PREFACE

The compilation and publication of District Handbooks was introduced for the first time during 1951 Census in almost all other States except Jammu and Kashmir where due to unsettled conditions prevailing then, no Census could be held at that time. In earlier years also, some States used to Publish District Census Statistics and Gazeteers from time to time. However, in the case of Jammu and Kashmir, the only compilation of this kind was brought out by Mr. Bates in about 1874.

The work of compiling and publishing District Handbooks as a regular feature of Census was taken up in our State earnestly during 1961 Census. As a result, seven Handbooks pertaining to Anantnag, Srinagar, Baramulla, Ladakh, Doda, Udhampur and Jammu districts were completed and published as part of the 1961 Census publication programme. The Handbooks of two remaining districts namely Kathua and Poonch, however, remained in arrears. These have been completed now. Owing to our pre-occupations with the current Census Operations and the inordinate delay in their timely publication, the portions dealing with physical features, past history etc. which will be found in other Handbooks have been dispensed with. Instead we have confined ourselves to compiling the books on data on administrative statistics supplied by various departments. However, no important Census table such as relating to population, sex-ratio, economic structure, literacy, languages and rural crafts will be found missing in these compilations.

The most valuable data contained in these Handbooks is given in the Village Directory printed at the end. The Directory gives in respect of each village the size of its area, number of households, sex-wise strength of population, literacy figures, number of male and female Scheduled Castes as well as classification of population in the recognised industrial categories. Further, educational, medical and public health institutions, if any, set up in a village have been also indicated. Similarly, the Directory contains data regarding roads, drinking water facilities and supply of electricity in every village listed.

In addition to the above, the Handbooks have been provided with maps showing boundaries of each tehsil along with the Census code number of each village. Other details given in the maps show the location of Tehsil Headquarters, roads, post and telegraph offices, Dak Bungalows etc.

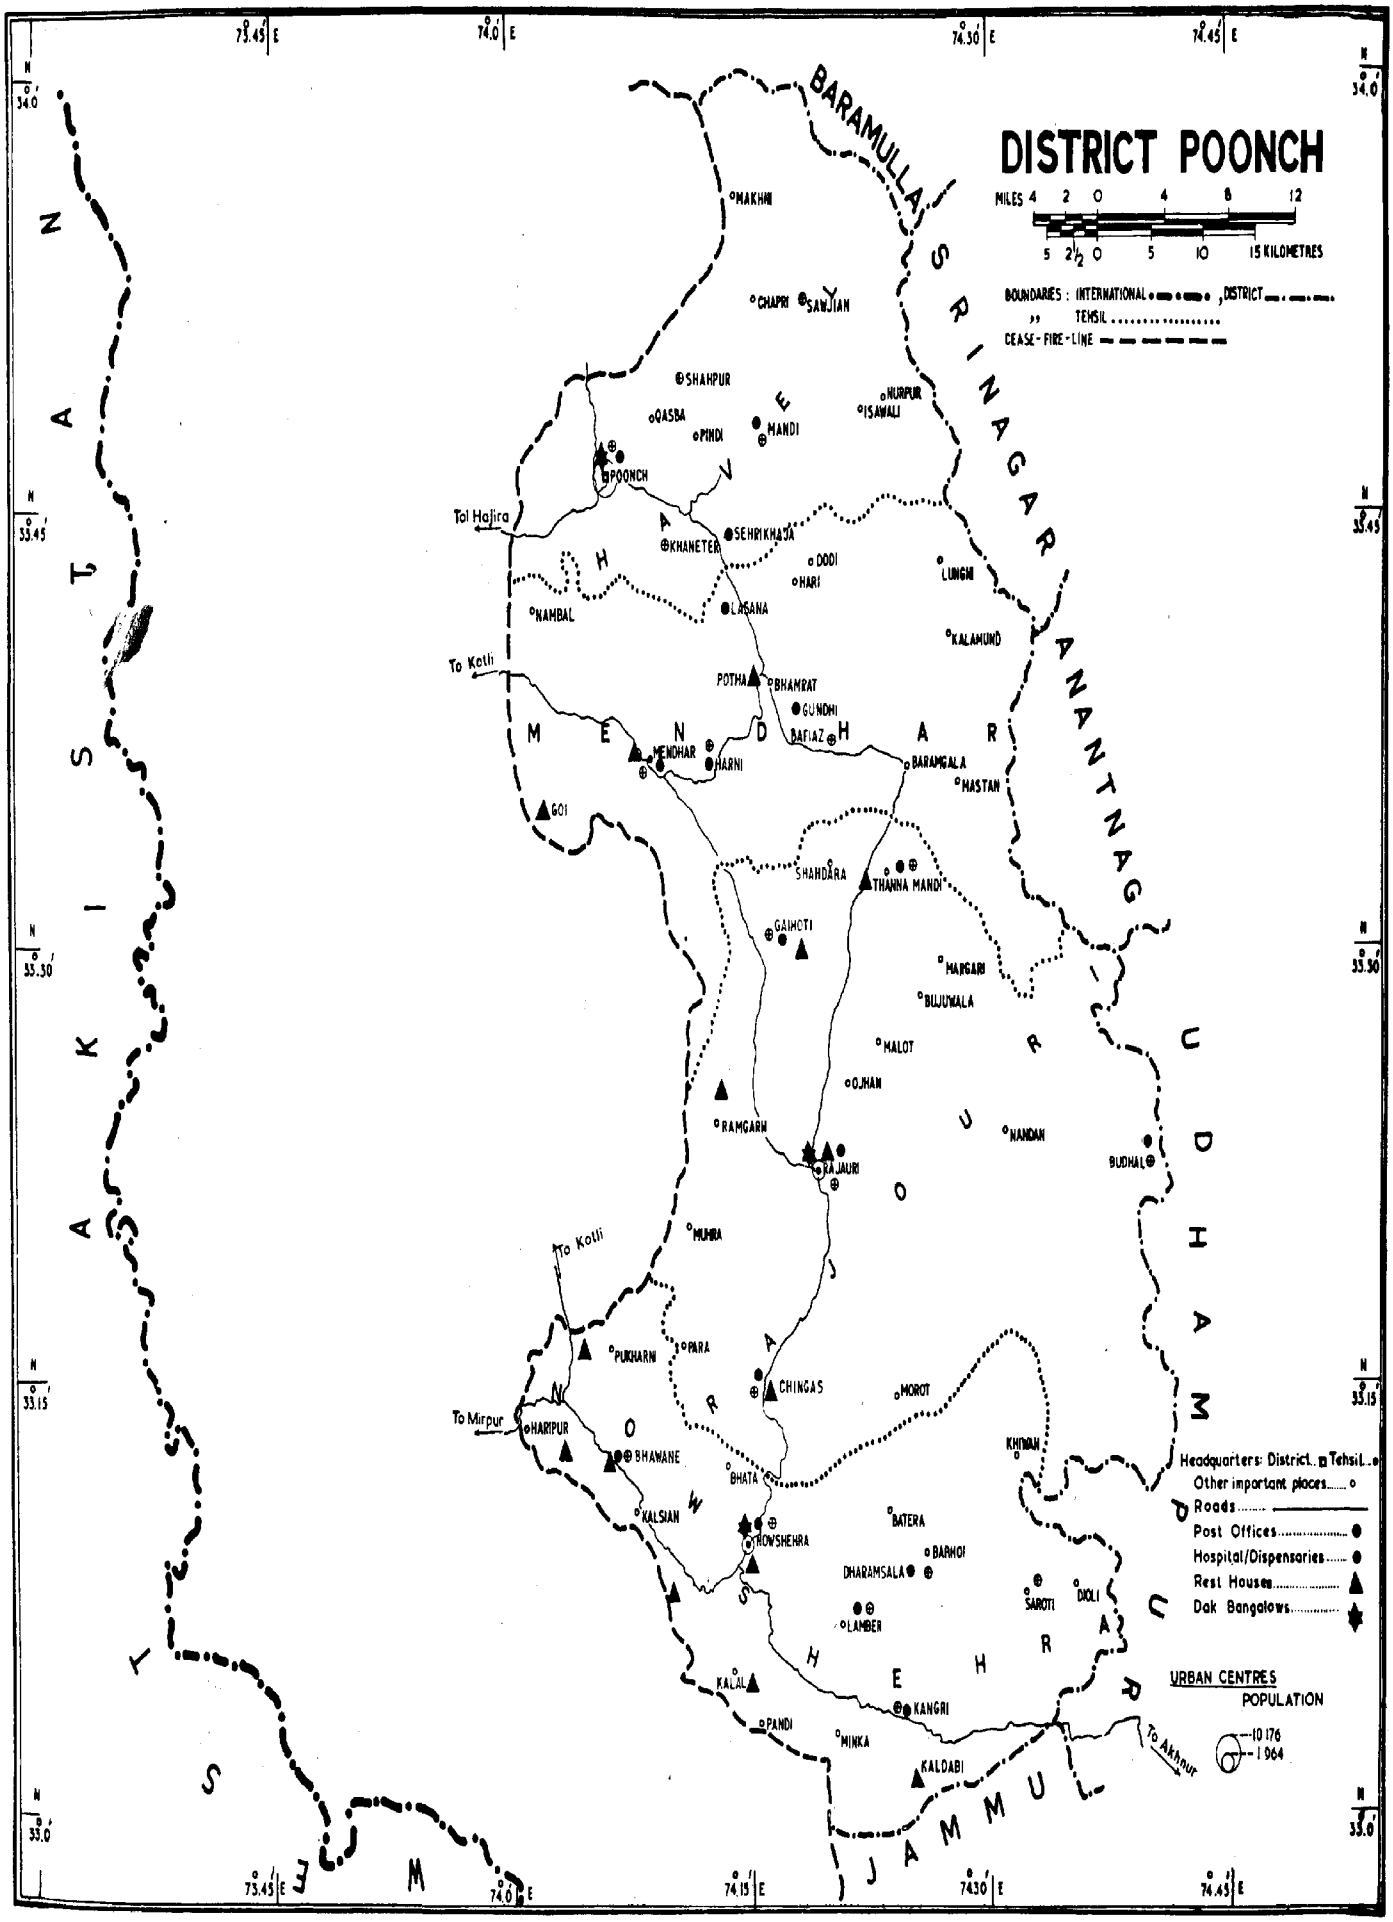

I am thankful to the various departments of the State Government for having made available information of diverse types relating to their respective spheres of work. I would also like to mention that the entire cost on paper, printing and binding of the Handbooks has been borne by the State Government.

I would like to commend the work of Shri B.L. Tikoo, Tabulation Officer and Shri Abdul Jabar, Statistical Assistant, who did not spare any pains to enrich the publications with valuable material. Shri Tikoo has written the fly-leaves to different series of tables appearing in it. Shri Masood Ahmed, Statistical Assistant (Map), also put in hard work in preparing the District and Tehsil maps. The final proof reading was done by Miss Usha Tikoo and Shri Gulam Jeelani.

November, 1970.

CENSUS TABLES

CENSUS TABLES

The 1961 Census was designed to collect more comprehensive data than that attempted at any previous Indian Census in view of the Five year Plans undertaken by the Government as also because of the growing need for basic data by the different administrative departments.

The Census data relating to Jammu and Kashmir has been incorporated in Volume VI of the series of publications designated Census of India, 1961. The volume has been divided into 10 parts, some of which have been further subdivided, depending upon the quantum of material relating to each.

The Tabulation Plan of the 1961—Census envisaged the compilation of 5 sets of tables known as A—General population Tables, B—Economic Tables, C—Social and Cultural Tables, D—Migration Tables and E—Housing Tables series. The B-Series Tables were split up in two parts, one giving the general economic data and the other in which the data has been tabulated with household and not the individual as the unit. In addition to these five sets, special tables relating to scheduled castes and scheduled tribes were to be prepared and printed as a separate part. As there are no scheduled tribes in Jammu and Kashmir, tables giving the data of scheduled tribes were not prepared for this state. Another set of tables regarding rural arts and crafts found in different parts of the State was also compiled and printed as a separate part of Volume VI.

The District Census Handbook does not include D-Series (Migration Tables) and E-Series (Tables on Housing). These have been separately printed and constitute Part II-C and Part IV of Volume VI.

So far as other series are concerned, the following tables only have been omitted :-

Name of series	Tables omitted
A—Series General Population Tables	Union Primary Census Abstract.
B—Series (Tables I to IX) General Economic Tables	B—II-Workers and non-workers in cities, town groups and towns arranged territorially classified by sex and broad age-group.
B—Series (Tables X to XVII) Household Economic Tables	Nil
C—Series Social and Cultural Tables	C—IV-Single Year Age returns.
	C—VI-Bilingualism
SCT—Series (Special tables for Scheduled Castes)	Nil
Rural Craft Tables	Table III-Distribution of articles of rural crafts by material used.
	Table IV—Designs.
	Table V—Consumption and sale
	Table VI—Cost of production, sale price and earnings.

GENERAL POPULATION TABLES

GENERAL POPULATION TABLES

The General Population Tables, more commonly known as A—series, consist of four main tables and Union Primary Census Abstract. In addition, Table A-I has been supplemented by three appendices and one sub-appendix. Tables A-II and A—IV are also accompanied by one appendix each. Besides these, explanatory notes have been furnished to appendix II to A-I and A-IV tables.

Table A—I

The Table gives information regarding area, density, number of villages and towns, occupied residential houses and the total and sex-wise population. The information has been separately tabulated for the district and each of its constituent tehsils as also for each urban area falling in a tehsil.

The area figures of the State on this side of the Cease-Fire Line were neither available with the Directorate of Land Records of the State Government nor with the Survey of India. These have, therefore, been provisionally worked out by fresh planimetering on the basis of the boundary alignments supplied by the Census Department to the Directorate of Map Publication, Dehra Dun. In the case of urban areas, the area figures have been supplied by Deputy Commissioners, Tehsildars and the Administrators of Municipal Corporations and authorities of Local Bodies concerned.

It will be seen from the table that two sets of area figures, one in square miles and the other in square kilometres, have been shown in cols. 3a and 3b against each territorial unit. The rural figures have been worked out by deducting from the total area, as worked out by the Survey of India, the figures of urban areas supplied by Deputy Commissioners, Tehsildars etc.

The density of population has, in all cases, been indicated in terms of square miles.

Every village with well defined boundaries for revenue assessment having residential houses densely or sparsely populated has been treated as a village irrespective of the number of hamlets of which it may be constituted. A village with no habitations at all has been classed as an uninhabited village.

The definition of an urban area, as adopted at the Census of 1961, was that it should not have a population of less than 5,000 and at least 75% of these should consist of non-agriculturists. Another indispensable criterion which an area was to satisfy so as to qualify it for being classed as urban was that it should have a density of not less than 1,000 persons per square mile.

Notwithstanding these three tests, it was agreed upon that all Corporations, Municipalities and Cantonment Boards should, irrespective of their population, be treated as towns. An exception was also made for areas which though having a population of less than 5,000 possessed definite urban characteristics like places of tourist importance where all civic amenities have been provided.

An occupied residential house was defined as the building or a part of the building used for residential purposes and having a separate entrance of its own and independent of the entrances of other parts, giving on the road or a common staircase or a common courtyard which lead to a main gate.

Areas which have been declared as towns for the first time have been printed in italics so as to distinguish them from others.

The data given in the table shows that Poonch district holds the fifth position in so far as its population which stands at 326,061, according to the present Census is concerned. Judged by its area, however, the district extends to 16,89.1 square miles or 4374.8 Sq. Kms. only which is smaller than the area claimed by the four districts of Kashmir Province except Srinagar and Doda and Udhampur of Jammu Province. The density of the district is also low, being limited to 193 per sq. mile.

There are three towns in the district which claim aggregate area of 8.8 sq. miles (22.8 sq. Kms.) inhabited by a total population of 16,356 persons. The density of population in this case, therefore, works out to 1,859 as against 184 only returned from the rural areas. It is also clear from col. 5 of the table that Rajouri tehsil claims the largest number of inhabited villages among all other tehsils of the district. In Haveli, the number of

village is the smallest, there being 83 such villages only out of the total number of 547 and 257 in the district as a whole and Rajouri tehsil respectively. In Mendhar, there are 86 inhabited villages as against 121 of Nowshehra.

Appendix I to Table A-I gives the 1961 territorial units constituting the present set up of the district. The Statement given in the appendix is, however, provisional and subject to incorporation, adjustment and correction when the actual surveys are made of the four tehsils constituting district Poonch, the tehsil of Nowshehra was carved out for the first time in by detaching some of the villages of Rajouri tehsil and Kotli and Bhimber tehsils of former Mirpur district.

Appendix II giving the number of villages with a population of 5,000 and over and of towns of less than 5,000 population shows that one village, namely Darhal, belonging to Rajouri tehsil is inhabited by as many as 7,254 persons. Likewise there are two towns in the district, namely Rajouri and Nowshehra which are inhabited only by 4,196 and 1,964 persons respectively. Explanatory notes 'A' & 'B' to this appendix reveal that Nowshehra has been treated as a town for the first time in 1961 while Nowshehra cantonment which was inhabited by 612 persons in 1941 and treated as a town till then has been deurbanised in 1961.

Appendix III to table A-I gives the sex-wise and total population down to tehsil level of houseless persons and those enumerated in institutions. The figures have been given for each territorial unit as a whole as also for its rural and urban sectors.

Poonch holds the sixth position in so far as the houseless population is concerned. The data given in the appendix shows that as many as 3084 persons were enumerated as houseless in this district. Large majority of these returned numbering 2,103 are concentrated in Nowshehra tehsil. The number from other tehsils is fairly small, being limited to 631, 250 and 100 in Rajouri, Haveli and Mendhar respectively.

An institution as defined at the Census of 1961 represents a census household occupied by un-related persons who live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. The sub-joined statement gives the types of institutions found in Doda district as also the number of institutions of each category :—

1.	Agricultural farm	1
2.	Boarding Houses	2
3.	Factories and workshops	2
4.	Dak Bungalows, Rest Houses etc.	4
5.	Hospitals	2
6.	Inn	1
7.	Jail	1
8.	Police post	1
9.	Religious institutions	1
10.	Miscellaneous	1

Table A—II

The table furnishes the total and sexwise population of the district for the six censuses from 1901 to 1961 as also the percentage variation in each decade. In the absence of reliable vital statistics, the table, as it gives the growth of population from decade to decade, is the main source for estimating the population. The population figures for 1951 have been arrived at by adding half the difference of adjusted population of 1941 and the Census population of 1961 to the 1941 population of the district according to its 1961 jurisdiction. The various administrative units of which the district is constituted together with the 1941 population of each are given below :—

1. Haveli tehsil with a population of 62,206.
2. Mendhar tehsil with a population of 78,240.
3. Rampur-Rajouri tehsil of 1941 with the excepting of 65 villages transferred to newly formed Nowshehra tehsil with a population of 121,030.
4. Nowshehra tehsil newly formed with
   (i) 65 villages transferred from Rajouri tehsil population (198,14)
   (ii) 8 villages fully and 3 partly transferred from former Kotli tehsil of former Mirpur district (population 5,207)
   (iii) 52 villages fully and five partly transferred from Bhimber tehsil of former Mirpur district (Population 37,998)

Appendix to table A—II is an extract of main appendix to this table (published in part II-A, Vol. VI) which gives the disposition of the various districts of the State in 1961 and 1941. It is designed to indicate separately the 1941

population of the district as constituted at presents the number of its cows and villages wholly or partly in Pakistan or Chinese occupation, the area of such villages and towns and their 1941 population. As will be seen from the appendix, 316 villages fully and 18 partly of Poonch which formed a Jagir till 1941 are on the other side of the Cease-fire Line. These include 90 fully and 6 partly of Haveli tehsil and 14 fully and 12 partly of Mendhar tehsil as also the whole tehsils of Bagh and Sadhnuti which together claimed a total population of 282,603 persons.

The appendix further gives the details of territorial units of which the district was constituted in 1941 as also lists the changes in the jurisdiction of its constituent tehsils during the last decade.

Table A-III

State Table A-III, as distinguished from the Union table, gives down to the tehsil level, the number of inhabited villages, the total and sex-wize rural population classified by 7 population sizes, viz; (1) less than 200, (2) 200—499, (3) 500—999, (4) 1,000—1,999, (5) 2,000—4,999, (6) 5,000—9,999 and (7) 10,000 and above.

The following statement gives the percentage of villages and of the population claimed by each class of villages in 1921, 1941 and 1961 :—

Year	Less than 500		500—999		1,000—1,999		2,000—4,999		5,000—9,999		10,000+		Unclassified population

1961	61	25	24	30	12	30	3	13	N	2	..	..	..

NOTE—i) N=Negligible figures.
ii) Unclassified population includes, (a) boat population, (b) railway population etc.
iii) The figures for 1921 and 1941 have been worked out according to the 1961 jurisdictions.

The data given in the statement shows that the proportion of villages belonging to the population group less than 500 has been decreasing since 1921 and has shrunk from 65% of the total number of villages in 1921 to 61% only in 1961. The corresponding fall in the population of these villages to the total rural population of the district has been proportionately the same, being 25% in 1961 as against 29% in 1921. This is also true of the population belonging to the size group 500-999. Population groups 1000-1999 and 2000-4999 have however registered increases both in the number of villages constituting these groups in 1921 and 1961 as also in their percentages of population to the total rural population.

Table A—IV

Table A—IV gives the towns classified by population in 1961 with variations since 1941. It has been prepared at district level and gives the name of each town together with its area as also the status it holds, viz; municipality, town area, notified area etc.

For purposes of the Census of 1961, urban areas have been classified into six categories in descending order of their population, as indicated below :—

Class	Population
I	1,00,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Less than 5,000

As already stated in a preceding paragraph, there are only three urban areas in the district, namely Poonch, Rajouri and Nowshehera out of which Poonch belongs to class IV and Rajouri and Nowshera to class VI.

The appendix to table A-IV indicates the names of new towns which have been added to the urban list of the district in 1961 as also of those which were treated as towns in 1941 but were declassified as rural in 1961. It gives the status area and the 1941 and 1961 populations of all such towns. Towns which have been declared urban for the first time in 1961 have been printed in italics.

Note :—1. Towns treated as such for the first time in 1961 are printed in italics.

2. The total area shown against District/Tehsil under columns 3(a) and 3(b) represents the area as supplied by the Surveyor General of India. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area of district and tehsil is obtained by subtracting the urban area from the Surveyor General's area figures.

* 3. The square kilometres and density figures of urban areas of Tehsil and District are worked out using the area figures corrected upto two places of decimals obtained by adding the areas of the town in the respective units and not using the area figures given in the table. In addition to this, the area figures relating to sq. kilometres are further adjusted to make the Tehsil/District totals tally.

4. The following abbreviations have been used for the status of a town e.g.
(i) T.A.—Town Area Committee.
(ii) M.C.—Municipal Committee.

APPENDIX I TO TABLE A-I

Statement showing 1941 Territorial units constituting the present set-up of Poonch District.

"The area of the district is as supplied by the Surveyor General as a result of planimetering in 1953. The area figures against District and Tehsils are those apearing in part II-A, 1941 and include the entire area of the District/Tehsil where as the area of a village or a group of villages relates to 1961 figures and pertains to the land which is assessed to land revenue".

GENERAL ECONOMIC TABLES

GENERAL ECONOMIC TABLES

Economic data collected at the Census of 1961 has been presented in 17 tables known as B-Series and published in part II-B and Part III of Volume VI, Census of India, 1961. The first 9 tables have been incorporated in part II-B under the title "General Economic Tables". The remaining 8 tables in which the data has been presented with household as the unit are known as Household Economic Tables and constitute Part III of volume VI.

The General Economic Tables have been compiled from the data collected in answer to the economic questions canvassed in the Individual Slip. In all, five questions listed below were asked to elicit information on the economic characteristics of the person enumerated :-

Question 8 ... Working as cultivator.

Question 9 ... Working as agricultural labourer

Question 10 ... Working at household industry

a) nature of work

b) nature of household industry

c) if employee

Question 11 ... Doing work other than questions 8, 9 or 10.

a) nature of work

b) nature of industry, profession, trade or service

c) class of worker

d) name of establishment

Question 12 ... Activity, if not working

In order to facilitate a correct appraisal of the data given in the tables, the definition of a worker as adopted for the 1961 Census is reproduced below :-

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce, the basis of work will be satisfied if a person was employed during any of the fifteen days preceding the days on which his household was visited for enumeration".

An adult woman who was engaged in household duties but doing no other productive work to augment the family resources was not treated as a worker. If, however, in addition to her household work, she was engaged in work such as rice pounding for sale or wages or in domestic service for wages for others or minding cattle or selling firewood or making and selling cowdung cakes, etc., she was treated as a worker.

This change in the definition of a worker has had the advantage of persons working in family economic activities who were heretofore treated as non-workers or partly dependents being now classified as workers.

A distinguishing feature of 1961 Census has been the classification of workers into 9 industrial categories according to Standard Industrial Classfication. Following is a further description of these categories together with the nature of activity represented by each.

Category I—Working as cultivator

A person was treated as a cultivator if he or she was engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share. A person who had given out his land to others for cultivation for money, kind or share of crop and did not even supervise or direct cultivation of land was not treated as working as cultivator. Similarly, a person who worked in another person's land for wages in cash, kind or share was not also treated as cultivator.

Category II—Working as agricultural labourer

A person who worked as agricultural labourer on the lands of other person or persons for wages in money, kind or share of the produce was treated as agricultural labourer.

Category III—Working in mining, quarrying, livestock, forestry, fishing, hunting, plantation or orchards and allied activities.

This category stands for workers employed in afforestation or plantation of such other crops as tea etc. or those engaged in fishing or extraction of stone, lignite, coal, clay or employed in the production and rearing of livestock.

Category IV—Working at household industry

A Household industry was defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. An industry which was being run on the scale of a registered factory was not treated as a household industry. Professions, such as those of a pleader, doctor, barber, waterman or an astrologer, were not treated as household industry.

Category V—Working in manufacturing other than household industry.

This category represents workers engaged in manufacturing of products outside the scope of household industry. It relates to production, processing, servicing, repairing and manufacturing etc.

Category VI—Working in construction

The category includes workers engaged in all types of constructions including construction and maintenance of telegraph and telephone lines, water ways and water reservoirs, such as bunds, cannals, tanks, tube wells, embankments etc.

Category VII—Working in trade and commerce.

Workers engaged wholly or mainly in retail and wholesale trading have been included in this category. It also represents workers in commercial activities, like banking, money lending, insurance etc.

Category VIII—Working in transport, storage and communications.

The category represents workers in transport, storage and communications and includes aircraft pilots, bus drivers, conductors, telephone operators, signallors, wireless operators, postmen etc.

Category IX—Other services

Other services include workers in :-

a) public services
b) educational and scientific services
c) religious and welfare services
d) legal services
e) business services
f) community services and trade and labour associations
g) recreation services
h) personal services
i) services not elsewhere classified
j) medical and health services
k) electricity, gas, water and sanitary services

Non-workers have been divided into 8 categories. These have been discussed in the Flyleaf to Table B-IX.

Table B—I

The table has been prepared for the district as a whole and for its rural and urban sectors. It gives the sex-wise population of each of these units as also of workers and non-workers by four broad age-groups, 0-14, 15-34, 35-59, 60+ and age not stated. As these age groups correspond to the different stages of life which have special significance for capacity of work, viz, children, young persons, middle aged persons and elderly persons, it may well be regarded as a summary economic table of the district.

Table B—III

Table B-III has been split up into two parts, one dealing with the urban and the other with the rural areas. The first part has been presented upto district level and the second part down to the tehsils. Both give the distribution of workers and non-workers by educational levels and by industrial categories. It is hoped that the information given in the table will be of great help in assessing the size of available educated manpower in the district.

The proportions of workers in the State as a whole as also in its rural sector are more or less the same as the corresponding proportions in India, which stand at 42.9% and 45.1% respectively as against 42.8% and 45.3% in the State. In the urban areas of the State, however, only 30.2% persons are workers, whereas the corresponding proportion for the entire country stands at 33.5%. This shows that the incidence of non-workers in the urban sector of Jammu and

Kashmir is more pronounced than that obtaining in the urban areas of all the States put together.

The proportion of workers in Poonch district as a whole is lower than that of the State and stands 38.0% only. In the rural and urban sectors also, the corresponding proportions stand at 38.6% and 26.5% as against 45.3% and 30.2% of the entire State. The main object of the table is to give the incidence of literacy in each of the 9 industrial categories of workers and among non-workers. It was with this object in view that question No. 6, viz ; literacy and education, was included in the enumeration slip.

A literate person was defined as one who could both read and write and not one who could only read or only write in any language. With a view to ensuring effective application of this definition, instructions were issued to the Census staff to verify, in each case, whether the person claiming to be literate was able to read a simple letter either in print or manuscript and whether further he could write a simple letter. In the case of literate persons, a further enquiry was to be made, whether the person enumerated had passed any recognised examination as proof of an educational standard attained. The name of the highest examination passed was to be recorded against question 6 of the Enumeration Slip.

It may be remarked here that the first part of the table relating to urban areas is designed to collect more detailed information about the educational levels of workers and non-workers. Part-B of the table, in which data relating to rural areas has been presented, provides only three broad categories of literate persons, namely, literate without educational qualifications, those who have passed primary or junior basic examination and those possessing matriculation and higher qualifications.

The data given in B-III, part A shows that there are in all 4334 workers in a total population of 16356 inhabiting the urban areas of the district. The workers include 1967 illiterate persons or 45.4% of the total working population. Literate workers without educational qualifications comprise 27% and those who have passed primary or junior basic examinations constitute another 12.9% of the total number of workers in the district. The proportion of those who have pased matriculation or higher secondary examinations stands at 11.7%. Other literates with higher educational qualifications claim a very small proportion which is limited to 3% only.

The sex-wise data indicates that the proportions of literate female workers are very low and limited to 37.4% only as against 55.7% of male workers. There are no females possessing technical degrees or diplomas equal to degree or post-graduate degree.

Table B—IV

The table has been split up into three parts so as to indicate separately the industrial classification by sex and (i) class of worker of persons at work at household industry (ii) class of worker of persons at work in non-household industry, trade, business profession or service and (iii) divisions, major groups and minor groups of persons at work other than cultivation. All the three parts have been prepared down to tehsil level, but the branch of industry has been given upto major groups in the case of district in parts (a) and (b) and upto minor groups in part (c) of the table. So far as the data relating to tehsils is concerned, the figures have been presented upto divisions only in all the three parts.

Part—A of the table shows that the industries returned from the rural and urban sectors of Poonch district fall into one major group of Division 0 and 12 major groups of Division 2 and 3. Full description of the industries represented by these divisions and major groups is given below :-

Division	0	Agriculture, Livestock, Forestry, Fishing and Hunting
Major group	04	Livestock and Hunting
Division	2 & 3	Manufacturing
Major group	20	Food stuffs
,, ,,	21	Beverages
,, ,,	22	Tabacco Products
,, ,,	23	Textile-Cotton
,, ,,	25	Textile-Wool
,, ,,	27	Textile-Miscellaneous
,, ,,	28	Manufacturing of wood and wood products
,, ,,	31	Leather and leather products
,, ,,	33	Chemicals and Chemical Products
,, ,,	34-35	Non-Metallic Mineral products other than petroleum and coal

Major group	36	Basic metals and their products except machinery and transport equipment
,, ,,	39	Miscellaneous Manufacturing industries

As the participation of the members of the household in an industry carried on at home is an indispensable condition for its classification as a household industry, it was not deemed necessary to ascertain the status of such workers except in case of those among them who worked as employees in the household industry of some other households. It is therefore that the distribution of workers in Part-A of the table has been given by two categories only, namely, employees and others.

An employee was defined as a person who usually works under some other person for salary or wages in cash or kind. Managers, Superintendents etc., who might in their capacity as such be employing or controlling other workers on behalf of their own employers were also treated as employees and not as employers.

The figures given in Part-B of the table relate to workers engaged in categories III and V to IX of Industrial Classification, namely those engaged in :-

III	Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
V	Manufacturing other than Household Industry
VI	Construction
VII	Trade and Commerce
VIII	Transport, Storage and Communications
IX	Other Services

Workers of these categories were further subdivided into the following 4 classes :-

1. Employer

An employer was defined as a person who had to employ other persons in order to perform the work (other than cultivation, agricultural labour and household industry) in which he was engaged. In order to properly identify an employer care was taken to ensure that he was not only responsible for his own personal work but also for giving work to others in connection with the business in which he was engaged.

2. Employee

A person who usually worked under some other person for salary or wages in cash or kind was treated as an employee.

3. Single worker

A single worker was defined as a person who worked by himself but not as Head of household in a Household Industry. The test applied for verifying whether a person could be classed as a single worker was that he should neither have been employed by any one nor himself employed any body else, not even members of his household except casually.

4. Family worker

A person who worked without receiving wages in cash or kind in an industry, business or trade conducted mainly by the members of the family was treated as family worker provided that he worked at least one hour every day during the working season. Such of the members of the household who helped solely in the household duties were not treated as family workers.

Part—C of the table gives the distribution of workers by three digit industrial classification in respect of workers engaged in household industry and in non-household industry and does not include cultivators and agricultural labourers. A copy of the Standard Industrial Classification giving the description of each division, major group and minor group has been appended as an annexure to Table B—IV, Part—C. It may be remarked here that :—

(a) Minor Groups 000 to 004 and 005 (partly) relating to Category I (Cultivators) and Category II (Agricultural Labourers) and

(b) Minor Group 999 (fresh entrants to labour market) relating to non-workers being outside the scope of this table do not find place in it.

Further, the table does not include such of the minor groups in which the number of workers is less than 1% of the total number of workers given against the concerned division. In case, however, of division 2 & 3, only such minor groups which claim less than 0.5% workers of the division have been omitted. All these minor groups have been listed in the appendix to this table.

Table B—V

The table gives the occupational classification of Categories III to IX, viz., all workers except those employed in agricultural sector.

The term occupation used in the previous Census Reports implied means of subsistence or livelihood or the supporting sector of economy. In 1961, however, a precise connotation has been assigned to this term by making the 'function', or 'exact work' which a person performs in any branch of economic activity as the basis of occupational classification.

The occupational classification is based on the National Classification of Occupations adopted by the Government of India, a copy of which will be found at the end of the table. By this classification, the occupations have been divided into 11 Divisions, 75 Groups and 331 Families.

Following are the limitations of 'National Classification of Occupations' as adopted for Census of 1961 :—

(i) Occupational family 'Ox4' has been deleted from the N. C. O.

(ii) Occupational families 400-401 relating to Category I (Cultivators) and 414 relating to Category II (Agricultural labourers) do not find place in Table B—V.

(iii) Similarly occupational Group x0 and its families x00, x08 and x09 relating to Non-workers (workers without occupations) also do not find place in Table B—V.

(iv) Occupational family '063' has been changed as '069'.

(v) Occupational family '673' — 'Telepriter Operators' is a new addition in the family of occupations.

(vi) There have been changes in the description of some occupational families. Correct description of all such cases are listed below :—

010 Chemists except Pharmaceutical Chemists

047 Optometrists and Opticians

072 Statisticians and Actuaries

073 Geographers

202 Ticket Sellers and Ticket Inspector including Ushers and Ticket Collectors (excluding those on moving transport)

211 Typists

280 General and other Ministerial Assistants and Clerks

290 Office Attendants, Ushers, Hall porters etc. not elsewhere classified

660 Inspectors, Supervisors, Station Masters and Permanent way Inspectors

690 Ticket Sellers, Ticket Inspectors including Ushers and Ticket Collectors on moving transport

771 Shipwrights and Body Builders (wood)

Like Table B—IV Part—C, families against which the number of workers is less than 1% of the total number of workers in the concerned Division and less than 0.5% in the case of Division 7—8 have been omitted from the table. These have, however, been listed separately in the appendix to the table.

The data has been presented for all such families of National Classification of Occupations as are found in Poonch district separately for total and urban and persons, males and females. So far, however, as the tehsils are concerned, the presentation of the data has been restricted to divisions only.

Table B—VI

The table gives the distribution of urban workers of categories III to IX by broad age-groups, sex and educational levels, classified by occupational divisions. The age-groups adopted are the same as those given in table B—I.

So far as the educational levels are concerned the workers have been classified by the standards mentioned in Table B—III Part—A with the difference that no separate column has been provided for illiterate workers.

The table exhibits figures only for occupational divisions but even so it shows the pattern of educational level of working force and the principal occupations which attract qualified persons.

As the table gives the distribution of urban workers other than those engaged in cultivation (Category I) or employed as Agricultural labourers (Category II), Division 4 excludes families 400 (Cultivators owners), 401 (Cultivators Tenants) and 414 (Agricultural labourers). Similarly, group x0 of Division x which represents workers without

occupations has also been excluded as the table relates to workers only.

Figures of individual occupational divisions by age-groups are not available and have not, therefore, been presented in columns 3 to 5 of the table.

Table B –VII

Table B—VII is designed to indicate the principal and subsidiary work of such of the workers who are engaged in more than one activity.

It has already been indicated in the general note on B–Series tables that four questions were canvassed in the Enumeration Slip to ascertain the type of activity in which the person enumerated, if working, was engaged. In the case of a person engaged in more than one activity, the name of the particular activity in which he spent most of the time was also ascertained. This was treated as his principal work and the other activity in which he spent lesser time was regarded as his secondary work.

The table has been split up into two parts. Part—A gives the cross-tabulated data of persons whose principal and secondary work consist of any two of the following :—

I Cultivation

II Agricultural Labour

III Household Industry

It presents the data sex-wise in respect of the district and its rural and urban sectors as also for the rural areas of its constituent tehsils. The data for the district has been presented in respect of household industry, whether it appears as a principal or subsidiary work, by divisions and major groups. So far, however, as the tehsils are concerned, the presentation of the data has been limited to divisions only.

Major groups of household industry in which the proportion of persons having secondary work is less than 5% of the number of persons whose principal work is household industry have been omitted from the table. These have, however, been listed separately in the appendix to the table.

Full description of the divisions and major groups has already been given at the end of Table B-IV, Part-C.

Part—B of the table gives cross-tabulated data in respect of principal and secondary work of persons engaged in any of the activities represented by categories III and V to IX (non-household industry). The figures have been presented sex-wise down to the major groups in the case of the district and upto divisions in respect of the tehsils.

Table B—VIII

The table indicates the incidence of un-employment among persons of either sex aged 15 and above. It has been split up into two parts, one relating to the urban areas and the other to the rural sector. Part-A of the table gives the total and sex-wise number by broad age-groups and educational levels of unemployed persons in the urban areas and their distribution among those seeking employment for the first time and others who were employed before but are now out of employment and seeking work. The educational levels adopted for this table are the same as those given in Table B-III, Part-A.

Part-B of the table deals with the rural sector of the district and of its constituent tehsils. It gives similar educational level of unemployed persons of both sexes, aged 15 and above, as given in Table B-III, Part-B.

Table B—IX

The table gives the total and sex-wise distribution of Non-workers by broad age-groups and the type of activity. The data has been presented separately for the district and its rural and urban sectors as also for each tehsil.

Non-workers have been classified into the following 8 categories :-

1. Full time students or children attending school who do no other work, such as making of articles at home for sale, nor even help their own family cultivation, industry, trade or business on part-time basis.

2. Persons engaged in unpaid home duties (like a housewife or other adult females) who do no other work, such as making of articles at home for sale or wages, nor help regularly even on part-time basis in family cultivation, industry, trade or business.

3. Dependents including infants or children not attending school and persons permanently

disabled from work because of illness or old age.

4. Retired persons other than those re-employed, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend as also persons of independent means for securing which they do not have to work nor they do any other work.

5. Beggars, vagrants or independent women without indication of source of income and others of un-specified source of existence.

6. Convicts in jails (other than under trial prisoners) who used to work before being apprehended and inmates of penal, mental or charitable institutions.

7. Persons employed before but seeking employment for the first time.

8. Persons employed before but now out of employment and seeking employment.

Persons who did not work and could not be readily classified in any of the above categories were included in category V viz. beggars, vagrants etc. Similarly, persons who were not working at the time of Census but who had been offered work which they had not joined, were classed as dependents and included in category 3.

ANNEXURE TO TABLE B-IV PARTS A, B & C

STANDARD INDUSTRIAL CLASSIFICATION

This Classification groups the industries into

9 Divisions
45 Major Groups
343 Minor Groups

The divisions and major groups with their Code numbers are listed below :—

DIVISIONS

0 Agriculture, Livestock. Forestry, Fishing and Hunting
1 Mining and Quarrying
2 & 3 Manufacturing
4 Construction
5 Electricity, Gas, Water and Sanitary Services
6 Trade and Commerce
7 Transport, Storage and Communications
8 Services
9 Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, Livestock, Foresty, Fishing and Hunting
00—Field produce and Plantation crops
01—Plantation crops
02—Forestry and Logging
03—Fishing
04—Livestock and Hunting

Division 1—Mining and Quarrying
10—Mining and Quarrying

Division 2 & 3—Manufacturing
20—Foodstuffs
21—Beverages
22—Tobacco Products
23—Textile - Cotton
23—Textile - Jute
25—Textile - Wool
26—Textile - Silk
27—Textile - Miscellaneous
28—Manufacture of wood and wood products
29—Paper and Paper products
30—Printing and Publishing
31—Leather and Leather Products
32—Rubber, Petroleum and Coal Products
33—Chemicals and Chemical Products
34—35—Non-Metallic Mineral Products other than Petroleum and Coal
36—Basic Metals and their products except machinery and transport epuipment
37—Machinery (all kinds other than Transport) and Electrical equipment
38—Transport Equipment
39—Miscellaneous Manufacturing Industries

Division 4—Construction
40—Construction

Division 5—Electricity, Gas, Water and Sanitary Services
50—Electricity and Gas
51—Water Supply and Sanitary Services

Division 6—Trade and Commerce
60—63—Wholesale Trade
64—68—Retail Trade
69—Trade and Commerce Miscelleneous

Division 7—Transport, Storage and Communications
70—71—Transport
72—Storage and Warehousing
73—Communications

Division 8—Services
80—Public Services
81—Educational and Scientific Services
82—Medical and Health Services
83—Religious and Welfare Services
84—Legal Services
85—Business Services
86—Community Services and trade and labour associations
87—Recreation Services
88—Personal Services
89—Services (not elsewhere classified)

Division 9—Activities not adequately described
90—Activities unspecified and not adequately described (This includes new entrants to the labour market)

Major Group (Code) 1	Description 2	Minor Group (Code) 3
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram . .	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above . . .	005

Major Group (Code)	Description	Minor Group (Code)
1	2	3
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane, reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	009
01	*Plantation Crops*—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of *ganja, cinchona, opium*	014
	Production of other plantation crops not covered above	015
02	*Forestry and Logging*—	
	Planting, replanting and conservation of forests	020
	Felling, and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests	023
	Production of fodder by exploitation of forests	024
	Production of *gums, resins, lac, barks, herbs* wildfruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	*Fishing*—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	*Livestock and Hunting*—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power, such as, cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silkworms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products, such as skin, bone, ivory and teeth	048
	Division 1—Mining and Quarrying—	
10	*Mining and Quarrying*—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of Manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth, such as soda ash	108
	Mining and quarrying of non-metalic products not classified above, such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing—	
20	*Foodstuffs*—	
	Production of rice, atta, flour, etc., by milling dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugar-cane in mills	201
	Production of indigenous sugar, gur from sugar cane or palm juice and production of candy	202
	Production of fruit products, such as, jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207

Major Group (Code) 1	Description 2	Minor Group (Code) 3
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food-products, such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	*Beverages*—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery . . .	210
	Production of country liquor . .	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice .	212
	Production of other liquors not coverd above	213
	Production of aerated and mineral water .	214
	Production of ice	215
	Production of icecream . . .	216
	Processing of tea in factories . .	217
	Processing of coffee in curing works .	218
	Production of other beverages . .	219
22	*Tobacco Products*—	
	Manufacture of bidi . . .	220
	Manufacture of cigars and cheroots .	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco . .	223
	Manufacture of snuff . . .	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products .	226
23	*Textile-Cotton*—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills) .	231
	Cotton spinning and weaving in mills .	232
	Cotton dyeing, bleaching . . .	233
	Cotton weaving in power looms . .	234
	Cotton weaving in handlooms . .	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile . . .	237
	Manufacturing of cotton nets . .	238
	Manufacturing of cotton, cordage, rope and twine	239
24	*Textile-Jute*—	
	Jute pressing and baling . . .	240
	Jute spinning and weaving . . .	241

Major Group (Code) 1	Description 2	Minor Group (Code) 3
	Dyeing and bleaching of jute . .	242
	Printing of jute textile . . .	243

HOUSEHOLD ECONOMIC TABLES

HOUSEHOLD ECONOMIC TABLES

One of the distinguishing features of the 1961 Census has been the introduction of household schedule through which economic data has been collected for the household as a whole and not in respect of each individual as has been the past tradition. This departure has been deemed necessary as in countries of such economic status as ours, where not all the goods produced enter the money market and where a good proportion of the products is consumed by the family itself, collection of information on the basis of individuals is likely to be misleading unless it is supplemented by the data for the entire household.

In India, where the bulk of the population lives in rural areas and agriculture is the occupation of 70% of the population and cultivation is conducted by members of a household, with, in many cases, household industry as a compulsive adjunct, the household itself and not the individual acts as an integral economic unit of production. This was felt to be particularly valid for those households which produce mainly for self consumption and additionally for the market. This sector of the economy is, for various obvious reasons, the most resistant to displacement or transfer of population from what they are engaged in, because the population engaged in such activity finds that all of its effort, however, seasonal, is really wanted, and it is difficult to leave it in preference to any other. On the other hand, it is not easy to bring work from elsewhere to this population to fill its period of unemployment or under-employment. Before one makes facile assumptions about marginal productivity of labour being negative, it was thought worthwhile to investigate this sector with the help of such a schedule. A Household Schedule was, therefore, framed for this purpose which provided for area of land cultivated by a household on ownership, or on tenancy basis or on both and household industry, if any, conducted by the household and the number of family workers and hired workers employed in these activities.

It is necessary to reproduce here the definitions of some of the terms used in the tables.

A household industry was defined as an industry coducted by the head of the household himself and or mainly members of the household at home or within the village in rural areas and at home in urban areas. The following three-fold test was prescribed to justify the classfication of an industry as a household industry.

(a) Household indusrry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household industry should be on the household scale where the workers mainly will be the Head of the household himself and or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any *Household Industry, members of the household* should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a ragistered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village, this participation is possible if the Household Industry is located at home or within the village, because village organization is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, in urban areas only those industries which are located at home can be considered for being classified as household Industries. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving and winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a household industry even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

A cultivator was defined as a person engaged either as employer, single worker or family worker

in cultivation of land or supervision or direction of cultivation of land (a) owned or hired from Government and (b) held from private persons or institutions for payment in money, kind or share. A person who had given out his land to others for cultivation for payment in money, kind or share of crop and who did not even supervise or direct cultivation of land was not treated as a cultivator. Similarly, a person working in another person's land for wages in cash, kind or share was not also treated as a cultivator.

A person who worked without receiving wages in cash or kind in his own family in an industry, business or trade conducted mainly by members of family was treated as a family worker. Such of the members of the household as attended to household duties only where deemed as non-workers and were not included among family workers.

A person who was employed by a household other than his own to work in any of the activities connected with cultivation of household industry for payment in cash, kind or share of the produce was treated as a hired worker. An important condition for the classification of a person as a hired workers was that he/she should have been in whole-time employment during the last working season or in whole-time employment during the current season.

For the purpose of Census, the head of the household was defined as person on whom fell the chief responsibility for the maintenance of the household. It was made clear that the head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex, provided he or she actually acknowledged as such. In the case of institutions, the manager or superintendent or the person who was regarded by common consent as the head was to be treated as the head of the household.

As single worker and employers do not figure anywhere in Household Economic Table, it is not necessary to reproduce the definitions of such workers.

All the Household Economic Tables have been prepared on the basis of 20% sample of households excluding those classified as institutional. The definition of an institutional household has already been given in Fly-leaf to appendix III to Table A-I of the General Population Tables.

Table B-X

The table has been prepared from the data extracted from 20% sample household schedules. The figures have been tabulated for (a) all areas upto the district level, (b) urban sector of the district and (c) the rural area of each tehsil. It gives the distribution of the households according as they are engaged in cultivation only, household industry only or both or neither.

Table B-XI

The table consists of two parts, one dealing with the rural sector and the other pertaining to urban areas only. The former has been prepared down to tehsil level and the latter upto the district. In either case, the data is based on 20% sample household schedules.

As is clear from column 1 of the table, the data relates only to such of the households which cultivate lands (i) owned or held from Government, (ii) held from private persons or institutions for payment in money, kind or share or (iii) partly held from Government and partly from private persons for payment in money, kind or share. The table does not include households which give their lands to private persons for cultivation for payment in money, kind or share.

Cultivating households referred to in column 2 of the table represent both such of the households as are engaged in cultivation only as also those which besides cultivating lands also run some household industry. In other words, the figures given in col. 2 of this table are the sum total of the corresponding figures of columns 5 and 7 of the previous table for rural and urban sectors.

The household schedule from which the data has been compiled consists of three parts, viz., cultivation, household industry and workers at cultivation and/or household industry.

The portion of the household schedule relating to cultivation was to be filled in only in respect of households which actually cultivated land or gave the land to private persons for cultivation for payment in cash, kind or share. For this purpose, the households were divided into three categories, namely (a) those who cultivated lands owned or held from Government (b) those who held lands from private persons or institutions for payment in money, kind or share and (c)

those who have given their lands to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places owned or held or taken or given have been lumped together.

It may, however, be stated here that in the case of households falling in categories (a) and (b) referred to above, only those plots and parcels of land which were cultivated by the household, itself, such as, lands which lie within the village or in adjacent village or within such a distance as would enable the households to work on the land or actively supervise the cultivation, were regarded as areas cultivated by them. Lands owned or held in distant places where distance itself was a bar to active cultivation or its supervision or direction were not included in the lands actually cultivated by these two categories. On the other hand, category (C) included land in any part of the country, whatsoever. In such cases the aggregate area, no matter where such lands were situated, was treated as land given to private persons for cultivation for payment in money, kind or share.

The following table shows, at a glance, the distribution of 100 rural cultivating households in poonch district by size of land cultivated :–

Less than 1 acre	1.0 to 2.4 acres	2.5 to 4.0 acres	5.0 to 7.4 acres	7.5 to 9.9 acres	10.0 to 12.4 acres	12.5 to 14.9 acres	15.0 to 29.9 acres	30.0 to 49.9 acres	50+ acres	Unspecified
10	29	34	17	5	3	1	1	N	N	N

Table B-XII

This table has also been prepared separately for the rural areas down to tehsil level and for the urban sector upto districts. The data given in the table relates to households which are engaged in cultivation only and not to those engaged both in cultivation and household industry. As before, the institutional households have not been accounted for while taking out the sample.

The table is designed to give the classification of cultivating households according to the size of land cultivated, each such class being further cross-tabulated with reference to the number of hired workers and sex-wise number of family workers. Ten class ranges of land have been devised varying from less than I acre to 50 or more acres. An additional class has been provided to cover households in whose cases the size of land could not be ascertained.

The definitions of family worker and hired worker have already been given in the general note on Household Economic Tables.

Table B-XIII

In this case two separate tables have been prepared upto district level, one for the rural and the other for urban areas. The table gives the code numbers and detailed description of household industries according to Indian Standard Industrial Classification upto major groups except industries under such other major groups which claim less than 10% households in the respective divisions. The latter have been given in an abbreviated form in the appendix accompanying the table. The divisions thus affected are marked with an asterisk (*).

The statistics given in the table relate to households engaged both in cultivation and household industry and not to households which are engaged in cultivation only. It shows by cross-tabulation the distribution of households, engaged in a particular household industry, by the size classes of land referred to in Table B-XIII.

A comparison of the rural parts of Tables B-XII and B-XIII shows that the total number of cultivating households engaged in cultivation only stands at 9,157. Households which are engaged both in cultivation and household industry number 1,398 or 13.2% only of the aggregate number of households engaged in cultivation only and engaged both in cultivation and household industry.

Table B-XIV

The table consists of two parts. Part A gives the distribution of households for the district as a whole and for its rural and urban sectors by the number of persons employed and the divisions and major groups under which the principal household industries are classifiable according to the Indian Standard Industrial Classification. Part B of the table indicates the names of the industries by minor groups and the distribution of households engaged in such industries for the entire district and its rural and urban areas. It does not, however, give the classification of households by the number of persons employed.

Industries under such major groups which claim less than 10% households of their respective divisions have been omitted from part A of the table and listed in an abbreviated form in the appendix accompanying the table. The divisions thus affected are marked with an asterisk(*)

A distinguishing feature of the table is that it relates to households engaged in household industry only and excludes all others engaged in cultivation only or both cultivation and household industry.

Table B-XV

The table has been prepared upto tehsil and district level for rural and urban areas respectively. It indicates the distribution of households by various size classes of land classified by the number of persons employed in both cultivation and household industry. The definitions of family and hired workers have already been given in the general note on Household Economic Tables.

Table B-XVI

The table gives for the district as a whole and for its rural and urban sectors, the number of households, their family workers by sex and hired workers classified by the number of months in a year for which each household industry is being run by the households concerned. The data has been shown collectively and separately in respect of the households engaged in both cultivation and household industry and households engaged in household industry only. In this case also, the code numbers and names of industries have been given according to the Indian Standard Industrial Classification upto Major groups. Such of the industries which claim less than 10% households of the Division concerned have, however, been omitted from the table and listed in the appendix. The divisions thus affected are marked with an asterisk (*).

Table B-XVII

The table gives the distribution of rural households other than those classed as institutional households according as they are (a) engaged neither in cultivation nor in household industry (b) engaged in household industry only and (c) engaged in cultivation with or without household industry. Category (c) has further been subclassified into 10 holding groups according to the size of land cultivated by them.

The table also gives the total and sex-wise population of the sample households of each category and their distribution by five size classes of households. In the case of category (c), this classification has also been shown in respect of each size class of land.

Further, the table indicates the distribution of urban households of all categories put together by the number and sex-wise population of each size of households.

The actual number of all households and their population (except institutional population) as returned at the 1961 Census for the district and its rural and urban sectors has been given in the table at the end of the data relating to the district.

The data given in Col. 2 of the table shows that out of the total number of 11,127 rural households, 10,555 or 94.9% are engaged in cultivation. This is the next highest percentage of such households when compared with other districts of the State. These, however, include 68.7% households where the size of holdings is less than 5 acres.

SOCIAL AND CULTURAL TABLES

SOCIAL AND CULTURAL TABLES

The Social and Cultural tables, also known as C—Series Tables, have been published in Part II—C, Volume VI of Census of India, 1961. The series consists of eight tables, as detailed below :—

C—I	Composition of Sample Households by relationship to head of family classified by size of land cultivated
C—II	Age and Marital Status
C—III Parts A, B & C	Age, Sex and Education
C—IV	Single year Age Returns
C—V	Mother-Tongue
C—VI	Bilingualism
C—VII	Religion
C—VII Part A	Classification by literacy and industrial category of workers and non-workers among Scheduled Castes

It has, however, been decided to include Tables C—I to C—III, C—V, C—VII and C—VIII Part A only in the District Hand Books. Further, the appendix to Table C—III in which the particulars of employed and un-employed scientific and technical personnel have been tabulated, has also been omitted as the appendix gives the figures for the State as a Whole and not for individual districts.

Except for Table C—I, which alone is based on the data extracted from 20% sample Household Schedules, all other tables have been prepared on full count. In the case of C—II, C—V and C—VII, figures have been given down to the tehsil level, but in C—I and C—III, the presentation of the data has been restricted to the district only.

Table C—I

The data given in the table is the first of its kind and has not been collected at any previous census held in the State. The table is of sociological interest and presents a broad economic picture in the joint family system.

The data presented in the table has been compiled on 20% sample basis and gives the number of sample households, their total and sex-wise population, the numbers of male and female heads of households and of their spouses, as also the sex-wise numbers of married, never married, widowed and divorced or separated relations and unrelated persons.

In the case of urban areas, the data only indicates the structure and the composition of households and does not portray their economic activities. So far, however, as the rural areas are concerned, the households have been classified into three categories, viz. (a) those engaged neither in cultivation nor household industry, (b) those engaged in household industry only and (c) those engaged in cultivation. The last named category has further been classified by size of holding groups besides those whose size class is not known.

Table C—II

The table gives valuable demographic data of age structure and marital status separately for total, rural and urban population of the district as a whole and for rural areas of its constituent tehsils. The age groups conform to international requirements.

The table will prove helpful in ascertaining whether the proportions in the various marital status conditions have increased or decreased since last Census and whether any trend is discernible in the age of marriage. The data of married females by age-group can also be utilised for forecasting future births from age specific birth rates.

Table C—III

The table gives the statistics of literate population by age, sex and educational levels as also the sex-wize number of illiterate persons in each age group. In all, the following ten age groups, besides an additional one relating to persons who did not specify any age have been adopted :—

0-4, 5-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-44, 45-59 and 60 and above.

The table has been split up into three parts, each giving figures upto the district level. Part

A relates to all areas, Part B to the urban sector and Part C to the rural areas.

Parts A and C are designed to give for each age group sex-wise figures of total, literate and illiterate population. The statistics of literates have, however, been tabulated by three educational levels namely :—

(i) Those who have not passed any examination

(ii) Those who have passed Primary or Junior Basic Examination and

(iii) Those who have passed Matriculation and higher examinations.

In the case of urban areas where the incidence of literacy is comparatively high and larger facilities for higher education are available, a more elaborate and comprehensive description of the educational levels has been attempted. Part B of the table therefore gives the distribution of literate persons by the following seven major categories :—

1. Literates without educational standards
2. Those who have passed Primary or Junior Basic Examination
3. Those who have passed Matriculation or Higher Secondary Examination
4. Persons possessing technical diploma not equal to degree
5. Persons possessing non-technical diploma not equal to degree
6. Those possessing University degree or post-graduate degree other than technical degree
7. Those possessing technical degree or diploma equal to degree or post-graduate degree

The last category has further been sub-divided into 7 divisions, viz., Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and others. It is hoped that these statistics will prove of great use for making an assessment of the man power available for the implementation of various developmental schemes.

Table C—V

The table gives the total and the sex-wise population of the speakers of each mother-tongue for the district as a whole and for its rural and urban areas as also in respect of the rural sector of each tehsil. The mother-tongues have been arranged in alphabetic order to facilitate the tracing of number of speakers of a particular language.

The definition of mother-tongue as adopted at the Census of 1961 is a language spoken in childhood by a person's mother to the person or mainly spoken in the household. If the mother of the person had died in his infancy, the language mostly spoken in the persons home in childhood was treated as his mother-tongue. In the case of infants and deaf mutes, the language usually spoken by the mother was regarded as the mother tongue of the infant etc.

Table C—VII

This is an important sociological table giving the community wise population of the district and of each of its constituent tehsils. The data relating to the district has been exhibited separately in respect of its rural and urban areas, but that pertaining to the tehsils has been given in respect of rural areas only.

Before 1951, religion was treated as the unit of tabulation and most of the demographic data, such as marital status, literacy and other characteristics was tabulated by the communities. Further, the Classification of the population was being presented by religion down to the village level. In 1951, no data regarding race, caste etc. was collected and instead livelihood classes were adopted as the unit of tabulation. At the present census the industrial classification has been given greater emphasis and most of the data has been presented on this basis. Another distinguishing feature of the 1961 table is that the figures have this time been tabulated separately for rural and urban areas of each district.

Table C—VIII Part A

According to tabulation plan prescribed for 1961 Census, Table C-VIII is to consist of two parts, one dealing with Scheduled Castes and the other with Scheduled Tribes. As there are no Scheduled Tribes in Jammu and Kashmir, only Part-A of the table has been compiled.

The table gives population of Scheduled Castes for the district as a whole and for its rural and urban sectors together with the distribution of this population by literacy and industrial classification of workers as also the number of non-workers. In addition, similar data has also been presented at tehsil level with the difference that it relates to rural sector only.

A distinguishing feature of this table when compared with earlier Censuses is that the classification of workers by industrial categories has been confined to Scheduled Castes only and the tabulation of similar data for important communities, as was done in the past, has been dispensed with. The table is important as it will constitute the basis for the allocation of reserved seats in Parliament and State Legislatures.

SPECIAL TABLES FOR SCHEDULED CASTES

SPECIAL TABLES FOR SCHEDULED CASTES

The SCT series comprise five main tables (SCT-I to SCT-V) and three special tables (SC-I, ST-I, ST-II), which are designed to give broad demographic and economic data of Scheduled Castes and Scheduled Tribes. Four of the main tables, namely, SCT-I, SCT-II, SCT-IV and SCT-V, have been further sub-divided into two parts each, one dealing with Scheduled Castes and the other with Scheduled Tribes. SCT-III which relates to education of Scheduled Castes and Scheduled Tribes has, however, been split up into four parts, to indicate separately the rural and urban statistics of Scheduled Castes and Scheduled Tribes. Table SC-I pertains to Scheduled Castes only and ST-I and ST-II to Scheduled Tribes only.

Since, however, there are no Scheduled Tribes in Jammu and Kashmir and the entire Scheduled Castes population is concentrated in Jammu province, the following tables only have been prepared and included in the present publication :—

1. SCT-I Part A : Industrial Classification of persons at work and non-workers by sex for Scheduled Castes
2. SCT-II Part A : Age and Marital Status for Scheduled Castes
3. SCT-III Part A(i) : Education in urban areas only for Scheduled Castes
4. SCT-III Part B(i) : Education in rural areas only for Scheduled Castes
5. SCT-IV Part A : Religion for Scheduled Castes
6. SCT-V Part A : Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Castes (Households of members of Scheduled Castes in a 20 percent Sample of all households)
7. SC-I : Persons not at work classified by sex, type of activity and educational level for Scheduled Castes.

Table SCT-I Part A has further been supplemented by an appendix indicating the absolute figures and the percentages of Scheduled Castes to the total population in each of the district and its rural and urban areas.

Except for Table SC-I which presents the data for tehsils also, all other tables have been prepared upto district level only.

The data incorporated in the above tables is based on the replies given by the Scheduled Castes to the questions canvassed in the Enumeration Slip and Household Schedule at the Census of 1961.

All the SCT Tables, except Table SCT-V Part A which alone is based on the data extracted from 20% Sample Household Schedules, have been prepared on full count.

The following definition of Scheduled Castes has been laid in Article 49 (1) of the Constitution of Jammu and Kashmir.

"Scheduled Castes means the castes, races or tribes or parts of, or groups within castes, races or tribes which are for the purposes of the Constitution of India deemed to be Scheduled Castes in relation to the State under the provisions of Article 341 of that Constitution".

Article 341 of the Constitution of India empowers the President to specify, by public notification, with respect to Status specified in Part A or Part B of the First Schedule, after consultation with the Governor or Rajpramukh thereof the castes, races or tribes or parts of, or groups within castes, races or tribes which shall, for the purposes of the Constitution of India, be deemed to be Scheduled Castes in relation to that State. Further according to para 6 of Fifth Schedule of the Constitution of India, scheduled areas are defined as areas which the President may, by order declare to be scheduled areas.

In pursuance of these stipulations, the President made the Constitution (Scheduled Castes) Order of 1950 specifying the castes, races or tribes which shall be deemed to be the Scheduled Castes in a State. Since, however, the Constitution of Jammu and Kashmir came into force on the

26th January, 1957, the Presidential Order of 1950 which excluded the State of Jammu and Kashmir was amended and the following Castes were declared as Scheduled Castes for the State of Jammu and Kashmir :—

1. Barwala
2. Basith
3. Batwal
4. Chamar or Ramdasia
5. Chura
6. Dhyar
7. Doom or Mahasha
8. Gardi
9. Jolaha
10. Megh or Kabir Panthi
11. Ratal
12. Saryara
13. Watal

Table SCT-I Part A

The table has been presented in two parts, one indicating the data for the rural and the other for the urban sector of the district. Each part gives the total and sex-wise population of individual castes and their distribution among workers and non-workers as also the industrial classification of the workers. The table also indicates the number of workers engaged in special occupations such as tanning and currying of hides and skins and scavenging in which members of the castes may be engaged.

Appendix to Table SCT-I Part A has been specially devised for the District Handbook. As stated above, it gives, by total, rural and urban, the general and the Scheduled Caste population down to tehsil level as also the percentage of the latter to the former.

The data given in the Appendix shows that Poonch district is inhabited, among others, by 9,821 scheduled castes who constitute 3.01% of the total population of the district. The rural sector has returned 9,217 scheduled castes while the urban areas are inhabited by only 604 members belonging to scheduled castes.

The tehsil-wise statistics indicate that Nowshehra has returned the highest population of scheduled castes which stands at 6,940 or 70.7% of the total scheduled caste population of the district. Rajouri comes next with 2,678 (27.3%) scheduled castes while Haveli and Mendhar are inhabited by very small proportions of scheduled castes which are limited to 1.9% and 0.1% scheduled caste population of the district respectively.

Table SCT-II Part A

This is an important table as it furnishes valuable data in respect of civil conditions for all ages of the entire Scheduled caste population in the district. The three broad-age groups provided in the table, viz. 0-14, 15-44 and 45+ correspond to different stages of life, viz ; children, young and middle aged persons and elderly persons. Those who did not specify any age have been categorized separately and classified under the head "Age not stated".

Question 3 of the individual slip relates to the marital status of the person enumerated. Instructions were issued to the enumerators to include every person in one or the other of the following four categories according to the reply given by him :—

1. Never Married
2. Married
3. Widowed
4. Divorced or Separated

A person married whether for the first or another time was treated as "Married". Such other persons who are recognised by customs or society as married as also those in stable de facto union were also categorised as 'Married'. Even if a marriage was disputed in the locality, if the person concerned claimed that he or she was married or was in stable de facto union, their marital status was shown as "Married".

A widowed person was defined as one whose husband or wife was dead and who had not married again.

A person divorced in a lawful manner either by decree of a law court or by a regular social or religious custom but who had not married, or a person who had separated from wife or husband and was living apart with no apparent intention of living together again was treated as a separated or divorced person.

Persons in whose individual slip the enumerators had omitted to make any entry against question 3 were treated as of unspecified status.

Table SCT-III Part A(i) and SCT-III Part B(i)

Table SCT-III which furnishes sex-wise statistics of literate and illiterate population of Scheduled Castes by individual castes and educational levels has been prepared in two parts, namely, SCT-III Part A(*i*) dealing with the urban areas of the district and SCT-III Part B(*i*) relating to rural sector.

The definition of literacy as adopted at the 1961 Census has already been given in Fly-leaf to Table B-III of the General Economic Tables.

In view of the relatively high incidence of literacy in the urban areas and the poor percentage of literates in the rural population, it has not been deemed necessary to adopt the same educational standards for the classification of

literate persons in the rural and urban areas. While, therefore, the statistics of literates in the rural areas have been tabulated for (i) mere literates, (ii) primary or junior basic and (iii) matriculates and above, in the case of urban areas data relating to literate persons has been given for the following seven major categories :—

1. Literate without educational level.
2. Primary or Junior Basic
3. Matriculation or Higher Secondary
4. Technical diploma not equal to degree
5. Non-technical diploma not equal to degree
6. University degree or post-graduate degree
7. Technical degree or diploma equal to degree or post-graduate degree.

According to the data given in the table, the overall literacy percentage among scheduled castes belonging to the rural areas is very low and stands at 3.2% only. This is particularly true of females who claim 0.7% literates only as against 5.5% of males. The coresponding percentages for the entire population inhabiting the rural areas stand at 6.4% in the case of persons, 11.3% for males and 0.9% for females.

The incidence of literacy among scheduled castes inhabiting the urban areas is comparatively more pronounced. The data shows that 11.7% male and 5% female scheduled castes are literate. The corresponding percentages of the entire population belonging to the urban areas stand at 46.1% in the case of males and 24.4% in the case of females.

Table SCT-IV Part A

This table purports to indicate the religion professed by members of various Scheduled Castes. An important feature of the table is that unlike the Census of 1941 in which members of Scheduled Castes were shown as belonging to Hindu religion only, the 1961—Census figures indicate that some Scheduled Castes also belong to Sikh religion.

The table shows that out of a total scheduled caste population of 9,821 inhabiting the district of Poonch, 9,777 belong to Hindu community while the remaining who number 44 only profess Sikh religion. Among the latter, 36 are of Basith caste and 8 belong to Chamar (Ramdasia) Caste.

Table SCT-V Part A

This table is similar to Household Economic Table B-XI. The data given in the table relates to such of the Scheduled Caste households which are engaged in cultivation and have been traced from 20% sample of all households in Poonch district.

The definition of a cultivator has already been given in the Fly-leafs to Household Economic Tables. Households engaged in cultivation have been divided into three categories according as the land cultivated is :—

1) Owned or held from Government.
2) Held from private persons or institutions for payment in money, kind or share, and
3) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The first of these categories represents all pieces of land, owned or held in owner-like possession, such as land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of payment and heritable possession, but without the right of transfer and (iii) temporary or conditional lease of any kind with the Government.

Similarly, category 2 refered to above includes land (i) with rights of permanent, heritable possession but without right of transfer and (ii) held in a variety of tenancies or tenures.

The thired category of households consists of those which partly cultivate land held from Government and partly from private persons for payment in money, kind or share. It, therefore, includes not only one or more varieties of lands into which category (i) is classifiable as indicated above, but also those of category (ii).

Table SC-I

The table has been prepared for the total non-working population of all Scheduled Castes collectively. The data has been presented separately for total/rural/urban upto district. So far as the rural areas are concerned, the figures have been given down to tehsil level.

The definition of worker and non-worker has already been given at some length in the Fly-leafs to General Economic Tables. It is, however, necessary to point out here that except for (i) full time students, (ii) persons seeking employment for the first time and (iii) persons employed before but now out of employment and seeking work, the educatinal levels of all other categories of non-workers have been given collectively in columns 11 and 12 of the table.

The data given in the table shows that the proportions of non-workers among scheduled castes both in the rural and urban sectors of the district are slightly less than the similar proportions of non-workers in the entire population inhabiting these areas. These proportions stand respectively at 57.2% and 69.4% in the case of scheduled castes as against 61.4% and 73.5% in the entire district. Even in the case of the district as a whole, only 58% scheduled castes have been enumerated as non-workers as against 62% in the entire population.

The literacy percentage of non-workers belonging to schedule castes which stands at 2.3% is, however, low compared to 5.5%, the corresponding proportion of non-workers in the district.

HANDICRAFT TABLES

HANDICRAFT TABLES

The data relating to rural crafts is being printed in a separate publication entitled Part—VII of Volume VI of the Census of India 1961. The volume contains seven tables out of which the following three have been incorporated in the District Handbooks.

Table I—List of rural crafts and number of persons employed in production :—

The table also indicates the number of villages in which each craft is found.

Table II—Distribution of artisan communities :—

The table gives the names of crafts, name of caste or community to which the workers engaged in the craft belong. In addition, it also gives the number of total adult workers in respect of each craft.

Table VII—List of very skilled craftsmen of each community :—

The table gives for each surveyed village the name of the craft and of its skilled craftsmen together with the name of the community to which they belong.
