PREFACE

Prior to the 1951 Census, there was no regular separate publication at the district level regarding the data collected, although the seeds of the District Census Handbooks can be traced to the 'Village Lists brought out for every district in 1901 and 'Village Statistics' of every district published in 1911 and 1941. No. definite answer is forthcoming as to why such publications, giving village-wise information of occupied houses, break-up of population into males/females and literates, were not brought out in 1921 and 1931 The reason could be transfer from 1921 of certain charges on Census previously met from the provincia. revenues to the Central revenues and the Government of India may not have considered it necessary to publish statistics up to the village level. 'Village Statistics' in 1941 were brought out by the Central Provinces & Berar Government and this practice of bringing out district-wise publications at the cost of the State Government has since been continuing.

2. The scope of the district-wise publications, now called the District Census Handbooks, has been undergoing change with each successive Census from 1951. In 1951, the District Census Handbooks only contained the Primary Census Abstract and the Census tables. In view of the usefulness of separate publication for each district, improvements were made at the time of the 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, education, etc. An 'Introductory Note' was also added to highlight the more striking features. Unfortunately, the desire to make district-wise Census publications very comprehensive resulted in late availability of the books to the users. Therefore, this time the District Census Handbooks have been divided into three parts in order to release maximum data, as and when finalised, so that the publications may have a useful life of about seven to eight years of inter-Censal decennium. Part A will contain Primarily non-Census statistics, Part B the Primary Census Abstract and Part C various administrative statistics with a chapter titled "Introducing the district". It may be mentioned here that subsequently a decision has been taken to merge Parts A and B in one volume on grounds of economy.

3. Much of the delay in the publication of the District Census Handbooks after the 1961 Census was due to delay in collection of administrative statistics and the decision to write the Introductory Note in the head office. Separation of administrative statistics as Part C of the District Census Handbook and the kind Co-operation of the State Government, permitting Collectors of the 1961-71 decade to write the chapter on "Introducing the District," is likely to go a long way in early publication of all the parts of the District Census Handbooks. Another favourable factor this time is the early decision of the State Government to permit printing in private presses as and when the work-load on the State Government Presses is heavy and likely to result in delay in the bringing out of the District Census Handbook of any district. It would not be out of place to point out here that the work-load in connection with the District Census Handbooks is very much more this time, not only on account of wider coverage but largely due to the decision to bring out the District Census Handbooks in Hindi as well as English. In all, there will be 172 publications, 4 per district of which 2 will be in hindi and 2 in english. Advance action was taken this time to collect the non-Census data and it is hoped that the combined volume of Parts A and B of all the 43 districts would be out by the end of 1973 and Part C of all the districts by the middle of 1975. This would be a definite improvement on the 1961 performance when printing of the District Census Handbooks covered the period 1964 to 1967.

4. In his Preface to the 1961 District Census Handbooks, my predecessor, Shri G. Jagathpathi, had observed thus, "It was not possible at this Census to base all Census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.". It has not been possible to adopt the development block as the basic unit for operation and presentation in this Census for more than one reason. Firstly, the office of the Block Development Officer was abolished in December, 1965; its resurrection in the form of office of the Block Development Assistant from 2-10-69 had not taken firm roots up to the time field arrangements for the 1971 Census were finalised. Secondly, the tahsil as a unit of field arrangements has many more advantages, the most significant being the ready availability of that legendary functionary—the patwari—without whose active co-operation it would be a formidable task to determine whether a habited structure in a cultivated field is part of village X or Y. Even, otherwise, since village-wise figures are available, it should not be difficult for those in need of data for intermediate units between the village and the tahsil, like the development block or patwari halka, to compile it by adding figures of concerned villages. The tahsil has for long been a fixed unit of administration and, to my mind, should be retained in preference to the development block whose jurisdiction may undergo a change in accordance with the pace of future development.

5. In conclusion, I would like to place on record my grateful thanks to the Government of Madhya Pradesh for having so kindly agreed to undertake the publication of the Handbooks in hindi as well as english to the various government and semi-government offices for un-hesitatingly making available the non-Census statistics, and to the Controller, Government Press, and his staff for arranging early printing in the Government and private Presses.

VILLAGE AND TOWN DIRECTORY

PART X(A)

EXPLANATORY NOTE

History :

Prior to 1951 there were no separate Census publications for every district. But at the time of preparatory arrangements for the first Census of Independent India, it was felt that Census statistics should be made available for smaller territorial units basic to the needs of an administration wedded to welfare of the masses. Accordingly, the scheme of District Census Handbooks was conceived and implemented. In view of the usefulness of separate publications for each district, further improvement was made at the time of 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, banking, education, health, etc. An introductory note was also added to highlight the more striking features. Unfortunately the desire to make districtwise Census publication very comprehensive resulted in late availability of the books to the users. Therefore, the organisers of the 1971 Centenary Census decided in favour of splitting the District Census Handbooks into three parts and thereby release maximum data, as and when available, so that the publication may have a useful life of seven to eight years of intercensal decennium.

Scope :

(a) Part A of the book is the Village and Town Directory. The Village Directory contains for each village particulars of amenities available in the field of education, medicine, power supply, drinking water supply, post and telegraph facilities and communications. In addition, data relating to particulars of land use, weekly market, places of religious, historical or archaeological interest in the village has also been included. The Town Directory gives for each town in the district in the form of suitable statements the origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, latest municipal financial statements, civic and other amenities, medical, educational and cultural facilities, trade, industry, commerce and banking facilities, population by religion and Scheduled Castes and Scheduled Tribes. The abbreviations used in the Directory have been explained separately.

(b) Part B contains for each village and town, the primary census data incorporating area, occupied residential houses, number of households, total population and its break-up by sex, Scheduled Caste and Scheduled Tribe population, literate population and working population by nine broad categories.

(c) Part C will mainly incorporate the administrative statistics pertaining to the district in all the fields of development. The other Census tables pertaining to the district regarding language, religion, migration, etc., will also be reproduced. There will be a write-up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade.

Village Directory :

This is in the form of one statement. Important statistics for each village have been given under the main-head—Amenities and Land Use Data. Other information regarding nearest town with distance, market, staple food and places of religious, historical or archaeological interest have also been given in separate columns. The information regarding "Amenities" cover items like educational and medical institutions, power supply, drinking water, communications and post and telegraph. Under "Land use", the break-up of the total area of the village has been indicated under sub-heads forest, irrigated, unirrigated, cultivable waste and area not available for cultivation.

(a) There are 1,075 villages in the four tahsils of the district and the number of villages tahsil-wise is as under:—

Name of Tahsil	No. of Villages
(1)	(2)
1 Jaora	241
2 Alot	195
3 Sailana	461
4 Ratlam	178
Total	1,075

In 1961 Census the number of villages in Alot and Ratlam tahsils were the same but in Jaora and Sailana tahsils one village in each tahsil has increased in 1971 Censns due to the inclusion of Jaora Kasba (L.C. No. 15 1/241) and Sailana Kasba (L.C. No. 15/3/38) as villages and these are the revenue areas outside the municipal limits of the towns. The distribution of the villages with reference to their area in acreage is shown in the inset table below :—

Area (in acres)	No. of villages
(1)	(2)
50 acres or less	13
51 to 100	19
101 to 200	55
201 to 500	215
501 to 1,000	334
1,001 to 2,000	303
2,001 to 5,000	122
5,001 acres and above	14
Total	1,075

Village Bhurighati (L.C. No. 15/3/149) in Sailana tahsil has the smallest area of 2.69 acres and is located at a distance of 14.4 Kms. from the nearest town, Sailana while village Dharad (L.C.No. 15/4/129) in Ratlam tahsil has the largest area of 8,562.91 acres in the district and is located at a distance of 12.8 Kms. from the nearest town, Ratlam. Quite a good number of villages in the district (334 and 303) lie in the area ranges 501-1000 and 1001-2000 acres. Maximum villages in Jaora, Alot and Ratlam tahsils come within the area range of 1001-2000 acres while in Sailana tahsil maximum villages do not go beyond the area range of 201-500 acres as will be seen from the following table containing tahsil-wise data :—

Area in acres	Jaora	Alot	Sailana	Ratlam	Total
(1)	(2)	(3)	(4)	(5)	(6)
Below 50 Acres	...	...	13	...	13
51 to 100	...	...	19	...	19
101 to 200	2	2	51	...	55
201 to 500	17	28	157	13	215
501 to 1,000	82	68	138	46	334
1,001 to 2,000	99	77	63	64	303
2,001 to 5,000	37	20	20	45	122
5,001 & above	4	...	...	10	14
Total	**241**	**195**	**461**	**178**	**1,075**

(b) Educational Amenities.—The total number of villages having various educational facilities within the different distance ranges from the nearest town have been indicated in the inset table below :—

Distance from nearest town	Total No. of villages	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 Kms. or less	100	51	5	...	...	...
6 to 10 Kms.	200	115	9	...	...	...
11 to 15 Kms.	207	99	19	4	...	...
16 to 25 Kms.	265	141	16	2	...	...
26 to 50 Kms.	246	60	8	...	...	...
51 to 100 Kms.	55	6	...	...	...	...
101 to 200 Kms.	2	...	...	...	...	...
201 Kms. & above	...	...	...	...	...	...
Total	**1,075**	**472**	**57**	**6**	...	...

Maximum number of villages 265 lie within the distance range of 16–25 Kms. In the distance range of 26-50 kms., there are 246 villages. In the above two distance ranges bulk of the villages of the district are located and they have substantial number of educational institutions of the district. The number of educational institutions in the villages of different tahsils is given below :—

Tahsil	NUMBER OF		
	High School/ Higher Secondary School	Middle School	Primary School
(1)	(2)	(3)	(4)
1. Jaora	4	21	194
2. Alot	...	10	91
3. Sailana	...	5	66
4. Ratlam	2	22	121
Total	**6**	**58**	**472**

The villages of Alot and Sailana tahsils do not have any High School/Higher Secondary School.

Village Sarwan (L.C. No. 15/3/31) of Sailana tahsil is the only village in the district which has two middle schools. It is at a distance of 11.2 kms. from the nearest town Sailana and its area is 662.17 acres.

(c) Medical Facility.—The distribution of medical facilities per 100 Sq. Kms. area tahsil-wise, is given in the following inset table :—

Tahsil	Total area (in Sq. Kms.)	No. of medical institutions of any kind per 100 Sq. Kms.
(1)	(2)	(3)
Jaora	518.9	4.0
Alot	357.9	1.9
Sailana	464.3	2.5
Ratlam	513.5	2.5

This table will show that the villages of Jaora tahsil have maximum medical institutions per

100 Sq. Kms. The number of medical institutions tahsil-wise is also indicated below:—

Sl. No.	Tahsil	No. of Medical institutions
(1)	2)	(3)
1	Jaora ...	21
2	Alot ...	7
3	Sailana ...	12
4	Ratlam ...	13
	Total	**53**

It is apparent that the number of medical institutions in the villages of Jaora tahsil is highest.

(d) Power Supply.—The number of villages with electric power supply within various ranges of distance from the nearest town is indicated in the inset table below:—

Distance from the nearest town	Total No. of villages	No. of villages with electric power supply
(1)	(2)	(3)
5 Kms. or less	100	42
6 to 10 Kms.	200	41
11 to 15 Kms.	207	38
16 to 25 Kms.	265	35
26 to 50 Kms.	246	9
51 to 100 Kms.	55	1
101 to 200 Kms.	2	...
201 Kms. and above	...	...
Total	**1,075**	**166**

Quite a good number of villages enjoying this facility come in the distance ranges 5 kms. or less and 6-10 kms. and very few villages in the distance ranges 26-50 kms. and above have this facility. Number of villages having electric power supply tahsil-wise is mentioned below against the total number of villages :—

Tahsil	Total No. of villages	Villages having electric Power supply	Percentage of villages covered by electricity
(1)	(2)	(3)	(4)
Jaora	241	59	24.58
Alot	195	29	14.87
Sailana	461	10	2.22
Ratlam	178	68	38.2
	1,075	**166**	

(e) Communications.—The total number of villages and the number of villages connected by different types of communications, falling in different distance ranges from the nearest town, are indicated in the inset table below :—

Distance from the nearest town	Total No. of villages	No. of villages connected by				
		Pucca Road	Kutcha Road	Pucca Road and rail	Kutcha Road and rail	Others
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 Kms. or less	100	34	14	4	...	...
6 to 10 Kms.	200	43	19	4	1	...
11 to 15 Kms.	207	36	12	4	1	...
16 to 25 Kms.	265	27	33	...	1	...
26 to 50 Kms.	246	17	41		1	...
51 to 100 Kms.	55	...	21	...	...	...
101 to 200 Kms.	2	...	1	...	...	...
201 Kms. and above	...	...	...	...	...	...
Total	**1,075**	**157**	**141**	**12**	**4**	...

Few villages are served by "Pucca" road and there is no "pucca" road in the villages coming in the distance range 51-100 Kms. and above. Out of 1,075 villages in the district, 314 villages are served by either "Pucca" or "Kutcha" roads. The number of villages served by "Pucca" roads, tahsil-wise and the

total number of villages with percentage covered are as under:—

Tahsil	Total No. of villages	No. of villages having "Pucca" roads	Percentage
(1)	(2)	(3)	(4)
Jaora	241	35	14.52
Alot	195	34	17.44
Sailana	461	61	13.23
Ratlam	178	39	21.91
Total	1,075	169	

Comparatively, Ratlam tahsil has better communication facilities.

(f) Post and Telegraphs.—The total number of villages in the tahsils of the district having post offices and telegraph offices are given below :—

Name of tahsil	Total No. of villages	No. of villages having post offices	No. of villages having telegraph offices	No. of villages having telephones
(1)	(2)	(3)	(4)	(5)
Jaora	241	24	2	3
Alot	195	11	...	...
Sailana	461	4	1	...
Ratlam	178	21	2	1
Total	1,075	60	5	4

Some villages of Jaora and Ratlam tahsils have telephone facility.

The number of post offices per 100 Sq. Km. area in each tahsil is indicated in the following inset table:—

Name of tahsil	Total area in Sq. Km.	No. of post offices per 100 Sq. Km.
(1)	(2)	(3)
Jaora	518.9	5.5
Alot	357.9	3.1
Sailana	464.3	1.5
Ratlam	513.5	4.6

Jaora and Ratlam tahsils have better postal facility as compared to the other two tahsils.

(g) Staple food.—Jowar is a common staple food in the majority of the villages of every tahsil. Maize and wheat also constitute staple food in quite a good number of villages; maize being consumed more in Sailana tahsil and wheat in Ratlam and Jaora tahsils.

(h) Land use pattern.—(i) According to the village papers, about 7 per cent of the area in the district is under forest. The percentage of the forest area, tahsil-wise, is indicated below :—

Name of tahsil	Percentage of the forest area
(1)	(2)
(a) Jaora ...	0.2
(b) Alot ...	1.0
(c) Sailana ...	21.8
(d) Ratlam ...	4.7

The villages of Sailana tahsil have comparatively more forest area. It may be noticed that major portion of the district forest area lies in Sailana tahsil.

(ii) The net cropped area in the year 1969 increased by 22.9 per cent as compared to the area in 1960–61. The percentage of area under irrigation to area under crops during the years 1960-61 and 1968-69 comes to 5.2 and 5.3, respectively. The area under irrigation during this period increased by 25.1 per cent.

(iii) The following inset table shows the average percentage of cultivable waste per village in different distance ranges from the nearest town: —

Distance	Number of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
(1)	(2)	(3)	(4)	(5)	(6)	(7)
5 Kms. or less	100	85,455.98	854.56	21,563.51	215.64	25.23
6 to 10 Kms.	200	162,171.08	810.86	46,401 47	232.01	28.61
11 to 15 Kms.	207	156,692.04	756.97	50,662.72	244.75	32.33
16 to 25 Kms.	265	191,187.03	721.46	68,701.02	259.25	35.93
26 to 50 Kms.	246	108,151.63	439.64	52,312.96	212.65	48.37
51 to 100 Kms.	55	13,758.08	250.14	7,750.77	140.92	56.34
101 to 200 Kms.	2	442.45	221.22	96.91	48.46	21.91
201 Kms.& above	...	...	...	...	...	...
	1,075	717,858.29	...	247,489.36	...	...

It will be seen from this table that the nearer a village to an urban area, the lesser is the proportion of cultivable waste. There is, however, some deviation in the distance range 101-200 Kms. in this district. The nearest town considered for the above distance ranges are Sailana, Ratlam, Khacharod, Banswada. Tal, Jaora, Alot and Nagda.

In the whole district, 247,489 acres of land has been classified as cultivable waste which constitutes 21 per cent of the total area of the villages in the district. The percentage of cultivable waste in each tahsil is indicated below:—

Name of tahsil		Percentage of cultivable waste
(1)		(2)
1. Jaora	...	19
2. Alot	...	23
3. Sailana	...	26
4. Ratlam	...	16

This table would show that comparatively more cultivable waste is located in the two tahsils, of Sailana and Alot and it comes to about one-fourth of the total area of the villages in these tahsils.

Town Directory :

This is in the form of seven statements. But before discussing the information collected in the seven statements, it would be better to first understand certain concepts which determines urban areas.

(*a*) *Definition of town.*—A 'town' in the 1961 Census was either—(i) a Municipality, Cantonment or Corporation ; or (ii) a habitation with a population of at least 5,000 with atleast three-fourths of the adult male population engaged in non-agricultural pursuits.

Accordingly there were 219 towns in the State. However, seven towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75 percent or more. But the list already finalised was not changed subsequently ; the reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as municipalities and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than what was already present. In the 1971 Census there was no material change in the concept of town and a list of 247 towns was prepared originally. Three more towns were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and ultimately 250 towns were recognised in the State. All areas which are not towns have been included in the list of villages.

(*b*) *Urban Agglomeration.* —The concept of Urban Agglomeration has been adopted for the 1971 Census with the intention to present the population data in the District Census Handbook in respect of urban areas in such a manner that "*de-facto* urban agglomeration" is a recognisable entity, data pertaining to which will be the sum of the data of not only the *de-jure* (within Municipal/other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factual and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

(*c*) *Standard Urban Area.*—This new concept has been developed for the 1971 Census and the essentials of a Standard Urban Area are :—

(i) It should have a core town of a minimum population size of 50,000.

(ii) The contiguous areas made up of other urban as well as rural administrative units should have close socio-economic links with the core town; and

(iii) The probabilities are that this entire area will get fully urbanised in a period of two to three decades. This concept has been developed to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture.

The Seven Statements.—Very useful data regarding the towns have been given in the statements and they have been collected and compiled from various agencies and official publications. The source and period of the information has been indicated below each Statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data

compiled and presented throws sufficient light on the present stage of progress in each town.

(i) *Statement No. I.*—This statement presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status of the town indicates the authority incharge of its administration. Thus a town could have a Municipal Corporation, a Municipality, a Cantonment Board, a Gram Panchayat, a Notified Area Committee, etc.

(ii) *Statement No. II.*—This statement contains information regarding location (latitude and longitude), annual rainfall, temperature, distance from the nearest city with population of 1 lac or more and State, District and Tahsil headquarters. Distances from Railway Station and Bus route have also been indicated.

(iii) *Statement No. III.*—The statement contains information regarding receipt and expenditure of local bodies under different main heads indicating the indebtedness and general financial position and expenditure on public utility works. The information has been furnished for the years 1968-69, 1969-70 and 1970-71 in order to have an idea whether the concerned urban body is improving financially or not.

(iv) *Statement No. IV.*—This statement contains information regarding amenities, *e.g.*, road length, sewerage system, types of latrines, water supply, fire-fighting service, etc. in the different towns.

(v) *Statement No. V.*—This statement contains information regarding various important facilities available in the town, *viz.*, medical, educational, recreational and cultural.

(vi) *Statement No. VI.*—This statement throws light on the business and credit facilities commanded by the towns and contains information regarding trade, commerce, industry and banking.

(vii) *Statement No. VII.*—This statement contains data regarding population by religion and Scheduled Castes/Scheduled Tribes with male/female break-up for the year 1971. This is the only statement based on 1971 Census figures.

There are four tahsils and five towns in Ratlam district as indicated below :—

Tahsil	Town
(1)	(2
1. Alot	1. Alot
	2. Tal
2. Jaora	3. Jaora
3. Ratlam	4. Ratlam
4. Sailana	5. Sailana

Alot tahsil has two towns while the remaining tahsils have one town each. All the tahsil headquarters are towns. Ratlam is also the headquarter of the district. Alot continues to be recognised as a town since 1931, while Tal was recognised as a town as early as 1901. But Tal was derecognised from 1911 to 1941. The rest of the towns continue to be recognised as such since 1901.

(*d*) Tal town has no urban outgrowth. The following are the urban agglomerations in the district and there components are also mentioned :—

Urban Agglo. Components		L.C. No.
(1)		(2)
(*i*) *Ratlam U.A.*—		
(a) Ratlam (M)	...	15/V
(b) Kehtalpur (Partly)	...	15/4/62
(c) Dosigaon (partly)	...	15/4/63
(d) Barwad (partly)	...	15/4/64
(e) Rajgarh (wholly)	...	15/4/65
(f) Ratlam Khas (wholly)	...	15/4/68
(*ii*) *Alot U.A.*—		
(a) Alot (M)	...	15/IV
(b) Jiwangarh (partly)	...	15/2/85
(c) Vikramgarh (partly)	...	15/2/87
(*iii*) *Jaora U.A.*—		
(a) Jaora (M)	...	15/II
(b) Kumhari (partly)	...	15/1/182
(c) Bannakheda (partly)	...	15/1/195
(d) Jaora Kasba (wholly)	...	15/1/241
(*iv*) *Sailana U.A.*—		
(a) Sailana (M)	...	15/III
(b) Sailana Kasba (partly)	...	15/3/38

The population of Ratlam core town in 1971 is more than 50,000 (i.e., 106,666) and, therefore, it as

been recognised as a Standard Urban Area with the following components :—

Name of SUA	Components		L.C. No.
(1)	(2)		(3)
Ratlam			
	Urban		
	Ratlam (M)		15/V
	Ratlam Kasba	(O.G.)	15/4/68
	Rajgarh	(O.G.)	15/4/65
	Khetalpur*	(O.G.)	15/4/62
	Dosigaon*	(O.G.)	15/4/63
	Barwad*	(O.G.)	15/4/64
	Rural		
	Dosigaon*		15/4/63
	Barwad*		15/4/64
	Birya Khedi		15/4/64

*Partly

Statement I.—(a) All the towns of the district have Municipalities. The population of the town has by and large shown constant increase in every decade from 1901 except in the cases of Jaora, Ratlam and Sailana for certain intervening decades. The population of Jaora fell by a few thousands in 1911 and 1921 as compared to the figure of 1901 but from 1931 it has been increasing. Likewise the population of Ratlam fell in 1911 by about 8,000 but thereafter, there has been constant increase. In the case of Sailana, however, minor fluctuations have been taking place in different decades. The population of Ratlam increased from 36,321 in 1901 to 106,666 in 1971 and this rate of increase is not found in other towns. Ratlam and Jaora are comparatively bigger towns. The decrease in population of Jaora and Ratlam during the decade 1901-1911 is largely due to plague epidemic. During the subsequent decade 1911-1921, the population of Jaora and Sailana decreased not only due to plague epidemic but largely due to fulminating influenza epidemic of 1918-19. During this decade (1911-1921) the population of Ratlam, however, increased by 2,176 inspite of plague and influenza epidemics in 1917 and 1918, respectively, due to sojourn of pilgrims *enroute* to Ujjain Simhastha fair.* The population of Sailana town slightly reduced by 332 and 229 during the decades 1931-41 and 1951-61, respectively, and the rural population of Sailana tahsil during 1951-61 showed percentage variation by +37.3. This slight reduction in the population of Sailana town may be due to migration to rural areas. Column 14 of the statement shows the functional classification of these different towns in 1961 and they are indicated in the following inset table :—

Functional category	Total No. of towns
(1)	(2)
Services-*cum*-Industry *cum*-Primary Activities	1
Industry-*cum*-services	1
Industry-*cum*-services-*cum*-Transport	1
Services-*cum*-Primary Activities	1
Primary Activities	1
Total	**5**

The method adopted for the functional classification is elucidated below :—

(b) The nine industrial categories were grouped into the following five functional characteristics :—

(i) Primary Activities (Comprising Category I—Cultivation, II—Agricultural Labourer, and III—Mining and Quarrying, Fishing, Live Stock, Hunting, etc.).

(ii) Industrial (Comprising Category IV—Household Industry, V—Manufacturing other than Household Industry and VI—Construction).

(iii) Commercial (Comprising Category VII—Trade and Commerce).

(iv) Transport (Comprising Category VIII—Transport, Storage and Communications).

(v) Services (Comprising Category IX—Other Services).

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 per cent of the total workers the town was designated by that function. In case no single characteristic claimed 40 per cent of the workers, two predominant characteristics together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 per cent of the total workers, the first three characteristics were taken to represent the town.

Statement II.—The physical and locational aspects as in 1969 have been covered. Ratlam and Sailana get 975.6 mm. and 944 mm. rainfall, respectively, while Jaora gets 798.8 mm. The figures of rainfall of Alot and Tal are not available but they also get less rainfall like Jaora. The maximum and minimum temperature of Ratlam is 42.9°C and 6.5°C, respectively. The temperature of other towns are not available but the climate of the district on the whole is moderate. Alot, Jaora and Ratlam have Railway facility. All the towns are on bus route and the district headquarter, Ratlam, is at a distance of 280 Km. from the State Headquarter, Bhopal. In 1971, the population of Ratlam has crossed the limit of one lac and, therefore, Ujjain is the other nearest city (having population of more than one lac) from these towns. In the statement the position of the towns as in 1969 have been indicated.

Statement III.—On the basis of population, two towns of the district have been categorised as Class V while one town each come in Class I, III and IV categories. The statement would show that there is an upward trend in the total receipts of all the Municipalities during the three years 1968-69, 1969-70 and 1970-71. The total expenditure is within the total receipts of the municipalities except in the following cases :—

1. Alot municipality spent Rs. 2,800 more in 1968-69.

2. Tai municipality spent Rs. 4,900 and Rs. 28,700 more in the years 1968-69 and 1969-70, respectively.

3. Sailana municipality spent Rs. 5,800 and Rs. 1,700 more in the years 1968-69 and 1969-70, respectively.

In the case of Jaora municipality the striking feature is that in these three years it spent the full amount of its receipts. All the municipalities exept Sailana have been constantly increasing their receipts by taxes, etc. during these three years. Government grant and loan have substantially contributed to the receipts of these local bodies except Tal municipality which did not take any loan during these three years. The per capita receipt and expenditure under broad heads is indicated in the inset table below :—

Class of town	No. of towns	Year	Per capita (in Rupees)						
			Receipt			Expenditure			
			Total Receipt	Receipt through taxes, etc.	Receipt from all other sources	Total expenditure	Expenditure on Public Health conveniences	Expenditure on Public Institutions	Expenditure on all other aspects
(1)	(2)	(2A)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Class I	1	1968—69	30.2	16.6	13.6	27.9	2.3	0.1	25.5
100,000 & over	1	1969—70	28.2	20.6	7.6	24.4	5.9	0.1	18.4
	1	1970—71	42.4	21.7	21.7	33.7	6.4	0.2	27.1
Class II	...	...	...	...	...	...	...	...	...
50,000-99,999									
Class III	1	1968—69	27.5	15.6	11.9	27.5	2.1	0.0	25.4
20,000-49,999	1	1969—70	31.2	17.0	14.2	31.2	4.3	0.1	26.8
	1	1970—71	41.4	19.9	21.5	41.4	6.1	0.1	35.2
Class IV	1	1968—69	20.9	21.9	8.0	21.2	4.5	0.5	16.2
10,000-19,999	1	1969—70	27.2	18.0	9.2	28.3	4.9	0.5	19.9

The above inset table would show that by and large the per capita receipt and expenditure of the local bodies of the different category of towns have shown an upward trend. The per capita expenditure on public health and conveniences and on Public Institutions as compared to the per capita total expenditure,

is substantially less though the per capita receipt through taxes, etc. constitute a fair proportion of the total per capita receipt. The expenditure of the municipalities, other than Tal municipality, shown in column 15 of the statement No. III under head "Others", constitutes quite a high percentage of the total expenditure.

On a further probe it was found from the clarification received from Tal and Jaora municipalities that the expenditure shown in column 15 under head "Others" includes some items of the expenditure which should have been included in columns 10—14 (*e.g.*, dearness, provident fund, gratuity, telephone charges, mass contact, medical relief to employees, elections, leave salary, etc.) and some items of the expenditure which could not be included in these speified columns (*e.g.*, refund of loan, other refunds, investment for gainful purposes, saving banks and securities, etc.), Other municipalities failed to give clarification, regarding high expenditure under head "Others".

Statement IV.—All the towns have electricity and electric connections have also been given for industrial purpose. Street lights have also been provided in all the towns. Fire brigade and water tap facilities are available only in Ratlam and Jaora towns.

Statement V.—*Medical facilities* : (i) Except Sailana, all the towns have Hospital. There is, however, one Primary Health Centre at Sailana. At Ratlam, apart from one hospital, there is one T.B. hospital and one Family Planning Clinic. Jaora also has the advantage of a Family Planning Clinic. The number of beds per 1,000 population has been indicated in the inset table below :—

Total number of beds in medical institutions	No. of beds per 1,000 population
(1)	(2)
Alot 16	1.6
Jaora 60	1.6
Ratlam 302	2.8
Sailana 26	3.8
Tal 16	2.3

(ii) *Educational facilities* : There are two arts colleges and one combined college at Ratlam while Jaora has one combined college. Every town has Higher Secondary/High School facility. The number of Higher Secondary/High Schools, Middle Schools and Junior Secondary or Primary Schools per thousand population is shown in the following inset table. For a more realistic appreciation the population in the age-group 0-14 has been considered for Primary and Middle Schools while population in the age-group 15-19 has been considered for Higher Secondary/High Schools.

Name of the town	Number per 1,000 population		
	Higher Secondary or High School	Middle	Junior Secondary/ Primary
(1)	(2)	(3)	(4)
Alot	1.1	0.4	0.9
Jaora	0.5	0.3	0.7
Ratlam	1.0	0.4	1.0
Sailana	2.5	0.3	0.9
Tal	3.3	0.3	0.7

(iii) *Recreational and Cultural facilities* : Ratlam and Jaora have 6 and 3 Cinema houses, respectively. Rest of the towns have one Cinema house each. Public libraries are available in all the towns except Sailana and Tal.

Statement VI.—There are 7 banks at Ratlam while the rest of the towns have two banks each. Every town except Tal has got the facility of Agricultural or non-agricultural credit society. Cloth, foodgrains, "Kirana" and "Ghee" are the main items of import in these towns. Bricks, shoes, bidi, brass utensils, khadi cloth, "gud" and oil are locally manufactured in the towns. Cotton, bidi and oil constitute important items of export.

Statement VII.—About 65 per cent of the town population of Ratlam, Alot and Tal follow Hindu religion while in Jaora town only half the population follow this religion. In Sailana town, however, about 80 per cent people follow this religion. Islam religion is followed by about 22,41,11,30 and 28 per cent people of Ratlam, Jaora, Sailana, Alot and Tal towns, respectively. About 5 per cent people of Alot and Tal towns follow Jain religion while in the rest of the towns the percentage of such persons comes to about eight. The percentage of people following other religions is not very significant. Scheduled Caste population in these towns does not exceed 1/10th of the total population. Similarly about 1/10th of the population of Sailana town consists of Scheduled Tribes while their percentage in other towns is insignificant.

Note :—Persons returning different Sect/faith have been included under the main Religion as below :—

(1) In Jaora town, Hindu includes Bargundi (M. 38, F. 33), Vedik (M. 4, F. 2), Aryavedic (M. 3, F. 4), Sindhi (M. 39, F. 40), Sanatan (M. 5, F. 5) and Others include Zoroastrian (M. 1, F. 1)

(2) In Ratlam town, Hindu includes Aryavedic (M. 3), Vedik (M. 5, F. 4), Vaishnav (M. 3), Maheshwari (M. 4, F. 3), Gujarati (F.5), Punjabi (M. 1, F. 1), Sindhi (M. 28, F. 26), Others include Zoroastrian (Parsi) (M. 47,F. 31), and Jews (M. 5, F. 3)

(3) In Sailana town, Hindu includes Vedik (M. 2)and Muslim includes Bohra (M. 8, F. 7).

PRIMARY CENSUS ABSTRACT

PART X(B)

EXPLANATORY NOTE

I. General :

In Part A, the picture of the district as revealed by non-Census data has been discussed. In this note, the progress made by the district in the 1961-71 decade would be dealt with on the basis of information collected in the individual slip that was canvassed in the 1971 Census. Broadly speaking, the changes that have come about in the matter of total population, its growth-rate and density, sex-ratio, literacy, Scheduled Castes and Scheduled Tribes, working population, occupied residential houses and number of households have been discussed.

II. Population :

The population of Ratlam district is 626,534 while the population of Madhya Pradesh is 41,654,119. The population of Ratlam district thus comes to 1.50 percent of the State population. The rural population is about 71 percent of the district population, whereas the urban population is 28.93 percent as against the State percentage of 16.29 only. In other words, the district is urban in character. Highest percentage of the district population is found in Ratlam tahsil (about 39 percent) followed by Jaora tahsil (about 29 percent) and one of the reasons for this is that the population of Ratlam town (106,666) and Jaora town (37,235) are parts of Ratlam and Jaora tahsils, respectively. Ratlam district ranks 36th among the 43 districts of the State in population. During the decade 1961-71, the district population growth-rate has been 29.58 against the State growth-rate of 28.67. The area of the district is 4,859 sq. km. In other words, it has 1.10 percent of the State area and ranks 40th in area among the districts ot the State. The density of population per sq. km. of the district is 129 against the State density of 94 and the district ranks 7th in density in the State. The sex-ratio, number of females per 1000 males, of the district and the State is 941 and this is an interesting coincidence. Tahsils Jaora and Sailana have got sex-ratio higher than the district sex-ratio while the other tahsil, Ratlam, has lower sex-ratio. The sex-ratio of Alot tahsil is also 941 as that of the district and the State.

III. Literacy :

1. The percentage of literacy in the district comes to about 25 as against the State literacy percentage of about 22. In 1961 also, the literacy percentage of the district (21.39) was higher than the State percentage of 17.13. The district has made some progress to increase the rate of literacy during the decade 1961-71.

2. The literacy percentage among the males in the district (35.79) is higher than the State percentage of about 33. Among females also, the literacy percentage in the district (14.50) is higher than the State percentage of about 11.

3. Among the tahsils, Ratlam tahsil has the highest literacy percentage of about 36 while Sailana tahsil has the lowest percentage of about 9.

4. The same pattern is seen in male and female literacy in the tahsils. Among males, Ratlam tahsil is at the top (about 48 percent), while Sailana tahsil with about 13 percent comes last. Among females also, Ratlam tahsil leads in literacy (about 24 percent), while Sailana tahsil with 4.58 percent comes last. One of the reasons for this contrast is that Ratlam town, which is one of the leading towns of the State is in Ratlam tahsil, while Sailana tahsil is mostly inhabited by Scheduled Tribes.

IV. Workers :

In the district, about 34 percent of the population comes under the category of the workers (main activity) against the State percentage of about 37. The percentage of female workers (about 14) is appreciably less than the State percentage (about 19). In the district, comparatively, more percentage of workers (males and females) have been returned from Jaora tahsil. Ratlam tahsil has returned the lowest percentage of workers (31.75). Among female workers also Jaora tahsil (with 17.35 percent) leads other tahsils of the district, while Sailana tahsil (with 10 percent) comes last. Among the workers in the district, about 53 and 19 percent are cultivators and agricultural labourers, respectively, against the State percentage of about 53 and 27. Under the category "other workers", the district percentage (about 28) is higher than the State percentage of 20.58. Among females, the district percentage of cultivators (about 42), and other workers (about 11) is higher than the State percentage of about 41 and 10, respectively, while for agricultural labourers the district percentage (46.28) is lower than the State percentage (48.70).

V. Scheduled Caste and Scheduled Tribe :

The percentage of Scheduled Castes to total population of the district (12.67) is very near the State percentage (13.09) while the percentage of Scheduled Tribes in the district (12.67) is significantly lower than the State percentage (20.14). In the tahsils of the district, quite a high percentage of Scheduled Caste population (about 20) is found in Alot tahsil, while in Sailana tahsil the percentage (about 3) is lowest. The Scheduled tribe population in Jaora tahsil is less than 1 percent, while in Sailana tahsil, comparatively, the percentage (about 80) is very high.

VI. Occupied Residential Census Houses :

The district has 100,902 occupied residential Census houses against the State figure of 6,822,767 which comes to 1.48 percent. During 1961, there were 91,103 occupied residential Census houses in the district against the State figure of 6,230,854 which came to 1.46 percent. There has not been any material change in the percentage during the decade. The number of households and persons per occupied residential Census house in 1961 and 1971 are indicated below :

	Year	No. of residential Census houses	No. of households	No. of households per occupied residential Census house	No. of persons per occupied residential Census house
	(1)	(2)	(3)	(4)	(5)
State	1961	6,230,854	6,615,580	1.06	5.2
District	1961	91,103	92,776	1.02	5.31
State	1971	6,822,767	7,740,289	1.13	6.1
District	1971	100,902	111,690	1.11	6.21

It would thus be seen that the pressure on occupied residential Census houses has increased during the decade in the district as well as in the State. Comparatively, Ratlam tahsil (with about 41 percent) claims the highest percentage of occupied residential Census houses of the district.

VII. Villages and Towns :

There are in all 1,075 villages in Ratlam district which comes to 1.39 percent of total villages in the State. The percentage of inhabited villages to the total villages in the district is about 97 against the State percentage of about 92. There are in all 250 towns in the State out of which the district claims five towns.

NOTE: (1) U.A. = Urban Agglomeration
M. = Municipality
O.G. = Outgrowth

(2) Urban Outgrowth:

1 Village Jaora Kasba, L.C. 241 of Tahsil Jaora is wholly included.
2 Village Kumhari, L.C. 182 of Tahsil Jaora is partly included.
3 Village Banna Kheda, L.C. 101 of Tahsil Jaora is partly included.
4 Village Jeevangarh, L.C. 85 of Tahsil Alot is partly included.
5 Village Vikramgarh, L.C. 87 of Tahsil Alot is partly included.
6 Village Sailana Kasba, L.C. 38 of Tahsil Sailana is partly included.
7 Village Khetalpur, L.C. 62 of Tahsil Ratlam is partly included.
8 Village Dosigaon, L.C. 63 of Tahsil Ratlam is partly included.
9 Village Barwad, L.C. 64 of Tahsil Ratlam is partly included.
10 Village Rajgarh, L.C. 65 of Tahsil Ratlam is wholly included.
11 Village Ratlam Kasba, L.C. 68 of Tahsil Ratlam is wholly included.

(3) The total area figure given for the district is provisional 'Geographical Area' as supplied by the Surveyor General of India.

(4) The urban area figures have been supplied by the local bodies.

(5) The rural area of the district has been derived by subtracting the urban area figure supplied by local bodies from the total area figure of the district.
