DISTRICT CENSUS HANDBOOK

PART A—VILLAGE AND TOWN DIRECTORY

SUNDARGARH

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in views. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the corelation of the amenities

with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and accordingly to the proportion of Scheduled Castes and Scheduled Tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirement of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class—I and Class—II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement-IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement-V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the column on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahasil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value. The district and Tahasil/Police station/C. D.Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri A. R. Nanda, I. A. S., the Director of Census Operations, Orissa on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA
Registrar General, India

New Delhi
The 26th April, 1982

PREFACE

It has been the tradition of Indian Census to present demographic data in as detailed a manner as possible so as to serve effectively the interests of the users of Census data. 1981 Census has been completed leaving behind a vast mass of data collected carefully and meticulously on a country-wide basis by an army of trained enumerators. It is needless to mention that modern Census is no more confined to mere counting of heads. It is a kind of stock-taking, as it were, of the nation's human wealth. It has collected information of every individual, besides a host of other activities, institutions, establishments services and so on. Thus, it has become an indispensable instrument of policy for development planning-referred to by planners, data users, scholars and people from different disciplines and aims at presenting a complete picture of man in socio-economic and cultural settings.

District Census Handbook was first introduced as an auxilliary to 1951 Census and appeared as a State Government publication in more comprehensive and ambitious form in subsequent censuses. Under the existing instruction, the Director of Census has the responsibility of providing the Census data as well as non-census socio-economic and administrative statistics for this publication which is the responsibility of the State Government. In 1951 and 1961, it was published in one volume. During 1971, this publication was proposed to be presented in three parts. Part-A incorporated the Town and Village Directories, Part-B incorporated the Primary Census Abstract and provided data upto village level for the rural area and upto enumeration block level for the urban area. Part-C incorporated other Census tables and administrative statistics.

According to the publication programme of 1981 Census, it has to be pubilshed in two parts. Part-A will comprise the Village and Town Directory whereas Part-B will contain Village and Town-wise Primary Census Abstract. The first Part— Part-A consists of important statistical information relating to each town besides an array of statistical data relating to land use and various other amenities available in each village. Part-B of the present publication contains the essential census data known as Primary Census Abstract which provides demographic details of each district, tahasil, police station and down to each village and town and within the town, each ward. The aforesaid statistical information is enriched by the administrative map of the administrative units viz., district, tahasil and police station, availabe in the publication. These maps have been prepared in the Directorate of Census on the basis of maps obtained from the competent local authorities. In the Police Station maps, villages have been presented by their location code number for want of space. For the names of villages, one would have to refer to the alphabetical list of village of each tahasil, which are available both in Part-A and Part-B for facility of the readers.

With the object of avoiding delay and also to make each volume handy and not-too-bulky, it has been decided to bring out 1981 District Census Handbook in two parts.

In pursuance of the scheme for publication of the District Census Handbook, an analytical note has been provided explaining the census concepts adopted in the operation for easy appreciation of the subjects covered in the directory. An administrative map of the district is given at the beginning of the volume. Brief history of the district has

been provided for introducing the district to the reader. The scope of Village Directory, Town Directory, Statements and Primary Census Abstract has been explained with reference to the contents of statements available in the publication.

The geographical aspect of the district including decadal jurisdictional changes available in the publication is intended to make it more informative. Another venture of 1981 is presentation of major characteristics of the district particularly in relation to the *economic resources as furnished by the district authorities in the various fields of administration.* This is directed to provide an interesting profile of the district to the reader as well as appreciation of developmental activity in the district during the decade. Notes on different codes used in this directory have been provided for the convenience of the reader in understanding the data. Note on places of religious/historical interest has been provided to make the publication more interesting. The analysis of census results of the district at the end will be of some interest to the readers and data users.

Information on amenities in the Village Directory has been collected from the Tahasildars and Block Development Officers. A very few selected items were collected through the census enumerator during his door-to-door visit. The Executive Officers of Municipalities and Notified Area Councils provided such data on towns. The collection and compilation of such massive data of each village and town was a stupendous task. Despite all possible care taken through intensive check and re-check to remove discrepancies in facts and figures, possibility of errors still creeping in can not be altogether ruled out.

I must express my deep gratitude to Shri P. Padmanabha, I. A. S., Registrar General and Census Commissioner, India and Shri N. G. Nag, Deputy Registrar General (Social Studies) for the timely guidance and advice through circulars.

I must place on record my deep appreciation and thanks to the Departments of Government of Orissa, heads of Departments, local bodies, District Officers, Tahasildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils for whose active co-operation and help the voluminous compilation has been possible.

For providing additional information on general characteristics of the district as economic activity, decadal changes (1971—81) of special note, I am grateful to Shri B. B. Parida I. A. S., Shri H. Patnaik, I. A. S., District Magistrates and Shri U. S. Bhatia, I. A. S., Shri A. S. Sarangi I. A. S., Additional District Magistrate-cum-District Census Officers, Sundargarh who had taken keen interest in making this compilation more informative.

For timely scrutiny, compilation and tabulation of District Census Handbook data, the supervision and assistance rendered by Shri B. Sahu, O. A. S (I), N. C. Dutta, O. A. S. (I), J. Panda, O. A. S. (I), P. C. Roy, O. A. S. (I), and P. K. Mohapatra, O. A. S. (I), Deputy Directors-in-charge of Regional Tabulation Offices and their staff are worth mentioning. The job would have been difficult but for their diligent and tireless effort.

In my office, I am specially thankful to Shri S. K. Swain, Deputy Director, Shri Madan Mohan Das, O. A. S., Deputy Director, Shri C. R. Mohanty, Asst. Director and the staff of District Census Handbook, Map and Printing branches of the Census Directorate for diligence and zeal shown in this important assignment. Its expeditious preparation has placed a heavy burden on all officers and staff of this office. To each of them I am deeply obliged. The Deputy Director of Survey & Map Publication, Orissa, Cuttack has ensured printing and to him I offer my thanks.

Bhubaneswar,
September, 1982.

A. R. NANDA

ANALYTICAL NOTE

Census Concepts

Some of the important concepts and definitions used in 1981 Census and frequently mentioned in this publication are briefly explained below.

Village

It has been the Census tradition to present statistics by rural-urban break-up. Villages and Towns are universally accepted as the basic units of human habitation. A "Village" refers to any tract of land recognised as a village by the local administration in the revenue record. The revenue village may have a definite surveyed boundary or not. The revenue village may comprise several hamlets which do not have definite boundary or areas distinctly marked. The revenue village is inclusive of the sites of residence of the inhabitants and the entire area including hills, nalas, cultivable land and village forest, but excluding reserve forest. An uninhabited village is one which does not have any residential population in the entire tract. A revenue village may comprise several hamlets with a boundary in case of a surveyed village or a notional boundary in case of unsurveyed village; but the entire village is one unit for presentation of census data.

There are some forest villages located inside reserve forests and recognised by the State Government, which have been taken as villages for the purpose of census. Similarly, inside the reserve forest, some clusters of habitation were located, which are sometimes unauthorised in the eye of law. Such cases were also recognised as villages by way of treating clusters inside the jurisdiction of a forester's beat as one village. In course of the decade, several areas in the State remaining unsurveyed upto the previous census, have been surveyed in the meanwhile and such villages were included in the frame of current census.

Town

No society can be strictly termed as fully urban or completely rural. The dividing line is a far from sharp, since condition varies from country to country and it has not been possible to formulate a uniform definition which can be applicable to all places.

For the purpose of 1981 Census in India, an urban area has been defined as :

(a) all places with a Municipality, Corporation or Cantonment Board or Notified Town Area, and

(b) all other places satisfying the following criteria :

(i) a minimum population of 5, 000,

(ii) atleast 75 per cent of the male working population engaged in non-agricultural (and allied) activity,

(iii) a population density of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile).

Similar criteria were also adopted during 1971 Census.

Thus the area statutorily notified by the State Government as "Municipalities" and "Notified Area Councils" have been brought under the urban frame of Census. Besides, there are some marginal cases having distinct urban characteristic which as such do not qualify to be town by the State Government. Such cases—13 in number throughout the State were finalised by the Director of Census in consultation with the District Magistrates, which have been presented under the nomenclature of non-statutory census town, satisfying the following conditions :

(a) a minimum population of 5, 000 as projected in 1981 ;

(b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits ;

(c) a density of population of atleast 400 per Sq. Km. (or 1, 000 per Sq. Mile)

Classification of Towns

It has been customary for the census to classify the towns according to the size of their population. For 1981 operation, the classification was as follows :

CLASS	POPULATION
I	1,00,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Urban Agglomeration

The concept of "Urban Agglomeration" introduced during 1971 Census has also been adopted during 1981 to take care of the continuous urban spread of a recognised urban area. Very often, large railway colonies, university campuses, port areas and military camps etc. come up around the statutory boundary limit of the city or town having distinct urban characteristics. Such areas may not by themselves qualify to be treated as towns, but form a continuous spread with the town as 'out-growths' of the town and deserve to be treated as urban. Such town(s) together with their out-growths have been treated as urban units and are called "Urban Agglomerations". Thus an Urban Agglomeration may comprise :

(a) a city with continuous urban out-growth, (the part of the out-growth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) or

(b) one town with similar out-growth or two or more adjoining towns with their out-growths as in (a) or

(c) a city and one or more adjoining towns with their out-growths all of which form a continuous spread.

Accordingly, eight Urban Agglomerations have been formed in the 1981 Census throughout the State.

Standard Urban Area

During the 1971 Census, a new concept of "Standard Urban Area" was introduced in the context of urban classification. The Standard Urban Area is defined as the projected growth area of a city or town having a population of 50, 000 or more during a period of two or three decades. While delineating Standard Urban Area it is not only necessary to take into account the towns and villages which will get merged into it, but also the intervening areas which are potentially urban. The Standard Urban Area is a long-term planning area having a growth potential in a longer time span. In the context of developmental planning for urban areas, it is desirable to fix the Standard Urban Area beyond the boundary of large town having growth potential over a period of 20 years or so.

The standard urban area includes all areas which have any or all of the following characteristics (b) to (e), while characteristic (a) should be the basic minimum :

(a) Core town having minimum population of 50,000;

(b) Predominent urban land use;

(c) Intensive interaction with urban centres as reflected in communication for the purposes of work and secondary educational facilities; extension of city bus service, sale of commodities like milk, dairy products, vegetables (other than those transported by rail or truck haul) and purchase of food grains, clothes, general provisions etc. by the consumers directly;

(d) Anticipated urban growth as a result of future location of industry, market, transport and communication, administrative and servicing facilities;

(e) Existence of big villages with large population of working force engaged in non-agricultural and industrial categories.

Taking these factors into account the following standard urban areas were formed during the 1971 Census; 1. Sambalpur

2. Raurkela, 3 Baleshwar, 4. Cuttack, 5. Jeypur, 6. Brahmapur, 7. Bhubaneswar and 8. Puri. The standard urban areas of these towns were finalised in consultation with the Town and Country Planning Organisation of Government of India and Town Planning Organisation of Government of Orissa and are continued in 1981 Census.

There is subtle difference between the standard urban area and urban agglomeration. For the urban agglomeration out-growths should be contiguous having distinct urban characterstics, whereas, standard urban areas would cover both urban and rural areas around a core town which are likely to be urbanised within a period of two to three decades.

Building

A "Building" is generally a single structure on the ground. Sometimes, it is made up of more than one component unit which are used or likely to be used as dwellings (residence) or establishments, such as shops, business houses, offices, factories, workshops, schools, places of entertainment, places of worship, godowns and stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. Usually, a structure will have 4 walls and a roof. However, there are some areas where the very nature of construction of house is such that there may not be any wall. A typical example of this may be found in the Nolia habitation at Puri, where the house does not have wall, but an entrance and the conical roof which almost touches the ground. Such structures are also treated as buildings.

Census House

A 'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

An "occupied residential house" is a census house which is partly or wholly used for the purpose of residence at the time of Census enumeration.

Household

A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of un-related persons or having a mix of both. Example of unrelated households are boarding houses, messes, hotels, residential hotels, rescue homes, jails and ashrams etc. These are called "institutional households". There may be one member households, two-member-households or multi-member-households. For Census purposes, each one of these types is regarded as a household. If a group of persons who are un-related to each other live in a census house, but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person is treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen.

Enterprise

An "Enterprise" is an undertaking engaged in production and/or distribution of goods and/or services not for the sole purpose of own consumption. The workers in an enterprise may consist of members of the household or hired workers or both. An enterprise may be owned and operated by one household or by several households jointly (on a partnership basis) or by an institutional body. The activities of an enterprise may be carried on in a single census house or in more than one census house or in the open i.e. without premises. The activity of the enterprise may also be carried on only for a part of the year but on a fairly regular basis. It may also be possible that more than one enterpreneurial activity can be carried out in one census house. However, the results of such economic census after tabulation are being brought out by the Central Statistical Organisation separately. This excercise was extended to provide data for the planners regarding categories of agricultural and non-agricultural enterprises. The voluminous data included location of enterprise, description of the activities of enterprise, nature of operation,

type of ownership, social group of owner, power/fuel used for the activity and the total number of hired persons usually working in the enterprise.

Literate

A person is considered to be literate if he is able to read and write in any language with understanding. A person who can merely read but can not write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 4 years or less have been treated as illiterate, even if the child is going to school and may have picked up reading and writing a few odd words.

Scheduled Caste

The Scheduled Castes are specified in the Government of India (modification) order of 1956. 93 castes have been notified as Scheduled Castes in this State.

One caste, viz., 'Kuli' in Sambalpur district has been dropped from the Scheduled Caste list as per the Amendment Order, 1976.

Worker and Working Population

The population of a country can be divided into economically active and inactive. The economical active group is generally referred to as the working population. What proportion of our population are engaged in work or are economically active and what job they do for their living, these are the issues which the Census proposed to obtain through its massive operation in order to provide a broad dimensional picture of the labour-force. The Censuses conducted so far contain a wealth of economic data. There have been experimentations with the definitions from Census to Census and as a result, the definition of working force has rarely remained unchanged between two Censuses as would be evident from the paragraphs to follow.

"The means of livelihood" approach was adopted from 1901 upto 1951. From 1901 to 1921 the expressions used were "Workers" and "Dependents". In 1931, the concepts used were "earner", "working dependent" and "non-working dependent". In 1951, the categories were "self supporting persons", "earning dependents" and "non-earning dependents". In 1961 and 1971, however, there was a shift to the labour-force approach, according to which a person was treated as "worker" if his activity during the reference period was productive one. Thus, from 1961 the concept of worker and non-worker came into being. The difference in the concepts in 1961, 1971 and 1981 Censuses is summarised below :

(a) 1961 CENSUS

"Workers" = main workers + marginal workers of 1981
"Non-workers" = non-workers of 1981

(b) 1971 CENSUS

"Workers" = main workers of 1981.
"Non-workers" = marginal workers + non-workers of 1981.

The questions which were canvassed in the individual slips during 1981 Census to elicit information on the characteristics of the population were as follows :

I. Q. 14A Worked any time at all last year ?
Yes
No (H/ST/D/R/B/I/O)

II. Q. 14B If yes in 14A, did you work for major part of last year ?
Yes (1)/No. (2)

III. Q. 15A Main activity last year ?
Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

IV. Q. 15B 14B Yes—Any other work any time last year ? Yes (C/AL/HHI/OW)/No
14B No—Work done any time last year ? (C/AL/HHI/OW)

V. Q. 16 If no in 14A or 14B, seeking available for work ? Yes (1)/No (2

Basically, during 1981 Census the question have been formulated so as to divide the population into those who have worked any time a

all during the last year and those who have not worked at all. Having classified the population into these two broad streams, the next attempt was to divide those who have worked any time into two sub-streams viz., those who have worked in some economic activity over a period of 6 months or more or in both the agricultural seasons and those whose work can be considered as marginal or secondary (i.e. less than 6 months). Finally an attempt has also been made to determine whether those who are non-workers or those who are marginal workers are either seeking or are available for work.

"Work" has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. In all these questions the reference period is one year preceding the date of enumeration. Some work viz., agriculture and household industry are carried on either throughout the year or during a particular season or part of the year depending on local circumstances. In such cases the reference period has been the broad time span of the agricultural season preceding the enumeration has been kept.

An attempt has been made in this publication to present data relating to "main workers", "marginal workers" and "non-workers" separately. In case of main workers the distribution of such workers among cultivators and agricultural labourers, those engaged in household industry and other workers have also been given. The main workers are those who have worked for a major part of the year preceding the enumeration.

"Marginal workers" are those who have worked any time at all in the year preceding the enumeration but have not worked for a major part of the year. The type of work in which marginal worker were engaged have been elicited through question 15B.

"Non-workers" are those who have not worked any time at all in the year preceding the enumeration.

If the number of main workers, marginal workers and non-workers are added up, one would arrive at the total population itself. In other words, these are exclusive categories.

Main activity of workers has been classified into the following four broad categories :

(i) Cultivator

A person is regarded as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops viz., wheat, paddy, jawar, bajra and other crops, such as sugarcane, groundnut etc. and pulses, raw jute and kindred fibre crops, cotton, etc. and does not include fruit, growing of vegetables or keeping orchard or groves or working of plantation like tea, coffee, rubber etc.

(ii) Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation, but merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

(iii) Household Industry

"Household Industry" is defined as an industry conducted by the head of household himself/herself and/or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. It should involve production, processing, servicing or repair of articles or goods, not on the scale of a registered factory. The larger proportion of workers in a household industry should consist of members of the household including the head.

The main characteristics of the "Household industries" are the following :

a) One or more members of the household must participate. Participation by hired labour must be minimum.

b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods.

c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sell.

d) In an urban area the industry must be carried on in the precincts of the house in which the household lives. In the rural areas, the industry may be anywhere within the limits of the village.

e) The activity should not be on the scale of a registered factory.

f) Professions such as those practised by Pleader, Doctor, Barbar, Musician, Dancer, Dhobi, Astrologer etc. will not be Household Industry.

(iv) Other Workers

All workers i.e. those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or engaged in household industry are "Other Workers". This includes factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all Government servants, teachers, priests and artists etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry are other workers.

Other particulars, viz., name of the establishment, description of work, nature of industry, trade or service and class of worker were also obtained in respect of those who returned "household industry" or "Other work" as their activity.

Non-worker

In case of persons who are non-workers throughout, information relating to them has been obtained through categories, as mentioned below.

i) Household duties
ii) Students
iii) Dependents
iv) Retired persons or rentiers
v) Beggars etc.
vi) Inmates of institutions
vii) Other non-workers

(i) Household duties

This covers all persons who are engaged in un-paid home duties and who do no other work, or have not done any work at all during the last one year. If a person who normally attends to household duties is also engaged in some economic activity, then he or she is a worker. For example, a housewife may help in family cultivation or agriculture or make and sell cowdung-cakes etc. at odd times. She is treated as worker.

(ii) Students

This will cover all full-time students and children attending school. If a student participates in some economically productive work, like helping sometimes as an un-paid family worker in family cultivation etc. such students should be treated as a worker and not as student. Very often the daughter in the family helps in the household work though she is studying full time, in which case she is treated as student.

(iii) Dependent

This includes all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. Dependents include even able-bodied persons who can not be categorised in any other category of non-worker but are dependent on others.

(iv) Retired persons or rentiers

A person who has retired from service and is doing no other work and is not employed again in some full time work or engaged in some other work such as cultivation, business, trade etc. or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he/she does not have to work comes under this category. If a retired person is doing some work, in such case he/she is a worker.

(v) Beggar

This covers beggars, vagrants or persons without indication of source of income and those without specified source of subsistence, who are not engaged in economically productive work.

(vi) Inmates of institutions

This covers convicts in Jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc. in such institution. However, an under-trial prisoner enumerated in a jail is recorded for the work he/she was doing before he/she was apprehended. Similarly a person temporarily in a hospital or similar institution is recorded for the kind of work he/she was doing before being admitted into the hospital or institution. However, the previous work is not recorded in respect of long term under trial prisoner or convict or for long term inmates of penal, mental or charitable institutions. A person is considered as 'long term',if he or she is in such an institution for 6 months or more.

(vii) Other non-workers

This includes all non-workers who do not come under any of the above six categories, but are looking for work. A boy or girl who has completed education or has stopped studying and is looking for work comes under this category. Alternatively a person who is merely spending time at home as a dependent and is not doing any work and not seeking any work is not coming under this category. In case of students who may be seeking work and are quite prepared to give up studies, if they get a job they are to be recorded as 'Students'.

Area figure

In keeping with the census tradition, the Surveyor General of India provides the area figures for the State and district level. Hence the area figures of the district along with the spelling of the district name as adopted by the Surveyor General, India has been adopted in the publication, with a view to maintaining uniformity of data at the national level. The area figures of the units down below the district level, viz, tahasil, police station, towns have been given in sq. km. The Tahasildars had reported the area figures in acres in respect of the units in the rural area, whereas the Executive Officers of the urban bodies have reported the area figuers for the urban units. The area report in acres by such functionaries were converted into sq. km. Regarding the area of the villages, the same were also furnished by the Tahasildars. The total area of all tahasils of the district does not add upto the area of the district because the former represents the land-use area and is derived from the figures supplied by the local revenue authorities. Similarly the total of the village area may not tally with the rural areas of the tahasil. The difference may be due to the fact that the village area may not necessarily include the area under hills and rivers etc. which are included in the tahasil area. Besides, there are also varying methods on computation adopted at different levels. Area figures for the unsurveyed revenue villages have been left blank like the forest villages and are indicated as "Not available".

Though there has been no change in the boundary of the State between 1971-81, the revised computation in the area of some districts has resulted in marginal decrease of 135 sq. kms.

Density

The density (population per sq. km) shown for the State/District/Tahasil/Police Station/Town have been worked out using the area figure corrected upto two places of decimals.

Spelling of administrative unit

As explained above, the spellings of district have been adopted from the Survey of India to maintain uniformity at all-India level. However, the spellings of lower units, viz., tahasils, police stations, village, town are in confirmity with the spellings available in the State Government records.

Physically handicapped persons

It is customary for the Census to introduce new concepts in every Census Accordingly an attempt was made during the houselisting operation conducted in April-May, 1980 to find out the statistics regarding the physically handicapped

persons all over the country. Physically handicapped persons were broadly recorded under three categories, viz., totally blind, totally crippled and totally dumb.

The term "Totally crippled" refers to such persons who have not lost their arms or limbs. The loss of arms or legs or all the 4 limbs refers to loss of both the arms or loss of both the legs. It is not necessary that the disabled should have lost both arms and legs. The loss of either of these i.e., both arms or both legs would be sufficient for classification as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus a paralytic who has lost use of both the legs or both the arms was taken as totally crippled, though the limbs are physically available. However, the loss of either one arm and/or leg did not classify a person as totally crippled. There are other situations where a person unfortunately suffers from more than one of the aforesaid disabilities. In such cases, the intention was to record the persons by greater disability. For example, a person may be both blind and dumb or blind and crippled. In such cases the intention was to find out the greater disability, whether blindness is considered as greater disability than either dumbness or being crippled. Similarly being crippled is greater disability than being dumb. In the extreme cases, where a person suffered from all the 3 disabilities, it was recorded under the category 'blind' which is certainly the most unfortunate disability. It was usual to find a person blind or crippled due to old age and such cases were also taken note of and categorised under appropriate classification since he suffered from disabilities.

Brief History of the District

Two princely States of Gangapur and Bonai constitute the present district of Sundargarh, consequent upon merger of the princely States in 1948. It is understood that the district comprised in ancient time, the territory of South Kosala. However, divergent views are available regarding the origin of the ruling family. Both these ex-States were once under the suzerainty of Sambalpur which formed part of the dominion of the Marhata Rajas of Nagpur. They were ceded to the British Government in 1803 by the Marhata Chief Raghuji Bhonsla of Nagpur under the treaty of Deogaon. But they were restored to him by special engagement in 1806. They were finally ceded in 1826. In 1905, they were transferred from the control of the Commissioner of Chotanagpur to that of Orissa and a separate Political Agent was appointed.

For the revenue and general administration the district has been divided into three Sub-divisions viz., Sundragarh, Panposh and Bonai and 5 Tahasils, each in charge of Tahasildar. The district has been divided into 21 Police Stations. For developmental administration, the rural area of the district has been brought under 17 C. D. Blocks, which has been subsequently converted into Tribal Development Blocks. There are 139 Grampanchayats in the district. Similarly, Revenue Administration is carried through 41 Revenue Inspectors under the supervision of the five Tahasildars. There are six towns in the district which include one non-statutory Census Town.

The district is inhabited mainly by Scheduled Tribes and there is much difference between the inhabitants of Gangapur and Bonai ethnologically and economically. The people inhabiting in Panposh sub-division are mainly Mundas and Oraons who are highly sensitive and conscious of their rights. The Bhuiyans, inhabiting the Bonai sub-division are very hospitable and of steady temperament. The Agharias, mostly found in Gangapur area are very advanced agricultural community. The present industrial complex of Raurkela have drawn a large mixed population whose contact is evolving a new culture among the tribes.

District Census Hand Books

Among the traditional documentation of the Census, the fairly comprehensive and uniform publication of District Census Handbook (D. C. H.) consisting of town and village directory and town and villagewise Primary Census Abstract (P.C.A.) has been found to be very useful and are constantly referred to by the planners and data users. The District Census Handbook is the only publication that incorporates the data down to a village level in rural area and upto ward level in the urban area. The data published in these volumes are of immense value to the planners, scholars and administrators for the purpose of village level, block level and district level planning and studies. It is a publication of the State Government. The cost thereof is borne by the State Government. However, the Director of Census of the State is responsible to the extent of providing necessary data which are obtained through Census.

This document was first published as an auxiliary to 1951 Census, consequent upon the request of the Government of India to State Government to publish District Census Handbooks containing statistical information relating to villages, towns and police stations etc. of the districts. The State Government agreed to this and decided to bring out District Census Handbook as a priced publication to be published in the State Government Press. This publication since then is continuing with unbroken chain. Apart from giving the rural statistical information, it readily gives a complete list of villages contained within a Police Station and District. It will not, nowever, be out of place to mention here that in many districts, complete list of villages is not maintained properly and the present list is the result of extensive enquiries and contacts with different agencies and can be regarded as exhaustive.

To make the data component more illustrative maps of the district, tahasil and police station are also published in the publication. The Police Station maps showing the villages as per the population size, having different amenities represented in approved legend will help the readers in easy appreciation.

According to the 1951 publication programme the District Census Handbook was published in one volume and did not contain information given in the village and town directory. Apart from this the brief introduction of the district, general features, density map, prescribed tables for general population, economic tables, social and cultural tables and village statistics were provided in the District Census Handbook. The Primary Census Abstract was given under the heading "village statistics". However, the information on villagewise list of displaced persons, and information on small scale industries were presented in the 1951 District Census Handbook volume.

Similarly, 1961 Census publication was presented in one volume. This volume was divided into 3 parts. First part contained the introduction of the district, second part contained the census tables and the official statistics was given in the third part. The information given in the Village Directory and Town Directory for 1981 Census was not given in the 1961 District Census Handbook. The villagewise Primary Census Abstract was given in the second part under the heading of "Village Directory". The information on villagewise list of industries and tables on fairs and festivals were presented in 1961 District Census Handbook publication.

According to the 1971 Census publication programme, the District Census Handbooks were to be published in 3 volumes; Part-A containing the data on amenities, Part-B incorporating Primary Census Abstract (P. C. A.) and part-C giving administrative statistics and census tables. District Census Handbooks, part-A and part-B for the 1971 Census could be published quickly. Both these volumes were in great demand by the data users, as they contained a vast mass of data on amenities available in the Village/Town alongwith demographic features. In regard to the District Census Handbook Part-C, we faced difficulties in collecting administrative statistics from various Offices and our progress in

publishing the report was considerably delayed. After obtaining necessary statistics, much difficulty had to be encountered in printing of the part-C, which was pending in the State Government Press at Cuttack for a pretty long time. Under compelling circumstances the manuscript could be printed in the Private Presses located at Cuttack and elsewhere. In view of the inordinate delay in collecting administrative statistics which would in any case be available to the data users in the publications of the respective Statistical bureaus/departments of the State Government there was re-thinking in the matter to drop the publication of part-C of the District Census Handbook for the 1981 Census.

However, it has been decided to publish the 1981 District Census Handbook in two parts. Part 'A' would be confined to village and town directory, whereas part 'B' would be confined to village and townwise Primary Census Abstract including Scheduled Castes and Scheduled Tribes Primary Census Abstract upto Police Station/ Town levels. Despite the fact that publication of both the parts in one volume would have enhanced the value, it could not be helped in respect of the bigger districts comprising large number of villages and towns. Therefore, the publication has been broken up into two volumes (Part 'A' and 'B').

By and large, the contents of the Village and Town Directory are almost similar to those adopted for 1971 Census, barring a few changes necessitated by the requirements of the planners and data users.

The new feature of 1981 format is having provision of the distance range of the particular amenities to a village where it is not present. A few items of information like adult literacy centres have been introduced in the village directory to meet some requirement of the Minimum Needs Programme.

Another introduction viz., "total population and number of households" for each village has been shown in the village directory to ascertain the co-relation of the amenities with population and number of household they serve. Since current day planning has been initiated from the Community Development Block level, villages coming under each Community Development Block has been furnished in the annexure of the village directory for the facility of the administrators and planners, which is a departure from the earlier Censuses.

Similarly in the Town Directory, information on Scheduled Castes and Scheduled Tribes population in statement-IV and availability of adult literacy centres in statement-V are innovations keeping in view the requirement of Minimum Needs Programme.

The significant change in the Town Directory is the provision of class of town in all statements for analysis of the infrastructure of amenities.

Both the Village and Town Directory and objectives of various columns thereunder alongwith the connotation of various abbreviations used therein have been explained in the relevant sections.

Scope of Village Directory

The data on village directory have been presented Tahasil/P.S.-wise and Village-wise. The village includes revenue village and the clusters of habitation located in any tract mentioned thereunder. The names of villages have not been arranged alphabetically since location code thereof have been provided in ascending order. However, for facility of the readers, an alphabetical list of villages under each Police Station with its location code numbers has been provided at the beginning of the village directory. In case of a village treated as an out-growth of an urban agglomeration, the code number and name have been provided minus data thereof which has been shown against such core town. In case of part-village forming a portion of an out-growth, the corresponding data has been shown in the village directory. In case of census towns, such villages have been listed in the village directory without any data on amenities, for which the town directory has to be referred to. However, the land utilisation data for such census town has been made available in Appendix—II

It has been the tradition of census to present maps of constituent administrative units beginning with the district, followed by Tahasils, and Police Stations thereunder. All the maps so presented in this volume have been authenticated by the concerned revenue authorities in so far as the boundary and spellings and locations are concerned. In case of the units adjacent to the coast land of the State, such maps have been cleared by the Survey of India through the office of the Registar General, India.

In addition to the district map, the administrative map of each Tahasil/Police Station has been given in the beginning of the village directory of that Tahasil/Police Station. The boundaries of Police Stations in the Tahasil, location of towns, large villages, rivers, roads, railways, hills, forests and important institutions such as High Schoo Colleges, Medical Institutions, Post & Telegra Offices etc. have been shown in the Taha map. An administrative map of the Polic Station has also been presented in th beginning of the village directory of tha Police Station giving the boundaries of the villages in location codes and towns located within it and other details similar to the Tahasil map. Besides, villages have also been shown through symbolic representation by different population sizes. The uninhabited villages have been shown by cross marks (X). The shaded portion of the map represents the area of the towns.

The information on Village Directory has been provided in the statement containing 20 columns giving areas of the village in hectares, population and number of households, amenities viz., educational, medical, drinking water, power supply, post and telegraph and communication etc. available in the village. In case of non-availability of any of the amenities the distance range of its availability has been provided in the directory. Similarly, the land uses pattern of the village providing the extent of forest area, area under irrigation, un-irrigated area, culturable waste and area not available for cultivation have been indicated in the directory in hectares. Places of religious, historical/archaeological interest have been shown for reference of the readers.

COLUMN 14— *Staple Food* :— Staple food refers to grain and only relates to the majority population of the village using for major portion of the year. Combination of grain in staple food viz., rice, wheat and maize etc. have been indicated.

COLUMN 15 to 19—*Land Use* :— The land use pattern given in the village directory conforms to the patter

land use as recommended by the Ministry of Agriculture, Government of India. The guidelines in this regard are as follows. :

1. Forests
2. Not available for cultivation :
   (a) Lands put to non-agricultural uses
   (b) Barren and un-culturable lands
3. Other un-cultivated lands excluding fallow lands :
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands :
   (a) Fallow lands other than corrent fallows
   (b) Current fallows
5. Net area sown.

In the village directory Column-15 (forest) represents, the category one above. Column-16 (Irrigated) and column-17 (un-irrigated) given break-up of agricultural land, which are a combination of categories 4 (a+b) and 5 above. Column-18 (culturable waste) corresponds to category-3 (a+b+c) above. Column-19 (area not available for cultivation) corresponds to category-2 (a+b). Area figures of the village have been shown in hectares. The total of figures under columns 15 to 19 will not necessarily tally always with the total area of the village as indicated in column-3 of the directory, as there are waterways and hills etc. which may not be included in the land use statistics of the village.

Forests may mean either state owned or private forest and whether wooded or maintained as potential forest land. There are situations where patches of land have been put to agricultural use within the statutory notified forest and have been considered as forest by the revenue administration. These areas have been treated as forest. In Orissa, forest is broadly known under two categories, viz., village forest, known in local parlance as khesra forest and reserved or protected forest. The village forest constitutes an integral part of the village area unlike the reserve or protected forest. This is because communal right in land is not exercisable in the areas known as reserve forest under the Orissa Forest Act.

Leaving aside this, 4 Appendices in the village directory have been presented in this publication, which is a distinct feature of the current census publication.

These are :

i) Tahasil/Police station-wise abstract of educational, medical and other amenities.

ii) Land utilisation data in respect of non-municipal towns(Census Towns).

iii) Tahasil/Police Station-wise list of villages where no amenities are available and

iv) Tahasil/Police Station-wise list of villages indicating the proportion of Scheduled Caste/Scheduled Tribe population to the total population by ranges.

These appendices are new to the present census which provides Tahasil-wise abstract of villages on different priorities. The intention is that the abstract will be helpful for planning inputs in areas/villages where the basic infrastructure is lacking. Similarly the Appendix—IV will be helpful for planning of welfare programmes, for Scheduled Castes/ Scheduled Tribes at micro-level, as it provides data by ranges of Scheduled Caste/Scheduled Tribe population.

Scope of Town Directory

The town directory is intended to cover all the towns in the district statutorily notified as such as also the non-municipal census towns. The towns have been arranged in the town directory in the alphabetical order and do not cover strictly the military areas. The data on amenities and other aspects presented in codes has been explained in detail in separate chapters. Regarding the urban agglomeration the conventional creation of census the names of such agglomerations have been indicated which is similar to the name of the main town of the agglomeration. The particulars for such constituents of the agglomeration have been furnished separately. Such presentation was operationally found to be convenient to have an idea of the particulars of the city or town agglomeration in toto and also severally.

Regarding the out-growths which do not classify to be treated as town, the particulars are not separately available. The directory particulars relating to the out-growths have been merged with the different town and have not been shown separately.

To sum up the earlier format of 1971 D.C.H. Part-A has been restructured for 1981 census, keeping in view the objectives of the Planning Commission for the Minimum Needs Programme and the revised 6th Five Years Plan. More interest has been taken to know the over-all infrastructure in terms of amenities, however, modest or from whatever source it may have been provided.

Information on town directory has been furnished in 6 separate Statements. The scope and the content of the statement adopted for the towns is briefly explained below :

Statement-I—This statement gives the status and growth history of the town. In columns 1 and 2, serial No. of the towns in alphabetical order and names of the town with class and civic administrative status have been furnished. In columns 3 and 4 location code of the town has been indicated giving the names of the tahasil under which it is located. Column 5 gives the area figures of the town in sq. kms. The number of households including the houseless household has been shown in column 6. In columns 7 to 15 the population alongwith the growth rate of town from 1901 to 1981 have been shown, for easy comparability. In column 16 density i.e. population per sq. km. has been furnished. In columns 17 to 19 the sex ratios (females for 1,000 males) as recorded from the 1961 census onwards have been furnished.

Statement-II—It provides the physical aspects and location of the town. In columns 3 to 5 the average rainfall and temperature have been furnished. Distance of the town in kilometers from the State Headquarters, District Headquarters, Sub-divisional Headquarters/Tahasil Headquarters, the nearest city with population of one lakh or more, railway station, bus route, Navigable rivers/canals within 10 kms. It have also been indicated in column 6 to 12 respectively.

Statement-III—The statement reveals a picture of the municipal finance for the year 1978-79. The receipts of the urban local body from various sources have been provided under columns 4 to 10 whereas the expenditure under various items have been disclosed under columns 11 to 17.

Statement-IV—It gives information relating to civic and other amenities as it stood in 1979. Scheduled Castes and Scheduled Tribes have been given under columns 5(a) and 5(b) of the statement. The road length in kms. has been shown under column 6. The system of sewerage, number and type of latrines available in the town in addition to the method of disposal of night soil have been shown under columns 7 to 11. Columns 12 and 13 of the statement deals with the source of water supply and system of storage of the town.

Column 14 of the statement provides the availability of fire service if any in the town. In case, such service is not available in the town, the name of the nearest place where available has been shown alongwith the distance from town. Electrification with number of connections for different uses has been shown in columns 15 to 19 of the statement.

Statement-V—In this statement information relating to medical, educational, recreational and cultural facilities in the town has been shown. Medical facility available in the town has been shown in columns 4 and 5. Educational facilites, viz., number of different types of Colleges. Technical Schools, recognised commercial and vocational institutions, Higher Secondary Schools, Secondary Schools, M. E. Schools, Primary Schools and Adult Literacy Centres have been indicated in columns 6 to 15. Column 16 shows the Working Women's Hostel with the number of seats. Columns 17 to 20 of the statement discloses recreational and cultural facilities like Stadia and Cinema halls etc. available in town. In case of none availability of medical and educational facilities in the town the name of the nearest place alongwith the distance where the ficility is available has been given.

Statement-VI—This represents the information on Trade, Commerce, Industry and Banking as it stood in 1979. In columns 3 to 5, important commodities as imported into the town have been mentioned as against the exported items out of the town shown under columns 6 to 8. The names of the three important commodities manufactured in the town have been shown in columns 9 to 11. Number of banks, number of agricultural credit socities and number of non-agricultural credit societies available in the town have been furnished in columns 12 to 14 respectively in the statement.

There is no notified slum area in any of the towns of the state. Hence, the prescribed statement IV-A has not been provided in the Town Directory.

The towns having out growths have been provided in an Appendix to the Town Directory showing their population separately.

Physical Aspects

The district lies in the north western portion of the State. It is bounded on the north by Ranchi district of Bihar, on the south and south-east by Sambalpur and Dhenkanal districts of Orissa respectively, on east and north-east by Kendujhar and Singhbhum districts of Orissa and Bihar, on the west and north-west Raigarh district of Madhya Pradesh.

The district lies between 21°-35'N and 22°-32'N latitudes and between 83°-32'E and 85°-22'E longitudes. The district does not form a complete geographical unit and is extremely irregular in shape. Area of the district according to the Surveyor General, India is 9,712 sq. kms. Present Census has recorded the district population as 13,37,871 which includes 114,036 Scheduled Caste and 6,85,765 Scheduled Tribe population. Percentage of Scheduled Caste and Tribe population to the total population of the district works out to 8·52 and 51·26 respectively. Area-wise and population-wise the district occupies tenth and eleventh position in the State.

Geographically, the district is not a compact unit and consists of widely dis-similar tracts of expansive and fairly open country, dotted with isolated peaks, inaccessable forests, river valleys and mountainous terrain. Broadly speaking, it is an undulating table-land of different elevations broken up by rugged hill-ranges and cut off by torrential hill streams and the rivers Ib and Brahmani. The general slope of the district is from north to south.

There is a open well-cultivated plain country along the valley of the Ib river particularly in the south. The rest of the Sadar Subdivision consists of undulating table-land about 700ft. in average height, dotted here and there with hills and peaks rising to about 2,000ft., in the western most tracts af Hemgir P. S. In the north there is a gradual rise to the table-land of Chhotanagpur. The portion occupied by Bonai sub-division to the south-east has rugged forest and hills intersected by gorges and passes and having a narrow valley of the Brahmani river and its tributaries. For a short spell of time during the rainy season the rapid current of the hill-streams cut off communication. The east and west of the Brahmani valley is filled with high range of mountains, principals of which are Mankarnacha (3664ft.), Chheliatoka (3331ft.) and Bichakani (2964ft.) in the east. The last hill has acquired importance as it contains million of tonnes of iron-ore for use in Raurkela Steel Plant. The territory of Sundargarh and Panposh sub-divisions comprising the ex-States of Gangpur is about 700ft. above the sea level. Bonai sub-division comprising ex-State of Bonai is about 800ft. above the sea level.

The forest of the district is of northern tropical dry deciduous type, mainly containing Sal, Assan and Kurum. The eastern half of Bonai and Rajagangapur contain better quality of vegetation. The forest area is mostly studded with rich mineral deposits, like iron-ore, manganese, lime stone, lead; also forest products like bamboo, timper and kendu-leaf which are export-oriented.

The soil of Sundargarh on the whole is not very fertile except in the river valleys. In the northern part of the district which is occupied generally by the tribal people, the soil is less fertile. Mixed red and black soil, red sandy soil, gravelly and lateritic soil are found in this area. The mixed red and black soil contain a large quantity of calcium and magnesium carbonates, but is generally deficient in nitrogen and phosphorous. The red sandy soil, gravelly and lateritic soils are generally deficient in potash, phospheric acid and lime. Soil is in general open in texture and well drained. Plenty of iron concentrations are present in the soil.

The soil of Sundargarh sub-division is productive in the Ib valley towards the south, and here the skillful and industrious Agharias make the best use of their land. In the northern

portion, the soil is less fertile and cultivators are at a disadvantage owing to the ravages of wild animals. The cultivated lands in Panposh and Bonai Sub divisions are situated along the river valleys, with a few small and scattered areas in valleys lying between the hill ranges.

Raifall and climate — There is one meteorological observatory at Raurkela. The climate of the district is characterised by hot dry summer and well distributed rain fall in the south-west monsoon season. The hot season starts from March and continues till May, which is the hottest month of the year having the daily maximum temperature of 41°C (105·3°F) and the mean daily minimum temperature of 27°C (80·6°F). In September, the day temperature continues to be unpleasant due to the break in monsoon. The night becomes cooler from October and December is the coldest month of the year with the mean daily minimum temperature of 12°C (53·6°F).

The average annual rain-fall is 1,646·6 mm. (64.86 '). The rainfall is fairly uniform in the whole district. About 86 per cent of the annual rainfall is received from June to September. On the average there are 78 rainy days in the year in the district. Relative humidity is high in the south-west monsoon season. The humidity decreases later and during winter the air is fairly dry.

Jurisdictional change—There has been no change in the territorial outiine of the district after 1971 Census. The area of the district according to the Surveyor General, India, is 9,712sq. km. The area of the smaller administrative units as obtained from the local authorities have been added up to find out the area of the district and this has been adopted for calculation of density and similar other purposes.

Regarding the jurisdictional changes within the district there has been transfer of villages from Police Station to Police Station and from Tahasil to Tahasil during the decade 1971-81. 4 villages from Raghunathapali Police Station have been transferred to Tangarapali Police Station. Another new Police Station under the name of Plant Site Police Station has been formed by way of transfer of 11 villages from Raghunathapali Police Station and 4 villages from Bisra Police Station. 5 villages from Raiboga Police Station have been transferred and added to Rajagangapur Police Station. One village from Bonai Police Station has been transferred and added to Koida Police Station. At the Tahasil levle, 5 villages from Panposh Tahasil have been transferred and added to Rajagangapur Tahasil.

Major characteristics of the district

Mining—The district occupies a prominent Position in the mineral map of the state. The important minerals available in the district are iron-ore, limestone, manganese, dolomite, fire-clay. Besides, a few other minerals like mica, bauxite, lead, copper and zinc are also found. Limestone and delomite are available in Sundargarh and Panposh Sub-divisions. Iron-ore and manganese-ore deposits are available mostly in Bonai and Panposh Sub-divisions of the district. The estimated deposit of iron-ore in the district is 800 million tonnes (Singhbhum-Kendujhar-Bonai belt). The Lime stone and Dolomite depósits are estimated at 320 million tonnes and 280 million tonnes respectively.

During 1980-81, 58 numbers of mines were working in the district which covered Iron-ore, manganese, limestone, fire-clay, lead quartz. Dolomite and fire-clay are exploited by private agencies whereas other mines are run both by Government and private agencies. Orissa Mining Corporation, a State Government undertaking, operates iron-ore mines at Khandadhar, Kesira and mostly feeds the steel plant at Raurkela. The Mining operation in the district is done both by manual and mechanical way.

Due to heavy exploitation of the mining potential, the State Government received mining revenue to the tune of Rs. 135,45,749.87 during 1980-81. The collection of cess on account of mining royalty during this period was Rs. 71,87,388·33. The availability of rich mineral deposit in the district has been responsible for setting up of many mineral based industries in the district in the private sector in the recent past.

Forest—The district was a very inaccessible tract having no proper communication. The tribal people living in the area used to subsist for the most part on shifting cultivation which resulted in denudation of forest. The forest occupy an area of 3534·92 sq. kms. which includes 2664·64 sq. kms. under "reserved" forest and 612·07 sq. kms. under "protected" forest. The forests are of northern tropical dry deciducus type. Sal is the dominant species. The eastern half of Bonai contain better quality of vegetation.

The principal forest produce are timber, kenduleaf and bamboo besides minor product like sabai grass, lac, tassar, myrabolan, mahua, kusuma seed, resin, tamarind, gum and sal seed. The export of forest produce are mainly done through road and railway.

The forest produce alone provided a revenue of Rs. 161·55 lakh to the State Government during the year 1980-81. Consequent upon the State Government policy to increase the revenue from the kendu-leaf through Governmen trade, Orissa Forest Corporation, a State Government undertaking operates a trade in kendu-leaf and revenue of Rs. 110·42 lakh was received during the year 1980-81. Simultaneously emphasis has been laid duwn on afforestation through different programmes like D.R.D.A. and N.R.E.P. sponsored by the Govrnment in the recent past.

Industry—Due to adequate mineral resources there has been rapid industrialisation in the district in the post independence era. Prior to independence, the industrial activity of the district was confined to Biramitrapur the site of the limestone quarry. The establishment of cement factory in the private sector at Rajagangapur in 1951 and a Steel Plant at Raurkela in 1955 in the public sector are mainly responsible for rapid industrialisation in the district. During the last decade a number of large, medium as well as small scale and ancillary industries in and around Raurkela began to come up and from a big industrial complex. Establishment of large scale industries like Steel Plant at Raurkela, Indian Detonators at Raurkela, Orissa Industries at Lathikata, Fertiliser plant at Raurkela, Cement Factory

at Rajagangapur, Utkal Machinery at Kansbahal, Bisra Limestone quarry etc. have been responsible for establishment of a number of small-scale and ancillary industries in the vicinity. Simultaneously with the collaboration of Industrial promotion and Investment Corporation of Orissa Ltd., (a State Government undertaking), more industries like fabrication, Coke oven plant equipment, yarn etc. with an investment of Rs. 257 lakhs have gone into production in the recent past.

Coming to small scale industries, manufacture of engineering goods, Steel metal industries for manufacture of containers and automibile spares, food processing industries for steel city, forest based industries, Chemical industries for manufacture of incecticide and other chemicals, electrical apparatus, ancillary to the Steel Plant have come up in the recent decade. Various types of demand based industries engaged in manufacture of brick, tile, hessian bags, rope making and shoe making etc. have also come up.

To cope up with the demand for sheds by the entrepreneurs, the Orissa Iudustrial Infrastructure Development Corporation, a State Government undertaking and promoter of industrialisation, have undertaken construction of sheds in the growth centre near Raurkela. This corporation has established industrial estates in the district at Raurkela and Kulunga and has provided 165 sheds for establishment of industries. In addition to this further construction of sheds is in progress. The corporation has also made endeavour to provide compact area with infrastructure facilities in Kulunga (near Raurkela) for location of medium and major industries in future.

In pursuance of the Industrial policy resolution of 1977, the District Industry Centre was established at the district headquarters from 1.8.78 with a view to providing guidance, inputs to the small entrepreneurs and artisans and provide necessary assistance in setting up the units. During the year 1980-81, 167 small scale industries were established in the district with an investment of Rs. 148 lakhs which provided employment for 2,287 persons. This includes establishment of sophisticated industries like cotton vest, P. V. C. cables, water coolers and non-ferrous casting etc. The Raurkela Steel Plant alone has so far registered 165 small scale units which have supplied various items. During the year 1980-81, the Steel Plant has purchased different products from the small scale units to the tune of Rs. 6·90 crores. During 1981-82, Rs. 10·17 crores worth of products have been purchased from the registered ancillary units.

The industrial survey of the district has been completed, which has identified 11,285 artisans. traditional crafts like blaksmithy, pottery, carpentry, toy making, rope making, dhokra casting, bamboo basketry and foot wear, alongwith modern craft have been encouraged by the District Industry Centre by way of providing necessary training, financial assistance etc. under different programmes sponsored by the Government. The introduction of TRYSEM Programme is expected to accelerate the industrial growth in the rural area. Various programmes like Integrated Rural Development Programme, Economic rehabilitation of rural poor have been responsible for assisting 824 artisans during 1980-81.

In the co-operative sector, 39 village Industrial Co-operative Societies are working in trades like carpentry, oil mills, fibre, rope making, pottery, bell metal and weaving etc.

Agriculture —The soil of Sundargarh on the whole is not very fertile except in the river valley. In the northern part of the district, which is occupied generally by the tribal people the soil is less fertile. Mixed red and black soil, red sandy soil, gravelly and lateritic soil are found in this area. The mixed red and black soil contains a large quantity of calcium and magnesium carbonates, but is generally deficient in nitrogen and phosphorous. The red sandy soil, gravelly, and lateritic soils are generally deficient in potash, phospheric acid and lime. Soil is in general open in texure and well drained. Plenty of iron is present in the soil.

The soil of Sundargarh Sub-division is productive in the Ib valley towards south. In the northen portion, the soil is less fertile and the cultivators are at a disadvantage owing to ravages of wild animals. The cultivated land in Panposh and Banai Sub-divisions are situated along the river valleys, with a few small scattered areas in valleys lying between the hill ranges.

The crops depend mostly on natural rain-fall for water supply, besides irrigation facility wherever available.

The district is very much deficient in irrigation, although some irrigation projects have been taken up in the recent past. The cultivable area of the district is 2,93,988 hectares, out of which 2,79,374 hectares were cultivated during 1980-81. Out of this coverage 2,21 254 hectares were uuder paddy crop, 8,160 hectares were under high yielding variety, and 49,960 hectares had been brought under other crops. The kharif crops raised are paddy, maize. arhar, jawar, ground-not, besides other crops like Ragi, Biri, Mung, til, niger, Sugar cane and cotton etc.

To meet the deficit in food, emphasis was laid on rabi crops and a coverage of 84,966·90 hectares was taken up 1980-81, which included cereals, pulses, oil seed and other crops. The coverage under pulses alone was 39,097·15 hectares.

Irrigation—There is very little facility for irrigation in the district. There are many tanks and kattas in the villages, which are filled up during rain and utilised in dry season for bathing and drinking purposes and occasionally used for irrigating gardens by the local lift (Tenda) system.

There is no major Irrigation project in the district. The total irrigation potential of the district is of the order of 35,103·17 hectares from different sources both for Kharif and Rabi crops as given below :

CATEGORY	POTENTIAL IN HECTARES	
	Kharif	Rabi
1	2	3
Major	...	...
Medium	2,631·55	1,618·62
Minor	12,800·00	2,318·00
Lift Irrigation	2,120 00	1,742·00
Dug-well	2,250·00	950·00
Other sources	5,423·00	3,250 00
Total	**25,224 55**	**9,878·62**

A medium Irrigation Project viz , Pitamahal, 15 kms. away from Raurkela with estimated cost of Rs. 157 lakhs has been taken up with a certified ayacut of 4,800 hectares. Kuradhi Project in Bonai Sub-division has a certified ayacut of 2,800 hectares in Kharif and 280 hectares in Rabi. Other Medium Projects, viz., Talasara (3,036 hectares Kharif and 1,820 hectares Rabi), Saraphagarh Project (2,255 hectares Kharif and 1,340 hectares Rabi), Kansbahal Project (4,615 hectares Kharif and 2,410 hectares Rabi), Barsuan (2,850 hectares Khariff and 1,491 hectares Rabi) are under construction.

11 minor Irrigation Projects, with a designed ayacut of 1,230 hectares during Kharif and 272 hectares under Rabi are under construction. In the recent past, irrigation by dug-wells and lift irrigation have gained popularity. Upto June, 1981, 10,130 number of dug-wells have been taken up out of which 487 numbers have been energised which provide irrigation particularly in Rabi season. Similarly, under lift irrigation, 84 points have been energised upto 1980-81.

Drinking water—The district is confronted with scarcity of drinking water facility. The water dry up during the month of April and May and scarcity of drinking water becomes accute in the villages and towns. Hence emphasis has been laid in the past to provide drinking water facility in all villages and towns. Till February, 1982, 992 sanitary wells have been completed out of which 832 numbers have been

completed by 1980-81. There are 1,457 villages in the district identified as "problem" villages. 1,548 number of tube wells have been constructed in the problem villages by April,82. All the villages in the district have been covered either by tube well or sanitary well.

Soil Conservation—As indicated earlier, the district is full of hills, gullies and ravines, which are major hurdle for rapid agricultural growth. Soil erosion is accute in this district which is more noticeable in the upper catchment area of Mahanadi and Bramhani. Measures to check erosion were started in 1954 with the establishment of demonstration-*cum*-training centre at Jharabeda. The centre rendered technical assistance to the cultivators besides executing soil conservation measures in the area. The anti-erosion measure include contour-bunding, tree planting, pasture development, paddy field terracing, stream bank protection, gully reclamation and construction of structures of silt retention.

Such measures have been taken up in the Hirakud catchment (portion lying in Sundargarh district) and in selected sub-catchment of Ib river. Subsequently, the area of activity was extended to the catchment area of Mandira dam reservoir. The individual cultivators are also been given cash loan for development of their land.

Upto 1980-81, contour bunding has been done in 18,441 hectares. Plantation of cashew has been done in 6,201 hectares up to 1980-81. Besides, miscellaneous plantation has been done in 1948 hectares.

Pisciculture—The district depends upon inland fishery for fish supply. During summer most of the tanks dry up creating obstruction for pisciculture. To meet the local need large quantity of fish are imported specially for the industrial area of Raurkela, Rajagangapur etc., from the neighbouring districts and the coastal districts.

A water area of 16,340·16 acres is available in the district for pisciculture under 3,117 number of resources which include Panchayat tanks, private tanks, departmental tanks and reservoir of Grampanchayat and department etc.

Under reservoir fishery scheme, reservoir at Pitamahal in Lathikata Block was taken up during 1980-81, where 1,24,170 fry was stocked. Under Integrated Tribal Development Agency Programme, an water area of 9·85 acres was covered during 1980-81 by way of providing subsidy for pisciculture. Under tank fishery scheme, an water area of 13·07 acres were taken up for pisciculture during 1980-81. During 1980-81, 15·989 lakhs fry were produced in the district for distribution along with 53·87 lakhs of spawn by way of induced breeding technique intensive fish production was taken up in an water area of 10·02 acres during 1980-81.

Co-operation—There are altogether 236 Co-operative societies in the district, both agricultural and non-agricultural in character. These include 3 Land Development Banks, 47 LAMPS, 57 employees Co-operative Societies, 3 Regional Co-operative Marketing Societies, 4 Wholesale Co-operative Societies, 5 Poultry Co-operative Societies and 70 Consumers' Co-operative Societies etc. The total membership brought under the Co-operative fold is 74,000 as on 30-6-81. One Co-operative Bank with 5 branches scattered in the district is available to take care of the investment in Co-operative Sector. The Regional Co-operative Marketing Societies handled various kinds of agricultural produce in the district. 7 numbers of Weavers' Co-operative Societies recently organised in the district have started functioning with necessary financial assistance. Under this programme loomless weavers are being supplied with loom and other accessories for their production.

In view of the predominantly tribal population of the district, the Tribal Development Co-operative Corporation (A State Government undertaking) has opened two branches at Sundargarh and Lahunipada. The Corporation purchases minor forest produce at a reasonable rate from the tribals and thereby safeguards the interest of the tribals. Besides,

it also purchases the surplus agricultural produce and markets the same. The Corporation has taken up sale of consumers goods to the tribals. The corporation trades in minor produce includes gums, lac, myrabolan, resin, mahua-flower, Kusum seeds, Karanja seed,Nim seed and both in and outside the district.

Animal Husbandary—The live-stock population of the district, according to the live-stock *Census of 1977 is as follows*—

Cattle	...	5,59,689
Goat	...	2,34,158
Buffalo	...	61,161
Sheep	...	53,843
Pig	...	48,076
Poultry	...	6,48,568
Horse & Pony	...	491
Ducks	...	6,814

The district has two veterinary hospitals, 27 dispensaries, one minor dispensary, 79 live-stock aid centres two live-stock breeding firms, one Regional polutry firm. Besides, three units of applied nutrition programme are available in the district for popularisation of poultry.

With a view to up-grading the local live-stock and providing additional annual income of the individuals, different schemes of Dairy, Goatery, Piggery, Poultry have been introduced under various programmes taken up by Government. Under the economic re-habilitation of rural poor programme, 17 milch cows and 292 goat units (one unit consisting of five goats) have been supplied to the individuals. Similarly, under the Integrated Rural Development Programme, 684 goats, 47 cows and 51 bucks have been supplied to the individuals to improve their economy. Under "Paudi Bhuyan Development Agency", a Special Project taken up to improve the economic of Bhuyan families in Lahunipada Block—83 goat units and 23 buck units have been initiated to improve their economy.

Education—The district was economically and educationally backward until the recent past. The tradition regarding the birth of Vyasadev and his composition of the famous epic "Mahabharat" at the confluence on the Sankha and the Koel is mere legend. The Darbar administration of erst-while princely States of Gangpur and Bonai initiated action for education. In 1947-48, just before merger, the ex-States of Gangpur and Bonai together had 2 High English Schools, 17 Middle English Schools and 181 Primary Schools. Various measures and incentives provided by the State Government in the form of supply of paper and books at concessional rate, opening of Book Bank for the benefit of student upto college stage, financial assistance for reading and writing materials to the poor and meritorious students at Middle English Schools and High English School stage, free supply of uniform to the poor student at Primary School level and incentives for regular attendance in Primary Schools have resulted in noticeable change in the field of education. Opening of adult literacy centres in rural areas has also found favour with population and this programme has received wide response.

As against 181 Primary Schools available in 1947-48 number of such institutions was increased to 251 in 1950-51, 832 in 1960-61, 1,374 in 1972 and 1,531 in 1980-81.

Regarding High and Middle English Schools in the district the number increased to 3 and 19 in 1950-51, 15 and 66 in 1960-61, 89 and 211 in 1972-73 and 124 and 382 respectively in 1980-81. The number of students reading in Middle English Schools and High English Schools in the district were 59,226 and 38,186 respectively during 1980-81.

There are 3 Training Schools with a student strength of 180, on March'81 for imparting training to the teachers, besides one S. T. School for the purpose run by the Harijan and Tribal Welfare Department.

3 High Schools and 94 Primary Schools are reported to be functioning on March'81 without any building of their own. The teacher student ratio on March'81 was 1:25 in High School, 1:27 in M. E. School, besides 1:30 in Primary Schools.

For providing incentive to the students, scholarship at the rate of Rs. 1,000/-per annum to N. R. T. S. holders reading in selected Schools and residing in the hostel are available at the rate of 6 per block, whereas such stipend at the rate of Rs. 500/-per annum is available to the day scholars. Another grant at the rate of Rs. 20/-per month available for 2 students in each block under NRT matching Scheme. 69 M. E. merit scholarships are awarded to the students at the rate of Rs. 20/-per month in the district under non-plan sector and additional 23 number of such scholarships are available under plan sector.

Harijan and Tribal Welfare.—The district has an appreciably tribal and scheduled caste population for whose upliftment due priority has been put in the 5 year plans for their education as well as by way of introduction on various schemes. In the field of education there are 7 High Schools (including 2 Girls' Schools), 2 Ashram Schools, 3 Kanyashrams and 5 Sevashrams. The residential institutions available in the district are run by the State Government. The total sanctioned strength is 2,060 students. The boarders are paid monthly stipend for their maintenace. In addition to above incentives in the form of post matric scholarship, stipend in the field of technical education, pre-matric scholarship, distribution of natioal text books, reading and writing materials Government have provided encourgement to the tribals for education to their children. The strength of tribal students alone in the educational institutions of the district was 7,689 in M. E. Schools and 36,002 in Primary Schools during 1971 which has increased considerable during the decade as 15,108 and 43,235 students were on roll in M. E. School and Primary School respectively during 1981. Towards stipend in higher technical institution Rs 9.84 lakhs was disbursed to 1,149 tribal beneficiaries and Rs. 1.72 lakhs to 162 Scheduled Caste beneficiaries during 1980-81. Similarly at the pre-matric stage a sum of Rs. 36.14 lakhs was disbursed to 18,476 beneficiaries belonging to Scheduled Caste and Scheduled Tribe community during 1980-81.

Leaving aside the field of education, measures were initiated under various programmes, viz., Economic Re-habilitation of Rural Poor (ERRP), Intensive Tribal Development Agency (ITDA), Integrated Rural Development Programme (IRDP), National Rural Employment Programme (NREP) in the recent past for ameliorating the living condition of the tribals and Scheduled Caste community in various walks of life. The programmes initiated through different sehemes include financial assistance for agriculture and other avocations of life, purchase of inputs, cattle, live stock, milch animal, minor irrigation work, horticulture, farm forestry, drinking water project and road construction etc. Under ERRP, the poorest Scheduled Caste/Scheduled Tribe families have been identified @ 10 per cent of rural family. The poorest families in the village are being rehabilitated with 100 per cent assistance in case of Land Based Schemes and 75 per cent in case of other Schemes. This has benefited 1,575 tribals and 636 Scheduled Caste families during 1980-81. Land Based Scheme like animal husbandry, fishery and agricultural schemes have been initiated under different programmes as named above. Under integrated rural development programme farmers with income group of less than Rs. 3,500/- per annum have been identified for upliftment of their economy.

Communication—Communication facilities in the district have improved perceptibly during the second part of the century. The nearest rail head to the district headquarters is at Jharsuguda at a distance of 35 Kms. The main line of South Eastern railway (Calcutta-Bombay line) runs about 105 Kms. in Panposh and Sundargarh Sub-divisions of the district. An additioal branch line from Raurkela to Biramitrapur (28 Km.), from Bondamunda to Barsuan (68.6 Km.) are available for transportation of minerals. The rail link to Kiriburu passes about 26.2 Km. within the district. There is also a rail link between Nuagaon and Purunapani, a distance of about 10 Kms. Raurkela is the busiest railway station in both passenger and goods traffic. There is a proposal to link Bimlagarh and Talcher by rail to expedite the transport of minerals.

The rivers like Brahmani, Ib, Sankha and Koel flow in the district. During rainy season small boats carry goods down the Ib to Sambalpur whereas the other rivers are not navigable due to rocks and rapids. There is, however, a small air port at Raurkela owned and maintained by Raurkela Steel Plant which is licensed for private use.

Coming to road communication, the district headquarters and the Steel city of Raurkela are directly connected by public transport system to the State headquarters and other district headquarters. Nationalised buses ply in most parts of the district. The number, type and length of roads are given below —

High way/Road	Numbers	Length in Km.
1	2	3
National Highway	1	105.3
State Highway	3	196.0
Major District Road	14	330·6
Other District Road	4	53·6
Classified Village Road	N.A.	343·8
R.E.O. Road	N.A.	400·0
Panchayat Samiti Road	143	1,349·6
Gram Panchayat Road	795	3,459·0

However, all weather communication facility is not available to Bonai Sub-division.

Power—Power generation and distribution is controlled by the Orissa State Electricity Board, a State Government undertaking. At the district level one electrical circle is located at Raurkela in charge of power supply to the entire district. The district depends upon power from outside the district viz., Hirakud grid as well as Talcher grid. It has been proposed recently to establish 2 sets of power plant with a capacity of 60 M. W. each at an estimated cost of Rs. 80 crores. The first and second units are expected to be completed by December, 1984 and June, 1985 respectively.

Under rural electrification programme, 898 villages have been electrified till the end of 1979-80. 38 more villages have been electrified during the year 1980-81. Regarding energization of Lift Irrigation points and pumps in the district, 83 points and 459 pumps were energized upto 31. 3. 80.

The total No. of consumers in the district are as follows :

(a)	Industrial	...	616
(b)	Agricultural (including irrigation)	...	126
(c)	Commercial	...	4,110
(d)	Domestic	...	7,367

Housing—In the recent past provision of ready built houses and supply to the economic weaker sections of the community have been taken up by the Raurkela Regional Improvement Trust at Raurkela for easing out the housing problem. Near Durgapur foot hills 92 houses with an estimated cost of Rs. 4·75 lakhs besides 54 houses with an estimated cost of Rs. 2.67 lakhs have been taken up. The first stage of construction of 92 houses have been allotted to the individuals and possession delivered. Besides, the Orissa State Housing Board has constructed 524 number of quarters for the weaker section at a cost of Rs. 8,000/- each. Another new housing colony has been taken up by the Raurkela Regional Improvement Trust near the Steel City with the assistance of the HUDCO.

Land Tenure—Two constituent princely States of Gangpur and Bonai lost their identity after their merger in Orissa State in 1948. There was earlier survey by eye estimation in Gangpur by Kut settlement in 1874, regular survey and settlement by Connolly during 1907-11 and revision settlement in 1928-36 during the Darbar Administration. In Bonai State a summary settlement was taken up in 1880, followed by regular survey and settlement in 1910 (excluding Bhuyan area) during the Darbar Administration.

Regular survey and settlement operations after the merger was taken up in 1963 in the district. The main classification of land were broadly known as bahal, berna, mal, goda and bagayat. Bahal is used for flat land at the bottom of a depression or drainage line. Pani bahal land is served by reservoir.

Berna land receives the drainage from the slopes on either side and also from drainage line between them. However, pani berna land gets some water. Mal is an embanked land and slopes which are terraced to catch the surface drainage coming down from uplands. The lower mal lands called panimal get excellent drainage. Goda is generally an upland dependant on rain water entirely and suitable for rabi cultivation. Bagayat land is used for growing vegetable and orchard. The principal crops of the district are paddy, maize, wheat, ground-nut, mustard, kulthi, mung and biri etc.

The current settlement has classified the land into the following categories for Bonai area and rest part of the district.

Sl. No.	BONAI	REST OF THE DISTRICT
1.	Bahalpani-I, Dofasali	Bahalpani-I, Dofasali
2.	Bahalpani-I, II	Bahalpani-I, II
3.	Bahal	Bahal
4.	Bernapani-I, Dofasali	Bernapani-I, Dofasali
5.	Bernapani-I, II	Bernapani-I, II
6.	Berna	Berna
7.	Malpani-I, Dofasali	Malpani-I, Dofasali
8.	Malpani-I, II	Malpani-I, II
9.	Mal	Mal
10.	Goda-I, II	Goda-I, II
11.	Kudar, Pal	Kudar, Pal
12.	Bagayat-I, II, III	Bagayat-I, II, III
13.	Patit	Patit
14.	Gharbari	Gharbari

The settlement operation has been completed in 1,723 villages where record of rights have been published in three sub-divisions

Tenancy- —Consequent upon the abolition of estates and agrarian reforms brought about by lagislative measures in the recent past, almost a total change has been effected in the tenancy system. The effect has been fundamental and wide spread that the entire texture of relationship between the State and the land holder on the one hand and the tenant with immediate landlord on the other has undergone a metamorphosis. As a result the status of land has changed its complex and character in the same manner as the rights of the persons to hold them. The reality in the status connoting the same rights in more than one way under different names had to be reationalised through comprehensive legislative measures. Details of such land as given below.

1. With right of permanent heritable and transferrable possession. ... Rayati
2. Non-assessed land ... Bebandobasti
3. Kelo Jagir (only one jagir, village priest known as Kelo yet to be vested. ... Jagir
4. Un-classified ... Govt. land under possession of Revenue Deptt. are recorded as Abadya jogya Anabadi, Abadya ajogya, Anabadi, Sarbasadharan, Rakhit, Pattadar (Lease granted by the Govt. to accompanies for mineral activities.

Trade and Commerce-The routes passing through the Ib and Brahmani river valleys in the district served as ancient trade routes. The people of this area were carrying on trade with Madhya Pradesh, Bihar and other neighbouring areas in various forest products like peacock feather, ivory, lac and myrobalan etc. During the Darbar Administration the articles exported were lac, cotten, hunny, arrow-root, sabaigrass, wax whereas the imported articles were salt, sugar, kerosene oil etc. The railway station at Bisra, Kalunga, Raurkela and Panposh were used for export of timber and bamboo etc.

In course of time coverage under export has increased considerably which includes minerals like iron ore, dolomite, lime-stone, manganese and various forest products like timber, bamboo, Kendu-leaf, mahuaflower etc. The articles imported to the district are ferro-manganese, ferro-silicon, chemical, mechinaries, petrol, kerosene oil, edible oil and stationery

goods etc. The goods under import and export of the district are transported by the railway and road transport.

The rural marketing centres are mostly weekly or bi-weekly hats. There are 101 such markets in the district. The food grains constituting rice, pulses, vegetable, forest products and cattle etc. are sold in the rural market. The important markets include places like Tangarpalli, Balisankra, Sabdega, Baruadih, Pirpire, Jamkani, Garjanbahal, Gopalpur, Lafripada, Sargipali, Kutra, Lanjiberna, Jharbeda Nuagaon, Punchara, Bargaon, Hatibadi, Jareikala Kupsinga, Bisra, Jirpani, Bandhamunda, Kalunga, Kurunda, Kantbela, Lahunipada, Tensa, Bonaigada, Burundia, Banki, Birtola, Kalmang, Malda, Loida, Jadibahal, etc.

The district is deficit in consumer goods like rice, wheat, sugar, cement, kerosene oil etc. The State Civil Supplies Corporation as well as the District Civil Supply Office control the distribution of essential commodities released through the State Government. During the year 1980-81, the district had received the following quantities.

1.	Sugar	5994.9 M. T.
2.	Cement	5441.0 M. T.
3.	Rice	111988.6 M. T.
4.	Kerosene	4998.8 K. L.
5.	Wheat	8676.7 M. T.

These commodities are distributed through a number of sales centres operated by the State Government and such centres were 764 during the year 1980-81.

The T.D.C.C. is also operating in the district and helps in finding a market for the minor forest produce and other articles collected and manufactured by the tribals. These centres also ensure fair price to the tribals during sale and also deliver essential commodities to the tribals. The Regional Co-operative and Marketing Societies operating at the sub-divisional level supplied inputs like seed, fetiliser, pesticides etc. to the consumers and LAMPS.

For scientific storage of articles, State Werehousing Corporation and Food Corporation of India have put up storage godown and cold-storages at Rajgangpur, Lahunipada and Kuarmunda.

The district has 57 branches of commercial banks in the district. All the blocks except Nuagaon and Lephripada have banking facility. The average population served by a branch is 18,000 for the district and such ratio is 8,000 for Raurkela alone.

Major Social events during the decade

Distribution of Government waste land for agricultural and home stead purpose—This scheme was introduced by the State Government, during 1972. The ceiling for distribution of waste land for agricultural purpose was fixed at 2 acres per family of landless persons, for which no salami was charged. However, such salami was chargeable for irrigated Government land given on lease.

Home stead land has been given on lease to the house less persons. In the event of lease beyond 4 decimals 50 per cent of the market value is chargeable towards salami. The achievement in this respect upto 31. 3. 81 is as follows :

Area in acres	Total No. of beneficiaries	Sch. Caste	Sch. Tribe	Others	Purpose
1	2	3	4	5	6
49,782·65	26,863	2,702	20,264	3,897	Agricultural
921·44	11,384	2,135	6,991	2,258	Home stead

Bonded Labour Abolition—The bonded labour according to the provision of the Act is a person who is forced or partly forced to render labour or service by himself or through any member of his family or any person dependent on him under another person for the benefit of the said person for a specified or un-specified period with or without wage or for nominal wage (which is less than the minimum wage fixed by the Government) or forfeits the freedom of employment or other means of livelihood or right to move freely through-out the territory of India or the right to appropriate or sell at market value of his property or product of this labour or the labour of his family. A bonded labour is required to be free from the creditors and need to be rehabilated as a free citizen. Accordingly the Bonded Labour System (Abolition) Act, 1976 was framed which came into force with effect from 25.10.75.

Identification of bonded labourer has been completed in all the 17 blocks of district. So far the bonded labourers numbering 1,113 have been identified and released which include 224 males and 4 females belonging to Scheduled Castes and 649 males and 8 females belonging to Scheduled Tribes. 967 released bonded labourers have been provided with land for orchard, cashew or tassar plantation and 26 labourers have been provided with tank for fisheries. 120 labourers have been given rehabilitation assistance under different schemes/ crafts, such as blacksmithy, carpentry and basket making etc.

Paudi Bhuyan Development Agency—The Paudi Bhuyans, the main primitive tribals mostly live in the hilly terrain and inaccessible places or Lahunipada Block in Sundargarh district. They are still in food gathering stage from the jungle. For the upliftment of this particular rare community of tribals, a micro-project for their development has been taken up and an Agency has been formed during 1978-79. The area of operation of this agency is now confiend to 21 villages in 3 Grampanchayats of Lahunipada Block. For the identified 300 Paudi Bhuyan families covered under this scheme, the measures initiated are to bring alround improvement under agriculture, animal husbandry, health, communication and cottage industries etc. The approach is to develop the tribal area as a whole to reduce the gap between the tribal area and other area besides economic upliftment of family by way of initiating need based programme. 75 per cent of the alloted funds are spent for individual benefit and 25 per cent for infrastucture development in the area. Apart from providing land to the landless, subsidiary occupation like goatery, bee keeping, Sabai rope making, Siali bag making, tailoring and carpentry have been initiated. The intention is to raise the annual income of the Bhuyan family from Rs. 350/- to Rs. 2,000/- within a span of 5 years. Each family is being supplied with

agricultural implement, plough, input assistance, land, besides supply of goats and buck, so that the disposal may not be difficult due to the nearness of industrial belt like Raurkela. They have also been engaged in horticultural plantation and carpentry etc.

Regulation 2 of 1956—Various protective regulations have been initiated to safeguard the interest of the tribal community, Scheduled Area Transfer of Immovable Property (by Scheduled Tribe) Regulation, 1956 (Regulation 2 of 1956) is in force in the Scheduled areas inhabited tribal population. During the year 1980-81, 515 cases were disposed of. An extent of 31,463 acres of land were restored to the tribals. This regulation has been enforced to restrict the unauthorised alienation of land from tribals to non-tribals and to prevent forcible dispossession of tribals from their land.

The places of historical and tourist interest in the district.

Sundargarh—An undultating table land of different elevations, broken up by rugged hill-ranges and cut off by the territorial hill-streams and rivers is one of the few districts in Orissa, which is endowed with the bounties of natural beauty and mineral wealth. Until the establishment of the Raurkela Steel Plant, the district was relatively clam and quite. The cultural activities of the tribes are gradually changing due to their contact with the cosmopolitan city of Raurkela. A visit to the district enables one to have a glimpse of the ancient tribal culture amidst the modern excitements of the science and technology.

A few interesting places of the district from the tourist view-point are mentioned below :—

Raurkela—A place with a natural setting, girdled by a green range of hills and encircled by rivers, Raurkela has come into prominence with the establishment in 1955 of the first of the three Public Sector Steel Plants set up in India. It is one of the most modern steel plants deploying the latest technology in smelting steel. Spread over an area of about 45 sq. kms., this is the biggest planned town in Orissa which exudes an air of friendliness and tranquillity and has become the nerve center of all social and cultural activities of the district. Other attractions in the town include the beautyfully landscaped Indira Gandhi Park with a zoo and a lake and the fertiliser complex attached to the steel plant.

The S. E. Railways passes through Panposh and Sundargarh Sub-divisions of the district with the biggest station at Raurkela which has direct connectiton with New Delhi, Calcutta, Bombey, Madras, Tatanagar, Bokaro, Puri and a number of important places in the country.

By road, it is connected with all important towns in the State by all weather good motorable roads. There are regular interstate and intra-state bus service to and from Raurkela. It is 470 kms. from Bhubaneswar via. Kendujhar and 192 kms. from Sambalpur. Taxis, auto-rickshaws and town buses are avilable for internal transport.

Vedavyas—Situated on the confluence of the river Sankha and Koel, which thereafter from the river Brahmani, Vedavyas is not only a place of natural beauty but also is considered a 'Tritha' a place of religious sanctity. A dip in the confluence is belied to wash away all sins. Tradition has it that Vyasadeva, the reputed sage, lived here and composed the great epic Mahabharat. There are three temples here, two dedicated to Lord Siva and one to Rama. A Vedic Ashram and a School on the lines of Gurukula Ashram are the added attractions of the place. An ideal picnic spot, it is 5 kms. from Panposh and 15 kms. from Raurkela with an all weather road.

Nearest Railway Station is at Panposh (5 kms.) and Raurkela (15 kms.)

Connected by all-weather road from Raurkela. Regular bus service is available from Raurkela.

Mandira—Known for the dam accross the river Sankha, constructed for supply of water to Raurkela and other places in the vicinity, it presents a picturesque sight. Permission to enter the dam site is issued by an Officer at the main enterance. Boating facilities are also available in the lake on prior arrangement with the dam authorities. 32 kms. from Raurkela, it is a nice place for holidaying.

Nearest railway station is at Raurkela which is 32 kms. off.

All weather road is from Raurkela is available. There is no regular bus service but, taxis and auto rickshaws are available from Raurkela at reasonable rates.

Khandadhar—Amidst thick jungles, Khandadhar is a glittering water-fall created by a perennial rivulet called Korapani Nala within a few kms. of its origin. 244 meteres in height, it is said to be the highest water-fall in Orissa. 19 kms from Bonaigarh, it is approachable by a fair-weather road but the last two kms. is negotiable, only on foot. However, the strain one takes on the arduous journey is soon forgotten by the unthinkable scenic beauty the water-fall provides around. Nearby the local tribals worship a deity known as Goddess Kanta.

Nearest rail head is at Raurkela (104 kms.).

All weather road upto Bonaigarh is available and the last 2kms. is negotiable on foot.

Chatri hill—Located at a distance of 60 kms. from Sundargarh (20kms. on fair-weather road branching off the main road connecting Sundargarh and Raurkela at a place called Bargaon) the unique features of the hill are that it is a monolithic one totally barren of trees, buses and pebbles. Some caves and some ancient palaeographic marks are also found on the hill.

Ghogar—A gorge on river Ib, is situated 43kms. to the north of Sundargarh town and is popular as a picnic spot. After the rainy season, when the water level of Ib comes down, the river passes through a narrow stone bed extending over five kms. The beautiful gorge with its sylvan attracts many visitors. There is a natural Sivalinga of black granite at the site, where Sivaratri festival is observed.

Dargeen and Deodhara— 56 kms. from Raurkela on National Highway 23, it is a beautiful place on the river Brahmani ideal for picnic. 2 kms. away approachable on foot is deodhara a gorge on the river.

Junagarh— 4 kms. and 15 kms. from Hemgir and Kanika respectively, it is a fort of historial and archaeological importance with some ancient caves and having marks of Tantra worship.

Analysis of Village and Town directory data

Introduction of inset tables in District Census Hand Book is a noval feature of 1981 Census which is aimed at providing a brief analysis of reasults for facility of the planners, data users etc. 13 inset tables have been provided in this publication. The contents of each table is explained below in brief.

Table—1 depicts the distribution of villages according to the amenities under each Tahasil of Sundargarh district.

TABLE—1

Distribution of villages according to the availability of different amenities.

Sl. No.	Name of Tahasil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Hemgir	239	184 (76.79)	18 (7·53)	238 (99·58)	47 (19·67)	15 (6·28)	41 (17·15)	31 (12·97)	132 (55 23)
2	Sundargarh	284	264 (92·96)	66 (23·24)	281 (98·94)	98 (34·51)	26 (9·15)	87 (30·63)	54 (19·01)	217 (76·41)
3	Rajagangapur	195	182 (93·33)	31 (15·90)	195 (100.00)	44 (22·56)	23 (11·79)	26 (13·33)	49 (25 13)	113 (57·95)
4	Panposh	387	305 (78·81)	35 (9·04)	387 (100·00)	58 (14·99)	32 (8 27)	91 (23·51)	105 (27·13)	136 (35·14)
5	Banei	560	376 (67·14)	24 (4·29)	539 (96·25)	63 (11.25)	40 (7·14)	65 (11·61)	141 (25·18)	159 (28·39)
	Total District	**1,665**	**1,311 (78·74)**	**174 (10·45)**	**1,640 (98·50)**	**310 (18.62)**	**136 (8·17)**	**310 (18·62)**	**380 (22.82)**	**757 (45·47)**

Out of 1,665 inhabited villages in the district educational facility is available in 1,311 villages, medical facility in 174 villages, drinking water facility in 1,640 villages, post and telegraph facility in 310 villages, market and hat facility 136 villages, communication facility like bus stop etc. are available in 310 villages, 380 villages are approached by pucca road and 757 villages are having the power supply facility. It clearly reveals that how backward the district is. Coming to the Tahasils highest percentage (93·33 per cent) of villages have been served with educational facility in Rajagangapur Tahasil followed by Sundargarh Tahasil (92·96 per cent). The lowest percentage of villages (67·14 per cent) in Banei Tahasil are having the educational facility. The highest percentage of villages in Sundargarh Tahasil (23·24 per cent) are served with medical facility. In Banei Tahasil only 4·29 per cent of the inhabited villages are having medical facility drinking water facility is available in all the inhabited village of Rajagangapur and Panposh Tahasils but in Banei Tahasil only 96·25 per cent of the villages are having the drinking water facility. As regards the postal facility, market and hat facility, the communication facility. It is

revealed from the Statement that most of the villages are deprived of getting these facilities. Similar is the position in case of villages approached by pucca road. As regards power supply facility position is slightly better as 45·47 per cent of the inhabited villages are availing the power supply facility. On the whole the district is backward may be due to the fact that the district is predominated with Tribal population whose social awareness is yet to develop.

Proportion of Rural population served by different amenities in different tahasils of the districts are shown in Table—2.

TABLE—2

Proportion of Rural Population served by different amenities

Sl. No.	Name of Tahasil	Total Population of inhabited villages in the Tahasil	Proportion of Rural Population served by the amenities of—							
			Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10	11
1	Hemgir	109,601	93·06	22·96	99·97	44·17	16 09	33 04	23·24	72 23
2	Sundargarh	199,564	98·48	39·28	99 97	54·62	18 94	43·78	25·04	88·23
3	Rajagangapur	162,634	97·73	32·21	100 00	40·11	25·05	26 44	40·48	74·79
4	Panposh	241,269	91·71	20·92	100·00	30 06	18 03	40·47	37·78	53 02
5	Banei	215,470	87·59	14 79	99·50	29·53	20 08	21·08	36·77	44·22
	Total District	**928,538**	**93·42**	**25·66**	**99·87**	**38.64**	**19·70**	**33·34**	**33 56**	**64 62**

Out of 928,538 Rural population of the district, 93·42 per cent of the population are served by Educational facility, 25·66 per cent by medical facility, 99·87 per cent by drinking water facility, 38·64 per cent by postal facility, 19·70 per cent by market hat facility, 33·34 per cent by communication facility, 33·56 per cent by pucca road facility and 64·62 per cent by power supply facility inside the village of the district. The position is much better in terms of population rather than in terms of villages. Similar position is also noticed in the different Tahasils of the district. Banei Tahasil is availing lesser facitity than that of other Tahasils as it is more backward due to the predomenent of tribal population.

Table—3 gives the distribution of villages not having certain amenities arranged by distance range from the place where these are available.

TABLE—3

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available.

Village not having the amenity of	Number of villages where the amenity is not avilable and available at distance of			
	-5 Kms.	5-10 Kms.	10+Kms.	Total (Cols.2 to 4)
1	2	3	4	5
1 Education	323	30	1	354
2 Medical	466	492	533	1,491
3 Drinking Water	25	...	...	25
4 P. & T.	882	332	141	1,355
5 Market/Hat	768	485	276	1,529
6 Communication	560	352	443	1,355

Out of 1,665 inhabited villages in the district, Educational facility is not available in 354 villages but inhabitants of most of the villages are enjoying this facility within a distance of less than 5 kms. Similarly medical facility is not available in 1,491 villages. The villagers of 466 villages travel a distance of 5 kms. 492 villages travel 5-10 kms. and 533 villages travel a distance more than 10 kms to get the medical facility. Only in 25 villages of the district drinking water facility is not available. The inhabitants of these villages get this facilility within a radious of less than 5 kms. postal facility is not available inside 1,355 villages of the district. Villagers of 882 villages travel a distance of less than 5 kms.332 villages travel a distance of 5-10 kms. and 141 villages travel more than 10 kms. to get the postal facility. Similarly hat and market facility are not avalable in 1,529 villages. Villagers of 768 villages get these facility within a redious of less than 5 kms. distance. 485 villages get these facility within a distance of 5 to 10 kms and 276 villages get these facility within a distance by travelling more than 10 kms. Communication facility is also not available in 1,355 villages. The inhabitants of 560 villages travel a distance of lees than 5 kms. 352 villages travel a distance of 5 to 10 kms. and 443 villages travel a distance of more than 10 kms. to get the communication facility.

Table—4 depicts the distribution of villages according to the distance from the nearest town and availability of different amenities in the district.

TABLE—4

Distribution of villages according to the distance from the nearest town and availability of different amenities.

Distance Range from the nearest town (in Kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenities of—							
		Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
0-5	46	41 (89·13)	6 (13·01)	46 (100·00)	9 (19 57)	1 (2 17)	19 (41·30)	13 (28·26)	34 (73·91)
6-15	247	207 (83·81)	34 (13·77)	246 (99·60)	55 (22·27)	18 (7·29)	63 (25 51)	87 (35·22)	135 (54·66)
16-50	871	727 (83 47)	114 (13 09)	865 (99·31)	186 (21 35)	82 (9·41)	173 (19·86)	169 (19 40)	416 (47·76)
51+	501	336 (67·07)	20 (3 99)	483 (96 41)	60 (11·98)	35 (6 99)	55 (10 98)	111 (22 16)	172 (34·33)
Unspecified	...	...	...	...	...	...	..	...	...
Total	**1,665**	**1,311 (78·74)**	**174 (10·45)**	**1,640 (98·50)**	**310 (18·62)**	**136 (8·17)**	**310 (18.62)**	**380 (22·82)**	**757 (45.47)**

Out of 1,665 inhabited villages 871 villages are coming under the distance range of 16-50 kms. from the nearest town. 501 villages are coming under the distance range of more than 50 kms., 247 villages are under the distance of 6-15 kms. and 46 villages are under 0-5 kms. from the nearest town.

It is revealed from the table that the villages nearer to the town are enjoying more facility than those which are away from the town.

Distribution of villages according to the population range and amenities available are shown in the table—5

TABLE—5

Distribution of villages according to Population Range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenities of—							
		Education	Medical	Drinking Water	Post & Telegraph	Market/ Hat	Communi-cation	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
—499	1,008	667 (66 17)	25 (2.48)	983 (97.52)	53 (5·26)	27 (2 68)	97 (9·62)	169 (16.77)	318 (31 55)
500—1,999	609	596 (97·87)	112 (18·39)	609 (100·00)	216 (35·47)	79 (12·97)	176 (28·90)	178 (29·23)	393 (64·53)
2000—4,999	48	48 (100·00)	37 (77 08)	48 (100·00)	41 (85.42)	30 (62·50)	37 (77·08)	33 (68·75)	46 (95 83)
5,000+	...	...	...	...	...	...	...	...	...
Total	**1,665**	**1,311 (78·74)**	**174 (10·45)**	**1,640 (98·50)**	**310 (18·62)**	**136 (8·17)**	**310 (18·62)**	**380 (22·82)**	**757 (45·47)**

Most of the villages of the district are coming under the lowest population range of less than 500 population. It is seen from the table that the villages having more population are enjoying better facility than the villages coming under the lower population range. All the 48 villages coming under the highest population range i. e. 2,000—4,999 are getting educational facility as well as drinking water facility where as 37 villages are getting medical facility, 41 villages are getting postal facility, 30 villages are getting matket/hat facility, 37 villages are getting communication facility and 46 villages are getting power supply facility.

Main staple food in the majority of the villages in each Tahasil of the district is shown in Table—6.

TABLE—6

Main Staple Food in the majority of villages in each Tahasil

Sl. No.	Name of Tahasil	Main Staple Food
1	2	3
1	Hemgir	Rice
2	Sundargarh	Rice
3	Rajagangapur	Rice
4	Panposh	Rice
5	Banei	Rice

It is revealed from the table that main staple food in all the Tahasils is rice.

Table—7 depicts the distribution of villages according to the land use pattern of different tahasil of the district.

TABLE—7

Distribution of villages according to land use

Sl. No.	Name of Tahasil	No. of inhabited villages	Total area (in hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Hemgir	239	92,190·37	68·32	1 22
2	Sundargarh	284	139,482·04	79·86	2 55
3	Rajagangapur	195	105,704·46	76 50	1·02
4	Panposh	387	140,394·98	76·07	2·17
5	Banei	560	201,844·52	61·71	2·28
	Total District	**1,665**	**679,616·37**	**71·60**	**1·97**

Note:-The area figures, for uninhabited villages and villages for which the land use data are not available, are excluded from the total.

It is revealed from the table that the percentage of irrigated area to total cultivable area of the district is only 1·97 per cent which implies that the district is backward in respect of irrigation. The percentage is higher in Sundargarh Tahasil. In the meantime some minor irrigation projects as well as a number of lift irrigation projects have been taken up in the district to provide irrigation facility to the inhabitants of the district. It is hoped that an appreciable extent of area in the district will avail irrigation facility in near future. The agriculture is mainly rainfed 71·60 per cent of the total area is cultivable. This percentage is also higher in Sundargarh Tahasil.

Table—8 shows the growth, density and sex ratio of Urban Population in the district in relation to the State.

TABLE—8

Growth, Density and Sex Ratio of Urban Population in the District in relation to the State

Census year	SUNDARGARH						ORISSA					
	Total Population	Urban Population	Percentage of Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. km.)	Sex ratio (No. of females per 1,000 males)	Total Population	Urban Population	Percentage of Urban Population	Decadal Percentage variation in Urban Population	Density (Population per Sq. km.)	Sex ratio (No.of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951	552,203	15,367	2 78	...	849	903	14,645,946	594,070	4·06	+44 01	1,195	881
1961	758,617	135,760	17·90	+783·45	752	630	17,548,846	1,109,650	6·32	+86·79	1,078	807
1971	1,030,758	239,685	23·25	+76·55	1,151	790	21,944,615	1,845,395	8·41	+66·30	1,113	845
1981	1,337,871	409,333	30 60	+70·78	1,825	814	26,370,271	3,110,287	11·79	+68 54	1,359	859

The percentage of Urban Population to total population in the district is 30·60 during the current decade which is much higher than that of the State, which is only 11·79 per cent. These may be due to the existance of steel township at Raurkela. Percentage of Urban Population in the district in 1951 Census was only 2·78 per cent, in 1961 Census it was 17·90 per cent and in 1971 Census it was 23·25 per cent The highest percentage of Urban Population is recorded during this decade. The growth rate of Urban Population of the district is 70·78 per cent during current decade as against the State growth rate of 68·54 per cent. The density of Urban Population per sq.km. in the district is 1,825 where as for the State it is 1,359. Sex ratio (814) in the Urban area of the district is less than that of the sex ratio in Urban area of the State (859).

Table—9 gives the new town created/ towns declassified in 1981 Census.

TABLE—9

New Towns added/Towns declassified in 1981 Census

Name of Towns	Population 1981 Census
1	2
(a) Added	
(i) Jalda (C. T.)	12,089
(b) Declassified	NIL

Only one none-statutory town viz. Jalda has been added to the Urban frame of the current operation.

No town has been declassified during the the current decade in the district.

Per capita receipt and expenditure in towns have been shown in table—10.

TABLE—10

Per Capita Receipt and Expenditure in Towns, 1978-79

Class, name & civic status of the town	Per Capita Receipt (in Rs.)			Per Capita Expenditure (in Rs.)

* The town having out growth.

** The population of Jalda town has been excluded as that is a Non-Municipal town.

In respect of Jalda non-statutory town the figures have been kept blank as the area covered under Jalda town is still continuing in the rural frame for the purpose of revenue administration. The financial aspects has been presented for five statutory towns. Coming to the receipt side the per capita receipt has been assessed at Rs 20·44 in the district out of which Rs 12·06 through taxes, Rs. 8·38 from other sources i.e. Government grant etc. As regards expenditure side, per capita total expenditure of the district is Rs. 20·52 out of which Rs. 1·29 is utilised under general administration, Rs. 3·66 under public health and conveniences, Rs. 4·11 under public works, Rs. 2·97 under public institutions and Rs. 8·49 for other aspects. It is revealed from the table that financial position of Urban bodies in the district is not sound.

Table—11 depicts the number of schools per 10,000 population in towns.

(c) II Raurkela Civil Township (N. A. C)	1
III Sundargarh (M)	6
Total	**2**

* The town having out growth.

The district does not have any Aurvedic or Homoeopathic hospitals with the facility of beds in Urban areas. Hence the amenity like availability of beds is limited to the Allopathic hospitals/dispensaries where indoor facilities are available. As against availability of 726 number of beds in the district, in 1971 Census, the current operation discloses that there are 883 number of beds in urban areas.

Table—13 discloses the most impartant commodity, manufactured, imported and exported in towns.

TABLE –13

Most Important Commodity Manufactured, imported and exported in Towns.

Class, name and civic status of the town	Most Important Commodity		
	Manufactured	Exported	Imported
1	2	3	4
III Biramitrapur (M)	Gudakhu	Limestone	Foodgrains
IV Jalda (C. T.)	See Raurkela	Urban Agglomeration	
III Rajagangapur (M)	Firebricks	Firebricks	Limestone
II Raurkela Civil Township (N.A.C)	See Raurkela	Urban Agglomeration	
Raurkela Urban Agglomeration	See Constituent Units		
(a) I Raurkela Steel Township (N.A.C) *	Iron sheets and steel pipes	Iron sheets and plates (Steel)	Ironore
(b) IV Jalda (C.T.)	...	..	...
(c) II Raurkela Civil Township (N.A.C.)	Wooden furnitures	Wooden furnitures	Foodgrains
III Sundargarh (M)	Bricks and Tiles	Rice	Grocery

* The Town having out growth.

It is revealed from the table that Iron sheets and Steel pipes are manufactured and exported from Raurkela Steel township, as that is the only steel town in the State. Other consumer goods like food grains, grocery are being imported to the towns. Fire bricks are also manufactured and exported from Rajagangapur town where as lime stone is imported to the town. But lime stone is exported from Biramitrapur town of the district.

SECTION–I

VILLAGE DIRECTORY

Codes used in the Village Directory

In the Village Directory various amenities and other data have been indicated by codes for want of space. The codes used in different columns are explained below.

COL. 5—**Educational Amenities** :

This column is intended to provide availability of educational facility in the village under the following codes :

1.	Primary or Elementary School ...	P
2.	Junior Secondary or Middle School	M
3.	Matriculation or Secondary ...	H
4.	Higher Secondary/Intermediate/ Pre-University/Junior College.	PUC
5.	College ...	C
6.	Industrial Schools ...	I
7.	Training School ...	Tr.
8.	Audit literacy class/Centre ...	AC
9.	Other Educational Institutions ...	O

Schools upto class-V have been treated as Primary School and have included Nursery School. Kinder Garten School, Pre-basic School, Pre-primary School, Junior basic School, upto Class-V. Schools upto class-VII have been treated as Junior Secondary or Middle English School. Schools upto class-XI (Matriculation) have been considered as Secondary or High School. This also includes High Madarsa upto class-X. Schools or Colleges upto class-XII are considered as Higher Secondary Schools. In case of composite Schools like M. E. with Primary classes or Higher Secondary Schools with M. E. classes, those have been included in the number of Primary School and Middle School respectively. In a village having two Primary Schools and one M. E. with primary classes, the total number of Primary Schools in the village has been recorded as three and M. E. as one.

In this process, the number of institutions have been determined and presented under the approved code. In cases of availability of more number of institutions of a type, the number has been indicated within bracket after the code. In case the amenity is not available in the village the same has been shown by a dash (—) in the relevant column having a note of the distance range regarding its availability.

COL. 6—**Medical amenities** :

Availability of such amenities has been presented under the following codes. In case of availability of more number of institutions of a type, such number has been indicated within bracket against the abbreviation. Where the amenities are not available, it has been indicated by a 'dash' in the relevant column with a note thereunder including distance range of its availability.

Hospital	...	H
Maternity and Child Welfare Centre	...	MCW
Maternity Home	...	MH
Child Welfare Centre	...	CWC
Health Centre	...	HC
Primary Health Centre	...	PHC
Primary Health Sub-centre	...	PHS
Dispensary	...	D
Family Planning Centre	...	FPC
T. B. Clinic	...	TB
Nursing Home	...	NH
Registered Private Practitioner	...	RP
Subsidised Medical Practitioner	...	SMP
Community Health Worker	...	CHW
Others	...	O

COL. 7—**Drinking water amenities** :

The types of potable drinking water supply sources available within the village has been indicated by the following codes. If the amenities are not available in the

village it has been presented by dash (—) in the relevant column and the distance range of its availability thereunder.

Tap Water	...	T
Well Water	...	W
Tank Water	...	Tk
Tubewell Water	...	TW
Hand Pump	...	HP
River Water	...	R
Fountain	...	F
Canal	...	C
Lake	...	L
Spring	...	S
Nallah	...	N
Others	...	O
Information not available	...	NA

COL. 8—**Post & Telegraph :**

Availability of amenities in the village has been presented under the following codes. In case of non-availability it has been presented by dash (—) in the relevant column also indicating the distance range thereunder.

Post Office	...	PO
Telegraph Office	...	TO
Post and Telegraph Office	...	PTO
Telephone Connection	...	Phone

COL. 10—**Communication :**

Availability of public transport like bus, rail and water way to the village have been indicated by the following codes. In case of non-availability, it has been presented by a dash (—) in the said column with the distance range of its availability mentioned thereunder.

Bus Stop	...	BS
Railway Station	...	RS
Navigable Water Way (including river, canal, back-water etc.)	...	NW

COL. 11—**Approach to the village :**

This is a new introduction in the 1981 Census not covered by the 1971 series. Approach to the village refers to the state of road etc. leading to the village. The intention is to see whether the village is approachable both in fair and foul weather and whether it is in-accessible some time in the year. Such approach has been presented under the following codes.

Pucca Road	...	PR
Kutcha Road	...	KR
Navigable River	...	NR
Navigable Canal	...	NC
Navigable Water Way (other than river or canal)	...	NW
Foot Path	...	FP

COL. 13—**Power Supply :**

If the power is actually available in the village in any form, then the same has been presented in this column under the following codes.

Electricity for domestic purpose	...	ED
Electricity for agriculture	...	EAg.
Electricity for other purposes like industrial or commercial etc.	...	EO
Electricity for all purposes listed above	...	EA

COL. 20—**Remarks including any place of religious, historical or archaeological interest.**

This column is intended to record particulars of any place of importance as well as the information on number of copies of news papers coming to the village and motor cycles/scooters, cars/jeeps and tractors available in the village. The codes used in this column are as follows.

N—Copies of the news papers coming to the village.

M—Motor cycles/Scooters available in the village.

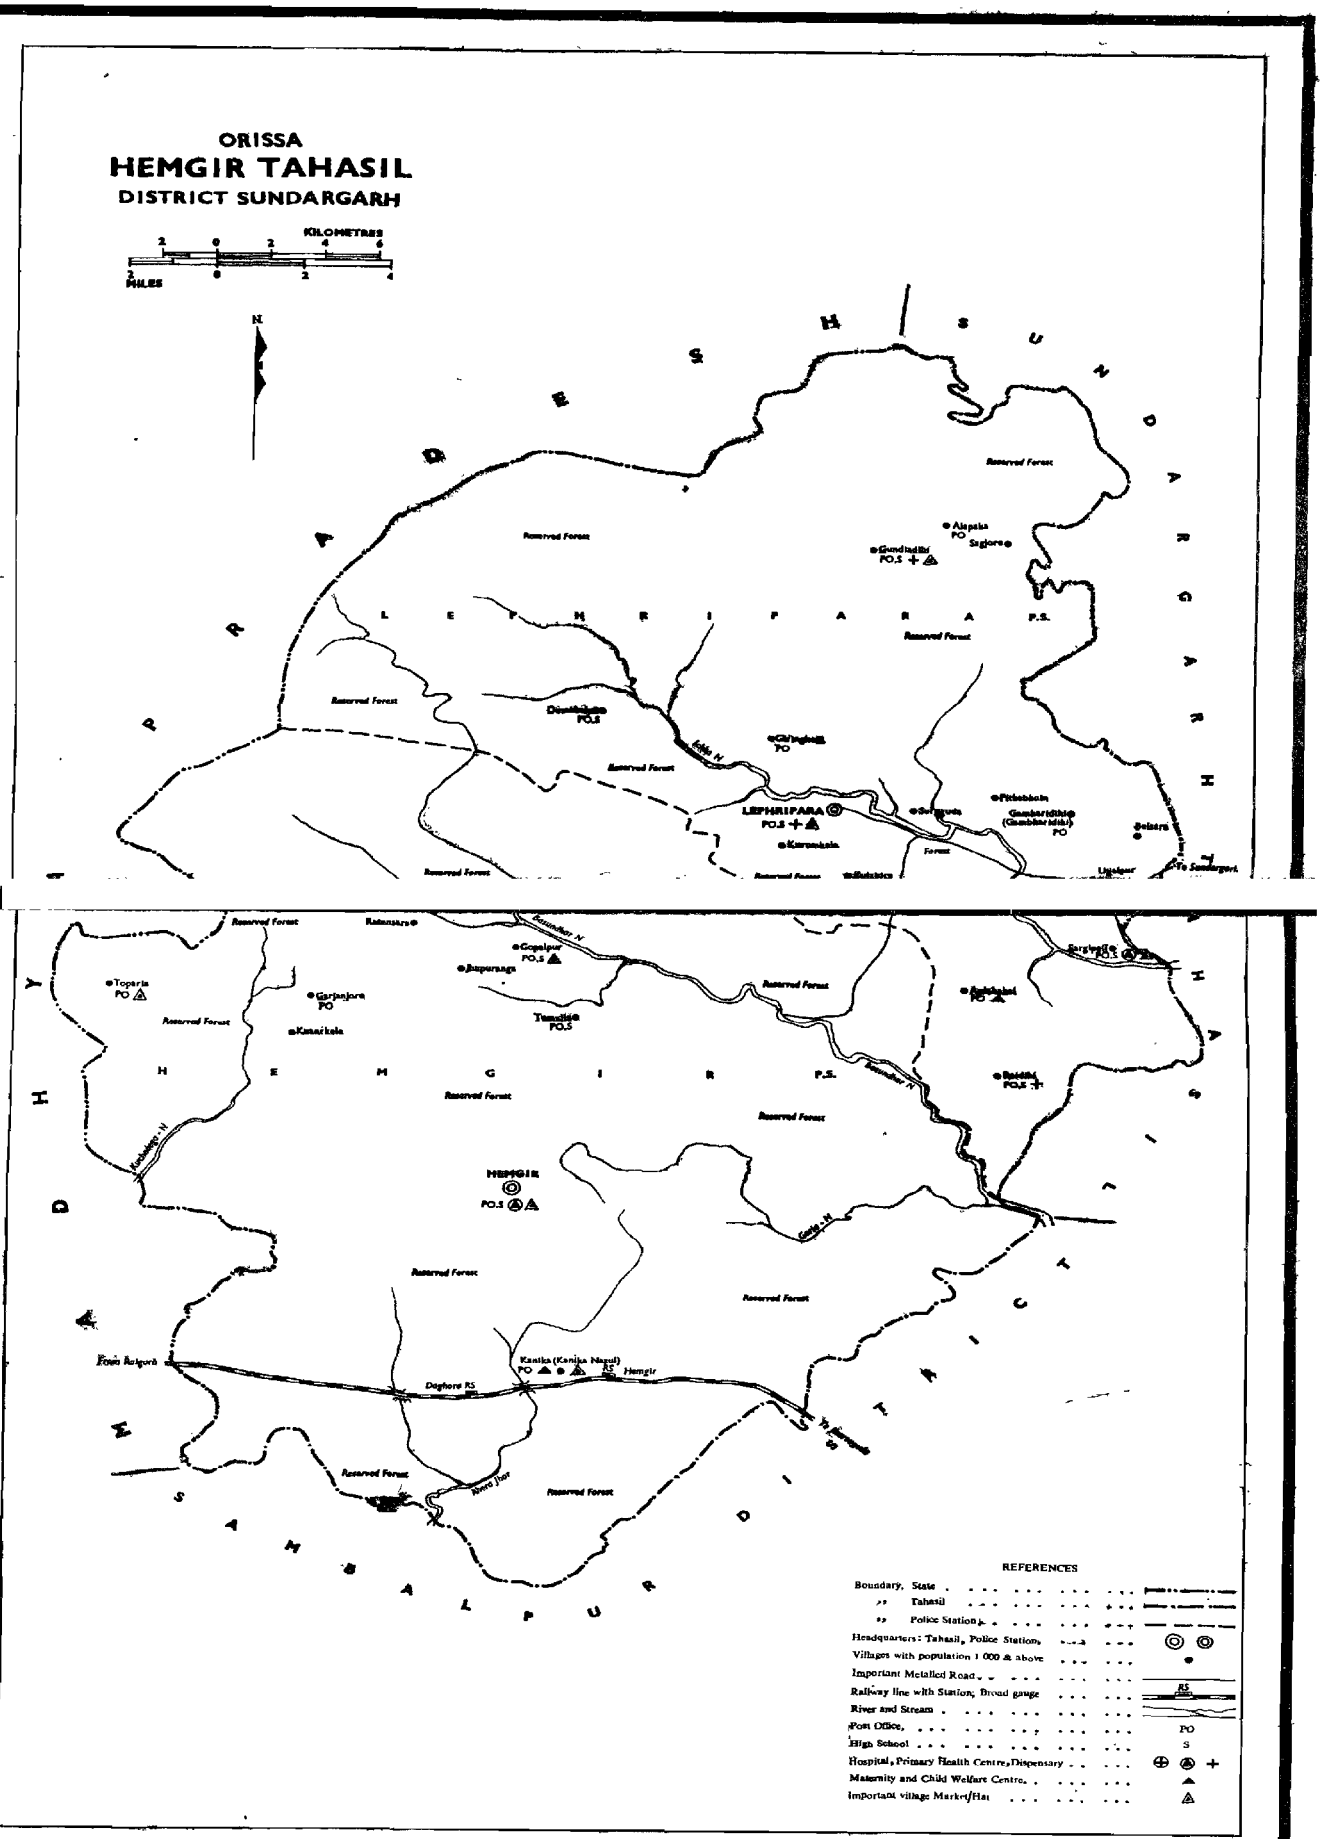

C—Cars/Jeeps available in the village.

T—Tractors available in the village.

The infromation presented under this column is illustrated below:

N-32, M-2

Here N-32 represents the number of copies of newspaper Viz. 32 and M-2, the number of motorcycles/Scooters Viz. 2.

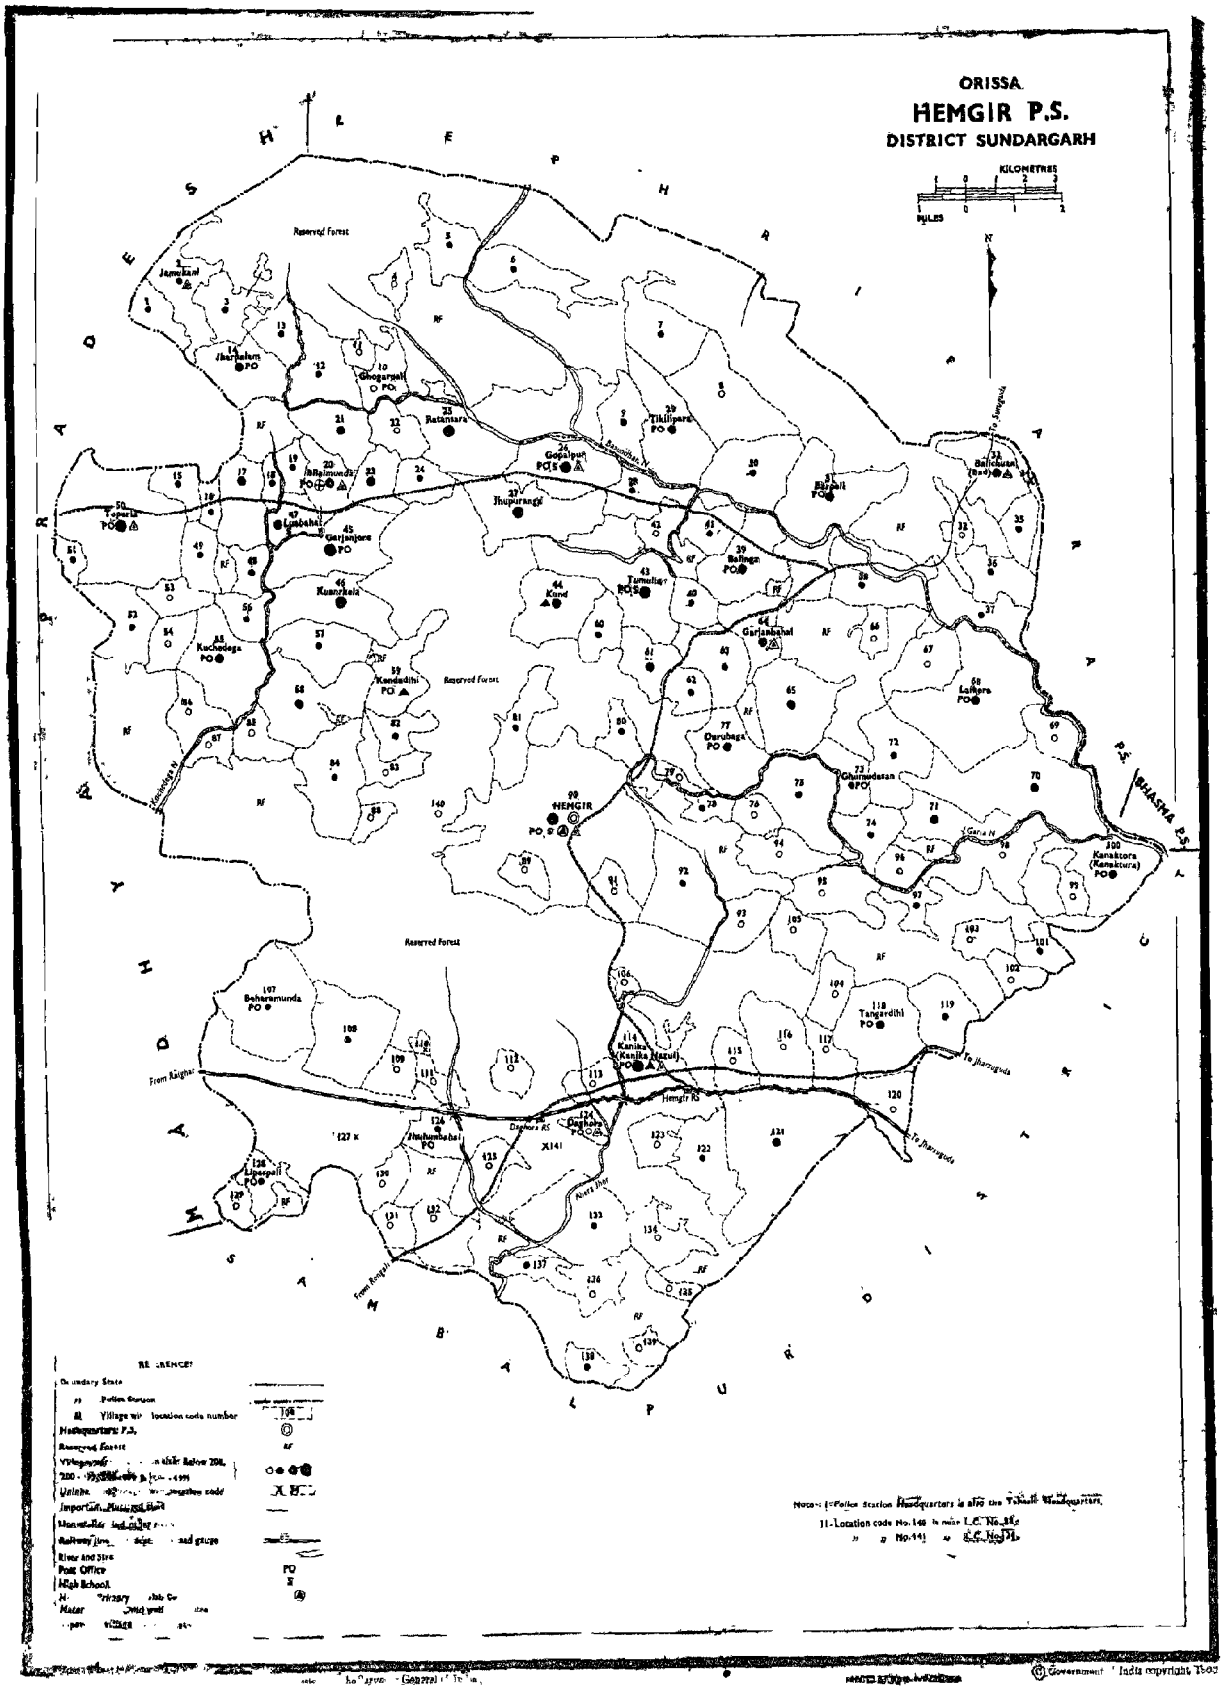

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION–II

TOWN DIRECTORY

Codes used in the Town Directory

STATEMENT- I

Status and growth history :

Col. 2—Class, name and civic administration status.

Class has been introduced to facilitate analysis on town directory data at State and all-India levels. It has been presented according to 1981 Census population of the core town in following ranges by the classification noted against each.

POPULATION		CLASS
1,00,000 and above	...	I
50,000—99,999	...	II
20,000—49,999	...	III
10,000—19,999	...	IV
5,000— 9,999	...	V
Below 5,000	...	VI

The name of the town has been shown in this column, with the correct spelling as adopted in the official record. Regarding the civic administration status, the town as it stood in 1980 has been indicated by the following abbreviations :

Municipality	...	M
Notified Area Council	...	NAC
Census Town	...	CT

STATEMENT- II

Physical aspects and location of towns :

Col. 12—The name of the navigable river/canal which is situated within a distance of 10 kms. has been shown under this column with distance from the referrent town. After the name of the river/canal 'R' for river and 'C' for canal has been given in brackets to denote whether it is a river or canal as illustrated below.

Mahanadi (R)—5

STATEMENT—IV

Civic and other Amenities 1979 :

Col. 6—Road length (in kms.)

Information under this column has been obtained from the officer incharge of the concerned urban local body. There are cases where the municipalities/notified area council maintain their roads accounts separately. Pucca roads and kutcha roads available in the town have been presented under the abbreviation 'PR & KR' respectively.

Col. 7—System of sewerage :

The sewerage system is implied the net work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal in the town. For the towns which are not provided with such underground sewerage system, availability of open surface drain or box drain etc. have been mentioned. The various type of sewerage/drainage system have been indicated upto two places in the town under the following codes :

Sewer	...	S
Open surface drains	...	OSD
Box surface drains	...	BSD
Sylk drains	...	SD
Cesspool method	...	CD
Pit system	...	Pt

Col. 11—Method of disposal of night soil :

Information in this regard has been obtained from the local body and the prevalent method of disposal of night soil has been presented with the following codes upto two places in order of their importance in the town. The objective of providing such data is to collect information which could help Government to provide a programme of stopping the practice of

removal of night soil as head loads and also minimising the use of human labour in the process of disposal.

Head loads	...	HL
Baskets	...	B
Wheel barrows	...	WB
Septic tank latrines	...	ST
Sewerage	...	S

Col. 12 & 13—Protected water supply :

The information collected from the local offices has been incorporated in these columns, in some cases such data had to be obtained from the State Public Health Engineering Department. The information on sources of water supply has been indicated in Col. 12 as against the system of storage with capacity in litres (in brackets) which has been presented in Col. 13. The same has been presented under following codes :

Over head tank	...	OHT
Service reservoir	...	SR
River infiltration gallery	...	IG
Bore well pumping system	...	BWP
Pressure tank	...	PT
Tubewell water	...	TW
Tap water	...	T
Well water	...	W
Tank water	...	Tk

The first five codes started above relate to the system of storage whereas, the remaining four codes represent the different sources of water supply.

STATEMENT—V

Medical, Educational, Recreational and Cultural facilities, 1979.

Col. 4 & 5—Medical facilities— Hospitals/ Dispensaries and beds available :

Information in this regard has been collected from the local offices. However, the institutions run by private doctors have not been included in these data, which have been restricted to the institutions run/aided by Government/ Semi-Government/ Local bodies/ Charitable institutions/ Social service agencies. The various types of institutions have been presented under the following codes :

Hospital	...	H
Dispensary	...	D
Health Centre	...	HC
Family Planning Centre	...	FC
T. B. Clinic	...	TB
Nursing Home	...	NH
Others	...	O

For places where medical facilities are not available, the name of the nearest place in the same district or nearest district, if in the same State or other State and its distance from the town where the facility is available has been indicated. All types of hospitals/dispensaries etc. whether allopathic, ayurvedic or homoeopathic have been covered. These are further distinguished by providing additional codes :

A—Ayurvedic

U—Unani

Hom—Homoeopathic

In case of allopathic, no separate code has been given.

Col. No. 6 to 9—Educational facilities :

Information in this regard has been collected from the local officials and, to the extent possible have been checked up with the informotion available in the office of the Director of Public Instructions of the State. For the place where more than one institutions of each type is available, the number thereof has been given against each in brackets. The codes used for different institutions are as follows :

Arts only	...	A
Science only	...	S
Arts and Science only	...	AS
Commerce only	...	C
Arts and Commerce only	...	AC
Combined of all categories Arts, Science and Commerce	...	ASC
Law	...	L

Col. 10—Recognised shorthand, typewriting and vocational training institutes.

Information has been collected from the local authorities. Here "recognised" means the institution recognised by statutory authority like Education Department, Commerce Department or Labour Department of the Government or semi-Government or autonomous bodies. The institution of each type has been presented under the following codes :

Shorthand	...	Sh
Typewriting	...	Type
Shorthand and Typewriting	...	Sh. Type
Others	...	O

Col. 11-14—Higher Secondary/ Intermediate/ PUC (Pre-University College)/ Junior College Level, Secondary/ Matriculation, Junior Secondary/ Middle Schools and Primary Schools.

Information in this regard has been collected from the local authority and presented under the following codes.

Primary School	...	P
Junior Secondary or Middle School	...	M
Matriculation or Secondary	...	H
Higher Secondary/ Intermediate/ Pre-University/ Junior College/ '10+2' system whether held in Schools or Colleges.	...	PUC

If educational facility is not available in the town, the name of the nearest place in the same district or name of the nearest district in the same State or other State with its distance from the town where the facility is available has been indicated.

Col. 17 to 20—Number of recreational and cultural facilities.

Information in this respect has been obtained from the local authority. Touring cinema has been eliminated from our purview and only permanent cinema/theaters have been included. Community halls/ auditorium have been added in this column as the same are becoming a common feature of the urban landscape. Information on Public libraries including reading rooms collected from the local authority and presented under the following codes.

Public Library	...	PL
Reading Room	...	RR
