STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(*ii*) *Household Economic Tables*:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random-start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other metallic furaterials	670
	Retail trading in hardware and and papers	671
	Retail trading in wood, bamboo and glass utensils atches	672
	Retai in trading in other building mater	673
68	Retail trading in agricultural and indust furs machinery equipment, tools and appliances	680
	Retaitrarading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	**999**

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers

1 *Administrative, Executive and Managerial Workers*

0X3 Librarians, Archivists and Related *Workers*:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—

- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—

- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—

- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—

- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—

- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—

- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—

- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—

- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—

- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

9 *Service, Sports and Recreation Workers.*

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

By

K. C. DUBEY

Deputy Superintendent of Census Operations, Madhya Pradesh

Raipur, the second largest district in the State in respect of population and the third largest in area, is situated in the south-eastern part of Madhya Pradesh between latitudes 19°50′, and 21°53′N and longitudes 81°25′ and 83°38′ E. The greatest length of the district from north to south is about 143 miles and the greatest width is 108 miles. The area of the district according to the figures furnished by Surveyor General of India is 8,214 sq. miles or 21,274 sq. kilometers whereas according to the figures furnished by the State Survey Department, the area of the district is 8,213.6 sq. miles or 21,273.2 sq. kilometers. Raipur district thus is one of the two districts in the State in respect of which the area figures furnished by the two sources tally.

The area of the district as mentioned in the earlier Censuses would be found to be varying. Till 1906 Raipur was the largest district in the erstwhile Central Provinces and in the Census of 1901 its area has been shown as 11,724 sq. miles. In 1906, when Durg district was newly constituted, the western portion of Raipur district, as it then was, with an area of 3,444 sq. miles, was transferred to the new district of Durg and at the same time an area of 706 sq. miles was transferred to Raipur district from Bilaspur district, the Seonath and the Mahanadi becoming the boundaries of Raipur district. In 1931, the area of the district is shown as 9,717 sq. miles but in 1936 an area of 1,432 sq. miles was transferred to the "New Province" of Orissa. The area of the district in 1941 and 1951 is shown as 8,205 sq. miles. The difference between this figure and the one now furnished by Surveyor General is due to improvements in surveying.

The district is bounded on the north by Bilaspur and Raigarh districts, in the east by Kalahandi and Sambalpur districts of Orissa State, in the south by Koraput district of Orissa State and by Bastar district and in the west by Durg district.

Internal Changes in 1951-61:

Prior to the abolition of proprietory rights in 1951, the district was divided into two portions the *Khalsa* and the *Zamindari*; after the abolition, the *zamindari* areas also came under the administrative control of the Government. Upto 1953, the district was divided into four tahsils-Baloda Bazar, Raipur, Dhamtari and Mahasamund. The last named tahsil was too large a unit having an area of 3,762 sq. miles and 1,673 villages (1951 Census) and it was therefore split up into the present Mahasamund and Bindranawagarh tahsils. Bindranawagarh was thus created a "New tahsil" in 1953 by taking out 668 villages (area 758.29 sq. miles) from Mahasamund tahsil and 21 villages (area 53.22 sq. miles) from Dhamtari tahsil. The other two tahsils-Raipur and Baloda Bazar-have remained unchanged.

Tansils, Villages and Towns:

There are now 5 tahsils in Raipur district, the largest of these in area being Mahasamund tahsil. Some basic statistics of these tahsils are given on page 2.

These statistics would show that even after being split up, Mahasamund is the biggest tahsil both in area and in number of villages. Bindranawagarh tahsil, with the exception of Raipur, has the least number of inhabited villages and has the least density of population in the district. A large part of this tahsil is covered by hills and forests.

According to the 1961 Census, there are 8 towns in the district-Raipur (139,792), Dhamtari (31,552) Bhatapara (16,930) , Mahasamund (10,624), Arang (8,469), Baloda Bazar (7,108), Newara (5,636) and Gobra-Nawapara (8,037). Of these, Mahasamund, Gobra-Nawapara, Baloda Bazar and Newara have been treated as towns for the first time in 1961 : there were 4 towns in the district in 1951.

Name of the tahsil	Area in		Area in Sq.Km.		No. of villages		Towns

Raipur, the headquarters of the district and of the division, is situated on 21°14′ and 81°39′ E and is a junction on the Howrah-Bombay railway line, being 513 miles from Howrah. The town is believed to have existed since the 9th Century, the old site being to the west of the present town and extending upto the river. The most ancient building here is the fort said to have been constructed in 1460 A. D. but of which only traces remain. An inscription dated 1401 A. D. was found on one of the walls and a copy of it was made by Colonel Agnew during the time he was Superintendent in this area during 1818-30:* Unfortunately no record of it exists now.

Raipur was made the headquarters of Chhattisgarh Division in 1818 and subsequently it was also the headquarters of the Political Agent of the Chhattisgarh Feudatory States. The bungalow which the Collector now occupies was the residence of this Agent. Half a battalion of Infantry was also stationed here until 1902 and the area now known as Byron Bazar came up sometime during this period; the office building now occupied by the Superintending Engineer, PWD (Irrigation) was being used as a military hospital in those days. This building nas been largely remodelled but still traces of the old hospital architecture remain.

It is recorded that Shri Narendra Nath Dutta, who later became known to the world as Swami Vivekananda, had passed two years of his childhood in this town in 1877-79 and lived somewhere in the area known asBurha Para. Raipur town has also the

* Report on the Land Revenue Settlement of the Raepore District, J.F.K. Hewitt, 1869, P. 15 .

proud privilege of having been the home of Late Pandit *Ravi Shankar Shukla, the first Chief Minister of the* State. It was here that Late Pandit Shukla started his political career and he and Dr. Hari Singh Gour, the eminent lawyer and founder of the University of Saugar used to practise law together. It is said that the offices of these two distinguished persons were somewhere in what is now known as Jawahar Market.

Except Gariaband, which is the headquarters of Bindranawagarh tahsil, all tahsil headquarters have been treated as towns in the present Census. Gariaband again is the only tahsil headquarters which is accessible with some difficulty during the rainy season: all others are connected with Raipur by all -weather roads.

Geology:

The greater part of the district is covered by what is known in Indian geology as the Cuddapah System. The junction of this system of rock-formations with formations older to it, is exposed to the east of the Mahanadi and runs almost parallel to it. The Cuddapah System is also exposed in the eastern part of the district in the area beyond Saraipali in Mahasamund tahsil and Gauragarh plateau and the area to the west of it in Bindranawagarh tahsil are comprised of Cuddapah rocks.

The Cuddapah System comprises two divisions the lower arenaceous division known as the Chandarpur Series consisting of quartizitic sandstone with a conglomerate at the base, and the upper calcareous division known as the Raipur Series consisting of purple shale and limestone. The Chandarpur Series is exposed only along the rim of the drainage basin of the Mahanadi whereas the formations consisting the Raipur Series are disposed almost horizontally usually covered by a superficial layer of alluvium or of laterite.

Thus the northern, north-western and eastern parts of the district are covered by the Cuddapah System. Rest of the area of the district is covered by older rocks-the Archaens and the Dharwars-which underlie the Cuddapahs. The stratified Dharwar rocks are exposed in the north-eastern part of the district around Sonakhan and Deori and in the area south of Bilaigarh. The Archaen rocks form the hill features in the east and south and consist of a massive gneiss and granites. These granites and gneiss are intersected by doleritic dykes which provide excellent road-metal.

The limestone of Raipur Series is kilned near Raipur town. Apart from this no other economic minerals are found in the district though in sandstone formations on the Gauragarh plateau between Bindranawagarh tahsil and Orissa State, some localised pockets of iron ore are found. This ore is neither extensive nor rich enough to be of any economic value and is only sometimes worked by indigenous blacksmiths.

Geography:

The district is divided into two more or less distinctly-marked tracts by the Mahanadi which flows through the district from the south-west to the north-east. This river rises in the Sihawa hills in the south of Dhamtari tahsil and, according to local legend, its source is on the top of the Sring-rishi hill. The river then flows eastwards into Kanker tahsil of Bastar district and making a curve re-enters Raipur district near Dhamtari. It then pursues a north-easterly course till the Seonath joins it on the Raipur-Bilaspur border. The country to the west of the Mahanadi comprising about half of Baloda Bazar tahsil, the whole of Raipur tahsil and a small area of Dhamtari tahsil, constitutes a part of the open Chhattisgarh plain, thickly populated and closely cultivated.

The character of the open country lying to the east of the Mahanadi is different. This trans-Mahanadi area is the hilly and wooded part of the district. Black soil is rare here and yellow and red soils prevail. The open country in the trans-Mahanadi region consists of a strip along the Mahanadi in Dhamtari tahsil, Rajim tract in Bindranawagarh tahsil, Kasdol tract in Baloda Bazar tahsil and another strip of country in Baloda Bazar tahsil in the south of the Mahanadi through Bilaigarh, Bhatgaon and Sarsiwa. Behind this open tract rises a block of hills and forests.

The principal tributaries of the Mahanadi are the Pairi and the Jonk. The former rises in the Bhatigarh hills of the Bindranawagarh tahsil and, making a curved course which has given it the name '*Pairi*' (an ornament worn in the leg), it flows northwards and joins the Mahanadi at Rajim. Itself it is joined by another river-the Sondhur-near village Baruka on Raipur-Gariaband road. The Jonk rises in the hills of Khariar in Orissa State and flowing northwards enters Raipur District and then drains its waters into

the Mahanadi at Seorinarayan. River Kharun flows 6 miles to the west of Raipur town forming the boundary between the districts of Raipur and Durg for some distance; it drains its waters into the Seonath.

The general character of these rivers is that they flow to the north and turn to the east on the northern border of the district. There are two eastwards flowing rivers in the district-the Udanti and the Tel. Both of these drain the southern regions of Bindranawagarh tahsil. The Tel rises in the Jeypore region of Orissa State and flows eastwards; it constitutes the boundary between this district and Orissa State. The Udanti is a very fast-flowing hilly river rising in the south of the district and flows eastwards crossing into Orissa State.

The character of the Mahanadi and the rivers in the eastern part of the district is somewhat different from that of the Seonath and its tributaries. The latter rivers generally flow over a rocky or gravelly bottom and consequently retain water for the whole or a greater part of the year whereas the bed of the rivers in the east is sandy and these get dried up in the summer.

The south and south-eastern parts of the district are hilly and some of the noteworthy hill features are the Sring-rishi and Angira-rishi of Dhamtari Tahsil where the Sages Sring and Angira are said to have performed penance and Atang (2,678′), Milcowa, Deodongar (3,048′) and Malewa in Bindranawagarh, tahsil. The highest point in the district is the top of Deodongar hill. There are some good waterfalls in the district in the vicinity of these hills; the most famous and well-known of these is the Deodarha fall in Bindranawagarh tahsil where the waters of the Indrawan debouch from a height of 45′ Further east in Bindranawagarh tahsil are the Ranira fall (250′) the Kolab fall and the Patai fall. The last-named fall is on the Pairi and with the Deodarha, provides good fishing ponds.

The plain country is gently undulating having an elevation of about 1,000 feet : this is exactly the height of Raipur town. Arang is situated at 908 feet, Mahasamund at 989 feet and Tilda at 945 feet.

Soils :

The local soil-terminology in the district is as follows:-

Kanhar,	*Bhata*,
Dorsa,	*Pal Kachhar*,
Matasi,	*Patpar Kachhar and Kap*

The soils in the Sihawa tract where the geological foundations are the granites and gneisses are also known by these names which prevail in other areas of the district. Genetically speaking, this would not be quite correct since the soils in the central and northern parts of the district are derived from the weathering of limestone and sandstone. These names have, however, been adopted by the Settlement officers and have come to stay.

The *Kanhar* is a black clay which is very retentive of moisture. As it is apt to suffer from water-logging, it is a good soil for wheat but not for paddy. It is, however, capable of growing a second crop and, from that point of view, is certainly the most valuable soil in the district. The *Matasi* is a yellow soil, not retentive of moisture, but with heavy rainfall, giving a far better outturn of paddy than any other soil. The *Matasi* can not grow a second crop and when unembanked is fit for little more than *Kodon* and requires long resting fallows. There are several kinds of *Matasi* depending upon their genesis : the best is derived from sandstone and the worst is nothing but the washed-out portions of the *Bhata*. The best *Matasi* is known as *Dudhiya* because of its milky appearance. The *Dorsa* is a mixture of *Kanhar* and *Matasi* as the name itself suggests (*Do* means two and *rasa* means extracts). It is a good soil for paddy but gives only a moderate outturn of wheat or second crop.

The *Bhata* is a poor detritus of laterite, red in colour and containing numerous little pebbles. It does not have much consistency and hardly retains any moisture. With a heavy rainfall, a crop of *Kodon* can be grown over this but otherwise it is the poorest soil in the district. The *Pal Kachhar* is a rich brown silt found on the banks of rivers and large streams and is an excellent soil for garden crops Another alluvial soil is *Patpar Kachhar* : the land by the side of big streams and rivers which has been partly spoilt by sand. It is a good soil for garden crops if facilities for irrigation are available. *Kap* is the name of silt in the backwaters of the Mahanadi and is a very fertile soil. When *Kanhar* and *dorsa* contain limestone, they are known as *Ghurri*. The soil containing a lot of pebbles and stones is known as *Gotarri*. The soil around Dhamtari is locally known as *Lapkaha*.

Positions are of great importance in the paddy areas and the terms prevalent in the district may be described here. The *Bahara* is the land down which

the water flows i.e. it is the hollowest part of the land receiving drainage from three sides. The *Baharas* are originally difficult to prepare because the stream has got to be bunded and the ground filled in. But once ready, crops in *bahara* fields are excellent. The tribes of Bindranawagarh look only for suitable *bahara* lands in the forests for cultivation. The term for small *baharas* is *Nar*. The *Gabhar* is flat land and the *Tangar* is slopy land. *Tikra* is the term given to high ground difficult to cultivate. Two other terms are common in the district-*Dhanha* and *Bharri*. The *Dhanhas* are fields which are exclusively used for sowing paddy and are embanked whereas the *Bharri* are unembanked fields-not fit for paddy cultivation.

Climate and Rainfall:

The climate of Raipur district is, in general, warm and humid. Poorly wooded areas, the closeness of rocks to the surface and the red gravelly soil make the heat in summer excessive in the northern and central parts of the district; the areas in the south and east are not as hot because of *Sal* forests. Winter months are not very cold in the plains but the forest areas are much cooler.

Raipur is one of the 36 meteorological stations in the State. The observatory, located on the top of the Commissioner's Office, was opened in 1870. The average maximum and minimum temperature recorded in May and December during 1955-61 are :-

Year	*May* (In centigrade)	*December*
1955- Max.	41.1	26.3
Min.	28.4	13.0
1956- Max.	41.1	27.4
Min.	29.1	14.2
1957- Max.	41.7	28.9
Min.	28.8	15.0
1958- Max.	41.9	27.1
Min.	29.6	14.1
1959- Max.	42.8	27.3
Min.	29.8	12.8
1960 Max.	42.8	28.7
Min.	29.1	14.2
1961- Max.	41.5	25.3
Min.	28.3	11.5

Seen from the temperature-records for the last 7 years, December and May appear to be the coldest and hottest months respectively.

The district falls in the heavy rainfall belt of the State and the average annual rainfall is 55" on the average. In the southern and south-eastern parts of the district the rainfall is usually copious owing to the neighbouring forests. The tract around Simga often suffers from scarcity of rainfall.

The rainy season is spread over 4 months—June, July, August and September and July is usually the rainiest month. October also has 1 to 2 inches of rain but the next 3 months—November to January—have only an inch of rain and the remaining four months have about 2 inches in all. It may be of some interest here to reproduce the observations of Carey:

"I divide the year into four epochs, as when analysed in this manner the effect produced by the rainfall on the agriculture of the district is better portrayed. The first epoch includes the months of June, July and August, during which time the ploughing, sowing, *biasi* or thinning and weeding operations of the autumn crops take place, as well as the preparation of land for the spring crop. As a rule during these months the rainfall is amply sufficient, the tahsil averages ranging between 31 and 37 inches. The second period includes the months of September and October, and upon the rainfall of this epoch hang great issues. If September and October are rainless, the rice crop proves a failure not only on all the high-lying lands, but also on the *matasi* slopes. Many fields so situated are not worth reaping, or as the Chhattisgarhi cultivator would say '*hassia ne phiris*' (the sickle was not plied).———A further disadvantage of deficient rainfall during these months is that the *ol* or moisture of the unembanked lands which dries up under the scorching rays of a monsoon sun and the spring sowings of linseed and wheat fail to germinate or wither are they reach the surface. A deficient rainfall then in September and October, however, favourable may have been the previous season, means a bad autumn and a bad spring crop. On the other hand, adequate rain in these months ensures the succees of both crops. The third epoch, the rainfall of which is locally termed *akaras ke pani*, includes the months of November, December and January, which affects, of course, only the spring crops. The absolute necessity of any rain in this epoch depends not only upon the character of the monsoon and the rainfall of September and October, but also upon the dews which fall nightly. But there can be no doubt that an

inch of rain at Christmas time is a great boon to the cultivator, though he may argue that as much harm is done thereby to linseed as good to wheat. The benefits of this rainfall are, however, unequally distributed. One field which has germinated will be benefitted thereby; a second which is not yet sown will be so moistened as to enable a crop to grow; a third, however, which is but recently sown will suffer damage. The seed will be washed out or rotted and a second sowing will be necessitated.....The fourth epoch includes that period of the year during which rain does more harm than good. The only good rain does in this season is to soften the soil and thus enable it to be ploughed up and exposed to the beneficial action of the sun and wind in the hot weather."

Flora:

It is the eastern, south-eastern and southern regions of the district that contain good forest. This forest has been divided into three administrative divisions for purposes of control and silviculture: The South Raipur Forest Division comprising the forest of Dhamtari tahsil, the East Raipur Forest Division comprising the ex-zamindari forest of Bindranawagarh tahsil and the North Raipur Forest Division comprising the forests of Mahasamund and Baloda Bazar tahsils. Of these, the forest in the South Raipur Division is a very well-controlled one and may well claim to be one of the best forests in the State. In the central, north-western and extreme south-eastern regions of the district, the areas are completely denuded of trees.

It is in the South Raipur Forest Division that one may study the relationship between geology and forest. The rocks here are granites and gneisses on the one hand and quartzitic sandstone on the other; the latter overlying the former. It would be seen that the boundary between the outcrops of the granites and gneisses and the sandstone is also the boundary between the *Sal* forest and the mixed forest. It appears that the granites and gneisses are preferentially selected by the *Sal* (*Shorea robusta*) for its growth.

The preponderant tree in the forest is *Sal* (*Shorea robusta*) and in some regions as on the foot of Gauragarh plateau beyond village Sikasar in Bindranawagarh tahsil, the density of *Sal* is very high. A *Sal* forest is a delightful sight early in March at the commencement of hot weather when the tall, straight trees come into leaf and flower, the deep red of the young leaves being very striking in conjunction with the bright cool green of their neighbours. Accompanying the *sal* in the forests are the usual species: *Saja* or *Saj* (*Terminalia tomentosa*), *Kauha* (*T. arjuna*) or the waterside companion of *Saja*, *Bija* or *Bijasal* (*Ptero carpus marsupium*,), *Dhawra* (*Anogeissus latifolia*), *Bahera* (*T. belerica*), *Harra* (*T. chebula*), *Lendia* (*Lagerstroemia parviflora*), *Tinsa* (*Ougeinia dalbergioides*) and *Salai* (*Boswellia serrata*). Other common trees in the forests are *Tendu* (*Diospyros melanoxylon*), *Mahua* (*Bassia latifolia*), *Karra* (*Cleistanthus collinus*). *Char* (*Buchnania latifolia*), *Bhira* (*Chloroxylon swietenia*), *Haldu* (*Adina cordifolia*) and *Aonla* (*Phyllanthus emblica*). Bamboo is found mostly in Bindranawagarh forset.

There are teak plantations now in all the forest divisions but along the Sondhur river *Sal* associates with teak as a natural growth. This is probably the only place in India where these two species are found together. Till sometime back some fine teak trees existed along the eastern border of the north and south Sihawa ranges and in the south of Bindranawagarh in the locality known as Sahibin Kachhar beyond village Nagesh.

In the plains the common trees are *Babul* (*Acacia arabica*), *Renja* (*A. leucophloea*), *Palas*(*Butea frondosa*) and *Sirsa* (*Albizzia lebbek*) and in the areas adjoining the villages are found the common trees like *Pipal* (*Ficus religiosa*), *Bar* or *Bargad* (*F. bengalensis*), *Nim* (*Melia indica*), *Jamun* (*Eugenia jambolana*), *Munga* (*Moringa pterygosperma*), Tamarind (*Tamarindus indica*) and mango (*Mangifera indica*). Of trees confined to road sides and seldom found elsewhere may be mentioned *Siris* or *Sirsa* (*Albizzia lebbek*)and *Karanj* (*Pongamia glabra.*)

Funna:

The carnivorous animals found in the district are tiger (*Felis tigris*), tendua (*F. pardus*), wolf known as hundra (*Canis pallipes*) and hyaena (*Hyaena striata*). The tigers and panthers are very much less now than what they were two decades ago. Except one tiger in Bindranawagarh tahsil in 1958-59, there has been no report in recent years of man-eaters. Bison (*Gavaeus gaurus*) and wild buffalo (*Bubalus arni*) were formerly very common in the south-eastern

forest but they are becoming rarer now though they may still be seen around Taurenga and Indagaon in Bindranawagarh tahsil.

The black-faced monkey (*Semnopithecus entellus*) is found in all parts of the district but the red-faced monkey (*Macarus rhesus*) is not found. Jackal (*Canis aurens*) is very common and the fox (*Vulpes bengalensis*) is found in all open parts of the district. Bears (*Melursus ursinus*) are found in the forest in the south and east.

Other animals found in the forest areas in the south and east are—the *Nilgai* locally known as *ronjna* (*Portax pictus*), the barking deer (*Cervulus muntjac*), the spotted deer (*C. axis*), the Swamp deer (*C. duvauceli*) known as *gauni* and *Sambhar* (*C. unicolor*). The wild dog (*Cyon dukhunensis*) is found in the forests and is very destructive to game.

Rivers, tanks and ponds of the district contain numerous kinds of fish, the local names, of some of which may be mentioned here—

Large variety—*Parhan, Rechha, Rehu, Bausin, Pariyans, Kalant, Munda, Kaunchhi, Kotra, Silan, Sawal* and *Kusra*.

Small variety—*Singan* or *Kewai, Mongri, Karijenwa, Sauri, Tengna, Gunjwari, Kotri, Bam, Mohrali, Gurda, Phalia, Galaj* and *Kokya*.

The Deodarha and Patai waterfalls in Bindranawagarh Tahsil contain large-sized Mahseers locally known as *Kosar*. These fish of the rivers and tanks in the plains are caught by members of the Kewat caste; in the tribal areas, the tribes catch fish by poisioning the water and shooting them with their bows and arrows.

The cattle of the district are in general poor in build. As mentioned in the District Gazetteer, 1909, "The Chhattisgarhi bullock is the smallest and weakest in the province." There is scarcity of milk throughout the district. The cattle seem to be more kept for cattle-dung than for milk for the dung is very much valued not only as field manure but also as fuel in the form of dung-cakes (*chhena*). The Gazetteer also mentions that in 1907-08 the number of cows in the district was the highest in the erstwhile province. The Livestock Census, 1961, also shows that the number in the district of cows in milk (170, 044), total cattle (1,396,765) and total bovines i.e., cattles and buffalos (1,682,495) was the highest in the State.

The poor breed of the cattle appears to be due both to the indiffernce of cultivators and to the scarcity of grazing grunds. Stall feeding worth the name is almost unknown and the cattle live on whatever grass is available to them and on the paddy—straw (*paira*). As an article of cattle-food paddy-straw is very much inferior to wheat and juar straw and dependence of the cattle on this diet only may account to a large extent for their susceptibility to disease.

For ploughing, the cultivators prefer buffalos to bullocks because, as they say, the buffalos are able to stand the dampness of the country better. Large numbers of buffalos are brought every year from the northern districts of the State by cattle-traders—the Basdevas and the Banjaras.

The names of common diseases of the cattle are—*mata* (Rinderpest), *Chhai* or *Chitbojh* (gloss anthrax), *lohadia* or *ghatsarp* (anthrax) and *Sarsa, Chapka* and *Khuri* (foot and mouth disease).

History:

In mythology, this area can be traced back to the days of Arjuna and Krishna of the days of the *Mahabharata* and it is said that King Moraddhwaj had his seat in the place known now as Arang. This story is found in the *Jaimininya Ashwamedha* and it is said that Tamraddhwaj, the son of Moraddhwaj had caught hold of the horse left by Arjuna. There is some difference of opinion on this point and some people consider that Moraddhwaj ruled at Ratanpur (in Bilaspur District) and not at Arang. Be that as it may, the name Arang means 'saw over body' (*Ara* meaning saw and *ang* meaning body) and, according to this tradition, Moraddhwaj had got his body sawn by his wife and son in fulfilment of a promise he had made to Krishna.

What is now known as Chhattisgarh was known in early history as Dakshina Koshla or Mahakoshala and the Aryans, at the time of, or subsequent to the Mahabharata, had a kingdom established here. Nothing, however, is known either of their rule or as to when the administration passed from their hands to the Guptas. Samudra Gupta of the Gupta dynasty conquered this area in the middle of the 4th Century

and the Gupta rule continued till about the 6th Century. Who were the immediate successors of the Guptas is not known but when the famous Chinese traveller Hien Tsiang visited Maha Koshala in 639 A.D., a Buddhist King was ruling here. The parent line of this kingdom was probably at Bhandak in Chanda District (now in Maharashtra) and the headquarters of the Maha Koshala branch was at Sirpur. The reign of this dynasty seems to have continued upto the 8th or 9th century though the later kings changed over from Buddhism to Saivism as is indicated from the various records of Mahasiva Gupta who also built a number of temples dedicated to Siva.

Very little is known of the dynasty of kings who ousted the Guptas. Neither the inscriptions of the Sirpur dynasty (i.e., the Guptas) nor of their successors are dated but the characters in which they are written belong to the 8th and 9th centuries A.D. and the change over may have come during this period at the end of which the Haihayas came on the scene and conquered Chhattisgarh for themselves.

The Haihayas rose to power in this area in the 10th century as the Ratanpur inscription dated 1114 A.D. indicates. Of these Ratan Deo founded the town of Ratanpur (which is now only a village in Bilaspur district). A junior branch of the Ratanpur dynasty established themselves at Raipur. Raipur town was founded by Rai Brahma Deo of this junior branch.

In 1741 the Maratha General, Bhaskar Pant, while on his way to attack Bengal, defeated and annexed the kingdom of Ratanpur but Amar Singh, the Haihaya Chief of Raipur, was not disturbed by the Marathas immediately; he was quietly ousted in 1750 and the *parganas* of Raipur, Rajim and Patan were given to him for maintainence. These too were annexed by the Marathas on the death of Amar Singh in 1753. From this date to 1818 the territory in which the present Raipur district is also situated, was under the Government of the Marathas. The Maratha administration was of a very oppressive type, their sole aim being to extract the maximum amount of revenue from the people. The revenue of each village was altered every year and there were internal disturbances. The wild tribes raided and looted the inhabitants of the plains in the north. To quote Colonel Agnew: the country presented "one uniform scene of plunder and oppression uninfluenced by any consideration but that of collecting by whatever means the largest amount of revenue possible."

In 1757, Bimbaji assumed control of the Maratha administration in Nagpur and he restored some order and tranquility in this area by strong military rule. After his death in 1787, his widow managed the affairs of the State with the help of one Vitthal Deokar. It was this officer who introduced the system of *Pargana* accounts on the village system. After his time, the government seems to have decayed into anarchy and the raids of the wild tribes again assumed threatening proportions. In 1818, when the British took over the management after Appaji's rebellion, the Zamindar of Sonakhan had annexed some 300 villages and the Binjhwar raiders had rendered the northern parts of the district almost uninhabitable.

On the assumption of control of this area by the British, Captain Edmonds was the first officer to be put in charge. He, however, died a few months after his arrival and was succeeded by Colonel Agnew. The name of this officer was still remembered in 1867 when Hewitt carried on his settlement operations in the district; he ruled the country justly and firmly. He forced the Zamindar of Sonakhan to disgorge his gains, established law and order in the area and introduced many reforms in the land-revenue system. He retained the system of annual settlements, but reduced the number of *parganas* from 27 to 9.

The British protectorate continued from 1818 till 1830, when Chhattisgarh, along with other territories was handed back to the Marathas as the Raja had attained majority. The reforms introduced by Colonel Agnew were retained by the Marathas and the revenue continued to expand. During 24 years i.e., from 1830-54, Chhattisgarh was governed by the *subahs* who resided at Raipur and subordinate to whom were *Kamaishdars* or sub-collectors in each *pargana* or cluster of *taluks*. On the lapse of the Nagpur province in 1854, Chhattisgarh with the rest of Bhonsla territoies came under British rule. At this time Raipur was a big district in area and in 1856 was divided into 2 tahsils viz. Raipur and Dhamtari. In 1857 Durg was made a tahsil and in 1861 Bilaspur was separated from Raipur. In 1863 a fourth tahsil—Simga—was added to Raipur. This continued till 1906 when Durg was constituted a separate district by taking away the Durg tahsil and portions of Dhamtari and Simga. The remaining area was divided into 4 tahsils as before by creating a new tahsil—Mahasamund and at the same time Simga tahsil was abolished

and a new one—Baloda Bazar — was formed from portions of the old Simga tahsil and tracts from Bilaspur district transferred to Raipur district.

During 1857, this area was almost undisturbed. A section of the small military force at Raipur was mutinous and insubordinate but open outbreak was prevented. The Zamindar of Sonakhan—Narayan Singh--who was in jail at the time of the Rising, effected his escape and returning to his territory openly defied the British, but he ultimately surrendered and was executed.

The earliest revenue settlement of Chhattisgarh under British rule were triennial and the successive assessments were made in 1855-57, 1858-60 and 1861-62. In 1864, J.F.K. Hewitt started a regular settlement which was for 20 years. Subsequent settlements were made by Carey, Hemmingway and Deshmukh. It may be recalled here that the last named officer was later to become Finance Minister of the Indian Union. The office building where he worked during his tenure as settlement officer is located in Gandhi Chowk in Raipur town and the temporary structure that he got erected for the staff is now used as a middle school building. The arm-less chair on which he used to sit while writing his Report could be seen lying in the Land Records Office till 1955.

Archaeology:

Places of archaeological importance in the district are Sirpur, Arang, Rajim, Fingeshwar, Dhamtari, Sihawa, Deokut and Khalari. More important of these being Sirpur, Arang and Rajim. These places contain both Buddhistic and Hindu ruins, Arang being conspicuous for its Jain remains. Most of the Sirpur sculpture and beautiful pillars were removed to distant places such as Rajim and Dhamtari. Most of the temples at Sirpur were constructed in brick of a very old type before the 9th century. An archaeological excavation recently made at Sirpur has unearthed conclusive evidence of a glorious past. In Rajim, the temple of Rajiva Lochan is a Vishnuite shrine apparently first built about the 8th or 9th century but subsequently rebuilt in the middle of the 12th century.

Some of the famous inscriptions found in the district are the Arang plates of Bhimsena (601 A.D.), Rajim plates of Tiravadeva, Sirpur, Gandheshwar Deo temple inscription of Siva Gupta, Sirpur Laxman Deo temple inscription of Maha Siva Gupta, Arang plates of Maha Jaya Raja (8-9 century), Raipur plates of Maha Sudeva Raja (8-9 century), Rajim inscription of Jagapaldeo (1145 A.D.), Khalari inscription of the reign of Hari Brahmadeo (1415 A.D.), Raipur inscription of Brahma Deva (1402 A.D.), Arang inscription of Amar Singh Deva (1735 A.D.) and Sihawa inscription of Karna Raja (1191-92 A.D.). Some illegible or unimportant inscriptions have also been found at Arang, Sirpur, Turturiya, Rajim, Deokut Kandadongar and Murmura. In one of the Raipur inscriptions dated 1402 A.D. the name of Raipur appears as Rayapura.

The Population and the People:

In 1901 the population of Raipur District, as it is now constituted, was 974,953. Since then it has been steadily increasing notwithstanding the influenza epidemic that raged in 1918. The percentage decade variations of the district population are given below: for comparison State and Division figures are also given:—

	1901-11	1911-21	1921-31	1931-41	1941-51	1951-61
Madhya Pradesh	+15.30	—1.38	+11.39	+12.34	+8.67	+24.17
Raipur Division	+21.89	—0.15	+11.54	+12.95	+8.61	+25.26
Raipur District	+20.21	+6·07	+ 9.94	+10.98	+٩.13	+22.07

The population increase of 20.21% (197,023 persons) during the decade 1901-11 was to a large extent due to immigration. A large number of persons had emigrated in the famine period preceding the count of 1901 and during 1901-11, there was a substantial return of these emigrants as well as some additional immigration in connection with the railway construction and the expansion of trade in the urban areas of the district. In 1911 Census, the increase in population was more marked in the remoter and less

densely populated tracts (Census, 1911; Vol. X Pt.I. pp 42-43). During the decade 1911-21, there was an increase in the district population by 6.07% whereas the State and division figures registered a decrease. The Census Report of 1921 has the following to say regarding the district : "During the present decade there was an annual excess of births over deaths, ranging from 14,000 to 27,000, until the influenza epidemic of 1918, when there were 101,909 reported deaths as against 59,291 births. In 1919, the birth-rate fell by about 25 per cent, and as the epidemic had not yet spread to the more distant portions of the district, by the end of the previous year deaths again reached the high figure of 73,047 with scarcity conditions prevailing, in 1920 the death-rate was still high and births were slightly in deficit. There was in the decade an increase of 82,000 in the deduced population while the increase in the actual population was some 5,000 more" (Census, 1921, Vol. XI, Pt. I, p.22).

In the decades 1921-31, 1931-41 and 1941-51 the increases in the district population were 123,516, 150,005 and 123,320 persons respectively and the percentage decade variations were, more or less, on par with the State and division figures.In 1951-61 also the population increase in the district is on a par with the State and division figures. The percentage variation of population of the district during 1901-61 has been as follows:

+105.34	—	Total
+ 91.32	—	Rural
+377.66	—	Urban

Density of Composition :

The density of population i.e., number of persons per square mile, for the district as a whole is 244. For rural and urban areas separately the densities are found to be 217 and 6,259 respectively. It may be remembered here that the total density has been calculated on the basis of the figures of Surveyor-General, urban density is based on area figures collected by the Census Organisation and the rural density is calculated on the basis of the difference between Surveyor General's figures for the district and urban area figures collected by the Census Organisation.

Age and Sex Composition

The age and sex structure of population of the district is presented in the table below; corresponding data for the State is also given for comparison:—

Distribution of 100 persons of all ages into age-groups by sex

Age Group	Percentage of population in the age-group					
	Raipur District			M. P. State		
	P	M	F	P	M	F
0-4	14.8	14.8	14.7	16.4	16.0	16.7
5-9	14.2	14.1	14.3	14.3	14.2	14.4
10-14	9.5	10.4	8.7	10.1	10.7	9.5
0-14	**38.5**	**39.3**	**37.7**	**40.8**	**40.9**	**40.6**
15-19	7.2	7.3	7.1	7.9	8.0	7.8
20-24	8.3	7.7	8.9	8.6	8.1	9.1
25-29	9.2	9.5	9.0	8.8	8.9	8.7
30-39	7.7	8.0	7.4	7.3	7.6	7.1
15-39	**32.4**	**32.5**	**32.4**	**32.6**	**32.6**	**32.7**
35-39	6.3	6.7	6.0	5.8	6.0	5.6
40-44	5.4	5.3	5.4	5.3	5.3	5.3
45-49	4.8	4.9	4.6	4.2	4.4	4.1
50-54	4.1	4.2	4.1	4.0	4.1	3.9
55-59	2.4	2.2	2.5	2.1	2.1	2.0
35-59	**23.0**	**23.3**	**22.6**	**21.4**	**21.9**	**20.9**
60-64	2.6	2.2	2.9	2.4	2.2	2.5
65-69	1.1	0.9	1.4	0.9	0.9	1.0
70+	2.4	1.8	3.0	1.8	1.5	2.2
60+	**6.1**	**4.9**	**7.3**	**5.1**	**4.6**	**5.7**
Age not Stated	0.0	0.0	0.0	0.1	0.0	0.1

The age data given above are based on ungraduated ages and though the quinquennial groupings adopted suppress to some extent the distorting effects of age-heapings at multiples of 5, still the data is not fit enough to permit analysis by quinquennial age-groups unless corrected or smoothed. It would, therefore, be safer to confine the scrutiny to the broad age-group 0-14, 15-34, 35-59 and 60+ which may also be roughly described as children, young persons, middle-aged persons and old persons.

As in case of the State, in Raipur District too, the proportion of children (i.e., 0-14 years) is the greatest, though as compared to the State figure, the proportion is low by 2 per 100. The next age-group or young persons (15-34 years) have the same proportion in the district as in the State but the proportion of middle aged persons is higher by 2 persons per 100 in the district as compared to the State as a

whole and out of every 100 persons, the district has one person more in the age-group 60+ than their proportion in the State. In other words, as compared to the State figures, the proportion of children is less and the proportion of higher age-groups i.e., 35-59 and 60+ is more.

Despite the lower proportion as compared to the State, children (0-14 years) have the maximum proportion in the age-group distribution of the district population and roughly speaking, 2 out of every 5 persons in the district are children below 14 years. It may also be seen that 7 out of every 10 persons in the district belong to age-group 0-34 years and 87.4% of the population of the district is below 50 years of age. It may thus be said that,like the State,the population of the district also is *youthful* and is likely to be a growing one.

Changes in Age-distribution since 1951

Changes in the age-composition of a population, if measured satisfactorily, provide indications of the likely trends of its growth. In the table-inset below is shown the percentage distribution of 100 persons in the district into broad age-groups in 1951 and 1961; 1951 data is based on a 10% sample of the population and in making comparison with 1961 data an assumption has been made that the 1951 sample represented the universe:

Percentage distribution of 100 *persons in* 1951 *and* 1961 *into broad age-groups*

Age	1951			1961		
group	P	M	F	P	M	F
0-14	36.0	37.3	34.7	38.5	39.3	37.7
15-34	34.0	31.9	36.0	32.4	32.5	32.4
35-64	26-6	27.8	25.4	25-6	25.5	25.5
65+	3.3	2.9	3.8	3.5	2.7	4.4
Age not Stated	0.1	0.1	0.1	0.0	0.0	0.0

It may be seen from this table that in 1951, children and young persons were more equally balanced than in 1961: the proportion of children below 14 years of age has increased in 1961 whereas the proportion of young persons in the age-group 15-34 years has gone down. There is a decrease in the proportion of age-group 35-64 by 1 person per 100 but the proportion of old persons has remained more or less the same.

The increase in the proportion of age-group 0-14 years may suggest that the chances of survival of children have increased during the decade. It may also be seen from the above table that in the age-group 15-34 years, the proportion of males has increased in 1961 but that of females has decreased. This may be, to a large extent, due to urbanisation because urbanisation generally goes with a change in the sex-ratio adversely to the females. Partly this may also be due to greater feminine mortality between these ages. Census of India 1961, Paper No. 1, has the following to say in this regard: "The deteriorating sex-ratio reflects on our social health, for it indicates that the risks to female lives at most ages has not improved upon that to male lives; on the contrary, it seems to emphasize that demographically we have not yet entered upon the modern industrial age with its compensatory characteristics of increased risks to males and reduced risks to female lives. Rather we seem to be on the reverse". (p. xvi) This feature is better brought out by sex-ratio described below.

Sex-ratio and Sex-distribution by age :

The changes in the proportion of sexes in the district during 1901-61 is shown below:-

	1961	1951	1941	1931	1921	1911	1901
Total Population	1,037	1,043	1,057	1,068	1,057	1,055	1,061
Rural	1,053	1,056	1,063	1,077	1,062	1,058	1,064
Urban	923	908	976	918	955	982	991

The general demographic pattern of the State is that the south and the south-eastern districts show a higher sex-ratio. Taking the total population Raipur has always (since 1901)been one of the 5 districts having the highest sex-ratio. From the above table it may be seen that the sex-ratio (i.e., number of females per 1,000 males) has decreased from 1,061 in 1901 to 1,037 in 1961 and that from 1931 onwards this decrease has been consistent. This may be, as already stated, a result of urbanisation : in the urban areas the sex-ratio has fallen from 991 in 1901 to 908 in 1951 and 923 in 1961.

The proportion of sexes in the different age-groups is shown in the following table:-

Age-group	No. of females per 1,000 males	
	Raipur District	M.P. State
0- 4	1,025	996
5- 9	1,051	966
10-14	875	847
0-14	**995**	**974**
15-19	1,002	929
20-24	1,198	1,069
25-29	977	939
30-34	972	897
15-39	**1,034**	**959**
35-39	928	878
40-44	1,067	950
45-49	979	886
50-54	1,009	908
55-59	1,151	903
35-59	**1,006**	**905**
60-64	1,371	1,080
65-69	1,620	1,157
70+	1,854	1,337
60+	**1,555**	**1,190**
Age not stated	1,127	898

It may be seen from this table that in the State, except in the age-group 20-24, masculine excess is the rule in all the age-groups below 60 years. In the district, there is a deviation from the State pattern : the proportion of females is much higher in the age-groups 0-4, 5-9, 15-19, 40-44, 50-54 and 55-59. Lower sex-ratio in the age-groups 10-14, 25-29 and 30-34 in the district corresponds with the state pattern. In fact low sex-ratio in the age-group 10-14 years is a common pattern in practically all the districts and it is obviously due to mis-reporting of age in this age-group. What generally happens is that unmarried girls in this age-group are reported to be below 10 years and those who are married are reported to be over 14 years. Low sex ratio in the age-group 25-39 , which is the child-bearing age, may be due to femine mortality but it is difficult to hazard a definite conclusion.

Religion :

Hindus are most numerous in the district constituting 97.21% of the population. Followers of other religions are Muslims 1.56%, Christians 0.58%, Jains 0.28%, Sikhs 0.21%, Buddhists 0.06% and followers of other religions 0.10%

Mother-tongue :

There are in all 91 languages/dialects spoken as mother-tongue in the district. Most common among them are Chhattisgarhi (54.06%), Hindi (31.6%), Oriya (8.83%), Sindhi (0.99%) and Marathi (0.78%). The figures given in brackets represent the percentage of speakers in each mother-tongue to the total population.

Chhattisgarhi, which is the main mother-tongue, is regarded as a dialect of Eastern Hindi and in about 1909 was the mother-tongue of about 85 percent of the population. The present figure of 54.06% shows its displacement by Hindi. Dr. Grierson considers that the Eastern Hindi of Chhattisgarh found its way through Jabalpur and Mandla, being introduced by the Aryans who originally settled here and owing to its geographical isolation the dialect developed its peculiarities.

Some of the very common characteristics of Chhattisgarhi, as spoken in the district, may be noted here. The termination of the past tense is, *is* as *Kahis* (said), *Maris* (struck, beat) *Sois* (slept). In Chhattisgarhi, as in all the Eastern Hindi dialects, the use of *O* instead of *e* for the genitive of the personal pronouns is seen as in *mor* (my) tor (yours) and in *mola* (me) *tola* (you). Another peculiarity is the formation of the plural by adding *man* as in *laika man* (boys) *tumhar man* (plural you). In declension the following post positions are added to the noun which remains unchanged; *ta* (for) *bar* (for) *le, se* (by, from), *ke* (of) *ma* (in). Chhattisgarhi is not a difficult dialect to speak and can be easily learnt.

Scheduled Castes and Scheduled Tribes :

Enumeration of the scheduled castes and scheduled tribes in 1961 has been done strictly according to the *Scheduled Castes and Scheduled Tribes lists (Modification) Order*, 1956. As per this Order, 15 castes have been regarded to be the scheduled castes throughout the district. The population of these scheduled castes is 299,050 or 14.94% of the total population : the proportion of the scheduled castes in the tahsils is as below-Raipur 16.30%, Mahasamund 13.48%,

Baloda Bazar 21.24%, Dhamtari7.76% and Bindranawagarh 11.32%. According to the aforesaid order there are 32 scheduled tribes which are so scheduled only in Mahasamund, Dhamtari and Bindranawagarh tahsils. The population of these scheduled tribes in the district is 310,161 or 15.49% of the total population 15.49% and their proportion in the tahsils is Mahasamund (28.52%), Dhamtari (29.18%) and Bindranawagarh (37.88%). In some of the R.I. Circles in these tahsils the proportion of scheduled tribes is more than 50% i.e. Chhura R.I. circle of Bindranawagarh tahsil (55.14%), Gariaband R.I. circle of Bindranawagarh tahsil (62.06%) and Sihawa R. I. circle of Dhamtari tahsil (60.86%).

In 1951, the population of scheduled castes in the district was 255,536 or 15.58% of the total population and there were no scheduled tribes. It may be remembered that the 1951 enumeration was done according to the *Constitution (Scheduled Castes) and (Scheduled Tribes) Order*, 1950, and in making any comparison between 1951 and 1961 figures of the scheduled castes, note may be kept of the non-comparability of these figures because of additions of synonymous groups in the 1956 list. Some more details about this may be found in part V-A which contains special tables on scheduled castes and scheduled tribes.

The People:

Nothing definite can be said about the autochthones of the district. On the basis of culture, state of economy and tribal tradition. it appears that the Kamars living in the interior of Bindranawagarh,Dhamtari and Mahasamund tahsils are probably the earliest inhabitants of the district. The Bhunjias have often been regarded as equally old settlers of the district but their being later immigrants cannot be ruled out. The Gonds are more recent immigrants as compared to the Kamars and Bhunjias. The Chhattisgarhi Brahmins are of long standing in the district and, as tradition states,were brought from Kannauj by Kalyan Sai, the great Haihayvanshi Raja of the 16th century. The Maratha Brahmins settled in the district under the Bhonsla administration between 1750 and 1850. Some mention may be made here about the important castes and communities living in the district.

The Kamars are dismomically a very backward tribe living in the jungle and hill fastnesses in the south and south-eastern parts of the district. They are either landless or have uneconomic holdings and their mode of cultivation is primitive. A large number of them even now live by shooting and hunting and on roots and tubers. The tribe is generally divided into two territorial groups-the Paharpatiya or dwellers of the hills and Bundhrajiya or dwellers of the plains: these groups are, however,not endogamous. The tribe has exogamous septs called *got* which are totemistic in nature. The Kamars are a somewhat shy people and build their hutments away from the main village when they live with other castes and tribes. Some of the Kamar settlements that one may come across in the district are Jarandih, Narripani, Kamarama, Sihar and Chikhli in Bindranawagarh tahsil.

The Bhunjias mostly inhabit Bindranawagarh tahsil with small numbers of them in the eastern areas of Dhamtari tahsil. They are divided into two sub-tribes-the Chinda Bhunjias and the Choukhutia Bhunjias, the former are usually found in Gariaband and Deobhog R.I. circle of Bindranawagarh tahsil and the latter are mostly found in Chhura R.I. Circle of Bindranawagarh tahsil. Bhunjia villages worth a visit are Kodopali, Mahuabhata, Jangda, Jungad and Amad—all in Bindranawagarh tahsil.

Both the Kamars and Bhunjias speak dialects known after the names of the respective tribes. These dialects-Kamari and Bhunjia-have been regarded by Dr. Grierson to be broken forms of Marathi and sub-dialects of Halbi. The majority of these tribes are, however, bilingual now and speak and understand Chhattisgarhi. Men of both the tribes are expert shots with their bows and arrows and the Kamars of Mainpur patwari circle and the Bhunjias of Peeperchhedi patwari circle have killed even tigers and panthers with their arrows. Their fishing is done by poisioning the waters of ponds.

The Gonds are found everywhere in the district but are more concentrated in Bindranawagarh and Dhamtari tahsils. They are mostly of the Amath and Dhurwa clans. In the Shobha-Gona tract of Bindranawagarh tahsil, one may come across the Murias who are immigrants from Bastar. Other tribes living in the district are the Kanwars, the Binjhwars and the Halbas.

The castes living in the plain regions of the centre and north are the Kurmis, Telis, Rawats and Satnamis. The Kurmis are good agriculturists and prior to the Abolition of Proprietory Rights in 1951, they held a

good number of villages of the district in *malguzari* rights. They are mostly concentrated in the Dharsiwa-Simga-Palari tract. The Telis are also numerically an important caste. Their principal sub-castes are the Halias and Jharias, of whom the Halias (from *Hal* meaning plough) are considered to be good cultivators. The Telis have, in most cases, given up their traditional occupation of oil-pressing and have become purely cultivators. The Rawats who formed about 10 per cent of the population of the district in 1901, are the caste of cattle herdsmen, corresponding to the Ahirs elsewhere but here they have another very important function, being generally employed as household servants. They are the caste from whom everybody accepts water. The Kewats, whose traditional occupation is fishing, are now mostly agriculturists, grain-parchers and vegetable gardeners. The Pankas and Gandas are weavers by tradition and work as village-watchmen. The Gandas are mostly concentrated in Mahasamund and Bindranawagarh Tahsils and serve as village-musicians. During the marriage season they are very much in demand in the villages and during Diwali they are invited by the Rawats for being employed as the drummers in the Rawat dance. At this time, these Ganda musicians may be found coming to Raipur from as far as Deobhog (140 miles).

The Satnamis, a scheduled caste, are found mostly in the north and north-east of the district. They are the Chamars who have raised their social status by adopting the *Satnam panth* preached by Ghasidas in in the beginning of the 19th Century. The Satnamis originated as a religions sect but were successful in getting the status of a caste by 1927 or so. The Satnamis possess very sharp features and have, in general, a fair complexion. In the former days they used to go in large numbers to the tea-plantations and even now an appreciable number goes to Bihar to work in the factories there. They also work on road construction and on the doubling of railway lines. The *Guru* of the Satnami sect lives at Bhandar near Raipur.

The district has quite a good number of persons from the adjoining areas of Orissa State (mostly from Kalahandi) : these are mostly concentrated in the towns where they work as household servants. They are also employed in large numbers on rail and road construction works. The Displaced Persons from West Pakistan, whose number in 1951 was 11,994, are found throughout the district, large numbers of them having settled in Tilda, Newara and Raipur.

Social Life and Customs :

In spite of a higher female ratio in the population, women are sought after in marriage and the custom of bride-price prevails in almost all the tribes and castes of the district. The marital association in many castes (as among the Satnamis, Rawats and Pankas for instance)and in the tribes of the district is not stable and separation and divorce cases are quite a common feature. Equally common features are the remarriages and widow-remarriages with the result that the statistics do not show the real quantum of separated and widowed persons. A peculiar form of marriage, known as *Choori Bihav*, is very common and is a socially recognised form of marriage. It consists in the man offering bangles to the woman who accepts them and becomes his wife. The frequency of separation and of *choori* marriages is very high among the Rawats and Satnamis. Also, child-marriages are very common among these castes. The custom of Levirate, by which a widow is expected to marry the younger brother of her deceased husband, is in force and this has been held by some scholars to be reminiscence of polyandry. The marriage usually takes place at the bride's house, but occasionally the ceremony is performed at the bridegroom's house, the ritual being curtailed and expense reduced. This is called *Chhot Bihav* or inferior marriage.

A peculiar marriage-custom prevails among the Choukhutia Bhunjias. There is always a token pre-puberty marriage of the girl with an arrow. This marriage is known as *Kand-byah* and if a girl attains puperty before this token marriage is performed, she can not be married with rituals. Again, among the Choukhutia Bhunjias there is a custom of building the kitchen-hut separate from the main house and of dismantling it if some outsider enters it.

Among the tribes and in most of the castes in the rural areas, the disposal of the dead body is usually by burial though cremation is practised in some cases : for example, if the deceased was very old and has left a large family behind.

Very few villagers have any idea of what the population of their village is. Given time, every villager can give almost the exact number of houses or families in the village. The simple rule to arrive at a fair estimate the village population is to multiply the number of houses by 5. In the tribal areas where the size of family

is somewhat smaller, a reasonably correct guess can be made by multiplying the number of houses by 4.

Village names

Village names in Raipur District are derived from three, more probably from four, different languages-Hindi and Chhattisgarhi, Gondi, Uriya and Kamari and Bhunjia. In Raipur and Baloda Bazar tahsils a majority of names are Hindi and Chhattisgarhi in Dhamtari tahsil Hindi-Chhattisgarhi and Gondi, in Mahasamund tahsil Hindi-chhattisgarhi, Gondi and Uriya and in Bindranawagarh tahsil Hindi-Chhattisgarhi, Gondi, Uriya and Kamari-Bhunjia. There is an absence of Urdu names as this part of the country was never under muslim rule.

Hindi-Chhattisgarhi names usually end in *gaon* (as in Bhatgaon, Tumgaon, Nahargaon), *pur* (as in Bisrampur), *para* (as in Nawapara, Bhatapara), *dih* (as in Labhandih), *jhar* (as in Champajhar), *dabri* (as in Gaidabri) *tara* or *tarai* (Bhainsatara), *bod, sara, pani, aud, bhata, khuta* and *koni*. Of these, terminations *gaon para, dih pur*-mean village or hamlet, whereas *jhar, tara* or *tari, sara , bod, pani* and *aud* refer generally to water or to spring, pool, pond or tank. *Dongar* or *dongri, bhata, khar, khuta, kona or koni* refer to land-hilly, waste land, agricultural land and corner respectively.

Uriya names generally end in *guda, padar, basa,* (which all mean a hamlet), *jor* (brooklet), *munda* and *dand* (field embankment) and *bahal* (wet land). Some of the terminations like *pali, jhar* and *dongri* are common to Hindi and Uriya. It is somewhat difficult to distinguish Gondi names but those ending in *Kasa* meaning a spring usually belong to that language.The tendency of the Gonds is to avoid terminations as in Teka, Mongra, Hardi, but the exemple of their Hindu neighbours has induced them to borrow some terminations as in Rengadih (*Renga* meaning *ber* or wild plum). Many names in Bindranawagarh tahsil are probably derived from Kamari and Bhunjia dialects as Jungad, Jangda, Koiba and so on.

As usual a majority of names are derived from natural objects such as trees, animals, water-courses and hills, some examples may be given here-

On trees- Peeperchhedi, Bargaon, Kalmidadar, Boirdih, Semardih, Kouhapani and so on.

On Animals- Suarmar, Baghmar, Nahargaon, Kokdi, Koliha, Bhalukona, Hatband, Gawargaon and so on.

Water-courses- Puranapani, Barpani, Jampani and so on.

Other interesting names with past associations are Chorhadih, Chorbhatti and Thagpali (*chor* meaning thief). Names which are common to many villages are Deori and its variants Deopur, Deosundra; Khamaria and its variants Khamaridih, Khamargaon. Khaira from Khair (*Acacia catechu*), Parsada from *paras* or *Palas* (*Butea frondosa*) or from Gondi *paras* meaning gourd, Amlidih from tamarind, Nawagaon, Nawadih, Nawapara and Nawagarh meaning new village. A very interesting village name is found in Mahasamund Tahsil : it is Arbichgaon or R.B. Chapmen which was named after R.A.B. Chapman, Deputy Commissioner of Sambalpur district in which erstwhile Phuljhar *Zamindari* was then included.

Housing and Living Conditions :

There are now 417,662 (374,146 rural, 43,516 urban) houses in the district as against 328,307(304,781 rural, 23,526 urban) in 1951. The houses in the rural areas are built of mud and tiles or grass is used for roofing. One characteristic feature of these rural houses is that they are kept absolutely neat and clean by washing them with cattle-dung and a suspension of white or coloured clay in water. The outer walls of the houses are also kept well plastered and washed with clay.

It is not considered auspicious to have a big house and that may be the reason why the houses in the rural areas are so small. The rooms of the houses are generally known as *chhena-konia* or room for cow-dung cakes, *dheki-konia* or room for grinding and keeping corn and *mai-ghar* or main room.Every Chhattisgarhi family, however, poor, has at least two separate huts or two rooms in the house, one of which serves as a cooking and sleeping place and the other as a store house for grain or fuel. Practically all houses have a courtyard.

Sandstone and limestone are used as building stones in some areas as in Simga-Dharsiwa and Rajim-Nawapara tracts. The houses in the tribal areas in the east and south are constructed of thatch or of wattle

and mud. Keeping an outer verandah is not a common feature and the rooms open directly on the road. The houses in the rural areas are generally devoid of windows and these, wherever present, are very small. The doors are made of timber or in many cases of matted bamboo or interwoven branches.

Working force and Industrial Classification:

Out of the total population of the district, 1,145,942 persons are workers and 856,062 are non-workers : the respective proportions are 57.24 : 42.76. In other words, out of every 1,000 persons in the district 572 are 'workers' and 428 are 'non-workers'. The proportion of male workers to total male population of the district is 61.94% and of the female workers to total female population is 52.70%.

Out of the total workers, 82.80% are engaged in cultivation (61.38% as cultivators and 21.42% as agricultural labourers) which is the predominant economic pursuit in the district. The percentage distribution of workers in other Industrial Categories is-

III	IV	V	VI	VII	VIII	IX
2.49	3.81	1.71	0.76	2.36	0.89	5.18

As already indicated above, 52.70% of the female population of the district is economically active population. The role played by women in the economic activities is highlighted by the table inset below which shows the sex-ratio (i.e., females per 1,000 males) among the total population, total workers and each category of workers--

	Total population	Total workers	I	II	III	IV	V	VI	VII	VIII	IX
Total	1,037	883	1,017	959	305	895	271	280	312	74	581
Rural	1,053	940	1,020	955	290	918	340	334	579	11	620
Urban	923	390	870	1,546	457	786	247	221	178	62	525

Agriculture :

By far the most important crop in the district is paddy, which in 1960-61, occupied 79.1% of the net area sown. Other important crops are pulses, oilseeds and wheat which in 1960-61 occupied 34.11 per cent of the net cropped area. Perusal of the statistics shows that during 1951- 52 to 1960-61 there was an increase of 3.7% in the net area sown from 2,087,650 acres to 2,166,195 acres and a reduction in the area under fallow lands and culturable waste, though the figure for area sown more than once does not register any significant increase. The figures for area sown more than once are more for the years 1952-53, 1955-56 and 1956-57 (777, 874; 784, 449 and 803,570 acres respectively) than for the year 1960-61 (766, 746 acres).

The history of wheat in the district is rather interesting. The crop was not a very popular one as late as Carey's settlement (1885-89). The wheat boom of the early nineties affected Raipur district also and for a few years, there was a rapid rise in the area under this crop, so much so, that in a very large village like Palari, the wheat area in 1894-95 was nearly equal to that under paddy. Expansion of wheat cultivation was confined to the tracts around Simga, Lawan, Palari and upper portions of Raipur tahsil. This expansion almost coincided with the years when the wheat-rust was very prevalent and the crop of 1894-95 became a complete failure and reduction in the area under wheat was faster than its expansion. During the last ten years (i.e. from 1951- 52 to 1960-61) area under wheat has registered an increase, the largest figure being recorded in 1956-57.

Methods of paddy cultivation :

Methods of rice cultivation may be classified on two bases-one on the basis of sowing and the other on the basis of ploughing. According to the first, the systems of cultivation may be described as ***Chhitaka*** (broadcasting), ***ropa*** (transplantation) and ***lahi*** (sowing after germination). Even now, *chhitaka* or broadcast, sowing is the commonest method of rice sowing. When thus sown, the fields are subjected to a process called *biasi*. The land is ploughed once before sowing and the seed is broadcast at the rate of about 40-45 kilos per acre. When the plants are about one foot high, the land is ploughed which uproots many of the plants and covers some with mud. *Biasi* is thus a thinning process, the theory being that the broadcast

rice grows up so close that the plants would kill each other out,if some of them were not deliberately destroyed. Five or six days later the plot is levelled by means of a *kopar* which flattens all the surviving plants in the mud. In five to six days more weeding operations, known as *nindai* are commenced; two or three weedings at intervals of about a fortnight are generally necessary.

The *biasi* is usually carried on at the end of July or at the beginning of August and is a very important operation : its postponement owing to lack of rain is very detrimental to the paddy crop. The *nindai* or the weeding operation, is done once before the *biasi* and once after it, the one subsequent to the *biasi* being repeated two or three times.

Ropa or transplanting of rice is perhaps the most elaborate method of cultivation. As its name implies, the seed is sown in one place and the seedlings, after they have grown a little, are transplanted to the field. The *lei* or *lahi* method is followed when there is extensive rain which does not permit the sowing of the seed at the proper time. The seed is steeped in water and kept for four to five hours, it is then placed in a heap, hot water is poured over it and it is covered with straw for the night. Next morning it is spread out on the ground and allowed to germinate. As soon as there is a break in the weather, the sprouted seed is sown and when the plants grow sufficiently high, the *biasi* operation is effected.

The other classification is into *khurra*, *batar* and *lahi*. The *batar* is the ordinary method of sowing, when the soil has become sufficiently softened by the first few showers of the monsoon to admit of a plough being worked, the seed is scattered broadcast and the field is ploughed once. In case of *matasi* soil, the field requires one ploughing prior to the sowing of the seed and a cross ploughing to cover it up. The *khurra* method is applied when the rains are late. The seed is simply scattered on *kanhar* and *dorsa* land before the rains and then it is ploughed. When rain falls the seed will germinate. It will not get damaged from being in the ground for a month so long as the rain, when it comes, is sufficient. As described earlier, the *lahi* method is taken resort to when the rains are early and excessive. In the district rain-showers at the time of Dasahra (October) are of paramount importance and a failure of rains in September-October may ruin a promising crops of paddy.

Some mention may be made here of the system of cultivation in the tribal areas of the district. In the past, the Kamars and Bhunjias residing in the hilly tracts used to practise what is known as shifting cultivation. This shifting cultivation practised in the district was of four types-*Dahi*, *Beora*, *Pharha* and *Guhad*. Under the *dahi* system, a low-lying patch of ground was cultivated, cutting trees from the forest, transporting the logs to the field, burning them there in May and spreading the ash evenly. Year after year the *dahi* cultivator proceeded further and further into the forest to get the wood for burning consequently destroying the forest. The *beora* system of cultivation is different from *dahi* : here the land was not low-lying and secondly the felling was *in situ*. But the tribals held that *beora* fields were suited only for coarse crops and not for paddy. The *Pharha* cultivation was actually a compromise between shifting and settled cultivation. In this system, seed beds were prepared out of the ashes of about half a dozen or so trees and seed sown in this. After sprouting, the plants were transplanted. *Guhad* cultivation is the name for the shifting cultivation that used to be practised in the bamboo-growing forests.

Though prohibited in law, shifting cultivation does go on still in remoter and inaccessible areas. And the Kamars still burn branches of trees and brushwood, to enrich the soil. In many areas in Bindranawagarh tahsil the tribes resorted to cutting and burning trees as late as 1959. Another common feature of cultivation in the tribal areas is the cultivation of *baharas* or low-lying areas resulting in the intrusion of their fields in the nearby forest in the form of fingers; sometimes isolated pockets may also be seen. Thus, here the fields of a village do not form a compact block but are seen to be scattered over a large area and isolated from one another.

In the district a system of double-cropping is practised: it is known as *utera*. The rice land is not reploughed in order to sow spring crops but the seed is scattered in the slush of the paddy fields while the paddy crop is still standing. After the paddy is harvested, these seeds come up. Thus the only expense to be incurred is the cost of the seed. The outturn of *utera* crops so sown is about half that of similar crops sown in properly ploughed fields. The *utera* crops commonly grown in the district are gram, *alsi*, *tiwara*, *urad*, *batra*

and *lakhri*. In the other method of double-cropping the second crop, generally linseed or gram, is the important one; rice of a light variety is sown broadcast and is reaped early so as to allow the field to be prepared for the second crop. The double-cropped area depends entirely on the rainfall of the last half of September and beginning of October and therefore exhibits the most extraordinary fluctuations; if the September rain is copious, the area sown is large. The statistics for the last ten years do not reflect any significant increase in the double-cropped area in the district.

Kinds of rice in the district :

Broadly speaking, there are three classes of paddy : *haruna, ardhana* and *mai*. The first is early rice sown or high-lying ground which is reaped at the end of October. The second is intermediate rice, reaped early in November and the last is late-ripening variety reaped upto the beginning of December. The district was known for some very fine varieties of rice but the cultivation of such fine rice has considerably gone down now, the reluctance of the cultivators being due to risks involved in their cultivation. Names of two of the fine varieties are Doobraj and Badshah-bhog. Gurmatia is the rice most commonly sown.

Outturns of Crops :

The requirement of paddy seed per acre varies according to the soil from about 40 kilos in *matasi* to 50 kilos in *kanhar* and the outturn may be reckoned at 400 kilos (i.e. 10 fold). The current yield in pounds of some of the crops in the district in 1960-61 is as below-

Rice (890), Wheat (390), Jowar (450), Maize (954), Tur (850), Gram (293), Kodon (150), Til (68), and Linseed (136).

Diseases of rice:-

Local names of the diseases of rice are *banki, phapha* and *Sanwarkira. Banki* is a pest (*Nymphula depunctalis*) which attacks the crop in cloudless September when intense heat prevails and the fields are still full of water. Attacked by *banki*, the rice stalks wither and become yellow. Deprived of substance and proper support the ears do not grow to full size and the seed is small and stunted.The common belief about *banki* is that it attacks poorly manured fields and that it is injurious to the crop sown by *lahi* method. *Phapha* (*Heroglyfus furcifer*) or the green locust and the red locust (*Cirphis unipuncta*)are the greatest enemies of young paddy, their mode of operation being to nip off the young shoots which then fail to flower and seed. These insects attack the crop in deficient rain. *Sanwarkira* is the greenish-white caterpillar which cuts the ears of rice. Of the diseases of wheat are *Sendri* which is a most fatal scourge : the infected plant does not yield any grain. *Khairi* is said to attach itself to the stem of a plant: its test is that if the infected plant is touched, it leaves a yellow stain on hand. The seed of the crop attacked by *khairi* is of a shrivelled deteriorated type. The crop is sometimes attacked by an insect called *katua* or the wheat stem-borer (*Nongria uniformis*) which eats the young plants. *Sanwarkira* (*Cirphis unipuncta*) also attacks the crops in cloudy weather. Linseed and gram is sometimes attacked by a insect called *bhong* (*Chlorodea obsoleta*) in cloudy weather.

Agricultural implements:

A word may be necessary here regarding agricultural implements used in the district. The term for plough is *nagar* and the plough here is similar to, but lighter than, that used in other districts. After the sowing of paddy, the ground is levelled with an instrument called *Kopar* which is a log of wood drawn by two bullocks. The *Kopar* is also used after the *biasi* of paddy is completed. *Datri* as an implement used for pulverising the soil and thinning plants in the fields of late ripening *kodon*. It is a log of wood with 13 or so wooden nails called *datua* driven in it one row. Wheat and gram are sown through a wooden cup attached to a bamboo driven perpendicularly in a plough, so that the seed enters the ground in a line formed by the plough. *Tutari* is the term for the stick that the ploughman keeps for driving bullocks. It is pointed at one end with an iron nail.

Other petty instruments used in agriculture are as follows :

Chatwar-a wooden implement to cut clods out of moist ground with which banks of fields are prepared and breaches in the band are closed, *Sur*- a wooden pole to carry bundles of paddy to the threshing floor and *Kalari*-a wooden pole with a sickle-shaped iron-nail used in the threshing ground for separating stalks from corn.

The threshing ground is known as *khalihan*.

Irrigation :

The following mention is found in the Gazetteer (1909) about irrigation in the district : "Irrigation in the Raipur district is almost entirely from tanks, though here and there streams are bunded and surplus water carried into the fields, and also gardens are irrigated from wells. Still these two systems of irrigation are at present so unimportant that no further notice need be taken of them". (p. 149). Yet in 50 years or so, the conditions changed so much that in 1960-61 only 12.6% of the irrigated area was from tanks.

It is seen from the statistics for the year 1960-61 that Raipur District has the largest number of wells used for irrigation (38,734) but the area irrigated by wells is only 1.9% of the total irrigated area. The number of irrigation tanks in the district is also the second largest in the State (preceded by Bilaspur district) and the area irrigated by tanks in 1960-61 (46,323 acres) is also the second largest figure in the State (preceded by Balaghat district). 80.6% of the irrigated area is by canals and about 4.8% by other sources.

The following inset-table shows the number of tanks and area irrigated in 1905-06 and 1960-61 :

Year	No. of tanks	Area irrigated in acres	% increase
1905-06	4,671	36,745	—
1960-61	10,329	46,323	26.0

It is seen from this that whereas the number of tanks used for irrigation has increased by more than double, the area irrigated from them has not registered an increase at equal pace. The main reason for this is the increased preferance for canal irrigation and consequent on the above and because of the abolition of proprietory rights, negligence towards deepening and repair of tanks.

Canal irrigation is done in the district by Mahanadi Canal system which are fed by the weir at Rudri and the accessory reservoir at Moramsilli in Dhamtari tahsil.. This scheme was first submitted in 1905 and then revised and enlarged in 1907. At present Raipur district has the largest area (295,708 acreas) in the State irrigated by canals.

Other Industries and Occupations :

The proportions of persons engaged on industries other than cultivation and agricultural labour have been indicated earlier. It will be seen that after cultivation (including agricultural labour) the largest number of workers are engaged in 'other services'. 3.81% of the workers are engaged on household industries and 1.71% on manufacture other than household industries. A comparison of 1961 figures with those from the 1951 Census may be made here : it may, however, be remembered that there is no strict comparability between the two sets of figures :

Industry	No. of persons engaged in 1951	1961
Livestock, fishing, hunting, mining and quarrying	15,237	28,578
Manufacture (including household industry)	22,761	63,243
Construction	8,110	8,749
Commerce	18,158	27,038
Transport, Storage, Communication	7,859	10,155
Other Services	25,815	59,331

It is thus seen that except in construction there has been a tremendous increase in the number of persons engaged in other industries and the largest increase has been in those engaged on manufacture.

Raipur District could not boast of having any important industries till a comparatively recent time. There were in the past some indigenous industries like brass, copper and bell-metal vessels manufacture,but as mentioned in the Gazetteer of 1909, these were on the decline then and are so now. The same was the fate of the indigenous weaving of cotton and tussar cloth and dyeing and manufacture of bangles. In recent times some industries have been developed in the urban areas and mention may be made here of the Raipur Metal Products, M.P. Industries, timber and furniture works, steel box and trunks manufacture and manufacture of bidi. The weaving industry has again been revived through co-operative societies.

The main trade of the district centres around rice. There are important markets (*ganj*) at Raipur, Nawapara, Dhamtari and Bhatapara and all these

places have a number of rice-mills. Oilseeds and pulses also form main exports. Forest products like timber, *harra, lac* and gum are also important items of export.

In his Settlement Report of 1869, Hewitt stated that the trade of Chhattisgarh might be said to have been created since the country came under British rule. Formerly a silver currency was almost unknown and all exchange was carried on by means of cowries.

Communication :

The project to connect Nagpur with Chhattisgarh by a light tramway was first mooted by Sir Richard Temple about the year 1863, but the work was delayed till 1878. This scheme was ultimately given up and instead a new scheme of metre-guage railway was implemented. Nagpur-Rajnandgaon line was opened on the metre-gauge in 1882, but after the formation of the Bengal-Nagpur Railway Company,the line was converted into broad-gauge and extended to Raipur in 1888.Raipur was connected with Calcutta in 1900. The Bombay-Howrah railway line enters the district at Kumhari on the west and continues in an easterly direction to Raipur. Here it turns to the north-east and leaves the district beyond Nipania station, its length within Raipur district being 63 miles. From Raipur, a branch line on the narrow-guage has been constructed to Dhamtari at a distance of 46 miles and from Abhanpur another branch goes to Nawapara 28.5 miles from Raipur. This narrow-guage feeder was opened in 1900. Raipur was connected with Vizianagram in about 1910.

Raipur District has now a little more than 733 miles of road : the details are shown elsewhere in this Handbook. It is now well-connected by road with Nagpur, Jabalpur, Bilaspur, Sambalpur (Orissa) and Koraput (Orissa) via Jagdalpur. Raipur is now connected with all the tahsil headquarters by all-weather roads (excepting Gariaband on which route one has to cross Mahanadi and Pairi rivers by ferry during the rainy season).

Some areas of the trans-Mahanadi region become cut-off during the rainy season-Bilaigarh tract in the north-east and Deobhog tract in the south-east.The latter can be approached through Kesinga and Bhawanipatna in Kalahandi District of Orissa. There are two National Highways (171 miles)-one running east-west from Nagpur to Sambalpur and the other from Raipur to Koraput.

Road transport has rapidly increased in recent years and privately-operated companys ply buses on all the routes. The busiest route at present is between Raipur and Durg past Bhilainagar-the Steel town of Madhya Pradesh.

Education :

As everywhere else, Raipur District has also made great headway in education. In 1877-79 when Shri Narendra Nath Datta (later to become famous as Swami Vivekananda) came here as a child, Raipur town had no school. Now the town has grown into an important place of learning; we now have :

1. Chhattisgarh College of Arts and Commerce,
2. New Durga College of Arts, Commerce and Law
3. Government College of Science,
4. Dudhadhari Sanskrit College,
5. Government College of Ayurveda,
6. Government College of Engineering and Technology,
7. Government Post-Graduate Basic Training College,
8. Government Agriculture College,
9. Government Girls' Degree College,
10. Medical College

Recently a university has also been established at Raipur.

A brief history of two educational institutions may be givne here. The Government High School, Raipur (now Basic Multipurpose High School) was founded as a middle-school and was raised to the status of a high school in 1887 when it was affiliated to Calcutta University. The school was subsequently affiliated to the University of Allahabad in 1894. The Rajkumar College, which was formerly meant for the children of the feudatory states' chief and is now a public school, was transferred from Jabalpur to Raipur in 1894.

The progress of education in the district during the decade 1951-61 may be seen from the following table-

Year	Percentage of literates					
	Whole population			0-4 yr. age group excluded		
	Total	Male	Female	Total	Male	Female
1951	10.52	17.80	3.59	12.09	20.63	4.10
1961	18.49	30,97	6.45	21.70	26.39	7.56

In the above table the percentage of literates has been calculated both, on the basis of whole population and also by excluding age-group 0-4 years from consideration. This age-group 0-4 years actually should not be taken into consideration since the children in this group,except the prodigies, do not go to school. It can thus be seen that on both bases, literacy has grown by over 75% during the decade.

Local Bodies :

There are 3 municipalities in the district— Raipur, Dhamtari, and Bhatapara. Of these the first two are old municipalities and were created in 1867 and 1881 respectively. Other tahsil headquarters Baloda Bazar, Mahasmund and Gariaband do not as yet have municipal committees; they have Gram Panchayats.

Four Janapada Sabhas, those at Raipur, Baloda Bazar, Mahasamund and Dhamtari were constituted on 15th August, 1948. Consequent on the separation of Bindranawagarh tahsil from Mahasamund, the number of Janapada Sabhas rose to 5.

Religion, Fairs and Festivals :

The religion that is followed in the district may be said to be a mixture of the great Hindu tradition and the primitive tribal beliefs. In the rural areas deities like Dulha Deo, Thakur Deo, Bhainsasur, Sahanra Deo and Mata are usually worshipped though Mahabir, Siva and Rama are now becoming popular. The religion of primitive tribes like the Kamars and Bhunjias may be said to centre around ancestral spirit worship, whcih is probably the earliest conception of religion. The religious beliefs of the people in the rural areas also relate to supernatural spirits and witch-craft. The district, till the thirtees, was notorious for witch-craft : the belief in witches is gradually disappearing due to culture-contact and advance of education. The subject has been dealt with in some detail in the District Gazetteer, 1909, which states : "The wide-spread belief in witchcarft, though now showing some signs of decay, has upto the present time exercised a most potent and evil influence on the lives of the people of Chhattisgarh and a long tale of murders must be laid to its account".

A member of some primitive tribe, called *baiga,* is the village priest in almost all the villages. He is employed by the villagers to look after the worship of the village deities. In villages, where a member of some primitive tribe is not available, one of the villagers may be selected for this assignment. The *baiga* serves as witch-doctor and also conducts festivals like *Jawara* and *Bhojli.* Some of the important festivals in the district are Jawara (*Chaitra,* 2: 1-9), Hareli (*Srawan* 1:15), Pola (*Bhandra* 1:15), Dasahra (*Kunwar* 2:10), Diwali (*Kartik* 1:15) Sankranti (*Magh* 1:5), Holi (*Phalgun* 2:15) and Sivarati (*Phalgun* 1:14).

The *Jawara* which falls twice in the year once in *Chaitra* and again in *Kunwar,* is a very important agricultural festival of the district. In Raipur Town, the festivals of importance are Dasahra (when there is a big congregation at the Ravanbhata ground near the water-works), Moharram and Ganesh-Utsava.

Some of the important fairs held in the district are those of Rajim, Bangoli, Turturiya, Bhandar and Mahadeo Ghat : of these Rajim fair, which is held on the confluence of the Mahanadi and the Pairi, is the most important. This fair lasts for about 5 weeks in February or March from the 8th day of *Magh Sudi* to the full moon day of *Phalgun.* This day and festival of Shivratri are the occasions of the principal gatherings and the attendance is stated to rise as high as 100,000 persons. The fair is primarily of a religious nature, the pilgrims coming to bathe in the Mahanadi near the temple of Kuleshwar and to worship at the great temple of Rajiva Lochan.

At Bhandar 32 miles from Raipur on the Baloda Bazar Road, a gathering of the Satnamis takes place in the month of *Phalgun* (February-March) lasting for about 15 days.

Community Development and National Extension Service :

There are 23 development blocks in the district as given on Page 22 :

Raipur was one of those districts where Community Project was started and Abhanpur, Kurud and Chaudkhri Blocks inaugurated the launching of this scheme. These three reverted as P.I. Blocks on 1.10.58 and the post-stage II blocks on 1.4.63. In respect of area Chandkhuri is the biggest block in the district, having an area of 384.3 sq. miles and Pallari with the area of 100.3 sq. miles is the smallest block. From the point of view of population, Abhanpur is the biggest block and Gariaband block is the smallest.

Tahsil	No. of Blocks	Name of Block	Date when started
Raipur	4	Abhanpur	2.10.52
		Chandkhuri	2.10.52
		Dharsiwa	2.10.57
		Tilda	1. 4.62
Baloda Bazar	6	Pallari	1. 4.54
		Bilaigarh	1. 4.56
		Kasdol	1. 4.59
		Baloda Bazar	1. 4.61
		Simga	2. 4.62
		Bhatapara	2.10.62
Dhamtari	4	Kurud	2.10.52
		Sihawa	1. 4.58
		Magarlod	2.10.59
		Dhamtari	1. 4.62
Mahasamund	5	Kaudia	2.10.53
		Saraipali	2.10.56
		Mahasamund	1. 4.58
		Bagbahara	1.10.61
		Basna	2.10.62
Bindranawagarh	4	Fingeshwar	1. 4.54
		Deobhog	2,10.56
		Gariaband	1. 4.57
		Chhura	1. 4.60

Package Pragrmme :

This programme for concentrated effort towards rapidly increasing farm porduction is under implementation in Raipur District from the *Kharif* season of 1961-62. The area to be covered by the programme is selected in compact groups of villages in each development, block. In the selection of such areas such factors as facilities of irrigation, progressiveness of the cultivators and existence of co-operative societies etc. are taken into consideration. The yearwise coverage of the programme has been as below :

Year	No. of villages covered	Area covered in lakh acres	Population covered (approx.)	No. of farm plans prepared
1961-62	446	4.07	311,000	20,000
1962-63	1,090	7.57	559,000	39,000
1963-64	1,147	12.78	992,000	100,000

In the base year the distribution of nitrogenous fertilisers was 5,100 tons. This has gone upto 10,000 tons. The consumption of phosphate fertilisers has also registered a corresponding rise indicating that the cultivators are taking to more balanced use of fertilisers ; the distribution of superphosphate has increased from 450 tons to 4,500 tons in two seasons For the first time green manuring on a large scale was introduced and 40,000 acres were brought under green manure in the last 2 years.

The programme has also aimed at supplying quality seed and plant protection activities have been intensified. With a view to popularise improved agricultural implements, large number of demonstrations have been held. A significant development in this direction is the introduction of threshing implement known as the Raipur paddy thresher. A large number of demonstrations of improved techniques and fertilisers have also been held-the figure for 1961-62 being 500 and for 1962-63 being 2,570.

The entire district is now covered by primary co-operative societies. The loan distributed by the societies has increased from 22.87 lakh rupees in 1961-62 to 72.05 lakh rupees in 1962-63. Marketing of farmer's produce through co-operatives has met with encouraging success and in the first season 470,000 maunds of produce worth-about Rs. 49,29,000 was marketed through the cooperatives. An agricultural workshop and a soil testing laboratory are being set up at Raipur to assist in the scientific development of agriculture.

Important places :

(1961 population figure is given in brackets after the name)

Abhanpur (2,184)

Located about 18 miles from Raipur on Raipur-Jagdalpur road (National Highway 43), Abhanpur is a growing village. It is also a junction on the metreguage railway and from here a branch line goes to Nawapara. It was one of the first selected centres for community development programme. A government tank was constructed here prior to 1909 at a cost of Rs. 2,731.

Amdi : (135)

Situated 7 miles to the north-west of Dhamtari town, the village is especially noted for its land, the

soil of which is reported to be the finest in the district.

Arang (8,469)

This large village is situated 22 miles from Raipur town on Raipur-Sambalpur National Highway. It is the headquarters of Chandkhuri development block and was one of the first 3 centres selected for community development. Arang appears to have been a very big city once and many inscriptions have been found here by Cunnigham and Hiralal. It has many ancient ruins, the most notable being a temple known as Bhand-deval

Baloda Bazar (7,108)

It is the headquarters of the tahsil of the same name and is 47 miles north-east of Raipur. It may be approached from Raipur by two routes-one via Bisrampur and Bhatapara and the other via Kharora, the former of these routes being more convenient. It has not yet developed into a municipal town.

Bhandar :

A village in Raipur tahsil about 32 miles to the north-east of Raipur between Pallari and Arang. It is the headquarters of the *gurus* of the Satnamis and it is recorded in the 1909 Gazetteer that it had a temple of this sect over which once stood a golden pinnacle. This pinnacle, which was then valued at Rs. 750, was stolen in 1906.

Bhatapara (16,930)

It is a village which has developed very fast and is now one of the three municipal towns of the district. Its population in 1901 was only 2,900 and in 1891 only 461. Its development to a large extent is due to its being an important railway station on Raipur-Bilaspur line. It is one of the important trade centres of the district.

Deobhog (1,342)

This big village is situated in the extreme south-east of the district, 140 miles away from the district headquarters. It becomes inaccessible during the rains and has to be approached through Kalahandi district. It is the headquarters of development block and is also the headquarters of Naib-Tahsildar. Deobhog was once the head quarters of a district under the Somavansi Kings of Cuttack and is so referred to in a copper plate grant of Maha Bhavagupta II.

Dhamtari (31,552)

Situated south of Raipur town (46 miles by railway and 48 miles by road), Dhamtari is the headquarters of the tahsil of the same name and is one of the three municipal towns of the district. The name of the town appears to be a corruption of Dharam-tarai meaning the sacred tank or place. It is a big trade centre of the district largely trading in forest produce and rice.

Gariaband (3,041)

This is the headquarters of Bindranawagarh tahsil situated 50 miles south-east of Raipur town It is the only tahsil headquarters which is accessible with some difficulty during the rains.

Kopra (2,964)

This is a big village in Bindranawagarh tahsil situated 10 miles to the south-east of Rajim on Raipur-Deobhog road. It is considered to be a sacred place where dwells Kopeshwar Mahadeo, one of the five Mahadeos who are within the *Panch-kosi* (*area of* 5 *kos*) around Rajim.

Kurud : (4,676)

A large village in Dhamtari tahsil, 32 miles south of Raipur and 14 miles from Dhamtari, Kurud is also a railway station on Raipur-Dhamtari narrow-guage line. It is the headquarters of a development block and was one of the three centres first selected for community development. The village is situated about a mile from the railway station.

Labhandih.

Etymologically the village-name means the hamlet of Labhans or Banjaras and the name appears to be based on the fact that it was originally the camping-ground of the "pack bullock" traders. It is situated on Chhokra nala, a stream famous for guava grown on its banks. The village is 5 miles from Raipur on Raipur-Sambalpur road and has become prominently known because of the Government Agricultural Experimental Farm. This farm was started here in 1903 and now is an important centre of paddy research. An Agricultural College is also expected to be built here and the staff quarters have already been constructed.

Mahasamund (10,624)

This is the headquarters of the tahsil of the same name, situated 18 miles north-east of Rajim and 34 miles from Raipur. It is a station on Raipur-Viziana-

garam railway line and is also a station of the Great Trigonometrical Survey. The name of the village means 'the large tank' but the tank which has probably given it the name is much silted up. Two old temples, built of coarse granite and laterite and dedicated to Siva may be seen here.

Narayanpur :

This is a small village situated 53 miles north-east of Raipur on the Mahanadi river near Kasdol on the road to Seorinarayan. This village was frequently visited in the past by floods. It is the place where the Haihaya kings planted an excellent garden, which is mentioned in the Kharod inscription dated 1181 A.D. It is also stated in the inscription that the Haihaya kings built public alms house here abounding with savoury food and beverages.

Nawapara (8,037)

This large village is also known as Gobra-Nawapara and its former name appears to be only Gobra. This is a village situated on the banks of Mahanadi opposite to Rajim and is the terminal station for Raipur-Nawapara branch of the narrow-guage railway. Nawapara means "new village" and it was only a new hamlet of Rajim on the west side of the Mahanadi. It grew out of a small village Gobra, so named because Raja Bimbaji offered it to the temple of Rajiva Lochan for *Gobri* or cow-dung cakes fuel for preparing the temple food. Because of its fast development, Nawapara has completely eclipsed Rajim and it is now a big trading centre of the district.

Palari (2,151)

A large village in Baloda Bazar tahsil, 9 miles south of the tahsil headquarters and 42 miles north-east of Raipur. The prevailing soil here is *Dorsa* and *matasi* on which excellent rice crops are raised. There are some good tanks here and the legend, about the biggest tank known as Balsamunda is that a child was sacrificed when it was dug. On the bank of this tank, there is an old temple in which a beautifully carved image apparently removed from some ancient ruin, now untraceable, is enshrined.

Rajim (4,583)

Situated 29 miles to the south-east of Raipur on Raipur-Deobhog road, Rajim is a big village now but in the historical past, was an important centre in Maha Kosala. A big fair is held here every year in February-March.There is an important temple here-Rajiva Lochan-where there are two inscriptions engraved in characters of very different ages; one is dated *Chedi Samvat* at 896 (A.D. 1145) while the other appears to be atleast three centuries older. Another temple-Kuleshwar temple-may be seen on the bed of the river where also there are two inscriptions, one of which states : 'when the waters surrounded the temple of Sive I stayed here while Jagat Rau's throne of Sambhu stood firm as a pillar'.

Saraipali (4,458)

A large village situated about 86 miles from Raipur on Raipur-Sambalpur road. The origin of the village-name is from Sarai (*shorea robusta*). The village used to be the headquarters of erstwhile Phuljhar zamindari and now is the headquarters of a Naib-Tahsildar and development block.

Sihawa (1,643)

Located 44 miles to the south-east of Dhamtari, Sihawa is famous as the source of the Mahanadi. The name Sihawa is probably derived from two words *Sinha-avat*, meaning the 'comfort of Sinha' and an inscription in one of the old temple testifies to the fact of Sinharaja being the founder of a dynasty of kings. According to a legend, Sinharaja, had become afflicted by leprosy but was cured of the disease by bathing in a spring here. There is a hill near the village-Sringrishi hill-where the Sage Sringi is said to have performed his penance.

Simga (4,536)

Upto 1906 (i.e., upto the separation of the present Durg district from Raipur) Simga was the headquarters of a big tahsil of the same name. The tahsil building is now used as police station house. The village is situated 9 miles to the north-west of Tilda railway station and is 28 miles from Raipur on Raipur-Bilaspur road. A road leads from here to Bemetara and Kawardha in Durg district. As mentioned in the Gazetteer of 1909, there used to be crocodiles in a tank here.

Sirpur :

This ancient centre of learning is situated on the right bank of the Mahanadi about 37 miles east by north from Raipur. Once a city of considerable importance,

it is now but a small collection of huts. Scores of old temple sites and several more or less ruined shrines, constructed in bricks of a very old style built before the 9th century are found here. The most complete of this is the Laxman temple. Remains of a Buddhist monastry have also been discovered here. Many statues from here have been taken to as far as Dhamtari. Archaeological excavations were made here in 1952-55 and many new discoveries have been made.

Taurenga :

A very small village on Gariaband-Deobhog road 103 miles from Raipur. The place used to be the camping ground of European officers in the past and the water of the well situated near the *sarai* is reported to be very good. A tank has recently been constructed here by the Forest Department. Bisons and wild buffalos which once used to frequent the surrounding forest, have now become very rare but tigers and panthers are still commonly met with. About 6 miles from here is the waterfall of Deodarha near Jangda village.

Turturiya :

This village is situated 15 miles from Sirpur and 50 miles from Raipur. It is said to have been the hermitage of sage Valmiki and the birth place of Lava and Kusa, the sons of Rama. There is a spring in the nearby hills. Some archaeological remains may be seen here and it is believed that the place was a Buddhist nunnery.

SUMMING UP

Raipur District has a glorious historical past dating back as far as the hoary days of Mahabharata and at one period of its history, it had the capital of Maha Kosala in Sirpur. As time rolled on, nothing remained to testify to its ancient glory except the many remains and ruins and the district became, along with the rest of Chhattisgarh, "the least known portions of the obscurest divisions of India" (1872 Gazetteer). Even till the twenties and thirtees of this century it was supposed to be the land of witches and evil spirits. But during the last 30 or 40 years, the district has taken long strides towards progress and prosperity and its future is now assured with the pace of industrialisation and education and with the proximity of the Steel Project at Bhilai.

Since the beginning of the present century, the population of the district has been continuously increasing, notwithstanding the influenza epidemic of 1918 which caused a decrease of population in 1921, both in the state and the division.The decade 1951-61 witnessed the increase of 22.07%, the highest during the last 60 years, which though not anywhere near that of Durg District, is more than that of Bilaspur,the district immediately higher up both in area and population. There has been, during the decade, a high increase in number of persons employed in manufacture, other services and forestry and quarrying etc. There has been some 80% increase in the number of literates and the number of educational institutions has significantly gone up.

With the coverage of the entire district by development blocks, the launching of the Package Programme and the setting up of a University and the fact that here there has been a tradition of enlightened leadership, it would not be a futile hope that the next few decades will take the district to new heights in the fields of agriculture, industrialisation and education.

A—GENERAL POPULATION TABLES

TABLE A—I

AREA, HOUSES AND POPULATION

District/Tahsil City/Town	Total Rural Urban	Area in Sq. miles	Area in Sq. Km.	Population per Sq. mile	Number of Villages: Inhabited	Number of Villages: Uninhabited	Number of Towns	Number of occupied residential houses	Population: Persons	Population: Males	Population: Females

Note :—1 Under Columns 3(a) and 3(b) ; (a) represents the area figures furnished by the Surveyor General of India ; (b) represents the area figures furnished by the State Survey Department. The area figures of tahsils, total and rural, are based on the figures of the State Survey Department.

2 The urban areas are collected by the Census Organization.

3 Population per sq. mile has been calculated on area figures furnished by the State Survey Office.

4 Towns treated as such for the first time in 1961 are printed in italics.

5 (M) stands for Municipality and (G.P.) for Gram Panchayat.

APPENDIX I

Statement showing 1951 territorial units constituting the present set up (only those names/areas which have undergone changes since 1951 have been shown below)

Name of District and Tahsil	1951 Territorial Units	Details of gain in Territories			Details of loss in Territories			Net Area Gain(+) Loss(—)	
		Brief Description	Area in		Brief description	Area in

Note The total number of villages in Baloda Bazar Tahsil is actually 953 and not 954 as shown in Table A-I of this Handbook and in Part II-A of the Madhya Pradesh 1961 Census series. This was due to the erroneous inclusion in this Tahsil of Keshaldih Forest village which belongs infact to Mahasumund Tahsil.

Appendix	X—Towns and Villages in which weekly or fortnightly markets are held together with the day on which it is held ..	502—504
Appendix	XI—Towns and Villages having Co-operative societies together with the description of the society ..	505—506

APPENDIX—I

INDUSTRIAL ESTABLISHMENTS

Note:— This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise, that is, under the name of the district have been arranged the industries in ascending order of minor groups, showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above Note clear:—

Raipur District Total 200 (1,944) signifies that there are 1,944 establishments in Raipur District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains." Baloda Bazar Tahsil Total 202 (1) signifies that there is one establishment in Baloda Bazar Tahsil pertaining to Minor Group 202, which stands for "Production of indigenous sugar, gur from sugarcane or palm juice and production of candy". Village 1 Koni 311 (1) signifies that in Village Koni which has 1 as its location code number there is one establishmement pertaining to Minor Group 311, which stands for "Manufacture of shoes and other leather footwear". Bhatapara Town Ward No. 1 273 (2) signifies that there are two establishments located in Ward No. 1 of Bhatapara Town pertaining to Minor Group 273, which stands for "Making of textile garments including raincoats and headgears."

PART II

OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies (the agency or source is indicated below each Table or Statement) and from official publications. These are presented under the following heads :--

1 Rainfall and Temperature

2 Economic Statistics :

- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance
- (e) Consumer's price index for working class

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics--

- (a) Health and Medical
- (b) Vital Statistics

7 Communications

8 Miscellaneous
