 1951.

The low population density in the border tahsil of Teonthar which is on the lowlands and in continuation of the Ganga basin appears somewhat intriguing. This tahsil, however, contains the smallest proportion of district's gross and net cultivated area. This, however, does not necessarily explain the low population density because it may itself be a result of the low population density. Possibly, greater distance from the former State capital, bad communications and consequent neglect on the part of the administration played some part in the comparatively less colonisation of this tahsil. If this presumption is correct, in times to come, with the greater opening up of the tahsil, one should expect it to grow faster than the rest of the district (This in fact has been the case during the preceding decade).

In the State perspective, Rewa district ranks fifth in respect of population density, the districts more densely populated than itself being Indore (510), Bhind (373), Jabalpur (326), and Gwalior (326). Rewa district is more than $1\frac{1}{2}$ times (actual proportion is

1·66) as densely populated as the State as a whole. If we consider rural areas only, Rewa district (with 301 persons per square mile) shoots up to the 2nd position in population density ranking in the State, first position being that of Bhind (346 persons per square mile). The reasons for this comparatively high rural density of population despite its general economic, educational backwardness is presumably the earlier colonisation of the district. But for firm conclusions the data before us is inadequate. It is an interesting demographic aspect of the district and may be fruitfully studied by scholars interested in demography.

Discrepancy in Area figures :

Area figures for the district are given by the Surveyor General of India, and the State Directorate of Land Records. The methods employed by these two agencies in surveying, and in calculating the area are different and this naturally results sometimes in large discrepancies in the areas calculated. That is perhaps so in case of Rewa district, where the discrepancy in the area of the district (given in table A-I) given by these two agencies is of the order of 3.3% of the Director of Land Record's area.

Territorial changes during 1951-61 :

There has been only one inter-district change of territory during the decade, involving six villages and an area of 27.1 square miles transferred from Raghurajnagar tahsil of Satna district to Sirmour tahsil of Rewa district. Details i. e., names etc. of the villages may be seen in annexure to Appendix 1 to Table A-I.

Houseless Population :

Houseless persons in the district number 1 in 2,000 as against 1 in 300 in the State. Apparently the district is better in this respect than the State as a whole.

Rural Urban Composition :

Three of the district's four tahsils are entirely rural. Rewa, headquarters of the district and formerly of the Rewa State, is the only town in the district. It contains 5·6% of the district's population, and 18·9% of the population of Huzur tahsil in which it is situated.

Villages :

The district contains 2,802 villages which make 3.6% of all villages in the State. As many as 18 out of every 100 villages in the district are uninhabited; the corresponding frequency for the State as a whole being 8 in 100. The frequency of uninhabited villages is highest (22%) in Mauganj tahsil. In other tahsils the frequency of uninhabited villages is : Teonthar (18%), Sirmour (15%) and Huzur (15%). The district has 2,296 inhabited villages. Of every 100 inhabited villages in the district, Teonthar contains 20·5%, Mauganj 36·3%, Sirmour 22·2%and Huzur 21·0%. It is significant that Teonthar tahsil which is the second biggest tahsil in the district contains the least number of inhabited villages, a fact compatible, however, with its low population density. Mauganj, the biggest tahsil, contains more than one-third of the villages ; which is considerably more than proportionate to its size and population.

Distribution of villages by population size .

Table inset below gives the distribution of 1,000 inhabited villages in the district and in each tahsil by population sizes, namely, villages with a population upto 199 (hereinafter called very small villages), villages with population above 199 but below 500 (hereinafter called small villages), villages with population above 499 but below 1,000 (hereinafter called medium-sized villages), above 999 but below 2000 (hereinafter called big villages) and with more than 1,999 population (hereinafter called very big villages).

Distribution of 1,000 inhabited villages in the district and tahsils by population sizes , 1961

District/Tahsil	Total	Number of villages in population size				
		Less than 200	200—499	500—999	1,000—1,999	2,000+
1	2	3	4	5	6	7
1 Rewa District	1,000	526	286	136	39	13
Teonthar Tahsil	1,000	489	317	149	36	9
3 Sirmour Tahsil	1,000	480	298	155	47	20
4 Mauganj Tahsil	1,000	626	239	97	29	9
5 Huzur Tahsil	1,000	438	326	172	48	16
6 M. P. State	1,000	372	381	182	54	11

The district has a preponderance of very small villages, which account for more than half (53%) of its inhabited villages. This compares with the low figure of 37% for the State as a whole. The State, however, surpasses the district as regards small villages (200-499), by about 10%. Villages of the first two

categories i. e., villages with less than 500 population form more than four-fifth of all villages in the district, whereas in the State as a whole the corresponding proportion is only three-fourth. The district thus has a greater number of smaller villages than the State as a whole. This characteristic is perhaps significant of the district's industrial backwardness because industrialisation with its invariable concomitant, urbanisation normally tends to the growth of bigger villages. Of medium-sized and big villages, the district has roughly 14 and 4 percent respectively comparing with corresponding proportions 18 and 5% respectively for the State as a whole. In other words, whereas the State as a whole has roughly one of every four of its villages in the category of either a medium-sized or a big village, in the district the frequency of such villages is less than one in five.

As regards tahsils, Mauganj has the highest proportion (63%) among the tahsils of very small villages while Huzur has the lowest (44%) proportion. In Teonthar and Sirmour tahsils, very small villages are more or less equally frequent. The position is reversed in case of 'small' villages (200–499), with Mauganj having the minimum proportion (roughly 1 in 4) of them, and Huzur having the maximum proportion (roughly 1 in 3). Medium-sized villages and big villages together vary from 22% (maximum) in Huzur tahsil to 13% (minimum) in Mauganj tahsil. Very big villages (with more than 2,000 population) constitute 1.3% of all inhabited villages in the district, varying between a minimum of 0·9% in case of Teonthar and Mauganj tahsils to a maximum of 2% in case of Sirmour tahsil.

In a nutshell, an overwhelmingly large proportion (more than four-fifths) of inhabited villages in the district consists of very small and small villages (i. e., villages with less than 500 population). Medium sized villages are one in seven while big and very big villages together are only one in twenty.

Distribution of population by village-size :

The proportions of rural population living in villages of various size-groups in the district and in each tahsil are presented in the table inset below :

Percentage of population living in villages of different size-groups in the district and in each tahsil, 1961

District/Tahsil	Total Population	Population living in villages with Population				
		Less than 200	200—499	500—999	1,000—1,999	2,000+
1	2	3	4	5	6	7
1 Rewa District	100	14·1	29·1	29·2	16·2	11·4
2 Teonthar Tahsil	100	13·3	32·5	31·5	15·8	6·9
3 Sirmour Tahsil	100	12·3	26·6	29·1	17·5	14·5
4 Mauganj Tahsil	100	19·5	30·3	26·0	14·4	9·8
5 Huzur Tahsil	100	10·5	27·4	31·3	17·1	13·7
6 M. P. State	100	10·0	31·8	31·6	18·2	8·4

Very small villages, forming 53% of all the inhabited villages in the district, contain only 14 out of every 100 persons in the district. This compares with 10 persons out of 100 living in such villages in case of the State as a whole, which form 37% of all inhabited villages in the State. Thus 'very small' villages seem to be more preferred in the district than in the State as a whole. Small villages (200–499) and medium sized villages (500–999) together accounting for 42·2%. (more than two-fifths) of inhabited villages accommodate 58% (a little less than three-fifth) of the population. The two classes of villages individually contain the same proportion, (29%) of the rural population, though separately they account for 29% and 14% of all inhabited villages. In the State as a whole, the two classes, individually and collectively are slightly more populous than in the district.

Big and very big villages (i. e. villages with more than 1,000 population), constituting together 5% of all inhabited villages account for more than a fourth (28%) of the rural population of the district. For the State as a whole, villages of this type contain 27% of the rural population. This fact, when seen in conjunction with the higher proportion of these villages in the State, indicates that villages of these classes are more populous in the district than in the State as a whole. It is interesting to note that roughly equal number of persons in the district live in small villages (200–499), medium-sized villages (500–999) and bigger villages (1,000 and more) contributing respectively 29%, 14% and 5% to the total number of inhabited villages. The tendency as regards habitational preference may be summed up : a small proportion of the population prefers dispersal in a large number of very small villages ; but bulk of the population exercises its

choice in favour of villages of increasing size, the choice being more or less equally shared by small villages (200–499), medium-sized villages (500–999) and bigger villages (1,000 and more). This corresponds broadly with the State pattern.

Coming to tahsils, a few observations deserve mentioning. Mauganj tahsil has comparatively more people (19.5%) living in very small villages, while Huzur has the smallest proportion living in such villages, thus bringing out the greater preference of Mauganj for living in a large number of very small villages. In respect, however, of big and very big villages (i. e. with a population of 1,000 and more), Sirmour tahsil tops all the tahsils with 32% of its population living in such villages. Huzur tahsil with 31% of its population in these villages is a close second, but Mauganj and Teonthar with respectively 24.2% and 22.7% living in these bigger villages demonstrate the preference of their population for smaller villages.

Average Population of a village :

A study of population living in villages with varying population-sizes is hardly complete without a discussion of the average size to which villages in each size tend to cluster. Given below, therefore, is a table which gives, separately for the district and the tahsils, average size of a village in each size-group of population.

TABLE

Average population of a village in villages of different size-groups

District/Tahsil	Average population of a village in population range.					
	All Villages	Below 200	200—499	500—999	1,000—1,999	2,000+
1	2	3	4	5	6	7
1 Rewa district	318	85	323	682	1,341	2,773
2 Teonthar tahsil	315	86	323	667	1,383	2,542
3 Sirmour tahsil	368	95	329	691	1,370	2,720
4 Mauganj tahsil	250	78	317	670	1,249	2,562
5 Huzur tahsil	384	92	323	697	1,378	3,168
6 M. P. State	394	106	329	685	1,323	2,880

The table shows that average size of a village in the district is distinctly smaller than in the State as a whole. The difference is conspicuous in the bottom and the top size-groups ; but in the intermediate size-groups the State and the district averages show greater agreement.

As may well be expected by now, the minimum size of an average village is in Mauganj tahsil, while Huzur has the maximum average population. The general average in case of Mauganj is obviously pulled down by the low averages in size-groups 'below 200' and '200–499'. It may also be noted that distribution of average population over the various size-groups shows broad similarity between Huzur and Sirmour tahsils on the one hand, and Mauganj and Teonthar on the other.

Towns :

Rewa, the headquarters of the district, is the only town in the district. In 1951 the district had as many as 14 towns, of which all but one have lost that status as a result of the 1961 census definition of a town. For ready reference, the names of these declassified towns together with their populations in 1961 and 1951 are given below :

	Name of declassified town	Population	
		1951	1961
	1	2	3
1	Mauganj	4,579	2,930
2	Gurh	3,927	4,790
3	Raipur	2,033	2,437
4	Naigarhi	2,050	2,075
5	Hanumana	1,818	140
6	Baikunthpur	3,093	3,668
7	Mangawan	2,326	2,742
8	Raghunathganj	1,273	1,431
9	Semaria	2,313	2,554
10	Dabhaura	2,304	2,534
11	Sohagi	1,125	1,570
12	Chak	863	1,899
13	Govindgarh	3,448	4,207

Rewa is situated in 24° 32′ N latitude and 81° 24′ E longitude, 1,045′ above the sea. It is 31 miles by asphalted road from the nearest railhead Satna. The town has had continuous existence as such since 1901. During the period 1901–50, the town only increased by 20·4% over its 1901 population. This is because it is essentially a residential town, without any industries and as such there was hardly any rural to urban migration. During 1951–61, however, the town recorded an unprecedentedly high increase of 45·4%. Partly this was a result of inclusion of certain adjoining non-municipal areas in the town because of acquisition of urban characteristics by their population. Partly it is

also due to the growth of educational and administrative institutions in the town.

Houses :

The district had 210,515 census houses at the time of houselisting. Of these, 66% were used as dwellings 0·7% as shop-cum dwellings and 3·8% as workshop-cum-dwellings. The remaining were put to other uses like hotels, hostels, sarais etc., shops, factories, schools, etc. Quite a large proportion i.e , 23·1% were not classed by any of the known uses, but were returned merely as 'others'.

94·8% of the households in the district live in houses belonging to them, and only 5·2% in rented houses. In urban areas, the proportion of households that live in rented houses was as big as 47·9%, a fact, which emphasizes the migrant character of urban population.

More than nine-tenths (92·3%) of all households live in houses of which the walls are mainly made of mud, mixed with fodder of kodon or other grain. Houses with walls of timber emerge as next in popularity, providing dwellings to 2·8% of the households. Houses with walls of stone accommodate 2·5% of the households. Houses with bamboo or grass or leave walls are also met with, and these serve as dwellings of 0 9% of the households. Pacca houses, with walls of burnt brick are not very common in the district; only 0·9% of all households live in such houses.

In urban areas also, mud houses are the most frequent serving as dwellings of 60·8% of the households. Next in frequency are houses with walls of stone, which accommodate 31·6% of the urban households. Pacca houses with walls of burnt brick are not very numerous, serving as the dwelling of only 5·6% of the households.

As regards roofs, as many as 92·5% of the households in all areas live in houses covered with tiles and 5·4% live in houses with roofs covered with grass, leaves etc. 1·5% of the households live in houses of which the roofs are covered with stone and concrete. This leaves only a small fraction —0·5% of households that live in houses with roofs covered by other materials.

As regards living accommodation, the data before us reveals that every household in the district has 2 rooms in its occupation, a room being defined as a part of a census-house with four walls and an exit door, and with space enough for at least one man to sleep. The census requirements of a room were thus quite modest. More than two-fifths (45·7%) of the households live in census-houses with only one room, with 3·7 persons on an average living in it. Between one fourth and three-tenth (28·6%) of all households live in census houses with two rooms for each household, and with 2·5 persons living in each room. About one-fifth (19·1%) of the households live in census houses having three or four rooms each. The remaining 6·6% of the households thus live in dwellings with more than four rooms each. The picture that emerges from the census data is thus that between two-fifths and half of all households in the district are living in congested houses with one room each, about three-seventh are somewhat better with two rooms each, and the remaining one-fourth have reasonably better accommodation of three or more rooms each.

Earlier Censuses :

The first regular census of the population of Rewa district (as a part of the Rewa State) was taken on the 17th February 1881, synchronously with the rest of India. Thereafter censuses had been taking place in the district with the rest of the country in February-March of the opening year of every decade. The present is thus the ninth in the series of regular decennial censuses, and the 2nd after the attainment of independence.

Population Variation 1901-1961 :

The table given below shows variations in the population of the district between 1901-1961; corresponding figures for the State also are given for comparison :

Year	Rewa district			State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901–11	+6·71	+6·81	+5·18	+15.30	+17·78	—10·91
1911–21	—3·18	—2·21	—17·79	- 1.38	- 2·26	+10·87
1921–31	+6·71	+6·34	+13·16	+11.39	+10·45	+23·03
1931–41	+14·44	+15·14	+2·76	+12.34	+10·49	+32·78
1941–51	+8·06	+ 2·93	+103·98	+ 8.67	+ 6·01	+33·16
1951–61	+21·90	+27·31	—29·14	+24.17	+20·95	+47·70
1901–61	+66·18	+67·60	+45·34	+92.00	+80·13	+217·36
1901–31	+10·24	+11·08	— 2·14	+26·66	+27·15	+ 21·52
1931–61	+50·74	+50·88	+48·52	+51·59	+41·67	+161·15

• Salient features of the above table are summarised below :—

(i) Except for the decade 1931–41, which saw a greater rise in the population of the district than in that of the State as a whole, the latter has been growing faster than the district during all the decades.

(ii) During the past sixty years, the population of the district registered a decline only once : namely in 1911-21.

(iii) The percentage increase registered by the district in 1951-61, was the highest during the past six decades. The only other decade which witnessed a high increase in the district's population was 1931-41.

During the decade 1901–11 the district's population grew by 6.7%, which is less than half of the increase recorded for the State as a whole. The evidence I could lay my hands on does not enable me to assign the reasons for this noticeably low increase.

We have, however, a better picture of the decade 1911-21. During this decade Rewa district lost in population by 3.2%, comparing with a loss of 1·4% for the State as a whole. The 1921 census Report of Rewa State[7] assigned this to (i) rise in wages in neighbouring areas in the then British India causing emigration; wages in Rewa being abnormally low and the 'Harwaha' system, a feudal institution, amounting practically to slavery, (ii) outbreak of an influenza epidemic in 1918 described as the greatest catastrophe that had ever befallen the State, sweeping away numerous lives, (iii) Scarcity conditions in 1918-19; and (iv) Famine in 1919–20. All these causes contributed to the high decrease in the district's population during 1911-21.

The conditions during the decade 1921-31, were on the whole good. As stated in the 1931 census Report,[8] the condition of the crops from 1921-26 was very good, the country side enjoyed a fair continuation of good years. There was a small set-back in 1927 and 1928 due to excessive or badly distributed rains and the rabi crops were extensively damaged by a plague of rust. The last two years of the decade are not reported to have been bad. Thus, conditions in the Rewa State of which the present district was then a part during the decade were partly conducive to the growth of population, and partly, during the closing four years, tended to be adverse. The result is a modest growth of 6·7% during the decade, comparing with 11·4% for the State as a whole.

The district registered a sizeable increase (14.4%) in its population during 1931-41, comparing with the slightly smaller growth (12.3%) recorded by the State. Agricultural and economic history of the decade is not available in respect of Rewa State in the available census records. The decade is, however, reported to have been normal for the neighbouring districts of the old C.P. and Berar, and it can thus be presumed that in Rewa district,too, conditions during the decade were normal. The population which had been badly mauled by a series of adversities in 1911-21, and during the last four years of 1921-31, showed spectacular recovery during the 1931-41 decade, reflected in the high percentage growth recorded by it.

The decade 1941-51 saw the district growing almost at the same rate as the State as a whole. The extremely lopsided distribution of the increase over the rural, and urban areas is only apparent, being due to the inclusion of twelve new towns namely Gurh, Raipur, Mauganj, Hanumana, Naigarhi, Baikunthpur, Semaria, Mangawan, Raghunathganj, Chak, Dabhaura, and Sohagi in 1951. The unprecedentedly high increase of 21.9%, achieved by the district during the decade just gone by is somewhat smaller than the State average, and has, in common with the State as a whole, to be ascribed to better health and economic conditions enjoyed by the people in the post-independence era, and perhaps to an increase in levels of fertility which was at a slightly lower ebb during 1941-51 owing to depletion of women in child bearing ages 20-24 as a result of influenza in 1918-19. The district recorded a lower increase of 66% as compared to the State average of 92% during the 60 year period 1901-61. The first half of this period i.e. 1901-31, was particularly bad for the growth of population in the district than in the State as a whole. During this period, the State grew almost thrice as fast as the district. During the later half of the sixty year period the district improved its position considerably and registered growth which is comparable with the State average.

Growth during 1951-61 studied by Tahsils :

It is interesting to find whether the all time high rate of increase of 1951-61 is uniformly distributed among the rural and urban areas and among the tahsils, or shows some unevenness. The urban population in 1951-61 is shown to have decreased by 29%. This is, however, owing to the declassification in 1961 of 13 of the 14 towns of 1951. In the table below are given tahsilwise rates of increase separately for total, rural and urban areas, treating only Rewa town as urban at both 1951 and 1961 censuses.

District/Tahsil	Percentage increase		
	Total	Rural	Urban
1	2	3	4
Rewa District	21·9	20·8	45·4
Teonthar Tahsil	24·3	24·3	...
Sirmour Tahsil	18·9	18·9	...
Mauganj Tahsil	22·3	22·3	...
Huzur Tahsil	22·6	18·3	45·4

7 Vol. III, Part I, page 2.

8. Vol. XX Central India Agency, Part I, Report, page 29.

District/Tahsil	Area under: Other pulses except Tur & gram	Total food-grains	Total food-crops	Linseed	Rape and mustard	Seasamum	Total oilseeds	Total non-foodcrops
1	11	12	13	14	15	16	17	18
Rewa district	100·0	100·0	100·0	100·0	100·0	100·0	100·0	100·0
1 Teonthar Tahsil	27·3	21·6	21·6	11·2	82·9	32·4	15·6	15·7
2 Sirmour Tahsil	23·3	24·1	24·1	26·8	3·5	33·2	27·0	27·1

Rewa district	59,325	908,724	913,212	92,193	1,907	8,104	102,512	105,678
1963–64	5·8	89·2	89·6	9·0	0·2	0·8	10·1	10·4

Food crops occupy 91% of the gross cropped area of the district, almost all of which is under foodgrains. Cereals and millets, of the foodgrains, have the maximum acreage, of 69% of the gross cropped area of the district. The proportion of area under foodgrains is maximum (76%) in Mauganj tahsil and minimum (64.6%) in Teonthar tahsil.

Rice and the millets i.e. *kodon* are the staple crops in *kharif*. The area under rice is a little more than one-fourth of the gross-cropped area in the district, while individually, Mauganj tahsil has as much as 32% of its gross-cropped area under rice. Teonthar is next to Mauganj in respect of area under rice whereas Sirmour and Huzur tahsils have more or less equal proportions of areas under rice. Rice is grown throughout the district on *sigaon* soil. *Kodon* is grown on higher *bhatha* lands. *Juar*, less popular, is grown mostly in Teonthar, Sirmour and Huzur tahsils which have respectively 7.4, 4.6 and 4.3% of their areas under the crop.

Wheat amongst the cereals, gram amongst pulses and linseed amongst oil-seeds are the staple *rabi* crops in the district. Wheat is also grown mixed with gram. Mauganj has 31·5% of the total wheat are a in the district in 1960–61, which is the maximum. Relatively however, Huzur tahsil has the maximum proportion of its area under wheat, Sirmour is second in that respect and Mauganj is third. Teonthar tahsil has only 12·4% of its area under wheat which is less than half of the area under rice in that tahsil. Again in Mauganj and Teonthar tahsil, even combined areas under wheat and gram fall short of the area under rice in these tahsils. Huzur and Sirmour tahsils have more area under wheat than under rice. Thus, as regards even cropping, Huzur and Sirmour show a similarity of pattern. Teonthar and Mauganj also exhibit similarity in respect of wheat and gram, but in respect of *jowar* and barley the similarity ceases. Barley, another cereal, apparently is popular in Teonthar tahsil which accounts for 65% of the area under the crop in the district.

Gram and *tur* are the most widely grown pulses, occupying respectively 10.2 and 4·7 percent area of the district's gross cropped area. They are grown in all the tahsils, the proportions varying not very significantly from tahsil to tahsil except in case of gram, which has a particularly low proportion of area (6%) in Mauganj tahsil.

Oilseeds, covering 9·0% of district's gross cropped area, are important in that they put cash in the hands of the cultivators. Linseed is the most widely grown oilseed, accounting for 8% of the gross-cropped area of the district. Other oilseeds thus together cover approximately 1% of the district's cropped area.

Changes in Acreage since 1951—52 :

Table 2A· 2 in part II gives the area under some important crops in the district. The table at once focusses attention on the sizeable increase in the acreage devoted to wheat in the district In relative terms, this crop has about 58% more area under it in 1960–61 than it had in 1951-52. Relatively the crop occupies 27·4% of the net area sown in 1960–61, whereas in 1951–52 it had occupied only 20·6% of the net area sown. Rice has also improved its acreage since 1951-52, but the increase has been only of the order of 17% in absolute terms since 1951-52. Jowar has increased its acreage though very slightly since 1951-52 The acreage under oilseeds has also improved, but increase has not been as impressive as in case of wheat or paddy.

Double-cropped area has also increased conspicuously during the last ten years. In absolute terms, the increase in acreage has been of the order of 64.2% of the double cropped area of 1951-52. Relatively, from 17.0% of the net area sown in 1951-52, double cropped area has now increased to 23·6% of the net area sown in 1960-61. In fact, the impressive increase under the food-crops, and the net area sown has been made possible mainly on account of the sizeable increase in area sown more than once.

Irrigation :

Area under irrigation is at present of no consequence, being only 0·2% of the net sown area in 1960-61. Irrigation is mostly by wells. Two medium irrigation projects, namely the Baisa Weir in Huzur tahsil, and Loni dam in Teonthar tahsil are under construction, and these when completed will irrigate about 6,000 acres. A somewhat bigger scheme estimated to result in the irrigation of about 19,000 acres is the Grama

groups 0-14, 15-34, 35-59, and 60+ as corresponding to childhood and juvenility, youth, middle age and old age respectively. As in the case of the State, in Rewa district too, the proportion of children under 15 years forms the broadest age-segment. The district proportion is greater than the State proportion by 1·2 points. In concrete terms, roughly 2 out of every 5 persons in the district are children below 15 years. The next higher age-interval i.e. youth (age-group 15-34) accounts roughly for one out of every three persons in the district, while roughly one out of every 5 persons in the district is middle aged. In other words, of every five persons in the district, two are children below 15 years of age, one is a middle-aged man between 35 and 59 and the remaining two are young and old persons. The relative numerousness of persons belonging to last mentioned category may be judged from the fact that of every 22 persons in the district, only one is likely to be an old person above sixty years of age.

The preponderance of youth in the population is also obvious from the fact that three-fourth of the population is less than 35 years in age while very nearly 90% are below 50 years of age. The population of the district is thus youthful as against old, and is therefore likely to be a growing population. Generally the population of the district partakes of, more or less closely, the pattern disclosed by the age-data of the State as a whole.

Changes in Age-distribution since 1951 :

Changes in the age-composition of a population, if measured satisfactorily, are indications of the likely trends of its growth. The table inset below gives the percentage distribution of the district's population in 1951 by broad age-groups: the relevant proportions for 1961 are also given in order to focus attention on the changes that have occurred. The 1951 data is based on a 10% sample of the population, and in making the comparison with 1961 census data (based on total population) we are making the assumption that the age-composition in the sample (1951) represents the universe.

TABLE

Percentage distribution of 100 persons in 1951 and 1961 into broad age-groups.

Age-group	1951	1961
1	2	3
0–14	39·4	42·0
15–34	33·3	32·8
35–59	23·0	20·7
60+	4·1	4·5
A.N.S.	0·2	Neg.

Proportion in the youngest ages (0–14) representing childhood and juvenility has increased by 2·6% during the decade. The increase is sizeable and is significant of the arrest of mortality in the younger ages and perhaps of a slightly higher fertility level. The proportion in the age group 15–34, corresponding to youth has registered a trifling decrease, apparently owing to the more than proportionate increase in the youngest ages. There is, however, a significant decline in the middle-aged age group 35–59, all of which cannot be ascribed to the more than proportionate increase in the lower extreme of ages. Whereas higher mortality in the age-cohort '25–49' of 1951 of which they are the survivors may not be ruled out, the more probable cause seems to be emigration of persons in the concerned age-group to adjacent or even remote districts in search of livelihood. Being a district singularly unfortunate in respect of industrial development and having no scope for feeding more persons from agriculture, the district is known in the past to have sent emigrants to other districts. Seasonal migration of harvestors is well-known even in these days.

Persons in the older ages have somewhat improved in proportion, indicating greater longevity in their case.

Sex Ratio :

Sex–ratio is an index number employed to measure the difference in the numbers between the sexes, because contrary to general expectations that males and females exist in equal numbers in the population, the population of the two sexes varies not only over time but also from place to place. In the district as a whole, sex ratio, or the number of females per thousand males was 987 in 1961, comparing with a smaller number 953 for the State as a whole. The lowest value 947 for the ratio was in Teonthar tahsil. In Huzur tahsil the sex–ratio is 967. In the remaining two tahsils, the sex-ratio has almost equal value; 1,013 in Sirmour and 1,014 in Mauganj tahsil.

In general in urban areas, sex–ratio shows a deficiency of females, and such deficiency goes on increasing with increase in urban population. In rural areas, on the other hand, the sex ratio tends towards a parity of the sexes. Thus, for the rural areas of the district, the ratio has the value 1,002, which is very near an equality of the sexes. The sex-ratio in urban areas of the district has the low value of 765. The high female deficiency in urban areas is not difficult to understand. It arises mainly by migration of people who go there in search of employment. This migration is, to begin with, only of men, and there is considerable time lag before women go and settle with their menfolk. Hence, as long as a town continues to grow, its sex–ratio has a tendency to decline. In Huzur tahsil, in rural areas of which sex-ratio has the high value of 1,021, the sex–ratio is pulled down on account of Rewa town, which recorded a high increase of 45·4% during 1951–61. Mainly as a consequence of this high increase, its sex–ratio dropped from 873 in 1951 to 765 in 1961. Another feature peculiar to sex–ratio in rural areas of the district is that whereas the three plateau tahsils Huzur, Sirmour and Mauganj exhibit a surplus of females, the low-lying tahsil Teonthar has the lowest sex–ratio showing a considerable female deficiency. The demographic reason for this is not apparent.

It is interesting to examine how sex-ratio in the district has changed over time during past six decades. The following table, accordingly, gives the values of the sex-ratio in the district for the past six censuses. Corresponding figures for the State as a whole are also given to focus attention on variations, if any, in the sex-ratio pattern.

Sex Ratio 1901—61

Year	Rewa district	Madhya Pradesh
1	2	3
1901	1,014	990
1911	1,012	986
1921	1,012	974
1931	992	973
1941	996	970
1951	979	967
1961	987	953

This table at once brings out the difference in the variation in sex-ratio in the district and in the State during the past sixty years. In the latter, the sex-ratio has been more or less steadily falling from decade to decade. This is not so in case of the district. Starting with a small surplus of females in 1901, sex-ratio in the district more or less stayed constant during the first twenty years. The decade 1921-31 did not witness much change in the sex-ratio of the State, but during this decade the sex-ratio of the district registered a decline of 20, which converted the small feminine surplus into a small deficit. In the next decade also, whereas the sex-ratio in the State registered a very small fall, that in the district registered a small increase. Decade 1941-51 again witnesses a sizeable drop in the sex-ratio of the district, comparing with only a small drop in case of the State. During the decade just gone by, the district again behaved contrary to the State trend in respect of sex-ratio change. Thus, when the State recorded a sizeable drop in sex-ratio, the district registered a significant rise. This suggests perhaps male emigration from the district, presumably after the formation of new Madhya Pradesh, in search of employment. As an overall picture, during the sixty years 1901-61 the sex-ratio in the district has fallen by 27, as against a drop of 37 recorded by the State as a whole.

Sex Ratio by Age-Groups :

In the lowest age-group 0-4, the sex-ratio shows a slight excess of females. This does not mean that more females than males are born in the district. On the other hand, it is more or less a settled fact that nature is slightly partial to the male sex in the matter of birth, but the imbalance that results from this partiality is soon levelled off by greater male than female deaths during the first year of existence. The male child is constitutionally weaker than its female counterpart, and dies in greater numbers. This fact perhaps explains the greater number of females in the youngest age-group inspite of the fact that the female child is generally neglected owing to the prevailing social attitudes. The effect of the continuous neglect to which the female child is subject manifests itself in the higher age-groups where the sex-ratio shows a deficit of females. In the broader age-group 0-14, females are outnumbered by males, there being only 17 females for every 18 males.

Three sub-age groups of the wider age-group 15-34 show a female excess in the sex-ratio, but the wider age-group itself exhibits a slight feminine deficit. The feminine excess in the ages 20-24, 25-29 and 30-34 suggests, emigration of males in these ages, a fact which also seems to be probable from the variation in the age-composition of the district. The middle age segment, however, clearly shows a decline in masculinity not only in majority of the sub-age groups constituting it, but in the wider age-group itself. This suggests comparatively greater mortality in the male than in the female sex, a thing rendered plausible because the brunt of maintaining the family during this crucial age of life falls on the male, with the attendant stresses and strains and all these must militate against the male health. Partly this also suggests male emigration, perhaps in search of livelihood.

The oldest age-group, of course, exhibits a considerable female excess. This phenomenon is almost universal, explained partly by the fact that the females who survive to ages beyond 60 represent that sturdier section of their sex that has successfully withstood the onslaught of improvident maternity; partly it is also explained by the fact already adverted to earlier of the male being subjected to various stresses and strains, necessary concomitants of bread-winning for the family.

Age and Marital Status :

The table next following gives the marital status by sex of the population of the district for 1961 :—

XLIX

MARITAL STATUS

Marital Status of 100 Males and Females by age

Age-groups	Total		Never Married		Married		Widowed		Divorced or Separated		Unsepecified Status

A.N.S.	100	100	56·67	86·75	28·33	9·64	3·33	1·21	...	1·20	11·67	1·20

Only 44 males and 36 females out of every 100 males and 100 females in the district are returned as never-married. The proportion of married males and females respectively in the age-group (0–14) of persons who may not legally be married is 12 and 15 per cent. This obviously points to the prevalence, on an alarming scale, of child marriages. In the age-group 10–14 as many as 41% of boys and 58% of girls are married. The table apparently shows that marriages of very small children are entirely absent in the comparatively tender ages 0–9. This impression, however, does not seem to be correct. The absence of any return in 0-9 ages was owing to the tabulation instruction to treat all persons in the age-group 0–9 as never-married. Whereas, in case of majority of the districts, the instruction did not materially alter the results, it appears that in case of Rewa district, it has possibly distorted the picture to some extent. The high percentage of married persons in the age-group 10–14 does point to the possibility of prevalence of child-marriages in the ages below 10 also. The number of never married persons starts with a peak value at the lower extreme of the age table and goes on successively decreasing with increasing age. Number of never-married males is one in three in the age-group 15-19, while in the next higher age-group it sharply falls to one in six. In the age-group 25-29, the proportion of never-married males is roughly 1 in 12. A very significant feature of the table is that the proportion of never-married males never drops down to negligible dimensions. Roughly one out of 20 persons remains unmarried in all the age-groups after age-group 25-29.

In case of females, the proportion of married and widowed females is as high as 58% even in the younger age-group 10–14. Hardly one in every five girls remains unmarried between 15 and 19 years of age; while beyond 18 years, the proportions of unmarried females sinks to negligible dimensions. The evidence before us thus points to the prevalence on a shocking scale of child marriages both in case of boys and girls, but in case of the latter the proportion is alarmingly high

Widowed Persons :

The number of widowed persons goes on progressively increasing with increase in age, the increase being steeper in case of females than males. The relative numerousness of widowers and widows in the age-group 30–34 may be seen from the fact that one out of every 25 males is a widower while 1 out of every 12 females is a widow. In the next higher age-group 35–39 which marks the approach of middle age, widowers are 6% as

against 15% widows. One out of every ten males, and one out of every four females in the ages 40–44, have lost their spouses. As one approaches higher rungs of the age-ladder, one finds more and more females leading a life of widowhood. Thus, more than half of the females in the age-group 50–54 are widows, and almost the same proportion continues at the closing years of middle age. Beyond sixty years, the proportion of widows is more than 70%. The proportion of widowed males, however, does not exceed one in three even in the age-group 65–69. This fact clearly brings out the comparatively greater longevity of members of the fairer sex, a fact which has already been observed in connection with the sex-wise age-distribution earlier.

In the population as a whole, widowers number roughly 1 in 20 among males, while widows are as many as 1 in 8. The higher frequency of widows in the population is obviously a result of the traditional disparity in the ages of husband and wife, the latter being about 5 to 10 years younger, and to greater mortality with increasing age.

The proportion of divorced and separated persons is very small both in case of males and females.

Mother Tongues :

As many as forty-one speeches have been returned as mother-tongue from the district. This would give the impression that the district is a veritable 'babel of tongues'. Even a cursory examination of table C-V will, however, show that nothing could be farther from the truth than this. Two languages, namely Baghelkhandi and Hindi claim as many as 98·8% of all speakers. Together with Urdu, which is spoken by 0·5% of the population as mother-tongue, and Sindhi spoken by 0·3%, these languages account for 99·6% of the population. In other words, the remaining thirty-seven languages put together can claim to be the mother-tongues of only 0·4% of the population. Of these thirty-seven languages; two, that is Marathi and Satnami have more than 500 but less than 1,000 speakers each; another two, Punjabi and Awadhi between 400 and 500 speakers each; two, Bengali and Malayalam between 200 and 300 speakers each; Bundelkhandi and Telugu between 100 and 200 speakers each and the remaining twenty-nine less than 100 speakers each.

Baghelkhandi which, claiming 61·8% speakers, is the most widely spoken mother-tongue in the district, is a dialect of Hindi spoken in the region to the east of river Ken, known as Baghelkhand from its rulers who belonged to Baghel clan. In fact, most of the 36·9% of the population who have returned the main language Hindi as their mother-tongue, have presumably the Baghelkhandi dialect as their mother-tongue. It is interesting that more than seven-tenth of the population of Rewa town has returned Hindi as mother-tongue. Rewa town has returned only 196 persons as Baghelkhandi speakers. In Huzur tahsil (rural)—as also urban—Hindi is the most widely spoken mother tongue while in the rural areas of the other three tahsils it yields the first place to its dialect Baghelkhandi.

Urdu, returned as the third most widely spoken mother-tongue in the district is confined mostly to Rewa town, there being only 201 Urdu speakers in rural areas of the district. Sindhi, which comes next to Urdu as regards its number of speakers, also is confined to urban areas. The same is the case with Malyalam, Punjabi, Marathi, Bengali and Telugu languages, speakers whereof are confined mostly to urban areas and perhaps represent migrant elements.

It may also be observed that all speakers of Satnami mother-tongue and about nine-tenths of Awadhi are confined to rural areas of Teonthar tahsil, which adjoins Allahabad district of Uttar Pradesh.

Religion :

Table inset below shows the religious distribution of the population in the district separately for total, rural and urban areas in 1951 and 1961.

TABLE

Distribution of 100 persons in total, rural and urban areas of the district by religion–1951 and 1961.

Total Rural Urban	Total Population	POPULATION OF Hindu 1951	Hindu 61	Muslim 1951	Muslim 61	Sikh 1951	Sikh 61	Jain 1951	Jain 61	Christian 1951	Christian 61	Budhist 1951	Budhist 61
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Total	100	97·6	97·1	2·4	2·8	Neg.	Neg.	Neg.	Neg.	Neg.	Neg.	Neg.	Neg.
Rural	100	N.A.	98·0	N.A.	2·0	N.A.	Neg.	N.A.	Neg.	N.A.	Neg.	N.A.	Neg.
Urban	100	N.A.	81·0	N.A.	17·5	N.A.	0·5	N.A.	0·4	N.A.	0·6	N.A.	Neg.

Hinduism is the religion professed by all but 3 of every 100 persons in the district. In the rural areas, the number of non-Hindus reduces to 2 in 100. In Rewa town, Hindus roughly constitute four-fifth of the population. Next to Hindus in numerical strength, though hardly significant in absolute proportion, are Muslims who form 2·8% of the district's total population. In rural areas of the district their proportion shrinks to 2%, but in Rewa town they reach the sizeable proportion of 17·5%.

Other religions, combined, constitute only 0·1% of the district's total population; individually the proportions are negligible (i.e. less than 0·5%) in total and

rural areas of the district, but assume some significance in urban areas, where they together constitute 1·5%, Sikhs form 0·5%, Jains 0·4% and Christians 0·6% of the population in urban areas.

Over the decade, Hindus have lost in proportion by 0·5%. The gainers are Muslims (0·4%) and other religions (0·1%).

Scheduled Castes :

Scheduled castes constitute 12·1% of the population. The scheduling extends to the whole district and comprised 19 castes, of which all but 6 have been returned from the district. The scheduled castes are concentrated in the rural areas of the district to the extent of 97·5% of their total population. Their population is distributed over the tahsils as follows :— Teonthar (20·2%), Sirmour (25%), Mauganj (32%), and Huzur (22·8%). Chamar also known as Ahirwar or Chamar-Magan, Mochi or Raidas is the most numerous scheduled caste. It accounts for 78% of all scheduled caste, in the district. Kumhar (11·7%), Basor (5·9%) and Mehtar (1%) are other important castes in the district. As many as 1·3% of the scheduled caste population was unclassified. The remaining 2·1% consisted of other castes.

The progress of education in the scheduled castes is very depressing. Percentage of literacy is 2·6%, in females the percentage is as low as 0·3%. Most of the literates are without educational level. The proportion of persons who have passed primary or junior basic or higher examinations is 0·7%. Only 23 males have been returned matriculates, while one Chamar from Rewa town is returned as graduate.

The participation rate is 59·6% which is higher than the rate for the general population. This is due to the high participation rate (56·7%) for women. The working population is over-whelmingly in agriculture, 79·2% of the working force is in agriculture i.e., categories I and II. Of these only 17·3% are cultivators, while 61·9% are agricultural labourers. This points to the magnitude of landlessness in the ranks of the scheduled castes. Household industry, (13·5%) is the second most important sector of industry for the scheduled castes. Most of the persons engaged in household industry are from the Chamar (traditional industry shoe-making), Kumhar (traditional industry pottery) and Basor or Bansphor (traditional industry making of bamboo artifacts) castes.

Chamar :

Constituting 78% of the total scheduled caste population of the district, this is the most numerous scheduled caste in the district. 89·9% or roughly 9 out of every 10 workers in the caste are engaged in agriculture. The backward state of their economy or their land hunger is apparent from the fact that 73·4% of the workers are agricultural labourers, who have either no land or not enough land to support them. Any plan by way of rehabilitating the caste should not fail to take note of this unusually large proportion of landless agriculturists in the caste. Surprisingly enough, shoe-making and tanning of leather, the traditional household industry of the caste gives principal work to 3·3% of the workers only. Other services, accounting for the principal employment of 2·9% of workers is next to household industry in the economy of the caste. The remaining 3·9% of the workers are diffused over the other categories. 2·7% of the population is literate; of the 24 persons in all scheduled castes who are matriculates and above all but 5 come from this caste.

Kumhar :

Next to the Chamar caste in numerical strength, the caste differs from others in that its economy is not overwhelmingly agriculture dominated as is found in case of the other castes. Agriculture is the principal economic activity of only 54·7% of the workers. Having only 21·3% of the workers in category II, landlessness in the caste does not have alarming proportion. Household industry, accounting for 41·1% of the workers in the caste is its next important economic activity. The household industry traditionally associated with the caste is making of earthen utensils. Percentage of literacy in the caste is only 2·3%.

Basor :

This caste makes 5·9% of all scheduled castes in the district. Percentage of literacy in the caste is only 1·9, which is approximately half of the percentage in case of Chamar or Kumhar castes. Agriculture does not dominate the economy of the caste, employment in it being as small as 7·3% of the working force. Household industry, which in the case of this caste is making of bamboo articles, gives principal work to 89·0% of the workers, and dominates the economy of the caste.

Scheduled Tribes :

Scheduled tribes, concentrated to the extent of 99·5% in rural areas, form 13·3% of the total population of the district. Distribution of the tribal population among the tahsils of the district is : Teonthar (28·8%), Sirmour (23·0%), Mauganj (28.0%) and Huzur (20·2%). Kols (92·5%) constitute the overwhelming majority of the tribal population and with Gond(5·2%)they account for all but 2·3% of the scheduled tribal population in the district. As large a proportion as 1·3 of the Scheduled tribal population is unclassified, so that classified tribes other than Gond and Kol make only 1% of the total scheduled tribes population of the district. These are (with their population given in brackets) Baiga (285),Agaria (2), Bhumia including Bharia and Paliha (5), Biar or Biyar (4), Khairwar including Konder (243) ; Nat (436) ; Panika (54), Sahariya (4) and Sonr (13). With only 1·2% of the population having claims to literacy (comparing with 14·9% for the general population), the deplorable backwardness of the tribe in respect of education is clear. Female literacy is as low as 0·14%.

Participation rate is 64·2% which is very much on the higher side. Economy with 92·6% of the working force in agricultural sector, is preponderatingly agricultural. Perplexing feature of this, however, is the huge proportion of agricultural labourers who form 86·3% of the workers in agriculture. Most of these are landless

labourers. In fact scheduled tribes in the district contribute 44·7% of the agricultural labourers in the district (Scheduled castes and scheduled tribes together make 73·8% of the district's working force in agricultural labour). Category III, which in the case of tribals is presumably forestry and livestock, occupies the next important place in the tribal economy of the district, accounting for 4·0% of the working force. 2·7% of the workers are in 'other services'; other activities, employing together 0·8% of the workers are of little importance in the economy of the tribals.

Kols :

As observed earlier, Kols (92·5%) overwhelm other tribes in numerical strength. They are represented more or less evenly in all the tahsils. C.S. Venkatachar, Superintendent of Census Operations, Central India Agency observes in the 1931* Census Report that "There is good reason to assume that the Kols were the dominant race in Rewa and even in the northern areas upto the Gangetic valley". According to him, the "Kol is now a degraded serf all over the State". Even to the present day, 84·3% or more than four-fifths of Kol workers are engaged in agricultural labour. This points to the pitiable state of this predominantly agricultural caste, and the magnitude of the problem of rehabilitating them. 8·4% of the Kol working force cultivate on its own account either on owned or tenanted lands. Agriculture thus accounts for more than nine-tenths of Kol workers. Next in importance in Kol economy is category III—presumably forestry—accounting for 3·8% of their working force. 'Other services' give principal work to 2·8% of the Kol workers. Other categories thus absorb only 0·7% of the Kol working force. Literacy in the tribe is 1·1%.

Gond :

Forming 5·2% of the scheduled tribes population, the Gonds are second in numerical strength in the district. Unlike the Kol who are more or less evenly dispersed in all the tahsils; the Gond are concentrated (91%) in the Mauganj tahsil. Agriculture is the mainstay of their economy, accounting for 91·0% of the workers. But, unlike Kols, the Gonds are mostly cultivators in their own right, the proportion of workers in category I being 78·5% of all workers. They are by degrees better than the Kols in education and claim a literacy percentage of 3·7%.

Literacy and Education :

With a literacy percentage of 14·9%, comparing with a State rate of 17·1% and the national average of 24·0%, Rewa district is certainly lagging behind in the march of education. Among districts of the State, it occupies the low 25th rank in respect of education and literacy. Indore district, which leads the State in education and literacy, has a literacy rate of 38·2%, that is, its literacy rate is more than $2\frac{1}{2}$ times as great as that of Rewa district. Rewa, however, leads in the districts of the former Vindhya Pradesh region, where only Satna district has a higher percentage of literacy than Rewa.

Separately for rural and urban areas of the district, the percentage of literacy is 13·1 and 45·0 respectively comparing with 12·7 and 43·5 percent in case of the State as a whole. Obviously, therefore, the proportion of literate and educated in the State is pushed up owing to its containing a higher proportion of urban population than Rewa district, which scores over the State individually in rural and urban literacy.

Percentage of literacy is higher (26%) among males and the general percentage is brought down by the very low percentage 3·6% among women. In the State as a whole, sexwise percentage of literacy is : males 27% and females 6·7%. Thus, while the district is more or less on par with the State as a whole as regards male literacy, it is considerably behind in female education. Among causes of the low literacy rate in the district, a very important one is the very low levels—shockingly low—of literacy in the scheduled castes and scheduled tribes population which together account for a little more than one-fourth of the total population.

The table inset below shows the percentage of literacy in the tahsils separately for total, rural and urban areas of the tahsils, and for males and females.

	Percentage of literate and educated						
	Persons			Males		Females	
District/Tahsil	T	R	U	T	R	T	R
1	2	3	4	5	6	7	8
Rewa district	14·9	13·1	45·0	26·0	23·8	3·6	2·5
Teonthar tahsil	12·9	12·9	...	22·8	22·8	2·5	2·5
Sirmour tahsil	15·3	15·3	...	27·7	27·7	3·1	3·1
Mauganj tahsil	11·5	11·5	...	21·4	21·4	1·8	1·8
Huzur tahsil	18·9	12·8	45·0	30·9	23·2	6·4	2·6

*Page 218, Census of India, 1931, Central India Agency, Part I-Report.

Huzur tahsil leads among the tahsils in literacy and education. This is because of its higher urban population, which is more alive to the need of education, and also, where greater facilities are available. In rural areas only, Huzur tahsil is behind Teonthar and Sirmour tahsils, the last mentioned being the first in the district in education and literacy.

64·4% of all literate and educated persons in the district do not possess any educational levels, comparing with 71·9% in case of the State as a whole. These include persons who may have had some formal schooling but who have not passed the primary or junior basic level examination. Persons who have passed primary or junior basic level examination add upto 28·1% of all literate and educated, which is distinctly higher than the State proportion of 21·9%. These include also those literate and educated persons who might have received higher than primary level education but who could not pass the matric or higher secondary examination. Persons who have passed matriculation or higher examination number 7·6% of all literate and educated persons. In the State as a whole, persons with this educational level make 6·2% of all literate and educated.

Growth of Educational Institutions :

The progess in education and literacy achieved by the district during the last ten years has been a result of the fast growth of educational institutions in the district. During the intercensal decade, the number of primary schools has more than doubled, while the number of scholars has almost trebled. In case of female scholars, the number has multiplied six-fold since 1951. In 1960, there was on an average one primary school for every three villages in the district, serving on an average 3·2 square miles of area. The number of teachers has also increased by about four times since 1951. Table 5·1 in part II of the Handbook shows that growth of primary schools in the district was rapid from and after the year 1955. That may be one reason why, after all this expansion of schools, the percentage of literacy remains comparatively low in the district.

In 1951, the district had 44 middle schools, which increased to 59 in 1960. The increase was very impressive in the case of higher secondary schools, which increased from 3 in 1951 to 17 in 1960. The number of male scholars in high schools has grown about seven times, but there has been practically no increase in the number of female scholars. This means that the attitude regarding giving of higher education to girls probably is not changing in the desired manner and this should get urgent attention of the society in the present decade. The number of teachers in higher secondary schools has increased about six fold since 1951.

As regards higher collegiate and technical education also the district has made considerable advancement. It had only one college in 1950-51, but has as many as five in 1961. A girls' degree college was started from 1961. The Venkat Sanskrit College imparts education upto intermediate. It was started in 1955-56. The year 1958-59 saw the addition of two technical and professional colleges. By the time this book was sent to the press (1965), the district has a medical college, as well as a Sainik School. The latter imparts military education to young boys with a view to prepare them for training in the National Defence Academy.

Medical and Public Health :

Tables 6A·1 to 6B·2 in Part II of the Handbook present data bearing on the public health of the district. It appears from Table 6A·1 that Rewa district had four primary health centres, with a total bed capacity of 32 in the year 1960. By 1960, as may be seen from table 4·1, Rewa had seven community development blocks so that three blocks did not have a primary health centre till 1960. Besides the primary health centres, the district also had two hospitals in 1960 having 32 beds, 2 dispensaries and four maternity and child-welfare centres. The District Medical Officer has not furnished any information regarding registered medical practitioners in the district or regarding ayurvedic or homeopathic dispensaries. The returns furnished by the Civil Surgeon are obviously incomplete and do not depict a correct picture of the state of medical and public health in the disrict. Fortunately, we have in Table B—V of the Handtook some valuable material bearing on the public health of the district, some analysis of which is, therefore, worth attempting. This table tells us that at time of census, Rewa district had returned 109 persons in occupational group '03'—i.e. "physicians, surgeons and dentists". This figure includes physicians in allopathy, ayurved, homeopathy and in certain other unspecified systems of treatment. They may be regarded as giving us the total availability of medical help in the district in 1961. Thus, as a total public health picture, we may say that in 1961 Rewa district had one physician for 7,088 persons; one for 15,522 persons in rural areas and one for 695 persons in urban areas. There is thus a concentration of medical services in the urban areas.

Considering physicians and surgeons in allopathy alone, who are generally technically qualified (whereas in case of ayurvedic and homeopathic systems of treatment, self-taught persons who do not hold certificates from recognised institutions also practise) and who seem to matter most in the public mind, it appears from table B-V that Rewa district had 46 such physicians and surgeons, all in category IX. Of these 32 were in the urban areas and only 14 in the rural areas. There is thus one physician in allopathy for 16,796 of the general population. The uneven or lopsided distribution of medical help over rural and urban areas follows from the fact that roughly more than two-thirds of the doctors are concentrated in urban areas which contain only 5.6% of the district's population. In other words, while there is one doctor in allopathy for 1,346 urban population, there is one such doctor for 52,110 rural population; that is, a population which has one doctor in allopathy in rural areas,has about 39 such doctors in urban areas. Rural population of Rewa

district is not as well served by allopathic medical help as the rural population of the State as a whole which has one doctor in allopathy for 41,580 persons in the rural population. In respect of urban population, Rewa district with one doctor for 1,346 persons is somewhat better served by allopathic medical help than the urban population of the State as a whole which has one doctor in allopathy for every 1,822 persons.

In respect of ayurvedic medical help, the situation in rural areas is somewhat better, which have three-fifths of the ayurvedic physicians (family 031) returned from the district. There is one physician in ayurved for every 27,020 of the rural population. The backwardness of Rewa district's rural population as compared with rural population of the State as a whole even as regards ayurvedic physicians is clear from the fact that rural areas of the State have one ayurvedic physician for every 11,473 population. Besides this, the district returned four physicians in homeopathy, of whom two were in urban areas. Of the fourteen physicians other than those covered above, ten were in the urban areas and only four in the rural areas.

Regarding medical services other than those rendered by physicians and surgeons, table B-V shows that the district had 447 persons in occupational group '04', "Nurses, pharmacists and other medical and health technicians", of whom 219 were in urban areas. Of these 103 were nurses (102 in urban areas), 38 (11 in urban areas) were midwives and health visitors, 44 (23 in urban areas) were nursing attendants and related workers, 143 (41 in urban areas) pharmacists and pharmaceutical technicians, 21 (9 in urban areas) vaccinators, 57 (17 in urban areas) sanitation technicians.

Vital Statistics :

Vital statistics are available only from the year 1958 onwards, and even these seem to be grossly incomplete as the figures for 1960, give a birth rate of about 3 per thousand whereas the true birth rate as estimated from the number of persons aged '0' in 1961 is more than 39 per thousand. The figures are being published not because they are anywhere near the true picture, but for focussing attention on their incompleteness.

Community Development :

The district was placed on the community development map of the country for the first time in the year 1954, with the inauguration of the Hanumana and Mauganj blocks, both in Mauganj tahsil. The years 1955 and 1956 did not see the addition of any new development blocks in the district, but that was partly made up by the addition, in 1957, of two blocks, Rewa in Rewa tahsil and Teonthar in Teonthar tahsil. Sirmour block in the tahsil of the same name came in 1958. The next to come was Gangeo in Sirmour tahsil in 1960. This was followed by Jawa block in Teonthar tahsil in 1961. The year 1962 saw the addition of two more blocks, Raipur (Gurh) in Huzur tahsil and Naigarhi in Mauganj tahsil, and with these two, the district is now completely covered by the Community Development Programme.

Land Use Pattern :

Table 2 A· 1 in part II of the Handbook gives the pattern of land use in the district for the last 10 years i. e., from 1951-52 to 1960-61. Upto 1952-53, land use figures were available under six separate heads *viz.*, forests, area not available for cultivation, area cultivable, net area sown and current fallows. From the year 1953-54 onwards, "area not available for cultivation" began to be presented under two different sub-heads-'land put to non-agricultural uses' and 'barren and uncultivable land', while what was before given under the single head 'area cultivable' now began to be given under four sub-heads, namely 'cultivable waste', 'fallow lands other than current fallows', 'permanent pastures and grazing lands' and 'land under miscellaneous tree-crops and groves not included in the net area sown'.

The area under forests shows considerable fluctuation from year to year, mostly owing to its apparent (mis) classification with barren and unculturable land. In 1960-61, 'forests' covered 12·7% of the district's total area (according to village papers). About an equal proportion (12·8% in 1960-61) of area is classed as 'area not available for for cultivation', being either 'land put to non-agricultural uses' like house-site, etc. or 'barren and unculturable land'.

6·7% of the district's total area in 1960-61 is shown as 'culturable waste' while 8·1% as 'old fallows'. This 14·8% of the total area indicates the potential for extension of cultivation in the district, though part of it may have to be diverted to 'permanent pastures and grazing lands' which has the pitiably small area of 0 8% under it. Obviously, the cattle must at present be feeding in the area recorded as 'cultivable waste' and 'forests'. The area under 'tree crops not included in net area sown' is 0.9% of the district's total area.

The net area sown in the district has been showing a generally increasing trend since 1951-52. It was 704,996 acres in that year, and had increased to 834,695 acres in 1960-61, an increase of 18·4%. In 1960-61, 'net area' sown constituted more than half (53.7%) of the district's area. Current fallows occupied 4·3% of the total area in that year.

AGRICULTURE :

Soils :

Except in the northern Teonthar tahsil, the soils of the district are of the same character throughout. The two main classes, according to the Settlement Report of 1929, are *sigaon* and *domat*. *Sigaon* (pronounced locally as सिगाँओ *sigaon*) is a pure clay soil in which rice is grown mainly, while *domat* is a mixture of *sigaon* and *mair* or pure black soil. *Mair* is not

found extensively, except in villages towards Gurh in the Huzur tahsil. In all tahsils except Teonthar, *sigaon* soils predominate, but the soil is a great deal lighter. In Teonthar tahsil the clay *sigaon* is conspicuous by its absence and what goes by the name of *sigaon* there is a very sandy, inferior soil. *Domat* in Teonthar tahsil is a mixture of sand and clay. Then in Teonthar tahsil there are large areas of dark soil called *mair* or *matiyar*. Refuse soils in the district are known as *bhatha* or *bharra*,, which are very red poor gravel soils.

Crops :

The tables below gives (i) percentage of area under some important crops to the gross cropped area in the district and in each tahsil for the year 1960–61, (ii) percentage distribution of area under some crops over the tahsils :—

AREA UNDER CROPS IN EACH TAHSIL OF DISTRICT FOR THE YEAR 1960–61

				Area under						
	District/tahsil	Total cropped area	Net area sown	Rice	Wheat	Jowar	Barley	Total cereals and millets	Gram	Tur
	1	2	3	4	5	6	7	8	9	10
	Rewa District	100·0	80·9	25·4	22·2	4·0	3·8	69·3	10·2	4·7
1	Teonthar Tahsil	100·0	80·0	27·4	12·4	7·4	11·9	64·6	13·8	6·5
2	Sirmour Tahsil	100·0	83·8	19.8	25·4	4·6	2·8	67·2	11·3	5·1
3	Mauganj Tahsil	100·0	77·3	31·8	22·1	1·1	1·4	75·5	6·0	3·4
4	Huzur Tahsil	100·0	83·7	20·9	27·7	4·3	0·9	67·4	11·6	4·7

		Area under							
	District/Tahsil	Other pulses except Tur & gram	Total food-grains	Total food-crops	Linseed	Rape and mustard	Seasamum	Total oilseeds	Total non-foodcrops
	1	11	12	13	14	15	16	17	18
	Rewa District	6·1	90·4	90·7	7·7	0·2	1·1	9·0	9·3
1	Teonthar Tahsil	7·9	92·8	93·1	4·1	0·7	1·7	6·7	6·9

Food crops occupy 91% of the gross cropped area of the district, almost all of which is under food-grains. Cereals and millets, of the foodgrains, have the maximum acreage, of 69% of the gross cropped area of the district. The proportion of area under foodgrains is maximum (76%) in Mauganj tahsil and minimum (64.6%) in Teonthar tahsil.

Rice and the millets i.e. *kodon* are the staple crops in *kharif*. The area under rice is a little more than one-fourth of the gross-cropped area in the district, while individually, Mauganj tahsil has as much as 32% of its gross-cropped area under rice. Teonthar is next to Mauganj in respect of area under rice whereas Sirmour and Huzur tahsils have more or less equal proportions of areas under rice. Rice is grown throughout the district on *sigaon* soil. *Kodon* is grown on higher *bhatha* lands. *Juar*, less popular, is grown mostly in Teonthar, Sirmour and Huzur tahsils which have respectively 7.4, 4.6 and 4.3% of their areas under the crop.

Wheat amongst the cereals, gram amongst pulses and linseed amongst oil-seeds are the staple *rabi* crops in the district. Wheat is also grown mixed with gram. Mauganj has 31·5% of the total wheat are a in the district in 1960-61, which is the maximum. Relatively however, Huzur tahsil has the maximum proportion of its area under wheat, Sirmour is second in that respect and Mauganj is third. Teonthar tahsil has only 12·4% of its area under wheat which is less than half of the area under rice in that tahsil. Again in Mauganj and Teonthar tahsil, even combined areas under wheat and gram fall short of the area under rice in these tahsils. Huzur and Sirmour tahsils have more area under wheat than under rice. Thus, as regards even cropping, Huzur and Sirmour show a similarity of pattern. Teonthar and Mauganj also exhibit similarity in respect of wheat and gram, but in respect of *jowar* and barley the similarity ceases. Barley, another cereal, apparently is popular in Teonthar tahsil which accounts for 65% of the area under the crop in the district.

Gram and *tur* are the most widely grown pulses, occupying respectively 10.2 and 4·7 percent area of the district's gross cropped area. They are grown in all the tahsils, the proportions varying not very significantly from tahsil to tahsil except in case of gram, which has a particularly low proportion of area (6%) in Mauganj tahsil.

Oilseeds, covering 9·0% of district's gross cropped area, are important in that they put cash in the hands of the cultivators. Linseed is the most widely grown oilseed, accounting for 8% of the gross-cropped area of the district. Other oilseeds thus together cover approximately 1% of the district's cropped area.

Changes in Acreage since 1951—52 :

Table 2A· 2 in part II gives the area under some important crops in the district. The table at once focusses attention on the sizeable increase in the acreage devoted to wheat in the district In relative terms, this crop has about 58% more area under it in 1960-61 than it had in 1951-52. Relatively the crop occupies 27·4% of the net area sown in 1960-61, whereas in 1951-52 it had occupied only 20 6% of the net area sown. Rice has also improved its acreage since 1951-52, but the increase has been only of the order of 17% in absolute terms since 1951-52. Jowar has increased its acreage though very slightly since 1951-52 The acreage under oilseeds has also improved, but increase has not been as impressive as in case of wheat or paddy.

Double-cropped area has also increased conspicuously during the last ten years. In absolute terms, the increase in acreage has been of the order of 64.2% of the double cropped area of 1951-52. Relatively, from 17.0% of the net area sown in 1951-52, double cropped area has now increased to 23·6% of the net area sown in 1960-61. In fact, the impressive increase under the food-crops, and the net area sown has been made possible mainly on account of the sizeable increase in area sown more than once.

Irrigation :

Area under irrigation is at present of no consequence, being only 0·2% of the net sown area in 1960-61. Irrigation is mostly by wells. Two medium irrigation projects, namely the Baisa Weir in Huzur tahsil, and Loni dam in Teonthar tahsil are under construction, and these when completed will irrigate about 6,000 acres. A somewhat bigger scheme estimated to result in the irrigation of about 19,000 acres is the Grama

nullah scheme in Mauganj tahsil. This was not even in the survey stage till 1961.

ECONOMY :

Workers and Non-Workers :

The table below gives a distribution of population into the nine categories of workers and non-workers, separately for the district and each tahsil. Corresponding figures for the State as a whole are also given for comparison.

TABLE

Distribution of 1,000 persons in the district and in each tahsil into the nine categories of workers and non-workers, 1961

District/Tahsil	Workers	CATEGORIES									Non-Workers
	I–IX	I	II	III	IV	V	VI	VII	VIII	IX	
1	2	3	4	5	6	7	8	9	10	11	12
Rewa District	498	264	153	16	25	2	2	9	2	25	502
Teonthar Tahsil	515	272	184	12	21	Neg	2	8	1	15	485
Sirmour Tahsil	486	268	161	9	26	Neg	Neg	6	Neg	16	514
Mauganj Tahsil	534	314	156	18	22	Neg.	1	8	1	14	466
Huzur Tahsil	462	208	123	22	30	7	5	14	5	48	538
M. P. State	523	328	87	15	26	10	5	13	5	34	477

The participation rate i. e., proportion of workers to total population (49.8%) for the district is somewhat lower than the State average (52.3%). The lower rate for the district is ascribable to the lower participation in the working force by women (41·3% as against 44% for the State), owing-among other things-perhaps to rigidity of social inhibitions amongst the non-tribal population the difference being more pronounced in rural areas (participation by women is 42.7% in rural areas of the district as against 48.6% in rural areas of the State as a whole). A higher participation rate, or what is the same thing, a lower dependency ratio, is more often than not an index of economic backwardness (in areas of low productivity), a fact which is apparent from the observed lower participation rates or greater dependency ratios for urban areas. Within the district this observation seems to be borne out from the fact that Huzur tahsil containing the only town in the district has the lowest participation rate (46.2%); and the maximum dependency ratio (53.8%); while Mauganj, apparently the most backward tahsil has the maximum participation rate (53.4%) and the minimum dependency ratio (46.6%). Sirmour tahsil which, as we have seen has comparatively the maximum population living in bigger villages which are more exposed to urban influences is next to Huzur tahsil in respect of lowness of participation rate.

Unemployment :

Table B–IX in the body of the Handbook gives details of all non-workers by sex and age- groups in different categories. Not all of these persons can be regarded as swelling the ranks of unemployed in the district, or of potential job-seekers. Columns 18 to 21 of the table are of considerable interest as they disclose number of persons who are seeking employment. Such persons are only 0·1% of all non-workers, and this small proportion would tend to paint a rosy picture of the state of employment problem in the district. The truth, however, is far from it. The figures in columns 18 to 21 of the table do not represent the correct state of affairs for a variety of reasons; one of these is that the questions relating to unemployment in the enumeration schedule might not have evoked correct answers from the respondents partly because of the reluctance of the respondents to disclose their state of unemployment. Then most of the students in ages beyond 15 are potential entrants to the labour market, and should be taken note of as unemployed. In fact, one should treat all persons in the age-group 15–59 except men and women engaged in household duties and inmates of penal and mental institutions as persons for whom jobs have got to be found. This leaves roughly 20,000 persons, who on the census day were fit enough to work forthwith or in the near future (in case of some students) and for whom jobs had to be found. This number comes to roughly 22% of all non-workers in the working age-group (15–59) and may roughly be taken to be an index of unemployment in the district. I have, in the above line of reasoning, not taken note of the vast army of underemployed persons in the district who have been returned as workers on account of the somewhat liberal definition of 'work' at the 1961 census.

WORKERS :

Distribution of working force by industrial Category :

The table given below gives a distribution of workers in the district and in each tahsil into the nine categories of workers :

TABLE

Distribution of 100 workers in the district and in each tahsil into the nine categories of workers—1961

District/Tahsil	Total workers	CATEGORIES								
		I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10	11
Rewa District	100	53·0	30·7	3·2	5·1	0·4	0·4	1·9	0·3	5·0
Teonthar Tahsil	100	52·8	35·7	2·3	4·1	Neg	0·4	1·5	0·2	3·0
Sirmour Tahsil	100	55·2	33·0	1·8	5·3	Neg	Neg	1·4	Neg	3·3
Mauganj Tahsil	100	58·8	29·2	3·4	4·1	Neg	0·1	1·6	0·1	2·6
Huzur Tahsil	100	45·0	26·7	4·8	6·6	1·4	1·1	3·1	1·0	10·3

With 83·7% of its working force in the agricultural sector, the district has a predominantly agricultural economic base. The base is distinctly broader than that for the State as a whole (79%). The three entirely rural tahsils, to wit, Teonthar, Sirmour, and Mauganj have very nearly equal dependence on agriculture, while the urban Huzur tahsil has clearly less dependence on agriculture.

An important feature of the economy of the district and each tahsil is the rather large proportion of workers in category II i. e., agricultural labourers. This is 30·7% for the district comparing with 16·6% for the State as a whole. Most of the agricultural labourers belong to the ranks of landless agriculturists, or own only a pittance in the name of land. A considerable proportion of them do not have any gainful employment during the slack season. The economic rehabilitation of these persons and the optimum exploitation of their manpower is one of the major problems our development and welfare oriented administration may have to tackle in the district in the years to come. The proportion of agricultural labourers is more in Teonthar and Sirmour tahsils.

Household industry (category IV) and 'other services' (category IX) appear to be sectors of economic activity next in importance to agriculture in the district. Each of them accounts for 5% of the working force : but whereas the first is more or less evenly dispersed in the tahsils, the latter shows a concentration in the urban Huzur tahsil. Employment in 'other services' may also be considered as providing a rough index of the degree of urbanisation or acquisition of urban characteristics. Thus, it may be noted that as regards employment in category IX, Sirmour tahsil which contains maximum proportion of bigger villages (having greater susceptibility to acquiring urban attitudes) is next to Huzur tahsil.

Important household industries in the district, in the descending order of number of persons employed in each, are : manufacture of bamboo artifacts (traditionally associated with the Basor or Bansfor caste), making biris, manufacture of earthenwares (traditionally the industry of the Kumhar caste), production of edible oils (traditionally carried on by the Teli caste); currying and tanning of hides and skins and manufacture of shoes etc. (traditional industry of the Chamar caste), manufacture of gold and silver articles (traditionally associated with Sunar caste), manufacture of structural wooden goods and agricultural implements (traditional industry of Badhai caste); making of textile garments, etc.

Next to household industry and other services, the largest proportion of workers is in category III. These are mostly in minor group '040',(production and rearing of livestock mainly for milk and animal power). The industrial backwardness of the district is manifest from the negligible proportion of workers in category V (i.e., manufacturing) in three tahsils and very small proportion in the fourth tahsil. Categories VI (construction), VII (trade and commerce) and VIII (transport, storage and communications) also absorb very small proportions of workers.

Household Economy :

For some purposes, the economy can better be studied by treating the household itself as a unit rather than the individual. Agriculture and household industry are such economic activities, in which, particularly in rural areas, the entire household is engaged as a unit and individuals, if any, working outside do so more with a view to supplement the income accruing from the household activity. Tables B–X to B–XVII of the Census Handbook therefore deal with the economy treating the household itself as the unit. These tables are prepared from a 20% sample of the households that were enumerated at the census, and in respect of each of which a separate schedule was filled. Since this sample was selected in a random manner, and can undoubtedly be treated as a large sample, the results derived from it may without sensible error be extended to the entire universe of households in the district. Since household as a unit of economy is important in rural areas, the analysis below is restricted only to the rural areas of the district.

Table B–X of the Handbook gives us a simple basic distribution of the sample households by the two principal economic activities namely household

cultivation and household industry and their combinations. Of the 29,421 rural sample households in the district, a little more than one-fourth (28·6%) are engaged neither in household cultivation nor in household industry. About three-fifths (61·9%) of the households are engaged in household cultivation only, 3.4% in household industry only and 6·1% in both household industry and household cultivation. Thus 68% of the rural households are engaged in household cultivation, with or without household industry, and 9·5% are engaged in household industry with or without household cultivation.

Table B-XI gives us information on two important aspects of cultivation namely prevalence of sub-tenures or absentee-landlordism and fragmentation of holdings as regards the total size of each cultivated holding. As regards the first, evidence before us shows that only 63.9% of the cultivating rural households were owners of the complete holdings cultivated by them. About one-eighth (13.1%) cultivate holdings which do not belong to them but which they hold from private persons for payment in money, kind or share. The remaining 22.9% of the cultivating households cultivate holdings which only partly belong to them, and partly have been taken from other persons on lease. Thus, more than one-third (36%) of the cultivating households are either full sub-tenants of other holders, or have a part of their holding on sub-lease from others. This proportion therefore indicates the extent of absentee-landlordism still prevailing in the district and shows that the extent of sub-tenancy holdings in the district is considerable.

As regards fragmentation of holdings, the table inset below gives the proportion of households cultivating holdings of given sizes to total cultivating households, and the proportions cultivating holdings below a given size.

TABLE

Proportion of households cultivating holdings of given sizes to all cultivating households.

Size†	Percentage of households cultivating holding of size given in col. 1 to all cultivating households.	Percentage of households cultivating holdings smaller than the upper limit in col.1
1	2	3
Below 1 acre	8·7	8·7
1·0– 2·5	14·3	23·0
2·5– 5·0	17·4	40·4
5·0– 7·5	16·3	56·7
7·5–10·0	8·1	64·8
10·0–12·5	9·7	74·5
12·5–15·0	3·8	78·3
15·0–30·0	13·9	92·2
30·0–50·0	5·0	97·2
50+	2·8	100·0

†Upper limit of each size-group is excluded from the group.

The table at once focusses attention on the important fact that two-fifths (40·4%) of all cultivating households own fragmentary holdings of less than 5 acres each in size. Roughly one-fourth of all cultivating households possess very small holdings of less than 2·5 acres each, while 8·7% cultivate holdings of less than one acre. There cannot be any doubt that all these 40% households are very badly off agriculturally. About one-sixth (16·3%) of the cultivatiug households are somewhat more fortunate and possess holdings between 5 and 7·5 acres each in size, whereas, about half of this proportion possess holdings varying in size between 7·5 and 10 acres. While the last mentioned households may hope to have some sort of economic viability, the same cannot be said of the households owning between 5 to 7·5 acres of land and numbering about one-sixth of all cultivating households. This is so in view of the poor nature of soils, the absence of irrigation and consequent inability to raise more than one crop in a year, and the archaic techniques of cultivation. Thus, under the present conditions, 64·8% of the cultivating households in rural areas that possess less than 10 acres of land each are not economically well off and must needs look to alternative sources for augmenting the household income.

More than one-sixth (17·7%) of the cultivating households hold between 12·5 and 30 acres in size. These may generally be expected to be somewhat better off in agriculture. 7·8% of the households own more than 30 acres of land each, and though it is not obvious from the table, yet it seems that a considerable proportion of land wealth is concentrated in the hands of these households. This seems to follow from the fact that if the net-sown area of 1960–61 (834,695 acres) were divided equally among all the cultivating households (taken as five times the cultivating households in the sample), each would get about 8·3 acres of land. As it is, however, more than half of the households have less than 7·5 acres of land.

Trade and Commerce :

Workers principally engaged in trade and commerce contribute only 1·9% to the working force of the district. About 8% of these are engaged in wholesale trade, almost entirely in wholesale trading in food-grains (cereals and pulses), in other edible articles, and in textile products. More than nine-tenths of the workers are engaged in retail trading activities, a thing not to be surprised about because the retail trader looks to the direct consumption needs of the community. As is natural, more than half of the retail trade workers are returned from minor group 640 i. e., retail trade in food-grains and other edibles. The other important basic need of the community is cloth, and retail traders dealing in it are the next numerous. Retail traders in tobacco and its products, retail traders in fuel like wood, coal, etc. and retail traders dealing in sweetmeats, cakes, biscuits and other foodstuffs of this type are also more numerous than others. Book-sellers are also quite frequent.

Most of the wholesale import, and the little export trade of the district takes place by road, by means of motor trucks. The retail trade in towns, of course, takes place in regular markets, but in the rural areas, most of the buying and selling is done in the weekly markets. A list of villages, where weekly markets are held is given as Appendix X of the Handbook.

Communications :

Communications in the district are reasonably good. The district is, however, particularly poor in railway communications, with only the Manikpur-Jhansi section of the broad-gauge railway cutting the northern most portions of Teonthar tahsil of the district making dents into Uttar Pradesh territory. Dabhora is the only station of any importance in the district. Nearest railhead for Rewa town is Satna, thirty-three miles to the west. As regards roads, the Jabalpur-Allahabad, and the Jabalpur-Mirzapur roads pass through the district. The two are common upto village Mangawan, after which they get bifurcated, the Allahabad road going towards villages Garh and Suhagi, while the Great Deccan road goes to Mauganj and Hanumana. Both of these are national highways.

Among major district roads are–(i) Rewa-Dabhaura road, which joins Rewa town to rail head Dabhaura in Teonthar tahsil *via* Sirmour, the tahsil headquarters (ii) Sohagi-Teonthar road, (iii) Teonthar-Shankargarh road and (iv) Rewa-Sidhi road. The last mentioned road bifurcates at village Govindgarh into two, one going to Sidhi, and the other going to Shahdol. Besides, there is a net work of fair-weather roads in the district, which are motorable in the open season. Thus as regards road communications, Rewa appears to be better, having connections with all the neighbouring districts by first-class metalled roads. The district has 463 miles of all-weather roads, which break up into 100 miles of national highway, 32 miles of State highway, 50 miles of major district roads and 207 miles of other district roads. Besides the district has 476 miles of forest roads. The district has thus 197 miles of P.W.D. maintained roads per 1,000 square miles of area, which compares with 129 miles in case of the State as a whole. If we include village roads also, the mileage per 1,000 square miles rises to 387 in case of the district and 184 miles in case of the State. Rewa district thus seems to be better served by roads than the State as a whole.

Electrification :

The district is extremely poor in power resources. By March 1961, electricity had reached Rewa town and five villages in the district. Power is supplied from the Satna thermal power station over a local grid. The backwardness of the district in the State context as regards rural electrification is clear from the fact that whereas in the State, electricity has reached 0·5 out of every 100 villages, in Rewa district only 0·2% of the inhabited villages are electrified.

SUMMING UP

Rewa district owed its importance in the past to its being the seat of the Baghel house of kings, who have ruled over the region known after them as Baghelkhand for the past seven centuries. Three of the four tahsils in the district lie on the wide alluvial plateau of the Vindhyas, and the fourth in the basin of the Ganga and Yamuna. The climate of the district is of the extreme type, but the heat is of the clean, dry type. Average annual rainfall is about 40 inches.

The district has an area of 2,428 square miles, which is 1·4% of the area of the State as a whole. The district is, thus much smaller than an average district in the State; in fact it is the 11th smallest district in the State. The area is distributed more or less evenly among the four tahsils, with the biggest Mauganj containng roughly three-tenth and the smallest Huzur containing about one-fifth of it. Teonthar, with almost one-fourth, and Sirmour closely following it with 24%, of the district's area represent the average position.

Distribution of population also does not suffer from sizeable lopsidedness, with the most populous Huzur containing three-tenths, and the least populous Teonthar containing about one-fifth of the district's population. The concentration of population in the Huzur tahsil is partly due to its containing Rewa, the only town in the district. With 318 persons on an average per square mile, the district is one of the most densely populated, ranking fifth in the State. In case of density of population in rural areas, it ascends to the second rank in the State, the first being Bhind district. This denseness of population in the district seems in no small measure, to be due to historical reasons, because of the settlement of many clans and tribes that were driven away from their original homes in the Uttar Pradesh, one of the most densely populated states in the country. Rewa, consisting of a wide alluvial plain, offered more fascination to the immigrants than the surrounding wooded tracts. Huzur and Sirmour with 443 and 323 persons to a square mile, are more densely populated than Mauganj and Teonthar tahsils which have respectively 290 and 242 persons to a square mile.

Three out of the four tahsils in the district are entirely rural. Rewa town, headquarters of the district is the only town in it, accounting for 5.6% of the district's and 18·9% of the population of Huzur tahsil in which it is situated. Apparently the district is much less urbanised than the State as a whole, whose population includes a much bigger urban component of 14%.

Past population history of the district shows that with the exception of the influenza decade 1911–21, when it registered a decrease of 3·2%, population in the district has shown an increasing trend since 1901. The rate of growth has, however, shown considerable variation, being generally smaller than the State rate of growth except in the 1931–41 decade.

In the sixty year period 1901-61, population in the district recorded an increase of 66%, as against a much higher increase of 92% attained by the State as a whole during the same period, the low growth in the district being ascribable in the main to emigration, due in its turn to the tyrannical *harwaha* system. This, according to the 1921 Superintendnent of Census Operations of the State, amounted to virtual slavery. The district recorded an increase of 22% during the past decade, which, though still smaller than the State rate of increase during the decade, remains the highest attained by the district in the last sixty years. Among possible causes for this increase are traditional methods of fertility with a high rate of birth, and a considerable reduction in the death-rate in the post-independence era, due among other things to effective arrest in the incidence of famines and epidemics, and a general improvement in public health resulting from increased prosperity.

The district contains 2,296 inhabited villages, which make 3·3% of all inhabited villages in the State and is much more than average quota of inhabited village per district i.e., 2·3%. It however contains only 2·6% of the State's rural population, which indicates that villages in the district are on an average less populous than villages in the State as a whole. The villages are distributed among the tahsils as follows: Mauganj 36%, Sirmour 22%, Huzur 21% and Teonthar 21%. The district is overwhelmingly a district of small villages, with more than four-fifths having less than 500 population (more than half have infact below 200 population). These villages, however, account for 43% of the district's rural population, which indicates that majority of the population prefers to live in villages with more than 500 population. Preponderance of very small villages, in a way, hinders the spread of education because it is almost impracticable to open primary school in very small villages having less than 200 population.

The marital status pattern of the district reveals one very disturbing aspect. 64% of the females and 56% males are married, or are leading widowed or divorced lives. This shows prevalence of child and very early marriages on an alarming scale, particularly in case of females. Thus 42% of the males and 59% of females in the age-group 10-14 are either married or widowed. This institution of child and early marriages has been customary in the district for a very long time and its eradication is bound to be very difficult. Spread of education and a social climate against the evil, however, are urgently necessary.

Population of the district is preponderatingly Hindu, who constitute 97%. Muslims make most of the remaining 3%, followers of other religions being in negligible minority in the district. Though forty-one mother tongues have been returned from the district, Baghelkhandi and Hindi alone claim about 99% of the population as speakers.

Scheduled castes, which represent the more backward section of the community make 12% of the district's population. They are more or less evenly dispersed in all the tahsils. Most numerous scheduled caste is Chamar (and synonymous caste-names) which accounts for 78% of the district's scheduled caste population, followed by Kumhar, Basor and Mehtar, respectively making 11·7, 5·9 and 1·0 percent. Other castes, numbering nine, thus account for only 3·4% of the scheduled caste population. Only 2·6% of the scheduled castes are literate and educated, the literacy among females being as low as 0·3%. Even of these, more than 97% do not possess any educational level, i. e., they have not passed even the primary school examination. About 60% of the population of scheduled castes takes part in economic activities. Agriculture is the mainstay of their economy employing about four-fifths of the workers. In agriculture, agricultural labourers preponderate over cultivators by more than 3 to 1. This indicates the extent of land hunger in the castes, as well as the demographic pressure on land. Household industry also is important in the economy of the scheduled castes employing 14% of the working force. The household industries are the traditional industries, like shoemaking, earthen pottery, or bamboo basketry associated with the Chamar, Kumhar and Basor castes.

Scheduled tribes represent another weaker section of the population constituting 13% of the district's population. They are thus almost as numerous as the scheduled castes. They are also evenly distributed over the tahsils. More than nine-tenths of the scheduled tribal population consists of Kols, followed by Gonds who make 5%. Nine other Scheduled tribes, together make only 1% of the scheduled tribal population. With only 1.2% of their population literate and educated the scheduled tribes are even more backward than scheduled castes in respect of educational progress. 64% of the tribal population is economically active. More than nine-tenths of the workers are in agriculture. Most of these are agricultural labourers. In fact, the agricultural labourers outnumber cultivators by 6 to 1. This indicates the magnitude of land-hunger in the tribes.

Percentage of literacy in the general population is 15%, which is lower than the State average of 17%. The district, though backward in the State context, has still made considerable progress in education and literacy, because in the past Rewa used to be a by-word for backwardness particularly educational. The low levels of literacy and education in the district are due mainly to:—

(1) Low female literacy of 3·6% as compared with 6·7% in the State as a whole, and (ii) educational backwardness of one-fourth of the population belonging to the scheduled category. Any programme of education in the district should therefore pay particular attention to these weak spots. About 8% of all literate and educated persons in the district are matriculates or have higher educational qualifications.

About half of the population of the district is economically active, which is slightly lower than the

State participation rate. Agriculture is the mainstay of the district's economy with 84% of the working force in it, comparing with 79% in case of the State as a whole. Agricultural labourers (coming mostly from scheduled castes and tribes) contribute 31% to the working force which is about twice as large a proportion as that for the State as a whole. Obviously, there is greater demographic pressure on land in the district, and this is not a healthy trend. In cultivation, smaller holdings prevail. About two-thirds of rural cultivating households in the district have less than 10 acres; more than half have holdings of less than 7·5 acres, and two-fifths have holdings of less than 5 acres. About one-fourth of the rural cultivating households thrive on mere pittance in the name of land having less than 1·0 acres each. Irrigation being almost unknown, a holding of less than 7·5 acres is clearly uneconomic. The figures clearly bring out the distress among the cultivating households in the district and indicate the urgency of the problem. Household industry (category IV), other services (category IX), and category III, are other sectors of economy having sizeable participation. The district has practically no large-scale manufacturing industry.

In the past, Rewa country passed as a byword for backwardness. In the post-independence era, there is clear evidence of considerable improvement in education. But, the economy still remains firmly in the grip of land, pressure on which is increasing with every increase in population. The deplorable state of agricultural economy is brought out in full force by the data provided by census. Particularly weak in the economic sense are the scheduled tribes and scheduled castes, who form a quarter of the district's population. The general population as such is also below average in almost every field. The need for more urgent measures for securing a greater diversification of the working force and reduction of pressure on land is perhaps indicated.

A—GENERAL POPULATION TABLES

TABLE A—1

AREA, HOUSES AND POPULATION

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note :—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups; showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the Industrial code numbers etc. as in the case of villages.

The following examples will make the Note clear :—

Rewa District Total 200 (135) signifies that there are 135 establishments in Rewa District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and food grains." Teonthar Tahsil Total 207 (234) signifies that there are 234 establisments in Teonthar Tahsil pertaining to Minor Group 207, which stands for "Production of edible fats and oils other than by hydrogenated oil." Village 11 Soharwa 283 (1) signifies that in Village Soharwa, which has 11 as its Location Code Number there is 1 establishment pertaining to Minor Group 283, which stands for "Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures." Rewa Town, Ward No. 1 220 (14) signifies that there are 14 establishments located in Ward No. 1 of Rewa Town pertaining to Minor Group 220, which stands for "Manufacture of Bidi".

REWA DISTRICT

Total—200 (135), 202 (1), 205 (3), 207 (1,213), 209 (140), 215(10), 220 (362), 230 (1), 231 (2), 235 (23), 236 (1), 255 (57), 270 (3), 271 (9), 273 (345), 280 (9), 281 (20), 282 (7), 283 (851), 284 (50), 288 (1,089), 300 (2), 302 (3), 310 (7), 311 (1,441), 313 (1), 333 (14), 335 (2), 340 (4), 342 (1), 343 (2), 344 (7), 350 (1,364), 362 (2), 365 (9) 367 (13), 368 (2), 369 (1,130), 375 (1), 377 (5), 378 (1), 382 (1), 384 (30), 388 (85), 392 (13), 393 (859), 394 (2), 399 (48).

Rural—200 (106), 202 (1), 207 (1,205), 209 (102), 220 (306), 231 (2), 235 (23), 255 (57), 270 (3), 271 (9), 273 (277), 280 (1), 281 (4), 282 (5), 283 (850), 284 (49), 288 (1,088), 310 (7), 311 (1,435), 313 (1), 333 (12), 335 (2), 340 (4), 342 (1), 343 (2), 344 (7), 350 (1,362), 362 (2), 365 (6), 369 (1,122), 382 (1), 388 (21), 393 (736), 399 (29).

Urban—200 (29), 205 (3), 207 (8), 209 (38), 215 (1), 220 (56), 230 (1), 236 (1), 273 (68), 280 (8), 281 (16), 282 (2), 283 (1), 284 (1), 288 (1), 300 (2), 302 (3), 311 (6), 333 (2), 350 (2), 365 (3), 367 (13), 368 (2), 369 (8), 375 (1), 377 (5), 378 (1), 384 (30), 388 (64), 392 (13), 393 (123), 394 (2), 399 (19).

1 TEONTHAR TAHSIL

Total—200 (51), 207 (234), 209 (19), 220 (1), 255 (12), 273 (19), 283 (44), 284 (8), 288 (307), 311 (82), 333 (2), 335 (2), 342 (1), 343 (2), 350 (268), 362 (1), 369 (242), 388 (2), 393 (112), 399 (1).

PART II

OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies (the agency or source is indicated below each Table or Statement) and from official publications. These are presented under the following heads:—

1 Rainfall and Temperature

2 Economic Statistics :—

- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics :—

- (a) Health and Medical
- (b) Vital Statistics

7 Communications

8 Miscellaneous

TABLE 8.4

IMPORTANT EVENTS

REWA DISTRICT

S. No.	Year	Description of the Events	S. No.	Year	Description of the Events
1	2	3	1	2	3
1	1951	Gram Panchayats were formed throughout the District.	6	1958	(1) Wheat crop was heavily damaged due to scarcity of rains. (2) To meet the acute shortage fair price shops were opened and wheat was sold at controlled price.
2	1953	The Vindhya Pradesh Pawai Abolition Act was enforced.			
3	1955	The Vindhya Pradesh Land Revenue Act was enforced with effect from 1st April 1955.			
4	1956	Lack of rainfall causing heavy damage to Rabi-crops and resulting in acute food shortage. Relief works were opened to meet famine conditions.	7	1959	Heavy rainfall causing much damage to Bandhs and bandhias.
			8	1960	Heavy fire broke out in Janki Park of Rewa town. Many shops were burnt to ashes and loss of lakhs of rupees was caused to the merchants. Sindhi merchants were specially affected.
5	1957	Both Rabi and kharif crops were damaged badly due to lack of rainfall. Relief works were opened to meet famine like conditions.
