PREFACE

Though compiled in the Census Office, District Census Handbooks are actually State Government publications. They were published for the first time in the 1951 Census. So varied have been their uses and so great their value that there can be little doubt that the Handbooks have come to stay as a regular feature of every census. In 1961, while the tradition has been continued, efforts have been made to enlarge the scope and enrich the contents of the Handbook in several ways. Much of it is, of course, due to the able guidance and inspiration from Shri Asok Mitra, the Registrar General of India, to whom no words of gratitude can really do full justice.

The main attraction of the District Census Handbook lies in the portion relating to Village Statistics which presents primary census data for each village in the district. To facilitate reference, this table has been supplemented by a Village Directory which, apart from cataloguing some additional information, gives an alphabetical list of villages in each Anchal. The arrangement of villages in the Village Statistics portion is according to the jurisdiction of Panchayats and Anchals. No authentic list of villages comprised in each Panchayat or Anchal was readily available before the Census of 1961. Much pioneering effort had, therefore, to be made in the preparation of these lists. It is possible that some errors, particularly in the delineation of Panchayat jurisdiction, might have crept in because of these limitations or subsequent modifications in boundaries. It may be noted also that the statistics reproduced here are generally related to March, 1961 unless otherwise indicated.

The Anchal maps are a special feature of the Handbook this time. They have been prepared from 1″=1 mile Anchal maps which were traced from the old Revenue Thana maps. Though revenue thanas had long ceased to be of much significance in day-to-day administration no attempt appears to have been made in the past to prepare police station or anchal maps delineating the village boundaries. The Census of 1961 in Bihar can justly claim the preparation of these anchal maps, both on 1″=1 mile scale as well as on the reduced scale in which they are presented in this book, among its major achievements. Of course this was made possible mainly because of the keen interest and helpful attitude of the State Government which not only placed the relevant materials at my disposal but also agreed to meet the entire cost of the scheme. For all this I am greatly indebted to Shri S. J. Majumdar, the then Chief Secretary, Shri S. K. Chakravorty, the then Revenue Secretary, and Shri J. P. Shrivastava, the then Director of Land Records, Bihar. I owe a special debt of gratitude to Shri M. P. Singh, Deputy Director of Surveys, Bihar, who not only helped with some of his experienced staff but also provided valuable technical supervision from time to time.

The Village Statistics and the Village Directory, together with the Anchal maps, should provide a complete index and statistical guide to each village in the district. Among other items of interest, mention may be made of the note introducing the

district, brief gazetteer of places, glossary of ancient monuments and official statistics. These are, of course, in addition to the census tables for the district. It is regretted that paucity of space stood in the way of reproducing a good many of the other census tables in the Handbook. For instance, Migration and Housing Tables have been excluded completely. These may be looked for, if necessary, in the relevant State volumes.

This Handbook is the product of hard toil and patient labour of several persons and agencies. No list can really be comprehensive enough to include them all. An acknowledgement appears elsewhere mentioning some of those who were associated with this work in the Census Office. Outside sources and agencies have been mentioned as far as practicable, at appropriate places in the book itself.

Last, but far from least, my special thanks are due to Shri S. N. Chatterjee, Superintendent, Secretariat Press, Patna and his staff for the fine printing and get-up of this Handbook.

INTRODUCING THE DISTRICT

1. GENERAL

Situated between north latitude 24°44′ and 24°57′ and longitude 84°42′ and 86°4′, the district of Patna lies virtually in the heart of the South Bihar Plain. It is a constituent district of the Patna division. The city of Patna, besides being the headquarters of the district, is also the divisional headquarters and the State capital since 1911. The district of Patna is bounded on the north by the Ganges, beyond which lie the districts of Saran, Muzaffarpur and Darbhanga. To the east lies the district of Monghyr and to the south, the district of Gaya. Patna is separated from Shahabad on its west by the river Sone.

There are 28 anchal-*cum*-community development blocks and 35 police stations in the district. They are distributed in five subdivisions as indicated below :

Number of anchals and police stations in the subdivisions of Patna district, 1961

Subdivision	Number of	
	Anchals	Police stations
Patna Sadar	4	9
Patna City	1*	5
Dinapur	6	7
Barh	7	5
Bihar	10	9
DISTRICT TOTAL ..	28	35

A statement showing the inter-relationship between revenue thanas, anchals and police stations of the district is given at page 11 of Part I.

2. HISTORY OF THE DISTRICT

The district of Patna was constituted in the year 1865 out of portions of the then existing districts of Behar (Vihar) and Tirhut. There were some minor changes of jurisdiction between 1881 and 1931, but its boundaries have remained virtually intact thereafter.

As the centre of the great Magadh Empire, the district has a rich and glorious history extending to over 2,500 years.

Early History

The *Vratyas*, referred to in the *Atharwaveda*, constituted an un-Vedic or possibly pre-Vedic civilization in the region of Magadh. The autochthonous tribes gave way to the incoming Aryans and migrated south to the hilly regions of the Chotanagpur plateau which is even now the stronghold of the tribes of Bihar. Thus Bandhayana (6th century B.C.) spoke of Magadh as a tract "still containing a people of mixed origin, outside the pale of Aryan civilization".

Epic literature describe the valiant feats of the mighty King Jarasandha who had his capital at Rajgriha. The remains of a fortress ascribed to Jarasandha of the pre-historic period are still to be found at Rajgir, as also the ruins of the old Cyclopean walls built around the city as a part of its fortifications. However, not much is known of the line of the twenty-eight kings believed to have come after Jarasandha.

Magadh reached the heights of spiritual renaissance in the sixth Century B.C., during the reign of King Bimbisar of the Haryanakakula dynasty, when both Gautama Buddha and Mahavir Vardhaman preached their doctrines. Indeed the new religious philosophies had such profound influence on the history of the country in the next few centuries that something more than a passing allusion is necessary even in a short historical note such as this.

Gautama Buddha

Siddhartha, a Sakya prince of Kapilvastu (in the Nepal Terai) was born at Lumbini about the year 566 B.C. He lived a life of princely comforts and luxury till the age of 29 when he came to realise the futility of mundane pleasures in a world besought with old age, disease and death. He then renounced the world and came to Rajgriha to learn at the feet of two learned Brahmins, Alara and Uddaka. But the study of Brahmanical *shastras* could not satisfy young Siddhartha who was determined to seek out a more satisfactory philosophy of life. He moved on to the modern Bodh Gaya, and sat in deep meditation under the now famous *peepal* tree. Eventually, on this spot he attained enlightenment and came to be known as Buddha, the enlightened one. He then proceeded to the Deer Park at Sarnath near Varanasi and began his preachings. He wandered about propagating his doctrines till his death forty-five years later. Buddha visited Rajgriha

*A portion of this anchal also lies in the Patna Sadar subdivision.

frequently and the sites of *Venu-van* (bamboo grove) and *Gridhra-Koot* (vulture's peak) are often associated with him in Buddhist literature. Emperor Bimbisar embraced Buddhism which flourished for several centuries. The first Buddhist synod was held in the *Sapt-parni* caves near Rajgriha in *Circa* 487 B.C. Buddha died in *Circa* 483 B.C.

Vardhaman Mahavir

Vardhaman Mahabir, son of a Jnatrika chief of Kundanpura, was a contemporary of Gautam Buddha. He also forsook the world when he was 32 years old, and preached the Jain doctrines for the rest of his life. According to the Jains, Mahavira did not find any religious system, but was the last of the twenty-four *Tirthankars* or "ford-makers across the stream of existence". He died at Pawapuri (in Patna district), a hallowed place of Jain pilgrimage, in *Circa* 478 B.C.

Pataliputra

Bimbisar was a powerful ruler. He annexed the kingdom of Anga with its capital at Champa, and entered into matrimonial alliances with Kosala and Vaishali. According to a Chinese pilgrim, the city of Rajgriha was built by him at an old site. Bimbisar was murdered for the throne by his son Ajatshatru, the founder of Pataliputra. Being faced with hostility of the rulers of Sravasti and also the Vrijjis and Lichchavis of Vaishali, Ajatshatru fortified the village of Pataligram which lay just south of the confluence of the Ganges and the Sone. This little village soon became the metropolis of the country and remained so for over four hundred years. Lord Buddha had prophesied, "of all famous places, busy marts and centres of commerce, Pataliputra will be the greatest, but three dangers will threaten it—fire, water and internal strife". Ajatshatru was succeeded by his son Udayi who transferred the capital of Magadh from Rajgriha to Pataligram which now came to be known by its more abiding name Pataliputra. This place was selected as the capital primarily because of its strategic location, facile river communication and more central position in the expanding empire of Magadh.

The Mauryas

After the fall of the Sisunag dynasty (*Circa* 400 B.C.), the Nandas came to power. They, in their turn, were replaced by the Mauryas. Chandragupta, the founder of the Maurya dynasty was a native of Magadh. He annexed the throne in 321 B.C. Chandragupta was an efficient administrator and wielded a considerable power. He successfully defeated the invading army of Seleukos Nikator, the Greek General of Alexander and king of Syria, in 303 B.C. and married his daughter. He extended his empire over a vast territory stretching from the Bay of Bengal to the Arabian Sea. Megasthenes was an ambassador to his court on behalf of Seleukos. He has left detailed accounts of the places, people, administration and customs of that period. According to his description of Pataliputra—

> "the city stood on the tongue of land formed by the confluence of the Ganges and Sone on the northern bank of the latter river, which then ran parallel to and at a short distance from the Ganges. Like the modern city under which it now lies buried, it was a long narrow parallelogram, 9 to 10 miles in length and $1\frac{1}{2}$ to 2 miles broad. It was defended by a massive wooden palisade pierced by 64 gates, crowned by 570 towers, and protected by a broad deep moat, filled from the water of the Sone which also served as the city sewer".

Megasthenes estimated the population of Pataliputra at four lakhs. The retinue of the king alone numbered several thousands.

Asoka

Asoka ascended the throne of Magadh in 272 B.C. After victory at the famous and fierce battle of Kalinga, he adopted Buddhism as his religion and Magadh became the centre of Buddhist missionary activities. It was during his regime that the third Buddhist synod was held at Pataliputra. In it the canons of the scriptures were settled and steps were taken to reform the abuses that had crept into the running of the monasteries. Asoka made vast improvements in his capital. A masonry wall was built around the city. Numerous stone buildings were erected replete with rich decorations. A hospital was constructed for the animals. Fa-hien visited the city in the fifth century A.D. when some of the buildings of the Asoka period were still standing. He viewed them with great wonder and wrote, "the royal palace and the halls in the midst of the city which exist now as of old were all made of spirits which he employed, and which piled up the stones, reared the walls and the gates, and executed the elegant carving and inlaid sculpture work in a way which no human hands in this world could accomplish".

With the death of Asoka began the decline of the Mauryan dynasty. Pataliputra also fell into comparative oblivion until the rise of the Guptas in the fourth century A.D. The Sunga period in between was rather uneventful.

The Guptas

Chandragupta I extended the kingdom of Magadh up to Allahabad and Pataliputra regained its lost glory. His son Samudragupta further extended the empire and transferred the capital to a more central place, though Pataliputra continued to be an important and a great city.

Fa-hien, a Chinese pilgrim who toured India in *Circa* 424 A.D. during the reign of Chandragupta II, the son of Samudragupta, found the city of Pataliputra in a prosperous condition. It was a centre of learning and visited by scholars from different parts of the world. The people were virtuous and there was justice all around. According to his description, "the nobles and the householders of this country have founded a hospital within the city to which the poor of all the countries, the destitutes, the cripples and the diseased may repair. They receive help of all kinds gratuitously; physicians treat them and order them food and drink, medicine or decoctions—everything in fact that may contribute to their ease".

Hiuen Tsang, another Chinese traveller who visited this country between 630 and 645 A.D. during the reign of Harsha, has left behind a more detailed description of the places seen by him. He visited Pataliputra and found the city deserted though the remains of splendid palaces were reminiscent of their glorious past. At that time there were hardly 1,000 houses in the city. Devastation was probably due to the invasion of the barbarous Huns in the latter half of the sixth century A.D. and of Sasanka, the king of Bengal. Sasanka was an enemy of Buddhism and he tried to uproot the religion. The persecution of the Buddhists did not last long for they got a patron in King Harshavardhan (600—648 A.D.). Although Pataliputra was in ruins when Hiuen Tsang visited it, Magadh continued to be the peaceful abode of the Buddhists. It was dotted with a large number of Buddhist *Vihars* or monasteries from which the State derived its present name. The Buddhist shrines attracted a large number of devotees and the monasteries were humming with life. The monastery at Nalanda sheltered thousands of Buddhist monks and was a world renowned centre of learning.

The Dark Age

After the death of King Harsha, Magadh entered into a period of dark age. It was immediately, after this event that a Tibetan-Chinese-Nepalese army invaded Magadh to take revenge against the earlier attack on a Chinese mission on way to meet Harsha who was no more. However, Madhavgupta's son Adityasena maintained independence of the region. But the north-eastern India was plunged into anarchy in the later days of the Guptas. This position ended with the rise to power of Gopal, who founded the Pala dynasty. Till then there was no king powerful enough to hold out the vast empire. Naturally, small independent kingdoms had sprung up. Gopal became the king of Bengal in 815 A.D. He was able to consolidate his kingdom and extend his hold over Magadh also. He made the town of Bihar his capital. His descendants were Buddhists and a number of Buddhist remains of today were erected during their regime (815 to 1200 A.D.). Gopal and his successors revived the glory of Magadh. Emissaries were sent to different parts of the country to spread the message of Lord Buddha. It was during this period that the Lamaism of Tibet was reformed by Atisha who had been educated in Magadh.

The Muslim Invasion

Sometime after 1193 but before 1200 A.D. Md. Bin Bakhtiar Khilji invaded Bihar. He invaded Oddantpuri (Biharsharif) and the monasteries at Nalanda. The Muslim invaders killed a large number of Buddhists. The massacre was so huge that Khilji did not find even a single monk to explain to him the contents of the Buddhist library. The monks and priests who could do so, escaped and fled to Tibet, Nepal and South India. Thus Buddhism was practically effaced from the land of its birth. With the conquest of Muslims over Magadh, the history of this land and other parts of South Bihar got merged with that of Bengal. The district of Patna formed part of the territory under the Bengal Viceroys till 1320 when emperor Ghiasuddin Tughlak separated it. The control of Bihar passed into the hands of the Sherqui dynasty of Jaunpur from 1394 to 1486. After this it was amalgamated with the Muslim kingdom of Gaur.

The Mughal Period

Babar, the first Mughal emperor, came to Maner in 1529 to curb the rebellious Afghan

chiefs. After Babar's death, Sher Shah defeated Humayun and seized power. On his way back from Bengal in 1541 Sher Shah passed through a small town on the southern bank of the Ganges. He was greatly impressed by the place and got a fort constructed there. This little town was none other than Patna. After the building of the fort, Patna again became a central place and Biharsharif lost its importance. Patna was soon a centre of trade and commerce. The Portuguese merchants visited the place in *Circa* 1520. Patna was described by Tavernier as a large town in Bengal most famous for its trade.

Daud Khan, an Afghan chief who became the Governor of Bengal in 1573, established his headquarters at Patna and Hajipur in view of the strategic importance of these two places. He was attacked in 1574 at Patna by the Mughal army commanded by Munim Khan but without any success. Emperor Akbar then moved to supervise the military operations. Hajipur was conquered by the Mughals, and eventually Patna. Hereafter Patna became the headquarters of the Mughal Governors and a centre of political activity. The town was raided in 1612 by Khusru, the pretender to Mughal throne, who proclaimed himself the emperor of India in the Governor's palace at Patna. His forces plundered the city. Patna was recaptured by Shah Jehan in 1622 during his rebellion against his father. Another Mughal prince Parwez Shah, son of Jahangir, ruled over the city. The still existing stone mosque known as *Pathar-ki-Masjid* was built by him in 1626.

Sherista Khan, uncle of Emperor Aurangzeb, became Governor in 1674. He was a fanatic Muslim and became so oppressive that he had to be recalled and substituted by Md. Azim, the third son of Aurangzeb. Azim was succeeded as the Governor of Bihar by Aurangzeb's grandson—Azim-us-Shah. In 1704 he named the city after himself as Azimabad. During his period the city progressed considerably. He endeavoured to make Patna a great city, second only to the imperial capital of Delhi. With this end in view he induced many nobles to come down to Patna and settle here. The nobles took up their residences in a Mahalla called Kaiwan Shekoh (the splendid palace). The Khawakoh Mahalla still exists and is only a corrupt name of the aforesaid locality. The clerks of the Mughal court lived in a locality named Dewan Mahalla. The Mughals had their residences in Mughalpura and the Afghan Lodies lived in Lodikatra. Azim-us-Shah got *serais* and alms-houses built for the poor and destitute. There still exist mahallas in Patna with the suffix 'Serai', presumably built around those very localities. Azim-us-Shah's efforts, however, did not entirely succeed on account of the war that broke out after Aurangzeb's death among the contenders to the throne. Azim-us-Shah himself was swallowed alive in quicks in the year 1712. Farrukh-Siyar, son of Azim-us-Shah came to Patna after his father's death. His cause was espoused by Hussain Ali Khan, one of the Saiyed brothers of Barah who played the role of king-maker in the 18th century, and who was also for sometime the Governor of Bihar. At Patna Farrukh-Siyar proclaimed himself the emperor of India and proceeded towards Delhi to occupy the throne. Many of the nobles who had come to Patna at the instance of Azim-us-Shah returned to Delhi in 1719. Muhammad Shah was set up by the Saiyed brothers to be the emperor. Fakhruddaula was then made the Governor of Bihar. He was a jealous person. He attacked the *jagirs* of the nobles, misbehaved with them and ousted them from the city. Their protestations to the court of Delhi were of no avail. On the fall of the Saiyed brothers, however, the oppressive Governor was removed and Bihar was once again merged with the *Subah* of Bengal.

Advent of the British

The first English trade mission to visit Patna consisted of Hughes and Parker who came in 1620 to purchase cloth and to establish a business house. But the heavy expense that would arise for the transport of articles from Patna to Agra (which was the original headquarters of the Company) and thence to Surat (which was the port of trade) made them desist from the venture as being uneconomic. A second attempt in this direction was made in 1632 when Peter Mundy was sent from Agra with eight cartloads of quicksilver and vermilion. However, Mundy was not favourably impressed with the opportunities for trade in the city.

It was only after the East India Company had firmly established itself in Bengal that the English again thought of setting up a factory

at Patna. A batch of pioneers came in 1650 and succeeded in founding a small settlement. By 1658 they had a factory on the other side of the Ganges opposite Patna for refining saltpetre. The factory was located on northern bank of the Ganges since the saltpetre grounds were situated there. In addition, the site was away from the seat of the Mughal Governor and therefore comparatively free from his interference. The English began as humble traders. The chief article of commerce was saltpetre which was in great demand all over Europe for the manufacture of gunpowder. They also traded in musk which was brought from Bhutan and sent to Agra for export to Persia and Venice. Drugs and cloth were imported from China and England respectively. The Company dealt in opium as well. Saltpetre was available in abundance at very cheap rate and the English trade flourished. The company acquired a fleet of boats and its commerce was chiefly carried on through the river Ganges. The Dutch had also come to Patna. They had a refinery for saltpetre at Chapra. They also traded in sugar.

The English and the Mughals

The flourishing trade of the English soon came to the notice of the Mughal Governor, Shaista Khan. He found that by paying a very small price for saltpetre they were exploiting the people; at the same time they were not contributing anything to the Mughal treasury. In 1681 he prohibited the purchase of saltpetre and imposed 3½ per cent duty on the company's goods. On their refusal to pay, he imprisoned Peacock, the chief of the English factory at Patna. This was the beginning of a difficult time for the Company which lasted over 30 years. During this period they had often to suspend their business and close their factories.

The Maratha and Afghan raids

The imperial throne of Delhi had become weak and several aspirants for power had begun to assert themselves. In 1740 Ali Vardi Khan defeated Nawab Sarfaraz Khan and became the master of Bihar and Bengal. Soon after, Patna was threatened by a Maratha invasion. In 1741 the fortification of the city was improved, the city wall was repaired and the moat outside was desilted to ensure protection to city dwellers. Mustafa Khan, the Afghan General of Ali Vardi Khan, laid siege to Patna in 1745 but was eventually defeated. The Marathas attacked in 1746 and the Afghans aided them but Ali Vardi Khan managed to repulse both of them.

In 1748 the Governor of Patna was assassinated and the city plundered by the Afghans of Darbhanga who came to Patna on the false plea of continuing negotiations for peace started earlier with the Governor. The Afghans raided city, dishonoured women and terrorised the people. For a few days until the arrival of Ali Vardi Khan there was a reign of terror in Patna. The Afghans eventually suffered a crushing defeat at Rabi Sarai near the present Railway Station of Fatwah.

Sirajuddaula, grandson of the Viceroy of Bengal, came to Patna in 1750 with a view to assuming independent power. The Governor refused to hand over the city to him and launched an attack with a band of 60 men. But the Governor was soon overpowered and had to flee taking shelter ultimately in a house in the suburbs.

In 1757 the English made Mir Jafar Khan, the Nawab of Bengal. He was escorted to Patna by an English force commanded by Robert Clive. Mir Jafar made Ram Narain, the Deputy Governor of Bihar. Ram Narain was a pious man and entertained *fakirs* and visited the tombs of the Muslim saints. But he spent much of his time with the dancing women of the city. This annoyed the nobles and they complained to Emperor Shah Alam, who came to Patna in 1759 to enforce his claim over the province. The English General of Patna left the city by boat with his countrymen. The Governor saw that in absence of any help from Mir Jafar he was incapable of resisting the army of Ali Vardi Khan and so he promised allegiance to Shah Alam. But he changed his stand when he learnt that the English forces were coming to his aid. Shah Alam then proceeded to Sasaram but was defeated by the English army. According to another account, Shah Alam retreated to Allahabad when he heard that Suja-ud-daula of Oudh had treacherously taken possession of the fort of Allahabad. However, it may have been, Shah Alam retreated but returned again. His forces met the combined army of the Governor of Bihar and the English and defeated them. Undaunted by the defeat the English, reinforced by an army under command of Mir Jafar's son Miran, faced Shah

Alam's army again. Although Miran's troops fled away after the conflict the English forces succeeded in driving out Shah Alam to Burdwan. Shah Alam returned again with fresh reinforcement and Jean Law, the French adventurer, to aid him. Law passed through Patna which was defenceless at that time (though unknown to him) and proceeded to Bihar. Shah Alam's attempt to ransack Patna again met with failure. Later in 1761 Shah Alam and Jean Law were defeated at Manpur near Gaya. In spite of their victory, the English came to terms with Shah Alam who was proclaimed the Emperor of India at Patna. Mir Kasim was then made the Nawab of Bihar, Bengal and Orissa.

Mir Kasim and the English could not remain on good terms for long and soon quarrels began. The English attempted to seize Patna but were forced by Mir Kasim to remain inside their factories. When their provisions ran short and they found that they could no longer remain there, the English officers left Patna on the 24th June, 1763 leaving their Indian forces behind. These abandoned forces felt insecure, became reckless and moved about plundering the city. Although the English officers had left the fort, they could not proceed very far by river because they were afraid of being intercepted by Mir Kasim's forces at Monghyr. Therefore, they moved up the Ganges instead to go to the Nawab of Oudh. However, they were overtaken near Manjhi in the district of Saran and brought back to be imprisoned at Patna.

Mir Kasim and the English were constantly at war. The Nawab's forces had been defeated at Katwa, Suti and Udhuanala. Mir Kasim came to Patna in October, 1763 when he was shocked to learn that his fort at Monghyr had surrendered to the English. Now that he was defeated and vanquished, he ordered complete annihilation of English at Patna. With the result about 198 Englishmen, women and children were butchered what came to be known as the great massacre of Patna. The cemetery near Patna City still contains a cenotaph commemorating these persons. Hearing of this massacre, the English forces under Major Adams hurriedly moved to Patna and laid siege to the city. After a great deal of fighting Mir Kasim lost on the 6th November, 1763 and escaped to the territory of the Vazir of Oudh. After he had gathered a large force, he came back with Shuja-ud-daula and attacked the city on the 3rd May 1764. But he was repulsed whereupon he retreated to Maner. On the 23rd October 1764 the English won a decisive victory at Buxar which made them masters of the lower provinces of Bengal.

1857

The next event of importance was the War of Indian Independence or the Great Mutiny of 1857, as it is sometimes called. The events in the upcountry had inspired the people of Bihar also and they prepared to overthrow the foreign yoke. The letters found in the house of Pir Ali, a book-seller at Patna, in the course of a search of his house on the 4th July 1857 confirmed that the rising was not a sepoy mutiny but a planned effort to free the country from foreign rule.

Tayler was then the Commissioner of Patna. On the 7th June 1857 he gathered the European residents of the town in his house in Chajjubagh so as to give them the necessary protection. He had heard that the sepoys at Dinapur would raise the banner of revolt that very night. Since the information had leaked out and the sepoys were aware of it, they decided to keep quiet for the time being. Dinapur on that date had only one European regiment, the 10th Foot and one company of artillery. But their strength increased with the arrival of Sikh reinforcements under Rattray. Everything appeared to be normal for sometime. On the 18th June Tayler invited three Wahabi Maulvi leaders and a few other respectable citizens to his house to discuss the defence of the city. The Maulvis were quite sincere and made sensible suggestions but Tayler had a different plan for them. As soon as the conference, which was held in his dining room was over, the Maulvis were arrested. Next day he ordered surrender of arms by the citizens and their remaining indoors after 9 p.m. The orders were obeyed. On the 3rd July, 60—70 Muslims marched with a green flag and band. The English anticipated violence and Rattray's Sikhs were ordered to move but Dr. Lyell, the Opium Assistant, rode in advance to overawe the processionists. His presence provoked the Muslim marchers and he was fired at. The Sikhs, however, arrived and the crowd dispersed. This was the first incident in the town. Next morning the entire city was searched. Some letters were found in the house of a book-seller, Pir Ali, which indicated widespread conspiracy. Many were arrested

and 14 persons were hanged the same afternoon.

The Indian sepoys at Dinapur were getting restive. Tayler wanted General Lloyd, who was in command of the military divisions at Dinapur, to disarm them. The General was hesitant, and at long last he recluctantly agreed to take away the percussion caps of the sepoys after the strength of the European troops had been increased by the arrival of two Companies of an English Regiment, the 37th Foot. On the morning of the 25th July after parading the English troops, he sent two bullock carts to the magazine to bring the percussion caps. The taking away of the caps was an insult to the Indian sepoys and as the bullock carts passed the sepoy lines on their return journey, the Indian soldiers rushed forward in their attempt to stop the caps from being taken away. The soldiers could be pacified with great difficulty. Though things appeared to be apparently quiet, the Indians could not tolerate the insult inflicted upon them. General Lloyd went for lunch on board a steamer. It had been arranged that in case of trouble two muskets would be fired in quick succession by the European guards at the hospital. At 1.30 the sound was heard and the European forces came out. But it was not actually the signal which had been given. The General, before leaving for the steamer had issued orders that caps actually in possession of the sepoys should not be taken away but this instruction was not followed. And when the sepoys were made to part with the caps in their possession they fired upon the officers. The sound of this fire was taken to be the signal previously arranged and, therefore, the European forces came out. And when the Europeans came within the sight of the Indian lines a grave confusion and uproar was created. To add further to the disorder some European soldiers opened fire. The signal was now actually fired but the war had begun. The Indian soldiers took to their arms, left their lines and marched towards Arrah to join the valliant Babu Kuar Singh.

On the 4th August Tayler was replaced by Sammuels. 200 British soldiers and two guns protected the city of Patna. The success of the freedom fighters in Gorakhpur and other places inspired the people. The Indian soldiers who had broken away from the British; moved about in the country-side. Several government thanas were stormed and destroyed. The English were not able to stop the activities of the rebels in *mufassil* areas, though Patna remained quiet. As is known to history, the struggle of 1857 ultimately failed and the English rule over the country continued for another ninety years.

3. PHYSICAL FEATURES

Natural Divisions

The district can be divided into three natural divisions comprising (*i*) a narrow strip of somewhat high land about 4 to 5 miles in width along the southern bank of the Ganges having very fertile soil, (*ii*) an elevated country in the south-east containing the Rajgir hills, and (*iii*) alluvial fertile plains in the remaining portions.

Topography and Hills

The Rajgir hills are the only natural eminences in an otherwise entirely alluvial and flat region. They form a part of the long range extending from near Bodh Gaya and terminating near Giriak. From Giriak begin two parallel ranges enclosing a narrow ravine. A little south of the present town of Rajgir, the parallel ranges broaden out and enclose a valley which was once upon a time the site of the ancient town of Raj-griha. The southern range runs in south-westerly direction. The northern range turns abruptly north and then to the south-west. The two ranges meet again beyond Baibhargiri and Sonagiri. The hills are not very high, the maximum altitude of 1,472 feet above mean sea level being reached near Hardiya hills on the eastern boundary of the district.

Rivers

The Ganges and the Sone are the two major rivers of the district. Those of lesser importance are the Punpun, the Phalgu, the Panchane and the Sakri. The greater part of the district is watered by streams which descend from the Chotanagpur Plateau to join the Ganges.

The Ganges, which runs all along the northern boundary of the district, separates it from the Tirhut division. It is the largest river of the district, entering it at its confluence with the Sone and flowing for 93 miles in easterly

directions upto Dumra. The Gandak joins the Ganges just opposite Patna. The river is so wide in this portion that Patna has sometimes been likened to a "port" on the Ganges which is, of course, navigable throughout the year.

The Sone, rising in the Maikal range near Amarkantak in the Deccan Plateau (which incidentally is also the source of another great river of India, the Narbada), and after traversing some 390 miles, touches the district of Patna at Mahabalipur from where it flows in northerly direction for 41 miles till it joins the Ganges. The river constitutes a natural boundary between the districts of Patna and Shahabad. It has a long rail-*cum*-road bridge at Koilwar. The river receives no tributaries in the district and is normally constituted of a narrow stream of water. In the dry season the river is a wide stretch of drifting sand with landlocked pools and narrow serpentine stream of water. During the rains, however, the river receives washings from the uplands in its earlier stages and generally overflows its banks, inundating the surrounding area. The floods thus caused are, however, of a short duration. The bed of the Sone constitutes an important source of house building sand.

The Punpun enters the district from the south at village Bauwan and flows in a north-easterly direction. It crosses the Patna-Gaya Railway line near Punpun Railway Station and joins the Ganges near Fatwah after flowing for 54 miles through the district. It is joined by the Morhar and the Dardha before it meets the Ganges.

Besides the important rivers mentioned above, the district has a large number of small rivers, rivulets and streams flowing through it. These are—

> Kardua, Bhutni, Baha, Sund, Donr, Mohana, Jalwar, Bagahi, Paimar, Panchane, Goithawa Kumari, Jirajan, Mahaich, Bari, Goga, Mohani, Chiraja, Dhowa, Nonai, Chirata and Mahatnai.

They provide water for irrigation and the washings brought by them have rendered the district extremely fertile.

Geology and Minerals

Except the Rajgir hills the geological formation of the entire district is alluvial built up with the alluvium brought down by the Ganges and deposited by it and its tributaries. The Rajgir hills consist of metamorphic schists and slate covered with quartzite. No mineral of any kind is found in the district. The hot water springs of Rajgir, are, however, said to contain rich radio-active elements.

Soil

Four kinds of soil are found in the district—*kewal, doras, balsundari* and *rehra*. The *kewal* soil consists of hard clay and is very suitable for growing rice. It has the capacity to retain moisture and is suitable for *rabi* cultivation also. The Mokameh *tal* consists mainly of this soil. As the *tal* is under water most of the time, only *rabi* crops are grown in it. The *doras* soil is formed of clay and sand mixed in almost equal proportions. On uplands near the homestead it is used for growing potatoes and vegetables. In fields, it yields both rice and *rabi* crops. *Balsundari* soil has a greater proportion of sand than clay in it. It produces *rabi* crops and spices. *Rehra* soil contains carbonate of soda in it and is not suitable for cultivation except where the soda content is very low.

Flora and Fauna

The land in the district is too fertile to be left for wild growth. So it is that except for some jungles in the Rajgir hills the district is devoid of any forest wealth of consequence. The total area under forest in the district was 18.05 sq. miles in 1959-60 which got reduced to 17.91 sq. miles in 1960-61. The forests constitute only 0.83 per cent of the total area of the district. Of late, some afforestation work has been taken up in the Rajgir hills.

The alluvial tract of land yields rice, sugarcane and other foodgrains. The area under cultivation is studded with mango orchards and bamboo clumps. In the fields adjoining the Ganges weeds such as *ammannia, utricularia, hygrophile* and *sesbania* grow. But palmyra (*borassus fibellifer*) and date palm (*phoenix sylvestris*), and mango orchards are found near habitations. Specimens of *tamarindus, odius, sapindus* and *moringa* also come to notice. One also sees village shrubberies, *glycosmis, clerodendron, solanum, jatropha, trems* and *streblus*. Dry shrub jungles are sometimes seen in the villages away from the rivers. Among other species found in the district are various *authistrial*

and *penniseta, evagrosties cynosuroides, saccharum spoutaneum, arundinella brasileusis, pipal* (*Ficusreligiosa*), and banyan (*ficus indica*). Trees seen are *bel* (*aegle marmelos*) *neem* (*melie azadirachta*), *siris* (*mimosa sirissa*), jack fruit (*artocarpus integrifolia*), and red cotton tree (*bambax malabaricum*).

Leopard, hyena, jackal, fox and wild cat are some of the carnivora found in the district, but their number is very small. Patna was once infested by wolves and in 1870 A.D. as many as 229 deaths occurred from wolf-bite. They vanished towards the end of the 19th century.

Climate and Rainfall

The district of Patna has an extreme type of climate. It is very hot in summer and cold in winter. The summer appears in April. The months of May and the first half of June are the hottest. During this period, a hot westerly wind containing 100 (heat-wave) blows. The high temperature and low humidity make the summer really oppressive. The easterly wind appears in the latter half of June bringing some relief. The monsoon also sets in towards the end of June or in early July bringing much-needed relief. The rainy season lasts upto September. The mercury begins to fall from October-end, but December and January are the really cold months.

During the last decade 1951—60, the highest temperature of 45°C (113°F) was recorded in 1953 in the month of June. Generally the maximum temperature in the district is near about 43.9°C (111°F) sometime in May or June. The average rainfall is heaviest generally in the month of August in which the number of rainy days varies from 10 to 14 and the actual rainfall from 10.41 to 13.30 inches. The months of October and November are quite pleasant, as there is neither too much heat nor too much cold.

4. COMMUNICATIONS

Roads

The district of Patna is well served by a network of roads. National Highway no. 31 passes through Dinapur, Patna, Patna City. While one branch goes to Barauni *via* Barh, another proceeds to Nawada *via* Bihar. Thus all the five subdivisional headquarters of the district are situated on this National Highway which provides the road link between North and South Bihar. It runs for about 125 miles in the district.

In 1961 there were over 300 miles of metalled road in the district in charge of the State Public Works Department. Besides improvements being effected on the National Highway, the following roads were also taken up for development :

(1) Bihar-Rajgir-Vanganga Road (going up to Hisua in Gaya district).
(2) Bihar-Barbigha Road.
(3) Bihar-Giriak Road.
(4) Bihar-Ekangarsarai Road (going up to Jehanabad in Gaya district).
(5) Bihar-Daniawan Road *via* Chandi (going up to Singriawon in Patna district).
(6) Mokameh-Barahiya Road.
(7) Mokameh-Sarmera-Barbigha Road.
(8) Sadikpur-Fatehpur-Masaurhi Road.
(9) Kankarbagh Road.
(10) Bankipore-Nadaul Road.

Bridges, culverts and causeways have been constructed on the important roads.

The following roads managed by the District Board were taken up for improvement during the last decade :

(1) Dinapur-Neura Road.
(2) Phulwari-Canon Bridge Road.
(3) Babhanpura-Rajghat Road.
(4) Dinapur-Naubatpur Road.
(5) Bihta-Kateshar Road.
(6) Masaurhi Bazar Road.
(7) Islampur Road.

Railways

The Main line of the Eastern Railway passes through the entire length of the district running parallel to the Ganges. There are three railway lines running across the district from north to south, *viz.*, the Patna-Gaya Branch line, the Fatwah-Islampur Light Railway, and the Bakhtiarpur-Rajgir Branch line. The last one has been converted into broad gauge

recently. Except the Light Railway, the other two are branches of the Eastern Railway.

The North Eastern Railway has a ferry service which connects the capital with the North Eastern Railway system serving the North Bihar.

Riverways

The Ganges is navigable throughout the year and there is considerable boat traffic for transporting cargo. The smaller rivers, *e.g.*, Punpun and Dardha become navigable only during the rains when they are used for transporting agricultural produce to the grain market at Fatwah.

Airways

Patna is connected by air to Calcutta and Delhi by daily flights. There is an aerodrome at Patna near Phulwarisharif, while a bigger one is under construction at Bihta.

5. DISTRICT ADMINISTRATION

General Administration

The District Magistrate and Collector is in charge of the civil revenue and criminal administration of the district. He is also the chief pilot of all development and welfare activities in the district. The Commissioner, Patna division exercises general supervision and control over him. The Collector is assisted by an Additional Collector and a District Development Officer, both of Additional District Magistrate's rank. A number of Deputy Collectors, Sub-Deputy Collectors and other officers are posted at the district headquarters to assist the Collector.

For general administrative purposes, Patna is divided into five subdivisions, each in charge of a Subdivisional Officer, who is drawn from the Indian Administrative Service or the Bihar Civil Service. Of these Patna City subdivision is the smallest (in the district as well as the State) with an area of 35 miles only. The Subdivisional Officer works under the direct control of the Collector. He is also assisted by a number of Deputy and Sub-Deputy Collectors.

Each subdivision is divided into a number of anchal-*cum*-development blocks. The district has 28 such blocks each in charge of an Anchal Adhikari, who is also the Block Development Officer. These officers belong either to the Bihar Civil Service or the Bihar Junior Civil Service. The Anchal Adhikari-*cum*-Block Development Officer is in charge of all revenue, development and welfare activities in the area and works under the direct control of the Subdivisional Officer. His services as a Magistrate are also utilised when a law and order situation arises. He has a team of workers drawn from various departments of Government to assist him in development works. As Anchal Adhikari, he is also the Chief Revenue Officer at the Anchal level and collects rent, cess and other miscellaneous dues of Government.

Judicial Administration

There is complete separation of executive and judiciary in the district. The District Judge, who is also the Sessions Judge for the Sessions Division of Patna, heads the judiciary. He is assisted by Subordinate Judges and Munsifs at the district and subdivisional headquarters. Additional Judges, Sub-Judges and Munsifs have also been posted to cope with the heavy load of judicial work.

Police Administration

The Superintendent of Police heads the police force in the district. He has his headquarters at Patna and works under the Deputy Inspector-General of Police, Central Range, Patna. He is assisted by a number of Deputy or Assistant Superintendents of Police (according as they are drawn from the Bihar Police Service or the Indian Police Service), Police Inspectors, Sergeants-Major, Police Sub-Inspectors and Prosecuting Inspectors. In every subdivision there is a Deputy or Assistant Superintendent of Police and below him, Inspectors and Sub-Inspectors of Police incharge of circles and police stations respectively. The total number of police stations in the district is 35 (including the town police stations). The Officer-in-charge of a police station is generally assisted in his work by a team of Sub-Inspectors, Assistant Sub-Inspectors, Literate Constables and ordinary constables. Chowkidars and Dafadars constitute the rural police force. Their duties consist of night patrol, watch over the movement of strangers and suspects, and reporting of crimes. Table ADM-III at page 161 of Part I gives the strength of police force in the district in each year of the decade 1951—60.

6. AREA, VILLAGES AND TOWNS

Area

The area of Patna district is 2,128 sq. miles (or 5,511 sq. kms.) according to the Bihar Survey and 2,164 sq. miles (or 5,605 sq. kms.) according to the Surveyor General of India. The small difference of about 36 sq. miles may be ascribed to the different methods of computation adopted by the two agencies.

The area of the district is much below the average area of a district (3,937 sq. miles) in the State. The Patna district accounts for only 3.2 per cent of the area of the State. Barring the three districts of Bhagalpur, Saharsa and Dhanbad, the area of Patna is smallest among the districts of State. Among the 328 districts in India, it ranks 232nd in area. It is about one and half times the area of Goa, Daman and Diu (3,706 sq. kms.) and more than three fourths the area of Sikkim (7,299 sq. kms.). Compared to some countries of the world, its area is more than one half of Cyprus (9,251 sq. kms.) and about one fifth of Albania (28,748 sq. kms.).

Villages

The term 'village' has the same meaning in census as a revenue *mauza*. The latter was defined in the Code of Census Procedure, 1961 as follows :

> "A *mauza* means a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of Cadastral Survey or at the time of the Revenue Survey. It may contain no houses at all or, on the other hand, several hamlets each bearing a different name."

There are 2,335 inhabited and 199 uninhabited *mauzas* in the district. 73 *mauzas* are wholly included in towns which number 10. The total of inhabited and uninhabited *mauzas* and *mauzas* wholly included in towns exceeds by 3 the number of *mauzas* borne on the Thana Jurisdiction lists (2,604). This is so because of the duplication of village Mohammadpur Nakatpura (Thana no. 164) in Bihar and Asthawan Anchals, of village Rajawan (Thana no. 168) in Rahui and Asthawan Anchals and treatment of Mahmuda, a hamlet, as an independent village in Asthawan Anchal. For fuller details, a reference may be made to the Introductory Note in Part II-A (page 15, paragraph 2) volume of the 1961 Census Publications for Bihar. Patna ranks 15th among the districts of Bihar in the number of villages. Dhanbad and Saharsa are the only two districts having lesser number of villages than Patna.

The average area of a *mauza* in the Patna district is 0.82 sq. mile which is slightly lower than the average for the State (0.85 sq. mile), but higher than the averages in the districts of Monghyr (0.80 sq. mile), Shahabad (0.72 sq. mile), Gaya (0.69 sq. mile), Dhanbad (0.68 sq. mile), Muzaffarpur (0.67 sq. mile), Bhagalpur (0.58 sq. mile) and Saran (0.55 sq. mile).

The average population per *mauza* in the district is 1,133 persons which is almost twice the State average of 588 persons. Compared to other districts of the State, the average in Patna is higher than other districts except Saharsa (1,272) and Darbhanga (1,196). These averages have been worked out by taking into account all the villages inhabited, uninhabited or included in towns.

The statement below shows the distribution of 1,000 inhabited villages by different size classes of population and the proportion of population in each size class per 1,000 of rural population in Patna and Bihar :

Villages in Patna district and Bihar State classified by population sizes, 1961

Villages with population of	Proportion per 1,000			
	Patna district		Bihar State	
	Villages	Population	Villages	Population
1	2	3	4	5
Less than 500 ..	369	111	627	216
500—999 ..	300	215	204	228
1,000—1,999 ..	221	305	113	247
2,000—4,999 ..	98	281	49	228
5,000—9,999 ..	10	60	6	68
10,000 or more ..	2	28	1	13

NOTE : Similar figures up to anchal level are given in Table A-III of Part II-A, Volume IV of the 1961 Census Publications of Bihar.

It follows that a little less than one third (32.6 per cent) of the rural population of Patna district live in small villages having less than 1,000 persons in each. The corresponding proportion for the State is as high as 44.4 per cent. Even in regard to number the proportion of small size villages in Patna (66.9 per cent) is much below the State average (83.1 per cent). The incidence of medium size villages (population 1,000 to 1,999) is higher in Patna both in number and proportion of population in them than the State. The same is true of large size villages (having 2,000 persons or more). The proportion of population in villages with 5,000—9,999 persons, however, is slightly less in Patna (6.0 per cent) than in the State (6.8 per cent).

There are only five villages in the district having more than 10,000 persons each. They are—

Village	Anchal	Thana no.	Population, 1961
1	2	3	4
1. Digha ..	Patna Rural	1	16,613
2. Kita-Chauhattar ..	Maner ..	6	16,072
3. Phulwari ..	Phulwari ..	35	12,262
4. Pundarakh ..	Pandarakh ..	10	11,836
5. Ramnagar Diara ..	Bakhtiarpur	314	10,292

The number of villages in Patna district having population of 5,000 or more is 27.

Towns

According to the definition adopted at the 1961 Census, a 'town' includes—

(*i*) every municipality or notified area;

(*ii*) all civil lines not included within municipal limits;

(*iii*) every cantonment; and

(*iv*) such other places which have (*a*) a population of not less than 5,000, (*b*) density not less than 1,000 persons per sq. mile, (*c*) at least three fourths of the adult male population engaged in non-agricultural livelihood, (*d*) which have been declared to be towns for census purposes by the Superintendent of Census Operations.

Towns are usually divided into six size classes according to their population. The district of Patna has 10 towns in all. These are distributed into the six size classes as under:

Towns in Patna district classified by their population size classes, 1961

Class	Population range	Towns	Population
1	2	3	4
I	100,000 or more	(1) Patna ..	364,594
II	50,000—99,999	(2) Bihar ..	78,581
III	20,000—49,999 ..	(3) Mokameh ..	35,743
		(4) Dinapur Nizamat	35,159
		(5) Khagaul and Dinapur Railway Colony.	20,549
IV	10,000—19,999	(6) Barh ..	18,808
		(7) Dinapur Cantonment.	15,058
		(8) Fatwah ..	11,823
V	5,000—9,999	(9) Rajgir ..	9,033
VI	Below 5,000	(10) Bakhtiarpur ..	4,548

Bakhtiarpur has been treated as town for the first time in 1961. The capital city of Patna has a municipal corporation, while Bihar, Dinapur Nizamat, Khagaul and Barh have municipalities. Notified area committees exist in the towns of Mokameh and Rajgir. Because of their proximity and inter-dependence in socio-economic matters, Dinapur Nizamat, Khagaul including Dinapur Railway Colony, and Dinapur Cantonment have been treated as one town group with a combined population of 70,766. The concept of town group is one of the innovations of the 1961 Census. For a further understanding of this concept, reference may be made to the chapter on Urban Population in the General Report (Part I-A) of the 1961 Census.

7. POPULATION

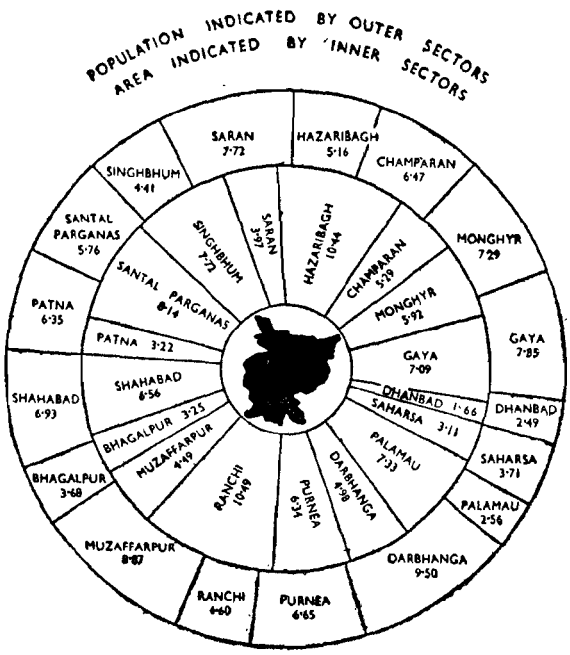

General

At sunrise on the 1st March, 1961 the district of Patna had a total population of 2,949,746 persons. The figure is somewhat higher than the average for a district (2,732,683 persons) in the State. Comprising 6.35 per cent of the State's population, Patna ranks ninth in

population. The districts having larger populations than Patna are Darbhanga, Muzaffarpur, Gaya, Saran, Monghyr, Shahabad, Purnea and Champaran. Among the 328 districts of India, Patna occupies 22nd place in order of population. Compared to some countries of the world, the district of Patna has higher population than that of Ireland (2.8 millions, 1961) or New Zealand (2.4 millions, 1961); it is more than one third of Ghana (6.7 millions, 1960) and over one fourth of Nepal (9.4 millions, 1961).

Population figures for each anchal and town in Patna district are given in Table A-I at page 7 of Part I of this book. The diagram below compares the proportions of area and population in different districts in Bihar:

PERCENTAGE OF POPULATION AND AREA OF DISTRICTS

Distribution of Population

Among the five subdivisions of the district, Bihar is the most populous with 33.16 per cent of the district population. On the other hand, the Patna City subdivision is the least populous containing a mere 6.39 per cent of the district population. The three other subdivisions, viz., Patna Sadar, Dinapur and Barh account for 19.05, 20.85 and 20.55 per cent respectively of the district population.

Variations in the distribution of population among the anchals are wider still. The Patna Rural anchal falling both in the Patna Sadar and Patna City subdivisions and including the Patna Municipal Corporation area emerges as the most populous anchal in the district with a population of as much as 428,042 persons. On the other hand, Sarmera anchal with a population of 40,284 only is the least populous. Besides the Patna Rural anchal, the following 12 anchals in the district also have populations exceeding one lakh in each case :

Name of anchal	Population	Name of anchal	Population
1. Bihar ..	154,583	7. Mokameh	115,137
2. Rajgir ..	133,560	8. Barh ..	114,824
3. Dinapur-*cum*-Khagaul	132,566	9. Phulwari ..	103,826
4. Fatwah ..	124,582	10. Hilsa ..	103,672
5. Chandi ..	122,412	11. Asthawan..	103,362
6. Bikram ..	117,839	12. Paliganj ..	100,312

The average population of an anchal in the district is 105,348. 9 out of 28 anchals have populations above the district average. They contain as much as 48.94 per cent of the district population.

Density of Population

With an average density of 1,386 persons per sq. mile, Patna is the most densely populated district in the State. Its density is almost double that of the State average (694 per sq. mile) and about four times the all India average (358 per sq. mile). There are only 7 districts in India having higher densities of population than Patna. Of them, four districts are in Kerala (Alleppey, Trivandrum, Ernakulam and Trichur), two in West Bengal (Howrah and Hooghly), and one in Madras (Kanya Kumari).

Dinapur is the most densely populated subdivision (1,368 per sq. mile) in the district. It is followed by Patna City* (1,264), Patna Sadar* (1,261), Bihar (1,234) and Barh (1,050).

No anchal in the district has lower density of population than the State average (694). The Patna Rural anchal (which includes the urban population of Patna Municipal Corporation) has the highest density of population (7,255 per sq. mile). The Dinapur-*cum*-Khagaul

* Excluding the Patna Municipal Corporation area.

(2,544) and Bihar (2,270) anchals follow next in order of density. It may be noted that these two anchals also include urban areas. Besides these, as many as 9 anchals in the district have densities varying between 1,250 and 1,500 persons per square mile. These are : Phulwari, Barh, Rahui, Noorsarai, Bihta, Naubatpur, Asthawan, Fatwah and Hilsa. 10 others have densities between 1,000—1,250. There are only six anchals in the district having densities less than 1,000 per square mile. These are : Harnaut (992), Islampur (959), Mokameh (883), Rajgir (878), Pandarakh (840) and Sarmera (770). Of them, Pandarakh, Mokameh and Sarmera lie in the *tal* area and Rajgir contains considerable areas of forests and hills.

Growth of Population

The following table delineats the growth of population in Patna district since 1872. Percentage variations in the State population have also been indicated alongside for comparison :

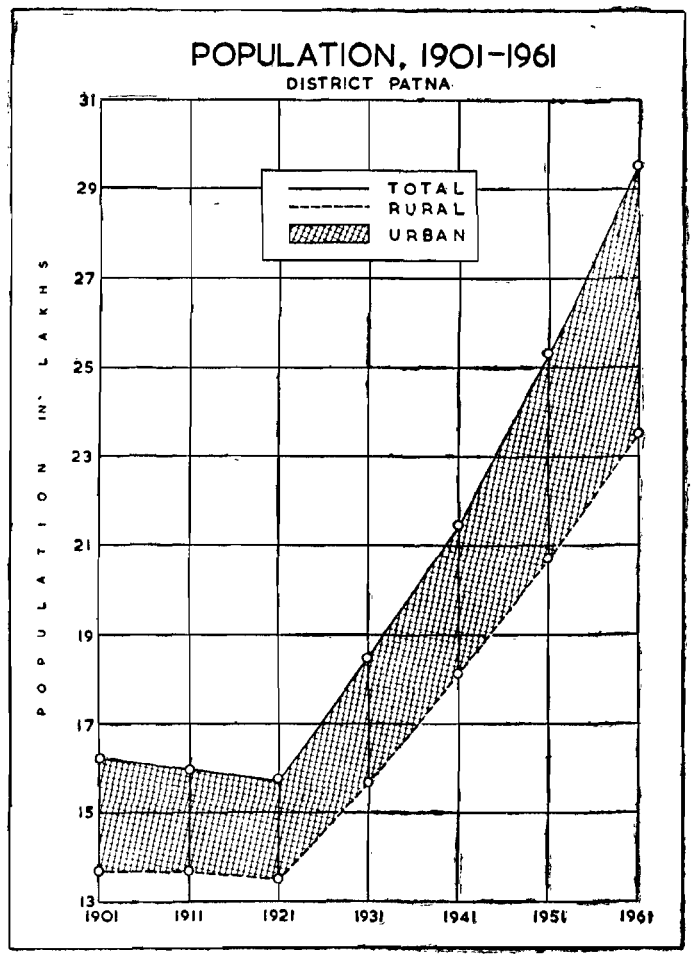

Growth of population in Patna district and Bihar State, 1872—1961

Year	Population	Variation	Percentage variation	
			Patna district	Bihar State
1	2	3	4	5
1872 ..	1,555,774*			
1881 ..	1,755,416	+199,642	+12.83	+15.56†
1891 ..	1,772,191	+16,775	+0.96	+5.94†
1901 ..	1,624,231	—147,960	—8.35	+0.22†
1911 ..	1,608,674	—15,557	—0.96	+3.67
1921 ..	1,576,879	—31,795	—1.98	—0.66
1931 ..	1,846,474	+269,595	+17.10	+11.45
1941 ..	2,144,552	+298,078	+16.14	+12.20
1951 ..	2,528,272	+383,720	+17.89	+10.27
1961 ..	2,949,746	+421,474	+16.67	+19.77

*Unadjusted for changes in territory after 1921.

†Unadjusted for changes in territory after 1951.

The diagram below depicts the growth of total, rural and urban populations of the district since 1901 :

The population of the district has nearly doubled within the last ninety years. The bulk of the increase has, however, taken place only after 1921. In fact, the net addition to the population during the five decades preceding 1921 was less than one twelfth of the increase even during the decade 1921—31. The following excerpt from the Census Report of 1951 gives a succinct account of the trends and the factors operating behind the growth of population during the entire period 1872—1951 :

> "This district returned a population of 1,555,774 at the census of 1872. The next census showed an increase of

196,860 or 12.7 per cent. Much of this increase was illusory and should be attributed to better enumeration in the second census. The 1891 census showed that the population was more or less stationary, the net increase being just below 1 per cent. In the next decade (1891—1900) the population fell by 8.4 per cent. Public health was unsatisfactory in 1892, 1894 and 1896 and there were short crops in 1891 and 1896. There was a serious outbreak of plague epidemic in January, 1900 and it appeared with renewed vigour in 1901 on the eve of the census. The plague took a heavy toll of lives and also caused a heavy exodus from the district. The census arrangements were also disorganised to some extent by the appearance of plague. It might be mentioned that this district did not suffer from famine in 1897. During the next 10 years (1901—10), plague continued to levy a heavy toll year after year; epidemics of cholera were also frequent; there was partial failure of crops in three years, and the river borne trade was declining fast. The census of 1911 disclosed a fall in population of 1.0 per cent. There was a large influx of labourers from other districts in the Mokameh *tal* for harvesting of *Rabi* crops at the time of the census and but for this the fall registered at the census would have been larger. The population decreased further by 2.0 per cent also in the 1911—20 decade. The last serious outbreak of plague was in 1911, but it was present in a comparatively mild form also in other years. There were outbreaks of cholera epidemic in 1911, 1913 and 1917. In 1918, came the influenza epidemic, there were also epidemics of plague and cholera and the district was in the grip of scarcity due to a more or less complete failure of principal crops. The number of emigrants had fallen during this decade by over 30,000. The real loss in population was, therefore, greater than what is indicated by the percentage variation figure. In the 1921—30 decade there were virulent outbreaks of both cholera and plague in 1921 as also a large number of deaths from fever. After 1921, however, there was neither a severe epidemic of cholera nor of plague. There was also an appreciable reduction in the death rate from fever. Economic conditions were satisfactory throughout the decade. Crops were satisfactory in all years except 1923 when crops of the Dinapur subdivision were damaged by a severe flood. There was also increase in the number of immigrants and though separate immigration figures for the district are not available, there are good reasons for concluding that there was considerable decrease compared with the earlier decade. The 1931 census disclosed an increase of 17.1 per cent in the population of the district. The largest increase (33 per cent) occurred in Patna City but there was no revenue thana in which the increase in population was less than 10 per cent over the 1921 total. In the next decade (1931—40), public health conditions were even better than during 1921—30. Plague had disappeared completely. There were mild epidemics of cholera in 1930 and 1934 and a further fall in the fever death rate. The *Bhadai* harvest was deficient in 1934 and crops were damaged due to floods in some parts of the district in 1936, 1937 and 1938. On the whole, however, economic conditions were satisfactory throughout the decade. The 1941 census showed an increase of 16.1 per cent over the 1931 total, there being large increases in all revenue thanas except Mokameh which had suffered flood damage almost year after year. In the last decade (1941—50), cholera appeared in epidemic form in 1944, 1945, 1947 and 1948 and was also present in other years, but the mortality caused was not large. There were fewer deaths from small-pox and fever than in the earlier decade. Except in 1950 when all principal crops suffered due to want of rain during September to December, crops were normal or better than normal in the remaining years. The 1951 census has revealed an increase of 17.9 per cent in the population. The greatest increase in population has occurred in the Patna urban area, and Phulwari and Maner thanas but as the following statement shows, substantial increases have taken place also in all the remaining thanas, except Mokameh where a very extensive area remains submerged

under water for several months in the year :

District, Subdivision and Revenue Thana	Population 1951	Percentage variation 1941—51	1931—41	Density 1951
PATNA ..	**2,528,272**	**17.9**	**16.1**	**1,195**

Barh ..	307,063	21.2	14.1	1,041
Mokameh ..	115,851	1.0	7.3	646
Bihar Subdivision ..	**834,390**	**11.5**	**14.8**	**1,066**
Bihar ..	491,426	11.2	15.4	1,125
Hilsa ..	272,806	12.0	31.6	1,045
Islampur ..	70,158	11.6	25.2	830

A substantial part of the increase in the population of the Patna district is due to immigration from outside. No less than 180,189 persons born in other districts were enumerated in the district of Patna in 1951. This is in excess of the 1931 figure by 56,654. The actual difference, however, must be larger because in 1931, even casual visitors to Patna, whose number is by no means small, were included in the count, while on this occasion they were enumerated at their normal places of residence."

The rate of growth during the last decade (1951—61) was almost at par with the growth rates during each of the previous three decades. However, the rate of growth at 16.67 per cent during the last decade is considerably lower than the State average of 19.77 per cent. In fact, except Saran, Santal Parganas and Ranchi, the growth rate in Patna in the last decade is the lowest among the districts of Bihar.

One of the factors having an important bearing on the growth of population in Patna district is migration which is dependent upon general economic conditions prevailing in the district and outside. It is generally found that there is outward movement of population in search of employment from economically backward areas. The trend is reversed when there is affluence at home. Unfortunately, a complete picture of migration trends at the district level is not available, for data relating to inter-State emigration by the district of origin are not available for any census except 1921. However, some indication of the general trend can be had from the figures relating to inter-district migration within the State. The district of Patna with the State capital in it has always attracted large number of people from other parts of the State as well as outside. In 1951, the number of immigrants to Patna from other districts of the State outnumbered the emigrants from Patna to other districts of the State by 57,428. This difference was reduced to 50,728 only in 1961. This may be one of the reasons for relatively lower rate of population growth in Patna district during the last decade.

Areas of comparatively slow rate of growth of population in the last decade can be easily pinpointed in the table below showing relevant figures for the district, subdivisions and anchals :

Per cent variations in the population of subdivisions and anchals of the Patna district, 1951—61

District/Subdivision/ Anchal	Population 1951	Population 1961	Variation	Percentage decade variation

28. Islampur ..	70,158	82,303	+12,145	+17.31

NOTES : (1) 1951 populations of anchals have been taken from the E-Summary Tables of 1951 Census. Where a police station of 1951 has been split into two or more anchals, the 1951 population of the police station has been distributed among the anchals in the same proportion as in 1961.

(2) Population of the entire Patna Municipal Corporation including the Pataliputra Colony has been included in the Patna Rural anchal.

(3) The Patna Rural anchal falls within the jurisdiction of both the Patna City Subdivision and the Patna Sadar Subdivision.

The map at page XVIII shows the percentage variations of population in different anchals of the district during 1951—61.

The population of the Patna Sadar subdivision has increased by 20.46 per cent in the last decade which is much above the district average of 16.67 per cent. The Bihar subdivision has registered a lower rate of increase (17.23 per cent), though still higher than the district rate as such. The population in the other three subdivisions, viz., Patna City, Dinapur and Barh grew at much slower pace, viz., 16.45 per cent, 15.28 per cent and 13.93 per cent respectively.

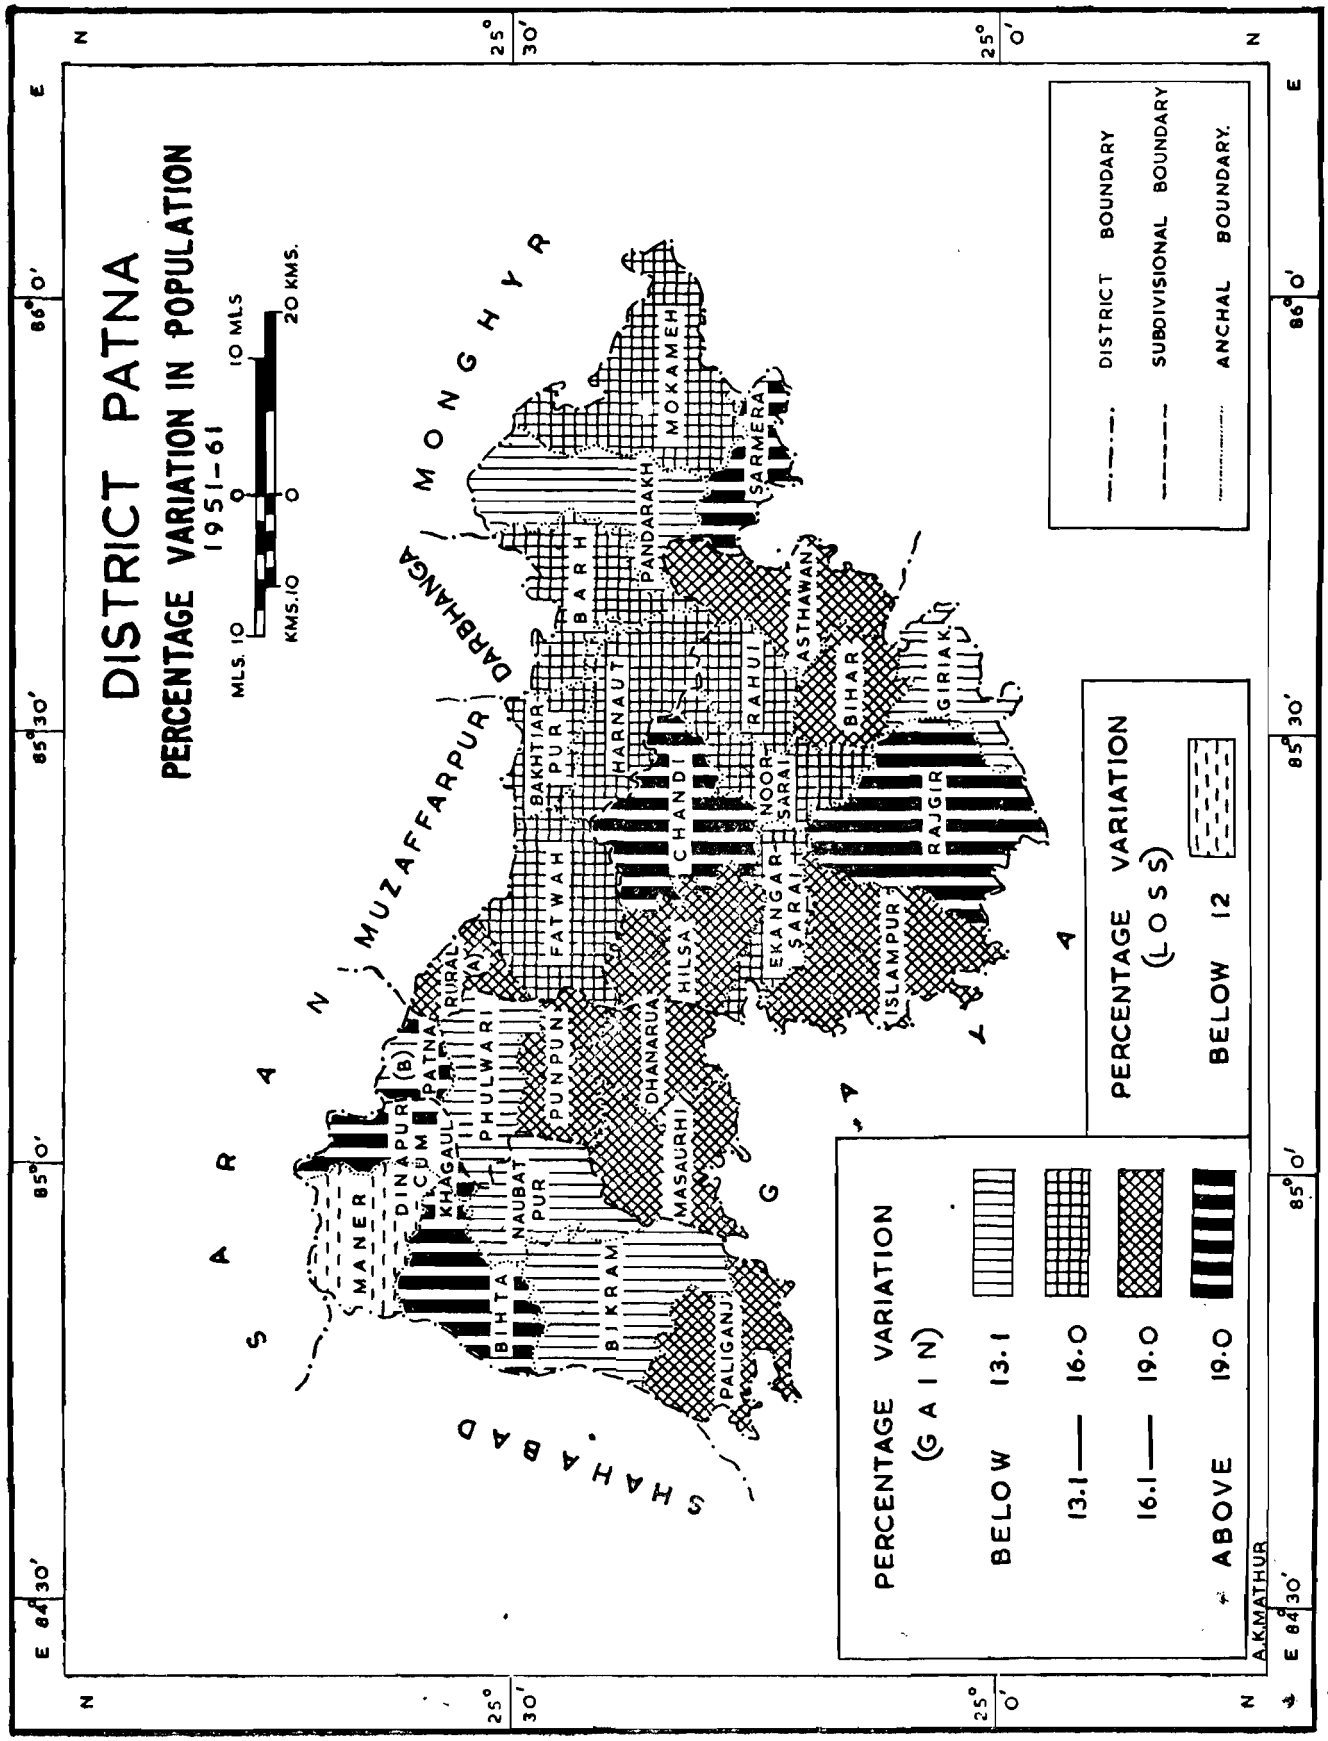

Among the anchals, Bihta has shown the highest rate of growth (58.61 per cent). Three other anchals, viz., Patna Rural (24.00 per cent), Sarmera (21.33 per cent) and Chandi (20.15 per cent), have also shown more than 20 per cent increase in population. Of the remaining 24 anchals, 12 anchals have registered growth rates varying between 15 and 20 per cent, and 9 others varying between 10 and 15 per cent. Two anchals, viz., Pandarakh (8.21 per cent) and Phulwari (7.83 per cent), have each shown less than 10 per cent increase. Curiously enough, the Maner anchal has actually suffered a decline of 11.55 per cent.

The Rural Population

79.87 per cent of the population of Patna district is rural. The proportion of rural population in this district is much lower than the corresponding proportion in the State (91.57 per cent). The statement below compares the per cent decade variations of rural and total populations and proportions of rural population to total population in Patna district and Bihar State during 1901—61 :

Per cent variations in and proportions of rural population in Patna district and Bihar State, 1901—61

It is significant that the growth of rural population in the Patna district after 1921 has always been tardier than that of total population. It is due to the fact that the growth of urban population in the district has been much faster than its rural counterpart. It is also noteworthy that the proportion of rural population has been declining at each census since 1921. A comparison with the corresponding proportions for the State will reveal that the extent of urbanisation in the district of Patna has always been higher than the State as a whole.

The Urban Population

Patna has an urban population of 593,896 comprising 20.13 per cent of the district population. The corresponding proportion for the State is 8.43 per cent, and for the country 17.97 per cent. Thus, Patna is ahead of both the State and the country in the matter of urbanisation. In Bihar, only two other districts, viz., Dhanbad and Singhbhum, have higher proportions of urban population (25.02 per cent and 21.50 per cent respectively) than Patna. The statement alongside gives the proportions and rates of growth of urban population in Patna district and Bihar State during the period, 1901—61.

Trend of urban growth in Patna district and Bihar State, 1901—61

Year	Patna district			Bihar State		
	No. of towns	Per-cent decade variation in urban population	Per-cent of urban population to total population	No. of towns	Per-cent decade variation in urban population	Per cent of urban population to total population
1	2	3	4	5	6	7
1901	6	..	15.25	55	..	3.99
1911	6	—6.00	14.47	57	—1.92	3.78
1921	6	—5.99	13.88	63	+9.03	4.15
1931	8	+28.80	15.27	66	+22.00	4.54
1941	9	+24.34	16.35	82	+32.99	5.38
1951	8	+30.59	18.11	103	+37.07	6.69
1961	10	+29.73	20.13	153	+50.94	8.43

NOTE : Only those towns of previous censuses have been considered which were towns in 1961 also.

During the first two decades of the present century there was a steady decline in the urban population of the district. After 1921 the position has changed but it is noteworthy that the rate of urban growth in Patna has been slower than that of the State in each decade except 1921—31.

The statement below traces the growth of population of individual towns of Patna district since 1901 :

Growth of population of individual towns in Patna district, 1901—61

NOTES : (1) Patna New Capital which was treated as a separate urban unit in 1941 having population 20,709 (12,735 Males, 7,974 Females) was merged with Patna Municipal Corporation in 1951. The combined population of Patna and Patna New Capital for 1941 has been shown against Patna Municipal Corporation.

(2) Dinapur Cantonment having population of 10,841 (5,939 Males, 4,902 Females) in 1901, 9,959 (5,655 Males, 4,304 Females) in 1911, 9,210 (5,373 Males, 3,837 Females) in 1921 and 13,514 (8,068 Males, 5,446 Females) in 1951 was treated as part of Dinapur. The combined population of Dinapur Municipality and Dinapur Cantonment for 1901, 1911, 1921 and 1951 has been shown against Dinapur Nizamat Municipality. In 1931 and 1941 Dinapur Cantonment was treated as separate urban unit.

(3) It seems that the figures for Mokameh and Barh were wrongly interchanged in the 1951 Census tables. This mistake has been corrected in the present table.

(4) Figures below the absolute figures indicate the per cent increase (+) or decrease (—) during the dacade.

(M.C.)—Municipal Corporation (M)—Municipality (N)—Notified Area

This district has ten towns. Its total urban population of 593,896 in 1961 is the largest among the districts in the State. It has enjoyed this position at every census since 1901.

Patna, the headquarters of the district as well as the State, is the largest city of Bihar, though its place among the cities of India is as low as twenty-first. Its population as returned in 1961 is 364,594. This city had a rich past but its importance declined during the medieval period. In early nineteenth century Buchanan Hamilton (1807—14) estimated its population as 312,000. At the census of 1872, however, it returned a population of 158,900 only. It seems that there were large omissions at this census and the actual number was perhaps more. At the next census (1881) the population returned was 170,654. Between 1881 and 1921 the population of Patna was almost continuously on the decline due mainly to decrease in the river-borne trade, persistent unhealthiness and repeated epidemics of plague. The population recorded in the census of 1911 was 136,153 which marked a slight increase over the 1901 population of 134,785; but the 1901 figure was admittedly low because of the virulent plague which was raging at the time of census. A re-count made six months later disclosed the population of this town as 153,739. In 1921 the population of Patna was at its lowest (119,976). It had continued to fall in the decade 1911—21 in spite of the fact that the New Capital area had been set up consequent upon the designation of the city as the capital of the newly created Bihar province. Perhaps, the figures of 1921 were to some extent affected on account of the Non-co-operation Movement. Since 1921, however, the city has enjoyed steady and rapid growth. In 1931 its population stood at 159,690, an increase of over 33 per cent attributable mainly to the rapid development of the New Capital area and Bankipur area, extension of the University and large influx of immigrants. In the following decade (1931—41) also, the increase continued but at a slower pace (23 per cent). The highest decadal increase in the present century, however, occurred in 1941—51

when the population increased by 44.33 per cent. This perhaps reflected the rapid expansion of Government and Semi-Government agencies no less than the beginnings of a developing urban economy and extension of trade and industry in the post-war and post-independence era. In the last decade (1951—61), the trend has been maintained though the rate of percentage increase has gone down to 28.61. In absolute numbers, however, the increase in the last decade is not very much less than the previous decade. That the rate was not higher is presumably due to the fact that Patna owes its importance mainly as an administrative and educational town. It can hardly boast of any significant development in the industrial or commercial sector in the decade. There is little wonder that the pace is not faster. A part of the increase has been caused by the extension of the territory included within Patna. In 1911 its area was mentioned as 9 sq. miles. It increased to 16.50 sq. miles in 1951 and 22.33 sq. miles in 1961. It may be noted, however, that in 1961 the immigrants constituted as much as 41.66 per cent of the city's population.

Bihar or Biharsharif as it is often called, is the next important town in the district. It had a population of 45,063 in 1901 which decreased to 35,151 in 1911 due to prevalence of plague, a condition which seems to have offset even the benefits of rail-link (by light railway) with Bakhtiarpur during this decade. There was a small increase of about 1,600 in 1921 but the pace continued to be sluggish till 1931 when its population of 46,994 was only a little more than that of 1901. After 1931, however, the growth has been rapid. The population increased to 54,551 in 1941 and 63,124 in 1951. The highest increase has, however, occurred in the last decade which has pushed its population to 78,581, an increase of over 24 per cent. Bihar town is developing fast into an important transport and marketing centre for potatoes and several cold storages have been set up in recent years.

The Dinapur Town-group consists of three towns—Dinapur Nizamat, Khagaul including Dinapur Railway Colony, and Dinapur Cantonment. These are all located within a few miles of Patna and in several ways form part of it. Their combined population in 1961 was 70,766. Sixty years earlier, the corresponding figure was 41,825. Except in 1911 the population has been progressively increasing. The gradual expansion of the railway administration at Khagaul and the location of the Army camps and the Bihar Regimental Centre in the Dinapur Cantonment seem to have contributed towards such growth. The decrease in the population of Dinapur Nizamat from 42,684 in 1951 to 35,159 in 1961 was apparently due to a redefinition of the urban jurisdiction which reduced its area from 11.50 to 4.96 sq. miles.

Mokameh is the only town in the district to have shown increase of population in the first two decades of the century. From 13,861 in 1901 its population increased to 15,363 in 1911, an increase of 10.8 per cent attributed to its growing importance as a trade centre and railway junction through which the grains traffic of the North Bihar districts passed. The increase in 1911—21 was nominal but significant if it is remembered that in this decade the general population of the district as well as the State suffered considerable decline due to the great influenza epidemic and that public health conditions in Mokameh town could not have been much better. The population, however, decreased from 15,663 in 1921 to 14,260 in 1931. This is believed to have been partly due to a shifting of some of the railway offices to Khagaul. In 1941 its population increased again to 19,984 presumably because of the establishments of a number of depots and other centres in connection with the World War II, though these units were no longer existing in 1951. There was further increase and its population 29,308 that year was more than double its population only twenty years ago. Mokameh town is an important trading centre with a big hinterland rich in its *rabi* crops. In 1961 its population stood at 35,743. Besides, the establishment of certain industrial units for tannery, leather goods and engineering goods, a vast organisation was set up at this place for construction of the bridge across the Ganges.

Like other towns in Bihar the population of Barh also declined from 12,164 in 1901 to 8,464 in 1921. In the following two decades its population increased though the rate of growth was slightly lower than the district rate for general population. There was a nominal loss of population in 1951. In 1961, however, its population has grown to 18,808 which marks an increase of over 69 per cent in the last decade. This seems to have been primarily due to changes in extent of the urban area which has increased from 2.90 sq. miles in 1951 to 4.50 sq. miles in 1961.

Fatwah town entered the urban list in 1931 with 9,393 persons. In 1941 it showed a sudden spurt with a population of 19,411. In the following decade, however, the population dropped to a mere 8,482. The exact reasons for such wide fluctuations are not clear. The 1961 population is 11,823. It marks an increase of nearly 40 per cent in the last decade. There has been no special development and the increase seems to be due mainly to the increase in area.

Rajgir, the ancient capital of Magadh, was included in the urban list for the first time in 1951. It then had a population of 3,870 only. Its population in 1961 is 9,033, which marks an increase of over 133 per cent. This again is due to the inclusion of a surprisingly large area within the notified jurisdiction of the town. Rajgir town has an area of 22.10 sq. miles which is slightly bigger than the municipal area of Patna.

The only remaining town in the district is Bakhtiarpur which has been elevated to urban status in the present census. It returned a population of 4,548 in 1961. It is fast growing into an important transport centre.

8. MIGRATION

In Indian census, migration is determined solely with reference to the place of birth. Thus a person, born at a place other than the village or town of enumeration, is *ipso facto* treated as a migrant. According to a custom prevalent in many Hindu families married women prefer to have the first confinement in their parental homes. After delivery they return to their husbands. It is obvious that all children born in such circumstances must figure as migrants in census returns though, for all practical purposes, they might not have moved at all from their places of normal residence after birth. Similarly, most women after marriage leave their parental homes and start living with their husbands. Village exogamy is the general rule, particularly among the Hindus. Thus, most married women become migrants in terms of census, though the movement involved in their case is entirely fortuitous. On the other hand, a person may have been away all his life but he will not figure as a migrant if at the time of enumeration, he had returned to his place of birth. Such cases are, however, uncommon and it can be said definitely that the birth place concept of migration has a tendency to exaggerate rather than underestimate the movements of population.

Non-migrants are persons who were born at the places of their enumeration. Migrants, on the other hand, are persons who were born at places other than those of their enumeration. They can be classified into the following categories on the basis of their birth place :

(*i*) Born elsewhere, but within the district of enumeration.	Intra-district
(*ii*) Born outside the district but in other districts of the State.	Inter-district
(*iii*) Born outside the State but in other States of India.	Inter-State.
(*iv*) Born outside India ..	International.

The distribution of population enumerated in the Patna district in 1961 by their places of birth is given in the following statement :

Distribution of population in Panta district by their birth place, 1961

(*Figures within brackets indicate percentages*)

Birth place	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

*Includes birth place 'Unclassifiable'.

70.08 per cent of the population in Patna district was enumerated where born. The corresponding proportion for the State was 69.31 per cent. Those born elsewhere in the district comprised 21.03 per cent or a little over one fifth of the population. Immigrants to the Patna district from other districts of the State comprised 7.56 per cent of the district population, while those coming from other States of India accounted for 1.09 per cent only. Immigrants from 'other countries beyond India' accounted for a mere 0.24 per cent.

As explained earlier, the bulk of migration among females is due to their movement consequent upon marriage. Thus, while 85.34 per cent of males in Patna were enumerated at the place of their birth, the corresponding proportion among females was only 53.80 per cent and a considerable portion of them no doubt comprised unmarried girls. Marriage migration among females is, however, largely confined to places within the district. Thus, 88.70 per cent of females in the Patna district belonged to this district itself.

It may be of interest to ascertain the extent of immigration to, and emigration from, Patna in relation to other districts of Bihar. The statement below gives the number and distribution per 1,000 of each separately for males and females :

Number of immigrants to, and emigrants from, Patna district to other districts of Bihar, 1961

(*Figures within brackets give the distribution per* 1,000)

Singhbhum	340 (4)	355 (2)	Singhbhum	5,187 (87)	3,086 (27)

The six adjoining districts (Gaya, Shahabad, Saran, Muzaffarpur, Darbhanga and Monghyr) account for 93.9 per cent of female and 88.3 per cent of male immigration from other districts to Patna. No non-adjoining district contributes even 3 per cent of such immigrants. The proportions among females are even less. So far emigration from Patna is concerned, Gaya, Dhanbad and Monghyr are the districts providing the main outlet. Taken together, they account for more than two fifths of emigrants from Patna. Births and marriages must be important factors influencing the emigrations to Gaya and Monghyr which are adjacent districts. The mining and industrial district of Dhanbad, however, seems to attract a large number of males from this district for economic reasons.

As for influx from other States of India, Uttar, Pradesh contributes the largest number (M—6,979, F—4,980), followed by West Bengal (M—4,423, F—5,016), Punjab (M—1,890, F—1,227), Rajasthan (M—1,532, F—612), Kerala (M—168, F—399), Gujarat (M—280, F—222), Madras (M—267, F—227), Delhi (M—215, F—254), Assam (M—217, F—167), Orissa (M—199, F—154), Madhya Pradesh (M—138, F—187), Maharashtra (M—126, F—167), Andhra Pradesh (M—101, F—70), Jammu and Kashmir (M—89, F—56) and Mysore (M—69, F—74). The immigrants from other States and Union Territories have almost insignificant numbers. Similar information in respect of emigrants from Patna district to other States of India is not available for any census after 1921. In that year the

number of such emigrants from this district was 73,434 whereas the number of immigrants from other States was 10,775.

Considering the immigrants to Patna from other countries, Pakistan comes first having sent 5,288 immigrants (M—2,779, F—2,509), followed by Nepal with 1,461 immigrants (M—1,032, F—429). These two neighbouring countries taken together account for 95.26 per cent of the total immigrants (7,085) to Patna from other countries of the World.

9. AGE, SEX AND MARITAL STATUS

Age

Single year age returns have been presented in Table C-IV of 1961.* This table has not been reproduced in the present volume for want of space. Among the tables published in this volume, however, is Table C-II which classifies the population of either sex in quinquennial age groups and also by marital status. Broad age groups are also shown in Tables B-I and C-III, included in this volume.

Heapings into quinquennial age-groups result in better appreciation of data relating to age structure as the inconsistencies apparent in single year age returns are largely eliminated in the heaped age groups. While the five year age groups have their own importance, particularly in regard to evaluation of sex ratios for the purpose of assessing economic characteristics the four broad age groups indicative of children (0—14), young persons (15—34), middle aged persons (35—59) and elderly persons (60+) are more revealing.

The following statement shows the distribution of population by sex and broad age groups in Patna district and Bihar State :

Number of persons, males and females, and their distribution per 1,000 of each, by broad age groups in Patna district and Bihar State, 1961

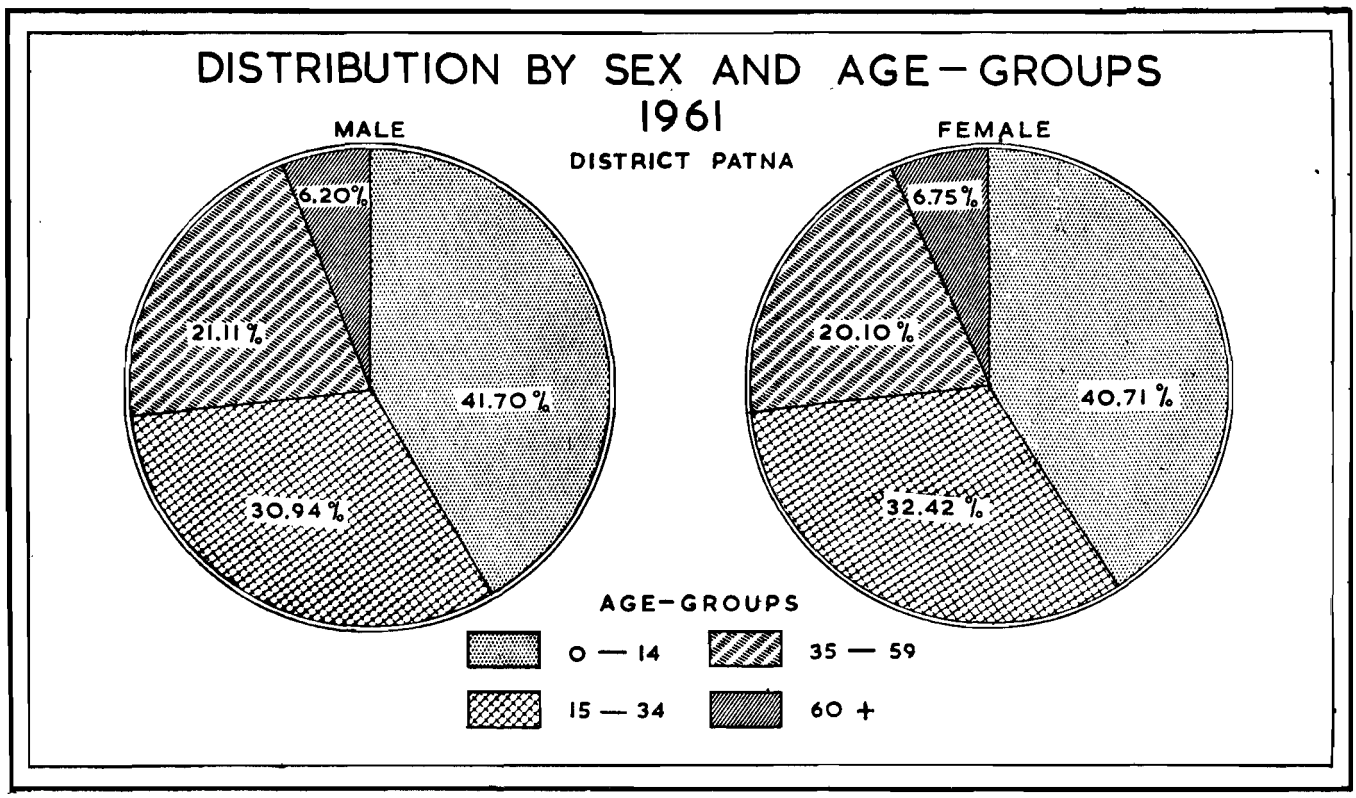

(*Figures within brackets give the distribution per* 1,000)

Age groups	Patna district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All ages	**2,949,746 (1,000)**	**1,522,687 (1,000)**	**1,427,059 (1,000)**	**46,455,610 (1,000)**	**23,301,449 (1,000)**	**23,154,161 (1,000)**
0—14	1,215,927 (412)	635,016 (417)	580,911 (407)	19,653,328 (423)	10,112,846 (434)	9,540,482 (412)
15—34	933,745 (317)	471,148 (309)	462,597 (324)	14,335,615 (309)	6,976,349 (299)	7,359,266 (318)
35—59	608,300 (206)	321,431 (211)	286,869 (201)	9,845,764 (212)	5,006,949 (215)	4,838,815 (209)
60+	190,743 (65)	94,400 (62)	96,343 (68)	2,608,218 (56)	1,197,596 (52)	1,410,622 (61)
Age not stated	1,031 (N)	692 (1)	339 (N)	12,685 (N)	7,709 (N)	4,976 (N)

(N)—denotes negligible figures.

*Census of India, 1961, Bihar, Volume IV, Part II-C, Social and Cultural Tables.

The diagram below shows the per cent distribution of male and female population separately by the four broad age-groups :

It is apparent that only a little more than one half (52.3 per cent) of the total population is in the working age-group 15—59 years. The corresponding proportions among males (52.0 per cent) and females (52.5 per cent) are almost identical. It may be noted that the proportions of young persons (15—34) in Patna district are higher and those of middle aged-persons (35—59) lower, than in the State. The proportions of children (0—14) are also lower in Patna than in the State. This feature is significant when correlated to the appreciably lower rate of increase of population in the district (+16.67 per cent) than the State (+19.77 per cent) in the last decade. The proportion of elderly persons is, however, considerably higher in Patna (6.5 per cent) than in the State (5.6 per cent).

According to Sundburg, "half of the total population is always made up of persons between 15 and 50 years of age, while the fluctuations in the lower and higher categories respectively indicate whether the population is progressive, stationary, or retrogressive"*. Thus a proportion of 40 per cent or more in the age group 0—14 is indicative of the population being progressive, 33 per cent of its being stationary and 20 per cent of its being retrogressive. By these standards, it would seem that both Patna district and Bihar State have highly progressive populations but, comparatively, the former is less so than the latter.

Another interesting feature is the slight edge elderly women seem to have over elderly men, pointing towards apparently greater longevity among the former both in Patna district and Bihar State.

Sex Ratio

Sex ratio is determined by the number of females per 1,000 males. The district of Patna has a sex ratio of 937 as against 994 in the State of Bihar. The only two districts in Bihar having lower sex ratios are Purnea (922) and Dhanbad (792).

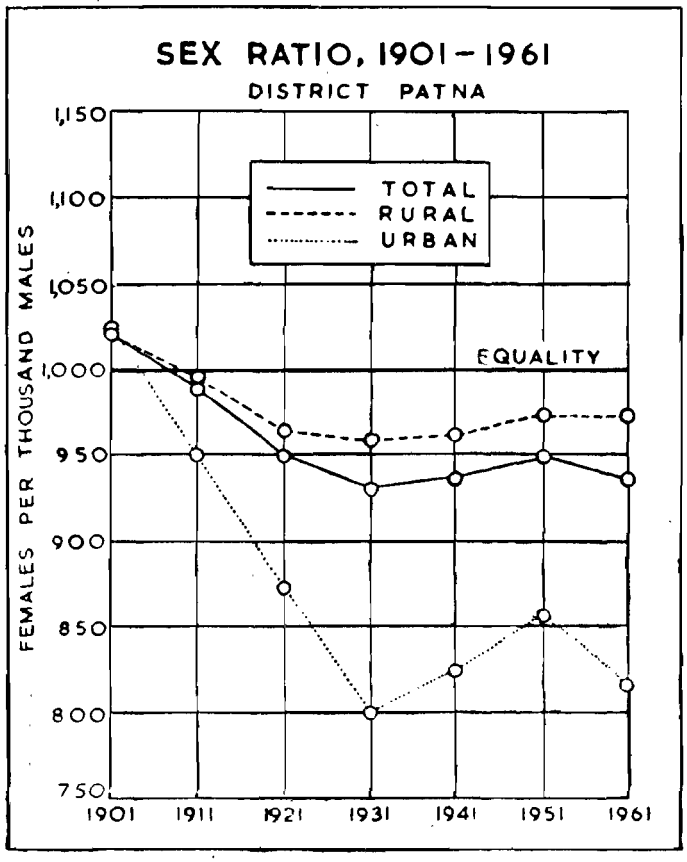

*Census of India, 1931, Vol. VII, Bihar and Orissa, Part I, Report by W. G. Lacey, page 122.

The following statement traces the changing pattern of sex ratio in the district and the State, 1901—61 :

Variations in sex ratio in Patna district and Bihar State separately for total, rural and urban, 1901—61

Census	Number of females per 1,000 males					
	Patna district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,020	1,019	1,024	1,054	1,057	997
1911	988	994	950	1,044	1,048	936
1921	949	962	872	1,016	1,023	869
1931	931	957	800	994	1,003	813
1941	935	959	822	996	1,006	828
1951	949	971	865	990	1,001	841
1961	937	971	813	994	1,012	811

The diagram below depicts the above statistics for the district separately for total, rural and urban populations :

It is of interest to note that except in 1901, the *de facto* population of Patna has never shown any surplus of females. In the three successive decades following 1901, the trend was towards a falling sex ratio—a feature common to both the district as well as the State. This implied that the tendency to emigrate declined among the males of the district during that period. This is understandable in view of several factors, such as general improvements at home in public health and agriculture, political unrest and non-co-operation movements detracting would-be emigrants from leaving their people. After 1931, the sex ratio moved upward during the next two decades with the result that in 1951 it was precisely the same as in 1921. In 1961, though the sex ratio has registered a significant drop, it is still slightly more than in 1941. The drop is entirely due to very steep fall in the urban sex ratio.

A distinctive feature is that even the rural sex ratio in Patna district has, except in 1901, been always very adverse while the corresponding ratio in the State has always been favourable. The explanation seems to lie in two factors—one, comparatively higher level of urbanisation and two, favourable balance of migration in the Patna district.

The urban areas suffer from a chronic shortage of females. This is a feature common to most towns in northern India. Evidently, the towns serve only a limited purpose, the population being mainly agricultural with its moorings in villages. People take to towns only for purposes such as employment, education, trade, business, profession, etc. Most of these avocations concern men only who come to, or live in, towns as a make-shift arrangement. They continue to keep contact with their village homes where they generally leave behind their families and make frequent visits to look after cultivation, observe festivals and for various other purposes. Of course, definite signs of change in this pattern of living are discernible now and more people are making towns their permanent abode. Even so, the old order takes long to change.

Sex ratios by broad age groups give a more detailed picture, as in the following statement for Patna district and Bihar State :

Sex ratios by broad age groups in Patna district and Bihar State, 1961.

Age group	Number of females per 1,000 males	
	Patna district	Bihar State
0—14 ..	915	943
15—34 ..	982	1,055
35—59 ..	892	966
60+ ..	1,021	1,178

It has often been said that one of the factors responsible for adverse sex ratio in India, as in Bihar, is that more boys are born than girls. It is also said that in subsequent years, during childhood as well as maternity, females suffer greater mortality because of comparative neglect or hazards of reproduction. In this context, it is significant to find that both Bihar State and Patna distict have very adverse sex ratios in the age group 0—14; in fact, the latter is more so than the former. A discordant note is, however, struck in the next age group (15—34) in which also the Patna district, unlike the Bihar State, has an adverse sex ratio. This is clearly the result of urban growth and considerable in-migration, factors which operate differently in so far as the State is concerned. The position worsens in the age group (35—59), but now both the State and the district have adverse ratios. It is only among elderly persons that the higher longevity of females (who survive the indifference and hazards of earlier life) enables them to tilt the balance in their favour and the sex ratios both in the State and the district are quite favourable.

Marital Status

Table C-II at page 72 of Part I furnishes the statistics relating to marital status. The following statement gives the distribution of 1,000 persons, males and females by marital status :

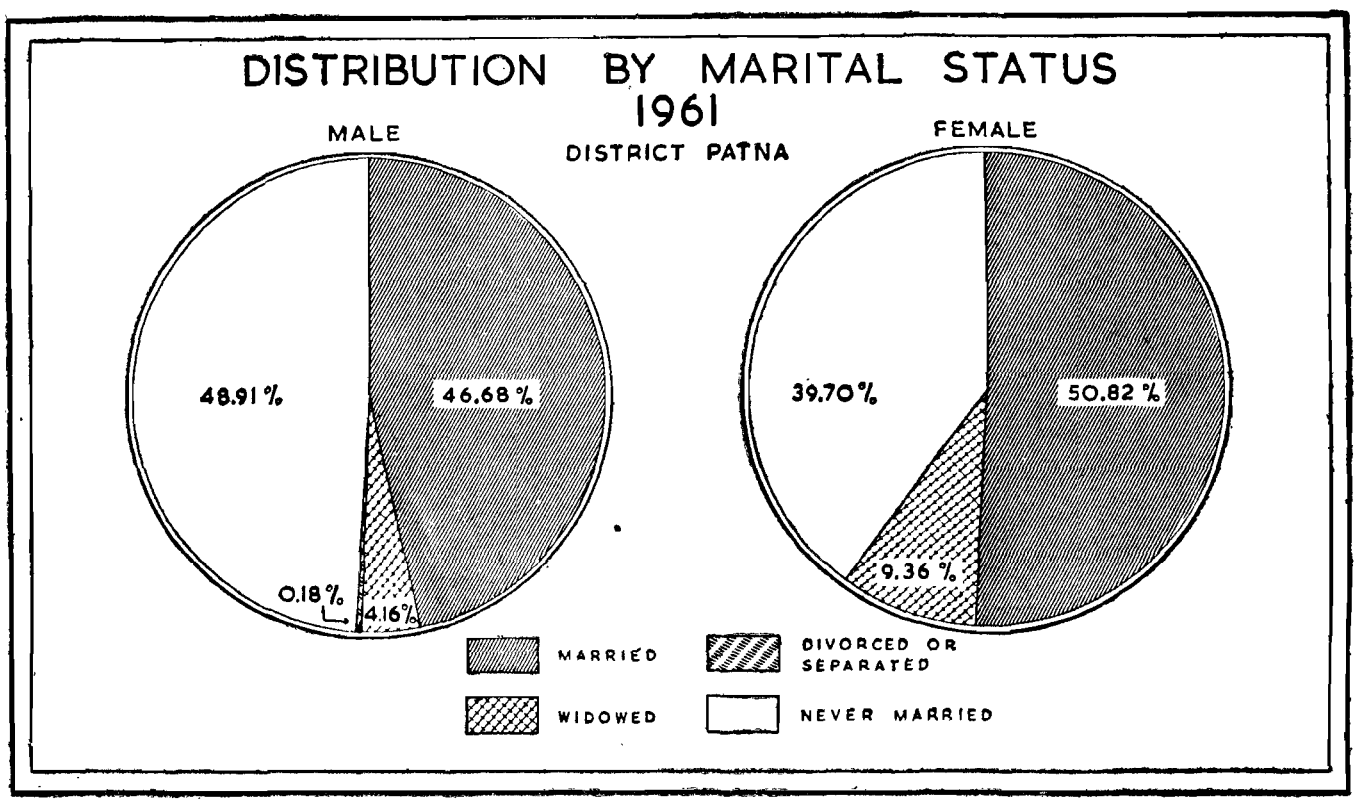

Distribution of 1,000 persons, males and females in Patna district and Bihar State by marital status, 1961.

Marital Status	Patna district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
Total ..	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Never married ..	444	489	397	447	498	396
Married ..	487	467	508	476	459	492
Widowed ..	67	41	94	74	39	109
Divorced or separated	1	2	N	3	3	2
Unspecified Status	1	1	1	N	1	1

N—denotes negligible figures.

NOTE : All persons in the age group 0—9 have been treated as 'never married' irrespective of the actual returns.

The diagram below gives for Patna district the per cent distribution of never married, married and widowed persons separately for males and females. The figures for divorced or separated persons and those of unspecified status are too small for diagrammatic representation :

Like other districts of Bhiar, Patna has relatively more 'never married' males than females, and more married females than males. This is explained by the fact that girls marry at much younger ages than boys. As against 48.9 per cent of 'never married' males in Patna, the corresponding proportion among females is 39.7 per cent only. These proportions are almost similar to those for the State. Married males and females, however, have higher proportions in Patna district than in the State. It is noteworthy that Patna has a slightly lower proportion of widows (9.4 per cent) than the State (10.9 per cent).

A better appreciation of marital status can be had from an analysis of marital status by broad age groups as in the following statement :

Distribution of 1,000 persons of either sex in broad age groups by marital status, in Patna, 1961

Marital Status	Males				Females			
	0—14	15—34	35—59	60+	0—14	15—34	35—59	60+
1	2	3	4	5	6	7	8	9
Total	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Never married	968	241	40	39	932	53	2	1
Married	31	741	867	668	68	924	792	320
Widowed	N	15	89	289	N	21	204	677
Divorced or separated ..	1	2	3	3	N	1	1	1
Unspecified Status	N	1	1	1	N	1	1	1

N—denotes negligibles figures.

Notwithstanding the fact that all persons in the age group 0—9 were treated as 'never married' irrespective of the actual returns, 3.1 per cent of males and 6.8 per cent of females in the age group 0—14 have been returned as married. The corresponding proportions for the State are 3.5 and 8.2 per cent respectively. This is perhaps indicative of the fact that child marriages, though prevalent, are less common in Patna district than in the State. Compared to other districts, Patna ranks 9th and 12th respectively so far as the proportions of married males and females in the age group 0—14 are concerned.

The universality of marriage, particularly among females, is established by the fact that only 0.2 per cent of females in the age group 35—59, and 0.1 per cent in the age group 60+ belong to the category, 'never married'. It is also significant that only 5.3 per cent of females in the age group 15—34 are 'never married'. The corresponding proportions among males are very much higher, particularly in the age group 15—34.

In regard to widowed persons, it is only natural that with the restrictions prevalent among the Hindus on widow re-marriage, the proportions of widows should be appreciably higher than those of widowers in each age group.

10. LITERACY AND EDUCATION

In the district of Patna, 847,582 persons comprising 28.73 per cent of its population are able to read and write or have attained higher educational level. The corresponding percentage for Bihar State is 18.40, and for the country 24.02 per cent. The dis trict has, therefore, higher literacy rate than the State and the country.

Children up to 4 years of age may, in the very nature of things, be treated as illiterate. The effective literacy rate is, therefore, measured by the proportion of literate and educated persons to persons aged 5 or more. The alongside table shows the effective literacy rate per 10,000 of population in Patna district and Bihar State separately for persons, males and females, and for total, rural and urban population.

Effective literacy rates in Patna district and Bihar State, 1961

Category of population	Persons Males Females	Number of literates per 10,000	
		Patna district	Bihar State
Total ..	P	3,375	2,175
	M	5,092	3,519
	F	1,529	817
Rural ..	P	2,823	1,909
	M	4,596	3,219
	F	991	613
Urban ..	P	5,532	5,021
	M	6,854	6,363
	F	3,865	3,310

It is evident that the effective literacy rate in Patna district (33.75 per cent) is over 50 per cent higher than that in the State (21.75 per cent). Among the districts of the State, it is at the top. The literacy rate in urban areas is almost double the rate in rural areas. The difference is particularly marked in the case of females. While 10 out of every 26 urban females in the Patna district are literate, the corresponding proportion among rural females is only 1 out of every 10. It is also noteworthy that while as much as 68.54 per cent of males in urban areas are literate, the corresponding proportion in rural areas is only 45.96 per cent. Another significant fact revealed by the above statistics is that the effective literacy rates in both the rural and urban areas of Patna district are much higher than those of the State.

A break-up of the literate population by various educational levels further shows that 66.8 per cent of the literates can only read and write; 23.3 per cent have crossed the primary or junior basic stage and only 9.9 per cent have passed the matriculation or higher examinations. The classification of literate and educated persons by educational levels separately for total, rural and urban areas is given below :

Classification of literate and educated persons in Patna district by broad educational levels, 1961

Educational levels	Total Rural Urban	Number of literates			Proportion per 1,000 of total population			Proportion per 1,000 of total literate		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10	11
Literate (without educational level)	T	566,239	420,760	145,479	225	323	120	668	635	786
	R	398,808	316,582	82,226	200	103	84	707	678	843
	U	167,431	104,178	63,253	327	365	279	591	532	723
Primary or Junior Basic ..	T	197,372	165,145	32,227	79	127	27	233	249	174
	R	135,953	121,164	14,789	68	119	15	241	260	152
	U	61,419	43,981	17,438	120	154	77	217	225	199
Matriculation or above ..	T	83,971	76,657	7,314	33	59	6	99	116	40
	R	29,494	29,005	489	15	29	N	52	62	5
	U	54,477	47,652	6,825	106	167	30	192	243	78

N—denotes negligible figures.
NOTE : Total population excludes population in age-group 0—4.

The contrast between rural and urban areas as between males and females is most conspicuous in the educational level, 'Matriculation or above.' While 16.7 per cent of urban males in Patna district are at least matriculate, the corresponding proportions among urban females, rural males and rural females are 3.0, 2.9 and 'negligible' respectively.

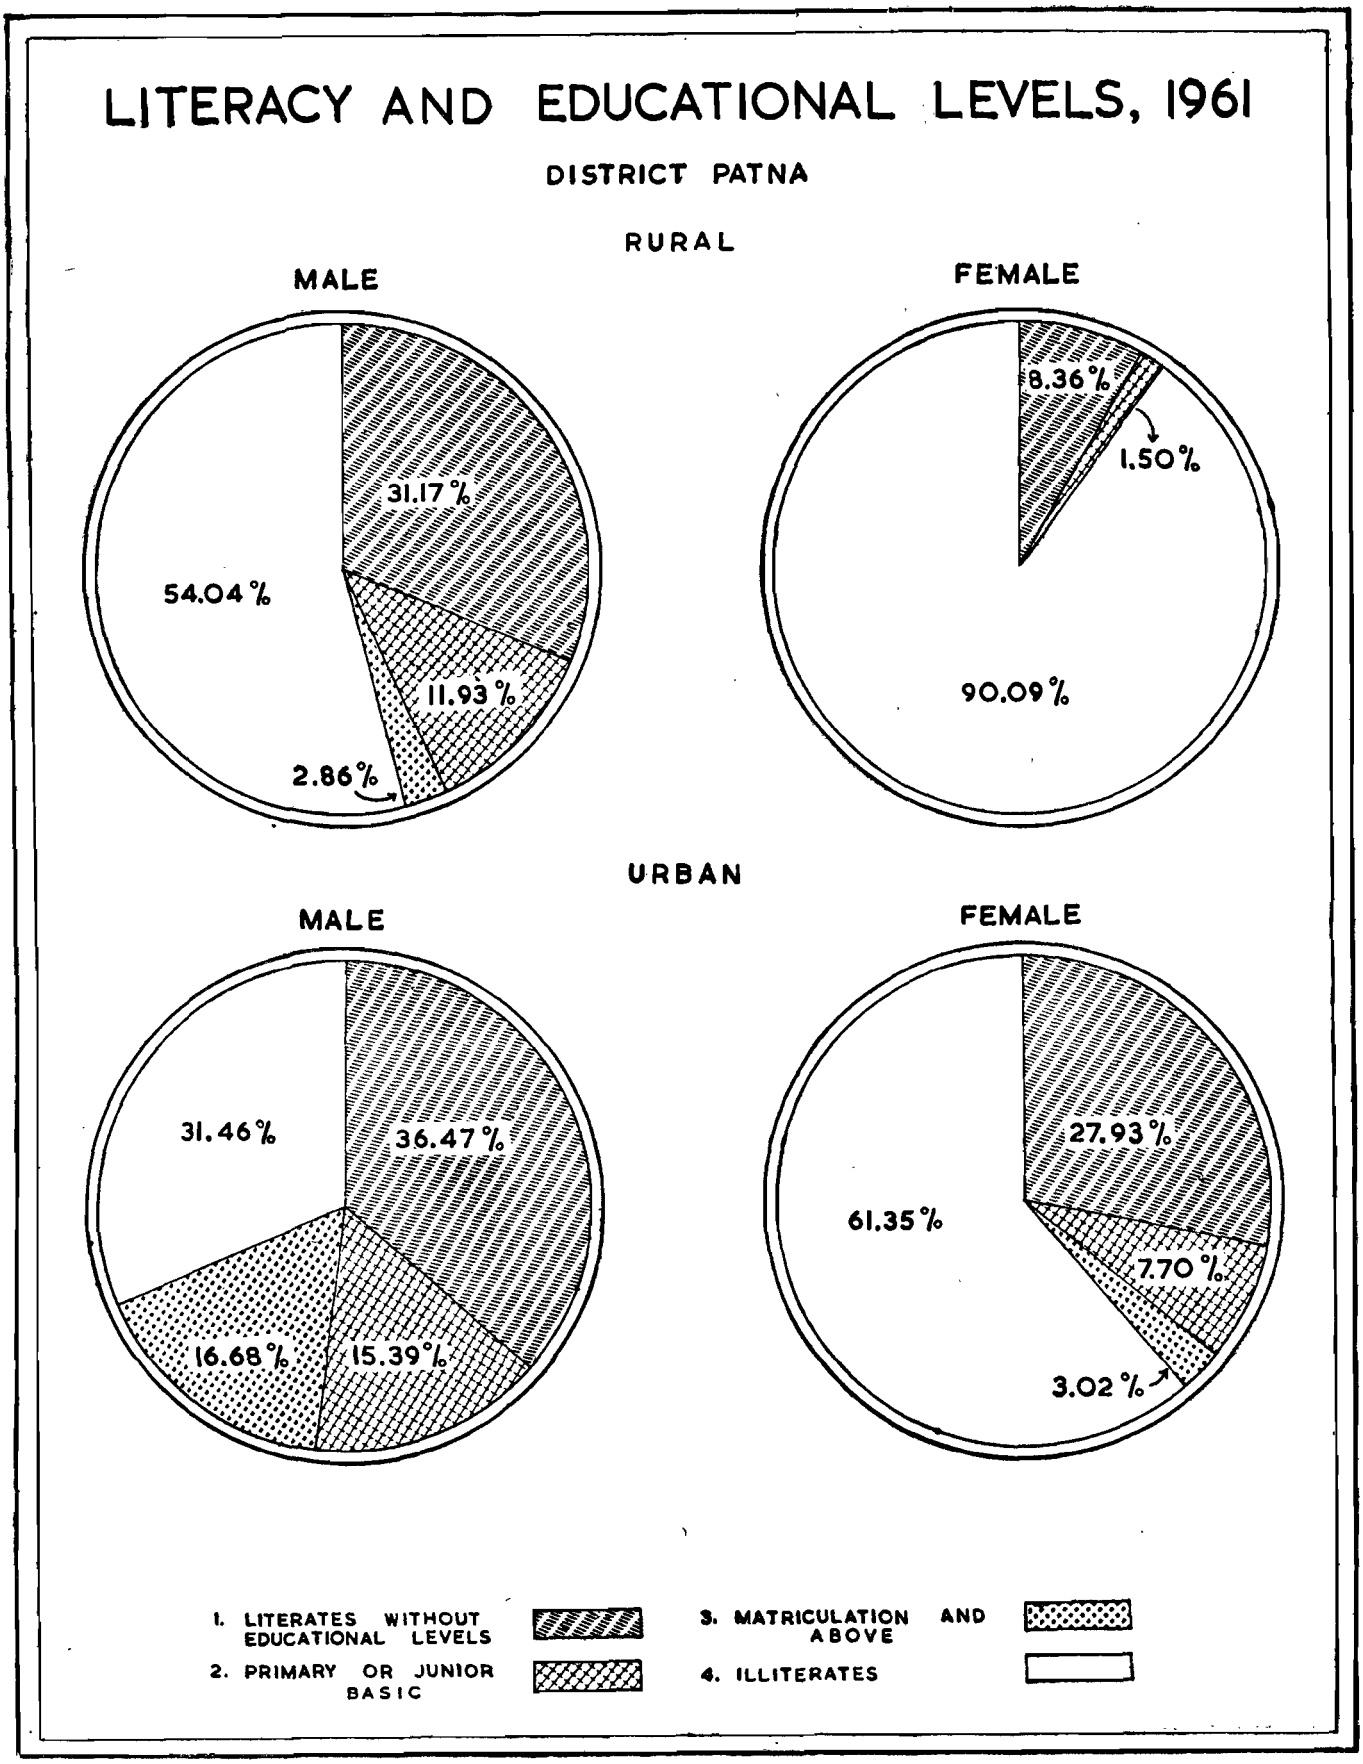

The diagram at page XXXI indicates the literacy and educational levels for males and females separately for rural and urban areas.

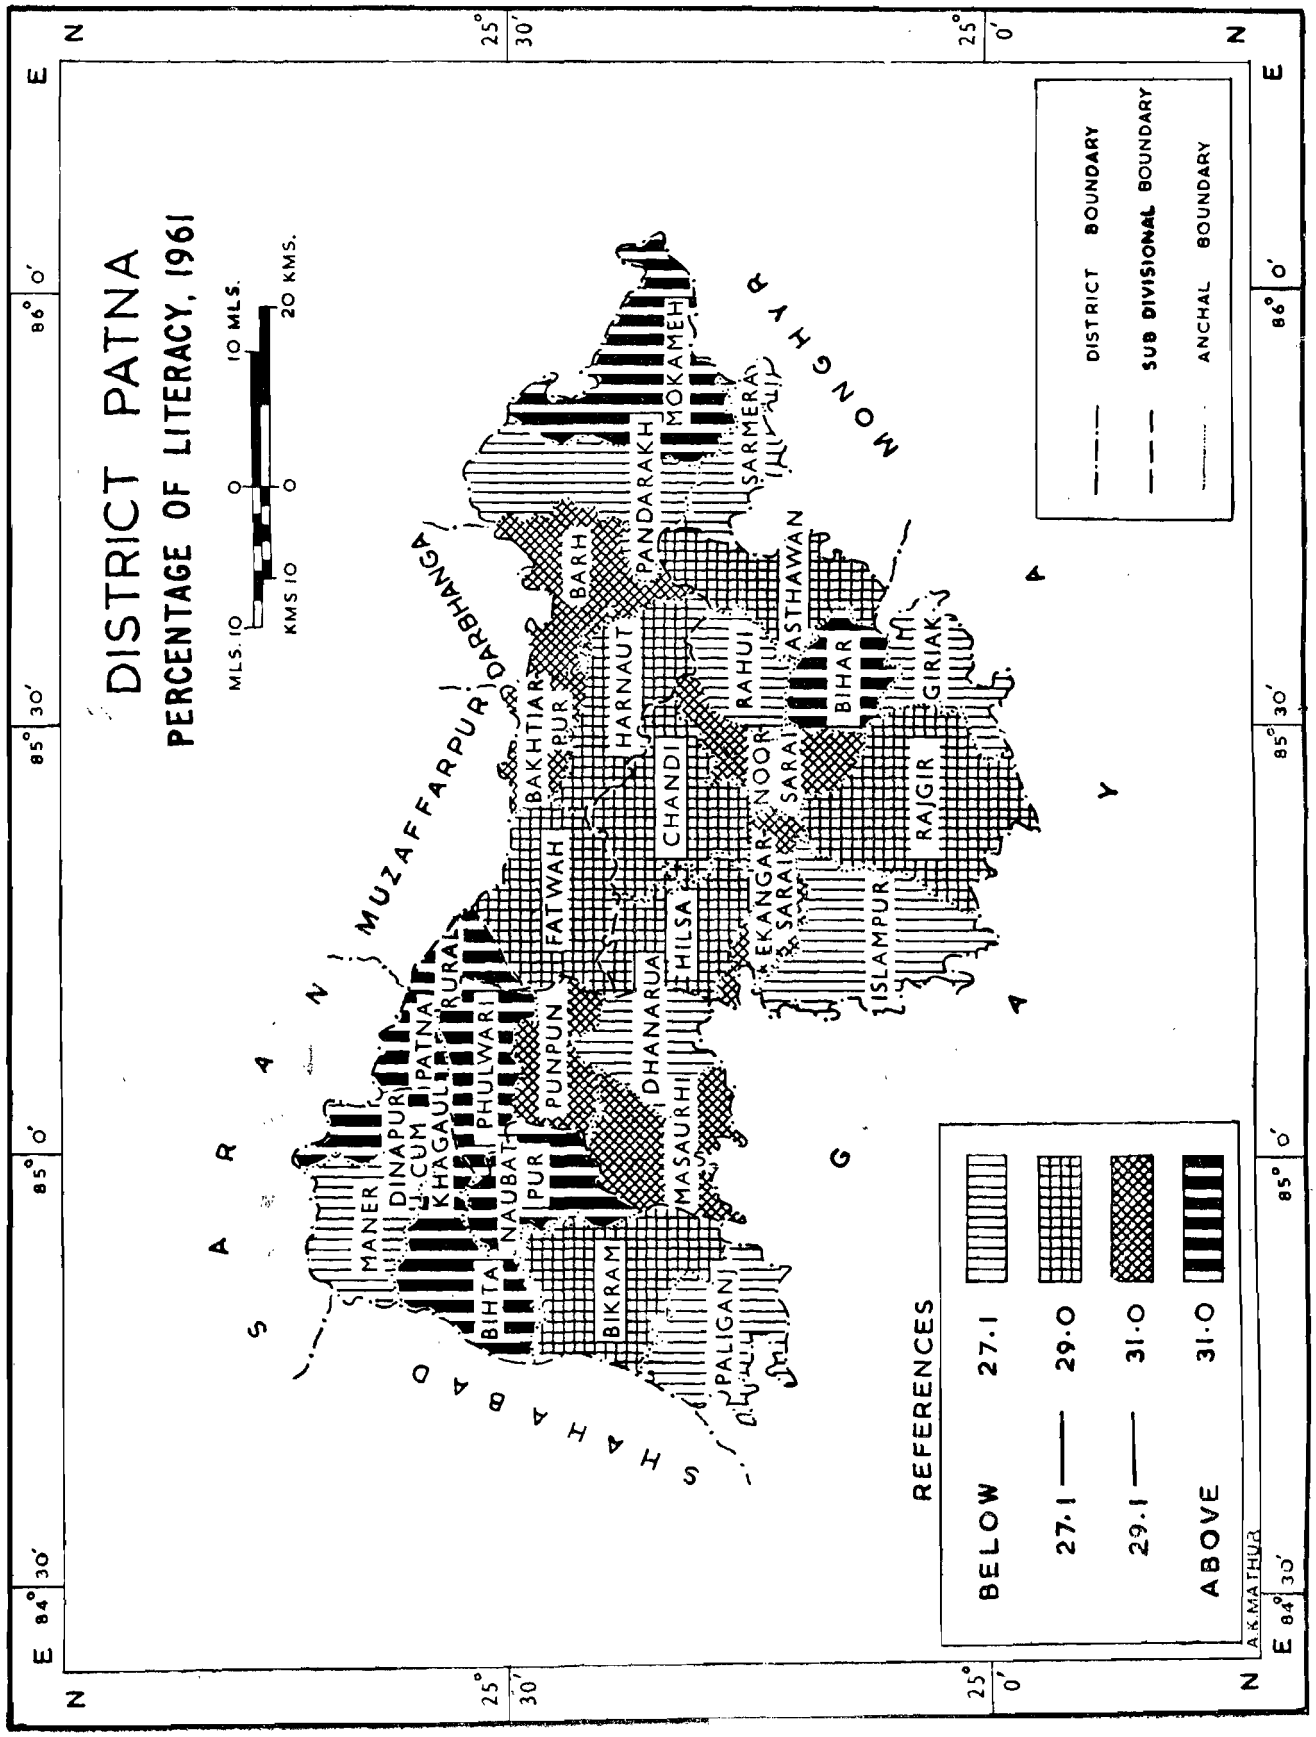

The alongside statement traces the growth of literacy in Patna district and Bihar State during the period 1901—61.

Growth of literacy in Patna district and Bihar State, 1901—61.

A graph illustrating the above statistics for Patna district is also given below :

Since 1901 there has been continuous improvement in the literacy rate in Patna district. Even in 1901 it was much ahead of the State and the distinction has been retained in all the subsequent censuses. It is noteworthy, however, that while literacy in the State has increased by 5.5 times in the last sixty years, it has done so by 4.6 times only in the Patna district. Even so, the difference between the district and State rates has widened from 3.35 per cent in 1901 to 12.00 per cent in 1961. The great hiatus between male and female literacy rates is too glaring to escape notice.

Tables B-III Part A and B-III Part B (printed elsewhere in this book) provide useful materials for assessing the extent of literacy among different categories of workers (*vide* economic classification given later). Literacy is highest in the Patna district among workers engaged in trade and commerce (66.74 per cent), followed by those in transport, storage and communications (60.06 per cent), manufacturing industries (55.41 per cent) and other services (53.52 per cent). As is expected, the literacy rate is lowest among agricultural labourers (7.03 per cent). Considering all the workers together, the bulk of literates among them is made up of cultivators (46.28 per cent). This is so because of the large share of cultivators in the total working population.

An idea of the extent of literacy in different parts of the district can be had from the literacy map on page XXXII. The table below gives the rate for each subdivision and town :

Effective literacy rates in each subdivision, anchal and town of Patna district, 1961.

Subdivision/ Anchal/Town	Literacy per 10,000	Subdivision/ Anchal/Town	Literacy per 10,000

(M)—Municipality (N)—Notified Area

NOTE : Patna Municipal Corporation lies in both the subdivisions of Patna Sadar and Patna City. Hence, the figures for Patna Municipal Corporation have been shown separately and not included in any subdivision.

The city of Patna, which has not been included in any anchal, has the highest literacy rate (59.79 per cent). Among the anchals, Dinapur-*cum*-Khagaul has the distinction of having the highest rate (39.49 per cent), mainly because of the large urban population comprised in the three townships of Dinapur Nizamat, Khagaul and Dinapur Cantonment. Bihar anchal comes next with 37.70 per cent. Here again, much of the credit is due to the town of Biharsharif. The lowest rate (24.55 per cent) is in Pandarakh anchal in Barh subdivision.

The literacy map indicates that except for Maner anchal which contains some Diara tracts, literacy rate is very high in the north-western part of the district. Other anchals with comparable rates are Bihar and Mokameh. Generally the rate of literacy decreases as one proceeds from north to south.

Educational institution and number of pupils

Table EDN I at Page 169 of Part I gives the number of educational institutions of various types in the district and the number of pupils in them in 1960-61. There has been an appreciable increase in the number of all types of institutions since 1951. The number of Primary and Junior Basic schools increased from 1,871 to 2,297 during the decade. The total enrolment in Primary schools rose from 92,817 to 176,007 or almost twice.

Middle school education has also received great fillip in the last decade. From 245 Middle schools in 1951 the number rose to 420 in 1961. The number of pupils on rolls increased from 31,549 to 74,850. Similarly, from 116 High or Post-Basic schools in 1951, the number rose to 163 and the total enrolment also increased from 39,727 to 56,394. Four High schools were upgraded to Higher Secondary and 8 to Multi-purpose Higher Secondary. There were 31 colleges in 1961 (28 for boys and 3 for girls). In 1951 there was only one University in the Bihar State. The Patna University is now basically residential with eight constituent colleges, the remaining being affiliated to Magadh University.

11. LANGUAGE

Table C-V at page 80 of Part I gives the number of speakers of different languages and dialects in the district and its anchals. The statement below shows the distribution of major mother-tongues (having more than 1,000 speakers) in the district separately for total, rural and urban areas. The mother-tongues have been arranged in descending order of their numerical importance :

Speakers of major mother-tongues in Patna district, 1961

(*Figures within brackets indicate the distribution per* 1,000)

Language	Total	Rural	Urban	Percentage of each language in	
				Rural	Urban
1	2	3	4	5	6
All languages ..	**2,949,746** (1,000)	**2,355,850** (1,000)	**593,896** (1,000)	..	..
Hindi ..	1,867,974 (633)	1,469,474 (624)	398,500 (671)	78.67	21.33
Magahi ..	789,213 (268)	737,520 (313)	51,693 (87)	93.45	6.55
Urdu ..	195,453 (66)	96,697 (41)	98,756 (166)	49.47	50.53
Bhojpuri ..	55,187 (19)	47,101 (20)	8,086 (14)	85.35	14.65
Bengali ..	18,975 (6)	824 (N)	18,151 (30)	4.34	95.66
Maithili ..	7,954 (3)	1,765 (1)	6,189 (10)	22.19	77.81
Punjabi ..	5,657 (2)	519 (N)	5,138 (9)	9.17	90.83
English ..	1,715 (1)	133 (N)	1,582 (3)	7.76	92.24
Nepali ..	1,417 (N)	234 (N)	1,183 (2)	16.51	83.49
Others ..	6,201 (2)	1,583 (1)	4,618 (8)	25.53	74.47

N—denotes negligible figures.

Hindi has been returned as the mother-tongue of 63.3 per cent of the district population. Magahi is spoken by 26.8 per cent and Urdu by 6.6 per cent. The three taken together account for 96.7 per cent of the district population. These proportions may, however, be viewed with the limitation that to a great extent the language returns are indicative mainly of individual preferences rather than of any precise linguistic classification. As a matter of fact, the district of Patna extends over a predominantly Magahi speaking region and many persons who returned Hindi or Urdu as their mother-tongue actually speak Magahi at home. Their returns were evidently influenced by certain extraneous considerations to which reference will be found in the General Report on the 1961 Census.

Among other important languages or dialects in the district, Bhojpuri was returned by 55,187, Bengali by 18,975, Maithili by 7,954, Punjabi by 5,657, English by 1,715 and Nepali by 1,417. It is significant that speakers of Bengali, Maithili, Punjabi, English and Nepali were mostly enumerated in urban areas and speakers of Bhojpuri in rural areas of the district.

12. RELIGION

The distribution of population by religion is given up to anchals in Table C-VII at page 90 of Part I. The following statement shows the number and per cent distribution of population by religion in total, rural and urban areas of the district :

Distribution of population by religion in Patna district, 1961

Religion	Number of followers			Per cent of each religion in	
	Total	Rural	Urban	Rural	Urban
1	2	3	4	5	6
All religions ..	**2,949,746 (100.00)**	**2,355,850 (100.00)**	**593,896 (100.00)**	..	..
Hindus ..	2,727,211 (92.46)	2,241,766 (95.16)	485,445 (81.74)	82.20	17.80
Muslims ..	213,031 (7.22)	112,063 (4.76)	100,968 (17.00)	52.60	47.40
Sikhs ..	4,096 (0.14)	359 (0.02)	3,737 (0.63)	8.76	91.24
Christians ..	3,676 (0.12)	1,011 (0.04)	2,665 (0.45)	27.50	72.50
Jains ..	932 (0.03)	225 (0.01)	707 (0.12)	24.14	75.86
Buddhists ..	265 (0.01)	91 (N)	174 (0.03)	34.34	65.66
Others ..	535 (0.02)	335 (0.01)	200 (0.03)	62.62	37.38

N —denotes negligible figures.

NOTE : Figures within brackets indicate percentages.

The Hindus comprise 92.46 per cent of the district population and the Muslims 7.22 per cent. Other religious groups together constitute a mere 0.32 per cent.

The rural-urban break-up indicates that the less numerous religions such as, Sikhs, Christians, Jains and Buddhists flourish mainly in urban areas. The Hindus and the Muslims are the only two communities found mostly in rural areas, the latter being comparatively more urbanised.

The table below shows the growth of each religious group in the district during the last sixty years. The figures for Sikhs, Christians, Jains and Buddhists are small and have been given separately in the foot-note below the table :

Variations in population of each religious group, 1901—61

Census	Hindus		Muslims	
	Number	Percentage decade variation	Number	Percentage decade variation
1	2	3	4	5
1901 ..	1,435,657	..	186,411	..
1911 ..	1,436,135	+0.03	170,383	—8.60
1921 ..	1,412,233	—1.66	158,438	—7.01
1931 ..	1,639,829	+16.12	202,655	+27.91
1941 ..	1,909,752	+16.46	235,201	+16.06
1951 ..	2,279,282	+19.35	239,873	+1.99
1961 ..	2,727,211	+19.65	213,031	—11.19

NOTE : Absolute figures for Sikhs, Christians, Jains and Buddhists are given below :

Religion	1901	1911	1921	1931	1941	1951	1961
1	2	3	4	5	6	7	8
Sikhs ..	..	54	135	220	879	5,599	4,096
Christians	2,562	2,585	3,175	3,503	2,861	1,573	3,676
Jains ..	340	466	274	204	441	1,576	932
Buddhists	5	6	27	16	42	91	265

In 1901, the Hindus comprised 88.39 per cent and the Muslims 11.48 per cent of the population of Patna district. The corresponding proportions in 1961 were 92.46 per cent and 7.22 per cent respectively. It is evident, therefore, that while the Hindus have registered an increase, the Muslims have suffered slight decrease in their proportions in the last six decades. The rapid growth of population among certain minor communities such as the Sikhs, the Christians, the Jains and the Buddhists in the last sixty years may possibly be one of the factors responsible for the diminution of the proportion of the Muslims.

However, the Hindus have always been the most dominant religious group in the district. During the last six decades their population has grown by 89.96 per cent as against 81.61 per cent increase in the total population of the district. In the year 1911, when the district population fell by 0.96 per cent, the population of the Hindus recorded a nominal increase of 0.03 per cent. But in 1921, when the district population fell by 1.98 per cent, the Hindu population also recorded a decline of 1.66 per cent. Thereafter, the Hindu population has always been on the increase in line with the district population.

The Muslim population has increased by 14.28 per cent during the period 1901—61. It fell by 8.60 per cent during the decade 1901—11 and 7.01 per cent during the following decade 1911—21, when the total population of the district recorded a decline of 0.96 per cent and 1.98 per cent in the two decades respectively. But from 1921 up to the year 1951, the Muslim population has been on the increase, the maximum rate of increase (+27.91 per cent) being in the decade 1921—31. At the 1961 Census, the Muslim population has recorded a decline of 11.19 per cent when the district population has increased by 16.67 per cent.

Among the minor religious groups, the Sikhs showed an unusual increase in 1951. The abnormal communal situation in the years following the vivisection of the country in 1947 culminated in a mass exodus of the Sikhs from the West Pakistan. They dispersed themselves in different parts of the country, particularly in northern India and that possibly accounts for this phenomenon. The number of Christians declined steeply in the two decades following 1931, presumably due to the emigration in large numbers of the Anglo-Indians to certain other parts of India (*e.g.*, Bangalore), and even outside.

The sex ratios for different religious groups in the district are : Hindus—933; Muslims—1,001; Sikhs—719; Christians—920; Jains—775 and Buddhists—2,118. No significant conclusions can be drawn from the sex ratios amongst the less numerous religious groups, *viz.*, Sikhs, Christians, Jains and Buddhists, because the numbers are too small.

13. SCHEDULED CASTES AND SCHEDULED TRIBES

The total population of Scheduled Castes in Patna district was 474,501 according to the Census of 1961. They comprised 16.09 per cent or a little less than one sixth of the district population. The corresponding percentages in previous censuses were 13.68 in 1951; 13.42 in 1941; and 16.44 in 1931. The 1961 proportion is higher than in previous censuses except 1931.

In the State as a whole, the Scheduled Castes comprise 14.00 per cent of the total population. Patna ranks sixth among the district of Bihar in the population of Scheduled Castes but its position goes up to fourth when the proportions only of the Scheduled Castes to the total population in each district are taken into account. The districts having higher proportions are : Palamau (25.93 per cent), Gaya (24.54 per cent) and Saharsa (17.18 per cent).

The greatest concentration of Scheduled Castes in Patna district is in Punpun anchal of the Sadar subdivision, where they comprise 28 per cent of the anchal population. Harnaut, Giriak and Rajgir anchals come next, having 21 per cent Scheduled Castes in each case. In other anchals the proportions vary between 10 and 20 per cent of their respective population.

The statement below gives the population of individual Scheduled Castes having more than 1,000 persons in the district :

Population of scheduled castes having more than 1,000 persons in Patna, 1961

Name of Scheduled Castes	Population 1961	Number per 1,000 of	
		Total Scheduled Castes population in the district	Total population of the respective Scheduled Castes in the State
1	2	3	4
1. Dusadh including Dhari or Dharhi.	181,793	383	105
2. Chamar or Mochi	114,157	241	60
3. Musahar ..	79,323	167	79
4. Pasi ..	59,334	125	228
5. Dhobi ..	18,733	39	56
6. Dom or Dhangad	6,180	13	39
7. Rajwar ..	4,723	10	30
8. Hari, Mehtar or Bhangi	4,305	9	48
9. Nat ..	2,199	5	181
TOTAL ..	470,747	992	84

The above nine castes comprise 99.2 per cent of the total population of Scheduled Castes in the district and 8.4 per cent of their population in the State. Out of every 100 members of Scheduled Castes in the district, 38 are Dusadhs (including Dhari or Dharhi) and 24 Chamars (or Mochi). It is of interest to note that out of every four Pasis in the State, one hails from the Patna district, the corresponding proportion among the Nats being one out of every six.

Among the remaining Scheduled Castes (*see* Table SCT-I Part A at page 102 of Part I), 2,988 persons have been returned under the category 'Unclassified'. It relates to cases in which vague entries such as *Harijan*, *Achhoot*, etc., were made without specifying the exact name of the Scheduled Caste to which the person belonged.

In 1961 Patna had 1,511 persons returned as members of the Scheduled Tribes. This district lies outside the tribal belt and the small number returned in the district evidently relates to immigrants. The population of the Scheduled Tribes in the district shows wide fluctuations. The present population is only about one third of the population of 1951. The decrease has been continuing since 1941.

Among individual tribes, the Oraons with a population of 446 are the most numerous in the district. The Gonds come next with a population of 328 only. Other tribes are—Mundas (124), Hos (115) and Santals (90). The remaining eight tribes have populations below 15 in each case.

14. HOUSING

Tables E-I, E-II, E-IV and E-V, published in Part IV-B of the 1961 Census publications relating to Bihar, contains information on various characteristics of housing in rural and urban areas of the district and anchals.

Use of Houses

The total number of houses in Patna district, according to the houselisting operation conducted in September-October, 1960, was 534,577. It ranked ninth among the districts of Bihar in the number of houses. The eight districts with larger number of houses were the remaining two districts of Patna division, all the four districts of Tirhut division, Monghyr and Purnea. As against 3 per cent in the State, 3.9 per cent of the houses in Patna were found vacant, that is, they were not put to any specific use. It follows that 96.1 per cent of the houses in Patna were occupied. There are only five districts which have lower proportion of occupied houses than that of Patna. These are—Dhanbad (95.7 per cent), Palamau (95.6 per cent); Hazaribagh (94.4 per cent); Ranchi (93.8 per cent); and Saharsa (91.7 per cent). 73.1 per cent of the houses in Patna district were used solely for the purpose of dwelling or shop-*cum*-dwelling or workshop-*cum*-dwelling. The corresponding proportion for the State is 79.8 per cent.

An idea of the different kinds of uses to which census houses are put in Patna district can be had

from the following table, which also gives proportional figures for Bihar State for comparison :

Number and distribution of 1,000 census houses in Patna district by kinds of uses, 1960

Kinds of uses	Number	Proportion per 1,000 census houses	
		Patna district	Bihar State
1	2	3	4
Total Census Houses ..	**534,577**	**1,000**	**1,000**
A. VACANT DURING HOUSELISTING	21,056	39	30
B. OCCUPIED CENSUS HOUSES USED AS—			
(*i*) Dwellings (including shop-*cum*-dwellings or work-shop-*cum*-dwellings).	390,509	731	798
(*a*) Dwellings ..	374,571	701	765
(*b*) Shop-*cum*-dwellings	8,593	16	13
(*c*) Workshop-*cum*-dwellings.	7,345	14	20
(*ii*) Hotels, *Sarais*, Dharamshalas, Tourist houses and Inspection houses.	1,061	2	1
(*iii*) Shops excluding eating houses.	15,050	28	15
(*iv*) Business houses and offices	3,209	6	4
(*v*) Factories, Workshops and work-sheds.	6,441	12	8
(*vi*) Schools and other educational institutions including training classes, coaching and shop classes.	2,939	6	5
(*vii*) Restaurants, sweetmeat shops and eating places.	517	1	1
(*viii*) Places of entertainment and community gathering (Panchayat Ghar).	5,913	11	10
(*ix*) Public health and medical institutions, hospitals, health centres, doctors' clinics, dispensaries, etc.	1,079	2	1
(*x*) Others ..	86,803	162	127

The category 'others' is a residuary group and includes uses which could not be fitted into any of the other prescribed categories and includes entries such as *goshala*, *baithka*, *bhoosa-ghar*, cemetery, lavatory, kitchen, garage, pegion house, pig house, etc.

Density of Houses

There were 204 houses per sq. mile in rural areas and 1,570 houses per sq. mile in urban areas of the district. The density of census houses in Patna is higher than the average for the State (120 in rural and 1,016 in urban areas). The rural density is low because of the large areas covered by agricultural fields, orchards, etc., which in rural areas comprise the bulk of the land mass. If the areas of village settlements only were taken into account, the density of houses in rural areas would be equally high. Such a study is, however, handicapped because relevant figures are not available. It is noteworthy that in rural areas Patna occupies fourth place and in urban areas third place in order of density of census houses. Districts having higher densities are—Muzaffarpur (231 houses per sq. mile), Saran (219 houses per sq. mile), and Darbhanga (215 houses per sq. mile) in rural areas and Darbhanga (2,068 houses per sq. mile) and Saran (1,720 houses per sq. mile) in urban areas.

Status of Occupancy

96.8 per cent of households in rural areas and 54.3 per ent in urban areas of Patna live in owned houses. It follows that the proportion of households living in rented houses is very small in rural areas. But in urban areas it is a little less than one half of the households. The corresponding proportions for the State as a whole (2.4 per cent in rural and 43.5 per cent in urban areas) are smaller.

Material of Wall

We may now consider the type of materials that provide the structure of houses in Patna district. The following statement compares the distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant material of wall, separately for rural and urban areas, in Patna district and Bihar State. :

Distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant wall material in Patna district and Bihar State, 1960

Material of wall	Number per 1,000 Households			
	Patna district		Bihar State	
	Rural	Urban	Rural	Urban
1	2	3	4	5
Grass, leaves, reeds or bamboo.	7	7	225	88
Timber ..	1	2	3	6
Mud ..	690	291	663	289
Unburnt bricks ..	8	35	7	30
Burnt bricks ..	293	662	99	579
C. I. sheets or other metal sheets.	1	1	1	3
Stone ..	0	0	2	3
Cement concrete ..	0	2	N	1
All other materials ..	0	0	N	1

N—denotes negligible figures. 0—denotes nil figures.

In Patna as in the State, mud is the most common material of wall in rural areas. The use of burnt bricks is confined mainly to urban areas of the State, but its prevalence is quite high even in rural areas of Patna. One out of every three rural households (293 for 1,000) in Patna lives in brick-walled houses, the corresponding proportion for the State being one out of every 10 (99 per thousand). Obviously, it is an index of comparative affluence of Patna. The use of grass, leaves, reeds or bamboo as wall material in Patna is very much less than in the state.

Material of Roof

Considering next the material of roof, the table below shows the distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant roof material in total, rural and urban areas of Patna district as well as Bihar State :

Distribution of 1,000 households living in census houses used wholly or partly as dwellings by predominant roof materials in Patna district and Bihar State, 1960

Material of roof	Number per 1,000 households			
	Patna district		Bihar State	
	Rural	Urban	Rural	Urban
1	2	3	4	5
Grass, leaves, reeds, thatch, wood or bamboo.	164	22	446	125
Tiles, slate, shingle ..	790	640	522	524
Corrugated iron, zinc or other metal sheets.	1	12	8	41
Asbestos ..	N	3	1	21
Brick and lime ..	44	321	22	283
Concrete and stone slabs	1	2	1	6
All other materials ..	N	N	N	N

N—denotes negligible figures.

The above statement further confirms the picture revealed by the previous one. Both in rural as well as urban areas of the district, a much higher proportion of households have tiled roofs in preference to thatch which accounts for only 16.4 per cent as against 44.6 per cent in the rural areas of the State and 2.2 per cent as against 12.5 per cent in the urban areas of the State. The proportion of brick and lime roof in Patna (rural) is just the double of the State. Besides these materials, others do not count.

Living Accommodation

For obvious reasons, the enquiry conducted by the Census at the time of houselisting did not concern itself with the exact area of accommodation available to each household. It was decided to remain content with information relating to number of rooms occupied by each household. A room was defined as follows :

> "A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in, i.e., it should be at-least 6 feet long. Unenclosed verandah, kitchen, store, garage, cattle shed and latrine which are not ordinarily used for living and sleeping should not be treated as rooms. An enclosed room, however, which is used for living, dining, storing and cooking should be regarded as a room."

The statement below gives the distribution of households by number of rooms occupied, separately for total, rural and urban areas in Patna district and Bihar State :

Distribution of 1,000 census households by number of rooms occupied in Patna district and Bihar State, 1960

Number of rooms	Number per 1,000 households in					
	Patna district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
No regular room ..	1	1	2	2	2	4
1 room ..	236	189	413	363	356	441
2 rooms ..	239	234	259	293	296	264
3 rooms ..	171	180	137	155	157	127
4 rooms ..	122	132	84	83	84	73
5 rooms or more ..	231	264	105	104	105	91

Even in the matter of living accommodation, the people of Patna are better off than the State as

a whole. Thus, comparing columns 2 and 5 of the above table, we find that in comparison to the State as a whole, the proportions of those living in 3, 4 and 5 rooms or more are much higher in the district of Patna. It is but natural that the proportion in Patna of households living in single room as well as 2 rooms should be much lower than in the State. These observations hold good also in case of rural as well as urban areas.

15. HOUSEHOLDS : SIZE AND COMPOSITION

Size of Households

A household means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. A census house is a structure or part of a structure, a dwelling, a shop, a workshop, factory or place of business, or a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. It follows that while the concept of census house relates to a physical unit, that of census household extends to a social unit.

In Patna district the average size of a household is 6.11 persons per household. This is appreciably more than the average for the State (5.49 persons). In conformity with the State pattern, the size of a household in rural areas is larger than in urban areas. Comparative figures for the district and the State are noted below :

	Number of persons per household	
	Patna district	Bihar State
Total ..	6.11	5.49
Rural ..	6.25	5.51
Urban ..	5.61	5.33

Lest the overall average give a misleading notion about the size of households, the table given alongside shows the distribution of 1,000 households by different sizes :

Distribution of 1,000 households in Patna district and Bihar State by their size, 1961

Size of household	Patna district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
All sizes ..	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Single member ..	55	45	90	57	53	99
2-3 members ..	178	168	213	211	209	232
4—6 members ..	401	408	375	436	442	376
7—9 members ..	226	232	203	202	203	191
10 members or above	140	147	119	94	93	102

It is evident that the most common size of households (accounting for 40.1 per cent in Patna) consists of 4—6 members. Large households (having 7—9 members) or small households (having 2-3 members) are also not very uncommon in the district. In fact they too account for an almost equal proportion (40.4 per cent). A comparison of the district proportions with those of the State shows that there is a marked tendency towards large sized households (7 members and above) in Patna district. Thus, almost one out of every 7 households in Patna consists of 10 members and above. The proportion of households having 7—9 members is also high in Patna as compared to the State. As between rural and urban areas, the latter have, as expected, a larger proportion of households having smaller sizes, which is indicative of greater prevalence of joint family system in rural areas.

Composition of Households

The statement presented below gives the composition of households (20 per cent sample) by relationship to the head of households :

Composition of households in Patna district, 1961

Relationship to head of households	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
Total	**100.00**	**100.00**	**100.00**	**100.00**	**100.00**	**100.00**
Heads of households	29.87	2.11	29.60	2.06	30.89	2.34
Spouses of heads of households ..	0.04	25.20	0.03	24.54	0.07	28.16
Married sons	12.46	..	13.67	..	7.79	..
Other married relations	7.25	25.27	7.42	26.82	6.60	18.35
Never married, widowed and divorced or separated relations.	48.40	47.10	48.32	46.43	48.70	50.06
Unrelated persons	1.98	0.32	0.96	0.15	5.95	1.09

In Patna 29.87 per cent of males are heads of households as against a mere 2.11 per cent of females. This should not cause any surprise, because patriarchal system of family is almost universal throughout the State. Even the small proportion of female heads of households presumably relates to elderly widows, mothers or such other females. In some cases, continued absence of husbands for long period on work elsewhere may also have resulted in their wives having been treated as heads of households.

The categories 'married sons' and 'other married relations' have a distinctly higher proportion in rural areas. It is perhaps indicative of the joint family system being more in vogue in rural areas than in urban areas. The category of 'never married, widowed, and divorced or separated' relations has the highest proportions both in rural and urban areas of the district. Unrelated persons of either sex have higher proportions in urban areas due to the more prevalent practice of engaging domestic helpers private tutors, professional clerks, etc., on salary-*cum*-food basis.

16. ECONOMIC CHARACTERISTICS

Workers and Non-workers

The economic classification of 1961 Census envisages a broad division of the entire population into two categories, viz., workers and non-workers. A 'worker' is a person who is engaged in some kind of economic activities. For example, he may be working as a cultivator, or as an agricultural labourer, or at household industries or doing any other work of productive and/or gainful nature. Work includes not only actual work but effective supervision or direction of work. Persons engaged in seasonal work like cultivation, livestock, dairying, household industry, etc., were deemed to be workers if they had regular work for more than an hour every day for the greater part of the last working season. Persons engaged in trade, profession, business or service were treated as workers if they were employed during any of the fifteen days preceding the date of enumeration. A person who is not working is a 'non-worker'. Non-workers may be full-time students or children doing no other work, housewives or other persons engaged in household duties only, infants or disabled persons incapable of doing any work, retired persons (not re-employed), rentiers, beggars, vagrants, convicts in jails, inmates of penal, mental or charitable institutions, and unemployed persons. For a fuller understanding of these concepts, reference may be made to the flyleaf to Primary Census Abstract in Part II-A (General Population Tables) or to the Introductory Note to Part II-B(*i*) (General Economic Tables) of the 1961 Census Publications relating to Bihar.

The Primary Census Abstract gives the distribution of workers by nine categories of economic activity.

Participation Rates

The participation rate (also called the labour participation rate) refers to the number of workers per 1,000 of population. The following statement gives the participation rates separately for persons, males and females as well as for total, rural and urban areas in Patna district and Bihar State, according to the 1961 Census. Workers have been classified by the three broad sectors of economy, viz., primary, secondary and tertiary :

Participation rate of workers in Patna district and Bihar State by broad sectors of economy, 1961

District/State	Persons Males Females	Total population	Workers				Non-workers
			Total	Primary sector	Secondary sector	Tertiary sector	
1	2	3	4	5	6	7	8
			TOTAL				
Patna ..	P	1,000	376	258	40	78	624
	M	1,000	524	338	58	128	476
	F	1,000	217	173	20	24	783
Bihar ..	P	1,000	414	326	41	47	586
	M	1,000	556	421	57	78	444
	F	1,000	271	231	24	16	729

Participation rate of workers in Patna district and Bihar State by board sectors of economy, 1961—*concld.*

			Total	Primary sector	Secondary sector	Tertiary sector	
1	2	3	4	5	6	7	8
		RURAL					
Patna ..	P	1,000	390	313	30	47	610
	M	1,000	531	416	39	76	469
	F	1,000	245	207	20	18	755
Bihar ..	P	1,000	422	352	34	36	578
	M	1,000	560	458	45	57	440
	F	1,000	285	248	23	14	715
		URBAN					
Patna ..	P	1,000	320	42	79	199	680
	M	1,000	501	53	128	320	499
	F	1,000	97	28	20	49	903
Bihar ..	P	1,000	332	46	114	172	668
	M	1,000	517	59	180	278	483
	F	1,000	104	29	32	43	896

376 out of every 1,000 persons in the district of Patna are workers. This proportion is below the State average of 414. In the State, only four districts, viz., Shahabad (371), Darbhanga (356), Saran (348) and Muzaffarpur (335) have lower participation rates than this district. As is expected, males have a higher participation rate than females. It is seen that the order of difference between the male and female rates in Patna is higher than the State. However, the male rate in Patna is lower than the State average by 5.8 per cent, while the female rate is lower by as much as 19.9 per cent.

As in the State, the rural areas in the district have higher participation rate (390) than the urban areas (320), though the difference between the rural and urban rates in Patna is not as wide as in the State. Considering the two sexes separately also, the rural areas have higher participation rate than urban areas. Thus the participation rates for males are 531 and 501 respectively in rural and urban areas while the corresponding rates for females are 245 and 97. A considerable portion of the male population in urban areas consists of students, job seekers and retired persons. Among females also, the scope of work in household industry and agricultural labour (in which they are mostly engaged) is considerably limited in towns. These factors, therefore, depress the urban participation rates.

The distribution of workers by the three broad sectors of economy as presented in the above table may be of special interest. The *primary sector* includes workers in cultivation, agricultural labour, livestock, forestry, fishing, hunting, plantations, orchards and allied activities. The *secondary sector* comprises workers engaged in mining and quarrying, household industry, manufacturing, construction and gas and electricity. The *tertiary sector* relates to workers in trade and commerce, transport, storage and communications and other services.

The statement reveals that as compared to the State, Patna has a lower proportion of workers in the primary sector. Thus, against 326 persons per 1,000 engaged in primary sector in Bihar, the proportion is as low as 258 in Patna. The number per 1,000 engaged in secondary sector in the district is slightly lower than the State, while in the tertiary sector the

proportion is higher in the district. This may be indicative of comparative 'progressiveness' of the district. This pattern holds good for both rural and urban areas.

As in the State so in the district, the primary sector claims the largest proportion in rural areas, while the tertiary sector does so in urban areas.

Industrial Category of Workers

Workers have been classified into nine industrial categories depending on the sector of economic activity in which they are engaged. In case of a person doing more than one kind of work, such classification has been done on the basis of principal work determined by the one which consumed the greater part of his working time.

The statement below shows the distribution of 1,000 workers in Patna district and Bihar State by nine industrial categories separately for persons, males and females:

Distribution of 1,000 workers in Patna district and Bihar State by industrial categories, 1961

Working	Proportion per 1,000 workers					
	Patna district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
I As Cultivator	407	433	338	539	534	547
II As Agricultural labourer	267	196	450	230	199	294
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.	13	14	9	34	42	18
IV At Household Industry	55	46	76	55	46	73
V In Manufacturing other than Household Industry	37	48	10	22	30	6
VI In Construction	12	15	5	5	8	1
VII In Trade and Commerce	49	60	22	27	35	12
VIII In Transport, Storage and Communications ..	26	36	1	12	17	N
IX In other Services	134	152	89	76	89	49

N —denotes negligible figures.

It is evident that 67.4 per cent of the workers in Patna district are engaged in cultivation and agricultural labour. The corresponding proportion for the State is 76.9 per cent. The extent of agricultural employment in Patna is, therefore, below the State average. It is somewhat depressing to find that although the proportion of cultivators (40.7 per cent) is much lower than that of the State (53.9 per cent), the proportion of agricultural labourers (26.7 per cent) is higher than the State average (23.0 per cent). It may be noted that agricultural labourers are persons who work in other persons' land for wages in cash, kind or share, without having any right, title or interest in such land. These proportions, therefore, are rather revealing in regard to the State of agriculture in the district. It is also to be noted that proportion of agricultural labourers are relatively high among females. A good proportion (54.82 per cent) of female agricultural labourers belong to Scheduled Castes.

Patna does not have any mine except a few stone quarries. The employment in category III is, therefore, considerably lower than in the State, the proportion being somewhat less than half. The proportion of workers in category IV (household industry) is the same for the district and the State. The details of household industries will be found later. In other categories, viz., manufacturing other than

household industry, construction, trade and commerce, transport, storage and communications, and other services, the proportions of workers in Patna district are comparatively higher than those in the State.

Female Participation

An idea of the extent of female participation in economic activities can be had from a consideration of sex ratio among workers in each industrial category. The following statement gives the relevant figures for Patna district and Bihar State, separately for total, rural and urban areas as well as for each industrial category, total workers and total population :

Number of females per 1,000 males among workers in different industrial categories in Patna district and Bihar State, 1961

Categories of workers	Patna district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Total Population	937	971	813	994	1,012	811
Total Workers	389	448	157	485	515	163
I Cultivators	303	302	346	496	497	380
II Agricultural Labourers	891	896	738	716	717	650
III Workers in Mining, Quarrying, etc. ..	259	285	139	204	210	169
IV Workers at Household Industry	640	791	322	755	801	407
V Workers in Manufacturing other than Household Industry.	80	130	48	105	162	59
VI Workers in Construction	121	163	67	91	88	95
VII Workers in Trade and Commerce	146	216	83	166	218	77
VIII Workers in Transport, Storage and Communications.	9	3	13	12	11	13
IX Workers in Other Services	227	287	171	267	302	181

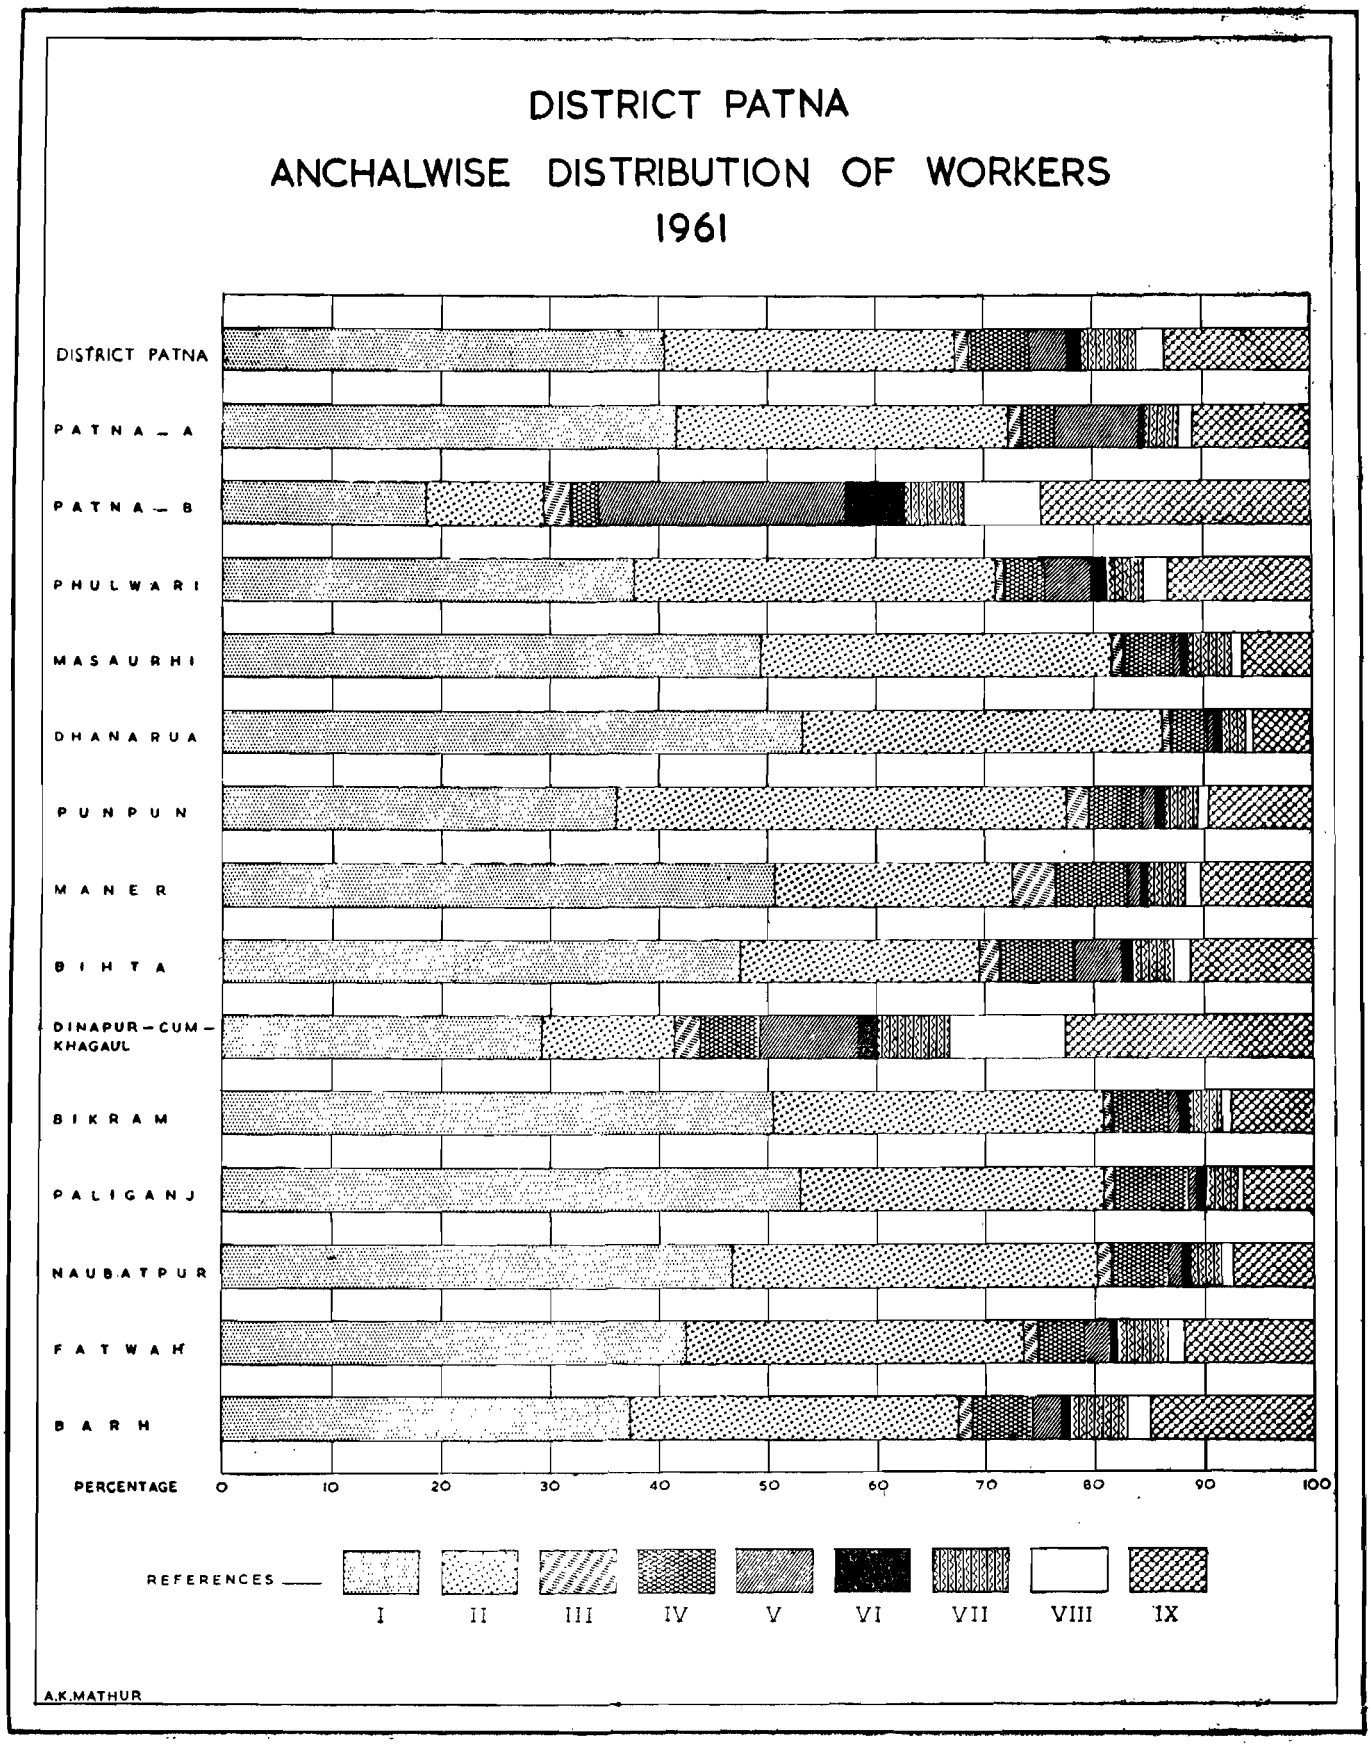

In the State as well as the district, household industry and agricultural labour provide the greatest scope for female participation in economic activity. For every 1,000 males working in categories II and IV in Patna, there are 891 and 640 females respectively working in them. The former proportion is higher than that of the State, while the latter is lower. Almost 47 per cent of the workers among agricultural labourers are females, the corresponding proportion engaged in household industry being 39 per cent. Female participation in transport, storage and communications is almost insignificant. The proportion in this category is lower than that in the State. It is noteworthy, however, that Patna has better female participation rates in Categories II, III and VI than the State. Another notable feature is that the participation of females in rural areas is higher than that in urban areas in all the categories except I and VIII.

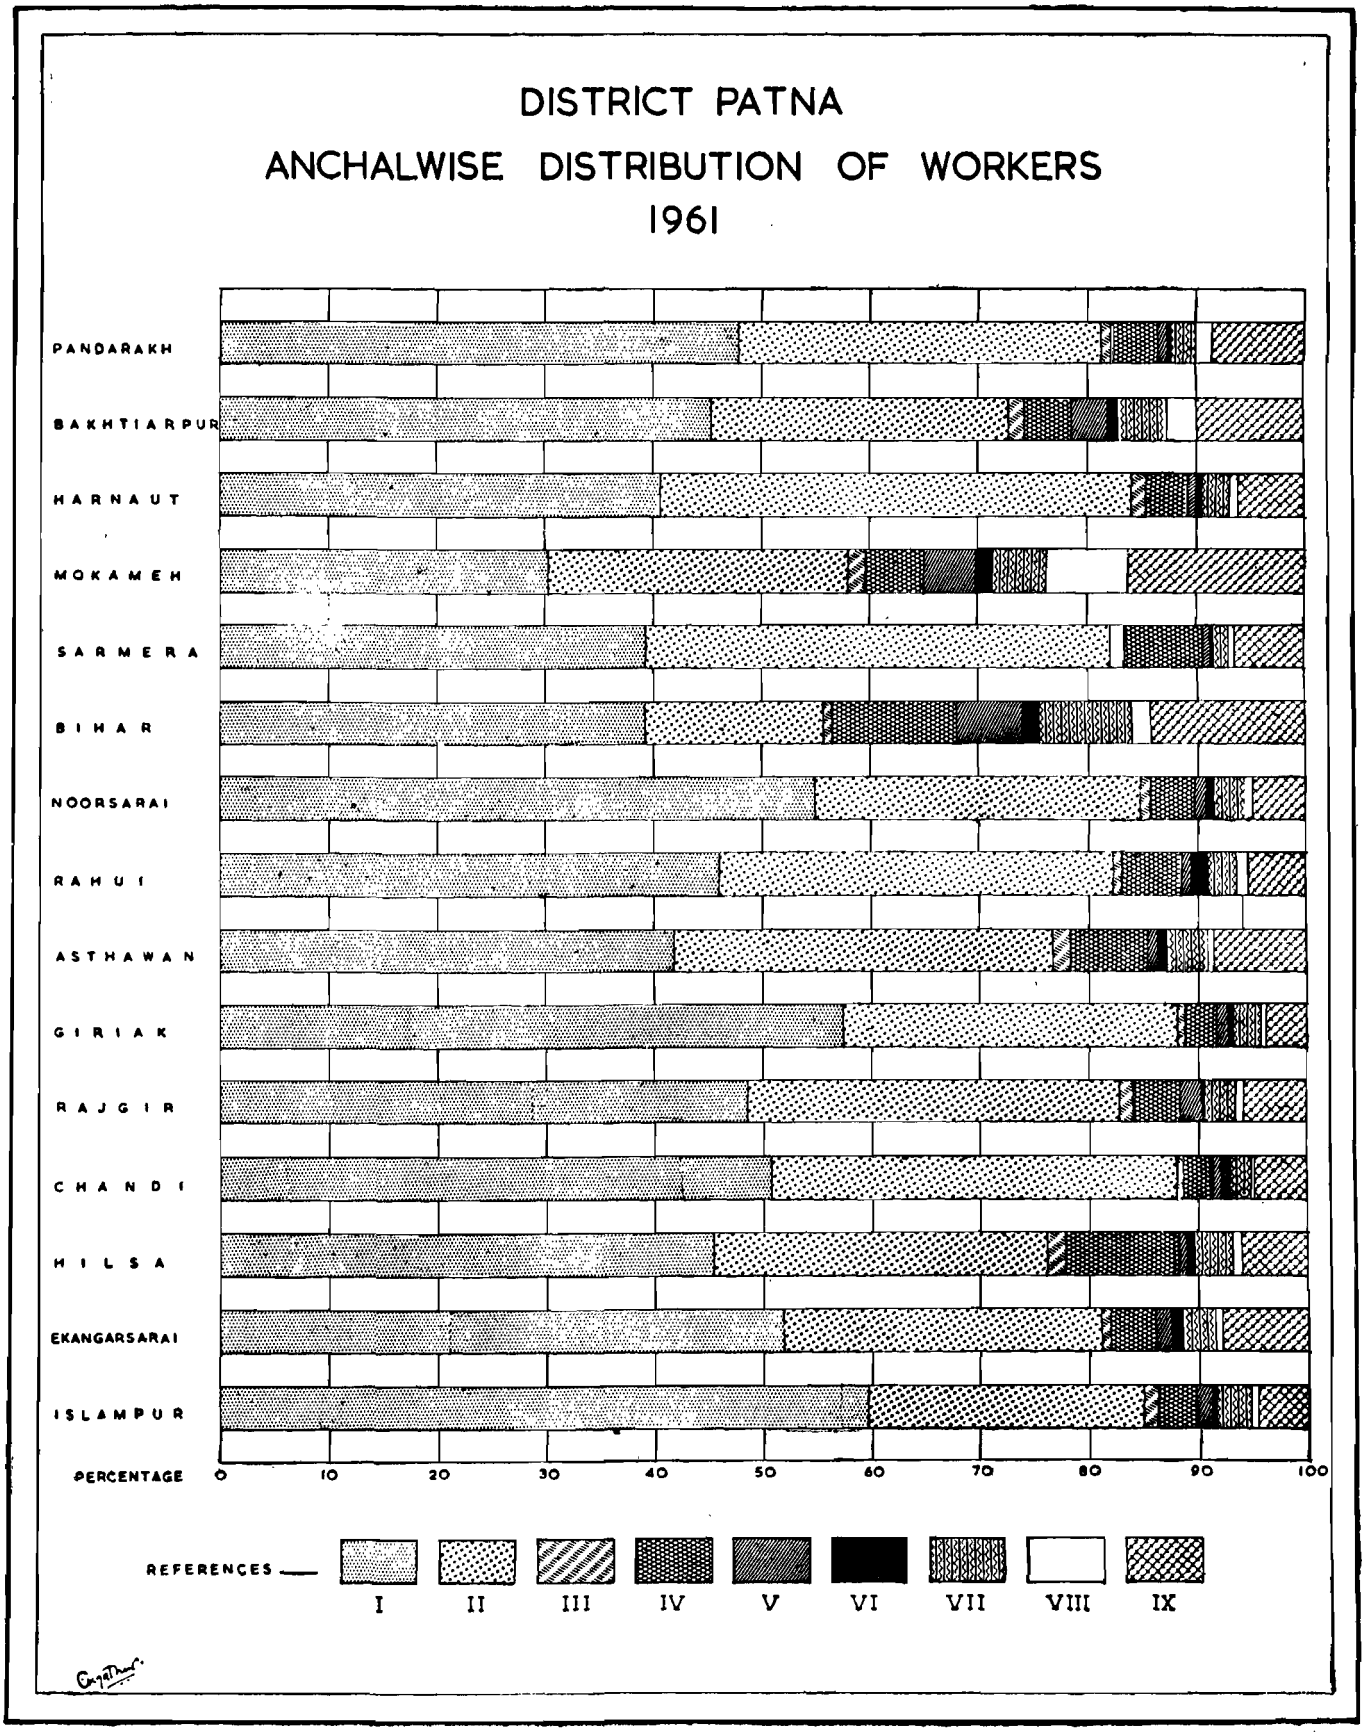

Participation Rates in Anchals

The participation rates at lower levels, viz., subdivisions and anchals may now be considered, for they give a better idea of the regional differences within the district. The statement below gives the relevant information :

Number of workers per 1,000 males and females in subdivisions and anchals of Patna district, 1961

26. Hilsa ..	534	356
27. Ekangar Sarai ..	530	251
28. Islampur ..	532	258

NOTE : Patna Municipal Corporation including Pataliputra Housing Colony falls both in Patna Sadar and Patna City subdivisions, and it has been accounted for accordingly.

So far as the male participation rate is concerned, there is not much variation among the subdivisions. The rates vary between 500 in Patna City subdivision and 529 in Barh subdivision. Among the anchals also the variations are not very wide. Sarmera anchal has the highest participation rate (546) and Bihar the lowest (504). Among females there is great fluctuation. The rates vary from 101 in Patna Rural anchal to 356 in Hilsa anchal. Beside Hilsa (356), only two anchals, viz., Sarmera (329) and Giriak (313) have participation rates above 300. As many as 19 out of the remaining 25 anchals have participation rates varying between 200—300. The remaining 6 anchals have rates below 200. It is significant to note that Sarmera, Pandarakh, Rajgir and Harnaut which have high male participation rates have low densities of population.

Workers by Age groups

The statement below shows the percentage of workers in each broad age-group in Patna district and Bihar State, separately for persons, males and females :

Percentage of workers in broad age groups in Patna district and Bihar State, 1961

Age groups	PERCENTAGE OF WORKERS					
	Patna district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
All ages ..	**37.59**	**52.45**	**21.74**	**41.40**	**55.60**	**27.12**
0—14 ..	4.42	5.18	3.58	7.84	9.64	5.94
15—34 ..	56.65	80.49	32.36	63.90	87.65	41.39
35—59 ..	70.83	96.86	41.66	73.29	97.40	48.34
60+ ..	49.78	79.14	21.01	50.26	82.26	23.09
Age not stated ..	44.03	56.79	17.99	42.84	56.13	22.25

The proportion of child workers (age group 0—14) in Patna is appreciably lower than that in the State for boys as well as girls. Since the overall participation rates are lower in Patna, the proportions of workers among young and middle-aged persons are also lower. It is, however, seen that in the State as well as in the district, the age group 35—59 contains the largest proportion of workers. This is easily explained by the fact that the age group 15—34 includes a considerable proportion of students as well as fresh entrants in the employment market. It is significant to note that the proportion of workers in all the age groups, and for both the sexes, are lower in Patna than in the State. This simply underlines the lower participation in Patna district as compared to Bihar State in the overall population as well as in the individual age groups.

Workers by Literacy and Educational levels

The following statement gives an idea of the distribution of workers by literacy and educational level for Patna district and Bihar State :

Workers by literacy and educational level for Patna district and Bihar State, 1961

Educational level	Percentage of workers	
	Patna district	Bihar State
1	2	3
Total workers	**100.00**	**100.00**
Illiterates	65.23	78.45
Literates	34.77	21.55
(*i*) Literate (without educational level).	24.22	15.84
(*ii*) Primary or Junior Basic ..	6.43	3.86
(*iii*) Matriculation and above ..	4.12	1.85

It has been observed earlier that the extent of literacy in Patna district is higher than that in the State. This is true among the workers also. The literacy rate is higher not only in respect of mere literates (without educational level) but also for those who have attained the Primary or Junior Basic as well as Matriculation or higher standards. The difference is more marked in case of latter.

Status of Employment

Workers in industrial categories III and V to IX have been classified further by four kinds of employment status, viz., employer, employee, single worker and family worker. An *employer* is a person who has to employ other persons in order to perform the work in which he is engaged. An *employee* is a person who usually works under some other person for salary or wages in cash or kind. A *single worker* is a person who works by himself, i.e., he is not employed by anyone nor does he employ anyone, not even members of his household except casually. A *family worker* is a member who works without receiving wages in cash or kind in some industry, business or trade conducted mainly by members of the family, and ordinarily does at least one hour of work every day during the working season. For further elucidation of these terms a reference may be made to the flyleaf to Table B-IV Part B*.

The statement below shows the distribution of workers by employment status for Patna district and Bihar State :

Distribution of 1,000 workers (other than those in agriculture and household industry) in Patna district and Bihar State by employment status, 1961

Class of worker	Number per 1,000 workers					
	Patna district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Total workers ..	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**	**1,000**
Employers ..	58	31	85	41	30	67
Employees ..	452	336	565	463	407	590
Single workers ..	389	480	300	377	419	280
Family workers ..	101	153	50	119	144	63

Employees constitute the largest proportion (45.2 per cent) of workers. It is so in urban areas of the district also (56.5 per cent) but in rural areas single workers constitute the most important group (48.0 per cent). This is so because of large number of workers returned under Minor groups 040 (dairying), 640 (retail trading in cereals, pulses, etc.) as well as Major groups 40 (Construction), 82 (medical and health services), 83 (religion and welfare services), 88 (personal services) and 89 (services, not elsewhere classified).

*Census of India 1961, Bihar, Volume IV, Part II-B(*i*), General Economic Tables.

Households and their Economic Activities

It is well known that the main economic activities of households in the State as in Patna are cultivation and household industry. The information collected on the basis of Individual Slips has, therefore, been supplemented in 1961 by further data in Household Schedules on the aforesaid two economic activities of the household as a unit. Tables B-X, B-XI, B-XVII and C-I given in this volume are based on 20 per cent sample of household schedules. Other household economic tables have been published in Parts III(*i*) and III(*ii*) of the 1961 Census Publications relating to Bihar. The following statement gives the distribution of sample households according to their participation in cultivation and household industry :

Distribution of households by their economic activity, 1961

Kind of activity	Patna district			Bihar State		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
All households	**100**	**100**	**100**	**100**	**100**	**100**
(*i*) Households engaged neither in cultivation nor in household industry.	43	33	84	28	23	81
(*ii*) Households engaged in cultivation only.	49	59	9	64	68	13
(*iii*) Households engaged in household industry only.	4	3	6	2	2	5
(*iv*) Households engaged both in cultivation and household industry.	4	5	1	6	7	1

Cultivating households with or without household industry comprise only 53 per cent of the households, a proportion much below the state average of 70 per cent. In fact, except the district of Dhanbad (44 per cent), Patna has the lowest proportion of households engaged in cultivation with or without household industry. It may be noted, however, that these figures do not take into account households whose members work merely as agricultural labourers. In rural area the proportion of cultivating households is naturally higher (64 per cent). 43 per cent of the households in the district are engaged neither in cultivation nor in household industry. This proportion is more than 1½ times the average for the State (28 per cent). A mere 4 per cent is engaged exclusively in household industry only. Compared to the State, the participation of households in household industry is somewhat higher in both rural and urban areas. The two proportions for the district and the State, however, more or less agree if all households engaged in household industry with or without cultivation are taken into consideration.

Nature and Size of Land holdings

68 per cent of the cultivating households in the district of Patna cultivate lands which they own. The proportion in the district is the same as in the State. About 8 per cent of the households cultivate land held from private persons or institutions as against 7 per cent for the State. This category evidently includes households of lease-holders as well as share-croppers. The remaining 24 per cent of the cultivating households have mixed tenancies in the sense that they cultivate lands partly owned or partly held from others. The corresponding proportion in the State is 25 per cent. The possibility of concealment in furnishing information relating to the extent of share-cropping cannot be ruled out. The statement below shows the distribution of sample cultivating households in rural areas by the size of land cultivated by them :

Distribution of cultivating households in rural areas by the size of their holdings, 1961

Size of land (in acres)	Percentage of cultivating households to total cultivating households in rural areas	
	Patna district	Bihar State
1	2	3
All sizes	**100.00**	**100.00**
Less than 1	22.14	21.51
1.0—2.4	23.61	26.65

Distribution of cultivating households in rural areas by the size of their holdings, 1961—*concld.*

Size of land (in acres)	Percentage of cultivating households to total cultivating households in rural areas	
	Patna district	Bihar State
1	2	3
2.5—4.9	21.68	23.34
5.0—7.4	13.47	12.20
7.5—9.9	5.72	5.10
10.0—12.4	4.29	3.70
12.5—14.9	2.42	1.80
15.0—29.9	5.14	4.21
30.0—49.9	1.14	1.01
50+	0.37	0.42
Unspecified	0.02	0.06

It follows that 67.43 per cent of the households cultivate land below 5 acres each. The corresponding proportion for the State is higher (71.50 per cent). It is evident from the table that the incidence of small sized holdings in Patna is comparatively lower than in the State. It is significant to note that more than one fifth (22.14 per cent) of the cultivating households in rural areas of the district have less than one acre each, and little less than one half (45.75 per cent) have less than 2.5 acres each. 13.36 per cent or approximately one out of every 8 cultivating households has holding of 10 acres or more. Holdings over 50 acres are owned by a mere 0.37 per cent of households.

Non-workers

Table B-IX at page 52 of Part I gives the classification of non-workers by different kinds of activity. It is to be noted that 62.4 per cent of the population of Patna district consists of non-workers. This is a proportion considerably higher than the State average of 58.6 per cent. Among males, the proportion of non-workers is naturally low (47.6 per cent). Among females, it is as much as 78.3 per cent. The following statement gives the distribution of 1,000 non-workers in Patna district and Bihar State by their type of activity :

Distribution of 1,000 non-workers in Patna district and Bihar State by the kind of their activity, 1961

Description	Number per 1,000 non-workers					
	Patna district			Bihar State		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
1. Full time students	179	367	57	126	273	36
2. Engaged in household duties	281	2	461	270	3	435
3. Dependants, infants and disabled persons ..	529	607	477	596	709	526
4. Retired, rentier or independent means.. ..	5	9	3	2	3	1
5. Beggars, vagrants, etc.	2	4	2	2	3	2
6. Inmates of institutions	N	1	N	1	2	N
7. Persons seeking employment for the first time ..	3	7	N	2	4	N
8. Unemployed but seeking work	1	3	N	1	3	N

N— denotes negligible figures.

Dependants, infants and disabled persons comprise the largest element (52.9 per cent) among non-workers. 60.7 per cent of non-workers among males and 47.7 per cent among famales belong to this category. The next important category among males consists of

full time students who account for over one third (36.7 per cent) of the non-working population, a proportion much above the State average of 27.3 per cent. Among females 46.1 *per cent of the non-workers are engaged in* household duties. This proportion is slightly higher than the State average (43.5 per cent). The proportion of beggars and vagrants is of the same order in Patna as in the State. The figures relating to unemployed persons give an impression of well-nigh full employment. The explanation will become obvious if the basis of economic classification of the 1961 census is taken into account. Much of the unemployment in this country, particularly in the rural sector, is in the nature of under-employment. A reference to the concept and definition discussed earlier would show that most under-employed persons would have been returned in the census as workers. Even students and other categories listed among non-workers would have figured as workers if engaged in some kind of work or the other. Non-workers by definition are only those who are not engaged in any kind of economic activity. The number of such persons is naturally very limited.

17. VITAL STATISTICS

The two vital events of life are birth and death. Statistics relating to these are collected in Bihar under the Bengal Births and Deaths Registration Act, 1873 which makes the registration of births and deaths compulsory. This Act extends over the whole of Patna district. In the past, village *chowkidars* were the primary reporting agencies in rural areas. Since 1959-60, however, the work has been entrusted to the Panchayat Sevaks who are now the registering authority. Compilation of data is done by the Junior Statistical Supervisors at the anchal level and by the District Statistical Officer at the district level. In municipal areas the municipal body is supposed to maintain the necessary record and transmit the information. Compilation and analysis of data for the State is done by the Directorate of Statistics, Bihar. Since the beginning of 1965, however, these data are directly transmitted to the State headquarters from the anchal level for further processing.

During the period 1951—60, 212,817 male and 194,662 female births were registered. The number of deaths recorded during the same period was 111,748 males and 103,818 females. Thus, the net addition to the population of the district on account of natural events was 101,069 males and 90,844 females. According to the Census of 1961, the increase over the 1951 population of the district was 225,421 males and 196,053 females. This was, of course, based on the *de facto* population which included immigrants. It has been stated earlier that Patna gains heavily in the balance of migration (that is difference of immigration over emigration). In the category of inter-district migration alone, the order of gain was 19,738 males and 30,990 females. The number of emigrants from Patna district to other States of India is not known. In absence of which it is not possible to ascertain the net gain as a result of in-migration from other States. Table D-II* shows that a total of 30,540 immigrants from other States of India were found in this district. Another 8,652 persons (including 1,567 whose place of birth was unclassifiable) were enumerated in the district. Even so, the actual decadal increase is not explained adequately. The order of actual increase in population by natural events in the last decade was, therefore, considerably more than what was revealed by the registered figures of births and deaths and the extent of under-reporting is enormous.

18. NATURAL CALAMITIES

The following is a chronological list of natural calamities in the district.

1866	Famine
1874	Famine
1897	Famine
1901	Flood
1913	Flood
1923	Flood
1927	Drought
1929	Flood
1931	Drought
1932	Drought
1933	Flood
1935	Drought
1935	Flood
1936	Flood
1938	Drought
1939	Drought
1940	Drought
1946	Flood
1948	Flood
1949	Drought
1950	Drought
1951	Drought
1954	Drought
1957	Scarcity

*Census of India, 1961, Volume IV, Bihar, Part II-D, Migration Tables.

19. AGRICULTURE AND IRRIGATION

Table AS-III at page 144 of Part I gives the statistics on land utilisation. Out of a total area of 13.62 lakh acres, the cultivated area (consisting of net area sown and current fallows) is 10.98 lakh acres or 80.64 per cent of the total area. This represents a decrease of 28,534 acres or 2.53 per cent over cultivated area (11.27 lakh acres) in 1951, due largely to an increase in the land put to non-agricultural uses by about 49,000 acres.

The *per capita* availability of land in the district has declined from 0.54 acre in 1951 to 0.46 acre in 1961. This is considerably lower than the State average of 0.92 acre in 1961. A better idea of the pressure on land can be had by considering the proportion of net area sown to the total population. This is termed as agricultural holding *per capita*. The agricultural holding *per capita* in the district is 0.34 acre as compared to 0.43 acre for the State. The average size of agricultural holding per cultivating household is 5.25 acres in Patna as against 4.85 acres in the State. Thus, Patna has a slight edge over the State in regard to the size of holding per cultivating household. Even in regard to intensity of cropping, the index for Patna is 160.44 as against 138.28 for the State (assuming the net area sown to be 100). This is one of the highest in the State and is so mainly because 42.76 per cent of the net area sown in Patna district is irrigated, the corresponding percentage for the State being 18.56. The district of Shahabad alone has higher intensity of cropping (170.05).

Rice is the main crop of the district. It accounts for 41.3 per cent of the gross area sown. Other foodgrains like maize, pulses, etc., account for 44.8 per cent, and wheat 6.8 per cent. Non-food crops are grown in only 1.8 per cent of the gross area sown and comprise mostly of oil seeds. The cropping pattern is indicated in Table AS-III at page 144 and its subsidiary tables at pages 149—153 of Part I.

The gross irrigated area in the district has risen from 6.26 lakh acres in 1951 to 6.52 lakh acres in 1961, an increase of only 4 per cent.

Patna is one of the few districts of the State which had a net work of irrigation canals since the British days. Even so, after independence in 1947, considerable attention has been paid to the provision of irrigation facilities. Some of the schemes executed in the district are noted below :

Name of Project	Approximate cost	Area to be benefited
	Rs.	Acres
1. Panchane Irrigation Project ..	336,035	10,000
2. Mokameh Tal Irrigation Project ..	129,434	5,000
3. Lokain Irrigation Project ..	553,648	10,000
4. Kulti Irrigation Project ..	918,142	7,000
5. Bharthanan Irrigation Project ..	697,593	7,000
6. Sirnama Irrigation Project ..	800,000	6,250

In addition to the above, tube-wells under the Patna-Barh-Ekangar Sarai-Bihta Emergency River Pump and Technical Co-operation Administration Schemes were installed in the district and some *pynes* were also renovated.

Notwithstanding the expansion of irrigation facilities and provision of other facilities such as improved seeds, more fertilisers and better agricultural practices, the yield rates of principal crops (Table AS-VI at page 146 of Part I) do not show commensurate results. Wide variations are noticed from year to year. Of course, there are too many gaps in the data available and it will be hardly safe to draw any firm conclusions. However, the yield of gram and sugarcane has registered increase in their yield rates.

The dependence of the bulk of population on agriculture has been alluded to earlier. Every 100 acres of net area sown provides employment to 45 cultivators and 30 agricultural labourers. The latter consisted of mainly field workers, whose daily wages declined from Rs. 2.09 in 1951 to Rs. 1.09 in 1960 for males, Rs. 1.64 to Rs. 1.02 for females and Rs. 1.24 to Re. 0.90 for children per day. Table AS-VII at page 147 of Part I gives data relating to average daily wages. It needs to be stated here that some of the trends revealed by the statistics are *prima facie* unacceptable. Judging by common experience, one is inclined to think that the daily wages of labourers, including those in agriculture, have been going up. But the above mentioned figures tell a different story.

20. LIVESTOCK

The livestock population of Patna, according to the 1961 Livestock Census, is 1,119,014. This represents an increase of 87,835 over the 1956 population (1,031,179). Only Dhanbad has a smaller number (714,474). Cattle population in the district stands at 557,708 (which includes cows, bulls and bullocks). With regard to cattle population again, only Dhanbad has a smaller number than Patna. But the district is not as much behind in regard to the population of buffaloes. It has 236,313 heads of buffaloes and is thus ranked eleventh in the State (the State has 17 districts).

Table LVT-II at page 154 of Part I gives figures relating to livestock and poultry by five-year periods, and also indicates the variation from one census to another. It is seen that while all categories of livestock and poultry have recorded increase in 1961, only cows, buffaloes, she-buffaloes, and sheep have recorded decline. A census of poultry (fowls and ducks) was taken for the first time in 1945 and, in the last 15 years, their number has nearly doubled. This is largely due to the attention paid to poultry development by the Community Development Blocks. The Government Poultry Farm at Patna has become very popular and its eggs are in great demand in the city. The city is also served by a Milk Supply Scheme introduced by the State Government.

Table LVT-I at page 153 of Part I gives the number of veterinary hospitals, dispensaries and doctors in each year of the last decade. There are 3 veterinary hospitals and 28 dispensaries in the district manned by 29 veterinarians. Although the number of veterinary dispensaries has increased from 8 to 28 in the last decade, there is scope for further increase in view of the large livestock population. The only Veterinary College in the district is located in the city of Patna.

21. INDUSTRIES

Registered Factories

According to records maintained by the Chief Inspector of Factories, Bihar, there are 630 registered factories in Patna district. These provided employment to 10,825 workers daily on an average, in 1960. Of these, as many as 475 are located in towns and 155 in rural areas. While the registered factories in towns are of various kinds, those in rural areas are mostly flour, rice and oil mills. The number of saw mills and workshop for wood-work is nearly half of their number in towns. While there are 10 units of cold storage in towns as many as 4 are located in rural areas. Among the large industrial establishments of the district are Shri Lakshmi Cold Storage Ltd., Patna City, Pradip Lamp Works, Patna City, South Bihar Sugar Mills Ltd., Bihta, Bata Shoe Co. Ltd., Digha Ghat and Mokameh, The Bihar Cotton Mills, Phulwarisharif, Shri Baidyanath Ayurvedic Bhawan Ltd., Patna, Hindusthan Manufacturing and Industrial Corporation Ltd., Phulwarisharif, The Patna Electric Supply Co. Ltd., Patna and Britania Engineering Co. Ltd., Mokameh.

Houselist figures of Industrial Establishments

During the houselisting operations preceding the 1961 Census, an attempt was made to assess the number of industrial establishments, registered or otherwise, engaged in any kind of "production, processing, repair or servicing or where goods or articles are made and sold". The enquiry revealed that Patna had, in all, 13,786 industrial establishments—7,812 in rural areas and 5,974 in urban areas. The Patna Municipal Corporation area alone has as many as 3,548 units. The production of sweetmeat and condiments, *muri, murki, chira, khoi*, etc., accounted for the largest number (1,967) followed by manufacture of textile garments (1,538). The manufacture of earthenware and earthen pottery engaged 1,308 establishments and manufacture of nuts, screws, bolts, etc., 1,112. Cotton weaving on handloom covered 947 establishments. The statement on the next page gives the

subdivisionwise break up of five major industries in the district :

Major Industrial establishments in Patna district by subdivisions, according to houselisting in 1960

Serial no.	Industrial Code no.	Particulars of the industry	Number of Industrial Establishment					
			District total	Patna Sadar sub-division	Patna City sub-division	Dinapur sub-division	Barh sub-division	Bihar sub-division
1	2	3	4	5	6	7	8	9
1	209	Production of sweetmeat and condiments, *muri, murki, chira, khoi, cocoa, chocolate,* toffee, lozenge.	1,967	404	282	436	326	519
2	273	Manufacture of textile garments including rain coats and head-gear.	1,538	393	257	311	191	386
3	350	Manufacture of earthenware and earthen pottery.	1,308	180	92	352	142	542
4	369	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery.	1,112	256	143	295	100	318
5	235	Cotton weaving in handlooms ..	947	25	31	312	40	539

Household Industries

In view of the great importance of household industry to the general economy of this country, the number of persons engaged in household industries was separately recorded and tabulated in Census of 1961. A household industry was defined thus :

> "An industry conducted by the head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be at the scale of a registered factory. A household industry would relate to production, processing, servicing and repairing and includes makers and sellers of goods."

In the district of Patna, 60,655 persons were found engaged in household industries. Their breaking industrywise will be found in Table B-IV Part C.* They comprised 5.5 per cent of the total working population of the district. The number of persons engaged in the five numerically important household industries is indicated below :

Sl. no.	Industrial code no.	Particulars of the industry	No. of workers at work
1	2	3	4
1	350	Manufacture of earthenware and earthen pottery.	7,102
2	220	Manufacture of bidi	5,471
3	200	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and foodgrains.	5,445
4	209	Production of other food products such as sweetmeat and condiments, *muri, murki, chira, khoi,* cocoa, chocolate, toffee, lozenge.	5,166
5	231	Cotton spinning (other than in mills)	5,001

Silao in Patna district is famous for *khaja* (crisp but sweet preparation of *maida*) and *choora* (parched rice). Maner's *laddu* (sweet prepared from *besan*) has also a name. The traditional lacquerware craft of Mogalpura in Patna City is being developed under the patronage of the State Government.

22. TRADE AND COMMERCE

In Patna district, trade consists mainly of exporting pulses, dry chillies, castor seed, milk products and vegetables and of importing cotton textiles, iron and steel products, cement, coal and consumer goods.

According to 1961 Census, 54,600 persons out of a total working population of 1,108,905 in the district are engaged in trade and commerce. In other words, 4.9 per cent of the working population has been returned as work-

*Census of India 1961, Volume IV, Bihar, Part II-B (*i*).

ing in trade and commerce. Their distribution by sex and employment status is given below :

Persons at work in trade and commerce	Males	Females
Total	**47,648**	**6,952**
As employer	10,418	412
As employee	8,747	334
As single worker	19,697	3,495
As family worker	8,786	2,711

According to the houselists prepared on the eve of the 1961 Census, Patna had 15,050 shops excluding eating houses, 8,593 shop-*cum*-dwellings and 3,209 business houses. Their break up by rural and urban areas is given below :

Sl. no.	Nature of business	Number of establishment	
		Rural	Urban
1	Shop-*cum*-dwellings ..	5,257	3,336
2	Shops excluding eating houses ..	6,563	8,487
3	Restaurants, sweetmeat shops and eating places.	319	198
4	Business houses and offices ..	1,101	2,108

A list of banking offices will be found in table ADM-X at page 168 of Part I. Patna which is the district headquarters as well as the State headquarters, has as many as 17 banking offices, the State Bank of India and the Bank of Behar having three offices each and the Allahabad Bank, the Central Bank of India and the Punjab National Bank having two offices each in the town. Cash transactions for the treasury at Patna and the sub-teasuries at Barh and Biharsharif are conducted by the State Bank of India. The Dinapur subdivision does not have a branch of the State Bank of India and the sub-treasury there has to handle cash transactions for Government also.

23. POWER

The district receives its entire power supply from the Damodar Valley Corporation and the Power House of the Patna Electric Supply Co. Ltd.

All the 10 towns of Patna district have electricity now. In rural areas, however, the pace of electrification has been comparatively slow, though in terms of proportion Patna is, of course, better provided than any other district of the State. Out of 2,395 inhabited villages in the district 494 villages were electrified up to March, 1961. The consumption of electrical energy in the city of Patna during the period from March, 1960 to February, 1961 was 42,434, 428 KWH. Its break up is given alongside.

Nature of consumption		KWH.
1		2
1. Domestic	(*a*) Heat and small power	1,078,444
	(*b*) Light and fan ..	11,896,481
2. Commercial	(*a*) Heat and small power	249,199
	(*b*) Light and fan ..	8,113,253
3. Industrial	(*a*) Low and medium voltage.	4,759,392
	(*b*) High voltage ..	11,355,002
4. Public lighting ..		721,894
5. Irrigation		181,065
6. Public water work and sewerage pumping. ..		4,079,698

SOURCE : Electrical Executive Engineer, Patna Electric Supply Division.

NOTE : The figures also include the consumption of area under Dinarpur Nizamat Municipality and Khagaul Municipality.

24. LAND REFORMS AND REVENUE ADMINISTRATION

The district of Patna like others in the State contained a large number of intermediaries. With the enactment of the Bihar Land Reforms Act, 1950 and its subsequent amendments, all these estates of the intermediaries vested in the State Government. In the beginning, the estates and tenures of big proprietors having an income of above Rs. 50,000 each were taken over. Later, in pursuance of Government Notification no. 631-LR., dated the 26th January, 1955, all other intermediary interests also vested in the State.

With the abolition of *zamindari* in the district, a vast machinery had to be built up for collection of rent and management of land. It comprises at present of an Additional Collector, 5 Land Reforms Deputy Collectors (one in each subdivision) and 28 Anchal Adhikaries and Circle Inspectors (one for each Anchal). The Collector and the Subdivisional Officers head the revenue administration at the district and subdivisional levels respectively. At the village level, there is a Karmachari for each of the *halkas* (on an average 8—12 *halkas* constitute an

anchal). The Karmachari is required to collect rent from tenants, look after Government properties, e.g., Government *hats*, *bazars*, tanks, trees, etc., make enquiries in mutation and other cases, report encroachment on Government lands or illegal cutting of trees, etc., and such other duties connected with the land revenue administration. His work is supervised by the Circle Inspector, Anchal Adhikari and other superior officers. In suitable cases the work of rent collection has been entrusted to Panchayats also. The table given alongside shows the revenue demand of the district in a chronological order.

Period	Demand (in rupees)
After vesting of estates with income of 50,000 and above—	
1951-52	308,129
1952-53	302,830
1953-54	298,450
1954-55	1,223,857
After total vesting—	
1955-56	2,050,796
1956-57	5,953,694
1957-58	7,120,236
1958-59	9,022,013
1959-60	9,536,634

25. PUBLIC HEALTH AND MEDICAL FACILITIES

Public Health

The preventive and curative branches were combined in the early fifties to ensure better co-ordination and control. The Senior Executive Medical Officer of Health is in overall charge of medical programme in the district. He is assisted by the District Medical Officer of Health and an Assistant Health Officer on preventive side and Deputy Superintendents of Hospitals and Civil Assistant Surgeons on curative side.

Malaria, which was a dreaded disease at one time, has now been almost completely eradicated, thanks to the measures taken under the National Malaria Eradication Programme. Cholera and small-pox are also under control. Actual mortality from cholera in the district has not exceeded 1,648 in any year of the decade (1951—60) and the number in 1960 was a mere 467. Small-pox is another dreaded disease which claimed 4,307 lives during the decade 1951—60. The number of deaths in 1960 is only 78 as against 1,434 of 1951. The next largest number of deaths in any one year of the decade due to small-pox was 580 in the year 1958. In 1959 the number came down to 91.

Among other diseases, tuberculosis has received due attention. Apart from the B.C.G. Campaign, T.B. Centres/Wards have been set up at Patna, Barh and Biharsharif. Patna has a T. B. Demonstration Centre as a part of UNICEF Health Programme. The incidence of leprosy in the district is negligible.

Medical facilities

There are 9 hospitals in the district, including the district, subdivisional and other hospitals. Medical facilities below the subdivisional level are available at the 55 dispensaries of which 22 have been taken over under State management and 33 continue to be managed by the District Board. Beside these, there are 5 other hospitals and dispensaries and 17 Primary Health Centres in the district. Three sub-centres are attached to each Primary Health Centre so as to cater to the needs of interior villages.

As many as 1,760 beds are provided in hospitals and dispensaries of the district. This gives a proportion of 1 bed for every 1,676 persons in the district. Similarly, there is on an average one hospital or dispensary to serve an area of 31 sq. miles. The 17 Primary Health Centres have not, however, been taken into account in these calculations.

The Patna City, Biharsharif and Barh subdivisional hospitals and the Rajgir Dispensary have maternity and child welfare centres attached to them. These cater to the special needs of children and mothers. A Family Planning Centre has been started in the Patna Medical College Hospital, the Patna City Hospital and the Gardanibagh Dispensary. The State Dispensaries and Primary Health Centres also take active interest in birth control measures and distribute contraceptives for the purpose.

The premier Medical College and Hospital of the State is located at Patna. A Cancer Hospital and a Blood Bank are also attached to it. The Infectious Diseases Hospital previously located at Gulzarbagh has now been shifted to its new building at Agamkuan.

The district has 198 allopaths, 1,339 homeopaths, 648 *vaidyas* and 87 *hakims*. Thus there is

one medical practitioner for every 1,298 persons in the district.

Table PH-I at page 173 of Part I gives the details of medical facilities. In Part A of this table is shown the number of degree or diploma holding medical practitioners registered in the district at each year during 1951—60.

The number of persons engaged in medical and public health work, as returned in the 1961 Census, is given below :

Family of National classification of occupations	Descriptions	Persons	Males	Females
1	2	3	4	5
030	Physicians and Surgeons, Allopathic.	733	672	61
031	Physicians, Ayurvedic ..	487	478	9
032	Physicians, Homeopathic ..	779	771	8
033	Physicians, Other ..	240	234	6
035	Dentists	2	2	..
039	Physicians, Surgeons and Dentists, n.e.c.	401	379	22
040	Nurses	563	335	228
041	Midwives and Health Visitors	374	59	315
042	Nursing Attendants and Related Workers	a34	199	135
043	Pharmacists and Pharmaceutical Technicians.	780	761	19
044	Vaccinators ..	147	147	..
045	Physiotherapists, Masseurs and Related Technicians.	21	19	2
046	Sanitation Technicians ..	489	487	2
047	Opticians ..	9	9	..
049	Medical Health Technicians, n.e.c. (excluding Laboratory Assistants)	352	346	6

Details of their employment by industrial categories are given in Table B-V of Part II-B(*ii*), 1961 of this State.

BRIEF GAZETTEER OF PLACES IN PATNA DISTRICT

[Compiled from village notes prepared by enumerators during the 1961 Census; accuracy of the information has not been checked in every case.]

Anandpur

A large village (pop. 3,321), situated 5 miles north of Bihta railway station. Contains a centre for training of home guards.

Anikhan

A hamlet lying 5 miles south-east of Bikram on the Bihta-Pali road. It is noted for its large biennial cattle fairs held on the occasion of *Basant Panchami* and *Baisakh Saptami*.

Aspura

A hamlet situated one mile south of Bikram on the Bihta-Pali road. A State sponsored carpentry centre is run in the village. It provides training in the manufacture of various kinds of furniture.

Asthanwan

A large village (pop. 4,989), lying 7 miles east of Biharsharif railway station: the headquarters of an anchal: has a Dak Bungalow.

Baikatpur

A very large village (pop. 6,187) in Fatwah anchal, situated on the southern bank of the Ganga. Noted for its Shiva temple said to have been constructed by Raja Man Singh. Weekly fairs are held on every Monday in the month of *Sravan* and an annual fair on the occasion of *Shivaratri*.

Bakhtiarpur

A small town (treated as such for the first time in the Census of 1961) with a population of 4,548. Headquarters of an anchal. It is situated 28 miles east of Patna on National Highway no. 31 and on the route to Rajgir, Nalanda, Pawapuri and Barauni. It is fast growing into an important transport centre.

Banarsi

A medium sized village (pop. 756), lying on the southern bank of the Ganga about 2 miles north of Barh railway station. Noted for its old temple of Umanath. A large annual fair is held on the occasion of *Shivaratri*. A part of the revenue *mauza* is included in Barh town.

Barh

The subdivisional headquarters of Barh subdivision, situated on the Eastern Railway. It has a population of 18,808 persons.

Begampur

A medium sized village (pop. 1,276), situated 3 miles north of Nalanda railway station. It has many unexcavated mounds believed to cover further ruins of the ancient university of Nalanda. It has two big tanks known as Dighi and Sanaroha.

Bhagwanganj

A large village (pop. 1,552), lying on the western bank of river Morhar situated about 7 miles south-west of Masaurhi and 6 miles west of Nadaul railway station. The village has a police outpost, a health sub-centre and a regular market.

Bharathpura

A large village (pop. 2,418), situated 9 miles south of Bikram on the Bihta-Pali road. Noted for its old library which has about 2,500 rare and old books, manuscripts and *tamra-patras* (copper plates).

Bihar

Bihar (or Biharsharif), the headquarters of Bihar subdivision, lies at a distance of 19 miles south of Bakhtiarpur. It is a railway station on Bakhtiarpur-Rajgir line. It sprang into prominence, during the Gupta period and even today, there stands a pillar 14 feet in height, inscribed with the names of Kumar Gupta (413—55 A. D.) and Skanda Gupta (455—67 A. D.). It was also the capital of Pala kings. According to the Tibetan chroniclers, Gopal I, founder of the Pala Empire, had built a Vihar or monastery and hence, the name of this town and State. It contains many graves of *pirs*—the most famous being that of Makhdumul-Mulk and therefore, it has

of stone images. Some ancient stone images have also been found in the village.

Giriak Bahbolpur

A large village (pop. 1,649), situated on the Biharsharif-Ranchi road 13 miles south of Biharsharif. The Giriak-Rajgir hill range starts from the western part of this village. The hill-top in the village contains a round temple, traditionally believed to have been built by Jarasandh, the king of Magadh during the Mahabharat age.

Goraila

A small village (pop. 382), situated 3 miles south of the anchal headquarters at Naubatpur. Noted for its tomb of the father of Makhdum Saheb of Biharsharif. It is a place of pilgrimage for Muhammadans.

Hilsa

A very large village (pop. 6,881), the headquarters of an anchal. The telegraph office is at Noorsarai. Hilsa is a rail-head.

Islampur

A very large village (pop. 8,588), the headquarters of an anchal. There is a library in the village known as Kutubkhan Quadarea which has a many Persian and Arabic manuscripts.

Kashmiri Chak

A medium sized village (pop. 546), situated 4 miles north of Islampur railway station. Noted for its tombs of Yusuf Sah and his son Yakub Sah who are believed to have been rebels from Kashmir ; hence, the name of the village.

Katarpur

A small village (pop. 449), situated 8 miles east of the anchal headquarters at Giriak. The village is an important centre for production of *Khadi* and has a large number of *ambar charkhas*.

Khagaul

A small municipal town having a population of 12,227 persons. Situated 4 miles south of Dinapur town. It is a divisional headquarters of the Eastern Railway and is important mainly as a railway colony.

Maner

A large village (pop. 3,332), situated 17 miles west of Patna on the Patna-Arrah road. The headquarters of an anchal. The village derives its name from King Maniar, the remains of whose fortress still exist. It is traditionally believed that the marriage party of Lord Rama halted at Maner both on the outward and return journeys to Janakpur. The village has a magnificent tomb of the Muslim saint Makhdum Saheb, said to have been constructed by Emperor Jehangir in 1660 A. D.

Masaurhi Buzurg

A large village (pop. 7,494), situated 19 miles south of Patna. The headquarters of an anchal. It has a Basic Training School and an Inspection Bungalow and is an important market in the locality. It is a rail-head.

Mokameh

A medium sized town with a population of 35,743, situated 56 miles east of Patna on the southern bank of Ganga. The town is covered by a Notified Area Committee and is a rail-head on the Eastern Railway. The Rajendra Pul across the Ganga is situated eight miles east of the town. Mokameh has a Co-operative Spinning Mill and an engineering concern for the manufacture of locomotive parts. There are large warehouses for stocking grains. There is a large Christian Missionary Hospital. Mokameh is the commercial centre for grains of the wide area known as Mokameh *tal* which is a low-lying tract extending to over 40,000 acres and very fertile for production of *rabi* crops.

Nagwan Khas

A medium sized village (pop. 774), situated 3 miles north of the anchal headquarters at Naubatpur and 6 miles south of Khagaul. It is a model village (adopted by the Rotary Club) in which all the roads and lanes have been paved and adequate drainage and street lighting provided. There are public bathrooms and *pucca* compost pits. The village has its own building for its *panchayat*.

Naipura

A medium sized village (pop. 1,091), situated one mile west of Silao in Rajgir anchal. Noted as a centre for production of fine quality handloom silk cloth. It has a large number of looms working.

Nalanda

Situated 8 miles south of Biharsharif and at the same distance north of Rajgir, internationally renowned as containing ruins of the ancient university of Nalanda. There is a museum containing important sculptures and other articles excavated from the ruins. The Pali Institute has been set up in Nalanda for teaching the Pali language.

Naubatpur

A large village (pop. 2,257), the headquarters of an anchal. It has an *Arya Samaj* temple, built in the beginning of this century.

Nawada

A large village (pop. 3,290), situated 4 miles north-east of Barh railway station. It contains an old tomb of a Muslim saint which is held in reverence not only by the Muslims but also the Hindus. A waiting shed has been constructed for the facility of visitors.

Nisarpura

A large village (pop. 1,334), situated on the bank of river Punpun about 1 mile south of the anchal headquarters at Naubatpur. Noted for its large fairs held on the occasion of *Makar Sankranti* and *Bisua*.

Noorsarai (Charuipar)

Situated 8 miles north-west of Biharsharif on the Soh-Fatwah road, the headquarters of an anchal. It has a High School and 12 Industrial Co-operative Societies. The village has a population of 2,512 persons.

Pakri

A small village (pop. 443), situated on the river Punpun, the headquarters of Punpun anchal. A large number of Hindu pilgrims congregate here in the *pitripaksh* fortnight to offer oblations to their deceased ancestors.

Paliganj

Located 17 miles from Bihta railway station, the village is an anchal headquarters. It has a post and telegraph office.

Pundarakh

Situated in Barh subdivision, it is a very large village (pop. 11,836) and an anchal headquarters. It is a rail-head.

Pareo

A large village (pop. 2,352), situated on the eastern bank of the Sone just south of the Koilwar road-*cum*-rail bridge. Noted as a centre for manufacture of brassware.

Parnawan

A large and ancient village (pop. 1,407), situated 3 miles west of the anchal headquarters at Sarmera. Noted for its old temple called Mahatoji's temple. One-day fair is held every alternate year on the occasion of *Baisakh Purnima*.

Patna

The capital and largest city of Bihar with a population of 364,594. Ruins of the ancient city of Pataliputra have been found in Kumhrar. Patna City area developed in the 16th century ; Bankipur area sprang up in the 18th and 19th centuries while the New Capital area was built up mainly in the last 50 years. Patna has many ancient sacred places and places of worship : the Bari and Chhoti Patan Devi for Hindus, the mausoleum at Sultanganj for Muslims, the Gurudwara in Patna City for Sikhs and the Padri-ki-Haveli (a Roman Catholic Church built in the 18th century) for Christians.

Patna lies on the main line of the Eastern Railway and is well connected by road. A regular steamer ferry service connects it with North Bihar.

Patna is mainly an administrative and educational centre. It is developing and new residential colonies are coming up fast, e.g., Rajendra Nagar, Shrikrishna Nagar, Shrikrishna Puri and Pataliputra Colony.

Pawapuri (Puri)

A large village (pop. 1,267), lying on the fifty-sixth mile of the Patna-Ranchi road, 16 miles

south of Biharsharif. Lord Mahavira is believed to have attained salvation at this place which is now an important place of Jain pilgrimage. It contains a magnificent temple situated in the midst of a large tank. A large fair is held on the occasion of *Dipawali* every year.

Phulwari (Phulwarisharif)

A very large village (pop. 12,262), situated on the Patna-Khagaul road. The headquarters of an anchal. It is an important place for Muslims as it contains an old *Khankah* where some hairs of prophet Mohammad are preserved. Every year on the occasion of Fateh-Duaz-Dahum (the birthday of the prophet) a large fair is held. It attracts an all-India gathering. Phulwarisharif also has an old mosque built of red stone and known as Sangi-Masjid, believed to have been got constructed by Emperor Humayun in 1543 A. D. There is a factory for production of cloth, and another for the manufacture of bicycles.

Rahui

A large village (pop. 4,041), lying on the Bakhtiarpur-Biharsharif road 14 miles south of Bakhtiarpur. It has a small general market.

Rajendra Pul

Located 8 miles east of Mokameh town. It is the longest road-*cum*-rail bridge over the Ganga with a span of 1.25 miles.

Rajgir

A small town with a population of 9,033, situated 16 miles south of Biharsharif. It is the headquarters of an anchal. Rajgir is noted for its hot springs and is an important tourist centre of the State. Rajgir, then known as Rajgriha was the capital of the Magadh emperor, Jarasandh (of the Mahabharat age). The Gridhrakut hill was a place of meditation of Lord Buddha.

Rajgir was included in the list of towns for the first time in 1951. It then had a population of 3,870 only which has risen to 9,033 in 1961 marking an increase of over 133 per cent in the decade 1951—61.

Rani Sarai

A medium sized village (pop. 752), situated one mile east of Bakhtiarpur on the Patna-Mokameh road. Noted for its weekly cattle market, held on every Monday.

Rewan

A large village (pop. 1,545) in Masaurhi Anchal. An ancient stone image of the Sun-God has been excavated from this place and is now preserved in the Patna Museum.

Rupaspur

A large village (pop. 1,222) in Harnaut anchal situated 37 miles south-east of Patna on the Patna-Ranchi road. It has a High School, a State Dispensary and a Dak Bungalow. It is a rail-head on the Bakhtiarpur-Rajgir section of the Eastern Railway.

Sanda

A large village (pop. 1,302), situated 3 miles south-west of Islampur railway station. It was an ancient centre for Buddhist studies. Remains of *stupas*, temples, pillars and stone-slabs with inscriptions have been found in the village.

Seonar

A large village (pop. 3,904), situated 1 mile west of Mokameh. Noted for its temple of Nilkanth Mahadeo. An annual fair is held on the occasion of *Shivaratri*.

Sigori

A hamlet of village Janpur (which has a population of 3,067), situated 7 miles east of the anchal headquarters at Paliganj. An important marketing centre. It has 11 registered co-operative societies.

Silao

A large village (pop. 3,549) in Rajgir anchal. Noted mainly for its production of *khaja* sweets which are of very high quality.

Ular

A small village (pop. 622), situated 8 miles south of Bikram on the Bihta-Pali road. Famous for its temple of the Sun-God. An annual fair is held on the occasion of *chhat* in *kartik* every year.

Wena

A medium sized village (pop. 696) in Rahui anchal. Noted as a centre for production of good quality of *pera* and *mawa*.

A GLOSSARY OF THE BETTER KNOWN ANCIENT MONUMENTS IN THE DISTRICT OF PATNA

NOTE

Along with the houselisting operation conducted in October, 1960, a village note was also prepared by enumerators for each mauza or enumerator's block. The enumerators were required to record information on ancient monuments according to the following instructions :

"Part B (3): Ancient Monuments

A monument means 'anything that preserves the memory of a person or an event, a building, pillar, tomb, tablet, statute, mound, etc.'. The idea here is to collect information about monuments which are of some importance and antiquity, the idea is that the period to which the monument relates should not be less than 150 years old. Religious shrines of some antiquity will be noted under this head as well as item 11 of Part A."

Admittedly, the extent of details collected in this survey is rather meagre and, perhaps, not very authentic. This could not have been otherwise, considering the severe limitations and general handicaps of the enumeration agency. Even so, the comprehensive coverage has yielded some significant data which are presented below for further investigation and research by interested persons.

The list is presented in the same order of subdivisions and anchals as in the Village Directory and Village Statistics. Within an anchal, the villages are arranged in alphabetical order.

SADAR SUBDIVISION

Anchal—Patna Rural (a)

Kumhrar (Thana no. 12)—The excavations carried out in this village in 1913 brought to surface high stone pillars, wooden girders, and copper plates inscribed in the Pali script. The site has been identified as the capital of Magadh in the reign of the Mauryan Emperor Asoka. The stone pillars were a part of an assembly hall which was supported by 80 such pillars. The entire area of excavations has been fenced and is maintained by the Archaeology Department. Some of the stone images and other articles found have been kept in a small museum in the grounds.

Pahari (Thana no. 14)—Excavations in this village yielded articles of the Mauryan period which are preserved in the Patna museum.

Rashida Chak (Thana no. 16)—Contains the ancient Agamkuan, built by Emperor Asoka. According to an account Asoka had hundred brothers. In order that they should not compete for the throne of Magadh, Asoka killed his brothers and threw their bodies in the Agamkuan.

Sabalpur (Thana no. 44)—It has an old well, said to be about 200 years old, known as *Babuaji-ki-Bawli*.

Anchal—Phulwari

Murgia Chak (Thana no. 59)—The village, situated 7 miles from Phulwarisharif, has an old monastery.

Anchal—Masaurhi

Koriawan (Thana no. 189)—The village is situated 3 miles from the anchal headquarters. Excavations have yielded wide brick walls, believed to be ruins of a fort. Ancient stone images have also found. There is also a *pucca* well in the village believed to be over 150 years old.

Saguni (Thana no. 258)—The village, situated 3 miles from Taregna railway station, has a very old well in the northern part. It has such a large circumference that six *lathas* can draw water at a time. It is lined with bricks.

Anchal—Dhanarua

Mai (*Datmai Jaman Bigha*) (Thana no. 270)—The village is situated 7 miles south of the anchal headquarters. It has the *Sati-sthan, Kanhaiya-sthan, Makhdumana Pokhar, Goraiya-sthan,* about which some legends exist. The

Sati-sthan is said to contain the remains of a lady who committed *sati*. The *Kanhaiya-sthan* is a high mound where Lord Krishna is said to have performed *raslila*. Three stone images of Lord Buddha have been found. They are very large, and indicative of the exquisite workmanship for which the ancient sculptures are famous.

Bhergawan (Thana no. 137)—The village contains the ruins of a 200-year old fortress. Excavations have brought to surface large stone pieces and brick-built walls.

Anchal—Punpun

Barawan (Thana no. 70)—Situated six miles from Punpun railway station, the village has some ancient stone images which are objects of worship.

Keora (Thana no. 40)—Lying one mile from Punpun, the village has a tomb of one Makhdum Saiyed Saheb. The tomb is said to be over 150 years old.

Khapura (Thana no. 18)—The village has a large mound, about 8 bighas in area. It has a grave, believed to be over 200 years old. A large stone piece, 4 feet long 1 foot wide, was found in the mound. This led to the belief that the remains of a fortress might be lying buried under the mound.

Parthu (Thana no. 10)—Situated 3 miles from Punpun railway station, the village has the ruins of brick-built wall and also large stone blocks, believed to be ruins of some ancient building. Some damaged stone images have also been found.

Saidpur (Thana no. 14)—Situated 7 miles from Punpun, the village has some ancient stone images which are objects of worship.

DINAPUR SUBDIVISION

Anchal—Maner

Rewa (Thana no. 99)—The village has a very old image of Lord Narsingh which is installed in a temple and worshipped.

Anchal—Bihta

Gokhulpur Kurhar (Thana no. 54)—The village has a very old image of Lord Gokhuleshwar Nath Mahadeva. The image was found on the boundary of village Korhar hence the name of the village, Gokhulpur Korhar. According to a legend, when Ashvatthama (of the Mahabharat age) prayed to Shiva, this image appeared of its own. A temple was constructed in 1942 for installing the image.

Mithapur (Thana no. 19)—The village has a brick-built monument commemorating the spot where a lady committed *sati* over 200 years ago. The monument has no inscriptions.

Anchal—Bikram

Khuraitha (Thana no. 59)—The village has a *Sati-sthan* with a peculiar legend associated with it. It is said that the lady who committed *sati* had enjoined the members of her family and their descendants, NOT to observe *Chhat Vrat* (worship of the Sun) or else they would be destroyed. The *Sati-sthan* is believed to be over a hundred years old.

Saraiya (Thana no. 303)—The village has a large tank named Rani Talao, believed to have been constructed by the Rani of Belkhara about 200 years ago.

Anchal—Paliganj

Mera (Thana no. 353)—The village has an ancient temple (the *Chaturbhuj-sthan*), with an image of Lord Chaturbhuj. The image is belived to date back to the thirteenth century.

BARH SUBDIVISION

Anchal—Fatwah

Baikatpur (Thana no. 135)—Situated 3 miles east of Fatwah, the village has a temple of Gouri Shanker. It is believed to have been got constructed by Raja Man Singh some 450 years ago.

Shahjahanpur (Thana no. 112)—Situated about 5 miles south of Fatwah, the village has the

ruins of two fortresses covered by mounds. It is said that some gold coins of the age of Emperor Vikramaditya were discovered in the village.

Anchal—Pandarakh

Bhagwatipur Karmor (Thana no. 32)—Situated about two miles to the south-west of Pandarakh, the village has a 200-year old Kali temple.

Pundarakh (Thana no. 10)—The village has an old temple of the Sun-God. It is believed that Shyam, the grandson of Lord Krishna established this temple after he was cured from leprosy. The stone images in the temple bear evidence of attempts at demolition by Muhammedans and are believed to be of some hundreds of years old.

Anchal—Mokameh

Samaya (*Isanagar*) (Thana no. 47)—Situated about 5 miles south-west of Mokameh, the village has a large mutilated stone image of Lord Buddha believed to have been lying there since the inception of the village. It contains some inscriptions which have, however, become worn out and can no longer be deciphered.

BIHAR SUBDIVISION

Anchal—Noorsarai

Ajaipur (Thana no. 62)—Situated about 4 miles south-west of Noorsarai, the village is believed to have been the seat of king Ajaipal of the Pal dynasty. The village has ruins of an old tank and an old mound. Some inscribed stone images, believed to be over 1,500 years old, have also been found.

Bara Khurd (Thana no. 61)—Situated about 4 miles south-west of Noorsarai, the village has an old fortress said to date back to the period of establishment of the Nalanda University.

Barara (Thana no. 73)—Situated about 6 miles south-east of Noorsarai, the village has a 800-year old grave of a Muslim saint, where incense is burnt and lamps lit every day even now.

Begampur (Thana no. 89)—Situated at about 7 miles south of Noorsarai and 3 miles from Nalanda railway station, the village has the ruins of a library said to date back to the period of establishment of Nalanda University. It also has an ancient temple of the Sun-God.

Sakrorha (Thana no. 80)—Situated about 8 miles south-west of Noorsarai, the village has remains of an old fortress.

Anchal—Rahui

Moratalao (Thana no. 45)—Situated about 3 miles west of Rahui, the village has an old tank with an Asokan pillar in the middle. The tank is known as Mura Rani tank, Mura having been the mother of the Chandra Gupta Maurya. It is about 2,300 years old.

Anchal—Asthawan

Benar (Thana no. 232)—Situated about 3 miles east of Asthawan, the village has remains of a fortress believed to be 150 years old.

Bind (Thana no. 214)—Situated about 8 miles north-east of Asthawan, the village has yielded statues of Lord Buddha, said to the date back to the Mauryan period.

Jana (Thana no. 263)—Situated just east of Asthawan, the village contains an old *Chaturbhuj-sthan*, which has an image of Lord Vishnu with inscriptions in the Pali script.

Jiar (Thana no. 268)—Situated 2 miles south of Asthawan. Ancient stone images, believed to be about 2,000 years old, have been found in the village.

Anchal—Giriak

Ghora Katora (Thana no. 353)—The revenue mauza, contains a part of the Rajgir hills, on the top of which are ruins of the meeting hall of Jarasandh, king of Magadh in the Mahabharat age.

Puri (Thana no. 333)—Situated about 5 miles north of Giriak on the National Highway, the village has an old temple of Swetambar Jains. According to one account, Lord Mahavira is said to have attained salvation here.

Raitar (Thana no. 346)—Situated about 2 miles north of Giriak, the village has 300-year old stone images of Lakshmi Narayan and Surya Narayan. They are inscribed in the Nepali script.

The *mauzawar* notes (from which information about ancient monuments have been compiled) were unfortunately not available for the villages of Rajgir anchal. However, brief notes on some of the more important ancient and historical places of Rajgir anchal are given below:

(1) The ancient town of Rajgriha was situated in the valley between two ranges of hills. The town was fortified by outer walls, the ruins of which yet exist. The stone walls were 11 to 12 feet in height.

(2) *Maniar Math* is a monument on the way to *Sonebhandar* cave, so called because of a Jain temple known as *Maniar Math* situated on the top of a mound. The temple covers a well. According to tradition, the Magadh Emperor Bimbisar, who had 32 wives, used to present each one of them with new sets of ornaments every day and the old ones were thrown in the well. Further excavations in the site yielded structures of varying antiquity.

(3) The Bimbisar Jail lies half a mile south of *Maniar Math.* The jail was square fort with stone walls. Bimbisar was imprisoned here by his son Ajatsatru.

(4) The *Gridhra Kuta* (Vulture's Peak) is, according to Buddhist tradition the spot where Lord Buddha frequently stayed during his visits to Rajgir.

(5) *Sonebhandar* caves are situated on the Vaibhara hills. It is the local belief that the piece of rock which blocks the passage in one of the caves is an ancient "wedge" blocking up the passage to "the treasury of gold" inside the hill. Hence the name of the caves.

(6) About a mile south-west of *Sonebhandar* caves is a spot known as *Akhara.* It is believed that the wrestling bout between Jarasandh and Bhima was fought here.

(7) Rajgir owes its tourist importance to the existence of hot springs at the eastern foot of the Vaibhara hills. The springs are known as *Saptadhara.*

(8) The *Saptaparni* caves on the Vaibhara hills are a series of seven caves with a large open terrace in front. The first Buddhist synod was held here.

PART I

CENSUS TABLES, OFFICIAL STATISTICS AND VILLAGE DIRECTORY

NOTE

The Census tables have been published in Parts II to V (with their various sub-parts) of the 1961 Census Publications for Bihar. However, many of the important census tables are also being reproduced in the District Census Handbooks, and some of these give information for units up to the anchal.

The Census tables are classified into different series according to the nature of information presented in them. These are :

A-Series—General Population Tables ;

B-Series—Economic Tables, comprising :

(*i*) General Economic Tables, and

(*ii*) Household Economic Tables ;

C-Series—Social and Cultural Tables ;

D-Series—Migration Tables ;

E-Series—Housing Tables ;

SCT-Series—Special Tables for Scheduled Castes and Scheduled Tribes.

Selected tables from all the above series except D and E are being reproduced in this Handbook. Each series of tables is preceded by a brief explanatory note indicating the contents of the tables and the concepts used.

EXPLANATORY NOTE

A-Series comprises 4 General Population Tables, viz. :

A-I—Area, houses and population ;

A-II—Variation in population during 60 years ;

A-III—Villages classified by population; and

A-IV—Towns (and Town-groups) classified by population in 1961 with variation since 1901.

Only Tables A-I (together with Appendices and Annexures) and A-IV (with Appendices) are being reproduced in this Handbook, and for the latter, the variation of population has been shown from 1941 instead of from 1901.

The particulars of these tables are given below :

Table A-I—Area, Houses and Population

This table furnishes for each subdivision, city, anchal, town-group and town, the area (in square miles and square kilometres), density (number of persons per square mile), number of occupied residential houses and population classified by sex. It also gives the numbers of villages (inhabited or uninhabited) and towns up to anchals. The terms and concepts used in this table are defined below :

Town

A town includes every municipality, notified area, civil lines or cantonment. Certain other selected places were also treated as towns for the 1961 Census provided that they ordinarily fulfilled the following criteria, viz., (*i*) having a population of not less than 5,000 persons, (*ii*) density of not less than 1,000 persons per square mile, and (*iii*) at least 3/4th of the adult male population were engaged in non-agricultural activities.

Town-group

If two or more towns are contiguous and so constituted that they form together a compact block, each part having separate civic bodies, the entire area is treated as a town-group. There is, however, one town-group in the district of Patna.

Village

A village means a revenue *mauza* which is defined as follows :

> "A *mauza* means a parcel of land which, as a rule, is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of cadastral survey or at the time of revenue survey. It may contain no houses at all, or on the other hand, several hamlets each bearing a different name".

House

A house is a structure or part of a structure inhabited or vacant, a dwelling, a shop, a workshop, factory or place of worship or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. The term "occupied residential houses" refers only to such houses as are used for dwelling purposes or where any other purpose of use is accompanied by the element of dwelling, e.g., shop-*cum*-dwelling, workshop-*cum*-dwelling, etc.

Appendix I to Table A-I shows the 1951 territorial units constituting the district of Patna and indicates the changes in their jurisdiction after the 1951 Census. For details of villages affected in these changes, a reference may be made to Annexure II to this Appendix.

Annexure I to Appendix I to Table A-I shows the inter-relationship among revenue thanas, police stations and anchals.

Annexure II to Appendix I to Table A-I not published elsewhere, gives the list of villages affected in the territorial changes mentioned in Appendix I to Table A-I. The numerical symbols given within brackets in columns 3 and 6 of Appendix I to Table A-I are elaborated in this Annexure. For example 12 villages were transferred from Kotwali Police-Station to Gardanibagh Police-Station as mentioned in column 3 and 6 of Appendix I. The numerical symbol is prefixed to this entry and the affected villages are enumerated in Annexure II against the same symbol in column 1 of the Annexure.

Sub-Appendix to Appendix I to Table A-I shows the areas in 1951 and 1961 of those municipal towns which have undergone changes in their jurisdiction within the last decade.

Appendix II to Table A-I gives the number of villages with a population 5,000 and above and of towns with a population under 5,000 upto the level of anchal. It is seen that in Patna district, 27 villages have a population of more than 5,000, while only one town has a population under 5,000.

Table A-IV—Towns (and Town-groups) classified by Population in 1961 with variations since 1941

This table traces the growth of towns since 1941. The area of each town is given in square miles as well as in square kilometres. The towns are divided into 6 classes according to their population sizes as under :

Class I	..	100,000 and above
Class II	..	50,000—99,999
Class III	..	20,000—49,999
Class IV	..	10,000—19,999
Class V	..	5,000—9,999
Class VI	..	Less than 5,000

The class totals have been worked out by considering the population of towns falling in different classes on the basis of their actual population and class in previous censuses.

One new town namely, Bakhtiarpur has been added to the list of towns in 1961, the details of which are given in the Appendix to Table A-IV. No town of 1951 was declassified in 1961.

Explanatory Note A to Appendix to Table A-IV gives the names and areas of the villages constituting the new towns.

Special Appendix to Table A-IV, prepared in two parts, gives details of the villages constituting the towns together with their status and boundaries.

TABLE A-I—AREA, HOUSES AND POPULATION

District/Subdivision/ City/Anchal/Town-group or Town	Total Rural Urban	Area		Population per Sq. mile**	Number of villages		Number of towns	Number of occupied residential houses	Population

NOTES. (1) **The Square Kilometres and density figures of urban areas of Anchal/Subdivision/District are worked out using the area figures corrected up to two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this the area figures relating to Square Kilometres are further adjusted to make the Anchal/Subdivision/District totals tally.

(2) Town treated as such for the first time in 1951 Census which continue as town in 1961 Census is shown with asterisk (*) on its left.

(3) Town treated as such for the first time in 1961 is printed in *italics*.

(4) The following abbreviations have been used for the status of town, e. g.,

(M.C.)—Municipal Corporation (M)—Municipality
(N)—Notified Area (Cantt.)—Cantonment

Where no symbol occurs but the place is shown as urban, it means that the place has been treated as town for Census purposes.

(5) The rural areas of units smaller than the district do not add up to the total rural area of the district, because the rural areas of units smaller than the district have been computed from Thana Jurisdiction Lists, while the total rural area of the district has been arrived at by subtracting the total urban area of the district as supplied by the District Officer, from the total area of the district as supplied by the State Survey Office.

APPENDIX I TO TABLE A-I

Statement showing 1951 *Territorial Units constituting the present set-up of Patna*

1. Only those names/areas which have undergone changes since 1951 have been shown below.

2. The location code number (thana number), name and area of each village (wherever available) transferred from one territory to another or incorporated in a territory by transfer from another will be found in the Annexure II to this Appendix.

3. The areas of the transferred units have been taken from the Thana Jurisdiction Lists, and so they may not necessarily agree with the areas appearing in the 1951 District Census Handbook.

District/Subdivision/ Police Station	1951 Territorial Unit	Details of gain in territories			Details of loss in territories			Net Area Gain(+) Loss(—)	
		Brief description	Area		Brief description	Area			
			Sq. miles	Sq. Km.		Sq. miles	Sq. Km.	Sq. miles	Sq. Km.
1	2	3	4	5	6	7	8	9	10
				(No inter-district transfers)

NOTES : (1) *Includes a part of Kadamkuan P. S. also.
(2) **Includes a part of Kotwali P. S. also.
(3) Figures within brackets following each Revenue Thana in column 1 indicate the number of villages in it according to actual counting of entries in Thana Jurisdiction Lists.
(4) Villages included wholly within towns have been shown against them. But villages included partly in towns have been excluded there from and counted entirely in the rural portion.
(5) Figures shown against Anchals include those for urban areas within the Anchals, separate figures have been given for Cities, as they do not form part of Anchals.
(6) (N), (M), (M.C.) or Town has been mentioned against each town according as it is a 'Notified Area", a "Municipality", a "Municipal Corporation" or a Town without status.

ANNEXURE II TO APPENDIX I TO TABLE A-I

†Dinapur cantonment in 1951 population 13,514 (8,068 M, 5,446 F) was part of Dinapur. The combined population of Dinapur municipality and Dinapur cantonment for 1951 has been shown against Dinapur municipality. In 1941 Dinapur cantonment was treated as a separate urban unit.

NOTES : (*i*) It seems that the figures for Mokameh and Barh were wrongly interchanged in the 1951 Census Report. This mistake has been corrected in the present table.

(*ii*) Town treated as such for the first time in 1951 Census which continue as Town in 1961 Census is shown with asterisk (*) on its left.

(*iii*) Town treated as such for the first time in 1961 is printed in italics.

(*iv*) The following abbreviations have been used for the status of town :—

M.C.—Municipal Corporation M—Municipality N—Notified Area Cantt.—Cantonment

Where no symbol occurs but the place is shown as urban, it means that the place has been treated as town for census purposes.

NOTES—(1)† Area figure as shown in column 4 differ from the area figure as given in Table A-IV. The discrepancy has arisen because the area figure for table A-IV was obtained initially from local officers, while that for the above table has been worked out in the Census Office from available records.

(2) Town treated as such for the first time in 1961 is printed in *italics*.

(3) Town treated as such for the first time in 1951 Census which continue as town in 1961 Census is shown with asterisk (*) on its left.

EXPLANATORY NOTE

I. General Economic Tables

There are 9 Economic Tables (excluding sub-parts) compiled from information collected in the Individual Slips. Termed collectively as the General Economic Tables, these are :

B-I—Workers and non-workers classified by sex and broad age-groups.

B-II—Workers and non-workers in cities, town-groups and towns arranged territorially classified by sex and broad age-groups.

B-III Part A—Industrial classification of workers and non-workers by educational levels in *urban areas only.*

B-III Part B—Industrial classification of workers and non-workers by educational levels in *rural areas only.*

B-IV Part A—Industrial classification by sex and class of workers of persons at work at household industry.

B-IV Part B—Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service.

B-IV Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.

B-V—Occupational classification by sex of persons at work other than cultivation.

B-VI—Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in *urban areas only.*

B-VII Part A—Persons working principally—(*i*) as cultivators, (*ii*) as agricultural labourers or (*iii*) at household industry classified by sex and by secondary work (*i*) at household industry, (*ii*) as cultivator or (*iii*) as agricultural labourer.

B-VII Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry.

B-VIII Part A—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in *urban areas only.*

B-VIII Part B—Persons unemployed aged 15 and above by sex and educational levels in *rural areas only.*

B-IX—Persons not at work classified by sex, broad age-groups and type of activity.

Of these, the following tables have been reproduced in this book :

B-I	..	Upto district
B-III Part A	..	Upto district
B-III Part B	..	Upto anchals
B-VIII Part A	..	Upto district
B-VIII Part B	..	Upto anchals
B-IX	..	Upto anchals.

The economic classification adopted in 1961 is based on the division of the entire population in two basic groups, namely, workers and non-workers. Workers are persons engaged in the production of goods and/or exchangeable services. The concept of work is not tied to the securing of an income, hence even family workers who do not receive any wages in cash or kind (but supplement the family income by engaging in any kind of productive work) have been treated as workers. On the other hand, persons who are earning but do not work (e.g., beggars, rentiers and pensioners) are classed as non-workers. The workers have been further classified into nine industrial categories according to the sector of economic activity in which they are engaged. This classification, therefore, is entirely industrial, and based upon the Indian Standard Industrial

Classification Scheme adopted by the Government of India. It may be noted that occupational classification has also been done, in Tables B-V and B-VI (printed in Part B (*ii*) of this State) which, however, are not reproduced in this volume. The nine industrial categories are :

I	..	Working as Cultivator
II	..	Working as Agricultural labourer.
III	..	Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.
IV	..	Working at Household Industry.
V	..	Working in Manufacturing other than Household Industry.
VI	..	Working in Construction.
VII	..	Working in Trade and Commerce.
VIII	..	Working in Transport, Storage and Communications.
IX	..	Working in Other Services.

In previous Censuses, the non-working or non-earning section of the population was tagged on to each livelihood class so that the total number of dependants of each livelihood class was easily determinable. In 1961, all non-workers have been pooled together into one category and it is no longer possible to say what is the extent of dependancy among persons, say, engaged in cultivation. However, in accordance with the recommendations of the United Nations, the non-workers have for the first time in the Indian Census been further classified into the following 8 groups :

1. Full time students,
2. Housewives and persons engaged in unpaid home duties,
3. Infants and other dependants including permanently disabled or old persons,
4. Retired persons, rentiers and others who are in receipt of income without any work,
5. Beggars, vagrants or independant women and others of unspecified source of existence,
6. Convicts in jail, inmates of a penal, mental or charitable institution,
7. Persons not employed before but now seeking employment for the first time, and
8. Persons employed before but now out of employment and seeking work.

The particulars of the tables, reproduced herein are given below :

Table B-I—Workers and Non-workers classified by Sex and Broad Age-groups

This table gives for each industrial category of workers and also non-workers the classification by sex and broad age-groups, 0—14, 15—34, 35—59 and 60+ besides the rubric "age not stated".

Cultivation involves production of crops like cereals and vegetables on land owned or held on lease. Thus, tenant cultivators are included, but not plantation growers.

An agricultural labourer is a person who works on another person's land for wages in cash, kind or share without having any right on the land. He has also no right to take a decision as to which crop will be sown and when.

Household industry means an industry, not on the scale of a registered factory, conducted by the head of the household himself and/or members of the household at home or within the village in rural areas and only at home in urban areas.

Table B-III Part A—Industrial Classification of Workers and Non-workers by Educational Levels in *Urban areas only*

Table B-III Part B—Industrial Classification of Workers and Non-workers by Educational Levels in *Rural areas only*

These tables give the classification of workers and non-workers by sex, literacy and educational levels separately for urban and rural areas. All persons in the age-group 0—4 are, by definition, illiterate. The classification of persons

with some educational standard is common upto the stage of Matriculation or Higher Secondary for both rural and urban areas. However, in urban areas, persons with qualifications above Matriculation or Higher Secondary have been further classified into (*i*) persons holding technical diploma not equal to degree, (*ii*) non-technical diploma not equal to degree, (*iii*) University degree and (*iv*) technical degree or diploma equal to degree or post-graduate degree in Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and Others.

Illiterate means a person who can neither read nor write or can merely read but not write in any language.

Literate means a person who can both read and write a simple letter.

For a literate person who had also passed a written examination or examinations as proof of the educational standard attained, the highest examination was noted in the Individual Slip. This formed the basis for grouping under the different educational levels.

Table B-VIII Part A—Persons Unemployed Aged 15 and above by Sex, Broad Age-groups and Educational Levels in *Urban areas only*

Table B-VIII Part B—Persons Unemployed Aged 15 and above by Sex and Educational Levels in *Rural areas only.*

These tables give figures of unemployed persons aged 15 and above by sex and the same educational standards as in Table B-III. The unemployed persons given in these tables, however, are those (*i*) seeking employment for the first time, (*ii*) having been employed before, but out of employment and seeking work. Table B-VIII Part A also shows classification by age-groups.

Table B-IX—Persons not at Work classified by Sex, Broad Age-groups and Type of Activity

This table gives the figures of the non-working population classified by sex and broad age-groups (0—14, 15—34, 35—59 and 60+) into the 8 different categories of non-workers, viz.,

1. Full time students or children attending school who do no other work, such as make articles at home for sale, nor even help part-time their own family cultivation, industry, trade, or business.

2. Persons engaged in unpaid home duties (like housewives or other adult females) but doing no other work, such as make articles at home for sale or wages, nor helping regularly even part-time in family cultivation, industry, trade or business.

3. Dependants, including infants or children not attending school, persons permanently disabled from work because of illness or old age.

4. Retired persons not employed again, rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work.

5. Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence.

6. Convicts in jails (undertrial prisoners were treated as workers if they used to work before being apprehended) or inmates of penal, mental or charitable institutions.

7. Persons who had not been employed before but were seeking employment for the first time during enumeration.

8. Persons employed before, but out of employment and seeking employment at the time of enumeration.

II. Household Economic Tables

The Household Economic Tables have been prepared from the data collected in the Household Schedule canvassed for each and every household in the State. In preparing the tables, however, a 20 per cent systematic sample was drawn separately for rural and urban areas. Thus, all the tables in this series are based on a 20 per cent sample. The tables are :

B-X—Sample Households (*i*) engaged neither in cultivation nor in household industry, (*ii*) engaged either in cultivation or household industry but not in both and (*iii*) engaged both in cultivation and household industry for *all areas.*

B-XI—Sample Households engaged in cultivation classified by interest in land and size of land cultivated in rural and urban areas separetly.

B-XII—Sample households engaged in cultivation only classified by size of land cultivated and

number of family workers and hired workers in rural and urban areas separetely.

B-XIII—Sample Households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry in rural and urban areas separately.

B-XIV—Sample Households engaged only in household industry classified by principal household industry in *all areas*.

B-XV—Sample Households engaged both in cultivation and household industry classified by size of land in rural and urban areas separately.

B-XVI—Sample Principal Household industry classified by period of working and total number of workers engaged in household industry in *all areas*.

B-XVII—Sample Households classified by (*i*) Number of male and female members by size of households and (*ii*) Engagement (*a*) neither in cultivation nor in industry (*b*) in household industry only and (*c*) in cultivation sub-classified by size of land cultivated.

The Household Economic Tables being reproduced in this Handbook are :

Table B-X—Sample Households (*i*) Engaged neither in Cultivation nor in Household Industry (*ii*) Engaged either in cultivation or Household Industry but not in both and (*iii*) Engaged both in Cultivation and Household Industry for *all areas*

This table gives the classification of sample households in the following four types of economic activity :

(*i*) households engaged neither in cultivation nor in household industry;

(*ii*) households engaged in cultivation only ;

(*iii*) households engaged in household industry only; and

(*iv*) households engaged both in cultivation and household industry.

Cultivation involves "ploughing, sowing and harvesting and does not include fruit-growing or keeping orchard or groves or working for plantations like, tea, coffee, rubber, cinchona and other medicinal plantation".

Household industry means "Industry (not on the scale of registered factory) conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas".

Table B-XI—Sample Households engaged in Cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban Areas separately

This table gives the classification of sample cultivating households by the following 10 size-ranges of land cultivated in acres :

Less than 1, 1.0 to 2.4; 2.5 to 4.9; 5.0 to 7.4; 7.5 to 9.9 ; 10.0 to 12.4; 12.5 to 14.9; 15.0 to 29.9; 30.0 to 49.9; 50+ and, Unspecified'.

The information is cross-tabulated with reference to the following three kinds of interest in land :

(*i*) owned or held from Government ;

(*ii*) held from private persons or institutions for payment in money, kind or share; and

(*iii*) partly held from Government and partly from private persons or institutions for payment in money, kind or share.

Table B-XVII—Sample Households classified by (*i*) Number of male and female members by size of Households and (*ii*) Engagement (*a*) Neither in Cultivation nor in Industry (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land cultivated

This table gives the distribution of sample households by the following size-classes, (*i*) 1 member, (*ii*) 2-3 members, (*iii*) 4—6 members, (*iv*) 7—9 members and (*v*) 10 members or more. For urban areas the figures are for total sample households. For rural areas, however, the size-class of household is cross-tabulated with reference to the economic activity of the household, *viz.*,

(*a*) households engaged neither in cultivation nor in household industry ;

(*b*) households engaged in household industry only; and

(*c*) households engaged in cultivation only. These are further categorised into 10 size-classes by the extent of holdings.

TABLE B-I—WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

EXPLANATORY NOTE

The following tables constitute the C-Series :

C-I—Composition of Sample Households by relationship to head of family classified by size of land cultivated.

C-II—Age and Marital Status.

C-III Part A—Age, Sex and Education in *all areas.*

C-III Part B—Age, Sex and Education in *Urban areas only.*

C-III Part C—Age, Sex and Education in *Rural areas only.*

C-IV—Single year age returns.

C-V—Mother-tongue.

C-VI—Bilingualism.

C-VII—Religion.

C-VIII Part A—Classification by Literacy and Industrial category of Workers and Non-workers among Scheduled Castes.

C-VIII Part B—Classification by Literacy and Industrial category of Workers and Non-workers among Scheduled Tribes.

Table C-I has been prepared from the data collected in the Household Schedule on the basis of a 20 per cent sample. The remaining tables of this series have been prepared from information gathered in the individual slips.

The tables reproduced in this Handbook are given below, along with the unit up to which they have been furnished :

Table C-I—For district classified by total, rural and urban.

Table C-II—Up to subdivisions classified by rural and urban.

Table C-III Part B—For district only.

Table C-III Part C—For district only.

Table C-V—Up to anchals for total only.

Table C-VII—Up to anchals.

Table C-VIII Part A—Up to anchals.

Table C-VIII Part B—Up to anchals.

Relevant particulars of the above tables are given below :

Table C-I—Composition of Sample Households by relationship to head of family classified by size of land cultivated

The table gives separately for total, rural and urban areas, the composition of sample households by heads of households, their spouses, relations (separately for married and never married/widowed and divorced or separated), and unrelated persons. The information relating to rural areas is cross-tabulated with reference to households (*i*) engaged neither in cultivation nor in household industry, (*ii*) households engaged in household industry only, and (*iii*) households engaged in cultivation, the last named category being further classified by the size of holding into 10 size classes.

Table C-II—Age and Marital Status

This table gives separately for rural and urban population, the marital status of males and females for the entire population and also for quinquennial age-groups beginning from 10—14 years. All persons up to 9 years of age have been treated as 'Never married'.

'*Married*' implies a living spouse, whether of the first or a subsequent marriage and includes any husband-wife relationship customarily recognized by society as well as *de facto* union.

'*Widowed*' means married but spouse dead, no remarriage having taken place.

'*Divorced*' means a person divorced in a lawful manner either by a decree of a law court or by a regular social or religious custom, but not remarried and '*Separated*' means a person separated from wife or husband and living apart with no apparent intention of living together again.

'*Age*' means number of completed years on the 1st March 1961, the reference day for the 1961 Census. Infants below one year have 0 year as their age.

Table C-III Part B—Age, Sex and Education in *Urban areas only*

Table C-III Part C—Age, Sex and Education in *Rural areas only*

In both the tables, educational standards of the population (classified by sex) are given

for all ages and quinquennial age-groups commencing from 5—9 years to 30—34 and broader age-groups thereafter. Those within 0—4 years of age were, by definition, treated as illiterate.

Table C-V—Mother-tongue

This table gives the number of speakers of each mother-tongue returned in the Census. The mother-tongues have been given in alphabetical order and are classified by the Linguist in the office of the Registrar General, India, on the basis of Grierson's Linguistic Survey. They have been marked appropriately to indicate :

(*i*) mother-tongues of countries outside the Indian sub-continent (printed in italics) ;

(*ii*) mother-tongues unclassified in the Linguistic Survey of India (with asterisk) ;

(*iii*) mother-tongues though classified in the Linguistic Survey of India, either tentatively reclassified by the Linguist or considered by him to be unclassifiable (with dagger) ;

(*iv*) mother-tongues unclassified by the Linguistic Survey of India, but tentatively classified by the Linguist (with asterisk and dagger).

In 'Nagpuri-Eastern Magahi', the hyphenated words have been inserted by the Linguist to indicate the affiliations, of the mother-tongue 'Nagpuri'.

Mother-tongue is the language 'spoken in childhood by the person's mother to the person or mainly spoken in the household'.

Table C-VII—Religion

This table gives figures for the following six main religious groups, arranged in alphabetical order :

(*i*) Buddhists,
(*ii*) Christians,
(*iii*) Hindus,
(*iv*) Jains,
(*v*) Muslims, and
(*vi*) Sikhs.

There is a residuary group of 'other religions and persuasions' as also a group comprising of persons who did not state their religion.

Table C-VIII—Scheduled Castes and Scheduled Tribes, classified by Literacy and Industrial categories of Workers and Non-workers

Part A of the table furnishes data for the combined population of all Scheduled Castes and *Part B* for the combined population of all Scheduled Tribes.

The population is categorised by sex into (*i*) illiterate, and (*ii*) literate and educated, and also by the nine industrial categories of workers and non-workers.

TABLE C-I— SIZE AND COMPOSITION OF SAMLPE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20% sample)

EXPLANATORY NOTE

Special tables for the Scheduled Castes and Scheduled Tribes, separately for each caste or tribe are an innovation of the 1961 Census. The tables in this series are the following :

SCT-I Part A—Industrial classification of persons at work and non-workers by sex for Scheduled Castes.

SCT-I Part B—Industrial classification of persons at work and non-workers by sex for Scheduled Tribes.

SCT-II Part A—Age and marital status for Scheduled Castes.

SCT-II Part B—Age and marital status for Scheduled Tribes.

SCT-III Part A(*i*)—Education in urban areas only for Scheduled Castes.

SCT-III Part A(*ii*)—Education in urban areas only for Scheduled Tribes.

SCT-III Part B(*i*)—Education in rural areas only for Scheduled Castes.

SCT-III Part B(*ii*)—Education in rural areas only for Scheduled Tribes.

SCT-IV Part A—Religion for Scheduled Castes.

SCT-IV Part B—Religion for Scheduled Tribes.

SCT-V Part A—Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Castes.

SCT-V Part B—Sample households engaged in cultivation classified by interest in land and size of land cultivated in rural areas only for members of Scheduled Tribes.

SC-I—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes.

ST-I—Mother-tongue and bilingualism for Scheduled Tribes.

ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes.

The tables being reproduced in this Handbook and the levels up to which they are reproduced, are indicated below :

SCT-I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Part A) and Scheduled Tribes (Part B)—For the district as a whole.

SC-I—Persons not at work classified by sex, type of activity and educational level for Scheduled Castes—For the district as a whole and rural areas of such anchals in which the combined Scheduled Caste population is higher than the average Scheduled Caste population per anchal in the district.

ST-I—Mother-tongue and bilingualism for Scheduled Tribes—For the district and selected anchals in which the combined strength of Scheduled Tribes is higher than the average population of Scheduled Tribes in an anchal.

ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes—For the district and selected anchals in which the Scheduled Tribe population is higher than the average Scheduled Tribe population per anchal.

The Scheduled Castes and Scheduled Tribes have been notified as such under Notification no. SRO-2477-A, dated the 29th October, 1956, issued by the Government of India, Ministry of Home Affairs in accordance with the provisions contained in Articles 341(1) and 342 (1) of the Constitution of India. The list of Scheduled

Castes and Scheduled Tribes, thus notified, for the district of Patna is given below :

A. Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhumij
5. Bhuiya
6. Chamar or Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom or Dhangad
11. Dusadh including Dhari or Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar or Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan or Sawasi
21. Pasi
22. Rajwar
23. Turi

B. Scheduled Tribes

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Binjhia
7. Birhor
8. Birjia
9. Chero
10. Chik Baraik
11. Gond
12. Gorait
13. Ho
14. Karmali
15. Kharia
16. Kharwar
17. Khond
18. Kisan
19. Kora
20. Korwa
21. Lohara or Lohra
22. Mahli
23. Mal Paharia
24. Munda
25. Oraon
26. Parhaiya
27. Santal
28. Sauria Paharia
29. Savar

Table SCT-I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Part A) and Scheduled Tribes (Part B) for the district as a whole

Part A gives the same information for each of the Scheduled Castes as given in Table B-I, i.e., industrial classification of workers and non-workers. However, the data are not classified by broad age-groups. Information is also given of the number of males and females of each caste engaged in the unwholesome occupations of (*i*) tanning and currying of hides and skins, and (*ii*) scavenging.

Part B of this table gives the industrial classification by sex of each Scheduled Tribe into nine categories of workers and non-workers.

Appendix to Table SCT-I shows the total population of Scheduled Castes and Scheduled Tribes in each anchal of Patna district.

Table SC-I—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes

This table gives for the Scheduled Castes as a whole, the classification of non-workers by sex, type of activity and also educational levels. Instead of 8 detailed groups of activities relating to non-workers vide Explanatory Note to General Economic Tables, at page 23, the groups are restricted to four, namely, (*i*) full time students, (*ii*) persons seeking employment for the first time, (*iii*) persons employed before but now out of employment and seeking work, and (*iv*) others.

'Others' include persons engaged in unpaid home duties (such as housewives), dependants, retired persons, beggars, and inmates of penal and mental institutions.

The classification by educational levels is by illiterate, literate without educational level, primary or junior basic, matriculation or higher secondary, and above matriculation or higher secondary.

Table ST-I—Mother-tongue and bilingualism for Scheduled Tribes

This table gives the extent of prevalence of tribal languages spoken as mother-tongue by each of the Scheduled Tribes and the number of speakers of subsidiary language in each tribe.

Table ST-II—Persons not at work classified by sex and type of activity for Scheduled Tribes

This table gives information similar to that in Table SC-I, in respect of the Scheduled Tribes. However, information about the four types of activities of non-workers, though given separately for each Scheduled Tribe, is not, as in the case of Scheduled Castes, classified by educational levels.

TABLE SCT-I PART A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES

EXPLANATORY NOTE

Information relating to the nature and number of houses was collected during the period of houselisting in September-October, 1960 in the Houselist Form. The data processed from these lists were compiled under the E-Series tables. Although none of the E-Series tables is reproduced in the Handbook, the information collected in the houselists is given in two tables : (*i*) classification of rural population by size class of villages determined by the numbers of houses in them, and (*ii*) villagewise industrial data.

Classification of rural population living in villages of Various sizes.

The villages are classified into seven categories by the size class of number of houses contained in each. These are—

(*i*) 5 and below
(*ii*) 6—15
(*iii*) 16—25
(*iv*) 26—35
(*v*) 36—50
(*vi*) 51—100
(*vii*) above 100

Villagewise Industrial data

This table gives information about the number of industrial establishments in each village. The name of the village is followed by the three-digit code number of the industrial establishment indicating the division, major group and minor group of the Indian Standard Industrial Classification. A list of the Divisions, Major Groups and Minor Groups together with their code numbers occurring in the table, is reproduced in the Annexure to this note. Figures within brackets indicate the number of establishments relating to the industry concerned in the village. Data relating to towns have been given separately.

ANNEXURE

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and hunting—	
04	*Livestock and Hunting*	
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Division 2 and 3—Manufacturing—	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling dehusking and processing of crops and foodgrains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of other food products such as sweetmeat and condiments, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of country liquor ..	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of aerated and mineral water	214
	Production of ice .	215
	Production of ice cream	216
22	*Tobacco Products—*	
	Manufacture of bidi	220
	*Division 2 and 3—Manufacturing—*contd.	
22	*Tobacco Products*—concld.	
	Manufacture of *hookah* tobacco ..	223
	Manufacture of *jarda* and other chewing tobacco.	225
23	*Textile—Cotton—*	
	Cotton ginning, cleaning, pressing and baling.	230
	Cotton spinning (other than in mills) ..	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching ..	233
	Cotton weaving in power looms ..	234
	Cotton weaving in handlooms ..	235
	Manufacturing of *khadi* textile in handlooms.	236
	Printing of cotton textile ..	237
	Manufacturing of cotton, cordage, rope and twine.	239
25	*Textile—Wool—*	
	Wool weaving in powerloom ..	254
	Wool weaving in handloom ..	255
26	*Textile—Silk—*	
	Spinning of silk other than in mills ..	262
	Weaving of silk textile by handloom ..	264
27	*Textile—Miscellaneous—*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and frings.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274

ANNEXURE—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—contd.	
27	*Textile—Miscellaneous*—concld.	
	Manufacture of coir and coir products ..	277
	Processing and manufacture of textile products not covered above.	279
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood ..	280
	Manufacture of wooden furniture and fixtures.	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys artwares.	284
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board hand made.	291
	Manufacture of products, such as paper bags, boxes, cards, envelops and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of books ..	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with industry.	302
	All types of binding, stitching, sizing and other allied work connected with bining industry.	303

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—contd.	
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of leather products (except those covered by code nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repairs of shoes and other leather footwear.	314
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes ..	320
	Production of coaltar and coke in coke oven.	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of ammunition, explosives and fire works.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats.)	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340

ANNEXURE—*contd.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Minor Group (Code)
	Divison 2 and 2—Manufacturing—contd.	
34-35	*Non-metallic Mineral Products other than Petroleum and Coal*—concld.	
	Manufacture of cement and cement products.	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images.	344
	Manufacture of earthenware and earthen pottery.	350
	Manufacture of earthen image, busts and statues.	355
	Manufacture of earthen toys and artwares except those covered by code no. 335.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
36	*Basic Metals and their Products except Machinery and Transport Equipment*—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture of armaments ..	362
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products.	365
	Manufacture of aluminium products ..	366
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G.I. pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
	Divison 2 and 3—Manufacturing—contd.	
37	*Machinery (All kinds other than Transport) and Electrical Equipment*—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools ..	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of electric lamps and fans	375
	Manufacture of all kinds of batteries ..	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment*—	
	Manufacture assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways, and other rail road equipment other than that manufacture of structural steel products such as joist, rail, sheet, plate.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat, frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines.	386
	Repairing of bicycles and tricycles ..	388
	Manufacture of other transport equipment not covered above such as animal-drawn and hand drawn vehicles.	389

ANNEXURE—*concld.*

STANDARD INDUSTRIAL CLASSIFICATION

Major Group (Code)	Description	Major Group (Code)
	Division 2 and 3—Manufacturing—contd.	
39	*Miscellaneous Manufacturing Industries*—	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of Scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks.	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393

Major Group (Code)	Description	Minor Group (Code)
	Division 2 and 3—Manufacturing—concld.	
39	*Miscellaneous Manufacturing Industries*—concld.	
	Manufacture and tuning of musical instruments.	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountainpen.	395
	Manufacture of sports goods ..	396
	Manufacture and repair work of goods not assignable to any other group.	399

EXPLANATORY NOTE

Besides giving the Census Tables, the District Census Handbook of 1951 contained information on vital statistics, rainfall, agriculture, livestock, industries and wholesale prices. The present Handbook seeks not only to continue the tradition but also to enlarge its scope by furnishing official statistics on several other topics. The data contained in the following pages are complementary to the Census Tables, and attempt to give a complete statistical picture of the district.

The materials in this section have been obtained from various sources indicated in the tables. They can be broadly divided into eight groups, namely, Vital Statistics, Agricultural Statistics, Livestock, Industry, Administration, Education, Public Health and Communications.

The salient features of the tables under each group are briefly summarised below :

VITAL STATISTICS

Table VS-I—Registered Births and Deaths with Mid-year Rates

This table gives for the district as a whole the number of births and deaths registered during the years 1951—60. The birth and death rates have been calculated both on the 1951 Census and the estimated mid-year population, *i.e.*, the population on the 30th June of each year.

Table VS-II—Deaths and Death Rates due to Selected Causes

This table furnishes the figures of death by selected causes for 1951—60. The death rates have been calculated for 1951 on the figures for the Census of that year, and in other cases, on the estimated mid-year population. Data in respect of four causes of death could be had for 1960 only, and, therefore, they have been presented separately in the supplement to the table.

AGRICULTURAL STATISTICS

Table AS-I—Rainfall

Monthly rainfall data for the years 1951—60 are presented for the five selected rainfall recording stations at Patna "Observatory", Dinapur, Bihar, Barh and Paliganj. The district average has also been given.

Table AS-II—Highest and Lowest Temperatures

This is a table on temperature. The mean maximum, highest, mean minimum and lowest temperatures recorded at Patna during all the twelve months of the decade 1951—60 have been given.

Table AS-III—Land Utilisation and Area under Different Crops

This table presents land utilisation statistics for the district as a whole. The figures relate to the six census years beginning from 1911. The manner in which the figures have been worked out is indicated in a note appended to the table.

The terms and concepts used in the table are defined below :

Geographical area—It represents the total land area of the district. The 1951 and 1961 area figures tally with the area worked out by the Bihar Survey. In other cases there are differences which may be due to computational errors.

Forests—All actually forested areas on the lands classed or administered as forest under any legal enactment dealing with forests, whether State-owned or private.

Barren and unculturable land—All barren and unculturable land like mountains, deserts, etc. Land which cannot be brought under cultivation unless at a high cost is classed as unculturable, whether such land is in isolated blocks, or within cultivated holdings.

Land put to non-agricultural use—All lands occupied by buildings, roads and railways or under water, *e.g.*, rivers and canals and other lands put to uses other than agricultural.

Culturable Waste—All lands available for cultivation, whether or not taken up for cultivation or abondoned after five years for one reason or the other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may lie in isolated blocks or within cultivated holdings.

Permanent pastures and other grazing lands—All grazing lands, whether they are premanent pastures and meadows or not. Village common and grazing lands within forested areas are included under this head.

Miscellaneous tree crops and groves—All cultivable lands, which are not included under net area sown, but are put to some agricultural use. Lands under casuarina trees, thatching grass, bamboo bushes and other groves for fuel, etc., which are not included under 'orchards' are classed under this category.

Other fallow land—All lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

Current fallows—Lands which are left fallow during the current year only.

Net area sown—The net area sown represents the area sown to crops, counting areas sown more than once in the same year only once.

Cultivated area—The sum of net areas sown and area under current fallows gives the cultivated area.

Section B of the table furnishes details of the area covered by different crops. The total area sown under all crops is in fact the gross cropped area, which term means "the sum of areas under all crops and represents the sum of net sown area and area sown more than once in the year."

The cropped area is divided into three main groups, *viz.*, under food crops, non-food crops and miscellaneous crops. The food crops have been further subdivided into basic food crops and other food crops. The former includes rice, wheat, pulses, fruit and vegetables, and the latter, sugarcane, condiments, and others. Non-food crops have also been likewise sub-divided into oilseeds, fibres (which term includes cotton, jute and other fibres), and tobacco. Miscellaneous crops cover fodder and other non-food crops.

Table AS-IV—Gross Area Irrigated by Crops

This table gives the gross cropped area and irrigated area for the district as a whole. The break-up of the irrigated area by crops (food and non-food) has also been indicated.

Table AS-V—Gross Area Irrigated by Sources

This Table shows the Gross area irrigated in the district by different sources for the six census years beginning from 1911.

Table AS-VI—Yield Rates of Principal Crops

This table furnishes the average yield in maunds per acre in respect of the principal crops of the district for the period 1951-52 to 1959-60.

Table AS-VII—Statistics of skilled and unskilled Agricultural labourers

This table indicates the average daily wages paid to skilled and unskilled agricultural labourers during the rabi and kharif seasons.

Skilled labourers include carpenters, blacksmiths and *mochis* (cobblers). Among the unskilled are the field labourers, herdsmen and other agricultural labourers. Separate figures have been given for men, women and children so far as the unskilled labourers are concerned.

Table AS-VIII—Monthly Ruling wholesale Prices of Staple Foodgrains

The wholesale prices of staple foodgrains, namely, rice (medium), wheat (red) and gram for all the twelve months during the years 1952—60 are presented in this table for the district. Figures for the year 1951 could not be had.

Table AS-IX—Cost of Living Index number at Patna (Urban)

This table gives the monthly consumer's price cost of living Index Number for the years 1953 to 1960 at Patna (Urban) Centre. Year ending July 1939 has been taken as the base year for computing the Index Number.

Subsidiary Tables

Seven subsidiary tables have been prepared. They are all subsidiary to Table AS-III.

*Subsidiary Table AS-III.*1 *: Land Utilisation*—It gives the break up of 1,000 acres of the land area in the district by area under forests, etc., and total cultivable area. The net area sown per 1,000 acres of the land area has also been indicated. The distribution of every 1,000 acres of the total cultivable area in the district by the net area sown and area of fallow and other uncultivated land has also been given. The proportion of the cultivable area, net area sown, net area irrigated, etc., in the district to every 1,000 acres in the State has also been worked out to facilitate comparative study.

Subsidiary Table AS-III.2—Progress of Cultivation during the last three decades—This table traces the progress of cultivation since 1931 in terms of area under foodgrains and other crops, net area sown and area sown more than once.

Subsidiary Table AS-III.3—Components of Land Area Cultivable and Cultivated Area per hundred persons during the last three decades—It shows the incidence of land area, area cultivable net area sown, etc., per 100 persons in the district. The figures relate to the last three decades.

Subsidiary Table AS-III.4—Cropping pattern—The table indicates the cropping pattern as in 1951 and 1961. The crops have been grouped under two heads, namely food and non-food. The area covered by different crops per 1,000 acres of the gross area sown in the district as also their proportion into every 1,000 acres in the State as a whole, has been shown.

Subsidiary Table AS-III.5—Density of Total/Rural Population per 100 acres of area under Foodgrains and net area sown—This table furnishes the density of total and rural population per 100 acres of area under foodgrains, other crops, net area sown and area sown more than once for the last three decades.

Subsidiary Table AS-III.6—Density of Cultivators and Agricultural Labourers per 100 acres of net area sown in 1951 and 1961—This table gives the density of cultivators and agricultural labourers per 100 acres of net area sown in 1951 and 1961. Separate figures have been furnished for the total and rural population.

Subsidiary Table AS-III.7—Rainfall, Area Sown and Irrigated, Density, etc.—The table furnishes data on rainfall and gross area sown and irrigated (by different crops) together with yield rates. The density per 100 acres of the cropped area and the area under foodgrains has also been given.

LIVESTOCK

Table LVT-I—Government Veterinary Facilities

Veterinary facilities existing in the district during the years 1951—52 to 1960-61 are indicated in this table. The number of hospitals, dispensaries and veterinary doctors has been given year by year.

Table LVT-II—Livestock and Poultry

This table presents the population of livestock and poultry for eight livestock censuses beginning from 1920. The variation in the numbers from census to census has also been indicated. Figures preceded by a plus (+) sign denote increase, and those by minus (—) sign decrease, from previous figures.

Livestock means all domesticated animals of economic importance and includes cattle, buffaloes, sheep, goats and pigs.

Poultry means domestic avian such as fowls and ducks.

INDUSTRIES

Table IND-I—Employment in Textile and Non-Textile Industries (As on 31st December, 1960)

The number of industrial establishments in the district with daily average employment in each has been furnished in this table. The industries have been divided into two broad groups—textile and non-textile. While the former category has two industries namely, the cotton mills and knitting mills, the latter embraces 39 industries detailed in the table. The rural and urban break-up of the industrial establishments has also been given.

Table IND-II—Name of Industry with number of Households and Persons Employed in *Rural Areas only.*

This table furnishes anchalwise industrial data for all the rural areas of the district. These have been extracted from the Houselists prepared during September-October, 1960, as a preliminary step to the 1961 Census. Here also the industrial establishments have been grouped into two broad divisions—textile and non-textile. The textile establishments include weaving and spinning works. Non-textile establishments cover leather work, black-smithy, carpentry, pottery, gold and silver ornaments making, laundry, tailoring, bamboo products making, bidi making, mat making, manufacture of oils, manufacture of butter and cream, preparation of sweetmeats, extraction of palm juice, etc. The number of villages where the particular type of industrial establishment is found along with the number of households and number of persons engaged in it, has been indicated anchalwise.

The industries which are not common in many of the Anchals have been shown in the supplement to this table to save space.

ADMINISTRATION

Table ADM-I—General Results of Trial of Criminal Cases

General results of trial of criminal cases in the district for the period 1951—60 have been shown in this table. Section A gives the manner of disposal of criminal cases in terms of persons affected in the lower courts, while Section B deals with the results of appeals and revisions.

Table ADM-II—Punishments inflicted in Criminal Cases

This table gives for the district data on punishments inflicted in criminal cases during the period 1951—60.

Table ADM-III—Strength of Police

The strength of the Police force in the district during the years 1951—60 has been shown in this table for every category of policemen.

Table ADM-IV—Places of Confinement and Distribution of convicts by Age-groups and Literacy

This table gives the average daily number of prisoners in the district jail of Bankipur, and other sub-jails. The number of convicts and their distribution by age-groups and literacy has also been indicated. The figures relate to the years 1951—60. M and F in columns 5 onwards represent males and females respectively.

Table ADM-V—Co-operative Societies

The data regarding Co-operative Societies are presented in this table for the years 1950-51 to 1959-60. The Societies have been grouped into four broad categories, namely, Primary Agricultural Societies, Non-agricultural Societies Provincial and Central Credit Societies and Central Co-operative Banks and Unions. The first two have been further sub-divided into Non-credit and Credit Societies. For each type of Co-operative Society, information is given about the number of societies, number of members, working capital (in rupees), and profit or loss (in rupees). Figures preceded by plus (+) sign denote profit, and those by minus (—) sign indicate loss.

Table ADM-VI—Receipts of Excise Revenue, Sales tax, Entertainment tax, Motor-spirit tax, Stamps, etc.

This table gives for the district details of collections made under various heads such as excise, sales-tax, entertainment tax, motor-spirit tax, etc., during the year 1951-52 to 1960-61. Figures for registration fee relate to the calendar years 1951—60.

Table ADM-VII—Land Revenue/Rent

Figures relating to the demand and collection of land revenue/rent for the district, along with the percentage of collection to the demand, have been given in this table. The State Government started taking over the *zamindari* interests under the Bihar Land Reforms Act, 1950 in 1954-55. Prior to this, the *zamindars* paid land revenue to Government and the *raiyats* generally paid rent to the *zamindars*. The demand and collection for the years 1951-52 to 1953-54 relate to land revenue. The collection of rent by Government started in 1954-55 consequent upon the vesting of the *zamindari* interests in the State.

Table ADM-VIII—Number of Registered Documents and value of properties transferred

Registration statistics are presented in this table for the decade 1951—60. The number of instruments registered and the value of property transferred are given in this table along with gross receipts and expenditure for the district as a whole.

Table ADM-IX—Sale and Discharge under Small Savings Scheme

This table furnishes data relating to the sale and discharge of certificates under the Small Savings Schemes. Figures have been given separately for the Treasury Savings Deposit, Post Office Savings Bank, 15-Year Annuity Certificate and National Plan Savings Certificate for the period, 1954-55 to 1960-61.

Table ADM-X—List of Banks

It contains a list of Banks in the district. Column 1 gives the names of places where banking facilities exist, while column 2 indicates the names of Banks.

Table ADM-XI—Progress of Life Insurance

This table traces the progress of Life Insurance in the district from the year 1957 onwards.

Table ADM-XII—Number of Motor Vehicles

The number of motor vehicles in the district during the period 1950-51 to 1960-61 is shown in

this table. Separate figures have been given for different types of automobiles. State figures have also been given to facilitate comparison.

EDUCATION

Table EDN-I—Educational Institutions and Pupils

This table gives the number of various types of educational institutions with pupils therein. Column10 of the table shows the population in the relevant age-group the pupils of which generally receive schooling in the institutions noted against it in column 1. Column 7 furnishes figures of enrolment in 1960-61. The percentage of the pupils enrolled to the total population in the relevant age-group has been given in column 13. Since enrolment in schools for professional and special education is open to pupils belonging to a very wide age-group, no figures similar to column 8 onwards have been furnished for such institutions.

Table EDN-II—List of Educational Institutions

The table gives a list of middle and higher educational institutions. Column 1 shows the type of institution and column 2 the location in alphabetical order. Where two or more educational institutions exist, the names of such institutions have been indicated within brackets immediately after the name of the locality.

Table EDN-III—Press and Journals

This table shows the number of printing presses in the district and the publications brought out by them during the period 1951—61

Table EDN-IV—List of Cinema Houses

It gives a list of cinema houses in the district.

PUBLIC HEALTH

Table PH-I—Medical Facilities

This is a table on medical facilities. Part A of the table gives the number of degree or diploma holding medical practitioners regtstered in the district at each year during 1951—60. Part B indicates the number of hospitals and dispensaries. Part C is a list of other health institutions, *viz.*, Family Planning Centres, Maternity and Child Welfare Centres, Rural Family Planning Centres, and T. B. Clinics/ Ward/Centres.

COMMUNICATIONS

Table CMN-I—Mileage of extra Municipal Roads maintained by Public Authorities

The mileage of various types of roads in the district maintained by the Public Works Department and the Local Bodies other than municipalities is indicated in this table.

Table CMN-II—List of Inspection/Dak Bungalows

This is a list of Inspection/Dak Bungalows with detail of amenities existing in each.

Table CMN-III—Polymetric Table of Distances (in miles)

This is a polymetric table of distances in miles. The district, subdivisional and anchal headquarters, numbering 28, find place in the table. Each place is connected with the remaining ones by a vertical line. The road distance between any two places on the table can be read along the vertical line connecting the two places. Rail distances are given within brackets for places connected by rail as well.

VITAL STATISTICS

TABLE AS-III.1—LAND UTILISATION

(*Subsidiary Table* 1)

(*Area in acres*)

Serial no.	Classification of land	Year 1961	Year 1951
1	2	3	4
1	Total land area according to the Surveyor General	1,385,024	1,380,189
2	Total area for which village papers are available	1,361,920	1,354,240
3	Per 1,000 acres of the land area in the district—		
	(*i*) Under forests or otherwise not available for cultivation	174	136
	(*ii*) Total cultivable area	826	864
	(*iii*) Net area sown	736	765
4	Per 1,000 acres of total cultivable area in the district—		
	(*i*) Net area sown	892	885
	(*ii*) Area under fallow lands	93	91
	(*iii*) Area under other uncultivated land excluding fallow land	15	24
5	Proportions to total area (1,000) in respect of—		
	(*i*) Total cultivable area	40	39
	(*ii*) Net area sown	52	52
	(*iii*) Net area irrigated	N. A.	N. A.
	(*iv*) Area sown more than once	76	83
	(*v*) Area irrigated more than once ..	N. A.	N. A.

NOTE : Figures for the Census year 1951 give the average of five crop years with the Census year 1951 as the mid-year, the 1961 data are the average of the five crop years including and preceding 1960-61.

N. A.—Not available

SOURCE : Directorate of Statistics, Bihar.

TABLE AS-III.2—PROGRESS OF CULTIVATION DURING THE LAST THREE DECADES

(Subsidiary Table II)

(Area in acres)

Particulars	1961	1951	1941	1931
1	2	3	4	5
Area under foodgrains	1,416,083	1,384,700	1,121,880	1,117,160
Area under crops other than foodgrains	109,316	107,796	106,100	119,220
Net area sown	1,002,936	1,035,705	959,440	910,080
Area sown more than once	521,482	445,682	265,020	326,100

NOTE : Figures for the Census years 1931 to 1951 give the average of five crop years with the relevant Census year as the mid-year in every case. The 1961 data are the average of the five crop years including and preceding 1961.

SOURCE : Directorate of Statistics, Bihar.

TABLE AS-III.3—COMPONENTS OF LAND AREA, CULTIVABLE AND CULTIVATED AREA PER HUNDRED PERSONS DURING THE LAST THREE DECADES

(Subsidiary Table III)

(Area in acres)

Particulars	1961	1951	1941	1931
1	2	3	4	5
Land area	46	54	63	73
Area cultivable	38	46	55	64
Net area sown	34	41	45	49
Net irrigated area	N.A.	N.A.	N.A.	N.A.
Area sown more than once	18	18	12	18
Area irrigated more than once ..	N.A.	N.A.	N.A.	N.A.
Area under foodgrains	48	55	52	63
Area under crops other than foodgrains	4	4	4	6

Land area—Total geographical area according to the Surveyor-General, India.

Area cultivable—Includes (*i*) Net area sown, (*ii*) Current fallows, (*iii*) Cultivable wastes, (*iv*) Fallows other than current, (*v*) Pastures and grazing land, (*vi*) Miscellaneous tree crops and groves not included under net area sown.

Net area sown—Represents the area sown counting area sown more than once in the same year only once.

Net irrigated area—Represents the area irrigated from different sources, counting area irrigated more than once, in the same year, only once.

Area irrigated more than once—Represents area which receives irrigation more than once in raising the same crop again or other crops in the same year.

NOTE : Figures for the Census year 1931 to 1951 give the average of five crop years with the relevant Census year as the mid-year in every case. The 1961 data are the average of the five crop years including and preceding 1961.

OF
DISTANCES (IN MILES)

(FIGURES WITHIN BRACKETS INDICATE RAIL DISTANCES)

Note : The distance between any two places is indicated at the intersection of the vertical and horizontal lines connecting them.

EXPLANATORY NOTE

The Village Directory is primarily an Anchal-wise list of villages arranged in alphabetical order. While serving this purpose, it also gives certain information about gross cropped and irrigated areas (cols. 5 and 6), irrigation facilities (cols. 7—11), drinking water-supply (cols. 12—14) and availability of transport (cols. 15 and 16) for each village. The 1951 Census population of each village has also been shown in col. 4 for comparative purposes. All such information should have been actually gone into the Village Statistics portion (*see* Part II), but this could not be done for want of space. However, the Village Directory read with the Village Statistics should give detailed information for each and every village. Cols. 2 and 3 of the Village Directory give the cross reference to the Village Statistics.

The data relating to irrigation facilities, drinking water-supply and transport have been compiled from the Village Note prepared for every village at the time of the House-listing (September-October, 1960) for the 1961 Census. The gross cropped and irrigated areas noted in cols. 5 and 6 respectively have been obtained from the District Statistical Officer, Patna.

The term '*mauza*' (col. 1) has the same meaning as a 'Revenue village' (*see* Explanatory Note to Village Statistics).

The different abbreviations used in this Table are explained below:

Cols. 7 *to* 14—

B—Bandh (including *Ahar*, *Pyne* and *Nala*)
C—Canal
K—*Kacha* well
Ors.—Others, such as river, Tube-well, etc.
P—*Pukka* well
Riv.—River
T—Tank (including *Garha*)
Tw—Tube-well
W—Well

Cols. 15 *&* 16—

B—Bullock-cart
C—Cycle

Figures under cols. 7, 9, 10, 12, 13, 15 and 16 indicate numbers, while figures under col. 8 give the distances in miles. The figures preceding the abbreviations in cols. 11 and 14 denote the number relating to it. N.A. means not available and U denotes uninhabited.

PART II

VILLAGE AND TOWN STATISTICS

EXPLANATORY NOTE

Village Statistics containing a reproduction of the Primary Census Abstract were presented for the first time in 1951 in Part II of the District Census Handbooks. This innovation has been followed in 1961 with certain improvements. The main object of this table is to furnish for every village certain basic data such as area, number of occupied residential houses and households, general population as well as population of scheduled castes and scheduled tribes, literate and educated persons and workers and non-workers classified into various industrial categories separately for each sex.

Definitions

Village : The term "village" has the same meaning as a revenue *mauza*. A *mauza* means "a parcel of land which as a rule is partly built over but mostly cultivated and waste with a definite position and area, the boundaries of which were defined either at the time of the cadastral survey or at the time of the revenue survey. It may contain no houses at all or, on the other hand, several hamlets each bearing a different name".

House : A "house" means "a structure or part of a structure inhabited or vacant, a dwelling, a shop, workshop, factory, a place of worship or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance".

"Occupied residential house" refers only to such houses as are used for dwelling purposes either wholly or in part.

Household : A "household" means "a group of persons who commonly live together in the same house and take their meal from a common mess unless the exigencies of work prevent them from doing so".

Workers : Workers are those who are engaged in some kind of economic activity. They have been classified into the following nine industrial categories :

I Cultivators.

II Agricultural labourers.

III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.

IV Household Industry.

V Manufacturing other than Household Industry.

VI Construction.

VII Trade and Commerce.

VIII Transport, Storage and Communications.

IX Other Services.

Non-Worker : A person who is not working is a non-worker. The following is the list of non-workers of different kinds :

(1) Full time students or children doing no other work, such as make articles at home for sale nor even help part-time in their own family cultivation, industry, trade or business ;

(2) Housewives or such other persons engaged in unpaid home duties, doing no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business ;

(3) Dependants such as infants or children not attending school, persons permanently disabled from work because of illness or old age ;

(4) Retired persons (not employed again), rentiers, persons living on agricultural or non-agricultural royalty, rent or dividend or other persons of independent means for securing which they do not have to work and who do no other work ;

(5) Beggars, vagrants or independent women without indication of source of income and others of unspecified source of existence ;

(6) Convicts in jail (undertrial prisoners were treated as workers if they used to work before being apprehended), inmates of a penal, mental or charitable institution ;

(7) Persons not employed before but now seeking employment for the first time; and

(8) Persons employed before but now out of employment and seeking work.

Column Headings

Col. 1 [*Serial no. (Thana no.)*]: The figure within brackets immediately after the serial number under this column is intended to indicate the revenue thana number of the village. The name of Revenue Thana has been shown in bold capital letters above the village names in column 2.

*Col.*2 (*Name of village*) : Within an Anchal, villages have been arranged according to the Gram Panchayat (where constituted at the time of census arrangements for 1961) to which they belong; or according to their thana numbers in blocks of 5, where no Gram Panchayat was then constituted.

If the Gram Panchayat bears the name of one of its constituent villages, it has been indicated by printing the name of such village in *italics*. Where this is not so, the name of the Gram Panchayat has been printed in *italics* at the head of its constituent villages.

The jurisdication of Gram Panchayats has been obtained from charge registers prepared by the Charge Superintendents for the Census of 1961. It may be noted here that at the time of preliminary arrangements for 1961 Census, the jurisdictions of many Gram Panchayats were not finally settled. Some were in the process of proposed changes. Great difficulty was also experienced in obtaining a complete and authentic list of Gram Panchayats with the names of their constituent villages. Efforts were no doubt made to verify the lists with those maintained in the District Gram Panchayat Offices. But it is possible that in some cases the jurisdiction as indicated herein is not in strict conformity with the actual position. However, this is the first time that such information is being made available in print and few discrepancies here and there may be excused.

Several symbols and abbreviations have been used under this column to the left or right of the village names. These indicate various kinds of amenities found in the village. For full explanation of these, a reference may be made to the relevant section below.

Col. 3 (*Area in acres*): Village areas have been reproduced from the Thana Jurisdiction Lists. The Anchal area is the arithmetical total of village areas. In the following cases, however, the areas differ from those published earlier in Part II-A, Vol. IV, Bihar, Census of India, 1961. The differences are due to copying or computational errors which have been detected subsequently :

Subdivision/ Anchal	Area published in Part II-A (in sq. miles)	Corrected area (in sq. miles)
Sadar		
Patna Rural (*b*) ..	13.1	14.0
Phulwari ..	69.5	70.2
Barh		
Pandarakh ..	89.5	89.6

Cols. 6 *to* 36—In these column headings, P stands for Persons, M for Males, and F for Females.

Dots under columns 9 to 36 indicate 'nil' figures.

Sources of Information

Information about village amenities other than post offices and post and telegraph offices have been compiled from the Village Notes prepared by the census agency at the time of houselisting, which operation was conducted in September-October, 1960. Locations of post offices and post and telegraph offices have been shown on the basis of the information obtained from the office of the Post Master General, Bihar Circle.

Figures relating to occupied residential houses and households (columns 4 and 5) have been obtained from the Household Schedules filled in at the time of census enumeration between the 10th February and 5th March, 1961.

All other data have been processed from the Individual Slips, which were prepared separately for each individual at the time of enumeration.

Symbols and Abbreviations

The various symbols and abbreviations used under the column 2 of the table relate to the existence of certain amenities in the villages concerned. Their significance is explained below :

Symbols

+—Post Office.
†—Post and Telegraph Office.
‡—Electrified village.
*—Rest House, Inspection Bungalow, Dak Bungalow, etc.

Abbreviations

A—Allopathic medical practitioner.
B—Senior Basic School.
C—Community Building.
Cc—Cane-growers' Co-operative Society.
G.P.—Gram Panchayat.
H—Homeopath.
h—High School.
Hos—Hospital/Dispensary.
Ic—Industrial Co-operative Society.
K—Makhtab.
L—Public Library.
M—Middle School.
m—Madersa
Mc—Multipurpose Co-operative Society.
Oc—Other Co-operative Society.
P—Primary School.
Rhc—Rural Health Centre.
Rvc—Rural Vaccination Centre.
S—Sanskrit Pathshala.
T. no.—Thana number.
U—Unani Hakim.
V—Vaidya.

Where the amenities existing in the village exceeded one, their number has been given immediately after the abbreviation.

EXPLANATORY NOTE

Town Statistics give the same data as Village Statistics, but for urban areas.

According to the definition adopted for the 1961 Census, a town includes "(*i*) every municipality or notified area; (*ii*) all civil lines not included within municipal limits; (*iii*) every cantonment; and (*iv*) such other places which have (*a*) a population of not less than 5,000, (*b*) density not less than 1,000 persons per square mile, (*c*) at least 3/4th of the adult male population engaged in non-agricultural livelihood, and (*d*) which have been declared to be a town for census purposes by the Superintendent of Census Operations because of the historical or administrative importance of the place, or such other factor".

As areas of individual wards were not available, only the town areas have been given.

Other concepts and explanations are the same as in the case of Village Statistics.
