25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;
(ii) The four-coloured map of the district ;
(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;
(iv) Supplementary information showing basic amenities available for each village ; and
(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

BOMBAY : B. A. KULKARNI
The 31st August 1964.

THE DISTRICT IN MAHARASHTRA

FIG. 2

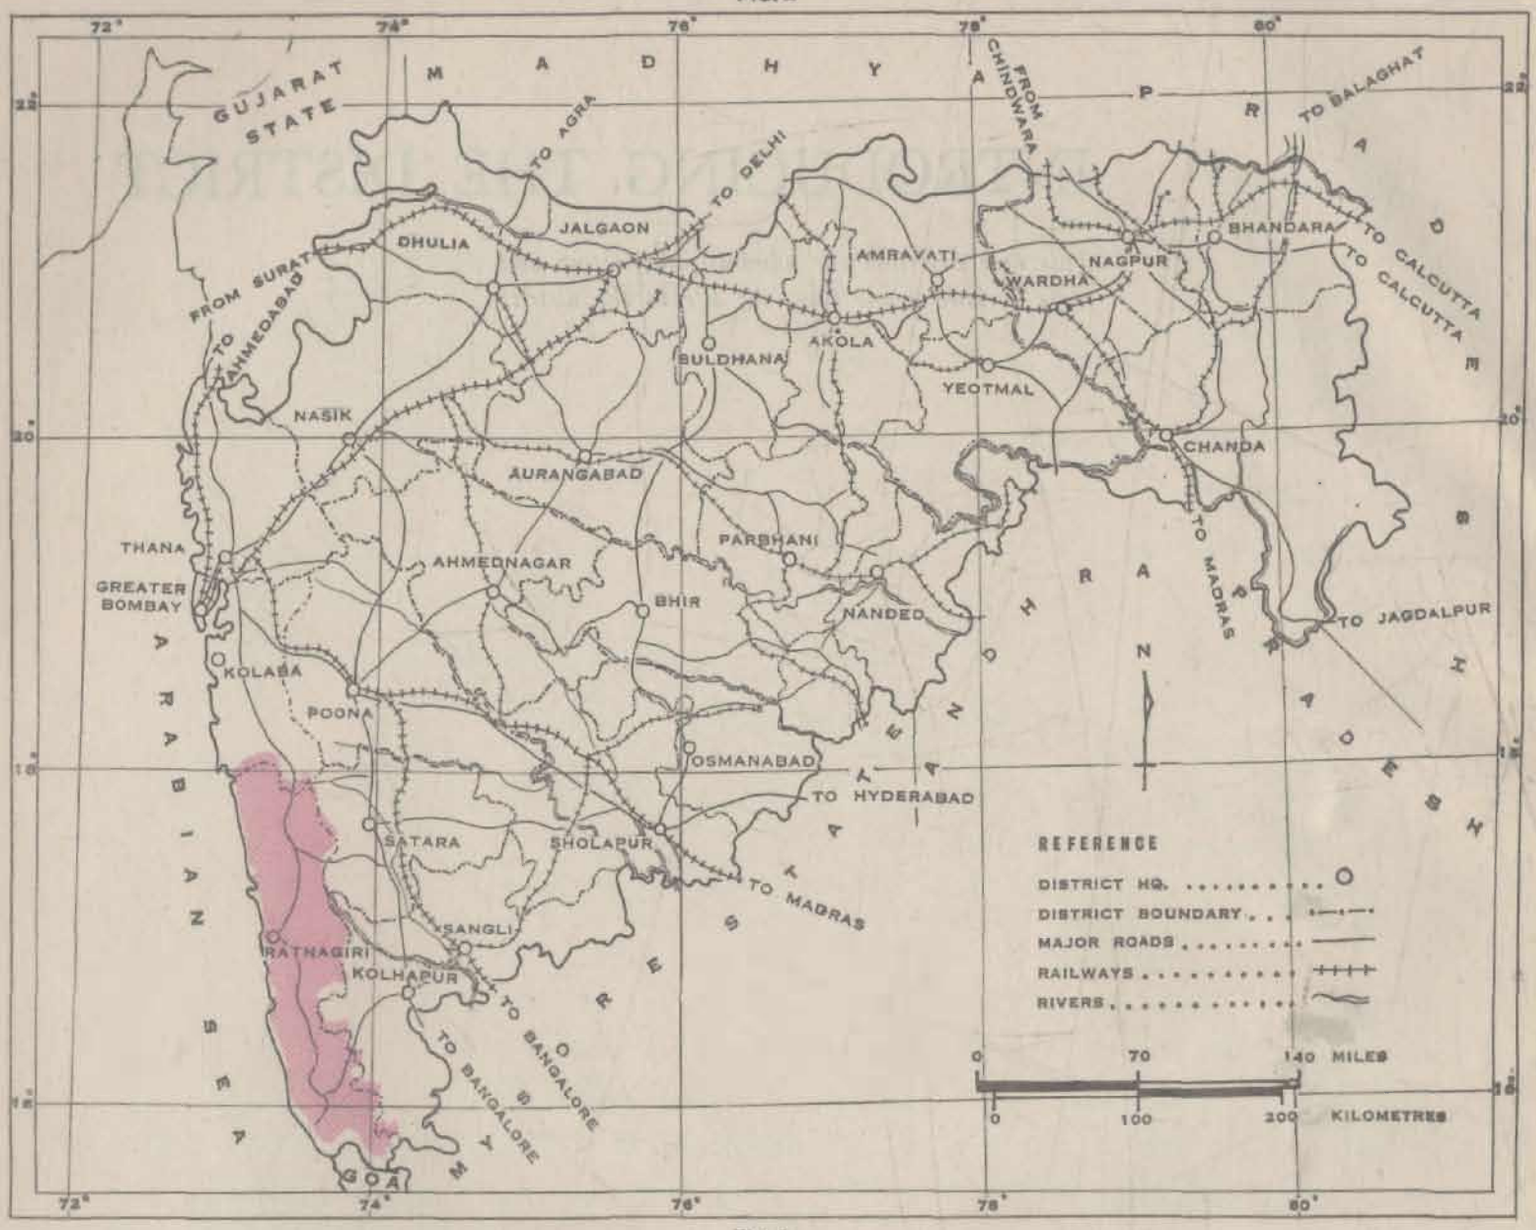

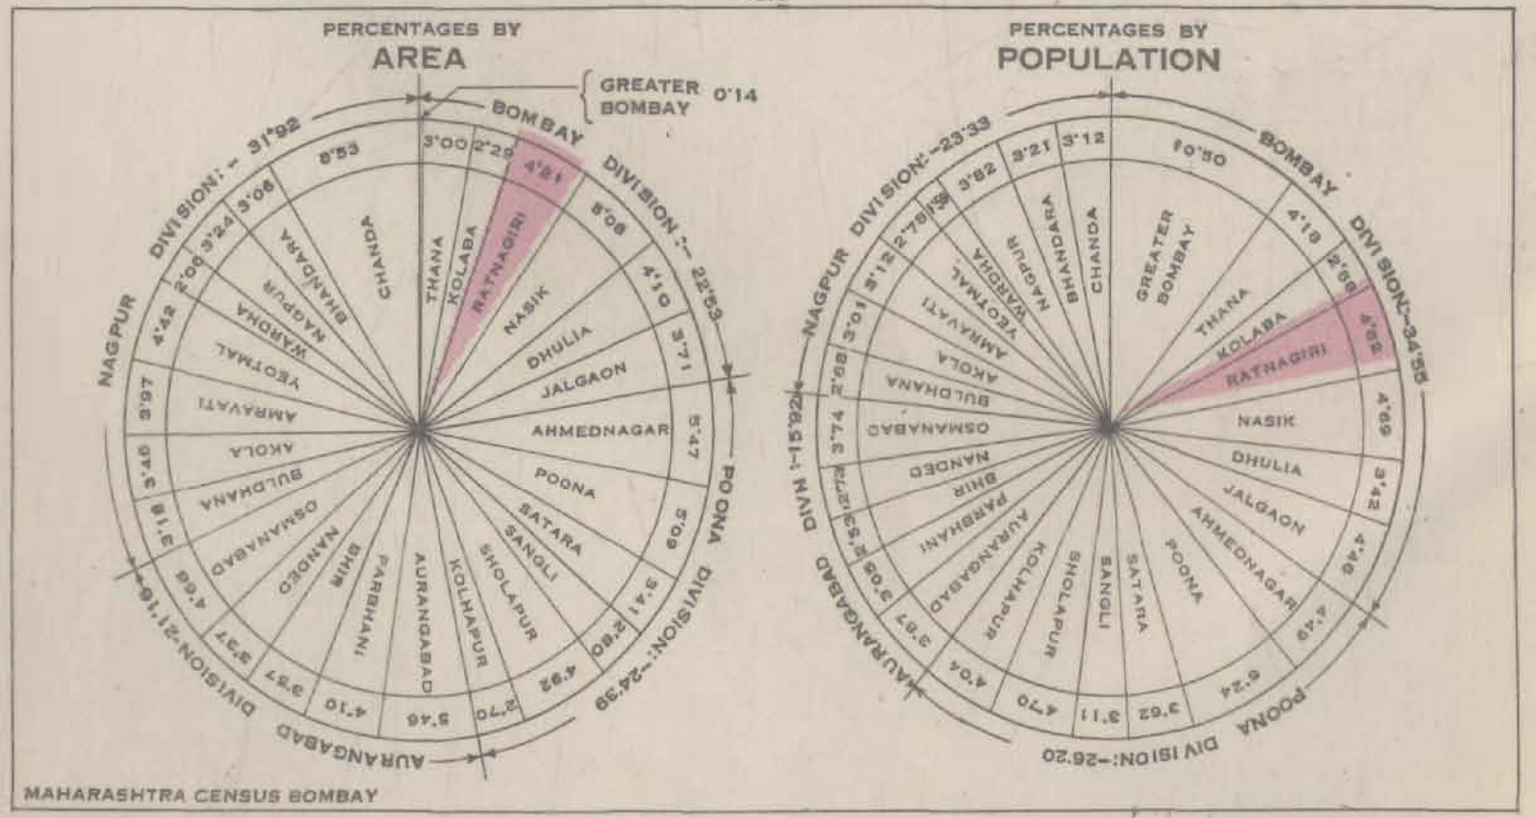

FIG. 3

MAHARASHTRA CENSUS BOMBAY

H-747G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

THE DISTRICT lies along the west coast forming the main part of the Konkan. The ranges of Sahyadri in the east and the Arabian Sea on the west dominate the make-up of this district. The district has a north-south length of about 180 miles. It has an average east-west extension of about 40 miles except in its extremities, which taper to join the coast-line. It has a coast-line of about 200 miles. The streams which flow from the Sahyadri towards the sea have formed basins at places between the hill ranges and on the coastal plains.

The district of Ratnagiri lies between 15° 36′ and 18° 5′ N. latitude and 73° 5′ and 74° 36′ E. longitude.

The district is surrounded by Kolaba district on the north; Sahyadri hills and beyond Sahyadri, Satara and Kolhapur districts in the east; Goa in the south; and Arabian Sea towards the west.

The area of the district is 4,982·8 square miles and its population in 1961 is 1,827,203. In terms of area and population it makes 4·21 per cent and 4·62 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

The main system of hills is the Sahyadri and its offshoots. The main range of the Sahyadri forms the eastern boundary of the district. Over 85 per cent of the land surface is hilly. On the east, this consists of the steep and forbidding scarp of the main Sahyadris. In the centre are the transverse chains of small hills, which projecting from the main range, develop higher elevations in the middle portions. In this portion, hill ranges run parallel to each other and as a result the numerous streams which flow through the valleys have formed a parallel drainage pattern.

Important Rivers

The Vasishthi is the most important river of the district from the point of view of length and navigational facilities. It has a course of about 30 miles. It rises in the Tivra section of the Sahyadris. On reaching the plain tract, the river becomes tidal.

The Jagbudi is the principal tributary of the Vasishthi on the north. It rises near the Hatlot pass of the Sahyadris. The river is navigable for smaller vessels.

South of the Vasishthi river, the Shastri flows from the east to the west and drains a part of the district. It takes its source waters in the Sahyadris near the Prachitgad fort and has a total length of about 40 miles.

Savitri is the northernmost of the more important rivers of the district and acts as a boundary for about 24 miles between this district and the Kolaba district. It rises from the Mahabaleshwar hill complex. The river is navigable for small vessels for about 36 miles upstream up to Mahad town in Kolaba district. Large vessels can go only up to Mhapral in Mandangad taluka, of this district about 24 miles from the mouth of the river.

Other rivers of some importance are Bav, Ratnagiri, Muchkundi, Jaitapur, Vaghotan, Devgad, Achra, Kalavali, Karli and Terekhol.

Majority of the rivers receive their waters from the Sahyadrian main range and flow westwards to the Arabian Sea. In length they seldom exceed forty miles. Their intensely seasonal regime is yet another limitation to their economic use. However, the rivers in this district are of great value from the point of view of navigation. Parts of these rivers are tidal.

Climate

Monthly temperature records for the district are available only for two stations, viz., Ratnagiri and Vengurla (Table 1 in Part III).

The year may be divided into four seasons, summer season from March to May, the south-west monsoon season from June to September, the post-monsoon season from October to November and the winter season from December to February.

Being a coastal district, the variation of temperature during the day and through the seasons is not large. In the hot season temperature rises slowly from March and May is the hottest month. With the onset of the monsoons, the temperature drops by three to four degrees. Day temperatures during the monsoon are lower than those in the cold season. In the post-monsoon months of October and November, day temperatures increase and days in November are as hot as in May. Night temperatures are lowest in January.

Within the district, the seasons show local variations also. Areas within 12 to 16 miles of the coast are the most pleasant particularly in hot months with the sea breeze blowing, nearly throughout the day. Further inland during the hot months

both days and nights can be oppressive and more so in the tract at the foot of the Western Ghats. At the coast the maximum temperature rarely goes beyond 38°C (100·4°F) but in the interior it may reach 40°C or 41°C (104° or 106°F). Owing to the proximity of the sea, the district is on the whole very humid. Even during the winter and summer the relative humidity seldom goes below 50 per cent.

During the monsoon, skies are heavily clouded to overcast. But in the rest of the year, skies are very clear or very lightly clouded. Winds are very strong and are mainly westerly or south-westerly during the monsoon. Thunderstorms are common in the post-monsoon months and the latter part of the hot season.

Rainfall

Table 2 in Part III shows monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall is not uniform in all parts of the district. It increases rapidly from the coast towards the Western Ghats on the eastern border of the district. In and near the Ghats rainfall is very heavy. Amboli gets annually on an average 7,446 mm. (293·1″) of rain. The coastal stations of Malvan and Devgad get annually 2,156 and 2,247 mm. (84·9″ and 88·5″) of rain, respectively. Monsoon starts in this district generally by the beginning of June and the rains continue with little intermission till about the middle of October. The average annual rainfall for the district as a whole is 3,188 mm. (125·52″). Practically the entire annual rainfall occurs during the months from June to October. July is the month with highest rainfall when about one-third of the annual rainfall is received.

Mean rainfall at Devgad and Vengurla is 2,249 mm. (88·53″) and 2,669 mm. (105·07″), respectively. Standard deviation is 467 mm. (18·40″) and 487 mm. (19·17″), respectively. The coefficient of variability is 20·79 per cent and 18·25 per cent, respectively. The rainfall reliability is measured by the coefficient of variability. In fact, variability is inverse to reliability. The degree of reliability of rainfall in this district may, therefore, be said to be high.

Dependability of Rainfall and Scarcity Areas

As the district has heavy and assured rainfall the Fact-Finding Committee appointed by the Government of Bombay in 1960 has come to the conclusion that the district can be considered as free from scarcity.

Soils

The predominant soils in the district are laterite soils. They vary in colour from bright red to brownish red owing to the preponderance of hydrated iron oxides. They are always acidic and lime is deficient or almost absent. They are fairly well supplied with nitrogen and organic matter, their texture is loamy and depth varies from one foot to three feet. They are porous and not retentive of moisture and are found all over the district except in Mandangad taluka. These soils are found in several grades, some of those of special significance are given below :—

(1) *Rice soils* and (2) *Warkas soils*.—These are situated on the slopes of the hills and are partly eroded, yellowish red and poor in fertility. They are shallow in depth and coarse in texture. Ragi (Nagli) is the principal crop in these soils. Cashewnut grows in plenty in this area. It is on these soils that the world renowned Alphonso mangoes are grown.

(3) *Garden soils*.—They are located in the basins at the bottom of hill ranges and are fairly fertile. Arecanut and coconut gardens thrive well in these soils.

(4) *Coastal Alluviums*.—The coastal strips in Dapoli, Guhagar, Ratnagiri and Rajapur talukas are deep sandy loams and coconut gardens and arecanut gardens thrive well in them.

(5) *Salty lands*.—Due to the inundation of the sea, a part of coastal soils has become salty. They are locally known as *khar* or *khajan*. In Devgad and Malvan talukas and Vengurla mahal, the entire western strips are salty while in other coastal talukas only salt patches are to be noticed.

Minerals

Of all the districts in the Bombay Division, Ratnagiri district seems to be favourably placed in regard to the supply of some of the important minerals.

Manganese ore occurs almost side by side with the belts of iron ore in this district. Thick veins of manganese ore in laterite were reported at Rajari (Redi) point in Vengurla mahal. Manganese ore is also reported to occur at Phondye, Sasoli, Dingne, Netarde and other places in Sawantwadi taluka. The ore exposed at surface is of low grade being either highly ferruginous or silicious having manganese content of 25 to 40 per cent. Iron ore occurs roundabout Redi, Tak, Asoli, Ajagaon, Shiroda Nanos, Talaone, Gulduve, Kinale, Kavthani, Satarde, Sateli, Aros, Thakurwadi, Malewad, Matond, Dabholi, Tendoli, Khanoli and other places in southern part of the district. Of all these places, iron ore occurrences at Redi, Sateli, Aros, Tendoli and Khanoli appear most promising. Minor deposits of limestone and dolomite also occur at Tarle in this district.

Another important mineral found in this district is bauxite. It occurs at a few places along the coast near Harnai, Vijaydurg and Devgad. There

are large deposits of chromite in this district, the total reserves being estimated at 71,300 tons. The deposits are located in the valley of the Gad river near Kankavli and Vagda. Extensive deposits of ilmenite are known to occur in this district along the western coast for a distance of about 25 miles at a number of places like Malgund, Ori, Tiwri, Jaigad, Panshal, Dapoli, Dabhol, Jaitapur and Kuveshi. The possible reserves have been roughly indicated at two million tons. The most important concentration is seen at Malgund, Ori and Tiwri.

Certain minor minerals are also found in this district. Workable deposits of feldspar and quartz are seen in this district in the Kadawal and Pangrad belt. The feldspar found in this district can be used in the manufacture of potteries. The following minor minerals also occur in this district: Mica, mineral pigments such as clay, silica sand, asbestos, building stones, glass sand, copper, salt, etc.

Forests

The total area under forests in this district is about 73 sq. miles. Of this about 61 sq. miles are reserved and the rest protected. Nearly 12 sq. miles are under the charge of Revenue Department. Besides, there are extensive Malki forests in the district. The forest produce in addition to timber and grass includes Shikekai, Hirda and a number of medicinal herbs.

Natural Zones

The district can be broadly divided into three zones which are parallel to the coast-line and the inland Sahyadris : (1) The eastern portion consists of the main areas of Sahyadrian range and its offshoots ; (2) to the west of this Sahyadrian and sub-Sahyadrian region of the district there is a plateau surface, under intensive rice cultivation ; and (3) the coastal plains, where fishing and coconut and betel-nut gardening are practised.

ADMINISTRATIVE SET-UP

Brief History

South Konkan was formed into a separate district in 1819. Its headquarters was first at Bankot and later at Ratnagiri. Three northern sub-divisions were transferred to Thana district in 1830 and the district was reduced as a sub-collectorate under Thana. In 1833, it was again made a fullfledged district and named as Ratnagiri district.

In 1891, the district had the following sub-divisions :—

Devgad, Ratnagiri, Sangameshwar, Vengurla, Malvan, Rajapur, Chiplun, Khed and Dapoli talukas, and Guhagar and Mandangad petas.

There were no major changes between 1891 and 1931.

Vengurla taluka was downgraded as peta in the year 1923.

A new mahal called Kankavli mahal was formed in the year 1945.

The former Indian State of Sawantwadi was merged with the district and the taluka boundaries were reorganised in 1949. One new taluka of Sawantwadi and two new mahals of Kudal and Lanja were formed in the year 1949. Two villages were added to this district from Kolhapur district and two villages from this district were transferred to Kolaba district.

With the Reorganisation of States in 1956, the district was included in the Bombay State. Since 1960, it forms a part of Maharashtra.

Present Set-up

For administrative purposes, the district is at present divided in 11 talukas and 4 mahals. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka and mahal are as follows :—

District/Taluka (1)	Name of Headquarters (2)	Area in sq. miles (3)	Number of inhabited villages (4)	Number of towns (5)	1961 population (6)	Percentage of area (7)	Percentage of population (8)
RATNAGIRI DISTRICT	Ratnagiri	4,982·8	1,516	13	1,827,203	100·0	100·0
1 Mandangad Taluka	Mandangad	160·3	91	..	52,056	3·2	2·9
2 Dapoli Taluka	Dapoli	326·9	148	3	134,709	6·6	7·4

13 Kudal Mahal	Kudal	316·4	77	..	114,389	6·3	6·3
14 Vengurla Mahal	Vengurla	126·6	17	2	86,649	2·5	4·7
15 Sawantwadi Taluka	Sawantwadi	515·9	120	1	139,136	10·4	7·6

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and four Deputy Collectors who hold charge of four Revenue divisions and have their headquarters at Dapoli, Chiplun, Sawantwadi and Ratnagiri, respectively. Eleven Mamlatdars are in charge of eleven taluka offices and four Mahalkaris in charge of four mahal offices.

Land Revenue Settlements

The original Revenue and Survey Settlement of different talukas in the district was completed between 1866—1893. The work was suspended in 1873 as there was much opposition from the Khots as well as peasant holders. The work recommenced after the Khoti Act of 1880. The first revision survey was completed between 1895 and 1926 and the second revision settlement was introduced in three talukas only, viz., Ratnagiri in 1916-17 and Mandangad and Khed in 1926-27. The land revenue rates have not been revised since then in spite of the expiry of the terms of the first or second revision settlements.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during the revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlements untaxed. The comparative incidence of land revenue from field to field is thus generally the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small *bandharas*, the land revenue is integrated and inclusive of the charge for water supplied.

Table 24 in Part III shows demand and collection of land revenue during the ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam, Khoti or Jagir villages had not been covered by most of them. In fact, some of those villages were unsurveyed and unsettled as late as in 1947. That work has now been completed. Because of such recently settled villages and because of the territorial changes in the taluka boundaries from time to time, most of the talukas today have a more varied pattern of land revenue assessments than what is seen in the reports of earlier settlements. Even then the maximum rates fixed at each settlement or revision settlement or the average land revenue rates per acre should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. Those rates for dry, garden or rice lands for each taluka are as follows :—

Taluka	Original settlement or Revision settlement	Year	Guarantee period	No. of villages	Average land revenue per acre	Group	Villages	Maximum rates per acre		
								Dry lands	Garden lands	Rice lands

Assembly and Parliamentary Constituencies

Since 1957 the district has 14 Assembly seats. In 1957, the Chiplun constituency was a double-member constituency with one of the two seats reserved for Scheduled Castes. After abolition of the double-member constituencies in 1961, the seat from Makhajan is reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly constituency	Number of Voters on rolls
1 Dapoli	60,669
2 Guhagar	55,149
3 Chiplun	61,357
4 Makhajan	60,302
5 Sangameshwar	66,447
6 Ratnagiri	66,459
7 Lanja	55,296
8 Rajapur	52,007
9 Malvan	60,662
10 Devgad	62,265
11 Kankavli	66,266
12 Vengurla	66,515
13 Sawantwadi	68,119
14 Ratnagiri-Khed	67,480
Total ..	868,993

In 1962 General Elections, the Assembly constituencies Dapoli, Guhagar, Chiplun, Makhajan, Sangameshwar and Ratnagiri together made one Parliamentary constituency called Ratnagiri constituency and the Assembly constituencies Lanja, Rajapur, Malwan, Devgad, Kankavli and Vengurla made another Parliamentary constituency called Rajapur constituency. The remaining Assembly constituencies Sawantwadi and Ratnagiri-Khed combined with Assembly constituencies Chandgad, Gadhinglaj, Bhudargad, Radhanagari and Kolhapur from Kolhapur district made another Parliamentary constituency called Kolhapur constituency.

The total number of voters on rolls in the district in 1961 was 868,993. The total population 21 years and above according to 1961 Census is 880,337. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be District Magistrate and the Deputy Collectors and Mamlatdars are vested with magisterial powers. But those powers are limited to Chapter VIII to Chapter XII of the Criminal Procedure Code and Schedule III and Schedule IV in Part II of the Criminal Procedure Code, and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other magistrates who try criminal cases in the district. This separation of the judiciary from the executive has been brought about in the year 1953.

The District and Sessions Judge is assisted by one Civil Judge of the Senior Division and Judicial Magistrate, First Class. He has jurisdiction over the entire district in respect of special civil suits and over Ratnagiri taluka and Lanja mahal in respect of ordinary original civil and criminal suits.

There are also seven Civil Judges of the Junior Division and Judicial Magistrates, First Class, with headquarters at different taluka places. Their jurisdiction is limited to certain talukas and they deal with ordinary original civil and criminal matters.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by one Deputy Superintendent and two Circle Police Inspectors. There are 16 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

	Police Station Headquarters	No. of Villages
Ratnagiri Taluka	1 Ratnagiri ..	134
Sawantwadi Taluka	2 Sawantwadi ..	40
	3 Banda	83
Kudal Mahal	4 Kudal	77
Vengurla Mahal	5 Vengurla ..	19
Malvan Taluka	6 Malwan	59
Devgad Taluka	7 Devgad	64
Kankavli Mahal	8 Kankavli ..	66
Rajapur Taluka	9 Rajapur	146
Lanja Mahal	10 Lanja	84
Sangameshwar Taluka ..	11 Deorukh ..	170
Chiplun Taluka	12 Chiplun	131
Guhagar Taluka	13 Guhagar	78
Khed Taluka	14 Khed	146
Dapoli Taluka	15 Dapoli	150
Mandangad Taluka	16 Mandangad ..	91

Average number of villages and population per Police Station in the district is 95 and 114,200 against 69 and 62,547 in the State.

Crime statistics for the district for the year 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

Seven out of 13 towns in the district have Municipal Committees established under the Bombay District Municipal Act, 1901, and the Bombay Municipal Boroughs Act, 1925. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and for Women are shown on page (8) for each Municipality separately.

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 population	Total number of Municipal Councillors	Seats reserved for	
							Scheduled Castes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1	Khed	1940	1961	4	7,315	12	1	1
2	Ratnagiri Municipal Borough ..	1876	1961	4	31,091	25	1	3
3	Chiplun	1876	1961	4	17,355	19	1	2
4	Sawantwadi	1931	1962	4	15,120	20	..	2
5	Malvan	1918	1962	4	17,828	21	..	2
6	Vengurla	1876	1960	4	12,061	20	1	2
7	Rajapur	1876	1960	4	8,270	11	..	1

Municipalities at Ratnagiri, Chiplun, Vengurla and Rajapur were established in the same year, about 90 years ago while the Municipality at Khed was established only two decades ago.

The seven Municipalities together cover 73·75 per cent of the urban population or 5·97 per cent of the total 1961 population of the district. The remaining six towns, viz., Harnai, Dabhol, Dapoli Camp, Pophali, Nate and Redi do not have municipalities.

The taxation level of each of the municipalities is shown in the next column.

The *per capita* municipal tax appears to be high at Khed and Sawantwadi. But both are trade centres and much of the incidence falls on agriculturists who bring their goods for sale in the market.

	Name of the Municipality	Year 1961-62			
		1961 population	Total Receipts	Receipts from Municipal taxes	*Per capita* Municipal tax
			Rs.	Rs.	Rs. nP.
1	Khed	7,315	3,02,522	2,23,661	30 58
2	Ratnagiri Municipal Borough.	31,091	7,54,283	3,56,799	11 48
3	Chiplun	17,355	4,84,566	2,91,804	16 81

5	Malvan	17,828	3,60,145	2,28,340	12 81
6	Vengurla	12,061	2,70,527	1,36,480	11 32
7	Rajapur	8,270	2,32,360	1,02,399	12 38

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 15 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries except in the case of municipal towns which are not covered by them. Six towns, viz., Dapoli Camp, Dabhol, Harnai, Pophali, Nate and Redi which do not have municipalities but which are treated as towns in the 1961 Census are, however, included under the jurisdiction of the Zilla Parishad and Panchayat Samitis concerned. The Zilla Parishad covers 99·43 per cent of the area and 94·03 per cent of the total population of the district. The population covered includes total rural population and 26·25 per cent of urban population of the district in 1961. The number of villages, number of non-municipal towns and population included under the Zilla Parishad and each Panchayat Samiti are shown on the next page. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961.

	Name of Headquarters	Area in sq. miles	No. of inhabited villages	No. of non-municipal towns	Population in 1961	Percentage by area	Percentage by population

Constitution

The Zilla Parishad has 60 directly elected councillors. Out of these 60 seats, one seat is reserved for Scheduled Castes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of all Panchayat Samitis are also *ex-officio* councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the block and a chairman of a co-operative society conducting the business of purchase or sale of agricultural produce in the area of the block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the block as a co-opted member. Sarpanchas elected by members of Village Panchayats are also elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I. A. S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as a Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two Subject Committees are presided by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the Subject Committees is achieved through the Standing Committee which includes the Chairmen of all the Subject Committees as members.

The Panchayat Samitis do not have Subject Committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now, with the creation of democratic bodies at the district and block level, been devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities, at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayat, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as the District Local Board, the District School Board and the District Panchayat Mandals. The functions of non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan Schemes.

If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at

a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the years 1963-64 are Rs. 222·6 lakhs. The major portion of the receipts is of receipts from Government. They are 90·4 per cent and Zilla Parishad receipts are 9·6 per cent of the total revenue receipts. Major items of Zilla Parishad receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 222·4 lakhs. Following are the major items of expenditure :—

	Per cent
General Administration	4·3
Education	55·9
Community Development Projects ..	8·5
Buildings and Communications ..	11·4
Miscellaneous	6·8
Other items	13·1

No new taxation measures were introduced by the Zilla Parishad during the year 1963-64. The district is already having octroi tax and this has been continued for two years more for the present.

Per capita expenditure of the Zilla Parishad on different developmental heads is as follows :—

	Rs.
General Administration ..	0·56
Education	7·24
Community Development ..	1·10
Buildings and Communications	1·48

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government departments now transferred to the Zilla Parishad.

There are 5 Class I and 35 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV categories is 9,417.

VILLAGE PANCHAYATS

The number of independent village panchayats, group village panchayats and the number of villages covered by the group village panchayats are shown below :—

Taluka	No. of inhabited villages and non-municipal towns	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1 Mandangad	91	7	23	84
2 Dapoli	148+3	19	50	132
3 Khed	146	35	44	111
4 Guhagar	78	25	24	53
5 Chiplun	131+1	43	42	89
6 Ratnagiri	120	42	32	78
7 Sangameshwar ..	170	47	43	123
8 Lanja (Mahal) ..	84	24	25	60
9 Rajapur	144+1	30	42	115
10 Devgad	64	29	15	35
11 Kankavli (Mahal) ..	67	36	13	31
12 Malvan	59	*33	15	30
13 Kudal (Mahal) ..	77	43	12	34
14 Vengurla (Mahal) ..	17+1	†21	..	..
15 Sawantwadi	120	35	32	85
Total ..	1,516+6	469	412	1,060

* Four Village Panchayats are for suburbs of Malvan.
† Four Village Panchayats are for suburbs of Vengurla.

The break-up of the total annual income of the Village Panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000) Rs.	Percentage of total income
Grants	1,096	56·55
Taxes on houses and properties	321	16·56
Octroi	..	..
Other taxes	160	8·26
Total taxes	481	24·82
Income from other sources	361	18·63
Total Income	1,938	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The village panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

793 Village Panchayats have imposed taxes on houses and properties. Others have not.

The break-up of the total annual expenditure of all the Village Panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000)	Percentage of total expenditure
	Rs.	
Administration	325	18·15
Health and Sanitation	144	8·04
Public Lighting	61	3·40
Other Items	1,261	70·41
Total Expenditure	1,791	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of panchayat *ghars*, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

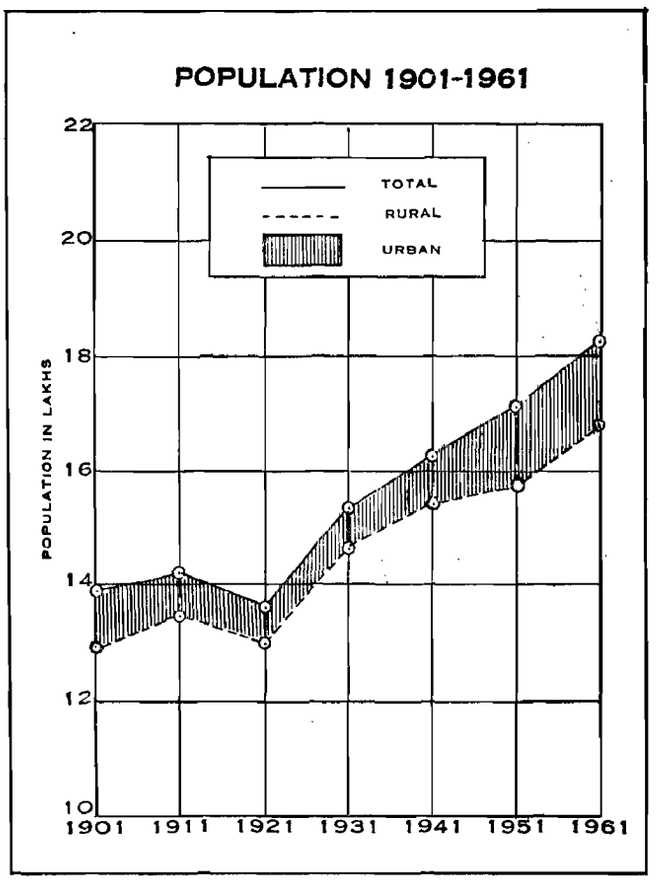

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—61.

Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Decade Variation	Rate of Variation
1901 ..	1,387,074	..	..
1911 ..	1,422,199	+35,125	+2·53
1921 ..	1,361,884	—60,315	—4·24
1931 ..	1,534,540	+172,656	+12·68
1941 ..	1,627,225	+92,685	+6·04
1951 ..	1,711,964	+84,739	+5·21
1961 ..	1,827,203	+115,239	+6·73

The Figure in the next column shows the total, rural and urban population of the district for the last seven Censuses.

During the decade 1901—11 population of the district increased by 2·53 per cent. In the following decade the severe influenza epidemic of 1918 took a heavy toll of life which was reflected in a decrease of 4·24 per cent in the population.

Decade 1921—31 showed a spectacular rise of 12·68 per cent. The district contributes a large number of migrants to Bombay City. The economic depression in 1930 led to closure of a number of textile mills in Bombay and the workers probably returned to their home district. Partly due to this depression and partly due to the recovery from 1921, the growth recorded in the decade 1921—31 has been the highest in the last sixty years.

The following decade 1931—41 had a growth rate of 6·04 per cent only. The next decade had a still lower rate of growth, viz., 5·21 per cent. Quite in contrast with very high growth rates seen in the other districts during the 1951—61 decade the rate of growth of population for the district has been only 6·73 per cent and is the lowest among the rates of growth of all the districts in Maharashtra. Continuous stream of out-migration appears to be the biggest single factor contributing to the low rate of growth of population in the district. Out-migration to Bombay has been described on pages (22) and (23).

The 1951—61 decade variation for the district and each of the talukas is as follows:—

		Percentage Variation 1951—61
	RATNAGIRI DISTRICT	+6·73
1	Mandangad Taluka	+6·33
2	Dapoli Taluka	+4·34
3	Khed Taluka	+10·05
4	Guhagar Taluka	+4·13
5	Chiplun Taluka	+11·68
6	Ratnagiri Taluka	+5·66
7	Sangameshwar Taluka	+5·86
8	Lanja Mahal	+5·55
9	Rajapur Taluka	+3·67
10	Devgad Taluka	+3·51
11	Kankavli Mahal	+8·16
12	Malvan Taluka	—1·46
13	Kudal Mahal	+12·65
14	Vengurla Mahal	+9·38
15	Sawantwadi Taluka	+11·94

The Figure on page (14) shows the areawise pattern of 1951—61 growth of population within the district.

There is a significant difference in the rates of variation of various talukas in the last decade. Kudal mahal recorded the highest variation of 12·65 per cent while Malvan has actually shown a decrease of 1·46 per cent in its population. Rate of variation is higher than the district average in Khed, Chiplun and Sawantwadi talukas and Kudal, Vengurla and Kankavli mahals and is lower in the remaining talukas. The increase in the population of Sawantwadi taluka and Vengurla mahal may partly be due to the developing mining industry near Redi town. The decrease in population of Malvan taluka may partly be due to the closure of a few cashew nut factories and heavier out-migration to adjoining talukas and to Bombay City.

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows:—

	Ratnagiri District	Maharashtra
1901—1961	31·73	103·97
1921—1961	34·17	89·71
1951—1961	6·73	23·60

During the last 40 years since 1921, the population of the district has increased by 34·17 per cent in contrast with the increase of 89·71 per cent for Maharashtra. Because of the decrease in population in 1901—21 period, the increase in 1901—61 is still lower than that of the Maharashtra State.

Density of Population

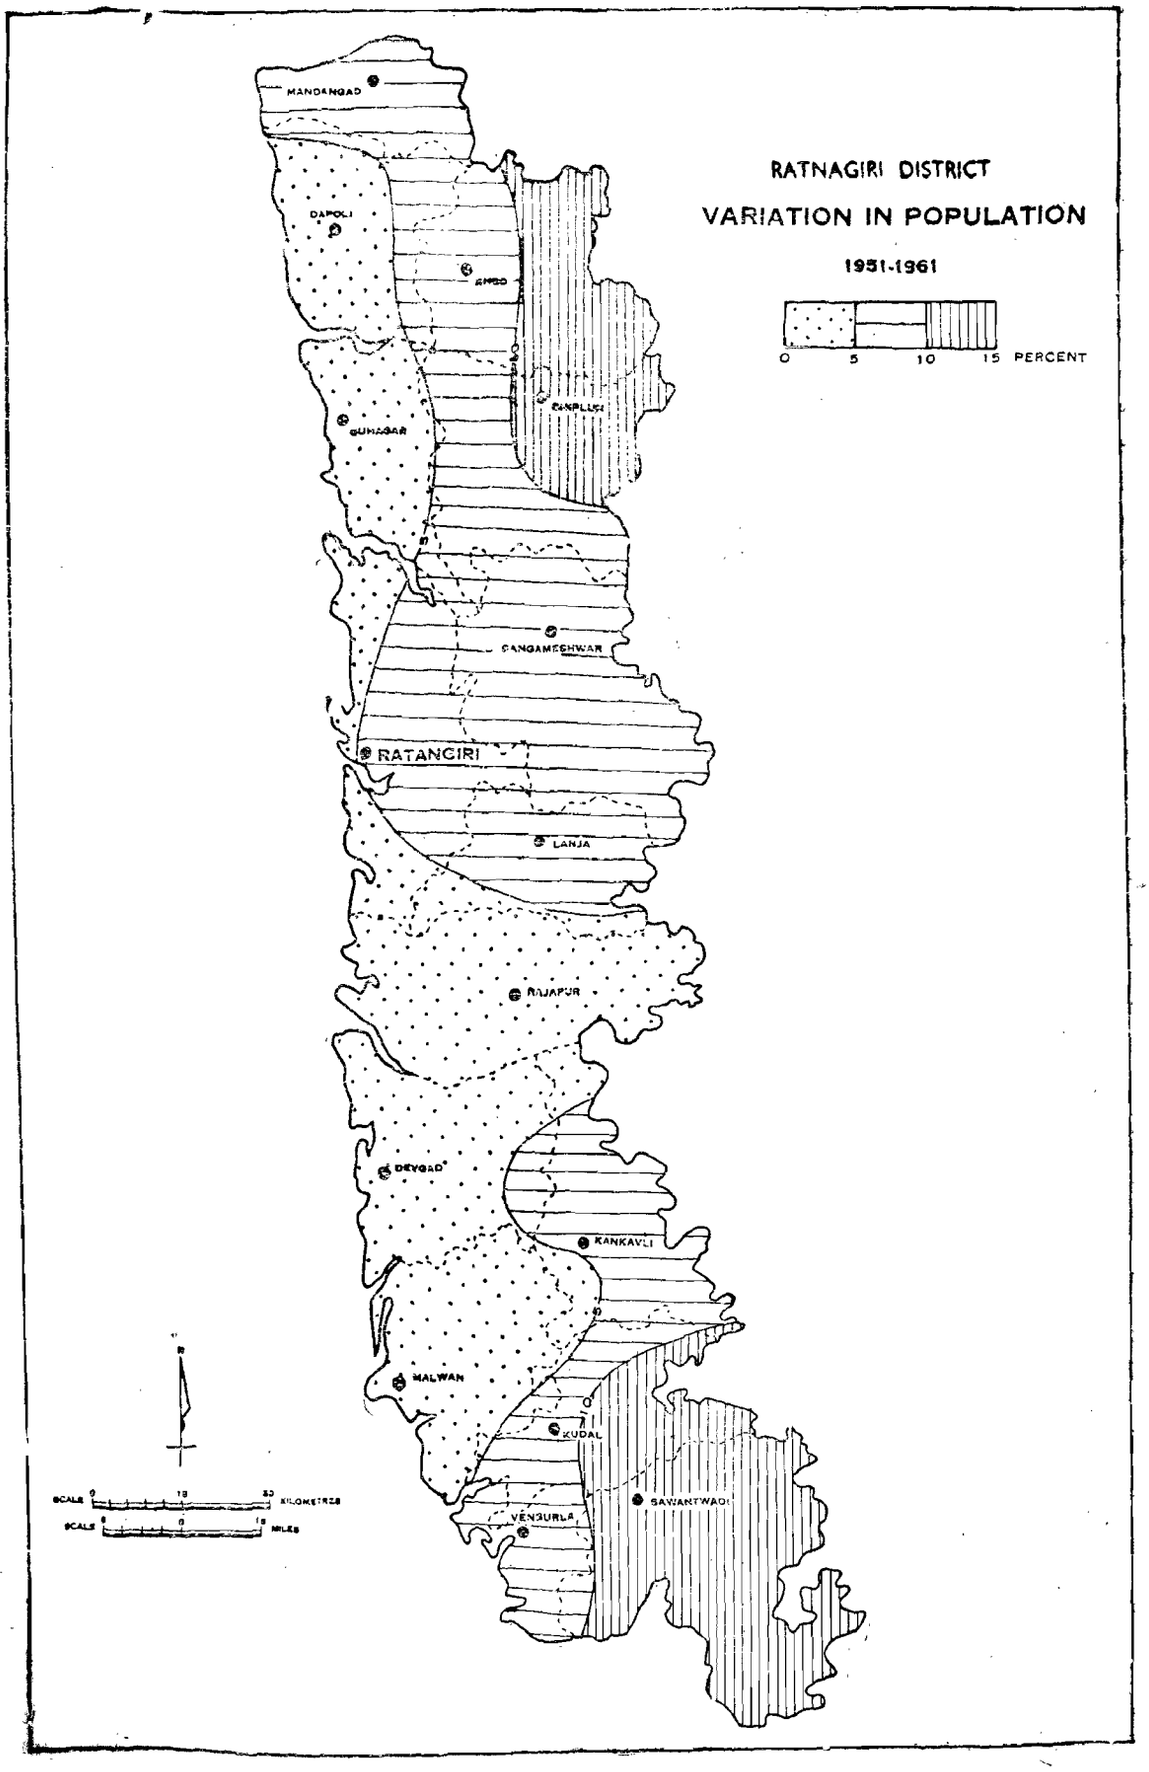

The densities of population for Maharashtra, Ratnagiri district and its talukas for 1951 and 1961 are as follows:—

	Density per sq. mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
RATNAGIRI DISTRICT ..	344	367	100·00
1 Mandangad Taluka ..	305	325	2·85
2 Dapoli Taluka	395	412	7·37
3 Khed Taluka	324	356	7·52
4 Guhagar Taluka ..	363	378	—5·01
5 Chiplun Taluka	352	394	9·36
6 Ratnagiri Taluka ..	446	471	9·22
7 Sangameshwar Taluka ..	297	315	8·59
8 Lanja Mahal	275	291	4·50
9 Rajapur Taluka	296	306	8·31
10 Devgad Taluka	345	357	5·55
11 Kankavli Mahal ..	345	373	6·10
12 Malvan Taluka	507	500	7·00
13 Kudal Mahal	321	362	6·26
14 Vengurla Mahal	626	684	4·74
15 Sawantwadi Taluka ..	241	270	7·62

The Figure on page (15) shows the approximate contours of density of population in 1961 within the district.

Within the district the density varies from 684 persons per sq. mile in Vengurla mahal to 270 persons per sq. mile in Sawantwadi taluka. Figure on page (15) will show this variation as the natural effect of topography of each taluka. Eastern hilly portions of the district have the lowest densities. The density increases gradually from east to west. The south-western coastal portion has the most dense population in the district. This is obviously the most fertile area in the district with intensive cultivation of gardens and rice lands capable of growing two crops annually.

The above table will show that there is more or less even distribution of population among the talukas. The concentration is mainly towards the coast where garden lands are available in abundance.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

Year	Ratnagiri District			Maharashtra		
	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901	8	..	6·28	219	..	16·59
1911	6	—16·37	5·12	232	+0·99	15·13
1921	6	—14·20	4·59	238	+18·72	18·50
1931	6	+7·69	4·39	258	+15·54	18·60
1941	9	+32·70	5·49	266	+27·11	21·11
1951	13	+53·39	8·00	383	+62·42	28·75
1961	13	+7·89	8·09	266	+21·32	28·22

In the Figure on page (12) actual urban population of the district since 1901 is shown by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 69·70 per cent as against 246·96 per cent for the State.

The district is less urbanised than Maharashtra State. The percentage proportion of urban population in the district decreased gradually from 6·28 in 1901 to 4·39 in 1931 and then increased gradually to 8·09 in 1961. The proportion of urban population is low because there is no large town in the district and the biggest town—Ratnagiri—has a population of 31,091 only.

The number of towns increased from 8 in 1901 to 13 in 1961. Because of the rigid application of the definition of urban areas five towns in the district have been declassified in 1961, but five new towns have also been added.

The total urban population in the district decreased by 16·37 per cent in the decade 1901—11 because two towns Harnai and Dapoli treated as towns in 1901 were not treated as such in 1911. The decrease of 14·20 per cent in the following decade was due to the severity of the influenza epidemic in 1918-19. The increase in the decades 1931—41 and 1941—51 were both due to additions of new places in the list of towns.

The population of the five declassified towns in 1961 is 31,751 while that of the five new towns is 32,537. Had these towns been not declassified in 1961 the urban population would have made 9·83 per cent of total population. The urban population of the district may thus be seen to have increased by 31·06 per cent though the increase appears only as 7·89 per cent in the table without adjustment for the change of definition of urban areas.

Ratnagiri, the district headquarters, and Chiplun are the two most important towns in the district. The percentage growth in the population of Ratnagiri was 93·18 per cent since 1901 and 113·00 per cent since 1921. For Chiplun town-group the growth is 188·61 per cent since 1901 and 131·47 per cent since 1921. The population of Malvan and Vengurla towns has in the last sixty years decreased by 9·16 per cent and 36·58 per cent, respectively. Malvan and Vengurla were the two biggest towns in the district in 1901 with population of 19,626 and 19,018, respectively.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows :—

Year	Ratnagiri District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	..	93·72	..	83·41
1911	+3·80	94·88	+12·68	84·87
1921	—3·70	95·41	—6·77	81·50
1931	+12·92	95·61	+14·77	81·40
1941	+4·82	94·51	+8·54	78·89
1951	+2·41	92·00	+7·72	71·25
1961	+6·63	91·91	+24·51	71·78

The net increase in rural population of the district has been 29·19 per cent over that of 1901 and 29·24 per cent over that of 1921. The corresponding figures for the State are 75·53 per cent and 67·08 per cent, respectively.

Between 1901 and 1931 the proportion of rural population went on increasing gradually. 1930 or 1931 was the climax perhaps when a large number of workers had returned from Bombay to their rural homes because of depression and closure of textile mills.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their

population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size class	Ratnagiri District		Maharashtra	
	Percentage of No. of villages to total number of villages	Percentage of population to total rural population	Percentage of No. of villages to total number of villages	Percentage of population to total rural population
Less than 500 ..	26·45	7·03	47·72	15·02
500—999 ..	31·79	20·92	28·55	25·71
1,000—1,999 ..	29·62	36·83	16·62	28·55
2,000—4,999 ..	11·02	28·55	6·18	22·40
5,000 and over ..	1·12	6·67	0·93	8·32

It will be seen that villages with less than 1,000 population are 58·24 per cent of the total number of villages in the district and have 27·95 per cent of the rural population. Villages with more than 2,000 population are 12·14 per cent of the total number of villages and account for 35·22 per cent of the rural population. Heavy concentration of the rural population is in the villages with population between 1,000 and 2,000. They accounted for 36·83 per cent of the total population and 29·62 per cent of the total number of villages. The concentration of the population in bigger villages in the district is higher than in the Maharashtra State.

The area, number of inhabited villages, total rural population, average population per village and the number of villages per 100 sq. miles are shown below for the State, district and each taluka separately.

Average population per village in the district is 1,108 against the average of 792 in Maharashtra. The average population per village within the district varies from 572 in Mandangad taluka to 3,779 in Vengurla mahal. The number of villages per 100 sq. miles is 31 and is the same for the district and the State. Among the talukas of the district, Mandangad has 57 villages per 100 sq. miles compared to 15 in Vengurla mahal.

Southern talukas have very large villages. The average population per village for Vengurla is 3,779. For Malvan it is 1,866.

It may be added that the sizes of villages discussed here are of the administrative units and not necessarily of each pada or hamlet. In fact Ratnagiri villages are known to consist of the largest number of hamlets in the State.

State/District/Taluka	Area in sq. miles (rural)	Number of inhabited villages	Rural population	Average population per inhabited village	No. of inhabited villages per 100 sq. miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31
RATNAGIRI DISTRICT	4,925·0	1,516	1,679,345	1,108	31
1 Mandangad Taluka	160·3	91	52,056	572	57
2 Dapoli Taluka	319·5	148	117,922	797	46
3 Khed Taluka	382·9	146	130,095	891	38
4 Guhagar Taluka	242·2	78	91,513	1,173	32
5 Chiplun Taluka	414·2	131	148,222	1,131	32
6 Ratnagiri Taluka	353·4	120	137,299	1,144	34

11 Kankavli Mahal	299·2	67	111,513	1,664	22
12 Malvan Taluka	253·6	59	110,094	1,866	23
13 Kudal Mahal	316·4	77	114,389	1,486	24
14 Vengurla Mahal	117·0	17	64,243	3,779	15
15 Sawantwadi Taluka	513·8	120	124,016	1,033	23

Age Distribution

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 are shown below separately for males and females compared with the corresponding proportions for 1951:—

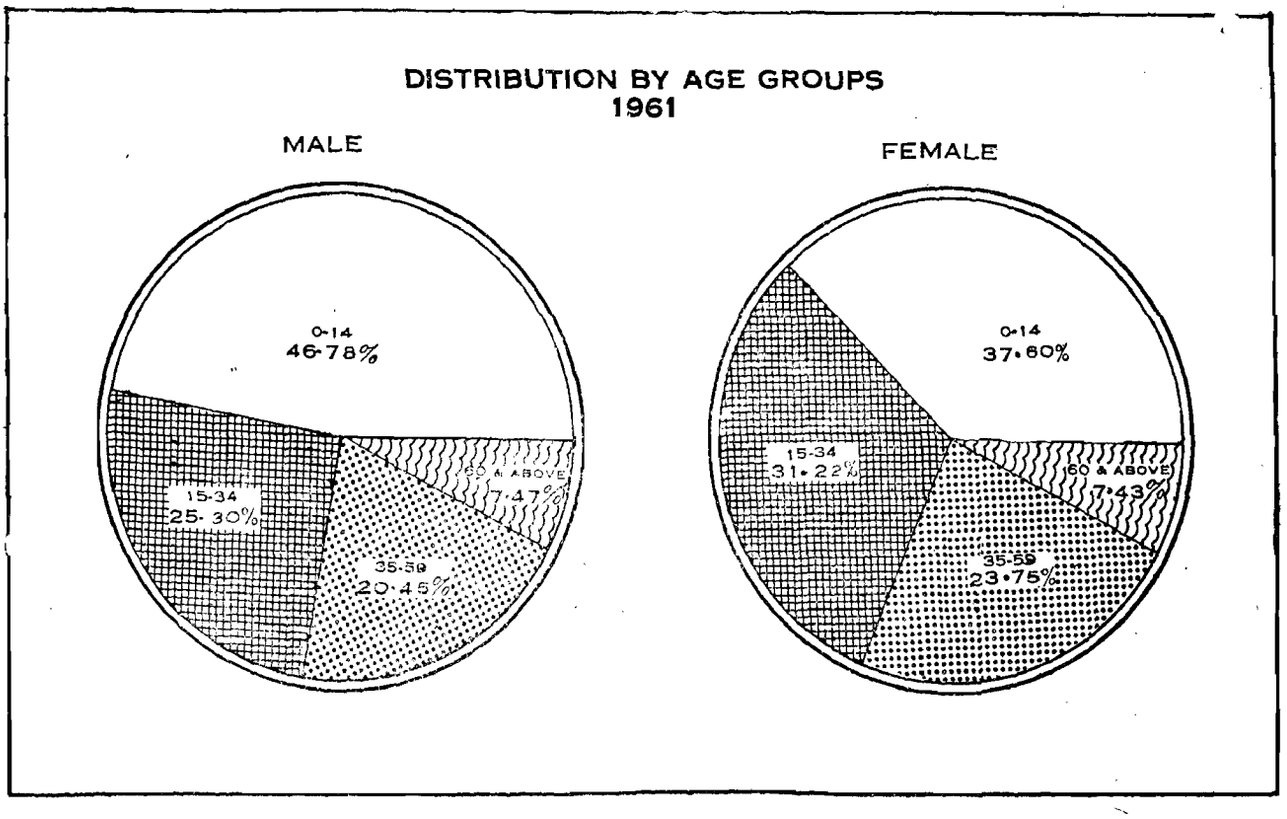

Age-groups	Percentages of population by age-groups			
	1951		1961	
	Males	Females	Males	Females
0—4	14·56	11·73	15·99	12·79
5—14	30·76	24·22	30·79	24·81
0—14	45·32	35·95	46·78	37·60
15—34	25·93	32·22	25·30	31·22
35—59	21·95	24·40	20·45	23·75
15—59	47·88	56·62	45·75	54·97
60+	6·80	7·43	7·47	7·43
Total ..	100·00	100·00	100·00	100·00

Figure below shows the distribution of the district population by broad age-groups for males and females separately.

During the last decade the proportion of children aged 0—4 increased from 14·56 per cent to 15·99 per cent for males and 11·73 per cent to 12·79 per cent for females. The same trend was observed for age-group 0—14. The percentage of aged persons remained the same for females and has increased from 6·80 per cent to 7·47 per cent for males. The percentages for working ages showed a decrease both for males and females.

There is a wide disparity in the age distribution of males and females. It is due to the migration of working age males in large numbers to Greater Bombay. The out-migration of males in age-group 15—59 increases the proportions of 0—14 and 60+ age-groups.

Within the district the difference between the age structures for males and females is much less in urban areas.

Dependency Ratio

The ratio between dependents (age-groups 0—14 and 60+) and 100 of supporting (age-groups 15—59) population has an economic significance: The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State separately :—

		Ratnagiri District			Maharashtra		
		Youth	Aged	Total	Youth	Aged	Total
1951	Total ..	76·3	13·6	89·9	69·9	9·3	79·2
1961	Total ..	82·0	14·6	96·7	75·2	9·7	84·9
	Rural ..	83·1	15·1	98·2	80·6	10·8	91·4
	Urban ..	70·5	9·9	80·4	63·1	7·3	70·4

Compared to 1951 the dependency ratio both for Ratnagiri district and Maharashtra have increased in 1961. The increase in dependency may be partly due to sustained high fertility and declining mortality. Such a trend leads to a younger population. The 1961 population thus has a larger load of dependents than that of 1951. The dependency load is heavier in rural areas than in urban areas. The difference is due to the differences in age structures of rural and urban populations resulting from the migration of working age people.

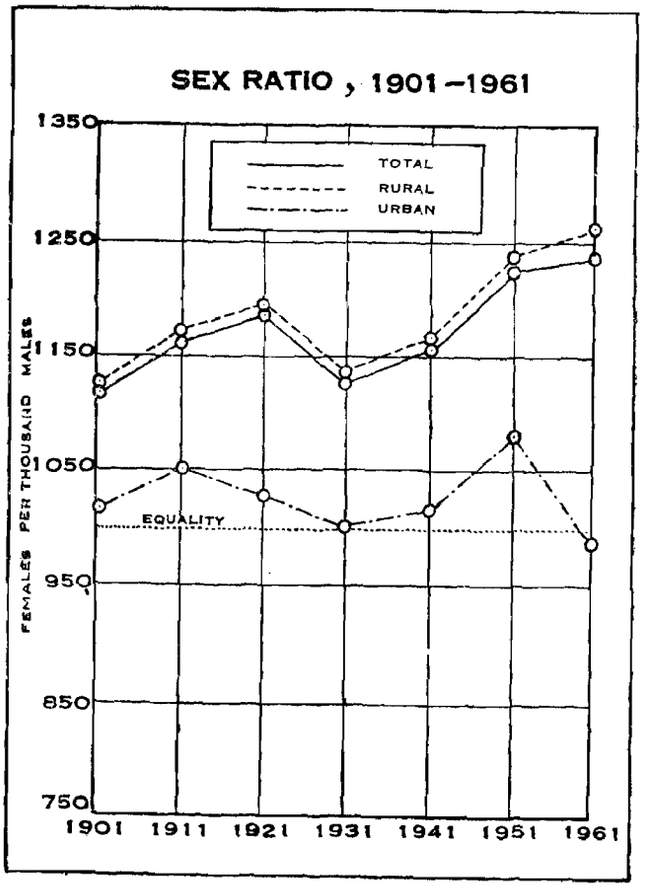

Dependency ratio is considerably higher in Ratnagiri district than the average for Maharashtra. This is because of the migration of workers outside the district and may be an index of the so-called " money order economy".

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 and for total, rural and urban areas separately :—

	Ratnagiri District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901	1,119	1,126	1,020	978	1,002	866
1911	1,164	1,171	1,052	966	1,000	796
1921	1,187	1,195	1,029	950	994	776
1931	1,129	1,135	1,001	947	987	790
1941	1,158	1,167	1,018	949	990	810
1951	1,224	1,238	1,080	941	1,000	807
1961	1,237	1,262	987	936	995	801

Figure in the next column shows the variation in the sex ratios since 1901 for the district total, rural and urban areas separately.

The district has the most unbalanced sex ratio in Maharashtra. The predominance of females is due to out-migration of working age males to Greater Bombay. Moreover, the disparity between the number of males and females has, except for 1931 and 1941 (the decades of depreciation and war), been continuously increasing from decade to decade. This indicates not only an increasing out-migration of males but also the continuing or worsening housing shortages at Bombay because of which the migrants could not take their families there.

The imbalance in the sex ratio is extremely high in rural areas of the district where the sex ratio in 1961 is as high as 1,262. Urban areas do not have predominance of females though the proportion of females there is also considerably higher than the average for urban areas in the State.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas :—

Age-group	Total	Rural	Urban
0—14	994	999	945
15—34	1,527	1,606	962
35—59	1,437	1,474	1,068
60+	1,229	1,234	1,158
All ages	1,237	1,262	987

Except for the age-group 0—14 the sex ratios are very high for both total and rural population. This shows a net out-migration of males in the population of the district in the working age-group (15—59). The abnormal sex ratio of 1,606 for age-group 15—34 in rural areas shows the out-migration of young adult males both for education and employment. This again can be seen from the significant difference in rural and urban age structure for males in contrast with more or less the same age structure in rural and urban areas for females.

The sex ratios for each taluka in the district for total, rural and urban areas separately are as shown below :—

	Total	Rural	Urban
RATNAGIRI DISTRICT ..	1,237	1,262	987
Mandangad Taluka	1,288	1,288	..
Dapoli Taluka	1,299	1,337	1,061
Khed Taluka	1,222	1,239	959
Guhagar Taluka	1,433	1,433	..
Chiplun Taluka	1,202	1,243	968
Ratnagiri Taluka	1,217	1,296	924
Sangameshwar Taluka ..	1,261	1,261	..
Lanja Mahal, ...	1,272	1,272	..
Rajapur Taluka	1,297	1,315	1,139
Devgad Taluka	1,260	1,260	..
Kankavli Mahal	1,241	1,241	..
Malvan Taluka	1,279	1,300	1,160
Kudal Mahal	1,184	1,184	..
Vengurla Mahal	1,075	1,182	820
Sawantwadi Taluka	1,117	1,128	1,033

Sex ratios are extremely high in the northern talukas. Guhagar, Malvan, Dapoli, Mandangad and Rajapur talukas and Lanja mahal appear to be the main regions of out-migration from the district.

Marital Status

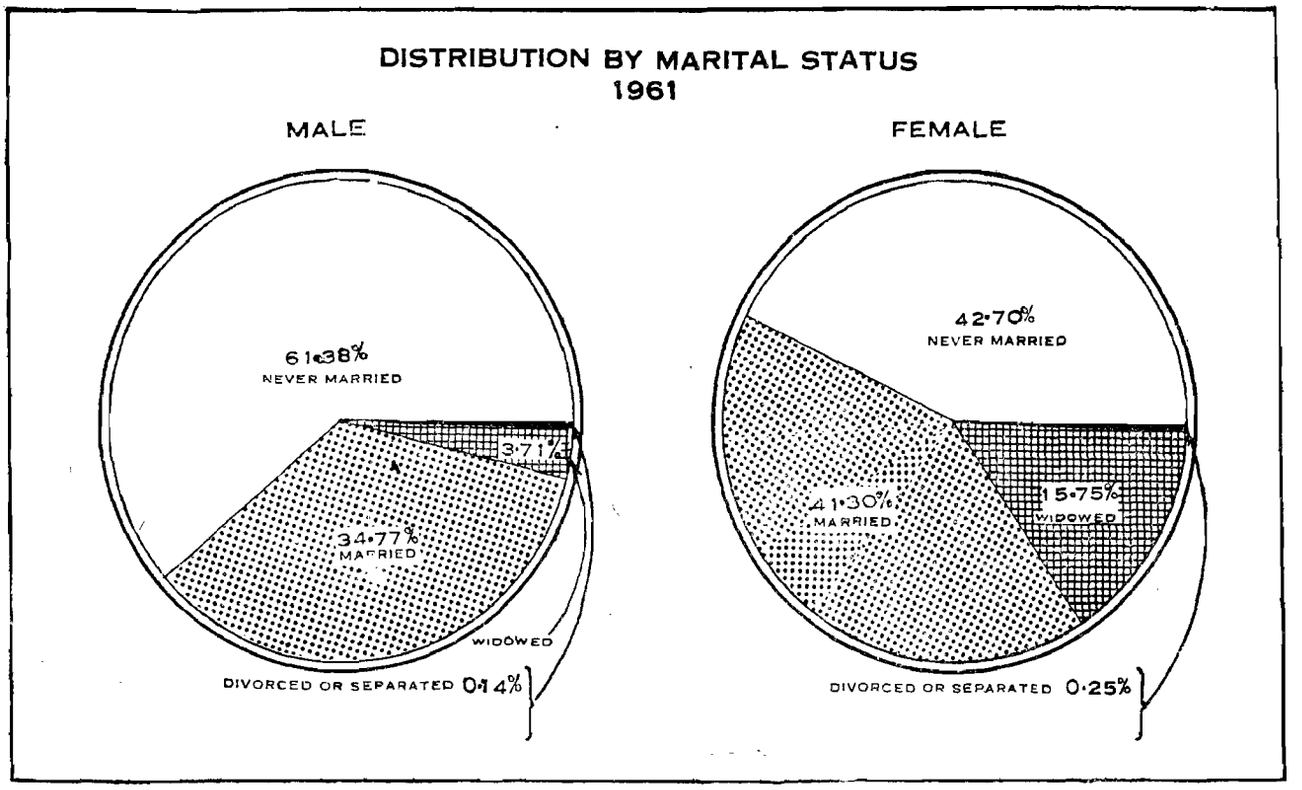

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951.

The Figure on page (21) shows the distribution of the district population by marital status for males and females separately.

During the decade 1951—61 the proportion of never married increased both for males and females. There has been a decrease in the proportion of widowed both for males and females. The proportion of divorced or separated has shown an increase but it is not of any numerical importance. The proportion of married has decreased for both the sexes. As can be expected the proportions of never married and widowed are higher in rural than in urban areas. The differences are more prominent for females than for males. The proportion of never married is higher in urban areas. It may be partly due to higher age at marriage in urban areas.

Year	Age-group	Total	Marital status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14 ..	100	99·85	97·97	0·13	1·98	0·01	0·04	0·01	0·01
	15—34 ..	100	55·02	14·30	43·91	79·56	1·01	6·09	0·06	0·05
	35—54 ..	100	3·54	0·97	88·13	65·00	8·24	33·96	0·09	0·07
	55+ ..	100	1·70	1·37	73·80	22·71	24·49	75·86	0·01	0·06
	All ages ..	100	60·35	40·22	35·26	42·65	4·36	17·09	0·03	0·04
1961	0—14 ..	100	99·81	99·09	0·19	0·91	N	N	..	N
	15—34 ..	100	55·37	17·05	43·79	78·41	0·69	4·11	0·15	0·43
	35—54 ..	100	3·20	0·30	89·59	68·09	6·81	31·14	0·40	0·47
	55+ ..	100	1·16	0·35	76·62	22·94	21·95	76·55	0·27	0·16
	All ages ..	100	61·38	42·70	34·77	41·30	3·71	15·75	0·14	0·25

N=Negligible.

Child Woman Ratio

The following are the child woman ratios for 1951 and 1961, i.e., the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows to 1,000 married women of 15—44 years age-group is also shown for comparison :—

	Number of Children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of Children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of Widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	537	688	144
1961 District Total ..	600	769	114
Rural ..	604	765	114
Urban ..	556	823	115

The child woman ratio for rural areas in the district is higher than that in urban areas. When standardised for married women of 15—44 years age-group, it is higher in urban areas. Over a decade the child woman ratio has increased even when standardised for marital status. It may be due to reduced infantitle mortality. Rural-urban differentials may be due more to the differences in infantile mortality rates than those in the fertility levels.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 144 in 1951 to 114 in 1961. The incidence of widowhood is thus considerably lower in 1961.

Migration

The 1961 proportions of population enumerated at place of birth and other places are as follows :—

Proportions of population by places of birth

—— (1)	Total population (2)	Place of enumeration (3)	Elsewhere in the district (4)	Outside the district but in Maharashtra (5)	Outside Maharashtra (6)
Persons	1,827,203	1,219,599	506,913	75,841	23,077
Males	816,804	675,986	94,447	34,629	11,101
Females	1,010,399	543,613	412,466	41,212	11,976
Percentage to total population—					
Persons	100·00	66·81	27·77	4·16	1·26
Males	100·00	82·83	11·57	4·24	1·36
Females	100·00	53·86	40·87	4·08	1·19

66·81 per cent population (82·83 per cent males and 53·86 per cent females) were enumerated at their place of birth. Most of the migration of women is due to marriage. Bulk of it is within the district. Internal migration of males is partly due to the movement of boys to nearby centres for higher education.

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as shown below:—

Age-group	Sex ratios		
	Total	Rural	Urban
All ages	1,237	1,262	987
0—4	990	994	938
5—9	1,008	1,011	969
10—14	984	990	926
15—19	1,234	1,274	931
20—24	1,590	1,685	959
25—29	1,741	1,851	981
30—34	1,662	1,755	988
35—39	1,597	1,665	1,019
40—44	1,594	1,653	1,101
45—49	1,422	1,460	1,042
50—54	1,331	1,348	1,147
55—59	1,147	1,154	1,048
60+	1,229	1,234	1,158

The sex ratios for age-groups between 20 and 44 years are extremely imbalanced and indicate that about 50 per cent of the males in those age-groups seek employment outside the district and do not take their womenfolk with them. Uneven sex ratios in advanced age-groups also indicate that in spite of long periods of service at Bombay, many migrants do not settle at or take their families to Bombay.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and of non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52.

The percentage of cultivators is very high for those born at the place of enumeration whereas that of agricultural labourers is larger among the migrants from within the district.

Category IX (Other Services) had a very high proportion of persons both from among the migrants within and outside the district.

(1)	Categories of workers									Non-workers
	I	II	III	IV	V	VI	VII	VIII	IX	
	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	31·42	2·46	2·33	1·56	1·49	0·98	1·67	1·12	5·28	51·69
Born at place of enumeration	35·03	2·40	1·90	1·46	1·32	0·33	1·21	0·81	3·64	51·90
Elsewhere in the district	16·74	3·72	2·15	2·44	2·33	1·27	4·06	2·49	15·30	49·50
Outside the district	8·49	0·86	8·97	1·22	2·34	9·96	3·63	2·81	8·89	52·83

Migration to Greater Bombay

A special study of migrants in Greater Bombay undertaken in the 1961 Census has revealed the following very interesting features regarding migrants from the Ratnagiri district. The full report on that study is published in Part X of the 1961 Maharashtra Census Report on Greater Bombay.

There are (in 1961) 494,404 persons in Greater Bombay who are born in Ratnagiri district. Of these, 324,953 or 65·73 per cent are males and 169,451 or 34·27 per cent are females. 255,927 or 78·76 per cent of the males are workers and the remaining 21·24 per cent are non-workers. Among the females only 15,390 or 9·08 per cent are workers and the remaining 90·92 per cent are non-workers. Bulk of the migration is from rural areas. 20·55 per cent of the females are, however, from urban areas of the district while the corresponding proportion for males is 17·41 per cent.

A significant change in the migration pattern from the district is that, of late, more females and more non-workers, both among males and females, are going to Bombay. For Ratnagiri migrants with a stay of 15 years and more in Bombay there are only 440 females per 1,000 males. For migrants with a stay of 5—9 years in Bombay there are 558 females for every 1,000 males. For migrants with less than one year stay in Bombay there are 866 females for every 1,000 males. The sex ratio has thus been improving gradually.

50·08 per cent of the total male workers from Ratnagiri are engaged in Manufacturing Industries, 8·84 per cent in Trade and Commerce, 11·36 per cent in Transport, Storage and Communications and 26·19 per cent in Other Services. By the occupational classification 145,492 or 56·85 per cent of the male workers from Ratnagiri are engaged as production process workers, 34,415 or 13·45 per cent as clerical and related workers, 11,270 or 4·40 per cent as sales workers, 9,739 or 3·81 per cent in Transport and Communication as drivers, conductors or telephone operators, etc., and 39,761 or 15·54 per cent in service, sports and recreational services. This includes mostly personal or domestic services.

By percentage of literacy and educational levels the distribution of migrant workers from Ratnagiri for males and females is as follows :—

	Males	Females
Illiterate	32	80
Literate without educational level ..	28	5
Primary or Junior Basic	31	7
Matriculation and above	9	8
Total ..	100	100

Migrants from Ratnagiri make 44·52 per cent of all migrants to Greater Bombay from within Maharashtra State and 18·54 per cent out of all migrants to Greater Bombay. The current annual volume of migration for 1961 is 32,611 persons, 17,480 males and 15,131 females. This annual migration makes 40 per cent of the current annual migration to Greater Bombay from within Maharashtra and 16 per cent of the current annual migration to Greater Bombay from all parts of India.

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member	9·51	9·33	11·99
2—3 members..	25·13	25·20	24·23
4—6 members..	41·48	41·78	37·20
7—9 members..	17·17	17·04	19·00
10 members and more ..	6·71	6·65	7·58
All sizes	100·00	100·00	100·00

Single member households are 9·51 per cent of the total households. Among the different sizes of households the size with 4 to 6 members is more common (41·48 per cent). The percentage distribution reveals that single member households are more common in urban areas. Similarly, larger size households are more common in urban (26·58 per cent) than in rural (23·69 per cent) areas. The average size of household is 4·93 for the district. It is 4·92 in rural areas and 5·07 in urban areas. Average household size is 5·12 for Maharashtra, 5·11 in rural areas and 5·15 in urban areas. It will be seen that in spite of the sizable out-migration, the average size of the household is not very much smaller in the district. The balance is perhaps restored because of the absence of single member households of seasonal immigrants in the district.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is shown below.

30·80 per cent of the males are the heads of households as against 11·89 per cent females. Married sons are 4·63 per cent of the total males. 58·64 per cent males and 52·37 per cent females, which incidentally form the largest groups, are never married, widowed or divorced relations. Percentages of unrelated persons are 1·96 for males and 0·32 for females. 19·16 per cent of the females are spouses of the heads of households. Daughters-in-law, daughters and sisters of the heads are included in the high proportion of females in the other married relations. The heads of households and their spouses nearly form the same percentage in rural and urban areas. The percentage of married sons is less in urban areas. Unrelated persons have a higher proportion in urban areas. This indicates that domestic servants stay with the households more in urban areas.

	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	30·80	11·89	30·85	11·96	30·10	10·89
(2) Spouses of heads of households	0·28	19·16	0·28	19·06	0·37	20·69
(3) Married sons	4·63	..	4·74	..	3·17	..
(4) Other married relations	3·69	16·26	3·72	16·62	3·23	10·94
(5) Never married, widowed or divorced relations	58·64	52·37	58·54	52·08	59·97	56·62
(6) Unrelated persons	1·96	0·32	1·87	0·28	3·16	0·86
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown in the next column.

		Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual	1951 ..	1,712	*284	*901
Actual	1961 ..	1,827	313	929
Projected	1966 ..	1,966	319	992
Do.	1971 ..	2,130	356	1,082
Do.	1976 ..	2,348	384	1,214
Do.	1981 ..	2,641	414	1,391

* Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V at page 196 in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows :—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Gujarati ..	0·07	0·03	0·49	42·54	57·46
(2) Hindi ..	0·07	0·03	0·47	41·19	58·81
(3) Kannada ..	0·15	0·08	0·88	50·87	49·13
(4) Konkani ..	0·21	0·17	0·70	73·00	27·00
(5) Malayalam ..	0·02	0·01	0·08	65·38	34·62
(6) Marathi ..	94·10	95·15	82·14	92·94	7·06
(7) Tamil ..	0·03	0·01	0·28	26·78	73·22
(8) Telugu ..	0·20	0·15	0·82	67·33	32·67
(9) Urdu ..	5·11	4·35	13·83	78·12	21·88
(10) Others ..	0·04	0·02	0·31	43·34	56·66
All languages ..	100·00	100·00	100·00	91·91	8·09

Marathi is the principal language and was reported by 94·1 per cent of the population. In rural areas Marathi speakers account for 95·2 per cent as against 82·1 per cent in urban areas. Urdu is reported by 5·11 per cent of the population Urdu speakers make as much as 13·8 per cent in urban areas as against 4·4 per cent in rural areas.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Gujarati	0·06	0·06	0·07
(2) Hindi	1·91	0·03	0·07
(3) Kannada	0·05	0·03	0·15
(4) Konkani	0·20	0·14	0·21
(5) Malayalam	..	N	0·02
(6) Marathi	97·66	95·56	94·10
(7) Tamil	N	N	0·03
(8) Telugu	N	0·04	0·20
(9) Urdu	..	4·12	5·11
(10) Others	0·12	0·02	0·04
All languages	100·00	100·00	100·00

N=Negligible.

The proportion of Marathi speakers decreased from 97·7 per cent in 1901 to 95·6 per cent in 1951 to 94·1 per cent in 1961. The percentages of Gujarati and Konkani remained fairly constant. In 1901 Urdu had been combined with Hindi. The proportion of Urdu speakers has increased from 4·12 per cent in 1951 to 5·11 per cent in 1961. This increase compared with an equal reduction in the proportion of Marathi speakers might indicate that some of the Muslims who had returned Marathi as their mother-tongue have instead returned Urdu in 1961. Language figures for 1901 pertain to the district as it existed then and do not include the erstwhile Sawantwadi State.

RELIGIONS

Table C-VII at page 198 in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is shown in the next column.

87·5 per cent of the population reported their religion as Hindu. Muslims are only 5·1 per cent in rural areas but make as much as 15·7 per cent in urban areas. Buddhists account for 5·5 per cent of the total population of the district. In rural areas their percentage is 5·83 per cent against 1·45 per cent in urban areas. Christians and followers of other religions are similarly more in urban areas. The Hindus and Buddhists are more numerous in rural areas than in urban areas.

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	5·48	5·83	1·45	97·86	2·14
(2) Christians ..	0·88	0·71	2·89	73·62	26·38
(3) Hindus ..	87·47	88·16	79·69	92·63	7·37
(4) Jains ..	0·17	0·16	0·26	87·33	12·67
(5) Muslims ..	5·98	5·13	15·69	78·77	21·23
(6) Others ..	0·02	0·01	0·02	87·73	12·27
All religions ..	100·00	100·00	100·00	91·91	8·09

The comparative position of the religions in 1901 and 1961 is shown below :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists	..	5·48
(2) Christians	0·75	0·88
(3) Hindus	92·68	87·47
(4) Jains	0·19	0·17
(5) Muslims	6·38	5·98
(6) Others	..	0·02
All religions	100·00	100·00

The proportion of Christians increased from 0·75 per cent to 0·88 per cent during 1901 to 1961. Jains have retained more or less the same percentage over the last sixty years. The proportion of Muslims has decreased from 6·4 per cent in 1901 to 6·0 per cent in 1961. The percentage of Hindus decreased by 5·2 per cent. This is due to some persons belonging to Hindu Scheduled Castes returning their religion as Buddhists or Nav-Bauddhas in the 1961 Census. The combined proportion of Hindus and Buddhists, however, remained almost unaltered.

Sex ratios in 1961 by main religions are as follows: Muslims 1,364; Hindus 1,234; Buddhists 1,193; Christians 1,134; Jains 918 and all religions 1,237. These sex ratios reveal the heavy out-migration of males from among the major religious groups in search of employment outside the district.

SCHEDULED CASTES

Table SCT-I-Part A at page 202 in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste for the district and each taluka separately. Actually, 24 castes are notified as Scheduled Castes but only 10 are reported in the district in 1961. The distribution of the Scheduled Caste population by rural and urban areas is shown below.

The remaining 14 Scheduled Castes for which no one was returned in 1961 Census in the district are as follows :—

(1) Baked, (2) Chalvadi, (3) Chenna Dasar, (4) Garoda, (5) Haller, (6) Halsar, (7) Holaya, (8) Lingader, (9) Mahyavanshi, (10) Meghval, (11) Mukri, (12) Pasi, (13) Tirgar and (14) Turi.

Out of the nine Scheduled Castes reported in the district the largest number is of Mahars. The second largest group is of Chambhars. The remaining seven Scheduled Castes have together 480 population which makes less than 0·03 per cent of the total population of the district. In fact four out of them, viz., Ager, Dhor, Nadia and Shenva have only one person each in the district.

The comparative position of the Scheduled Castes population in 1951 and 1961 within the district is as follows :—

All Scheduled Castes—	Percentage to total population in		
	Total Area	Rural Areas	Urban Areas
1951	7·53	7·96	3·29
1961	2·08	2·12	1·60

22003.

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
All Scheduled Castes*	18,420	19,519	2·08	93·77	6·23
(1) Ager	1	..	N	100·00	..
(2) Bhangi	127	110	0·01	16·46	83·54
(3) Chambhar	8,034	8,916	0·93	92·68	7·32
(4) Dhor	1	..	N	100·00	..
(5) Holar	50	43	0·01	96·77	3·23
(6) Mahar	10,082	10,314	1·12	95·56	4·44
(7) Mang (including Mang-Garudi)	76	70	0·01	89·73	10·27
(8) Nadia	1	..	N	..	100·00
(9) Shenva	1	..	N	100·00	..

*Inclusive of persons from the Scheduled Castes who have not stated their individual castes. N=Negligible.

The reduction of the proportion from 7·53 to 2·08 is the result of a large number of persons from Mahars returning their religion in 1961 Census as Buddhist or Nav-Bauddha. Due to the change of religion they are not treated as Scheduled Castes as the Constitution recognises Scheduled Castes from Hindu and Sikh religions only. But for that change of religion the total population of the Scheduled Castes would have made over 8 per cent of the district population in 1961.

Literacy

Table SCT-III-Parts A (i) and B (i) at page 208 in Part II shows the literacy and educational levels for each Scheduled Caste. The percentage of literacy for the district population, for all Scheduled Castes population and each Scheduled Caste are as shown below.

Although the males of the Scheduled Castes are not very much behind in literacy than the general male population of the district, still the Scheduled Caste females have comparatively lagged behind. The Scheduled Castes are no doubt taking advantage of the educational facilities and concessions available in the district.

Name of Scheduled Caste	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	26·55	40·24	15·71	50·47	61·26	39·53
All Scheduled Castes	14·74	24·83	5·35	30·64	43·62	15·55
(1) Ager	No literates			..	..	..
(2) Bhangi	30·77	34·78	25·00	36·87	49·04	23·40
(3) Chambhar	16·79	27·16	7·59	31·83	43·78	18·64
(4) Dhor	100·00	100·00	..	..	..	..
(5) Holar	4·44	8·51	No literates	33·33	33·33	..
(6) Mahar	13·08	23·03	3·47	27·62	42·06	9·48
(7) Mang (including Mang-Garudi)	18·32	31·88	3·23	26·67	57·14	No literates
(8) Nadia	..	..	..	100·00	100·00	..
(9) Shenva	100·00	100·00	..	..	..	..

Economic Activity

The industrial classification of persons at work and non-workers for the district average for all Scheduled Castes and for each Scheduled Caste is as follows :—

	Percentage of workers in categories			Non-workers
	I	II	III to IX	
District Average ..	33·74	2·73	8·45	55·08
All Scheduled Castes	21·89	8·01	19·09	51·01
(1) Ager ..	..	..	100·00	..
(2) Bhangi ..	..	..	46·41	53·59
(3) Chambhar ..	26·74	4·68	11·47	57·11
(4) Dhor ..	..	..	100·00	..
(5) Holar ..	..	..	58·06	41·94
(6) Mahar ..	18·06	11·01	24·82	46·11
(7) Mang (including Mang-Garudi)	6·16	..	43·15	50·69
(8) Nadia ..	..	..	100·00	..
(9) Shenva ..	..	..	100·00	..

The proportion of workers for the Scheduled Castes is more than that of the total population of the district. The proportion of cultivators is lower and that of agricultural labourers is higher than the district average. This is due to the association of a few Scheduled Castes with certain services as well as to a fewer persons owning lands amongst them.

Size of Land Cultivated

Tables C-I and SCT-V-Part A at pages 190 and 209 in Part II show a broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Castes in rural areas, respectively. The proportions are as follows :—

Size of land cultivated	District rural population		All Scheduled Castes	
	No. of sample households	Percentage	No. of sample households	Percentage
All sizes ..	51,832	100·00	708	100·00
Less than 5 acres	41,868	80·78	660	93·22
5—9·9 acres ..	6,242	12·04	35	4·94
10—29·9 acres ..	3,320	6·40	13	1·84
30 acres and over ..	402	0·78	..	..

Out of a sample of 51,832 cultivating households, 708 or 1·4 per cent are from the Scheduled Castes against their population which is 2·12 per cent of the rural population. 93·22 per cent of the cultivating households of the Scheduled Castes are cultivating less than five acres of land against the corresponding average of 80·78 per cent for the district. The percentage of households cultivating land over five acres among Scheduled Castes is 6·78 per cent only as against the corresponding average of 19·22 per cent for the district. The proportion of cultivating households is thus smaller in the case of Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I-Part B at pages 206-207 in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Six Scheduled Tribes are reported in the district in 1961 Census. Their total population, however, is only 3,101 or 0·17 per cent of the total population.

The distribution of the Scheduled Tribes population by rural and urban areas is as shown below.

The remaining 13 Scheduled Tribes for which no one was returned in the district in 1961 are as follows :—

(1) Barda, (2) Bavacha, (3) Chodhara, (4) Dhanka, (5) Dhodia, (6) Dubla, (7) Gamit, (8) Gond, (9) Patelia, (10) Pomla, (11) Rathawa, (12) Varli and (13) Vitolia.

Kathodi with 2,941 persons is the largest Scheduled Tribe in the district. They are found largely in the talukas of Mandangad, Dapoli, Khed and Chiplun. The other tribes have very small populations.

The Scheduled Tribes population in the district has gone down from 3,553 in 1951 to 3,101 in 1961.

Literacy and Education

The Scheduled Tribes in the district are very much behind in literacy and education. Bhils appear to be the most depressed group in this respect, as there are no literates among them. Females from Kathodis (the largest tribe in the district) are all illiterate while the male literacy among them is as low as 1·55 per cent in rural areas.

Economic Activity

More than half of the workers from the Scheduled Tribes work as cultivators and agricultural labourers.

Name of Scheduled Tribe	Population		Percentage to total population of the district	Percentage of each Scheduled Tribe population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Tribes	1,622	1,479	0·17	97·23	2·77
(1) Bhil	25	21	N	100·00	..
(2) Kathodi	1,533	1,408	0·16	97·08	2·92
(3) Kokna	3	5	N	100·00	..
(4) Kolidhor	1	..	N	100·00	..
(5) Naikda	8	2	N	100·00	..
(6) Pardhi	52	40	0·01	100·00	..

*Inclusive of persons from the Scheduled Tribes who have not reported their individual tribe. N=Negligible.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of Standing Committee, which is the most powerful committee of the Zilla Parishad, at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the Subject Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(*i*) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, Nomadic and Semi-nomadic Tribes, Vimukta Jatis and the Backward Classes. The concession is awarded in the Primary Schools, High Schools or Technical Schools. 727 students were benefited and Rs. 38,936 were spent on these schemes during the year 1962-63. Grant-in-aid was given to 14 backward class hostels and one cosmopolitan hostel in the district in 1962-63.

(*ii*) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for cottage industries and professions and of assistance for purchase of milch cattle to the Scheduled Castes and other backward classes. Under the scheme of loan-*cum*-subsidy for cottage industries and professions, Rs. 13,035 were given to 72 beneficiaries and 2 societies from the Scheduled Castes and backward classes from under-developed rural areas during the year 1962-63 and Rs. 2,250 were spent on 10 beneficiaries under the scheme of assistance for purchase of milch cattle.

(*iii*) *Housing.*—A number of housing cocieties of Backward Classes have been formed in the district. These societies construct houses for their members. Financial assistance in the form of loan and subsidies is given to these societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other backward classes is also provided. Under this scheme Rs. 4,800 were given to 47 beneficiaries.

(*iv*) *Drinking Water Wells.*—An amount of Rs. 25,350 was spent under this scheme. Rs. 1,350 were spent for repairs of wells in or near Scheduled Castes localities for 3 beneficiaries while Rs. 14,500 were incurred for drinking water wells for Scheduled Castes for 20 beneficiaries.

(*v*) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to the Scheduled Castes and Rs. 427 were spent during the year on 14 beneficiaries.

(*vi*) *Agricultural.*—Financial assistance is given to poor deserving agriculturists from Scheduled Tribes, Vimukta Jatis and other backward classes in under-developed rural areas to purchase ploughs, bullocks, implements, seeds, carts, etc. Rs. 225 were spent on 3 beneficiaries under this scheme during the year 1962-63.

(*vii*) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film shows and gatherings are addressed at fairs and other places. Kirtan programmes and melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan schemes. The expenditure described above against each scheme is out of the committed schemes and does not include expenditure on the Plan schemes. There are in addition some more schemes sponsored by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification base on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes".

Concessions to Buddhists

From 1st May 1960, the Scheduled Castes converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

Phenomenal growth in the number of secondary schools marks the progress of education during the last decade. Schooling facilities are now available to almost every village in the district. Female literacy has also increased considerably.

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is given in next column.

	Total	Males	Females
1901	5·26	10·90	0·29
1911	4·35	9·00	0·38
1921	4·64	9·29	0·76
1931	6·53	12·55	1·24
1941	14·94	25·77	5·70
1951	17·70	28·70	8·80
1961	28·49	42·16	17·44

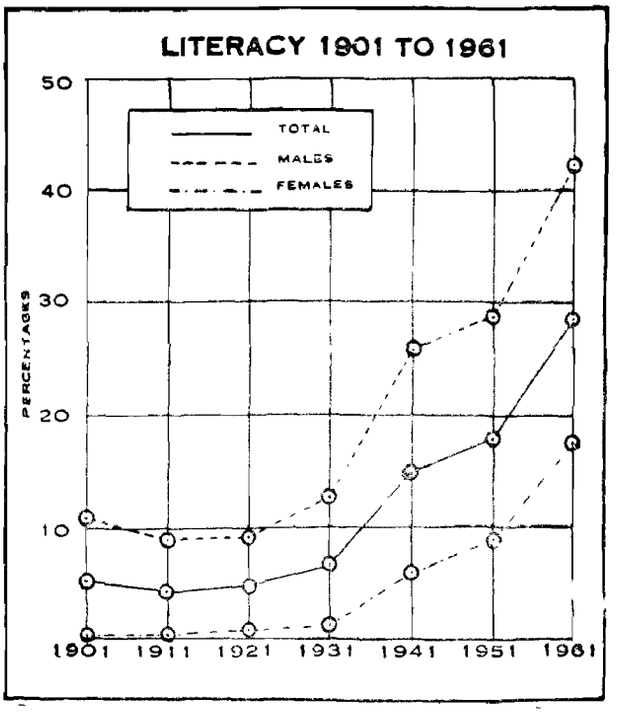

Figure to the right shows the growth of literacy in the district for total population, males and females separately.

The level of literacy in this district has increased more than five times during the last sixty years. The decade 1951—61 has had a very rapid rise as the percentage of literates has increased from 17·70 in 1951 to 28·49 in 1961.

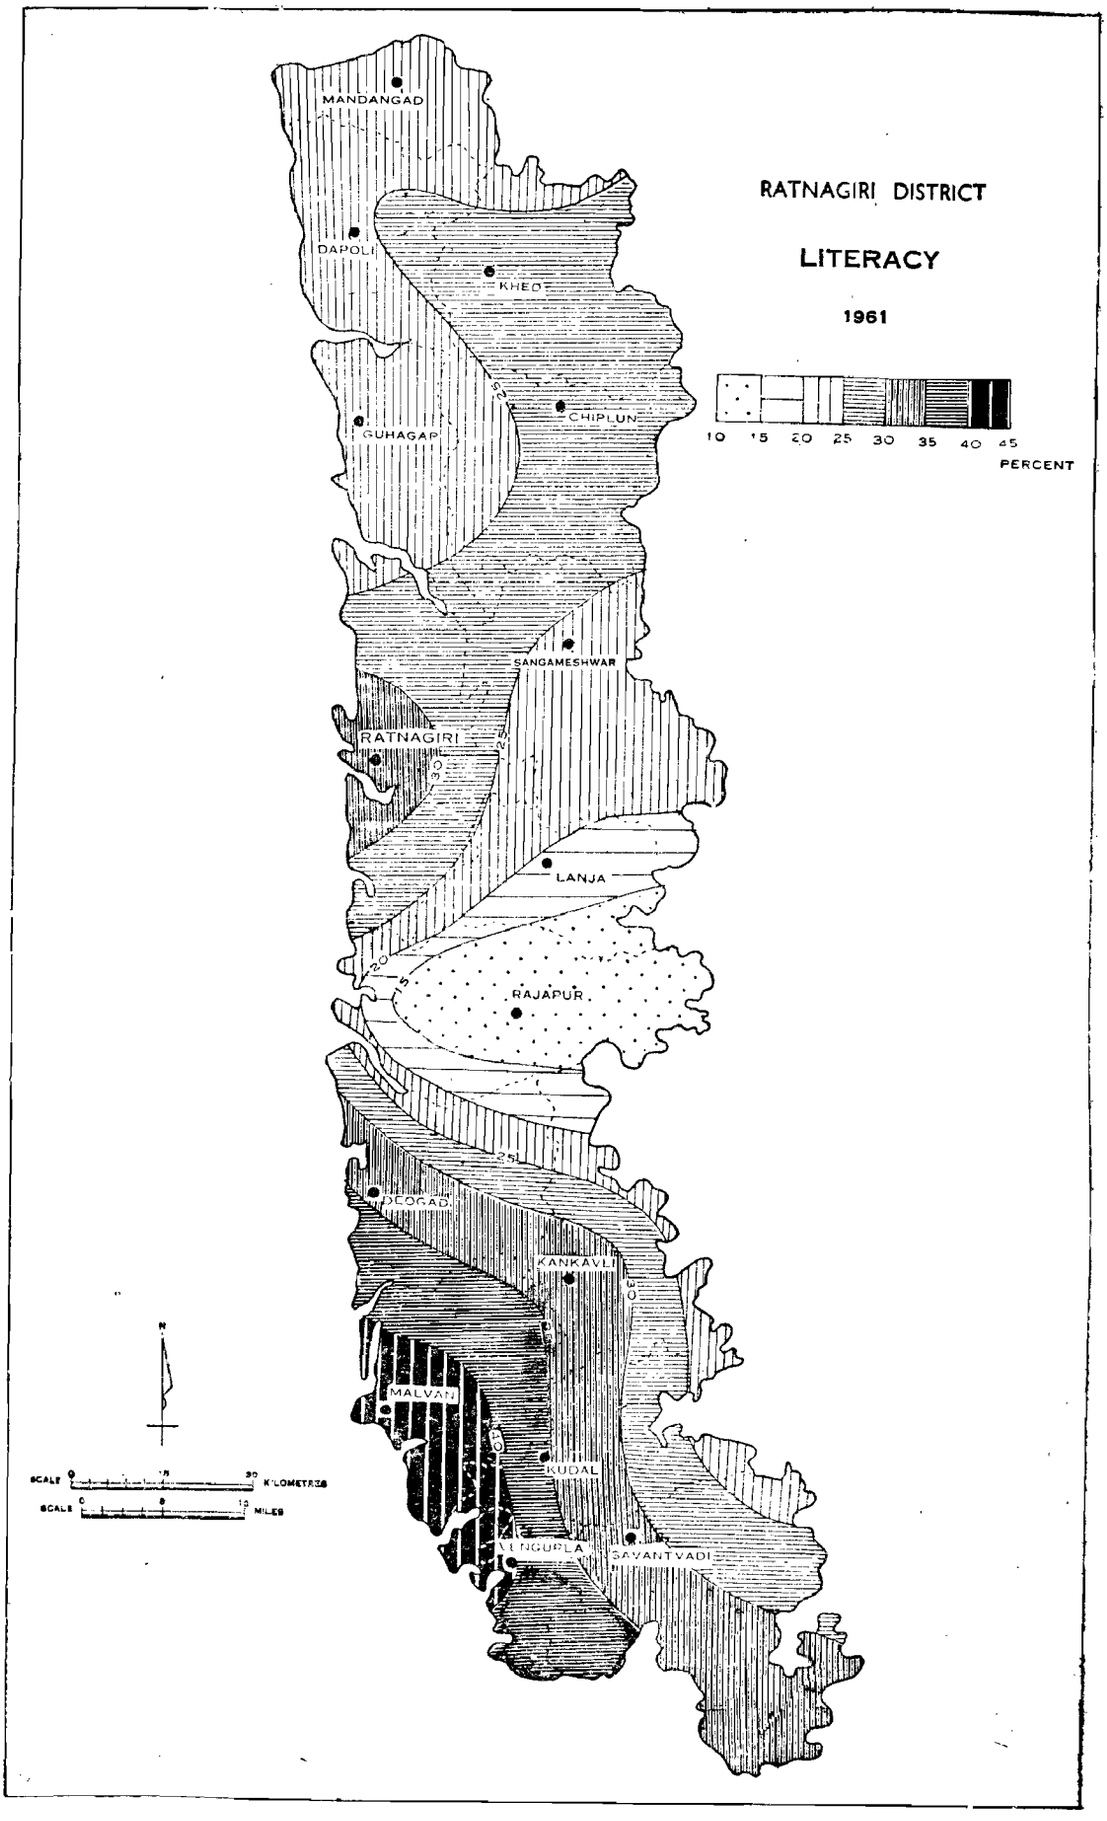

Female literacy has almost doubled during the decade 1951—61. Introduction of the scheme of compulsory primary education may be one of the contributory causes for such rapid advance.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately.

The Figure on page (30) also shows the spread of literacy in the district by isoplyths.

State/District/Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

SCALE 0 5 10 MILES

The most literate area is located roundabout Malvan in the south-west corner of the district. The southern talukas have comparatively higher literacy rates than those in the north. Malvan taluka has the highest literacy rates for total, males and females. Lowest rates are in Lanja mahal. In rural areas also Malvan taluka has the highest literacy rates. In urban areas, however, Sawantwadi taluka has the highest literacy percentage for total population, while Malvan has the highest rate for males and Khed taluka has the highest rate for females.

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are shown below. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

Literacy for males is high because of the high figures for the age-group 15—34 and 35—59. It is an indication of persistent educational activity over a period of 30 to 40 years as well as effective campaign for adult education.

High figures for females for the age-group 5—14 are a result of the efforts to promote primary education since independence.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as follows:—

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	I—IV Multi-teacher	Middle I—VII	
Total No. of Schools.	2,645	209	21	29	1,177	184	1,025
State Government.	4	4	..	..	..	..	..
Zilla Parishad	2,518	202	21	29	1,089	163	1,014
Municipal ..	..	..	..	..	..	..	..
Private ..	123	3	..	..	88	21	11

There has been a steady growth in the number of primary schools in the district during the last ten years. The number of primary schools was 2,257 in 1951. It rose to 2,438 in 1956 and to 2,611 in 1961. On 31st March 1962, it stoot at 2,645. Out of the 2,645 primary schools, 95·35 per cent (i.e., 2,522) are managed by State Government and Zilla Parishad and only 4·65 per cent are managed by private institutions. The State Government's share in 1961-62 was 95·7 per cent of the total expenditure. The expenditure on primary education on Government account is incurred through grants-in-aid to Zilla Parishad and building loans and grants to primary teachers' training colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Also the students from Scheduled Castes and Scheduled Tribes get free education at the cost of the Government. Scholarships are given to students from Scheduled Castes and Scheduled Tribes at the rate of Rs. 3 per year in standards I and II

and Rs. 6 per year in standards III and IV. Also Government gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools is also making steady progress in this district. In the First Plan period 145 schools were converted into basic schools. During the Second Plan period additional 70 primary schools were converted into basic schools. On 31st March 1962 the total number of basic schools stood at 259.

By 31st March 1962, 13 towns and 1,431 villages in the district had primary schools and 64 villages had schooling facilities, i.e., primary schools situated within a mile from the village. Twenty-one villages did not have even schooling facilities. Total number of teachers was 6,937. Out of them, 3,530 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Ratnagiri District	Maharashtra
Average population served by a primary school	699	1,135
Average area served by a primary school .. (sq. miles)	1·9	3·4
Pupils per teacher	41	38
Pupils per school	108	127
Average annual salary per teacher .. .. .. (Rs.)	1,145	1,250
Average annual expenditure per school .. .. .. (Rs.)	3,141	4,903
Average number of teachers per school	2·6	3·3
Percentage of trained teachers ..	50·9	64·8

The scheme of compulsory primary education was introduced in the district in 1947-48. Initially the scheme was applied to villages having population of 1,000 or more. In 1951, it was applied to children in the age-group 7—11. In 1956, the scheme was applied to children in the age-group 7—8 in villages having population between 500 to 1,000. As a result, the indices of the progress of primary education shown above compare favourably with those of the State in many respects.

One of the Third Plan Schemes is to extend the scheme of compulsory primary education to children in the age-group 6—11. A provision of Rs. 34·81 lakhs has been made in the Third Plan for various schemes under primary education in the district. During the Plan period additional 320 teachers would be appointed in primary schools. The number of students in primary schools is expected to rise by 16,000. Similarly, 207 class rooms are proposed to be built during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the year 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools	
			Multi-purpose	Ordinary
State		..	..	..
Municipal		..	..	..
Private	116	..	11	105

Total number of students on roll in the secondary schools during the year 1961-62 was 23,429. Out of them, 17,760 were boys and 5,669 girls. Total number of teachers was 1,045. Out of them, 587 were trained teachers. Percentage of trained teachers was thus 56.2. Other indices of secondary education compared to the State averages are as follows :—

	Ratnagiri District	Maharashtra
Population served by each high school..	15,945	13,805
Area served by each school (sq. miles)	43·3	40·8
Pupil-teacher ratio	22	25
Pupils per secondary school	202	338
Average annual salary per teacher (Rs.)	1,657	1,870
Average annual expenditure (direct) per secondary school .. .. (Rs.)	22,623	39,543
Average number of teachers per secondary school	9·0	13·7

Figure on the next page shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

The progress of secondary education in the district is quite impressive. The number of secondary schools increased from 43 in 1950-51 to 52 in 1955-56 and to 101 in 1960-61. On 31st March 1962 the number was 116. The secondary schools are well dispersed throughout the district.

The highest number of schools is in Malvan taluka which has 15 High Schools. Khed and Guhagar talukas and Lanja mahal have two schools each, which is the lowest number.

Private institutions alone manage all the secondary schools in the district. The Government share in the total expenditure on secondary education was 76·8 per cent in 1961-62. It is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in the primary schools, the number of pupils in the secondary schools may rise to 30,000 by 1965-66 and to 41,000 by 1970-71.

S. S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October, and Chiplun, Dapoli, Malvan, Ratnagiri, Sawantwadi, Vengurla, Devgad and Rajapur are the examination centres in the district. The numbers of candidates who appeared and passed from the district during the year 1962 are as follows :—

	Appeared	Passed
Examination held in—		
March 1962	3,350	1,778
October 1962	931	393
Total ..	2,171	

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. There was only one college, viz., the R. P. Gogate College of Arts and Science in 1945. An Arts and Science College at Sawantwadi and an Arts and Commerce College at Vengurla have been started from 1961. The R. P. Gogate College has made arrangements for training students appearing for T.D. The number of college students rose from 235 in 1950-51 to 410 in 1960-61. All the three colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government.

Technical Education

There are five technical institutions recognised by the Department of Technical Education. They are as follows: (1) Technical-*cum*-Industrial Centre, Ratnagiri; (2) Topiwala Memorial Technical School, Sawantwadi; (3) Mahila Vidyalaya, Ratnagiri; (4) Mahila Kala Mandir, Malvan; and (5) Rajapur High School (Composite), Rajapur.

The first two institutions are managed by Government while the remaining three are private. The Government Technical Centre at Ratnagiri conducts Diploma Courses in carpentry, motor mechanic, fitter, tracer, wireman and electrician. The school at Sawantwadi conducts courses in tailoring, handloom weaving, carpentry and typography. A Polytechnic has been started at Ratnagiri recently.

Libraries

There are 25 libraries in the district recognised by the Government of Maharashtra, as standing on 31st March 1962. Out of the 25 libraries one is a district library, 14 are taluka libraries and 10 town libraries. The district library gets an annual maximum Government grant of Rs. 6,000 and taluka and town libraries, Rs. 1,000 each.

Printing Presses, Journals and Newspapers

There are 28 printing presses in the district. The number of journals and newspapers is 18. Of these, 11 are weeklies, 1 monthly and 6 journals.

Radio Licences

The number of radio licences in the district was 1,326 in 1956-57. It rose to 1,362 in 1959-60.

Cinema Theatres

There were nine permanent theatres, one quasi-permanent and four touring talkies in the district in December 1963.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health Activities in the district.

Drinking Water Supply

Column (5) in the Village Directory in Part I shows the sources of supply and adequacy of drinking water for each village in the district.

Only two towns and one village have piped water supply. Out of the remaining towns and

villages, 34 villages draw drinking water from rivers, 8 villages from nallahs, 36 villages from canals, 3 villages from tanks, 10 villages from springs, 634 villages and 7 towns from wells and 4 towns and 790 villages have more than one of these sources. The water supply is not adequate in summer in the case of 322 villages and 3 towns.

Malaria Eradication

The malaria eradication scheme has been in operation since 1958. For the purpose of this scheme, the district has been divided into two zones, one comprising the talukas of Ratnagiri, Chiplun, Sangameshwar, Guhagar, Dapoli, Khed and Mandangad and the other comprising of Kankavli, Kudal, Vengurla and Lanja mahals and Rajapur, Devgad, Malvan and Sawantwadi talukas.

There are four sub-centres at Ratnagiri, Chiplun, Khed and Dapoli. DDT spraying has been carried out throughout the district during the three years since the inception of the campaign. Efforts are now directed at eradicating malaria by carrying on investigations to find out malaria patients with the help of Village Panchayats and treating them.

Leprosy Control

There is one Leprosy Centre at Ratnagiri where 100 patients can be accommodated. 1,707 patients were treated during 1951 to 1961 of which 230 were cured. There are four sub-centres at Chiplun, Dapoli, Kotavde (Ratnagiri taluka) and Khed for treatment of patients.

Anti-T. B. Campaign

A special ward has been opened for T.B. patients in the Civil Hospital at Ratnagiri with a provision of 12 beds. B.C.G. vaccination programme is being carried out in the district by mobile B.C.G. teams of the Public Health Department. X-Ray plant has also been installed at the Cottage Hospital at Sawantwadi.

Family Planning

There are seven family planning centres at Khanu, Kankavli, Dapoli, Kotavde, Wave, Ratnagiri and Vengurla.

Medical Facilities

Medical facilities available in the district are shown in Table 17 of Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The numbers of private practitioners, hospitals and dispensaries are not shown there.

The numbers of indoor and outdoor patients have increased between 1951 and 1960. The numbers of doctors, nurses and beds have, however, declined in 1960 after a temporary increase in 1955.

The number of doctors rose from 18 in 1950 to 51 in 1955 and declined to 43 in 1960. Similarly, the number of nurses rose from 14 in 1950 to 59 in 1955 and declined to 34 in 1960. The number of beds rose from 150 in 1950 to 249 in 1955 and declined to 210 in 1960.

The number of indoor patients increased from 3,465 in 1950 to 7,868 in 1960. The number of outdoor patients increased from 109,735 in 1955 to 170,476 in 1960.

Hospitals—The Civil Hospital at Ratnagiri is the main Government hospital at the district headquarters. There are also two other hospitals managed by Government, viz., the Mental Hospital and Sir D. M. P. Leprosy Hospital. The Civil Hospital at Ratnagiri (now called the General Hospital, Ratnagiri) has been vastly improved during the period of the First Plan. As already stated a special ward for T. B. patients with 12 beds has been opened. A centre for treating ex-servicemen has also been started with six beds. A new X-Ray plant has also been installed. The Mental Hospital at Ratnagiri was established in 1886. About 350 inmates are treated in this hospital. "Electric shock" and Insulin Treatment are now available to the patients.

There are two cottage hospitals at Sawantwadi and Dapoli.

Dispensaries—In 1960, there were 42 Government aided dispensaries, 7 belonging to the District Local Board (now Zilla Parishad) and 6 belonging to Municipalities of which one was Ayurvedic and the rest were allopathic.

Primary Health Centres—At the end of 1960, there were nine primary health centres in the district of which two each were in Ratnagiri and Khed talukas, one each in Dapoli and Sawantwadi talukas and three in Sangameshwar taluka. In addition, there were 27 sub-centres.

Maternity and child welfare centres are functioning at Kudal and Dapoli.

There were 42 subsidised medical practitioners working in rural areas of the district in 1960.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 1,283.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classification by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 32 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

Fifty-nine per cent of the houses are used as dwellings, 31 per cent as cattle sheds, etc., 4 per cent were vacant at the time of the Census, and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 61·7 in 1951 to 70·5 in 1961. The number of persons per residential house has, however, decreased from 5·7 in 1951 to 5·2 in 1961. This may indicate increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by " owned " and " rented " categories, 93 per cent of the dwellings in the district are owned and 7 per cent are rented. The proportion of owned is higher (95 per cent) in the rural areas but lower (62 per cent) in the urban areas. Even this low proportion of 62 per cent for the urban areas in the district is much higher than the average of 30 per cent for urban areas of Maharashtra.

Out of the various materials used for walls, mud appears to be predominant in the district with a proportion of about 54·2 per cent of occupied houses. Mud walls are more common in rural areas as 55·5 per cent of the occupied dwellings are having such type of walls compared to 35·8 per cent in urban areas. Its proportions in the talukas of Mandangad, Dapoli and Khed are a little lower and the difference is made up by walls of stone and unburnt bricks. Unburnt bricks are predominant in the north and gradually decrease in predominance towards the south where mud walls are very common. Stone is not used as much in rural areas as in urban areas. Its proportion is only 18·8 per cent in the rural areas against 31·4 per cent in urban areas. Unburnt bricks appear to be predominant in the rural areas with a proportion of 15·3 per cent as against 11·6 per cent in the urban areas.

Out of the materials of roof, tiles are predominant in the district with a proportion of 70·1 per cent of occupied dwellings. The use of tiles for roofs is more (86·5 per cent) in urban areas than (69 per cent) in rural areas. Along with tiled roofs, roofs of grass, leaves, etc., also have a proportion of 30·2 per cent in rural areas. Tiles for roofs are used predominantly in almost all talukas except Sangameshwar and Lanja mahal where roofs of grass and leaves are more common. In Guhagar and Chiplun talukas, tiles and grass, leaves, etc. for roofs are used in almost equal proportions. The district falls in the heavy rainfall tract where the houses have roofs with slopes. Tiles, grass and leaves are, therefore, the common materials used. Corrugated iron and zinc sheets appear to be more in use in urban areas with 3·2 per cent while they are rarely used in rural areas and make only 0·6 per cent.

Classified by the number of rooms occupied, 49·6 per cent households are occupying one-room dwellings and 27·8 per cent are occupying two-room dwellings. The households occupying more rooms are more in the urban than in rural areas. Average number of persons per room is 2·69 for total, 2·76 for rural and 2·06 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the most important economic activity as it engages 81·19 per cent of the working population in the district. Most of the others also work in industries related to processing of agricultural produce or trade, transport and services ancillary to agriculture.

Tables 3 to 10 in Part III present statistics regarding land utilisation, crop pattern, irrigation, wholesale and harvest prices and livestock and agricultural implements, etc., for the district.

Cultivating Seasons

As in other areas of the State, there are two agricultural seasons, viz., Kharif and Rabi in this district also. But the district has almost negligible area under cultivation in rabi season. Rice, Ragi, small millets, Kodra and Varai, Pulses, Kulthi, Udid and Chavli are the main crops of the kharif season. Winter rice, Kulthi and Wal are grown in rabi season. Rice and Kulthi are grown in both seasons. Patni, Waksal, Warangal and Kolamba varieties are grown in kharif and Patni-6 variety is much preferred in rabi. More than 95 per cent of the area under rice is, however, cultivated in kharif season. Winter rice is mainly grown in irrigated lands in Sawantwadi, Kudal and Malvan talukas. The sowing and harvesting periods for these crops are shown below :—

Crop	Sowing period	Harvesting period
(a) *Kharif Season*—		
(1) Rice	May-June	Sept.-Nov.
(2) Ragi	June-July	Oct.-Nov.
(3) Kodra, Varai	June-July	Oct.-Nov.
(4) Kulthi, Udid	July	Oct.-Nov.
(5) Tur	July	Oct.-Nov.
(b) *Rabi Season*—		
(1) Rice	Nov.-Dec.	March-April.
(2) Kulthi, Udid	Nov.-Dec.	Feb.-March.
(3) Wal	Nov.-Dec.	Feb.-March.
(c) *Perennial*—		
Sugarcane	Jan.-Feb.	Feb.-April.

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on averages for three years from 1957-58 to 1959-60.

The Figure at page (38) shows the land utilisation pattern for the year 1959-60 for the district and each taluka separately.

The net area sown in the district is only 27·73 per cent of the geographical area against the average of 57·69 per cent for the State. This extremely low proportion is due to the high proportion of barren and unculturable lands. So-called "warkas" lands have to be left fallow for 4-5 years for accumulation of soil. The proportion of other fallow lands is, therefore, also high, i.e., 16·77 per cent against the average of 4·46 per cent for the State.

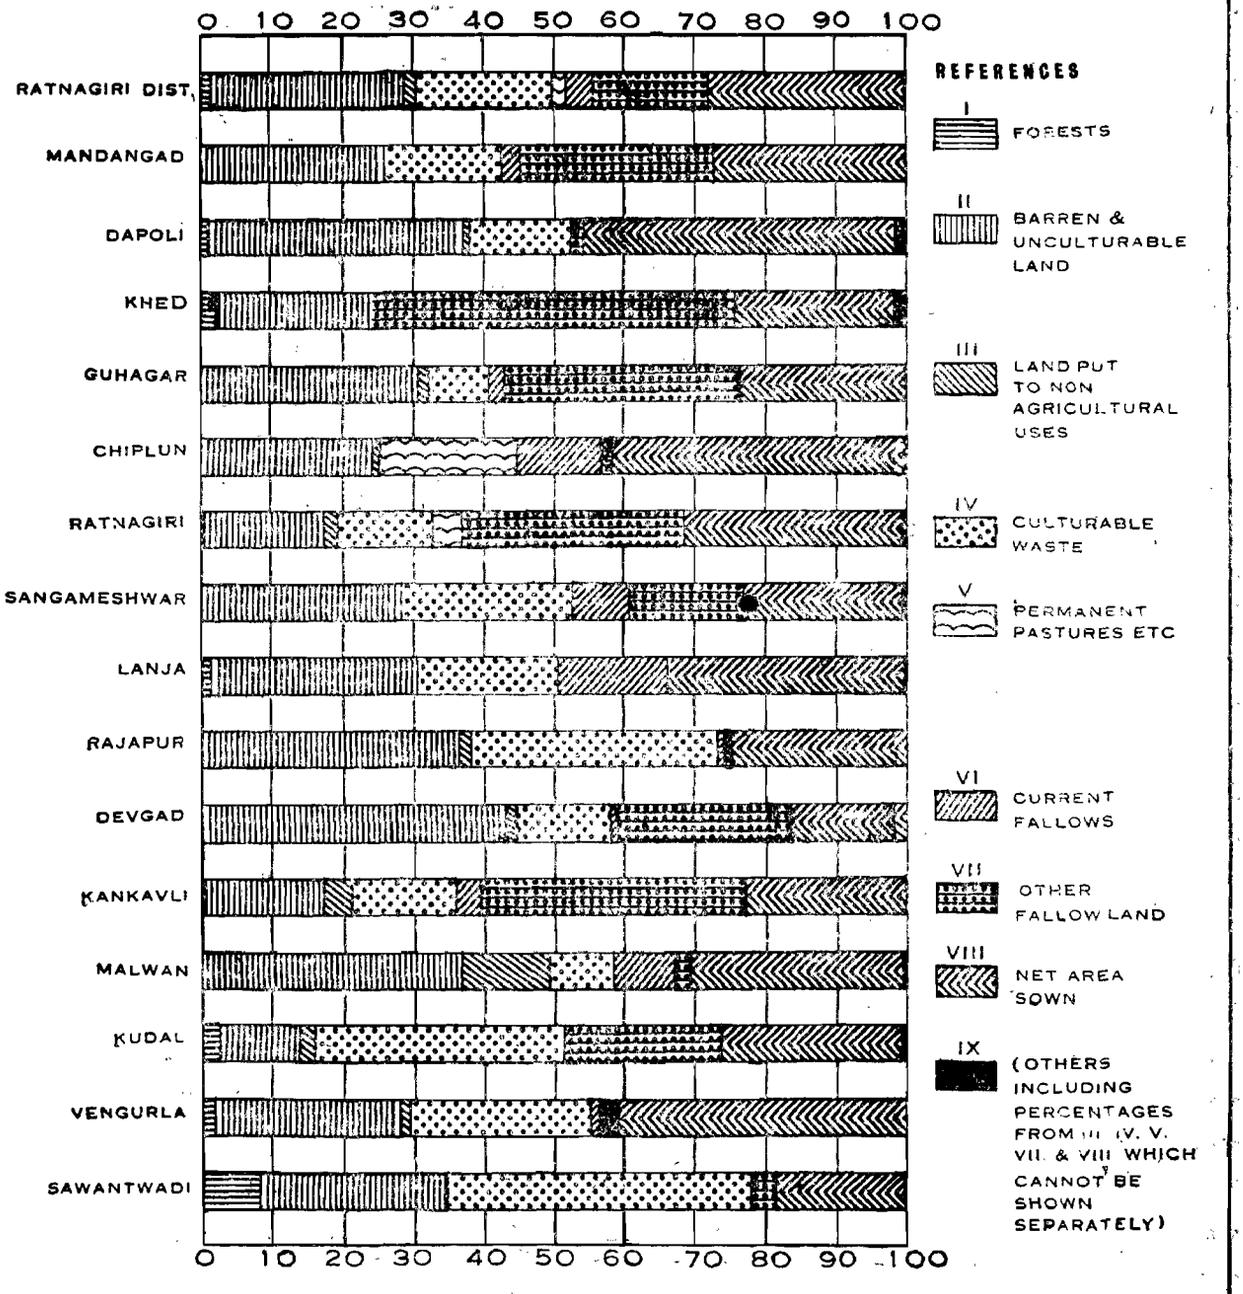

The proportion of net area sown to the geographical area within the district ranges between 17·80 per cent in Devgad taluka and 44·13 per cent in Dapoli taluka. The proportion is higher than 30 per cent in the talukas of Dapoli (44·13 per cent), Chiplun (40·68 per cent) and Ratnagiri (30·87 per cent) and Lanja (33·30 per cent) and Vengurla (40·69 per cent) mahals only. Sawantwadi and Rajapur talukas have the highest proportions of barren and culturable waste areas and the percentages of net area sown are very low in Devgad and Sawantwadi talukas. Khed taluka has 52·65 per cent of its geographical area under other fallows. Chiplun taluka has the highest proportion of area under miscellaneous tree crops and groves (19·42 per cent).

Because of the changes in the administrative boundaries of the district as well as the changes in the classification of land utilisation effected in 1950-51, it is not possible to determine if there has been any change in the pattern of land utilisation during the last 40—50 years or not.

Administrative Unit	Percentage of geographical area										
	Total geographical area	Forests	Barren and unculturable land	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	Gross cropped area

The Figure at page (40) shows the crop pattern for the district and each taluka separately.

The crop pattern in the district is a typical example of the Konkan tract. Important crops like wheat, jowar, bajri, cotton and tobacco are not grown at all. Rice is the principal crop and occupies 35·72 per cent of the gross cropped area. Next in order are minor millets like Ragi, Kodra, Varai, etc., which together occupy 27·57 per cent of the gross cropped area. Pulses occupy 4·31 per cent, sugarcane 0·03 per cent and other food crops 2·86 per cent. All the food crops together occupy 70·49 per cent against the average of 69·88 per cent for Maharashtra.

Compared to the State averages the district has very high proportions of rice and other cereals and very low proportions of areas under pulses, sugarcane and other food crops. The main pulses grown in the district are Kulthi, Udid, Wal and Tur. Among the condiments and spices Betelnut and Chillies are important. Supari (betelnut) is an important garden crop and the district stands second in the State as far as its area is concerned. Nearly half the area under other food crops is covered by fruit trees mainly mangoes and cashewnuts. The area covered by mangoes and cashewnuts is comparatively small, but these two crops are very important in the economy of the district and bring valuable foreign exchange to the country.

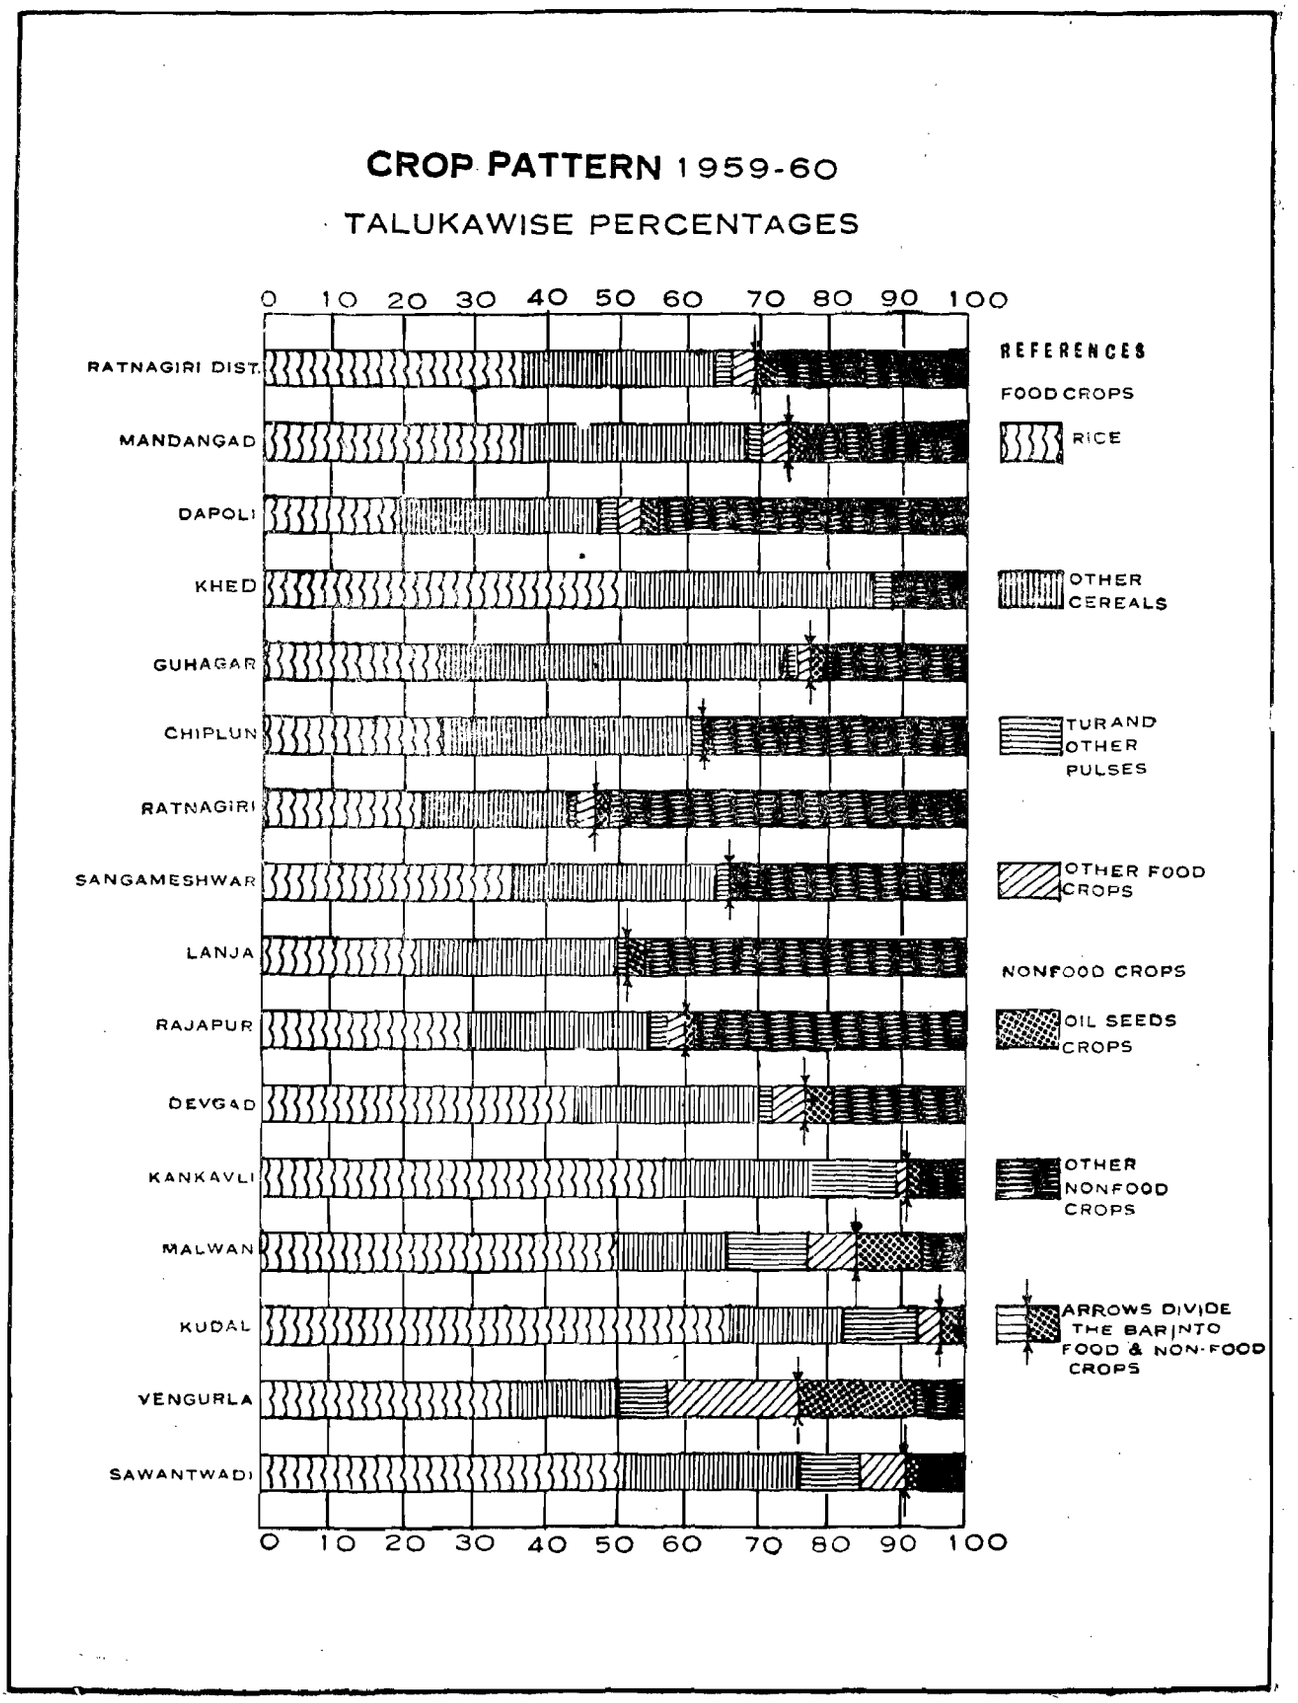

Bulk of the area under non-food crops is under fodder crops. Oil-seeds occupy 3·18 per cent area, chief of them being coconut and sesamum. Area under groundnut is almost negligible.

Because of the changes in the administrative boundaries of the district, comparable statistics prior to 1950-51 are not available.

During the course of nine years from 1950-51 to 1959-60, there does not appear any significant shift in the cropping pattern of the district. With the increase in the gross cropped area, the areas under most of the crops have also increased. The proportion of the non-food crops to the gross cropped area has increased from 24·68 per cent in 1950-51 to 29·45 per cent in 1959-60. It is due to the increase in area under fodder crops. The proportion of fodder crops rose from 20·89 per cent in 1950-51 to 26·30 per cent in 1959-60.

Amongst the food crops, the area under pulses and sugarcane has decreased to some extent while the area under cereals has increased considerably. The area under rice has gradually increased but that under ragi has gone down from 1957-58 onwards. The area under sesamum has increased considerably in almost all the talukas.

The district has a higher proportion of rice but it also has a very high proportion of other low-value millets. Fruit crops like mangoes and cashewnut are also relieving factors. On the whole the cropping pattern is better than the average for the State. The Techno-Economic Survey of Maharashtra has estimated the gross value of output per acre of cropped area in 1955-56 at Rs. 124 for the district against the

average of Rs. 76 per acre for Maharashtra. The distressing factor, however, is the extremely low proportion of geographical area under crops combined with a high density of population and absence of large-scale manufacturing industries in the district.

Within the district the cropping pattern varies according to rainfall and soil types. Khed, Kankavli, Malvan, Kudal and Sawantwadi have more than half of the gross cropped area under rice, Kudal has the highest proportion of area under rice (67·00 per cent). The northern talukas of Mandangad, Khed, Guhagar, Chiplun and Sangameshwar have high proportions of ragi and other cereals. Nearly half the gross cropped area in Guhagar is covered by ragi and other cereals. Sugarcane is grown to a small extent in the irrigated areas of Dapoli, Malvan, Kudal and Sawantwadi. The southern talukas of Kankavli, Malvan, Kudal, Vengurla and Sawantwadi have sizable proportions under pulses. The northern and the central regions on the other hand have low proportions of pulses. Vengurla mahal has very high proportion (16·41 per cent) of area under "Other food crops" consisting mainly of "fruit trees". Mandangad, Devgad, Malvan and Sawantwadi also have sizable proportion under "Other food crops". Mangoes are grown in all the talukas but cover large areas specially in Ratnagiri, Dapoli, Devgad, Mandangad and Malvan talukas. The coastal climate, red laterite soil and heavy rainfall are favourable for growing cashewnut. It, therefore, covers large areas in Vengurla mahal and Sawantwadi and Malvan talukas. Supari (betelnut) occupies large area in Dapoli taluka.

The proportion of non-food crops to the gross cropped area varies considerably from taluka to taluka. It is highest (52·66 per cent) in Ratnagiri taluka and least (3·48 per cent) in Kudal mahal. Most of the area under non-food crops is covered by "fodder crops". Only Malvan and Sawantwadi talukas and Kudal and Vengurla mahals have high proportion of oil-seeds within non-food crops. These talukas have large areas under coconut trees which is the principal oil-seed of the district. Sesamum is grown mainly in the northern and central talukas.

Nine-year average yields and 1958-59 acreages and outturns of important crops are shown below compared with the corresponding figures for Maharashtra taken as 100 :—

Crop	Nine-year average yields per acre	1958-59 area	1958-59 outturn
MAHARASHTRA	100·00	100·00	100·00
(1) Rice	109·01	10·23	11·19
(2) Ragi	84·55	24·35	20·74
(3) Tur	48·40	0·09	0·06
(4) Sugarcane	45·10	0·07	0·03
(5) Sesamum	107·73	3·32	3·44

The district yields for rice and sesamum are higher than the averages for the State. The yields for ragi are, however, lower and the district outturn of that crop is only one-fifth of the State though the district area is about one-fourth of the total area of that crop in the State.

The density of population, proportion of workers on land to total workers, gross area sown per worker on land and the proportion of irrigated areas to gross cropped area are shown below for the district and each of its talukas compared with the State averages :—

Administrative unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land in acres	Percentage of irrigated area to gross cropped area
MAHARASHTRA	334	69·91	3·50	6·23
RATNAGIRI DISTRICT.	367	81·19	1·34	3·68
Mandangad Taluka	325	86·09	1·38	1·04
Dapoli Taluka ..	412	77·48	2·04	2·85
Khed Taluka ..	356	87·95	1·05	..
Guhagar Taluka ..	378	78·22	1·10	1·88
Chiplun Taluka ..	394	81·75	1·89	0·09
Ratnagiri Taluka ..	471	71·86	1·49	3·09
Sangameshwar Taluka	315	90·47	1·06	0·28
Lanja Mahal ..	291	92·29	1·61	0·33
Rajapur Taluka ..	306	85·97	1·32	1·58
Devgad Taluka ..	357	84·78	0·84	8·11
Kankavli Mahal ..	373	88·93	0·94	0·68
Malvan Taluka ..	500	75·43	1·29	6·00
Kudal Mahal ..	362	86·10	1·19	5·97
Vengurla Mahal ..	684	50·33	1·66	20·26
Sawantwadi Taluka	270	73·69	1·34	15·31

81·19 per cent of the total workers work on land. 75·10 per cent are cultivators and 6·09 per cent are agricultural labourers. The proportion of workers on land is higher than the State average (69·91 per cent). The gross cropped area per worker on land in the district is 1·34 acres against 3·50 acres for Maharashtra.

The proportion of workers on land to total workers ranges from 50·33 per cent in Vengurla mahal to 92·29 per cent in Lanja mahal. Vengurla mahal has a number of mines in operation. Gross area sown per worker on land ranges from 0·84 acres in Devgad taluka to 2·04 acres in Dapoli taluka. The gross area sown per worker on land in each taluka is thus lower than the State average.

2·99 per cent of the net area sown in the district in 1959-60 was sown under double crops. This proportion is lower than the average for the State (5·05 per cent). The proportion of double crops is large in Malvan (13·38 per cent), Kudal (7·17 per cent), Sawantwadi (5·91 per cent), Devgad (5·71 per cent) talukas and Vengurla (3·73 per cent) mahal obviously because of the high proportion of irrigated lands in these talukas. Generally winter paddy is taken as the second crop in irrigated areas and Kulthi and Wal in jirayat land after kharif paddy. The proportion of double-cropped area has not increased during the last decade.

Irrigation

The proportion of gross irrigated area to the gross cropped area for the district (3·68 per cent) in the year 1959-60 is much lower than the State average (6·23 per cent). In 1950-51 the proportion was only 2·41 per cent.

The proportion of gross irrigated area to gross cropped area within the district ranges from 0·09 per cent in Chiplun taluka to 20·26 per cent in Vengurla mahal. Sawantwadi taluka also has a very high proportion of irrigated area (15·31 per cent). On the other hand Khed taluka has no area under irrigation.

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation separately for each taluka and the district. Areas irrigated by canals are 42·54 per cent of the total irrigated area. Wells irrigate another 36·96 per cent, tanks 4·66 per cent and other sources 15·84 per cent. Tanks are used as a source of irrigation only in Ratnagiri and Malvan talukas and Kudal and Vengurla mahals. In Sangameshwar taluka and Kankavli mahal irrigation is by wells only, while the entire irrigated area in Chiplun taluka and 94·79 per cent of the irrigated area in Sawantwadi taluka are under canals. All the area under Government canals (600 acres) is in Malvan taluka. The number of wells is very large (3,227) in Ratnagiri taluka but Vengurla mahal has five times more area irrigated by wells.

The net irrigated area has increased from 17·9 thousand acres in 1950-51 to 32·2 thousand acres in 1959-60, i.e., by 80 per cent in nine years.

The increase in the irrigated area is seen under all the sources. The area irrigated by canals increased by 4,100 acres (or 42·71 per cent), that irrigated by tanks by 400 acres. 1,737 additional wells (either newly constructed or brought into use) added 6,500 acres under irrigation.

Crop Pattern under Irrigation

Table 5 in Part III shows the crop pattern under irrigation. In 1959-60, 61·89 per cent of gross irrigated area was under food crops and 38·11 per cent under non-food crops. Among the food crops rice occupied 31·71 per cent, ragi and other cereals 2·13 per cent, pulses 2·44 per cent, sugarcane 0·91 per cent, condiments and spices consisting mainly of arecanuts and chillies 6·10 per cent, and other food crops consisting of mangoes, etc., 18·60 per cent. Among non-food crops coconut as oil-seed occupies large irrigated areas.

There are indeed local variations in this pattern. Irrigated rice is not observed in the northern talukas of Mandangad, Dapoli, Khed, Guhagar and Chiplun. In fact in these talukas we do not come across irrigated food crops. Heavy irrigation of rice is observed in Sawantwadi and Malvan talukas and Kudal mahal. Almost all talukas have irrigated areas under coconut but the concentration is mainly observed in Sawantwadi taluka and Vengurla and Kudal mahals. Irrigated gardens of betelnut (Supari) cover a large area in Dapoli taluka.

Though rice has the largest acreage under irrigation, irrigated area under rice is only 3·24 per cent of the total area under rice. The entire area under sugarcane is irrigated. The area under sugarcane is however very small and is found in Devgad and Malvan talukas. The area under sugarcane has decreased during the last ten years. 30·77 per cent area under condiments and spices is irrigated.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production between 1951 and 1956 and 1956—60 compares with the production of 1950-51 as follows:—

Crop	Average production in hundred tons per year during		
	1950-51	1951—56	1956—60
Rice	1,039	1,276	1,388
Ragi	325	313	349
Other cereals	194	197	215
Total cereals	1,558	1,786	1,952
Total pulses	61	52	39
Total foodgrains	1,619	1,838	1,991
Sesamum	5	10	10

The average total annual production of foodgrains during the First Plan period increased by 13·53 per cent over the production in 1950-51. The increase during the Second Plan period was 22·98 per cent. The increase during the corresponding periods in production of rice was 22·81 per cent and 33·59 per cent, respectively. The production of pulses has been considerably lower during both the periods. The production of sesamum has doubled during the First Plan period.

Agricultural Implements

Section C of Table 9 in Part III shows the number of agricultural implements for the district and each of its talukas for the years 1951, 1956 and 1961 separately.

There has been a reduction in the number of all types of implements, except wooden and iron ploughs, during the decade from 1951 to 1961. The number of both iron and wooden ploughs had gone down in 1956. But the loss has been made good from 1956 to 1961. As a result the number of iron ploughs in 1961 is 188·32 per cent higher than that in 1951. The number of wooden ploughs is also 12·93 per cent higher than in 1951. The number of sugarcane crushers has also decreased because of reduction in the area under sugarcane. The number of oil-engines and electric pumps have also gone down by 34·82 per cent and 80·00 per cent during the last decade.

By using standard average prices of the agricultural implements shown in Table 9 of Part III, the total outlay on them for the year 1961 may be estimated at Rs. 36 lakhs or Rs. 4·13 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 7 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as a Secretary to the Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officers. The latter work as Secretaries to the Taluka Samitis. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There are six agricultural research stations carrying out experiments in this district.

Agricultural Research Stations at Phonda Ghat and Ratnagiri carry out agronomic researches on paddy and research is carried out on Raji, Varai and Kodra at Hatkhamba. These centres have areas of 12·25, 20·00 and 23·07 acres, respectively.

Regional Coconut Research Station has been established at Bhatye in Ratnagiri taluka in 1955 to conduct experiments on coconut. It has an area of 65 acres.

Research work on cashewnuts is done at the Regional Cashew Research Station at Vengurla. It was established in the year 1956 and has farm area of 31·15 acres.

A research station to conduct experiments on mango is set up at Vengurla in 1957. It has a farm area of 42 acres.

Agricultural Improvements

(i) *Increasing the area under irrigation.*—The most important item of increasing the agricultural production is to increase the area under irrigation. Unfortunately the topography of the district forbids contemplation of any large irrigation projects. Stress is, therefore, laid on minor irrigation schemes like bunds, bandharas, tanks, etc. During the first two Plan periods, masonry bandharas were built at 9 different places. Tanks were constructed at Pendur, Warad, Dhamapur and Pat and repairs and improvements were made to 19 other tanks. This increased the irrigational potential by about 5,000 acres. The Third Five-Year Plan envisages new works irrigating 1,173 acres in addition to the spillover works of about 2,000 acres involving an outlay of Rs. 5·1 lakhs. Construction of new wells and repairs to the old ones offer the quickest means of increasing irrigation facilities in the district. Keeping this in view, financial assistance and tagai loans are made available to needy cultivators. From 1950-51 to 1959-60, 1,737 additional wells were either newly constructed or brought into use through repairs. The Third Plan envisages construction of 500 new wells and installation of 200 pumping sets.

(ii) *Improved Seeds.*—Another item of improving food production is recommendation of appropriate varieties or strains of crops. The Agriculture Department has recommended the following improved varieties or strains of paddy for the district:—

Patni-6, Warangal-487, Waksal-207, Panvel-61 and Bhadas-79.

Seed farms have been established at 6 places in the district to provide improved seed to the farmers. The combined area of all the seed farms is 209·30 acres.

(iii) *Soil Conservation or Bunding and Terracing*:—The Third Five-Year Plan includes schemes for terracing of 2,000 acres, involving an outlay of Rs. 10 lakhs. The Plan also envisages afforestation of 8,500 acres for soil conservation.

(iv) *Reclamation of Khar and Khajan lands*.—The Khar Lands Development Board has implemented 19 schemes during the first two Plan periods and has developed nearly 2,800 acres of Khar or Khajan lands for cultivation. During the Third Plan period 1,284 acres of Khar and Khajan lands are to be reclaimed involving an outlay of Rs. 2·21 lakhs.

Livestock

Table 9 in Part III shows the statistics on livestock for the district and each taluka separately for the years 1951, 1956 and 1961.

There are 949,200 livestock in the district in 1961. That makes 106·40 livestock per 100 acres of cultivated area in the district. The corresponding figure for Maharashtra is 138·82.

The total bovine population in the district in 1961 is 90·36 per cent of the total livestock in the district. The number of male bovines over three years is 417,100. This gives 4·28 acres of cultivated area per pair of male bovines in the district as against 5·48 acres for Maharashtra.

Female bovines over three years in the district are 252,700. Thus there are 138·30 female bovines over three years per 1,000 population in the district against 158·82 for Maharashtra.

There has been a reduction in all types of livestock (except other livestock) during the period 1951 to 1956. This loss has been made good completely during 1956—61 with the result that the total livestock increased by 5·20 per cent during the decade (1951—61). All types of livestock except buffaloes

increased. The number of buffaloes in 1961 is lower by 6·02 per cent over 1951 but that for cattle is higher by 5·47 per cent. The increase in the number of sheep and goats is 6·67 per cent and 18·28 per cent, respectively. There are 300 horses and ponies in 1961 as against 100 in 1951.

Veterinary Facilities

There are 15 veterinary dispensaries one at each taluka place and 31 veterinary aid centres in the district. Treatment of animal diseases, control of epidemics, castration of male bovines and control and destruction of animal parasites are the main services rendered at these dispensaries and aid centres. The breed commonly found in the district is of non-descript type. Pandharpuri buffaloes and Khillar and Dangi breed of cattle are imported. One key-village with 6 units has been started at Ratnagiri. Two poultry demonstration centres are working at Khed and Sawantwadi.

AGRARIAN STRUCTURE AND LAND REFORMS

Land Tenures

The district had a peculiar non-ryotwari tenure known as Khoti tenure in 952 villages. The peculiar institution of village rentiers—Khots—had originated in the 15th century as owing to the rugged nature of the tract and the difficulty of collecting land revenue, a powerful intermediary class who could settle in the village, organise cultivation of land and be responsible to Government for revenue was necessary.

There were three classes of Khoti villages :—

(1) *Khoti*—Rented ; (2) *Dharekari*—Peasant held ; and (3) *Khichadi*—Partly rented and partly peasant held.

The Khoti tenure in the Ratnagiri district was governed by the Khoti Settlement Act of 1880, and differed from the Khoti tenure in Kolaba district. A Khot held the village on payment of the assessment of the village to Government. He was entitled to Khoti *faida* (rent) from the permanent tenants and quasi-dharekaris and had full rights in Khoti *khasgi* (private) land. His rights in the Khoti village were heritable and transferable.

The Khoti Abolition Act, 1949, was enacted and enforced from 15th May 1950. It abolished the intermediary Khoti tenure with all its incidentals and the ryots cultivating those lands have been recognised as ryotwari holders—occupants of those lands.

Another peculiar land tenure known as Kauli and Katuban tenure existed in 293 villages of the erstwhile Sawantwadi State. Certain lands were given on reduced assessment in the past to encourage cultivation. By the Kauli and Katuban Tenure Abolition Act of 1953, all the lands held on that tenure have now been subjected to payment of full assessment.

Most of the remaining land in the district was held under the usual Ryotwari (Occupancy) or Inam tenures. All inams, excepting Deosthan inams held by religious institutions or for religious services, have now been abolished under various measures of land reforms. All hereditary Watan lands held for village services have also been abolished and the village servants now work on a salary basis. The occupancy rights of abolished inam lands have been conferred on their holders or tenants, as the case may be, on condition of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress.

The process of abolition of intermediary interests in land is thus being completed in the district.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands Act which is in force in this district since 1946. It provided security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "Land to the tiller" policy the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1957, which is known as the "Tillers' Day". This was an important step towards the removal of absentee landlordism which had been one of the disincentives in every programme of agricultural improvement.

Up to 30th September 1963, ownership rights have been conferred upon 78,654 tenants for 81,277 acres of land in the district. Out of these 4,388 tenants had mutually agreed with the landholders on the price to be paid by them in respect of land measuring 5,211 acres. In the remaining cases, the prices were fixed by the Revenue Officers.

Record-of-Rights

A Record-of-Rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up to date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual Revenue accounts are prepared on the basis of the Record-of-Rights.

Ceilings on Holding of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act, 1961, came in force from 26th January 1962. Only one local area for the entire district has been notified with ceiling area for dry crop land at 66 acres. In the case of irrigated lands, the ceiling area is 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons, and 48 acres in areas which get irrigation water for one season. In the case of Warkas land, the ceiling area is 126 acres. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

Under the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, work of consolidation of holdings was started in 1948 in Lanja mahal and in 1954 in Khed taluka. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to the end of March 1963, 36 villages have been completed covering an area of 44,326 acres with 58,772 holdings. This work is temporarily suspended as Record-of-Rights is not up to date.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

(i) Warkas land	..	6·0 acres.
(ii) Bagait land	..	0·25 acre.
(iii) Rice land	..	0·50 acre.

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

Size of Land Holdings

Census Table B-X (Based on 20 per cent Sample) in Part II of this Volume shows that 71·43 per cent of the total number of households cultivate land and the remaining 28·57 per cent do not cultivate any land.

Census Table B-XI (Based on 20 per cent Sample) in Part II shows the break-up of cultivating households by size of land cultivated and by interest in the land. 35·30 per cent of the cultivating households cultivate their owned lands only, 21·36 per cent of the households cultivate tenanted lands only and the remaining 25·34 per cent cultivate lands partly owned and partly taken on lease.

Percentage distribution of cultivating households by the size of land cultivated is shown below. The distribution of households in Table B-XI and the one shown in percentages in column 2 below is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (not the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of those ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	24·10	34·22
1·0 to 4·9 acres	56·83	32·63
5·0 to 9·9 acres	11·96	14·49
10·0 to 14·9 acres	3·70	7·03
15·0 to 29·9 acres	2·64	7·60
30·0 to 49·9 acres	0·56	2·51
50+ acres	0·21	1·52
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 8·26 acres. Average size of the ownership holding in the district was 6·93 acres in 1952-53 against the average of 12 acres for the State.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The first co-operative society was registered in the district at Girye-Vijaydurg in Devgad taluka in 1907. Due to manifold difficulties the movement had not however taken deep roots for over forty years. Concentrated efforts made since independence have, however, led to a very rapid progress. The progress during the Second Plan period has especially been very striking. Besides agricultural

credit, the activities such as farming, agricultural processing, fisheries, marketing, etc., are now being brought under co-operative fold.

The following description is based on the report for the year 1960-61.

Co-operative Credit

(*a*) *Agricultural Credit Societies.*—The number and membership of Agricultural Credit Societies have increased at a very rapid pace during the last decade and especially during the Second Plan period.

The position of Agricultural Credit Societies in 1950-51 and 1960-61 is as follows :—

	1950-51	1960-61
(1) Number of Agricultural Credit Societies.	265	524
(2) Number of members	28,693	83,318
(3) Share Capital .. (Rs. in lakhs)	4·75	15·11
(4) Reserve and other funds (Rs. in lakhs)	2·11	7·31
(5) Working Capital .. (Rs. in lakhs)	12·23	47·82
(6) Number of members to whom loan was advanced.	11,690	33,476
(7) Amount advanced .. (Rs. in lakhs)	3·25	26·07
(8) Amount recovered .. (Rs. in lakhs)	2·24	20·37
(9) Loans outstanding .. (Rs. in lakhs)	3·96	27·76
(10) Overdues .. .. (Rs. in lakhs)	1·03	7·78

Average membership per primary society in the district is 163 against the average of 96 members for Maharashtra. 94 per cent villages in the district have been covered.

Total owned funds (share capital *plus* reserve funds) of the Primary Agricultural Credit Societies in the district amounted in 1960-61 to Rs. 22·42 lakhs and formed 47 per cent of their working capital against 26 per cent for Maharashtra.

The loan operations of all the Primary Agricultural Credit Societies amounted to Rs. 26·07 lakhs in 1960-61. The average amount of loan per borrowing member in the district worked out to Rs. 78 against Rs. 329 for Maharashtra.

During the decade, the number of societies has almost doubled. Their membership, share capital, reserve funds and working capital have all increased three times. In addition to credit, the primary societies have stepped into service activities also. 315 societies have undertaken distribution of agricultural requisites and have distributed goods worth Rs. 72·55 lakhs during 1960-61.

(*b*) *Central Co-operative Bank.*—The Central Co-operative Bank at the district headquarters was established in the year 1957 and has been working as a federal financing agency catering for the district requirements of all the primary co-operatives in the district. Since 1962 the Zilla Parishad also transacts its financial business through the Central Co-operative Bank.

In the year 1960-61, the position of the Central Co-operative Bank was as follows :—

(1) Number of members—	
(*a*) Individuals	116
(*b*) Societies	420
(2) Paid-up share capital .. .. (Rs. in lakhs)	3·24
(3) Reserve and other funds .. .. (Rs. in lakhs)	0·01
(4) Deposits—	
(*a*) Individuals .. .. .. (Rs. in lakhs)	28·54
(*b*) Societies and Banks .. .. (Rs. in lakhs)	6·50
(5) Borrowings—	
(*a*) State Co-operative Bank and the Reserve Bank of India .. (Rs. in lakhs)	1·00
(*b*) Government .. .. .. (Rs. in lakhs)	0·22
(*c*) Other sources .. .. .. (Rs. in lakhs)	1·25
(6) Working capital .. .. .. (Rs. in lakhs)	40·76

In the year (1960-61), the individual membership of the Bank has decreased by 376 but society membership has almost doubled, owned funds have increased by Rs. 97,000, deposits have increased by Rs. 7·78 lakhs, the working capital has increased by Rs. 8·87 lakhs and the amount of loans advanced has increased by Rs. 10·69 lakhs. Improvement is also observed in the recoveries as the proportion of overdues to outstanding loans is reduced from 15·36 per cent to 10·12 per cent. The Bank has opened two new branches during the year. The Bank however suffered a loss of Rs. 24,000 during 1960-61 as against a loss of Rs. 32,000 in the previous year.

(*c*) *Land Mortgage Bank.*—There is no District Land Mortgage Co-operative Bank in this district. The State Land Mortgage Co-operative Bank has opened its branch at Ratnagiri for meeting long-term needs of the agriculturists.

Urban Banks and Credit Societies

On 30th June 1961 there were in all nine urban banks and 23 urban credit or salary earners' societies in the district. Their total membership was 21,228 and working capital Rs. 106·24 lakhs. The loans advanced during the year amounted to Rs. 104·57 lakhs. Urban banks have been organised at almost all the important taluka places. All these urban banks provide finance for trade. Some banks have introduced small savings schemes for the benefit of their members.

Agricultural Processing Societies

On 30th June 1961 there were two co-operative rice husking societies and one cashewnut processing co-operative society in the district. These three

societies together have 388 members, share capital of Rs. 1·02 lakhs and working capital of Rs. 3·14 lakhs. In the year 1960-61 the cashewnut processing society at Vengurla processed cashewnut worth Rs. 2·88 lakhs. The other two societies were not operating during the period.

Industrial Societies

There were 12 handloom weavers' co-operative societies and 66 other industrial co-operative societies in the district. The total membership of the weavers' societies was 577, working capital Rs. 1·73 lakhs and share capital Rs. 22,000. 776 out of 864 registered looms in the district were in the co-operative fold. The weavers' societies produced goods worth Rs. 1·71 lakhs during the year. The other types of industrial societies included five oil ghanis, nine leather works, six carpentry and smithy works, five pottery and brick making, seven coir and rope works, etc. The total membership of the societies was 4,052, share capital Rs. 1·31 lakhs and working capital Rs. 3·94 lakhs. The value of the production of these societies was Rs. 50,000 and sales value was Rs. 92,000 in the year.

Forest Labourers Societies

There was one forest labourers' society and six labour contract societies in the district with membership of 56 and 263, respectively. Their working capital was Rs. 556 and Rs. 16,574, respectively. Both the types of societies were, however, not in operation during the year.

Co-operative Farming Societies

There were three joint farming, four collective farming, six better farming and two gram swarajya co-operative societies in the district. Their combined membership was 701. The collective farming societies cultivated all the 60 acres of area under their command. The other types of societies have yet to start operation.

Fishery Societies

There were 21 fishermen's co-operative societies in the district in 1961. They had a combined membership of 3,429, share capital Rs. 60,000 and working capital Rs. 2·64 lakhs. The societies received Rs. 71,000 as loan and Rs. 37,000 as subsidy from the Government in 1960-61. Fish worth Rs. 49,000 was sold by the societies during the year. Thirteen societies showed a profit of Rs. 10,000 during the year while the remaining eight societies showed neither profit nor loss. There is a vast scope for fishing industry and the fishermen's co-operative societies are expected to make rapid progress very soon.

Purchase and Sales Societies and Unions

There is one purchase and sales society for the district and 13 primary purchase and sales societies for the talukas. The district purchase and sales society has only six societies as members. The primary societies have 119 societies and 3,912 individual members. The share capital of the district society was Rs.8,000 and that of the primary societies Rs.2·90 lakhs. The Government grant towards share capital of primary societies was Rs. 27,000. The turnover of the district and primary societies was respectively Rs. 37·87 lakhs and Rs. 21·91 lakhs during the year.

The societies mainly concentrated their activities on the supply of cement, iron, steel and fertilisers. The district purchase and sales society has been appointed as a district wholesaler for supply of fertilisers and sugar. It has established a link with service societies through the taluka purchase and sales societies.

Consumers' Movement

There were 14 consumers' societies in the district with membership of 1,495. Their combined working capital was Rs. 224 lakhs. These societies together sold consumers' goods worth Rs. 19·44 lakhs during the year. Seven of these societies made a profit of Rs. 43,000, five suffered loss of Rs. 7,000 and two others showed neither loss nor profit.

Housing Societies

There were eight housing societies in the district out of which six were for backward class persons. The number of members of the societies for backward classes was 118 and their working capital was Rs. 20,000. The membership of the other two societies was 22 and working capital Rs. 21,000. These societies did not construct any house or tenement till the end of 1960-61. The Partavane Backward Class Co-operative Housing Society Ltd., Partavane, in Ratnagiri taluka, has however been granted loan for construction of 12 tenements and that work was in progress.

Co-operative Activity for Backward Classes

There are no credit or farming societies organised exclusively for backward class persons. Persons belonging to the backward classes get all facilities from the societies. The co-operative housing societies for backward class persons have been described above.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

Type of society	Number of societies				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Bank.	..	1	..	..	..	..	1
(2) Agricultural Credit Societies.	55	151	94	85	..	139	524
(3) Non-Agricultural Credit Societies.	5	14	5	5	..	3	32
(4) Land Mortgage Bank	..	..				..	..

FORESTS

The forests in the district cover an area of 72·78 square miles. The forest area of 61·30 square miles in Kudal, Sawantwadi and Dapoli talukas are in charge of the Forest Department and the remaining 11·48 square miles in the remaining talukas are in charge of the Revenue Department. The forest area makes 1·46 per cent of the total geographical area as against 17·56 per cent for Maharashtra.

The forests are not situated in one compact block but are scattered and relegated to the poorer shallow soils on steep hill slopes which are generally unfit for cultivation. The most of the forest area is in Kudal and Sawantwadi talukas.

The forests are administered by the Divisional Forest Officer, Sawantwadi Division, who has headquarters at Sawantwadi, and works under the Thana Circle. The forests in charge of the Revenue Department are looked after by the Collector.

The forests in the district are mainly of two distinct climatic formations, viz., (1) Bombay subtropical evergreen forests which are found in the plateau region in the vicinity of Amboli Ghat area and (2) South Indian tropical moist deciduous forests which confine mostly to hilly and undulating ground.

The main species found in the Bombay subtropical evergreen forests are: Anjani, Hirda, Amberi, Amba, Shendri, Bhoma, Parjambhul, Dinda, Tamalpatra, Pandhari, Makadlimbu, Kutkuta, Narkya, etc. In the South Indian tropical moist deciduous forests the most characteristic species found is teak which reaches luxuriant size in the sandy loams. It is associated with other important species like Ain, Kinjal, Nana, Siddum, Koshumb, Sowar, Shiras, Bibi, Satwin, Bibla, Shisham, Kolum, Watamb, etc. The Bamboo, viz., Kalak or Velu is also found in some parts of the forests.

The major forest produce is transported mainly by bullock-carts and trucks to Malvan, Ratnagiri, Shiroda, Aronda, Kankavli and Sawantwadi. Outside the district the forest produce consuming markets are Kolhapur, Nipani, Belgaum, Gadhinglaj and Ajara. The minor forest produce such as Shikekai, Shembi bark, Sawar cotton, Tamalpatra, Kokam, Watsol, Wavding and Hirda are mostly exported to Bombay *via* Vengurla harbour.

According to the 1961 Census 481 persons are reported as working in forestry and logging. Their distribution for industry minor groups is shown in Table B-IV-C in Part II.

The exploitation of forests is regulated under a scheme under which the forests are divided into four working circles :—

(1) The Protection Working Circle ;
(2) The Main (Teak Timber) Working Circle ;
(3) The Old Plantation Working Circle ;
(4) The Teak Pole Working Circle.

The method of treatment in the Protection Working Circle consists of improvement fellings in the over-wood and light thinnings wherever necessary in the underwood. Selection-*cum*-Improvement is the system prescribed in the Main (Teak Timber) Working Circle. Plantations of the past are tended under the Old Plantation Working Circle. In the Teak Pole Working Circle the method of treatment is improvement felling and light thinning with plantation in concentrated areas.

A century ago the district is reported to have been very rich in forest wealth. Indiscriminate felling, without proper care for reafforestation and regeneration during the last century especially during the Second World War, has rendered vast areas of land barren. This has resulted in soil erosion and consequently depleted the natural resources. In the Five-Year Plan schemes, therefore, much importance has been laid on afforestation in vast areas for increasing forest wealth and also as an effective soil conservation measure. During the Second Five-Year Plan period about 50,000 acres of land was acquired for afforestation in the soil conservation scheme and about 2,800 acres have been afforested. The acquired areas are divided into two groups—the first group consists of areas somewhat well wooded while the second group includes areas which are barren.

Under the working scheme, in the first group planting is to be undertaken in one-third portion of the coupe while in the second group plantation is to be raised in the whole coupe. During the Second Five-Year Plan period nurseries have been established at Padave and Majgaon in order to ensure a permanent and good quality supply of seedlings for various forest development works.

In the Third Five-Year Plan the following schemes are in progress :—

(1) *Plantation of valuable trees*—

Planting of Teak and Eucalyptus trees in 375 acres and cashewnut in 1,083 acres involving an outlay of Rs. 1·48 lakhs.

(2) *Afforestation for soil conservation*—

8,500 acres to be afforested involving an outlay of Rs. 7·00 lakhs.

Wild life in the forests consists mostly of tiger, panther, hyaena, jackal, wild dogs, spotted deer, sambhar, blue bull, barking deer and wild bear. Bison is occasionally seen in some localities.

FISHERIES

The district is one of the most important maritime districts in Maharashtra. Marine fishery is naturally an important economic activity in the district. The coastal belt of the district stretches over 200 miles from Bankot in the north to Redi in the south. Fishing is done all along the coast in the sea generally within 10 miles from the coast. In a few cases the area however extends as much as 50 miles from the shore. The important fishing centres in the district are Harnai, Dabhol, Jaigad, Ratnagiri, Jaitapur, Vijaydurg, Devgad, Malvan and Vengurla. Fishing activities are carried during nine months from September to May.

The commercially important varieties of fish available in large quantities are—

Bangada, Tarli, Pedawa, Mushi, Shingala Paplet, Halwa, Gedar, Surmai, Zinga, Dhoma, Bhing, Ghol, Karli, etc.

Besides these, Clam and Oysters are also available along the entire coastal line, mainly in the creeks, backwaters and estuaries. The catch is estimated at about 50,000 metric tonnes approximately worth a crore of rupees annually.

In 1961 Census 11,841 persons are reported as engaged in fishing as principal work : 9,991 of them are males and 1,850 females. The fishermen are mainly scattered in 118 fishing villages along the coast. They belong to the communities known as Koli, Bhoi, Kharvi, Gabit and Daldi. The Daldi fishermen are Muslims by religion. There are some Christian fishermen also. The Gabits take up cultivation as a subsidiary occupation.

More and more fishermen's co-operative societies are being formed in the district. There are 27 fishermen's co-operative credit societies now. Financial assistance in the form of loan and subsidy is given to the societies for (1) mechanisation of fishing crafts, (2) purchase of fishery requisites and (3) preservation, marketing and transport of fish. During the Second Five-Year Plan period, Rs. 4·01 lakhs were granted as loans and Rs. 3·91 lakhs as subsidy. During the first two years of the Third Plan the loans advanced amounted to Rs. 7·58 lakhs and subsidy to Rs. 7·57 lakhs. A society at Malvan has been granted a loan of Rs. 1·06 lakhs and subsidy of Rs. 56,000 for establishing a cold storage and quick freezing plant.

Most of the fishing is carried out in small sailing boats. About 4,000 boats are engaged in fishing in the district of which about 100 boats are fitted with engines. The types of nets used for fishing are: (1) long lines or hooks called Khanda or Wawal, (2) stationary nets called Waghur or Budi nets, (3) bagnets called Dol or Bokshi, (4) drift nets called Wavri, Bhishi, (5) shore Seines or drag nets called Rampan or Pera, (6) cast nets called Pag and (7) trawl nets. Special nets are knitted for catching particular types of fish. The nets are mainly prepared out of cotton and hemp twine but nylon twine is also being increasingly used.

A major portion of the fish caught is transported by sea to Bombay. There is also a good local demand at Chiplun, Sangameshwar, Lanja, Kankavli, Phonda Ghat and Sawantwadi. Fish is also transported in trucks outside the district to Kolhapur, Miraj, Karad, Satara, Belgaum, etc. Transportation facilities are however inadequate. There are hardly any facilities for cold storage or preservation of fish. Curing of fish by salt is the only effective method by which supplies of fish are maintained throughout the year. There are 21 curing yards established at important fishing centres and about 5,000 tonnes of fish are cured annually. Some amount of wet salted fish is also exported to Ceylon and other countries.

Besides the export of fresh fish, a number of industries have been set up for subsidiary fish products. Dry unsalted fish is collected on a large scale at Dabhol, Bankot and Vijaydurg markets from where it is despatched inland areas in the neighbouring districts. Oil from Shark liver is extracted at various centres. Supply of Shark fins and air bladders of fishes forms an important item of trade. There are two fish-canning factories also.

Although the area is so rich in fishes, it has remained under-exploited mainly due to the old methods of fishing by sail crafts. Lack of communications, transport or preservation facilities have also retarded development. A number of schemes have been recently undertaken by the Fisheries Department. The department is operating one truck at concessional rates for transport of fish belonging to local fishermen to interior markets of the district. There is also a proposal for plying a transport vessel between Ratnagiri and Bombay for fish transport. A training centre has been established at Ratnagiri to impart training in the upkeep, maintenance and overhaul of engines and the latest methods of fishing. A demonstration vessel (Surmai) belonging to the Fisheries Department conducts fishing trips off Ratnagiri and a large number of fishermen are taken aboard the vessel for training in the operation of trawl nets and winches. Besides this the department also operates two multi-purpose boats to explore off-shore fishing grounds, to indicate the possibilities of commercial enterprises, to chart the bottom of the sea, to locate obstructions if any and to facilitate trawl fishing, etc.

A Marine Biological Research Station has been established at Ratnagiri to study the various allied aspects of fisheries and Marine Biology.

MINING AND QUARRYING

The northern portion of the district is occupied by " Deccan Traps ". The southern part has exposures of "Dharwars" and contains rich ore of iron which is at present exploited at Redi in Vengurla mahal. Geological prospecting to prove the iron ore deposits of the district is in progress.

Another important mineral in this district is ilmenite which occurs at many places along the coast. The mineral next in importance is chromite which is found near Kankavli. This deposit is of low grade but could be beneficiated. Mica deposits of Kadawal used to be worked previously.

Silica sand is being exploited on a fairly large scale. Sand stone is quarried, pulvarised and sorted into various grades. Extensive deposits of laterite are quarried and used for buildings.

The area has not been fully investigated so far. Geological prospecting undertaken presently is likely to bring out many more deposits of important minerals.

Following is a brief account of the important mineral deposits found in the district :—

(1) *Iron Ore.*—The iron ore deposits in the district are the largest in Maharashtra. They are associated with the older geological formations called the Dharwar system. The important ore deposits occur around Redi, Tak, Asoli, Ajgaon, Shiroda, Nanos, Gulduve, Kinale, Kavthani, Aros, Thakurwadi, Malewad, Matond, Dabholi and other places. A preliminary reconnaissance survey carried out in 1958-59 indicated the possibility of discovering iron ore in Sateli, Talaone, Satarde, Khanoli and Tendoli villages. Detailed prospecting undertaken by the Department of Geology in 1959-60 and 1960-61 reveals estimated reserves of about 20—25 million tons of workable ore. At present iron ore is extracted at Redi. In 1960-61 mining leases were given to 14 mining companies for exploitation from 3,833·51 acres. The production during the year was 3·30 lakhs metric tonnes, as against 1·15 lakhs metric tonnes in 1956. Almost all the quantity of ore extracted is exported to foreign countries, the chief consumers being Czechoslovakia and Yugoslavia.

(2) *Chromite.*—The deposits of chromite are reported near Kankavli in the valley of Gad river and at Vagda. The reserves at Kankavli are estimated at 55,600 tons and those at Vagda at 15,700 tons. The chromite is of low grade and chromium oxide content varies between 32 per cent and 39 per cent and iron content between 12 per cent and 18 per cent. The chromite available in the district is amenable for beneficiation. At present the deposits are not being worked out.

(3) *Ilmenite.*—Extensive deposits of ilmenite are known to occur along the western coast from Jaigad to Ratnagiri. The important places where deposits are seen are Malgund, Ori, Tiwri, Jaigad, Panshal, Dapoli, Dabhol, Jaitapur, Kuveshi, etc. Ilmenite sand is deposited along the coast in the beach sands by wave action. The estimated reserves are of the order of two million tons.

Though the deposits here are not as rich as deposits along the Travancore beach, they are sufficiently large and could be exploited after some beneficiation. The reserves are not exploited at present but sand used to be exported earlier when a few leases were in operation.

(4) *Bauxite.*—The ore occurs in the up-ghat region of Amboli. The estimated reserves are of the order of five million tons. The alumina content varies from 45 per cent to 60 per cent. About 10 per cent of the bulk is considered to be of high grade and quite suitable for an aluminium project. The deposits are not being worked at present.

(5) *Manganese.*—Manganese ore occurs almost side by side with the belts of iron ore in the district. It is associated with Dharwarian rocks and in laterite formation capping them. Manganese ores are reported at Rajari, Phondye, Sasoli, Dingne and Netarde. The ore is in exposed patches and appears to be rather inferior in quality being either highly ferruginous or silicious and having manganese content of 25 per cent to 40 per cent.

In the year 1960-61, leases for extraction of iron and manganese ore were given to 13 mining companies and 902 tonnes of manganese valued at Rs. 97,900 was extracted.

(6) *Limestone.*—Deposits of limestone are known to occur in the district to the south-west of Phondaghat, and in the high hills of Hanuman ghats. The former were previously exploited for manufacture of lime and the stone appears to be of good quality. Limestone is also noticed in the valley two miles north-east of Tarele. It is associated with the Kaladgi shales and is supposed to be of metasomatic origin. The deposit is not very extensive.

(7) *Silica Sand.*—Extensive deposits occur in the district from Goa border to Devgad. The important places where the deposits occur are Vengurla, Math, Vetore, Walawal, Khavati, Tendoli, Chendawan, Achare, Mithbaon, etc. The deposits at Vetore and Walawal are estimated at 21 million tons and are being exploited at present. Silica content is between 95 per cent and 99 per cent. With low contents of iron the sand is useful in glass industry. It is locally used in the manufacture of sodium silicate in a factory near Vengurla. In 1960-61, about 1,700 tons of sand worth Rs. 11,185 was exploited.

(8) *Clays.*—A kaolin deposit occurs near Kumbharmati east of Malvan port. The clay is of good quality and is slightly plastic. It does not fuse at 1,200° C and burns pure white. Deposits of red plastic, lime free laterite clay, suitable for the manufacture of cheap glazed wares and roofing tiles are reported near Malvan and Kashedi, and Jalgaon in Dapoli taluka. The reserves are estimated at one million tons. The deposits are not worked at present. Clay deposits have also been observed during reconnaissance surveys at Otavane, Masaoli and other places. But since alteration of feldspar into clay is not complete, percentage recovery of clay here would be much low.

(9) *Mica.*—The deposits of mica are reported at a number of places from Natal to Bhirawande and Majgaon to Kesari and at Kadawal in Kudal taluka. It is associated with pegmatite type of rocks. Most important occurrences are near Kadawal between Avalegaon to Pangrad. Large-scale mining operations were carried out in the past (1945 to 1951). The surface mica is of inferior quality but it improves greatly at depth. The present estimates indicate that the reserves may yield about 18,000 kgs. of mica every year for 10 years. Detailed prospecting is being carried out in the area nearabout Kadawal.

(10) *Ochres.*—Yellow ochres of various shades derived by alteration of ferruginous sandstone and phyllites, occur near Sawantwadi, Kudal and Vengurla and in a number of places in the hills along the coast between Malvan and Vengurla. The ochres are shipped to Bombay for manufacture of mineral pigments.

(11) *Other Minerals.*—Besides the abovementioned mineral occurrences of copper, soapstone, feldspar and quartz, asbestos ore, building materials, etc., are reported at various places in the district. Soapstone is found near Akeri and is used for pots and kettles, fireplace lining, etc. Green fibrous asbestos is reported to occur between Akeri and Kolgaon north-west of Sawantwadi. Deposits of feldspar and quartz are seen in Kadawal and Pangrad belt. The feldspar is quite suitable for use in the ceramic industry. Small bands of dark grey-grained soft steatite are noticed near Asgani, Akeri, Zolambe and in hills between Kumbral and Panturli. They are worked out locally for making utensils, etc. Building materials like stones, boulders, ordinary clay, granite, laterite, etc., are observed at a number of places in the district. The district also has a number of springs of mineral waters which are famous for having certain curative values and are also held sacred. The springs are located at Aravali, Math, Rajapur, Sangameshwar, Tural or Rajvadi and Unhale. Most of these springs are reported to have properties of curing skin diseases, itches, eczema, etc., and inducing appetite.

In the 1961 Census, 5,992 persons are reported as engaged in mining and quarrying activities. 5,136 of them are males and 856 females. Their distribution for industrial minor groups is shown in Table B-IV-C in Part II.

INDUSTRIES

As far as industries are concerned Ratnagiri is one of the most under-developed districts in the State. There is practically no major manufacturing industry in the district. The existing industrial establishments are mostly very small in size and are more or less of processing type. The employment in the non-agricultural sector leans heavily upon the village and cottage industries, i. e., the village artisans working on traditional lines, producing articles required by local populace and with the locally available raw materials only. With the availability of Koyna power, many large-scale industries are likely to be set up in the near future.

There are in all 36,177 workers engaged in industries, 22,955 or 63·45 per cent of them are in household industries and 13,222 or 36·55 per cent in non-household industries. The total number of workers in the registered factories in 1961 was 1,779 which makes only 4·92 per cent of all workers engaged in industries or hardly one factory worker per thousand of total population against 20 per thousand of total population for Maharashtra.

The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from the houselists are also shown separately, for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

There is no large-scale industry in the district at present. However, a proposal to set up an aluminium plant at Jaigad has been under consideration for long. Proposals for having three large-scale units of Ferro-Silicon and Ferro-Chrome manufacturing and a textile mill at Chiplun are also being explored.

Small-scale Registered Factories

The more important of the small-scale industries in the district are cashewnut processing, fruit preservation and silica processing. Other registered units are oil mills, saw mills, cement products, construction, repair workshops, automobile repair workshops, sodium silicate, laundry soap, electricity generation, printing, book-binding, bidi-making, etc.

The number of registered factories has increased from 25 in 1956 to 36 in 1961. The number of workers in registered factories has also increased from 1,391 in 1956 to 1,779 in 1961.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 1·6 lakhs and working capital of Rs. 4·3 lakhs. The total value of annual production was Rs. 29·2 lakhs and the value added by manufacturing was Rs. 3·3 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1959 is only 0·02 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

Cutlery, manufacture of writing nibs, "Kokam" juice syrup processing, bidi-making, manufacture of bamboo articles, blacksmithy, potteries, handloom weaving, coir, etc., are among the important cottage or small-scale industries in the district. Some unregistered units nearabout Ratnagiri and Dapoli are engaged in fruit canning industry, producing mango pickles and mango slices in brine.

By size of employment fishing is the largest industry in the district. The present position of fisheries has already been described earlier.

4,691 persons are engaged in the manufacture of products from bamboo, cane, etc.

4,450 persons are engaged in the production of fruits and nuts in plantations and orchards. The district is well known for the "Alphonso" and "Raiwal" varieties of mangoes. Mangoes are grown mainly in Devgad, Rajapur, Ratnagiri and Malvan talukas and Vengurla mahal and the annual yield is estimated at 23,000 tons. Mangoes are mostly exported to Bombay and Kolhapur. There are two fruit canning units at Ratnagiri processing Alphonso mangoes into mango pulp and mango slices. Raw mangoes are put in brine for preparation of pickles and chutneys. There are 12 units engaged in this industry at Rajapur and a co-operative society at Kharepatan. Cashewnut plantations are in the southern part comprising of Sawantwadi and Malvan talukas and Vengurla mahal. Malvan and Vengurla have four factories where cashewnuts are decorticated and exported to Bombay and foreign countries. The factories utilise cashewnuts grown locally and those imported from Africa. Ratamba is another important fruit which is grown widely. "Kokam" (Mate Mangosteen) and juice syrup are prepared out of it and mostly exported to Bombay.

3,002 persons are engaged in the manufacture of bidi. Bidi-making is a common industry in almost all towns and large villages. Kudal, Malvan, Ratnagiri and Sawantwadi are the important bidi-making centres. Tobacco is brought from Belgaum, Nipani and Kolhapur and "Kuda" leaves which are locally available are used for wrapping.

A chemical factory at Math near Vengurla manufactures silicate of soda and laundry soap. Aluminium buttons are manufactured by two concerns at Vijaydurg. Penknives, bread cutters and cut-throat razors (folding) are manufactured at Malvan. There are three proprietary units at Malvan and one at Kasal engaged in manufactuing nibs out of brass sheets. Copper and brass utensils are prepared at Ratnagiri, Chiplun and Harnai. Rajapur and Devgad are centres of hemp fibre used for fishing nets.

Khed, Dabhol, Guhagar, Kankavli, Kudal, Math, Oni, Rajapur and Sawantwadi are known for handloom weaving. Rajapuri "Panchas" are well-known in the State. At the end of May 1961, there were 864 cotton handlooms in the district. Dapoli, Chiplun, Ratnagiri, Malvan, Sawantwadi and Vengurla are important centres of leather industry. Shiroda, a village in Vengurla mahal, is the only important centre of salt manufacturing in the district and has a model salt farm for imparting training in the production of high quality salt. Articles of coir are prepared at Aronda and Vengurla. Talaode in Sawantwadi is known for the production of "Kat" from Khaira trees. "Kat" is used in preparation of colours and chewing "Pan". Wooden toys and decorative articles of fine quality are prepared at Ratnagiri and Sawantwadi. Shark liver oil is extracted at six places. Water colours, oil paints and coloured chalks are manufactured at Kudal and Sawantwadi. Handmade paper, scents and scented oils are some other village industries in the district. Small-scale boat-building and repairs and production of fishing nets are typical lines pursued along the coast.

There are 486 flour or rice mills engaging 759 workers.

5,320 persons are engaged as carpenters. They manufacture, fix or repair doors and door-frames, wooden roof beams, furniture and agricultural implements. 4,523 persons are engaged as basket-weavers while the number of bidi-makers is 2,964. 2,221 persons are engaged as drawers and weavers and 1,748 persons are reported as food canners and preservers.

The proportions of different groups of artisans to one lakh of total population in the district are as follows :—

Blacksmiths 19, Carpenters 291, Shoe-makers 68, Potters 69, Tailors and dress-makers 77, Spinners and weavers 183 and Basket weavers 248.

The Industries Department has started a number of peripatetic industrial schools and production centres in the district to impart training in cotton weaving, coir, tanning and leather work, carpentry, smithy, etc. The department also conducts an Industrial Training Institute which imparts training courses to civil and mechanical draughtsmen, electricians, motor mechanics, machinists, turners, fitters, pattern-makers, welders, etc. The Maharashtra Village Industries Board has undertaken development of the following village industries :—

(1) Khadi (hand spinning and hand weaving), (2) Bee-keeping, (3) Palm gur, (4) Salt, (5) Ghani oil, (6) Match industry, (7) Soap industry, (8) Khandsari, (9) Hand pounding of Rice, (10) Bamboo, (11) Pottery, (12) Handmade Paper and (13) Leather Industry.

The Master Plan prepared by the Industries Department in 1960 had indicated scope for establishment of the following new industries in the district :—

(1) Aluminium,
(2) Nitrogenous fertilisers,
(3) Phosphatic fertilisers,
(4) Sulphuric Acid,
(5) Calcium Carbide,
(6) Electrolytic Caustic Soda,
(7) Phosphorus.

A factory to manufacture Mangalore tiles is being set up at Kasheli in Rajapur taluka while a cashewnut processing factory on co-operative lines is proposed at Malvan.

It is proposed to set up Industrial Estates on co-operative lines at Ratnagiri, Sawantwadi and Chiplun during the Third Five-Year Plan period.

POWER

The number of electrified towns and villages in the district is 19. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is 8·21 per cent of the total population of the district.

The district consumption of electricity on different items for seven years is shown in Table 30 in Part III.

The *per capita* consumption is naturally much lower than the State average, as only 19 towns and villages in this district had been electrified so far.

The district gets its electricity from the Maharashtra State Electricity Board, through five power stations located at Ratnagiri, Chiplun, Vengurla, Malvan and Sawantwadi, with total installed capacity of 1,113 kw. The management of the power-houses which were put into commission in 1950-51 was transferred to the State Electricity Board from November 1954. With a view to meeting the power requirements of surrounding areas and specially that of the glass factory at Vengurla, the capacities of Ratnagiri and Vengurla power-houses were raised from 150 kw. to 350 kw. during the last decade. 28 per cent of the total electric power is consumed by 87 industrial consumers mainly comprising of saw mills, cashewnut factories, flour mills, cutlery units, etc. On completion of the Koyna Project, power in large quantities and plenty of water from tail race canals will be available for industrial and other uses in the district, and the prospects for growth of large-scale industries appear to be bright.

TRADE AND COMMERCE

The chief articles of export of the district are salt, mangoes, cashewnuts, coconuts and betelnuts. In addition, jack fruit, fish (cured as well as fresh), "Kokam" and coir are also exported mainly to Bombay, Poona, and Kolhapur. Mangoes from the district have a brisk sale in Bombay. The common varieties are Alphonso or "Hapus" and "Payari". The former variety is very famous for its delicious taste and flavour and has a market even outside the country. Cashewnuts are generally exported to Bombay and America. Salt is exported to the Ghat districts. Mangalore tiles imported from Mangalore are re-exported *via* Chiplun. Grocery and grains of all varieties, cloth, oil, medicines and hardware, sugar, gur, chillies, kerosene, etc., are the chief articles of import. Most of these goods come from Bombay, Poona and Kolhapur. In most of the cases the commission agents of dealers at Bombay purchase goods from the producers. The distribution of goods outside the wholesale trade centres is done at market places and weekly bazars held at different places and on different days of the week.

Shops

Every village is within the reach of one of the weekly bazars, and/or in addition has one or more shops. These shops provide the inhabitants with their day-to-day requirements.

They deal in all kinds of articles such as grains, groceries, oils, gur, spices, salt, coconuts, soap, tea, tobacco, betelnuts, chillies and innumerable articles required by people for their daily use. There are in all 7,013 shops in the district; 5,118 are in rural areas and 1,895 in the urban areas. This does not include the shops temporarily set up in the weekly markets or fairs. The number of shops

per 1,000 dwellings is 19·9 for the district as a whole, 16 6 for rural areas and 81·4 for urban areas. It will be seen that the urban areas have about five times more shops per 1,000 dwellings than rural areas. The ratio between shops and 1,000 dwellings for the district is far below than that of the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These are generally trade centres popularly known as "bazars" and are distributing rather than collecting centres. All sorts of articles like foodgrains, pulses, oils, chillies, spices, gur, cloth, fruit, vegetables, cattle, miscellaneous articles such as pots, pans, etc., are sold in these markets. Pedlars and hawkers set up booths on the market days. Agriculturists from the nearby villages also bring their farm produce. The traders and shopkeepers belonging to the market place also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The weekly markets start by about 2 in the afternoon and close by 6 to enable both the buyers and sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and, if so, on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 267 shows the locations of all these markets and also the days on which they are held.

There are altogether 76 weekly and bi-weekly markets in the district. Nine out of them are also cattle markets and four are bi-weekly markets. Eighteen markets are held on Sunday, 6 on Monday, 11 on Tuesday, 14 on Wednesday, 7 on Thursday, 10 on Friday and 10 on Saturday.

The map facing page 267 will show that the weekly markets are more numerous in the southern portion of the district whereas the talukas of Dapoli, Khed, Guhagar and Chiplun have none. It may be due to the more dense population in the south. It is further noticed that four or five weekly markets cluster as satellites around a central village. Each has its bazar on one of the week days, keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

Fairs

Fairs vary a little from weekly markets and sometimes consist of gatherings hardly known outside the villages. Most of the fairs held in the district are associated with important deities and religious festivals. So far as trade is concerned, fairs are complementary to the weekly markets. Considerable quantities of agricultural produce and other articles of daily use are brought for sale. A list of fairs held in the district showing their locations, duration, dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 268 shows location of all the fairs in the district having 1,000 or more gatherings. As in the case of weekly markets, and due to the higher density of population, the concentration of fairs is heavier in the southern part of the district.

Trade Centres

Apart from the weekly markets and fairs, Ratnagiri, Chiplun, Malvan and Vengurla are the important trade centres in the district, as far as collection and export of commodities are concerned. There is, however, no market regulated under the Bombay Agricultural Produce Markets Act, 1939, in the district. Two Purchase and Sale Unions dealing in mangoes were established at Ratnagiri and Vengurla during the First Plan period. One more union of a similar type dealing in arecanut has recently started functioning at Dapoli.

The figures of value of imports and exports based on octroi returns for some of the municipal towns in the district during the year 1953-54 are given below:—

(Rs. in lakhs.)

Commodity	Chiplun		Vengurla		Malvan		Sawantwadi		Ratnagiri	
	Imports	Exports	Imports	Exports	Imports	Exports	Imports	Exports	Imports	Exports
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
Cereals	0·02	0·003	42·93	8·07	12·47	2·68	15·78	11·24	23·68	3·36
Sugar	7·08	1·27	5·30	0·17	5·78	0·77	5·53	3·54	1·96	0·35

Others	6·81	0·03	5·25	0·77	16·44	4·34	47·79	25·78	5·65	0·36
Total ..	38·28	8·43	69·42	12·45	48·35	9·49	106·11	64·17	49·30	6·02

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district in 1961 Census is 20,252, out of which 14,454 or 71 per cent are in rural areas and 5,798 or 29 per cent are in the urban areas. The number of workers in trade and commerce makes 2·5 per cent of all the workers in the district.

Only 3·51 per cent of the workers in trade and commerce are engaged in wholesale trade. 89·64 per cent are engaged in retail trade and 6·85 per cent in miscellaneous trade and commerce. Sixty-six per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is 106 only. The wholesale trade of cereals and pulses appears to be combined with wholesale trade of gur, sugar, spices, oil, tobacco, etc., as the number for this group is 403 for the district.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 of Part III. Their break-up by talukas and type is shown in the next column.

	Number of Banking Offices			
	Scheduled	Non-scheduled	Co-operative	Total
DISTRICT TOTAL ..	17	5	15	37
Mandangad Taluka ..	..	..	..	..
Dapoli Taluka	..	..	2	2
Khed Taluka	1	..	1	2
Guhagar Taluka	..	..	1	1
Chiplun Taluka	2	..	1	3
Ratnagiri Taluka	3	1	3	7
Sangameshwar Taluka ..	..	..	2	2
Lanja Mahal	..	..	..	..
Rajapur Taluka	..	..	..	..
Devgad Taluka	1	..	..	1
Kankavli Mahal	1	1	..	2
Malvan Taluka	3	1	1	5
Kudal Mahal	..	1	1	2
Vengurla Mahal	3	..	1	4
Sawantwadi Taluka ..	3	1	2	6

Ratnagiri, Sawantwadi, Malvan and Vengurla being the important trade centres and ports have together more than half of the total number of banking offices in the district. The talukas of Mandangad and Rajapur and Lanja mahal have no banking offices at all, the remaining talukas, at least, have one branch of the Central Co-operative Bank each.

The State Bank of India works for the treasury in the district and has branches at Ratnagiri, Khed, Chiplun, Malvan, Vengurla and Sawantwadi.

COMMUNICATIONS AND TRANSPORT

There is no railway line in the district. The traffic of passengers as well as goods is carried by road or by coastal shipping.

Sea Transport

The district has a coast line of about 200 miles. There are four major and a number of minor ports. These ports are connected with the hinterland by creeks and rivers which facilitate approach to the interior markets and collection centres by country crafts and launches. Sea transport is, however, not so swift because of the silting of creeks and of the absence of mechanised vessels. It is, moreover, not available during the monsoons.

The main ports are: (1) Ratnagiri, (2) Vijaydurg, (3) Malvan, (4) Vengurla, (5) Jaigad, (6) Purnagad, (7) Varoda (Tiwri), (8) Achare, (9) Devgad, (10) Niwati, (11) Jaitapur, (12) Harnai, (13) Borya, (14) Dabhol, (15) Bankot, (16) Redi, (17) Kelashi and (18) Palshet.

Dabhol, Jaigad, Ratnagiri, Malvan, Vengurla and Redi are of significance from the view-point of tonnage of cargo and passengers handled in recent years. Jaigad and Vijaydurg which are entrepots for erstwhile commercial centres of Sangameshwar and Kharepatan, respectively, are considered to be safe ports open throughout the year for vessels up to 200 tons. Other important fair weather ports are Ratnagiri, Devgad, Malvan and Vengurla. The tonnage of cargo and passengers handled and the chief imports and exports at some of the main ports in the district during the year 1960-61 are given on page (56).

The Bombay Steam Navigation Company runs passenger-*cum*-cargo steamers.

Port Development Plan

The development of an all-weather port near Ratnagiri is considered as a part of the Port Development Plan for an all-weather sheltered anchorage at Mirya Bay which is about four miles from Ratnagiri. Initially, the project envisages a 1,500 feet break water in the Mirya Bay and some ancillary works like approach roads, godowns, water-supply, sheds, etc. When the full scheme is completed the total imports and exports from this port is expected to be of the order of 1,625,000 tons per annum. It is also proposed to undertake development works like providing passenger amenities, wharves, jetties, berthing facilities, etc., during the Third Five-Year Plan at Bankot, Harnai, Dabhol, Palshet, Borya, Jaigad, Purnagad, Devgad, Achare, Malvan, Vengurla and Redi ports.

Port	Cargo Traffic			Passenger Traffic			Chief imports of commodities	Chief exports of commodities
	Imports (tons)	Exports (tons)	Total (tons)	Embark	Disembark	Total		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
(1) Kelashi	76,245	302	76,547	NA	NA	NA	Foodgrains, tiles and salt	Firewood, coconuts, etc.
(2) Palshet	2,305	69	2,374	NA	NA	NA	Foodgrains and tiles ..	Dry fish and general cargo.
(3) Harnai	5,617	468	6,085	21,007	21,741	42,748	Tiles, cement and salt ..	Building materials such as bricks and tiles, foodgrains, oils, etc.
(4) Dabhol	33,465	2,444	35,909	119,699	117,020	236,719	Foodgrains, cement, diesel oil, salt, rice and tiles.	Mangoes and wood.
(5) Borya	159	79	238	3,528	5,940	9,468	Foodgrains and miscellaneous cargo.	Fish and wood.
(6) Jaigad	10,788	1,539	12,327	25,797	27,301	53,098	Salt, kerosene, groundnut, tiles and cement.	Junglewood, mangoes and bamboo.
(7) Ratnagiri	28,253	4,607	32,860	44,585	40,360	84,945	Foodgrains, rice and salt.	Jaggery, rice and mangoes.
(8) Varoda (Tiwri) ..	555	437	992	5,904	11,805	17,709	Foodgrains, tiles and general cargo.	Firewood.
(9) Purnagad	2,879	2,176	5,055	*5,430	*4,135	*9,565	Foodgrains and kerosene	Junglewood, mangoes and general cargo.
(10) Jaitapur	9,397	3,966	13,363	24,381	27,568	51,949	Foodgrains, oils, cement and miscellaneous cargo.	Wood, mangoes and bamboo.
(11) Vijaydurg	9,996	5,884	15,880	25,797	27,301	53,098	Food-stuffs, cement, salt and sugar.	Junglewood, mangoes and bamboo.
(12) Devgad	7,134	1,550	8,684	25,059	48,088	73,147	Kerosene, rice, tiles and salt.	Mangoes, wood and miscellaneous cargo.
(13) Achare	1,084	518	1,602	3,114	3,185	6,299	Foodgrains, oils and salt.	Building sand, wood, silica and dry fish.
(14) Malvan	12,599	3,397	15,996	30,965	44,462	75,427	Foodgrains, kerosene, cement and tiles.	Coconut, bamboo and mangoes.
(15) Redi	..	337,357	337,357	[Figures included in Vengurla Port.]			..	Iron ore.
(16) Vengurla	14,075	17,643	31,718	17,564	18,812	36,376	Tiles, kerosene and cement.	Sand, cashew kernels and mangoes.
(17) Bankot	5,363	1,059	6,422	22,806	25,084	47,890	Foodgrains, tiles and cement.	Mangoes, firewood and foodgrains.

* Figures for 1958-59. NA = Not available.

Road Transport

Ratnagiri town along with Vengurla, Sawantwadi, Kudal, Malvan and Rajapur are well connected by roads with other commercial centres like Kolhapur, Bombay, Nipani and Belgaum. Most of the traffic from the district runs during monsoon through Kolhapur district. The district headquarters is also well connected by roads with the taluka headquarters. Interruptions to through traffic are numerous due to a network of rivers and rivulets in the district and ferries are, therefore, required to be used at many places for want of bridges.

The eastern part is a hilly terrain and the roads leading to 'Desh' pass through the ghats. The important ghats are Amboli, Phonda and Amba. There is no National Highway passing through the district. The Bombay-Konkan-Goa Road of more than 200 miles of length is an important State Highway passing along the coast.

During the period 1951—61, the mileage of State Highways increased by only 9·22 miles. The major district roads increased by 13·48 miles, other district roads by 17·76 miles and village roads by 92·80 miles. The total increase in all types of roads (excluding municipal roads) is 133·26 miles.

New Roads

The construction or improvement of the following roads has been undertaken (as on 31st March 1962):—

(1) Road near Banda bridge on Sawantwadi-Dodamarg road; (2) Bombay-Konkan-Goa road; (3) Ratnagiri-Kolhapur road; (4) Mirya-Ratnagiri road; (5) Vengurla-Belgaum road; (6) Devgad-Nipani road; (7) Guhagar-Chiplun road; (8) Mhapral-Kumbale-Visapur road; (9) Malvan-Kasal road; (10) Devhare-Bankot road; (11) Harnai-Khed road; (12) Deorukh-Talekante-Pangri-Tulsani road; (13) Rajapur-Anaskura Ghat road; (14) Vijaydurg-Wagothana-Kasavan road; (15) Dapoli-Karanjani-Pali road; (16) Khed-Shivtar road; and (17) Chiplun-Kadavali-Dhamanand-Pali road.

Bridges under Construction

Work of the following bridges is in progress (as on 31st March 1962):—

(1) On Bhansal river on Bombay-Konkan-Goa road; (2) on Margaon nallah on Bombay-Konkan-Goa road; (3) on Kelna river on Bombay-Konkan-Goa road; (4) on Tillari river on Bombay-Konkan-Goa road; (5) on Kolamb creek on Malvan-Kasal road; (6) on Saptaling river on Sakharpa-Sangameshwar road; and (7) on Jog river on Anjarle-Bondiwali road.

Under the Nagpur Plan the district should have 3,039 miles of roads. It was short of that target by 658·50 miles on 31st March 1961.

Posts, Telegraphs and Telephones

The district is included in the Konkan Postal Division. Head Post Offices are situated at Ratnagiri and Malvan and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1961-62, there were 60 sub-post offices and 494 branch post offices in the district. Together their number has increased by 68 per cent over that of 1951-52.

There are telegraph offices at the following 51 places:—

(1) Ratnagiri; (2) Malvan; (3) Achare; (4) Adur; (5) Aronda; (6) Banda; (7) Bankot; (8) Chiplun; (9) Dabhol; (10) Dapoli; (11) Devgad; (12) Deorukh; (13) Dodamarg; (14) Guhagar; (15) Harnai; (16) Jaitapur; (17) Jaigad; (18) Kadvai; (19) Kankavli; (20) Kasal; (21) Kasba; (22) Katta; (23) Kharepatan; (24) Khed; (25) Khopi; (26) Kudal; (27) Lanja; (28) Latwan; (29) Makhajan; (30) Malgund; (31) Mandangad; (32) Masure; (33) Mithbaon; (34) Pachal; (35) Padel; (36) Pali; (37) Parule; (38) Phonda Ghat; (39) Pophali; (40) Purnagad; (41) Rajapur; (42) Saitavade; (43) Sakharpa; (44) Sangameshwar; (45) Sawantwadi; (46) Savarde; (47) Shironda; (48) Talebazar; (49) Tarele; (50) Vengurla; and (51) Vijaydurg.

The following 24 places have telephone connections:—

(1) Ratnagiri; (2) Malvan; (3) Banda; (4) Chiplun; (5) Dapoli; (6) Devgad; (7) Deorukh; (8) Kankavli; (9) Kharepatan; (10) Khed; (11) Kudal; (12) Lanja; (13) Makhajan; (14) Malgund; (15) Mandangad; (16) Padel; (17) Phondaghat; (18) Pophali; (19) Rajapur; (20) Sakharpa; (21) Sangameshwar; (22) Sawantwadi; (23) Shiroda; and (24) Vengurla.

Passenger Road Transport

Due to the lack of railways and sea transport being completely closed during the monsoons, roads play a vital role in linking the district with other parts of the State. During the Plan period a number of roads connecting the villages were constructed in the district and the buses of the State Transport Corporation are running regularly on these roads. This district is included in the jurisdiction of Ratnagiri S. T. Division. Nine depots are situated at (1) Ratnagiri, (2) Deorukh, (3) Chiplun, (4) Dapoli, (5) Sawantwadi, (6) Malvan, (7) Devgad, (8) Vijaydurg and (9) Rajapur. The division consists of practically the entire area of the district. The nine depots together run buses on 178 routes making 593 single trips and on an average carry 32,000 passengers per day. The S.T. is also running a local bus service in Ratnagiri municipal area.

Nationalisation of passenger road transport in the district had been completed by the end of October 1949. The Third Five-Year Plan schemes include expansion of the services to new places on public demand, construction of permanent bus stations, and pick-up stands and provision of other facilities for the travelling public.

Goods Transport

Goods traffic by road is handled by about 150 trucks registered in the district and owned by private transport companies and individual operators. A number of trucks from places like Poona, Kolhapur, Belgaum and Bombay come to Ratnagiri, Chiplun, Sawantwadi, Malvan, Vengurla and Rajapur and accept goods transport on their return journey.

Workers in Transport and Communications

7,971 persons are engaged in transport and 1,410 in postal, telegraphic and telephone communications, etc., in the district. Out of the workers in transport 3,926 are engaged in sea transport, 1,596 in motor transport, 2,198 in other kinds of transport like bullock-carts, and horses on hire, coolies, etc., and 251 are in railway transport. Workers engaged in railway transport appear to be the persons who are engaged with the railways in Bombay and other places, who might have come for "Holi" festival and happened to be enumerated in the district.

Village Communications

The Village Directory in Part I gives in the district whether it is served by a railway or a road and has a post office or not.

CONSTRUCTION

The total number of persons engaged in construction is 9,502; 8,033 are males and 1,469 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

36·06 per cent of the workers are engaged in the construction and maintenance of dams, waterways and canals, etc., 37·47 per cent in construction and maintenance of roads, bridges, etc., and 26·45 per cent in construction and maintenance of buildings, etc.

The large proportions engaged in the constructions of dams, waterways, canals, etc., and roads, bridges, etc., are due to the workers engaged in the construction on tail race waters of the Koyna Hydro-Electric Project, passing through Pophali in Chiplun taluka and the construction of bridges and improvement of the Bombay-Konkan-Goa and Ratnagiri-Kolhapur roads.

All the workers engaged in construction together make only 1·16 per cent of the total workers in the district.

OTHER SERVICES

55,337 persons are engaged in the district in "Other Services"; 43,138 are males and 12,199 are females. The major categories out of them are (i) Public Services; (ii) Educational Services; and (iii) Personal Services. "Public Services" include administrative employees of Central, State and Local Governments. "Educational Services" include all classes of teachers and "Personal Services" include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of workers in other services by minor groups is shown in Table B-IV-C in Part II.

6·74 per cent of the total workers in the district are engaged in "Other Services" as against 8·53 per cent in the State. 18·42 per cent of the total workers in "Other Services" in the district are engaged in "Public Services" and 15·75 per cent in "Educational Services". The former is much below while the latter is higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This may be so because the district does not have large number of urban centres and there are hardly any comparable business services, labour associations or recreation services. The other reason appears to be that the avenues of employment are much restricted and as a result a large number of working age males migrates to industrial centres like Bombay. The proportion of "Personal Services" in the district is also lower at 24·91 per cent than the State average of 27·15 per cent.

The number of domestic servants is 7,182 or one for 254 population. The number of barbers is 1,724. The number of persons in laundry services (washermen, etc.) is 518.

There are 268 legal practitioners and 1,574 persons working in medical and health services excluding veterinary services.

The number of persons including teaching staff in technical schools and colleges is 196 and that in other schools and colleges is 8,482.

The number of State Government employees including those now working under the Zilla Parishad is 5,586.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rate

The proportions of workers to total population, males and females, for the district and each taluka are as given on the next page.

The labour participation rate, i.e., the percentage of workers to total population varies from 39·42 in Ratnagiri taluka to 50·05 in Lanja mahal. Labour participation rate for males varies from 43·49 in Malvan taluka to 51·19 in Lanja mahal and that for females from 33·76 in Ratnagiri taluka to 49·16 in Lanja mahal. Low rates for Ratnagiri taluka are due to the large proportion of urban population having a large student population. Lanja mahal has the highest participation rates in the district both for males and females. The labour participation rate for the district as a whole is lower (44·92) than the average for the State (47·91). Out-migration of males in the working age 15—54 has brought down the participation rate for males to 48·31 against the average of 57·09 for the State. Female participation in the district is greater than the State average both because of the predominance of rice in the crop pattern and because in the absence of men working at Bombay, women look to household cultivation more than in the other districts. Female participation is very high in Lanja and Kankavli mahals and Guhagar and Devgad talukas.

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA ..	47·91	57·09	38·10
RATNAGIRI DISTRICT ..	44·92	48·31	42·18
1 Mandangad Taluka ..	46·70	50·85	43·47
2 Dapoli Taluka ..	44·61	48·12	41·91
3 Khed Taluka ..	45·99	49·34	43·25
4 Guhagar Taluka ..	47·19	47·01	47·31
5 Chiplun Taluka ..	44·12	49·64	39·53
6 Ratnagiri Taluka ..	39·42	46·29	33·76

15 Sawantwadi Taluka ..	45·73	51·15	40·88

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract in Part II shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows:—

		Total workers	Primary	Secondary	Tertiary
Maharashtra ..	Total	100	72·25	12·34	15·41
	Rural	100	88·73	5·68	5·59
	Urban	100	11·97	36·69	51·34
Ratnagiri District ..	Total	100	83·59	6·05	10·36
	Rural	100	87·27	4·67	8·06
	Urban	100	23·04	28·70	48·26

As may be expected, the primary sector dominates in the district with as much as 83·59 per cent of the total workers engaged against the average of 72·25 per cent for the State. Even in the urban areas of the district the primary sector engages as much as 23·04 per cent of the total workers against the average of 11·97 per cent for urban areas in the State.

Categories of Economic Activity

The distribution of workers, males and females by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			RATNAGIRI DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46·11	40·69	54·79	75·10	65·03	84·43
II Agricultural Labour ..	23·80	18·12	32·90	6·09	5·10	7·00
III Mining, Quarrying, Livestock, Forestry, Fishing, etc.	2·16	2·97	0·86	2·88	4·82	1·09
IV Household Industry ..	4·39	4·80	3·74	2·80	3·22	2·40
V Manufacturing other than household Industry.	6·88	10·22	1·54	1·61	3·09	0·25
VI Construction	1·24	1·69	0·53	1·16	2·04	0·34
VII Trade and Commerce ..	4·52	6·61	1·17	2·47	3·46	1·55
VIII Transport, Storage and Communcation.	2·36	3·65	0·29	1·15	2·31	0·08
IX Other Services	8·54	11·25	4·18	6·74	10·93	2·86
Total Workers ..	100·00	100·00	100·00	100·00	100·00	100·00

A remarkable departure from the average pattern for the State is that the proportion of agricultural labourers is extremely low. But the deficiency is more than made up in the higher proportion of cultivators. The State average ratio between cultivators and agricultural labourers is 2 : 1 while for the district it is 12 : 1. The preponderance of cultivators over agricultural labourers seems to be a special feature of the district. It may be due to the crop pattern and cultivation practices in which outside labourers are not hired as much as in other districts and/or those who are so hired are themselves small cultivators and in addition work as agricultural labourers after harvesting their own crops. There are more than a lakh of persons in the district who work both as cultivators and agricultural labourers (*vide* Table B-VII-A in Part II).

The 1961 Census concepts of workers and non-workers have been described in the Explanatory Note to Part II. In spite of the changes in the method of economic classification, the broad pattern of 1961 may be compared with the livelihood pattern of 1951.

In 1951 the cultivators and agricultural labourers (including earning dependents) were 70·47 per cent and 3·22 per cent of the total workers. In 1961 the corresponding proportions are 75·10 per cent and 6·09 per cent, respectively. The combined proportion of the two categories has thus increased from 73·69 per cent in 1951 to 81·19 per cent in 1961. The difference is mainly due to the changes made in 1961 in the definition of work, principal work and secondary work. It will, however, be noticed that the proportion of agricultural labourers which is extremely low in 1961 was still lower in 1951. It may indicate that owner cultivation is seen in the district at its height.

Talukawise distribution of workers in nine categories of economic activities is shown on page (60).

Corresponding figures for the State and the district are also shown for comparison.

Distribution of workers by nine categories of economic activity is also shown in the Figure on page (61) for the district and each taluka separately.

The combined proportion of the first two categories are very high in all talukas except Vengurla mahal where 21·09 per cent of the workers are engaged in category III which includes fishing and mining industries. The combined proportion of categories IV and V, i.e., household and non-household manufacturing industries, is only 4·41 in the district against the average of 11·27 per cent for the State.

Labour Participation by Age

The labour participation rates by four broad age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Ratnagiri District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All ages ..	44·92	48·31	42·18	47·91	57·09	38·10
0—14 ..	5·49	4·49	6·49	8·72	8·62	8·84
15—34 ..	76·66	84·07	71·81	74·53	87·45	60·90
35—59 ..	78·84	96·08	66·84	81·57	96·86	63·68
60+ ..	42·70	71·10	19·59	49·13	72·82	26·28

Talukawise distribution of workers in nine categories of economic activities

State/District/Taluka	I Cultivator	II Agricultural labourer	III Mining, quarrying, live-stock, forestry, fishing, hunting, etc.	IV Household industry	V Manufacturing other than household industry	VI Construction	VII Trade and commerce	VIII Transport, storage and communication	IX Other services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA	46·11	23·80	2·16	4·39	6·88	1·24	4·52	2·36	8·54	100·00
RATNAGIRI DISTRICT	75·10	6·09	2·88	2·80	1·61	1·16	2·47	1·15	6·74	100·00
1 Mandangad Taluka	79·31	6·78	1·16	1·09	0·65	3·00	1·82	0·96	5·23	100·00
2 Dapoli Taluka	69·24	8·24	4·79	2·62	1·74	0·75	2·77	1·37	8·48	100·00
3 Khed Taluka	81·14	6·81	0·57	1·22	1·37	1·72	1·43	0·57	5·17	100·00
4 Guhagar Taluka	73·73	4·49	5·18	1·95	1·55	0·49	3·94	0·79	7·88	100·00
5 Chiplun Taluka	74·35	7·40	0·24	1·33	1·83	5·53	2·19	0·93	6·20	100·00
6 Ratnagiri Taluka..	66·57	5·29	4·06	2·26	2·68	0·87	3·48	3·00	11·79	100·00
7 Sangameshwar Taluka	83·05	7·42	0·17	1·28	1·31	0·39	1·34	0·76	4·28	100·00
8 Lanja Mahal	88·73	3·56	0·20	1·05	0·68	0·49	1·02	0·22	4·05	100·00
9 Rajapur Taluka	81·93	4·04	1·79	2·24	1·54	0·43	1·84	1·29	4·90	100·00
10 Devgad Taluka	80·12	4·66	1·78	3·42	0·94	0·60	1·80	1·92	4·76	100·00
11 Kankavli Mahal	85·28	3·65	0·43	2·40	1·03	0·68	1·86	0·41	4·26	100·00
12 Malvan Taluka	68·14	7·29	4·21	4·00	2·45	0·22	4·19	1·79	7·71	100·00
13 Kudal Mahal	77·80	8·30	0·74	3·93	1·05	0·46	1·64	0·34	5·74	100·00
14 Vengurla Mahal	46·38	3·95	21·09	6·05	3·00	0·52	5·54	1·94	11·52	100·00
15 Sawantwadi Taluka	66·57	7·12	3·45	7·55	1·73	0·47	3·10	0·86	9·15	100·00

The district participation rates for males are lower than the State averages for all the age-groups and especially so in the age-group 0—14. Female participation rates in the district are higher for 15—34 and 35—59 age-groups and lower for 0—14 and 60+ age-groups than the corresponding averages for the State. Lower participation in age-group 0—14 both for males and females indicates that a larger proportion of children is sent to schools in the district than the State average.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III in Part II is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison:—

	Illiterate	Literate (without educational level)	Primary or Junior basic	Matriculation and above
Maharashtra ..	68·65	14·11	13·91	3·33
Ratnagiri District ..	72·38	12·32	14·12	1·18

The literacy percentage for workers in the district is more or less equal to that for the State. A larger proportion of workers in the district is however illiterate because literates and educated persons may be migrating outside the district more than the illiterates. It is, however, significant that 861 matriculate males and 30 matriculate females work as cultivators.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage proportions of employers, employees, single workers and family workers in the district, for total, rural and urban areas are shown on page (62). Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II.

Family workers and single workers have higher proportions in the district than the State average. Those differences are more marked in the urban

areas. This is a reflection of traditional crafts and single worker trading establishments dominating the scene.

		Total workers	Class of workers: Employers	Employees	Single workers	Family workers
Maharashtra	Total	100	3·96	62·18	26·52	7·34
	Rural	100	1·57	46·47	38·58	13·38
	Urban	100	4·98	68·90	21·37	4·75
Ratnagiri District.	Total	100	2·21	50·94	32·33	14·52
	Rural	100	1·77	47·56	34·68	15·99
	Urban	100	3·35	59·54	26·34	10·77

The proportion of employees, i.e., hired workers and others in household industries in the district total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

		Total workers	Employees	Others
Maharashtra ..	Total ..	100	8·18	91·82
	Rural ..	100	4·91	95·09
	Urban ..	100	16·35	83·65
Ratnagiri District ..	Total ..	100	4·09	95·91
	Rural ..	100	3·77	96·23
	Urban ..	100	6·63	93·37

Household Industries in the district also work more with family workers and the proportion of hired workers is 4·09 per cent against 8·18 per cent for the State. The difference in urban areas is more significant than that in the rural areas.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II) :—

	Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work: I	II	IV
Maharashtra ..	I Cultivation	Total	..	17·85	1·97
		Rural	..	18·03	1·98
		Urban	..	10·54	1·32
	II Agricultural Labour.	Total	13·17	..	0·94
		Rural	13·46	..	0·97
		Urban	7·12	..	0·31
	IV Household Industry.	Total	14·78	6·97	..
		Rural	19·61	9·38	..
		Urban	2·70	0·95	..
Ratnagiri District.	I Cultivation	Total	..	14·94	1·75
		Rural	..	15·03	1·74
		Urban	..	6·15	2·47
	II Agricultural Labour.	Total	27·53	..	1·53
		Rural	27·70	..	1·55
		Urban	19·58	..	0·67
	IV Household Industry.	Total	28·50	5·53	..
		Rural	31·25	6·11	..
		Urban	6·94	0·96	..

The proportion of agricultural labourers working as cultivators as a secondary work in the district is more than double the average for the State. At least one among every four agricultural labourers is also cultivating his land. Household industries are also worked more in combination with cultivation than the State average. At least one in every four workers engaged in household industry is also working on land.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as shown below. The occupational classification is described in the Explanatory Note to Part II :—

	Occupational Division	Maharashtra	Ratnagiri District
0	Professional, technical and related workers.	6·42	8·03
1	Administrative, executive and managerial workers.	3·89	4·80
2	Clerical and related workers	9·13	5·19
3	Sales workers	12·23	11·94
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	12·66
5	Miners, quarrymen and related workers.	0·75	2·87
6	Workers in transport and communication occupations.	3·57	4·51
7-8	Craftsmen, production process workers and labourers not elsewhere classified.	45·99	37·92
9	Service, sport and recreation workers	10·27	11·51
X	Workers not classifiable by occupation	0·11	0·57
	Total ..	100·00	100·00

The three significant departures from the average State pattern are the larger proportion of occupational division 4 and 5 due to the prominence of fishing and mining industries in the district and the lower proportion of occupational divisions 7 & 8 of production process workers due to the absence of any large-scale manufacturing industry in the district.

Non-workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District Total: Males	Females	Rural: Males	Females	Urban: Males	Females
(1) Full-time students	40.25	16.25	39.08	15.72	51.72	20.72
(2) Household duties	0.05	35.29	..	33.58	0.55	49.69
(3) Dependents, infants and disabled	56.62	48.04	58.42	50.32	38.91	28.81
(4) Retired, rentiers or independent means, etc.	1.08	0.22	0.91	0.21	2.78	0.30
(5) Beggars, vagrants, etc.	0.19	0.12	0.17	0.13	0.39	0.12
(6) Inmates of institutions	0.10	0.02	0.01	N	1.07	0.14
(7) Persons seeking employment for the first time.	0.76	0.04	0.60	0.02	2.24	0.19
(8) Unemployed but seeking work ..	0.95	0.02	0.81	0.02	2.34	0.03
Total ..	100.00	100.00	100.00	100.00	100.00	100.00

N = Negligible.

There is a marked difference in the distribution pattern for non-workers among males and females. 40·25 per cent out of male non-workers are full-time students while the corresponding proportion for females is 16·25. The reason is that 35·29 per cent females who are engaged in household duties are also included as non-workers. The rural urban differences are similar both for males and females. In urban areas the percentage of full-time students is higher and that for the dependents is lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 4·58 and 1·41 for males in urban and rural areas respectively and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower also because the group of non-workers contains a large number of adult women engaged in household duties.

Review

The proportion of population in working ages, i.e., 15—59 is smaller in 1961 than 1951. It may be still smaller in 1971 because of the high rate of growth of population. An average worker in the district has thus to bear an increasing burden of dependents in 1961 than in 1951. This change in the age composition of the population would itself depress the level of living unless it is also accompanied by a corresponding rise in the *per capita* production. The gross agricultural production has no doubt shown an increase during the last decade but the number of workers on land also increased by about the same proportions. The increase in industrial production in the district is not yet of any significance to influence the estimate of *per capita* production.

Agriculture dominates the economy and is bound to do so for long. Though the estimated 1955-56 production of Rs. 124 per acre is considerably higher than the average of Rs. 76 per acre for the State, yet the average production per worker on land is considerably lower (Rs. 209) than the State average (Rs. 499) because the average gross area cultivated per worker on land is only 1·34 acres against the average of 3·50 acres per worker for the State.

With the average size of holding at 8·26 acres, and only 1·34 acres cultivated per worker on land, the agricultural production would hardly suffice the needs of the growing population. As a result the long-term migration of working age males to Bombay continues and a large proportion of the population depends on the money orders received from Bombay and other places. On an average more than 30,000 people may be migrating outside the district every year. The receipts of money orders in the district from outside amounted to Rs. 3·75 crores during the financial year 1963-64.

PART I

VILLAGE DIRECTORY

This Directory renders an account of each Village and each ward of Town

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with word "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown in roman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for Electricity.*

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Chouitries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for Canal.*

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

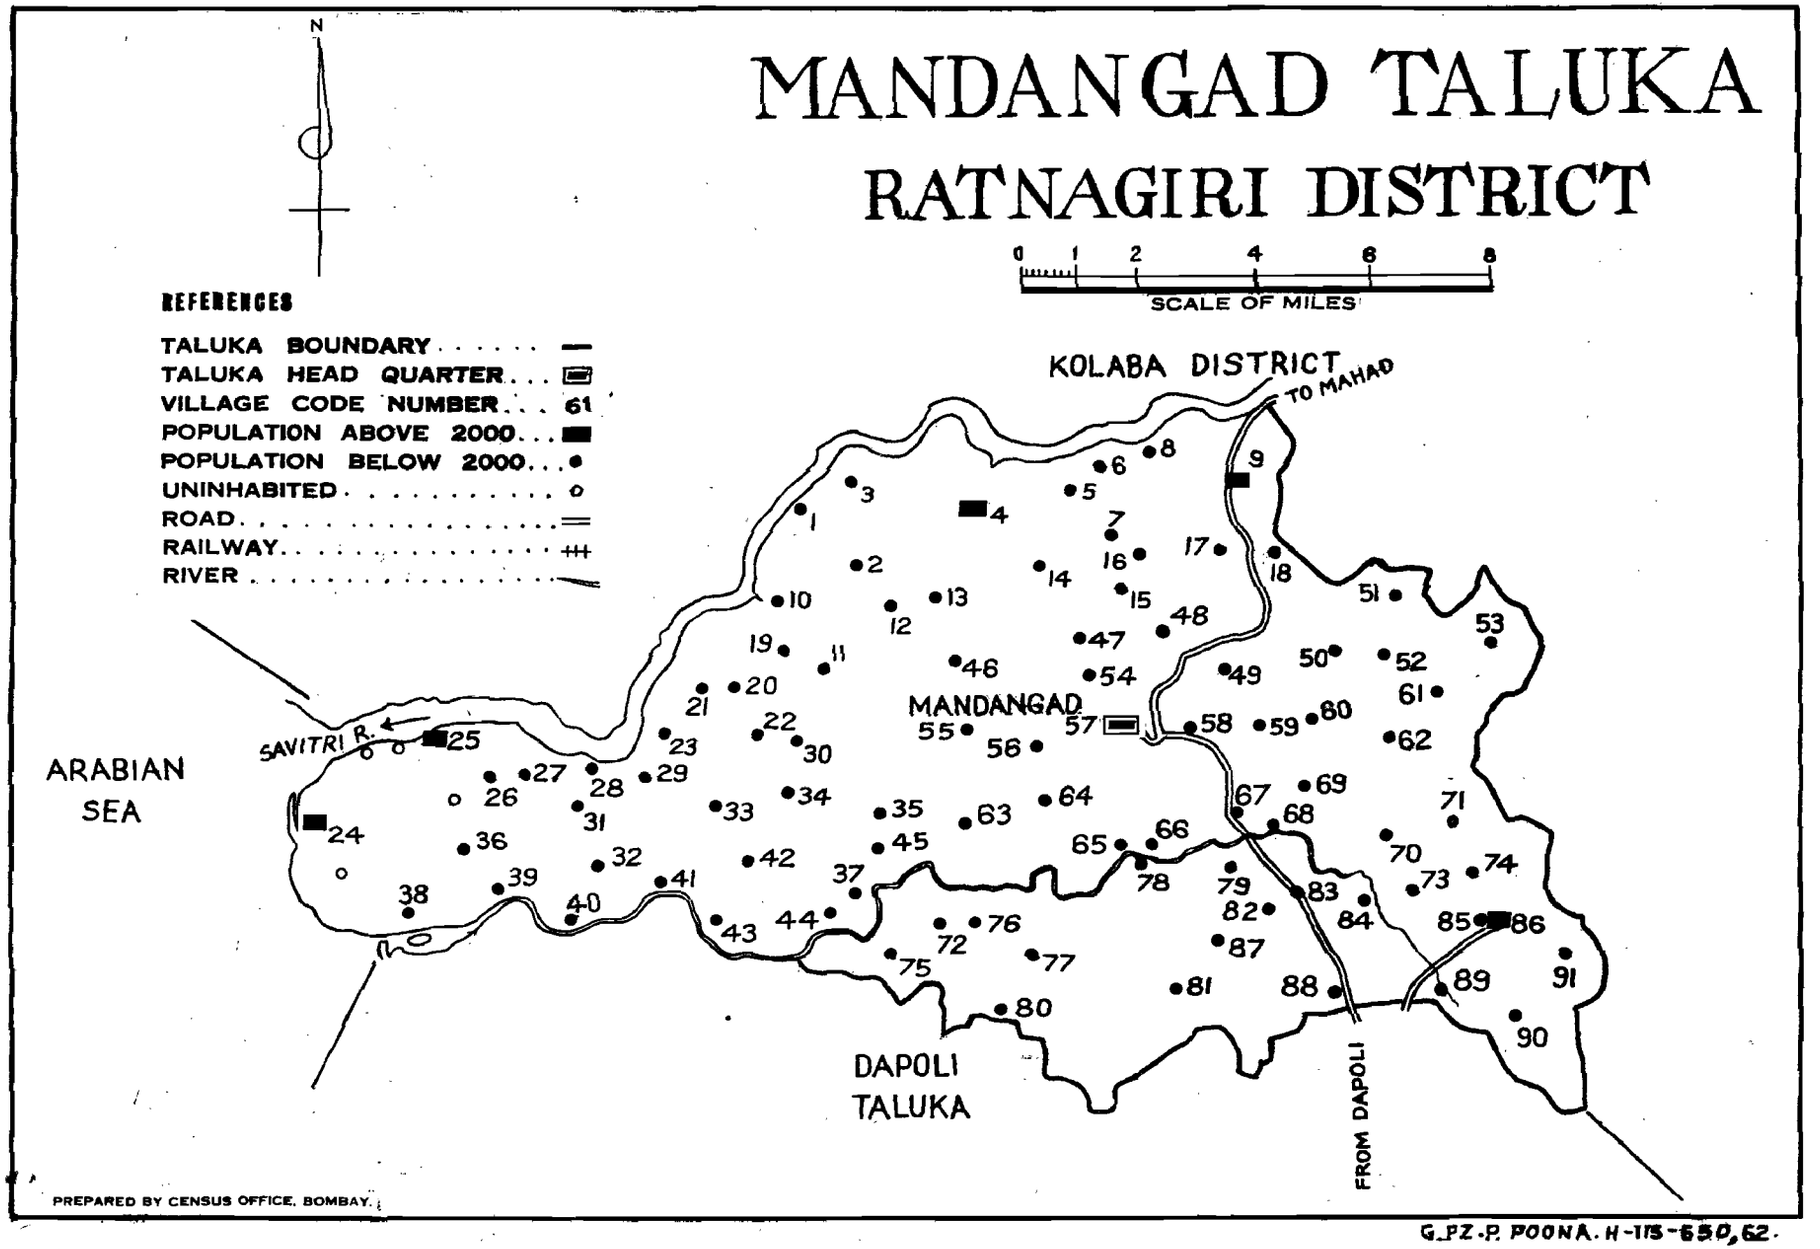

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

EXPLANATORY NOTE

This Part contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (*e.g.*, A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (*e.g.*, B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. There have been no territorial changes during the decade 1951—1961. Appendix I does not, therefore, appear here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This. table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The " household " is slightly different from a " family ". A " household " is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A " literate " is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I. As Cultivator.
II. As Agricultural Labourer.
III. In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV. At Household Industry.
V. In Manufacturing other than Household Industry.
VI. In Construction.
VII. In Trade and Commerce.
VIII. In Transport, Storage and Communications.
IX. In other services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, live-stock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, waterman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which o not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately, while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I.	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II.	Agricultural Labourer ..	
III.	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV.	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V.	Manufacturing	Divisions 2 and 3.
VI.	Construction	Division 4.
VII.	Trade and Commerce ..	Division 6.
VIII.	Transport, Storage and Communications.	Division 7.
IX.	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (*i.e., who are either employers, single workers or family workers in those household industries*). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes "employer", "employee", "single worker" and "family worker":

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii), even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivation and II-Agricultural labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in cloumn (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka, separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry ;

(ii) engaged in cultivation only ;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and

by industry division and major group of the household industry (Appendix I). The table shows the sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 Tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. All the same, the table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0–9 years and 70 and over. The entire population in 0–9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Table C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bi-lingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-B of Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and for rural areas only for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government ;
(ii) entirely held from private persons or institutions for payment in money, kind or share ; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This Table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students ;
(ii) persons seeking employment for the first time ;
(iii) persons employed before but now out of employment and seeking work ; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students ;
(ii) persons seeking employment for the first time ;
(iii) persons employed before but now out of employment and seeking work ; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five Tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods, goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants an also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124. This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, live-stock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Live-stock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Divisions 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal.
36	Basic Metals and their products except machinery and transport equipment.
37	Machinery (all kinds other than Transport) and Electrical equipment.
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services
83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations.
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described. (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting—*concld.*	
04	*Live-stock and Hunting—*	
	Production and rearing of live-stock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Divisions 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugar-cane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor, from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Divisions 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven ..	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products.	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railways bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
63	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade*—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in food stuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobiloil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper ..	661
	Retail trading in metal, porcelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*—	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport*—	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport*—	
	Such as packing, carting travel agency ..	710
72	*Storage and Warehousing*—	
	Operation of storage such as ware-houses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication*—	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting..	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services*—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or inividuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note.—n. e. c. = not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers
1 Administrative, executive and managerial workers
2 Clerical and related workers
3 Sales workers
4 Farmers, fishermen, hunters, loggers and related workers
5 Miners, quarrymen and related workers
6 Workers in transport and communication occupations
7-8 Craftsmen, production process workers, and labourers not elsewhere classified
9 Service, sport and recreation workers
X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers
- 00 Architects, Engineers and Surveyors
- 01 Physicists, Chemists, Geologists and other Physical Scientists
- 02 Biologists, Veterinarians, Agronomists and Related Scientists
- 03 Physicians, Surgeons and Dentists
- 04 Nurses, Pharmacists and other Medical and Health Technicians
- 05 Teachers
- 06 Jurists
- 07 Social Scientists and Related Workers
- 08 Artists, Writers, and Related Workers
- 09 Draughtsmen, Science and Engineering Technicians, n. e. c.
- 0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers
- 10 Administrators, and Executive Officials, Government
- 11 Directors and Managers, Wholesale and Retail Trade
- 12 Directors, Managers and Working Proprietors, Financial Institutions
- 13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers
- 20 Book-Keepers and Cashiers
- 21 Stenographers and Typists
- 22 Office Machine Operators
- 28 Clerical Workers, Miscellaneous
- 29 Unskilled Office Workers

3 Sales Workers
- 30 Working Proprietors, Wholesale and Retail Trade
- 31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
- 32 Commercial Travellers and Manufacturers' Agents
- 33 Salesmen, Shop Assistants and Related Workers
- 34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers
- 40 Farmers and Farm Managers
- 41 Farm Workers
- 42 Hunters and Related Workers
- 43 Fishermen and Related Workers
- 44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers
- 50 Miners and Quarrymen
- 51 Well Drillers and Related Workers
- 52 Mineral Treaters
- 59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations
- 60 Deck Officers, Engineer Officers and Pilots, Ship
- 61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen
- 62 Aircraft Pilots, Navigators and Flight Engineers
- 63 Drivers and Firemen, Railway Engine
- 64 Drivers Road Transport
- 65 Conductors, Guards and Brakesmen (Railway)
- 66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
- 67 Telephone, Telegraph and Related Telecommunication Operators
- 68 Postmen and Messengers
- 69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified
- 70 Spinners, Weavers, Knitters, Dyers and Related Workers
- 71 Tailors Cutters, Furriers and Related Workers
- 72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers
- 73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
- 74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
- 75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
- 76 Electricians and Related Electrical and Electronics Workers
- 77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
- 78 Painters and Paper Hangers
- 79 Bricklayers, Plasterers and Construction Workers, n. e. c.
- 80 Compositors, Printers, Engravers, Book Binders and Related Workers
- 81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
- 82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
- 83 Chemical and Related Process Workers
- 84 Tobacco Preparers and Products Makers
- 85 Craftsmen and Production Process Workers, n. e. c.
- 86 Testers, Packers, Sorters and Related Workers
- 87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
- 89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers
- 90 Fire Fighters, Policemen, Guards and Related Workers
- 91 House Keepers, Cooks, Maids and Related Workers
- 92 Waiters, Bartenders and Related Workers
- 93 Building Caretakers, Cleaners and Related Workers
- 94 Barbers, Hairdressers, Beauticians and Related Workers
- 95 Launderers, Dry Cleaners and Pressers
- 96 Athletes, Sportsmen and Related Workers
- 97 Photographers and Related Camera Operators
- 99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations
- X0 Workers without occupations
- X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
- X9 Workers Not Reporting Occupations.

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note : n. e. c. = not elsewhere classified

Industrial Code Number	Household Industry
	Major Group 00—Field Produce and Plantation Crops
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
	Major Group 01—Plantation Crops
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
	Major Group 02—Forestry and Logging
023·1	Production of Charcoal.
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above
	Major Group 03—Fishing
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
	Major Group 04—Livestock and Hunting
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
	Major Group 10—Mining and Quarrying
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
	Major Group 20—Foodstuffs
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of padd y by rice mill
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and foodgrains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweet-meats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
	Major Group 21—Beverages
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
	Major Group 22—Tobacco Products
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
	Major Group 23—Textile—Cotton
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
	Major Group 24—Textile—Jute
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date plam fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
	Major Group 25—Textile—Wool
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkaha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
	Major Group 26—Textile—Silk
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
	Major Group 27—Textile—Miscellaneous
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
	Major Group 27—Textile—Miscellaneous—*concld.*
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat, and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including rain- coats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
	Major Group 28—Manufacture of Wood and Wooden Products
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
Major Group 28—Manufacture of Wood and Wooden Products—*concld.*	
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of artwheels
289·4	Manufacure of other wood and allied products n.e.c.
Major Group 29—Paper and Paper Products	
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags
292·2	Papier mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
Major Group 30— Printing and Publishing	
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving , etching, block making, type cutting and other work connected with printing industry.
303	Book binding, stitching, sizing and other work connected with book binding industry
Major Group 31—Leather and Leather Products	
310·1	Flying, processing of hides and skins including taxidermy
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals).
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur.
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
Major Group 32—Rubber, Petroleum and Coal Products	
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths, etc.
Major Group 33—Chemicals and Chemical Products	
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335·6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
Major Group 33—Chemicals and Chemical Products —*concld.*	
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemicals products n. e. c.
Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal	
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, cnakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346·1	Ma king of images from soap stone
346·2	Manufacture of images, toys and other articles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment	
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods, n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*	
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n.e.c.
366·1	Making of aluminium utensils
366·2	Making of other aluminium products n. e. c.
367·1	Making of tin utensils
367·2	Making of articles from tin sheets
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets
369·4	Making and repairing of locks and trunks
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n. e. c.
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts.
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
Major Group 38—Transport Equipment	
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
Major Group 38—Transport Equipment—*concld.*	
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
Major Group 39—Miscellaneous Manufacturing Industries	
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including Silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc. n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets, balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n. e. c.

33.	Fairs	268

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. " Normal rainfall " [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India."

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, riverbeds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years ;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by " cereals, pulses and others ". Non-foodcrops are similarly shown under " oilseeds and others ".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1955-56 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area, and the gross irrigated area, are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters. (However, this table is not shown for this district as the data are not available.)

Table 8

This table presents harvest prices of principal crops. The " harvest price " is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

" Poultry " in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, i.e., calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word "factories" here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960. The number of persons shown is based on eye estimates of the reporters.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
