STATE GOVERNMENT PUBLICATIONS

PART X-A	...	Village and Town Directory
PART X-B	...	Village and Town Primary Census Abstracts
PART X-C	...	Analytical Report and Administrative Statements and District Census Tables

(District Census Handbooks are published under Part X in 3 Parts—A, B & C for eac of the 43 districts in the State. Parts A and B are published in one volume).

PREFACE

Prior to the 1951 Census, there was no regular separate publication at the district level regarding the data collected, although the seeds of the District Census Handbooks can be traced to the 'Village Lists' brought out for every district in 1901 and 'Village Statistics' of every district published in 1911 and 1941. No definite answer is forthcoming as to why such publications, giving village-wise information of occupied houses, break-up of population into males/females and literates, were not brought out in 1921 and 1931. The reason could be transfer from 1921 of certain charges on Census previously met from the provincial revenues to the Central revenues and the Government of India may not have considered it necessary to publish statistics upto the village level. 'Village Statistics' in 1941 were brought out by the Central Provinces and Berar Government and this practice of bringing out district-wise publications at the cost of the State Government has since been continuing.

2. The scope of the district-wise publications, now called the District Census Handbooks, has been undergoing change with each successive Census from 1951. In 1951, the District Census Handbooks only contained the Primary Census Abstract and the Census tables. In view of the usefulness of separate publication for each district, improvements were made at the time of the 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, education, etc. An 'Introductory Note' was also added to highlight the more striking features. Unfortunately, the desire to make district-wise Census publications very comprehensive resulted in late availability of the books to the users. Therefore, this time the District Census Handbooks have been divided into three parts in order to release maximum data, as and when finalised, so that the publications may have a useful life of about seven to eight years of inter-Censal decennium. Part A will contain Primarily non-Census statistics, Part B the Primary Census Abstract and Part C various administrative statistics with a chapter titled "Introducing the district". It may be mentioned here that subsequently a decision has been taken to merge Parts A and B in one volume on grounds of economy.

3. Much of the delay in the publication of the District Census Handbooks after the 1961 Census was due to delay in collection of administrative statistics and the decision to write the Introductory Note in the head office, Separation of administrative statistics and the decision to write the Introductory and the kind Co-operation of the State Government permitting Collectors of the 1961–71 decade to write the chapter on "Introducing the District", likely to go a long way in early publication of all the parts of the District Census Handbooks. Anotherfavourable factor this time is the early decision of the State Government to permit printing in private presses as and when the work-load on the State Government Presses is heavy and likely to result in delay in the bringing out of the District Census Handbook of any district. It would not be out of place to point out here that the work-load in connection with the District Census Handbooks is very much more this time, not only on account of wider coverage but largely due to the decision to bring out the District Census Handbooks in Hindi as well as English. In all, there will be 172 publications, 4 per district of which 2 will be in Hindi and 2 in English. Advance action was taken this time to collect the non-Census data and it is hoped that the combined volume of Parts A and B of all the 43 districts would be out by the end of 1973 and Part C of all the districts by the middle of 1975. This would be a definite improvement on the 1961 performance when printing of the District Census Handbooks covered the period 1964 to 1967.

4. In his Preface to the 1961 District Census Handbooks, my predecessor, Shri G. Jagathpathi, had observed thus, "It was not possible at this Census to base all Census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.". It has not been possible to adopt the development block as the basic unit for operation and presentation in this Census for more than one reason. Firstly, the office of the Block Development Officer was abolished in December, 1965; its resurrection in the form of office of the Block Development Assistant from 2-10-69 had not taken firm roots up to the time field arrangements for the 1971 Census were finalised. Secondly, the tahsil as a unit of field arrangements has many more advantages, the most significant being the ready availability of that legendary functionary—the patwari—without whose active co-operation it would be a formidable task to determine whether a habited structure in a cultivated field is part of village X or Y. Even, otherwise, since village-wise figures are available, it should not be difficult for those in need of data for intermediate units between the village and the tahsil, like the development block or patwari halka, to compile it by adding figures of concerned villages. The tahsil has for long been a fixed unit of administration and, to my mind, should be retained in preference to the development block whose jurisdiction may undergo a change in accordance with the pace of future development.

5. In conclusion, I would like to place on record my grateful thanks to the Government of Madhya Pradesh for having so kindly agreed to undertake the publication of the Handbooks in hindi as well as english to the various government and semi-government offices for un-hesitatingly making available the non-Census statistics, and to the Controller, Government Press, and his staff for arranging early printing in the Government and private Presses.

BHOPAL:
15th August, 1972.

EXPLANATORY NOTE

History :

Prior to 1951 there were no separate Census publications for every district. But at the time of preparatory arrangements for the first Census of Independent India, it was felt that Census statistics should be made available for smaller territorial units basic to the needs of an administration wedded to welfare of the masses. Accordingly, the scheme of District Census Handbooks was conceived and implemented. In view of the usefulness of separate publications for each district, further improvement was made at the time of 1961 Census by including non-Census data like climate, agriculture, cooperation, industry, banking, education, health etc. An introductory note was also added to highlight the more striking features. Unfortunately the desire to make districtwise Census publication very comprehensive resulted in late availability of the books to the users. Therefore, the organisers of the 1971 Centenary Census decided in favour of splitting the District Census Handbooks into three parts and thereby relea e maximum data, as and when available, so that the publication may have a useful life of seven to eight years of inter-censal decennium.

Scope:

(a) Part A of the book is the Village and Town Directory. The Village Directory contains for each village particulars of amenities available in the field of education, medicine, power supply, drinking water supply, post and telegraph facilities and communications. In addition, data relating to particulars of land use, weekly market, places of religious, historical or archaeological interest in the village has also been included. The Town Directory gives for each town in the district in the form of suitable statements to the origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, latest municipal financial statements, civic and other amenities, medical, educational, cultural facilities, trade, industry, commerce and banking facilities,population by religion and scheduled castes and scheduled tribes. The abbreviations used in the Directory have been explained separately.

(b) Part B contains for each village and town, the primary census data incorporating area, occupied residential houses, number of households, total population and its break-up by sex, Scheduled Caste and Schedulad Tribe population, literate population and working population by nine broad categories.

(c) Part C will mainly incorporate the administrative statistics pertaining to the district in all the fields of development. The other Census tables pertaining to the district regarding language, religion migration etc., will also be reproduced. There will be a write-up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade.

Village Directory :

This is in the form of one statement. Important statistics for each village have been given under the main head—Amenities and Land use Data. Other information regarding nearest town with distance, market, staple food and places of religious, historical or archaeological interest have also been given in separate columns. The information regarding "Amenities" cover items like educational and medical institutions, power supply, drinking water, communications and post and telegraph. Under "Land use" the break-up of the total area of the village has been indicated under sub-heads forest, irrigated, unirrigated, cultivable waste and area not available for cultivation.

(a) There are 1,541 villages in the seven tahsils of the district as in 1961 and the number of villages tahsil-wise is as under :—

Sl. No.	Tahsil	No. of Villages
1	Raisen	235
2	Ghairatganj	173
3	Begamganj	232
4	Goharganj	240
5	Baraily	249
6	Silwani	255
7	Udaipura	157
	Total	1,541

The distribution of the villages with reference to their area in acres is as shown in the inset table below :—

Area (in acres)	No. of Villages
50 acres or less	Nil
51 — 100	Nil
101 — 200	7
201 — 500	203
501 — 1,000	567
1,001 — 2,000	494
2,001 — 5,000	238
5,001 acres and above	26
Area not available	6
Total	1,541

Area of six forest villages of Udaipura tahsil is not available and, therefore, these villages have not been considered in this note while discussing data on area.

Village Pipalia Bhat (L. C. No. 27/3/38) in Begamganj tahsil has the smallest area of 128 acres and is located at a distance of 4.8 Km. from the nearest town, Begamganj, while village Jabra Malkhan (L. C. No. 27/4/228) in Goharganj tahsil has the largest area of 19,252.96 acres in the district and is located at a distance of 35.2 Kms. from the nearest town, Bhopal. In all 1,161 out of 1,535 villages, for which area figures are available, are in the range of 501-2,000 acres. Twenty-six villages are in the range of 5,000 acres and above. Maximum villages in each tahsil also come within the range of 501-2,000 acres as will be seen from the following table containing tahsil-wise data of villages :—

Area in acres	Raisen	Ghairatganj	Begamganj	Goharganj	Baraily	Silwani	Udaipura	Total
1	2	3	4	5	6	7	8	9
Below 50 acres	...	...	...	...	...	...	...	..
51 — 100	...	...	...	...	...	...	...	...
101 — 200	3	...	2	1	1	...	...	7
201 — 500	37	11	37	34	28	36	20	203
501 — 1,000	81	81	107	73	91	83	51	567
1,001 — 2,000	65	55	75	72	74	100	53	494
2,001 — 5,000	45	24	11	46	51	35	26	238
5,001 and above	4	2	...	14	4	1	1	26
Area not available	...	...	...	...	...*	...	6	6
Total	235	173	232	240	249	255	157	1,541

(*b*) *Educational amenities* :—The total number of villages having various educational facilities within different distance ranges from the nearest town are as indicated in the inset table below :—

Distance from the nearest town	Total No. of villages	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 Kms. or less	63	33	1	1	...	...
6 — 10 Kms.	111	53	4	...	...	...
11 — 15 Kms.	143	84	13	...	...	...
16 — 25 Kms.	397	188	28	4	...	...
26 — 50 Kms.	656	297	38	5	...	...
51 — 100 Kms.	168	51	7	3	...	...
101 — 200 Kms.	3	2	...	...	...	...
201 Kms. and above	...	...	...	...	...	...
Total	1,541	708	91	13	...	...

Mixiмum number of villages, 656, lie within the distance range of 26-50 Kms. and maximum number of villages having educational facilities also lie within this range. The number of educational institutions in the villages of different tahsils is given below :-

Tahsil	Number of Educational Institutions			
	Higher Secondary/ High School	Middle School	Primary School	Others
1	2	3	4	5
Raisen	2	7	110	...
Ghairatganj	2	6	66	...
Begamganj	...	5	109	...
Goharganj	2	17	86	...
Barailly	2	26	130	...
Silwani	2	10	110	...
Udaipura	4	23	106	...
Total	14	94	717	...

Nine villages have two primary schools each, while three villages have two middle schools each. One village Kasba Udaipura, which is a tahsil headquarter, has two High/Higher Secondary Schools. The area of these villages with distance from the nearest town are indicated below :—

Sl. No.	Name of Village	Tahsil	L.C. No.	Area of the village in acres	Distance from the nearest town in Kms. with name		Educational Institutions & number (if more than one)		
							Primary	Middle	Higher Secondary/ High School
1	2	3	4	5	6		7	8	9
1	Diwanganj	Raisen	27/1/18	1,013.94	Bhopal	24.0	2	...	...
2	Kanakheda Kalan	Raisen	27/1/55	1,014.46	Vidisha	8.0	2	...	...
3	Pipliya Gajju	Goharganj	27/4/12	805.81	Bhopal	22.4	2	—	...
4	Chikhlod Kalan	Goharganj	27/4/162	4,780.43	Raisen	33.6	2	...	...
5	Goharganj	Goharganj	27/4/85	3,455.06	Bhopal	44.8	...	2	...
6	Badi Khurd	Baraily	27/5/40	1,980.28	Baraily	19.2	...	2	...
7	Badi Kalan	Baraily	27/5/43	3,721.61	Baraily	19.2	...	2	...
8	Dilhari	Silwani	27/6/35	2,313.66	Baraily	28.8	2	...	...
9	Pipalia Punwaria	Udaipura	27/7/18	2,399.83	Baraily	24.0	2	...	...
10	Kasba Udaipura	Udaipura	27/7/63	3,402.24	Baraily	35.2	2	...	2
11	Kasba Deori	Udaipura	27/7/108	6,998.69	Gadarwara	25.6	2	...	...
12	Thala	Udaipura	27/7/114	466.65	Gadarwara	19.2	2	...	—
						Total	18	6	2

(c) *Medical facilities*:—The availability of medical facilities per 100 sq. Km., tahsil-wise, is as given in the following inset table :—

Tahsil	Total area (in sq.Kms.)	No. of medical institutions of any kind per 100 sq. Kms.
1	2	3
Raisen	1,321.13	0.4
Ghairatganj	918.91	0.5
Begamganj	904.79	1.2
Goharganj	1,775.19	1.0
Baraily	1,411.01	0.8
Silwani	1,296.09	0.6
Udaipura	777.23	1.3

The above table will show that the villages of Begamganj, Goharganj and Udaipura tahsils have, comparatively, greater medical facilities per 100 sq. Kms. than the villages of other tahsils. The number of medical institutions, tahsil-wise, is as indicated below :—

Tahsil	Number of medical institutions
1	2
Raisen	6
Ghairatganj	5
Begamganj	11
Goharganj	18
Baraily	11
Silwani	8
Udaipura	10
Total	69

Minimum number of medical institutions are in Goharganj tahsil.

(*d*) *Power Supply* :—The number of villages with electric power supply within various ranges of distance from the nearest town is as indicated in the table below :—

Distance from the nearest town	Total number of villages	No. of villages with electric power supply
1	2	3
5— Kms. or less	63	3
6— 10 Kms.	111	7
11— 15 Kms.	143	8
16— 25 Kms.	397	14
26— 50 Kms.	656	21
51—100 Kms.	168	5
101—200 Kms.	3	...
201—Kms. and above	...	...
Total	1,541	58

It would be seen from the above that about 4 percent of the total number of villages have electricity and about 91 percent of them are in the distance range up to 50 Kms.

The number of villages having electric power supply, tahsil-wise, is as below :-

Name of Tahsil	Total No. of villages	Villages having electric power supply	Percentage of village covered by electricity
1	2	3	4
Raisen	235	14	5.96
Ghairatganj	173	9	5.20
Begamganj	232	0	0
Goharganj	240	6	2.50
Baraily	249	22	8.84
Silwani	255	2	0.8
Udaipura	157	5	3.18
Total	1,541	58	3.7

The percentage (about 4) of villages having electric power supply is less than the state percentage (about 7). Within the district, villages of Baraily tahsil have, comparatively, more of this facility while no village of Begamganj tahsil has electricity.

(*e*) *Communications* :—The total number of villages connected by different types of communications, falling in different distance ranges from the nearest town, are indicated in the inset table below :—

Distance from the nearest town	Total No. of villages	Name of villages connected by				
		Pucca road	Kutcha road	Pucca road & Rail	Kutcha road & Rail	Others
1	2	3	4	5	6	7
5 Kms. or less	63	6	55	...	...	—
6 — 10 Kms.	111	25	76	2	...	—
11 — 15 Kms.	143	14	118	...	...	...
16 — 25 Kms.	397	37	284	3	2	2 (Rail)
26 — 50 Kms.	656	93	486	5	1	...
51 — 100 Kms.	168	10	146	1	...	...
101 — 200 Kms.	3	...	3	—	...	...
201 Kms. and above	...	...	...	...	...	...
Total	1,541	185	1,168	11	3	2

Few villages are served by "Pucca" road. Out of 1,541 villages in the district, 1,353 villages are served by either "Pucca" or "Kutcha" roads. The number of villages served by "Pucca" roads, tahsil-wise, and the total number of villages with percentage covered are as under :-

Tahsil	Total No. of villages	No. of villages having "Pucca" road	Percentage
1	2	3	4
Raisen	235	55	23.40
Ghairatgaj	173	23	13.29
Begamganj	232	5	2.16
Goharganj	240	63	26.25
Baraily	249	20	8.03
Silwani	255	9	3.53
Udaipura	157	21	13.38
Total	1,541	196	

Comparatively, Goharganj and Raisen tahsils have better communication facility.

(*f*) *Post and Telegraphs* :—The total number of villages in the tahsils of the district having post offices and telegraph offices are given below :-

Name of Tahsil	Total No. of villages	No. of villages having post office	No. of villages having telegraph office	No. of villages having telephone
1	2	3	4	5
Raisen	235	8	..	...
Ghairatganj	173	8	5	...
Begamganj	232	8	...	...
Goharganj	240	10	5	2
Baraily	249	28	...	...
Silwani	255	7	...	...
Udaipura	157	23	1	1
Total	1,541	92	11	3

The number of post offices per 100 sq. km. area in each tahsil is as indicated in the following inset atble :—

Name of Tahsil	Total area in sq. Km.	No. of Post offices per 100 sq. Km.
(1)	(2)	(3)
Raisen	1,321.13	0.6
Ghairatganj	918.91	0.9
Begamganj	904.79	0.9
Goharganj	1,775.19	0.6
Baraily	1,411.01	2.0
Silwani	1,296.09	0.5
Udaipura	777.23	3.0

Comparatively, Udaipura and Baraily tahsils have better postal facilities. Two villages of Baraily tahsil and one village of Udaipura tahsil have also telephone facility. The names of these villages are indicated below :-

Tahsil	Name of the village	Location Code No.
(1)	(2)	(3)
1 Baraily	1 Bhondia	27/5/188
	2 Khairwada	27/5/207
2 Udaipura	1 Kasba Udaipura	27/7/63

(*g*) *Staple food* :-"Jowar" and wheat constitute staple food in quite a good number of villages of the district while rice and "kodo" also constitute staple food in a few villages.

(*h*) *Land use Pattern* :—(i) According to the village papers, about 37 percent of the area in the district is under forest. The percentage of the forest area, tahsil-wise, is indicated below :-

Tahsil	Percentage
1	2
Raisen	43.80
Ghairatganj	27.41
Begamganj	26.59
Goharganj	54.02
Baraily	25.65
Silwani	46.47
Udaipura	10.22

It may be noticed that Gohraganj, Silwani and Raisen tahsils have relatively more forest area.

(ii) The net cropped area in the year 1969 increased by 26.48 percent as compared to the area in 1960-61. The percentage of area under irrigation to area under crops during the years 1960-61 and 1968-69 comes to 0.71 and 1.30, respectively. The area under irrigation during this period increased by 130.47 percent.

(iii) The following inset table shows the average percentage of cultivable waste per village in different distance ranges from the nearest town :—

Distance	Number of villages	Total cultivated land	Average culivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 Kms. or less	63	37,227.59	590.91	7,216.03	114.54	19.38
6 — 10 Kms.	111	74,916.17	674.92	11,010.38	99.19	14.70
11 — 15 Kms.	143	102,852.79	719.25	13,955.00	97.59	13.57
16 — 25 Kms.	397	276,749.04	697.10	54,125.22	136.34	19.56
26 — 50 Kms.	656	388,948.24	592.91	96,929.72	147.76	24.92
51 — 100 Kms.	168	73,003.88	434.55	26,111.07	155.42	35.77
101 — 200 Kms.	3	1,158.75	386.25	1,145.72	381.91	98.88
200 Kms. & above	...	...	...	...	...	...
Total	1,541	954,856.46		210,493.14		

Ordinarily, the nearer a village to an urban area, the lesser is the proporation of cultivable waste but it may noticed from the above table that there is deviation in the distance ranges 6-10 kms. and 11-15 Km. In the whole district 210,493 acres (in round figure) of land has been classified as cultivable waste which constitutes about 10 percent of the total area of the villages in the district. The percentage of cultivable waste in each tahsil is as below :—

Name of tahsil	Percentage of Cultivable waste as against the total area of the villages
1	2
Raisen	10.11
Gairatganj	12.54
Begamganj	11.55
Goharganj	8.35
Baraily	8.08
Silwani	14.80
Udaipura	6.68

This table would show that, comparatively, more cultivable waste is located in Silwani, Ghairatganj, Begamganj and Raisen tahsils where the percentage of cultivable waste is more than ten.

Town Directory

This is in the form of seven Statements. But before discussing the information collected in the Seven statements, it would be better to first understand certain concepts which determines urban areas.

(*i*) *Definition of town* :—A 'town' in the 1961 Census was either (1) a Municipality, Cantonmen or Corporation; or (2) a habitation with a population of at least 5,000, with atleast three-fourths of the adult male population engaged in non-agricultural pursuits. Accordingly there were 219 towns in the State. However, seven towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75% or more. But the list already finalised was not changed subsequently; the reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as Municipalities and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than what was already present. In the 1971 Census there was no material change in the concept of town and a list of 247 towns was prepared originally. Three more

towns were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and ultimately 250 towns were recognised in the State. All areas which are not towns have been included in the list of villages.

(*ii*) *Urban Agglomeration* :—The concept of Urban Aggolmeration has been adopted for the 1971 Census with the intention to present the population data in the District Census Handbook in respect of urban areas in such a manner that "*de-facto* urban agglomeration" is a recognisable entity, data pertaining to which will be the sum of the data of not only the *de-jure* (within municipal/other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factual and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

(*iii*) *Standard Urban Area* :—This new concept has been developed for the 1971 Census and the essentials of a Standard Urban Area are:—

(1) It would have a core town of a minimum population size of 50,000.

(2) The contiguous areas made up of other Urban as well as rural administrative units should have close socio-economic links with the core town and

(3) The probabilities are that this entire area will get fully urbanised in a period of two to three decades. This concept has been developed to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture.

The Seven Statements :

Very useful data regarding the towns have been given in the statements and they have been collected and compiled from various agencies and official publications. The source and period of the information has been indicated below each Statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data compiled and presented throws sufficient light on the present stage of progress in each town.

(*i*) *Statement No. I* :—This statement presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status of the town indicates the authority incharge of its administration. Thus a town could have a Municipal Corporation, a Municipality, a Cantonment Board, a Gram Panchayat, a Notified Area Committee, etc.

(*ii*) *Statement No. II* :—This statement contains information regarding location (latitude/longitude), annual rainfall, temperature, distance from the nearest city with population of 1 lac or more and State, District and Tahsil headquarters. Distances from Railway Station and Bus route have also been indicated.

(*iii*) *Statement No. III* :—The statement contains information regarding receipt and expenditure of local bodies under different main heads indicating the indebtedness and general financial position and expenditure on public utility works. The information has been furnished for the years 1968-69, 1969-70 and 1970-71 in order to have an idea whether the concerned urban body is improving financially or not.

(*iv*) *Statement No. IV* :—This statement contains information regarding amenities, *e. g.*, road length, sewerage system, types of latrines, water supply, fire-fighting service etc. in the different towns.

(*v*) *Statement No. V* :—This statement contains information regarding various important facilities available in the town *viz.*, medical, educational, recreational and cultural

(*vi*) *Statement No. VI* :—This statement throws light on the business and credit facilities commanded by the towns and contains information regarding trade, commerce, industry and banking.

(*vii*) *Statement No. VII* :—This statement contains data regarding population by religion and Scheduled Castes/Scheduled Tribes with male/female break-up for the year 1971. This is the only statement based on 1971 Census figures.

Towns :

There are seven tahsils and three towns in Raisen district as indicated below :—

Sl. No.	Tahsil	Town	Location Code No.	Class
1	2	3	4	5
1	Raisen	Raisen	27/I	V
2	Ghairatganj	Nil		
3	Begamganj	Begamganj	27/II	IV
4	Goharganj	Nil		
5	Baraily	Baraily	27/III	V
6	Silwani	Nil		
7	Udaipura	Nil		

It may be seen from the above that out of seven, only three tahsil headquarters are towns. The district headquarter Raisen is a class V town, the population being less than 10,000 and incidentally, it may be interesting to note that there is no district headquarter in the State, except Raisen and Sidhi, the population of which is less than 10,000. Raisen was recognised as a town in 1911 while Begamganj and Baraily were recognised in 1921 and 1941, respectively. In 1951 Raisen and Baraily were derecognised. There is no town in the district having population of over 50,000 and, therefore, there is no Standard Urban Area. Only Begamganj town has the following urban outgrowths :—

Town	Outgrowth (Name of village)	Included (Wholly/Partly)	Location Code No.
1	2	3	4
Begamganj	1 Parasari	Wholly	27/3/69
	2 Gamiria	Wholly	27/3/70
	3 Gopalpur-churakka	Wholly	27/3/71
	4 Shahpur-Hadaipur	Wholly	27/3/72
	5 Khiria-Narayandas	Wholly	27/3/73
	6 Garhoipur	Wholly	27/3/74

Statement I :—The category of town administration in 1970 has been indicated in column 5 of the statement. All the three towns have municipality.

The population of Begamganj and Raisen fell during the decades as indicated below :

Sl.No.	Name of Town	Decade Population		Reduction in Population
		Year	Population	
1	2	3		4
1	Begamganj	1921	3,774	
		1931	3,747	27
		1961	10,029	
		1971	10,003	26
2	Raisen	1911	3,577	
		1921	2,897	680

The population of the towns have, by and large, shown constant increase in every decade after their recognition as towns except during the periods mentioned above.

During the decade 1911-1921, Raisen lost in population by 680 and this was mainly due to widespread fatal influenza epidemic which caused heavy mortality in 1918.*

During the decade 1921-1931, Begamganj showed a fall in population by 27. The district also lost in population during this decade due to distress caused by uneven distribution of rain and consequent failure of crops for some years.**

During the decade 1961-71, Begamganj showed a fall in population by 26 because in 1961, the population of non-municipal urban area was included in the town while in 1971 the population within the municipal area has been shown.

Column 14 of the statement shows the functional classification of the towns in 1961 as indicated in following inset table :—

Functional category	Total No. of towns
1	2
Primary activities	1
Industry	1
Service-*cum*-Primary-activities	1
Total	3

* District Census Handbook—Census of India, 1961—Raisen district—Page li

** District Census Handbook—Census of India. 1961 Raisen district page li

The method adopted for the functional classification is elucidated below :

The nine industrial categories were grouped into the following five functional characteristics :—

(i) Primary Activities (Comprising Category I-Cultivation, II—Agricultural Labourer and III—Mining and Quarrying, Fishing, Livestock, Hunting, etc.)

(ii) Industrial (Comprising Category IV—Household Industry, V—Manufacturing other han Household Industry and VI—Construction)

(iii) Commercial (Comprising Category VII—Trade and Commerce)

(iv) Transport (Comprising Category VIII—Transport, Storage and Communications)

(v) Services (Comprising Category IX—Other services)

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 percent of the total workers the town was designated by that function. In case no single characteristic claimed 40 percent of the workers, two predominant characteristics together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 percent of the total workers, the first three characteristics were taken to represent the town.

Statement II :—The physical and locational aspects as in 1969 have been covered. The district is situated mainly in the Malwa plateau and partly in the Narmada valley. The towns get annual rainfall of 1,150 to 1,369 m.m. The temperature of the towns is not available hence the temperature of Bhopal, which has more or less similar temperature, has been indicated as those of the 3 towns in the statement. The range of maximum and minimum temperature of the towns is indicated as 31.5° C. and 18.5° C. It may, however, be mentioned that the climate is, more or less, temperate in the plateau while the low lying Narmada valley and the hilly region suffer from extreme climate, being very hot in summer and cool in winter.

All the towns are on the bus route but none has railway facility. The district headquarter, Raisen, is at a distance of 48 km. by road from the State headquarter, Bhopal. Bhopal is the nearest city from the towns of the district, except Begamganj, for which Sagar is the nearest city.

Statement III : On the basis of population of 1971, the three towns of the district have been categorised as under :

Sl.No.	Name of Town	Population in 1971	Class
1	2	3	4
1	Baraily	8,263	V
2	Begamganj	10,003	IV
3	Rnisen	9,138	V

The Statement would show that the total expenditure is within the total receipts of the local bodies except in the following cases :

Sl. No.	Local body in the town	Year of excess Expenditure	Total Receipt	Total Expenditure	Amount by which the expenditure is more than receipts	Percentage of expenditure to total receipt
1	2	3	4	5	6	7
1	Baraily	1969-70	117,000	129,400	12,400	10.60
2	Begamganj	1968-69	30,700	34,300	3,600	11.73
3	Raisen	1968-69	75,200	79,700	4,500	5.98
		1970-71	155,200	172,200	17,000	10.95

Column 7 of the above table would show that the percentage of excess expenditure to total receipts of the local bodies is more than ten for the years indicated in the table. The total receipts of the local bodies have, by and large, shown an upward trend except in the case of Begamganj for the year 1970-71. This is mainly due to shortfall in receipts mentioned in columns 4 and 8 of the statement.

Receipts through taxes etc. have also shown, by and large, an upward trend during these years except in the following case :—

Sl. No.	Local body in the town of	Year	Extent of short fall
1	2	3	4
1	Raisen	1969—70	1,300

It may be significant to note that the municipality of Begamganj has no receipt through taxes during the three years indicated in the statement. Government grants have been received by all the local bodies but loan has been taken only by the local bodies of Baraily and Raisen. The per capita receipt and expenditure under broad heads is indicated in the inset table below :

Class of town	No. of towns	Year	Per capita (in rupees)						
			Receipt			Expenditure			
			Total Receipt	Receipt through taxes etc.	Receipt from all other sources	Total expenditure	Expenditure on public conveniences	Expenditure on public Institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9	10
Class IV	1	1968-69	3.07	...	3.07	3.43	0.14	0.07	3.22
10,000—19,999		1969-70	7.61	...	7.61	6.84	1.11	...	5.73
		1970-71	4.01	...	4.01	3.60	1.43	...	2.17
Class V	2	1968-69	10.18	3.44	6.74	9.15	2.51	0.06	6.58
5,000—9,999		1969-70	12.74	4.96	7.78	12.52	3,29	0.06	9.17
		1970-71	19.08	7.41	11.67	15.77	9.30	0.05	6,42

The above inset table would show that on the whole the total per capita receipt matches fairly well with the total per capita expenditure. The per capita expenditure on public health and conveniences as against the per capita receipt through taxes etc., is encouraging except that Begamganj municipality does not receive any income through taxes etc. although it is incurring expenditure on items of public health and conveniences. The expenditure of the local bodies, shown in column 15 of the statement No. III under head "Others", by and large, constitutes a high percentage of the total expenditure.

Statement IV :—All the towns have electricity and street lights. Water tap facility is available only in Baraily while fire brigade is not available in any town.

Statement V:(*i*) *Medical Facilities*:—Hospital facilitiy is available at Raisen while the other two towns have only health centres. Family Planning Clinic is available only at Raisen. The number of beds per thousand population has been indicated in the inset table below :—

Total No. of beds in medical institutions	No. of beds per 1,000 population
1	2
48	1.7

(*ii*) *Educational Facilities* :—College facility is available only at Baraily where there is one arts and science college. Every town has higher secondary/high school facility. The number of higher secondary/high schools, middle schools and primary schools per thousand population is shown in the following inset table. For a more realistic appreciation, the population in the age-group 0-14 has been considered for primary and middle schools while population in the age group 15-19 has been considered for higher secondary/high schools : –

Name of the town	Number per 1,000 population		
	High/Higher secondary	Middle	Primary
1	2	3	4
Baraily	2.6	0.3	0.5
Begamganj	1.7	0.8	1.2
Raisen	1.4	1.0	1.0

(*iii*) *Recreational and Cultural Facilities*:— Libraries and reading rooms are available in all the towns while the cinema house is available only at Baraily. The district headquarter, Raisen does not have any cinema house.

Statement VI :—Every town has banking facility and agricultural credit society. Non-agricultural credit society is available only at Raisen. Cloth, pulse, oil and "bidi" are the important items of import in the towns, while wheat and "masur" are the main items of export. Bricks and handloom cloth are the items of local manufacture.

Statement VII :—About 37 percent of the urban population of the district is in Begamganj town and it is followed by Raisen and Baraily where the percentage of urban population is about 33 and 30, respectively. Majority of the urban population follow hindu religion, next come followers of islam religion. The percentage of people following hindu and islam religions in the town is as below :—

S. N.	Town	Percentage in round figure	
		Hindu	Islam
1	2	3	4
1	Raisen	62	37
2	Begamganj	49	44
3	Baraily	65	29

The percentage of people following other religion is not significant and there is no population following boudh religion in any town. Scheduled caste population in Raisen town is about 11 percent while in other towns it is less than 10 percent. Scheduled tribe population is insignificant in the towns of the district.

PRIMARY CENSUS ABSTRACT

PART X (B)

EXPLANATORY NOTE

I. General :

In Part A, the picture of the district as revealed by non-Census data has been discussed. In this note, the progress made by the district in the 1961-71 decade would be dealt with on the basis of information collected in the individual slip that was canvassed in the 1971 Census. Broadly speaking, the changes that have come about in the matter of total population, its growth-rate and density, sex-ratio, literacy, Scheduled Castes and Scheduled Tribes, working population, occupied residential houses and number of households have been discussed.

II. Population ;

The population of Raisen district is 553,026 while the population of Madhya Pradesh is 41,654,119. The population of Raisen district, thus comes to 1·33 percent of the State population. The rural population is about 94·44 percent of the district population, whereas the urban population is 5·56 percent as against the State percentage of 16·29. In other words the district is rural in character. Highest percentage of the district population is found in Baraily tahsil (about 22 percent) and the following are the main reasons for this : (i) comparatively, there are greater number of villages in this tahsil (249), except in Silwani tahsil where there are 255 villages, (ii) there is less forest area (25·65 percent) in this tahsil than in Silwani tahsil (46.47 percent), and (iii) the population of Baraily town is included in the tahsil population, whereas there is no town in Silwani tahsil.

Raisen district ranks 40th among the 43 districts of the State in population. During the decade 1961-71. the district population growth-rate has been 34·42 against the State growth-rate of 28·67. The area of the district is 8,395 sq.Km. In other words, it has 1·90 percent of the State area and ranks 25th in area among the districts of the State. The density of population per sq.Km. of the district is 66 against the State density of 94 and the district ranks 40th in density in the State. The sex-ratio, *i.e.*, number of females per 1,000 males, of the district and the State is 900 and 941, respectively. Tahsils Udaipura, Silwani, Baraily and Ghairatganj have got sex-ratio higher, while Begamganj, Raisen and Ghairatganj tahsils have lower sex-ratio than the district sex-ratio.

III. Literacy :

1. The percentage of literacy in the district comes to about 18 as against the State literacy percentage of about 22. In 1961 also, the literacy percentage of the district (13·36) was also lower than the State percentage of 17·13. The district has made some progress to increase the rate of literacy during the decade 1961-71.

2. The literacy percentage among the males in the district (27·56) is lower than the State percentage of about 33. Among females also, the literacy percentage in the district (7·88) is lower than the State percentage of about 11.

3. Among the tahsils, Udaipura tahsil has the highest literacy percentage of 19·92, while Ghairatganj tahsil has the lowest percentage of about 15.

4. The same pattern is seen in male literacy in the tahsils. Among males, Udaipura tahsil is at the top (about 30 percent), while Ghairatganj tahsil with about 22·54 percent comes last. Among females, Begamganj tahsil leads in literacy (about 9·18 percent), while Ghairatganj tahsil with 5·62 percent comes last.

IV. Workers :

In the district, about 34 percent of the population comes under the category of workers (main activity) against the State percentage of about 37. The percentage of female workers to total population (about 12) is less than the State percentage (about 19). Within the district, comparatively greater percentage of workers (males and females) have been returned from Begamganj tahsil.

Udaipura tahsil has returned the lowest percentage of workers (32·39). Among female workers, Baraily tahsil with 14·16 percent leads other tahsils of the district, while Raisen tahsil with 10·41 percent comes last. Among the workers in the district, about 41 and 39 percent are cultivators and agricultural labourers, respectively, as against the State percentage of about 53 and 27. Under the category 'Other workers', the district percentage (20·20) is only slightly less than the State percentage of 20·58. Among females the district percentage of agricultural labourers (about 73), and other workers (about 17) is more than the State percentage of about 49 and 10, respectively, while for cultivators the district percentage (about 11) is less than the State percentage (about 41). Comparatively, highest percentage of cultivators (about 43) has been returned from Silwani tahsil, while Ghairatganj tahsil has returned highest percentage of agricultural labourers. Lowest percentage of cultivators (about 37) and agricultural labourers (about 34) have been returned from Goharganj and Begamganj tahsils, respectively.

V. Scheduled Caste and Scheduled Tribe :

The percentage of Scheduled Castes to total population of the district (about 17) is higher than the State percentage (about 13). The percentage of Scheduled Tribes to total population of the district (13·49) is, however, less than the State percentage (about 20). Highest percentage (22·45) of Scheduled Castes is in Raisen tahsil, while lowest percentage (12·13) is in Silwani tahsil in the district. As regards population of Scheduled Tribes, Silwani tahsil (about 31 percent) leads the other tahsils, while Raisen tahsil (7·87 percent) comes last.

VI. Occupied Residential Census Houses :

The district has 85,291 occupied residential Census houses against the State figure of 6,822,767 which comes to 1·24 percent. During 1961, there were 82,591 occupied residential Census houses in the district against the State figure of 6,230,854 which comes to 1·33 percent. There has been very slight change in the percentage during the decade. The number of households and persons per occupied residential Census house in 1961 and 1971 are indicated below :

State/ District	Year	No. of Residential Census houses	No. of Households	No. of houseeolds per occupied residential Census house	No. of persons per residential Census house
1		2	3	4	5
State	1961	6,230,854	6,615,580	1.06	5.2
District	1961	82,591	88,452	1.07	5.0
State	1971	6,822,767	7,740,289	1.13	6.1
District	1971	85,291	104,463	1.22	6.5

It would thus be seen that the pressure on occupied residential Census houses has increased during the decade in the district as well as in the State. Comparatively, Baraily tahsil (with about 22 percent) claims the highest percentage of occupied residential Census houses in the district.

VII. Villages and Towns :

There are 1,541 villages in Raisen district which comes to 2·00 percent of total villages in the State. The percentage of inhabited villages to total villages in the district is 93·12 against the State percentage of about 92. There are 250 towns in the State out of which the district claims three—Raisen, Begamganj and Baraily.

532	45	81	3	1,470	181	19,467	33,688	Rural		
...	...	...	...	...	...	...	...	Urban		

3. The total area figure given for the District is provisional "Geographical area" as supplied by the Surveyor General of India.
4. The urban area figures are those supplied by the Local Bodies.
5. The rural area of the district has been derived by subtracting the urban area figures supplied by local bodies from the total area figure of the district
6. Total area figures of tahsils are according to village papers as supplied by the Director of Land Records, Madhya Pradesh. Tahsilwise area figures exclude 869.1 Km.^{2} of forest area in the district since tahsilwise breakup is not available.
