ACKNOWLEDGEMENTS

At the 1971 Census it has been our endeavour to compile both Census and non-Census statistics at the village and block level in a uniform manner. To ensure that these statistics are available to the users as soon as these are sifted and compiled, the District Census Handbook has been divided into three parts. This is the first part of the series, the Village and Town Directory, which mostly comprises non-Census data.

We are deeply indebted to the State Government for their everwilling and prompt help to us at all stages. The District Census Handbooks are being published by us on their behalf. I wish to express my gratitute to Sri M. Lal, Chief Secretary to U. P. Government, for all the guidance and facilities afforded to us in the conduct of Census in this State. I am also grateful to Sri P. C. Pandey, Secretary, G. A. D. (Now Commissioner, Rohilkhand Division, Bareilly) and his successor, Sri A. P. Dixit, for the facilities given by them in sorting out various administrative matters relating to the publication of these Handbooks. I am extremely thankful to the District Officers for their whole hearted co-opration in furnishing the desired information and the District Census Officers for their hard work and sustained efforts in collecting the same.

The programme for the printing of District Census Handbooks has been heavy indeed, more so as three parts are being published one in Hindi and two in English. The arrangements made by Sri A. Dar, Superintendent, Printing and Stationery, U.P., Allahabad for the printing of these volumes, are thankfully acknowledged. Joint Superintendent, Sri J. S. Gupta, I/c New Government Press Aishbagh, Lucknow has also been extremely helpful in bringing out the maps.

In the Census Office, everyone has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I am grateful to Shri K. S. Sinha, Deputy Director, Headquarters, the Tabulation Officer, and other staff of the Techical Section, who have shared the burden and helped in bringing out these Handbooks.

I must also express my gratitude to Sri A. Chandrasekhar, Registrar General, India, Sri K. D. Ballal, and Dr. B. K. Roy Burman, Deputy Registrars General and Sri K. K. Chakravarty, Central Tabulation Officer for their constant help and guidance despite their own heavy preoccupations.

D. M. SINHA
Director of Census Operations,

Introductory Note

1. History of District Census Handbook.

It has been customary to bring out vital statisties at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. Such information was, however, not brought out in 1901. Village Directories were prepared for all districts in 1911, but could be published only for thirteen due to the outbreak of the First World War. At the 1921 Census, these were published for all districts in the form of District Census Statistics. In 1931 villagewise statistics were compiled but could not be published owing to financial stringency, resulting in loss of valuable data. At the 1941 Census, restricted tabulation was undertaken in the wake of the Second World War, but the utility of Census statistics was recognised and these were published. The District Census Handbook in its present form was brought out at the 1951 Census, and was published alongwith another volume titled District Population Statisties. In 1961 Census, attempts were made to render the District Census Handbook more informative, as in addition to Census data pertaining to each village, data about its level of development and amenities were also collected. At the 1971 Census, efforts have been made to compile both Census and non-Census statistics at village/town level in a uniform manner with an enlarged scope.

As the District Census Handbook makes Census statistics available for the smaller territorial units, it is constantly referred to for several purposes of administration, demarcation of electoral constituencies, planning and development and so on. To ensure that these statistics are available to the users early, the District Census Handbook has been divided for being published separately into three parts :

Part A : Town and Village Directory
Part B : Village and Town-wise Primary Census Abstract
Part C : Analytical Report and Administrative Statement—District Census Tables.

2. Scope of District Census Handbook.

Part A of the Handbook comprises the Town and Village Directory. In Village Directory, particulars of amenities in regard to Education, Medical, Power supply, drinking water supply, Post and telegraph and Communications have been given. Besides, it contains land-use statistics, days of weekly markets and places of religous, historical or archaeological interest in each village. The Town Directory comprising seven statements throws light on the status of the town, its origin, growth of population, functional category, location and physical aspect, Municipal finances, Civic and other amenties, Medical and Educational facilities and statistics pertaining to Trade, Commerce, Industry and Banking. Apart from these, it also gives the distribution of population of a town by religion and scheduled Caste/Scheduled Tribes.

Part B represents data down to village level for rural area and block level for towns. It contains the Primary Census Abstract which incorporates figures of area, number of occupied residential houses and households, total population and its break-up by sex, scheduled caste and scheduled tribe, literate population, working population by nine broad industrial categories of cultivators, agricultural labourers, workers engaged in forestry the livestock etc. in mining and quarrying, in manufacture or repair, in construction, in trade and commerce, in transport and communications and in other services as well as the non-working population.

Part C deals with the administrative statistics pertaining to the district in all fields of development. The Census tables pertaining to language, religion, migration and economic activities are being reproduced in this part. A write up indicating changes in socio-economic and demographic characteristics of the district during the last decade is also being included in it.

3. **Town Directory**—given in Part A presents data for all the Census towns of the district. There is no uniformly accepted definition of a town. The historical, political, cultural and administrative considerations are generally taken as criteria for rural-urban classification. An urban area, in contradistinction to the rural, comprises a large majority of inhabitants who are engaged in industrial and non-agricultural activities. In addition to its size, population and occupational characteristics, an urban area provides such facilities as transportation, banking, commercial and technical services, community facilities and other civic service. According to the State Government, all Municipal Corporations, Municipal Boards, Cantonment Board , Notified Areas and Town Areas are considered as towns, and according to their average annual income from their own resources, tahsils have been classified into different classes of local bodies. The Criteria adopted under the Census Operations is slightly different from the State Government. In 1971 Census all places satisfying the following conditions have been treated as Towns :—

1. All Municipal Corporations, Municipal Boards, Cantonments & Notified Areas.
2. All localities though not in themselves local bodies but forming part of a city or town agglomeration.
3. Other places satisfying all the three upper mentioned conditions :
   (i) Population exceeds 5,000.
   (ii) At least 75% of the male working population engages in non-agricultural pursuits, and
   (iii) The density of population exceeds 1,000 persons per sq. mile (386 persons per sq. km.

The information given in the Town Directory relates to the year 1969. The data has been presented in the following seven statments :

(a) Statement I—This statement presents the population of the towns at the end of each decade from 1901 to 1971, the Civic status of the towns and their functional categories at 1961 and 1971 Censuses. The functional categories given in columns 14 and 15 have been determined on the basis of the predominant functional character of the town, to derive which the working population under the broad industrial categories has been regrouped into five broad functional classifications :—

(i) Primary Activities–Categories I, II, III & IV
(ii) Industry–Categories V (a), V (b) and VI
(iii) Trade and Commerce–Category VII
(iv) Transport–Category VIII, and
(v) Service–Category IX

For each town, the percentage of workers under each of the aforesaid classes to total workers is worked out, and where the workers under one of the classes comprise 40% or more of the total workers, the town is taken as mono-functional. In other cases, the next predominant occupation is taken into account and if the total of the two comes to 60%

or above, the town is designated as bifunctional. If the total does not yield 60%, the third predominant occupation is also taken and such a town is treated as multi-functional.

The notations used in column 5 of the statement are :

C—Municipal Corporation
M—Municipal Board
NAC—Notified Area Committee
TC—Town Area Committee
CB—Cantonment Board

(b) **Statement II**—This statement gives the physical aspects and location of towns. The annual rainfall, maximum and minimum temperature, nearest City with its distance, name of district and tahsil headquarters, railway stations and bus routes etc. have been indicated. (c) **Statement III**—It reveals the municipal finances for the year 1968-69. The receipts through taxes and other sources alongwith the expenditure on general administration, public works and conveniences have been given therein.

Besides, the information relating to staple food, distance from nearest town, days of market/hat and places of religious, historical or archaeological interest is also given in the statement. If the village is un-inhabited or power is being used for agricultural purpose only these characteristics have been indicated in the remarks column.

The land use statistics are constantly in demand for Agricultural production programme. These statistics have been given in columns 11 to 15 under the headings (i) Forest, (ii) Irrigated, (iii) Unirrigated, (iv) Culturable waste, and (v) Area not available for cultivation. Village Directory

(a) According to their area in acres the villages have been stratified in the following table.

Table 5

Area (in acres)	No. of Villages	Percentage
50 acres or less	11	0.94
51-100	30	2.58
101-200	114	10.26

2001-5000	13	1.12
5001 acres and above	—	—
Total @	1160	

@ Total is exclusive of one forest village whose information is not available.

It is evident from the above table that the number of villages having an area of more than 200 acres but not more than 1,000 acres are highest claiming the percentage of 79.67. Thereafter size of villages increases. There is no village having an area exceeding 5,000 acres. As regards smaller villages, there are only 11 having an area of less than 50 acres.

(b) The distribution of villages having educational institutions is given in the following table :

Table 6

Distance from the nearest town (in km.)	Total No. of villages	No. of villages having				
		Primary School	Middle School	Higher Secondary School	Colleges	Others

@ Total is exclusive of one forest village whose information is not available.

The above table shows that the largest number of educational institutions (729) including Higher Secondary Schools exist in the villages situate between 26 to 50 kilometers from the nearest town. The villages which lie within a radius of 51 to 100 kms. have the least number of institutions (5). As regards Higher Secondary Schools only 7 lie within a radius of 10 to 50.

(c) 14 villages in district Rampur have hospitals. If all kinds of medical institutions including dispensaries, health centre etc, are taken into account, 37 villages out of 1160 have medical institutions.

The following table presents the number of medical institutions per 100 Sq. Kms. :-9

Table 7

Name of Tahsil	Total area (in sq. kms.)	No. of medical institutions of any kind per 100 sq. kms.
Suar	558.05	2
Bilaspur	488.29	2
Rampur	440.35	1
Shahabad	428.74	2
Milak	407.52	1

It transpires that tahsils Rampur and Milak each have one medical institution per 100 sq. kms. Suar, Shahabad and Bilaspur are slightly better off well having 2 institutions per 100 sq. kms.

(d) 296 villages are electrified in the district out of 1160 villages. Their percentage comes to 25.52.

The largest number of electrified villages (96) lie in Tahsil Bilaspur and minimum in Tahsil Milak (28). The power supply in villages with reference to their distance from the nearest town is given in the following table :—

Table 8

Distance from the nearest town	Total No. of villages	Number of villages with Electric Power supply	
		Total	Percentage of total electrified villages to total villages
0-5	62	12	19.35

51-100	3	—	—
101-200	—	—	—
201 and above	—	—	—
Total @	1,160	296	25.52

@ Total is exclusive of one forest village whose information is not available.

The percentage of electrified villages to the total villages is highest 38.91 for those, situate within a radius of 20 to 50 kilometers and the minimum percentage of 11.17 is for those situate at a distance 11 to 15 kms. from the nearest town. It is evident from the above table that the percentage of electrified villages to total villages generally decreases with the increase of distance from the nearest town.

The means of communications within a radius of 1 mile from the villages have been shown in table 9. As many as 17 villages of the district are connected by rail, out of the total number of 1160 villages. 16.98% are connected by pucca road and 10.17% by kachcha and pucca roads. The percentage of villages having only kachcha roads is 50.95%. The nature of communications have been shown in the following table, where the villages have been classified according to their distance from the nearest town.

Total @	1,160	197	591	118	-	1	17	-	20

@ Total is exclusive of one forest village whose information is not available.

It is evident from the above table that the villages nearest to the town have better facilities of communications and *percontra* the villages situated at a distance of more than 50 kms. from the nearest town have 3 Kachcha roads.

(f) There are in all 62 post offices in the rural areas of the district. On an average, 1 post office caters to the need of about 19 villages. The number of Post Offices per 100 Sq kms. in the various tahsils have been shown in the following table :—

Table No. 10

Name of Tahsil	Total area (in sq. kilometers)	No. of Post Offices per 100 sq. kilometers

Bilaspur	488.29	2
Rampur	440.34	4
Shahabad	428.62	2
Milak	401.52	3

Tahsil Suar, Shahabad and Bilaspur have the lowest number of post offices, the average being 2 per 100 sq. kms. Tahsil Rampur and Milak have 4 and 3 post offices per 100 sq. kms. 1000 population.

(g) Wheat and rice are the staple food in the district.

The cultivated area is 82.42 percent of the total rural area of the district, of which 25.74 percent is irrigated area.

The following table shows the average cultivated land, average cultivable waste and its percentage to average cultivated area per village. The villages in this table have again been classified according to their distance from the nearest town.
