PREFACE

It has not been possible for us to bring out the 1971 series of District Census Handbooks in an alphabetical order as we had originally planned. Additionally, there has been some delay in completing the series due to unavoidable reasons. Even so, it is our endeavour to bring out these volumes, one for each district, within a reasonably short time.

The reader may not find the present volume all comprehensive since this part of the publication is intended to bring out only the basic and immediately available information. All the same it presents this information at the level of lowest administrative unit viz ; village/ward/ mohalla and makes it a reference source of immense value in connection with administration, policy and planning at the grass-roots level. More comprehensive details of an administrative nature collated with cross-classification of 1971 Census data which is bound to involve some more time for compilation will appear as Part C of the publication in the case of each district.

The District Census Handbook of Srinagar which includes data about the State's premier capital city, believed to have been founded by Ashoka in 300 B. C., deserves a close study by the authorities who have lately been evincing keen interest in its planned development and removing deficiencies in the available public amenities. It may interest the reader to know that in the course of the last three decades, Srinagar M. C. has expanded in area to 82.88 sq. kms. in 1971 as against 28.49 sq. kms. in 1941. Similarly in population it has grown from a strength of 207,787 in 1941 to 403,413 persons in 1971 and is now graded as B-2 city. However, it goes without saying that many improvements are indicated to bring up this ancient city to a level which it legitimately deserves not only as the capital seat of the State Government but also as the focal centre for promotion of the State's all-important tourist industry. Mention may particularly be made of the need for slum clearance in areas constituting the older parts of the town, radical improvements in sanitation and sewerage, provision of adequate drinking water facilities, widening and upgrading of thorough-fares, provision of playgrounds and parks for public recreation, improvement in street-lighting and transport facililities etc. It is, also time that steps are taken to rid the city of some of its old anachronisms like the presence of cattle-breeders and milk - sellers in almost every locality of the town, which only aggravates its age-old problem of insanitation and squalor.

The reader will find that the contents of this volume have been divided into two parts. Part A which comprises Town and Village Directory gives out information with regard to amenities of various kinds available besides disclosing particulars about the land use pattern. Part B covers census information on such topics as population, household size, sex ratio, literacy level and the distribution of working population by industrial categories for each village and town of the district.

The Handbook has been provided with six maps, one pertaining to the district and the rest pertaining to its five constituent tehsils namely Ganderbal, Srinagar, Chadura, Badgam and Beerwah. These were prepared by our Cartographic Section headed by Shri Masood Ahmed, Cartographer, under the close and valuable guidance of Dr. B. K. Roy, Map Officer of the Registrar General's Office.

The credit for compiling this Handbook belongs to Shri Abdul Gani, Deputy Director, who was ably assisted in this task by Shri A. M. Kalloo, Tabulation Officer (Social Studies) and Shri P. K. Khosa, Statistical Assistant. The tables were compiled by S / Shri Ghulam Jeelani, Ghulam Ghaws Qadiri, Habib Ullah, Computors. Proof reading was done by Miss Halima Bano and Miss Rajni Warikoo, Proof Readers, and the manuscript was typed out by Shri S. K. Koul, U. D. C. and Miss Prana Kaw, L. D. C. I wish to put on record my appreciation of their work.

Srinagar,
the 21st June, 1973.

J. N. ZUTSHI

PART X-A

TOWN AND VILLAGE DIRECTORY

TOWN AND VILLAGE DIRECTORY

The District Census Handbook series of 1971 differ widely in scope and presentation from the corresponding series of 1961. In this publication, for the first time, information both Census and non-Census relating to each village and town of the district has been presented in the form of Town and Village Directory. The earlier volumes, on the other hand, mainly encompassed the Primary Census Abstract for each village of the rural sector and ward/mohalla of urban sector plus some additional information collected from administrative agencies.

Part A of the District Census Handbook gives the Town and Village Directory. A broad appraisal of the urban and rural data has been attempted in this portion of the publication.

Part B of the publication contains the Primary Census Abstract based on 1971 Population Census.

In view of limitations of printing space, a number of abbreviations have been used to facilitate presentation. The amplification of the abbreviations used in the statements of the Town Directory is given below in Statement A and that of the abbreviations used in Village Directory is mentioned in Statement B.

1. Origin and Growth of District Census Handbooks :

The District Census Handbooks were introduced for the first time in 1951 Census in almost all other States of India except Jammu and Kashmir where due to unsettled conditions prevailing in the wake of Pakistan invasion of 1947-48, no census could be held for the decade 1941-51. Prior to 1951, some States used to produce District Census Statistics but so far as Jammu and Kashmir is concerned no such statistics, nor even any District Gazeteer were compiled except the one produced by Mr. Bates in 1874. Prior to 1951, it was the practice to compile population figures on the basis of communities, but since 1951 the basis of classification was downright changed from a social to economic one and the figures were for the first time presented in the Primary Census Abstract according to eight Livelihood Classes. The pattern of 1951 series of District Census Handbooks which contained the Primary Census Abstract plus some useful administrative information on the availability of amenities in villages and towns varied from State to State depending upon the financial and other resources made available by the State Government. At the 1961 Census it was decided not only to improve the frame-work in which the data may be presented in future but also to produce these publications on a generally uniform pattern throughout the country. Thus the District Census Handbook of 1961 differed appreciably in the matter of content and coverage from that published in the 1951 Census. Besides the primary census data, the 1961 District Census Handbooks were made more informative with the inclusion of village-wise and town-wise information on the availability of amenities such as educational facilities, medical facilities, supply of drinking water, electricity etc.

However, for reasons already explained, the work of bringing out District Census Handbooks in our State was taken up in right earnest only at the 1961 Census. And since they made available not only the basic census information at the grass-roots level of village and ward/ mohalla of a town, but also gave succinct account of the general stage of development of the urban areas as also rural areas of each individual district, they were found useful for administrative purposes.

At the 1971 Census, efforts have been made to further improve and enlarge the scope and coverage of data in the District Census Handbooks. Presentation of information, both census and non-census, in respect of each village and urban block of the District in the shape of Town and Village Directory for instance, is a first-time innovation. Another improvement of significance has been to break up the Handbook in three parts so as to make the more urgent part of the information available to data users with minimum delay.

2. Scope of District Census Handbooks :

The scope and utility of the District Census Handbooks can be gauged from the fact that these are the only publications which incorporate the basic Census data and also other non-census information at the level of smallest administrative unit viz ; village and ward/mohalla of a town. They are, therefore, constantly referred to for several purposes by the administrator, planner, policy-maker, election machinery and academician. Conscious of their usefulness and alive to the fact that delay in their publication would result in detracting from their value, the District Census Handbooks have been sub-divided into three parts. Parts A and B, the details of which were ready have been fused together and published as one volume. Part C would come out as a

separate volume and would inevitably take more time in compilation of administrative statistics proposed to be included in it.

Part A : **Town and Village Directory :**

Part A contains both census and non-census information about each village and town of the district. The Town Directory which runs over seven statements portrays mostly non-census information about each town of the District on such items as (1) the status of civic administration and the functional category of towns and the growth of population since 1901 ; (2) physical aspects and location ; (3) civic finances ; (4) civic and other amenities ; (5) medical, educational, recreational and cultural facilities ; (6) trade, industry, commerce and banking facilities ; and (7) population by religion.

The Village Directory portion of Part A highlights the particulars of amenities available in each village of the district in the matter of educational and medical institutions ; power supply ; drinking water facilities ; post and telegraph facilities ; communication ; particulars of land use ; weekly markets and places of religious, historical and archaeological interest in the village.

Part B : **Primary Census Abstract :**

Part B gives for each village and ward/ mohalla of a town, the primary census data incorporating area of the town in Km^2 and of the village in hectares ; the number of occupied residential houses ; the number of households ; total population with sex-wise break-up ; scheduled caste population ; literate population and working population by nine broad industrial categories, namely (1) cultivators ; (2) agricultural labourers ; (3) those working in live-stock, forestry, fishing, hunting, plantations, orchards and allied activities ; (4) mining and quarrying ; (5) manufacturing, processing, servicing and repairing ; (6) in construction : (7) trade and commerce : (8) in transport and storage ; and (9) in other services and the non-working population.

Part C : Administrative Statistics and Report

Part C would incorporate the administrative statistics relating to the district in various fields of development. A write-up highlighting the changes in socio-economic and demographic characteristics of the district during the last decade would also be given.

TOWN DIRECTORY

The Town Directory exclusively deals with the urban areas of the district. It may be relevant to reproduce here the definition adopted for an urban area. The following criteria were adopted universally for the purpose of determining any area as urban :—

a) All places with a Municipality, Corporation or Cantonment Board or Town Committee or Notified Area irrespective of their population or other characteristics.

b) All other places satisfying the following tests :—

1. A minimum population of 5,000 ;
2. At least 75 percent of the male working population as non-agriculturists ; and
3. A density of population of at least 1,000 persons per sq. mile (390 persons per km^2)

At the 1961 Census, the district was composed of three urban areas viz ; Srinagar Municipality, Badamibagh Cantonment and Notified Area of Natipora-Hyderpora, but during the intercensal period of 1961-71 Natipora-Hyderpora lost urban status and no other area of the district was notified as urban. Thus, at the 1971 Census the number of urban areas was reduced from 3 to 2. On the other hand, with the creation of two more tehsils of Beerwah and Chadura, the number of tehsils in the district rose from 3 to 5. Srinagar M. C. and Badamibagh Cantt. both fall in Srinagar Tehsil, and satisfy both criteria reproduced above for being classified as urban.

Urban Agglomeration

The concept of urban agglomeration was evolved at the present census as an improvement over the 'Town Group' concept which had been adopted in the past. The 'Town Group' concept was given up because it did not bring out spatially contiguous territory of urban rural settlements. Under this concept it was not always the contiguous urban units that formed such a group. Sometimes urban units quite cut off from one another were taken together ignoring the intervening region. The concept, thus, proved somewhat inadequate for the purpose for which it was evolved. Urban agglomeration, on the other hand, is made up of a continuous urban spread constituted of a town or two or more physically

contiguous towns together with continuous well recognised urban out-growths, if any, of such towns. However, urban agglomeration is envisaged to be constituted only in such cases where the core town has a population of at least 50,000. In J & K State, therefore, only two cities viz; Srinagar M. C. and Jammu M. C. qualified to be formed into agglomeration.

The constituents of Srinagar Urban Agglomeration are indicated below :

	Population		
	Persons	Males	Females
A. Srinagar Urban Agglomeration	423,253	228,227	195,026
1. Srinagar Municipality	403,413	217,765	185,648
2. Badamibagh Cantonment	7,982	4,160	3,822
3. Out-growths			
i) Natipora	6,400	3,419	2,981
ii) Kursu Padshahi Bagh	1,293	714	579
iii) Bemina	2,020	1,065	955
iv) Bagat Barzala	2,145	1,104	1,041

Standard Urban Area

As already mentioned the concept of town group as adopted at the 1961 Census was found of limited value. It was therefore decided to modify this concept as to make it possible to compile comparable data for at least two decades for a fixed area covering a large core town as well as the adjoining areas in order to facilitate the formulation of urban development plans. The "town group" concept thus yielded place to the concept of "Standard Urban Area". The modified concept called for the delineation of all such contiguous rural and urban areas as are at present under the intensive influence of cities/big towns having a population of 50,000 and above, Under this definition, in our State only two towns viz, Srinagar and Jammu M. Cs qualified to be considered for the demarcation of Standard Urban Area.

The particulars of Standard Urban Area of the district are shown below :—

District	**Standard Urban Areas and component units**	**Civic status**	**Area in km²**

	TOTAL RURAL GROUP	257.88

The Town Directory consists of seven statements, as explained below.

Statement I

This statement gives the particulars relating to the status of the town ; growth history of towns since 1901 and the functional category of towns in 1961 and 1971 Censuses. The civic administration status of each urban area in the district has been denoted with the help of abbreviations. These are amplified below :—

Status	Abbreviation
Municipality	M. C.
Cantonment	Cantt.

Srinagar Municipality came into being in 1901 and since then continues to enjoy the urban status. In fact, this is the only city in the State having returned a population of over 4 lakhs. Badamibagh Cantonment is another urban area of the district which acquired urban status in 1931 and since then also continues to be in the urban list. On the basis of population, this cantonment with a population of 7,982 persons qualifies to be one of the 17 class V towns of the State.

As no census was held in the State in 1951 owing to abnormal conditions prevailing then, the population figures recorded in col. 11 of the statement is the arithmatic mean of 1941 and 1961 Census populations.

Columns 14 and 15 of the statement highlight the functional category of the towns according to 1961 and 1971 Censuses. The method adopted for determining the functional traits of towns is uniform and is based on the method employed in 1961 Atlas volume. According to the method, the participation rates of the working population among the following nine industrial categories have been taken into account :–

I) Cultivation

II) Agricultural Labour

III) Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities,

IV) Mining and Quarrying

V) Manufacturing, Processing, Servicing and Repairs

a) Houshold Industry

b) Other than Household Industry

VI) Construction

VII) Trade and Commerce

VIII) Transport, Storage and Communications and

IX) Other Services

These nine categories have been re-grouped into the following 5 broad functional classifications :–

Group	*Categories*
1. Primary activities	I+II+III+IV
2. Industry	Va+Vb+VI
3. Trade and Commerce	VII
4. Transport	VIII
5. Services	IX

The percentage of workers under each of the specified groups has been worked out for each of the towns. These towns have then been classified according to the percentage values which determine the characteristics of the town as Primary Activity, Industrial, Commercial, Transport, Services etc. in the following manner :–

i) If the proportion of workers under any of the five broad categories is 40 per cent or more of the total working population, the town has been treated as mono-functional e.g. Industries, Commercial, Transport etc.

ii) If the proportion of workers in most predominant category is less than 40 per cent, but, when added with the next predominant category makes up 60 per cent or more, the town has been designated as bi-functional e.g. industry-cum-services, primary activities-cum-services etc.

iii) If the percentage of workers in three most predominant categories add up to 60 per cent or more of the total working force, the town has been classified as tri-functional like industry-cum-services-cum-transport etc.

It will be seen from the statement that while at the 1961 Census both the urban areas of the district were service towns, during the last ten years viz ; Srinagar has improved its status having become bi-functional or industry-cum-service town.

Statement II

This statement consisting of 13 columns gives the details of physical and locational aspects of

the towns. Under physical aspects are given such data as annual rainfall (in mms.) and minimum and maximum temperature (in centigrade). This data has been obtained from the Director General of observatories, Meteorological Department, Govt. of India. The statement also gives details of the distance of the town from the nearest city with population of one lakh and over, from the State Headquarter from the District Headquarter, from the Tehsil Headquarter and from the nearest railway station, if any and bus route. It also indicates whether or not the town is provided with a navigable river or canal within 10 kms. and a sea port if within 50 kms.

The district experiences moderate temperature in summer and severe cold in winter. The summer season extends from June to August and the maximum temperature during the season soars upto 36.0° centigrade. During these months, the atmosphere gets sultry and unpleasant. The heat often becomes intolerable, but is generally followed by showers of rain. With the advent of September, the temperature starts to come down. During October and November, the days are pleasant and nights cold. The actual winter sets in from 20th of December and lasts upto the end of February. During winter months, there is good deal of snow-fall and the whole valley appears draped in white. According to the intensity of cold, the winter has been divided into 3 parts. The first forty days are called "Chila Kalan", the next twenty days, the "Chila Khurad" and the last ten days, the "Chila Bacha". The winter is generally unwelcome to the people as it paralyses all economic activity and imposes heavy strain on their already meagre financial resources.

The district receives a rainfall of 564.0 mms. which is good despite the fact that monsoons do not reach here.

Srinagar commanding an altitude of 1,588 metres is the major city of the State, having a population of over 4 lakhs. It serves as the summer headquarter of the State Government offices, and lies about 291 Kms. from Jammu city ranking only next to it, which serves as the winter state headquarter. Srinagar city is connected by a network of roads with practically all the district and tehsil headquarters of the State. River Jhelum which is the only major navigational river in the State passes through the district and both the urban areas — Srinagar and Badamibagh are situated on its banks. Pathankote which was the nearest rail head till recently is 389 and 392 Kms. from Badamibagh Cantonment and Srinagar City respectively. With opening of a railway station at Jammu the distance to rail-head has reduced by 101 Kms.

Statement III

The statement portrays the details of civic finance for the year 1968-69. Under the receipt head, the data has been collected under sub-heads, like receipt through taxes ; receipt derived from Municipal Property and powers ; Government grant ; loans ; advances and other sources. It also covers under the item of expenditure sub-heads like expenditure on general administration ; public safety ; public health and convenience ; public works ; public institution and others. The following table shows the per capita receipt and expenditure by size class of towns.

TABLE NO. 1

Per capita receipt and expenditure by size class of towns

Size class of town	No. of towns	Receipt (Rs.)			Expenditure (Rs.)			
		Total receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	Expenditure on public health and conveniences	Expenditure on public institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9
I								
100,000 and over	1	12.62	7.86	4.76	8.39	0.06	..	8.33
V								
5,000—9,999	1	75.15	5.36	69.79	68.28	6.57	0.26	61.45

It will be seen that per capita total receipt is higher in the case of the class V town than for the class I town, the two figures being Rs. 75.15 and Rs. 12.62 respectively. However, the per capita receipt through taxes is higher in class I town than in the class V town, the figures being Rs. 7.86 and Rs. 5.36 respectively.

In the matter of per capita total expenditure also the class I town very much trails behind the class V town, the figures being Rs. 8.39 and Rs. 68.28 respectively. The statement shows that in class I town there is no outlay on public institutions at all.

Statement IV

This statement contains the details of civic and other amenities. It incorporates information on items like road length ; system of sewerage ; number of latrines by types ; method of disposal of night soil ; source and capacity of protected water supply and availability of fire-fighting services. It also gives under the item of electricity the number of connections available on sub-items like domestic, commercial, industrial, road-lighting and others.

For limitations of printing space, a number of abbreviations have been used. These are amplified below :—

Column 4	*Abbreviations*
System of sewerage/drainage	
1. Pucca drainage	PD

Column 8	*Abbreviations*
Method of disposal of night soil	
1. Wheel Borrows	WB
2. Dumping System	DS
3. Municipal Trucks	MT
4. Trench System	TS
5. Hand Carts	H
6. Thrown in River	R

Column 9	*Abbreviations*
Source of protected water supply	
1. Tube Well	TW
2. Nallah	N

Srinagar and Badamibagh are both provided with pucca drainage. However, there are hardly any modern underground sewers in either town. Water borne latrines obtain in both the towns. Considering the population, however, particularly that of Srinagar City, the existing waterborne latrines, are appallingly inadequate. Much remains to be done for conversion of service type latrines into waterborne ones. The most prevalent means used in the disposal of night soil are handcarts, wheel barrows and municipal trucks. The method of dumping system is commonly practised. The arrangement is that garbage etc. is first removed to reception centres by means of handcarts and from thence it is removed through trucks to outside urban limits where it is either dumped or used in filling natural ditches. For a capital city like Srinagar which attracts tourists from all over the world this type of disposal is obviously distasteful besides being unhygenic. It calls for drastic improvement. Both the towns are provided with protected water supply. However, the position is not so happy in the case of Srinagar city as in the case of Badamibagh. While on the basis of a consumption norm of 30 gallons per head per day which is considered reasonable, the requirements of Srinagar are in the neighbourhood of 1,21,02,400 gallons per day, the installed capacity of the reservoirs is only 50,25,000 gallons which is far too inadequate. However, with the commissioning of new water supply projects the situation is bound to improve considerably.

Fire Fighting service is available in Srinagar alone to be shared by Badamibagh also. This is, however, one service in Srinagar which is reasonably well organized and equipped. It has a distinguished record of coming even to the rescue of other surrounding villages and towns in times of exigencies.

Electricity is available in both the towns. The power consumed has been categorised into domestic, industrial, commercial, road-lighting and others. From the number of connections issued under industrial category, the city of Srinagar is gradually assuming industrial complexion. The roadlighting facilities are provided by the Municipal Committee for Srinagar city and by the Cantonment Board for Badamibagh.

Statement V

This statement brings out the picture of educational, medical, recreational and cultural facilities available in each town of the district. Under medical facilities, type of institution and

number of beds available are given. Similarly under educational amenities different types of educational institutions are indicated. It also gives information on recreational and cultural facilities like availability of stadia, cinema, drama halls and libraries.

The abbreviations used in the statement to denote the various types of medical and educational institutions are explained below :—

Column 3	*Abbreviations*
Type of Medical Institution	
1. Hospital	H
2. Dispensary	D
3. T. B. Clinic	TBC
4. Health Centre	HC
5. Nursing Home	NH
6. Family Planning Centre	FC
7. Maternity Child Welfare Centre	MCW

Column 5

Type of Colleges	
1. Arts and Science College	AS
2. Science and Commerce College	SC

Expectedly both towns of the district are provided with well equipped Medical Institutions. In fact some of the hospitals in Srinagar are easily the best and the largest amongst the hospitals existing in the State and cater to inpatients suffering from serious diseases. The following table gives the number of beds available per 1,000 population in each town :—

TABLE NO. 2

Medical Facilities

S. No.	Name of Town	No. of beds in medical institutions	No. of beds per 1,000 population
1.	Badamibagh (Cantt.)	20	2.51
2.	Srinagar (M. C.)	1,316	3.26
	Total	1,336	3.25

It is apparent from the above table that there are all told 1,336 beds available in all the medical institutions of the two towns of the district which makes a ratio of 3.25 beds per 1,000 population. Considering the fact that the available strength of the beds has to bear the ever increasing pressure of many in-patients from other parts of the State also, the ratio slides down further.

Srinagar is the seat of Kashmir University which has come up as a Teaching University and is equipped with the faculties of Arts, Science, Commerce, Engineering, Medicines etc. It also has a Polytechnique and a vocational Training Institute for providing vocational guidance in various trades. Badamibagh shares in full measure the benefit of these facilities as part of Srinagar urban agglomeration. Significantly Srinagar is the only town in Kashmir Province which is provided with a Medical College, an Engineering College and a Polytechnique which serve as a centre of training in these fields for students from all over the State.

To provide Primary and Secondary School education, there are 50 High/Higher Secondary Schools, 29 Junior Secondary/Middle Schools, 164 Primary Schools and 82 other Schools in Srinagar and one High School, 2 Junior Secondary/ Middle Schools, 1 Primary School and 3 other Schools in Badamibagh. The following table gives the School-population ratio in the two towns of the district :—

TABLE NO. 3

S. No.	Name of Town	Number per 1,000 population		
		Higher Secondary/ High Schools	Junior Secondary/ Middle Schools	Primary Schools
(1)	(2)	(3)	(4)	(5)
1.	Badamibagh (Cantt.)	0.13	0.25	0.13
2.	Srinagar (M. C.)	0.12	0.07	0.41
	Total	0.12	0.08	0.40

This shows that the existing number of schools of practically all the categories do not reasonably suffice the requirements of the growing population and explains why the schools in both the towns are generally overcrowded.

In the matter of recreational and cultural facilities, the two towns with one stadium, 8 cinemas, one drama hall and nine public libraries in Srinagar M. C. and one cinema and one public library in Badamibagh Cantonment are relatively placed much better than other towns of the State. However, considering the size and status of Srinagar as a State

headquarter and a city of heavy tourist influx, there is large scope for further improvement and expansion of the existing cultural and recreational facilities.

Statement VI

This statement sketches out the facilities of trade, commerce, industry and banking available in two towns of the district. The statement also gives the particulars of three most important commodities imported, exported and manufactured in the towns. It also gives the number of banks and co-operative credit societies functioning in the towns.

There are 3 Agricultural credit and 6 non-agricultural credit societies in Srinagar M. C.

Srinagar has been the traditional home of handicrafts of international repute which because of their fine quality and texture find markets in countries like France, U. S. A., Australia, West Germany, Canada and United Kingdom. Of course, some of the handicrafts which were dependent upon the high quality wool and pashmina yarn imported from Central Asia have received a severe blow with the closure of traditional trade route since 1947. However, the concerted efforts made by the Government to re-orient the age-old handicraft industry and provide the necessary wherewithal for the promotion of industrial development have begun to bear fruit and Srinagar has become an established centre for the export of embroidered shawls, namdas, carpets, wood carving, papier machie etc., besides fruits and timber assembled from the surrounding areas. Badamibagh Cantonment in its small way, contributes things like sand, seeds, milk etc.

Banking facilities are also on the increase in Srinagar. Till 1968-69 the number of banks had gone upto nine. Badamibagh Cantonment has no bank of its own and shares the available facilities in common with Srinagar.

Statement VII

This statement brings out the religion-wise distribution of population of the two towns on the basis of 1971 Census. It will be seen that both towns are multi-religious, the aggregate position being as under :—

TABLE NO. 4

Urban Population by Religion

Religion	Urban Population	
	Total	Percentage
(1)	(2)	(3)
All Religions	411,395	100.00
Buddhist	261	0.06
Christian	299	0.07
Hindu	53,570	13.02
Jain	5	N
Muslim	351,424	85.43
Sikh	5,831	1.42
Others	2	N
Religion not stated	3	N

Note :—(N) Negligible.

Muslims constitute the predominant religious group claiming a proportion of 85.43% of the total population of the two towns. Hindus constituting 13.02% of the total population. From the remaining 1.55%, Sikhs claim 1.42 while the number of Jains, Christians and Buddhists is practically insignificant.

As between the two towns Srinagar is more predominantly Muslim than Badamibagh, the two proportions being 85.56% and 78.71% respectively. The corresponding proportion of Hindus is 12.93% and 17.51% respectively. While in the case of Srinagar M. C. the sex-ratio is adverse to females for both major communities there being 858 Muslim females per 1,000 Muslim males and 831 Hindu females per 1,000 Hindu males. In the case of Badamibagh Cantonment Hindu females outnumber Hindu males, giving a ratio of 1,205 females per 1,000 males. This phenomenon is possibly occasioned by a large number of male residents being posted on duty outside the town.

VILLAGE DIRECTORY

A brief outline on each statement of the Town Directory has been given in the earlier pages. As already mentioned, the publication in addition contains a Village Directory of the district giving particulars of the amenities available in the field of education, medicines, power supply, drinking water, communication, post and telegraph facilities and land use etc. in respect of each village of the district.

Appendices :

The Village Directory is supplemented with the following appendices :—

Appendix I : gives tehsil-wise list of villages arranged alphabetically along with their 1971 location code numbers.

Appendix II : Provides tehsil-wise abstract of educational, medical and other amenities.

Maps :

The publication has been illustrated with the following maps :—

i) District map depicting tehsil boundaries and location of towns.

ii) Tehsil map indicating the boundaries of each village and town within the tehsil, illustrated by suitable symbols, population and various amenities available in villages and towns.

Abbreviations :

In the Village Directory some abbreviations have been used which are amplified below :

Column No.	Item	Abbreviations
4	Maktabas	MKT
	Patshalas	PS
	Primary School	Pr. S
	Basic Activity School	BAS
	Central School	CS
	Middle School	Mid. S

	Post & Telegraph Office	POTO
	Telephone	Phone
12	Government Canal	*C
	Non-Government Canal	C
	River	R
	Tube Well	TW
	Other than Canal and River	O

Number and size of Villages :

There are in all *706 villages which are administratively distributed in 5 tehsils viz; Ganderbal, Srinagar, Chadura, Badgam and Beerwah. Of these *706 villages, 680 are inhabited and 26 uninhabited. The following table gives the number of villages in each tehsil :—

TABLE NO. 5

S. No.	Name of Tehsil	Number of Villages		
		Total	Inhabited	Uninhabited
1.	Ganderbal	136	133	3
2.	Srinagar	62	59	3
3.	Chadura	142	136	6
4.	Badgam	186	177	9
5.	Beerwah	180	175	5
	Total	*706	680	26

It will be seen that Srinagar is the smallest tehsil of the district with its jurisdiction extending over only 62 villages. Badgam is the biggest tehsil of the district stretching over 186 villages. Beerwah and Chadura have become tehsils in the inter-censal period 1961-71.

The following table gives the distribution of villages by their area :—

* Forest/Boat blocks have not been treated as villages.

TABLE NO. 6

S. No.	Area in Acres	No. of Villages
1.	50 or less	45(6.38)
2.	51 — 100	98(13.90)
3.	101 — 200	149(21.14)
4.	201 — 500	215(30.45)
5.	501 — 1,000	145(20.57)
6.	1,001 — 2,000	44(6.24)
7.	2,001 — 5,000	7(0.99)
8.	5,001 & above	3(0.43)
	Total :	706(100.00)

Note :— (Figures in brackets indicate percentage to total number of villages).

It will be seen that largest number of villages in the district falls in the area group of 201-500 acres. These villages which number 215 constitute 30.45% of the total. It is followed by the area groups 101-200 and 501-1,000 acres covering 149 and 145 villages respectively, forming 21.14% and 20.57% of the total villages. Thus 72.06% villages of the district have areas ranging between 101 and 1,000 acres. Only, 10 villages fall in the area group 2,001 and 5,001 acres and above, 7 of these being in the area range between 2,001-5,000 acres and 3 above this range.

Educational Facilities :

Not all the villages of the district enjoy primary school facilities. There are still 281 inhabited villages without at least a primary school and they make 41.32% of the total inhabited villages of the district. The tehsil-wise number of villages without a primary school is given in the following table :—

TABLE NO. 7

S. No.	Name of tehsil	No. of villages without primary school	No. of uninhabited villages
(1)	(2)	(3)	(4)
1.	Ganderbal	39(29.32)	3
2.	Srinagar	21(35.60)	3
3.	Chadura	59(43.38)	6
4.	Badgam	81(45.76)	9
5.	Beerwah	81(46.29)	5
	Total	281(41.32)	26

Note :— (Figures in the brackets indicate percentage to total inhabited villages in each tehsil).

It will be seen that Badgam, Beerwah and Chadura tehsils are still well behind Ganderbal and Srinagar Tehsils in the matter of this basic amenity. There is no doubt, however, that in all the tehsils of the district the number of villages without at least a primary school is on a steady decline and they are all marching towards the goal of universal education.

Higher Secondary/High Schools exist only in 35 villages which make a proportion of 5.15% of the total inhabited villages of the district.

The following table gives the distribution of villages having educational amenities by distance from the nearest town :—

TABLE NO. 8

S. No.	Distance from the nearest town (in kms.)	Total No. of villages	Number of villages having		
			PS/MKT/Primary/ Basic Activity School	Central School/ Middle School	Lower High/High School/Higher Secondary School
1	2	3	4	5	6
1.	5 and less	26	12(46.15)	6(23.08)	2(7.69)
2.	6—10	53	22(41.51)	10(18.87)	2(3.77)
3.	11—15	109	53(48.62)	12(11.01)	7(6.42)
4.	16—25	298	146(48.99)	38(12.75)	11(3.69)
5.	26—50	207	112(54.11)	38(18.36)	13(6.28)
6.	51—100	13	10(76.92)	4(30.77)	..
	Total	@706	355(50.28)	108(15.30)	35(4.96)

NOTE :—1. @ Includes 26 uninhabited villages.

2. (Figures in brackets indicate percentage to total number of villages in each distance group)

It is pleasing to note that villages placed farther away from a town have received relatively more attention in the provision of schooling facilities. This is the only rational approach to ensure equal opportunities and minimum cost and inconvenience to the children of all areas for receiving basic schooling facilities.

Medical Facilities :

Column 5 of the statement shows that in the year 1968-69, there were only 55 villages or 8.09% of the total inhabited villages of the district provided with dispensaries. Amongst the tehsils, Ganderbal is relatively better placed with 20 of its villages covered with dispensaries. There are in all 8 rural health centres in the district, two each in Ganderbal, Chadura, Badgam and Beerwah tehsils. Of the 18 rural family planning centres in the district, 5 each are found in Ganderbal and Chadura Tehsils.

The following table gives the distribution of medical institutions per 100 sq. km.

TABLE NO. 9

S. No.	Name of Tehsil	Total village paper area (in sq. km.)	No. of medical institutions of any kind	No. of medical institutions per 100 sq. km.
(1)	(2)	(3)	(4)	(5)
1.	Ganderbal	264.1	27	10.2
2.	Srinagar	150.3	8	5.3
3.	Chadura	276.4	22	8.0
4.	Badgam	281.0	15	5.3
5.	Beerwah	219.9	10	4.5
	Total	1191.7	82	6.9

It will be seen that while for the entire rural sector of the district, there are 6.9 medical institutions per 100 sq. km., Ganderbal and Chadura are well above this average with a ratio of 10.2 and 8.0 medical institutions per 100 sq. km. respectively. The other three tehsils are far below the district average. Beerwah with a ratio of 4.5 medical institutions per 100 sq. km. is placed at the bottom. It is thus evident that for any future expansion of medical facilities in the rural part of Srinagar district, Badgam, Beerwah, Srinagar tehsils deserve more attention than the other two tehsils.

Electricity :

Out of a total of 680 inhabited villages, only 95 or 13.97% villages of the district have been electrified. Badgam and Beerwah, the two comparatively bigger tehsils by number of villages, have the least number of electrified villages which stands at 11 and 5 respectively.

The following table gives the distribution of electrified villages by their distance from the nearest town :—

TABLE NO. 10

S. No.	Distance from the nearest town (in kms.)	Total No. of villages	No. of villages with electric power supply
(1)	(2)	(3)	(4)
1.	5 and less	26	9(34.62)
2.	6—10	53	12(22.64)
3.	11—15	109	21(19.27)
4.	16—25	298	36(12.08)
5.	26—50	207	16(7.73)
6.	51—100	13	1(7.69)
	Total	@706	95(13.46)

Note :— 1. @ — Includes 26 uninhabited villages.
2. (Figures in brackets indicate percentage to total number of villages in each distance group)

Expectedly the distance from the nearest town is a factor of influence in the process of rural electrification. Villages nearer a town claim a larger share than those farther off.

Drinking Water Facilities :

Only 44 villages or 6.47% of the total inhabited villages of the district enjoy protected drinking water facilities, Beerwah tehsil being totally devoid of this amenity. Wells as a source of drinking water are uncommon. Only 5 villages, 4 in Ganderbal Tehsil and one in Srinagar Tehsil use well water. The rest of the villages use either spring water or nallah/river water for drinking purposes.

Communication :

It is interesting to find that most of the villages in the district are connected by roads of some kind, 272 villages or 40.00% of the total inhabited villages being connected with pucca roads and 364 villages or 53.53% with kutcha roads. There are only 44 villages which are still devoid of a road connection.

The following table gives the distribution of villages with different types of communication facilities by distance from the nearest town :—

TABLE NO. 11

S. No.	Distance from the nearest town (in kms.)	Total No. of villages	No. of villages connected by		
			Pucca Road	Kutcha Road	Pucca Road and River
(1)	(2)	(3)	(4)	(5)	(6)
1.	5 and less	26	18(69.23)	7(26.92)	..
2.	6—10	53	33(62.26)	14(26.42)	2(3.77)
3.	11—15	109	58(53.21)	46(42.20)	1(0.92)
4.	16—25	298	91(30.54)	172(57.72)	..
5.	26—50	207	58(28.02)	123(59.42)	..
6.	51—100	13	11(84.62)	2(15.38)	..
	Total	@706	269(38.10)	364(51.56)	3(0.42)

NOTE :—1. @—Includes 26 uninhabited villages.

2. (Figures in brackets indicate percentage to total number of villages in each distance group)

The table reveals that with increase in distance from a town, the proportion of villages connected with pucca roads decreases and conversely the proportion of villages with kutcha roads increases.

Post & Telegraph Facilities :

Post office facilities are available in only 71 villages or 10.44% of the total inhabited villages of the district, with Chadura and Beerwah tehsils enjoying comparatively better position, each having 19 villages provided with post offices. Only 4 villages in the district, one in each tehsil except Srinagar, have telephone as well as telegraph facilities.

The following table indicates the distribution of post offices per 100 sq. km.

TABLE NO. 12

S. No.	Name of Tehsil	Total village paper area (in sq. kms)	No. of post offices	No. of post offices per 100 sq. km.
(1)	(2)	(3)	(4)	(5)
1.	Ganderbal	264.1	13	4.92
2.	Srinagar	150.3	8	5.32
3.	Chadura	276.4	19	6.87
4.	Badgam	281.0	13	4.63
5.	Beerwah	219.9	19	8.64
	Total	1,191.7	72	6.04

It will be seen that in the rurality of the district, there are only 72 post offices which gives an average of 6.04 post offices per 100 sq. km. Chadura and Beerwah tehsils are well above the district average with a ratio of 6.87 and 8.64 post offices per 100 sq. km. The other three tehsils are below the district average, Badgam with a ratio of 4.63 post offices per 100 sq. km. stands at the bottom.

Staple Food :

Rice constitutes the main staple food of the district. More or less the same position obtains in the individual tehsils except that in Srinagar and Chadura tehsils wheat forms co-staple food and in Ganderbal and Badgam tehsils it is substituted by maize. This is evident from the following table :—

TABLE NO. 13

S. No.	Name of Tehsil	No. of villages reporting staple food					
		Rice	Wheat	Maize	Trumba	Barley	Grim
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Ganderbal	125	3	44	2	1	1
2.	Srinagar	59	50	8	..	..	..
3.	Chadura	135	68	36	..	..	..
4.	Badgam	175	7	52	..	..	..
5.	Beerwah	180	..	16	..	..	..
	Total	674	128	156	2	1	1

Land use :

Information on land utilization has been for the first time incorporated in the Village Directory. For this purpose, the total area of the village has been classified into five types viz; (1) Forest area; (2) irrigated land; (3) un-irrigated land; (4) culturable waste; and (5) area not available for cultivation.

The percentage of average cultivable waste land per village to average cultivated land per village by distance group from the nearest town has been brought out in the following table :—

TABLE NO. 14

S. No.	Distance from the nearest town (in kms.)	No. of villages	Total cultivated land (in acres)	Average cultivated land (in acres)	Total culturable waste (in acres)	Average culturable waste (in acres)	Percentage of culturable waste to cultivated land (in acres)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	5 and less	26	9,610	369.62	2,467	94.88	25.67
2.	6—10	*53	20,179	380.74	5,834	110.08	28.91
3.	11—15	109	24,862	228.09	5,648	51.82	22.72
4.	16—25	298	74,495	249.98	16,060	53.89	21.56
5.	26—50	207	59,688	288.35	12,283	59.34	20.58
6.	51—100	13	4,548	349.85	2,101	161.62	46.20
	Total	*706	1,93,382	273.91	44,393	62.88	22.96

NOTE :—* Includes the village Wonta Bhawan, the relevant details of which are not available.

Normally the average culturable waste should increase with increase in distance from the nearest town. This however, does not invariably hold good so far as Srinagar district is concerned. It of course holds good in the case of farthest category of villages where the proportion of culturable waste is the highest.

PRIMARY CENSUS ABSTRACT

As already mentioned, Primary Census Abstract constitutes part B of the publication. It is exclusively based on 1971 Census and provides information down to village and block/ward/ mohalla of a town on items such as area of the village in hectares and that of towns in square kilometres; number of residential houses; number of households; total population with sex-wise break-up; scheduled caste population; literate and educated persons; total working population and non-working population. The total working population has been classified into the following nine industrial categories with sex-wise break-up.

I) Cultivators

II) Agricultural Labourers

III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV) Mining and Quarrying

V) Manufacturing, Processing, Servicing and Repairs

a) Household Industry
b) Other than Household Industry

VI) Construction

VII) Trade and Commerce

VIII) Transport, Storage and Communications

IX) Other Services

The following abbreviations have been used in the Primary Census Abstract to facilitate presentation :—

1. Municipality : MC
2. Cantonment : Cantt.

	Urban	..	..	..	..	..	..

* Represents provisional "geographical area" figures supplied by the Surveyor General, India, figures for urban areas are those supplied by the Local Bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the tehsils will not tally with the district figures because the former represent "Land Use" area and are derived from the figures supplied by the Revenue Department.

Conversion factor 1 Acre = 0.40,469 Hectares and 100 Hectares = 1 Km^2

£ = See Appendix
