NOTE ON SPELLING

In the notes and tables the spelling of the police stations follows generally that adopted by the Home (Police) Department, and of towns by the Land & Land Revenue Department, Government of West Bengal.

In the District Map appearing in the frontispiece, which has been prepared in the office of the Director of Land Records and Surveys, Government of West Bengal, the names of the police stations have been spelt as per the records of that office.

PART I

1

CULTURAL PROFILE OF PURULIA

by

Benoy Ghose

The geo-physical configuration of Purulia reflects to a large extent its cultural configuration. The people of Purulia are composed of some oldest ethnic elements. As far as our present ethnological knowledge goes, the oldest stratum of India's population, and that of Bengal's also, is Austro-Asiatic or proto-Australoid ('Nisadic' according to R. P. Chanda : *Indo-Aryan Races*, Rajshahi, 1916) in origin, and to this oldest stratum belong the Santhals, the Mundas and their offshoots the Bhumij, the Bauris and many other scheduled castes and tribes of upper western Bengal. This portion of western Bengal was known in the olden days as *uttar radh*. Geographically this area roughly corresponds to the western segment of a straight line drawn from the northern limits of Rampurhat subdivision in Birbhum district to the point where the river Subarnarekha flows into Midnapore near Gopiballavpur, across Suri, Asansol, Bankura sadar and Jhargram subdivisions. This was the heart of ancient *radh bhumi*, the oldest cradle, so far known, of Bengali culture. The whole of Purulia district falls within this culture-zone. Although this culture constitutes a part of the total cultural configuration of Bengal, it has some conspicuous traits of its own, which can make out a distinctive regional culture-complex.

An interesting geographical fact is that a large number of rivers, besides many rivulets, on the west of the Bhagirathi in West Bengal, originate in the Chotanagpore region—the Mayurakshi, the Ajoy, the Damodar, the Dwarakeswar, the Kangsabati, the Silabati, the Subarnarekha. Of these the Dwarakeswar, the Kangsabati and the Silabati rise in the present Purulia district, and the Damodar flows along its northern fringe, beyond the Panchet hills, while the Subarnarekha, touching its western border, flows through Singhbhum to Midnapore. The Kangsabati or the Kasai, rising from north-west Purulia, above Jhalda, flows in the south-eastern direction across the heart of the district, almost bifurcating it. Along with it a stream of culture also flows around its banks, beyond the border of Purulia towards Ambikanagar and Sarenga areas of Bankura. This culture-stream was once predominantly Jain (see below) and, archaeologically and historically, perhaps the most important stream of Jainism so far known in the whole of West Bengal.

It is now evident from the anthropological and archaeological findings (though casual) that if the big gap between the different cultural strata of Bengal's prehistory and history has to be filled, our researches are to be directed to and concentrated on this region of western Bengal in future. This can be done effectively by an inter-disciplinary approach, that is, by manipulating the technical-conceptual tools of Socio-Cultural Anthropology, Sociology and History. And while doing it, we shall have to be cautious about our age-old habit of fixing our vision of history on the horizon of the Vedic Aryans and thinking of the Vedic Age as the fountain-head of all 'civilization' and 'culture' well worth knowing in India. Not only should we stretch our vision beyond the Vedic Aryans towards the pre-and-non-Aryans, but also we should be prepared to accept the historical fact that there were more than one stream of Indo-Aryan migrations to different regions of India at different times, and consequently there were varying stages of Aryanisation in different regions in proportion to the predisposition of earlier settlers to assimilate the introduced culture of immigrants. Moreover, while judging 'the contact of peoples', as has been pointed out by the eminent anthropologist W.H.R. Rivers, "we have first to inquire what is the criterion of the superiority which allows the few to exert an influence out of proportion to their number. It is clear that we have not to do with any absolute standard of the higher or lower. *The influence of an introduced culture is not determined by any absolute superiority, but by its effects on those to whom it is presented.* It is the fact that an introduced culture seems to those who adopt it to be higher than their own which determines the extent of its influence. We have, then, to inquire *what aspects of culture thus impress on the minds of rude peoples this notion of superiority....*" (emphasis added). The inquiry reveals, says Rivers, that "in this direction it is material culture which counts, and counts almost alone" (W.H.R. Rivers : *Psychology and Ethnology*, London 1926 ; 'The contact of peoples').

Non-material or ideological culture (the cultural 'superstructure'), consisting of higher organisation of social structure, exalted religion, moral values, aesthetic ideals and refined language has small importance to simpler peoples besides the purely material aspects of culture. For instance, it is the goods, dress and furniture, the cinema, the railway train, the motor, the electricity, the radio, the plastic goods, which have impressed most the simpler folks of Purulia, as of other places, but not much the non-material culture of the upper

castes or immigrants. The recently sponsored sociological theory of 'Sanskritization' in India, which puts forward the proposition that "the customs, rites and beliefs of the Brahmins, and the adoption of the brahmanic way of life by a low caste seems to have been frequent, though theoretically forbidden" (M. S. Srinivas : *Religion and Society among the Coorgs of South India*, Oxford 1952), appears to be a facile generalisation in this context. It has been found that even where the introduced non-material culture (Brahmanic or otherwise), by the merit of its 'superiority', has exercised its influence, it has failed to swamp the ideological content of the simpler cultures. In fact, there is a continuous process of interaction in the social-ideological level as a result of the contact of peoples, as is evident in Purulia, and there is no set pattern of the process. One can see through each such culture-complex different layers of assimilation of later introduced cultures in the cultures of earlier peoples, and often one comes across strange survivals of earlier 'traits' in each layer which the people cling to most tenaciously. They are not just isolated discrete traits, but constitute the 'folkways' and the 'mores' which determine much of the individual behaviour in the 'caste' or 'community' and which are, in the last resort, 'the guardians of solidarity' (W.G. Summer : *Folkways*, Boston, 1907). Many such instances from the socio-religious institutions of the Bhumij, the Santhals, the Bauris and other castes and tribes of Purulia—such as 'marriage' and 'death ceremonies', 'religious' beliefs and practices,—may be cited to illustrate the point (see below).

Prehistory and History

Prehistoric archaeologists have found stone tools scattered all over Chotanagpore, including Burdwan, Midnapore, Bankura and Purulia districts of West Bengal. These have been collected mainly from the gravel beds of rivers and detrital laterites. Among these the Palaeolithic core-tools have striking resemblance with the big core-tool culture-complex of South India (Madras Region). It has been suggested therefore by prehistoric archaeologists that sometime in the middle Pliestocene, about 500,000 years ago, this Palaeolithic core-tool culture might have travelled from the Madras Region of South India, along the sea-coast, to the Mayurbhanj area of Orissa, and from there to the neighbouring regions in Singhbhum, Manbhum, Birbhum and the Santhal Parganas.

Lithic celts, ringstones, grinders and crude potteries of Neolithic age have also been found in large number in this region. It appears from the number of celts and celt-making technique that there were once neolithic factories and settlements in Chotanagpore and its adjacent places. It is not yet certain, however, whether Chotanagpore or its contiguous western Bengal, had ever passed through the next pre-iron Chalcolithic stage of culture, but it appears from collateral evidence that it might have flourished in the copper-belt of the Dhalbhum region. These facts indicate that in the hills and forests of Chotanagpore and its contiguous western Bengal (including Purulia), there was a separate culture-stream since the middle Pliestocene, and that there was nothing 'Vedic Aryan' in it. Long before the advent of the Aryan-speaking peoples in India and their gradual spread in eastern India (including Bengal), this culture was built up through ages, mainly by the ancestors of the present dolichocephalic (long-headed) platy-mesorrhine (broad-and-medium nosed) Nisadic peoples of this region.

We know that the Vedic Samhitas completely ignored Bengal, and that if any Brāhmana or Āranyaka text referred to its peoples it did so in very disparaging terms. Even in the period of the Sutras the Aryan culture did not make much headway in Bengal. The Mahabharata and the Buddhist-Jain literature reveal the slow and gradual spread of Aryan influence in Bengal by the monks and warriors of *Madhyadesh* (middle region of northern India). In fact, with the revival of Vedic culture under the Imperial Guptas, the steady progress of Aryanisation of Bengal began. The torch-bearers of this Aryan culture were the Brahmins of Madhyadesh. The process set in since the 5th century A.D., and it gathered momentum with the extension of patronage to the Brahmins by the kings of Bengal, particularly by the Varman and the Sena kings. The wave of Brahminisation of Bengal steadily rose higher from the 7th to the 12th century A.D., touching a new high in the 11th-12th centuries in the Sena period. The impetus was lost with the beginning of the Muslim conquest of Bengal in the 13th century.

The Aryanisation of eastern India, as far as it can be ascertained from historical facts, started from Videha or Mithila (north Bihar), from where it advanced towards Pundravardhana (north Bengal) and Magadha (south Bihar). From north Bengal it made headway to Pragjyotish (Assam). Radhdesh, or regional western Bengal proper, was the last bastion of non-Aryan culture when north and east Bengal was largely Aryanised (D.C. Sircar : 'Spread of Aryanism in Bengal', *Journal of Asiatic Society*, Vol.—18, No. 2, 1952). It was brought under the influence of Aryanism by the 5th or the 6th century A.D., but Aryanism could not make much headway in the impenetrable pathless area of Rādh till the 11th or the 12th century, when the patronage of the Sena kings pushed it through the fastness of forest. This outline history of the spread of Aryanism in Bengal is offered here as the background of the tentative cultural profile of Purulia we intend to present.

The Stream of Jainism

Buddhism followed the track of Aryanism to Bengal, that is from north and east Bengal it advanced towards West Bengal. But the story of Jainism is something different. The earliest stronghold of Jainism was *Rādh* or western Bengal. We know that both Jainism and Buddhism originated in eastern India. The Pārsvanath hills, in commemoration of Pārsvanath, the immediate predecessor of Mahavira in the lineage of Tirthankaras, is located within Chotanagpore, and is not very far from the northern border of the present Purulia district. The old Jain text *Āchārānga Sūtra* (4th-3rd century B.C.) relates the journey of the Jaina Tirthankara Mahavira through the impassable forest of '*Lādh*' country, where he was not very favourably received, because the rude peoples living there hurled stones and set dogs upon him. This '*Lādh*' is obviously the same as the '*Rādh*' and there are still many place-names in Purulia and Bankura with '*Lādhā*', such as Suklādhā, Lāulādhā, Podlādhā, Bāhulādhā etc. The rude 'peoples' who set dogs upon Mahavira were the old Nisādic or proto-Australoid tribes of this region.

But inspite of this hostile demonstration of the non-Aryan Nisadas, the proselytizing mission of Mahavira was not wholly unsuccessful because, after all, he did not travel in that region as a 'civilized' Vedic monk. It should be remembered that he travelled as a *digambara* ('naked' missionary) and preached something which did not smell much of orthodox Aryanism. Mahavira and his followers, both in appearance and utterance, were not therefore wholly repugnant to the local rude fellows, and they could move among and mix with the 'wilds' of the forests, with a little effort and patience. And Jainism actually established itself in Bengal, and in Rādh, as early as the 3rd or the 2nd century B.C. In Rādh this was also the first introduction of 'Aryanised' culture, though not of the orthodox Vedic variety, by the backdoor and in disguise.

There was a split in the Jain church after Bhadrabahu, the compiler of Jain *Kalpasutra* and a contemporary of Maurya Chandragupta, which led to the foundation of a number of schools, of which *Tamraliptika* (in Tamluk) was an important one. To this Tamraliptika school belonged, most probably, the followers of Jainism in *Rādhdesh*. A Mathura inscription of 2nd century A.D. records the erection of a Jain image at the request of a Jain monk of *rādh*. By the 7th century A.D., Hiuen Tsang says, the Jain Nirgranthas became a dominant religious sect in Bengal and the '*digambara* Nirgranthas were very numerous'. The zeal of the Nirgranthas definitely waned during the reign of the Pāla and the Sena kings who patronised respectively Buddhism and Brahmanism, and their inscriptions hardly contain any reference to the Jains. That does not indicate however that the Jains were completely wiped out, because there was no persecution of the Jains either by the Palas or the Senas. They simply did not extend their patronage to them. It is very likely that the Jain Nirgranthas lived a comparatively quiet life in the remote, isolated and inaccessible regions of Bengal, of which the *Rādh* provided perhaps the most congenial climate for their existence. This quiet, isolated existence of Jainism continued in Bengal till, during the Muslim period, the immigrants from western India gave a fresh impetus to it. It is interesting to note in this connection that in the list of P. C. Nahar's *Jain Inscriptions*, except an inscription on the back of an image of Pārsvanath found at Azimganj (Murshidabad district) which is dated *Sambat* 1110 (11th century A. D.), there is no other inscription found in Bengal which is earlier than the 15th century A. D. On the other hand, most of the Jain images of Purulia, Bankura, Burdwan and other places in regional west Bengal have been dated by archaeologists between the 10th and the 12th century A. D. This justifies our statement that Jainism in Bengal did not disappear in the Pala-Sena period, and that it continued to thrive in regions favourable to it, in its own humble way, particularly in its earliest stronghold, the Rādh.

Purulia, of all districts, bears an eloquent testimony to this role of Jainism in West Bengal's cultural history. And there is no other district in West Bengal which, from the archaeological and the historical points of view, is more important, and also more neglected, than Purulia for the study of Jainism in this part of our country. Jain images are considered to be scarce in Bengal. But there are plenty of Jain images in Purulia even today, on the old archaeological sites along the banks of the river Kasai, and also in that portion of Bankura through which the Kasai flows. One can still collect dozens of excellent images of Jain Tirthankaras from these sites, of various sizes, with at least one colossus about 8 feet high in Pākbirrah in Purulia. It appears from the prevalence of the naked images of the Tirthankaras on these sites that this whole area in Purulia along the Kasai, and the contiguous Kasai-bound Bankura, had once been the stronghold of the *digambara* sect of the Jains.

More than one hundred years ago, Lt. Col. Dalton, then Commissioner of Chotanagpore, and Beglar, in the 1860s and 1870s, made an extensive tour of this region, and published their reports on the archaeological and historical importance of these places. Quite a large area of their tour covered the present Purulia district of West Bengal. But inspite of that, one wonders as to why our archaeologists had so long been indifferent to

these historical sites of Purulia, and why uptil now they have not considered it worth while to explore the sites in proper manner. In course of my recent tour in Purulia district (1967-69), I made it a point to visit the sites covered by Dalton, Beglar and Cunningham, and found them almost equally interesting from the point of view of Jain antiquities. It is true that all the temples seen by Dalton and Beglar are not there, some have decayed and fallen, and the images and relics have partly disappeared and partly been removed to neighbouring villages. But still all the sites in Purulia are worth visiting and certainly calls for intensive archaeological exploration, as well as preservation, without any further delay.

"The Cossai is rich in architectural remains", says Lt. Col. Dalton in his 'Notes on a Tour in Manbhoom in 1864-65' (*Journal of the Asiatic Society*, Part 1, 1866). Based on an account of Lt. Money, he wrote about *Palma*, an old settlement on the bank of the Kasai, within a few miles of the railway station of Purulia: "The principal temple is on a mound covered with stone and brick, the debris of buildings, through which many fine pepul trees have pierced, and under their spreading branches the gods of the fallen temple have found shelter. In different places are sculptures of perfectly nude male figures....One of these images is larger than life. It is broken away from the slab on which it was cut, and the head separated from the body, lies near....I have now seen several of these figures and there can, I think, be no doubt that they are images of the Tirthankaras of the Jains..". The ruins of the broken temples and the Jain images are still there in Palma, although a large number of good images have been removed by collectors and possibly antique-dealers. *Para* has been mentioned in Beglar's report (*Archaeological Survey of India Report*, 1874-75, 1875-76), which is situated about 4 miles to the west of Anādhā, on the main road from Raghunathpur to Purulia town. Beglar saw a few images and two temples on the site, one of stone and another of brick. The temples are still standing on the site, but images there are none, except a few fragments which are worshipped by the villagers. Para is a Bauri-dominated village.

Back on the main road as you proceed towards Purulia, about 4 miles from the border of the town, you reach *Charrāh*, an important archaeological site (Dalton's 'Churra' and Beglar's 'Chorrah'). Beglar found some old temples here, and "judging from the remains of sculpture lying about" he inferred that these were "Brahmanical and principally Vaishnavic". But of Beglar's 'Brahmanical' or 'Vaishnavic' remains I have found almost nothing in Charrah. Dalton saw "two very old stone temples of deul-type" in Charrah (in 1860s), and reported that "there were originally seven of these Deols. Five have fallen and the fragments have been used in building houses in the village". Of Dalton's two temples, I have seen only one stone-temple on the site. Some fine images of Jain Tirthankaras have been stuck to the walls of the newly erected village-abodes (not exactly 'temples') of Shiva, Durga etc. but by far the largest collection of fragments of Jain images, chaumukhas, votive shrines, yakshas etc., are housed in a dilapidated hut in the Dom locality of Charrah, in front of the most popular village-god Dharmathakur, installed under a tree. On the outer walls of the hut some fine Jain images are stuck up, and inside the hut one would be surprised to see the massive collection of Jain sculptures, reduced to fragments. It is a kind of a 'mini-museum' in Charrah, where all the Jain images and broken relics are worshipped by local Doms, probably as emanations of Dharmathakur. When we asked for a gift of Jain relic, a small head or votive shrine, the assembled men and women (mainly Doms) cried out in a chorus that they could not offer a single piece as gift, as disaster would descend upon the villagers if a single fragment of sculpture is removed or stolen away from the hut. We came back disappointed to our car on the main road to resume our journey to other sites.

Starting from the west of Purulia, if we proceed along the banks of the Kasai towards the east, we come first to *Boram* on the right bank of the river, about 4 miles south of Jaypur town. Both Dalton and Beglar saw the ruins of Boram, and the temples and sculptures seen by them are still lying there. Three "very imposing looking brick temples" (Dalton) still stand in Boram on big mounds, amidst heaps of debris of architectural ruins. All the temples are of Bāhulādhā (Bankura) deul-type, with elaborate mouldings. Actually the local name of the place is 'Deulghata', for the deul-type temples on the 'ghat' of the Kasai. There are images of Mahismardini, Ganesh, Durga, Shiva and Vishnu in the temples, and the image of Mahismardini is really "the finest piece of sculpture in the place" (Beglar). From these sculptural remains Beglar concluded: "All the temples appear to have been Saivic; there is no Vaishnavic or other sculpture at all in the whole place; there must, therefore, have been a large and rich, and probably intolerant, Saivic establishment here." About Bāhulādhā Beglar made similar remarks, seeing Siddheswara Lingam inside the temple: "I conclude, therefore, that the temple was originally Saivic". What led Beglar to infer that the Saivites of Boram had been "a large and rich, and probably intolerant" sect, one cannot guess. It is interesting to note Dalton's remarks, in this connection, on Boram: "I found indeed no Jain images on the spot, but about a mile to the south, the remains of a Hindoo temple in a grove was pointed out to me, and all the images from all the

temples in the neighbourhood have been there collected. The grove temple was dedicated to Siva, but amongst the images were several nude figures....that were in all probability the 'Jinas' of the brick temples". Possibly Beglar missed the grove-temple of Siva and its collections, and therefore could not find out any trace of Jainism around. But there is hardly any doubt that like Bahulādhā and many other places in Bankura and Purulia, it had been a Jain centre, which was later converted into Saiva-Sākta centre during the revival of Brahmanic culture.

Let us proceed from Boram-Deulghata to *Palma* on the bank of the Kasai, which we have already described. Further east, towards Bankura, is *Budhpur*, a Bauri-dominated village, with extensive ruins of stone temples, carved pillars, and fragments of images. There is a fine stone image of Ganesh on the site, of medium size. All other images have been removed from the place. From Budhpur, on the road to Bankura, near Bagda, is *Pākbirrāh*. Beglar visited the site in the 1870s and was impressed to see the extensive ruins around. After one hundred years anyone who cares to visit the place even today, would be equally struck to see the massive ruins of Jainism in Pākbirrāh. It was one of the biggest centres of Jainism in this region, with a large group of temples in two adjacent sites, where the images of many Jain Tirthankaras—Padmaprabha, Adinath, Parswanath—with their Sāsanadevis, were installed. There is a colossal figure of a Tirthankara (about 8 ft. high), now worshipped as Bhairab, standing in Kāyotsarga pose on a low lotus-carved pedestal, flanked by *cauri*-bearers. From the *lānchana* carved on the pedestal it seems that the image is of the Jain Tirthankara Padmaprabha (?). The open shed in which the image stands, is a store-house of numerous Jain images, mainly mutilated. In another shed on the adjacent site, there is also a good collection of Jain images. The whole area is strewn with lithic architectural fragments of votive shrines, big *kalasas, amalākas* and door-jambs. There is no doubt that once a large Jain culture-centre flourished here, around Pakbirrah.

About 20 miles south-east of Pakbirrah, across the border of Purulia, there is another large medieval Jain culture-centre, around Ambikanagar (in Ranibandh P.S.) in Bankura. It is centred round the villages Ambikanagar, Chitgiri, Pareshnath (2 miles north-west of Ambikanagar), Chiada and Kendua, all on the banks of the Kasai and the Kumari. Unfortunately a large part of this area is now going under water for the Kangsabati Dam Project. But fortunately it has drawn the attention of the Department of Archaeology, Government of India, before it is submerged, and a good account of the Jain relics of this area in Bankura has been recorded (Debala Mitra : 'Some Jaina Antiquities from Bankura, West Bengal' : *Journal of Asiatic Society*, Letters, Vol. XXIV, No. 2, 1958).

These archaeological and inconographic remains clearly indicate that there were once flourishing centres of Jainism in Purulia-Bankura region of West Bengal. The spread of Jainism might have begun in the 3rd-2nd century B.C., and Jain settlements started springing up along the banks of river, as 'islands' of Aryan civilisation, away from the inaccessible forest-bound settlements of 'rude' tribal peoples. Over these earliest settlement-sites, at a much later period, roughly between the 10th and the 12th century A.D., these religious edifices were erected with temples and images of Jain Tirthankaras, by the descendants of earlier converts and immigrants, who by that time had grown into a rich and prosperous community by taking to trade and agriculture. As there were no Jain Rajas in this region, and no ruling dynasty of Bengal patronised Jainism, it is obvious that these Jain religious centres were built up under the patronage of a well-to-do community. The remnants of this once well-to-do Jain community are, most probably, the *Sārwāks*. Lt. Col. Dalton in his 'Notes' gave the following interesting account of these 'Sarwaks':

"In 1863 I halted at a place called Jumpra, 12 miles from Poorulia, and was visited by some villagers who struck me as having a very respectable intelligent appearance. They called themselves Sarawaks. They prided themselves on the fact that under our Government not one of their community had ever been convicted of a heinous crime. They are represented as having great scruples against taking life. They must not eat till they have seen the sun, and they venerated Parswanath. There are several colonies of the same people in Chotanagpore proper, but they have not been there for more than seven generations, and they all say they originally came from Pachet. Contrasted with the Moondah or Cole race, they are distinguished by their fairer complexions, regular features and a peculiarity of wearing the hair in a knob rather high on the back of the head. They are enterprising, and generally manage to combine trade with agricultural pursuits, doing business both as farmers and money-lenders".

The *Sārwāks* are still found in Purulia in about half-a-dozen villages, of which the most important are Pārā, Jhāpra (Dalton's 'Jumpra') and Raghunathpur. They are vegetarians and usually do not worship any god. On the 14th January (*Pous Sankranti* day) they make bulls from rice-powder and sacrifice it. They are still very much enterprising in monetary pursuits, and farming, money-lending and trade are still their main occupations. I have found Sarwaks also in the Chandrakona area of Midnapore, who are mostly prosperous weavers. They are also devout Jains. The story

of these *Sarwaks* in West Bengal has not yet been written, and their origin, rise and decline has not yet been traced. 'Sārwāk' is derived from '*Srāvak*', the Jain laity and the "most numerous class of all", according to Dalton, in Manbhum and Purulia. It is likely that a large portion of this 'Jain laity', with the decline of Jainism in Bengal, merged themselves with the different occupational castes (mainly trading) of this region, and a few orthodox laymen only stuck to their Jain identity as 'Sārwāks'. The physical features of the 'Sārwāks', described by Dalton in 1863, and witnessed by anyone in 1969, may also raise a very pertinent question as to whether the ancestors of these 'Sārwāks' were 'local converts', or 'immigrants'. Whatever they might be, there is no doubt that they were the most ardent money-makers in this region (like other Jains in Bengal), and that the medieval Jain religious centres, with their magnificent temples and images of Tirthankars, both in Purulia and Bankura, could only be erected with their monetary munificence.

Why Jainism failed in Bengal

The ideological content of Jainism, with its 'vegetarianism' and creed of 'non-violence', had never been able to exercise any spiritual influence upon the Bengali people. Bengal is essentially a land of the 'Mother-cult' and the 'Mother-Goddess', that is a land of Saktism and Tantricism, with Saivism as an adjunct of it. Jainism could therefore never penetrate into the deeper layers of the Bengali society. Buddhism and Chaitanya-Vaishnavism could make some headway because of their 'anti-casteism' and basic 'humanism', but both were largely swallowed by Hindu Tantricism at a later period. It is natural, therefore, that Jainism in this part of Bengal, during the revival of Hinduism in the Sena and subsequent period, will be largely thrown out of its weak social base, and its strongholds will come under the influence of Hindu Saktism and Saivism.

Rajputization and 'Sanskritization'

In fact there is hardly anything new in the recently advertised concept of 'Sanskritization' (see above). As early as 1890s it was clearly put forward by Risley, who observed, during several years of his district work in Chotanagpore, in the socio-religious movement a tendency of "the gradual Brahmanising of the aboriginal, non-Aryan or casteless tribes". But the tendency, Risley noticed, was not uniform everywhere at all levels. One of the notable processes of this 'Brahmanisation' which Risley observed in this region was this (H. H. Risley : *The Tribes and Castes of Bengal*, Vol-I, 1891) :

"The leading men of an aboriginal tribe, having somehow got on in the world and become independent landed proprietors, manage to enrol themselves in one of the leading castes. They usually set up as Rajputs ; their first step being to start a Brahman priest, who invents for them a mythical ancestor, supplies them with a family miracle connected with the locality where there tribe are settled, and discovers that they belong to some hitherto unheard-of clan of the great Rajput community. In the earlier stages of their advancement they generally find great difficulty in getting their daughters married, as they will not marry within their own tribe, and Rajputs of their adopted caste will, of course, not intermarry with them. But after a generation or two their persistency obtains its reward, and they intermarry, if not with pure Rajputs, at least with a superior order of manufactured Rajput, whose promotion into the Brahmanical system dates far enough back for the steps by which it was gained to have been forgotten."

The primary incentive to this Brahminisation of tribal chiefs is economic. When a tribal leader gradually establishes himself as a zamindar, and expanding his zamindary ascends to the rank of a Raja, he seeks ways and means to elevate himself socially also. His first impulse is to dissociate himself from his own poor tribal fellows, and then to climb up the social hierarchy. The most convenient social elevator in this case would obviously be 'Brahminisation' through, what may be called 'Rajputization', with the connivance of a Brahmin priest, skilled in the art of making pedigrees for the sake of money. This is the story of many local Raj families of Purulia. Not only in Purulia, but in Bankura, Midnapore, Burdwan and other districts of West Bengal also, there are many such "manufactured Rajput" Rajas. It has especial importance in Purulia because it is directly related to the process of 'Brahmanisation' which has set in among the tribal and semi-tribal ('scheduled tribes' according to the Census) people of Purulia. The process has started from the top and filtered down to the bottom. Raja's religion and religious practices has gradually spread their influence upon the *prajas*. What is most interesting is that the majority of these 'Rajas' and 'zamindars' of West Bengal betray a strange fondness for Vaishnavism, particularly those who have been Rajputized and Brahminised. And one wonders, why ? Possibly because Saktism and Saivism smack of crude tribalism, and lack the civilised refinement of Vaishnavism. Vaishnavism is a much more effective antidote to the coarseness of tribal and people's religion than either Saktism or Saivism is. Moreover, Vaishnavism, with its Krishna-Radha cult, offers much greater scope for exhibiting the extravagance of both wealth and refined emotion which Saktism or Saivism does not. It is therefore perfectly suited to the temperament of the Rajas and the Zamindars, and provides a better outlet for the release of their mental tension.

The Vaishnava 'Jhumur'

With the filtration of the process of Brahminisation from the top, the spell of Vaishnavism has therefore spread more widely among the tribal and semi-tribal masses of Purulia, although they still cling to many of their old religious practices and beliefs. The *Jhumur* songs of Purulia, which still retain the natural fragrance of folk-music, and are mainly composed of Vaishnava themes, may be cited as an instance of this spread of Vaishnavism. Some of the finest composers and singers of *Jhumur* songs belong to the Bhumij, the Mahato and other scheduled castes and tribes. Of about one hundred names of composers I could collect, I am mentioning only a few : Brajamohan Tanti (weaver), Kaliram Karmakar (blacksmith), Dwarik Hari, Chamu Sardar (Bhumij), Binand Singh (Bhumij), Sankar Singh (Bhumij), Radhanath Mahato, Baneswar Mahato, Pitambar Mahato, Gobardhan Charmakar (cobbler). Like Birbhum's 'baul', Manbhum's or Purulia's pride is '*Jhumur*'. The source of inspiration of both is Vaishnavism. '*Jhumur*', possibly derived from the older '*Jhombodhā*', is as old as *Krishna-kirtan* (15th century A.D.) and in Vaishnava *Padabali* we have —'Jhumur gahichey Shyam Banshi Bajayaya'— 'Shyam is singing *Jhumur* by playing the flute'. Another characteristic of *Jhumur*, which is also as old as *Krishna-Kirtan*, is its mode of 'dialogue' through the medium of extempore songs between two groups of singers, like the popular *Kabial* song of later period. In some of the most popular folk-festivals of Purulia, like the *Tushu parab*, this variety of Jhumur in extempore dialogue form is widely sung. Even boys and girls participate merrily in these dialogue-songs during *Tushu parab*. Not only in *Tushu* and other popular festivals, but also in various other seasonal songs of Purulia, this dialogue-mode of *Jhumur* is widely prevalent. For instance, the *Udhuā gēēt* which starts from the 1st of Magh after *Pous Sankranti*, and the *Ashar Kabigeet* which starts from the month of *Ashar* with the beginning of monsoon and paddy transplantation. Usually at this time the people are in gay mood, and for Purulia the advent of monsoon is an occasion for release with unbounded joy. At this season, therefore, the *Jhumur*, in extempore dialogue-form, offers the best medium of expression of the repressed desires and emotions of all men and women, especially peasants, in open fields, without inhibitions. These extempore monsoon songs, sung between men and women cultivators in dialogue-form, often have erotic overtones, but everybody is in mood to take them easy.

But this wide popularity of *Jhumur* in Purulia does not portray faithfully the depth of Vaishnava influence among the masses. Nor does the Rajputization and Brahminisation of the tribal 'Rajas' explain wholly the filtration of this process among the people. Messianic movements among the Mundas, the Oraons, the Bhumij, the Santhals and other tribes and castes in this region in the 18th and the 19th century, have also been responsible for the spread of this process. Of these, the Tana Bhagat, Bachhi-dan (Calf-giving) Bhagat, Kabir Panth, and Srinath Gosain's (Vaishnava) movements are worth-mentioning (Stephen Fuchs : *Rebellious Prophets*, A study of Messianic Movements in Indian Religion, Bombay 1965). The Vaishnava converts (Bhumij) of Srinath Sadhu "began to feel proud that they were leading a more 'civilized' and 'clean' life than their unenlightened brothers" (*Fuchs*, p. 68). As this sense of civilized refinement is associated more with Vaishnavism than with Saktism or Saivism, it is natural that Vaishnavism will have stronger appeal to those who want to be 'detribalized' and 'Brahminized'. That is one of the reasons why the influence of Vaishnavism is greater than that of Saktism or Saivism among a section of the scheduled tribes and castes of Purulia who have begun their expedition to 'Brahminisation'.

Conflicts and Contradictions of a Culture in Transition

There is hardly anything 'unique' in the usual socio-religious ceremonies and rituals of the Hindu community in general or of any particular Hindu caste in Purulia. What is interesting and unique is the conflict of a basically non-Hindu culture of some scheduled tribes and castes, now caught in the process of painful transition. The culture of the Bhumij of Purulia may be cited as a case in point. The instances of other scheduled castes and tribes—like the Bauris (110,000), the Bhangis (14,080), the Mahlis (5,073), the Karmalis (1,016), the Korwas (1,142), and even of such tribes as the Mundas (12,546), the Oraons (5,266) and the Santhals (1,77,000) may also be cited in this context. But the case of the Bhumij (about 39,000) has especial significance in Purulia from many points of view. There are some peculiar castes and tribes still existing in Purulia, such as the Bhogtas (986), the Ghasis (4,648), the Nats (895), the Bedias (1,191), the Birhors (100), the Cheros (559), the Gonds (735), the Savars (2,181), the Khonds (41), the Sauria Paharias (28) and others, who have contributed much to the making of an ethnological museum of Purulia.*

The Bhumij, although numerically not stronger than the Santhals or the Bauris of Purulia, are socially and culturally the most important of all other 'groups' of people for a study of this transitional cultural process. According to Risley, "the Bhumij are closely allied to, if not identical with, the Mundas" and he is inclined to believe

*Source of statistics : Handbook on Scheduled Castes and Scheduled Tribes of West Bengal : Tribal Welfare Department, Govt. of West Bengal, 1966.

that "the Bhumij are nothing more than a branch of the Mundas, who have spread to the eastward, mingled with the Hindus, and thus for the most part severed their connection with the parent tribe" (Risley, *op. cit.*). Dalton says that in Chotanagpore proper the term 'Bhumij' is seldom used, and "the Kols who form the bulk of the population call themselves Mundas or, as the name is usually pronounced in Manbhum, Muras. The title Bhumij, 'the children of the soil', is given to the members of the tribe settled further east" (Dalton : *Descriptive Ethnology of Bengal*, 1872). These Bhumij were the original inhabitants of Dhalbhum, Barabhum, Patkum, Baghmundi and were once chiefly located in the country between the Kasai and the Subarnarekha rivers. They had large settlements formerly to the north of the Kasai, from where they were dislodged, according to Dalton, "by Aryans, who as Hindus of the Kurmi caste" occupied their old village sites. This indicates that the ancestors of the present Mahatos migrated from some parts of Bihar to Manbhum (Purulia) and pushed the Bhumij farther south-eastward from their former settlements between the Kasai and the Subarnarekha rivers. It is likely that the term 'Mura' has been derived from 'Munda', and a large section of the Bhumij of Purulia still call themselves 'Muras'. In fact some of my Bhumij informants in Purulia still use 'Mura' as their title. Or it may simply mean 'head' (Mura= Matha, head) and like 'Munda' the 'Muras' might have been village headmen. Some of the other titles of the Bhumij of Purulia are Lāyā (priests), Patar, Sardar, Singh, Thakur and Munkey, of which the last two are indicators of higher socio-economic status.

Both Dalton and Risley noticed that the Bhumij farther east, in Manbhum (Purulia), had become "too Hinduised" to acknowledge their relationship with the parent tribe—the Mundas. But this Hinduisation or 'Brahminisation' has still remained incomplete and partial, and it seems that the process has stabilised at a stage beyond which no farther push is possible without thorough modernisation and uplift of the socio-economic conditions under which the mass of the Bhumij people live. Still the mixture of Hindu with non-Hindu traits in marriage, death and the religious ceremonies, rituals and festivals of the Bhumij, makes a really interesting study. Marriageable age of the Bhumij girls has come down lately from 15-17 years to 10-13 years, which is obviously associated with a sense of shame for a man to have grown up unmarried daughters. It is a positive symptom of 'Brahminisation'. In the elaborate rituals of Bhumij marriage, such usages as *gana-parā* (auspicious calculations, but not horoscope reading), *jommari* (pre-marriage feast), use of *sal* leaves and goat-dung as dowry, posting of two branches of *sida* and *mahul* trees on marriage day, erecting a *chāmrā* (shade) with *sal* leaves, have little of Hinduism. After marriage, the bridegroom and the bride accompany the near relatives to the village-god, and with god's blessings proceed towards the village-border. On the border, before the bridegroom leaves the village with his bride, one *grambriddha* (an old Bhumij) of the village meets them, blesses the newly married couple, and then, placing an arrow in the hand of the bridegroom, warns him thus :" "Remember my boy, you have acquired the right from today to enjoy only the 'flesh' of the girl you have married, and not her 'bone'. When she dies, you shall have to return her bone to the village and to her parents. If you fail to do that, this arrow will pierce your breast". This strange warning with an arrow to the bridegroom is a direct reminder to every Bhumij that he must not be oblivious of and disrespectful to the megalithic customs of his ancestors.

Another peculiar ritual associated with the Bhumij marriage is the 'acting' of a hunter's role by the bridegroom. This is done on the *astamangala* or the eight day of marriage, when the bridegroom, after performing usual rites in a tank, comes up with a bow and arrow, and releases one by one three arrows, aiming at something. The arrows are picked up by the bride, and one of the arrows, at least the third one, must shoot an animal. If it does not, the bride acts it up, and when the bridegroom asks her, 'what is it I have shot at', the bride replies, 'it's a hare or a deer'. Then the bridegroom says to her bride, 'you take the flesh, I take the bone'. This custom recalls the memory of past days when the Bhumij were originally hunters in this forest-region.

Ceremonies and rituals of the Bhumij, related to the disposal of the dead, bear striking resemblance to those of the Mundas. Originally the idea was that the bones should be carried to the village in which the ancestors of the deceased had first settled by clearing the forests. Risley noticed that the Tamarhia Bhumij of Midnapore shifted the bones of their dead to the great Munda cemetry at Chokahatu, in pargana Tamarh of Lohardaga. Similarly the Desi Bhumij of Midnapore went with bones of the dead to Kuchong in Singhbhum and some of the Singhbhum Bhumij to Suisa in Baghmundi of Manbhum (Purulia). This is not done now, and the cremation-burial grounds are now located near Bhumij settlements. The fragments of bones of the deceased, left unconsumed by fire, are collected and deposited in the burial-ground and a large stone is laid over it. These stones were once laid over the graves according to the rank and status of the deceased. For instance, upright stones (menhirs) over horizontal ones were alloted to Bhumij Sardar ghatwals, and simple slabs to ordinary ghatwal *tabidars*. This socio-economic distinction is not always main-

tained now in the Bhumij graveyard, and ordinarily upright stones are placed over filled-in graves of bones. This writer has seen several such graveyards with upright stones, sometimes carved with figures (mainly heroic), not only in Purulia, but also in many areas of Midnapore and Bankura districts, chiefly in Midnapore-Bankura sadar and Jhargram subdivisions (Benoy Ghose : *Paschim Banger Sanskriti*, Calcutta, 1957). There is hardly any doubt that this Megalithic culture-complex was once carried to this part of West Bengal by the migration of 'Kolarian' tribes, the most important offshoot of which are the present Bhumij of this region. And the Bhumij culture of Purulia, in general, presents the picture of a basically non-Aryan Austric culture in transition, passing through different stages of Aryanisation or Brahminisation. There is also a positive correlation between the different socio-economic strata of the Bhumij and the various stages of Brahminisation—the higher the socio-economic stratum, the higher the stage of Brahminisation, which is again predominantly Vaishnavisation.

There are no such conflicts or contradictions of a transitional culture among the Kurmis of Purulia. Whatever may be the basis of Grierson's distinction between the Bihar and the Chotanagpore Kurmis, and of Risley's conjecture that the Kurmis may be a Hinduised branch of the Santhals, it is almost certain that they are completely Hinduised and that they think of themselves as bearers of an unadulterated Hindu culture. The 'Mahato' or village headman of the Kurmis may correspond with the 'Manjhi' of the Santhals or the 'Sardar' of the Bhumij, bearing traces of a common Kolarian village system (which is doubtful), but this correspondence does not indicate any cultural interrelationship. The Kurmis are complete Hindus and are proud of their Hinduism. But the fact that some of their 'septs' are *Abadha*, *Jayswal*, *Kanauj*, *Maghaya*, and some of their titles are *Patel*, *Chaudhuri*, *Singh and Jayswal*, and that usually they employ *non-Bengali brahmins* as priests, at least in west Purulia, indicates that they are immigrants from outside Bengal, and have some links with Bihar. It may be, as was suggested by Dalton (see above), that they were a group of Aryanised people who long after the followers of Jainism, migrated from the Aryanised stronghold in Bihar, clashed with the earlier Bhumij settlers and dislodged them from their former settlements between the Kasai and the Subarnarekha rivers.

Gramdevata—Village-god

The village-gods, unlike the big 'town-gods' or 'city-gods', live a simple life with the people of the village, and as such they alone can tell the real truth about people's religion and culture, which the city-town-gods cannot. There are powerful and influential town-gods in Purulia, like Shiva, Kali, Durga, Krishna-Radha and their variants, who at times assume the role of village-gods also, but they do not represent all the facets of people's religion in Purulia. It is difficult to collect, without village-wise survey, the details of all village-gods of Purulia. These are some which this writer has been able to collect from different areas of the district :

Chakadiri	Bhagavan
Jahir-Buru	Dharam
Nara-hara	Bura-Buri
Shilphonr	Gram-deota
Duarsini	Karakata
Bansingh	Baghut
Chorua-Buru	Kudra-Sini, Buru

Almost all the village-gods are represented by pieces of stones. *Jahir-Buru* is worshipped in *Jahir-thān*—which is a sacred grove, supposed to be a tuft of primitive forest. Formerly, buffaloes and pigs were sacrificed, now this grove-deity is appeased only with offerings of fowl. *Jahir-Buru* has to be propitiated in Baisakh (April-May) and Falgun (January-February) for auspicious commencement of agricultural operations. *Nara-harā*, as the name suggests, was formerly appeased with human sacrifice. *Shilphonr* and *Buru* are mountain-gods. There are numerous village-gods with *sini* name in Purulia, Bankura and Midnapore districts, spreading over the adjacent Arambagh and Asansol subdivisions of Hooghly and Burdwan districts. They seem to be old forest deities in new forms. *Bhagavan* and *Dharam* seem to have replaced *Sing Bonga*, the supreme tribal god of this region. *Kārā-kātā* (*Kara*=buffalo, *Kata*-to cut) is another agricultural deity, to whom buffaloes and goats are offered before rains set in. The influence of this deity is gradually waning. *Bāghut* (from *Bāgh-bhut*) is a tiger-deity, whose duty is to protect his votaries from tigers. *Gram deota*, sometimes called *Deoshali*, is protector of village and also an agricultural deity. His worship is known as *gārām-puja* or village-worship, which is done on any day in Ashar (June-July) before agricultural operations begin. The day is chosen and announced by the presiding village *laya* (priest). Formerly buffaloes and pigs were offered to gram-devata, now only goats and fowls are sacrificed. *Bura-Buri* are household deities representing ancestor-worship.

These village-gods are dominant and popular in the Bhumij and Bauri settlements of Purulia. The Mahatos are worshippers of Shiva-Sakti, Sakti or Kali being more popular and dominant. Shiva is worshipped by the Mahatos with offerings of animals.

Dharmathakur is the most popular village deity among the Bauris and the Doms of Purulia. This popularity of *Dharmathakur* is widespread in

Bankura, Birbhum, Midnapore, Burdwan and Hooghly districts, and its spread in Murshidabad (Kandi), Howrah and 24-Parganas also is not negligible. Bauris and Doms are not the only worshippers of Dharma, but other 'Scheduled' and non-Brahmin castes also worship Dharma.

Some Festivals and Dances

Most of the festivals of Purulia are related to agricultural operations like sowing, planting, harvesting—and they move in cycles round the seasons. Appropriate songs and dances accompany the festivals. Starting with *Karam* and *Jawa* (seed-sprouting) *parab* (festival), one of such cycles terminates with *Tushu parab* in *Pous sankranti* by the middle of January with the harvesting of crops.

The *Karam* or *Jawa parab* is celebrated on the 11th day of the bright half of *Bhadra* (August-September). It is mainly women's festival. In the month of Bhadra, every night, the women sing and dance, and a few days before the closing of the month they fill some earthen bowls with sand and earth and throw seeds on them. These are carefully tended and watered so as to germinate by the *sankranti* or last day of the month. On that day a branch of Karam tree is brought from near-by forest and planted in a suitable site of the village. Around this branch the seed-bowls with sprouting blades are placed (known as *Jawar dali sajano*) and the girls (mainly young) sit in a circle, listening to *dharmu-karmu bratakatha*. After the tales are told, they sing and dance in a circle and either return home or go to attend the *Ind parab* which is also held on that day. The theme of *Karam* songs, as that of *Tushu* songs, is mainly centred round the longings and frustrations of girls, married at early age. As usual, the longings are all reserved for the girl's own parents and brothers, and her frustrations and displeasures for her father-in-law's family-members. For instance :

Bonay photay kurchi phul, Bon Karay a'o lo
Biti chailar michai janam, sashur gharer jala lo
(*Karam* song)

(Kurchi flowers bloom in forest, and they illuminate the forest ; the birth of daughters is useless, because of their sufferings in father-in-law's house).

Ato baro paus parabay
Rakhli ma sasur gharay
O ma parer ma ki bedan bojhay
Antar jhurey marey
Aman mon baley
Uray jaiay baisbo lo mayer kolay
(*Tushu* song)

(In such big Pous festival, my mother, you have kept me in father-in-law's house ; O mother, how shall other's mother know my sorrow, and my heart aches and weeps. My mind says that I should fly from here and sit on my mother's lap).

The *Karam* festival, it may be noted, is very popular among some non-Aryan tribes of Chotanagpore, particularly among the Oraons (Dalton : *Descriptive Ethnology of Bengal*, 1872, P. 259). There is no doubt that it has been partially Hinduised in Purulia. *Ind parab* and *Chata parab* are also celebrated with Karam. The germinated seed-bowls are taken from the karam-festival centre of the village to the place of *Ind*-worship. In Purulia the *Ind*-festival is a people's festival, in which any man can play the role of a king. But the *Chata parab* (umbrella festival) is connected with the local Rajas. It seems it was originally one festival which later split into two—The *Ind* retaining in Purulia the earlier people's tradition, and the *chata* bearing the status-symbol of the local feudal chiefs.

In the month of Bhadra other festivals are also celebrated, of which the *Bhādu* and the *Manasā* (serpant-goddess) are important. Men and boys usually participate in a kind of dancing at this time, known locally as *bhānr nāch*. One account of the origin of the *Bhādu* festival is that Bhadu was a daughter of Panchet Raj family who died a virgin for the good of the people, and was later deified. Another account is that sometime in the fifties of the 19th century, a beautiful daughter of the Raja of Kasipur in Purulia died young and to commemorate her memory the Raja instituted an annual festival with her image. Both the accounts seem to be later innovations and it may be that the tragedy of a local princess was linked up with a people's festival to enhance the prestige of a royal family. R. C. Dutt's observations on the festival, about 90 years ago, deserve consideration : "The worship is a purely aboriginal one, and the goddess Bhadu is not recognised by the Hindus, nor has she yet obtained any Hindu worshippers". She might have obtained Hindu worshippers at a later period, and actually Hindus participate in it now, but the festival is basically related to agriculture. "There can be no doubt the worship is connected in some way with the early rice-harvest, which commences in Bhadra" (R. C. Dutt : 'The aboriginal element in the population of Bengal', *Calcutta Review*, 1882). There is obviously a close inter-relation between the *Karam* or *Jawa*, the *Ind* and the *Bhadu* festivals, which are all agricultural festivals.

Twelve days after *Karam* and *Ind* is *Jitastami*, when pregnant mothers are propitiated. Though Hinduised, it may have some link with the fertility cult. After fifteen days of *Jitastami* the *Durga puja*, a kind of a national festival in Bengal, is celebrated. After *Durga puja* in Aswin the most important festival of Purulia is *Garayā parab* or cattle-festival, celebrated in Kartick (October-November), on

the next day of Kali *puja*. It is also known as *Saharai* or *Bandhna parab*, particularly in west and south Purulia. It begins on Kali *puja* night with drink and dance. The cattle are kept awake by the constant beating of drums, and loud *Ahira* songs are sung with it :

Ahi rey—
Kothai achey bhala kachi kachi ghas rey
(babu ho)
Keha to charai dhenu gai rey
Agay jagabey dhenu gai rey
Ahi rey—
Nadir dharey dharey kachi ghas rey
(babu ho)

(Where is good green grass ? Some are tending the cattle, but keep the cattle awake. There is green grass beside the river). There are *Ahira* songs with Vaishnava themes also, invokingKrishna, Radha and Yashoda. Next morning, pujas are offered inside the cattle-shed. The following day, that is on brothers' day (*Bhratridwitiya*), the *Gorukhonta* and *Kārā-Khota* rituals are performed. On this occasion the horns of cows and buffaloes (*Kārā*) are smeared with vermilion and oil, and some are tied with strong ropes to different posts, planted close to each other on village-streets. These are then frightened by frantic drumming, and often by the display of red cloth, blanket or skin, till they break away from the posts. This *Bandhna parab*, was once celebrated, rather brutally, by the Bhumij of Dhalbhum. The buffaloes, driven into a small enclosure, were shot with showers of arrows, till they fell goring each other. The people then rushed in and hacked at them with battle axes till they were dead. This *parab* was put a stop to in 1865 (Dalton : *Descriptive Ethnology of Bengal*, 1872, p. 176). The *Bandhna* or *Garaya* festival of Purulia is a refined Hinduised form of this old '*Binda parab*' of the Bhumij.

After *Garaya* or *Bandhna parab* the next important festival is *Pous parab* or *Tusu*, a separate account of which has been given in this volume. From the first day of Magh (15th January), the rice-cake (*Pitha*) ceremony is held, which is also known as *Bhan Singh* (a village deity) *parab*. *Sal* posts are planted in villages, before which offerings of goats, fowls and pigeons are made. The village people go about merry-making, with cock-fighting, sheep-throwing and catching (called *bherā-orāi*), singing, dancing and drinking.

In Chaitra, the famous *Chait parab* is widely celebrated throughout Purulia, with *Chau* or mask dance (see separate article on *Chau* dance in this volume). Baisakh turns out to be a very colourful month for large-scale performance of *Chau* dance in Purulia. In Baisakh the famous tribal festival, *Sahrul*, is also celebrated, along with *Dharmathakur* which spreads over Jaistha and Ashar in some areas.

Besides the *Chau* dance and other festival dances, *Lātā-nach* of Purulia is worth mentioning. The word 'lātā' has been derived from 'nātua' (dramatic) and *lātā*-dance is a heroic dance requiring great physical skill and strength of the participants. It is performed with big *dhenki* (wooden corn-pounder), cart wheels and jars filled with water. With the decline of physical strength of common people, who are very poor, this heroic dance is gradually fading away. Although Pauranic themes are mainly represented in *Chau* dance, it should be noted in this connection that, in Purulia at least, it is still carrying a heroic tradition in most of its performances (gestures, postures and steps), which the Seraikela or Mayurbhanj *Chau* dance hardly does. If we remember the great tradition of tribal *Jātras* (open air acting) and dances of this region, and also the exemplary heroic tradition of the Bhumij and other local tribes as valiant fighters for freedom, it may be possible to imagine that the *Chau* dance originated somewhere here, in and around Purulia (Chotanagpore), with this heroic tradition of acting and dancing. In the process of its Hinduisation and 'detribalisation', especially under the royal patronage of the Seraikela and the Mayurbhanj Rajas, it became steadily refined, devitalised and civilised, rather more 'artistic' and 'urbanised'.

There is *Dāndhsyala* dance in Purulia, which is a perfect adaptation of the Santhali dance. Usually village-girls participate in this dance in rows, holding each other's waist and swinging rhythmically backward and forward. The *Nāchni nāch* is a kind of *Baizi nach*, which has probably come down to people from the courts of local rajas and feudal chiefs, as well as of rich local aristocracy.

Summing up

This cultural profile of Purulia may suggest, it is hoped, some interesting clues for filling some vacant spaces in the total cultural landscape of Bengal. The vacant space between prehistory and history, between pre-Aryan and Aryanised culture, between the different strata of Aryanisation or Brahminisation or Hinduisation, and also between the 'material' base and the 'non-material' or 'ideological' superstructure of Bengali culture, may largely be filled by hard field-work in this part of Bengal, among the people and with the people. The work is to be done with a sense of 'dedication', and not with any immediate 'academic' or 'official' end in view. If that is done, it is almost certain, that the history of Jainism in Purulia and the study of its people's religion, ceremonies and rituals, village-gods and festivals, folkways and mores will yield fruitful results for assessing the cultural stratification, as well as the cultural configuration, of the Bengali people.

ACKNOWLEDGMENTS : My indebtedness is boundless to Shri Mrinal Sen Gupta (now in Bankura), who is very much interested in this kind of work and has ungrudgingly given me all possible help and co-operation during my fieldwork in Purulia. I should also record my gratitude to Sri Bhutnath Mukherji of Bagda (Purulia) for his active assistance during my tours in Purulia.

I am deeply appreciative of the numerous information given by many informants in Purulia during the preparation of this brief cultural note. For especially generous and helpful information I am indebted to Swami Hiranmayananda, founder of the Ramakrishna Mission Vidyapith of Purulia, who could persuade local villagers to offer some excellent Jain images and antiquities for the museum of the Vidyapith ; to Sm. Labanyaprava Ghosh and Sri Arun Ghosh of Loksevak Sangha Silpasram ; to Sri Kalikinkar Chaudhuri (teacher), Sri Bibhuti Bhushan Sen and Sri Doman Sunder Mura of Jhalda; to Sri Bibhuti Bhushan Mura (teacher) of Ichag and to Sri Balaram Laya of Ona.

TUSU—A FOLK FESTIVAL

by

DR. TUSHAR CHATTOPADHYAY

TUSU is one of the chief Folk festivals of Bengal. Like the Durga Puja festival in the plains of Bengal Tusu is the greatest of festivals of the western border of Bengal. This festival is observed widely in the regions of Manbhum, Bankura and Midnapore. The prominent centres of this festival range from Purulia, Bankura and Midnapore in West Bengal to Dhalbhum and Singhbhum in the province of Bihar. In respect of popularity Purulia is the epicentre of the Tusu festival, although it is in vague more or less around this centre. The regions of Purulia can be claimed as the source of Tusu festival in view of the popularity of the festival, its wideness and folk-tales relating to the traditional hearsay about Tusu. From the last day of the month of Agrahayan to the last day of the month of Pous *i.e.*, for one month the Tusu festival is performed. The communities of Mahato, Kurmi, Bagal, Bauri, Bhuina, etc. and the tribals in general observe this festival with special pomp and grandeur. Though in different areas Tusu Puja is mainly restricted among the lower caste people, but in Purulia almost among all the strate and classes Tusu festival is in practice.

Relating to Tusu there are various folk-tales current among the folk-society. In one of these folk-tales—during the Moghal Rule Tusu was born in a Hindu family. From infancy Tusu was exquisitely beautiful, in youth her beauty blossomed further. Tusu was an object of attraction for all men. While her parents were busy to find out a suitable bridegroom for her, a muslim ruler became charmed by her beauty. Knowing that the Hindu parents of Tusu would not give her in marriage to a Muslim, the Muslim ruler became active to snatch her away by force. In this situation considering it unsafe for herself, her parents and relatives, she fled away secretly. Getting the news about her flight the Muslim ruler and his followers chased her. Reaching the bank of a river while she was about to be caught, Tusu strangled herself with the end of her cloth and plunged in the full flood of the river in order to safeguard her chastity. The place from where Tusu sacrified herself into the river is known as the 'Satighat'. Since that time Tusu is worshipped as an ideal of chastity in the folk-society. In another folk-tale—she was a daughter of the Kurmi community, her name was Rukmini and her nickname was Tusu. In beauty and qualification Tusu became a character by herself. She was in love with Kurmi youngman. On the day while the wedding was taking place, before the ceremony was over a band of Muslim robbers raided the house and kidnapped Tusu and her husband away. The Muslim raiders released them when they came to know that Tusu and her husband used to take ham which is prohibited for the Muslims. Tusu returned to her own village. The local people and her relatives objected to her marriage with the Kurmi youth became a mendicant and went to the forest, and Tusu began to pass her days without food and sleep. At last one day Tusu left her home in search of her beloved. After much toil she could found out and met her husband in the garb of a 'Sannyasi' on the bank of the river Subarnarekha. But her meeting was incomplete, Tusu being sick due to want of food, sleep and the exertion of the journey, died on the bank of Subarnarekha under the police station Ichagarh. Afterwards, this site was named as 'Satighat'. In modern times too a huge number of people assemble during the Tusu festival at 'Satighat' under the jurisdiction of Ichagarh police station in the district of Singhbhum. In another folk-tale—Tusu is depicted as the daughter of the King of Kasipur in Panchakot. The most beautiful and universally loved daughter of the kind suddenly fell ill and she died an untimely death on the last day of the month of Pous. The Tusu Puja was introduced from that time. In another folk-tale—a similar story is found with a difference that Tusu was the daughter of the King of Jhargram instead of the King of Kasipur.

Generally, Tusu is worshipped widely with the symbol of an concave earthen plate. Tusu is placed in a corner of a room decorated with 'Alpana' or at the foot of the homestead pole (Bastu Khunti) or on a particular altar or in the niche of the room. The earthen plate is generally painted with the paste prepared out of rice-powder and water, and in many cases red and white lines are drawn on it with vermilion and chalk. On the earthen plate new paddy, husk of new paddy, balls made of cow-dung and husk, balls of cow-dung, paddy strewn on hemps of cow-dung, paddy and grass, mustard and radish flower, cowrie and mustard, etc. are placed. In certain places lighted earthen lamp is placed on the earthen plate. Next in importance to the earthen plate is Tusu *ghat* (small pitcher)—filled with water. Tusu *ghats* are of two types—(1) earthen pitcher painted with the face of a woman and (2) earthen pitcher having lines drawn with cow-dung and rice-paste with dots of vermilion. On the mouth of Tusu pitcher similar items are placed like that

of Tusu plate. One of the distinct particulars of Tusu is Choral (differently pronounced as Chodal, Choudal, Choul); Choral is a chariot-like four-legged structure made of strips of bamboo sticks or wood covered with coloured papers. Their size vary from one cubit to five or seven cubits in height. In places the Tusu plate is placed inside the Choral or in some places Choral is placed beside the Tusu plate or Tusu image. In many places like Punyapukurbrata—sacred-pond rite, Tusu Puja is performed after digging a small pond-like hole filled with water in the courtyard of the house with paddy husk and flowers. In certain places Tusu image is also current. The rural potters make idols of various shapes big and small of Tusu. Though in some public festivities big images are found, but the traditional measurement of Tusu is not more than one cubit generally. The complexion of Tusu is yellow and the wearing is blue. In the two hands of Tusu paper-lotus are helf and behind the head of Tusu a similar hallow or a circular canvas of coloured papers are placed. The almost plain breast of the image represent the minor maiden character of Tusu. The Tusu image is decorated with various ornaments made of cork, coloured paper and tin-foil. The image of Tusu is found in standing posture generally. Although Tusu is without any carrier generally, in some places Tusu image is rarely seen seated on a swan. Perhaps in later times swan as carrier of Tusu was introduced by the influence of the image of Saraswati. The Tusu images are generally placed on a small wooden stool or on a belmetal plate.

There are some distinct stages of the festival and worship of Tusu—*Sthapan*, *Palan*, *Jagaran* and *Bisarjan*. On the last day of the month of Agrahayan the Tusu image is placed *i.e.*, *Sthapan* (placing) ; throughout the month of Pous from the evening till late hours in the night the worship of Tusu is performed with dance and song *i.e.*, *Palan* (observance) ; throughout the night before the last day of the month of Pous Tusu Puja is performed with dance and song *i.e.*, *Jagaran* (keeping awake) ; and on the next dawn *i.e.*, on the last day of the month of Pous Tusu is immersed in the river or in some local pond *i.e.*, *Bisarjan* (immersion). In Tusu Puja from the start to finish there is no use of 'Shastric Mantra'. The Tusu festival is observed through dance and song.

Generally in the evening of the last day of the month of Agrahayan the image of Tusu is placed. Tusu image or *ghat* or earthen plate is placed in a particular corner of the room painted with the paste of rice-powder or in a niche of the room or on an altar or at the base of the Bastu Khunti. This is known as 'Tusu Pata' or 'Sara Pata'. In some places on the day of the placing of Tusu eating and catching of fish, preparation of rice-cake, making of buskets sneared with cow-dung and husk, etc. are performed as formalities. At the time of the placing of Tusu yellow cloth is offered to Tusu. During the placing of Tusu the womanfolk sing :

Navannar Dhan Bhanlyam Navannar Dhan
Tar Guccher Tush Rakhlyan Tusu
Mayer Than.
Dhane Dhane Marai Bhara
Amra Sajai Tusur Sara.

Or,

Chal Sajanee Tusu Pataba
Amra Tusu Puja Kariba
Chal Sajanee Tusu Pataba.

Since the placing or *Sthapan* of Tusu on the last day of the month of Agrahayan Tusu Puja is performed everyday throughout one month. During the day-time flower offerings are made to Tusu. As offerings pounded rice, gur, puffed rice etc. are placed before the Tusu image or Tusu plate. On every evening a lamp is lighted near the image of Tusu and till late hours in the night dances and songs are performed by the assembled womanfolk. Of course, the dance rarely performed now-a-days. Daily during the evening performance waking up of Tusu are—*Tusu Jagano* is observed :

Tusu Naki Etai Ghumaiche
Tusuke Uthain Basain Jagai de—
Tusu Naki Etai Ghumaiche.

After the waking of Tusu various songs are sung till late hours when the women bid good-night they put Tusu to bed by lullaby—this is called '*Tusu Dhulano* :

Tusu Dhul Dhul Dhul go
Age Jaye Ma Hati—Ghora
Pachu Jaye Ma Jhari
Jharir Chalane Mora
Chalite Na Pari
Tusu Dhul Dhul Dhul Go.

After the performance of the dance-song throughout one month the night before Pous Sankranti (the last day of the month of Pous) is observed with speciality. That day is called 'Banuni' or 'Banuri'. Dances and songs are performed throughout that night. Of course, dance is almost extinct now-a-days. Fireworks and in some places fire is kept burning throughout the night. Fire is never allowed to go off and encircling the fire dance-song is performed. In many places the customs of taking fish is compulsorily observed. Keeping an earthen lamp burning throughout the night near the place of Tusu or placing Tusu in the courtyard dance-song is performed. In many places Tusu of one house is given in marriage with the Tusu of another

house, or Tusu of one locality is given in marriage with the Tusu of another locality. That night passes with unrestrained festivity encircling Tusu. Though the maidens take more initiative in the worship of Tusu in the *Jagaran* night the married, young, middle-aged and old women *i.e.*, women of all ages take part. In many places the menfolk also cooperate in Tusu song in the *Jagaran* night.

The day next to Pous Sankranti or Makar Sankranti is the day of *Bisarjan* (immersion) of Tusu. On the dawn of Pous Sankranti the womenfolk carrying the Tusu image of Tusu plate and Choral go round the roads and assemble at the place of immersion. In the procession of immersion the women sing and the men go on playing with *dhol, dhamsa, madal, flute, kansi* etc. The image of Tusu, Choral and Tusu plate or *ghat* (small pitcher) are thrown in the water. During the immersion the women sing :

Tiristi Din Railey Tusu
Tiristi Ful Pele Go
Ar Rakhite Larbo Tusu
Makar Alo Badi Go.

Or,

Aghaner Sankrite Ele Tusu Dhan
Pos Masher Sankrat Holo Bhange Tusur Man.

Or,

Pous Masher Sankrat Holo
Tusur Man Bhangila
Sahale Felia Tusu
Oi Jalate Bhasila.

Or,

Ai Ke Jabi Ai
Amar Koler Tusu Jale Jai.

In many places only the Choral is immersed and not Tusu image, plate or pot. Along with the offerings of the Puja Tusu plate or pot is preserved in a particular corner of the room throughout the year—this is known as keeping the Lakshmi (the goddess of wealth) tied, or 'Lakshmi-bandha'—in one's house. After the immersion of Tusu the women bathe and wear new or clean cloth. At last, the finishing of the Tusu Puja is celebrated with a feast of rice-cakes and sweet rice-porridge (of frumenty).

It is to be noted that the most important part of the Tusu festivity is Tusu Mela (fair) which is held on the occasion of Tusu immersion. The economic basis of the Mela is prepared by the harvesting of the new crop (*aman* paddy) in the month of Pous. Besides people have enough leisure during this part of the year. In proper back-ground small or big fairs are organised at the places where Tusu is immersed. On the occasion of Tusu festival massive assembly of people are held in these fairs. As a general feature in the Mela there are arrangements for various merriment and shops. Excepting dance-songs centering round Tusu, *ghora-natch, jhumur-natch, sang-natch* etc. are performed. One of the chief remarkable features of the Tusu Mela is the free-mixing of boys and girls and mutual jokes and frivolities. Some instances of utterances and counter-utterances of the boys and girls through songs-rhymes in the Tusu Mela may be noted :

Girl— Tusu Dekhte Ali
E Tor Keman Purusali

Or,

Ore Ore Kalo Chora
Tor Sange Ki Hat Jabo
Parar Loke Jigas Korle Go
Ki Bole Jabab Dibo.

Boy— Makar Parabe
Churider Pa Parena Garabe
O Haya Makar Parabe.

Topically it may be mentioned that the girls pick up friends—'Fulsai' (flower-friend) by setting flowers on their heads mutually in the Mela and in many cases through free-mixing the boys and girls select friend of choice—'Maner Bandhu'.

Song is the main basis of Tusu Puja. Tusu festival is performed by folk-song althrough. In the folk festivity of Tusu there is no place for Shastric or priestly code. The Tusu festival is performed on the basis of folk-rites through dances and songs. The dance of Tusu festival has become almost secondary, the song occupies the place of primary importance. The Tusu folk-song occupies the place of Shastric Mantras. Fundamentally, as a festival of the womenfolk the Tusu-songs are composed by them orally, of course, exceptions are also observed. The Tusu folk-songs are sung with the traditional folk-tune. In the Tusu-songs Tusu is solely a daughter of a Bengalee family, and in Tusu-songs no glory of godliness about her is extolled. Above all, in Tusu-songs Tusu is only a symbol, the hopes and desires of the women's heart is manifested through Tusu-songs. Albeit, the hopes and desires of the women's heart is mainly expressed through the Tusu-songs,—the contemporary events the experience of personal mutual life, social rules and policies, political events etc., that is the picture of the entire society is unfolded. Though Tusu is placed in a place of deification, the folk-society never keep Tusu separated in any way, or, create a spiritual raptness with Tusu. Basing on Tusu

the folk-society through tune and song express the feelings of weal and woe, hopes and aspirations of life.

During the elections, political controversy influence the composition of Tusu songs. A few instances :

Haler Balad Jora Balad—Tusu Tumi Chine Nao
Bhul Karona Deshabasi Congresske Sab
Vote Dao.
Ei Bhoteti Chalbe Sashan, Desher Satru
Habe Rokha
Bhulona Bhulona Bideshi Dalaler Dhoka.

Or,

Tusu Tumi Vote Diona Jora Balade
Parbi Shess Bisham Galade
Ayere Tora Chalre Tora Jana Sarthe
Vote Dibo
Jukti Kore Jot Hoe Sab Hakim
Hukum Badlabo.

During the re-organisation of States, the various Tusu-songs related to the Bengali language became the mainstay of the mass movement for the inclusion of the regions of Purulia within the territory of the State of West Bengal,—

Amar Maner Madhuri
Sei Bangla Bhasa Karbi Ke Churi

Or,

Bangla Gane Tusu Amar
Makar Dine Sankrate
Tusu Bhasan Parab Tare
Tusur Gane Man Mate.

Or,

Amar Ma Gayeche Ghum Parani Gan
Sei Bhasari Je Apaman.

Or,

Amar Bangla Bhasa Praner Bhasare
O Bhai—Marbi Tora Ke Tare
Bangla Bhasare

Perhaps the songs, which are composed basing on the contemporary political, social events, may originally be created by some educated conscious mind and in places their written or printed forms may also be found, but in the folk-level those are accepted and re-created in the collective feelings of folk-society spontaneously, and attain the fundamental features of folk-song evolving through oral tradition.

A particular aspect of Tusu songs is 'Tusu Jigir'. On occasions, between the two groups of women song—tournament like the contest of poets—'Kabir Larai' is found—this is Tusu Jigir. In such contests songs censoring the neighbouring Tusu and florifying the native Tusu are sung. During immersion in many cases the contest of Tusu songs become obscene and erotic. At this time besides the current Tusu songs, many Tusu songs are composed and sung orally on the spot. In many cases in such Tusu songs the nature of rhymes are more manifest than that of a song.

Learned opinions differ regarding the features and significance of Tusu festival. Some are of the opinion that the Tusu of the western border of Bengal is inseparable from the current Tus Tusali Brata of different parts of Bengal and in reality Tusu is a transformation of Tosla Brata of other regions. Some say that Tusu is a kind of Ganga Puja. Some opine that Tusu is a product owing to the influence of Bhadu festival and some consider that the Puja connected with Pusya or Tisya Naksatra (eighth Star of Hindu Astronomy) is Tusu festival.

By analysing the nature of Tusu festival it is understood that the Tusu festivity of the western border of Bengal is not a changed form of Tosla Brata which is in vogue in different parts of Bengal. According to the geographical and ethnological characteristics of the western border areas of Bengal the Tusu festival is enriched with the indegenous spontaneous regional features. Many scholars hold that Tusu and Bhadu are mutually related in view of the similarities in area, idol, story and functional aspects of song and dance of the two festivals. By stretching this view they observed that Bhadu is the product of the influence of Tusu, or, on the contrary Tusu is the product of the influence of Bhadu. But in real inference, it is understood that inspite of apparent similarities between Bhadu and Tusu neither is the product of the influence of the other. In reality, the festivals of Bhadu and Tusu are to be judged as festivals bearing the characteristics of an agricultural society. As per current opinion Bhadu is the worship of a memory, but it is not so. The Bhadu is an agricultural festival of the Bhadui crop (in the month of Bhadra) of the western border regions of Bengal (vide : Folk Religion of Bengal and Bhadu Ritual—Tushar Chattopadhyay, Summeries of Papers : All India Oriental Conference XXIV Session, October 1968 Varanasi, Philosophy and Religion Section (10)-PR-12, Pp. 210-211). And Tusu is the agricultural festival of the Pausali crop (in the month of Pous) of the western border areas of Bengal. It is redundant to mention that there is no such direct or indirect similarity with Tusu and Ganga Puja so that Tusu festival can be categorised as Ganga Puja. Above all, there is no specific reason to link up Tusu festival with Pusya or Tisya Naksatra. According to the Shastras the month of Pous is

associated with Pusya Naksatra. The Pusya is otherwise called Tasya, and Tusu festival is derived from this Tasya—this is the opinion of some scholars. It is needless to note that in general the folk festivals never originate or develop according to the Shastric Tithi and Naksatra (Day and Star). Basing on the historical, geographical, social economical environs of folk life, its basic hopes and aspirations, joys and pains, necessities and beliefs, etc., the folk festivals originate and evolve. In Bengal where agriculture is predominant, specially in the rural areas, the month of Pous is of great significance. In the folk-society the month of Pous is considered as 'Laksmi Mash' *i.e.*, the month of wealth, because in this month new paddy (Natun Dhan) is harvested by the cultivators. The Navanna or Pitha Parban (new-rice festival) is performed in the month of Pous. One of the main items of Tusu Puja is 'Tus' (coarse covering of rice *i.e.*, husk). Tusu festival in general indicates its relation to agriculture. The earthen plate of Tusu may be considered as the symbol of the earth and the water-filled pitcher, cow-dung and husk appear to be the symbols of irrigation, fertiliser and crop respectively. In reality, in Tusu Puja the formal use of cow-dung, tus, and earth is the symbol of fertilising the field, and the ceremonial use of cow-dung and husk is the remnant of the magic belief of fertility cult *i.e.*, the belief of having full crop out of the empty covering of rice. In this connection it may be noted that special formalities are observed centering round the cow, which is the main aid to agriculture, during the festival in many places. In true sense, 'Tus' means husk of rice and the word Tusu is derived from Tus. Thus Tus is related to Tusu both etymologically and ceremonially. It is a folk festival undoubtedly connected with the crop, and the Tusu festival is the worship of the agricultural deity 'Krishi Laksmi'. Later on, as a result of the transformation of the socio-economic environs, and inspite of many changes in the story, the formalities of the ceremony, songs, dances and observances of Tusu if judges with the scientific outlook of Anthropology, Sociology and Folklore the Tusu festival is fundamentally a post-harvest folk festival of an agricultural society.

III

CHOW DANCES OF PURULIA

by

DR. ASUTOSH BHATTACHARYYA

Rabindra Professor, Calcutta University

Over a wide area of the district of Purulia in West Bengal there is prevelent a form of folk dance known as Chow dance which is one of the remarkable specimens of not only of folk-dance but also of dances in general of India. The word Chow seems to have been derived from the sanskrit word *sang* (सङ्ग) meaning a clown or an actor in a farce or a pantomime. As a matter of fact the dance as it exists today, has noting to do with any clown or pantomime, therefore it seems that it has developed its present characteristics from a primitive stage in which it was associated more or less with clownish characters and farcical performances.

Even now in the course of performance of a continued narrative like the Ramayana and the Mahabharata some special kinds of war-dance are introduced between two scenes for comic relief. They are locally known as *Kap*. Special types of masks representing demons and demi-gods are used for this purpose.

The main characteristic of this particular form of folk dance is that appropriate masks made of paper-pulp and as such feather weight are used by the dancers in the course of their performances. The masks cover the entire face of the dancers leaving only two holes at the place of the eye balls and two holes at the place of the nostrils allowing sight and breathing facilities respectably as far as possible. In view of this fact this form of dance is generally known as mask dance or *mukhā nac*. It is doubtful whether at the very beginning of this form of dance masks were associated with it. It seems that during the period when this region was influenced by Hinduism and the themes of the Ramayana and the Mahabharata were introduced into this dance from, the masks representing the characters of the epics found a place into it. Originally the faces must have been painted, but now-a-days no trace of this practice can be seen anywhere.

Chow dance of Purulia with its characteristic features has failed to spread beyond its own region due to various factors. Firstly the dance troupes have to depend on a particular group of people who live in one village only for the supply of masks they use. The way of making the masks is also peculiar to one particular group of people oiving over this particular area. The village Chorda within the Baghmundi police station of Purulia district is the home of the masks-makers. About forty families of mask-makers live in this village which supplies masks throughout the neighbouring areas. One or two families have however migrated from this village and settled down elsewhere in the district but by being detached from the parent body they have lost the link of tradition and their products have very little or no significance.

The second factor of this dance's not being able to spread elsewhere is that the spirit of this dance is as it were integrated into the life of the people of this area. Chow dance is originally and fundamentally a war dance. The people who live over this area are most vigorous in character. Chow dance is a reflection of the inner character of this vigorous people. Their blood boils in their vein when they listen to the loud beat of drums. This is still evident from the excitement the audience feel as the dances progress. The people who still practice chow dance were originally food gatherers instead of being food producers. They live over the jungles and hilly areas. They were a hunting people of nomadic character and still hunting forms a special feature in their dance. As we advance towards east of the district of Purulia where the land is plain and forests are rare we find this dance is less developed and even non-existant.

Another essential features of Chow dance is that it is ritual in character and not even a fraction of it has so far been secularized. The people among whom the dance is prevalent are mostly illiterate and Hinduized aboriginals. But they strictly adhere to the orthodox Hindu ideals when they perform the items of their dance. They draw inspiration either from the Ramayana or from the Mahabharata and discard any popular source. Dances are performed on the occasion of the annual worship of the sun-god, but due to Hindu influence known as 'Siva', Though public performances start from the date of the annual worship of the sun-god or from the day of Gajan yet in the Baghmundi area the people are initiated fromally for the training in this dance on the date of annual worship of the local hill-god Matha Burung. Every performance must begin with the dance of Ganesh who is worshipped first, and before any offering is made to any other gods or goddesses according to orthodox Hindu tradition. The dancers aboriginals and semi-aboriginals as they are have practically no affiliation as far as orthodox Hinduism is concerned. Yet they are

extremly cautious against any possible infiltration of unorthodox ideals. They follow the tradition blindly. Therefore, no subject matter has been able to enter into Chow dance since it had been codified on the present line. But the performances have improved immensely in the course of the last few years.

Originally the local feudal chief known as the Raja of Baghmundi was the great patron of Chow dance. It was due to their patronage that the dance could develop into a definite form of artistic character. Therefore, the best specimen of Chow dance can still be observed around the area with Baghmundi as centre. Since the abolition of Zamindari the Raj family has naturally ceased to be its patron, but the people of the area have been continuing tradition with zeal and energy. It was already codified into a rigid system and therefore even after it passed into the hands of the people the system already established has not been broken down.

The forty families of mask-makers who live only two miles away from Baghmundi in a village named Charida were settled there by the Rajas of Baghmundi. After their adoption of Hinduism the Rajas who were local tribal chief claimed their descendants from the Rajputs and in order to worship Hindu gods and goddesses settled some families of image makers from the interior of West Bengal. From a study of the geneology and the social customs of the members of the families of the mask-makers it has been found out that they have migrated from somewhere in the district of Burdwan and they constitute a group of Caste Hindus. Land was donated to them in exchange of making images of different gods and goddesses during their annual ceremonial worship by the Raja of Baghmundi. Land record of one member of the family shows that it was offered a land covering about two bighas on condition that it would supply to the Raj family one piece of idol of Bhadu during its annual worship. The image in those days would not cost more than 12 paisa. Thus it would be seen that the grant was rather generous, in consideration of the material supplied by the tenant. Now as the Raj family has been deprived of its pristine glory and seasonal worship of Hindu gods are not held, the images are not supplied. It seems that originally the artists were settled over the area for making clay images of Hindu gods and goddesses by the newly converted Hindu Rajas and ultimately they adipted the art of mask-making probably from some traditional local source now lost. Otherwise masks of this nature and mask dances of this character are nowhere met with in any other part of Bengal.

There was a crisis period of the mask-makers as far as their business is concerned during the last World War, but it is now over and during the two months of the year from April 13th to June 13th they make flourishing business. During this period some of them go to the district town of Purulia and carry on their business there by opening temporary stalls or shops. Making of masks is a family affair and children and women help the male members in the different stages of making the masks.

The mask-makers are well acquainted with the episodes of the Ramayana, the Mahabharata and the Puranas and while making the mask they take extreme care that the tradition of the classics is strictly adhered to. Therefore, chow is dependent on mask-making and as such it is a jont-enterprize of the mask-makers and the mask dancers. Sometimes mask-makers themselves take part in mask dances. The mask-makers follow the Bengal School, popularly known as the Krishnagar School of realistic art in making the mask. This School of art was introduced by the Maharaja of Krishnanagar of Nadia district in West Bengal during the eighteenth century, and as such the image-makers of Charida in Purulia must have migrated to Purulia after that period most probably during the beginning of the nineteenth century.

There seems to be a practical reason behind the origin of the use of masks in Chow dance. There is a number of folk dances over the area in which Chow dance is prevalent where no mask is used, but they are all of secular character. Therefore, it is apparent that with the spread of the influence of Hinduism over the area, among the aboriginal and semi-aboriginal people, masks representing various Hindu mythological characters were introduced in the dances which already existed in a primitive form. In order to give an authentic and realistic touch to the divine characters of mythology appropriate masks were adopted to cover up the ugly human features.

Along with an adequate knowledge of the Hindu mythology a craftmanship of high order is necessary to quality masks. Both these accomplishments are hereditorily possessed by the mask-makers of the village Charida. These people live in isolation surrounded on all sides by the Hinduzed aboriginals, yet they have been able to follow the orthodox Hindu tradition most rigidly without any corruption or modernization of the ideals. This attitude of the artists has guarded this artists has guarded this art against any possible deterioration.

I have already stated that Chow dance is based on war dance and the incidents of war between two opposing parties are always given prominance to in the course of representing the epic theme. Any composition of Chow dance is locally

known as chow *yuddha* or chow war and in general Chow dance is also known as chow yuddha (chow war). Therefore, Chow dance is the dance of men and not women. The fundamental movements of this dance cannot be faithfully performed by women. In order to give a complete character of the episodes sometimes women characters—they are always men in the guise of women—are introduced. But such characters never perform the essential features of this dance. The *main bhava* of all the items of dance is *tandava* and never *lasya*. Therefore, it is only Durga or Parvati in her aspect of destroyer of the demons Mahisha, or Sumbha and Nishumbha that appears as a full-fledged women character in the Chow dance performance. When in the legend of the Ramayana characters like Kausalya, Kaikeyi, Sumitra or Sita appear, each of them make only a show or apology of dance graceful and befitting the dignity of the characters but when the demoness Tadaka appears to fight Rama and Laksmana she dances Tandava, till she is ultimately killed by Ramachandra.

A form of women's dance or lasya is widely prevalent over the regional covered by Chow dance. This is known as the dance of the professional dancing girl—*Khemti or nachni* in local language. This is a secular dance though mainly deals with the love apisode of Radha and Krishna. It is surprising to note that there has been absolutely no influence of this form of erotic dance on the Chow dance performance either in idea or in form. Chow dance is absolutely free from any erotic appeal. Of late due to Vaisnava influence there has been an attempt to introduce some episodes of the Bhagavata Puran dealing mainly with Sri Krishna is amorous sports with the milkmaids (*gopinis*). Rasa of Balarama has already found a place in some of the professional parties of chow dance. But by this introduction the quality of chow dance has not improved but deteriorated considerably. Because in this item of dance the heroic aspect of war which is the main constituent of chow dance is altogether absent. Amorous sport of Krishna with the milkmaids is antagonistic to the fundamental spirit of chow dance and, therefore, it has failed to improve upon the existing themes. Moreover, in the course of the amorous dances of the milkmaids along with Krishna or Bálaram, the male dancers dressed as females with masks covering their faces make most unrealistic hip and breast movements which fail to create any real appeal to the audience. Therefore, introduction of female characters in greater number is definitely detrimental to this art form. Unfortunately this has been the case over the neighbouring areas of the adjoining States where this form of dance is prevalent in some form or other. But in Baghmundi area this tendency has never grown remarkably and as such chow dance has been able to retain its vitality to a very great extent over this area.

The main characteristics movements of the chow dance are the following—

(1) Movement of the crown: According to this the whole body remains stiff while only the top of the crown moves a little.

(2) Movement of the shoulder: This is a very important feature of the chow dance. In this movement the top of the crown and the lower part of the body remain stiff while the two shoulders tremble vigorously.

(3) Jumping in the air: According to this movement the dancers individually or simultaneously jump high and revolves sideways in the air and ultimately fall on the ground with folded legs, and in that peculiar sitting position they move forward and backward.

(4) Movement of the chest: According to this movement the heads and the lower parts of the bodies of the dancers remain stiff and only the chest portion trembles vigorously.

(5) Foot Stepping—There are two types of stepping popularly known as *Devchal* (gate of the gods) and *Rakshasha Chal* or steps of the Rakshashas.

Each scene begins with a very short vocal music introducing the theme. But no importance is attached to it. As a matter of fact this is drowned by loud beat of drums.

From close analysis of the different factors of chow dance of Purulia it will be apparent that it is the oldest specimen of this form of dance which is prevalent over the adjoining areas of two neighbouring States—Bihar and Orissa. Due to the fact that chow dance of Purulia freed itself from patronage of any Raja or Maharaja, it has not been sophisticated and as such it has been able to retain its folk-character in the real sense of the term.

IV

A FEW TRADITIONAL COTTAGE AND SMALL INDUSTRIES OF PURULIA

by

A. N. MUKHERJEE,

Deputy Director of Industries, Community Development Projects, West Bengal

In the present Note, it is intended to give brief details about the following cottag/esmall industries of the district of Purulia :

(i) Lac
(ii) Cutlery and Handtools of Purulia proper
(iii) Tasser Weaving of Raghunathpur
(iv) Mask Making of Domordi and Chorida

2. In each case, the investigations have been made by the Field Officers of Cottage and Small Scale Industries Directorate, whose names have been mentioned against the particular industry under Report.

3. *Lac in Purulia* (Investigation and Reporting Officer : Sri A. K. Banerjee, Lac Development Officer, Purulia) :

3.1 According to Bengal District Gazetteers of Manbhum by H. Coupland, published in 1911, the most important industry in the Manbhum district after coal was lac. The export from this district of lac in the form of sticklac and manufactured forms was 200,311 maunds valued at Rs. 40.50 lakhs in the year 1909, as compared with Rs. 150 lakhs for coal and Rs. 3 lakhs for all kinds of food grains.

3.2 The number of lac cultivators in Purulia could not be estimated, as almost every household in the district has at least a few trees on which lac is reared. Thousands of intermediaries also are engaged in collecting raw lac from the local *hats* and selling those to the manufacturers. In 1909, there were 118 regular lac factories in Manbhum district. The important centres were at Jhalda area and the other factories were at Balarampur, Manbazar and Purulia.

3.3 In district Purulia, the main region of lac cultivation is Tulin, Jhalda, Baghmundi, Manbazar, Bandowan, Garhjaipur, Raghunathpur and adjacent places. There are several species of lac host plants, of which, the important ones are Kusum, Palas, and Kul/Bair, on which, lac cultivation is made.

3.4 The system of propagation of lac cultivation originally followed is to prune the twigs during February/March, so that, sufficient succulant shoots could grow during the period of infection. The infection is a process where sticks with lac encrustation, in which, living lac larvae are about to emerge (called broodlac), are cut from the host trees and tied to another host tree. The lac larvae emerge in enormous numbers from the broodlac and settle on the succulant shoots of the host trees which have resulted from previous pruning and thrive on the sap juices of the host. The settlement occurs upto 150-200 larvae per liner inch.

3.5 The secretion of lac begins immediately by glands in the insect, and covers the insect as a protective coating, and, utlimately a continuous or semi-continuous encrustation is formed over the shoot. The lac larvae undergo morphological changes inside the cells and the male lac insects emerge from their cells through the operculum after about 6 to 8 weeks and fertilies the female insects through the anal tubercular openings in the cell. Each cell has also bronchial pores, and waxy filaments protrude through these anal and bronchial pores. Thus, the female cells are responsible for the production of lac encrustation and the empty male cells become occluded by them. Through the anal pores of the lac cell, a sweet sticky substance known as "honey dew" is secreted.

3.6 The life cycle of lac insects occurs twice in 12 months, but, actually, four crops are grown as the life cycle of the insects on Kusum three differs with that on other hosts such as Palas, Bair etc. In Mysore, Trivoltine strain of lac insects grown on Shoreatalure is found, which passes through three life cycles in thirteen months.

3.7 The four lac crops are named after Hindi months in which they are cut from the trees. The lac grown on Kusum threes are called Kusmi lac and that on threes other than Kusum are called Ranginee lac. The life cycles and respective crops are stated below :

Harvesting broodlac and infection	Commercial crop reaped	Harvesting broodlac and infection	Name of the commercial crop
(a) *Ranginee or Non-Kusum crops*			
June-July	Oct.-Nov.	Oct.-Nov.	Katki crop
Oct.-Nov.	April-May	June-July	Baisakhi crop

Harvesting broodlac and infection	Commercial crop reaped	Harvesting broodlac and infection	Name of the commercial crop
(b)	*Kusmi crops*		
June-July	Dec.-Jan.	Jan.-Feb.	Aghani (Kusmi) crop
Jan.-Feb.	March-April	June-July	Jethwi crop

3.8 The lac encrustation on sticks called lac sticks are scraped off, which is called sticklac (Laha, Lahi). The sticklac passes through several intermediaries to reach the manufacturers. In the manufacturing units, the sticklac is crushed in machines and seived and winnowed to free it from the wooden pieces. Previously, the crushing was done in 'Sil Nora', which system, still prevails in Tulin and Manbazar. In Jhalda, Balarampur and Purulia, almost all factories have roller crushers. The crushed sticklac, free from wooden particles, to some extent, are called 'Biuli'. 'Biuli' (crushed sticklac) is then washed in cement pots or nands, of size about 2½ feet in diameter, by the labours called Ghasandars or Majandars, with their feet, Soda, Sajimati are used for the washing. Incidentally, it may be mentioned that, the lac dye water do not cause any sore on the feet of the Majandars who are to perform the washing of lac sticks for 8 to 10 hours daily. The washed lac is then dried on cemented floor by female labours called Kamins. After drying, the same is winnowed to free it from dust and impurities and also separated into different granular size. Due to the granular size, this is called seedlac and, locally, as 'Chowrie'. The seedlac is poured in a long cloth bag, one end of which, is fixed to a chorki or wheel and rotated by labours called 'Phirwava' or 'Pherwaya'. The other end of the bag containing seedlac lies in the hand of the Karigarh sitting in front of oval-shaped charcoal oven. The cloth bag is twisted in front of fire and the molten lac is taken out by spatula and spread over the glazed porcelain cylinder which is filled up by hot water. The molten lac on the culinder is made into a small sheet by the help of palm leaf called 'Nera'. This is then stretched into thin sheet with the help of hands, feet and mouth by the labour called 'Bhilwaya'. The lac flakes are called shellac or Chapra. When the molten lac is made in the form of button by spreading over galvanised iron sheets, it is called button lac.

The refused lac, molamma, Kiri, Passewa are obtained in different stages of the processing of lac in the factories.

3.9 The details of the production of sticklac in district Purulia compared to State West Bengal and Indian Union are given below:

Year	Purulia (Quintals)	West Bengal (Quintals)	Indian Union (Quintals)
1963-64	36,018	39,750	287,206
1964-65	19,072	20,845	176,597
1965-66	20,342	20,075	234,763
1966-67	23,329	27,808	296,724
1967-68	34,525	39,004	387,791
Average 5 years	26,657	30,301	2,76,616

3.10 It appears that, West Bengal's production on the average of last five years is about 11 per cent to that of Indian Union, of which, about 9.6 per cent has been produced in Purulia. About 88 per cent of the production of West Bengal on the average for the last five years has been produced in Purulia.

3.11 The consumption of sticklac in quintals in different manufacturing centres in Purulia is given below :

	1966-67 (Quintals)	1965-66 (Quintals)	1964-65 (Quintals)
Purulia	101,179	87,970	82,190
Sticklac production :			
Purulia	23,329	20,342	19,072
Indian Union	296,724	234,763	176,597

From the figures cited herein, it is seen that, about 36-46 per cent of sticklac produced in India is consumed in the local factories in Purulia. The total export of Indian Union is about Rs. 4 crores to 5 crores and the export of Purulia is estimated around Rs. 2 crores.

3.12 The actual consumption of lac in use in India is about 10 per cent and about 90 per cent is exported to foreign countries. But due to threat from synthetics and abnormally low price of sticklac in Thailand, the trade has been affected.

3.13 Since lac is predominantly an export commodity and the manufacture and the export are in the hands of a few industrialists, the primary producers are always deprived of reasonable price. This has posed a serious problem during the last few years in the district, when the pride of sticklac in the internal market has declined so much that this has resulted in despair among the lac cultivators and many of the lac host threes are being cut down and lac growing temporarily abandoned. It has been understood locally that, the Ranginee

sticklac/Kusmi sticklac fetch a price of Re. 0.50 to 0.75 per Kg. /Rs. 1.50 per Kg. respectively and that the district has less of Kusum trees compared to Palas/Kul trees. The Kusmi production per tree, is also higher than the Ranginee production, approximately by three times.

3.14 As a precautionery measure, Indian Government took regulatory measures from time to time. The first regulatory measure of minimum export prices of lac was brought into effect from 23rd June, 1958. But as no measures were taken to keep the prices at the internal market steady, a wide gap between the minimum export prices and the internal prices existed, from which, the shippers got the maximum profit and that at the cost of poor cultivators. Lastly, the buffer stock scheme of the State Trading Corporation became operative from January 1962, when price of sticklac deteriorated further. But their operation made no effect on the price available to the primary growers as the intake of the State Trading Corporation was not sufficient in comparison to the availability of seedlac in the market.

3.15 It is also maintained that the problem will continue until lac exports are nationalised and the State Trading Corporation take up the export of seedlac and shellac. Then, there will be no danger of under-invoicing and the foreign exchange earnings will be safe guarded. Side by side, there will be assurance to the primary producers of a guaranteed price, proportionate to the export price.

It has also been felt that co-operative marketing is the only way to ensure fair price to the primary producers.

3.16 For the benefit of the poor cultivators and the trade, different schemes have been formulated and are being operated under the Directorate of Cottage & Small Scale Industries of the Government of West Bengal, the details of which, are given below :

(i) Development of Lac Cultivation through the State Broodlac farms.

(ii) Industrial Centre for Lac at Balarampur and Training-*cum*-Production Centre at Balarampur. West Bengal Lac Artisans' Co-operative Society Ltd. has been formed at Balarampur with the ex-trainees of this centre. The society has started production earning substantial profit.

(iii) Servicing Co-operative for Lac at Tulin ; the Servicing Centre is equipped with modern machinery.

The Tulin Laha-O-Gala Industrial Co-operative Society Ltd. comprised of small manufacturers and growers of Tulin, has been giving the facilities of the Servicing Centre. There are proposals of setting up a Lac Godown at Balarampur for storing 1,800 maunds of sticklac, a Bleached Lac Plant at Balarampur and a Servicing Centre for lac at Balarampur. These, however, are schemes yet to be finalised.

4. *Cutlery and Handtools of Purulia proper* (Investigating Officers: Sri Sankar Roy, Inspector, Cutlery and Sri Chanchal Guha, Inspector, Handtools under Quality Marking Scheme having submitted Notes through Sri D. K. Sikdar, Controller, Quality Marking Scheme with his comments) :

4.1 Purulia proper has got a number of mixed Units producing Handtools, Carpentry tools and Cutlery items. The distinctive products of Purulia is Carpenters' Auger. Generally, the dealers supply the required raw materials to the artisans who get these materials forged in their own homes and supply the half-finished articles back to them on wage/contract basis. There are producers-dealers also. The existing firms have been running their business with difficulty, particularly, for the non-availability of specified raw materials like carbon steel at reasonable price. The quality of the major articles often times is deteriorated due to the activities of the unscrupulous traders, who allow commission to secure orders and to supply substandard goods. The Purulia Handtools owe much to the endurance, skill and organisational work of Sri T. D. Karmakar, who started the Presidency Edge Tools Co. as far back in 1928. Incidentally, he was a foreign-qualified engineer.

4.2 There were 4 major Units 10 years back and, at the present moment, there will be 10 Units. Their particulars are given below :

A. Employment upto 5 persons (No. of 3 Units):
   (i) M/s. Purnima Tools Works (Proprietor : Sri Giridhari Karmakar)
   (ii) M/s. B. Karmakar & Sons (Proprietor : Sri B. Karmakar)
   (iii) M/s. Kamala Tools Works

B. Employment of more than 5 persons (No. Units : 7):
   (iv) M/s. Purulia Engineering Works (Proprietor : Sri Jugol Kishore Karmakar)
   (v) M/s. N. C. Karmakar Co. (Sri N. C. Karmakar)
   (vi) M/s. Popular Cutlery & Co. (Proprietor Sri Gour Ch. Karmakar)
   (vii) M/s. Kalipada Karmakar
   (viii) M/s. Pioneer Tools Mfg. Co. (Proprietor : Sri Gopal Ch. Karmakar)

(ix) M/s. Presidency Edge Tools Co. (Proprietor: Sri B. P. Singh Deo)
(x) M/s. Purulia Hardware (Sri P. R. Banerjee)

4.3 The general items of productions are Auger, Firmer Chisel, Bevel Chisel, Prunning Knife, Butchers' Knife, Cut Plane, Top Iron, Auger bit, Rose bit, Carpenter's bit. The functions of such articles are separately for boring of timber, joining work on wood, planing and chopping etc. These articles have got good market all over India especially in Calcutta, Uttar Pradesh, Madhya Pradesh, South India, Bombay, Assam and Punjab.

4.4 The broad specifications of some of the common items are given below :

(a) *Auger*

Overall length	Outside diameter of twist	Length of twist excluding screw lead	Width of eye	Bore diameter of eye	Length of the screw lead
24″	5/8″	7½″	1¼″	7/8″	1/2″

(b) *Chisel*

Overall length (without shank)	Breadth	Thickness with taper	Length of shank	Diameter of stop	Cutting angle
6½″	1¼″	3/16″	about 2″	5/8″ (approx.)	25″ (approx.)

(c) *Cutter of Bench Planes*

Overall length	Breadth	Slot	Diameter of hole	Thickness	Head taper	Cutting angle
7½″	2″	3.5/8″x7/16″	11/16″	1/8″	1½″	25° (approx.)

(d) *Pruning Knife*

Overall length	Blade size	Thickness with taper	Handle	No. of rivets	Diameter of rivets	Curved Portion	Thickness
12″	1½″x6″	1/4″	6″	3	3/16″	1½″ radius	1/16″

Most of the Units use scrap iron, spring steel, rail top etc. But those manufacturing standard products use carbon steel of 0.65 per cent to 0.75 per cent for Auger, Chisels, Pruning knives etc. and of 1 per cent for cut planes. Generally, scrap iron is procured from Calcutta, Dhanbad and Tatanagar. Spring steel and rail top are procured from Railway authorities and Units procure carbon steel from resellers and importers.

4.5 Excepting M/s. Pioneer Tools Manufacturing Co., M/s. Presidency Edge Tools Co. and M/s. B. Karmakar & Sons all other Units have no testing and quality control arrangements. The above 3 Units are also equipped with Hardness Testing machines. The costing of productions of a few items and their selling prices are given below :

I (a) 5/8″ Auger (standard quality) :

To cost of	2½ Kg. carbon steel (Imported)	Rs.	15.00
,, ,, ,,	1½ Kg. mild steel	Rs.	1.50
,, ,, ,,	forging	Rs.	6.00
,, ,, ,,	heat treatment, polishing and finishing	Rs.	3.50
,, ,, ,,	packing, labelling etc.	Re.	0.50
	Total cost	*Rs.*	*26.50*
			per dozen

Sale price Rs. 36.00—Rs. 39.00 per dozen.

I (b) 5/8″ Auger (commercial quality) :

To cost of	2½ Kg. spring steel (scrap)	Re.	1.00
,, ,, ,,	3½ Kg. mild steel	Rs.	2.55
,, ,, ,,	forging	Rs.	6.00
,, ,, ,,	heat treatment, polishing and finishing	Rs.	3.50
,, ,, ,,	packing and labelling	Re.	0.50
	Total cost	*Rs.*	*13.55*
			per dozen

Sale price : Rs. 18.00 per dozen.

II (a) Firmers Chisel—1″ size (standard quality):

To cost of	1½ Kg. carbon steel (imported)	Rs.	9.00
,, ,, ,,	forging charges	Rs.	5.00
,, ,, ,,	heat treatment, polishing and finishing	Rs.	2.00
,, ,, ,,	packing and labelling	Re.	0.25
	Total cost	*Rs.*	*16.25*
			per dozen

Sale price : Rs. 24.00—Rs. 26.00 per dozen.

II (b) Firmers Chisel—1" size (commercial quality):

To cost of	1½ Kg. spring steel (scrap)	Re.	0.60
,, ,, ,,	forging charges	Rs.	5.00
,, ,, ,,	heat treatment, polishing and finishing	Rs.	2.00
,, ,, ,,	packing and labelling	Re.	0.25
	Total cost	*Rs.*	*7.85*
			per dozen

Sale price : Rs. 10.00—Rs. 10.50 per dozen.

4.6 Supplies are made to the indenting firms direct against orders received. Financially, most of the Units depend on banks.

4.7 Forging being done by the local individual artisan's units, those firms take up grinding, forging, polishing and finishing etc. The names of the master-craftsmen and their special skill are given below in this regard :

Name of master-craftsmen	Age	Special skill
Sri Narayan Karmakar	24 years	Forging
,, Sanatan Karmakar	45 ,,	Forging
,, Lakshipada Karmakar	36 ,,	Forging
,, Hiralal Karmakar	35 ,,	Forging, tempering & finishing
,, Madan Karmakar	55 ,,	Forging
,, Golok Karmakar	45 ,,	Tempering
,, Gopal Ch. Banerjee	40 ,,	Grinding
,, Israil Biswas	42 ,,	Grinding
,, Gour Karmakar	46 ,,	Grinding, forging, tempering

5. *Tassar in Raghunathpur* (Investigating Officers : Sri I. Sen, Assistant Superintendent, Tassar Seed Supply Station, Raghunathpur):

5.1 There will be 80 working Tassar Looms.

5.2 The master weavers are : Sri Ramanath Dey (40), Sri Mukti Dey (37), Sri Asutosh Pal (45), Sri Nilkantha Das (63), Sri Sitikantha Das (60), Sri Radhanath Das (48), Sri Sambhunath Pal (55), Sri Manindra Nath Dey (62), Sri Hari Pal (60), Sri Subodh Pal (45), Sri Rampada Pal (52), Sri Gobardhan Das (25), Sri Upendra Nath Pal (72), Sri Syam Sundar Das (32), Sri Aukshoy Das (41), Sri Krishnapada Pal (62), Sri Baidyanath Das (48), Sri Baidyanath Bhaya (49), Sri Pasupati Das (52), Sri Damodar Bhaya (33), Sri Debu Guin (64), Sri Gandhi Saw (55), Sri Sudhir Saw (45), Sri Ramdurlav Dey (89), Sri Banowari Mondal (85), Sri Kishori Das (75).

5.3 Amongst the master weavers who have since expired, the following names can bementioned: Surath Sikdar, Bhim Bhaya, Rishi Das, Kirtan Das, Jugal Sikdar, Dayal Dey, Balai Pal, Sridam Pal, Sambhu Saw, Kulada Mondal, Gopal Pal, Chakradhar Bhaya, Govinda Dey, Tribhanga Dey, Hara Mohan Das, Gangadhar Das.

5.4 It is reported that, 10 years back, there were about 150 looms and, 20 years back, there were more than 200 looms. The main reason for the gradual decrease in working looms is stated to be the rigidity in wage-rates, for which, the younger ones of weavers' families have been looking after alternative jobs.

5.5 The main items of production of the weavers are Tassar plane (12 yds. x 36"), Tassar Matka (12 yds. x 36"), Tassar Matka Anga Bastram (12 yds. x 36"), Tassar Bapta (12 yds. x 36"), Tassar Kete (12 yds. x 36"), Tassar coating (16 yds. x 30"), Tassar Matka coating (16 yds. x 30"), Tassar Bapta coating (16 yds. x 30"), Tassar Pagdi (4, 5, 6 yds. x 28"), Tassar Sari (12 yds. x 48" and 11 yds. x 46"-47"). Tassar Dhuti (11 yds. x 47"-48"), Tassar cover, Kete cover, Tassar curtain, etc. Incidentally, 20 years back, the 'thans' used to be produced at sizes of 10 yds. x 36" and Saree/Dhutis at sizes of 10 yds. x 44". Generally, one weaver can produce 5-6 'thans' in a month. The fabrics were used primarily for dress-materials in Bengal, Bihar and Orissa. The 'Anga Bastrams' have markets in U.P.

5.6 For the Tassar yarn, 20/25 years back, Tassar cocoons were available from Puncha forests. But, now, the cocoons are imported from Chakradharpur, Chaibasa, Chakulia, Mayurbhanj and Giridih. The local persons then produce yarn in an indigenous process. The cocoons are put inside a pot, on the bottom of which, are kept straw and *sal* leaves, should not the cocoons are burnt. A quantity of 4 'Pans' (320) is then boiled in water mixed with needed soda for a period of about 3 to 3½ hours. The cocoons are then cooled for half an hour and again sprinkled with cool water carefully. The water in cocoons is allowed to be reasonably soaked when put on a piece of cloth spread on dry ash. The 'Katni' (spineer) then spins using bamboo spindles which start with 'Khi'. 'Ghicha' yarn are available from 'Phunki' (pierced cocoons).

5.7 Before partitions, Narayanganj, Dacca, Mymensingh were good markets for Tassar products. At the present moment, the north Indian States including West Bengal are the markets. Most of the products are used for religious occasions like marriage, festivals etc.

5.8 There is a Tassar Silk Cooperative Society at Raghunathpur with 68 members. The working members function on wage-basis. For illustration, it is stated that, (a) for one Tassar Plan shirting 12 yds. x 36" 'Than', 10 'Pan' cocoons

will be required costing Rs. 50.00 to Rs. 80.00 per 'kahan' and the wage is Rs. 18.00 and (b) for one Tassar Matka shirting 12 yds. x 36", Tassar cocoons (3½ 'Pan') will cost Rs. 17.50 and Bharna Matka yarn of 1 Sr. will cost Rs. 44.00 and the wage is Rs. 16.00.

5.9 At Raghunathpur, there is one Tassar Seed Station. It's objective is to distribute Tassar seeds to the growers of Purulia areas like Hura, Puncha, Kasipur and Sadar, thereby helping indirectly the Tassar weavers to get cocoons locally.

5.10 It is locally considered that the basic issues of the supply of cocoons, the diversification of production and the organised lifting of goods at cash and fair prices still remain to be properly attended to.

6. *Mask-making* (Investigating and Reporting Officer : Sri R. C. Bhattacharyya, Mat Organiser in Cottage & Small Scale Industries Directorate) :

6.1 There are artisans' Units in 2 areas of Domordi in Jaipur P.S. and Chorida in Baghmundi P. S. The particulars of each place are stated below separately.

DOMORDI

6.2 The village bears J. L. No. 369 under Garhjaypur Post Office of Jaipur P. S.

6.3 There are 3 Units in the village employing 11 artisans.

6.4 About 28 years back, the master artisans migrated from the village of Chorida in Baghmundi P. S. to settle in their aunts' village of Domordi. According to the version of Sri Madhu Roy (a prominent artisan), he left Chorida on a protest to learn mask-making himself elsewhere than Chorida and to organise dance-functions on his own without any assistance from the master-craftsmen of that village. His intensive probation on the craft thus started from that feeling, although, initially, he learnt the technique of mask-making from Sutradhar families of Chorida about 50 years back.

6.5 Almost all the artisans of Domordi are Bhatta-Brahmins and connected with Sri Madhu Sudan Roy, as if, he was the head of one family. Their names (with ages) are :

	Name of mastercraftsmen	Age
1	Sri Madhu Sudan Roy	68-70 years
2	,, Hiralal Roy	27 ,,
3	,, Gokul Roy	50 ,,
	(*Name of other craftsmen*)	
4	,, Motilal Roy	65 ,,
5	Sri Muktipada Roy	24 years
6	,, Sristidhar Roy	15 ,,
7	,, Gita Bala Roy	9 ,,
8	,, Manik Roy	24 ,,
9	,, Anadi Roy	13 ,,
10	,, Sitanath Roy	35 ,,
11	,, Chittaranjan Dosandhi	16 ,,

6.6 Their items of production are mostly Hindu mythological figures and common animals and birds like Mahadev, Durgamata, Narayan, Ganesh, Kartik, Luxmi Devi, Saraswati Devi, Ram, Lakshman, Sita Devi, Bhim, Arjun, Yudhistir, Nrisingha, Kirat ('Byadh'), Ravan, Kumbhakarna, Indrajit, Bivisan, Hanuman, Jambhuban, Nal, Neel, Angat, Jatayu, Garur, Srikrishna, Balaram, Surpanakha, Mahisasur, Kaljaban, Bhasmasur, Karal Asur, Rakta Bij, Manasa Devi, Kalimata, Horse, Tiger, Lion, Parrot, Peacock, Deer, Snake, Jackle, Dog, Boar, Dwibidha Banar.

6.7 The mask ('Mukhos') is known locally as 'Muha' and 'Mahara'.

6.8 The specifications of some of the items are given below :

(i) Surpanakha

(a) Ear to ear—13"
(b) Chin to head—11"

(ii) Kirat

(a) Ear to ear—13½"
(b) Chin to head—10½"

(iii) Dwibidha Banar

(a) Ear to ear—15"
(b) Hair to hair—17½"
(c) Chin to head with hair—11"

(iv) Ganesh

(a) Ear to ear—15½"
(b) End of the trunk to head—17"

(v) Yudhistir

(a) Ear to ear—13½"
(b) Chin to crown—18"

(vi) Hunuman

(a) Ear to ear—8½"
(b) Chin to head—6½"

6.9 The artisans produce masks for 'Chow' dance dramas which are based on the incidents of the Ramayana, the Mahabharata and the Chandi and the designs correspond to the particular

characters as depicted thereunder. Thus, the participants of such dance-programmes are primarily the customers. The dance party at Domordi consists of Bhatta-Brahmin and a few persons belonging to scheduled castes and tribes. Such parties exist also in the villages of Pratappur, Shalgram, Rengani Tar, Balibhasa, Shilphor, Bhuchandi, Palanja, Khedader—all in Jaipur P. S.

6.10 The stages of production are indicated below :

(i) Preparation of models with clay ;
(ii) Baking of model in sunrays for half-drying ;
(iii) Pasting of water soaked paper twice over the half-dried model ;
(iv) Pasting of paper (6 to 10 times) with glue made of 'gadh' (gum) ;
(v) Pasting of pieces of cloth soaked with 'Cheeta-mati' (pasty clay) twice for eyes, ears, nose, teeth etc. ;
(vi) Polishing of the whole thing very carefully with a small wooden 'Kurni' locally called 'Thapi' ;
(vii) Baking of the whole thing in sun ;
(viii) Dyeing, painting and finishing after taking off the mask from the model with the help of narrow iron 'Khunti'.

6.11 For illustrations of cost and tme needed, it is stated that a Surpanakha costs Rs. 1.88 (selling at Rs. 5.00) requiring 5 days for 3 such pieces and a Mahadev costs Rs. 7.00 (selling at Rs. 25.00) requiring 8 days for modelling and finishing. The basic cost as above is exclusive of labour charges.

CHORIDA

6.12 The village Chorida bears a J. L. No. 89 under Baghmundi P. S. It is the parent village in respect of the craft.

6.13 There were about 29 Units 10 years back and are 44 Units now employing about 130 persons.

6.14 It was learnt from Sri Durga Charan Dutta, a mastercraftsman, aged about 60-65 years that about 200 to 250 years ago, one 'Mahut' (elephant-driver) of Raja of Baghmundi (name of the Raja was reported to be Raghunath Singh) fled away from Baghmundi to Seraikela under Singhbhum district and got a service under the Raja of Seraikela. The Raja of Seraikela was a great patron and exponent of 'Chow' dance performed by the 'Adibashi's of the locality. The 'Mahut', somehow or other, learnt the technique of 'Chow' dance very well from them and returned back to Baghmundi. There he staged 'Chow' dances with great enjoyment and pleasure to Raja of Baghmundi. At that time, 'Chow' dances were being performed with masks made of simul wood. From the 'Mahut' the local 'Sutradhars' (carpenters) who were reported to have been brought from 'Bartala Para' of Burdwan town by the Raja of Baghmundi learnt the technique of 'Chow' dance and began to prepare masks out of simul wood. It was reported that 'Sutradhars' of 'Bartala Para' of Burdwan town was brought to Baghmundi for preparation carpentry works, earthen gods and goddess. It could not be collected, from when, the paper and cloth took the place of simul wood for base materials of mask.

6.15 The caste of craftsmen is 'Sutradhar' (carpenter).

6.16 The names (with age) master craftsmen are given below :

	Name of important master craftsman	Age
1	Sri Durga Charan Dutta	60-65 years
2	,, Nakul Chandra Dutta	40-41 ,,
3	,, Ram Charan Dutta	57-58 ,,
4	,, Chhotulal Sutradhar	50-52 ,,
5	,, Nimai Ch. Sutradhar	25-26 ,,
6	,, Ganapati Sutradhar	35 ,,
7	,, Bhola Nath Pal	34-35 ,,
8	,, Haradhan Pal	30 ,,
9	,, Dulal Chandra Dutta	21-22 ,,
10	,, Ghanashyam Pal	50-52 ,,
11	,, Nirmal Chandra Pal	22-23 ,,
12	,, Suchand Chandra Sil	60-65 ,,
13	,, Anil Chandra Sil	40 ,,
14	,, Nepal Chandra Sil	34-35 ,,
15	,, Hiralal Pal	30-32 ,,

6.17 Their items of production are similar as in Domordi with the additions of mythological figures like Ghototkoch, Go-singh Asur, Chabasur, Taraka Rakshmi, Gayasur, Tripurasur, Tarakasur, Dadhi Bal Banar, Bali, Sugrib, Narantak, Tarani Sen, Mahi Ravan, Kangsha, Brishasur, Kali Nag.

6.18 The specifications of a few items are given below :

(i) Ram

(a) Ear to ear—14½″
(b) Chin to head of the crown—15″
(c) Hair to hair—17″

(ii) Gosinga Asur

(a) Ear to ear—13½″
(b) Chin to head—15½″
(c) Length of horn—16″
(d) Gap in between the horns' tips—10″

(iii) Mahadev

(a) Ear to ear—11″
(b) Chin to head of Maganga—11½″
(c) Tail to head of the snake—17½″

(iv) Ma Durga

(a) Ear to ear—13″
(b) Chin to crown—17″
(c) Side hair to side hair—18″

(v) Lakshmi

(a) Ear to ear—13″
(b) Chin to crown—18″
(c) Side hair to side hair—16½″

6.19 A 'Chow' dance party of this area as in Domordi consists of persons in Caste-Hindu, Scheduled Caste and Scheduled Tribe communities.

6.20 The process of production is almost the same as in Domordi. The stages, however, as gathered from the artisans, are placed below :

(i) Preparation of model with clay (locally called 'Chita-mati') ;
(ii) Pasting of paper 4 times on the raw model after spraying ordinary ash (locally called 'Chhai') on it ;
(iii) Spreading one layer of liquid clay (locally called 'Chita-mati') ;
(iv) Polishing of the layer of clay during half-dried model with a small wooden 'Kurni' (locally called 'Thapi') ;
(v) Pasting of cloth soaked with clay ;
(vi) Baking of the whole thing in sun-rays for complete drying ;
(vii) Opening of the mask* from the model with the help of narrow and flat type of about 12″ long iron tool (locally known as 'Khunti') ;
(viii) Dyeing of mask with 'Khari-mati' mixed with liquid glue made of tamarind seeds and rice ;
(ix) Finishing the mask with different dyes as required.

---

*During opening of mask from the model, the model is lost.

6.21 The cost of mask items excluding labour charges come to Rs. 0.93/Rs. 2.93 per piece in case of Ram/Ghatotkoch respectively, their corresponding sales price being Rs. 3.00 to Rs. 4.00 and Rs. 5.00. The items of cost are paper, cloth, paste, dye and varnish etc.

6.22 The artisans of both the places use just wooden 'Kurni'/Thapi' for work and flat/round brushes and their best tool is own hands.

The Chorida artisans were seen to producing the religious images of worship besides and masks.

V

NOTES ON THE TEMPLES OF PURULIA DISTRICT

by

DAVID MCCUTCHION

INTRODUCTORY

Purulia district, formerly constituting a large part of the old Manbhum district lying outside Bengal, offers many contrasts with the districts further east. These contrasts are already emerging in Midnapore and Bankura districts—rockier dryer terrain, laterite and sandstone available for building, strong Orissan influences on architecture and sculpture, less evidence of Muslim penetration. Whether because of the drier climate or because the Muslims came here later and not to stay, concentrating their activities far away in Gaur, more early remains have survived than in any other district of Bengal. The first survey of these ruins was made by Beglar at the beginning of 1873 in continuation of his tour down through Bihar from Patna. He was followed by Bloch in 1903-4, but apart from isolated visits by scholars before and after, no systematic study of the remains or the culture which produced them has yet been undertaken. The finest group of pre-Muslim monuments in the whole of Bengal—at Deulghat—still remains unprotected, as also at Cheliama—a fine example of 17th century terracotta-decorated temple.

One striking fact emerges from these crumbling and half buried ruins, none of which has been more than cursorily excavated : the presence of a flourishing Jaina culture over a period of centuries in areas now jungle-covered, difficult of access, and backward compared with the rest of Bengal. Although Hiuen Tsiang reported numerous 'Digambara Nirgranthas' in North and East Bengal in the 7th century, comparatively few Jaina remains have come down to us from those regions. The most impressive Jaina vestiges are already somewhat to the west—at Satdeulia in Burdwan district. But when we come to Bankura and Purulia districts, the evidence greatly increases—not only numerous images, but large and small temples still standing from the pre-Muslim period, and the tumbled walls or buried plinths of others. The finest early *deul* in Bengal—at Bahulara in Bankura district—was a Jaina temple, so too the massive *deul* at Deulvirya or the scattered vestiges in the villages all round Ambikanagar in the same district. In Purulia there were rich Jaina centres with temples and images at Pakbirra, Tuisama, Deoli, Pabanpur, Palma, Arsha, Charra, Gholamara, and other places. This Jaina culture extended south-west into Ranchi district (Dulmi), south-east through Bankura into Midnapore (Harmashra—Simlapal—Gopiballavpur), and north into Dhanbad (Biljona, Darika). How and when did it disappear ? There are still Hindus in Purulia district who retain Jaina practices, but otherwise Jainism has disappeared from here as completely as from all the other parts of Bengal—the present Jainas are immigrants from north-west India. Equally intriguing is the possibility that some of these temples may belong to a comparatively late period : it is hard to believe that the stiff rudimentary mouldings of the temples and the cursory chiselling of the sculptures at Pakbirra and Deoli, for instance, could belong to the 12th century or earlier. Beglar considers that a good deal of renovation and a certain amount of building or rebuilding went on at the end of the 16th century, when Man Singh exercised supreme authority in these parts. As in the case of the Konch temple of Bihar, scholars have differed widely in dating the Manbhum remains : Bloch, for instance, puts them in the 14-15th centuries, whereas the Bengal List assigns the temples of Pakbirra to the 9th or 10th century. Not all these temples were Jaina : the extensive groups at Deulghat or Telkupi were Brahmanical ; most of the non-Jaina temples appear to have been Saiva. The temples on the northern border at Banda and Telkupi also belong to a period after the Muslim conquest, so far as this may be judged from their style.

In spite of extensive laterite deposits and Barakar sandstone in the north, the finest temples of Purulia—both in the early and late periods—were built of brick. The three standing Deulghat temples and another at Para belong to the small group of pre-Muslim brick *deuls* which includes the Sonatopal and Bahulara temples of Bankura district, Satdeulia of Burdwan, and Jatar Deul in the Sundarbans. These are all in the tall *nagara* or *rekha* style associated especially with Orissa, and have stucco decoration broadly reminiscent of Bhubaneshwar. All the other pre-Muslim temples of Purulia, including all the Jaina temples, are of stone—also in *rekha* style. In Orissa a *rekha deul* is generally preceded by an attached *jagamohan* (assembly hall) or *mandapa* ; the *rekha* tower is divided vertically into projections (*rathas* or *pagas*) and horizontally by *baranda* mouldings where the tower meets the lower wall. These features are generally found in Purulia *rekha* temples, but the rich Orissan sculptural decoration is generally simplified to its basic elements. During the Moghul period, the Bengal hut and *ratna* styles penetrated the area : the former—called *chala* or *bangla* temples—are roofed on the model of thatched

huts ; the latter are decorated with pinnacles. The finest of these temples in late style is in Cheliama, but others were built by the Rajas of Panchakot and Baghmundi, and there are isolated examples in various villages. Such temples are far less common here than in the more central parts of Bengal. They are generally built of brick and decorated with terracotta, but in the Asansol subdivision of Burdwan the various hut styles were also executed in sandstone, and one example of this may be seen on the Purulia side of the border near Muradi. But Purulia district is far more noteworthy for its early than its late remains, even though so many of them have disappeared altogether (*e.g.*, the remnants of two temples that Beglar reported about half a mile east of Purulia town).

A useful reference book compiled from all the various reports, is *The Antiquarian Remains of Bihar* by D. R. Patil (Kashi Prasad Jayaswal Research Institute, Patna, 1963, Rs. 15.00), which covers all sites in the old Manbhum district. The best account is still by J. D. Beglar : *Report of a Tour through the Bengal Provinces in* 1872-73 recently republished by the Indological Book House, Varanasi, Rs. 30.00.

Early Sites

DEULGHAT (near Boram in Arsha P.S.)—The ruins of some fifteen or more temples and small shrines are crowded clos eto each other in no apparent order on slightly high ground above the Kansai river, about four miles south of Jaypur. The most immediately apparent are three tall brick *deuls* with stucco decoration, the largest of which is on the southern edge of the site. All three have triangular corbelled entrances, with towers built up by interior corbelling ; the corbelled entrance of the southern temple is particularly high and graceful with a delicate curve. All three have richly carved brickwork with stucco application. Most prominent among the designs are variants of the *chaitya* and miniature *rekha* motifs, especially a large heart-shaped *chaitya* reminiscent of Bihar (*e.g.*, Konch) and another splayed outwards reminiscent of Bhubaneshwar ; another prominent decorative feature is the niche—both high on the tower and along the lower walls surmounted by a *rekha* tower in relief. The stucco application includes scrollwork with geese and foliation, dwarfs and other squatting figures, *kirtimukhas*, hanging garlands, lotuses, flourishes, and other elements familiar from Pala-Sena art. Beglar considered this stucco to be 'a later, and probably a very recent, addition', and remarks that on the large southern temple 'there is not, and does not appear to have been, any plaster coating to the temple'. This is strange, for the stucco decoration on all three temples would appear to date from the same period, and it is not possible that it was added to the southern temple after Beglar's visit or it would be in better instead of worse condition. The stucco is at least as fine and would appear to date from the same period as that on the Bahulara and Satdeulia temples. The hunched supporting figures on the middle temple recall those on the 15th century temples of Barakar, but there is nothing else significant in common between these temples, and the Deulghat figures are much livelier and more rhythmical. For the rest of the decoration, it is hard to believe that the pre-Muslim skills and traditional motifs could have survived to the 15th, let alone the 19th century—especially when the stucco work of the 17th century in adjoining Bankura and Midnapore districts is so different and so crude. The stucco is most complete on the middle temple, whereas not only most of the stucco but a large portion of the carved brick facing has also crumbled away from the third temple on the extreme west. The carved brickwork on the other two is more complex and more extensive than on any other pre-Muslim brick temples of Bengal, including the lower walls, which have their full complement of decorated niches alternating with pilasters (at Satdeulia and Jatar the walls are entirely plain). Unfortunately all three temples have lost the tops of their towers, together with the *amlakas* and *kalasas* which must once have crowned them, but even so the western and southern ones still stand to a height of fifty feet or more : the western one especially, on a base about 16 feet square, seems to have been particularly slender and graceful ; the southern one, 24 feet square, is about the same size as the Bahulara temple. As on most of the *rekha* temples in Purulia district, the plans are basically *tri-ratha* (single central projection),complicated by numerous decorative recesses or subsidiary *rathas*. At least the middle and western temples seem to have originally had stone door-frames on a slightly projecting porch or *antarala* (entrance passageway), to judge by the carved stumps still in situ—although Beglar considers these to have been taken from the ruins of other temples. It seems likely from the heaped up rubble and pillars lying in front of them that these temples were formerly provided with *mandapas*. Beglar found a *linga* installed in the western temple, which is now empty, and a 'four-armed female seated on a lion' in the southern temple, which now has a tiny *linga* in the floor and a broken *yoni* outside : the middle temple is empty. Each temple has a carved stone *makara* water outlet on the northern side.

The other temples at Deulghat, which are mostly of stone, have all fallen down. The largest stands at the head of the flight of steps leading up from the river—a low mound in Beglar's day, on which he found a slab inscribed in characters which 'may belong to the 9th or 10th century'. The base has now been dug out, revealing a large plinth, 27½ feet wide at the rear(west), with simple

vase mouldings. The temple consisted originally of a *mandapa* or *jagamohan* with attached shrine, now disfigured by a modern brick structure housing the *linga* of Siddhesvara Siva. Against the right front wall of the *mandapa* an open chamber has been roughly assembled of fallen stones and bricks to house an early image of Ganesa. Immediately north of the southern brick temple are the remains of another fairly large stone temple which consisted of a shrine with attached *jagamohan*: only the shrine doorjambs and lower courses are in situ, with a tiny *linga* in a large *yoni* in the sanctum; the united large enough for an entrance 3 feet 3 inches wide still lies where Beglar noticed it, in front of the *jagamohan*. The shrine measures six feet square internally, and the *jagamohan* approximately 19 by 16 feet, joined by an *antarala* passageway seven feet long. Immediately south-west of this is the moulded base of another stone temple considerably smaller (10 feet wide externally) with many re-entrant angles between the *ratha* projections, and porch attached immediately in front of the central *rathas*; it has a water outlet on the northern side. Beglar describes another stone temple which used to stand between this one and the middle brick temple, but has now entirely collapsed; in his day it had a cell 8½ feet square, and an entrance surmounted by a triangle of overlapping courses. To the east of the middle brick temple are the remains of a small brick shrine with stone door-frame, which still houses a large image of Parvati flanked by Ganesa and Kartikeya: the decorative motifs on this sculpture are not unlike those in stucco on the large brick temples. Unlike all the temples so far described, this small temple faced north. A little to the east, facing in much the same direction, is another similar shrine of stone, which contains a *linga*. Equidistant to the south-east are the vestiges of another small stone shrine facing west. Somewhere east of the temple with the image of Parvati, Beglar refers to a small brick shrine facing north, which housed 'a life-size sculpture of the eight-armed Durga slaying the Maheshasur': this is now housed in a modern brick structure nearby (facing north), along with another smaller Durga image and a Parvati image; the big Durga measures five by two and a half feet, and is in worship.

The base courses of three more small stone shrines, one of them containing a *linga*, can be made out in the area between the middle and western brick temples, along with brick and stone mounds. The whole site is so strewn with tumbled debris, it is impossible to say exactly how many temples were once here. The place is now entirely abandoned, except for a visiting *pujari*, and there is no habitation anywhere near. But comparatively modern structures, including an unfinished brick tower with circular verandah, and signs of extensive improvised rebuilding, indicate that worship was kept on or the site was reoccupied long after it had fallen to ruin. An inscription from the ruins was edited by Dr. R. C. Mazumdar*, who observed: 'The alphabet is of the proto-Bengali type and does not seem to be earlier than the thirteenth or fourteenth century A.D.'. The inscription consisted of no more than a line or so of conventional praise of 'the Crown Prince, the son of illustrious Rudra', who is not known from any other source. Unfortunately Dr. Mazumdar's informants did not tell him from which temple the inscription was taken, but it is valuable in so far as it confirms that the place was flourishing in the early Muslim period. There are also a number of memorial slabs (hero stones), one of which has an inscription of about the 13th or 14th century referring to the accession to the throne of Sri Rudra Sikha Juaraja. Beglar considered the sculptures here to be contemporary with the Hindu sculptures of Dulmi, which he assigned to the 11-12th centuries. The architectural fragments would confirm this, or even later: the carving on the door-frames is rudimentary, with the 'bow' motif typical of the 12th century and after; sometimes there is a single *dwarapal*, in other cases none at all; Ganesa in at least one case occupies the centre of the lintel—another late feature. As many of these pieces, often broken, have been haphazardly re-used (a doorjamb as a lintel for instance), it is not possible to say to which temples all of them originally belonged. There are many architectural fragments, including *amlakas* and *bhumi-amlakas*, and other mouldings, lying all over the place, from which it is quite clear that the stone temples originally had towers in the *rekha* style. There are surprisingly few sculptures, which suggests that the stone temples did not have wall niches. The establishment seems to have been exclusively *saivite*, for besides the *lingas* in situ all the images relate to this cult. Lying on the ground is the lower portion (looked legs only) of a figure seated in *padmasana* on a double lotus: elsewhere this might have been considered Jaina (although the *tirthankars* are usually shown standing in this area), but here it may be Lakulisa. An image of Uma-Mahesvara has been removed to the State Archaeological Gallery. The oldest temples may be the brick temples, to judge by the superiority of the workmanship; they have the large tile-like bricks typical of the Pala period: Beglar notes examples from the southern temple measuring 18 inches by 12 inches by 2⅘ inches or 9 inches by 12 inches by 2⅘ inches, while others in the western temple are about a foot square.

KROSHJURI (Kashipur P.S.)—This site had not been mentioned by any writer previous to its investigation by the Archaeological Directorate of West Bengal in 1965, on advice from Sri Nemai

* Journal of the Bihar and Orissa Research Society, Vol. IX; P. 416

Lal Senapati, the headmaster of the local school. The temple here is certainly the most elaborately carved stone temple in the district, and may well be the earliest. Basically *tri-ratha* in plan, it has the usual complex indentations with rich vase mouldings interspersed with miniature *rekha* temples even at the level of the plinth. Unfortunately no more than a few feet of the walls survive, the upper portion being reconstructed roughly with cement. The most remarkable feature is the richly carved stone doorframe, now broken into several pieces, one of which has been taken to the museum of the Archaeological Directorate in Calcutta. It has bands of finely chiselled decoration consisting of figures climbing a wavy steam in the centre, foliated scrolls on the inner side, and ropes with beads and flowers on the outer. At the base of each jamb are three figures : Ganga and Jamuna, two four-armed *dwarapalas* holding *saivite* emblems (rosary, *Kapala*, trident), and two potbellied dwarfs squatting with upraised hands supporting a large pot in the next panel. Sri P. C. Das Gupta puts the temple in the 7th century on the basis of Gupta affinities, but the doorjamb figures may not be so far removed from the 12th century art of Khiching in Mayurbhanj. They are certainly earlier than the doorjamb figures of Deulghat, but not perhaps earlier than some of the loose sculptures at that place. The rich mouldings of the temple walls suggest an art that has reached its full development and not yet started to fall into simplification and decay. Inside, alomost filling the sanctum, is the large *linga* of Siddhesvara Siva, 3½ feet high in a yoni 3 feet across. The shrine was preceded by a small attached *mandapa* or porch, now entirely reconstructed, at the entrance to which was presumably the carved doorframe above a door sill with a round indented projection. A number of loose sculptures are lying nearby or under worship in a shed, including: ten(?)-armed Siva dancing on the back of Nandi ; four-armed Kali in archer posture on the body of a man, with a garland of heads, holding bow, sword, arrow, and severed head ; a two-armed male in *padmasana* holding a lotus (Avalokitesvara ?) in a trefoil-arched shrine surmounted by five stupa-like towers crowned by *amlakas* ; the base of an Uma-Mahesvara image ; and several hero stones, some with lions carved in the round above them. Architectural fragments include pieces of *amlaka* and a lion projecting from an uncut stone, suggesting that the tower was of the typical Orissan *rekha* type with projecting lions. The shrine measured 7 feet 4 inches square internally, and 16½ feet square externally, excluding the *mandapa* projection.

In a field about a quarter of a mile to the south-east are two mounds, one of bricks, presumably the remains of two temples. The stone architectural fragments include pieces of *amlaka*, a semi-circular *torana*, column stumps and the like.

PARA—There are two pre-Muslim *deuls* still standing just to the east of this village, one of which belongs to the type of the three brick temples of Deulghat. The top has crumbled down badly, and most of the stucco has fallen away, but a good deal of the carved brickwork remains. The lower walls have three niches each—one on each of the projections as at Deulghat—surmounted by tall *rekha shikharas* in relief, with pilasters either side of them; the tower has the big heart-shaped *chaitya* in the centre on each of the four faces, with a trefoil niche below, and the usual mouldings up the *pagas*. The entrance is the usual tall corbelled triangle, which in Beglar's time contained a rectangular doorframe of stone; the interior of the tower is also corbelled. The ten-armed image of Durga reported by Beglar and Bloch has since been removed from the sanctum, which measures a little less than six feet square. The lower portion of the exterior walls, measuring about 18 feet square, has been given a protective brick casing, now partly fallen away.

Close by on the east is a stone temple of about the same size, though not so tall as the brick temple originally was. This is remarkable for its rich overall carving in the soft sandstone, which has largely weathered beyond recognition. Both on the tower and the base of the walls the mouldings were cut away deeply into vertical and horizontal strips minutely carved with decorative motifs and figures ; few of them can be made out now, but they include figures in scrollwork, *kirtimukhas*, miniature *rekha shikharas*, floral lozenges, little *chaityas*, tumbling foliation, mythological scenes, rows of tiny pots or finials, and the like. Some of this is not unlike the stucco at Deulghat in style and motifs, and the tiny figures (human and animal) are sensuous and rhythmical. The closely-packed narrow horizontal ridges, and the tall thin pilasters with snakes coiled round them which decorate the walls, recall the 15th century temples of Barakar, which seem a later, sprucer more mechanical development. As at Barakar, each wall has a single central niche surmounted by a *rekha shikhara*, and the space between the two *baranda* projections seems to be filled with hunched supporting figures. The top of the tower has been rebuilt with plain blocks of coarser stone—a repair which Beglar supposes to have been executed during the time of Man Singh (late 16th century). The porch has also been partly rebuilt, but there is no sign of the *mukhamandapa* which Beglar saw traces of, and which he also supposes to have existed in front of the brick temple. The sanctum, measuring approximately 6 feet by 5½ feet with a shelf projecting two feet from the back and a little over one foot above the floor, is now empty ; but Beglar reported a fine balckstone images of Gaja-Lakshmi enshrined here. The ceiling is low—six offsets leading to a large slab. Both temples face south. Immediately south-west of

the brick temple is a large mound, containing the carved stone fragments of another early temple, perhaps larger than the other two : Beglar mentions two pilasters with plain square mouldings.

At the opposite end of the village there is another temple, from a later period. It is built of stone, with a plain square shrine about 20 feet square preceded by a slightly smaller porch. It is evidently post-Muslim, as the archways of the porch are true arches, although the low pyramidal roofs are built of overlapping courses, and the shrine entrance is trabeate. The temple belongs to no definable order of architecture, though the shrine has *nava-ratha* projections, and both roofs are surmounted by small *amlaka-kalasa* finials. It used to house a four-armed image of Narayan and another of Saraswati, but these have been recently removed. There is a roughly incized inscription under the lintel at the entrance to the shrine. Beglar reports some brick temples of the same period in the village, of which he says : 'these, but especially the Radharaman temple, are profusely ornamented with moulded and cut brick ; the minute tracery....is in wonderful preservation.' The temple of Radharaman is now a complete ruin, on which no terracotta panels remain ; nor are any to be seen on any other temples. Beglar was told that the Radharaman temple was built by one Purushottam Das from Brindaban, during the viceroyalty of Man Singh, to whom the later stone temple was attributed. The tomb or *chattri* of Purushottam Das is pointed out opposite the temple. Also in the village is a small mound with a *linga*, some pillars, and *makara* waterspout ; more architectural stone fragments are in other places. Near a Siva temple are some badly worn and broken images including Vishnu upheld by Garur, and a multi-armed figure in a roundel ; the Vishnu was removed in 1968 to the Museum of the Archaeological Directorate.

BANDA (Raghunathpur P. S., about half a mile outside Cheliama)—A solitary stone temple in *rekha* style, fairly well preserved, with the *amlaka* mostly still in place. Beglar remarks on the triple openings in the front of the tower, which he considers a constructional feature resulting from the necessity of laying floors across internally to give stability to the tall tower on narrow walls—a method also employed at nearby Telkupi. The plan is *tri-ratha*, about 13 feet square, with much simplified base mouldings and plain squared pilasters either side of a central niche in each wall. The tower has *bhumi-amlakas* up the corners, the central projection decorated with interconnected chaityas and foliated scrolls, and two vertical rows of separate projecting *chaityas* between this and the corners ; the central projection on the south side has a large elaborate interweaving leafy stem design suggestive of Middle Eastern Islamic influence; the *rahapaga* on the east is still untouched, and below it the outline of two large heart-shaped *chaityas* has been left unfinished. The doorframe is carved with boys blowing horns climbing up a wavy stem (a late echo of Kroshjuri), a band of foliated scrolls, and two bands of floral lozenges. The single cell measuring 6 feet 6 inches square has a shelf projecting 3 feet 4 inches : there is no deity. The temple faces north, with a water outlet (*makara* head) on the east. It was preceded by a *mandapa* which has largely collapsed, although eight pillars still stand supporting stone cross-beams.

TELKUPI (Raghunathpur P. S., about 5 miles north-east of Cheliama)—Beglar described this place as 'containing, perhaps, the finest and largest number of temples within a small space that is to be found in the Chutia Nagpur Circle in Bengal'. He lists over twenty temples specifically, and refers to several others and to 'numerous mounds, both of brick and stone, but more of brick'. By the time Bloch visited the place in 1902, the number of the well-preserved temples must have diminished considerably, for he mentions only ten, more or less complete, at the time of his visit. Of all these only two still stand today, and one more is visible half submerged in the flooded river. For the site was on the bank of the Damodar—the crossing of the trade route between Bihar and Orissa—subject to erosion from floods, and since the building of the Pachet Dam to permanent submersion. The one that can be seen half under water towards the other side of the lake is recognizable as No. 10 in Beglar's list—a late structure, probably of the time of Man Singh, with an ugly *shikhara* divided up by horizantal ridges and two *mandapas* with pyramidal roofs in three sections. This plain and disproportioned building gives an upper limit for the period of building, for the other temples—so far as can be seen from Archaeological Survey photographs taken in 1960 before the site was flooded—were for the most part similar to the temple at Banda. An earlier photograph shows two with towers closer to the Orissan type—not so tall in proportion to their base, and with *pagas* left smooth; the ruins of a *jagamohan* stand in front.

Beglar's No. 10 is one of his first group of thirteen, all of which must have been washed away. The two temples that are still standing—now on the very edge of the river—seem to belong to Beglar's second group, although one of them contains a *linga* whereas Beglar's second group only contains vaishnava temples. But they are half a mile south at the partly submerged temple, and the statue of Narasimha which he mentions is in the other one—broken in two, presumably when the temple collapsed in which it was previously enshrined. Both these temples are exactly similar in design to the Banda temple, apart from minor differences of decoration. The Siva temple measures about 12 feet square, whereas the other

is about one foot smaller each side. The Siva temple has what appears to be Lakulisa in a trefoil niche in the centre of the lintel—which is nowhere mentioned by Beglar. The doorframe is richly carved with two bands of foliated scrolls either side of a series of dancing and other figures ; at the bottom of each jamb stands a *saivite dwarapala*. The sanctum measures 5 feet 10 inches square, with a *linga* in the centre. The other temple, also facing east, has Gaja-Lakshmi in the centre of the lintel with three bands round the doorframe; consisting of foliated scrolls, figures climbing a winding stalk, and a lozenge pattern ; the figures at the base of the jambs are too badly worn to be made out. The sanctum measures 5 feet 2 inches square with a projecting shelf upon which the broken Narasimha is placed. Between these two temples are the mounds of two more, with carved fragments indicating that they were of the same style as the two others. One has a *linga* ; the other has a fragment of doorframe with five carved bands, including a series of figures in niches, one of them looking like a *jina*; the lintel has a worn seated figure, in the centre.

Beglar describes not only Vaishnava and Saiva temples, but a small temple of Surya, and even 'a temple of Buddha, with the ruins of a large monastery, in the shape of a large brick mound, close to it.' This temple was almost certainly Jaina, as Beglar half concedes ; there are small Jaina sculptures collected in Cheliama village, to confirm Jaina presence in this area. Near the Jaina temple, he describes a profusely ornamented temple entrance : four bands of incarnations of Vishnu, bearded sages, obscene figures, and fancy animals ; Krishna in *lalitasana* was sculptured over the entrance (!). He also reports numerous monolithic miniature temples, none of which remain today. From the photographs of the Archaeological Survey, it can be seen that the decoration on some of the other temples differed in certain respects from the two remaining. In some cases the side niches had an elaborate double *chaitya* motif above them, with a lotus in the centre of the top one—which suggests a late development. One temple had a series of figures seated in *padmasana* along the lintel, and a repeated foliation pattern down the jambs. Another had the round pilaster with coiled snake which is found again at Barakar and Para. Ganesa appears frequently above the entrances. A certain stiffness of design and triviality of decoration (minute details unrelated to the architecture) suggest a date of construction after rather than before the 12th century for all these temples. Even during the Muslim period this area was largely under the control of the Hindu kings of Pachet. Beglar reports a tradition that they were built not by *Rajas* but by *mahajans* or merchants. In that case the place must have fallen into neglect when the trade route changed. There can be few other sites where so many standing temples have disappeared within so short a time.

PAKBIRA (Puncha P.S., a mile east of Puncha)—Here too, as at Telkupi, there is much less to be seen today than when Beglar visited the place in 1873. He records five standing temples, thirteen in ruins, and three mounds ; of these one standing temple was of brick, as also the three mounds, and four of the ruins—the rest were of stone. Today only three temples are still standing, all of them in a badly ruined condition, having lost most of their facing stones. The smallest of these, which is little more than a shapeless pile, probably belongs towards the west of Beglar's irregular line of five temples ; it faces east. The other two belong to Beglar's row of four facing north, immediately north of the large brick temple which was still standing in his day, but is now a mere mound. These two temples, buried several feet up to the level of the wall niches, still have some of their lower facing stones, from which an idea of their appearance may be formed. They have the basic *tri-ratha* plan with simplified, squared-off mouldings noted at Telkupi, but—unlike the temples at Telkupi—with tall thin ridged *shikharas* topping the pilasters and *rekha* towers also in relief above the niches. Also unlike Telkupi, but as at Deulghat, are the tall triangular corbelled entrances —in the case of the western temple preceded by a projecting passageway. The interior cells measure about 5 feet square, with walls about 2½ feet thick. Nothing of the *shikhara* decoration can be seen, and the base mouldings are buried.

From the large *amlaka* fragments lying about, and the stone *kalasas* with lotus buds emerging, it may be supposed that most if not all of the temples here belonged to the usual *nagara* order. The towers were corbelled on the inside—initially to a low ceiling, and then presumably again gradually closing in as at Telkupi. There are many pillars at the site, presumably from porches or *mandapas* which have long since disappeared. According to Beglar, the principle temple, of which he could only describe the foundations, 'was very large, containing the full complement of preliminary chambers and hall in front of the sanctum.' He presumed that this temple, facing west, originally enshrined the colossal figure of a naked *tirthankar*, over 7 feet high, with the lotus as symbol on its pedestal, which still stands along with a number of other Jaina sculptures in an improvised stone shed which occupies the site of the original temple. Nearby, Beglar excavated five more Jaina sculptures 'of a late age' from a brick mound : this temple too originally had a *mandapa* in front. According to him, the line of four stone single-celled temples facing north had also been fitted with *mandapas* some time after their original construction, which had subsequently fallen down revealing the plain junctions. The large brick

temple which was still standing in his day he describes as having a tall corbelled entrance with no stone lintel cutting its height, interior corbelled tower, and 'remarkably plain' exterior with ornamental projections etc. only at the corners. Digging down near the foot of one of the temples, he came upon a stone pavement—part of the original paved platform on which he assumes that all the temples once stood ; this platform appears to have been constructed of brick, from what can be seen at the edges and where holes have been dug into it for removing bricks, and was about 10 feet high.

All the sculptures at Pakbira are Jaina. In the same shed along with the colossal *tirthankar* are gathered : more than eight standing *tirthankars* including three with the bull symbol (Rishabhanatha), two with the lion (Mahavira), one with the horse (Sambavanatha), one with the lotus (Padmaprabha ?), and one with the half moon (Chandraprabha ?) ; two images of Yaksha and Sasanadevi beneath a tree with a *jina* in the branches ; three votive *stupas* (two with standing and one with seated *jinas* on each side ; two are the usual *rekha shikhara* variety, but the other may be intended to represent a *bhadra deul*); a curious small image of a four-armed deity, apparently holding a goad and noose, seated on a dog ; Ambika with child and attendant standing on her lion beneath a flowering tree ; and numerous smaller fragments. There seems little doubt that these were the images originally enshrined in the temples, or placed in the exterior niches, and some of the fragments may indicate the exterior decoration. A short distance to the south-east is another shed of roughly assembled stone blocks, which contains five standing *tirthankars* : one with the bull symbol, two with the bull between two lions (one of them 4 feet high), one with the deer (Santinatha), and one of Parsvanatha, broken off at the waist, with entwined *naga* and *nagini* between two lions on the base. Yet another image of Rishabhanatha stands on the ruinous mound of another large stone temple about fifty yards to the east, almost in the village. A tiny image of the Yaksha Kuvera has been removed to the museum of the Archaeological Directorate.

Beglar describes a number of other old stone temples within a mile or so of Pakbira, which never seem to have been investigated subsequently. The largest was at DHADKI TANR : 'in an enclosure 120 feet square, the temple faced east, and had a *mahamandapa*, and the other chambers usual in complete temples' ; there were seven smaller subordinate temples round it. From the shallowness of the mouldings, and the fact that some of the carved stones had clearly belonged to an older temple, Beglar assumed that these temples were built at the time of Man Singh. So too the large ruined temple 'with *mahamandapa* and the usual complement of chambers complete' at TUISAMA : from the 'numerous votive *chaityas*' nearby, Beglar inferred this to be either Jaina or Buddhist. It was almost certainly Jaina, as Buddhist remains are not found in this area. Within the same village were three more temples, one large and two small, two of which were Saiva : from the carved fragments lying about, Beglar assumed that an older, richly ornamented temple has also once stood there. He ascribed two more temples at the east end of the village, to the time of Man Singh. Half a mile east of a low hill called Lathondongri he came across the remains of two more temples, one with a *linga* in situ, also with shallow mouldings. This whole area is now very inaccessible and neglected.

BUDDHPUR (Manbazar P. S., about 7 miles south of Pakbira, on the other bank of the Kansai river)—There was a large temple of Buddhesvara Siva, held in particular sanctity by the local people, which originally had its full complement of *mandapas* etc. which have all fallen down today. Already in Beglar's time the main tower had been replaced by 'a modern brick and plaster creation', which in 1926 was in its turn replaced by a rough stone tower with a carved entrance. Four smaller shrines at the corners of the enclosure formed a *panchayatana* arrangement : of these, only one is partly standing today—with the simplified mouldings and squared pilasters typical of Telkupi—but the position of the others can be made out by their bases amidst the rubble. From the carved fragements of *amlakas*, *chaityas*, etc., it is evident that all these temples were in the *nagara* style. The whole area is now a heap of tumbled blocks of stone, among which pillars, door-jambs, and a *makara* waterspout can be readily identified. Apart from these five, Beglar noticed the remains of 'no less than five other temples, all smaller, and none standing' ; a large plinth may still be made out to the north-east of the enclosure. Even the original *linga* seems to have disappeared, for a pillar has now taken its place under worship in the main sanctum. Three sculptures remain at the site—cult images to judge by their heavy pedestals—one standing Vishnu, one standing Ganesa, and one Ganesa seated in *lalitasana* : their style has Orissan affinities, like that of the sculptures at Deulghat, but less richly carved. Beglar dates them to the 12th or 13th centuries. There also a number of hero stones, some of them with worn inscriptions, which have been variously assigned to the 8th to 11th centuries by Walsh. The main temple faces east.

DEOLI (Baghmundi P. S., near Suissa)—There is a *panchayatana* group of stone temples here, of which only the ruins of the central one, and two of the corner shrines more or less complete, survive. The large central temple is so buried

beneath the debris of its own tumbled blocks, that it is difficult to make out the form of the attached structures : according to Beglar, these consisted of 'a sanctum, an *antarala*, a *mahamandapa*, an *arddhamandapa*, and probably a portico'. The temple faces north, and it seems likely that there was a monumental gateway at the entrance to the enclosure on the north. The rear wall of the main temple and part of the tower is still precariously standing, which shows that the mouldings were extremely plain—consisting of little more than the *pancharatha* projections and the central niches. But the temple seems to have been given a coat of thick plaster with incised decoration, a fragment of which is still sticking to the tower on the east. The ruined condition of the remains enables the construction of the tower to be seen clearly : the ceiling of the sanctum consists of six offsets culminating in a square ; above that a further vault is constructed, slowly curving in. The same principle is followed in the smaller temples. There are no pillars, unless they are buried in the rubble. The sanctum measures 5 feet square, with walls about 2½ feet thick excluding projections—the same as at Pakbira. The corner temples are of just half those proportions and about 20 feet high : they are entirely plain, also with *pancharatha* projections, very similar to the temple at Harmashra in Bankura district, or to the temple which has recently fallen down in Charra. The south-west temple faces east, and the north-east temple faces west. The only image at the place is in worship in the sanctum of the main temple : it is a gracefully proportioned Jaina *tirthankar* with a richly carved stela, much superior in workmanship to any of the sculptures at Pakbira; according to Beglar, the symbol on the pedestal (now buried) was an antelope, thus indicating that the image was probably Santinatha—it is now worshipped by the local Hindus as 'Indunath', or 'Aruanath' as Beglar was told. The entire stie measures about 80 feet from north to south, and about 55 feet from east to west.

Suissa (Baghmundi P. S.)— A number of images, presumably from temples which once existed nearby, are collected in the village. These include : a large four-armed Vishnu (4 feet 2 inches high) in unusual *tribhanga* pose, accompanied by Sri and Saraswati and devotees on the pedestal but no Garura ; Ambika, broken into several pieces ; *chaturmukha* votive shrine of *rekha* type with seated *tirthankars* ; several large and small standing *tirthankar* images, some whole, some broken (the symbols include a pot, a lotus or wheel, the sun? a lion, two with a bull, and one example of Parsvanath) ; another Ambika ; a *linga* ; an *amlaka* 2½ feet across ; a decorated door-jamb ; and various fragments. These statues were in worship under Hindu names when Beglar saw them, but are lying about in a neglected condition now.

Palma (within a few miles of Purulia, on the Manbazar road)—This place was visited by Hunter and Bloch, but not by Beglar. Hunter refers to the large mound of a Jain temple, covered with stone and brick and with numerous *tirthankar* images scattered about, as well as other mounds nearby. But Bloch only refers to a heap of debris with some stone pillars and two *tirthankar* images. Four memorial stones were removed to the Patna museum.

Charra (within a few miles of Purulia, on the road to Raghunathpur)—Until recently, when one of them fell down, there were two small stone *rekha deuls* in this village. The one which is still standing has an entirely plain *tri-ratha* wall with only the most rudimentary mouldings at the base, but the tower is quite extensively carved with square *bhumi-amlakas*, large *chaityas* on the central projection, and small *chaityas* on the other sections—now badly worn. The ornamentation of the *shikhara* suggests an earlier stage than that of the Telkupi temples. On a base 7½ feet square, with a sanctum 4 feet by 3 feet 8 inches, the temple rises to a height of about 22 feet with the *amlaka* still in position. The other temple, which has fallen down, was about the same size, but the tower was entirely plain ; it was *pancha-ratha* in plan, with no base mouldings, and only a very simple series of *baranda* mouldings. This temple faced south, and the other one east. Both were empty, but as there are many loose Jaina sculptures in the village, it may be supposed that they were originally Jaina temples. From the number of architectural stones re-used for the villagers' huts, Beglar assumed there had been 'numerous' other temples here, and the District Gazetteer puts the number at seven. Beglar reports that the many images lying about were principally Vaishnava, but Bloch found them almost entirely Jaina as today.

Charra was subsequently visited by Anantaprasad Sastri, who referred to a ten-armed image locally called Baneśvara at a spot about a mile away, along with a number of stone blocks suggesting a former temple. Two miles north-west, at Gholamara, Sastri describes the ruins of another temple ('the whole place is filled with slabs of stone' and other carved fragments) where the main image was a Jaina *tirthankar* with an inscription dated to the 11-12th centuries A. D. There was also 'a lion over a goddess' (Durga ?) with eight arms. The *tirthankar* was subsequently removed to the Patna museum. (See the *Journal of the Bihar and Orissa Research Society*, Vol. V. p. 285-7).

Balarampur (Purulia Muffassil P. S., 4 miles south-east of Purulia town)—There is a large brick *rekha deul* here, which seems to be intermediary between early and late styles. As for many later smaller temples, especially in Bankura district,

the Orissan type has been largely stripped of decoration and reduced to its bare essentials : the tower is entirely smooth, with the *ratha* projections standing out boldly ; but the lower walls still have the motif of *shikhara* in relief on the central and corner projections. But there are no exterior niches, and the miniature *shikhara* decoration on the walls is of the late variety already noticed in the half submerged temple at Telkupi—tall with a straight taper, divided up by horizontal ridges. A curious feature is that the lower plan is *pancha-ratha*, but two extra *pagas* are added to the tower, supported on brackets at the *baranda* level. The tower curves in abruptly, and is rather short—no taller than the equally low body. The exterior measures about 17 feet square, and the sanctum 8 feet square, with a passageway (*antarala*) 7½ feet long. The two *baranda* mouldings have the design of a projecting strip with half circles opposite each other at intervals along it—a motif characteristic of late mediaeval Bengal temples, and first found on the 15th century temples at Barakar. The entrance passageway is corbelled, as also the interior of the tower, but Beglar noted that the *mahamandapa* (now entirely fallen) originally had a dome resting on corbelled pendentives. He also noted that some sculptured and other stones, including an architrave, from an earlier temple had been re-used in the base and inner wall. All the evidence points to a post-Muslim date, possibly the period of Man Singh or even later. The temple is now empty, but I was informed that it was originally dedicated to Radha-Shyam.

When Colonel Dalton visited Balarampur in 1866, he referred to a collection of Jaina *tirthankar* images here, but Beglar makes no mention of them. Subsequently a confusion arose as to whether Dalton might have confused Balarampur with Palma, but I am informed by Sri D. K. Chakravarty of the Archaeological Directorate that there are indeed the remains of an a pre-Muslim stone *deul* beside the river, near the leprosy centre, although he did not see any Jaina images.

BIRINCHINATH (near Mandandi, on the southern lower slopes of the Pachet Hill)—The site of an old temple, now disappeared : a sunken *linga* is approached by steps into a pit with modern superstructure. Many stone fragments with architectural mouldings and incisions are lying about, some re-used for the steps up the hill. Fragments of *amlaka* and finial indicate a previous *rekha deul*. There is a modern *mandapa* on old columns, a Nandi *bull* near another ancient *linga*, and an old image plinth. Apart from Birinchinath, modern painted clay images of Radha-Krishna, Sarabhuj, and Jagaddhatri are under worship in modern structures.

2. Late Temples

GARH PANCHAKOT (Neturia P. S., at the southern foot of the Pachet Hill)—The fort of the powerful Rajas of Pachet, mentioned in the 17th century *Baharistan-i-Ghaibi* of Mirza Nathan as paying only nominal submission to Islam Khan, was already abandoned and falling to ruin at the time of Beglar's visit, and is hopelessly overgrown today. Beglar records two inscriptions on two of the gates, referring to one Sri Vira Hamira with the date *samvat* 1657 or 59, *i.e.*, about 1600. This is presumably the same king who was ruling in Bishnupur at that time, though whether and for how long Pachet was under the sovereignty of the Bishnupur kings is not clear : the *Baharistan* mentions them separately. All except possibly one of the temples in the fort appear to date from the 17th or more probably 18th centuries, and show no particular affinity with the Bishnupur temples, except for the tower of the westerly *pancha-ratna* temple, which is like those at the Bishnupur single-towered temple. Beglar mentions a number of 'massively built' temples on the side of the hill overlooking the fort (all with the true dome and true arch, hence of the Muslim period), but they are not easily accessible now. The largest, with a domed *mahamandapa*, was said to have been built by a king called Raghunath—which was the name of the son of Bir Hambir of Bishnupur.

The temples inside the fort are in an extremely dilapidated condition, two of them mere mounds of rubble and another reduced to its plinth. Of the two mounds, one consists of tumbled sandstone blocks, some of them with architectural mouldings, but mostly rough : this may have been the oldest temple. The only other stone temple, of laterite, is the one referred to by Bloch as an 'exact duplicate' of the temple of Raghunath on the hill : it consisted of a *rekha* tower over the shrine, preceded by a porch with steep pyramidal roof divided into four sections like the half submerged temple at Telkupi ; the exterior was thickly plastered without any decoration. There was an inscription above the entrance to the porch, now mostly crumbled away. The best preserved—but still very badly ruined—among the temples are both of *pancha-ratna* design, with pillared porches on all four sides, and decoration in carved bricks (terracotta). These terracottas, consisting of small panels carved before they were baked, are totally unlike the carved brickwork of the pre-Muslim *deuls*. The temple on the west is the more extensively decorated—both on the interior and exterior facades. By the time of my visit in 1965, the outer walls had collapsed on the east and west, and many of the terracotta panels had already been prized out by souvenir hunters, but enough remained to show the richness and variety typical of this art—rows of figures, floral bands, and geometrical motifs. The use of figure decoration inside the porches and on the tower is unusual : above the tower window is a row herdsboys dancing animatedly and blowing their horns ;

there are other Krishnalila scenes and dancers on the columns. In front of the temple on the south are the remains of a stone *mandapa* with corbelled entrance and inner roof on offsets almost to a point. Both the *pancha-ratna* temples have the four smaller towers close inset, but the central tower on the other temple is extremely big—far bigger than the usual proportions for this type of temple. The terracotta decoration is as rich as on the other, and equally damaged or partly removed. None of the exterior walls have fallen, but the facades are largely plastered plain, except on the eastern pillars and along the base on the east; the inner facades are also decorated with terracottas, especially on the east with mythological friezes, and on the north and south with incised floral motifs in Moghul style panels. There was another terracotta-decorated temple to the south-east, but this is now completely overgrown and half buried in its own rubble, so it is hard to make out anything. This also had pillared porches, and might have been another *pancha-ratna* temple, or *at-chala*. Another smaller temple, of which only the lower portion remains, also had terra-cotta decoration. There were two large *jorbangla* temples, one of them so completely overgrown that nothing of its decoration can be made out, but the other seems to have been plastered plain inside and out. Beyond the fort, on the road to the village, is a small *ekbangla* shrine : the centre of the facade above the archway has fallen down, but a single row of terracotta figures and other banded decoration are still recognizable either side.

All these temples are now empty, but an indication of the images they once contained may be had from the *thakurbari* of the Rajas of Kasipur, who took the images with them when the family removed from Pachet to Kasipur. Like the deities for whom the Bishnupur temples were built, these mostly relate to the cult of Krishna under various names : Syam Chand, Radha-Ramon, Radha-Syam, Madan-Mohan, Madan Gopal, (these names are all found at Bishnupur), Damodar, Gopal, and three hundred *salagrams*. Besides these, the family worships Kali under the name of Rajeshwarimata, a traditional stone image of Durga, Ram-Sita-Lakshmana, Panchathakur, Lakshmi, and other images. The temples which house them are modern flat-roofed structures of brick and cement.

GANPUR (near Muradi in Santuri P. S.)—Abandoned on the outskirts of the village is an interesting example of a type of *at-chala* temple especially built in the 17th century in Bankura district (*e.g.*, at Simlapal, Sabrakon, Tejpal) : the upper tower hardly projects above the lower roof, and the lines of the roof flow into each other, giving the appearance of a *char-chala* temple. The base measures 23½ feet square, with a pillared porch at the front, and a single chamber 15 feet 6 inches by 7 feet 2 inches ; the ceiling of the chamber is a pointed vault. The temple is built of Barakar sandstone, and originally had a brick enclosure wall ; there seems to have been a brick *rasmancha* nearby. The image (of Raghunath) is said to have been removed to Cholbalpur in Kulti P. S. of Burdwan district. The temple is in good condition.

CHELIAMA (Raghunathpur P. S.)—This village contains the temple most richly decorated with terracottas in Purulia district, and one of the few surviving from the 17th century in West Bengal : the temple of Radha-Binode, dated *sakabda* 1619 (c. 1697 A.D.). In the panels above the archways are depicted (left) Krishnalila scenes, notably *bastraharana* and *rasmandala* ; (centre) Rama confronting Ravana in two huge war chariots with monkeys and demons joining in the fray ; (right) Chandi accompanied by the other *matrikas* fighting the army of Sumbha and Nisumbha, who are seated on an elephant. A series of smaller panels rising on the left and right and continuing across the top include the *avataras* of Vishnu, and various other deities and devotees. Along the base on the left ran the usual Krishnalila frieze, and on the right (much less common) a Ramayana frieze ; beneath these is another frieze of processional and hunting scenes. At the bottom of the left column a *raja* is watching a performance of some kind. The upper part of the columns is ornamented with small figures of Durga with attendant deities, herdsboys beneath trees, animals and suchlike motifs. But the most unusual and fanciful panels are at the extreme edges of the facade ; blocks of tiny figures including demons, monkeys, musicians, Brahma greeting Krishna, and herdsboys climbing a palmtree—an echo of the stone doorframe carvings at Kroshjuri and Banda. On the northern wall is a rare scene of acrobats performing at the top of a pole, with a drummer below. Above the side entrance on the south are two delicate Radha-Krishna panels. The temple measures about 19 feet square, with a pillared porch on the east leading through a single archway into the elongated image chamber with passageway extensions at each end. The roof of the temple was already badly overgrown four years ago, and still nothing has been done to repair it, although a recommendation for protection has been forwarded by the Archaeological Directorate : the entire facade will soon collapse, for already the sky can be seen between it and the main body of the building. The base and column panels of the facade are already badly worn, but the panels above the archways are in excellent condition, full of rhythmic vitality and folk imagination.

CHAKULTOR (Purulia Muffassil P. S.)—*Jorbangla* temple of Syam-Chand, 17 feet 6 inches

by 17 feet, with very little decoration : houses an eight-metalled Radha-Krishna image and a *salagrama*. Probably belongs to the 18th century.

BAGHMUNDI—Within the *rajbari* compound is the former temple of Radha-Govinda, dated *sakabda* 1675 (c. 1753 A.D.). It is an *at-chala* design, badly overgrown, measuring about 19 feet square. The facade is fully decorated with lotus medallions and other floral and geometrical designs in terracotta, but no figures. The new Radha-Govinda temple is a flat-roofed modern structure, also falling to ruin. Near it is a small octagonal *rasmancha* with nine pinnacles, decorated with terracotta figures in very late style on four out of eight sides : these include Rama and Sita enthroned with entourage, Krishna in *rasmandala* with the *gopis*, episodes like the raising of Gobardhan, or killing of Bokasur, and a variety of secular figures and animals—all very crudely modelled. Further into the village is a plain *pancha-ratna* Siva temple. All these were built by the Rajas of Baghmundi.

NOTE : As regards the territory transferred from the Purnea District of Bihar, the 1951 figures relating to percentage distribution of villages and population were based on data furnished by the Superintendent of Census Operations, Bihar. The number of inhabited villages involved in the transfer is 723 according to these data, but as the details of 7 villages are not available the percentages worked out for the various ranges have been calculated on the basis of 716 villages only.

PART II

A. CENSUS TABLES AND B. OFFICIAL STATISTICS

A. CENSUS TABLES

Explanatory Notes

This part contains 44 tables presenting the 1961 Census data for the district. Most of the tables present materials for each police station and some tables present data for each town. The figures for the district as a whole have been given first followed by the figures for a subdivision and the police stations under a subdivision. The police stations in a subdivision have been arranged according to the location code number assigned to a police station for the purpose of the 1961 Census.

The tables presented in this part do not however cover the whole range of Census statistics pertaining to the district. The tables on migration and certain other topics have not been included in this volume for want of space. Those will be found in the West Bengal Census Table Volumes.

The following paragraphs will give a brief account of the tables included in this volume. A detailed note on each of the tables has been given in respective census publications containing 1961 Census Tables. Definitions adopted for certain terms often used in census parlance have been given in Appendix I to this note.

A—Series

General Population Tables

There are, in all, four General Population Tables and three Appendices in this series. But only two tables *i.e.*, A-I and A III have been selected for presentation in the District Census Handbook.

Table A-I

This table presents area, density, number of villages inhabited and uninhabited separately, number of towns, occupied residential house and total population with sex break-up. These data have been shown down to police station and each town separately under each police station having such town.

The Director of Land Records and Surveys, West Bengal was unable to furnish the revised area figures of the territorial units for the 1961 Census. In absence of the figures furnished .the State Survey Department, area figures for different territorial units had to be computed for the purpose of Census from the various available sources. Area figures mostly were taken from the last published Jurisdiction List for the *mauzas*.

The area of a town administered by the Municipal Commissioners was obtained from the civic authority concerned. For non-municipal towns, the area figures were obtained by adding up the area figures of the constituent *mauzas*. The density figures in the Table A-I have been calculated on the computed area figures.

Occupied Residential House meant the occupied Census-house. All Census-houses used wholly or partly as dwellings including a parlour or sitting room, a kitchen, which were located in structures auxiliary to the main house were counted as occupied Census-houses, but cowsheds, grain-gollas etc., though auxiliary to the main house, were excluded.

Table A-III

This table gives an account of the distribution of inhabited villages for the district and each police station in accordance with the size of population which has been broadly classified by seven groups *i.e.*, less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above.

B—Series

(*i*) *General Economic Tables*

The B-Series tables show the distribution of population by economic activity co-related with sex, age and educational level. The classification by economic activity has been made first by workers and non-workers and then the workers have been further classified into nine broad Industrial Categories.

In the 1941 and earlier Censuses, religion was adopted as the basis on which primary sorting and tabulations were done. The population classified by religion and sex, thus obtained, was given in the village statistics. In the 1951 Census Economic Classification substituted the classification based on religion. For this purpose population was divided into eight Livelihood Classes and in each livelihood class the self supporting persons and their dependents were included. At the 1961 Census the concept of dependency was abandoned for Economic Classification of population and the concept of work was adopted.

The workers in the nine Industrial Categories shown in the Primary Census Abstract conform to the industry divisions as given in the Standard Industrial Classification as follows :

	Category	Industry Division
I	Cultivator	Minor Groups 000, 001, 002, 003 and 004 from Division o
II	Agricultural Labourer	
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities	Division o except Minor Groups 000 to 004 and Division 1 (unless carried on in household level)
IV	At Household Industry	Division o except Minor Groups *000 to 004, Divisions 1, 2 and 3* (it carried on in household level)
V	In Manufacturing other than Household Industry	Division 2 and 3 (unless carried on in household level)
VI	In Construction	Division 4
VII	In Trade & Commerce	Division 6
VIII	In Transport, Storage and Communications	Division 7
IX	In Other Services	Divisions 5, 8 and 9

Definitions of Workers and Non-workers have been given in Appendix I.

Tables B-I and B-II

Table B-I is the basic economic table of 1961 Census. It shows the distribution of persons into nine broad Industrial Categories of workers and non-workers, with sex break-up under each category. This table also shows the distribution of the population into four broad age-groups under each category. The data have been presented for the district and each police station with rural-urban break-up. Table B-II which shows similar figures for the towns has been combined with Table B-I and entries for each town have been shown under the police station where it is situated.

Table B-III

This table has been prepared in two parts *i.e.*, B-III Part A and B-III Part B, of which the former relates to urban areas and the latter to rural areas. In both the parts each of the nine categories of workers and non-workers have been cross-tabulated by literacy and educational levels with sex break-up. The figures have been presented down to the police station and town.

Table B-IV

This table shows the distribution of workers engaged in household industry and non-household industry, trade, business, profession or service by sex, industrial divisions, major groups (Appendix II) and by status of employment *i.e.*, "Employer", "Employee", "Single Worker" and "Family Worker" (Appendix I). In the case of workers engaged in household industry the status of their employment has been classified into two *i.e.*, "Employee" and "Others".

The figures have been presented for the working population except cultivators and agricultural labourers of rural and urban areas separately down to police station.

Table B-V

This table gives the Occupational Classification (Appendix IV to this note) of persons who are working in non-agricultural sector. In this table data have been shown for rural and urban working population engaged in non-agricultural sector separately with sex break-up, by occupational group. The figures have been presented down to police station.

Table B-VI

This table presents the distribution of workers except those engaged in agricultural sector into occupational division and further they have been classified by four broad age-groups and age not stated, and by educational levels. This table shows the figures of urban areas for the district as a whole.

Table B-VII Part A

This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work as cultivators, agricultural labourers and at household industry by sex. The figures have been shown for rural and urban working population separately down to police station. Figures have been presented by major groups of industries in the case of the district and in the case of police stations figures have been shown only against the divisions of the Standard Industrial Classification.

Table B-VII Part B

This table furnishes the distribution of workers engaged principally in non-agricultural and non-household industry in accordance with their secondary work at household industry only. These workers have further been classified by sex, industrial divisions and major groups. These figures have been presented down to police station.

Table B-VIII Part A

This table accounts for the distribution of unemployed persons of age 15 and above who are seeking employment for the first time and who were employed before but now out of employment by broad age-groups. They have further been classified by sex and educational levels. This part relates to only the urban population and has been shown for the total urban population of the district as a whole.

Table B-VIII Part B

This part of the table contains the same material as that contained in Part A. The difference is that this part shows the figures for the rural population only down to police station. Furtner classification of the educational levels beyond matriculation has not been shown for the rural unemployed persons and the classification by age-groups has also not been done.

Table B-IX

This table shows the distribution of all the non-working population by broad age-groups as in Table B-I. They have further been classified by sex and eight different types of activity of non-workers (for definition of different types of activity see the Appendix I). The figures have separately been shown for rural and urban population and down to police station.

(*ii*) *Household Economic Tables*

Tables B-X to B-XVII account for the economic activity of a household as unit. The related figures have been compiled and tabulated from the data extracted from the entries of the Household Schedules on the basis of 20 per cent Sample. These tables have been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures of different tables relate to the number of households engaged in cultivation or household industry or both, size of land or interest in land cultivated and/or the household industry conducted by the household and the number of family workers and/or hired workers engaged in either of the two activities separately or together.

C—Series

Social and Cultural Tables

Table C-I

This table gives the composition of the members in a household. Sample Households have been classified by size, composition by family and non-family members, and by economic activity. The households engaged in cultivation have been further classified by size of land holding. This table is of sociological interest indicating, as it does, the strength of the joint family system. The material of this table has been collected from the Household Schedules on the basis of 20 per cent Sample and the table has been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delni. The figures have been presented for total, rural and urban households for the district only.

Table C-II

This is a very important demographic table. This table gives an account of distribution of rural and urban pc pulation separately by sex, age-groups and marital status. The entire population in 0-9 years age-group has been treated as never married and as such no other classifications have been shown against them. This table will give the readers an idea about the trend of variations in the proportions in the various marital status conditions over the last ten years. The figures have been presented down to police station.

Table C-III Part A

This part of the Table C-III relates to the total population of both the rural and urban areas. This table shows the distribution of the population by sex, age groups and educational levels. The figures have been presented down to district only.

Tables C-III Part B and Part C

These two parts contain the same data as contained in Part A. Only difference is this that Part B deals with the urban population, while Part C deals with rural population. Again in regard to educational levels more detailed educational classifications have been adopted in the case of urban area than those in rural area. In Part B figures have been presented for the total urban population of the district as a whole. Part C represents the population down to police station.

Table C-V

This table presents the distribution of population by sex and mother-tongues. There are as many as 33 mother-tongues spoken in this district. The figures have been shown for rural and urban areas separately down to police station.

Table C-VII

This table shows the distribution of population for rural and urban areas separately by sex and religions. The population has been classified into 6 main religions arranged alphabetically and the population belonging to other religions have been shown together under "Other Religions". There is another classification which describes "Religion not stated". The figures have been presented down to police station.

Table C-VIII Part A

This table presents the distribution of the scheduled caste population by sex, industrial categories of workers and non-workers and by

literacy. The figures for the rural and urban scheduled caste population have been shown separately down to police station. This table is considered important from the view point of the classification of scheduled caste population into various economic activities.

Table C-VIII Part B

This table contains the same distribution and presentation of data as in C-VIII Part A. This part relates to only scheduled tribes.

SCT—Series

Special Tables for Scheduled Castes and Tribes

Table SCT-I Part A

This table gives an account of the distribution of the scheduled caste population by sex and industrial categories of workers and non-workers. The entire scheduled caste population belong to as many as 22 castes arranged alphabetically. Persons who returned themselves as belonging to scheduled castes without specifying the names of the castes have been shown under "Unclassified." There is another interesting classification of special occupations *i.e.*, "Tanning and currying of hides and skins" and "Scavenging". The figures have been presented for rural and urban areas separately down to police station.

Table SCT-I Part B

This table contains the same distribution and presentation as in Part A. This table relates to scheduled tribes which are as many as 24 numbers in this district and arranged alphabetically. There is no column for the special occupations in this part.

Both these parts are interesting as they give detailed information about individual castes and tribes.

Tables SCT-III Part A(i) to Part B(ii)

These tables show the distribution of the scheduled caste or scheduled tribe population by name of caste or tribe, sex and educational levels for rural and urban areas separately down to district only.

Tables SCT-V Part A and Part B

These tables show the distribution of the households belonging to scheduled castes and tribes engaged in cultivation showing their interest in land and size of land. The figures have been collected from the household schedule on the basis of 20 per cent Sample. These tables have also been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for rural areas only for the district level. Part A of the table relates to the scheduled castes and Part B to the scheduled tribes.

Table SC-I

This table shows the distribution of the scheduled caste population by sex, by 3 main types of activities, non-working and educational levels. Other types of activity have been clubbed together and shown under "Others". The figures have been presented for rural and urban areas separately only for the district.

Table ST-I

This table gives an account of the distribution of the scheduled tribe population by name of tribe, mother-tongue, bilingualism and by sex. The figures have been presented only for the district.

Table ST-II

This table corresponds to SC-I in respect of the manner of distribution and presentation expect in that distribution by educational levels has not been shown. It relates to scheduled tribes.

Industrial Establishments

This table accounts for the distribution of different industrial establishments returned in the Housing Census of October, 1960 as carried on in Census house(s) by villages and towns under each police station separately. The nature of industry has been indicated by the minor groups of the Standard Industrial Classification (Appendix II). Number of such industrial establishmets has been put within brackets against each minor group. The data have been collected from the Houselists prepared during the house-numbering operation.

APPENDIX I

Definitions

Census House :

A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of bussiness, workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

Census Household:

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Literacy :

A person who can neither read nor write or can merely read but cannot write in any language was treated as illiterate. A literate is a person who can both read and write with understanding. The test for reading is ability to read any simple letter either in print or in manuscript with felicity. The test for writing is ability to write a simple letter.

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained the highest examination passed to denote the educational level attained by him was recorded.

Mother-tongue:

Mother-tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy the language mostly spoken in the person's home in childhood was taken as mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother was written.

Worker:

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which the household was visited for enumeration. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other causes are also treated as Workers. An under-trial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however treated as Workers. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working. Persons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as a Worker.

Status of Employment:

(i) An *Employer* is a person who has to employ other persons in order to perform the work. That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

(ii) An *Employee* is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other worker on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

(iii) A *Single Worker* is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a *Single Worker* will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

(iv) A *Family Worker* is a member who works, without receiving wages in cash or kind, in an industry, business, or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an industry should be on a scale larger than what has been covered in 'Household Industry' whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Household Industry:

A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for Household Industry is the participation of one or more member of a household in rural areas. In the Urban areas the industry should be confined to the house.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

APPENDIX I—*contd.*

Non-workers:

All persons who are not workers are non-workers. They should fall under any one of the following categories :

1. Full time student or child attending school who does no other work.

2. A person engaged in unpaid home duties (like housewife or other adult female).

3. Any dependent, including an infant or child not attending school or a person permanently disabled from work because of illness or old age.

4. A *retired person who is not employed again, rentier,* person living on agricultural or non-agricultural royalty, rent or dividend or any other persons of independent means for securing which he does not have to work and who does no other work.

5. Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence.

6. A convict in jail or an inmate of a penal, mental or charitable institution.

7. A person who has not been employed before but is seeking employment for the first time.

8. A *person employed before but now out of employment* and seeking employment.

APPENDIX II

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting	
00	*Field Produce and Plantation Crops*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantations, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by Code No. 006 and flowers) not covered above	009
01	*Plantation Crops*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	*Forestry and Logging*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	*Fishing*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	*Livestock and Hunting*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting—*contd.*	
04	*Livestock and Hunting*—contd.	
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs*	
	Production of rice, atta, flour, etc. by milling, dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oil (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
21	*Beverages*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	*Tobacco Products*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jarda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	*Manufacture of Wood and Wooden Products*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	*Paper and Paper Products*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	*Printing and Publishing*	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
30	*Printing and Publishing*—contd.	
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	*Rubber, Petroleum and Coal Products*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	*Chemicals and Chemical Products*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*contd.*	
34	*Non-metallic Mineral Products other than Petroleum and Coal*—contd.	
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by Code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanizing, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical Equipment*—contd.	
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electrical lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	*Transport Equipment*	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engine parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountainpen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	*Construction*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of waterways and water reservoirs such as bunds, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	*501*
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	*Water Supply and Sanitary Services*	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade*	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics, and textile products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf) coffee (Seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 6—Trade and Commerce—*contd.*	
	Wholesale Trade—contd.	
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	*Retail Trade*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (Seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products: (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobil oil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661

Major Group (Code)	Description	Minor Group (Code)
	Division 6—Trade and Commerce—*concld.*	
	Retail Trade—contd.	
66	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipments	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communications	
70	*Transport*	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704

APPENDIX II—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 7—Transport, Storage and Communications—contd.	
70	*Transport*—contd.	
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	*Storage and Ware Housing*	
	Operation of storage such as ware-houses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722
73	*Communications*	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communications	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt. Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communications, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industry groups)	
	Public service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of the State Governments	809
81	*Educational and Scientific Services*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	*Medical and Health Services*	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homoepathic practitioners	820

Major Group (Code)	Description	Minor Group (Code)
	Division 8—Services—*contd.*	
82	*Medical and Health Services*—contd.	
	Veterinary services rendered by organisation and individuals	821
83	*Religious and Welfare Services*	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	*Legal Services*	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, muhurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	*Business Services*	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853
86	*Community Services and Trade and Labour Associations*	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as ratepayers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*	
	Production of motion picture and allied services such as processing, editing etc.	870
	Recreation service rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing	873

APPENDIX II—*concld.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Dizision 8—Services—*contd.*	
88	*Personal Services*	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, drycleaning services	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair-dressing saloon and beauty shops	884
	Division 8—Services—*concld.*	
88	*Personal Services*—contd.	
	Services rendered by portrait and commercial photographic studios	885
89	*Services (not elsewhere classified)*	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX III

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005.1	Production of Vegetables
005.2	Production of roots etc., not included above
006.1	Production of fruits and nuts in plantation, vines and orchards
006.2	Production of copra (from coconuts)
007.1	Production of thatching grass
007.2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008.1	Production of juice (neera) by tapping coconut trees
008.2	Production of juice by tapping other palms like date, palmyra n.e.c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015.1	Pan Cultivation
015.2	Plantation Crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023.1	Production of charcoal
023.2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025.1	Production of Kathha
025.2	Production of Lac
025.3	Production of gum
025.4	Production of resins, barks, herbs, wild fruits, berries and leaves etc. n.e.c.
026	Production and gathering of other forest products not covered above
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch, shells, sponges, sea herbs, corals etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040.1	Rearing of goats for milk and animal power
040.2	Rearing of buffaloes for milk and animal power
040.3	Rearing of cows for milk and animal power
040.4	Rearing of camels and other big domestic animals
040.5	Production and rearing of livestock mainly for milk and animal power n.e.c.
041.1	Sheep breeding and rearing
041.2	Production of wool
042.1	Rearing and production of pigs and goats (mainly for slaughter)
042.2	Rearing and production of other animals (mainly for slaughter) n.e.c.
043.1	Poultry keeping and production of eggs
043.2	Rearing and production of ducks, hens etc. and other small birds *e.g.* pigeons, parrots, peacock, maina etc.
044.1	Bee keeping for production of honey and wax
044.2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046.1	Dog breeding, rearing of rabbits and guinea-pigs
046.2	Rearing of other small animals and insects n.e.c.
048.1	Collection of bones
048.2	Manufacture of glue from animal carcasses
048.3	Manufacture of gut
048.4	Production of other animal husbandry products such as skin, ivory, teeth and hair etc.
Major Group 10—Mining and Quarrying	
107.1	Extraction of chalk
107.2	Quarrying of lime-stone
107.3	Stone and slate quarrying
107.4	Quarrying of sand, clay, gravel etc. n.e.c.
Major Group 20—Foodstuffs	
200.1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram etc.
200.2	Hand pounding of rice by Dhekhi or Ukhal
200.3	Production of rice by milling, dehusking and processing of paddy by rice mill
200.4	Grinding of chillies, turmeric etc.
200.5	Production of pulses
200.6	Parching of grains
200.7	Production and processing of other crops and food grains, n.e.c.
202.1	Gur and Khandsari making from sugarcane and palm
202.2	Production of bhoora and candy
202.3	Production of jaggery from coconut and palmyra juice (neera)
202.4	Production of other indigenous products from sugar and jaggery n.e.c.
203.1	Manufacture of achar, pickles, chutney and murabba
203.2	Production of sauce, jam and jelly
203.3	Processing of cashew nut
203.4	Manufacture of kokam products
203.5	Fruit preservation (canning of fruits)
203.6	Making of dried vegetables
203.7	Production of other fruit products and preservation of fruits n.e.c.
204.1	Slaughtering, preservation of meat and fish and canning of fish
204.2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209.1	Confectionery
209.2	Making of sweet-meats, laddu, peda, barphi, batasa etc.
209.3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam etc.
209.4	Making of chura or chira, muri, murki, khoi
209.5	Making of chat
209.6	Making of dalmot, chanachur (jor) garam, rewari etc.
209.7	Making of other food products for residuary snacks
209.8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210.1	Manufacture of vinegar from coconut juice (neera)
210.2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212.1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212.2	Production of other indigenous liquors from other materials from trees and shrubs
214.1	Production of mineral water

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 21—Beverages—*contd.*	
214.2	Production of aerated water such as sodawater, lemonade etc.
215	Production of ice
216	Production of ice cream, ice-candy or kulphimalai, milk-shake etc.
218	Grinding of coffee
219.1	Preparation of sharbats and squashes
219.2	Preparation of jeerapani
219.3	Production of other beverages n.e.c.
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini, and other chewing tobacco
226	Manufacture of other tobacco products n.e.c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233.1	Dyeing of cloth (cotton) and yarn
233.2	Bleaching of cloth (cotton) and yarn
233.3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238.1	Making of fishing net
238.2	Making of mosquito net
238.3	Making of other nets
239.1	Making of sacred thread
239.2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis etc.
242	Dyeing and bleaching of jute
244.1	Making of rope and cordage, out of hemp
244.2	Making of rope and cordage, out of jute
244.3	Making of rope by palm fibre
244.4	Making of rope by date palm fibre
244.5	Making of fibre, sunn-hemp fibre
244.6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256.1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256.2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262.1	Spinning of tussar, other than in mills

Industrial Code Number	Household Industry
Major Group 26—Textile—Silk—*contd.*	
262.2	Spinning of eri, other than in mills
262.3	Spinning of silk, other than in mills n.e.c.
263.1	Weaving of Traditional silk (Atlas) by powerloom
263.2	Weaving of tussar by powerloom
263.3	Weaving of eri by powerloom
263.4	Weaving of silk and artificial silk in powerloom n.e.c.
264.1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264.2	Weaving of silk and artificial silk in handloom n.e.c.
265	Printing of silk textile
266.1	Goaf making
266.2	Making of silk cordage, rope and twine n.e.c.
Major Group 27—Textile—Miscellaneous	
270.1	Making of durries
270.2	Making of carpets and druggets
270.3	Manufacture of other similar textile products n.e.c.
271.1	Making of hosiery goods such as banyans, socks, sweaters, mufflers etc.
271.2	Making of nalas and azarbands
271.3	Making of parandas and chootelas
271.4	Manufacture of hosiery and other knitted fabrics and garments n.e.c.
272.1	Embroidery and making of phulkari
272.2	Making of jari thread, zardoshi
272.3	Traditional embroidery
272.4	Patchwork embroidery
272.5	Lace garland making
272.6	Making of fringes and crepe laces
272.7	Making of kargota, main garlands, shell garlands etc.
272.8	Making of other embroidery products n.e.c.
273.1	Making of cap, hat, and other head-gear
273.2	Traditional garments
273.3	Chrochet work (bora caps)
273.4	Making of textile garments including rain-coats and head-gears n.e.c.
274.1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags etc.
274.2	Making of newar
274.3	Manufacture of other made-up textile goods like mattress, quilt, rezai etc., n.e.c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin etc.
276.1	Making of namda felt
276.2	Making of suzani (padded quilts)
276.3	Processing of coconut fibre for upholstery
276.4	Handicraft articles made of flax and fibre
276.5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n.e.c.
277.1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277.2	Making of brush, broom etc. from coconut fibre
277.3	Coir spinning
277.4	Coconut curing
277.5	Other allied products of coir industry n.e.c.
278	Manufacture and repair of umbrellas
279.1	Making of daura (thread) batua, cotton thread, buttons
279.2	Manufacture of dolls and toys (rags and cotton)
279.3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 28—Manufacture of Wood and Wooden Products—*contd.*	
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283.1	Carpentry works concerned with repairs of agricultural implements (wood)
283.2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures
284.1	Lacquerware (if on wood)
284.2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284.3	Manufacture of wooden toys
284.4	Sandal wood and other wood carving
284.5	Bead making from wood
284.6	Sawdust and plaster figure making
284.7	Marquetry boxes (inlay work)
284.8	Manufacture of photo frames and framing of photo paintings etc.
284.9	Manufacture of other wooden products n.e.c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288.1	Making of box from moonjgrass
288.2	Making of rope mats etc. from moonj and sawai grass and making of cadjar for thatching purposes
288.3	Making of mats, handfans and umbrellas from palm leaves
288.4	Making of sirki, moora and chhaj
288.5	Making of baskets and broomsticks
288.6	Making of donas (drone) and pattals (Patravali) from leaves
288.7	Caning of chairs
288.8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n.e.c.
289.1	Making of sticks and poles from wood
289.2	Making of wooden kharaus and other wooden sandals
289.3	Making of artwheels
289.4	Manufacture of other wood and allied products n.e.c.
Major Group 29—Paper and Paper Products	
291	Manufacture of pulp and paper by hand
292.1	Making of envelopes and paper bags
292.2	Papier mache articles
292.3	Making of kite
292.4	Paper decorations for homes
292.5	Making of card-board boxes and cards
292.6	Making of paper toys
292.7	Making of paper flowers etc.
292.8	Manufacture of other paper products from paper, paper board and pulp n.e.c.
Major Group 30—Printing and Publishing	
301	Printing and publishing of books
302.1	Printing works, printing of handbills, invitation cards etc.
302.2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry

Industrial Code Number	Household Industry
Major Group 31—Leather and Leather Products	
310.1	Flaying, processing of hides and skins including taxidermy
310.2	Currying, tanning and finishing of hides and skins preparation of finished leather
310.3	Stuffed animals
311.1	Making of leather boots, shoes or chappals (slippers, sandals)
311.2	Making of Poola shoes
311.3	Manufacture of other footwear n.e.c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur
313	Manufacture of leather products such as leather upholstery, suitcases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
Major Group 32—Rubber, Petroleum and Coal Products	
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths etc.
Major Group 33—Chemicals and Chemical Products	
331.1	Manufacture of dyes, paints, colours, abir, sindoor, varnish etc.
331.2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *Pataka* etc.
334	Manufacture of matches
335.1	Manufacture of incense and perfumes
335.2	Manufacture of Agarbatti
335.3	Manufacture of rose water
335.4	Manufacture of powder, snow, cream, bindi, tikali, hair oil and nail polish
335.5	Manufacture of kumkum and hinglo
335.6	Manufacture of mascara and kajal
335.7	Manufacture of medicines (ayurvedic, unani etc.) and pharmaceutical preparations
335.8	Manufacture of perfumes, cosmetics and other toilet preparations n.e.c.
336.1	Manufacture of soap and washing soda
336.2	Manufacture of other washing and cleaning compounds n.e.c.
337.1	Manufacture of plastic toys
337.2	Making of plastic buttons
337.3	Manufacture of other plastic goods
337.4	Making of celluloid goods
337.5	Manufacture of turpentine, synthetic resin and other materials n.e.c.
338	Salt production
339.1	Manufacture of ink including fountainpen ink
339.2	Making of candles
339.3	Making of tooth powder
339.4	Making of boot polish and inedible oils etc.
339.5	Manufacture of other chemicals products n.e.c.
Major Group 34-35—Non-Metallic Mineral Products other than Petroleum and Coal	
340.1	Making of bricks
340.2	Manufacture of roofing tiles

APPENDIX III—*contd.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 34-35—Non-Metallic Mineral Products other than Petroleum and Coal—*contd.*	
340.3	Manufacture of other clay products n.e.c.
341.1	Manufacture of cement door frames and sanitary fittings
341.2	Manufacture of cement jali and tiles
341.3	Making of cement statues
341.4	Making of cement products n.e.c.
342.1	Manufacture of lishu
342.2	Manufacture of lime
343.1	Stone carving
343.2	Marble carving
343.3	Granite carving
343.4	Manufacture of other structural stone goods, stone dressing and stone crushing n.e.c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346.1	Making of images from soap stone
346.2	Manufacture of images, toys and other articles of plaster of paris
348.1	Mica splitting
348.2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353.1	Making of glass bangles
353.2	Making of glass beads
353.3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356.1	Making of earthen toys and artware
356.2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment	
360.1	Re-rolling of M. S. Rods
360.2	Manufacture of iron and steel including smelting, refining, rolling, etc. such as billets, blooms, tubes, rods, n.e.c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365.1	Making of utensils of brass and bell metal
365.2	Making of brassware
365.3	Making of bottom part of hookah from brass and bell metal
365.4	Making of brass and bell metal ornaments
365.5	Making of other brass and bell metal products n.e.c.
366.1	Making of aluminium utensils
366.2	Making of other aluminium products n.e.c.
367.1	Making of tin utensils
367.2	Making of articles from tin sheets
367.3	Copper utensils
367.4	Bronze works including bronze images, medals and articles of alloys
367.5	Manufacture of other metal products (excluding iron, brass, bell metal, aluminium) n.e.c.
368.1	Lacquerware (if on metal)
368.2	Nickel plating and electroplating
368.3	Engraving, embossing, polishing and welding of metal products

Industrial Code Number	Household Industry
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*contd.*	
368.4	Enamelling and galvanizing of metal products
368.5	Plating and electroplating of metal n.e.c. including silverplating, goldplating, E.P.N.S. etc.
369.1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal etc.
369.2	Manufacture of light engineering goods including bolts and screws
369.3	Making of iron utensils (*e.g.* buckets etc.) and articles from iron sheets
369.4	Making and repairing of locks and trunks
369.5	Cutlery
369.6	Manufacture of pins
369.7	Manufacture of scales, weights and measures
369.8	Foundry Industry (including blacksmithy)
369.9	Manufacture of other sundry hardwares such as G.I. pipe, wire net etc., n.e.c.
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tubewell pumps, air pumps etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377.1	Manufacture of storage batteries
377.2	Manufacture of charging batteries
377.3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379.1	Manufacture of domestic electrical appliances
379.2	Repairing and servicing of electrical apparatus, heaters, oven etc.
Major Group 38—Transport Equipment	
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles
385.1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear etc.
385.2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki cab, wheelbarrow, handbarrow etc.
Major Group 39—Miscellaneous Manufacturing Industries	
390.1	Repair of spectacles
390.2	Manufacture of small photographic equipment
390.3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393.1	Inlay work with ivory and brass
393.2	Goldsmithy
393.3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393.4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393.5	Silver filigree industry
393.6	Manufacture of gold and silver leaves

APPENDIX III—*concld.*

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Major Group 39—Miscellaneous Manufacturing Industries—*contd.*	
393.7	Gold covering work (fancy jewellery)
393.8	Bidriware industry
393.9	Manufacture of jewellery, silverwares etc., n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri etc.
395.1	Manufacture of chalk pieces
395.2	Making of slate and slate pencil
395.3	Making of rubber stamps
395.4	Manufacture of fountainpen parts
395.5	Manufacture of other stationery articles such as pencils, penholders etc.
396.1	Manufacture of deshi sports goods such as lezzim and dumbells
396.2	Making of rubber balls and balloons
396.3	Manufacture of other sports goods n.e.c. bats, rackets, balls etc.
Major Group 39—Miscellaneous Manufacturing Industries—*concld.*	
399.1	Making of tikka and cowdung cakes
399.2	Making of beads from conch, shells and horn goods
399.3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings etc.
399.4	Making of lac bangles
399.5	Making of buttons (bone, shell, ivory)
399.6	Making of gangavan (making of wig from human hair)
399.7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads etc.
399.8	Repair of petromax lights etc.
399.9	Making and repairing of goods n.e.c.

NOTE:

n.e.c.—not elsewhere classified

APPENDIX IV

NATIONAL CLASSIFICATION OF OCCUPATIONS

Divisions and Groups

0 Professional, Technical and Related Workers

- 00 Architects, Engineers and Surveyors
- 01 Physicists, Chemists, Geologists and other Physical Scientists
- 02 Biologists, Veterinarians, Agronomists and Related Scientists
- 03 Physicians, Surgeons and Dentists
- 04 Nurses, Pharmacists and other Medical and Health Technicians
- 05 Teachers
- 06 Jurists
- 07 Social Scientists
- 08 Artists, Writers and Related Workers
- 09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

- 10 Administrators, and Executive Officials, Government
- 11 Directors and Managers, Wholesale and Retail Trade
- 12 Directors, Managers and Working Proprietors, Financial Institutions
- 13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

- 20 Book-Keepers and Cashiers
- 21 Stenographers and Typists
- 22 Office Machine Operators
- 28 Clerical Workers, Miscellaneous
- 29 Unskilled Office Workers

3 Sales Workers

- 30 Working Proprietors, Wholesale and Retail Trades
- 31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers
- 32 Commercial Travellers and Manufacturers' Agents
- 33 Salesmen, Shop Assistants and Related Workers
- 34 Money-Lenders and Pawn-Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

- 40 Farmers and Farm Managers
- 41 Farm Workers
- 42 Hunters and Related Workers
- 43 Fishermen and Related Workers
- 44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

- 50 Miners and Quarrymen
- 51 Well Drillers and Related Workers
- 52 Mineral Treaters
- 59 Miners, Quarrymen and Related Workers, n.e.c.

6 Workers in Transport and Communication Occupations

- 60 Deck Officers, Engineer Officers and Pilots, Ship
- 61 Deck and Engine-Room Ratings (ship), Barge Crews and Boatmen
- 62 Aircraft Pilots, Navigators and Flight Engineers
- 63 Drivers and Firemen, Railway Engine
- 64 Drivers, Road Transport

6 Workers in Transport and Communication Occupations—contd.

- 65 Conductors, Guards and Brakesmen (Railway)
- 66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
- 67 Telephone, Telegraph and Related Telecommunication Operators
- 68 Postmen and Messengers
- 69 Workers in Transport and Communication Occupations, n.e.c.

7-8 Craftsmen, Production Process Workers, and Labourers not Elsewhere Classified

- 70 Spinners, Weavers, Knitters, Dyers and Related Workers
- 71 Tailors, Cutters, Furriers and Related Workers
- 72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
- 73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
- 74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
- 75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
- 76 Electricians and Related Electrical and Electronics Workers
- 77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
- 78 Painters and Paper Hangers
- 79 Bricklayers, Plasterers and Construction Workers, n.e.c.
- 80 Compositors, Printers, Engravers, Book-Binders and Related Workers
- 81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
- 82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
- 83 Chemical and Related Process Workers
- 84 Tobacco Preparers and Products Makers
- 85 Craftsmen and Production Process Workers, n.e.c.
- 86 Testers, Packers, Sorters and Related Workers
- 87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
- 89 Labourers, n.e.c.

9 Service, Sport and Recreation Workers

- 90 Fire Fighters, Policemen, Guards and Related Workers
- 91 House Keepers, Cooks, Maids and Related Workers
- 92 Waiters, Bartenders and Related Workers
- 93 Building Caretakers, Cleaners and Related Workers
- 94 Barbers, Hairdressers, Beauticians and Related Workers
- 95 Launderers, Dry Cleaners and Pressers
- 96 Athletes, Sportsmen and Related Workers
- 97 Photographers and Related Camera Operators
- 99 Service, Sport and Recreation Workers, n.e.c.

X Workers not Classifiable by Occupation

- X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
- X9 Workers not Reporting Occupation

NOTE :

NOTES :

1. The Sq. Km. and density figures of urban areas of Police Station/District are worked out using the area figures corrected upto 2 places of decimal obtained by adding the areas of towns in respective units and not using the area figures given in the table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the Police Station/District totals tally.

2. The following abbreviations have been used for the status of a town:

M Municipality
U.C. Union Committee
S.C. Station Committee

TABLE A-III—VILLAGES CLASSIFIED

I—Villages with less

District/Police Station	Total number of inhabited villages	Total Rural Population			Less than 200			200—499		
					Number	Population		Number	Population	
		Persons	Males	Females		Males	Females		Males	Females
1	2	3	4	5	6	7	8	9	10	11

043.1	Poultry keeping and production of eggs	1	..	1
200.2	Hand pounding of rice by Dhekhi or Ukhal	16	15	1
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products	2	2	..
207	Oil pressing ghani, kolhu or by small machines	7	7	..
209.2	Making of sweet-meats laddu, peda, barphi, batasa etc.	11	10	1
209.4	Making of chura, or chira, muri, murki, khoi	20	20	..
212.1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees	1	1	..
220	Manufacture of bidi	40	27	13
230	Cotton ginning, cleaning, carding, pressing and baling	1	1	..
231	Cotton spinning (by charkha and takali)	7	7	..
233.3	Tie and dye (bandhani) of cloth and yarn	2	2	..
235	Cotton cloth weaving in handlooms	129	124	5
238.1	Making of fishing net	5	5	..
244.2	Making of rope and cordage, out of jute	12	12	..
244.5	Making of fibre, sunn-hamp fibre	1	1	..
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.	1	1	..
263.2	Weaving of tussar by powerloom	4	..	4
266.2	Making of silk cordage, rope and twine n.e.c.	1	1	..
273.2	Traditional garments	19	15	4
278	Manufacture and repair of umbrellas	1	1	..
280	Sawing, planing and milling of wood	1	1	..
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	9	8	1
284.9	Manufacture of other wooden products n.e.c.	28	23	5
288.3	Making of mats, hand fans and umbrellas from palm leaves	5	5	..
288.4	Making of sirki, moora and chhaj	14	14	..
288.5	Making of baskets and broomsticks	114	113	1
288.6	Making of donas (drone) and pattals (patravali) from leaves	1	1	..
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n.e.c.	141	141	..
292.3	Making of kite	1	1	..
292.8	Manufacture of other paper products from paper, paper board and pulp n.e.c.	3	1	2
303	Book binding, stitching, sizing and other work connected with book binding industry	1	1	..
310.2	Currying, tanning and finishing of hides and skins preparation of finished leather	9	9	..
311.1	Making of leather boots, shoes or chappals (slippers, sandals)	18	16	2
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles	8	8	..
314	Repair of shoes, chappals and other leather footwear	2	2	..
335.2	Manufacture of Agarbatti	2	..	2
340.2	Manufacture of roofing tiles	1	1	..
341.2	Manufacture of cement jali and tiles	1	1	..
342.2	Manufacture of lime	1	..	1
350	Making of earthenware such as pottery, etc.	59	57	2
355	Making of clay models, earthen images, busts and statues	5	5	..
356.1	Making of earthen toys and artware	1	..	1
365.1	Making of utensils of brass and bell metal	7	6	1
365.5	Making of other brass and bell metal products n.e.c.	11	10	1
367.1	Making of tin utensils	1	1	..
367.2	Making of articles from tin sheets	2	..	2
368.3	Engraving, embossing, polishing and welding of metal products	1	1	..
369.1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal etc.	27	27	..
369.2	Manufacture of light engineering goods including bolts and screws	1	1	..
369.4	Making and repairing of locks and trunks	1	1	..
369.5	Cutlery	2	..	2
369.8	Foundry industry (including blacksmithy)	85	78	7
369.9	Manufacture of other sundry hardware such as G. I. pipe, wire net etc., n.e.c.	1	1	..
373	Manufacture of sewing machine parts	1	..	1
384	Repairing and servicing of automobiles	1	..	1
388	Repair of cycle and rickshaw	2	2	..
393.2	Goldsmithy	46	35	11
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri etc.	5	5	..
399.1	Making of tikka and cowdung cakes	1	1	..
399.2	Making of beads from conch shells and horn goods	1	1	..
399.4	Making of lac bangles	2	..	2
399.5	Making of buttons (bone, shell, ivory)	1	1	..
399.8	Repair of petromax lights etc.	1	..	1
399.9	Making and repairing of goods n.e.c.	9	8	1

(a) Households engaged neither in cultivation nor in household industry.
(b) Households engaged in household industry only.
(c) Households engaged in cultivation.

NOTE : The heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the head of household in the 'Population Record' where the conventional head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

NOTE : The death rate is the annual death rate per 1,000 of the same sex calculated on the population of 1951
*Relates to the period 1957-58
†Rates have been calculated on per thousand of live and still births.

PART III

VILLAGE DIRECTORY

This Directory renders an account of each Village and each Town

THE VILLAGE DIRECTORY

Explanatory Note

The Village Directory renders an account of each village, entered on the Jurisdiction Lists for each Thana maintained by the Director of Land Records and Surveys, West Bengal. For villages included in town figures are given for the town and not for the separate villages which it contains. In case of a municipal town figures are presented separately for each ward. It gives the Jurisdiction List number, name, area of the village, number of Occupied Houses, Census Households, Total Population, Scheduled Caste and Scheduled Tribe population, number of literates, and workers classified into the following nine Industrial Categories of Workers and Non-workers :

I As Cultivator

II As Agricultural Labourer

III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities

IV At Household Industry

V In Manufacturing other than Household Industry

VI In Construction

VII In Trade and Commerce

VIII In Transport, Storage and Communications

IX In Other Services

X Non-workers

These basic data are presented police stationwise first for the rural portion and next for urban portion in this directory. A notional map of the police station has been given at the beginning of the Village Directory of each police station showing the Jurisdiction List number of each village and the location of town, if any, and an inset map of the district has also been given to show the location of the police station in the district. An alphabetical list of villages has been given facing each thana map. This list shows the Jurisdiction List number of each village and the names of the villages arranged alphabetically and its population in 1951 and in 1961. The thana map and the alphabetical list together facilitate location of any village in the Village Directory as well as on the spot.

A village, as a general rule, is the revenue survey *mauza*. The uninhabited *mauzas* and the *mauzas* that have been completely merged in urban areas have been indicated accordingly. In respect of the villages which are partly included in urban areas and partly outside the limits of a town, the particulars for the portion included in urban area have been clubbed together with the particulars furnished for the corresponding town and for the portion lying outside the town limits *i.e.*, included in the rural area, the data have been shown in the Village Directory against the corresponding *mauzas*. The area figures of the villages have been obtained from the 1951 Census Handbook. The total area for any police station shown below each Primary Census Abstract has been taken from Table A-I given in Part IIA of this volume.

The area of the municipal towns has been presented according to the figures available from the respective municipalities. The area in respect of other towns has been computed from the area figures of the constituting *mauzas*.

For the definition of a Worker and Non-worker and detailed description of nine Industrial Categories of workers, the Explanatory Note to the Primary Census Abstract and other economic tables in Part II of this Volume may be referred to.

Symbols will frequently be seen against a village or town. They will indicate that the institutions offering the particular facilities which the symbol denotes is situated within the village or town. These facilities are shown by symbols as explained below against the name of village and town :

(a) Schools :
P=Primary Schools
H=High Schools

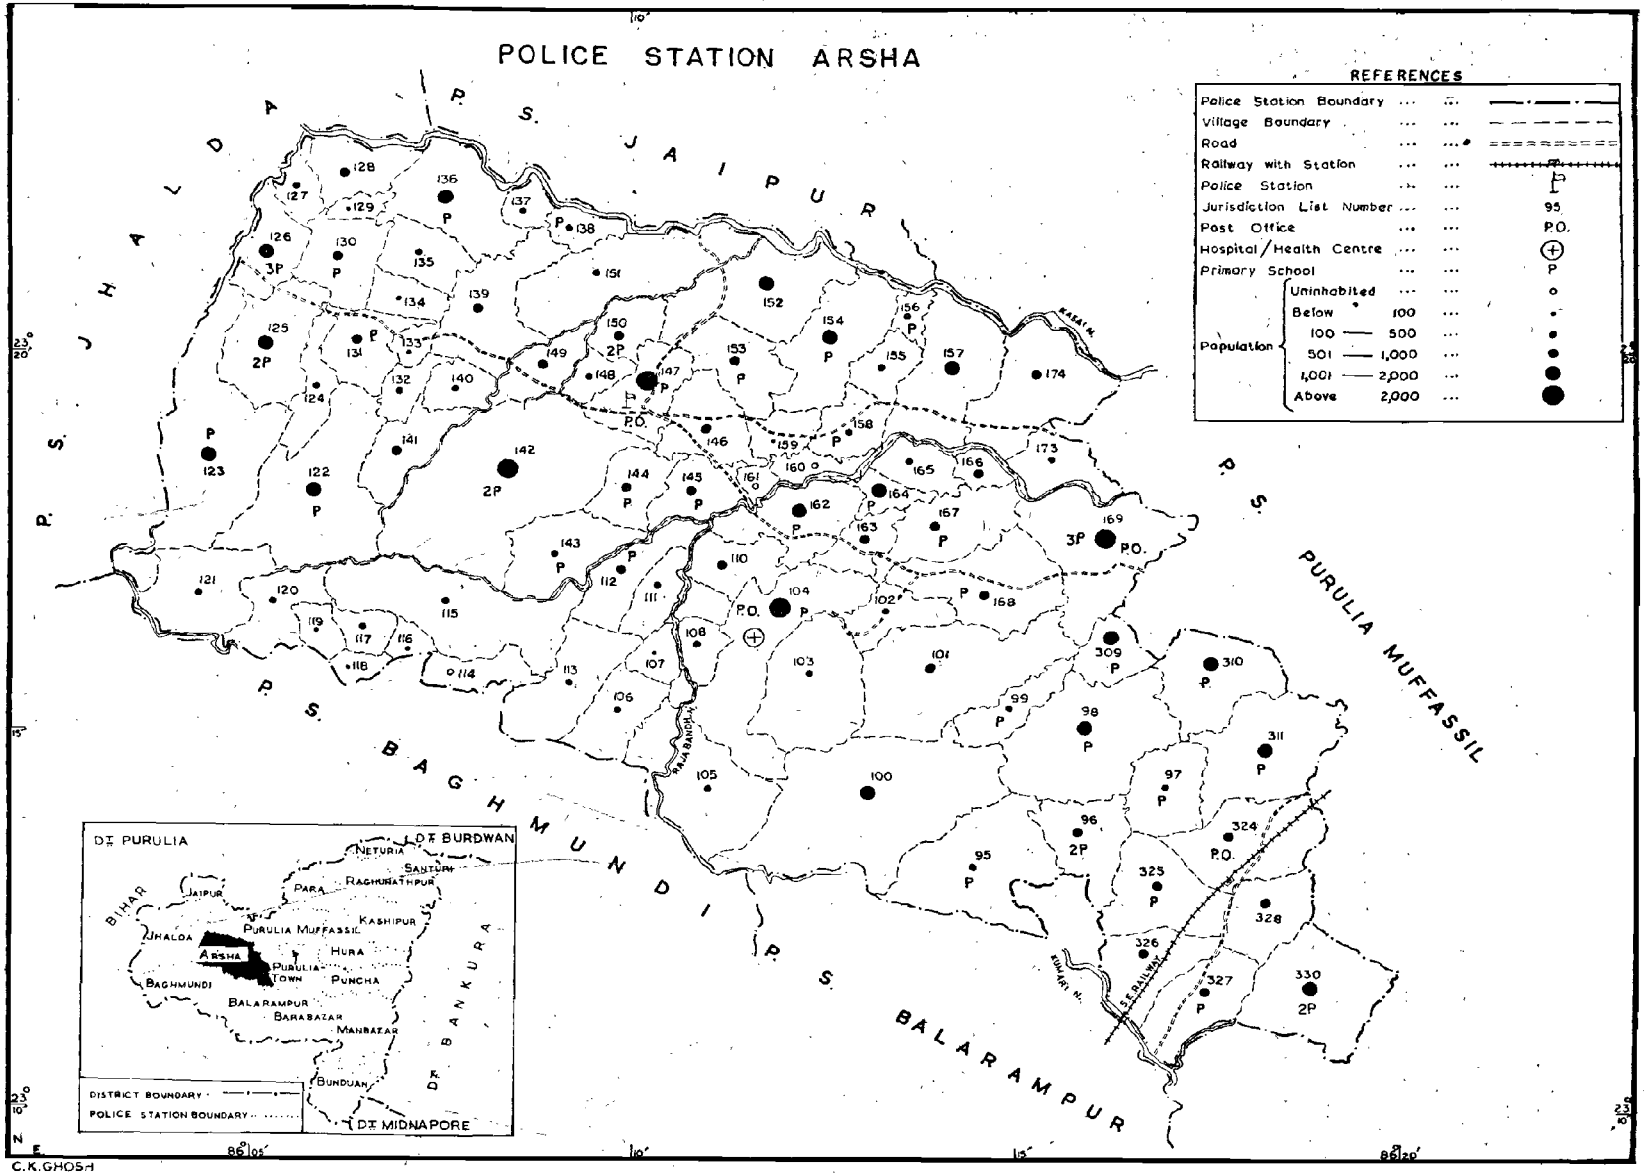

(b) Medical Facilities :
D=Dispensaries
Rhc=Rural Health Centres
Hos=Hospitals
Mcw=Maternity and Child Welfare Centres

(c) Post Office :
Po=Post Office

(d) Electricity :
E=Electricity

(e) Library :
L=Library

Where figures like 5P or 2H or 2Hos *etc.*, occur they denote that the *mauza* or the town has five Primary Schools or two High Schools or two Hospitals *etc.*

† Uninhabited

In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J.L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

†Uninhabited

*In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

J.D. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses: No. of Houses	Occupied Residential Houses: No. of Households	Total No. of persons enumerated (including inmates of institutions and houseless persons): Persons	Males	Females	Scheduled Castes: Males	Scheduled Castes: Females	Scheduled Tribes: Males	Scheduled Tribes: Females	Literate and educated persons: Males	Literate and educated persons: Females	WORKERS I: Total Workers (I—IX): Males	Total Workers (I—IX): Females	As Cultivator: Males	As Cultivator: Females

†Uninhabited

*In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

J.L. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses: No. of Houses	Occupied Residential Houses: No of Households	Total No. of persons enumerated (including inmates of institutions and houseless persons): Persons	Total No. of persons enumerated (including inmates of institutions and houseless persons): Males	Total No. of persons enumerated (including inmates of institutions and houseless persons): Females	Scheduled Castes: Males	Scheduled Castes: Females	Scheduled Tribes: Males	Scheduled Tribes: Females	Literate and educated persons: Males	Literate and educated persons: Females	WORKERS I: Total Workers (I—IX): Males	Total Workers (I—IX): Females	As Cultivator: Males	As Cultivator: Females

† Uninhabited

* In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

J.L. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses		Total No. of persons enumerated (including inmates of institutions and houseless persons)			Scheduled Castes		Scheduled Tribes		Literate and educated persons		Total Workers (1—IX)		As Cultivator	
			No. of Houses	No. of Households	Persons	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females	Males	Females

† Uninhabited

* In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

† Uninhabited

* In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

† Uninhabited

*In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

J.L. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses: No. of Houses	Occupied Residential Houses: No of Households	Total No. of persons enumerated (including inmates of institutions and houseless persons): Persons	Total No. of persons enumerated (including inmates of institutions and houseless persons): Males	Total No. of persons enumerated (including inmates of institutions and houseless persons): Females	Scheduled Castes: Males	Scheduled Castes: Females	Scheduled Tribes: Males	Scheduled Tribes: Females	Literate and educated persons: Males	Literate and educated persons: Females	WORKERS I: Total Workers (I—IX): Males	Total Workers (I—IX): Females	As Cultivator: Males	As Cultivator: Females

† Uninhabited

* In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

J.L. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses: No. of Houses	Occupied Residential Houses: No. of Households	Total No. of persons enumerated (including inmates of institutions and houseless persons): Persons	Total No. of persons enumerated (including inmates of institutions and houseless persons): Males	Total No. of persons enumerated (including inmates of institutions and houseless persons): Females	Scheduled Castes: Males	Scheduled Castes: Females	Scheduled Tribes: Males	Scheduled Tribes: Females	Literate and educated persons: Males	Literate and educated persons: Females	WORKERS I: Total Workers (I—IX): Males	WORKERS I: Total Workers (I—IX): Females	WORKERS I: As Cultivator: Males	WORKERS I: As Cultivator: Females

† Uninhabited

In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

J.L. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses: No. of Houses	Occupied Residential Houses: No. of Households	Total No. of persons enumerated (including inmates of institutions and houseless persons): Persons	Total No. of persons enumerated (including inmates of institutions and houseless persons): Males	Total No. of persons enumerated (including inmates of institutions and houseless persons): Females	Scheduled Castes: Males	Scheduled Castes: Females	Scheduled Tribes: Males	Scheduled Tribes: Females	Literate and educated persons: Males	Literate and educated persons: Females	WORKERS I — Total Workers (I—IX): Males	WORKERS I — Total Workers (I—IX): Females	As Cultivator: Males	As Cultivator: Females

* Uninhabited

† In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE

J.L. No.	Name of Village or Town/Ward	Area of Village or Town in acres	Occupied Residential Houses: No. of Houses	Occupied Residential Houses: No. of Households	Total No. of persons enumerated (including inmates of institutions and houseless persons): Persons	Total No. of persons enumerated (including inmates of institutions and houseless persons): Males	Total No. of persons enumerated (including inmates of institutions and houseless persons): Females	Scheduled Castes: Males	Scheduled Castes: Females	Scheduled Tribes: Males	Scheduled Tribes: Females	Literate and educated persons: Males	Literate and educated persons: Females	WORKERS I — Total Workers (I—IX): Males	WORKERS I — Total Workers (I—IX): Females	WORKERS I — As Cultivator: Males	WORKERS I — As Cultivator: Females

*Uninhabited

** Included in Urban Area

‡ Included in Purulia (Municipality)

† In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Cenus Count.

VILLAGE

† Uninhabited

* In the Village Directory of the District Handbook of Purulia 1951, the names of the villages with their J. L. Nos. had not been mentioned. It has, therefore, been assumed that these villages were "Uninhabited" in 1951 Census Count.

VILLAGE
