PREFACE

Prior to the 1951 Census, there was no regular separate publication at the district level regarding the data collected, although the seeds of the District Census Handbooks can be traced to the 'Village Lists' brought out for every district in 1901 and 'Village Statistics' of every district published in 1911 and 1941. No definite answer is forthcoming as to why such publications, giving village-wise information of occupied houses, break-up of population into males/females and literates, were not brought out in 1921 and 1931. The reason could be transfer from 1921 of certain charges on Census previously met from the provincial revenues to the Central revenues and the Government of India may not have considered it necessary to publish statistics upto the village level. 'Village Statistics' in 1941 were brought out by the Central Provinces and Berar Government and this practice of bringing out district-wise publications at the cost of the State Government has since been continuing.

2. The scope of the district-wise publications, now called the District Census Handbooks, has been undergoing change with each successive Census from 1951. In 1951, the District Census Handbooks only contained the Primary Census Abstract and the Census tables. In view of the usefulness of separate publication for each district, improvements were made at the time of the 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, education, etc. An 'Introductory Note' was also added to highlight the more striking features. Unfortunately, the desire to make district-wise Census publications very comprehensive resulted in late availability of the books to the users. Therefore, this time the District Census Handbooks have been divided into three parts in order to release maximum data, as and when finalised, so that the publications may have a useful life of about seven to eight years of inter-Censal decennium. Part A will contain Primarily non-Census statistics, Part B the Primary Census Abstract and Part C various administrative statistics with a chapter titled "Introducing the district". It may be mentioned here that subsequently a decision has been taken to merge Parts A and B in one volume on grounds of economy.

3. Much of the delay in the publication of the District Census Handbooks after the 1961 Census was due to delay in collection of administrative statistics and the decision to write the Introductory Note in the head office, Separation of administrative statistics and the decision to write the Introductory and the kind Co-operation of the State Government permitting Collectors of the 1961—71 decade to write the chapter on "Introducing the District", likely to go a long way in early publication of all the parts of the District Census Handbooks. Anotherfavourable factor this time is the early decision of the State Government to permit printing in private presses as and when the work-load on the State Government Presses is heavy and likely to result in delay in the bringing out of the District Census Handbook of any district. It would not be out of place to point out here that the work-load in connection with the District Census Handbooks is very much more this time, not only on account of wider coverage but largely due to the decision to bring out the District Census Handbooks in Hindi as well as English. In all, there will be 172 publications, 4 per district of which 2 will be in Hindi and 2 in English. Advance action was taken this time to collect the non-Census data and it is hoped that the combined volume of Pants A and B of all the 43 districts would be out by the end of 1973 and Part C of all the districts by the middle of 1975. This would be a definite improvement on the 1961 performance when printing of the District Census Handbooks covered the period 1964 to 1967.

4. In his Preface to the 1961 District CensusHandbooks, my predecessor, Shri G. Jagathpathi, had observed thus, "It was not possible at this Census to base all Census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.". It has not been possible to adopt the development block as the basic unit for operation and presentation in this Census for more than one reason. Firstly, the office of the Block Development Officer was abolished in December, 1965; its resurrection in the form of office of the Block Development Assistant from 2-10-69 had not taken firm roots up to the time field arrangements for the 1971 Census were finalised. Secondly, the tahsil as a unit of field arrangements has many more advantages, the most significant being the ready availability of that legendary functionary—the patwari—without whose active co-operation it would be a formidable task to determine whether a habited structure in a cultivated field is part of village X or Y. Even, otherwise, since village-wise figures are available, it should not be difficult for those in need of data for intermediate units between the village and the tahsil, like the development block or patwari halka, to compile it by adding figures of concerned villages. The tahsil has for long been a fixed unit of administration and, to my mind, should be retained in preference to the development block whose jurisdiction may undergo a change in accordance with the pace of future development.

5. In conclusion, I would like to place on record my grateful thanks to the Government of Madhya Pradesh for having so kindly agreed to undertake the publication of the Handbooks in hindi as well as english to the various government and semi-government offices for un-hesitatingly making available the non-Census statistics, and to the Controller, Government Press, and his staff for arranging early printing in the Government and private Presses.

VILLAGE AND TOWN DIRECTORY
PART X(A)

EXPLANATORY NOTE

History :

Prior to 1951 there were no separate Census publications for every district. But at the time of preparatory arrangements for the first Census of Independent India, it was felt that Census statistics should be made available for smaller territorial units basic to the needs of an administration wedded to welfare of the masses. Accordingly, the scheme of District Census Handbooks was conceived and implemented. In view of the usefulness of separate publications for each district, further improvement was made at the time of 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, banking, education, health etc. An introductory note was also added to highlight the more striking features. Unfortunately the desire to make districtwise Census publication very comprehensive resulted in late availability of the books to the users. Therefore, the organisers of the 1971 Centenary Census decided in favour of splitting the District Census Handbooks into three parts and thereby release maximum data, as and when available, so that the publication may have a useful life of seven to eight years of inter-censal decennium.

Scope :

(a) Part A of the book is the Village and Town Directory. The Village Directory contains for each village particulars of amenities available in the field of education, medicine, power supply, drinking water supply, post and telegraph facilities and communications. In addition, data relating to particulars of land use, weekly market, places of religious, historical or archaeological interest in the village has also been included. The Town Directory gives for each town in the district in the form of suitable statements the origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, latest municipal financial statements, civic and other amenities, medical, educational and cultural facilities, trade, industry, commerce and banking facilities, population by religion, Scheduled Castes and Scheduled Tribes. The abbreviations used in the Directory have been explained separately.

(b) Part B contains for each village and town, the primary census data incorporating area, occupied residential houses, number of households, total population and its break-up by sex, Scheduled Caste and Scheduled Tribe population, literate population and working population by nine broad categories.

(c) Part C will mainly incorporate the administrative statistics pertaining to the district in all the fields of development. The other Census tables pertaining to the district regarding language, religion, migration etc., will also be reproduced. There will be a write-up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade.

Village Directory:

This is in the form of one statement. Important statistics for each village have been given under the main-head—Amenities and Land Use Data. Other information regarding nearest town with distance, market, staple food and places of religious, historical or archaeological interest have also been given in separate columns. The information regarding "Amenities" cover items like educational and medical institutions, power supply, drinking water,communications and post and telegraph. Under "Land use", the break-up of the total area of the village has been indicated under sub-heads forest, irrigated, unirrigated, cultivable waste and area not available for cultivation.

(a) There are 4,038 villages in the five tahsils of the district and the number of villages, tahsilwise, in 1961 and 1971 are as under:—

Sl.No.	Tahsil	1961	1971	Difference
1	2	3	4	5
1	Baloda Bazar	953	955	+2
2	Raipur	535	540	+5
3	Mahasamund	1,199	1,198	—1
4	Dhamtari	646	650	+4
5	Bindranawagarh	689	695	+6
	Total	**4,022**	**4,038**	**+16**

It may be seen that there has been an increase of sixteen villages in the district. The reasons for the increase are as below:

1. **Baloda Bazar Tahsil.**—Two villages, Nawadih (L.C. No. 42/1/638) and Bisanpur (L.C.No. 42/1/821), are new forest villages.

2. **Raipur Tahsil.**—Arang town of 1961 Census has been declassified and treated as a village in 1971 Census. The following four villages were not included in 1961 and have appeared in 1971 Census for the reasons stated below:—

1.	Dungania	L.C. No. 42/2/357
2.	Chirhuldih	L.C. No. 42/2/362
3.	Gudiyari	L.C. No. 42/2/366
4.	Fafadih	L. . No. 42/2/371

Owing to the fact that part of the area of Gudiyari and Fafadih villages (mostly "abadi" area) were included within the then municipal limits of Raipur, the two villages were left out from the list of villages in 1961. Since revenue areas of these villages still exist, they have reappeared in 1971 Census. As regards the other two villages viz. Dungania and Chirhuldih, the abadi areas were included in Raipur city as non-municipal urban areas in 1961 and therefore they were left out from the list of villages. They still exist as villages in the revenue records, although their abadi areas have again been treated as urban outgrowth of Raipur city in 1971. These other two villages have also been included in the list of villages in 1971. Thus there has been an increase of five villages in all in this tahsil.

3. **Mahasamund Tahsil.**—Village Saraipali (1961 L.C. No. 42/3/345) has been classified as a town in 1971 Census.

4. **Dhamtari Tahsil.**—Dhamtari village (1971 L.C. No. 42/4/204) is the revenue area of Dhamtari town. The following three villages are the new forest villages:—

(i)	Pipraud	L.C. No. 42/4/429
(ii)	Deogaon	L.C. No. 42/4/485
(iii)	Boirgaon	L.C. No. 42/4/584

5 **Bindranawagarh Tahsil.**—The following six villages are the new habitations in 1971 Census:—

(a)	Suklabhata	L.C.No. 42/5/501
(b)	Ghotiya Bharri	L.C.No. 42/5/505
(c)	Raksa Pathra	L.C.No. 42/5/520
(d)	Pipal Khuta	L.C.No. 42/5/530
(e)	Budgel Tappa (F.V.)	L.C.No. 42/5/694
(f)	Kalimati (F.V.)	L.C.No. 42/5/695

The distribution of the villages with reference to their area in acres is as shown in the inset table below:—

Area (in acres)	No. of villages
1	2
50 acres or less	77
51— 100	35
101— 200	101
201— 500	768
501— 1,000	1,495
1,001— 2,000	1,178
2,001— 5,000	258
5,001 acres and above	7
Area not available	119
Total	**4,038**

Area of 119 villages is not available and, therefore, they have not been considered in this note while discussing data regarding area. Such villages are mainly located in Baloda Bazar, Mahasamund, Dhamtari and Bindranawagarh tahsils. The reasons for the non-availability of data regarding area for such a large number of villages are briefly as below:—

(i) About 96 per cent of such villages are forest villages.

(ii) About 4 per cent of such villages are uninhabited villages and as such the area figures could not be furnished by the tahsildars.

Village Sinharpur Tukada (L. C. No. 42/3/269) in Mahasamund tahsil has the smallest area of 1.00 acres and is located at a distance of 52.8 kms. from the nearest town, Saraipali, while village Saliha (L. C. No. 42/1/691) in Baloda Bazar tahsil has the largest area of 6,931.00 acres in the district and is located at a distance of 46.4 kms. from the nearest town, Sarangarh, in Raigarh district.

Out of 3,919 villages for which area figures are available, 768 villages are in the area range of 201–500 acres, while 1,495 and 1,178 villages are in the range of 501-1,000, and 1,001-2,000 acres, respectively. Only 7 villages are in the area range of 5,001 acres and above.

Maximum villages in all the tahsils, except Raipur tahsil, come within the area range of 501–1,000 acres, while in Raipur tahsil they come within the area range of 1,001–2,000 acres, as will be seen from the following table containing tahsilwise data:—

Area (in acres)	Baloda Bazar	Raipur	Mahasamund	Dhamtari	Bindranawagarh	Total

(b) Educational amenities.—The total number of villages having various educational facilities, within various distance ranges from the nearest town, are as indicated in the inset table below:—

Distance from nearest town	Total No. of villages	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 kms. or less	164	83	18	1	1	1

Total	**4,038**	**1,717**	**292**	**49**	**4**	**2**

Maximum number of villages (1,539) lie within the distance range of 26–50 kms. and maximum number of villages having primary and middle schools also lie within this range, while maximum number of villages having high/higher secondary schools lie within the range of 16–25 kms. The number of educational institutions in the villages of different tahsils is given below :—

Sl. No.	Tahsil	Number of educational institutions				
		Higher Secondary/ High School	Middle ol	Primary School	College	Others

4	Rudri	Dhamtari	42/2/236	Dhamtari (3.2)	Polytechnic

* The habitation of Lalpur is generally known as Bagbahera owing to the fact that Bagbahera Rly. Station is situated in the revenue area of Lalpur. Bagbahera is an adjacent revenue village.)

(c) Medical facilities:--The availability of medical facilities, per 100 sq. kms. and, tahsilwise, is as given in the following inset table :--

Sl. No.	Tahsil	Total area (in sq. kms.)	No. of medical institutions of any kind per 100 sq.kms.
1	2	3	4
1	Baloda Bazar	3,662.31	0.9
2	Raipur	2,853.04	1.3
3	Mahasamund	3,676.04	0.9
4	Dhamtari	2,100.00	2.0
5	Bindranawagarh	2,808.75	0.6

The above table will show that the villages of Dhamtari tahsil have, comparatively, greater medical facilities per 100 sq. kms. The number of medical institutions, tahsilwise, is as indicated below:—

Sl.No.	Name of tahsil	No. of Medical Institutions
1	2	3
1	Baloda Bazar	32
2	Raipur	38
3	Mahasamund	32
4	Dhamtari	43
5	Bindranawagarh	17
	Total	162

About 27 per cent of the medical institutions in the rural areas of the district are in the villages of Dhamtari tahsil followed by Raipur tahsil where the percentage is about 23. Bindranawagarh has only about 1 per cent institutions in the district.

(d) Power supply.—The number of villages having electric power supply within various distance ranges from the nearest town are as indicated in the inset table below :--

Distance from the nearest town	Total No. of villages	No. of villages with electric power supply
1	2	3
5 kms. or less	164	29
6—10 kms.	262	36
11—15 kms.	393	34
16—25 kms.	879	58
26—50 kms.	1,539	43
51—100 kms.	728	15
101—200 kms.	70	..
201 kms. and above	3	..
Total	4,038	215

It would be seen that only about 5 per cent of the total number of villages have electricity and all of them are in the distance range up to 100 kms. from the nearest town. The number of villages having electric power supply, tahsilwise, is as below:—

Sl. No.	Tahsil	Total No. of villages	Villages having electric power supply	Percentage of villages having electric power supply
1	2	3	4	5
1	Baloda Bazar	955	40	4.19
2	Raipur	540	43	7.96
3	Mahasamund	1,198	65	5.43
4	Dhamtari	650	42	6.46
5	Bindranawagarh	695	25	3.60
	Total	4,038	215	5.32

The percentage of villages (about 5) having electric power supply in the district is lower than the State average (about 7). Within the district, villages of Raipur tahsil have, comparatively, more of this facility, while in other tahsils the percentage of villages having electric power supply ranges from about 4 to 6.

(*e*) *Communications.*-The total number of villages and the number of villages connected by different types of communications, falling in different distance ranges from the nearest town, are indicated in the inset table below:—

Distance from the nearest town	Total No. of villages	Number of villages connected by				
		Pucca road	Kutcha road	Pucca road & rail	Kutcha road & rail	Others
1	2	3	4	5	6	7
5 kms. or less	164	80	31	12	1	1
6 — 10 kms.	262	103	47	3	..	1
11 — 15 kms.	393	134	66	6	..	8
16 — 25 kms.	879	278	133	8	..	11
26 — 50 kms.	1,539	339	393	3	..	5
51 — 100 kms.	728	125	213	2	..	..
101 — 200 kms.	70	5	17	..	..	..
201 kms. and above	3	..	..	..	..	..
Total	4,038	**1,064**	**900**	**34**	**1**	**26**

About 27 per cent of the villages are served by "pucca" road. Out of 4,038 villages in the district, 1,999 villages are served by either "pucca" or "kutcha" roads. The number of villages served by "pucca" roads, tahsilwise, and the total number of villages with percentage covered are as below:-

Sl. No.	Tahsil	Total No. of villages	No. of villages having "pucca" road	Percentage
1	2	3	4	5
1	Baloda Bazar	955	177	18.53
2	Raipur	540	161	29.81
3	Mahasamund	1,198	548	45.74
4	Dhamtari	650	125	19.23
5	Bindranawagarh	695	87	12.52
	Total	**4,038**	**1,098**	**27.19**

(*f*) *Post and telegraph.*— The total number of villages in the tahsils of the district having post offices and telegraph offices and telephone facility are given below:--

Sl. No.	Name of tahsil	Total No. of villages	No. of villages having post offices	No. of villages having telegraph offices	No. of villages having telephone

4	Dhamtari	2,100.00	2.0 (2.05)
5	Bindranawagarh	2,808.75	0.7

Comparatively, rural areas of Bindranawagarh tahsil have less postal facility. Only ten villages have telegraph facility and twelve villages have telephone facility in the district. The names and particulars of these villages are as under:—

Sl. No.	Tahsil	Name of village having telegraph office		Name of village having telephone		Remarks

(*g*) *Staple food.*—Rice constitutes staple food in bulk of the villages of all the tahsils. Wheat constitutes staple food in few villages of Bindranawagarh tahsil, while Kodo constitutes staple food in few villages of Baloda Bazar and Mahasamund tahsil.

(h) Land use pattern.— (i) According to the village papers, about 13 per cent of the area in the district is under forest. The percentage of the forest area, tahsilwise, is as indicated below:-

Sl.No.	Tahsil	Percentage
1	2	3
1	Baloda Bazar	8.98
2	Raipur	0.79
3	Mahasamund	12.72
4	Dhamtari	10.20
5	Bindranawagarh	34.48

It may be noticed that, comparatively, less forest area is in Raipur tahsil, while about 35 per cent of the area of Bindranawagarh tahsil is under forest.

(ii) The net cropped area in the year 1969 increased by 10.17 per cent as compared to the area in 1960-61. The percentage of the area under irrigation to area under crops during the years 1960-61 and 1968-69 comes to 16.93 and 21.21, respectively. The area under irrigation during this period increased by 65.29 per cent.

(iii) The following inset table shows the percentage of average cultivated waste per village in

different distance ranges from the nearest town :—

Distance	Number of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 kms. or less	164	119,315.00	727.53	24,704.00	150.63	20.70
6 —10 kms.	262	195,023.00	744.36	39,383.00	150.32	20.19
11 —15 kms.	393	311,108.81	791.63	56,111.00	142.78	18.04
16 —25 kms.	877	629,116.00	717.35	121,002.00	137.97	19.23
26 —50 kms.	1,505	840,015.11	558.15	172,396.06	114.55	20.52
51 —100 kms.	660	282,714.50	428.36	76,750.78	116.29	27.15
101 —200 kms.	55	8,959,00	162.89	13,673.00	248.60	152.62
201 kms. & above	3	236.00	78.67	302.00	100.67	127.92
Area not available	119	..	..	..	..	..
Total	**4,038**	**2,386,487.42**	..	**504,321.84**	..	..

Ordinarily, the nearer a village to an urban area, the lesser is the proportion of cultivable waste, but the above inset table does not show a consistent trend in this regard and there is some deviation in the distance ranges 6-10 kms., 11-15 kms. and 201 kms. and above.

In the whole district, 504,322 acres (in round figures) of land has been classified as cultivable waste which constitutes about 14 per cent of the total area of the villages in the district. The table below indicated the percentage of cultivable waste in each tahsil:—

Sl.No.	Name of tahsil	Percentage of cultivable waste
1	2	3
1	Baloda Bazar	12.31
2	Raipur	18.19
3	Mahasamund	10.69
4	Dhamtari	12.47
5	Bindranawagarh	14.82
	Total	**12.95**

It would be seen that, comparatively, the percentage of cultivable waste in Mahasamund tahsil, is less (about 11 per cent) while it is maximum in Raipur tahsil (about 18 per cent).

Town Directory :

This is in the form of Seven Statements. But before discussing the information collected in the Seven Statements, it would be better to first understand certain concepts which determines urban areas.

(i) **Definition of town** :—A 'town' in the 1961 - Census was either--(i) a Municipality, Cantonment or Corporation; or (ii) a habitation with a population of at least 5,000, with atleast three-fourths of the adult male population engaged in non-agricultural pursuits. Accordingly there were 219 towns in the State. However, seven towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75% or more. But the list already finalised was not changed subsequently; the reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as Municipalities and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than what was already present. In the 1971 Census there was no

material change in the concept of town and a list of 247 towns was prepared originally. Three more towns were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and ultimately 250 towns were recognised in the State. All areas which are not towns have been included in th : list of villages.

(ii) Urban Agglomeration :

The concept of Urban Agglomeration has been adopted for the 1971 Census with the intention to present the population data in the District Census Handbook in respect of urban areas in such a manner that *'de-facto* urban agglomeration' is a recognisable entity, data pertaining to which will be the sum of the data of not only the *de-jure* (within Municipal/other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factual and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

(iii) Standard Urban Area :

This new concept has been developed for the 1971 Census and the essentials of a Standard Urban Area are:--

(1) It should have a core town of a minimum population size of 50,000.

(2) The contiguous areas made up of other urban as well as rural administrative units should have close socio-economic links with the core town, and.

(3) The probabilities are that this entire area will get fully urbanised in a period of two to three decades. This concept has been developed to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture.

The Seven Statements ;

Very useful data regarding the towns have been given in the statements and they have been collected and compiled from various agencies and official publications. The source and period of the information has been indicated below each Statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data compiled and presented throws sufficient light on the present stage of progress in each town.

(i) *Statement No. I.*--This statement presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status of the town indicates the authority incharge of its administration. Thus a town could have a Municipal Corporation, a Municipality, a Cantonment Board, a Gram Panchayat, a Notified Area Committee, etc.

(ii) *Statement No. II.*--This statement contains information regarding location (latitude and longitude), annual rainfall, temperature, distance from the nearest city with population of 1 lac or more and State, District and Tahsil headquarters. Distances from Railway Station and Bus route have also been indicated.

(iii) *Statement No. III* .-This statement contains information regarding receipt and expenditure of local bodies under different main heads indicating the indebtedness and general financial position and expenditure on public utility works. The information has been furnished for the years 1968-69, 1969-70 and 1970-71 in order to have an idea whether the concerned urban body is improving financially or not.

(iv) *Statement No. IV.*– This statement contains information regarding amenities, *e. g.*, road length, sewerage system, types of latrines, water supply, fire-fighting service, etc. in the different towns.

(v) *Statement No. V.*– This statement contains information regarding various important facilities available in the town viz., medical, educational, recreational and cultural.

(vi) *Statement No. VI.*– This statement throws light on the business and credit facilities commanded by the towns and contains information regarding trade, commerce, industry and banking.

(vii) *Statement No. VII.*– This statement contains data regarding population by religion and Scheduled Castes/ Scheduled Tribes with male / female break-up for the year 1971. This is the only statement based on 1971 Census figures.

Towns :

There are five tahsils and 8 towns in Raipur district as indicated below :--

Sl. No.	Tahsil	Town	L.C.No.	Class
1	2	3	4	5
1	Baloda Bazar	(i)Baloda Bazar	42/II	V
		(ii)Bhatapara	42/1	III

		(ii)Saraipali	42/IV	V
4	Dhamtari	(i)Dhamtari	42/VIII	III
5	Bindranawagarh	Nil	..	..

Out of 8 towns in the district 3 are located in Raipur tahsil, while there are two towns each in Baloda Bazar and Mahasamund tahsils. Bindranawagarh tahsil is entirely rural and has no town in it. Raipur is the headquarter of the district and division and continues to be recognised as a town since 1901. The only other town which continues to be a town since 1901 is Dhamtari. Bhatapara was recognised as a town in 1921, while all other towns except Saraipali, were recognised as towns for the first time in 1961. Saraipali has been recognised as a town in 1971.

The following are the urban agglomerations and Standard Urban Area in the district and their component units are mentioned in the table below:—

Statement I .—(i) The category of town administration in 1970 has been indicated in column 5 of the statement. Dhamtari, Bhatapara and Mahasamund have municipalities, while Raipur has municipal corporation. Gobra Nawapara, Newara, Baloda Bazar and Saraipali have gram panchayats. The population of the towns have, by and large, shown constant increase in every decade since their continued recognition as towns except as indicated below :-

Sl. No.	Name of town	Decade population		Reduction in population
		Year	population	
1	2	3	4	5
1	Dhamtari	1921	12,721	
		1931	11,505	1,216
2	Newara	1961	5,636	
		1971	4,634	1,002

During the decade 1921-1931 Dhamtari town decreased in population due to Cholera and influenza.* The fall in population in 1961–71 in Newara town may be due to the migration of population to the rapidly growing industrial complexes in and around Raipur city.

(ii) Column 14 of the statement shows the functional classification of the towns in 1961 as indicated in the following inset table :-

Functional category	Total No. of towns
1	2
Primary Activities -*cum*-Services	1
Industry-*cum*-Primary Activities-*cum*-Services	1
Industry-*cum*-Primary Activities-*cum*-Commerce	1
Industry-*cum*-Services-*cum*-Trade & Commerce	1
Industry-*cum*-Services-*cum*-Primary Activities	1

Services-*cum*-Industry-*cum*-Trade & Commerce	1
Total	7

The above table is in respect of only seven towns

*Census of India 1931, Volume XII, Central Provinces and Berar, Part I, Report p. 50.

as Saraipali has been recognised as town in 1971 Census.

The method adopted for the functional classification is elucidated below :—

The nine industrial categories were grouped into the following five functional characteristics:-

(i) Primary Activities (Comprising Category I-Cultivation, II—Agricultural Labourer and III—Mining and Quarrying, Fishing, Livestock, Hunting, etc).

(ii) Industrial (Comprising Category IV--Household Industry, V--Manufacturing other than Household Industry and VI-Construction).

(iii) Commercial (Comprising Category VII—Trade and Commerce).

(iv) Transport (Comprising Category VIII—Transport, Storage and Communications).

(v) Services (Comprising Category IX—Other services).

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 per cent of the total workers, the town was designated by that function. In case no single characteristic claimed 40 per cent of the workers, two predominant characteristics together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 percent of the total workers, the first three characteristics were taken to represent the town.

Statement II -The Physical and locational aspects as in 1969 have been covered. The district is divided into two more or less distinctly marked tracts by the Mahanadi which flows through the district from south west to the north east. The country to the west of the Mahanadi constitutes a part of the open Chhattisgarh plain, thickly populated and closely cultivated. The character of the open country lying to the east of the Mahanadi is different. This trans-Mahanadi area is the hilly and wooded part of the district.*

The climate of the district is, in general, warm and humid. Poorly wooded areas, the closeness of rocks to the surface and red gravelly soil make the heat in summer excessive in the northern and central parts of the district, the area in the south and east are not as hot because of *sal* forests. Winter months are not very cold in the plains but the forest areas are much cooler.**

The temperature data of Raipur city has been indicated for all the towns except Dhamtari, Baloda Bazar and Mahasamund. Substituted data for the towns as indicated above have been mentioned because the data for such towns is not available and the rainfall and temperature are more or less similar to the towns the data concerning which hava been substituted. The towns get annual rainfall of about 1339. m.m. to 1550 m.m. The range of maximum and minimum temperature of the towns is from 32.6°C to 21.2°C. The temperature data is based on daily average temperature.

All the towns are on bus route. All the towns. except Newara, Baloda Bazar and Saraipali, are connected by railway. Tilda is the nearest railway station for Newara, while Bhatapara and Bagbahera are the nearest railway stations for Baloda Bazar and Saraipali, respectively. The district headquarters town, Raipur, is at a distance of 668 kms. by road from the State headquarters, Bhopal. Raipur, the district headquarters, is the nearest city by road from all the towns, while the nearest city for Raipur is Bhilainagar in Durg district.

Statement III.—On the basis of population in 1971 Census. the towns of the district have been categorised as below:—

Sl.No.	Name of town	Population	Class
1	2	3	4
1	Gobra Nawapara	10,787	IV
2	Dhamtari	34,546	III
3	Newara	4,634	VI
4	Baloda Bazar	9,449	V
5	Bhatapara	20,980	III
6	Mahasamund	17,480	IV
7	Raipur	174,518	I
8	Saraipali	5, 768	V

*Census of India, 1961, District Census Handbook, Raipur District, P. xxxix.

** Census of India, 1961, District Census Handbook, Raipur District, P. xli.

The statement would show that the total expenditure is within the total recepits of the local bodies, except in the following cases:--

Sl. No.	Local body in the town of	Year of excess expenditure	Total receipt	Total expenditure	Amount by which the expenditure is more than the receipt	Percentage of excess expenditure to total receipt
1	2	3	4	5	6	7
1	Gobra Nawapara	1970—71	49,800	80,900	31,100	62.45
2	Dhamtari	1968—69	1,164,800	1,216,000	51,200	4.40
3	Newara	1968—69	10,600	11,000	400	3.77
4	Bhatapara	1968—69	502,700	567,500	64,800	12.89
		1969—70	528,700	538,400	9,700	1.83
5	Mahasamund	1969—70	156,600	159,500	2,900	1.85
6	Raipur	1968—69	5,418,900	6,011,500	592,600	10.94
		1969—70	5,785,800	5,880,000	94,200	1.63
7	Saraipali	1970—71	12,700	14,200	1,500	11.81

Column 7 of the above table would show that the percentage of excess expenditure to total receipts of the local bodies of Gobra Nawapara and Raipur for the year 1968-69 and Saraipali for the year 1970-71 is noticeably high. This is mainly due to substantial expenditure under heads connected with public utility works and general administration.

Receipt through taxes etc., have also shown, by and large, an upward trend during these years except in the following cases:—

S. No.	Name of town	Year	Extent of shortfall in receipt through taxes, etc.
1	2	3	4
1	Gobra Nawapara	1969—70	1,200
2	Dhamtari	1970—71	34,500
3	Newara	1969—70	5,100
4	Mahasamund	1970—71	5,200
5	Saraipali	1970—71	2,500

The above table would show that the receipts through taxes, etc. of Dhamtari town for the year 1970-71 has gone down considerably as compared to the previous year.

The total receipts of the local bodies have, by and large, shown an upward trend except in the following cases:—

S. No.	Local body in the town of	Year
1	2	3
1	Gobra Nawapara	1970—71
2	Saraipali	1969—70
		1970—71

Government grants have substantially supplemented the receipts of the local bodies of Dhamtari, Bhatapara, Mahasamund and Raipur Loans have been obtained by the local bodies of Baloda Bazar, Bhatapara, Mahasamund, Raipur and Saraipali.

The per capita receipt and expenditure under broad heads is as indicated in the inset table below:—

Class of town	No. of towns	Year	Per capita (in Rupees) RECEIPT: Total Receipt	Receipt through taxes, etc.	Receipt from all other sources	EXPENDITURE: Total Expenditure	Expediture on public health conveniences	Expenditure on public institutions	Expenditure on all other aspects

The above table would show that the total per capita receipt matches fairly well with the total per capita expenditure and in a few cases the total per capita expenditure is higher than the total per capita receipt. The per capita expenditure on public health and conveniences against per capita receipts through taxes etc., by and large, is encouraging. In a good number of cases, the expenditure of the local bodies shown in column 15 of the statement No. III under head 'Others' constitutes quite a high percentage of the total expenditure.

Statement IV.- All the towns have electricity. Electric connections have also been given for industrial purposes in all the towns. Street lights have been provided in all the towns. Water supply through taps is available in Gobra-Nawapara, Bhatapara, and Raipur towns. Fire brigade facility is available in Raipur town only,

Statement V.—(*i*) *Medical facilities:*- Hospital facility is available in Gobra-Nawapara, Dhamtari and Raipur towns. There is a family planning Clinic, T. B. Clinic and a dispensary also at Raipur. Dhamtari has also a family planning clinic. Baloda Bazar, Bhatapara, Mahasamund and Saraipali have only primary health centres. There is no medical facility in Newara town. The number of beds per thousand population is as indicated in the inset table below :—

Total No. of beds in medical institutions	No. of beds per thousand population
1	2
524	1.9

(*ii*) *Educational facilities.*— Dhamtari, Baloda Bazar, Bhatapara and Mahasamund have one Arts and Commerce College each, while Dhamtari has one combined college also. Raipur has maximum number of educational institutions in the district and the following deserve particular mention:—

(1)	Arts and Commerce Colleges	4
(2)	Science College	1
(3)	Sanskrit College	1
(4)	Music College	1
(5)	Post Graduate Basic Training College	1
(6)	Medical College	1
(7)	Ayurvedic College	1
(8)	Engineering College	1
(9)	University	1
(10)	Higher Secondary Schools	25

There is an Agriculture college located in village Jora (L. C. No. 42/2/383) at a distance of 8 kms. from Raipur town. Higher Secondary/High schools are located in all the towns. The number of higher secondary / high schools, middle schools and primary schools per thousand population is as shown in the following inset table. For a more realistic appreciation, the population in the age-group 0-14 has been considered for primary and middle schools, while population in the age-group 15-19 has been considered for higher secondary/high schools.

Sl. No.	Name of town	Number per 1000 population		
		Higher Secondary or Secondary	Middle / Junior Secondary	Primary
1	2	3	4	5
1	Baloda Bazar	2.1	0.2	0.7

PRIMARY CENSUS ABSTRACT

PART X(B)

EXPLANATORY NOTE

I. General :

In Part A, the picture of the district as revealed by non-Census data has been discussed. In this note, the progress made by the district in the 1961-71 decade would be dealt with on the basis of information collected in the individual slip that was canvassed in the 1971 Census. Broadly speaking, the changes that have come about in the matter of total population, its growth-rate and density, sex-ratio, literacy, Scheduled Castes and Scheduled Tribes, working population, occupied residential houses and number of households has been discussed.

II. Population :

The population of Raipur district is 2,613,531 while the population of Madhya Pradesh is 41,654,119. The population of Raipur district, thus comes to 6.27 percent of the State population. The rural population is about 87.56 percent of the district population whereas the urban population is 12.44 percent as against the State percentage of 16.29. In other words, the district is rural in character. Highest percentage of the district population is found in Raipur tahsil (about 29 per cent) and one of the reasons for this is that the population of the district headquarters town, Raipur City, is included in this tahsil. Raipur district ranks first among the 43 districts of the State in population. During the decade 1961-71, the district population growth rate has been 30.55 against the State growth rate of 28.67. The area of the district is 21,251 sq. km. In other words, it has 4.80 percent of the State area and ranks third in area among the districts of the State. The density of population per sq. km. of the district is 123 (122.9)against the State density of 94 and the district ranks tenth in density in the State. The sex-ratio, number of females per 1,000 males, of the district and the State is 1010 and 941, respectively. Tahsil Raipur has got sex-ratio lower while the remaining four tahsils have sex-ratio, higher than the district sex-ratio.

III. Literacy :

(1) The percentage of literacy in the district comes to about 24 as against the State literacy percentage of about 22. In 1961 also, the literacy percentage of the district (18.49) was higher than the State percentage of 17.13. The district has made some progress to increase the rate of literacy during the decade 1961-71.

(2) The literacy percentage among the males in the district (36.69) is higher than the State percentage of (about 33). Among females also, the literacy percentage in the district (10.96) is slightly higher than the State percentage of (10.92).

(3) Among the tahsils, Raipur tahsil has the highest literacy percentage of (about 31),while Bindranawagarh tahsil has the lowest percentage of(about17) .

(4) The same pattern is seen in male and female literacy in the tahsils. Among males, Raipur tahsil is at the top (44 percent), while Bindranawagarh tahsil with about 28 percent comes last. Among females also, Raipur tahsil leads in literacy (about 18 percent), while Bindranawagarh tahsil with 5.85 percent comes last.

IV. Workers :

In the district, about 42 per cent of the population comes under the category of workers (main activity) against the State

percentage of about 37. The percentage of female workers to total female population (about 30) is higher than the State percentage (about 19). Within the district,comparatively greater percentage of workers (males and females) have been returned from Dhamtari tahsil. Raipur tahsil has returned the lowest percentage of workers (36.89). Among female workers, Dhamtari tahsil with (39.46) percent leads other tahsils of the district, while Mahasamund tahsil with (24.26) percent comes last. Among the workers in the district, about 52 and 32 per cent are cultivators and agricultural labourers, respectively, as against the State percentage of about 53 and 27. Under the category "Other workers" the district percentage (16.25) is lower than the State percentage of 20.58. Among females the district percentage of agricultural labourers (about 42) and other workers (about 8) is lower than the State percentage of about 49 and 10 respectively, while for cultivators the district percentage (about 50) is higher than the State percentage (about 41). Comparatively, highest percentage of cultivators(about 62)has been returned from Baloda-Bazar tahsil, while Bindranawagarh tahsil has returned highest percentage of agricultural labourers. Lowest percentage of cultivators (about 47) and agricultural labourers (about 28) have been returned from Raipur and Baloda Bazar tahsils, respectively.

V. Scheduled Castes and Scheduled Tribes :

The percentage of Scheduled Castes to total population of the district (about 14) is higher than the State percentage (about 13). The percentage of Scheduled Tribes to total population of the district (about 15) is less than the State percentage (about 20). Highest percentage (about 20) of Scheduled Castes is in Baloda-Bazar tahsil, while lowest percentage (7.42) is in Dhamtari tahsil. As regards Scheduled Tribes, only Mahasamund, Dhamtari and Bindranawagarh tahsils come within the ambit of Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. The percentage of Scheduled Tribes in these tahsils about 29, 28 and 37 respectively.

VI. Occupied Residential Census Houses :

The district has 465,645 occupied residential Census houses against the State figure of 6,822,767 which comes to 6.82 percent. During 1961, there were 417,662 occupied residential Census houses in the district against the State figure of 6,230,854 which came to 6.70 percent. There has been very slight change in the percentage during the decade. The number of households and persons per occupied residential Census house in 1961 and 1971 are indicated below:—

State/ Distt.	Year	No. of Residential Census Houses	No. of Households	No. of households per occupied residential Census House	No. of persons per residentia Census House
1	2	3	4	5	6
State	1961	6,230,854	6,615,580	1.06	5.2
District	1961	417,662	438,415	1.04	4.79
State	1971	6,822,767	7,740,289	1.13	6.1
District	1971	465,645	521,850	1.12	5.61

It would thus be seen that the pressure on occupied residential Census houses has increased during the decade in the district as well as in the State. Comparatively, Raipur tahsil (with about 27 percent) claims the highest percentage of occupied residential Census houses in the district.

VII. Villages and Towns :

There are 4,038 villages in Raipur district which comes to 5.24 percent of total villages in the State. The percentage of inhabited villages to total villages in the district is 95.47 against the State percentage of about 92. There are 250 towns in the State out of which the district claims eight:—Raipur, Gobra Nawapara, Newara, Bhatapara, Baloda-Bazar, Mahasamund, Saraipali and Dhamtari.
