STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

A District Census Hand Book for each of the 20 Districts in Andhra Pradesh

PRINTED BY THE HYDERABAD BULLETIN PRESS, SECUNDERABAD FOR THE DIRECTOR OF PRINTING, HYDERABAD.

PREFACE

The District Census Handbook is an innovation introduced at the 1951 Census. The Handbooks are compiled by the Census Office but published by the State Government. They proved to be very popular and valuable publications in considerable demand by the public as well as the official users of the Census data. At the 1961 Census, therefore, it was decided not only to continue the publication of the District Census Handbook but to greatly improve upon its precursor of 1951.

The present District Census Handbook may be conveniently divided into four parts. The first part consists of a narrative description of the physical features and history of the district, the social and economic characteristics of the people and the progress made by the district in each field of administration over the past decades. This is supplemented by a gazetteer of places. The second part consists of adminstrative statistics of various departments. The third part is based mainly on the present Census returns and consists of statistical tables giving the particulars of population, sex ratio, the economic composition, literacy, language and migration data, etc. The fourth part consists of Village and Town Directory which is perhaps the vital part of the Handbook giving villagewise and townwise particulars of area, households, population, Scheduled Castes and Scheduled Tribes, literacy, broad categorisation of working population, etc. Against each village and town the educational, medical, public health and transport facilities, etc., if available, have also been indicated. At the end of the fourth part a tabular statement of fairs and festivals, information about which had been collected through the Census enumerators will also be found. The pages of each part are numbered separately. The Handbook is enriched with two district maps one showing the administrative divisions and important communications, rivers, etc., and the names of all important places of above 5,000 population and the other showing the talukwise density of population. In the Village Directory portion of the Handbook, before the statistics of each taluk are presented, a taluk map showing the village and town boundaries with the location code number of each village and town marked will also be found. Thus the District Census Handbook is a self-contained and convenient book of reference about almost all matters pertaining to the District.

The Handbooks are no doubt coming rather late, a few years after completion of the Census count. This delay, if at all it can be called delay, could not be helped. The very detailed sorting of Census slips and compilation of the elaborate 1961 Census tables were time consuming; the administrative particulars for incorporation in the Handbooks had to be collected from different departments and other sources on proformae that were finalised and circulated from this office; the preparation of the excellent maps of the district and the taluks, attempted this time, also required considerable time; and lastly the printing of these voluminous reports which had to be done very carefully was a laborious process. All the same it is hoped that these Handbooks will serve as valuable sources of reference about all matters pertaining to the district and help one to assess the impact of the Five Year Plans and the progress each district had made in its social and economic well being over the decades and also serve as a guide in planning for the future. The credit for the compilation of the Handbook goes chiefly to Shri K. M. Ahmed, I.A.S., and Shri P.S.R. Avadhany Deputy Superintendents of Census Operations. Shri Ahmad took great pains to tour the district, contact the various officers of the district and dig out information from various sources. A compilation of this type and magnitude could have taken a much longer time but for the diligent efforts of Shri Ahmad and Shri Avadhany. The Handbook Section of the Census Office under the Tabulation Officer Shri K. Narasimha Murthy, did a commendable work in the speedy and accurate compilation of the Village Directory and the other Statistical and Administrative tables. Sarvashri G. Pandurangam, M. Hassan, M. J. Sadiq of the Cartographic Section in my office did a magnificent work as will be evident from the quality of maps that have been produced.

A. CHANDRA SEKHAR

PART I

INTRODUCING THE DISTRICT

SRIKAKULAM DISTRICT

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

CHAPTER I

GENERAL DESCRIPTION

Situation and Physical Characteristics :

Srikakulam district is the northern-most part of Andhra Pradesh and lies between 18°20' and 19°10' of the northern latitude and 83°5' and 84°50' of the eastern longitude. It was carved out of Visakhapatnam district and constituted into a separate district in the year 1950. It is bounded on the north and west by Koraput and Ganjam districts of Orissa State, on the east by the Bay of Bengal and on the south by Visakhapatnam district. The district is shaped like a revolver with the "butt" situated in the south-west and the "muzzle" lying in the northeastern direction. The district may be divided into two natural regions, namely, the hilly region called the Agency area in the north-western part of the district and the plains portion which is mostly sandy on account of its proximity to the sea. The Eastern Ghats run roughly parallel to the sea from the north-east to the south-west and, therefore, this district drains from the Ghats to the sea. The area occupied by the district is 3,889.0 square miles and has a population of 2,340,878 persons with a density of 602 persons per square mile according to the 1961Census. There are altogether 3,246 inhabited villages, 300 uninhabited villages and 13 towns in the district. The district is divided into three Revenue divisions, ten taluks and one Independent Sub-taluk as shown below for purposes of Revenue administration. Portions the taluks of Parvathipuram, Palakonda and Salur constitute the Agency areas.

STATEMENT—I-1

Name of Revenue Division (1)	Names of the taluks in the Revenue Division (2)	Area in square miles (3)	Population as per 1961 Census (4)	Density per Sq. mile (5)	No. of villages (6)	No. of towns (7)
Srikakulam	Srikakulam	227.3	217,993	959	213	1
	Cheepurupalle	461.7	318,321	689	322	1
	Narasannapet	200.0	166,233	831	168	1
Tekkali	Tekkali	272.0	189,984	698	379	1
	Sompeta	212.0	140,941	665	339	2
	Ichchapuram (IST)	87.0	87,283	1,003	50	1
	Pathapatnam	463.0	226,674	490	491	...
Parvathipuram	Parvathipuram					
	Agency :	294.0	43,555	148	270	...
	Plains :	296.0	174,916	591	222	1
	Palakonda *Agency* :	146.0	20,060	137	107	...
	Palakonda *Plains* :	348.0	304,586	875	337	3
	Salur *Agency* :	69.0	7,733	112	141	...
	Salur *Plains* :	422.0	156,392	371	254	1
	Bobbili	391.0	286,207	732	253	1

All the taluks except the Ichchapuram Independent Sub-Taluk are incharge of Tahsildars. The Ichchapuram Independent Sub-Taluk is incharge of an Independent Deputy Tahsildar.

Rivers :

The chief rivers in the district are Nagavalli, Vamsadhara, Suvarnamukhi, Vegavathi, Mahendratanaya, Gomukhi, Champavathi, Bahuda and Kumbikotagedda. The Vamsadhara river rises in the Eastern Ghats in Orissa State and enters this district in Pathapatnam taluk and flows between Narasannapet and Srikakulam taluks and finally falls into the Bay of Bengal. The Nagavalli also rises in the Eastern Ghats in Orissa State and enters the district in Parvathipuram taluk. After flowing through Palakonda taluk the river forms the boundary between Srikakulam and Cheepurupalle taluks. In the lower reaches it is called Langulya. The Suvarnamukhi river which also rises in the Eastern Ghats enters the district in the north-western part of Salur taluk and after flowing across Salur and Bobbili taluks joins Nagavalli at Sangam village in Palakonda taluk. River Vegavathi rising in Pachipenta hills of Salur taluk flows from east to west and joins Suvarnamukhi river at Patuvardhanam village of Bobbili taluk. Gomukhi river after flowing across Salur taluk joins Suvarnamukhi river at Sirlam village of Salur taluk. Mahendratanaya a tributary of Vamsadhara rises in Eastern Ghats and after flowing through Sompeta and Pathapatnam taluks joins Vamsadhara river at Komanapalle village in Pathapatnam taluk. River Bahuda rising in the Eastern Ghats in Orissa enters this district at Sasanam village of Ichchapuram Independent Sub-Taluk and after flowing across this taluk falls into the Bay of Bengal. River Champavathi after flowing across Salur taluk enters into Vizianagaram taluk of Visakhapatnam district. The Nagavalli assisted by its tributaries provides irrigation for major parts of Palakonda and Srikakulam taluks and some extent of Parvathipuram taluk. The Vamsadhara irrigates large extents in Pathapatnam and Srikakulam taluks. Bahuda river irrigates considerable extents in Ichchapuram Independent Sub-Taluk.

Climate :

The climate varies considerably in the different parts of the district. April to June are the warmest months. The climate is moderate in Ichchapuram, Sompeta and Srikakulam taluks. In other taluks the summer is hot and winter is cold. The coastal taluks have a humid atmosphere. The highest and the lowest temperatures recorded at the Calingapatnam station in this district from 1951 to 1960 monthwise is given under Administrative Statistics in Part II of this book and may be referred to.

Rainfall :

The district gets the benefit of both the north-east and the south-west monsoons. The average annual rainfall of the district is 1,086.9 mm. Most of the rainfall is received during the south-west monsoon period (June to September). Moderate rainfall is received during the north-east monsoon period (October to December). During the last ten years the district received more than the average rainfall in the years 1953-54 to 1958-59 and just the average in the year 1951-52, 1959-60 and 1960-61. The following statement furnishes the seasonal rainfall particulars from 1950-51 to 1960-61 with percentage variation from normal rainfall for each year.

STATEMENT 1-2

RAINFALL

(*in millimetres*)

Year	South-west Monsoon period (June to September)	North-East Monsoon period (October to December)	Winter period (January to March)	Hot weather period (April to June)	Total annual rainfall	Percentage variation from the normal

1960-61	787.5	147.1	40.6	91.4	1,066.6	(—) 2

Soils :

The soils in this district belong chiefly to the regar or black cotton and red ferruginous series. Near the hills the red varieties are predominant but towards the coast the soil becomes finer and in the richest valleys there is fertile clay with a tendency to crack on drying. Valuable food crops such as paddy, sugarcane, ragi, bajra and other cereals are cultivated mainly in black loams. In black clay, jowar and redgram are generally raised. In mud loam, gingelly, ragi, bajra, jowar, horsegram and greengram are grown extensively and paddy and sugarcane to some extent. Pulses, groundnut, sweet potatoes and chillies are grown in sandy soils.

Land utilisation :

The district is predominantly agricultural in character. About 43.1% of the total population in the district are working as Cultivators and Agricultural labourers. According to 1961 Census results 1,010,529 persons are engaged in agricultural occupations. Paddy is the chief food crop grown in this district. Groundnut, sugarcane and chillies are the chief commercial crops. About 83% of the total area sown in the district is under food crops and these largely depend upon the rainfall. During the south-west monsoon paddy, which covers about 51% of the total cropped area, is sown. The tillage operations are completed in April and May and raising of crops like paddy, ragi, sugarcane, groundnut, jowar, bajra, mesta and small millets are begun. The sowing operations of paddy are completed by August in irrigated lands. The north-east monsoon is useful for augmenting supplies to irrigated crops like paddy and sugarcane. Due to close proximity to the hills which are covered with fairly thick forests the irrigation sources receive a good supply of water during the rainy season. The chief irrigation sources in this district as already stated above, are the Nagavalli or the Langulya, Vamsadhara and Bahuda rivers. There are also several minor irrigation tanks in the district serving as sources of irrigation. The land utilisation statistics of the district from 1950-51 to 1960-61 are furnished hereunder :

The above statement gives the classification of the geographical area under different categories of utilisation in the district for the years from 1950-51 to 1960-61. Percentage of area under each classification to the total area has also been shown for the years 1950-51, 1955-56 and 1960-61 i.e., the year before the commencement of the Five Year Plans, at the end of the First Five Year Plan and the Second Five Year Plan for obtaining a comparative idea in the pattern of land utilisation before and after the implementation of the First and the Second Five Year Plans. The net area sown under all crops during 1960-61 forms 41% of the district area. Forests account for 17.4% of the district area while unculturable land covers 7.1% of the district area. The area put to non-agricultural purposes such as roads, buildings etc., constitute 4.9% of the district area. The total fallow land during 1960-61 accounts for 6.9% of the district area of which current fallows (i.e., land left fallow in the current year only) constitute 2.2% and the other fallows (i.e., land left fallow for more than one year but less than five years) account for 4.7%. Cultivable waste land (i.e., land left fallow for more than five years) accounts for 7.1%. Permanent pastures during 1960-61 account for 3.7% of the district area while land under miscellaneous tree crops and groves accounts for 1.0%. The net area under cultivation has increased from 8,28,311 acres in 1950-51 to 9,24,864 acres in 1955-56 and to 10,26,312 acres in 1960-61.

Livestock :

In agricultural economy livestock plays an important role. The number of livestock and poultry in the district as per the quinquennial Census taken in 1961 is given below. There has been an appreciable increase in the number of poultry.

Cattle	250,022
Buffaloes	209,773
Sheep	341,408
Goats	184,792
Horses and Ponies	6,390
Donkeys	53
Pigs	56,009
Others	6
Total Livestock	1,553,626
Total poultry	11,84,083

Flora :

The forests of this district are almost entirely deciduous, extremely irregular and open, varying considerably in condition, composition and density of the crop. Sal occurs in mixture with the other species, the percentage of Sal varying very widely. For details as regards the other species obtained in these forests, the Chapter on Forests may be referred to.

Pole forests occur in Chinnagora and portions of Burankonda reserves of Palakonda range. Fuel forests which cover most of the district lie at the foot of the hills and lower slopes. Bamboo forests exist in all the ranges. Teak is very rare. Under the Five Year Plan schemes efforts are being made to raise teak, cashew, eucalyptus and casuarina.

Communications :

The district has a net work of roads in the plains portion. The National Highway from Madras to Calcutta passes through Cheepurupalle, Srikakulam, Narasannapet, Tekkali, Sompeta and Ichchapuram taluks of this district. Roads from this district lead to Visakhapatnam district and the adjoining State of Orissa. Madras-Calcutta Broad Gauge line of the South Eastern Railway traverses the taluks of Cheepurupalle, Srikakulam, Narasannapet, Tekkali, Sompeta and Ichchapuram taluks. The district has also 21 miles of Narrow Gauge line which takes off from Naupada in Tekkali taluk and proceeds to Parlakimidi and Gunpur in Orissa State via Pathapatnam. A Broad Gauge line from Vizianagaram to Raipur traverses this district through Bobbili and Parvathipuram taluks with a branch line to Salur from Bobbili. The nearest Railway Station to Srikakulam, the district headquarters, is Srikakulam Road on Madras-Calcutta Broad Gauge line. The district is well served as regards postal facilities. The district has a minor sea port at Calingapatnam.

Geology:

A brief account of the Geology and Mineral Resources of Srikakulam district furnished by the Officers of the Geological Survey of India, Andhra Pradesh circle is reproduced below.

The Srikakulam district is constituted of rocks of Archaean ages comprising granites and charnockites which had been intruded into the highly folded and metamorphosed sedimentary rocks represented by khondalite series. The district forms a part of the stable shield of Peninsula where the intense erogenic activity and igneous intrusions were confined to Archean Era. These are overlain by laterite and alluvial soils of recent age.

From the point of distribution of various rock types, the district could be divided into two parts (1) the coastal plain on the eastern and southern parts, covered with soil and alluvium dotted with isolated hills; (2) hilly country forming part of the Eastern Ghats covered with forest on the northern and western parts. The Agency areas of Salur, Parvathipuram, Palakonda taluk and Patapatnam taluk constitute the western and northern rough terrain of the district. Parts of the district were mapped about 40 years ago. The manganese-belt in Cheepurupalle, Bobbili and Salur taluks and parts of Parvatipuram taluk have been mapped in recent years.

The chief rock types occuring in the district may be grouped as follows:

Alluvium and soils

Laterite

Pegmatite and quartz veins

Granitic rocks—granitic gneisses, porphyritic granitic gneisses and massive granites;

Charnokitic Series—Basic, intermediate and acid types

Khondalite Series—Garnet-sillimanite-gneisses, garnetiferous quartzites, quartzites, calc-granulites and gneisses.

The above rock types occur as parallel bands with regional strike of foliation in the direction of north east-south-west with steep dips and show signs of severe disturbance.

Geology of Northern and Western parts: The rugged hills in this area are constituted of the above rock types, in various stages of weathering and mostly covered by thick forests. A brief description of each rock type is given below :

Khondalite Series: Garnet-sillimanite-gneiss is the predominant type. It is generally weathered and the hill slopes are covered with the talus of this rock. When fresh, the rock is light grey and often pink in colour with fine banding. The main minerals are quartz, felspar with garnet, sillimanite graphite as accessories. The felspar and garnet are invariably altered. Sillimanite occurs as fine needles.

The strike of foliation varies from place to place due to folding; in the western part it is generally in the direction of north-east south-west to north-south with steep easterly or westerly dips. In the northern part, it varies from west-north-west east-south-east to north-west south-east. Narrow bands of garnetiferous quartzites and calc-gneisses are associated with the above gneisses.

Fine gneisses with varying amounts of garnet, biotite and pyroxene form the major rock type constituting the massive hill ranges in the area. The rock is highly jointed, the joints parallel to foliation being most prominent. The rock weathers into huge spheroidal boulders and forms steep cliffs. The rock is hard, compact and light grey in colour.

Charnockite: This rock occurs as narrow bands within the above gneisses in the western part. It is black, very hard and compact. The mineral composition varies in the acid, intermediate and basic varieties. The rocks are characterised by the presence of hypersthene; grey quartz and felspar are found in acid and intermediate varieties. Augite and hornblende are present in basic varieties. Garnet is common in all the types. In the northern part, the acid varieties are common and vary in texture. By a gradual inclusion of more and more rhombic pyroxene, the acid varieties give place to basic varieties.

Porphyritic gneissic granite:—The rock, when fresh, is grey and greyish white in colour, hard and compact. It is porphyritic, the phenocrysts of felspar being 6 to 8 cms in length. In addition to quartz and felspar, biotite and garnet are present invariably, zircon, apatite, magnetite and occasionally allanite and monazite are the associate minerals. Xenoliths of other rocks are seen in this formation.

Quartz veins and pegmatite: A number of veins and stringers of quartz and pegmatite traverse the above formations at numerous places. The quartz is massive and crushed and is white in colour. At a few places mica is developed in the pegmatite but is not of economic importance.

Geology of southern and eastern parts:—The area includes the low lying areas of Bobbili, Salur, Parvathipuram, Palakonda and Patapatnam taluks and the remaining taluks. Most of the area is covered by ferruginous soil and sandy soil with isolated hills projecting from the plains.

The main rock types belong to the (i) Khondalitic suite and (ii) Gneissic granites.

The manganese belt in the district (in parts of Salur, Bobbili and Cheepurupalle taluks) has been mapped in detail in recent years. The various rock types occurring in the area are quartzites, garnet granulites, calc-granulites, crystalline limestones, garnet-sillimanite-gneisses, porphyroblastic charnockitic gneisses, biotite gneisses, granite gneisses, intrusive orthogneisses and granites.

Garnet-sillimanite-gneisses are distributed over the area and constitute some of the hills. They vary in composition from garnet-sillimanite-gneisses and granitic gneisses to garnet-sillimanite-quartzites and felspathic quartzites.

Quartzites, garnet-granulites, crystalline limestones and calc-granulites occur as lenticular bands within the above gneisses.

Charnockitic gneisses, granite and granitic gneisses occupy the low lying areas. Xenoliths of garnet-sillimanite-gneisses and biotite-gneisses are common. Felspathisation of sillimanite-gneiss at the contact of these gneisses is seen. Lithomarges and weathered garnet-gneisses are seen in most of the manganese quarries of the area. A large number of pegmatite and quartz veins are found within the lithomarge and weathered garnet-gneisses and associated ore bodies.

The regional strike of the rocks is north-west south-east to north north-west south south-east changing to north-east south-west further west. The foliation is parallel to bedding contacts. The dips vary from 40° to 80°, the average being about 60° towards north-east or south-west. The dips indicate series of parallel folds, those axes are parallel to north-west south-east. Major faults are common, adjoining manganese ore deposits trending west north-west east south-east to north-west south-east.

Soils:

No detailed and precise information is available on the soils of the district. The gneisses of the area give rise to both red ferruginous soils and sandy soils and the distribution is very irregular, In general the hill peaks and slopes are covered with loose talus of the different gneisses, especially weathered khondalites (sillimanite-gneisses). Below the talus occurs a thin and gritty red soil cover which is very fertile and promotes good forests and crops. The narrow valleys and low lying areas between the hills are also covered with this brown ferruginous soil (red) and support good vegetation. The red soils are generally

deficient in humus, lime, magnesia, alkalies, nitrogen and phosphorous.

In the low lying tracts on the southern and eastern parts, the soil is sandy altering to loam and silty at places. Nodular kankar patches are common in this soil. The thickness of soil cover varies from place to place between 1 and 5 metres. This soil is very fertile and is intensively cultivated.

The soil near the river courses and near the coast is more sandy varying from fine to very coarse in size. Mineralogically it is made up of quartz, felspar, garnet, ilmenite, sillimanite. Occasionally zircon and monazite are also present. Thin patches of concentrations of the different minerals like garnet and ilmenite are found at places.

Minerals :

Manganese ore : Manganese ore is being mined in the district for the last 100 years. Most of the important deposits are situated in Cheepurupalle taluk. Next in importance are the deposits in Bobbili and Salur taluks. Some of the areas in the western and southern parts of Salur taluk have been prospected in recent years and since the ore is of poor quality and high in phosphorous, the deposits are not being worked at present.

CHEEPURUPALLE AREA :—The manganese ore deposits are confined to four mica belts trending north west south-east to east and west; (1) The southernmost belt comprising the quarries at Chinabantupalle (18° 21' : 83° 29'), Garividi (18° 16' : 83° 32'), Kodur (18° 17' : 83° 33'), Duvvam (18° 16' : 83° 33') and Devada (18° 15' : 83° 34'); (2) the south central belt comprising the quarries of Garbham (18° 22' : 83° 27'), Vedullavalasa (18° 21' : 83° 31'), Avagudem (18° 21' : 83° 03'), Cheepurupalle (18° 24' : 83° 37') and Perapi (18° 16' : 83° 37'); (3) the north central belt comprising the quarries of Aitemvalasa (18° 23' : 83° 34'), Gadabavalasa (18° 22' : 83° 35'), Bondapalle (18° 23' : 83° 36') and Bathuva (18° 28' : 83° 38') and (4) the northern most belt comprising the quarries of Gotnadi (18° 24' : 83° 36'), Garuja (18° 24' . 83° 37'), Sarveswarapuram (18° 23' : 83° 37') and Joda.

The ore deposits are of pyrolusite-psilomeane oxides and were derived from supergene oxidation. General grade of ore is low in manganese and quite high in iron and phosphorous. The probable reserves upto a depth of 50 feet in this area are about 200,000 tons.

The important mining areas are (i) Kodur-Devada area (ii) Sivaram-Lakshmipuram (18° 17' : 83° 33' - 18° 16' : 83° 36'), (iii) Perapi (18° 16' : 83° 37'), (iv) Pedda Madipalle - Palavasala (18° 15' : 83° 38'), (18° 15' : 83° 29'), (v) Nimmalavalasa (18° 18' : 83° 40'), (vi) Karlam, (vii) Cheepurupalle, (viii) Baguvalasa, (ix) Avagudam, (x) Vedullavalasa, (xi) Aitemvalsa, (xii) Gadabavalasa, (xiii) Bonda palle, (18° 22' : 83° 35' 30") and (xiv) Bathuva 18° 28' : 83° 38').

Present day mining operations are mainly confined to Kodur-Devada area, which has produced about 1.5 million tons from 1948–1957 (both from reefs and dumps). Average analysis of ore from this belt shows Mn 34.34%; Fe 11.20%; Sio 10.22%, P 0.241%.

Further west and north-west, the important deposits are those at Chinna Bantupalle (18° 21' : 83° 28), Garbham (18° 22' : 83° 27'), Kottakarra (18° 23' : 83° 29'), Budrayavalasa (18° 24' : 83° 28') and Bangaruvalasa (18° 29' : 83° 19'). The ore occurs in three stratigraphic horizons (i) at one or two stratigraphic positions within the quartzites (ii) at the base of calc-gneisses and (iii) at the top of the calc-gneisses.

About 14,000 tons of ore was produced within the last few years from China Bantupalle area. The Garbham quarry has reached a depth of about 43 metres : bottom portion is filled up with water. During the period 1948-1957 about 48,000 tons were produced from the reef and 133,000 from the dumps. During last three years about 15,000 tons were produced from dumps. Manganese content in the dump ore varies from 34% to 42%. From the other minor quarries about 5,000 tons were produced within the recent years. Quality varies from 33% to 38% Mn.

About 16,000 tons were taken out from Kottakarra-Budrayavalasa group of mines; percentage of manganese is 38. About 30,000 tons from Bangaruvalasa group were produced for the last 8 years.

SALUR AREA :—The following is a list of the important localities where work was carried out for some time. Most of the deposits are not being worked at present.

Locality	*Estimated reserves*	*Quality*
Chikkapara (18° 31' : 83° 13')	50,000 tons	Mn- about 25% P - 0.326%

Locality	*Estimated reserves*	*Quality*
Eguva Mandangi (18° 40′ : 83° 8′)	Not estimated	Mn – 40.82 (picked sample) Generally poor ore
Diguva Mendangi (18° 39′ : 83° 8′)	Not estimated	Mn – 33.7%
Konda Mosuru (18° 23′ : 83° 9′)	Not estimated	Reported poor
Gaurangavalasa (18° 24′ : 83° 13′)	Not estimated	Reported analysis Mn – 30.60% Fe – 2–14% Silica– 3-18%

Graphite :—Graphite was mined at the following places for some time but work is stopped at present. Some of the deposits may need further study and exploitation of the mineral may be possible.

Locality	*Quality*
Dolemba (18° 41′ : 83° 5′)	Fixed carbon . 73.92% Ash . 22.64%
Totadi konda (18° 28′ : 83° 15′)	Not known...Large flakes within schist
Chimlipalle (18° 15′ : 83° 5′)	Reported graphite content 60 to 80%
Konda Mosuru (18° 23′ : 83° 9′)	Not exactly known

A number of minor occurrences are known in southern part of Salur taluk.

Mica :—Mica occurs at a few places in the district. Prospecting has been carrried out in various parts of the district but no economic deposits have been located. The mica is of ruby quality but mostly crushed and spotted and the size varies from 0.5 sq. inch to 1.5 sq. inches. Prospecting was undertaken in the neighbourhood of Kurpam (18° 52′ : 83° 33′), Pachipenta (18° 29′ : 83° 7′), Sankarparti (18° 21′ : 83° 6′) Konda Kengua (18° 27′ : 83° 16′), Konda Mosuru (18° 23′ : 83° 9′) and other places.

CHAPTER II

HISTORY

This district originally formed part of the ancient Kingdom of Kalinga which is supposed to have been founded in the 9th century B.C. The name of Kalinga still survives in the sea side village of Kalingapatnam not far from Srikakulam and in early times a place of importance. Kalinga was for many centuries the citadel of Buddhism in India. The good relations of Kalinga with Ceylon were also kept up for many centuries and in 275 A. D. the celebrated tooth of Buddha was said to have been obtained by the king of Ceylon and shifted to Kandy, a place in Ceylon.

In 260 B.C. King Asoka attacked and conquered Kalinga. One of the famous rock edicts shows clearly that it was the remorse that he had felt for the horrors of this campaign which led him in the same year to espouse the Buddhist religion which he afterwards spread throughout India and Ceylon. The edict states that about 150 thousand persons were carried away captive from Kalinga, 100 thousand were slain and many times that number perished. Some of the terms of this inscription show that Kalinga at that time was quite capable of offering considerable resistance even to such a powerful emperor as Asoka, and that its people were a civilized race. For several centuries after this the history of Kalinga was quite obscure. Inscriptions, however, show that in the 6th century A.D. Kalinga was conquered by the Chalukyas of Badami and in the 7th century by their off-shoot the Eastern Chalukyas. The result of this latter campaign was the establishment of the Vengi Kingdom (the ruins of the capital can be found six miles north of Eluru) under the Eastern Chalukya King Vishnu Vardhana I (615-33 A.D.). Copper grants of this monarch found at Cheepurupalle show that he once ruled this tract.

The chronicles are continued by the grants of a series of kings who describe themselves as of the Ganga family, Lords of Kalinga, and worshippers of the Gokarnaswami (Siva) on the Mahendragiri hill and as ruling from Kalinganagara, which has been identified with Mukhalingam on the banks of the Vamsadhara, where notable temples and inscriptions have survived.

The Eastern Chalukyas of Vengi appear to have constantly interfered in the affairs of Kalinga, and Vimaladitya of that line seems to have conquered much of it, since an inscription on Mahendragiri states that the Chola king Rajaraja I of Tanjore overthrew him in 999-1000 and set up a pillar of victory on that hill.

The Gangas were followed by a later line of the same name who, as they also worshipped the Gokarnaswami on Mahendragiri and ruled from Kalinganagara, were apparently of the same family. Calculations from dates in copper grants show that they were in power from the end of the 9th century. One of them, Rajaraja, ascended the throne in 1070-71 and reigned eight years, during which time he is said to have helped the Vengi kings against the Cholas, and afterwards defeated both of them and also the ruler of Utkala (Orissa) and other monarchs. Under his son, Anantavaraman-Choda-Ganga, who ruled from 1078 for about 72 years, this family reached the zenith of its power. Many copper grants and inscriptions of this monarch have been found and these state that he replaced on their thrones the fallen kings of Vengi and Orissa, engaged in wars extending from the Ganges in the north to the Godavari in the south and built the famous temple of Jagannath at Puri. He married at least five times and had by them four sons who ruled after him. The country eventually fell to the Eastern Chalukyas of Vengi and their feudatories. The Yadavas of Devagiri (Daulatabad) and the Kakatiyas of Warangal also claim to have humbled Kalinga at this period.

The Simhachalam temple in Visakhapatnam district contains inscriptions of several of the later Ganga kings but few details regarding them survive. Their power was on the wane. Narasimha I and two of his successors are said to have resisted attacks from the Muslim kings of Bengal and Delhi. The Reddy kings of Kondavidu in Guntur district are also said to have penetrated into this kingdom. On the death of Ganga king Banudeva IV his Minister usurped the throne and in 1434-35 founded the Gajapati dynasty under the title Pratapa Kapileswara with his capital at Cuttack. He started expanding his dominions until they extended from the river Ganges to the river

Krishna. His whole reign was spent in warring with the Hindu kings of Vijayanagar who by then were powerful in the south and with the Muslim Bahmani dynasty of the Deccan. His son, Purushottama reigned from 1469 to 1497. His successor was Prataparudra. He is said to have had reverses at the hands of the Vijayanagar king, Krishna Devaraya. The latter seized Udayagiri in Nellore, Kondavidu and Kondapalli in Krishna, Rajahmundry and other fortresses and finally halted at Simhachalam. The Simhachalam temple still contains inscriptions recounting successes and relating how he and his queens presented the God with a necklace of 991 pearls and other costly gifts.

About the end of the 15th century the Bahmani Kingdom split up into several smaller States such as Bijapur A.D. 1489, Ahmednagar 1490, and Bidar 1498. In 1512 the Kingdom of Golconda was founded by Sultan Kutub Shah, said to have been a native of Persia. The latter was so successful that at the end of a long reign he left a territory extending from the river Godavari to beyond the river Krishna and from the sea to a line drawn west of Hyderabad about the 78th degree of east longitude. In 1520 Sultan Kutub Shah defeated the forces of the Hindu chiefs of the Telangana at Kondapalli and there is reason to suppose that Prataparudra was one of the chiefs who suffered discomfiture. In 1571 Ibrahim, the 4th monarch of the Kutub Shahi dynasty, taking advantage of the disturbed conditions of Orissa, made himself master of the Godavari and other districts as far north as Srikakulam. For about 180 years since then this tract which also included the Ichchapur area then known by the name of the 'Chicacole Circar' was controlled more or less directly by the Muslim authority from Hyderabad.

The principal seat of Government was at Srikakulam where the Faujdar or deputy of the Subha resided, while a Sub-Governor or Naib resided at Ichchapur. The revenues of the country were collected by these two Muslim officers and remitted to the seat of Government at Hyderabad. In the year 1641 Abdullah Kutub Shah sent Sher Mohammed Khan from Hyderabad to Srikakulam to rule over the dependencies north of the Krishna river. Sher Mohammed Khan during his period built a fine mosque at Srikakulam. In 1687 the Kutub Shahi dynasty came to an end when Aurangazeb, the Moghul Emperor, marched down to reduce the south to obedience and had wiped out the kingdom of Golconda and brought the whole country under his direct control. He appointed to the charge of it an officer called the Subadar of the Deccan under whom were a number of local subordinates in control of the various smaller divisions of territory. The five northern circars of Guntur. Kondapalli, Eluru, Rajahmundry and Chicacole had Masulipatam for their chief town, and the northern most of them, Chicacole continued to be ruled in the same manner as before by a Faujdar residing in that town.

Aurangazeb died in 1707 and his death was followed by great disorder in his southern possessions. In 1724 the Subadar of the Deccan though still continuing nominally subject to the authority of Delhi made himself virtually independent and began appointing his own officers. His first Faujdar of Srikakulam was Anwar-ud-din who afterwards became very famous in the wars of the Carnatic and subsequently came to be known as the Nawab of Carnatic and is the ancestor of the Prince of Arcot. His firm but kindly rule was gratefully remembered for many years afterwards.

This Subadar of the Deccan died in 1748 whereupon the French and the English took opposite sides in the disputed succession which followed. Eventually a French protege, Salabat Jung, secured the post of Subadar and Bussy, the French General, obtained from him in 1753 the four Northern Circars (excluding Guntur) for the support of his troops. Masulipatam and the country adjacent had been already ceded to the French in 1750; and Bussy sent M. Moracin, the French officer with instructions to take possession of the new acquisitions.

The Faujdar of Srikakulam, Jafar Ali, was exrtemely disinclined to give up his charge to the French and he persuaded Gajapati Viziarama Raju, head of the Vijayanagar family and the most powerful of the local renter-chieftains, who had come into being during the Muslim rule, to join him in opposing Moracin's entry. The latter, however, seduced Viziarama Raju from this compact by promising to lease him the Rajahmundry and Srikakulam Circars at a rate much below their value. Finding himself deserted, Jafar Ali called in the help of the Maharattas of Nagpur, who crossed the hills, devastated the two Circars, plundered and burnt the Dutch factory at Bheemunipatnam, defeated Viziarama Raju near Vijayanagar; faught an irregular action against the combined forces of that chief and M. Moracin at Tummapala near Anakapalle; and after few adventures returned home with immense booty. Having

secured the loot the Maharatthas troubled no further about Jafar Ali's aspiration, whereupon that gentleman was obliged to submit.

In July, 1754 Bussy went in person to Masulipatam and Rajahmundry, settled affairs in the Circars and appointed Ibrahim Khan as the Faujdar of Srikakulam. Soon afterwards, however, relations between him and the Subadar of the Deccan became strained, at last an open rupture occured, and for several weeks in the summer of 1756 Bussy was obliged to entrench himself against attack near Hyderabad. The authorities at Madras were only prevented from joining the Subadar against him by the necessity of sending every available man to Bengal. Further Bussy's officers in Circars including Ibrahim Khan disavowed his authority and refused to pay their tribute. Viziarama Raju was the only man who stood by Bussy. He ordered his agents at Hyderabad to assure M. Bussy of his fidelity and the regular payment of his tributes.

Bussy was eventually relieved by reinforcements from Masulipatam and was received back into the Subadar's favour; and at the end of 1756 he marched into the Circars to restore his fallen authority. Ibrahim Khan fled in terror at his approach. But Viziarama Raju, confident in the proofs of attachment he had given, went to meet him with a body of troops, belonging to him and others of the local chiefs, which numbered 10,000 men. Taking advantage of the support of Bussy he persuaded the latter to attack his bitterest enemy, the chief of Bobbili. Bussy proposed to Bobbili that he should leave his fort and receive instead other land of greater extent and value in another part of the province, but the suggestion was received as an insult. Soon afterwards one of Bussy's detachments was cut off in the woods of Bobbili and in his anger the general determined to expel that chief and all his family. The result was "one of the most ghastly stories which even Indian History has to record." Orme's description is as follows :

"The province of Chicacole has few extensive plains, and its hills increase in frequency and magnitude, as they approach the vast range of mountains that bound this, and the province of Rajahmundrum, to the north-west. The hills, and the narrower bottoms which separate them, are suffered to over-run with wood, as the best protection to the opener valleys alloted for cultivation. The Polygar (chieftain), besides his other towns and forts, has always one situated in the most difficult part of his country, which is intended as the last refuge for himself and all of his own blood. The singular construction of this fort is adequate to all the intentions of defence amongst a people unused to cannon, or other means of battery. Its outline is a regular square, which rarely exceeds 200 yards; a large round tower is raised at each of the angles, and a square projection in the middle of each of the sides. The height of the wall is 22 feet, but of the rampart within only 12, which is likewise its breadth at top, although it is laid much broader at bottom; the whole is of tempered clay, raised in distinct layers, of which each is left exposed to the sun, until thoroughly hardened, before the next is applied. The parapet rises 10 feet above the rampart, and is only three feet thick. It is indented five feet down from the top in interstices six inches wide, which are three or four feet as under. A foot above the bottom of these interstices and battlements, runs a line of round holes, another two feet lower, and a third within two feet of the rampart. These holes are, as usual, formed with pipes of baked clay; they serve for the employment of fire-arms, arrows, and lances; and the interstices for the freer use of all these arms, instead of loop-holes, which cannot be inserted or cut in the clay. The towers, and the square projections in the middle, have the same parapet as the rest of the wall; and in two of the projections, on opposite sides of the fort, are gateways, of which the entrance is not in the front, but on one side, from whence it continues through half the mass, and then turns by a right angle into the place; and, on any alarm, the whole passage is choked up with trees, and the outside surrounded to some distance with a thick bed of strong brambles. The rampart and parapet are covered by a shed of strong thatch, supported by posts; the eaves of this shed project over the battlements, but fall so near, that a man can scarcely sqeeze his body between; this shed is shelter both to the rampart and guards against the sun and rain. An area of 500 yards, or more, in every direction round the fort, is preserved clear, of which the circumference joins the high wood, which is kept thick, three, four or five miles in breadth around this centre. Few of these forts permit more than one path through the wood. The entrance of the path from without is defended by a wall, exactly similar in construction and strength to one of the sides of the fort; having its round towers at the ends, and the square projection with its gateway in the middle. From natural sagacity they never raise this redoubt on the edge of the wood; but at the bottom of a recess, cleared on purpose, and on each side of the

recess, raise breast-works of earth or hedge, to gall the approach. The path admits only three men abreast, winds continually, is everywhere commanded by breast-works in the thicket, and has in its course several redoubts, similar to that of the entrance, and like that flanked by breast-works on each hand. Such were the defences of Bobbili; against which Mr. Bussy marched, with 750 Europeans, of whom 250 were horse, four field pieces and 11,000 peons and Sepoys, the army of Viziarama Raju, who commanded them in person.

Whilst the field-pieces plied the parapet of the first redoubt at the entrance of the wood, detachments entered into the side of the recess with fire and hatchet, and began to make a way, which tended to bring them in the rear of the redoubt; and the guard, as soon as convinced of their danger, abandoned their station, and joined those in the posts behind; the same operations continued through the whole path, which was five miles in length, and with the same success, although not without loss. When in sight of the fort, Mr. Bussy divided his troops into four divisions, allotting one, with the field-piece, to the attack of each of the towers. Ranga Rao was here, with all his parentage, 250 men bearing arms, and nearly twice this number of women and children.

The attack commenced at daybreak, on the 24th January, 1757, with the field-pieces against the four towers; and the defenders, lest fire might catch the thatch of the rampart, had pulled it down. By nine O' Clock, several of the battlements were broken, when all the leading parties of the four divisions advanced at the same time with scaling ladders; but, after much endeavour for an hour, not a man had been able to get over the parapet; and many had fallen wounded; other parties followed with as little success, until all were so fatigued, that a cessation was ordered, during which the field-pieces, having beaten down more of the parapet, gave the second attack more advantage; but the ardour of the defence increased with the danger. The garrison fought with the indignant ferocity of wild beasts defending their dens and families. Several of them stood, as in defiance, on the top of the battlements, and endeavoured to grapple with the first ascendants, hoping with them to twist the ladders down; and this failing, stabbed with their lances, but being wholly exposed themselves, were easily shot by aim from the rear of the escalade. The assailants admired, for no European had ever seen such excess of courage in the natives of Indostan, and continually offered quarter, which was always answered by the menace and intention of death not a man had gained the rampart at two O'clock in the afternoon, when another cessation of the attack ensured; on which Ranga Rao assembled the principal men, told them that there were no hopes of maintaining the fort, and that it was immediately necessary to preserve their wives and children from the violation of Europeans, and the more ignominious authority of Viziarama Raju. A number called without distinction were alloted to the work; they proceeded, every man with a torch, his lance, and poignard, to the habitations in the middle of the fort to which they set fire indiscriminately, plying the flame with straw prepared with pitch and brimstone, and every man stabbed without remorse, the woman or child, whichsoever attempted to escape the flame and suffocation. Not the helpless infant, clinging to the bosom of its mother, saved the life of either from the hand of the husband and father. The utmost excesses whether of revenge or rage, were exceeded by the atrocious prejudices which dictated and performed this horrible sacrifice. The massacre being finished, those who accomplished it returned, like men agitated by the furies, to die themselves on the walls. Mr. Law, who commanded one of the divisions, observed, whilst looking at the conflagration, that the number of the defenders was considerably diminished, and advanced again to the attack. After several ladders had failed, a few grenadiers got over the parapet, and maintained their footing in the tower until more secured the possession. Ranga Rao hastening to the defence of the tower, was in this instant killed by a musket-ball. His fall increased, if possible, the desperation of his friends; who, crowding to revenge his death, left the other parts of the ramparts bare; and the other divisions of the French troops, having advanced likewise to their respective attacks, numbers on all sides got over the parapet without opposition: nevertheless none of the defenders quitted the rampart, or would accept quarter; but each fell advancing against or struggling with, an antagonist; and even when fallen and in the last agony, would resign his poignard only to death. The slaughter of the conflict being completed, another much more dreadful, presented itself in the area below: the transport of victory lost all its joy: all gazed on one another with silent astonishment and remorse, and the fiercest could not refuse a tear to the deplorable destruction spread before them. Whilst contemplating it, an old man, leading a boy, was perceived advancing from a distant recess: he was welcomed with much attention and respect, and

conducted by the crowd to Mr. Law, to whom he presented the child with these words: "This is the son of Ranga Rao, whom I have preserved against his father's will." Another emotion now succeeded, and the preservation of this infant was felt by all as some alleviation to the horrible catastrophe, of which they had been the unfortunate authors. The tutor and the child were immediately sent to Mr. Bussy, who, having heard of the condition of the fort, would not go into it, but remained in his tent, where he received the sacred captives with the humanity of a guardian appointed by the strongest claims of nature, and immediately commanded patents to be prepared, appointing the son lord of the territory which he had offered the father in exchange for the districts of Bobbili; and ordered them to be strictly guarded in the camp from the malevolence of enemies.

The ensuing night and the two succeeding days passed in the usual attentions, especially the care of the wounded, who were many; but in the middle of the third night, the camp was alarmed by tumult in the quarter of Viziarama Raju. Four of the soldiers of Ranga Rao, on seeing him fall, concealed themselves in an unfrequented part of the fort until the night was far advanced, when they dropped down the walls and speaking the same language, passed unsuspected through the qarters of Viziarama Raju, and gained the neighbouring thickets; where they remained the two succeeding days, watching until the bustle of the camp had subsided; when two of them qitted their retreat, and having by their language again deceived those by whom they were questioned, got near the tent of Viziarama Raju; then creeping on the ground they passed under the back part, and entering the tent found him lying on his bed, alone and asleep. Viziarama Raju was extremely corpulent, in so much that he could scarcely raise himself from his seat without assistance; the two men, restraining their very breath, struck in the same instant with their poignards at his heart; the first groan brought in a sentinel, who fired, but missed; more immediately thronged in, but the murderers, heedless of themselves, cried out, pointing to the body, "Look here! We are satisfied." They were instantly shot by the crowd, and mangled after they had fallen; but had stabbed Viziarama Raju in thirty-two places. Had they failed, the other two remaining in the forest were bound by the same oath to perform the deed or perish in the attempt."

The situation of this historic fort can still be traced on the west side of the town, and where the subsequent Maharaja of Bobbili in 1891 erected an obelisk bearing inscriptions on stone commemorating the tragedy.

From Bobbili Bussy marched on into Ganjam receiving the submission of the various local chiefs and Zamindars as he went; sent a body of troops from Masulipatam to capture the English factories at Injaram, Madapollam and Bandamurlanka in the Godavari district and then turned back to attack Vizagapatam settlement in person. Bussy then proceeded southwards and eventually returned to Hyderabad. In July of the next year (1758) he proceeded south to help in the war in the Carnatic and the siege of Madras.

Viziarama Raju's successor Ananda Raju, dissatisfied with the arrangements made by M. Bussy on the death of his predecessor had waited for an opportunity to take his revenge. As soon as Bussy went down south, he captured Vizagapatam from the French garrison which was holding it, sent news of the event to Madras and invited the English there to join him in expelling the French from the Northern Circars. Since Madras authorities were fully occupied at that time this offer was repeated to the English in Bengal. Clive sent Colonel Forde to Vizagapatam by sea with a force of 500 Europeans, 2,000 sepoys and 100 lascars which arrived on the 20th of October, 1758. The first step that Colonel Forde took, after joining the troops to those of Ananda Raju was to re-establish the factory of Vizagapatnam where the French had left a small garrison. The united forces then moved south and on the 9th of December near Condore, about 35 miles east-north-east of Rajahmundry, an action was fought with the French which ranks as one of the decisive battles of India in which the French were utterly routed. Forde then pushed on to Rajahmundry the next day without the Raja's rabble and shortly afterwards took Masulipatam by a most brilliant assault. Salabat Jang, the Subadar of the Deccan, who had advanced within fifteen miles of the place to assist the French, changed sides at once and on the 14th May, 1759 concluded a treaty with the English granting them the country around Masulipatam, renouncing all friendship with the French and prohibiting the latter from ever again settling in the Northern Circars. Except the tract then ceded to the Company, the rest of the Northern Circars fell once more with dramatic suddenness under the sway of the Subadar of the Deccan. His rule however, extended to it in name only 'For the seven succeeding years the completest anarchy ever recorded in history, therefore, prevailed over the Northern Circars.

In 1765 Clive obtained from the Moghul Emperor at Delhi a Firman granting to the company the five Northern Circars. The Subadar, however was in no way pleased at this cession of territory which he regarded as his own and threatened to retaliate by an eruption into the Carnatic. In November, 1766 a treaty was hastily concluded with him by the British, by which the English agreed to pay Rs. 9 lakhs annually for the territory that had already been granted to them as a free gift by the Moghul Emperor. Later however, this tribute was reduced and finally it was completely dropped.

After the withdrawal of all opposition by the Subadar of the Deccan the English Government at Madras at once took steps to secure Ganjam and the province of Ichchapur by passing a resolution in Council on the 2nd December, 1766. The idea was not only to settle the tract but also for the purpose of investment and promotion of sale of European goods. Mr. Cotsford was appointed both as Engineer and Resident. He was instructed to make himself acquainted with investments at different factories, to assist in finishing the fortifications at Vizagapatam, to report on the condition of the country especially with reference to the requirements of the stores ; prospects of providing investments and disposing of any part of European commodities etc.

In obedience to these instructions Mr. Cotsford proceeded first to Vizagapatam and afterwards to Ganjam early in 1765. He found the country to the north of Vizagapatam in a very disturbed state. Narayana Deo, the Zamindar of Parlakimidi (now in Orissa State), the largest and the most important Zamindar then in that area had possessed himself of the country and refused to submit to the authority of the English, intercepting communication between Bengal and Madras. Sitarama Raju of Vizianagaram also contributed to the worsening of the state of affairs. Mr.Cotsford, though with reservations, reported favourably upon the situation of Ganjam and the chances of making an investment there, but as it was evident that nothing could be done in the district without the presence of troops, he shortly returned to Madras.

In the following year 1768, the English determined to reduce Narayana Deo of Parlakimidi to obedience. Colonel Peach of the Bengal battalion stationed at Masulipatam was ordered to proceed against him. Mr. Cotsford was also instructed to accompany Mr. Peach and to take up his appointment at Ganjam as Resident. Mr. Cotsford arrived in April, 1768. The force under Colonel Peach soon afterwards defeated Narayana Deo in May, 1768 and compelled him to take refuge in the forest country. On the advice of Mr. Cotsford the defeated Raja's son was declared as his successor. However, the actual management of the Parlakimidi country was entrusted to a person nominated by the Company. Colonel Peach's battalion continued in the Parlakimidi Zamindari until the country to the south had been partially settled and Mr. Cotsford meanwhile proceeded northward to Ganjam and entered upon his duties of appointment as Resident in July, 1768.

The Chicacole Circar, as administered by the Muslims,had been divided and managed in three divisions, under the names of Ichchapur, Chicacole and Kasimkota. Under the reorganised set up Chicacole and Kasimkota being nearer to Vizagapatam were placed under the control of the Chief and Council at that place but the Ichchapur province on account of its extreme northern location rendered the presence of a Resident at Ganjam absolutely necessary to administer its affairs.

Upon Mr. Cotsford's first assuming possession of the country, his position was somewhat precarious, for to the north at Cuttack there was a large force of Maharattas, whilst in the province itself there were 19 Zamindars, all of a more or less turbulent character. His authority in the district was, therefore, liable to danger at the least appearance of any external troubles. The Zamindars, being semi-independent entertained considerable bodies of feudal retainers, and in all could muster amongst them, no less than 32,170 foot soldiers, while they had possession of 34 forts for the protection of their respective territories. It was therefore, the Resident's chief care to provoke as little opposition in his management of the country and by gradually destroying the country forts he hoped to reduce the Zamindars to obedience. To assist the Resident in governing the country and collecting its revenues an aggregate force of about 2,000 men commanded by Captain Bandinell was located in different parts of the country but chiefly at Ichchapur, Ganjam and Aska.

The various Zamindars continued to give trouble to the Resident in the payment of tribute and at the slightest provocation they would stop payment. It was only by a show of force that the tributes could be extracted from them. Among the more troublesome were the Raja of Vijayanagar, the Rajas of Goomsur,

Atagada and Mohiri. In some cases the Resident had to send forces to take possession of the standing crops upon their failing to settle satisfactorily their tribute. The Agent also felt that he could not deprive the Zamindars of their respective territories and place others in their stead as it would become very difficult to find anyone to accept such a place and who could maintain himself in authority without the assistance of a considerable detachment from the English; the Company at the same time running the risk of promoting a man equally unworthy as the one removed.

The Bengal detachment under Colonel Peach was to leave the country in December, 1768. As there were no other troops, Mr. Cotsford began to enlist a company of peons. He also proceeded to store the fort at Ganjam with provisions as news kept coming from Madras that the Northern Circars were likely to be invaded by the Nizam and the Maharattas. The Resident also thought it advisable to purchase a vessel and keep it in readiness at Ganjam in case matters came to the worst. Although all measures for the security of the country had been taken with as much caution as possible the news of an expected invasion soon leaked out and the Zamindars at once made a dead stop in their payment to the Company. Upon the appearance of an English force the Goomsur Raja retired to the hills and thinking it more prudent not to offer any further resistance he shortly afterwards gave immediate security for the payment of his tribute and prevailed on the detachment to retire from the fort into the camp.

Colonel Peach's Bengal detachment quitted the Parlakimidi Zamindari about the 12th December, 1768 and marched southwards to Vizagapatam. They had hardly left the place before the disturbances commenced. Narayana Deo, the rebel Zamindar immediately began intriguing with the Maharattas in Cuttack inviting them to attack the British and also promising co-operation of Sitarama Raju, the Nizam's former Faujdar and also of the Rajah of Vijayanagar. The British Resident in Cuttack, however, informed Mr. Cotsford that the Maharattas were in no mood to undertake any invasion on account of dissensions among themselves. Mr. Cotsford meanwhile suggested to the Madras Council the expediency of appointing a Resident or Chief at Chicacole supported by five companies of Sepoys for the management of the affairs of Kasimkota and Chicacole. It was not until 1787 that Mr. Cotsford's recommendations appear to have been acted upon.

The Resident's hands had been so fully occupied in coercing the refractory Zamindars of the district that the Company's commercial operations were almost forgotten. In 1771 Mr. Cotsford wrote stating that on mature consideration he thought that the Company would be running a risk in making contracts, as for the most part the merchants live under the Governments of the Zamindars and that they are very insolent and cannot be depended upon. Mr. Cotsford continued to have difficulties with the Estates of Parlakimidi, Vijayanagar and a few other major Zamindaris. Some of their forts had therefore, to be occupied and destroyed resulting in heavy casualties on either side.

At the end of 1773 Mr. Cotsford resigned his appointment as Resident on the plea of his failing health and the Government of Fort St. George expressed their appreciation of his able and vigorous administration of the country.

Upon the retirement of Mr. Cotsford it was determined to alter the form of management and therefore, Mr. Charles Smith was appointed as the Chief at Ganjam with a Council to assist him in the administration of his affairs. Disturbances broke out again in 1774, 1775 and 1776 on account of certain Zamindars withholding payments of tribute. Murders and disturbances together with the usual attendant consequences of military expeditions and assignments of villages to the Company appear to have been constant throughout the period of Mr. Smith's tenure of office as Chief. The Company's troops were constantly employed either in demanding the tributes of the Zamindars who but rarely paid without either compulsion or threats or in quelling distrubances and calling the murderers of the Company's Tahsildars to account. When a Zamindar was refractory the troops were quartered upon him and he was made to pay for their keep.

On the 25th September, 1779, the Ichchapur district was rented to Balakrishna Naidu, formerly the Company's dubash for a period of 10 years and the Zamindars instead of paying tributes to the Residents or Chief in Council were ordered to pay the tribute through the renter into the Company's treasury. Balakrishna soon found himself quite unable to cope with the difficulties of his position although assisted by the Company's troops, and upon falling irretrievably in arrears with all his payments, and giving great dissatisfaction to all the district Zamindars, his own

cowle was finally revoked in October, 1781 by an order from the Court of Directors.

On the 3rd of October, 1780 a serious mutiny occurred among the Sepoys at Vizagapatam. The settlement at Ganjam was startled by this news. All the English Officers were killed and the Governor of Vizag had been taken prisoner. The ostensible reason for this conduct appears to have been that they were under orders to sail from Vizag to Madras where their services were needed to meet the invasion of Carnatic by Hyder Ali of Mysore. The Zamindar of Parlakimidi, then under surveillance at Vizag was strongly suspected of having engineered this outrage. The Resident at Ganjam upon receiving this information directed Captain Bruce at Aska to march to Chicacole, take the command of the troops there, and proceed against the mutineers, who had placed themselves under Captain Brule, a French prisoner for treasonable correspondence, whom they had released. Subsequently, on hearing that no help was necessary from Chicacole Captain Bruce was directed to report back to Aska.

In 1781 the Circars were within an ace of being ceded back again to Hyderabad in return for a body of horse to be placed at the disposal of the Governor-General. Lord Macartney, who had just arrived as Governor of Madras protested, however, with such force against the proposal that it was abandoned.

On the 19th May, 1782 the office of the Resident was abolished. The Council was increased to five members. In 1783 quarrels took place in the settlement at Ganjam which continued almost without intermission until 1786. They appear to have originated at the Council Board out of jealousy of the Chief Mr. John Maxwell Stone, on account of his retaining the immediate management of Haveli lands in his own hands, and the other members of the Council complained that the whole power of the settlement was absorbed by Chengulroy, the Chief's dubash or manager. The quarrels of the Council Board at length became so notorious as to call for the interference of the Government. Mr. Henry Crawford was deputed to Ganjam in 1784 to investigate the complaints and counter complaints made by the different Members. Upon receiving his report on the subject, the Government came to the conclusion, that "the disputes originated from private pique to the chief". They reduced the number of members of Council from 5 to 3.

In 1787 a Circuit Committee arrived and commenced to investigate the revenue resources of the district. Their report dated 25th April, 1788 forms the chief data upon which the permanent settlement was afterwards effected. Mr. Morgan Williams, the Chief in Council in a report dated 31st December, 1787 describes the revenue of Ichchapur district as on the increase and estimates its population at 465,755 persons. The total revenue of the country excluding the whole of the Chicacole Sub-Division was given as 6,35,252 rupees. The trade of the district was described, however, as being on the decline.

On the 17th November, 1790, Mr. H. Crawford who had been previously Collector of the Chicacole Division was appointed as Resident and the Council was abolished. Troubles were meanwhile ripe in the district and a very severe famine was also about to add its horrors to the existing disturbances. The various Zamindars gave any amount of trouble in the form of petty rebellions and also inter-Zamindari skirmishes. It was, therefore, no wonder that with all the troubles of famine and rebellion prevailing from one end of the district to the other Mr. H. Crawford, the Resident announced to the Government that he was unable to reduce the refractory Zamindars until the situation of affairs in the Carnatic will admit of an addition to his military strength.

As a famine relief measure on the 7th November, 1789 Mr. Crawford issued a proclamation suspending all import and transport duties on grain and other edibles in the Company's Haveli lands. In the Ichchapur and Chicacole countries people died in thousands. Government seem to have done their best to mitigate the horrors of famine but were powerless to control the evil in an effective manner. In the Chicacole Division Mr. Keating, the Collector, calculated that an average of 3,000 poor people had daily subsisted on the Company's bounty for a period of two years. The importation of paddy for the relief of the poor was ordered by the Board of Revenue and it was found from the Chicacole records that in June, 1792, 10,519 bags of rice were despatched from Kalingapatnam to Ganjam. Large quantities of rice also appear to have been imported from Cuttack *via* Chilka lake.

The country was plunged in a state of misery and desolation truly deplorable. Whole tracts were depopulated and people were not forthcoming to cultivate the land. Authentic records about the number of people who died etc., and the number of people

relieved are not available. Mr. Warricker, Assistant Collecter, wrote on the 15th January, 1792 to Mr. Keating, the Collector at Chicacole as follows "I was an eye-witness of the melancholy effects of famine. About six persons were gathered around a fire and were feeding upon the carecass of a dog killed on suspicion of its being mad". The duration of the famine was increased by the failure of the dry crops in 1792, and the floods that occurred in that year did further damage. The famine seems to have been at its worst about Chicacole, and the Zamindaris of Jalantra, Mandasa, and around the fort of Mahendragiri.

In 1794 the office of Resident and Chief at all the settlements along the coast was abolished and the office of the Collector was established.

By the permanent settlement of 1802 all these ancient Zamindaris were handed over to their owners in perpetuity on a fixed peshkush and a number of other proprietary estates were also called into being by parcelling out the Haveli land into a series of properties and selling these by auction subject to the payment of a permanent peshkush.

Politically this settlement was a failure. These men had for years been treated as feudatories rather than as private landholders; and the functions of the Government had been in part conducted through them; some of them having been entrusted with the responsibility of keeping the hill tribes in order. But under the new arrangement they were unceremoniously set aside; authority over the hillmen was taken away from them; their estates were declared liable to immediate attachment and sale for the default in paying a single instalment of the peshkush; they were irritated by the working of the new revenue and judicial regulations; and the new police force no longer under their control took every opportunity under cover of a pretence of enforcing law and order, of harassing and annoying them.

Owing to all these causes the Zamindars for many years after the introduction of a permanent settlement, were in a chronic state of discontent and disaffection. Too often internal and domestic troubles accentuated their restlessness.

At first, troops were called out and an attempt was made to chastise these disturbers of the public peace. But these expeditions were by no means uniformly successful and cost much in blood and treasure. Recourse was then had to negotiation, the only result of which was to increase the insolence of the malcontents. Around 1832 disturbances became so serious that Mr. George Russell, First Member of the Board of Revenue was sent as Special Commissioner to investigate their causes and concert measures for their suppression.

He was invested with the extraordinary powers, including that of proclaiming martial law if necessary and was supported by a strong force of troops. He took severe action and most of the disturbances were controlled and some of the Estates were forfeited. To check further disturbances of the same kind Act XXIV of 1839 was passed and parts of the district were removed from the operation of much of the ordinary law and were administered directly by the Collector with extraordinary powers conferred upon him in the capacity of the Agent to the Governor. Subsequently a few of the Zamindaris in the south were from time to time bought in by Government at sales for arrears of revenue and formed into taluks for the purpose of direct administration. Slowly, peace dawned over this disturbed land and law and order prevailed as was the case with the rest of the tract comprising the erstwhile Madras Presidency.

It is now necessary to turn to the history of the Chicacole division between 1767 and 1802, in which year it was incorporated in the Ganjam district. Previous to this date, it had formed the 3rd division of the Vizagapatam district, and included Kasimkota, attached to Vizagapatam. The limits of the 3rd division extended from Chinna Pantulu Daba, 20 miles south of Chicacole, to Kasibugga, 50 miles north of it. Upon the acquisition of the Northern Circars, the district was rented out to Sitaram Raju, the brother of Viziaram Raju, Rajah of Vizianagaram, for a period of 10 years until 1777. In 1777 the rent of the country to Sitaram Raju's appears to have been renewed for a further period of ten years, which expired in 1787. Sitaram Raju management of the country was most oppressive, and seems to have been highly detrimental to the Company's interests. The country was rack-rented in a wholesale manner, and the renters took what share of the produce they pleased, leaving the remainder to the ryot. Sitaram Raju dispossessed the Brahmins of their charity lands or Agraharams and in recompense, bestowed upon them Haveli villages. The manufacturers and artisans of the country emigrated in large numbers and went to other places where they were less oppressed. At the expiration of Sitharam Raju's lease, Mr. Henry

Crawford was appointed in 1787 the first Collector of the Chicacole Division subject to the authority of the Chief and Council at Vizagapatam. Mr. Crawford estimated the probable revenue of the country at four lakhs, including the two large Zamindaris of Parlakimedi and Tekkali. The alienations made by Sitaram Raju had been considerable, so that all lands not uninterruptedly enjoyed for twenty years were ordered to be resumed. As in Ganjam, so in Chicacole, the land customs were numerous and burdensome, preventing the produce of the country being sent from those parts where it was plentiful to others where it was scarce.

Upon Mr. Crawford proceeding to Ganjam as Resident in 1790, Mr. Michael Keating succeeded him. The Haveli lands of Chicacole were rented out to one Ramavadhanulu in 1791, but the renter fell in arrears, and the company seized his ships and other property at Calingapatam in satisfaction of their demands. In 1794 the Chief and Council at Vizagapatam were abolished, and Mr. Keating was directed to correspond direct with the Board of Revenue. Mulberry, coconut and opuntia plantations, and cochineal seem to have engaged the Company's commercial attention, but the success of these ventures does not appear to have been great. In 1797 Mr. Keating got into trouble, and was charged with embezzling a sum of 1,19,380 Rupees out of 1,73,414 Rupees allotted for the repairs of the 898 tanks which had been breached or damaged by the monsoon of 1795. Captain (Lieutenant) Pitman was, at the same time, charged with collusion, and Mr. Keating was removed, and made way for Mr. Andrew Scott in 1797. The country during the administration of Messrs. Crawford, Keating, and Scott continued in a more or less disturbed state. Gajapati Deo, the Zamindar of Parlakimedi, whom the English had put in as Zamindar upon the defeat of his father Narayana Deo in 1768, was declared to have forfeited his Zamindari in 1797 for repeated breaches of his engagements, and for disobeying the orders of the Collector at Chicacole. The management of this extensive Zamindari was accordingly placed under the Collector, and Durga Raju, a relation of the Kimedi family, was appointed Manager in 1799.

In 1797 the Zamindar of Tekkali died, the last of a long and noble race, the Kadamba 'Vamsam' or family, and his estate which had been for 375 years in the possession of the same family, was converted into Haveli or Government land and managed by the Company.

During the years 1799 and 1800, disturbances in Kimedi took place concurrently with those in Goomsur, in consequence of which both the Chicacole and Tekkali Havelis sufferred material injury. The Zamindar, Gajapati Deo, and his son had been sent to Masulipatam, but this step did not have the effect of quieting the insurgents who, besides laying waste the country, attacked the detachments posted at Varanasi and Kimedi. The former was compelled by the peons of the Doratanams to retreat out of the Zamindari, and the latter to capitulate on condition of being allowed to retire with their arms. After these successes the insurgents proceeded to take possession of the Tekkali Heveli, and to burn and plunder the villages at will. Jagannath Deo, the brother of Gajapati Deo, for whom he had been removed from the Zamindari in 1780, had, in the meanwhile, joined the insurgents who numbered a body 5,000 strong. 8 Companies of Native Infantry, a detachment of Cavalry, and a brigade of six-pounders were sent against the insurgents. After some delay the rebels were finally reduced by Colonel Vigors with the assistance and advice of Durga Raju. During the course of the operations, Lieutenant Youngson, a British Officer, was taken prisoner and carried off into the Maliahs. His release was finally effected.

As a reward for the services rendered by him, Durga Raju was appointed Manager, and for 13 years his administration of the country was most successful. In 1802 Gajapati Deo died, and his son, Purushottama Narayana Deo, succeeded him. Upon the death of the latter in 1805, the Parlakimedi estate was managed by Durga Raju, subject to the Court of Wards, as Purushottama Narayana Deo's son was only 12 months old when his father died. Jagannath Deo who had joined the Goomsur Rajah in his rebellion, and for whose capture Government offered a reward of Rs. 10,000, was seized and delivered up by the Zamindar of Surada in 1804, and sent as a prisoner to Masulipatam.

Mr. Cherry was the last Collector to succeed to the management of the Chicacole country in 1800, and in 1802 when Chicacole was incorporated with Ganjam, Mr. Cherry became the first Collector.

With regard to the revenues of the Chicacole Division they never seem to have exceeded by much Mr. Crawford's first estimate of 4 lakhs. The jama or rent paid by Gajapati Narayana Deo for Parlakimedi was Rs. 86,000, whilst for Tekkali, the last Zamindar, Ram Kistna Jagga Deo, had paid Rs. 24,472 yearly. The average gross collections of the

Chicacole Haveli lands from Fasli 1202 to 1206 (1792-1796) were Rs. 2,94,760 making a grand total of Rs. 4,05,232.

Mr. Peter Cherry, who succeeded Mr. Brown in 1802 was the first Collector of Ganjam. In 1803 the Ganjam district comprised all the territory north of the Langulya river near Srikakulam and extended from Mofusbandar on the sea coast in the south to Priagi on the Chilka lake in the north. It included four distinct Havelis and 21 Zamindaris including the large and important one of Parlakimedi. Mr. Cherry's managment of the country was vigorous and praiseworthy. He not only introduced the permanent settlement but also established Courts of Judicature. He sold the Haveli or the Government lands and constituted them into proprietary Estates.

During 1816 this district was invaded by the Pindaries. The latter were an off-shoot of the Maharatta armies who had taken to robbing and plundering the country when their Chiefs could no longer afford to pay them. Their strength seems to have been between 4,000 and 5,000 men and they were well mounted. They entered the district through the Jeypore area and proceeded northwards burning and plundering as they went. The Ichchapur and Mansurkota valleys suffered most for their ravages, and as they spread over the country in small detached bodies it was difficult to account for their movements. The troops at Berhampore prevented their molesting this town and near Boirani a body of Pindaries, 1,000 strong, were surprised by Lieutenant Borthwick and a small force, and completely routed them. The Pindaries finally left the country.

In 1816 the Collector was invested with magisterial powers and a separate office of Magistrate was abolished.

There had been bad years in 1837-1838, but in 1839 the season was so disastrous that the inhabitants were put to the greatest distress, and many of them migrated, whilst Cholera and other diseases carried off multitudes of those who remained. To add to this calamity the drought that prevailed in the district after September was so severe that several coconut plantations also withered and died from its effects. The Government of that day tried its best to relieve those severely affected by this famine.

The next great famine occured in 1865. Between 1865 and 1866, a famine of the most unparalleled severity desolated the country and slew between 10,000 and 15,000 people by actual starvation. The number of deaths reported was 10,898 but there is no doubt that the total loss of life by starvation was greatly in excess of this return as many hundreds must have perished of whom no account was kept.

Territorial Reorganisation and formation of Orissa Province:

The Government of India in their resolution No. F. 12/ VI/ 31, dated the 18th September, 1931 laid down as follows:

"The consitution of a separate province of Orissa was not made the subject of separate investigation by the Round Table Conference or any of its Sub-Committees. But the matter was not overlooked. Some discussion took place at a late stage in the Committee of the whole Conference in which, though the claims of the Oriyas were not expressly endorsed, no delegates spoke against them. In these circumstance and having regard to the previous history of the case, the Government of India, with the approval of the Secretary of State, have decided to appoint a Committee to examine and report on the administrative, financial and other consequences of setting up a separate administation for the Oriya-speaking people and to make recommendations regarding its boundaries in the event of separation.

Constitution of Orissa Committee:

The Government of India, after careful consideration, have decided that this enquiry should be entrusted to a small body of men; with an impartial outlook on the problems involved, and that with them should be associated three persons drawn from the areas most interested. The latter will share freely in the proceedings of the Committee, but will take no part in drafting or signing the report.

In pursuance of these decisions the Governor-General in Council, with the approval of the Secretary of State, has been pleased to constitute the Committee as follows:—

Chairman

1. Sir Samuel O'Donnell, K. C. S. I, K. C. I. E.

Members

2. The Honourable Mr. H. M. Mehtha, Member, Council of State, and

3. Mr. T. R. Phookun. M. L. A.

The following gentlemen have been selected, on the advice of the Local Governments concerned, as associate Members:

1. Raja of Parlakimedi,
2. Mr. Sachchidananda Sinha, Bar-at-law,
3. Rao Bahadur C. V. S. Narasimha Raju Garu

Mr. B. C. Mukharji, I.C.S., will act as Secretary to the Committee. The Committee's headquarters will be at Cuttack.

The terms of reference to the Committee are as follows:—

If a separate Province of Orissa were to be created–

(i) What should be the boundaries of such a Province?

(ii) What would be the administrative, financial and other consequences in such a Province?

(iii) What would be the administrative, financial and other consequences in the adjoining territories of British India?"

Thus the Committee known as the Orissa Committee was constituted with instructions to examine and report on the financial and other consequences of setting up a separate administration for Orissa and to make recommendations regarding the boundaries in the event of separation. The Committee held its first meeting at Patna on the 7th November, 1931 when the proceedure to be followed was discussed in the course of its enquiry. As the Committee was anxious to enlist the co-operation of the public a communique was drawn up in which the attention was invited to the terms of reference and public bodies, organized associations and leading members of the general public were requested to submit memoranda. It was also decided to take oral evidence at suitable centres. The Committee reassembled again at Jamshedpur on the 23rd November and subsequently visited Chaibassa, Sambalpur, Raipur, Midnapur, Gopalpur, Waltair, Kakinada and Cuttack. The investigation was completed by the 14th January by which date the Committee examined in all 410 witnesses and were then in a position to formulate their recommendations regarding the boundaries of a separate province of Orissa and to take in hand the working out of the financial and other consequences. The report was signed on the 19th of April, 1932.

From the view point of Srikakulam district it is necessary only to examine the recommendations of the Committee as regards Ganjam district and Visakhapatnam district, parts of which went to form the reconstituted Ganjam and Koraput districts of the Orissa State. In this connection two of the memoranda placed before the Committee have been reproduced in this Chapter and these throw some light on the history, culture, affinities, etc., of this tract of land comprising Srikakulam, Ganjam, Koraput and Visakhapatnam districts.

Oriya Memorandum for Ganjam:—

1. It is a matter of history that the kingdom of Orissa extended roughly from the Ganges to the Godavari. Following civil wars in the kingdom of Orissa, it was dismembered and portions of the kingdom were seized by the neighbouring powers who were subdued at different times by the British power, so that the several portions which once formed part of the ancient kingdom of Orissa were annexed to different British provinces on account of their local proximity regardless of any racial affinity. Unfortunately for the Oriyas they found themselves at the tail-end of every Province and far off from the seats of Provincial Governments from which radiated British Civilisation and enlightenment which, in consequence, least affected the Oriyas. On the other hand, their neighbours in different Provinces having grown powerful by their closer contact with the British power at the Provincial centres became intermediaries between the British power and the Oriyas and practically supplanted the Oriya language by their own. In the district of Ganjam, Oriya was not recognised as a court language until 1890 when on the recommendation of a sympathetic Collector, the Madras Government issued G. O. 2024 / Judicial, dated 15th December 1890. In Jeypore, Oriya was recognised as court language much later.

2. The Oriyas being a helpless minority in every province, their customs and manners underwent considerable change owing to over powering influence of their more powerful neighbours. Unfortunately the change brought about was not uniform upon the community as a whole, as it was exposed to varying influences in different provinces. The Oriyas sought protection at the hands of the Provincial Government against the aggression of the neighbours and the Provincial Government, alive to the helpless condition of the Oriyas, issued orders from time to time directing the use of Oriya language and employment of Oriyas and affording facilities to

Oriyas for education. In spite of all that the Provincial Government did, the Oriyas were at a disadvantage in the competition with their neighbours.

3. So, in 1902 the Oriyas realised that, unless they were placed under one Provincial administration, they could be swamped and become extinct as a distinct race in spite of their glorious past.

The agitation for amalgamation of the Oriya-speaking tracts which began towards the end of 1901 was successful only to the extent of bringing the district of Sambalpur into the Orissa division which was *till 1905 included in Bengal.* But the Oriyas, undaunted by the failure to secure their cherished ambition in full, and depending upon British Justice, have been carrying on their agitation.

4. The Government of India Act of 1919 which aimed at introducing some measure of responsible government placed the Oriyas at a greater disadvantage, as the Oriyas found themselves in hopeless minority in every legislature, so that they are not in a position in any legislature to make their voice felt. Furthermore, they were deprived of the protection afforded by sympathetic officers which they were having in a more or less degree prior to the Reforms. The Oriyas, therefore, realised the urgent necessity for the formation of an Oriya Province wherein their National genius and culture might be fostered, developed and strengthened.

5. Unfortunately during the British regime people of other races settled in tracts of country which were previously the home of the Oriyas. In Volume III of the well-known Firmingher's Fifth Report on East India Affairs (1 and 2) at page 79 the Oriyas are described as the natives of the soil. In dealing with the Raj family of Vizianagaram in the Vizagapatam district in Volume III of the Report it is stated as follows :—

"In general the history of all the Ranzees, or tribe of Raohewar in the circars, traces their origin to a dependence on the ancient Rajas of the country either as Chelaks or favoured slaves, managers, talukdars, or renters of the sub-divisions of the sovereign domain ; and such also was the rise of all the other petty holders of land existing in this province, whether descended from the Velmawars of Telinga, or natives of the soil itself properly called Oriya."

In dealing with the population of the Northern Circars, Mr. James Grant, in his political survey of the Northern Circars reproduced in Volume III of the Fifth Report, says :–

> "They (the native inhabitants of Northern Circars) are parts of the two nations of Telinga and Oriya. Woria or Orissa formerly divided from each other by the Godavary, but since their union under the Government a good deal mixed among themselves, as well as with some of the neighbouring tribes".

6. The Oriyas from the beginning of this agitation have been claiming the whole of the Ganjam district *including the Agency (minus* the Chicacole taluk with its dependent taluk of Narasannapet), and the Jeypore Agency consisting of the Koraput division comprising the Pottangi taluk including Pachipenta Agency, Koraput, Paduva, Jeypore, Navarangapur and Malkanagiri taluks, and the Gunupur, Bissamkattak and Rayagada taluks and the Narayanapatnam Thana of the Jeypore Estate in the Parvatipuram taluk in the Parvatipuram Sub-division in the Vizagapatam district as Oriya-speaking tracts even though a large Oriya population reside outside these areas. The population of the aforesaid tracts consists of either Oriyas or Oriya-speaking aboriginal tribes with a very small Telugu-speaking population at the borders of the Godavary.

7. The aforesaid tracts consist mainly of estates owned by Oriya Rajas or Zamindars, who have derived their title from the Oriya kings, the sovereigns of all these tracts. Telugu found its way into Jeypore in 1880 or thereabouts, the then Maharaja having entertained a Telugu man to carry on correspondence in Telugu with the Government officials, Oryia not having been then recognised as court language, but in the estate offices Oriya was the only language in use. In 1889, when the Jeypore Estate was placed under the management of the Court of Wards during the minority of the then Rajah, Telugu language and Telugu officials replaced the Oriya language and Oriya officials, so that the foot-hold so gained by Telugu language and Telugu officials has been retained in spite of G. Os. of the Madras Government recognising Oriya as the sole court language in certain taluks and prescribing the Oriya test for Government officials serving in the Jeypore Agency. So the Telugu population now found in the Jeypore Agency found its way into the Agency since the management of the estate by the Court of Wards and in consequence thereof.

8. The Estate of Parlakimedi in the Ganjam district adjoins the Jeypore Estate, and is owned by

a lineal descendant of Kopilendra Deo, one of the most powerful kings of Orissa. The Rajas of Parlakimedi, Bodokimedi and Sanokimedi are distinguished by the title of Gajapathy in token of their descent from the Gajapathy kings of Orissa. The territories owned by them adjoined one another until the Parlakimedi Agency was cut off from the Parlakimedi Estate, and the Balliguda Agency from the Sanokimedi Estate; the Ramagiri Udayagiri taluk in the Ganjam Agency is held on feudal tenure by the Zamindar of Bodokimedi. The Oriya Zamindars of Mandasa, Jarada, Budarsingi, Surangi and Bodogodo held tracts in Ganjam Agency on feudal service. The Ghumsur, Udayagiri taluk in the Ganjam Agency became Government property in 1836 or thereabouts along with Surada Estate and its Agency appanage, when the Ghumsur Estate was bought in by Government along with the Surada Estate which had, in its turn, been purchased by the Ghumsur Zamindar about two years previously at a revenue sale. The Agency appanage of the Jalantra Estate was resumed by Government as the Estate was sold in execution of a decree of the Civil Court. The Ganjam Agency adjoins the Jeyapur Agency and the Khond Mahals of Orissa and the Ganjam and the Jeyapur Agency people have kinship and matrimonial ties and have the same customs and manners and language denoting their racial identity. The aboriginal tribes have no written language of their own and the attempt made in certain quarters to give them a written language has been neither successful, nor useful to the aboriginal tribes. Centuries ago the aboriginal tribes in the aforesaid Agency tracts came into contact with Oriyas who ruled them, educated them, and gave them such civilisation as they possessed before the advent of the British rule. Even under the British regime the work began by the Oriyas is continued by the Provincial Government, so that Oriya language is taught in schools started for the aborigines. Almost all the hill chiefs are Oriyas or Oriya-speaking. It is but right that the aforesaid Agency tracts of Ganjam and Vizagapatam should be included in the proposed Utkal Province.

9. The Ghumsur taluk and the Aska taluk and the Surada taluk comprising the Estates of Bodogodo, Sergoda, Sanokimedi, Dharakote and Atgada, the proprietary estates of Aska, Devabhumi and a portion of the Ryotwari tracts of Chatrapur taluk, etc., are within the jurisdiction of the Aska District Munsiff Court, the court language of which is recognised to be Oriya only by G. O. 456-Judicial, dated the 5th March, 1913. The Chatrapur Sub-Division comprises the taluks of Kodala and Chatrapur. The Kodala taluk consists of the estates of Atgada and Khallikote owned by the Raja of Khallikote. The Raja is an Oriya and has relationship with the rulers of Feudatory States in Orissa. The population consists entirely of Oriyas or of Oriya-speaking people. The Chatrapur taluk comprises three small estates owned originally by Oriya Zamindars but one of which is now owned by the Raja of Bobbili and the other by the Zamindar of Chemudu in Vizagapatam district, who is an Oriya. The people of all the three estates are entirely Oriya or Oriya-speaking. The population of the Ryotwari tract of the Chatrapur taluk consists mainly of Oriyas and the sprinkling Telugu population speaks Oriya and is ignorant of Telugu except in towns, where it comes into contact with Telugu officials.

10. The Berhampur Taluk comprises the ancient Mohuri Estate which was owned by an Oriya Zamindar, but was bought in by Government in 1836 or thereabouts. The population consists mainly of Oriyas. The Telugus also know Oriya. All the Hindu merchants of Berhampur used to maintain their records and accounts in Oriya but some of them have begun to use Telugu after the agitation for amalgamation of the Oriya-speaking tracts began. The Kalinga Komatis who have no relations south of the district and have their kith and kin in northern Ganjam and in Orissa, who do not know Telugu at all, have adopted Oriya customs and manners and celebrate Oriya festivals and have Oriya priests. The weavers of Berhampur also know Oriya having settled in Berhampur from a very long time. The Kalinjis of Berhampur have adopted Oriya customs and manners and have Oriya purohits. The Reddis also know Oriya and have adopted Oriya customs and manners having been cut off, for centuries, from their kith and kin in the southern districts of the Madras Presidency. The Bodokimedi Estate in Berhampur taluk is an Oriya Zamindari.

11. The Ichchapur taluk comprises of three Zamindaries owned by Oriya Zamindars who have relationship with Feudatory Chiefs and Zamindars of Orissa. The people are Oriyas and speak Oriya. The Uddanam villages which are situated on the seacoast are inhabited mainly by Odias, a section of Oriya Sudars and Kalinjis. The Odias speak Oriya and the Kalinjis who have no relationship south of the district also know Oriya. The Reddis in Ichchapur taluk also know Oriya.

12. The Sompeta taluk comprises the estates of (1) Jalantra, (2) Budarsingi, (3) Mandasa, (4) Peta Hunda and Baruva, (5) a portion of the Chikati Estate and the Ryotwari tracts on the sea-shore known as

Uddanam. What has been said with regard to the Uddanam villages of the Ichchapur taluk holds good with regard to the Uddanam villages of Sompeta taluk also. The Jalantra Estate was owned by an Oriya Zamindar but is now in the hands of the Raja of Vizianagaram. The people are either Oriyas or Oriya-speaking. The observations made with regard to the Kalinjis of Berhampur taluk hold good with regard to the Kalingas of the Jalantra Estate as well. The people of Budarsingi are Oriyas and the Zamindar is an Oriya. The Zamindar of the Mandasa Estate is an Oriya and the population consists of Oriyas, Kalinjis and Kapus. What has already been said with regard to Kalinjis also applies to Kalinjis of the Mandasa Estate. The Kapus of the Mandasa Estate know Oriya and have kinship with the Kapus of Bodokemidi Estate who speak only Oriya. They have no relationship with people beyond the district. The proprietary estates of Baruva, Peta and Hunda are owned by Oriyas and are peopled by Oriyas, Kalinjis of the same class as reside in Berhampur taluk and know Oriya, and most of them get Oriya Puranas read out to them by Oriya Brahmins. The portion of the Chikati Estate in Sompeta taluk is owned by an Oriya Zamindar and is peopled by Oriyas or Oriya-speaking people. The Kalinjis residing in this part of the Chikati Estate are of the same class as the Kalinjis of Berhampura taluk.

13. The Tekkali taluk consists of the estates of (1) Tarla, (2) Nandigam, (3) Tekkali; and (4) small proprietary estates. The owners of Tarla, Nandigam and Tekkali are Oriyas as well as of some of the small estates. The people are Kalinjis, Kapus and Oriyas. The remarks already made about the Kapus, Kalinjis, hold good with regard to Kapus and Kalinjis of these Estates.

14. The Parlakimedi taluk consists of the Parlakimedi Agency, the Parlakimedi Estate and the Hiramandalam village belonging to the Raja of Vizianagaram.

15. Observations have already been made with regard to the Parlakimedi Agency. The village of Hiramandalam originally belonged to the Parlakimedi Estate but was excluded from it before or at the time of the Permanent Settlement. The population of the village consists of Oriyas, Kapus and Kalinga Komatis.

The Estate of Parlakimedi is owned, as has been stated already, by a descendant of Kapilendra Deo, as king of Orissa and is an Oriya. The population consists of Oriyas, Kapus and Kalinjis. Oriya was the language of the estate before 1832 when a Telugu gentleman was appointed as Manager of the estate which was then under the Court of Wards. Gradually Telugu and Telugu officials replaced Oriya and Oriya officials. During the transitory period the Court of Wards found it necessary in 1850 or thereabouts to appoint an Oriya Shirastadar besides a Telugu Shirastadar. As Oriya was not recognised as Court language and Telugu was the language used in the estate office during the administration of the Court of Wards, Oriya found no place in the land of such Oriya poets as Gopal Krishna Patnaik, Padmanabha Poricha, Gourahari Poricha and others. A grandson of Gopalakrishna Patnaik learnt Telugu to the neglect of his mother tongue because, as a village accountant, he was forced to maintain its accounts in Telugu. Even in 1912 when grouping was introduced in the Parlakimedi Estate, when Mr. Bhore (later Sir Joseph Bhore) was the Sub-Collector of Chicacole division, the Manager-in-charge of the Parlakimedi estate under the management of the Court of Wards objected to the appointment of one Ramachandra Naiko or Naidu as Headman of the Nulakajodu group on the ground that he knew Oriya only and did not know Telugu but the Sub-Collector over ruled, the objection, and appointed Ramachandra Naiko or Naidu as Headman. Ramchandra Naidu belonged to the Kapu caste. He is an instance of a Kapu learning to read and write Oriya voluntarily. The head of the Kapu caste is known as Mondolo Naiko, an Oriya title which he receives from the Raja of Parlakimedi and resides at Bhusukudi, a village in the estate. The caste head and other members of the family know and speak Oriya.

16. The Census of 1901 which were compiled before any agitation was started for amalgamation of Oriya-speaking tracts under one Provincial adminstration and Risley's proposals of the Government of India can alone be taken as correct and reliable, the Census figures of 1911, 1921 and 1931 having been compiled by and under the guidance and supervision of persons interested in the agitation and counter-agitation relating to the amalgamation of Oriya-speaking tracts. Corrupt forms of the Oriya language have been misrepresented as independent languages and certain Oriya castes and classes have been falsely returned as Telugu or Telugu-speaking in the Census figures of 1911, 1921 and 1931.

17. It is not only just but also absolutely necessary for the preservation of the Oriya community and its culture from extinction that a separate Province should be formed incorporating all the Oriya-speaking tracts including the areas described in paragraph six supra."

Extracts from the Memorandum submitted by the Ganjam Defence League

HISTORICAL CONSIDERATIONS

11. "If the history of Orissa or of Ganjam be examined, it becomes apparent that the pathetic phrase of the Oriya leaders describing Ganjam as dissociated from Orissa, "as a limb separated from the body" or the use of such expressions as "dismemberment of Orissa", "re-union of Ganjam with Orissa", "her dismembered condition at present", "this unnatural bifurcation, vivisection, and fragmentation of the country", which are used in the memorandum presented by the Raja Saheb of Parlakimedi to the Round Table Conference and in the other memorials presented by Oriya leaders are mere rhetoric intended to mislead the authorities. There was never such organic and vital connection between Ganjam and Orissa as the phrases above quoted imply;

(a) in pre-historic times, or

(b) in the days of Hindu sovereignty, or

(c) under the Muslim rule, or

(d) during the short-lived French supremacy, or

(e) since the district came under the British Government.

The authors of the phrases above quoted cannot certainly suggest when, how, and by whom this limb of Ganjam was truncated from the body of Orissa.

12. From the time of the Mahabharata it clearly appears that there were two Kalingas, one always appearing in connection with Vanga and the other as a part of southern India. Arjuna in his Bhupradakshana first visited Anga, Vanga and Kalinga and performed all the religious ceremonies in that tract, thereafter left the Brahmans at Kalingadwara, entered Kalinga and visited Mahendragiri. The Kalingadwara referred to in this connection in the Mahabharata is the natural boundary described by Hunter in his history of Orissa. This boundary is to be found even to-day. Hunter says, in his Orissa, Volume I, pages 170 and 171, that the mountain spurs which run down to the sea south of the Chilka lake form a well defined boundary between Orissa and Ganjam.

13. In the Sabhaparvam (Rajasuyam) of the Mahabharata, Arjuna went for the establishment of domination to the north, Bhima to the east, and Sahadeva to the south. Bhima established his sovereignty over the territories in the east up to the sea coast. He conquered the king of Tamralipta; Tamralipta was the capital of Orissa in old times. He also conquered the kings that lived on the sea coast. Sahadeva exacted tributes from the Pandyas, the Dravidians, Udrakeralas, Andhras, and Kalingas. From this it is clear that the northern Kalinga which was Utkal was treated as a part of the northern India, while the southern Kalinga of which the northern limit is the Chilka lake, was treated as a part of the southern India or Deccan. This distinction between the northern Kalinga and the southern Kalinga was also maintained during the rule of the Hindu Rajas by collecting pilgrim tax from the pilgrims who visited Puri coming from below the natural boundary above referred to. Hunter states on page 172 of his Orissa, Volume I:— 'The native Government of Orissa practically acknowledged the natural boundary as the political one, treating as foreigners all devotees who came from the southern side of the Ganjam river, levying a ten per cent higher tax from them. This distinction found legislative recognition in our earliest Pilgrim Law-three years after the country passed under the British rule.'

14. The erection by Asoka of two pillars, one at Dhoili in Utkal and the other at Jaugada in the Ganjam district, clearly indicate that Utkal was one province and Ganjam was a part of another province at the time of Asoka. The inscription at Dhoili was addressed to his son and his agent, while the inscription at Jaugada was addressed to the Mahamantra (administrator) at Sampana or Sompeta.

15. During the time of the Hindu Rajas, it is clear that Orissa was ruled by the so-called Kesari Kings, that Kangoda or southern Kosala which is situated to the north of Ganjam was ruled by Sailobhdva kings, and that the southern Kalinga of which the Ganjam district formed the northern part was ruled by the Ganga kings, and it is the Ganga kings that extended their dominion in the north over Kangoda and Utkal.

16. It will be seen from page 316 of Hunter's Orissa, Volume I, that Orissa under the Lion-line (474-1132A.D.) formed a strip of about 185miles long by 60 broad extending from Khansbans river a little to the south of Balasore city, to the Rushikulya river and inland from the sea to the Tributary of Dhenkanal. It will also be seen from pages 317–319 of Hunter's Orissa, Volume I, that under the Gajapati Dynasty (1132 to 1532 A.D.) the country south of Chilka formed a separate Division distinct from Orissa and that this southern Division refused to pay

tribute and that the administration of the Gangetic line continued to be merely nominal over it. The following reference also appears on page 997 of Maltby's District Manual of Ganjam:—"The wild nature of the country in Ganjam rendered their administration however merely nominal, and they were probably induced by these considerations to establish their own servants as Rajas or Lords of the Marches to keep the wild aboriginal tribes of Khonds and Savaras in check."

17. The Oriyas of Ganjam district left their natural home Orissa, came to the Ganjam district as cultivators, priests, advisers and courtiers of the Oriya chiefs that were established on account of the relationship with the kings of Orissa as fiefs of the several territories in the Ganjam and Vizagapatam districts. The assertion that Ganjam is the natural home of Oriyas and that Telugus are domiciled settlers, is opposed to historical facts.

18. The Musalmans of Bengal conquered the northern portion of Orissa proper including Midnapur and the southern portion of Orissa proper became subject to the sovereignty of the Maharattas, while the Muhammadan sovereigns of Golkonda conquered the southern India upto the northern limits of Ganjam.

19. About 1571 A.D. a Muhammadan king from the south invaded the country upto the Chilka lake and he and his successors held for 180 years the district of Ganjam which including the Ichchapuram Province then known by the name of Chicacole Circar was controlled by the Nizam of Hyderabad. The principal seat of Government for this tract of country was Chicacole, while Ichchapuram was the seat of a Sub-Government (Ganjam Manual, Page 99). The Chicacole Circar extended from the Godavari to the Chilka lake (Orme's History of Hindusthan, Volume 1, page 335) and Ganjam was the last town in the Chicacole Circar (*vide* Volume 2, page 361).

20. The Northern Circars passed for a brief period in the eighteenth Century into the hands of the French and then finally came under the British rule in 1766 and still maintains its position.

21. To sum up the last three paragraphs, the Northern Circars came under the British rule in 1766, while Orissa was under the Maharatta rule and did not come under the British sovereignty until 1803. The Ganjam district has been a part of the Northern Circars throughout the British rule; and, prior to 1766, under the short-lived French rule as well as under the Muhammadan rule. Ganjam was a part of the Chicacole Circar and was controlled by the Musalman authority from Hyderabad for about 180 years from about 1571 to 1753 when the Chicacole Circar, with the other districts of the Northern Circars, was granted to the French by Salabat Jung, the same Nizam who ceded this country to the English six years later, though they did not take actual possession of it for seven years longer. It will thus be seen that Ganjam has for nearly four centuries of Muhammadan and European rule been an organic or integral part of the Northern Circars, even if we take out of consideration a similar position held by it *under the Hindu rule for several centuries.* Any disturbance of the prescription of such a long period will be keenly felt by us and is bound to provoke considerable discontent.

22. In paragraph 9 of the Memorandum presented by the Government of India to the Indian Statutory Commission on the subject of the amalgamation of the Oriya-speaking peoples, they state that Ganjam did not form part of Orissa in the last four centuries. With reference to the statement that "Ganjam is known to have formed part of Kalinga which included Orissa proper," it is submitted that there were two independent Kingdoms of the name of Kalinga in ancient times; and Orissa formed part of the northern Kalinga, while Ganjam formed part of the southern Kalinga. The term Utkal was used to designate what is called "Orissa", and when it became current, the term Kalinga was used to signify Ganjam and part of Vizagapatam. Similarly, the statement that "in the 15th century the Gajapatis of Orissa still ruled in Ganjam" requires also, a qualification, as this rule was nominal and even then Ganjam was treated as a separate entity different from Orissa as will be seen from the preceding paragraphs.

23. In paragraph 2 of the memorandum already referred to, the Government of India say:—"The authentic home of the Oriya race may well be said to be within what are now the three sea-board districts of Cuttack, Puri and Balasore." Again, they say in paragraph 3 of the same memorandum:—"As their power grew, their natural line of extension was in the low country round the sea board to the south, but against the Telugus they made little real headway. The mountain spurs, which run down to the sea on the south of the Chilka lake, formed a well-defined natural boundary which early tended to be accepted as a political boundary." In paragraph 7 of the memorandum it is stated that "In the year 1592 Man Singh, Akbar's Hindu general, annexed Orissa to the Mugal Empire (the sea board districts of the present

Orissa division being included in that definition, but not the District of Ganjam).

24. It will thus be seen that Ganjam has for more than four centuries been an organic or integral part of the Northern Circars, and that its transfer from Madras, instead of restoring a long lost limb of Orissa, will have the effect of excising a portion of the Circars and seeking to graft it on to Orissa of which it had never formed a part. Though historical connections between one province and another may, generally speaking, have no independent value, yet this argument must be of use as supporting other considerations that point in the same direction.

HISTORY OF ORIYA MOVEMENT

25. It is not due to any instance of administrative ineptitude or inefficiency, any miscarriage of justice, any social or economic disaster or hardship, or any kind of failure under the Madras Government that the Oriya leaders of Ganjam are agitating for its excision from the Madras Presidency. The idea is foreign in its inception. In the old days the Lieutenant-Governor of Bengal governed not only the whole of Bengal but also Assam, Bihar, Chota Nagpur and Orissa. Owing to its enormous charge, the Bengal Government could not cope efficiently with the great famine in Orissa in 1866 when half a million people perished. Then the Secretary of State suggested the advisability of relieving the Bengal Government by separating Assam and possibly Orissa. Ten years later, the idea of uniting all the Oriya tracts under one administration struck the leaders of Orissa. It took 25 years longer before this idea penetrated into Ganjam. It was there engineered by persons who came from Cuttack. One Mr. Nilamoni Vidya Ratno of Cuttack started an Oriya Weekly at Rambha and propagated the idea. The incorrect language Census Statistics of 1901 which will be discussed presently gave impetus to the movement and a petition was presented to the Government of India in 1903. It was on the strength of the incorrect statistics of 1901 that the Government of India made a reference to the Government of Madras in December 1903. In 1904 the Government of Madras strongly protested against the proposal on some specific grounds and also on the general ground that "it is useless to strive after administration on linguistic uniformity which both geographical and ethnological conditions combined with the ordinary course of trade and commerce and consequent commingling of races render absolutely incapable of satisfactory fulfilment". While the reference of the Government of India, No. 3678, dated the 3rd December 1903, was printed as Appendix III to the Memorandum of the Government of India, the reply dated the 20th June 1904 of the Government of Madras has not been published. So this reply is submitted as Appendix to this Memorandum.

26. The National Congress passed the following Resolution in December, 1903:—

"That this Congress views with deep concern the present policy of the Government of India in breaking up territorial divisions which have been of long-standing and are closely united by ethnological, legislative, social and administrative relations and the Congress deprecates the separation from Bengal of Decca, Mymensingh, Chittagong divisions and portions of Chota Nagpur division, and also the separation of the Districts of Ganjam and Vizagapatam." Sir Andrew Fraser, Lieutenant-Governor of Bengal, in his letter No. 2719-J.D., dated the 12th September 1904 opposed the transfer of the Madras Oriya peopled tracts on the ground that the Telugus in the District of Ganjam formed 28 per cent of the population and the necessity of administering to the interests of this large population would give rise to immense difficulties even under Bengal. The Government of India dropped the proposal to transfer Ganjam from the Madras Presidency with the following observantions:—"It is shown there that the transfer would give rise to serious difficulties in conneciton with the linguistic and racial conditions and the geographical conformation of the tract in question, that it would greatly complicate and confuse its judicial arrangements, and that it would place the administration of peculiar land revenue system in the hands of officers who would have no acquaintance with the principles on which it is based or with the language in which the bulk of its records are and must continue to be maintained."

27. In reply to a memorial presented by the Oriya leaders of Ganjam after the formation of Bihar and Orissa to add the Oriya-speaking tracts of Madras to that province, the Government of India stated in 1912 that the proposed union was "unnecessary and undesirable." The Oriya leaders approached Sir Arther Lawley and Lords Carmichael and Pentland and were informed that the question would not be reopened. In 1920 a resolution was moved in the Legislative Assembly by Mr. Sachchidananda Sinha in favour of the amalgamation of the Oriya-speaking tracts. The Government of India promised an enquiry and the resolution was not pressed.

28. On the 8th February 1927 Pandit Nilakantha Das moved a resolution in the Legislative Assembly for the amalgamation of all Oriya tracts under one local administration. The Home Member informed

the house that the Governments, both of the Central Provinces and of the Madras Presidency, objected to any transfer of territories under their jurisdiction, while the Government of Bihar and Orissa wished to be assured that any territories which might be transferred to them should be financially solvent. He stated that, as a matter of practical politics, he thought that they must reject for the moment any idea of a separate administration for Orissa, and the question really to be decided was what could be done in the way of smaller modifications. He commented on the differences of opinion disclosed in the debate, and stated that, when Government had to choose between the numerous conflicting views on the fate of Orissa, it would be after the consideration of discussions in the local Legislative Councils. The Legislative Council at Madras has never passed any resolution regarding the transfer of any portion of the Ganjam district from the Madras Presidency.

VIEWS OF THE GOVERNMENT OF MADRAS

36. The attention of the Government of Madras was drawn to the debate in the Legislative Assembly on Mr. Sinha's resolution above referred to. In 1922 the Government of Madras referred to certain administrative objections, for instance, the distribution of other languages within the Oriya-speaking tracts of the Madras Presidency; the intimate relations between forest areas and the plains; and the absence of communications to the east and the north. Lastly, there appeared to the Government of Madras to be strong financial objections to forming a Province consisting only of Oriya-speaking tracts; they stated that the cost of administration of the Agency tracts amounted annually to a sum of about Rs. 30,00,000/-, of which only a small part was met by the revenue from that area. The Government of Madras then expressed the opinion that they did not consider that it would be to the advantage of the country as a whole to transfer the Oriya-speaking tracts of Madras Presidency either to an Oriya Province or Sub-Province or to the Province of Bihar and Orissa. They did not consider that a commission of enquiry to go into the whole question would justify the expenditure which would be involved.

37. In 1925, on the publication of the Philip-Duff Committee enquiry report, the Government of Madras were again asked for an expression of their views. After some preliminary comment on the difficulties inherent in any linguistic redistribution of Provinces, the Government of Madras stated that the report prepared by Mr. Philip and Mr. Duff gave the Governor in Council no reason to change the views expressed in 1922. The Government of Madras considered that the value of enquiry made by Messrs. Philip and Duff was much discounted by a defect in the terms of the reference given to them in that they were required to ascertain the views only of the Oriyas, and not of the other elements in the local population whose views they were unable to take into account. The Government of Madras stated that the area in which the Oriyas largely predominated was small, and with the possible exception of the part lying between the left bank of the Rushikulya river and the Orissa border, was inextricably intermingled with the areas predominantly Telugu. The Government of Madras then recounted the following obstacles which in their opinion made the transfer of any portion of Ganjam district undesirable:—

(a) there is no intimate relationship between the Oriyas of Ganjam and the Oriyas of Orissa. In manners and customs and even in language, both spoken and written, there are considerable differences;

(b) there is no separate or distinct portion of the district which is peopled entirely by Oriyas. Even in parts of the district where as many as 75 per cent of the population speak Oriya, Oriya-speaking villages are intermingled with others in which only Telugu is spoken;

(c) the statistics of language are misleading. Telugu people living in villages more largely populated by Oriyas may be obliged to speak Oriya, but they are not Oriyas and should not be so classified.

(d) the aboriginal tribes in the Agency tracts of the district have no linguistic or ethnic affinities with the Oriya population;

(e) the mass of the Oriya Population of Ganjam is not sufficiently advanced to be competent to judge where its interests lay.

In paragraph 10 of the Report Messrs. Philip and Duff have enumerated certain grievances represented by the Oriyas in the Madras Presidency. The Government of Madras stated that they were taking steps to palliate their disabilities as far as practicable, notably with reference to the use of the Oriya language in public offices and the employment of Oriya officials in the public service. They considered that the practical solution of the problem lay in

further improving existing conditions, and not in creating fresh difficulties by amalgamation with a population and with an administration with which the Oriyas of the Madras Presidency are unfamiliar. The Governor in Council considered therefore, that the balance of advantage was wholly on the side of leaving things as they are, and added that the Madras Ministers fully concurred in that view.

38. In 1926 the Government of Madras adhered very strongly to the objections which it had maintained in 1904, in 1922, and in 1925 to the transfer of any portion of the Madras Presidency. The Government of Madras also stated that the views of the Governor in Council were shared by the Honourable Ministers, one of whom being a native of the Ganjam district and one of its representatives in the Legislative Council, was in a position to speak with special authority.

39. The Government of Madras have also stated that the taluks proposed for transfer were determined by the language test alone. But this test is not conclusive. The real test is that of caste, sect and religious associations; and, if it be applied, it is likely that a much smaller area can alone claim to be Oriya. Again, the Ganjam Agency tract is not an Oriya. The chief tribes are Khonds who are Dravidian and Savaras who are Kolarian.

The Oriya inhabitants of the Agency are mere birds of passage. If only the southern part of Ramagiri is left to Ganjam, the Savaras will be "dismembered" in the attempt to amalgamate the Oriya area. For these reasons, the Government of Madras are definitely opposed to the proposal for the transfer of taluks from the Ganjam to the Orissa division of Bihar and Orissa.

ADMINISTRATIVE AND LEGAL DIFFICULTIES :

46. If the suggested change be carried out, the law of personal rights, the common law of land tenures, the enactments relating to the rights of Zamindars, Jagirdars, Shrotriemdars, Proprietors, Ryotwari Pattadars, Inamdars and Tenants, the laws relating to the recovery of rent and revenue, all other special and local laws enacted by the Madras Government with special reference to local conditions and habits of the people living in the Madras Presidency including Ganjam, the methods of administration to some extent, and many other matters specially suited to the localities, will have to be dislocated. Again the common and customary law of land tenures obtaining in Orissa differs from that obtaining in Ganjam. The ryotwari system of Ganjam requires a special knowledge of the regulations relating to remission, irrigation, the village system and other matters closely touching the daily life of the ryot. If the system is to be administered to the contentment of the people, it must be by officers imbued with its principles and trained throughout their services in its methods. The ryots in Ganjam pay the revenue due to the Government in four kists, while it is collected in two kists in Orissa. The system of temporary settlements prevailing in Orissa is unknown in Madras. The Revenue and Rent Recovery Acts of Orissa and Madras vary. Acts relating to the administration of Municipalities and Local Boards are different, as also those relating to hereditary village servants, the land cess and water cess, etc. What is more, Ganjam with its peculiar laws and customs would form but a small portion of the proposed province of Orissa; and for the administration of this small area, the officers of that province would have to acquire a special knowledge of the laws and customs and would in any case lack that practical experience which is required for their proper administration. Further, there is the danger of the laws, etc., becoming stereotyped unless the modifications introduced from time to time by the Madras Legislature as also the bye-laws, circular orders, etc., be also extended to Ganjam as they are made. This would in effect mean administration of Ganjam by Orissa second-hand through Madras. If, again, such new measures or modifications do not commend themselves to the Government of Orissa, they will have to enact such modifications as in their opinion are necessary in the interests of Ganjam for the efficient administration of which they will be responsible; and this would again add to the labours of the Government of Orissa. The large number of Telugus throughout the tract and the fact that the bulk of the Government records have been kept in Telugu will render it essential for the officers employed to acquire a knowledge of Telugu, which is far more difficult to learn than Oriya.

47. If various laws, regulations, and Acts which are now in force in Ganjam, notifications and rules having the force of law and standing orders of the Board of Revenue, be not adopted after the transfer, and if the Orissa laws be introduced into the district, Ganjam will suffer seriously, and many valuable rights which have sprung up under the existing enactments will be imperilled and the uncertainty liable to be introduced by the change will be out of all proportion to the supposed benefits of the contemplated linguistic union, and would create a good deal of unnecessary confusion where peace and order

prevail. Again, as Ganjam with its peculiar laws and customs would form a small portion of Orissa, its needs are most likely to be neglected, as it cannot hope to have an adequate representation. If sufficient knowledge of the complicated revenue system of Madras including Ganjam be wanting in the gazetted officers employed in Ganjam or in their superiors, the interests of the ryots cannot fail to be prejudiced. Imperfect control of the subordinates, delay, intrigue and consequent hardship to the landholding class will follow. No system of land revenue, least of all the Madras system, will stand the strain of being carried on by officers who have but an imperfect knowledge of its principles.

IMPRACTICABILITY OF AMALGAMATION

48. Assuming, for the sake of argument, that a redistribution of Provinces on a racial or linguistic basis will bring about the prosperity, contentment and happiness of the people, no case can be made out for the proposed transfer of the Ganjam district to an Oriya Province. So far as Ganjam district is concerned, the Telugus are in a majority. With regard to the occupation of territory, all the area along the whole length of the 100 miles of the seacoast to a depth of 15 miles is inhabited by the Telugus, and the hills and slopes are occupied by Khonds, who in common with Telugus are of the Dravidian (Turanian) stock and by Savaras who are of the Kolarian stock. The tract of the country between is Oriya to the extreme north, mixed at the middle, and Telugu to the south. As for the language, the Oriyas residing in parts of the district like Parlakimedi, Tekkali and Sompeta taluks speak both Oriya and Telugu while the Telugus that live in parts of the district like Goomsur, Purushottapur, Aska and Surada speak both the languages. In fact, the intermingling of the races has advanced so far that one not only has been speaking the language of the other but has also adopted the habits, customs and manners of the other. Thus the division of Ganjam on the basis of race or language presents insurmountable difficulties. Again, if taluks are taken into consideration, the Telugus are in a great majority in the taluks of Parlakimedi, Tekkali and Sompeta, while it is understood that many Zamindars and other Oriyas have consented to the proposed transfer under the influence of the Raja of Kanika and other leaders of Orissa on the assumption that the whole of the district, with the single exception of Chicacole taluk, will be transferred to Orissa. Again, between the Rushikulya and Bahuda rivers, Telugus are in a majority in the towns of Berhampur, Ichchapuram, Chatrapur and Gopalapur. The Telugus have developed these four towns to their present importance, have sunk much capital and have the largest stake in them. If a referendum be made to the residents of these four towns to ascertain their wishes, it is certain the residents will, by an overwhelming majority, vote against amalgamation with Orissa. Again, more than half the Estates owned by the Oriya Zamindars and Proprietors are mostly peopled by the Telugus. The Rajas of Vizianagaram and Bobbili and the Rani of Wadhwan of the Vizagapatam district possess large landed Estates in this district. Besides, there are other Telugu landed Proprietors even in the northern part of the district. In this part of the district which lies to the north of the Rushikulya, Telugu community like the Military class of Telagas, the mercantile class of Kalinga Komatis, etc., have large vested interests. In these parts there are a large number of villages containing a fairly good proportion of Telugus, both in the Government taluks of Goomsur and in the several Zamindari and Proprietary Estates. In the Khallikota and Atagada Estates there are about fifty Telugu villages. In the Zamindaries of Bodogada, Chinnakimidi and Serugada there are a good number of Telugu villages. Even in the small Estate of Biridi, there are as many as twenty-three Telugu villages. There are Telugu villages also in the small Estates of Humma and Palur. The two communities are so intermingled that it is difficult to say that a particular portion is Oriya or Telugu.

49. A glance at the map will show the impossibility of easy communication between Ganjam and Orissa. Ganjam is flanked on the north and west by high ranges of hills. It has every facility for easy inter-course with districts south of it and that is why it has always been a part of southern India from time immemorial.

50. In the Agency tracts, the Oriyas form only 36, 31 and 22 per cent respectively in the taluks of Ramagiri, Balliguda and Udayagiri. There is no cultural, racial or linguistic affinity between the aboriginal inhabitants of these areas and the Oriyas. The former form a distinct factor and should continue under the administration of Madras which by long experience is well equipped by tradition and otherwise to provide for personal rule in those areas through their agents. Fituries and rebellions which are not uncommon in those tracts can be better dealt with by a resourceful and powerful administration

like that of Madras than by the new economically poor administration of Orissa. In this connection, we beg to invite the attention of the Committee to the following remarks of the Government of Madras:

"As a precautionary measure, it is necessary to have Reserve Police forces on the plains ready to proceed to the Agency tracts if necessary, in addition to the reserves maintained in the hill stations. The most suitable places for the location of these reserves are in the Vizagapatam district and in Godavari whence they can proceed quickly to the hill tracts. In the event of disturbances in the latter, the Government of Bengal would be compelled to call on the Government of Madras to assist with its Police as in former times it has been found necessary to apply to this Government for help in connection with disturbances in Bastar, Kalahandi and Nayagarh".

51. There are cogent reasons why the hill tracts of Ganjam and Vizagapatam should not be transferred. Several Zamindars in Vizagapatam have large tracts in the Agency attached to their Estates in the plains. If the proposed separation be effected, it will entail great hardship on those Zamindars, as they will be subjected to two different administrations. If, for this and other weighty considerations which it is unnecessary to dwell upon at length, the Vizagapatam Agency be excluded, the argument in favour of the transfer on linguistic considerations will lose much of its weight, as it will practically shut out from the linguistic union about four lakhs of the Oriya speaking people.

52. The contention about the so-called cultural affinity between the Oriyas of Ganjam and of Orissa is untenable in view of the absence of any social intercourse or relationship between the two peoples, and it is notorious that even the language spoken and written and the linguistic peculiarities in Orissa are different from the language spoken and written in Ganjam.

53. If the proposed change be carried into effect, Ganjam will have to be split up into two portions, one under the Madras Government and the other under the Government of the proposed Orissa province; and the effect of this will be to efface altogether memories and even the name of a district which was lovingly cherished by the people for a long time. Such a transfer will entail a change in the *locales* of official and business centres of the district causing immense loss in a variety of ways.

54. All the Telugus of the Ganjam district are opposed to the proposed amalgamation. There are as many as 573,417 Telugu speaking people according to the Census of 1921 in the ten taluks proposed to be transferred from the Ganjam district plains, while the real number of Telugus according to race and caste is about 50 per cent higher. The other communities including Muhammadans numbering 67,563 besides Oriyas do not favour the proposed transfer. Undoubtedly there is united opposition among the Telugus, while there is no unanimity amongst the Oriyas regarding the proposed amalgamation. The Oriyas who are opposed to the transfer do not come forward, because those that dare to think, write or speak against the proposed transfer are cried down to shame in the eyes of their community, and the religious instincts and superstitions of the masses are worked upon in the name of the sacred Jagannath to create a liking for union with Orissa.

PROPOSED AMALGAMATION NOT BENEFICIAL TO ORIYAS

55. Orissa is admittedly a very poor country. It is subject to frequent visitations of famines and floods. Union of Ganjam with such a poor country is not likely to prove beneficial to the Oriyas or other communities inhabiting the district. The Government of Madras is prosperous and is spending Rs. 4-3-1 yearly for each of us for our education, sanitation, medicine and general administration. The Bihar and Orissa Government spends Rs. 1-12-9 per head. Please see page 233 of Volume II of the Report of the Indian Statutory Commission. Orissa alone cannot perhaps spend even half of it. If Ganjam be transferred to Orissa, the Government may not be able to maintain the present facilities for education, medicine etc., and, in any case, no improvements can be effected by them with the result that all the inhabitants of the transferred area including Oriyas will suffer. The starving millions of Orissa have been inducing the Oriyas of Ganjam to join them only to alleviate their sufferings at their cost. The talk of all round racial progress and resuscitation of ancient culture is a delusion. The contemplated improvements to the Rushikulya Project and other irrigation works may not be executed for a long time. The Government of Madras have always evinced special interest in the solution of the Oriya problem by the adoption of liberal measures; such as, charging only half fees in schools and colleges, instituting scholarships for the special benefit of the Oriyas and preferring the Oriyas in the distribution of official patronage. In the last generation they have made

rapid strides in their education in English and Vernacular and in their representation in public services and Local Boards and Councils. The fact that Oriya language was recognised by the University of Madras as long ago as 1873, while the University of Calcutta ignored it until 1903, shows the interest taken by the Madras authorities in the progress of Oriyas. The number of pupils reading Oriya in schools in the Madras Presidency rose from 32,715 in 1906-07 to 77,617 in 1929-1930. In 1890 there were only two Oriya officials, the Oriya Translator and the Khond Interpreter, now nearly half of the office staff is manned by Oriyas. Within the last decade they have risen to the posts of District Collector, or Deputy Collector, District Munsiff, District Educational Officer, District Health Officer and to other positions of trust and responsibility. Three of the four elected members from the district in the Provincial Legislative Council are Oriyas. If the district be transferred to Orissa, the Oriyas of the District will lose the special concessions they now enjoy under the Madras Government, as their distinction would be lost among the rest of the Oriya population and they would not have that incentive and facilities for availing themselves of the higher education which they now have. The ryots of all communities are likely to lose in course of time the occupancy rights which have been secured to them by the Madras Estates Land Act I of 1908.

CONCLUSION

73. The wishes of a bare majority are not of much consequence in deciding such a momentous change as that asked for by the politically minded Oriyas. Where a strong minority objects to the change asked for, the onus of proof lies heavily on the advocates of change who must prove distinctly how economically, administratively and otherwise the area affected stands to gain by the change. Otherwise, the *status-quo* must be preserved. It may be desirable to create a linguistic province on the main principle of unity of race, culture and language. This will be achieved by confining the limits of the proposed Oriya Province to the Orissa division as it stands. The addition of any portion of the Ganjam district will destroy such homogeneity. There is no portion in Ganjam district where the Oriya language and culture prevails exclusively. The Telugu culture and language is found mixed even in areas which are predominantly Oriya. The administrative and other difficulties which are now urged by the Oriyas of Ganjam, will be intensified in the new Province of Orissa if any portion of Ganjam is included within its limits.

74. We venture to submit that the Oriya leaders demand the addition of a portion of Ganjam district with the sole object of finding additional revenue out of the surplus, if any, of this district for its utilisation in the nucleus area of Orissa. We enter our emphatic protest against this method of solving the financial difficulties of the Oriya Province. We apprehend that the standard of expenditure on the various services will be lowered and brought to the level of Orissa expenditure and moneys saved thereby will be utilised for the benefit of Orissa.

75. It is hardly necessary for us to submit in this democratic age that the view of a single Zamindar, however, influential he may be, should not prevail when it is opposed to that of thousands of his ryots. After all the Zamindar is only a Collector of Revenue. He is one of those peculiarly placed men in society who are neither here nor there. He is not like the Princes and the Sovereign Chiefs of India burdened with any responsibility legal, constitutional, or perhaps even moral to look after the welfare of his tenants. He has no powers, civil or criminal, over them. He does not minister to their needs in life. Nor does he invest his surplus money in co-operative societies and banks which have been carved out by Government to minister to their needs. This does not mean that occasionally there have not been generous Zamindars who have endowed or built hospitals and educational institutions and patronized culture and learning, but more often than not they have helped to bring them into existence outside their estates, places where they catch the eye of the public and Government better. Unostentatious service of a social and philanthrophic character is not a field of their interest or activities. They are not answerable to their tenants below or Government above or to the wider public around for the manner in which they spend their surplus revenues. In fact, they are relics of an ancient feudal system suffered to exist in the earlier years of a changed Government and are not better than men with large incomes made from business or other sources. They should, therefore, be treated whatever may be their wealth or influence in society, as no more than individuals endowed by Dame Fortune, with exceptional opportunities of money making and money spending. None would argue that because a wholesale merchant or a manufacturer of patent medicines or of a talisman makes large moneys over a wide constituency; therefore his wishes and his inclinations, his prejudices, and predilections should dictate or decide to which Province his constituents should be consigned. Likewise a

Zamindar who is an Oriya, dealing with tenants who are more than 80 percent Telugus, has no right to decide, and is not the factor concerned in deciding, in which of the two adjoining provinces his Zamindari should be placed. Not seldom do we come across cases in which a Zamindar possesses estates located in two adjoining districts or even in a district and a State. There are numerous instances in this behalf. Rights of inheritance and reversion often times bring estates distantly located to a Zamindar as to any individual. Such estates may not even be located in adjoining districts or even in two adjoining Provinces, but may be situated in two widely distant areas, such as Central India and South India. No one would argue that such areas should be territorially linked to gether nor does the language spoken by a Zamindar really concern the tenants. Thousands of Telugu tenants cannot be presuaded or prevailed upon to learn Oriya for the sake of an Oriya Zamindar or *vice versa*. Of course, it is recognised that lately certain Zamindars are preparing their *muchilikas*, receipts and accounts in diglott or in Oriya exclusively. But this is merely a process of creating evidence for a future demand. The interests of tenants who labour in the field, who spin and toil all day long, must constitute the supreme consideration in the redistribution of areas between two adjoining Provinces. Their interests and their wishes must be the sole criterion for judging whether they shall go to the Andhra or Oriya Province. A Zimindar who speaks Oriya and has tenantry, 80 per cent of whom are Telugus cannot for the sake of his own convenience and his own wishes drag with him thousands of helpless ryots into a strange Province with a strange language as the Court language. The position would be as bad as it would be if to day the Court language of all the Judicial Courts in India should be declared English. Fortunately, it is not so. Even so, should the thousands of tenants be not forced to adopt as their Court language-a language other than their mother tongue. It is for this reason that we urge that the self-interest of the Zamindar should not overweigh the justice and fair play that his tenants must get as their elementary right.

76. Oriyas and Telugus have been living together amicably for centuries maintaining most cordial relations, and bifurcation of the district will intensify the dissensions, disputes, and bickerings which the present agitation has introduced. We humbly submit that no disturbance of the *statusquo* is warranted by historical, administrative and other considerations and that any change in the existing order of things is fraught with serious difficulties for the administrators and is disadvantageous to the people, and that it will provoke wide and deep-seated dissatisfaction and discontent leading to prolonged, continuous and much stronger agitation from the other communities who are considerable in numbers, who have large and varied vested interests and who have greately helped in the all sided development of the district....."

Recommendations of the Orissa Committee:

After examining all the Memoranda etc., and after orally discussing with various bodies and institutions the Committee made several recommendations of which the following relate to the Ganjam District and Visakhapatnam Agency. A few extracts have been reproduced below:

"57. Since the Ganjam plains are a border tract lying between Orissa and the Telugu lands ro the south, it is probable that the population has from early times been mixed. It is hardly likely that, as some Oriya witnesses have contended, there were, when Ganjam was ceded to the British, no Telugus north of Chicacole. But, however that may be, we are concerned here as elsewhere with existing facts, and as far back as the seventies of the nineteenth century there were Telugu colonies all along the sea coast.

61 An examination of the maps and tables will show that in an area north of a line drawn from the Agency boundary along the northern boundary of the Jalantra estate, then north-eastwards along the Ichchapur Sub-Taluk boundary to Purushottapur on the Grand Trunk Road and thence north of the Surla Salt Factory, and south-eastwards to Sonapur, the Oriyas are in a large majority by the tests both of race and language. A line drawn from Sonapur to Golantra would define still more exactly the Oriya and Telugu areas, but see paragraph 64; it would include part of the Rushikulya irrigation system. The figures, as nearly as they can be calculated, are—

		Race	Language
Oriyas	...	833,985	934,958
Telugus	...	168,982	160,156

The predominance is marked in all areas except the Chikati Zamindari, and a narrow coastal belt. In the Berhampur town the population is evenly divided 48 per cent being Telugu and 47 per cent being Oriya. South of this line the Telugus out number the Oriyas except in the very small Bodarasinghi Zamindari. In the Agency tracts the aboriginal tribes are more than two-thirds of the population, but the Oriyas are not far short of one-third, and nearly one-third too speak

Oriya as their mother-tongue. The number of Telugus is negligible.

62. The Oriyas complained that at present they suffered from many disadvantages. The grievances particularly emphasised were the lack of educational facilities and the preponderance of Telugus in the Government service. It was admitted that the attitude of the Madras Government had been sympathetic. And it is, we think, probable that if most of the clerks, postmasters and canal subordinates are Telugus, this is largely due to the fact that the Telugus are more enterprising and industrious. Just as the Telugus feel the pressure of Tamil competition, so the Oriyas find it difficult to hold their own against the Telugus. Still, it is natural that the Oriyas should demand in an area predominantly Oriya, a major share in the Government services, and it is probable enough that the Telugu predominance does entail for them some inconvenience. It can hardly be doubted, too, that to some extent the education of the Oriya community has suffered. Oriyas who wish to become teachers must pass in Telugu, and it is apparently more difficult for them to do so than it is for Telugus to learn Oriya. Of the universities open to them Madras is distant, unfamiliar and uncongenial; at the new Andhra University Oriya is hardly likely to receive as much attention as Telugu; and it is not always easy for them to secure admission at Cuttack. Nevertheless, the origin of the demand for re-union with Orissa is not to be found in any specific grievances against the present administration. The desire of the educated Oriyas of Ganjam to be included in a separate province of Orissa is genuine and strong; but it is inspired by the ties of race, language, and history, of which they have become increasingly conscious during the last thirty years.

63. Subject to what is said below about the Parlakimedi Zamindari, the educated Telugus are no less strongly opposed to the transfer of any portion of plains; they are less interested in the Agency tracts. They naturally prefer that the Ganjam plains should continue to be attached to the Telugu districts. They have nothing to gain by inclusion in an Orissa province, and whilst they do not admit that the Oriyas in Ganjam have any substantial grounds for complaint, they fear that their own interests will suffer under a Government dominated by Oriyas. The Khonds and Savaras have probably no opinion. Very few of them know anything of the controversy that divides the Oriyas and Telugus, or are capable of forming any judgment thereon.

64. The transfer to a separate province of Orissa of such portion of the Ganjam district, as may on other grounds be thought desirable, will not, so far as we can see, involve any administrative difficulties. Ganjam is connected by road and rail with Cuttack, and is much nearer to Cuttack than to Madras. The whole of the Rushikulya irrigation system lies within the area of Oriya preponderance. A large part of the district is permanently settled, and though the ryotwari tenures have features peculiar to the Madras Presidency, we cannot think that their management would cause any trouble. The Madras Tenancy Law differs in some respects from that of Orissa, but so does the latter from the laws in force in Bihar, Chota Nagpur, and Sambalpur, all parts of a single Province. Sambalpur was for many years part of the Central Provinces, and the old Central Provinces Tenancy Law is still enforced there; a clear proof that a difference in tenancy law is not an obstacle to the transfer of a district to another province. Nor can we take seriously the argument that appeals will lie to another High Court.

65. It has been argued on the Telugu side that a minority is entitled to special consideration if it exceeds twenty percent of the population, and we have been referred in support of this contention, to the Minorities Treaties by which the minorities are protected in various parts of Europe. We cannot see that this argument has any application to the issue with which we are concerned. The Minorities Treaties regulate the treatment of minorities in countries whose boundaries had already been determined; they cannot be cited to prove either that the Oriya claim fails because the Oriyas are less than 20 percent of the population of the Madras Presidency or that no area should be transferred in which the Telugus exceed 20 per cent. There is always an initial presumption against altering administrative arrangements of long standing, but, if a separate province of Orissa is to be created, we can discover no grounds which would justify refusing to include in it the area specified in paragraph 61. As we have shown, the Oriyas in this area outnumber the Telugus by nearly five to one, their desire for reunion with Orissa is genuine and deep-seated; and there are no administrative obstacles to the granting of it. It is unfortunate that this area includes a Telugu fringe; but the narrow coastal belt in which they predominate cannot be detached from the interior, and the wishes of a small minority cannot be the determining factor.

66. We are not, however, agreed as regards the Parlakimedi Zamindari. The majority of the Com-

mittee (the Hon'ble Mr. Mehta and Mr.Phookun) are in favour, for the following reasons, of adding this Zamindari :—

"In conducting the enquiry as to what tracts now included in different provinces should be incorporated in the new Orissa province, if and when created, and in coming to definite conclusions about its boundaries, we have agreed to take among others, the following important facts into our consideration :—

(a) The race to which the people of those portions of the provinces belong;

(b) The languages they speak as their mother-tongue;

(c) The language they speak as their subsidiary language;

(d) The wish of the people residing in those areas.

In determining the boundaries of the new province on the basis stated above we are unanimous in our recommendations except on the question of the inclusion of the Parlakimedi Zamindari where the population consists of Oriyas, Telugus and hill tribes such as Savaras and Khonds. We are all agreed that the Telugus in the said Zamindari form the majority of the population. There is also the population which has been treated as "doubtfuls" as they cannot be definitely classed as either Oriyas or Telugus, but they are very small in number. On the population basis, therefore, the said Estate should ordinarily have been left where it is, i.e., in the Madras Presidency and not transferred to the proposed Oriya province. But we find that the Zamindar of Parlakimedi who is an Oriya by race, caste and culture, and who is looked up to as the leading Zamindar of Ganjam for his family connections with the Puri Rajas, is extremely keen on his Estate being transferred to the new Orissa Province. As far back as 1924, the Raja of Parlakimedi moved a resolution for amalgamation in the Zamindars' Association of Ganjam, a very influential body indeed, and it was seconded by the Raja of Khallikote. They were unanimous in their opinion which was very strongly expressed. And as a matter of fact it is through the efforts of the Raja of Parlakimedi at the Round Table Conference that this enquiry about a seperate Oriya province has been started. We have it from the evidence tendered before us that in the sphere of social, religious, educational and industrial improvements it is the Raja that the people look up to. He maintains a College for men and High Schools for boys and girls, there is an institution for imparting higher education in Sanskrit and he awards scholarships. He has also constructed a railway line extending over 50 miles at his own expense. He treats his tenants justly and fairly irrespective of their being Oriyas or Telugus. This fact is corroborated even by the witnesses who deposed against amalgamation. The wish of such a Zamindar ought, in our opinion, to be taken into account and his opinion ought to carry great weight in deciding in which of the Provinces his Estate should remain. Yet we consider that the mere wish of a single person, however, strong that wish might be, or the simple desire of a Zamindar, however good he may be, should not be taken as the only guiding factor when the interests of people other than those of his race are involved. We have to look over and beyond the present into the future. The Zamindar may be quite a good man to-day from everybody's point of view but he may not be so to-morrow; he may personally continue to carry on the good management of his Estate in interests of all his tenants but his successors may not do so and may change their attitude in favour of their Oriya tenants. But when we find that a large number of Telugus residing in Parlakimedi expressing clearly their wish to go with the Raja to the new Province of Orissa, we cannot but recommend the transfer of the said Zamindari to the new Orissa Province. The Telugu witnesses, without a single exception, have stated in no uncertain terms that they are happy and contented under the Raja and have been living peacefully with the Oriyas within his territory. There has been no complaint that at any time preferential treatment had been given to the Oriya tenants. The Telugus and the Oriyas equally and entirely depend upon their Raja for all comforts and conveniences and for their well-being generally.

On the facts found we have not the least doubt that the tenants of the Parlakimedi Raj are treated well by the Raja and that they truly desire to follow him to the new Province of Orissa.

The Chairman of the Union Board of Varanasi and the Chairman of the Municipal Council of Parlakimedi, both Telugus, state that the said Union Board and the Municipal Council adopted resolutions unanimously supporting the amalgamation of Parlakimedi with the proposed Province of Orissa. The fact that the members of the said local bodies are mostly Telugus, adds considerable weight to the resolutions adopted. The People's Association in Parlakimedi also adopted resolutions favouring amalgamtion. A large number of Memoranda from

Parlakimedi itself supporting amalgamation was presented to us. They contain the signatures of a large number of Telugus also numbering about five thousand. Telugu members of the District and Taluk Boards representing the said area also gave evidence in favour of amalgamation. Headmen of Telugu castes such as Kapus, Baktis, Velamas, Kalingis; and Telangas, as representatives of their castes or as caste-heads, supported amalgamation.

The allegation that some of the signatures of the Telugus were obtained by undue influence could not in the least be substantiated. Savaras and Khonds, whatever their strength may be in the territory, clearly state through their representatives that they wish to go to the new Orissa province. The Christian community through their representative, Rev. Abraham Patnaik, also a member of the District Board, expressed their eagerness to be with the Oriyas in the new province. The Telugu tenants themselves have nothing to gain by remaining under the Madras Government but everything to lose by going against the desire of the Raja who has been very good to them. We have not the least doubt that the Telugu residents of Parlakimedi receive very fair treatment at the hands of the Raja and most of them wish to follow him to the new province.

The Chairman accepts the principle that the wish of the people should be conceded to and that their desire met and on that principle he would have recommended the transfer of Parlakimedi to the Oriya province if only he was convinced that the Telugus had no objection to go with the Raja to the new province, but unfortunately he is not so convinced. The quality of the evidence from Parlakimedi for inclusion is to our mind better and the quantity larger than the Telugu evidence against it and the whole weight of evidence is in favour of amalgamation. There is no doubt that there is some expression of feeling by some Telugus of Parlakimedi against amalgamation but it is very half-hearted indicating that it was fostered by the Ganjam Telugu influence. The Rajas of Parlakimedi have undoubtedly been very good to their Telugu tenants and it is to their interests to keep them happy and contented even when the Zamindari is transferred to the proposed Orissa Province. If, however, in spite of the fact of the Telugus having always received impartial treatment from the Rajas they now go against his wish and desire, it is likely that he may change his attitude towards them. This will surely make them more unhappy than they can ever possibly be if they go to Orissa with him. In support of our contention, we invite a reference to the finding of the Philip and Duff Committee. The Committee made extensive tours in the interior of the Parlakimedi Estate to make detailed and careful investigation which we had not the opportunity of doing, and on the evidence received the said Committee came to the same conclusion, namely, that the people of Parlakimedi who count for anything, wanted amalgamation and the rest wanted to go by the wish of the Raja and on those considerations they recommended the inclusion of Parlakimedi into Orissa.

If most of the Ganjam Oriya Zamindars are taken away from Madras it is only natural that the Parlakimedi Estate also should go with the majority. We do not anticipate that the Telugu inhabitants will suffer in any way from the change recommended. Although it is a permanently settled area the Zamindar cannot enhance taxes at his own sweet will and the apprehension of some of the Telugus that their land-laws will be changed is unfounded. It would be very unfortunate if Parlakimedi is left out on account of a majority of its population being Telugus while other influential Oriya Zamindars are transferred to the new province.

We, for the reasons stated above, do recommend that the Parlakimedi Zamindari should also be included within the boundary suggested by us.

The opinion of the Chairman was as follows :

"The difference between me and my colleagues turns in the main on the view taken of the attitude of the inhabitants. My colleagues believe that most of them desire to be included in a separate province of Orissa. I do not. It is true that the Oriya claim was supported by Telugu witnesses, and petitions purporting to be signed by Telugus. It would be strange if such evidence were not forthcoming in an area owned by a Zamindar who has been a protagonist of the Oriya movement. I do not suggest that it has been obtained by improper means, but in judging the value of this testimony the influence of the Zamindar cannot be ignored. My colleagues have argued that the evidence adduced by the Telugus has been fostered by the Ganjam Telugu influence, but this argument is double-edged. There is no reason to suppose that the propaganda of the Oriyas has been less active than that of the Telugus and it is difficult to believe that it has not had the support of estate officials. In a case of this kind, however, the issue cannot be settled by arguments; the final appeal must be to the impression left by the evidence on those who

heard it, and to my mind the evidence as regards the attitude of the Telugus is quite unconvincing. I do not believe that the tenants have any views on the question of amalgamation with an Orissa Province. They are cultivators whose main concern is with crops, rents and prices, and whose outlook is restricted to the village. Of the educated Telugus, mostly residents of Parlakimedi, it may be that some are 'willing to go with the Raja to the new province', but that as a whole they are in favour of the transfer of the Zamindari. I simply do not believe.

"If this is the position then, as my colleagues justly observe, we must look beyond the present and to the future. With all that they say regarding the Raja of Parlakimedi I cordially agree. It is admitted on all hands that he has done much for the welfare of the estate. But I do not share their fear that if the Parlakimedi Zamindari is excluded his attitude will change, nor even if I did, could I admit that this is a consideration that should seriously influence the decision. Language and race are abiding facts, and ultimately of far greater importance than the reactions of the Zamindar. More than half the total population is Telugu by race, and Telugu is the mother-tongue of nearly two-thirds; and the subsidiary language of forty-five thousand persons. If Parlakimedi is added to a province of Orissa, sooner or later, and probably before very long, an agitation will arise inside and outside the estate for its reunion with the Telugu districts, which will embitter the relations between the Oriyas and the Telugus. In settling the boundaries of the new province, the line should be so drawn as to leave, so far as possible, no minority problem. The boundary which I propose gives to Orissa all the areas in which the Oriya population predominates. If it includes a Telugu minority that minority is as small as it is practicable to make it; and it satisfies, therefore, so far as the circumstances permit, the test on which the Statutory Commission laid stress, namely, the greatest measure of agreement between the area gaining and the area losing territory."

In the Agency tracts, as we have seen, the number of Telugus is negligible; whilst the Oriyas are a substantial proportion of the population, and Oriya is clearly destined to become the language in general use. It is, too, convenient, indeed; if our recommendations below regarding the Vizagapatam Agency is accepted; almost inevitable, that the Agency area should be administered from the plains which they adjoin. It is arguable that for this reason the Parlakimedi maliahs should go with the Parlakimedi Zamindari, which one of us would not assign to Orissa. It is not, however, part of the Zamindari, includes a substantial Oriya element; and is governed by Oriya Bissoyis. Moreover, the balance of advantage seems to lie in placing all the Agency areas of Ganjam under one administration. We are agreed, therefore, in recommending that all these tracts should be included in the new province.

Vizagapatam Agency

The Vizagapatam Agency tracts (of which all except the Gudem Agency is claimed by the Oriyas) are the hill areas, forming part of the Eastern Ghats which lie to the west of the coastal plain. The original inhabitants were aboriginal tribes, but at some remote time the country was invaded by Oriyas, who imposed their rule upon them. Most of it was from the 15th century till the advent of the British, under the rule of the Jeypore Rajas who were nominally at least, tributaries first of the Gajapati Kings and later of the Golconda Kings. After the overthrow of the latter by Aurangazeb, the Agency areas formed part of the Chicacole Circar which, with the other Northern Circars, were ceded by the Mughal Emperor to the British in 1765. But for a long period they remained under native rule; from 1803 to 1848 Jeypore was an almost unknown country to the officers of the district, and its effective administration may be said to date from 1863. Even since that date there have been numerous rebellions (fituris) of the aboriginal tribes the last of which occurred only a few years ago.

The Vizagapatam Agency is, as its history indicates, a very backward tract. The number of persons, who are capable of forming a judgment on any political question is very limited. The Maharajah of Jeypore, however, though evidently not free from anxiety as to the financial consequences of transferring the Agency, favours its inclusion in a separate province of Orissa; and so also does such other opinion as exists. On the Telugu side there was next to no opposition. A few Telugu witnesses said they did not wish to be transferred to Orissa, but it was clear that the Telugu leaders are indifferent to the fate of the Agency. Nor is the reason for this far to seek. It is to be found in the movement for the creation of an Andhra Province. The Agency areas outside Gudem and Golconda contain only a few Telugus, and financially they are a liability rather than an asset. The Telugu politicians, therefore, are not unwilling that they should be detached from the Telugu districts.

A common language tends to create a feeling of solidarity, and if the Agency tracts are excluded, the sentiment in favour of their union with Orissa will intensify as education spreads and the tribal languages are replaced by Oriya. Unless, therefore, there are insuperable administrative or other difficulties, there is a strong case for including in the new province the Agency areas claimed by the Oriyas except (1) the hill Madgole estate which is not part of the Jeypore impartible estate, and corresponds roughly with the area of Telugu predominance in Padwa; (2) the Veravilli and Srungavarapukota tracts where the Telugus are more numerous than the Oriyas; (3) the Palakonda tract; here both the Oriyas and Telugus are few in number, and administratively its attachment to the Palakonda (plains) taluk seems desirable; (4) the south-eastern portion of Gunupur which belongs to the Kurupam estate and is not part of the Jeypore impartible Zamindari. In Gunupur as a whole the population speaking Telugu somewhat exceeds that speaking Oriya, but by race the Oriyas are nearly twice as numerous, and, moreover, Gunupur is part of the Jeypore Zamindari. In Salur the number both of Oriyas and Telugus is very small, and while part of it belongs to the Pachipenta estate owned by the Maharaja of Jeypore, part belongs to the Salur Zamindar. On the whole, however, it seems preferable that here the boundary should follow the line that at present divides the Agency and the rest of the district.

The objections to transferring this area are essentially administrative and economic. The principals are: (1) the main roads in the Agency and the Raipur-Vizianagaram railway run down to the coast. The lateral communications are poor, and there is no route that in practice would ever be used from the Ganjam Agency to the Vizagapatam Agency; (2) the produce of the Agency is exported to the plains, and both its import and its export trade are in the hands of the Telugu Komatis of the plains; (3) the Godavari canal depends for its supplies on the streams which drain the ghats and the country west of them into the Godavari river, and the supply of water in the hot weather might be seriously affected if the forests in parts of the Agency were not adequately protected. The Madras Government can at present enforce whatever measures may be required for this purpose, but would have no such power if the forests were under another Government; (4) there have been frequent rebellions (fituris) amongst the tribes and though there is a force of armed police at Koraput the reserves at Vizagapatam are also available and might be needed.

There is undoubtedly some force in these objections, but we do not regard them as insuperable or even as very serious. Our reasons are: (1) From Ganjam the approach to the Vizagapatam Agency is no doubt by the roads (or the railways) leading up from the coast. But this only means that inspecting officers, such as the Inspector-General of Police and the Director of Public Instruction will have to travel along the coast, and thence by car or rail to the Agency tracts. They will have, in so doing, to traverse territory outside their province, but we do not see that this need give rise to any difficulty. (2) Since there are no internal customs barriers, a change in the provincial boundary will not affect the course of trade which will follow the same routes and be in the same hands as before. (3)Under the present Constitution the Central Government can intervene on any question affecting more than one province, and it is a reasonable assumption that under any future Constitution there will be some authority or tribunal to which Madras Government can appeal if the supply of water to the Godavari canals is endangered by the destruction of the forests in the Jeypore estate. (4) The armed police reserves at Koraput will probably have to be strengthened, if the Agency tracts are transferred, since it will take longer to reinforce them from other districts, but the addition to their strength required will not be large.

This concludes our examination of the proposals and suggestions that have been brought to our notice It will be seen that if the boundaries are fixed as we propose, the province of Orissa will include the Orissa division, Angul, the Khariar Zamindari of the Raipur district, and the greater part of the Ganjam district and of the Vizagapatam Agency tracts. It will have an area of approximately 33,000 square miles and a population of about 8,277,000 persons."

Thus when in 1936 the Orissa State was formed the entire Agency portion and a major plains portion of Ganjam district and a portion of the Agency areas of Visakhapatnam district as detailed below were transferred from the Composite Madras State to Orissa State. The plains portion of the Visakhapatnam district, however, remained unaffected during the above transfers.

Areas transferred from Ganjam district:

(i) Entire Agency area of Ganjam district i.e., Balliguda, G. Udayagiri, Parlakimedi, Ramagiri and Surada Agency taluks;

(ii) A major portion of the plains area of Ganjam district i.e., complete taluks of Aska, Chatrapur, Ghumsur, Kodala, and Surada and portions of Parlakimedi, Ichchapur and Barhampur taluks.

Area transferred from Visakhapatnam district

Complete taluks of Bissam Cuttack, Jeypore, Koraput, Malkanagiri, Naurangapur, Pottangi and Rayagada and portions of Gunupur, Padwa and Parvathipur taluks from the Agency portion of the Visakhapatnam district.

The residuary portion of Ganjam district, namely, Chicacole, Sompeta, and Tekkali taluks and portions of Parlakimedi, Ichchapur and Barhampur taluks of Ganjam district retained in Madras State was added to Visakhapatnam district. The major portion of Parlakimedi taluk (Plains) retained in Madras State was constituted into Pathapatnam taluk. Portions of Berhampur and Ichchapur taluks retained in Madras State were clubbed and consituted into Ichchapur Independent Sub-taluk. Srikakulam taluk was bifurcated into Srikakulam and Narasannapet taluks. All the above changes were made for administrative convenience. After the Estates were abolished under the Madras Estates (Abolition and Conversion into Ryotwari) Act 1948 (Act XXVI of 1948) survey and resettlement was undertaken in the taken over Estates and Inam villages. As it was found that the enlarged Visakhapatnam district was very unwieldy for administration it was bifurcated into Srikakulam and Visakhapatnam districts in the year 1950. The northern half of the old Visakhapatnam district was included in Srikakulam district with headquarters at Srikakulam, and the southern half was constituted into Visakhapatnam district with headquarters at Visakhapatnam. The Srikakulam district thus formed in the year 1950 remained unaffected till the present 1961 Census.

CHAPTER III

POPULATION AND HOUSING

In this Chapter a brief review is made of demographic, economic and social characteristics of the population on the basis of the 1961 Census findings. The tables in the third part of this Handbook will give the fuller and detailed statistical data. The following statement gives an idea of where the district stands in comparison with other districts of the State in respect of certain basic demographic data:

STATEMENT III-1

State/District	Area	Population	Density of population per sq. mile	Percentage of growth of population 1951-1961	Percentage of urban population
(1)	(2)	(3)	(4)	(5)	(6)

Population:

On the lst March, 1961, the reference date of the Census, 2,340,878 persons (1,149,447 males and 1,191,431 females) were found in the district of Srikakulam which means an increase of 10.26% during the decennium ending 1961 over the 1951 population. The average density of population in the district is 602 persons per square mile which is well above the State average density of 339. At the 1951 Census count the density of population in the district was 544persons per sq. mile. The density of the urban population at the 1961 Census count is 5,062 persons per square mile as against the corresponding State average figure of 4,340. Amongst the districts of the State, Srikakulam with an area of 3,889.0 square miles occupies 15th rank in regard to area but third rank as regards population. The district has 509.0 square miles of Agency area inhabited by 71,348 persons. The Agency areas lie in the taluks of Salur, Parvathipuram and Palakonda. The remaining 3,380 square miles are in the plains portion of the district.

Distribution and density of population :

Palakonda taluk has the largest number of people (324,646) living in it, closely followed by Cheepurupalle (318,321), Bobbili (286,207), Pathapatnam (226,674), Parvathipuram (218,471), Srikakulam (217,993),Tekkali (189,984), Narasannapet (166,233), Salur (164,125), Sompeta, (140,941) taluks and Ichchapuram Independent Sub-Taluk (87,283). Only Ichchapuram Independent Sub-Taluk recorded a population of less than a lakh. The density of the population varies considerably from taluk to taluk being as high as 1,003 in Ichchapuram Ind. Sub-Taluk and 959 in Srikakulam taluk and dropping to 831 in Narasannapet taluk, 732 in Bobbili taluk,698 in Tekkali taluk, 689 in Cheepurupalle taluk, 665 in Sompeta taluk, 657 in Palakonda taluk, 490 in Pathapatnam taluk,370 in Parvathipuram taluk and as low as 334 in Salur taluk. Nearly half of Parvathipuram taluk is in the Agency tract and 43,555 persons live in this area. Palakonda and Salur taluks contain 146.00 square miles and 69.00 square miles of Agency tract, covering a population of 20,060 and 7,733 respectively as per the 1961 Census count.

Growth of population :

During the six decades from the dawn of the present century Srikakulam district has recorded an increase of only 46.42% of population as against the State average of 88.73% and particularly during the decennium ending 1961 the population in the district increased at a rate as low as 10.26%, the lowest in the State, with the exception of Mahbubnagar district which recorded an increase of only 9.92%. The growth of population during the decade 1911-21 was greatly retarded on account of famines, epidemics and the great Influenza that visited the country and devastated large masses of population. In the Ageny area as per the 1921 Census count the population decreased by 6.58% and in the plains there was a small increase of only 2.34%. The total percentage of increase therefore, in the entire district reckoning the Agency area also was only 2.07%, the lowest ever recorded till the 1961 Census count. The district however soon recovered from this setback and like the other parts of the State followed the general pattern of a gradual increase in population. The rate of growth of population at the 1931 Census count was at 8.85% and at the 1941 Census count the population growth was 9.09%. At the 1951 Census count the Agency population recorded a decrease of 4.95% and the plains recorded an increase of 5.74%. The overall growth rate of the district population during the decade ending 1951 was 5.43% and this rate was almost doubled recording 10.26% increase as per the 1961 Census findings. The general rate of growth of population has however been below the State average. In 1951 61 the average growth of population of the State was 15.65%. The economy of the district is largely agricultural and there is insignificant industrial growth. The pressure on land is great. There has been exodus of population to the industrial centres as Bhilai, Calcutta *etc.*, as also to the tea estates of Assam and also to Burma.

The statement below gives the percentage of variation of population from 1901 to 1961 for the district as a whole as well as for each taluk. The data are given for the Agency and Plains portions separately

STATEMENT III-2

VARIATION IN POPULATION DURING LAST SIXTY YEARS FROM 1901 TO 1961

District / Taluk (1)	Year (2)	Persons (3)	Decade Variation (4)	Percentage decade variation (5)	Males (6)	Females (7)

Rural and Urban population:

There are 13 towns, 3,246 inhabited and 300 uninhabited villages in the district at the 1961 Census count. The absence of any city or large town only reflects the economic backwardness of the district. In the 1951 Census count there were however 16 towns. At the 1961 Census owing to the stricter definition laid down for the classification of a place to be treated as a town, Chinnamerangi, Kasibuggapalasa and Baruva towns of 1951 Census had to be declassified as rural. Inspite of the decrease in the number of towns the total urban population has increased from 190,785 at 1951 to 204,640 in 1961. The great majority of the total population in the district *i.e.*, 91.26% live in villages while the urban population living in the 13 towns constitutes only 8.74% of the total population. The Agency population constitutes 3.05% of the total population and 3.34% of the rural population.

Sex Ratio:

In this district as per the 1961 Census findings there are 1,037 females for every 1,000 males as compared with 1,052 females for every 1,000 males in the previous Census. In the urban areas of the district there are 1,017 females for every 1,000 males and in the rural areas they numbered 1,038 females for every 1,000 males. It is thus evident that both in rural and in urban areas women outnumber men. The migration of male members of the family to the neighbouring districts of Visakhapatnam, Ganjam, to the industrial areas of Bhilai, Rourkela and Calcutta to eke out their livelihood keeping their families at home may be one of the main reasons for this disparity in the sex ratio.

Age structure:

The following table gives the break up of population according to different age-groups

STATEMENT III-3

Age-group	Persons	Percentage
0-4 years	318,874	13.62
5-9 ,,	327,416	13.99
10-14 ,,	262,007	11.19
15-24 ,,	379,650	16.22
25-34 ,,	364,178	15.56
35-44 ,,	290,358	12.40
45-54 ,,	217,513	9.29
55-64 ,,	121,177	5.18
65-69 ,,	22,674	0.97
70 years and above	36,766	1.57
Age not stated	265	0.01
Total	2,340,878	100.00

It will be observed that able bodied persons of above 15 years and below 55 years constitute 53.47% of the total population and the remaining being accounted for by children and young persons of age below 15 years (38.80%) and old persons of 55 years and above (7.73%).

Marital Status:

Out of the total number of 2,340,878 persons in the district 1,694,588 (828,810 males and 865,778 females) persons are aged above 10 years and constitute 72.9% of the total population. Among these persons aged above 10 years married persons number 1,309,557 (569,081 males and 740,476 females) accounting for 77.28% and this number includes 217,798 (12.85%) widowed (males 39,366; females 178,432) and 26,957 (1.59%) divorced or separated persons (males 10,938 and females 16,019).

Literacy and Education:

The development of a country largely depends upon the educational advancement of its people and hence great stress has been laid on education in our Five Year Plans. Education is the systematic instruction, schooling or training given to young persons for the work of life, while literacy is the ability of a person to read and write in order that he may communicate with the outside world. During the Census enumeration information regarding literacy and educational levels of each person was collected and particulars were so tabulated as to facilitate proper planning for improvement of educational facilities with reference to the needs of the country in various fields.

At the present Census a person who can both read and write any language is taken as literate. A person who can merely read but cannot write has not been treated as a literate. The test for reading is the ability to read any simple letter either in print or in manuscript. The test for writing is the ability to write a simple letter. Children aged 4 years and below have been automatically treated as illiterates. If a person has been successful in a recognised examination or examinations, the highest qualification so obtained has been taken as the level of education of that individual. Columns 18 and 19 of the Village and Town Directory given in the fourth part of this book indicate the number of literates among males and females in each village and in each ward/locality of the town. The following statement gives at a glance the total number of literates as well as their percentage to the population in the district and in each of the taluk of the district, sexwise for the total, rural and urban population.

	U	16,821	8,118	8,703	5,737	3,970	1,767	34.11	48.90	20.30
11 Ichchapuram I. S. T.	T	87,283	39,567	47,716	13,682	10,763	2,919	15.68	27.20	6.12
	R	74,322	33,486	40,836	9,658	8,054	1,604	12.99	24.05	3.93
	U	12,961	6,081	6,880	4,024	2,709	1,315	31.05	34.55	19.11

It may be seen from the above statement that 15.71% of the total population in this district are literates; literate males form 12.13% while the literate females constitute only 3.58% of the district's population as against the corresponding figures of 21.20%, 15.24% and 5.96% respectively for the State. In the Agency taluks of Salur, Parvathipuram and Palakonda the literacy standards are very low. In the plains portion also the percentage of literacy in certain taluks like Sompeta and Cheepurupalle is low and these have pulled down the district's literacy percentage far below the State average.

The following table will illustrate the literacy figures in the district according to the different age-groups.

STATEMENT III-5

PERCENTAGE OF LITERATES BY AGE-GROUPS

Age-group	Total						Rural

It is seen from the above table that a considerable proportion of children of school going age do not attend schools. The number of educational institutions and scholars studying therein in the year 1960-61 are given in a separate statement under Administrative Statistics in Part II of this Volume and may be referred to.

Working population :

Persons engaged in productive work whether they derive income or not have been treated as 'Workers' in the 1961 Census. In respect of seasonal work like cultivation, livestock keeping, household industry etc., if the person had some work for more than one hour a day throughout the greater part of the working season, he has been recorded as a Worker. Persons temporarily incapacitated, under trial prisoners if they had been working before, have also been treated as Workers. Those that were treated as 'Non-Workers' were wholetime students, housewives, dependants, persons permanently disabled from work, retired persons, people of independent means for which they need not work, beggars, convicts in jail, unemployed persons *etc.*

From the above classification of Workers and Non-Workers, it may be seen that the definition of a Worker has been liberally conceived. Any one who generally spends more than an hour per day on any particular productive occupation has been considered as a Worker. Out of the total working population in the district more than three-fourths of the population *i.e.*, about 75.66% is found to be employed in the primary sector (Agriculture) and the remaining 24.34% of the district's population is found to be employed in Non-Agricultural occupations.

There are 908,297 persons in the age-group of 0-14 years representing 38.80% of the total population. With the introduction of compulsory education this age-group will henceforth be automatically eliminated from the working population. In the 1961 Census, it was seen that 137,905 persons of this age-group belonged to the working population. That is 15.18% of non-adults constituted the earning members. 52.53% of females come under the inference of workers.

Persons engaged in Agriculture (Cultivation and Agricultural Labour) as their main work constitute 75.66% of the total working population. The following table based on a 20% of sample of Household Schedules gives the figures of the sample Households engaged in Cultivation classified by interest in land and size of land cultivated in total, rural and urban areas separately.

STATEMENT III-7

Non-agricultural occupations provide employment for 24.34% of the total working population. The following table illustrates the broad categories of Workers other than in Cultivation and Agricultural Labour and the number of persons in each with their percentage to the total working population.

(1)	Total persons (2)	Percentage (3)
Other Services (Category IX)	100,146	7.50
Household Industry (Category IV)	96,673	7.24
Trade & Commerce (Category VII)	59,004	4.42
Mining, Quarrying *etc.*, (Category III)	43,772	3.27
Manufacturing Other than Household Industry (Category V)	13,401	1.00
Transport *etc.* (Category VIII)	7,690	0.58
Construction (Category VI)	4,454	0.33

Medical facilities

Though there is a Government General Hospital at the district headquarters, medical facilities in the district are quite inadequate for the population of the district. As seen from the Census population returns there are only 82 practitioners of modern medicine of whom only 6 are women. This means that there is one doctor for every 28,547 people and one lady doctor for 198,572 women. Further there are only 2 Dentists, 73 Nurses and 176 Midwives and Health Visitors.

The following table illustrates the average number of beds, Doctors, Dentists, Nurses, Midwives and Health Visitors per 100,000 of total population.

(1)	Number (2)	Per 100,000 Population (3)
Beds	316	14
Doctors	82	4
Dentists	2	0.1
Nurses, Midwives and Health Visitors	249	11

There are 844 persons who practise the Ayurvedic and Homeopathic systems of medicine. There are about 226 persons who profess to be physicians and have been classified under "Others."

Other Professions:

There are 599 Architects, Engineers and Surveyors in the district. Of these 155 are Civil Engineers, 11 Mechanical Engineers, 22 Electrical Engineers, 3 Chemical Engineers, 8 Mining Engineers, 353 Surveyors and 47 Others who have not been elsewhere classified.

On the educational side there are 41 University Teachers, 1,017 Secondary School Teachers, 6,148 Middle and Primary School Teachers, 2 Nursery and Kindergarten School Teachers and 604 Teachers who have not been elsewhere classified.

On the juristic side there are 20 Judges and Magistrates, 291 Legal Practitioners and Advisers, 8 Law Assistants and 50 Jurists and Legal Technicians (including petition writers) who have not been elsewhere classified.

On the communications side there are 115 Rail way Engine Drivers and Firemen. There are 832 Motor Vehicle and Motor Cycle Drivers, 708 animal drawn vehicle drivers.

Table B-V in Part iii gives full details regarding the people of various occupations among the working population available in the district classified by sex of persons. All these occupations have been classified according to the National Classification of Occupations. It provides an interesting field of study to the discriminating reader and will help to assess the requirements and the availability of resources and talent.

Scheduled Castes Population:

The total Scheduled Castes population of this district is 220,767 persons representing 9.43% of the total district population. The Scheduled Tribes population stands at 192,276 persons (males 96,720 females 95,556) representing 8.21% of the total district population. The highest concentration of Scheduled Castes is found in Pathapatnam taluk, representing 13.85% of the general population of that taluk followed by Palakonda taluk (11.26%),Cheepurupalle taluk (10.41%), Bobbili taluk (9.48%), Salur taluk (9.02%), Tekkali taluk (8.93%), Parvathipuram taluk (8.57%), Srikakulam taluk (8.27%), Narasannapet taluk (7.26%), Sompeta taluk (6.53%), and the lowest concentration is in Ichchapuram Independent Subtaluk with 3.15%. The district's overall percentage of Scheduled Castes during this decade works out to 9.43% and is far below the State average of 13.82%. Of the total population of Scheduled Castes 108,156 are males and 112,611 are females and this excess of females is not different from the general population trend of the district. The extent of literacy among the Scheduled Castes is low and more so among the

females. Only 14,180 males (13.11%) and 2,060 females (1.83%) are literates. There are very few persons, who have reached even the matriculation or the Higher Secondary Stage. The actual figures for this stage are 177 males and 7 females representing 0.87% and 0.09% of their respective numbers. These figures by themselves aptly illustrate the need for the upliftment of this community through more advanced education and technical training.

136,359 persons are Workers representing 61.77% of the total Scheduled Castes population. 69,845 men and 66,514 women come under this category. Their major occupation is Agricultural Labour and as usual women outnumber men in this field. Very few have taken to professions like Manufacture, Construction, Trade and Commerce, Transport and Communications. This seems to be due to lack of appropriate training and orientation. It is also seen that though the proportion of workers among these communities is higher than the district figure, yet the sort of work that is being done by them is only of the lowest category.

The following Table illustrates the population particulars of the various Scheduled Castes enumerated in Srikakulam district at the 1961 Census.

STATEMENT III-8

Scheduled Castes not specified	838	32	870

Scheduled Tribes :

The Scheduled Tribes in this district live mostly in the Agency areas of Salur, Parvathipuram and Palakonda taluks. A good number of the Scheduled Tribes no doubt live in the Plains portions of the district as well. According to the 1961 Census count the Scheduled Tribes numbered 192,276 persons (males 96,720 and females 95,556) and their proportion to the total population of the district works out to 8.21% as against the State average of 3.68%. Their economic and social conditions are no better than those of the Scheduled Castes. Their educational achievements are hardly worth mentioning. Their main occupation is Agriculture and a few of them work in Household Industries, Mining, Quarrying etc.

The following table illustrates the population particulars of the various Scheduled Tribes enumerated in Srikakulam district in the 1961 Census.

STATEMENT III-9

SCHEDULED TRIBE POPULATION

Name of the Scheduled Tribe (1)	Rural (2)	Urban (3)	Total (4)

Social and Religious Groups

Hindus form the bulk of the population constituting 98.72%. After this major religion Christians (1.03%) and Muslims (0.25%) come next in order. There are only 14 Buddhists, 10 Sikhs, 9 Jains, and 3 persons who have not stated their religion.

Migration :

Migration of persons from one part of the country to another is not uncommon and more so as between the districts in the State. Generally the motivation of an individual's decision to migrate may be traced to several factors like the cultural, economic, political, social ties etc., both in the place of emigration and in the place of immigration, and also to the personal desire to lead a better life or for adventure. The economy of the people in this district is chiefly agricultural and this largely depends on the vagaries of monsoons. So far only medium sized projects like Surapadu and Vegavathi have been completed and the industrial activity in this district is not yet appreciable. The district has a long and continuous coast line abutting the Bay of Bengal from north-east to south-east and the interior parts of the district largely consist of hilly tracts of the Agency area particularly in the taluks of Salur, Parvathipuram and Palakonda on the western side. Apart from the above the coastal belt and the Agency tracts are Malarial.

Amongst the districts that surround this district Visakhapatnam and Ganjam districts are comparatively more forward economically and industrially and have therefore, attracted a large number of emigrants from this district. A detailed study of migration trends in this district reveals that 31,658 persons (13,349 males and 18,309 females) have immigrated into this district from the other districts of this State and 35,514 persons (11,810 males, 23,704 females) from other States in this country and 748 persons (397 males and 351 females) from other countries. The bulk of the immigrants are from the adjoining districts of Ganjam and Koraput of Orissa State and from Visakhapatnam. The total immigrants from Visakhapatnam to this district are 22,218 persons (8,547 males and 13,671 females). The other districts in the State that have contributed a large number of migrants are East Godavari 4,020 persons (1,933 males, 2,087 females), West Godavari 2,069 persons (1,031 males and 1,038 females), Krishna 1,321 persons (647 males and 674 females), Guntur 1,027 persons (569 males and 458 females), Nellore 391 persons (266 males and 125 females), Hyderabad 139 persons (76 males and 63 females) and Chittoor 102 persons (62 males and 40 females). The other districts have contributed only a negligible number of immigrants. Anantapur and Kurnool districts have contributed only 98 persons (54 males and 44 females) and 95 persons (59 males and 36 females) respectively.

The largest number of immigrants from the Telangana region is from Hyderabad district. The contributions from the other Telangana districts in the descending order are Warangal 75 persons (46 males and 29 females), Khammam 48 persons (20 males and 28 females), Nalgonda 6 persons (3 males and 3 females), Karimnagar 4 persons (3 males and 1 female), Mahbubnagar 2 persons (2 males), Medak 2 persons (2 males), Nizamabad 2 persons (1 male, 1 female), and Adilabad 1 person (1 male). From this it is obvious that the migrants from Telangana region are negligible and even those few that have come might be Government employees or business people and their dependants.

It is of interest to note that out of 22,218 persons that have migrated from Visakhapatnam 8,547 are males and 13,671 are females. Similarly out of 13,506 immigrants from Ganjam district 3,802 are males and 9,704 are females. Out of 2,784 immigrants from Koraput only 855 are males and 1,929 are females. The main reason for women outnumbering men among the immigrants may be presumably marriage ties. The majority of migrants from other districts and also from the adjoining Orissa State have taken to cultivation, agricultural labour, household industry and other services and the remaining migrants are engaged in other categories of work. More than half of the immigrants constitute 'Non-Workers' most of whom are made up of 'Housewives' drawn into this district by ties of marriage.

Persons immigrated into this district from the other States in the country are 35,514 persons comprising 11,810 males and 23,704 females. Orissa State has contributed as many as 30,675 persons (9,101 males and 21,574 females). The number of immigrants from other States is very small. West Bengal comes next to Orissa and has contributed 2,035 persons (968 males and 1,067 females) and it is followed by Madras 710 persons (423 males and 287 females), Kerala 417 persons (334 males and 83 females), Assam 363 persons (191 males and 172 females), Bihar 311 persons (176 males and 135 females), Madhya Pradesh 254 persons (130 males and 124 females), Mysore 177 persons (99 males and 78 females), Maharashtra 173 persons (119 males and 54 females), Uttar Pradesh 130 persons (98 males and 32 females), Rajasthan 113 persons (82 males and 31 females), Gujarat 63 persons (38 males and 25 females), Punjab 51 persons (29 males and 22 females), Jammu & Kashmir 6 persons (5 males and 1 female). Amongst the Union Territories, Andaman & Nicobar

islands have contributed the maximum number *i.e.*, 31 persons (15 males and 16 females). As already stated above the large influx of population from Orissa State to this district is on account of its being a border district and the consequent ties of marriage and relationship. The immigration from other States may be due to economic factors.

As regards emigration from this district it is found that 54,057 persons (25,403 males and 28,654 females) as per the 1961 Census have migrated to the other districts in the State. Visakhapatnam district has attracted the maximum number of 31,733 emigrants (13,332 males and 18,401 females) for the obvious reason that it adjoins this district and is better placed. The districts next in order in this State are West Godavari 7,124 persons (3,696 males and 3,428 females), Krishna 5,567 persons (3,171 males and 2,396 females), East Godavari 5,049 persons (2,687 males and 2,362 females), Hyderabad 1,563 persons (769 males and 794 females), Guntur 785 persons (508 males and 277 females), Khammam 517 persons (313 males and 204 females), Nalgonda 432 persons (311 males and 121 females), Nellore 315 persons (251 males and 64 females), Chittoor 284 persons (101 males and 183 females), Kurnool 260 persons (35 males and 225 females), Warangal 96 persons (33 males and 63 females), Anantapur 95 persons (57 males, 38 females), Cuddapah 60 persons (38 males and 22 females), Adilabad 48 persons (25 males and 23 females), Karimnagar 47 persons (24 males and 23 females), Nizamabad 33 persons (21 males and 12 females), Medak 27 persons (20 males and 7 females), and Mahbubnagar 22 persons (11 males and 11 females). Among Telangana districts Hyderabad has attracted the maximum number obviously on account of its being the State capital.

Housing :

With a view to improving the housing situation and for future planning of the Housing Programmes the Government of India suggested to the National Buildings Organisation, working under the Ministry of Works, Housing and Supply to collect in collaboration with the Registrar General, India, New Delhi during the 1961 Census Operations, the basic data on Housing to meet the needs of the National Buildings Organisation. These data on Housing do not merely relate to residential housing but also cover places of business, workshops, schools, restaurants places of entertainment, hospital *etc.* From this information so gathered it has now become possible to assess not only residential housing requirements but also the adequacy or otherwise of the requirements of Industry, Commerce, Education, Public Health Institutions etc.

In Srikakulam district, as anywhere else, houses used wholly or partly for dwelling purposes form the largest proportion of the Census Houses. 496,794 houses out of a total of 605,522 are used wholly as dwellings and 1,706 houses as shop-*cum*-dwellings and 2,673 houses as workshop-*cum*-dwellings. Some of the part dwellings like laundry-*cum*-dwellings, barber's saloon-*cum*-dwellings have been included under the category of 'Others'. If these houses are also taken into account the proportion of the houses used wholly or partly as dwellings will be slightly higher.

It is seen that the proportion of *dwellings* to population in the Rural areas is higher than that in the Urban areas. Thus for a rural population of 2,136,238 persons there are 455,695 dwellings while for an urban population of 204,640 there are 41,099 dwellings. This means that in the urban areas there are 201 houses for every thousand population while in the rural areas 213 houses accommodate every thousand persons. It is obvious from these figures that there is crowding in residential housing. The increase in residential accommodation has not kept pace with the growing needs of a fast developing population.

The proportion of Census Houses used as *shop-cum-dwellings* is very small and is only 6 per thousand houses in the district. Workshop-*cum*-dwellings are less than the shop-*cum*-dwellings and their proportion among total Census Houses is very low being only, about 3 per thousand houses in the district. Out of a total number of 2,673 work shop-*cum*-dwellings in the district 2,255 are located in the rural areas as against 418 in the urban areas.

Hotels, Hostels, Dharmasalas etc. account for nearly 0.05% of the total number of Census Houses in the district and this percentage is lower than the State percentage of 0.14. The proportion is naturally higher in the urban areas than in the rural areas.

Shops excluding eating houses are about 8 per 1,000 in the district and the corresponding State average figure works out to 1.3%. The urban proportion as every where in the State, is considerably higher than the rural. The number of shops in the district shows that it has yet to improve commercially when compared to some other more advanced districts in the State.

The proportion of *business houses and offices* to the total Census Houses is very small in the district *i. e.*, 1,175 out of a total number of 605,522 houses. The number of houses of this category in the urban area is slightly more than that in the rural area.

There are 2,006 Census Houses in the district which are used as *factories, workshops and worksheds*- 1,399 in the rural areas and 607 in the urban areas. It means that there are about 3 houses used as factories, workshops, and worksheds out of every 1,000 houses in the district. The proportion is higher in the urban areas of the district than that in the rural areas, and it is obvious that the district is not industrialised to a significant extent.

There are 2,530 Census Houses in the district which are used as *schools and other educational institutions*. Of these 2,311 are in the rural areas and 219 are in the urban areas. For every 1,000 houses there are four houses under this category in the district. There is one school for every 924 persons in the rural areas while it is one for 934 in the urban areas of the district. There are 1,444 *restaurants, sweet-meat shops and eating places* out of a total number of 605,522 Census Houses. Out of this number 1,037 are in the rural areas and the remaining 407 in the urban areas. In the rural areas there are 2 houses in this category for every 1,000 houses while in the urban areas there are 8 houses for every 1,000 houses. Places of *entertainment, recreation etc.*, including temples, mosques and churches constitute 3,888 houses of which 3,466 are in rural areas and 422 are in urban areas. The higher proportion in the rural areas is naturally due to the large number of places of worship as well as the existence of the village chavidis and *pials* in almost all the villages.

There are 242 Census Houses used as *Hospitals Public Health Institutions, Dispensaries, Clinics, etc.*, in the district. Of these 143 are in the rural areas and 99 in the urban areas. It is a very well known fact that medical and public health facilities are grossly inadequate in our country, espicially in the rural areas and hence no further comment is considered necessary on the existing state of affairs.

As explained earlier the category of *'Others'* includes houses put to miscellaneous uses like 'cattle sheds', 'garages' *etc.*, consequently no distinct pattern is discernible in this category of houses in the rural and urban areas of the district. The proportion of houses in this category is higher in the urban areas than that in the rural areas.

House types :

Though the construction of a house by and large depends on the likes of an individual, yet certain factors like tradition, social and physical environments, availability of material *etc.*, play a considerable part in shaping the personality of any house. This district has a long coast line abutting the Bay of Bengal and as such one can see in the district the conical huts so shaped as to resist cyclonic weather that this part of the land is frequenty subjected to. The area abounds in palmyra trees which obviously form the cheapest material available for house construction. The beams, the rafters, the roofs and even the rope for securing all these together are obtained form the palmyra tree. In the Agency tracts of the district the houses are generally constructed in a row with common walls and low thatched roofs. The typical tribal of the area obtains all the materials needed for the construction of his house from the forests.

Wall material :

No uniformity can be noticed in the wall pattern through out the district. Sompeta and Ichchapuram taluks as per the 1961 Census findings have recorded more than 90% houses with mud walls. In the rural areas of the district mud is predominantly used for constructing the walls of houses and the percentage of houses with mud walls works out to 81.3% as against the State rural average of 64.7%.

Brick is also used as wall material in this district and the proportion of houses with brick walls is more in the urban areas. 15.6 per cent of the houses in the rural areas of the district have brick walls as against the State average of 10%. Only Bobbili and Pathapatnam taluks have recorded over 20% of the houses having brick walls.

Crossing over to the Agency tract one finds large number of houses with walls made up of grass or bamboo neatly plastered with mud or dung giving an impression of mud walls. Timber is also used as wa-

material and houses put up with walls of timber account for 1.3% in Salur taluk.

In the urban areas of this district also mud is used for walls and the proportion of this type of walled houses is fairly high accounting for 65.3% as against the State urban average of 39.8%. Again considering the urban areas at the taluk level, all the taluks in the district have a majority of houses built with mud walls and it comes as a surprise that in Ichchapuram, Sompeta, Cheepurupalle and Palakonda taluks more than about 70% of the urban houses are also built of mud walls.

Roof material :

Srikakulam has recorded 87% of houses in the rural areas with thatch as roof material as against the State average of 62.7%. Even in the urban areas of this district houses with thatched roofs have recorded the highest proportion of 69.0% as against State average of 37.2%. The urban areas of all taluks of Srikakulam district have recorded more than 50% of their urban houses with grass, thatch, etc., as their roof material.

In the urban areas of Narasannapet taluk 6.0% of the houses have stone or concrete roofs. It can therefore generally be said that in the rural and urban areas, by and large, the material used for house construction is that locally available, though in the larger towns there is growing demand for cement concrete. In the Agency areas of this district the roof is of forest thatch and the walls of wattle covered with mud and in the plains the roof is made up of palmyra leaves.

CHAPTER IV

IRRIGATION

Irrigation in this district is carried on by canals and by tanks. Though this district abounds in irrigation tanks both of a major and of a minor variety yet the percentage of land irrigated under tanks is less than the area irrigated under the Government canals. The following statement gives particulars of area irrigated during 1950-1951 and during 1960-61:

	Area irrigated (In acres)	
	1950-51 (1)	1960-61 (2)
Government canals	1,16,300	1,26,323
Tanks	29,600	63,406
Area irrigated more than once	12,000	12,000

Irrigation Project

The most important rivers are the Nagavalli and Vamsadhara. The Nagavalli, also called Langulya in its lower course, provides for the irrigation of a major part of Palakonda and Srikakulam taluks. The Srikakulam Minor River system consists of several open-head channels taking off from river Vamsadhara and Nagavalli. An ayacut of 64,442 acres is being irrigated under this system which was completed in 1900. The Nagavalli Project system or the Nagavalli left side channel scheme consists of a channel taking off above the Totapalli Regulator across Nagavalli near Totapalli from the left of the river and irrigates an extent of 29,000 acres. This project was completed in 1908. Due to close proximity to the hills which are covered with fairly thick forests the irrigation sources receive a good supply of water during the rainy season.

Apart from the above irrigation projects the following irrigation projects were executed during the two five Year Plan periods.

Nagavalli Right Side Channel Scheme: This scheme contemplates the excavation of a channel from the right side of the Nagavalli river above the Totapalli Regulator to irrigate an ayacut of 9,000 acres consisting of the existing ayacut of 5,640 acres wet and 3,360 acres dry additionally. Out of the above ayacut 3,000 acres of the existing ayacut under Sekharapalli channel is proposed to be supplemented. The scheme is physically completed. The ayacut so far developed is 5,283 acres wet and 1,791 acres dry leaving a balance of 1,926 acres yet to be developed.

Vonigedda Anicut Scheme: The scheme contemplates the construction of an anicut across Vonigedda near Voni village in Palakonda taluk to irrigate the existing ayacut of 23,112.68 acres wet and an additional dry ayacut of 724.32 acres. The work was completed in all respects in 1960. The ayacut so far developed is 2,324.14 acres wet and 429.48 acres dry.

Mandagedda Anicut Scheme: This scheme contemplates the construction of an anicut of a length of 40 feet across Mandagedda at Karrivalasa in Parvathipuram taluk and excavation of a contour channel to a length of 1 mile 7 furlongs and 150 yards on the left side of the Gedda. The scheme is designed to irrigate the existing wet ayacut of 73 acres and a new dry ayacut of 277 acres. Out of this the total ayacut so far developed is 84 acres.

Surapadu Anicut Scheme: The scheme contemplates the construction of an anicut across Addarugedda, a tributary of Gomukhi river at Surapadu village of Salur taluk to irrigate an ayacut of 1,486 acres dry, besides giving assured supply of water to 350 acres existing wet ayacut. The scheme has been physically completed. The ayacut so far developed is 461 acres wet and 1,015 acres dry.

Sitanagaram Anicut Scheme: This scheme contemplates the construction of an anicut across the Swarnamukhi river near Venkatabhyripuram in Bobbili taluk to irrigate an ayacut of 4,017 acres of which 2,320 acres are dry and 1,697 acres represent the existing wet ayacut. The scheme has been physically completed. The ayacut so far developed is 1,445 acres wet and 1,534 acres dry.

Vegavathi Anicut Scheme: This scheme contemplates the construction of an anicut across the river Vegavathi near Karrivalasa and excavation the right side channel to a length of 6 miles 4 furlongs and the left side channel to a length of 5 miles 1 furlong to irrigate an ayacut of 5,681 acres. The scheme has been physically completed. The ayacut so far developed is 3,038 acres.

The Pydigam Project Scheme: This anicut has been constructed across the Mahendratanaya river near *Badupuram* village in Sompeta taluk and is known as the Pydigam Project. This scheme contemplates providing an assured supply of water to the

existing ayacut of 4,749 acres under 62 tanks and an additional ayacut of 205 acres of dry to be converted into wet. Water was first let out into the channel on 24th August, 1963 and an ayacut of 5,976 acres was irrigated. During 1964-65, an ayacut of 7,000 acres was irrigated. Some cross drainage works are in progress. The length of the channel is 10 miles 4 furlongs.

Narayanapuram Anicut Scheme: The scheme contemplates construction of an anicut of 1,176 feet long between the two scour sluices on either ends with two head sluices on either flank. The crest level of the anicut is kept at + 92.00 with 3'-0 high shutters filled over the crest of the anicut. The top level of the shutter is + 95.00. The project contemplates assured supply to 31,495 acres of existing wet (under open head channels and tanks) and 5,335 acres of dry. The length of Right Side channel is 30 M. 4 Fgs. and the length of Left Side channel is 9 M. $7\frac{1}{2}$ Fgs. The existing net work of open head channels are tagged on to the project system dropping water at suitable places so that all the ayacut contemplated will have assured supply from the project. The scheme has been physically completed and water is being supplied for cultivation. The ayacut so far developed is 29,369 acres wet and 3,949 acres dry.

Vamsadhra Project: The Vamsadhra Project, a Major Irrigation Project to be taken up under the Five Year Plans in Srikakulam district at an estimated cost of Rs. 1,397.37 lakhs is intended for protection of the district against frequent famines. The project contemplates the construction of a barrage at Neradi across the Vamsadhara river with a canal taking off from the right flank for the purpose of feeding the high level lands on the right side of the river and another dam at Gotta 10 miles below Singidi with a canal on either flank. The length of the dam will be 5,700 feet with a storage capacity of 16.11 T. M. Cft. at F.R.L. level + 15,400.

The ayacut that will be benefited under this scheme is as follows:—

Division	Ayacut (in acres)
Neradi	26,400
Gotta	2,50,350 Ist Corp
	20,000 IInd Crop
	36,000 under Jute
Total	3,32,750

This is the only Major Irrigation Project contemplated in Srikakulam district under the Five Year Plans.

The following is the list of irrigation sources for each taluk giving particulars of the villages served and the ayacuts under each in charge of the Public Works Department:

A list of minor irrigation sources for each taluk in the district has been compiled and published by the Board of Revenue, Andhra Pradesh, Hyderabad in 1963. It is a very exhaustive list giving the name of the village, the name of irrigation source and the ayacut under each for each taluk and it may be referred to for fuller details.

Sources: 1 Collector, Srikakulam
2 Executive Engineer, Srikakulam Division
3 Statistical Atlas of Andhra State published by the Bureau of Economics and Statistcs, Government of Andhra Pradesh 1959.

CHAPTER V

AGRICULTURE

The soils of this district belong to the regar clay or black cotton and the red ferruginous varieties. Near the hills, the red varieties are predominant but towards the coast the soil becomes fine and in the valleys there is a fertile black clay with a tendency to crack when dry. This is, however, a very different soil from the deep fissured regar of the ceded districts. Regar clay is considered as the best soil in fertility so far as dry and *manavari* lands are concerned. In wet lands regar loam is considered superior to regar clay. The regar and red sand soils are considered to be of an inferior quality. In Palakonda taluk red ferruginous represents a major portion of the soil. The regar soil covers only a very small portion in this taluk. The most common variety of soil in this taluk is red loam which covers nearly half of the entire extent. The richest soils of regar loam are in the areas irrigated by the Nagavalli and Vamsadhara in Srikakulam and Palakonda taluks. Valuable food crops such as paddy, sugarcane, ragi, bajra and other cereals are cultivated mainly in black loam. In black clay, jowar, redgram and arika are generally raised. In red loam gingelly, ragi, bajra, jowar, horsegram and greengram are grown extensively and paddy and sugarcane to some extent. In sandy soils pulses, sweet-potatoes, chillies are grown.

The average rainfall of the district is 1,087.2 mms. Most of the rainfall is received during the south-west monsoon, that is, during the period from June to September. There is also a moderate rainfall during the north-east monsoon (retreating monsoon period-October to December). The rainfall during the south-west monsoon period decreases from the inland taluks to the coastal taluks while the conditions are quite the reverse during the north-east monsoon. The rainfall in the remaining part of the year is slight. The district is thus mainly depending on the south-west monsoon. The north-east monsoon is not of much importance to this district. The rainfall on the whole is not really adequate. The deficiency has, however, been met by improvements made to the various irrigation sources.

Agricultural practices :

Agricultural practices in the district do not differ greatly from that of the other parts of South India and they vary with soil, rainfall and facilities for irrigation as elsewhere. They also vary with the status of the ryot himself. There are three distinct agricultural seasons, namely, (I) *"Punasa"*—the period from April to August when the staple dry grains are sown, (ii) *"Pedda Panta"*—the regular wet crop season from August to December and *(iii) "Pyru"*—the period from January to March. The year is also divided into 27 *Karthies* or stars of the Lunar Zodaic and the ryots commonly hold that each of those asterisms is the proper season for certain agricultural operations. They believe that if owing to want of rain or other cause, the season is allowed to pass, the particular operation cannot afterwards be carried out with an equal chance of success. The result is that cultivation of some sort or other will be proceeding for about ten months out of the twelve. The punasa crops, bajra and ragi, are by far the most important as they comprise together with rice, the staple food crops of the mass of the population and a failure of the south-west monsoon is a great calamity to the peodle in the district.

There has been a large improvement in the methods of cultivation and the varieties cultivated. Almost all the area under sugarcane in the district is planted with the improved sugarcane varieties. The area under sugarcane has increased considerably and even the crushing season has been prolonged from December to April. Improved varieties give high yield and are amenable to cultivation at a lower cost and with less difficulty. Cultivation of plantains on improved lines in wet lands was first introduced by the department of agriculture in the district and has developed to a great extent. Many improved strains of ragi, ganti (sajja), jowar (jonna), paddy and groundnut have been released for introduction in the district from the Agricultural Research Stations and these have replaced the local strains to a great extent.

Use of chemical fertilizers is being popularised both by way of demonstrating their use on the fields of the ryots and also through systematic propaganda. The following statement gives particulars of the rural compost and also fertilizers distributed in tons during the three plan periods :

STATEMENT V-1

Year	Rural Compost distributed (in tons)	Fertilizers distributed (in tons)
(1)	(2)	(3)
First Five Year Plan Period		
1951-52	9,230	2,006
1952-53	6,987	2,946
1953-54	6,898	4,001
1954-55	...	...

1957-58	1,22,830	8,651
1958-59	1,33,389	5,573
1959-60	6,64,418	7,131
1960-61	10,45,670	2,402
Third Five Year Plan Period		
1961-62	3,24,599	4,694
1962-63	8,60,627	5,420
1963-64	9,88,695	6,495

The following statement gives particulars of the total amount of loans year-wise from 1951 to 1964 both under the Takkavi and under the Intensive Manuring Schemes:

STATEMENT V-2

Year	Takkavi Loans distributed (in Rupees)	Intensive Manuring Scheme Loans distributed (in Rupees)
(1)	(2)	(3)
First Five Year Plan Period		
1951-52	...	...
1952-53	60,230	90,675
1953-54	1,02,175	1,36,955
1954-55	...	...
1955-56	1,83,920	4,98,680
Second Five Year Plan Period		
1956-57	82,484	6,56,818
1957-58	1,06,910	8 76,965
1958-59	1,88,001	11,99,995
1959-60	50,820	7,24,900
1960-61	20,060	6,22,615
Third Five Year Plan Period		
1961-62	13,150	93,860
1962-63	1,30,122	2,65,580
1963-64	5,48,250	2,90,000

Agricultural Implements:

The Agricultural implements that are commonly in use are country plough and iron plough for ploughing purposes. Patti and Buck-scraper are used for breaking clods and levelling while another flat board with a lever or handle arrangement called '*Nolla*' is used for levelling puddled plots or levelling uneven plots. *Para*, *Boriga*, *Tholika* (hand-hoe), sickle and crowbar are the common main implements in use. Bund former is used for forming bunds. Ridge plough is used for forming ridges and furrows for planting sugarcane sets. Hitherto wooden crushers were used by the ryots for crushing sugarcane. Now iron crushers are used by all the ryots in the district.

Cropping pattern and Calendar of sowing and harvesting seasons in the district:

In normal years 80.9% of the total sown area will be covered by food crops and 19.1% by non-food crops. Paddy is the chief food crop and covers 45.8% of the total sown area and is followed by Ragi 8.6%, Bajra 2.1%, Jowar 1.0%, Other millets cover 3.6% while pulses and other food crops cover 12.6% and 7.1% respectively. Among non-food crops 6.1% of the sown area is covered by groundnut and 2.3% by gingelly. The other crops individually constitute only negligible percentages. The sowing and harvesting months of the important crops in Srikakulam district are given below:

STATEMENT V-3

Name of crop	Sowing months	Harvesting months
(1)	(2)	(3)
Food crops		
Paddy	July-September	November-December
Cholam (Jowar)	September-October	February
Cumbu (Bajra)	June-July	September-October
Ragi (Kharif)	June-July	September-October
Ragi (Rabi)	January-February	April-May
Korra (Kharif)	June-July	September-October
Korra (Rabi)	December-January	March-April
Varagu	July-August	October-November
Samai	June	August
Pulses		
Bengalgram	November-December	February-March
Redgram	July-August	January-February
Greengrm	August-October	January-February
Blackgram	August-October	January-February
Others		
Chillies	September	March
Garlic	October	January
Ginger	June-July	October-December
Coriander	November	February
Turmeric	June-July	February-March
Sugarcane	March-April	February-March
Onions	July-August	December
Bombay hemp (Gogu)	July-August	December-January
Sunn hemp (Janumu)	July	October
Groundnut	May-June	September-October
Gingelly	May-June	August-September
Castor	July-August	January-March
Linseed	October-November	February-March
Tobacco	October	February

The following table shows the talukwise time table of agricultural operations in the district in a normal year. The figures shown against each crop or variety of it represent the percentage of the area of the crop sown and harvested in the month to the total area of the crop sown and harvested in an year, in each taluk separately.

STATEMENT V-4

The effects of any departure from normal monsoon conditions upon this time table of agricultural operations are given below:

Month	Normal weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
January	The first dry month after the monsoon rains; fine weather; dry days and cold nights with dew fall.	There is generally no rain fall in this month and the dry weather facilitates the thrashing of the harvested paddy. If heavy showers occur, the thrashing of the paddy will be retarded. The quality of tobacco will be impaired.

Month (1)	Normal weather (2)	Effects of unseasonable or abnormal weather on the various crops (3)
January—*Concld.*		Moderate rainfall is beneficial to the standing crops such as chillies, cotton and vegetables and is conducive to the sowing of the dry crops such as gingelly, ragi and vegetables. Absence of rainfall is beneficial from the point of view of harvest, but it is less so in the case of industrial crops such as cotton and gingelly and in the case of standing dry and garden crops and for the sowing of other dry crops.
February	Fine weather generally with rare occasional showers.	February is generally rainless and the dry weather facilitates the harvest of sugarcane and the other dry crops such as pulses, garden crops and cholam. If there are heavy rains, they affect the quality of the tobacco leaves in the process of curing and retard the making of jaggery. Continuous rainfall affects the drying of ragi and chillies and the gathering of a variety of cotton known as "Buradapathi" and retards the harvest of sugarcane. Moderate rain facilitates the growth of the late gingelly sowings and of the other dry crops such as ragi and vegetables and is also beneficial to the standing dry crops such as cotton, ragi and gingelly. Occasional showers will be advantageous to all the standing crops. Absence of rainfall is favourable to harvests but the irrigation of garden crops such as chillies, onions and other vegetables and pulses will be retarded.
March	Fine weather generally, dew abating with occasional showers; cold abates.	March is generally rainless and the dry weather facilitates the harvest of the sugarcane crop, the making of jaggery and the curing of tobacco and the harvest of other dry crops such as ragi, cotton and chillies and other garden crops. Heavy rainfall will retard the harvest of dry crops and prevent picking of cotton, the quality of which will be affected by the rains. Moderate rainfall will be beneficial to the standing crops and for the sowings of gingelly and ragi. Absence of rainfall necessitates the irrigation of standing dry crops such as ragi, chillies and other garden crops.

Month (1)	Normal weather (2)	Effects of unseasonable or abnormal weather on the various crops (3)
April	Fine weather generally with occasional showers; the days and nights become warm.	April is favourable to the agriculturists an account of the occasional rainfall. Heavy and continuous rainfall during the month facilitates the transplantation of sugarcane and second crop paddy and the ploughing of dry lands but this retards gingelly, ragi, cotton and dalva paddy crops. Moderate rainfall though it retards the harvests of the dry crops, facilitates the growth of the standing dry crops such as ragi and other garden crops. Absence of rainfall is favourable to the harvest of dry crops but postpones the agricultural operations which have to begin in the month by the ploughing of dry lands and the preparation of seed-beds. The transplantion of Chittada paddy in Palakonda taluk and sugarcane in all the ryotwari taluks will be postponed.
May	Fine weather with occasional showers; western winds commence; south-west monsoon sets in; the days are hot and the nights sultry.	Excessive rainfall causes damage to cotton and to the harvest of the gingelly and ragi crops. Moderate rainfall is beneficial to the standing sugarcane crop and Chittada paddy in Palakonda taluk and to the tender dry standing crops. Absence of rainfall postpones the sowings of early dry crops, ragi, cumbu, gingelly, cotton, samai, korra and other green manure crops and the ploughing of dry lands.
June	Setting in of the south-west monsoon; moderate rains are received; all the irrigation sources receive a good supply; the busiest agricultural season begins.	Excessive or continuous rainfall interferes with the sowing of the groundnut and gingelly crops which do not require much irrigation and will be prejudicial to the tender standing dry crops. Moderate rainfall facilitates the transplantation of ragi, cumbu and other cereals and other dry and green manure crop and the preparation of paddy seed-beds. Absence of rainfall postpones the sowings of the early dry crops, the failure of which will have an adverse effect on the ryots and the preparation of paddy seed-beds and ultimately postpones the transplantation of paddy.

Month (1)	Normal weather (2)	Effects of unseasonable or abnormal weather on the various crops (3)
July	South-west monsoon in progress; Winds continue.	Excessive or continuous rainfall is prejudicial to the crops sown in the month, such as castor, gingelly and cotton, B. C. paddy, ragi, cumbu and Chittada, paddy but the irrigation sources get sufficient water supply for transplantation of paddy which is the staple food of most of the people in the district. Moderate and light showers are useful to the standing crops and facilitate the ploughing and sowings of dry lands and are beneficial to the standing crops. Paddy transplantation which begins will be greatly facilitated. Absence of rainfall postpones the agricultural operation and the transplantation of paddy in proper time as the water supply in the irrigation sources will not be sufficient for the transplantation of paddy. The paddy seed beds will become dry and have to be artificially irrigated. Failure of rains in this month hits hard on the agricultural population.
August	South-west monsoon active; winds continue; cold weather with moderate rains throughout the district.	Heavy or continuous rainfall is prejudicial to the crops sown in this month and to the crops sown in the later part of the previous month. The dry crops will be affected. It is however beneficial to the rainfed tank and other irrigation sources as they receive a fair supply of water and it facilitates the ploughing of wet lands for the transplantation of paddy, but it retards the harvest of gingelly and of the cereals and other dry crops ripe for harvest. Moderate rainfall is useful to the standing and tender dry crops and the transplantation of paddy. Absence of rainfall postpones the transplantation of paddy though it is beneficial to the harvest of dry crops.
September	South-west monsoon active;rains and winds abate; fine weather with good rains.	Heavy and continuous rainfall provides sufficient water supply in the irrigation sources for the transplantation of paddy but it retards the transplantation unless it is well distributed. It prevents the harvest of dry crops and affects the standing dry crops ripe for harvest. Moderate rainfall is beneficial to the standing wet and dry crops and facilitates the transplantation of paddy. Absence of rainfall in this month retards the growth of the standing wet and dry crops and leads to the failure of the paddy crops but it facilitates the harvest of the dry crops.

Month (1)	Normal weather (2)	Effects of unseasonable or abnormal weather on the various crops (3)
October	Setting in of the north-east monsoon about the middle of the month; cold weather and heavy rains in the coastal taluks.	Heavy and continuous rainfall is beneficial to the standing paddy and sugarcane crops but it affects the standing dry crops and those sown in the previous month and prevents the sowing of dry crops during the month such as tobacco, cholam and pulses. Moderate rainfall is beneficial to the tender standing crops and facilitates the sowings of dry crops. Absence of rainfall affects the standing paddy crops which require sufficient supply during this month but facilitates the harvests of dry crops.
November	North-east monsoon active.	Heavy and continuous rainfall is prejudicial to the paddy crop which will be in ears and to the standing dry crops such as tobacco and other cereals and pulses. It also retards the sowing of tobacco. Moderate rainfall, well distributed is beneficial to all the standing crops both wet and dry. Absence of rainfall facilitates the harvests of light paddy and B. C. paddy and of the dry crops such as korra and pulses.
December	Bright weather with rare occasional showers; north-east monsoon closes; dew begins to fall; extreme cold weather during nights.	This is generally a dry month. Excessive or continuous rainfall spoils the standing crops both wet and dry and retards the progress of paddy and sugar-cane harvest. Moderate rainfall facilitates the growth of the standing dry crop. Absence of rainfall facilitates the harvest of the paddy and sugarcane crops and other cereals and pulse crops.

Activities of Agricultural Department in the district

Activities of the Agricultural Department include implementation of the various Plan and Non-Plan programmes concerning with the agricultural production, land development, soil conservation and minor irrigation. The main activity of the department during the First and the Second Plan periods was the propagation of improved methods of cultivation by way of demonstrations on the fields of the ryots. Distribution of improved seed of paddy and millets and other crops was also intensified for an assured increase of 10% of the normal production per acre. Green leaf manure for increasing the general fertility of the paddy lands was also popularised. Varieties like *glyricidia madulata* and *ipomea cornea* were popularised by the supply of seed and seedlings to the ryots. Rational distribution of chemical fertilizers was an important activity of the department. The use of compost and vegetable waste and farm waste for the preparation of more black organic manures was also popularised. A number of farmers were trained in the scientific methods of compost manufacture. Japanese method of paddy cultivation was introduced. Tractors, buldozers, oil-engine pumpsets, belonging to the department were hired out to the ryots for reclaiming land for irrigation and cultivation. The plant protection wing of the department supplied pesticides and fungicides for protecting crops from insects, pests and other diseases. Equipment for spraying and dusting was also supplied by the department.

CHAPTER VI
FORESTS

The Srikakulam Division gets rains from south-west and north-east monsoons. The climate is tropical.

The forests in this Division exhibit a variety of local changes in quality, composition and density. They are interrupted with patches of superior or inferior types. They show much diversity in representation and combinations of the main species, their associates and the under storey components, under varying conditions of soils, situation, aspects and altitude.

The forests of this Division belong to the Central Indian Geographical Region. According to timber content, these are broadly classified as mixed deciduous forests.

Further classification of these forests into definite types is beset with difficulties due to considerable divergence in composition and frequent variations in crops. The change from one type to another type due to rainfall and altitude is gradual, and abrupt if due to changes in the soil and other aspects. Further, the natural formations of types and sub-types are adversely interfered due to biotic factors, particularly podu cultivation and selective illicit fellings which deplete the forests of the best species both in quality and kind.

Sal (*Shorea robusta*) forest occurs in about a dozen scattered patches in the northern portion of the Palakonda range near the Ganjam frontier. In these patches, Sal occurs in mixture with the other species, the percentage of Sal varying very widely. The other species met with in the mixture are *Terminalia tomentosa, Pterocarpus marsupium, Xylia Xylocarpa, Anogeissus latifolia, Chloroxylon swietenia, Cleistanthus collinus, Adina Cordifolia, etc.* The under growth consists mainly of *Buchanania Lanzan, Ixora parviflora, Emblica officanalis, Grewia tiliaefolia, Flacourtia Ramontchi, Morinda citrifolia, Ochna squarrosa, Syzygium curaini, Woodfordia fruticosa* and others. Regeneration of the Sal in various stages is present but is very irregular in distribution.

Owing to the condition under which Sal has existed, the Sal forests have generally arisen from coppice. The trees have originated from the root system which had gone through the process of "dying back" owing to the fires or other unfavourable conditions.

Pole forests are met with in Chinnagora and portions of Burnakonda reserves of Palakonda range. The growth varies in density and quality according to the nature of the soil and steepness of the hill slopes. Certain areas believed to be suitable for growing Teak have been earmarked for the purpose in these pole forests.

Fuel forests which cover most of the district lie at the foot of the hills and lower slopes. The species met with are *Soymida Febrifuga, Maba buxifolia, Albizzia amara, Albizzia lebbek, Dichrostachys cinerea* and *Acacia sundra.*

Bamboo forests i.e., Dendrocalamus strictus exists in all the ranges. The bamboos are sold in public auction to contractors for removal.

There is no natural growth of teak in this district except in some old plantations raised during the estate regime in the Pathapatnam range.

From the inception of the Five Year Plans work has been commenced on the Teak, Cashew Eucalyptus and Casuarina plantations.

A statement showing the extents of different plantations raised in the district and the cost incurred during the Second Plan period is given below :

PLANTATIONS RAISED IN SRIKAKULAM DIVISION DURING SECOND FIVE YEAR PLAN

	Casuarina		Teak		Eucalyptus		Cashew		Miscellaneous	
Year	Area	Cost	Area	Cost	Area	Cost	Area	Cost	Area	Cost

CHAPTER VII

INDUSTRIES

Weaving is a very important industry of this district, the chief weaving centres being Ponduru, Bonthalakoduru, Fazulbegpet, Rajam, Palakonda, Siripuram etc. The fine Khadi cloth produced at Ponduru has an All India reputation. Cloth is exported to Cuttack, Berahmpur and even to Northern and Western India. For a very long time, Srikakulam was an important centre for the manufacture of Muslin cloth, most of it being handsomely finished with gold thread. The common "Chicacole Muslin" was hawked about the country as far south as Masulipatnam.

There are several handlooms in Narasannapet taluk. On account of the insufficiency of the raw material supply and on account of the competition from the mill-made cloth, this industry is not finding adequate encouragement. Cotton produced in the district is hardly sufficient.

Village and Cottage Industries like handspinning and weaving (Ponduru), gur industry (Amadalavalasa), brass and bell-metalware industry (Budithi), manufacture of coir products such as coir yarn, rope etc., (Baruva), cashewnut industry (Palasa) have also taken root and have developed well. Musical instruments (Veenas) are made at Bobbili. Rajam and Ponduru are important centres of groundnut oil milling industry. Narasannapet and Srikakulam have rice milling industry. Palasa has cashew processing industry, Amadalavalasa is developing to be an important industrial centre with a concentration of oil mills, rice mills and Sugar factories. Bobbili has a large sugar factory. Garividi is a well known mining centre of Manganese.

Large Scale Industries:

The four large scale industries under the private sector in the district are the Amadalavalasa Co-operative Agricultural and Industrial Society, the Sri Rama Sugar and Industrial Limited, Bobbili, the Sri Rama Sugar and Industrial Limited, Seethanagaram and the Ferro-Alloys Corporation, Garividi. It is also proposed to start a cotton mill known as the Sri Sai Baba Cotton Mill at Amadalavalasa and a five ton paper plant at Paradi in Bobbili Panchayat Samithi under the Co-operative fold.

Small Scale Industries under the Public Sector:

Carpentry Training-cum-Production Centre, Srikakulam: This scheme was sanctioned in 1955 and started functioning from 1st September, 1956. Training is imparted to 12 traditional artisans every year in improved methods and machinery. Each artisan is paid a stipend of Rs. 30/- p. m. during the period of training which is of a duration of 11 months.

Blacksmithy Training-cum Production Centre, Srikakulam: This scheme was sanctioned by the Government in 1955 and it started functioning from 1st September, 1956. This scheme is also intended to train traditional artisans in improved methods and on machinery. Household equipment and agricultural implements are being manufactured in this centre. During the period of training which is of 11 months duration, each trainee is paid a stipend of Rs. 30/- p.m.

Government Coir Industrial School, Baruva: This scheme commenced functioning from 1949 for training Evacuees from Burma. The course of training is for two academic years. Each batch consists of 9 trainees, each of whom gets a stipend of Rs. 20/- p.m. from the Government.

Coir Production Wing, Baruva: This scheme was sanctioned in 1958 and started functioning from September, 1959 for producing Coir articles by local artisans. Coir mats, ropes etc., are being manufactured here.

Bristle and Mattress Fibre Unit, Baruva: This scheme was sanctioned in 1960. The construction works on buildings etc., have been started. The required machinery has also been acquired.

Carpentry Centre, Srikakulam: This scheme was sanctioned in 1960 but it has not started functioning so far.

Industrial Estates:

A scheme to establish an assisted private industrial estate at Amadalavalasa was sanctioned in 1961. An extent of about 28 acres has been selected for the location of this estate. Work on construction etc., has not yet commenced.

Industrial Co-operatives :

Fifty one Cottage Industrial Co-operative Societies related to various industries have been established. The following statement furnishes the particulars :

STATEMENT VII-1

Sl. No. (1)	Type of Society (2)	No. of Societies 1961-62 (3)	1962-63 (4)
1	Village Oil Cottage Industrial Co-operative Societies	13	2
2	Village Pottery Cottage Industrial Co-oprative Societies	7	1
3	Gur and Khandasari Cottage Industrial Co-operative Societies	4	1
4	Village Leather Workers' Cottage Industrial Co-operative Societies	3	...
5	Carpentry and Blacksmithy Cottage Industrial Co-operative Societies	2	2
6	Bamboo Cane and Basket Makers' Cottage Industrial Co-operative Societies	2	1
7	Dyeing and Printing Workers' Cottage Industrial Co-operative Societies	2	...
8	Coir Workers' Cottage Industrial Co-operative Societies	3	...
9	Veena Makers' Cottage Industrial Co-operative Societies	1	...

STATEMENT VII-1—*Concld.*

Sl. No. (1)	Type of Society (2)	No. of Societies 1961-62 (3)	1962-63 (4)
10	Brass and Bell Metal Workers' Cottage Industrial Co-operative Societies	5	...
11	Hand pounding Co-operative Societies	...	1
12	Lime Kiln Workers' Co-operative Societies	...	1

There are 2,387 members with a paid up share capital of Rs. 1,81,625/- in these 51 societies. These societies purchased raw materials worth Rs. 1,98,381/- and produced goods worth Rs. 2,43,837/- and sold finished goods worth Rs. 3,44,209/- during the co-operative year 1961-62. They received financial assistance to an extent of Rs. 1,26,607/- as loan and Rs. 38,650/- as grant in the financial year 1961-62 and Rs. 10,000/- as loan and Rs. 2,160/- as grant in the financial year 1962-63 from the Andhra Pradesh Khadi and Village Industries Board, as well as from the State Government.

The following statement gives details of the Industrial Co-operatives together with the number of members, paid up share capital, loans, grants etc.

STATEMENT VII-2

Sl. No.	Name of the Society	No. of Members	Paid up share capital (in Rs.)	Total funds received: Loan (in Rs.)	Total funds received: Grant (in Rs.)

nancial Assistance

For the development of Cottage Industries, ins upto an extent of Rs. 300 to each of the tisans are being issued by the Department of Industries and Commerce under "Cottage Industries Loans and Subsidiary Rules, 1948". Particulars of loans sanctioned from 1953-54 to 1961-62 to deserving artisans have been furnished in the following statement :

STATEMENT VII-3

Year	1953-54	1954-55	1955-56	1956-57	1957-58	1958-59	1959-60	1961-62

Amount (in Rs.)	3,250	4,200	2,600	5,700	11,000	29,000	60,000	40,600

dustrial Development in the Agency

The following schemes were implemented in the Agency areas of the district for the benefit of tribals:

STATEMENT VII-4

Scheme (1)	Date of starting (2)	Date of closure (3)	Staff employed (4)		Batches of trainees trained (5)
Carpentry Training Centre and Blacksmithy Training Centre, Killoyi	26-10-1957	10-9-1962	Instructor Foreman L. D. Clerk Maistries Trainees Watchmen Mazdoor	1 1 1 2 24 2 2	5 Batches of 59 candidates in Carpentry Training Centre and 5 batches of 60 candidates in Blacksmithy Training Centre trained on a stipend of Rs.30/- p. m. each
Masons' Training Centre, Kedaripuram	1957-58	6-6-1962	Supervisors Skilled Workers Unskilled Workers Watchman	2 2 4 1	5 Batches of 96 candidates trained on a stipend of Rs. 30/- p.m. each
Brick Layers' Training Centres, Kedaripuram and Kuddapalli	1957-58	1-3-1962	Supervisors Skilled Workers Unskilled Workers Watchmen	2 2 6 2	10 Batches of 184 candidates at Kuddapalle and 9 batches of 158 at Kedaripuram
Bee-keeping Units (i) Gummalaksbmipuram (ii) Badnayakavalasa (iii) Chinnagora	25-12-1958 1-12-1957 24-12-1957	1-3-1962	Supervisor Maistries	1 3	
Canning Demonstration Unit, P. Levidi	23-10-1957	10-8-1962	Demonstrator Watchman Unskilled Worker	1 1 1	5 Batches of 54 candidates trained on a stipend of Rs. 20/- p.m. each

During the year 1962-63 Carpentry Training Centres at Bhadragiri and Seetampet sponsored by the Social Welfare Department were started with Central assistance to an extent of 50% grant, for imparting training to the tribals.

The Small Industries Service Institute of the Ministry of Commerce and Industry, Government of India, Hyderabad conducted an intensive survey of the industrial potential of Srikakulam and Visakhapatnam districts and in 1960 published a small brochure called "The Industrial Possibilities of Visakhapatnam-Srikakulam Districts." The authors of this publication state that the purpose of this booklet is to give an idea about the industries which can be set up on a small scale basis in Srikakulam and Visakhapatnam districts. Although the list of industries in the district is not exhaustive, this booklet is expected to serve the purpose of a guide to small scale enterpreneurs.

This booklet has, therefore, been reproduced in full for the benefit of the reader.

I. Agricultural Implements :

1. This Industry is in existence in the area and there are many units already functioning.
2. The annual off-take of agricultural implements in the two districts was estimated at Rs. 12 lakhs of which the local units accounted for about Rs. 8 lakhs.
3. It is expected that the demand for the agricultural implements will increase at the rate of 20% per annum.
4. The items which may be increasingly in demand in the coming years are sugarcane crushers, bund formers, sprayers and dusters, winnowing pans, jaggery pans etc.
5. The existing units have chance to expand production for manufacturing the items mentioned above.

II. Builders' Hardware:

1. The builders' hardware items are manufactured in the area by units engaged in the production of agricultural implements.
2. It is estimated that about Rs. 6 lakhs worth of builders' hardware items were sold in1958-59 in the Visakhapatnam-Srikakulam area.
3. The production within the area is estimated at about Rs. 3.4 lakhs per annum.
4. The demand is expected to show an annual increase of 10%
5. The existing units have opportunities to expand production and new units can come up for the manufacture of specialised items like hinges, drawer locks, door locks, tower bolts, hasps and staples etc., required by the ship building yard and also to meet the increasing demand in the open market.

III. General Engineering and Foundry including Rice Mill Parts:

1. There is a good demand for products of general engineering industry like machine parts, automobile parts, and oil engines, rice huller and oil expeller spare parts.
2. There are 23 general engineering workshops in the area.
3. Skilled workers for this industry are available in the area.
4. No serious competition is reported by the existing units.
5. Annually Rs. 10 lakhs worth of rice mill parts alone are sold in the two districts.
6. There are 77 oil and rice mills in the area requiring different mill parts.
7. Existing units in this industry have scope for expansion and new units can also be started.
8. These units can also manufacture industrial fastener items like bolts and nuts, rivets, gland packings etc., which are also in good demand by the ship building industry.

IV. Cycles and Cycle Parts :

1. Cycles and cycle accessories are in good demand in the twin districts of Srikakulam, Visakhapatnam. The existence of cycle rickshaws in urban and rural areas has also contributed towards the demand for cycles and cycle parts.
2. The annual turnover of cycles, cycle parts and accessories works out to nearly Rs. 30 lakhs, of which the share of cycle parts and accessories alone is about Rs. 15 lakhs in the two districts.
3. The demand for these items in the past has been progressively increasing by nearly 16% on an average every year. As more and more cycles are sold year after year, the demand for spare parts and accessories would correspondingly increase.

4. There is a good scope for one or two small assembly units. Though there is scope for new units to manufacture spare parts, due to non-existence of this industry in the area, prospective entrepreneurs would do well to consider the competition in the market from the established manufacturers.

V. Ancillary Industries :

1. The Hindustan Shipyard and the Port and Dockyard Workshop offer good scope for the development of ancillary industries.
2. The existing general engineering units have also chance to take up the production of ancillary items.

The following are the main items required.

i. Electrical accessories
ii. Hardware fittings
iii. Sheet metal parts
iv. Industrial fasteners
v. Sanitary fittings (metal)
vi. Pipe fittings
vii. Fire fighting equipment
viii. Centrifugal pumps
ix. Wire ropes
x. Valves and cocks

3. The general engineering units may even expand into the new lines of production by equipping themselves with the addition of a few more machines and equipment.
4. One among the existing Small Scale Units may also take up the manufacture of malleable cast iron items.
5. The Hindustan Shipyard and Port and Dockyard Workshop authorities will extend maximum co-operation by giving details of specifications and drawings of items required.

VI. Automobile Leaf Springs :

1. There is no unit at present in the whole of Andhra Pradesh manufacturing this item.
2. The entire demand in the area is met through supplies from Calcutta, Ludhiana, Kapurthala, Jullundur, Bombay and Kerala.
3. The total demand for automobile leaf springs in the two districts is estimated at Rs. 6.5 lakhs per annum.
4. The spring steel flats required for the manufacture of leaf springs are to be imported. The State Department of Industries and Commerce, Andhra Pradesh can help in the procurement of this imported raw material.
5. One unit could be started at the Industrial Estate, Visakhapatnam.
6. The new units will be able to market their products throughout Andhra Pradesh and even export to adjacent foreign countries.

VII. Scientific Instruments :

1. Scientific instruments are required in large numbers in Educational Institutions, Universities and Research Laboratories.
2. There is good demand for Scientific Instruments throughout the Southern Region (Andhra Pradesh, Madras and Kerala).
3. There is one unit in the area producing these instruments.
4. The raw materials used in the industry are brass rods, copper sheets, michrome and manganese wires, optical blanks etc., which are generally obtained through dealers and importers at Bombay and Calcutta.
5. With the restriction in the imports of Scientific Instruments the demand for indigenous goods has increased considerably.
6. One more unit can be started in the area provided an entrepreneur with the necessary technical knowledge comes forward to take up this industry.

VIII. Domestic Electrical Appliances (Heater Type) :

1. There is good scope for establishing units in the area for manufacturing domestic electrical appliances (heater type).
2. By 1961 the demand for electrical appliances in the Southern Region (Andhra Pradesh, Madras and Kerala) is expected to be about Rs. 20 lakhs while the production in the region in 1957 was only about Rs. 1.81 lakhs.
3. There are three units in Andhra Pradesh manufacturing Domestic Electrical Appliances.
4. The small-scale units will be able to compete well in the market if good quality appliances are produced.
5. The fast moving items of appliances are electric irons, cooking ranges, water stills, heaters and incubators.

IX. Electrical Porcelain Ware :

1. There is scope within the area to manufacture low tension electrical porcelain ware items like insulators, fuse handles, porcelain parts for switches, plug sockets, fan regulators etc.

2. The consumption of these items in the Southern Region was estimated at Rs. 4.0 lakhs in 1955–56 and the demand was expected to increase by 70% during the Second Five Year Plan period.
3. Different varieties of clays which form the basic raw material are available in the area. The types of clay available will have to be tested further before deciding on its utility.
4. The equipments required for the industry are relatively simple.
5. The location of the unit may be decided after the Department of Industries and Commerce has arranged for the ceramic tests of various types of clays.

X. Graphite Industries:

1. Graphite is reported to be available in Anakapalle, Vizianagaram and Visakhapatnam taluks of Visakhapatnam district and Kuruppam and Salur Agency of Srikakulam district.
2. The graphite obtained in the impure form is at present sent to other parts of the country for refining.
3. The price of raw graphite is Rs. 100 per ton and that of refined graphite is Rs. 500-1,500 per ton (August 1959 prices)
4. Refined graphite can facilitate the establishment of new industries for manufacturing of paints, electrodes, dry batteries, crucibles and pencil leads.
5. It will be quite advantageous to start a graphite refinery in the area.

XI. Leather Tanning and Finishing:

1. There is no unit in Andhra Pradesh manufacturing finished leather.
2. There are seven tanneries in the area which are generally producing E.I. Tanned leather.
3. There is not much scope for new tanneries, but a unit could be established for manufacturing finished leathers like chrome uppers and vegetable tanned sole leather.
4. One of the existing tanneries at Vizianagaram may take up the production of finished leather.

XII. Leather Footwear:

1. There are 20 units in the area manufacturing leather footwear such as shoes, sandals, boots, chappals etc.
2. Industrial leather goods like gloves, aprons, knee covers are also manufactured by these units.
3. The annual consumption of footwear in these two districts is worth about Rs. 6 lakhs.
4. The total annual production in the area is about Rs. 3 lakhs.
5. There is scope for expansion in the existing units. They should concentrate on producing items of reasonably good quality.
6. In order to introduce new designs and improved methods of production, the Government is considering the establishment of an extension centre at Vizianagaram or Visakhapatnam.

XIII. Leather Sports Goods:

1. There is good scope for establishing a unit for manufacturing covers for foot-balls, volley-balls etc.
2. In this industry there is no unit in Andhra Pradesh and at present the demand is met through imports from Calcutta, Bombay and Jullundur.
3. The main raw meterial is E.I. Tanned Leather.
4. The labour will have to be trained for this industry before the unit is established if the proprietor himself is not a trained person.

XIV. Paints and Varnishes:

1. There is no unit in the area manufacturing paints and supplies are at present obtained mostly from Bombay and Calcutta.
2. The annual demand for paints in the two districts is estimated at Rs. 16.5 lakhs. The demand is expected to go up by 50 per cent when the Hindustan Shipyard attains the target production of 6 ships per annum.
3. Raw materials like graphite, red ochre, titanium etc. are available in the area. Niger seed oil which can be used as a substitute for linseed oil, is also available in Visakhapatnam district.
4. Two units may be started in this industry. The following places are suggested for locating these units.

   (i) Visakhapatnam (iii) Vizianagaram
   (ii) Srikakulam (iv) Anakapalle

XV. Starch Products:

1. There is excellent scope for manufacturing starch from the tamarind seed locally available.
2. The tamarind seed from the area is at present sent to Calcutta and the starch required in the area is imported from Calcutta.
3. The consumption of starch by the two jute mills in the area is estimated at 7cwt. per day.
4. The annual output of tamarind from the forests of the two districts alone is about 2.5 lakhs maunds. Tamarind seed is also available from the neighbouring State of Orissa.
5. Two units for the manufacture of starch may be located at Nellimarla in Visakhapatnam and Bobbili in Srikakulam district.

XVI. Fruit Preservation:

1. Fruit Preservation industry is not developed in the area in spite of the availabilty of plenty of bananas and mangoes.
2. There are good possibilities for exporting fruit products like pickles, chutneys etc., to foreign countries.
3. After local consumption it is estimated that in the two districts about 37,680 tons of bananas and 108,320 tons of mangoes are available.
4. The unit in this industry may produce banana, figs, pickles, chutneys and other products from mangoes.
5. The unit may be located in the Araku Valley or Vizianagaram.

XVII. Wood Based Industries:

1. Demand prospects for wooden furniture items are good in Srikakulam and Visakhapatnam districts.
2. With the increasing income people are becoming more and more furniture conscious and in the coming years the demand may be expected to go up.
3. The forests which cover about 43.6% of the total area of Visakhapatnam district and 17.4% of Srikakulam district offer good timber resources to this industry. Nearly 50% of the timber available serves as raw material for the existing 21 units manufacturing furniture.
4. The demand for wooden furniture is expected to go up with the establishment of more educational institutions, offices and industrial units. Hence new units can come up in the area in this industry, while the existing units may introduce in the market improved designs of furniture, drawings for which are available with the Small Industries Service Institute, Andhra Pradesh, Hyderabad.
5. For producing better quality furniture seasoned wood is necessary. A seasoning kiln could be established in the area to cater to the demand for seasoned wood.

XVIII. Jute Twine:

1. Jute is an important commercial crop of the area.
2. The two jute mills in the area are consuming only about 30-35 per cent of the total jute grown in the area.
3. The surplus jute can be profitably used for manufacturing jute twine.
4. The following varieties of jute twine have a good demand—
   (a) Single ply for packing provision and general stores;
   (b) Three ply and five ply twine used for heavier packing;
   (c) Three ply fine twine used for stitching gunny bags.
5. One unit may be established at Srikakulam and another one at Vizianagaram or Visakhapatnam.

XIX. Plastic Articles:

1. The consumer type plastic articles like combs, cups, tumblers, ash-trays etc., have a good market in Andhra Pradesh.
2. The demand for these items in this State are mostly met by imports from other places especially Calcutta and Bombay.
3. Most of the plastic articles can be made by injection moulding processes.
4. The main raw material (Polythene) is available in India.
5. Some of the moulding powers like cellulose acetate, cellulose bentyrate etc., are still to be imported.
6. Small injection moulding machines are indigenously available. Automatic injection

moulding machines are to be imported and can be obtained on hire purchase basis through the National Small Industries Corporation.

XX. Miscellaneous:

(*a*) *Expanded Metal*:

1. Expanded metal is in great demand as a building material for ventilation purposes.
2. The annual consumption of expanded metal in the Southern Region is estimated to be worth Rs. 7 lakhs.
3. There are four units in India manufacturing this item. One unit is located in Madras State.
4. With the improvement in the supply position of B. P. sheets and rapidly increasing demand there is scope for establishing one or two units.

(*b*) *Steel Furniture & Steel Trunks*:

1. There are six units in the area manufacturing steel trunks.
2. The existing units produce about Rs. 1 lakh worth steel trunks which may be nearly 90% of the total demand in the area.
3. The existing units can expand production to meet the increasing demand and also produce good quality steel furniture.
4. There is no unit in the area manufacturing steel furniture.
5. Items such as folding chairs, tables, almirahs and Hospital equipment are suggested for manufacture in the area.
6. New units may also take up the manufacture of steel furniture.

(*c*) *Fountainpen nibs*:

1. There are three units in the area manufacturing fountainpens.
2. Production of pens in the area in 1958-59 is estimated at about 405 dozens valued at Rs. 27,000.
3. There is good scope for the existing units to manufacture fountainpen nibs.
4. The units may mainly produce superior quality gold nibs.
5. The machinery for manufacturing iridium tipped nibs can be obtained through the National Small Industries Corporation on hire-purchase basis.

(*d*) *Optical Grinding*:

1. In the area there are three units engaged in the manufacture of optical lenses.
2. The total production in the area is valued at about Rs. 70,000.
3. The consumption of optical lenses in the area in 1958-59 is placed at Rs. 82,000.
4. The demand for spectacles is increasing rapidly in the Southern Region.
5. The existing units have chance for expanding their production. One or two new units can also be started.

(*e*) *Ivory Products*:

1. Manufacture of Ivory products is a traditional handicrafts industry of the area.
2. To train the artisans in this industry the Department of Industries and Commerce, Andhra Pradesh have started a training centre at Visakhapatnam.
3. Among the various products manufactured, the tortoise shell and sandal wood fretwork boxes are the fast moving items.
4. There is demand for these articles in foreign countries.
5. In view of the difficulties in getting raw materials no new units are suggested in this industry. However the existing units can expand their production.

(*f*) *Bone Meal Fertilizers*

1. The cattle wealth of the two districts provide scope for establishing units in the Bone Crushing Industry.
2. Bone crushing for export is a well established Industry in India. Bones crushed with the help of disintegrators are exported to foreign countries and there is a good demand for the same. Bone meal which is used as a fertilizer can be made by steaming the bones first and crushing them later. Bones, which are available from the slaughterhouses, and also from carcasses from the villages can be utilised for this purpose.

(*g*) *Card Board and Straw Board*:

1. Card board and straw board are widely used for manufacturing cartons and also for book binding.
2. The internal market for card board and straw board is quite extensive.
3. The main raw materials required are waste paper, straw and bagasse.

4. The availability of raw materials and good water supply are factors favourable for the establishment of a unit.
5. A unit with a capacity of 4 tons per day requires a capital investment of Rs. 3.5 lakhs.
6. Most of the required machines can be fabricated within the country

(*h*) *Cashew Shell oil*:

1. There are 13 factories at Palasa in Srikakulam District processing about 4,800 tons of Cashew Nuts annually.
2. About 3,600 tons of Cashew shell available are mostly used as fuel.
3. Cashew shell oil which can be extracted from the shells can be used for different purposes.
4. It is estimated that nearly 10 to 12 gallons of Cashew shell oil could be extracted from 500 lbs. of Cashew shells.
5. There is scope for one or two units to be started at Palasa in this industry.

(*i*) *Playground Equipments*:

1. Recreation and cultural activities find an important place in the social welfare programmes of the Second Five Year Plan.
2. Playgrounds and Children's parks are established in Block Development areas at considerable cost.
3. Use of Playground equipments like merry-go-rounds, see-saw etc., is ever increasing in the Block areas.
4. Scope for new units exists for manufacture of those items as the Block Development activities all over the State are expected to be intensified.

(*j*) *Solvent Extraction of Oil from Oil Cake*:

1. There are seventy seven oil and rice mills in the Srikakulam and Visakhapatnam districts.
2. The cake available from oil mills after oil extraction contains 6% of oil. From this 5% oil can be extracted.
3. The deoiled cake has a good market. It is also exported.
4. The consumption of deoiled cake as a fertilizer is bound to increase in the future.
5. A small unit capable of producing 40 tons of deoiled cake in 24 hours requires an approximate investment of Rs. 4 lakhs.
6. The majority of the equipment required is fabricated indigenously
7. Two units can be located one at Vizianagaram in Visakhapatnam district and the other at Donkinivalasa or Ponduru in Srikakulam district.

(*k*) *Coir Products* :

1. In the Northern part of Srikakulam district, the belt extending from Ichchapuram to Palasa, has cocoanut plantations. The green husk obtained from the cocoanuts can be used in the manufacture of coir products.
2. Various coir products like coir rope, coir-mats, and fancy articles can be manufactured on small scale and these have a good market.
3. Consumer articles like brushes made with coir bristles have also a good and ready demand.
4. One or two units for the manufacture of coir products can be located in the northern part of Srikakulam district."

CHAPTER VIII

PANCHAYATI RAJ

Historical Retrospect :

Local Boards were non-existent till the middle of the 19th century when Road Funds were created by an executive order for the upkeep of roads, other than trunk roads and important district roads. The Collector and the District Engineer were placed in charge of these works. This arrangement was put on a statutory basis by the District Road Cess Act, 1866, which authorized the levy of a cess of half an anna in the rupee on the rent value of occupied land for the construction and maintenance of local roads.

The origin of the District Boards may be traced to the Local Fund Act of 1871, which was the outcome of the desire on the part of the Government to provide sound elementary education to the masses. The Act made specific provisions for declaring a district or part of a district as a circle and for constituting a Local Fund Board for every such circle, consisting of three or more non-official members, nominated by the Government and an equal number of official members appointed by the Government. The term of office of members was for three years. The non-official members were chosen from among owners or occupiers of lands or persons carrying on business and residing in the circle. The Collector of the district was the Ex-officio President of the Board situated within his jurisdiction. Some of the important functions of the Board were as follows :

(1) the maintenance of public roads or streets

(2) management of hospitals, schools, choultries and markets; and

(3) the empolyment and training of health staff, the inspection of sanitation in towns and villages and the upkeep of other local works of public utility calculated to promote health and comfort of the people.

The Act authorised the levy and collection of land cess (at the rate not exceeding one anna in the rupee on the annul rental value of all occupied land), house tax (in villages or groups of villages or townships in which a school supported by Government grants-in-aid existed) and tolls on carriages, carts or animals making use of the roads within the circle.

Local Self Government as a conscious process of administrative devolution and political education dates back from the final reforms of Lord Mayo's Government. By a resolution No. 3334, dated 14th December, 1871, the Government of India made over to the provincial Governments certain departments of which, education, medical services and roads, deserve particular mention, as they still constitute the principal activities of Local Bodies. The beginnings of a system of Local finances were to be found in the new scheme of Provincial finances and many of the present day problems of Local finance vis-a vis Provincial finance are similar to those which provinces had to face in their dealings with the Governmet of India. Lord Ripon's Government desired that Provincial Governments should apply to their financial relations with Local Bodies, the principle of financial decentralization which had worked so satisfactorily between the Government of India and the Provinces. The more important services that were entrusted to the rural bodies were communications, education and sanitation.

The Madras Local Boards Act, 1884, conferred additional responsibilities on the Local Boards which for the first time came to be known as the 'District Boards' instead of the 'Local Fund Boards'. Under this Act, three classes of Local Boards, came into existence, *viz.*, District Boards, Taluk Boards and Unions. The Unions were of two classes—"Major" and "Minor". The administration of local affairs was vested in the District Boards constituted for each of the revenue districts consisting of not less than 24 Members who might all be appointed by Government or might be partly so appointed and partly elected by the Members of the newly created Taluk Boards from among their Members or by the Union Boards and by the tax payers of the rural parts of the district. The Collector continued to be the Ex-Officio President. The Act also provided for the election of the Presidents of the District Boards, from among the members of the District Boards, if the Government so directed. The members were to hold office for three years. All the Revenue Divisional Officers were made Ex-Officio members. The Local Boards were empowered to levy with the approval of the Government any of the taxes authorized under the Act.

A Taluk Board consisting of a President and not less than 12 members was constituted for each taluk or group of taluks. The term of office of the members was for three years. The Revenue Divisional Officer was made an Ex-Officio member and President of the Board. The Taluk Board funds consisted of one-half of the proceeds of the tax levied by the District Board in the area and transferred to the Taluk Boards by the District Board and other fees such as licence for markets etc., collected within the area of the Taluk Board. The revenues of the District Boards and the Taluk Boards were derived from land cess, from fees for the use of cart-stands, markets, slaughter-houses, etc., and from tolls in the case of the maintenance of roads, bridges and other means of communications. The chief functions of these institutions as has been stated earlier were the construction and maintenance of hospitals and dispensaries, the diffusion of education, the enforcement of measures relating to sanitation and public health and the establishment and maintenance of relief works in times of famine and scarcity conditions.

An Union Board was constituted for a single village or for a group of villages. They consisted of not less than five persons, the headmen of the villages, constituting the Union, being Ex-Officio members. The Board levied house-tax varying from 4 annas to 4 rupees according to the classification of the house. The duties and responsibilities of this Board were the lighting and cleaning of public roads, the maintenance of drains, wells and other public places, the establishment and maintenance of dispensaries and schools etc.

In 1907 the entire subject of Local Self Government was taken up for consideration by the Royal Commission on Decentralization. The Commission brought to light that the resources of the Local Bodies were not sufficient for the proper discharge of the duties assingned to them. In order, therefore, to make Local Self Government really effective and responsible, the Montague-Chelmsford Report suggested that there should be as far as possible complete popular control in the affairs of the Local Bodies and the largest possible independence from outside control. In regard to rural boards the report stated that they should have full liberty to improve and alter taxation within the limits laid down by law. It further stated that whenever a board paid for a service, it should also control that service. If it was considered that control should be largely in the hands of the Government, then in such a case the service should be provincialized.

In the Government of India Resolution of the 16th May, 1918, the Government reviewed the question of Local Self Government and expressed the view that in order to give effect to the new policy, Local Bodies should be as representative as possible of the people whose affairs they were called upon to administer, the authority in the matter entrusted to them should be real and not nominal and that they should not be subject to unnecessary control but should learn, if necessary, by making mistakes and profiting by them.

With the coming into force of the Government of India Act, 1919, Local Self Government became a transferred subject and the implementation of the policy and the principles formulated in the resolution of May, 1918, thereupon devolved on the elected members.

Several amending Acts were passed by the State Legislature from time to time with a view to rectifying defects which were brought to light in the working of the Madras Local Boards Act, 1884. In 1920, the State Government thought that it was necessary to have a comprehensive legislation to give effect to the new policy of the Government and to consolidate and amend the law relating to the District Boards and this resulted in the passing of the Madras Local Boards Act (Act XIV of 1920). The Act gave an independent status to each class of Local Boards and increased not only their strength but also the proportion of elected members, their resources and their powers. The taxation powers of all the three categories of Local Boards were enlarged. The Boards were authorized to levy the pilgrim tax and also the profession tax on companies and firms. They were given a free hand in framing their budgets. Provision was also made for the appointment of a District Board Engineer and a District Health Officer. The Local Boards thus became more or less autonomous and the Collector and the Government were empowered to interfere only in cases of emergency and maladministration. In the same year, the Madras Village Panchayat Act was also passed with the object of developing the system of Self-Government in rural areas. This Panchayats Act was, however, repealed in 1930 with the passing of the Madras Act XI of 1930, which amended the Madras Local Boards Act, 1920, and was also comprehensive enough to include even the Panchayats constituted before the repeal of the Madras Village Panchayats Act, 1920. The Madras Local Boards Act, 1920, has been amended since then several times; the Taluk Boards having been abolished in 1934 and the Panchayats having been taken

away from the ambit of the Act by the Madras Village Panchayats Act, 1950.

The following paragraphs illustrate in brief the trend in the amendments to the Act of 1920.

Provision was made for taking of oath by members of Local Boards. All roads and public markets were thrown open to all persons of whatever caste or creed. The main changes introduced by the amendment Act of 1930 were :

(i) inclusion of Village Panchayats within the scope of the Act, conversion of Union Boards into Panchayats and the repeal of the Madras Village Panchayats Act, 1920;

(ii) abolition of the system of nomination to Local Boards;

(iii) direct elections to District Boards ;

(iv) general triennial elections to Local Boards;

(v) provision for a vote of no-confidence in Presidents and Vice-Presidents and for the removal of Presidents and Vice-Presidents by Government;

(vi) election of Presidents of District Boards;

(vii) empowering the Government to provincialize the services of officers and servants of Local Boards;

(viii) alteration in the provisions relating to taxes and tolls with special emphasis on the levy of any tax suitable to the village with the sanction of the Panchayat; and

(ix) more effective supervision over the adjudication of disputes between local authorities *inter-se*, including, in particular, the vesting of power in the Local Government to constitute joint committees of local authorities for the purpose.

The levy of tolls and tax on motor vehicles by Local Boards was abolished in 1931. Specific provision was made for the constitution of District Boards, for altering their jurisdiction and for their abolition. The majority required for the passing of motion of no-confidence in Presidents and Vice-Presidents was reduced from 2/3 to 3/5. Provision was made for the reservation of seats for Muslims and Indian Christians beisdes members of the Scheduled Castes. The Government took power to appoint District Engineers, Health Officers and Panchayat Officers. The amendment Act of 1934 abolished the Taluk Boards, the Village Development Fund, and made a provision for the splitting up of District Boards. The jurisdiction of Courts to grant injunctions in election proceedings of Local Boards was taken away by the amending Act of 1936. The amalgamation of bifurcated District Boards was made possible by the amending Act of 1937. The Act of 1938 provided for the inclusion of the names of persons found in the electoral rolls of the Madras Legislative Assembly constituencies in the rolls prepared for Local Boards. Failure to pay arrears of any kind due to the Local Boards was made a disqualification for candidates standing for elections or for members continuing in office.

Certain safeguards were provided by the amending Act of 1942 in regard to the removal or the dismissal of Government servants employed by Local Boards. Act X of 1945 increased the rate of land cess leviable by Local Boards from 1 1/2 annas to 2 annas in the rupee. In the same year, provision was made in the Act for the levy of duty on transfers of property in the form of surcharge on stamp duty in respect of immovable property situated in the area under the jurisdiction of Local Boards. The formation of the Highways Department in 1946 resulted in certain amendments to the Act in that year. In 1947 provision was made for the inclusion in the electoral rolls of Local Boards of persons who were qualified to be included but were omitted to be included in the Assembly electoral rolls. The levy of duty on transfers of property in respect of leases in perpetuity of immovable property and exchange of immovable property was made possible by the Madras Act VII of 1950. The Madras Village Panchayats Act, 1950 removed Village Panchayats from the ambit of the Madras Local Boards Act, 1920, after which the provisions of the latter Act, which formerly related to Panchayats were restricted to non-Panchayat areas. The name of the Madras Local Boards Act was altered into the Madras District Boards Act, 1920. The provision for the reservation of seats for Muslims, Indian Christians and Europeans in the Act was omitted by the amending Act of 1951. The Act also limited the total number of reserved seats for the members of the Scheduled Castes, Anglo-Indians and women to one-fourth of the strength fixed for the District Board. By another Act of 1951, the adoption of Madras Legislative Assembly electoral rolls and the alteration thereto for purposes of elections to District Boards was provided for. Certain provisions of the Representation of the peoples Act, 1950, regarding the conduct of elections were embodied in the Madras District Boards Act by an Act of 1954.

The First Five Year Plan for the country was introduced in 1951. Planning led to an enormous

increase in the activities of the Government. Large sums of money had to be spent on various schemes in short periods. It was, therefore, found essential that those who were to be benefited by these schemes should also have a say in their formulation. They must learn to express their felt needs and get them translated into programmes that can be implemented. Thus, the idea of the "Panchayati Raj" slowly began to take shape.

Panchayati Raj in Andhra Pradesh can, however, be said to have had its roots nearly one and a half decades ago. It is based on the Gandhian principle of rural rejuvenation to usher in a balanced development of the countryside. This idea was given effect to by late Sri T. Prakasam, the then Chief Minister of the Composite Madras State by his promulgation of the "Firka Development Scheme" in 1946. This was subsequently converted to "the Rural Welfare Scheme" in 1950. Besides the rural reconstruction work this Scheme also covered Harijan Uplift Programmes as well as the Khadi Schemes. The three-pronged drive that this scheme gave to the economic and social reconstruction of rural life was in the direction of self-help, co-operative approach and State aid. As in all nascent institutions, the issues at the beginning were not so clearly defined and so well crystalised as in the case of the Panchayati Raj institutions, but however, they formed the forerunners of a movement which has now got itself fully entrenched in the institution of the Panchayati Raj.

Community Development Programme:

The pattern of Community Development inaugurated on the 2nd of October, 1952 has been gradually modified to suit the needs of our rural communities. The central object of the Community Development Programme was to secure the fullest development of material and human resources of the local areas based on the fact that all aspects of rural life are inter-related and that no lasting results can be achieved if individual aspects of it are to be dealt in isolation. The approach was to step up the co-operative principle in its infinitely ranging forms for solving all problems of rural life. The experiment, therefore, in Community Development was started with the introduction of the Community Projects in the wake of the Rural Development Schemes. These Projects in a very short period achieved great popularity and people everywhere in other areas started to clamour for similar benefits in their respective villages. On account of these public demands and also considering the limited resources at the disposal of the Government the pattern of Community Projects had to be gradually changed over, to cover similar and lesser expensive Projects. These were known as the National Extension Service Blocks each covering an area of about 150-170 square miles and involving an outlay of about Rs. 4.50 lakhs. The normal operational period of each of the N.E.S. Blocks was to be for three years. Any time within that period depending on the performance in the realm of people's participation, physical attainment and expenditure, the N.E.S. Block got converted into a Community Development Block with a bigger outlay of Rs. 15 lakhs which also included the expenditure incurred during its N.E.S. stage. In June, 1957 the National Development Council decided that the Block should be treated as a unit for the purpose of planning and development and that it should be made the agency through which the resources of the Government should flow to the people.

The study team for Community Development and National Extension Service headed by Sri Balwant Rai G. Mehta recommended certain changes in the pattern of Community Development. The Ministry of Community Development accepted these proposals and accordingly removed the distinction between the different types of Blocks and introduced the two stage system. Stage I was to be the intensive development phase with a provision of Rs.12 lakhs and Stage II was to be the post intensive phase with a provision of Rs. 5 lakhs. Both stages were to be of a duration of 5 years each. Great emphasis was laid on agriculture, and therefore, each Block had to pass through a Pre-Extension stage of one year devoted exclusively to agricultural development. On completion of this Pre-Extension Stage of one year the Block automatically entered the Stage I period.

Decentralisation: Decentralisation of authority and the participation of people in administration have always been considered by great thinkers from the time of Socrates, as the chief embodiment of any democracy. In order that these two essential requsites find place in the fabric of the Indian democracy, on the recommendations of Sri Balwant Rai G. Mehtha Committee Team, "Panchayat Samithis" were constituted for each of the Community Development Blocks wherein the people are provided opportunities for participating in the process of administration. All developmental works beneficial to the community and coming within the ambit of Community Development were entrusted to the people's own elected representatives.

The idea of democratic decentralisation was thus conceived and the nucleus for this revolutionary movement was the age old Village Panchayat. The three tier system in which the Panchayati Raj institutions are linked one with the other, consisting of the Gram Panchayat with its directly elected Sarpanch and members, the Panchayat Samithi at the Block level with the Sarpanches of Gram Panchayats, the Legislators of the State and six others to be elected in the prescribed manner as its members, and the Zilla Parishad at the district level consisting of the Presidents of all the Panchayat Samithis within the district, the District Collector and the Legislators of the State and the Centre, and six others to be elected in the prescribed manner, was evolved as the institutions in which the people's representatives will have their say in the formulation and execution of policies and programmes will be beneficial to the Community. The constitution of Gram Panchayats was, therefore, speeded up in order that the entire rural area came under one or the other of the Gram Panchayats.

The Andhra Pradesh Panchayat Samithis and Zilla Parishads Act was enacted in 1959 and except the areas within the jurisdiction of Municipalities in the Andhra area, the areas within the jurisdiction of the City Municipalities in the Telangana, the areas within the jurisdiction of the Municipal Corporation of Hyderabad and the areas within the jurisdiction of Secunderabad Cantonment Board, the rest of the area constituting the State of Andhra Pradesh was brought under the ambit of this Act.

Panchayat Samithis: The Presidents of all the Gram Panchayats in a Block constitute the members of the Panchayat Samithi. Besides, two women members, one representative of the Scheduled Castes, one representative of the Scheduled Tribes where the population of the Scheduled Tribes in the Block is not less than 5% of the total population of the Block and if not, another representative of the Scheduled Castes, and two persons interested in rural development will also be elected as members in the prescribed manner. Apart from these members, the Member of the Legislative Assembly of the State representing a constituency which comprises the Block will be the member of the Panchayat Samithi of that Block. A Member of the Legislative Assembly representing a constituency which comprises more than one Block including a portion of any Block will be a member of the Panchayat Samithi of only one such Block which he chooses and he will have the right to speak in, and otherwise to take part in the proceedings of a meeting of any Standing Committee of such Panchayat Samithi; but he is not entitled to vote at a meeting of such Standing Committee unless he is also a member of that Committee. He will also have the right to speak in and otherwise to take part in the proceedings of a meeting of any Panchayat Samithi or Standing Committee thereof constituted for the other Blocks comprised within the constituency, but he is not entitled to vote at any such meeting. Further, the Member of the Legislative Council of the State specified by the Government in the prescribed manner as member of the Zilla Parishad of the district will be a member of only one Panchayat Samithi, in such district; and where he is a registered voter in any Block in such district he will be a member of the Panchayat Samithi of only that Block; but if he is not a registered voter in any Block in the district, he will be a member of only one Panchayat Samithi of his choice in such district; and he will have the right to speak in and otherwise to take part in the proceedings of a meeting of any Standing Committee of such Panchayat Samithi, but he is not entitled to vote at a meeting of such Standing Committee unless he is also a member of that Committee. Similarly, the Revenue Divisional Officer, the District Collector and such other officers as the Government may, by order, specify can take part in the proceedings of any meeting of a Panchayat Samithi or any Standing Committee thereof functioning within the local limits of their respective jurisdictions without any right of voting.

The Panchayat Samithi has been placed in complete charge of the implementation of the Community Development Programmes and in addition, the Government have also entrusted it to the extension activities of the various development departments of the Government such as Agriculture, Animal Husbandry, Fisheries, Industries, Education, Co-operation, Social Welfare, Women's Welfare, *etc.*

Every Panchayat Samithi has seven Standing Committees, each of which has been placed in charge of a few specified subjects. The Panchayat Samithi with the approval of the State Government, is empowered to constitute one or more Standing Committees if it so desires for any matter. All the Standing Committees have independent powers of sanction with specified financial limits and may also execute works and schemes within those limits.

The Block Development Officer is the Chief Executive Officer of the Panchayat Samithi and he is assisted by the extension staff. The President of the Panchayat Samithi exercises administrative control

over the Block Development Officer for the purpose of implementation of the resolutions of the Panchayat Samithi and its Standing Committees.

Zilla Parishad: At the District level there is the Zilla Parishad comprising the Presidents of all the Panchayat Samithis in the district, the District Collector, the members of the Legislative Assembly of the State elected from the district, such members of the Legislative Council of the State as the Government may by order specify, the members of the House of the People elected from the constituency which forms part of the district, and such Members of the Council of States as the Government may, by order, specify and two women, one representative of the Scheduled Castes, and one representative of the Scheduled Tribes if their population in the district is not less than five percent of the total population of that district, and if not another representative of the Scheduled Castes, two persons interested in rural development elected by the above categories of members in the prescribed manner.

The Chairman and the Vice-Chairman are to be elected by the members from among the non-officials who are not Legislators. The President of any Panchayat Samithi or a Sarpanch of a Gram Panchayat is elected as the Chairman of the Zilla Parishad; he will from the date of his election cease to be the President of the Panchayat Samithi or the Sarpanch of the Gram Panchayat, as the case may be, but such cessation may not in any way affect his continuance as member of the Zilla Parishad, Panchayat Samithi or Gram Panchayat. A Secretary, appointed by the Government functions as the executive head of this organisation. He is entitled to attend the meetings of the Zilla Parishad or any of its Standing Committee meetings, and can take part in the discussions there at but he is not entitled to vote or to move any resolution. Like the Panchayat Samithi, the Zilla Parishad also functions through its seven Standing Committees, in addition to these seven Standing Committees the Zilla Parishad may with the approval of the Government, constitute one or more Standing Committees for any matter. The Chairman of the Zilla Parishad and the District Collector are ex-officio members of all the Standing Committees while the remaining members are to be elected by the members of the Zilla Parishad from among themselves. The District Collector is the Chairman of all the Standing Committees. The District Officers of various development departments, regional and State officers in charge of development activities who are specified by the Government by an order have the right to speak in or to take part in the proceedings of any meetings of the Zilla Parishad or any Standing Committees thereof but however, they have no right to vote.

The Zilla Parishad Co-ordinates and consolidates plans prepared in respect of all the Blocks in the District and also supervises generally the activities of the Panchayat Samithis in the district. It also examines and approves the budgets of the Panchayat Samithis in the district.

The chief sources of finance for the Zilla Parishad are the Central and the State Government funds allotted to it; grant from All India Bodies and Institutions for the development of Cottage, Village and Small Scale Industries; such share of the land cess or local cess, State taxes or fees as may be prescribed; proceeds from taxes or fees which the Zilla Parishad may, under any law, levy; income from Endowments or trusts administered by the Zilla Parishad; such income of the District Board as the Government may, by order, allot to it; donations and contributions from Panchayat Samithis or from the public in any form; and such contributions as the Zilla Parishad may levy from the Panchayat Samithis with the previous approval of the State Government.

Growth of Community Development Pogramme in the District:

The Community Development Programme was first inaugurated in Srikakulam district during the year 1954. Gara and Amadalavalasa National Extension Service Blocks and Ichchapuram Community Development Blocks were the first to be started in this district on 4-4-1954. After a period of two years, two more National Extension Service Blocks at Baruva and Burja were started on 1-4-1956 Based on their respective performance the Amadala valasa N.E.S. Block was upgraded into a C.D.Block on 1-4-1955 and that of Gara on 1-4-1956. On 2-10-1956 two additional N.E.S. Blocks of Mandasa and Shermahammadapuram were started. Thus at the beginning of the Second Five Year Plan period there were 4 National Extension Service Blocks and 3 Community Development Blocks in this district. During 1957 four more N.E.S. Blocks were started in this district. Saravakota and Urlam N.E.S. Blocks were started on 1-4-1957 and Seethampet and Kotabommali N.E.S. Blocks on 2-10-1957. From July, 1958 a significant change emerged in the pattern of the programme following the recommendation of the Study Team led by Sri Balwant Rai G. Mehta, which was appointed by the Committee on Plan Projects to study the working of the Community Development

Programmes. This Committee recommended the abolition of the distinction between the National Extension Service, intensive development and post-intensive development stages and introduced a revised phasing envisaging two stages of five years of each. Based on these recommendations, the pre-Extension, Stage I and Stage II Blocks have been adopted.

Another significant step which was taken in Andhra Pradesh was to treat the Block as a unit for the purpose of Planning and Development.

Based on the recommendations of Shri Balwant Rai, G. Mehta's Committee report and the future pattern adopted the eight N.E.S. Blocks viz., Baruva (Sompeta), Burja (Palakonda), Mandasa, Shermahmadapuram, Saravakota, Urlam Narasannapet, Seethampeta and Kotabommali were classified as Stage I Blocks; Ichchapuram, Gara and Amadalavalasa as Stage II Blocks. During 1958-59 Bhadragiri (Agency) Stage I Block and Marupaka and Ramabhadrapuram Pre-Extenison Blocks were newly started. During 1959-60 Marupaka and Ramabhadrapuram Pre-Extension Blocks were upgraded as Stage I Blocks and two new Pre-Extension Blocks viz., Bobbili and Tekkali were started on 1-4-1959 and 2-10-1959 respectively besides the starting of Saribujjili Stage II Block on 1-4-1959. During 1960-61 Bobbili and Tekkali pre-Extension Blocks reached Stage I and four new Pre-Extension Blocks viz.. Parvathipuram, Rajam, Kothur and Nandigam were started; the former two on 1-4-1960 and the latter two on 2-10-1960. Thus by 31-3-1961 i.e., by the end of the Second Five Year Plan there were 21 Blocks (13 Stage I, 4 Stage II and 4 Pre-Extension Blocks) in the district. During the Third Plan period the Community Development Programme gained further momentum and by 1-4-1964 there were 34 Blocks (22 Stage I, 8 Stage II and 4 Post-Stage II Blocks) in the district. The following statement gives details of the Stage of each Block, area, number of villages and the population covered.

STATEMENT VIII-1

Name of the Block (1)	Date of reaching the present stage (2)	Present stage (3)	No. of villages in the Block (4)	Area (in sq. miles) (5)	Population (6)
Bhadragiri (*Agency*)	1-3-1958	Stage I	206	267.27	24,855
Ranastalam	1- 3-1958	do	96	132.45	73,616
Ramabhadrapuram	2-10-1958	do	60	128.44	52,673
Bobbili	1- 4-1959	do	73	115.75	58,726
Tekkali	2-10-1959	do	102	64.80	55,408
Rajam	1- 4-1960	do	51	47.05	55,767

Saribujjali	30- 3-1964	do	117	89.22	51,000
Amadalavalasa	30- 3-1964	do	59	63.95	56,033

Source: Panchayati Raj Department.

During the recent redelimitation of the Blocks all the above 34 Blocks in this district were redelimited into 24 Blocks viz., Gara, Saribujjili, Narasannapet, Kotabommali, Cherukurupalli, Ranasthalam, Shermahammadpuram, Tekkali, Kasibugga, Ichchapuram, Mandasa, Pathapatnam, Kothuru, Parvathipuram, Kurupam, Bhadragiri, Salur, Pachipenta, Seethampeta, Palakonda, Rajam, Veeraghattam, Bobbili and Badangi covering the entire district.

The Panchayat Samithis were constituted in the district on 1-11-1959 and the Zilla Parishad was constituted on 1-12-1959 on a statutory basis. Therefore, with the introduction of democratic decentralisation set up at the District, Block and Village levels the responsibility and initiative in economic and social development in rural areas rested with these popular institutions—the Zilla Parishad, the Panchayat Samithi and the Village Panchayat. 1,453 Village Panchayats have so far been constituted in this district. During the recent Panchayat Elections held in June, 1964, 804 Panchayats have elected both their members and Sarpanches unanimously and 1,336 Panchayats have elected their Sarpanches only uncontested. Two of the Panchayat Samithis have also elected their co-opted members and Presidents unanimously. The expenditure incurred in each of the Community Development Blocks and the Block-wise physical achievements are given under Administrative Statistics in Part II of this volume and may be referred to.

CHAPTER IX

GAZETTEER

SRIKAKULAM TALUK

This taluk comprising an area of 227.3 square miles lies in the centre of the district abutting the sea-coast on the south-east and stretching narrowly like a finger up to Pathapatnam taluk in the north. On the east it is bounded by Narasannapet taluk and on the west by Palakonda and Cheepurupalle taluks. According to the 1961 Census count the taluk supports a population of 217,993 persons as compared with 192,615 persons in the previous Census. There are altogether 190 inhabited villages, 23 uninhabited villages and Srikakulam town. The density of population of taluk is 959 persons per square mile.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	22
200—499	57
500—999	53
1,000—1,999	35
2,000—4,999	20
5,000—9,999	3
10,000 and above	...
Total inhabited villages	190

The three villages having more than 5,000 population are Singupuram (5,868), Srikurmam (9,010), and Ampolu (5,286). The places of interest among these are described in the succeeding paragraphs.

Srikakulam taluk is drained and irrigated by the two main rivers Vamsadhara and Nagavalli on two sides of it ,which flow from north to south before falling into the Bay of Bengal. The river Vamsadhara flows on the east separating it from Narasannapet taluk and on the south-west flows the perennial river Nagavalli which is known as Leyangulya in its lower reaches, and therefore, a large part of the taluk is benefited by the channels of these two rivers. In addition to the river channels minor irrigation tanks are also helpful sources. Agriculture is the major means of livelihood for a large number of people in the taluk. Based on the 1961 Census findings the total number of Agricultural workers in the taluk is 79,986 persons.

As regards the transport and communication facilities, the taluk is well served both by Railways and Roadways. The Grand Trunk Road from Madras to Calcutta passes through the heart of Srikakulam town touching many villages in the taluk. A major district road from Amadalavalasa leads on to Battili on the borders of Orissa in Pathapatnam taluk. The Srikakulam-Palakonda road connects Amadalavalasa and Calingapatnam which is a minor port and a coastal village. Several buses ply regularly from Srikakulam town, the district headquarters to important places in the district as well as to other districts. The Howrah-Madras line (Broad Gauge) of the South Eastern Railway passes through this taluk with its stations at Dusi and Srikakulam Road.

Medical facilities are provided by a Government Headquarters Hospital located in Srikakulam besides a Mission Hospital. There are Local Fund Hospitals at Amadalavalasa and Calingapatnam and Rural Dispensaries in many big villages maintained by the Panchayat Samithi. The Srikakulam Municipality supplies protected water in the Municipal area. The drinking water in rural areas is mostly obtained from draw wells.

There is a Government Arts College, a Polytechnic, a Government Girls' High School, a Government Basic Training School, a Municipal Higher Secondary School and a High School at the district headquarters. The Zilla Parishad maintains High Schools at Amadalavalasa, Singupuram, Dusi, Lakshminarasupeta, Calingapatnam, Srikurmam, Bobbili and Gara villages of the taluk. There are Primary Schools in most of the villages.

There is a sugar factory besides a number of oil expellers and rice mills at Amadalavalasa. The bell-metal industry at Budithi village is making headway. Amadalavalasa is a good business centre. Srikakulam Road is a Railway Station on Howrah-Madras line, and near to Amadalavalasa and affords transport facilities.

Srikakulam—formerly known as Chicacole stands at some distance on the bank of the river Nagavalli and is about 567 miles away from Madras. It is the largest Municipality in the taluk with a population of 35,071 persons as per the 1961 Census count as compared with 24,212 persons in the year 1951. Srikakulam is the headquarters of the district and the taluk. The usual complement of district and taluk offices are located here. The town extends over an area of 5.25 square miles and the density is 6,680 persons per square mile. There are altogether 6,896 occupied residential houses in the town.

Srikakulam Road Railway Station on the Howrah-Madras line (Broad Gauge) of the South Eastern Railway is situated about 9 miles away from the town. Being the headquarters of the district Srikakulam is also well connected with all important places in the district by road on which buses ply regularly. The Grand Trunk Road from Madras to Calcutta also passes through the centre of this town. Another important feature of this place is that it has developed into an important centre of education with one Government Arts College, one Government Training School and three High Schools out of which one is the Government Girls' High School. In addition to these there are quite a number of primary schools.

As regards medical facilities there is one Government Hospital, a Municipal Maternity Centre and a private Maternity Centre called the Good Samaritan Centre. The headquarters of the District Health Officer, Municipal Health Officer and the Malaria Health Officer are located in this town. The town has protected water supply system but it lacks underground drainage. There are two parks and one library, maintained by the Municipality and one Reading Room maintained by the Government.

Handloom weaving is the major cottage industry of the locality. Srikakulam was formerly celebrated on account of the very fine muslin made here but the industry, like all other purely native industries, seems to have declined as soon as it came in competition with mill-made goods. The quality of the muslin made is excellent. A weekly market is held on every Thursday. The town contains a fine mosque built by Shermohammed Khan and several temples. The temple of Suryanarayana (Sun God) is of tourist interest. Srikakulam has historical importance. For details the chapter on History may be referred to.

Srikurmam—is the largest populated village in this taluk. According to the 1961 Census count the total population of this place is 9,010 and it occupies an area of 13.96 square miles. There are altogether 1,913 occupied residential houses. A large number of people depend on agriculture for their livelihood. 3,182 persons are Agricultural Workers as per the 1961 Census. The Nagavalli channel and the tanks nearby the villages facilitate irrigation. Paddy and ragi are the chief food crops raised besides groundnut which is an important commercial crop. There is a Sub-Post Office, a Panchayat Office, a Primary Health Centre and a First Aid Centre in this village. It is the headquarters of a Health Inspector and a Lady Health Visitor. The village contains a children's park and a temple of Srikurmamda. A Zilla Parishad High School serves the educational requirements of local children.

Singupuram—is the second largest village in the taluk which supports a population of 5,868 persons as per the 1961 Census count. It extends over an area of 2.53 square miles and in all it consists of 1,134 occupied residential houses. It is also primarily an agricultural village. The total number of Agricultural Workers of this place is 1,967. Wet paddy and ragi are the chief food crop raised besides groundnut. Here irrigation is facilitated by the river channels and tanks. This village is having good transport and communication facilities as the Grand North Trunk road passes through this village. There is a Branch Post Office, a Samithi Ayurvedic Dispensary, a Veterinary First Aid Centre and a Zilla Parishad High School in this village.

Ampolu—has a total population of 5,286 persons according to the 1961 Census count and the village extends over an area of 1.50 square miles. In all it has 1,036 occupied residential houses. People in this village live by cultivation as their main occupation. The total number of Agricultural Workers of this place is 2,882 persons of whom 1867 are Cultivators, while the rest are Agricultural Labourers. Paddy and ragi are the major food crops raised besides groundnut. Occasionally jowar and bajra are also raised by the individual farmers considering their needs. There is a Branch Post Office, a Panchayat Office, a Reading Room and a Library in this village. It contains several Panchayat Elementary Schools.

Salihundam—supports a population of 2,795 persons as per the 1961 Census count. The village assumes historical importance owing to the location of ancient monuments of "Kalinga Rajyam" (Kalinga Empire) on a hillock close by. The Buddhist stupas are under the management of Archaeological Department which is taking all possible steps to preserve them.

Calingapatnam—is a minor port and was of some importance during the days bygone. It is situated on the south bank of the Vamsadhara river. The sandy point forming the south bank of the river is in north latitude 18°19′ and east longitude 84°7′30″. A light house of 64′ height stands from the point and the town is between the south bank of the river and this long low sandy point. A reef of rocks extends from the shore half a mile eastwards. During the monsoon boats can come up into the river Vamsadhara. The total population of the village as per 1961 Census is 4,215 persons.

Calingapatnam is connected by road to Srikakulam which is at a distance of about 16 miles. It used to be the residence of European merchants during the days of the East India Company and even subsequently. Its neighbourhood is of antiquarian interest as it was formerly the site of the ancient City of Calinga.

CHEEPURUPALLE TALUK

This taluk is the southern most coastal taluk of Srikakulam district. It is bounded on the north by Palakonda and Bobbili taluks, on the north-east by Srikakulam taluk, on the west by Bobbili taluk, on the south-east by the Bay of Bengal and on its south-west by Vishakapatnam district. The taluk is extended over an area of 461.7 square miles and supports a population of 318,321 persons as compared with 289,379 persons in 1951 Census. The density of the taluk is 689 persons per square mile. There are altogether 322 Villages out of which 19 villages are uninhabited. Cheepurupalle is the only town in this taluk

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	33
200—499	59
500—999	100
1,000—1,999	74
2,000—4,999	34
5,000—9,999	3
10,000 and above	...
Total inhabited villages	303

The three villages having more than 5,000 population are Garbham (6,615), Ponduru (7,280) and Murapaka (5,498). The places of interest among these villages are described in the succeeding paragraphs.

The river Nagavalli or the Leyangulya, which is one of the chief rivers of the district flows between Cheepurupalle and Srikakulam taluks and thereby forms the boundary. The channels of river Nagavalli are useful for irrigation. The Narayanapuram Project serves about 28 villages of the taluk. But yet the chief sources of irrigation are minor irrigation tanks which are rainfed. The soil in this taluk is rocky and sandy and the area close to the hills is prominently of red varieties. The total number of Agricultural Workers of this taluk is 149,354.

Cheepurupalle being a coastal taluk, the climate is moderate. April, May and June are the warmest months but however, the sea breeze renders the climate tolerable. The rainfall in 1960-61 was 36.5 inches. The taluk possesses a moist atmosphere during the major part of the year. There are no reserved forests in the taluk. The unreserved forests cover small extents on scattered hills in which scrub jungles are found.

As regards communications the taluk is served both by roads and railways. The Howrah-Madras line (Broad Gauge) of the South Eastern Railway passes through this taluk with its stations at Cheepurupalle, Garividi, Bathuva, Sigadam, Ponduru and Gorinta. The National Highway passes through this taluk. Important places like Rajam, Vizianagaram and Srikakulam towns are connected by good roads.

As regards medical aid a Government Hospital is located at Cheepurupalle the taluk headquarters, to serve the people of this taluk. For the benefit of the workers in the Manganese Factory at Garividi a hospital is located at Shreeramnagar which is attached to the factory. Besides these there are Rural Dispensaries at Ponduru, Kinthali and Bhyripuram. People in this taluk drink water from wells.

The educational establishments of the taluk consist of 5 High Schools and 5 Middle Schools for boys and 2 Middle Schools for girls. There are Elementary Schools in almost all villages of the taluk. As in other taluks the common features of interest in the taluk are the weekly shandies which are held at Cheepurupalle, Budumuru, Ponduru and Nimmalavalasa

The chief cottage industries of this taluk are handloom weaving, pottery, basket making and the vegetable oil pressing and provide both part time and whole time employment. In respect of large industries the taluk consists of Manganese deposits at Garbham, Kothakarra, Budarayavalasa, Koduru, Sivaram, Cheepurupalle, Rachagundem and Itamvalasa villages and these have led to the establisment of a Ferro-Manganese Factory at Garividi. There is an up-grading factory also attached to it. Manganese manufactured at this place is exported to foreign countries and is of enormous value. The industry may, in future occupy a prominent place, as Manganese deposits are abundant in Parvathipuram, Salur and Bobbili belts.

Cheepurupalle–the headquarters of the taluk by the same name is a fairly big town. It is treated as a town for the first time in the year 1951. According to the 1961 Census count this town supports a population of 9,540 persons and it extends over an area of 1.35 square miles. The density of population is 7,067 persons per square mile. There are 1,984 occupied residential houses in this town.

Cheepurupalle is a Railway Station on Howrah-Madras line (Broad Gauge) of the South Eastern Railway and is well connected with Vizianagaram, Palakonda and Srikakulam by roads on which buses ply regularly. It contains the usual offices of a Tahsil. The Post office in this town is provided with telephone and telegraph exchanges. There is a Government Hospital, a Minor Veterinary Hospital, a Police Station, a Zilla Pairshad High School, a Panchayat Park and a Travellers' Bungalow in this village. Handloom weaving is the major cottage industry of the locality. A weekly shandy is held here on every Friday which is participated by people even from quite distant places.

It seems to have been of some importance in days gone by. It contains the remains of what was once a considerable fort. Bricks of ancient pattern are often dug up round the fort and in 1867 three sets of copper 'Sasanams' were found in this village, one of which records a grant by Vishnu Vardhana I of the Eastern Chalukya dynasty who flourished from 615 to 633 A.D.

Garbham–is the second largest village in this taluk which recorded a population of 6,615 persons as per the 1961 Census count. The village covers an area of 7.88 square miles and consists of 1,360 occupied residential houses. The majority of the people in this village are engaged in agriculture and its allied pursuits. The total number of Agricultural Workers of this village is 2,289 persons which includes both Cultivators and Agricultural Labourers. Here mostly commercial crops such as chillies, groundnut and jute are raised and irrigation is facilitated by minor irrigation tanks. There is a High School, a Panchayat office and a Zilla Parishad High School in this village.

Murapaka—is another fairly big village with a population of 5,498 persons as per the 1961 Census count. It occupies an area of 0.90 square miles and comprises 1,128 occupied residential houses. Agriculture is the major means of livelihood for the people in this village. The total number of Agricultural Workers of this place is 2,662 persons of whom 1,914 persons are Cultivators, while the rest 748 persons are Agricultural Labourers. Groundnut and jute are the major commercial crops of the village which are fed by minor irrigation tanks. Murapaka contains a Zilla Parishad High School, a Branch Post Office, a Block Development Office and a Panchayat Office.

BOBBILI TALUK

The taluk lies in the plains of Srikakulam district. It is bounded on the north by Parvathipuram taluk, on the south-east by the Cheepurupalle taluk, on the east by Palakonda, on the west by Salur taluk and on the south by Visakhapatnam district. The taluk occupies an area of 391.0 square miles and there are altogether 253 Villages out of which 15 villages are uninhabited. Bobbili is the only town in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	23
200—499	54
500—999	68
1,000—1,999	55
2,000—4,999	37
5,000—9,999	1
10,000 and above	...
Total inhabited villages	238

Pedapenki (5,132) is the only village in this taluk having more than 5,000 population.

According to the 1961 Census count the taluk recorded a population of 286,207 persons as against 262,748 persons the previous Census. The density of the taluk is 732 persons per square mile.

The taluk is drained and watered by the river Suvarnamukhi and the river Vegavathi which are the tributaries of the river Nagavalli. The river Suvarnamukhi rises in the hills of Salur taluk and flows from west to east and finally joins the river Nagavalli in the Palakonda taluk. The river Vegavathi takes its source in the Pachipenta hills of Salur taluk and flows in the same direction almost parallel to Suvarnamukhi which after a long course joins the Nagavalli river in the Palakonda taluk. The Penta channel, the Paltheru channel and the Chakarapalli channel are useful for irrigation. About eleven villages of this taluk are served by the Sitanagaram anicut scheme and the Nagavalli right side channel scheme. The Bantumakkuva and the Mangaligedda schemes are under investigation and they are expected to irrigate a large area in this taluk. The soil is made up of red loam, red sand and black clay. The total number of Agricultural Workers of this taluk are 126,639 persons.

The forests in this taluk contain scrubs and inferior timber useful as fuel. The Government are taking all possible steps to improve the forests of the taluk. The average annual rainfall of this taluk is 1,225 mm. and it gets the benefit of both North-East and South-West monsoons but the rainfall varies. April to June are the warmest months. The rest of the year is not too uncomfortable.

Transport and communication facilities are comparatively better in this taluk. It contains black topped roads maintained by the Highways Department which connect Bobbili with Visakhapatnam and Srikakulam. Bobbili which is the taluk headquarters is terminus for quite a number of buses which ply to different places in the district. The Vizianagaram-Raipur Railway line (Broad Gauge) of the South Eastern Railway passes through this taluk and the Bobbili-Salur line (Broad Gauge) also of the South-Eastern Railway, branches off at the Bobbili Railway Station. There is a Post Office with Telephone and Telegraph facilities in the taluk headquarters besides Sub-Post Offices at Balijapeta, Sitanagaram, Pedamanapuram and Therlam villages. Further, there are 71 Branch Post Offices covering the rest of the taluk.

As regards medical facilities a Local Fund Hospital, a Municipal Dispensary, a Health Centre, a Gosha Hospital and a Leprosy Asylum are located at Bobbili town besides the Rural Dispensaries at Balijapeta, Paltheru, Burja, Terlam, Komatipalle and Sitanagaram. The taluk also contains Health Centres at Chinthada, Piridi and Bobbili.

As regards the educational establishments, there is a Multipurpose High School at the taluk headquarters. Balijipeta, Badangi, Therlam, Sitanagaram, Piridi and Maradam villages have one High School each. The villages of Vantaram, Ajjada, Narannaiduvalasa, Uuddavolu, Chintada, Perumali, Datti, Uttaravilli and Dattirayeru have one Middle School each. Bobbili has a College, a Multipurpose High School and two Girls Middle Schools.

The chief cottage industries of the entire taluk capable of providing both part time and whole time occupations are handloom weaving, vegetable oil pressing, basket making, shoe making, brass and bell metal works, pottery and the manufacture of leaf-mats, gur and cigars. Weekly markets are held at Balijapeta, Pedamanapuram, Uttaravilli, Sitanagaram and Perumali.

Bobbili—is the headquarters of the taluk and is the third largest Municipality in the district with a population of 25,592 as per the 1961 Census count. It is situated about 60 miles away from Srikakulam. It appears that Lingappa, a Raja of Bobbili, during his time selected this place as his capital and called it Peddapuli (tiger) in honour of Sher Muhammad, the patron of the family (Sher *i.e.*, tiger) and Faujdar under Nizam. The word was corrupted into Pebbuli and Bebbuli and at last became Bobbili. The town extends over an area of 3.08 square miles and its density is 8,309 persons per square mile. There are altogether 5,480 occupied residential houses.

Bobbili is accessible both by Road and Railway. It is an important Railway Junction on Raipur-Vizianagaram line (Broad Gauge) of the South Eastern Railways. At this junction the Salur-Bobbili

line (Broad Gauge) branches off. This place is associated with a historic battle against the French under Bussy which costed the life and family of the Bobbili Raja. A detailed account of this battle is given under Chapter II-History and it may be referred to. The Raja of Bobbili in 1891 erected a war pillar where the actual battle took place commemorating the tragedy. This pillar can be seen even to-day towards the north-east on the outskirts of Bobbili town.

The town contains the Offices of a Tahsildar, Sub-Registrar, Judicial Second Class Magistrate, Labour Inspector, Commercial Tax Officer and Central Excise Officer in addition to several other offices. The Post Office in this town is provided with Telephone and Telegraph Exchanges. There is a Government Hospital, Municipal Ayurvedic Dispensary, a Maternity and Child Welfare Centre and a Government Veterinary Hospital in this town. A Government Rest House and a Travellers' Bungalow are located here. There is a Park, a Library and a Reading Room in this town. Bobbili is famous for the manufacture of 'Veenas'. The town also owes its importance to its sugar factory which provides employment to about 400 workers.

Pedapenki—is a large village in the taluk situated about 3 miles away from Bobbili with a population of 5,132 as per the 1961 Census count. The village occupies an area of 4.10 square miles and altogether there are 1,041 occupied residential houses. Pedapenki is primarily an agricultural village. The total number of Agricultural workers is 2,437 persons out of whom 1,606 persons are Cultivators while the rest 831 persons are Agricultural Labourers. Paddy, sugarcane and jute are the chief crops raised and irrigation is facilitated mostly by tanks. There is a Panchayat Office, a Branch Post Office and two Elementary Schools in this village.

SALUR TALUK

This taluk is in the western part of Srikakulam district lying west of Bobbili taluk. It is bounded on the north and west by Orissa State, on the east by Bobbili taluk and on the south by Vizianagaram taluk of Visakhapatnam district. About 69 square miles of the taluk, which is mainly a hilly tract, is treated as Agency area and this Agency tract is mainly inhabited by the hill tribes. The mountains of the Eastern Ghats are situated on the western side of the taluk and these provide most of the forest wealth. The Agency is mainly inhabited by Jatapus, Konda Doras and conisderable sprinkling of Gadabas. According to the 1961 Census count the Plains and the Agency areas of the taluk together supports a population of 164,125 persons as compared with 156,581 persons in the previous Census. 7,733 persons live in the Agency portion. The taluk occupies an area of 491.0 square miles and there are altogether 395 villages of which 50 are uninhabited. There are 141 villages in the Agency portion of which 115 villages are inhabited and 26 are uninhabited.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	194
200—499	71
500—999	41
1,000—1,999	30
2,000—4,999	8

10,000 and above	...
Total inhabited villages	345

Ramabhadrapuram (6,116) is the only village in this taluk having more than 5,000 population. The density of the taluk is 334 persons per square mile.

The taluk is drained and watered by the rivers Vegavathi, Suvarnamukhi, Gomukhi and Champavathi. These rivers rise in the Eastern Ghats. The river Vegavathi enters the taluk in its extreme western side and after a long flow across the taluk it passes through the Bobbili taluk and joins the Suvarnamukhi river at Patuvardhanam village of Palakonda taluk. The river Suvarnamukhi enters the north western portion of the taluk and after flowing across it passes through the Bobbili taluk, receives Vegavathi and finally joins Nagavalli river in Palakonda taluk. The river Champavathi drains the southern portion of the taluk and after flowing through a few villages it enters the Bobbili taluk. The river Gomukhi flows in the north-west of this taluk but soon joins the river Suvarnamukhi after serving a few villages. The soil in this taluk is mostly constituted of the red loam variety. The chief sources of irrigation in this taluk are the river Vegavathi and Adarugedda. An anicut has been built across the river Vegavathi at Karrivalasa village from which several irrigation channels branch off. About 6,000 acres in 24 villages are irrigated under this project. At Surapadu a

dam was constructed across Adarugedda from which irrigation channels take off to a length of about 9 miles. The anicut built across Suvarnamukhi river at Venkatabhyripuram serves only two villages of this taluk but serve several villages in Bobbili taluk.

As regards transport and communication facilities the taluk is connected by both roads and railways with the neighbouring taluks. The National Highway passes through this taluk. The Salur-Bobbili line connects Visakapatnam-Raipur Railway line at Bobbili junction. In addition to these the taluk is connected by a major district road with the district headquarters town on which buses ply regularly.

As regards medical relief, there are two Government Hospitals one at the taluk headquarters town and the other at Thonam. There is a Local Fund Hospital at Makkuva. Rural Dispensaries are located at Ramabhadrapuram, Sambara and Pachipenta villages. A mobile medical unit serves the entire taluk, specially villages which are not in easy reach of any medical facilities. The National Malaria Eradication Project Programme is busy fighting the infectious mosquito. There is a Government Veterinary Hospital at Salur and a Veterinary Dispensary at Ramabhadrapuram maintained by the Ramabhadrapuram Panchayat Samithi which cater to the animal health services of the taluk.

In the sphere of education there is a Zilla Parishad High School at Salur, the taluk headquarters town. The villages of Ramabhadrapuram, Makkuva, Sambara, Challapeta have a High School each maintained by the Zilla Parishad. Pachipenta, Arikithota and Sambara have a Middle School each which are also maintained by the Zilla Parishad. There are about 174 Elementary Schools in the entire taluk.

The chief cottage and small scale industries capable of providing both part time and whole time occupations are handloom weaving, shoe-making, basket making, furniture making, *adda* leaves stitching, brass and bell metal works, pottery and the making of leaf mats, gur and cigars. There are no large scale industries in this taluk. The common features of interest as in other taluks are weekly shandies which are held at Salur, Ramabhadrapuram, Makkuva, Duggeru, Pedapadam, Andra and Pachipenta villages.

Salur—a Municipality is the headquarters of the taluk and is the second largest municipality in the district, supporting a population of 26,111 persons as per the 1961 Census count. The town covers an area of 7.59 square miles and the density is 3,440 persons per square mile. There are altogether 5,429 occupied residential houses.

Salur is a Railway Station on the Bobbili-Salur line (Broad Gauge) of the South Eastern Railway. It is also well connected by roads. The Ramabhadrapuram – Itikivalasa road which is National Highway passes through this town. The Jeypore-Vizianagaram buses maintained by the Orissa State Government also stop at Salur. These buses provide satisfactory and quick transport and communication facilities which are accessible even to the Agency tract. Owing to its convenient situation and proximity to important markets *viz.*, Visakhapatnam and Vizianagaram, it gives stimulus to trade and provides an outlet to the marketable surplus particularly of the Agency. This place can therefore be considered as the gateway for the transport of all Agency produce to the markets of Vizianagaram and Visakhapatnam.

The town contains Taluk Office, a Sub-Registrar's Office, a Judicial Second Class Magistrate Court, a Police Station, a Commercial Tax Office and a Forest Range Office besides several public offices including a Post Office with Telephone and Telegraph facilities. In addition to these there is a Government Hospital, a Municipal Maternity Centre, a Mobile Medical Unit of the State Government in this town which provide medical aid. A Veterinary Hospital with a Touring Billet cater to the animal health services of the locality. There is protected water supply system in the town but lacks proper underground drainage system. The Municipality maintains three Reading Rooms and two Recreation Clubs. A Zilla Parishad High School and a Government Middle School for girls are located in this town, in addition to several private schools. A weekly market is held here on every Sunday.

Ramabhadrapuram—is the largest village with a population of 6,116 persons as per the 1961 Census count. This village lies on the Jeypore-Vizianagaram road, and is connected with the neighbouring places by a regular bus service. It occupies an area of 6.61 sq. miles and in all it consists of 1,223 occupied resi-

dential houses. A very large section of people in this village depend on agriculture for their livelihood. The total number of Agricultural Workers of this place is 2,411 which includes both Cultivators and Agricultural Labourers. Paddy, ragi, and maize are the chief food crops raised and irrigation is facilitated by minor irrigation tanks. There is a Block Development Office, a Panchayat Office, a Local Fund Hospital, a Veterinary Hospital and a Post Office in this village. Here a weekly market is held on every Friday.

PARVATHIPURAM TALUK

This taluk is situated in the north-west portion of the district and extends over an area of 590.0 square miles, of which the Agency portion covers of 294.0 square miles. According to the 1961 Census count the total population of the Agency area is 43,555 persons while that of Plains is 174,916 persons. There are altogether 270 villages in the Agency area out of which 19 villages are uninhabited. In the Plains there are 222 villages out of which 16 villages are uninhabited. Parvathipuram is the only town in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	223
200—499	123
500—999	49
1,000—1999	43
2,000—4999	14
5,000—9999	...
10,000 and above	...
Total inhabited villages	457

The Agency is chiefly inhabited by Khonds, with a sprinkling of Konda Doras, Paidis, Ghasis and Gadabas. The taluk is drained by the perennial Nagavalli river along with its tributary Votti Gedda which bisects it into the east and the west. The taluk is connected by road and railways. The Vizanagaram-Raipur line (Broad Gauge) of the South Eastern Railway passes through this taluk with its stations at Seetharampuram, Narasipuram, Parvathipuram and Gumada. The State Highways and the major district roads connect all the important places in this taluk. Parvathipuram is the headquarters of the taluk and also of the Sub-Collector. This town and the other important places in the taluk are briefly described below :

Parvathipuram-a Municipality, is the headquarters of the taluk by the same name and has a population 25,281 as per the 1961 Census count. It extends over an area of 4.98 square miles and in all it consists of 5,172 occupied residential houses. Parvathipuram is connected both by the road and the railway. It is a Railway Station on Vizianagaram-Raipur line (Broad Gauge) of the South Eastern Railway. The Agency tract is abutting this place towards the north and the west at a distance of about 15 miles. It has therefore become a very important centre both for the Agency produce and the agricultural produce.

The town is the headquarters of a Sub-Collector and a Deputy Superintendent of Police. It has the usual complement of offices at the divisional level. The Principal District Munsif's Court, Additional District Munsif's Court and the Judicial Second Class Magistrate's Court are also located here. There is protected water supply system in this town. It contains two post offices with telephone and telegraph exchanges.

A Zilla Parishad High School, a Government Basic Training School, and several Primary Schools cater to the educational requirements of the local children. A weekly cattle shandy is held here on every Thursday.

Devunigumpa-though a small village with a population of 216 persons as per the 1961 Census count assumes religious importance owing to the construction of a Shiva temple on the bank of river Nagavalli where the river Janajavati joins it. The orthodox Hindus attach a great importance to this place. Every year it attracts a large gathering of about 20,000 pilgrims on the occasion of Mahasivarathri festival.

PALAKONDA TALUK

This taluk is situated in the heart of Srikakulam district comprising an area of 494.0 sq. miles of which the Agency portion is 146.0 sq. miles. It is surrounded by Srikakulam and Pathapatnam taluks in the east, Bobbili taluk in the west, Parvathipuram in the north and Cheepurupalle in the south. The taluk recorded a population of 324,646 persons as per the 1961 Census count as compared with 298,992 persons in the 1951 Census. The population of the Agency portion is 20,060 persons. The

density of the taluk is 657 persons per sq. mile. It consists of 425 inhabited villages, 19 uninhabited villages and 3 towns viz., Palakonda, Rajam and Veeraghattam towns. 107 villages are in the Agency portion.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	97
200—499	111
500—999	112
1,000—1,999	89
2,000—4,999	17
5,000—9,999	...
10,000 and above	...
Total inhabited villages	425

The perennial Nagavalli with its tributaries namely, the rivers Suvarnamukhi, Vegavathi and Kumbhikotagedda waters the taluk and makes it rich and fertile. A regulator was built across the river Nagavalli at Thotapalle in Parvathipuram taluk for the diversion of the water through several main and branch channels. The Vonigedda Anicut has been built across a hill stream about three miles from Palakonda. These channels command the irrigation of a major part of the Palakonda taluk. The taluk owing to its proximity to the hills which are covered with thick forests, receives sufficient quantity of water into its minor irrigation sources to the north of the river Nagavalli. The Narayanapuram Anicut Scheme at Narayanapuram village is also nearing completion. The soil in this taluk belongs predominently to red ferruginous and regar or the black cotton series. The soil near the hills is of the red ferruginous series and towards the south fertile regar clay and regar loam are found. The red ferruginous series covers a major portion of the taluk. Several improvements have been made to the irrigation sources during the last decade which have resulted in the augmenting the food resources of the district. The total number of Agricultural Workers of this taluk is 143,427 out of which 84,752 are Cultivators while the rest are Agricultural Labourers.

The taluk has a large Reserve Forest area which is of a deciduous type, and considerable portion of which is situated at the foot of the Ghats. The timber chiefly in local demand is *Nallamaddi* which is abundantly available. The forests have a luxuriant growth of bamboo practically of non-thorny variety and which provides a very large source of forest revenue.

The climate is generally warm in the Plains, while in the areas bordering Agency it is warmer especially from February to June. The south-west monsoon which then sets in renders the climate tolerable. Winter is quite chilly in the Agency tracts while it is not so uncomfortable in the Plains.

The average rainfall of the taluk for the decade is 58.33'. Most of the rain is received during the south-west monsoon (June-September) period, while moderate rainfall occurs during the north-east monsoon. Thus the taluk is mainly dependent on the south-west monsoon. The rainfall on the whole is adequate.

The transport and communication facilities are inadequate. The entire taluk is neither connected nor traversed by the Railways. Srikakulam Road Station which is 18 miles away from Palakonda is the nearest Railway Station. As such buses are the only possible conveyances to this taluk. The river Nagavalli divides the taluk in two and the bridge constructed across the river at Sankili which is about three miles from Palakonda has collapsed during the very year it was constructed. The river Nagavalli is not fordable inspate and impedes communications for about three to four months in a year and during this period public have to take up a circuitous route to Rajam *via.* Srikakulam or take the risk of crossing the river in small boats.

As regards medical insititutions the taluk contains two Government Hospitals, one at Palakonda and the other at Seetampeta. There is a Panchayat Samithi Hospital at Rajam. The Zilla Parishad maintains dispensaries at Gullaseetharmapuram, Veeraghattam and Burja villages. Besides these there are Rural Dispensaries at Neelanagaram, S. Kaviti and Lingalavasala villages and a Public Health Centre at Guthavilli. There is also a Leprosy Hospital at Chilakalapalle. There is no protected water supply scheme in the entire taluk and so the people both in the towns and the villages are mostly dependent on tanks and draw wells for drinking water.

As regards educational establishments, Palakonda, S. Kaviti, Guttavalli, Mandasa, V. Venkampet, Burja Khandyam, Lingavalasa, Siripuram, Rajam, Neelanagaram and Veeraghattam have High Schools. At M. Seetharamapuram, Bitivada, Devudala and G. Seetharamapuram villages there are only Middle Schools. Besides these Palakonda and Rajam contain one Girls' Middle School each.

The chief cottage and small scale industries which are popular in the taluk and capable of providing both part time and whole time occupations are Handloom weaving, basket making, jaggery manufacture, carpentry, and pottery. Coal cleaning provides employment at Velagavada and P. R. Rajupeta. Even in the Agency tracts handloom weaving, basket making brick laying and carpentry are popular. Weekly shandies are held in several big villages of the taluk such as Navagam, Seethampeta, Kollivalasa during which cattle are also brought for sale. Bamboo and tamarind are the two chief commodities available at cheap rates. It is reported that at each shandy centre the total transaction amounts to more than Rs. 40,000 and at Nagam shandy the business turnover is estimated to be still larger.

Palakonda—is a Panchayat and also the headquarters of the taluk by the same name. The town is well connected by roads. According to the 1961 Census count the total population of this place is 13,780 persons and the town occupies an area of 2.34 sq.miles. Its density is 5,889 persons per sq.mile There are altogether 2,801 occupied residential houses in this town. It contains the usual offices of a Tahsil besides a Government Hospital, a Veterinary Hospital, a Zilla Parishad High School and a Travellers' Bungalow. The Post Office in this town is facilitated by Telephone and Telegraph exchanges. The chief cottage industries of this locality are the manufacture of mats, brick, tatties in addition to blacksmithy, gold smithy and carpentry which are quite common in some of the villages. Handloom weaving also occupies a prominent place and is rapidly making headway. There is a Small Scale Industries Centre in this town. A weekly market is held on every Wednesday.

Rajam—is situated towards the north-west of Srikakulam where the Ramabhadrapuram and Chilakapalem State Highway Road joins the major district road in the taluk. It is about 14 miles from Palakonda and is about 11 miles from Cheepurupalle Railway Station. According to the 1961 Census count Rajam recorded a population of 7,729 persons and the town occupies an area of 0.29 sq.miles. Its density is 26,652 persons per sq. mile which is the highest in the district. Rajam was the headquarters of the famous Tandra Papaiah, a Sirdar of Bobbili and who is credited with the slaying of Vijayaramaraju the Maharaja of Vizanagaram at the end of the battle of Bobbili in 1757.

There is a Munsiff's Court, a Block Development Office, a Zilla Parishad High School, a First Aid Veterinary Centre, a Police Station, a Travellers' Bungalow and a Post Office with Telephone and Telegraph Exchanges. It is the headquarter's of a Special Deputy Collector (Mines). Here a biweekly market is held on Sundays and Thursdays.

In the past Rajam was famous for weaving industry and was noted for coloured clothes for women.

Veeraghattam—a Panchayat, is well connected by roads on which buses ply regularly to all important places in the district such as Srikakulam, Bobbili, Parvathipuram, Palakonda, Chinamerangi, Kurupam and Bathili. It is situated about 18 miles away from Parvathipuram and 30 miles from the Srikakulam Road Railway Station.

According to the 1961 Census count Veeraghattam supports a population of 8,951 persons. The town occupies an area of 3.24 sq. miles and its density is 2,763 persons per sq.mile. There are altogether 1,841 occupied residential houses in the village. It contains a Police Station, a Panchayat Office, an Agency Corporation's Office, a Zilla Parishad High School and a Sub-Post Office with Telegraph and Telephone facilities. There is also a Travellers' Bungalow maintained by the Highways Department.

PATHAPATNAM TALUK

This taluk comprising an area of 463.0 square miles lies towards the north of the district bordering the Orissa State. The taluk supports a population of 226,674 persons as per the 1961 Census count as compared with 203,542 persons in the previous Census. There are altogether 491 villages out of which 46 villages are uninhabited. There are no towns in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	153
200–499	137
500–999	101
1,000–1,999	44
2,000–4,999	10
5,000–9,999	...
10,000 and above	...
Total inhabited villages	445

The density of the taluk is 490 persons per square mile. It is bounded on the north by Orissa State, on the south by Narasannapet and Srikakulam taluks on the east by Tekkali taluk and on the west by Palakonda and Parvathipuram taluks. The distinctive feature of the taluk is that it consists of mostly hilly tracts and the entire taluk is divided into the Pathapatnam main taluk and Hiramandalam Sub-taluk being separated by the river Vamsadhara which flows between the main taluk and sub-taluk.

The chief rivers of this taluk are the Vamsadhara and the Mahendratanaya. The river Vamsadhara rises in the Eastern Ghats in the Orissa State, flows through the middle of Pathapatnam taluk and then enters the Srikakulam taluk. The river Mahendratanaya rises in the Orissa State and flows through the north of Pathapatnam taluk and joins the river Vamsadhara at Komanapalli village in Pathapatnam taluk. The construction of a barrage on the river Vamsadhara at Singdi village of this taluk is under way and is expected to benefit the taluk in the future. The river Vamsadhara is the only major irrigation source in this taluk and irrigation is largely facilitated by minor irrigation tanks. The soil in this taluk is chiefly made up of regar or black cotton and red ferruginous varieties. Near the hills the red variety is predominant. The forest area of Pathapatnam taluk with large blocks of hills is about 102.28 square miles and this contains timber and fuel growth. April to June are the warmest months in this taluk. Being surrounded by hills of considerable height the rainfall received is also quite heavy. The average annual rainfall of this taluk is 940.7 mm.

As regards the transport and communication facilities this taluk is comparatively better placed. The taluk is connected both by roads and railways. The Naupada-Gunupur line (Narrow-Gauge) of the South Eastern Railway passes through this taluk with its stations at Peddasana, Temburu, Ganguvada and Pathapatnam. Roads from this taluk lead to Srikakulam, Tekkali, Varanasi, Sompeta and Parlakimedi in Orissa State. In the Hiramandalam Sub-Taluk roads lead to Bathili, Kotturu, Palakonda and Nivagam villages. Buses also provide necessary transport and communication facilities. The Post Offices at Pathapatnam and Hiramandalam are facilitated by Telegraph Exchanges and the entire taluk is served by about 40 Branch Post Offices in different villages.

As regards medical facilities the taluk contains Rural Dispensaries at Pathapatnam, Mugudapeta, Saravakota, Gotalabhadra, Nivagam and Battili villages. There is a Leprosy Clinic at Hiramandalam besides a private hospital. Further, for the eradication of Malaria, the National Malaria Eradication Programme units of the Public Health Department are functioning at Pathapatnam, Chapara, Saravakota, Kotturu, Hiramandalam and Bathili villages. There are Middle Schools at Kharajada, Srimukhalingam, Lingalavalasa, Peddaseedi, Gotlabhadra, Nivagam and Goppili and then are Elementary Schools in almost all villages. There are 349 Elementary Schools serving the entire taluk.

The chief cottage and small scale industries of this taluk are handloom weaving, vegetable oil pressing, pottery, basket making and gur manufacture. It is reported that handloom industry alone absorbs more than 6,000 workers in the entire taluk. Weekly shandies are held at Temburu, Bagga, Hiramandalam, Bhamini, Kosamala, Sarvakota, Balada and Kotturu (near Mahasingi).

Pathapatnam — the headquarters of the taluk has a population of 4,613 persons and occupies an area of 1.90 sq. miles as per the 1961 Census count. It consists of 1,061 occupied residential houses and is accessible both by road and railways. The Railway station is on the Naupada-Parlakimedi Narrow Gauge line of South Eastern Railway. A very large section of people in this town live by cultivation as their main occupation. The total number of agricultural workers of this town is 1,266 which includes both Cultivators and Agricultural Labourers. Wet paddy and ragi are the chief food crops raised.

There is a Taluk Office, a Sub-Registrar's Office, a Police Station, a Judicial Second Class Magistrate's Court, a Forest Range Office, a Deputy Panchayat Office and several other public offices besides a Local Fund Dispensary, a Veterinary Touring Billet and a Zilla Parishad High School. Handloom weaving is the chief cottage industry of this town.

NARASANNAPET TALUK

This taluk is situated to the east of Srikakulam taluk adjoining the Bay of Bengal. The taluk is bounded by Pathapatnam and Tekkali taluks on the north, by the Bay of Bengal on the east and by Srikakulam taluk on the west and south. The river Vamsadhara flows between Narasannapet and Srikakulam taluks and forms a natural boundary. According to the 1961 Census count this taluk recorded a population of 166,233 persons as against 151,634 persons in the 1951 Census. The density of the taluk is 831 persons per square mile. There are altogether 168 villages out of which only two villages are uninhabited, besides Narasannapet is the only town in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	15
200–499	37
500–999	62
1,000–1,999	37
2,000–4,999	15
5,000–9,999	...
10,000 and above	...
Total inhabited villages	166

Agriculture is the major means of livelihood for a large section of the people in this taluk. Based on the 1961 Census findings the total number of Agricultural workers of this taluk is 70,539 persons out of which 39,985 persons are Cultivators while the rest 30,554 persons are Agricultural Labourers. Irrigation is facilitated by river channels and minor irrigation tanks. The taluk does not contain any forest area and it lies in the track of both the south-west and the north-east monsoon. The climate of this taluk is also of extremes but to some extent is conditioned by the sea breeze as the eastern portion of it adjoins the Bay of Bengal.

Transport and communication facilities are comparatively better, because the Howrah-Madras Railway line (Broad Gauge) of the South Eastern Railway passes through this taluk with its stations at Urlam, Tilaru, Harischandrapuram and Kota-Bommali. It is also connected by the National Highway besides the Major District Roads which connect the National Highway to several big villages of the taluk.

Narasannapet—a Panchayat is the headquarters of the taluk by the same name and supports a population of 11,167 persons as per the 1961 Census count. It extends over an area of 2.00 sq. miles and its density is 5,584 persons per square mile. There are altogether 2,196 occupied residential houses in the town. Narasannapet is well connected by roads. The National Highway which passes through this place is joined by the Kimidi-Calingapatnam Road. Urlam and Tilaru Railway Stations are connected by roads with the taluk headquarters. There is a Government Hospital, a Zilla Parishad High School, a Travellers' Bungalow, a Police Station and a Sub-Post Office with Telegraph and Telephone facilities, besides a Taluk Office, a Sub-Registrar's Office and Judicial Second Class Magistrate's Court in this town. A weekly market is held on every Monday. Handloom industry, oil pressing and rice milling are its chief industries.

TEKKALI TALUK

This taluk is situated to the north-east of Srikakulam adjoining the Bay of Bengal and extends over an area of 272.0 square miles. According to the 1961 Census count it suports a population of 189,984 persons as against 166,186 persons in the year 1951. The density of the taluk is 698 persons per sq. mile. The taluk consists of 379 villages out of which 42 villages are uninhabited. Tekkali is the only town in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	112
200–499	112
500–999	64
1,000–1,999	38
2,000–4,999	11
5,000–9,999	...
10,000 and above	...
Total inhabited villages	337

As cultivation is very difficult in the sandy tracts adjoining the east coast of the taluk, the people in the coastal belts generally supplement their livelihood by fishing.

The taluk is not drained by any significant river but there are large forests lying to the west of the G.N.T. road and this area is generally inhabited by Savaras. The Savaras eke out their livelihood by selling minor forest produce like the firewood, tamarind etc., to the people living in the Plains. The climate of this taluk is moderate and to some extent characterised by sea breeze owing to its proximity to the Bay of Bengal. The soil towards the west of the taluk is black but the land adjoining the coast is saline and sandy. Irrigation is mostly facilitated by minor irrigation tanks which depend on rain water. The taluk contains 41 major irrigation tanks and 1,063 minor irrigation tanks. There are two *geddas* known as the Sandhemmagedda and Desigedda which have separate ayacut.

As regards the transport and communication facilities the taluk is well connected by roads and railway. At the Naupada Railway junction the Howrah–Madras (Broad Gauge) line meets the Naupada–Parlakimedi (Narrow Gauge) line of South Eastern Railway. Tekkali, the taluk headquarters, is a Railway station on the Naupada–Parlakimedi line on the Howrah–Madras line. Pundi, Bendikonda and Palasa are the Railway Stations. The Grand North Trunk Road passes through the middle of the taluk. It is also well served by major district roads. In addition to these there are some small roads connecting the interior villages with the main road laid under the Community Development Schemes.

As regards medical facilities, there is one Government Hospital at Tekkali with 20 beds besides two private clinics. The Panchayat Samithi at the taluk level maintains Rural Dispensaries at Palasa and Naupada. A Primary Health Centre at Dandugopalapuram is under construction. There is no protected water supply system in the taluk. The main sources of drinking water are wells and tanks.

As regards educational facilities there is a Zilla Parishad Higher Secondary School,a Zilla Parishad Girls' High School and a Zilla Parishad Middle School at Tekkali. The taluk also contains High Schools at Kasibugga and Dandugopalapuram villages. Nandigama Chinnabadam have one Middle School each maintained by the Zilla Parishad. There is a Secondary School at Palasa and also a Basic Training School maintained by the Zilla Parishad. The Panchayat Samithi maintains Elementary Schools at the taluk level. There are no large scale industries in this taluk. Coir rope-making is the chief cottage industry in the coastal villages of the taluk. The salt industry at Naupada and Pundi has indicated a steady progress. Palasa is known for cashew industry. Weekly shandies are held at Palasa, Bendi, Pundi, Nandigama, Naupada, Kasibugga, Dandugopalapuram, Tekkali and Chakipalle.

Tekkali town—a Panchayat, is the headquarters of the taluk and supports a population of 11,636 persons as per the 1961 Census count. The town occupies an area of 3.52 square miles and the density is 3,306 persons per sq. mile. There are altogether 2,470 occupied residential houses.

Tekkali is a Railway Station on the Naupada–Parlakimedi Railway (Narrow Gauge) line which joins the Madras–Howrah line at Naupada. The National Highway passes through this town. Owing to its convenient situation between Srikakulam and Ichchapuram and as it is also the Revenue Divisional headquarters, many buses halt at this place. The town owes its importance to a number of industries out of which the manufacture of bronze vessels, utensils and brass pots has indicated a steady progress and constitutes the chief cottage industry of this locality. Tekkali contains the usual offices of a Revenue Division, besides a Zilla Parishad Higher Secondary School and a Zilla Parishad Girls' Middle School. There is a Sub-Post Office in this town with Telephone and Telegraph Exchanges. The town lacks proper drainage and protected water supply system. The Zilla Parishad maintains a Travellers' Bungalow. A weekly market is held here on every Tuesday.

SOMPETA TALUK

This taluk lies just below the Ichchapuram Independent Sub-Taluk towards the north-east of the district adjoining the Bay of Bengal. The taluk occupies an area of 212.0 square miles and supports a population of 140,941 persons as compared with 130,444 persons in the 1951 Census. It contains altogether 339 villages out of which 49 villages are uninhabited. Sompeta and Mandasa are the only towns in this taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	124
200–499	86
500–999	48
1,000–1,999	28
2,000–4,999	3
5,000–9,999	1
10,000 and above	...
Total inhabited villages	290

Baruva (7,502) is the only village in this taluk having more than 5,000 population.

The taluk is bounded on the north by Orissa State and Ichchapuram Independent Sub-Taluk, on the east by Bay of Bengal, on the south by Tekkali taluk and on the west by Orissa State. The density of the taluk is 665 persons per square mile.

The river Mahendratanaya drains and waters the taluk. It rises in the Eastern Ghats in the Orissa State and flows through Siripuram, Korlam and Baruva Firkas along its course. The river Sunnamudigedda is the tributary of the river Mahendratanaya which irrigates a considerable extent in this taluk. The Pydigam project across this river at Pydigam village is nearing completion. The taluk mostly depends on minor irrigation tanks and there are as many as 1200 minor irrigation sources in this taluk. The soil in this taluk is made up of regar clay, black cotton and red ferruginous series. Near the hills the red variety is predominant but towards the coast the soil becomes finer and in the valleys there is a fertile black clay which is amenable for paddy cultivation.

The forests in this taluk are of good deciduous type and cover large blocks of hills. April to June generally are the warmest months but the sea breeze renders the climate tolerable. The taluk gets the benefit of both monsoons, though the rainfall varies considerably. The rainfall during 1961 was 1175.4 mm. The climate generally is moderate.

As regards the transport and communication facilities this taluk is connected by both roads and railways. The G.N.T. Road passes through this taluk and connects with Tekkali Taluk, and Ichhapuram Independent Sub-Taluk. The important villages such as Mandasa, Baruva, Haripuram, Korlam, Bhyripuram, Ratti, Jalantrakota, Sondipudi, Pydigam, Budarasingi, Besi, Sasanam and Pedda Srirampuram are well connected by roads maintained by the Highways Department and the Panchayat Samithi on which buses ply regularly and provide direct urban contact. The Howrah-Madras line (Broad Gauge) of the South Eastern Railway traverses through this taluk with its stations at Sompeta, Baruva and Mandasa. There are Sub-Post Offices in Sompeta, Mandasa and Baruva wherein Telegraph facilities are available. At the taluk headquarters Telephone facilities are also available.

As regards the medical facilities there is a Government Hospital at Sompeta town. Mandasa and Baruva contain Local Fund Dispensaries. Haripuram and Mattamsariapalle have Primary Health Centres. Draw wells are common sources for drinking water in entire taluk.

As regards educational facilities there are Zilla Parishad High Schools at Sompeta, Mandasa and Baruva. There is a Zilla Parishad Girls' Middle School at Sompeta, and another Middle School at Siripuram. Besides these there are Elementary Schools in most of the villages.

There are hardly any large scale industries in this taluk. In Baruva there is a coir industry, a carpentry centre and a Government Arecanut Development Farm. There is a cottage industry centre at Mandasa.

Gangubenda and Killoyi villages contain a coir industry centre and a carpentry centre respectively. Weekly shandies are held at Dolagovindapuram, Siripuram, Ampuram, Mandasa and Ambugam villages.

Sompeta–situated about 4 miles away from the sea supports a population of 10,588 persons as per the 1961 Census count. It is the headquarters of the taluk by the same name and covers an area of 2.41 square miles. Its density is 4,393 persons per sq. mile. There are 2,307 occupied residential houses. Sompeta is accessible both by roads and railway. It is an important Railway Station on the Howrah-Madras line (Broad Gauge) of the South Eastern Railway. The distance between the town and the Railway Station is about 3 miles.

Sompeta contains a Taluk Office, a Sub-Registrar's Office, a Police Station, a District Munsiff Magistrate's Court, an Additional District Munsiff Magistrate's Court, a Judicial Second Class Magistrate's Court and a Panchayat Office. The Post Office in this town has both Telegraph and Telephone facilities. A Government Hospital and a Private Hospital provide medical aid. There is a Zilla Parishad High School. A weekly market is held here on every Thursday.

Mandasa —a Panchayat, was once the capital of a Zamindari of that name. The Zamindar's Fort is situated at the foot of the Mahendra mountain. According to the 1961 Census count the total population of this town is 6,233 persons and the town extends over an area of 2.38 sq. miles. Its density is 2,619 persons per square mile. There are altogether 1,468 occupied residential houses. As it is the headquarters of a taluk it contains the usual offices of a Tahsil. There is a Local Fund Dispensary, a Veterinary First Aid Centre, a Zilla Parishad High School and a Post Office with Telephone and Telegraph facilities. There is a temple of Varahaswamy which is also of considerable tourist interest. A weekly market is held on every Monday.

Baruva—is the largest populated village in the taluk with a population of 7,502 persons as per the 1961 Census count. It extends over an area of 2.25 square miles and consists of 1951 occupied residential houses in all. Cultivation is the main occupation of the people of this locality. The total number of Agricultural workers of this place is 2,080 persons out of whom 1,185 persons are Agricultural Labourers. Paddy is the chief food crop raised. Large groves of cocoanut trees to the south-west of Baruva along the green paddy fields provide a fine landscape. To the north, can be found stretches of sanddrifts. The swampy sea shore locally called beela, is famous for duck shooting and fishing.

Baruva is connected both by train and bus. It is a Railway Station on the Howrah-Madras line (Broad Gauge) of the South Eastern Railway. The Grand North Trunk road also passes at a distance of about 4 miles from the village and this is connected by the Korlam-Baruva road. A number of buses ply to this place and provide urban contacts. Post and Telegraph facilities are available in this village. There is a Local Fund Dispensary. Coir industry is the chief cottage industry of this village. Baruva is a small and yet an important sea port of the district. The port is marked by two columns black and white 50 feet high built on a site 15 feet above the sea bearing north-west from the usual anchorage.

ICHCHAPURAM INDEPENDENT SUB-TALUK

This Independent Sub-Taluk lies in the extreme north-eastern part of the district adjoining the Bay of Bengal and comprises an area of 87.0 square miles. It is the least populated taluk in the district. According to 1961 Census count the total population of this taluk is 87,283 persons as against 78,761 persons recorded at the 1951 Census. It has altogether 50 inhabited villages and one town. The density of the taluk is 1,003 persons per square mile.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	2
200-499	9
500-999	12
1,000-1,999	13
2,000-4,999	13
5,000-9,999	1
10,000 and above	...
Total inhabited villages	50

Kaviti (6,496) is the only village in this taluk having more than 5,000 population.

The taluk is bounded by Orissa State in the north and west, by Sompeta taluk in the south and by the Bay of Bengal in the east. The taluk has a coast line of about 12 miles. Right along the coast there is a continuous belt of swamp locally called the beela or tampara, which stretches a mile wide all through. The southern part of the taluk comprising Kaviti firka is also locally known as "Uddanam" meaning the Udyanavanam (garden) as the coastal belt is fringed with large extents of cocoanut, cashew and jack fruit plantations.

The river Bahuda which flows from west to east, drains and waters the taluk and is the main source of irrigation. Several irrigation channels take off from Bahuda and irrigate about 6,000 acres of land in the taluk which come under the Srikaku-

lam minor river system. The minor irrigation sources such as tanks and swamps are also important sources of irrigation in the taluk. In Kaviti firka spring wells irrigate a considerable portion and are helpful sources because they rarely dry up. There are no forests in this taluk. The soil in this taluk is made up of regar clay, regar loam, red loam regar sand, red sand and arnaceous.

As regards the climate, April to June are the warmest months. The average annual rainfall of this sub-taluk is 45.31". The sub taluk gets the benefit of both the south-west and the north-east monsoons though the amount of rainfal varies considerably.

As regards the transport and communication facilities the Howrah-Madras line (Broad-Gauge) of the South Eastern Railway passes through this taluk with its stations at Ichchapuram and Jhadupudi. The Grand North Trunk Road, a National Highway passes through this taluk from south to north. The taluk headquarters is well connected both by road and railways.

As regards medical relief, there is a Government Hospital at Ichchapuram town and a Primary Health Centre at Kaviti. Besides these there are also Zilla Parishad Dispensaries, one at Rajapuram and the other at Manikyapuram villages. There is also a Government Veterinary Dispensary at Ichchapuram with an artificial insemination centre attached to it. In addition to it a touring billet at Kaviti caters to the animal health services of the entire taluk. There is no protected water supply system in the taluk. Tanks and wells are the main sources for drinking water. The river Bahuda is also a helpful source for drinking water. Most of the villages in Kaviti Firka particularly in Uddanam area are not having proper drinking water facilities. The Government have also sunk artesian bore wells under the rural water supply scheme in this area.

As regards the educational establishments there is a Higher Secondary School at Ichchapuram town and a High School at Kaviti. The Zilla Parishad maintains two Middle Schools, one at Ichchapuram for girls and the other at Rajapuram. There are five Higher Elementary Schools and 94 Elementary Schools in the entire taluk maintained by the Panchayat Samithis.

The chief cottage and small scale industries of this sub taluk are handloom weaving, poultry, tanning, pottery and the coir industries. The Social Welfare Department has opened a sewing centre for women.

Ichchapuram— a (City of delight) lies on the road between Berhampore and Srikakulam, 16 miles from Berhampore and was formerly the headquarters of a Mussalman Naib under the Muslim occupation of Ichchapuram province during 1560-1753. According to the 1961 Census count the total population of this place is 12,961 persons. The town extends over an area of 2·0 square miles and there are altogether 2,970 occupied residential houses. The river Bahuda passes near Ichchapuram and is spanned by a bridge on the high road. In the neighbourhood there are some fine betel vine plantations.

The town is connected by road and railways. The Grand North Trunk Road and the Howrah-Madras line run parallel to each other. Ichchapuram is a Railway Station on Howrah-Madras line.

Kaviti—is well connected by a major district road on which buses ply regularly. It has a population of 6,496 persons as per the 1961 Census count and occupies an area of 5.05 square miles. There are altogether 1,413 occupied residential houses. Agriculture is the major means of livelihood and people till the soil and tend cattle in the neighbourhood of the villages. The total number of Agricultural workers based on the 1961 Census findings is 1,061 which includes both Cultivators and Agricultural Labourers. There is a Primary Health Centre, a Zilla Parishad High School and an experimental Sub-Post Office in this village.

TABLE 2.11—GOVERNMENT EXPERIMENTAL FARMS

Sl. No.	Name of Farm	Location and distance from Railway Station	Year of Establishment	Whether Research, Multiplication or Demonstration farm	Management *i. e.*, State, University or Private	Annual Rainfall (in inches)	Type of soil	Programme of Research
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
				SRIKAKULAM DISTRICT				
1	Sugarcane Liaison Farm	Bobbili 3 miles from Bobbili Railway Station	1957	Demonstration-*cum*-Research	State Government	49.0	Loams to clayey loams (The farm will be shifted from place to place each year depending upon the availability of 20 acre piece of leased land	1. Trial of new varieties 2. Cultural trials suited to the tract 3. Manurial trials and demonstration of recommended methods of sugarcane culture from the main sugarcane Research Station at Anakapalle
2	Arecanut Station	Baruva 3 1/2 miles from Baruva Railway Station	1956	Research-*cum*-Multiplication	State, financed by the Indian Central Arecanut Committee, Kozhikode	40.0	Sandy	1. Nursery studies on arecanut 2. Germination and growth trials with different types of areca seed nuts 3. Irrigation studies in arecanut nursery 4. Sowing seed nuts at different depths 5. Raising and supply of good quality areca seedlings
3	Agricultural Demonstration-*cum*-Research Station	Ragolu 5 miles from Srikakulam Road Railway Station	1956	Demonstration-*cum*-Research station	State Government	40.7	Loamy soil, well drained	Evolution of improved strains of the local crops by pure line selection and hybridisation; evolution of improved manurial regimen and improved agricultural practices.
4	Mesta Research Station	Amadalavalasa 1 mile from Srikakulam Railway Station	1958	Research	State, with equal financial assistance from the Indian Central Jute Committee	47.0	Clayey	To breed heavy yielding type giving fine quality fibres and also to conduct studies on Agronomical and setting practices

Note : The talukwise and villagewise distribution of Industries and Rural Crafts have been given in Village and Town Directory portion of this Hand Book

TABLE 4.2—TOTAL NUMBER OF ARTISANS OF EACH CATEGORY WORKING IN THE DISTRICT TOGETHER WITH THEIR DAILY AVERAGE EARNINGS

Class of workers	No. of workers	Average daily earnings
(1)	(2)	(3)
SRIKAKULAM DISTRICT		
		Rs.P.
Amber Charka producers	72	2.00
Amber Charka spinners	4	1.00
Bakery makers	38	1.00
Basket, Mat and Rattan workers	2,456	2.00
Bee keepers	14	1.00
Beedi Makers	45	N.A.
Blacksmiths	1,370	2.50
Blacksmiths, Goldsmiths and Silversmiths	201	3.00
Book binders	40	1.50
Brick makers	411	1.50
Carpenters	3,751	2.50
Carpenters-cum-Blacksmiths	5,310	2.50
Carpenters-cum-Goldsmiths	114	2.50
Carpenters-cum-Masons	146	3.00
Charka spinners	4	1.00
Cobblers	332	2.00
Dyers and printers	440	2.00
Fish net workers	1,749	1.00
Floor & roof tile makers	40	2.50
Garland maker	6	1.00
Glass workers	146	N.A.
Goldsmiths and Silversmiths	4,210	2.00
Gur and Khandasari workers	314	2.50
Hand pounding workers	187	1.00
Horn workers	3	1.50
Jute workers	60	2.00
Lace, Knitting workers	852	1.00
Lime workers	55	1.00
Masons	41	3.00
Metal workers	240	2.50
Oil Mongers	3,609	3.00
Plate leaf workers	17	1.00
Potters	4,997	1.50
Rice Mill workers	4	2.50
Rope makers	2,638	1.00
Silk weavers	...	...
Spinners	6,465	1.00
Stone workers	21	1.50
Tailors	2,207	3.00
Tanners	131	2.00
Tanners-cum-Cobblers	99	2.50
Tape weavers	90	1.50
Tapping and palmgur workers	2	1.25
Tinsmiths	18	2.00
Toy makers	3	N.A.
Weavers	27,532	3.00
Wooden comb makers	9	1.00

Note : Due to the introduction of one year P. U. C. and 3 year Degree course in place of two year Intermediate course and two year Degree course from 1957–58 the strength under columns 7 to 10 under P. U. C. has gone down and that under columns 11 to 14 under degree course has gone up from 1958–59. The figures shown upto 1956–57 under columns 7 to 10 represent the strength of students studying Intermediate course. The figures shown against 1957–58 under columns 7 to 10 represent those of P. U. C. and Second Year Intermediate. The figures shown from 1958–59 onwards under columns 7 to 10 represent those of P U.C. only.

12-7-1960	Central Government Servants' Strike

Section II—Commonly known in particular taluks

1 SRIKAKULAM TALUK

1890	Construction of Railway line
1923	Cyclone
1931	Floods in Langulya River
1938	Floods in Vamsadhara River
4-4-1954	Opening of Community Development Blocks at Gara and Amadalavalasa
1955	Bye-Elections to the State Assembly
1957	General Elections
October, 1958	Floods in Nagavali River
1-5-1959	Opening of New Collectorate Building
July, 1959	Opening of Saribujjili Block

2 CHEEPURUPALLE TALUK

1896	Earthquake
1897	Cholera
1905	Cyclone
1923	Cyclone
1931	Floods in Nagavali River
1942	Wreckage of ship near Koyyam village
1943	Cyclone
October, 1958	Floods in Nagavali River
27-2-1959	Quit Day Work of Non-Gazetted Officers

3 BOBBILI TALUK

1904	Korruvanivalasa Pithuri
1907	Cholera
1909	Cyclone
1921	Death of Zamindar of Bobbili
1923	(i) Floods and Cyclone (ii) Alluri Seetharamaraju Pithuri
1927	Coronation of the Zamindar of Bobbili
1931	Floods and Cyclone
1932	Damage to Seethanagaram Railway Bridge
1942-43	Construction of aerodrome at Badangi
7-9-1949	Abolition of Vizianagaram and Bobbili Estates
1952	General Elections
1957-58	Renovation of Bobbili-Salur Railway Line
3-7-1958	Integration of Estate Offices with regular Revenue Offices

PART III

STATISTICAL TABLES

SRIKAKULAM DISTRICT

© P. RANGAM

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

EXPLANATORY NOTE

A-SERIES

GENERAL POPULATION TABLES

General Population Tables prepared at the 1961 Census are the basic demographic tables and give information about the total population as recorded at the present Census in the district/taluk/town, the territorial changes that have occurred during the last decade *i.e.* from 1951 to 61, variation of population during the past six decades, distribution of villages and towns by population sizes and trends of urbanisation in the district. The data are presented under the following four tables.

A-I Area, Houses and Population

A-II Variation in Population during sixty years (1901-61)

A-III Villages classified by population

A-IV Towns (And Town-Groups) Classified by population in 1961 with variation since 1941

All the above Tables pertaining to Srikakulam district are reproduced in this Hand Book.

TABLE A-I AREA, HOUSES AND POPULATION

This Table, the basic population table, gives for each taluk as well as for the district and for each town in the taluk, area in square miles as well as in square kilometres, persons per square mile, number of villages inhabited and uninhabited, number of towns, number of occupied residential houses and population by persons, males and females. The figures have been given separately one below the other under total, rural and urban. In this Table as in all other tables, the taluks have been arranged in the order of the Location Code Numbers adopted in the 1961 Census and not in an alphabetical order. The eleven taluks in the district have been numbered off continuously in a clock-wise order starting from the headquarters taluk where the district headquarters is situated *i.e.*, from Srikakulam taluk. The Location Code Numbers allotted to the taluks are shown below :

Name of Taluk		*Location Code Number*
Srikakulam	...	1
Cheepurupalle	...	2
Bobbili	...	3
Salur	...	4
Parvathipuram	...	5
Palakonda	...	6
Pathapatnam	...	7
Narasannapet	...	8
Tekkali	...	9
Sompeta	...	10
Ichchapuram (Ind. Sub-Taluk)	...	11

One of the main changes in the presentation of this Table since the last Census is that the particulars of each of the towns in the taluk are also given underneath the concerned taluk besides giving the number of inhabited and uninhabited villages against each taluk.

The district area shown against (x) in column (3a) in brackets is that supplied by the Surveyor-General, India. The difference noticed between the area figures furnished by the Surveyor-General and the figures given by the State Survey Department shown against (Y) is on account of the different methods of computation of areas adopted by the two authorities. The area figures adopted generally for the district and the taluks are as furnished by the State Survey Department and the area figures of each of the towns are as furnished by the local authorities concerned and these are exhibited under column (3a). The urban area of each taluk has been worked out by adding the areas of all the urban units in the taluk and the rural area of the taluk is obtained by deducting the urban area of the taluk from the total area of the taluk.

The area in square kilometres under column (3b) is obtained by converting the area in square miles corrected upto two places of decimals. The area figures for district total/rural/urban, taluk total/rural and for each town have been first converted separately. In order to tally the totals of all the taluks with the district total, the converted total/rural/urban area figures of the taluks have been either increased or reduced on *prorata* basis according to area ratios of the taluks. The area of each town both in square miles under column (3a) and in square kilometres under column (3b) has been given upto second decimal place while the total/rural/urban area of the taluks as well as of the district has been given only upto first decimal place.

The density of persons per square mile for the district and for each of the taluks and towns has been worked out by using the area figures corrected upto two places of decimals and not using the area figures given under column (3a).

'Village' referred to in this Table and in all other tables in this book is the Revenue administrative unit with well defined boundaries. A village having one or more groups of habitations is treated as an inhabited village and a village with no habitations at all is treated as an uninhabited village. The number of inhabited and uninhabited villages, in each taluk and in the district is shown under columns 5 and 6 of this Table. In computing the number of villages in a taluk, the villages which are either completely included in an urban unit (town) or hamlets to a main Revenue village, are not taken into account. All the Revenue villages within the taluk are demarcated and numbered off continuously from North-West to South-East. The number so assigned to each village is the 1961 Census Location Code Number distinct from the Revenue Survey Number and will be referred to hereafter as the Location Code Number.

'Town' is a place usually having not less than 5,000 inhabitants possessing distinct urban characteristics and also satisfying certain criteria prescribed. For recognition of any place as a town at the present Census it should be either covered by a City Corporation, Municipality or Cantonment Board or it should generally satisfy the following criteria :—

(i) It should have a minimum population of 5,000;

(ii) The density of population should not be less than 1,000 per square mile; and

(iii) At least 3/4ths of the adult male population should be non-agricultural.

The total number of towns in each of the taluks and in the district is exhibited under column 7 of this Table.

A 'Census House' is defined for the purpose of 1961 Census, as a structure or part of a structure, a dwelling, a shop, workshop, or a factory, place of business, a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard, leading to a main gate or enjoying a separate entrance. Only houses used wholly or partly for the purpose of residence by one or more households are considered as residential houses and the number of such residential houses in the town/taluk/district has been given in column 8. Houses utilised wholly for purposes other than for residence have not been taken into account in this Table.

The total population, by persons, males and females for the district as well as for each taluk and town has been exhibited separately under columns 9, 10 and 11 in this Table.

Besides the main Table, there are also three Appendices to this Table.

Appendix I : In this Appendix the growth of the district and the taluks to the present area since the last Census has been traced by giving the territorial changes that have taken place during the last decade together with the names of the units and areas involved in the changes. The net area gained or lost by each unit is also given in the Appendix.

Appendix II : One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. However, several places with a population of 5,000 and over did not qualify to be treated as towns. This appendix gives the number of such places with their population. There are no towns with population under 5,000 persons at the 1961 Census in this district.

Appendix III : This Appendix shows the taluk-wise figures for the Houseless Population and the Institutional Population separately. Houseless Population consists of those people who have no fixed place of residence and no regular home to live in. Institutional Population represents groups of unrelated persons living and messing together as in the case of boarding houses, messes *etc.*, under the management of a head of the household appointed either by rules governing the institution or by

common consent of its members. For the purpose of studying different characteristics Institutional Population is also considered as Household Population.

TABLE A-II VARIATION IN POPULATION DURING SIXTY YEARS (1901-1961)

This Table compares the population of the district as ascertained at the 1961 Census with the corresponding figures for the six previous Censuses *i.e.*, from 1901. The figures revealed at the previous Censuses have been adjusted for subsequent territorial changes in order to afford a correct basis for comparison.

As this Table gives the growth of population from decade to decade, these data from the main source for the estimation of population in the absence of reliable Vital Statistics. One of the main changes in the presentation of this Table since the last Census is that the percentage of variation is also given from decade to decade. The variation of males and females from decade to decade has been omitted at the present Census.

During the last decade Gujarathipet and Fazulbegpet villages of Gujarathipet Panchayat were transferred from Cheepurupalle taluk to Srikakulam taluk. Barring this, no other inter-taluk transfers took place in this district during the decade 1951-61. No inter-district transfers took place affecting this district during the decade 1951-61.

Appendix: The Appendix to this Table shows the 1951 population according to the territorial jurisdiction in 1951 and the changes in area and the population involved in the changes, that have taken place during the last decade. The details of transfers of areas in each case together with the names and area in square miles and the number and the date of Notification of each transfer to the extent available are also given in the foot-note.

TABLE A-III VILLAGES CLASSIFIED BY POPULATION

This Table shows the total number of inhabited villages in the district, arranged on population basis under the following groups :-

Less than 200 population
200—499
500—999
1,000—1,999
2,000—4,999
5,000—9,999
10,000 and above

The villages which are either uninhabited or wholly included in urban units are not taken into account in this Table. The following statement gives at a glance the break-up of all the inhabited villages of Srikakulam district classified by population in four broad groups *viz.*,

Class by population size	*No. of inhabited villages*
less than 499	1,859
500—1,999	1,195
2,000—4,999	182
5,000 and above	10
Total inhabited villages	3,246

For the definition of "Village" and "inhabited Village" see Explanatory Note to Table A-I.

TABLE A-IV TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

This Table shows the growth of each town since 1941. The civic status, area both in square miles and square kilometres, population with sex break-up, decade variation in total population and percentage of decade variation have been given for every town in the district.

For the definition of "Town" see Explanatory Note to Table A-I.

The towns have been classified into six classes according to their population in the latest Census as detailed below .

Class	*Limits of population*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000— 9,999
VI	Less than 5,000

Class I towns with a population 100,000 and above have been treated as cities. The total number of towns under each class in the district at the 1961 Census are given below.

Class	*No. of Towns*
I	Nil
II	Nil
III	4
IV	5
V	4
VI	Nil
Total	13

Baruva, Kasibuggapalasa and Chinna Merangi which were treated as towns in the 1951 Census have been deleted from the list of towns in the present Census in this district. No new place has been treated as a town for the first time at the 1961 Census in this district.

Since the prime purpose of this Table is to show the growth of towns as towns and not how certain places have grown into towns from villages, the population of a place which at any particular Census year was not treated as a town is not given in this Table. The population of towns at each of the last seven Census years *i.e.*, since 1901 is, however, given in Table A-IV in Part II-A General Population Tables of Andhra Pradesh (State Volume). The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

The civic status of the town *i.e.*, whether the town is a Municipality, a Panchayat *etc.*, is indicated after the name of the town in the abbreviated letters M., P., *etc.*

One of the main changes in the presentation of this Table since the last Census is that the areas of towns and the percentage of decade variation of the total population of the towns have also been given.

Appendix : The Appendix to this Table gives the names of towns recognised at the present Census together with the names of villages either fully or partly included in them.

Ichchapuram (P)	U	2.00	5.18	6,481	...	...	1	2,970	12,961	6,081	6,880

Note:- 1. * Towns treated as such for the first time in the 1951 Census and which continue as towns in 1961 Census are printed with an asterisk (*) on the left side.

2. Under columns (3a) and (3b), (x) represents the area figures furnished by the Surveyor-General of India, and (y) represents the area figures furnished by the State Survey Department. The urban areas are based on the area of individual towns furnished by the local authorities. The rural area for a district/taluk is obtained by subtracting the urban area from the total district/taluk area according to the State Survey Department.

3. The Sq. Kilometres and density figures of urban areas of taluk and district are worked out using the area figures, corrected upto two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. In addition to this, the figures relating to Sq. Kilometres are further adjusted to make the taluk/district totals agree.

4. The population per square mile given under column (4) is calculated on the basis of the area figures furnished by the State Survey Department.

5. The following abbreviations have been used for the status of a Town :—
M : Municipality, P : Panchayat

APPENDIX I TO TABLE A-I

Statement showing the 1951 Territorial Units constituting the present set-up of Srikakulam District and Taluks therein and details of net area gain or loss in the changed Territories during the decade 1951-1961

(Only those names/areas which have undergone changes since 1951 have been shown in this Appendix)

District/taluk	1951 Territorial units	DETAILS OF GAIN IN TERRITORIES			DETAILS OF LOSS IN TERRITORIES			Net area (Gain '+' Loss '—')

(a) 2 villages *viz.*, Gujarathipet and Fazulbegpet of Gujarathipet Panchayat of Cheepurupalle taluk have been transferred to Srikakulam taluk *vide* G.O.Ms. No. 1898, Revenue, dated 4-10-1954.

(b) Changes are as enumerated against symbol (a).

Note : 1. Area figures furnished in columns (2) and (5) are according to State Survey Department and they are according to the jurisdiction prevailing in 1961 and 1951 respectively.

2. The figures given in brackets in columns 5 and 6 represent the difference in area between 1951 and 1961 and the figures in brackets in column 7 show the difference in population between the areas as per the jurisdiction in 1951 and the present jurisdiction.

3. The difference of area in 1951-61 given under columns 5 and 6 of this Appendix is on account of revised computation and does not represent the area of Gujarathipet and Fazulbegpet villages transferred from Cheepurupalle taluk to Srikakulam Taluk. The area of these two villages is not separately ascertainable

EXPLANATORY NOTE

B-SERIES

ECONOMIC TABLES

The Economic Tables for the 1961 Census are based on the principal work of a person and the concept of dependancy has been abandoned altogether for economic classification. The entire population has been divided into the following nine categories of Workers, for broad economic classification based on the National Classification of Industries adopted by the Government and the Non-Workers being shown as a separate category.

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in Other Services

X Non-Workers

The following seventeen Economic Tables, the first nine of which relate to the General Population and the remaining eight relating to a 20% sample of Households, have been prepared at the present Census.

(*i*) *General Economic Tables*

B-I Workers and Non-Workers classified by sex and broad Age-groups

B-II Workers and Non-Workers in Cities Town-groups and Towns arranged territorially classified by sex and broad Age-groups

B-III *Part A*-Industrial Classification of Workers and Non-Workers by educational levels in *Urban areas only*

Part B-Industrial Classification of Workers and Non-Workers by educational levels in *Rural areas only*

B-IV *Part A*-Industrial Classification by sex and class of Worker of persons at work at Household Industry

Part B- Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service

Part C- Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than Cultivation

B-V Occupational Classification by sex of persons at work other than Cultivation

B-VI Occupational Divisions of persons at work other than Cultivation classified by sex, broad Age-groups and educational levels in *Urban areas only*

B-VII *Part A*-Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural labourer

Part B- Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, profession or Service who are also engaged in Household Industry

B-VIII *Part A*- Persons unemployed aged 15 and above by sex broad Age-groups and educational levels in *Urban areas only*

Part B- Persons unemployed aged 15 and above by sex and educational levels in *Rural areas only*

B-IX Persons not at work classified by sex, broad Age-groups and type of activity

(*ii*) *Household Economic Tables*

B-X Sample Households (i) engaged neither in Cultivation nor in Household Industry, (ii) engaged either in Cultivation or in Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry

B-XI Sample Households engaged in Cultivation classified by interest in land and size of land cultivated

B-XII Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers

B-XIII Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by principal Household Industry

B-XIV *Part A* – Households classified by Major Groups of principal Household Industry and number of persons engaged

Part B – Households classified by Minor Groups of principal Household Industry

B-XV Sample Households engaged both in Cultivation and Household Industry classified by size of land

B-XVI Sample principal Household Industry classified by period of working and total number of workers engaged in Household Industry

B-XVII Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (a) neither in Cultivation nor in Household Industry, (b) in Household Industry only and (c) in Cultivation sub-classified by size of land cultivated.

Out of the above seventeen Tables only Tables B-I, B-III, B-IV Part-C, B-V, B-VII, B-VIII and B-IX pertaining to Srikakulam district are reproduced in this Hand Book. The other General Economic Tables are printed in "Census of India 1961 Volume II Andhra Pradesh – Part II B (i) and Part II B (ii)"

The Household Economic Tables are a special feature of this Census and are prepared on the basis of the returns in a 20% sample of the Household Schedules filled up at the time of enumeration. They are given in a separate volume entitled "Census of India, 1961 Vol. II, Andhra Pradesh-Part III Household Economic Tables"and may be referred to.

The working population in each of the nine categories of workers and the non-working population is divided by broad Age-groups, *viz.*, 0-14, 15-34, 35-59, 60+ and Age not stated in some of these Economic Tables.

TABLE B-I — WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table is prepared separately for Total, Rural and Urban Population and is a summary Economic Table for the entire district. It gives the distribution of the population by sex among the nine Industrial Categories of Workers and also Non-Workers by the four broad Age-groups 0-14, 15-34, 35-59 and 60+ years. This is the basic Economic Table and the Age-groups correspond to the different stages of life which have special significance with reference to capacity to work, *viz.*, children, young persons, middle aged persons and elderly persons. The classification of non-working population is made in other succeeding Tables.

This Table is prepared on the basis of the principal work of a person irrespective of the fact that the person may not be self-supporting from the income derived by that work. In the case of persons who are engaged in more than one work, which are also productive activities, the principal work is taken as that one which has been declared by the person himself as the work on which he spends the longest time and not necessarily the work from which he derives the largest income. Thus the stress is on the concept of work and not income or dependency. The following explanation makes it clear as to who is treated as a Worker.

Workers :

All persons who are engaged in some productive work during any of the 15 days preceding the day on which enumerated, irrespective of the fact, whether they derived any income or not, are treated as Workers. In respect of seasonal work like Cultivation; Livestock, Household Industry, *etc.*, if the person had some regular work for more than one hour a day throughout the greater part of the working season, he is recorded as a Worker. Persons

temporarily incapacitated from work at the time of Census enumeration due to illness or other cause are also treated as Workers. An undertrial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however, treated as Workers. Persons under training as apprentices with or without wages are recorded as Workers. Family workers, *i.e.*, who do not directly derive any income but attend to work along with other members of the family are treated as Workers. An adult woman who is engaged mainly in Household duties and in no other economically productive work, *i.e.*, a housewife, is not, however, treated as a Worker. Work includes not only actual work but also effective supervision. A public or social service Worker who is actually engaged in public service activity or political activity is taken as a Worker. Thus all workers in any branch of productive work are netted as Workers.

Non-Workers:

All persons who are not Workers, *i.e.*, those falling under the following categories are treated as Non-Workers:

(i) Fulltime students or children attending schools and who do no other work;

(ii) Persons engaged in unpaid home duties such as housewife;

(iii) Any dependant including an infant or child not attending school or a person permanently disabled from work because of illness or old age;

(iv) A retired person who is not employed again, a rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work;

(v) Beggars, vagrants or independent women without indication of source of income and others with unspecified source of existence;

(vi) A convict in jail or an inmate of a penal, mental or charitable institution;

(vii) Unemployed persons seeking employment for the first time;

(viii) Persons employed before but now out of employment and seeking work.

TABLE B-III--INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY *EDUCATIONAL LEVELS*

This Table is divided into two parts. *Part A* relates to Urban areas and *Part B* relates to Rural areas. In this Table each of the nine categories of Workers and also the Non-Workers are classified by different educational levels.

In *Part A* which relates to Urban areas only the data are given for all the Urban areas of the district, put together by the following educational levels:

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical diploma not equal to degree
Non-technical diploma not equal to degree
University degree or Post-graduate degree other than technical degree
Technical degree or diploma equal to degree or Post-graduate degree
Engineering
Medicine
Agriculture
Veterinary and Dairying
Technology
Teaching
Others

In *Part B* the data which relate to Rural areas only are given for the district, followed by taluks by the following educational levels:

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation and above

A "*Literate*" is a person who can, with understanding both read and write. He should be able to read any matter in print or manuscript and also be able to write a simple letter. A person who can neither read nor write or can merely read and cannot write is considered as illiterate. All children aged 4 years and below are treated as illiterates. The test for education is that the person should have passed a recognised written examination or examinations as proof of the educational level attained. The highest examination passed is taken as the level of education.

TABLE B-IV-INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table is divided into three parts.

Part-A shows the Industrial Classification by sex and class of worker of persons at work at Household Industry for Total, Rural and Urban population. The data are shown first for the Division followed by Major Groups in the order laid down in the Indian Standard Industrial Classification under that Division.

Part-B shows the Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service for the Total and Urban population. In this part also the data are presented first for the Division followed by the Major Groups in the order laid down in the Indian Standard Industrial Classification.

Part-C shows the Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than cultivation for Total and Urban population of the district. The data are presented first for the Divisions followed by Major Groups in the order laid down in the Indian Standard Industrial Classification. Under each Major Group the corresponding Minor Groups are shown.

Only *Part-C* is reproduced in this Book upto district level. Minor Groups having less than 1% of workers of the respective Division (0.5% in the case of Division 2&3) are not shown in this Table but are given in the Appendix to this Table.

"*Household Industry*" is an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in the Rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory and should relate to production, processing, servicing, repairing or making and selling of goods.

An "*Employer*" is a person who has to employ other persons in order to perform the work. Such a person is not only responsible for his own personal work but also for giving work to others. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An "*Employee*" is a person who usually works under some other person for salary or wages in cash or kind. Persons who are employed as managers, superintendents, agents, *etc.*, and in that capacity, employ or control other workers, on behalf of their own employers are not regarded as employers.

A "*Single Worker*" is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. Single workers also include persons who work in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is recorded as a "Single Worker".

A "*Family Worker*" is a member who works without receiving wages in cash or kind, in an Industry, Business or Trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an Industry, whether run at home or away from home in town or village and even away from village in the Rural area should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. Members of a family include those drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative. Members of the household who help solely in household duties are not treated as family workers.

Note: In respect of Household Industry, by the very nature of the participation of the workers in a Household Industry all the four categories of workers are not recognised. Only the "employees", if any, in a Household Industry are categorised as such. The rest are clubbed together as "Others".

TABLE B-V--OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table shows, for the Total and Urban population, the Occupational Classification of persons working in Non-Agricultural Occupations. The data are presented first for the Division followed by the Occupational Groups in the order of the National Classification of Occupations. Under each Group the detailed Occupational Families are shown. Occupational Families, accounting for less

than 1% of the Workers of the respective Division (less than 0.5% in case of Families under Division 7-8) are not given in this Table but shown in the Appendix to this Table. The particulars for the district are given down to the Occupational Family, while the talukwise particulars are given upto Division level only.

The Occupational Classification given in this Table is quite distinct from the Industrial Classification presented in Table B-IV Part-C. Occupational Classification relates to the actual work a person does irrespective of the Industry in which he is engaged, *e.g.*, a person who is a clerical worker for Occupational Classification may be connected with Industry, Trade or Service. Conversely in the same Industrial Category there may be persons following different Occupations as, technicians, managerial workers, clerical workers, watch and ward, *etc.* Therefore, in this Table under each Occupational Division, Group and Family the broad Industrial Category of the worker is also given.

TABLE B-VII

Part A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS, (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY, (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

Part B INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This Table is divided into two parts:

Part-A shows the persons working principally as Cultivators or as Agricultural Labourers or at Household Industry and who have secondary work in the other two alternatives from among Household Industry or Cultivation or Agricultural Labour. The data for the district are given for Total, Rural and Urban population by Industrial Divisions and Major Groups. For the taluks, however, the particulars are given for Rural population and by Divisions only.

Part-B shows the persons working principally in Non-Household Industry, Trade, Business, Profession or Service and also engaged at Household Industry as secondary work by Industrial Divisions and Major Groups. The data for the district are presented for the Total, Rural and Urban population by Divisions followed by the Major Groups of that Division. The talukwise data for Rural population are also presented by Industrial Divisions only.

TABLE B VIII—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS

This Table shows the distribution of persons unemployed aged 15 and above by sex and educational levels for Urban and Rural areas separately in two parts.

In *Part-A* which relates to the Urban areas the unemployed have been sub-divided into two classes, *viz.*, (i) Persons seeking employment for the first time and (ii) Persons employed before but now out of employment and seeking employment. The data are given by broad Age-groups and by educational levels. The first class of unemployed are divided into the Age-groups 15-19, 20-24, 25-29, 30-34, 35+and Age not stated and the second class into Age-groups 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated.

Part-B relates to Rural areas. The data in this part are given talukwise by educational levels. The data in this Table are not, however, given by Age-groups.

TABLE B-IX-PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This Table shows for the Total, Rural and Urban population, the persons not at work classified by sex, broad Age-groups and type of activity. The Non-Workers are divided into eight categories according to their activites, *viz.*, (i) Fulltime students; (ii) Those attending only to Household duties; (iii) Dependants, infants and disabled; (iv) Retired persons, rentiers or persons of independent means; (v) Beggars, vagrants *etc*; (vi) Inmates of penal, mental and charitable institutions; (vii) Persons seeking employment for the first time; and (viii) Persons employed before but now out of employment and seeking work, according to their activities. These eight categories are based on the recommendation

of the United Nations. This Table provides information about those who have an income without working, about housewives, about school going children, besides other types of non-working population. The data for the district are presented for Total, Rural and Urban population. The taluk-wise data are, however, presented for the Rural population only.

A total number of 14 males and 2 females have been returned as fulltime students in the Age-group 35–59 in this district. These elderly persons might be pursuing advanced studies in religion, such as Christian missionary trainees or in Vedas, Music or other fine arts *etc.*, and hence classified as fulltime students.

A complete classification list giving the description of the Divisions, Major Groups and Minor Groups is given below for guidance. In the Tables B-IV Part C and B-VII Part B only the number of the Division, Major Group or Minor Group is shown. The description of the Industry, Business, or Service concerned can be found from the list below.

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions
45 Major Groups
343 Minor Groups

The Divisions and Major Groups with their Code Numbers are listed below.

Divisions

0 *AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING*
1 *MINING AND QUARRYING*
2 &3 *MANUFACTURING*
4 *CONSTRUCTION*
5 *ELECTRICITY, GAS, WATER AND SANITARY SERVICES*
6 *TRADE AND COMMERCE*
7 *TRANSPORT, STORAGE AND COMMUNICATIONS*
8 *SERVICES*
9 *ACTIVITIES NOT ADEQUATELY DESCRIBED*

Major Groups

DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

00 Field Produce and Plantation Crops
01 Plantation Crops
02 Forestry and Logging
03 Fishing
04 Livestock and Hunting

DIVISION 1—MINING AND QUARRYING

10 Mining and Quarrying

DIVISION 2 & 3—MANUFACTURING

20 Foodstuffs
21 Beverages
22 Tobacco products
23 Textile—Cotton
24 Textile—Jute
25 Textile—Wool
26 Textile—Silk
27 Textile—Miscellaneous
28 Manufacture of Wood and Wooden products
29 Paper and Paper products
30 Printing and Publishing
31 Leather and Leather products
32 Rubber, Petroleum and Coal Products
33 Chemicals and Chemical products
34-35 Non-Metallic Mineral products other than Petroleum and Coal
36 Basic Metals and their products except Machinery and Transport equipment
37 Machinery (all kinds other than Transport) and Electrical equipment
38 Transport Equipment
39 Miscellaneous Manufacturing Industries

DIVISION 4—CONSTRUCTION

40 Construction

DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES

50 Electricity and Gas
51 Water supply and Sanitary services

DIVISION 6—TRADE AND COMMERCE

60-63 Wholesale Trade
64-68 Retail Trade
69 Trade and Commerce Miscellaneous

DIVISION 7—TRANSPORT, STORAGE AND COMMUNICATIONS

70-71 Transport

STANDARD INDUSTRIAL CLASSIFICATION—Contd.

72 Storage and Warehousing

73 Communications

DIVISION 8—SERVICES

80 Public Services

81 Educational and Scientific Services

82 Medical and Health Services

83 Religious and Welfare Services

84 Legal Services

85 Business Services

86 Community Services and Trade and Labour Associations

87 Recreation Services

88 Personal Services

89 Services (not elsewhere classified)

DIVISION 9—ACTIVITIES NOT ADEQUATELY DESCRIBED

90 Activities unspecified and not adequately described.

Classification and Code numbers at the 3 digit level in respect of Minor Groups are shown below and in the subsequent pages :

Standard Industrial Classification Showing the Divisions, Major Groups and Minor Groups

Major Group (Code)	Description	*Minor Group (Code)*
	DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING	
00	Field Produce and Plantation Crops	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	*000*
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	*001*
	Production of raw jute and kindred fibre crops	*002*
	Production of raw cotton and kindred fibre crops	*003*
	Production of oilseeds, sugarcane and other cash crops	*004*
	Production of other crops (including vegetables) not covered above	*005*
	Production of fruits and nuts in plantation, vines and orchards	*006*
	Production of wood, bamboo, cane, reeds, thatching grass etc.	*007*
	Production of juice by tapping palms	*008*
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above	*009*
01	Plantation Crops	
	Production of tea in plantation	*010*
	Production of coffee in plantation	*011*
	Production of rubber in plantation	*012*
	Production of tobacco in plantation	*013*
	Production of ganja, cinchona, opium	*014*
	Production of other plantation crops not covered above	*015*
02	Forestry and Logging	
	Planting, replanting and conservation of forests	*020*
	Felling and cutting of trees and transportation of logs	*021*
02	Forestry and Logging—*Concld.*	
	Preparation of timber	*022*
	Production of fuel including charcoal by exploitation of forest	*023*
	Production of fodder by exploitation of forests	*024*
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	*025*
	Production and gathering of other forest products not covered above	*026*
03	Fishing	
	Production of fish by fishing in sea	*030*
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	*031*
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	*032*
04	Livestock and Hunting	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	*040*
	Rearing of sheep and production of wool	*041*
	Rearing and production of other animals (mainly for slaughter) such as pig	*042*
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	*043*
	Rearing of bees for the production of honey, wax and collection of honey	*044*
	Rearing of silk worms and production of cocoons and raw silk	*045*
	Rearing of other small animals and insects	*046*
	Trapping of animals or games propagation	*047*
	Production of other animal husbandry products such as skin, bone, ivory and teeth	*048*

Major Group (Code)	Description	Minor Group (Code)
	DIVISION 1—MINING AND QUARRYING	
10	Mining and Quarrying	
	Mining of coal	*100*
	Mining of iron ores	*101*
	Mining of gold and silver ores	*102*
	Mining of manganese	*103*
	Mining of mica	*104*
	Mining of other non-ferrous metallic ores	*105*
	Mining of crude petroleum and natural gas	*106*
	Quarrying of stone (including slate), clay, sand, gravel, limestone	*107*
	Mining of chemical earth such as soda ash	*108*
	Mining and quarrying of non-metallic products not classified above such as precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt	*109*
	DIVISION 2 & 3—MANUFACTURING	
20	Foodstuffs	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and foodgrains	*200*
	Production of sugar and syrup from sugarcane in mills	*201*
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	*202*
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	*203*
	Slaughtering, preservation of meat and fish and canning of fish	*204*
	Production of bread, biscuits, cake and other bakery products	*205*
	Production of butter, ghee, cheese and other dairy products	*206*
	Production of edible fats and oils (other than hydrogenated oil)	*207*
	Production of hydrogenated oils (Vanaspati)	*208*
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	*209*
21	Beverages	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	*210*

Major Group (Code)	Description	Minor Group (Code)
21	Beverages—*Concld.*	
	Production of country liquor	*211*
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	*212*
	Production of other liquors not covered above	*213*
	Production of aerated and mineral water	*214*
	Production of ice	*215*
	Production of ice cream	*216*
	Processing of tea in factories	*217*
	Processing of coffee in curing works	*218*
	Production of other beverages	*219*
22	Tobacco Products	
	Manufacture of bidi	*220*
	Manufacture of cigars and cheroots	*221*
	Manufacture of cigarette and cigarette tobacco	*222*
	Manufacture of hookah tobacco	*223*
	Manufacture of snuff	*224*
	Manufacture of jerda and other chewing tobacco	*225*
	Manufacture of other tobacco products	*226*
23	Textile—Cotton	
	Cotton ginning, cleaning, pressing and baling	*230*
	Cotton spinning (other than in mills)	*231*
	Cotton spinning and weaving in mills	*232*
	Cotton dyeing, bleaching	*233*
	Cotton weaving in power looms	*234*
	Cotton weaving in handloom	*235*
	Manufacturing of khadi textile in handlooms	*236*
	Printing of cotton textile	*237*
	Manufacturing of cotton nets	*238*
	Manufacturing of cotton cordage, rope and twine	*239*
24	Textile—Jute	
	Jute pressing and baling	*240*
	Jute spinning and weaving	*241*
	Dyeing and bleaching of jute	*242*
	Printing of jute textile	*243*
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	*244*
25	Textile—Wool	
	Wool baling and pressing	*250*
	Wool cleaning and processing (scouring)	*251*
	Wool spinning and weaving in mill	*252*

Major Group (Code)	Description	Minor Group (Code)
25	Textile—Wool—*Concld.*	
	Wool spinning other than in mills	253
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textiles	256
26	Textile—Silk	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
28	Manufacture of Wood and Wooden Products—*Concld.*	
	Manufacture of other wooden products such as utensils, toys, art wares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and Paper Products	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by code Nos. 311, 312) such as leather upholstery, suit cases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314

Major Group (Code)	Description	Minor Group (Code)
31	Leather and Leather Products—*Concld.*	
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke-oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34-35	Non-Metallic Mineral Products other than Petroleum and Coal	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
34-35	Non-Metallic Mineral Products other than Petroleum and Coal—*Concld.*	
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by Code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their Products except Machinery and Transport Equipment	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery. (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in Major Groups 36, 37, 38, and 39)	369

Major Group (Code)	Description	Minor Group (Code)
37	Machinery (All kinds other than Transport) and Electrical Equipment	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles, engine parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
38	Transport Equipment—*Concld.*	
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles	389
39	Miscellaneous Manufacturing Industries	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	DIVISION 4—CONSTRUCTION	
40	Construction	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund embankments, dam, canal, tank, tubewells, wells	403
	DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES	
50	Electricity and Gas	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502

Major Group (Code)	Description	Minor Group (Code)
51	Water supply and Sanitary Services	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	DIVISION 6—TRADE AND COMMERCE	
60-63	Wholesale Trade	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products eggs, poultry and other food stuff (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics and textile products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
60-63	Wholesale Trade—*Concld.*	
	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silver wares and jewellery	638
	Wholesale trading in all goods not covered above	639
64-68	Retail Trade	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes, and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648

Major Group (Code)	Description	Minor Group (Code)
64-68	Retail Trade—*Contd.*	
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobil oil and allied products	655
	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipment	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
64-68	Retail Trade—*Concld.*	
	Book-selling	688
	Retail trading in goods unspecified	689
69	Trade and Commerce Miscellaneous	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fans, microphone, rickshaw, etc.	699
	DIVISION 7—TRANSPORT, STORAGE AND COMMUNICATIONS	
70-71	Transport	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horse, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc., by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing	
	Operation of storage such as warehouses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722

Major Group (Code)	Description	Minor Group (Code)
73	Communications	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
	DIVISION 8—SERVICES	
80	Public Services (This does not include Govt., Quasi Govt., or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments	809
81	Educational and Scientific Services	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinics as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820

Major Group (Code)	Description	Minor Group (Code)
82	Medical and Health Services—*Concld.*	
	Veterinary services rendered by organisations and individuals	821
83	Religious and Welfare Services	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities; this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	Legal Services	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	Business Services	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisation of accountants, auditors, bookkeepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library	861

Major Group (Code)	Description	*Minor Group (Code)*
86	Community Services and Trade and Labour Associations—*Concld.*	
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	*862*
87	Recreation Services	
	Production of motion picture and allied services such as processing, editing, etc.	*870*
	Recreation services rendered by cinema houses by exhibition of motion pictures	*871*
	Recreation services rendered by organisations and individuals, such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	*872*
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing	*873*
88	Personal Services	
	Services rendered to households such as those by domestic servants, cooks	*880*
	Services rendered to households such as those by governess, tutor, private secretary	*881*
88	Personal Services—*Concld.*	
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	*882*
	Laundry services rendered by organisations and individuals; this includes all types of cleaning, dyeing, bleaching, dry cleaning, services	*883*
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hair dressing saloon and beauty shops	*884*
	Services rendered by portrait and commercial photographic studios	*885*
89	Services (not elsewhere classified)	
	Services rendered by organisations or individuals not elsewhere classified	*890*
	DIVISION 9—ACTIVITIES NOT ADEQUATELY DESCRIBED	
90	*Activities unspecified and not adequately described including activities of such individuals who failed to provide sufficient information about their industrial affiliation to enable them to be classified*	*900*

EXPLANATORY NOTE
C - SERIES
SOCIAL AND CULTURAL TABLES

Social and Cultural Tables prepared at the 1961 Census give information relating to composition of sample Households, Age, Sex, Marital Status, Education, Mother-Tongue, Bilingualism and Religion of general population and also about Scheduled Castes and Scheduled Tribes classified by Literacy and Industrial Category of Workers. The data are presented in eight Tables as indicated below:

C-I Composition of Sample Households by relationship to head of family Classified by size of land cultivated

C-II Age and Marital Status

C-III Age, Sex and Education

Part A- All areas

Part B- Urban areas

Part C- Rural areas

C-IV Single Year Age Returns

C-V Mother-Tongue (in alphabetical order)

C-VI Bilingualism

C-VII Religion

C-VIII Scheduled Castes and Scheduled Tribes classified by Literacy and Industrial Category of Workers and Non-Workers

Part A—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B—Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

All the above Tables pertaining to Srikakulam district except Tables C-IV Single year Age Returns and C-VI-Bilingualism are repoduced in this book.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

This Table, prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration, gives the composition of Households, separately for Total, Rural and Urban areas in the district. The Households in the Rural areas are further classified into three Economic Categories *viz.*, (i) Households engaged neither in Cultivation nor in Household Industry, (ii) Households engaged in Household Industry only (iii) Households engaged in Cultivation. In respect of the third category of Households the data are furnished separately for each of the eleven classes of Households according to the size of land cultivated *viz.*, (i) Less than one acre, (ii) 1.0-2.4 acres, (iii) 2.5-4.9 acres, (iv) 5.0-7.4 acres, (v) 7.5-9.9 acres, (vi) 10.0 - 12.4 acres, (vii) 12.5 - 14.9 acres. (viii) 15.0 - 29.9 acres, (ix) 30.0 - 49.9 acres, (x) 50.0+ acres, and (xi) size of holding unspecified. The composition of the Households is given in terms of heads of Households, spouses of heads of Households, married sons and other married relations, other relations and unrelated persons. This Table will thus indicate the strength of the joint family system and will, therefore, be of sociological interest.

TABLE C-II-AGE AND MARITAL STATUS

This Table prepared on full count gives the distribution of population both by Age-groups and Marital Status separately for Total, Rural and Urban population in the district, and for the Rural population in each of the taluks. This is a very important demographic Table. A comparison of the data in this Table with corresponding data pertaining to the last Census will give an indication of mortality in different Marital Status and also in different Age-groups. The Age-groups, *viz.*, 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and Age not stated adopted in this Table conform to international requirements. Age-group 0-9 is automatically treated as 'Never Married' for the purpose of this Table. The proportion of increase or decrease in the various Marital Status since the last Census and the trends in the age at marriage can be studied from this Table. From the data of married females by Age-groups given under column 9 of this Table the future birth rates can also be forecast.

TABLE C-III-AGE, SEX AND EDUCATION

This Table gives the distribution of total population by broad Educational levels, Sex and by broad Age-groups. This Table is divided into three parts.

Part A relates to all areas while *Part B* and *Part C* relate only to Urban and Rural areas respectively. The educational levels given for all areas and Rural areas in *Part A* and *Part C* are the same, while in respect of Urban areas in *Part B* more detailed educational levels have been adopted. These educational levels are the same as those adopted in Table B-III for the Industrial Classification of Workers and Non-Workers by educational levels. This Table is useful in ascertaining the growth of literacy in the total population as well as in the different Age-groups since the last Census.

TABLE C-V-MOTHER-TONGUE

This Table exhibits separately for the Total, Rural and Urban population of the district and only for the Rural population of each taluk the number of persons, males and females speaking a particular language as Mother-Tongue. The languages returned at this Census are given in an alphabetical order.

'Mother-Tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the Household. If the mother died in infancy then the language mostly spoken in the Household is the Mother-Tongue. In the case of infants and deaf mutes the Mother-Tongue is the language usually spoken by the mother.

This Table is very important in view of the large number of languages and dialects spoken in the country and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the Constitution.

TABLE C-VII - RELIGION

This Table gives separately the distribution of Total, Rural and Urban population of the district and Rural population only of taluks according to Religion. In Censuses earlier to 1941 the practice was to show the distribution of population Religion-wise down to the village level. This practice has been discontinued from the 1951 Census.

TABLE C-VIII-SCHEDULED CASTES AND SCHEDULED TRIBES

Part A-Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B-Classification by Literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

This is a general Table prepared for Scheduled Castes and Scheduled Tribes only and gives separately the total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and by classification of Workers into different Industrial Categories and the total number of Non-Workers. This Table is divided into two parts. *Part A*-relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This is the first time that the number of literates amongst the Scheduled Castes and Scheduled Tribes are given separately. In addition to this Table some more Special Tables for Scheduled Castes and Scheduled Tribes pertaining to Srikakulam district have also been prepared and incorporated in this book under the series "SCT TABLES".

TABLE C–I

COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

EXPLANATORY NOTE
D-SERIES
MIGRATION TABLES

The Tables in this series show the migration trends analysed on the basis of the results of the 1961 Census. The data are presented in the following seven Tables, which are reproduced upto district level and for all Cities and Town-Groups in the Publication "Census of India 1961-Volume II-Andhra Pradesh-Part II-C—Cultural and Migration Tables" and these may be referred to for details.

D-I Non-Indian Nationals

D-II Place of Birth

D-III Migrants classified by place of birth and duration of residence in place of enumeration

D-III A Migrants from other States and out side India (less than 5 years duration) classified by Age-groups

D-IV Migrants to Cities classified by Sex, broad Age-groups, Educational levels and in case of Workers also by Occupational Divisions and Groups

D-V Cities showing population born locally, migrants from Rural areas and migrants from other Towns and Cities

D-VI Distribution of Industrial categories of Workers and Non-Workers by place of birth

In this Handbook only Tables D-I and D-II showing the Non-Indian Nationals and other migrants in Srikakulam district are reproduced.

TABLE D-I—NON-INDIAN NATIONALS

This Table shows the number of Non-Indian Nationals sexwise in the district. The Non-Indian Nationals for the purpose of presentation of the data have been broadly classified into five groups *viz.*,

(i) Nationals of Countries in Asia beyond India (including U.S.S.R.)

(ii) Nationals of Countries in Europe (excluding U.S.S.R.)

(iii) Nationals of Countries in Africa

(iv) Nationals of Countries in two Americas

(v) Nationals of Countries in Oceania

The name of the country of which the person is a National is given separately under each group. The persons who have not recorded any Nationality have been shown separately. Nationals of Goa, Diu, Daman and Pondicherry have been treated as 'Born in India'.

TABLE D-II—PLACE OF BIRTH

This Table prepared as in all previous Censuses gives the distribution of population by birth place. The data are presented both by the place of enumeration and by the place of birth classified separately into Rural and Urban areas. An important change in the presentation of the data at the present Census is that the place of birth has been classified separately as Rural and Urban. This two fold representation of the data enables one to study the migration trends not only within the district and from outside the district but also from Rural to Urban areas and *vice-versa*.

TABLE D-I

EXPLANATORY NOTE

E-SERIES

HOUSING TABLES

The Tables in this series give information on Housing. At the present Census when House numbering was done a few months before the general Census enumeration, the various particulars relating to each Census House were collected on a standardised All India Schedule called the 'House List' which is reproduced below:

CENSUS OF INDIA 1961

HOUSE LIST

Name of District..... (Code No.....)

Name of Island/Taluk/Tehsil/Thana/Anchal/Town.....(Code No.....)

Name of Village/Ward/Mohalla/Enumerator's Block..... .....(Code No.....)

Line No.	Building Number (Municipal or local authority or Census Number, if any)	Building Number (Col. 2) with Sub-numbers for each Census House	Purpose for which Census House used, e.g., dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel etc.	If the Census House is used as an establishment, workshop or factory			
				Name of establishment or Proprietor	Name of product (s), repair or servicing undertaken	Average No. of persons employed daily last week (including Proprietor, or household members, if working)	Kind of fuel or power if machinery is used
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Description of Census House		Sub-number of each Census Household with Census House number (Column 3)	Name of Head of Household	No. of rooms in Census Household	Does the Household live in own or rented house? (a) Own (O), (b) Rented (R)	No. of persons residing in Census Household on day of visit			Remarks
Material of wall	Material of roof					Males	Females	Total	
(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)	(18)

The data have been collected uniformly for the first time at the present Census in the above form and are presented in the following five Tables.

E-I Census Houses and the uses to which they are put

E-II Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwellings

E-III Census Houses used as factories and workshops classified by Industry, *power* and *no power* used and size of employment

E-IV Distribution of sample Households living in Census Houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof

E-V Sample Households classified by number of members and by number of rooms occupied

All the above Tables give information upto taluk level (except Table E-III which contains figures upto the district level only) and also in respect of towns having a population of 50,000 and more and are reproduced in the publication "Census of India, 1961-Vol. II-Andhra Pradesh-Part IV-B-Housing and Establishment Tables" and it may be referred to for full details. In this Hand book only "Table E-I Census Houses and the uses to which they are put" pertaining to Srikakulam district is reproduced.

TABLE E-I CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This Table shows the number of Census Houses and the different uses to which they are put. The data are given down to taluk level and also for towns having a population of 50,000 and more; the data are presented separately for Total, Rural and Urban areas.

A "Census House" is defined in the present Census as a structure, or a part of a structure inhabited or vacant, or a dwelling, or a shop-*cum*-dwelling, or a place of business, workshop, school etc., with a separate entrance. If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common stair case, or a common courtyard leading to a main gate, then each such block or flat is considered as a separate Census House. If within an enclosed or open compound there are separate buildings then each such building is treated as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with separate entrance is treated as a separate Census House.

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

District/Taluk/ Town with population of 50,000 or more	Total Rural Urban	Total No. of Census Houses	Census Houses vacant at the time of House-listing	Occupied Census Houses used as: Dwellings	Shop-*cum*-dwellings	Workshop-*cum*-dwellings	Hotels, sarais, Dharmashalas, Tourist homes and Inspection houses	Shops excluding eating houses	Business houses and Offices	Factories, workshops and worksheds	Schools and other educational institutions including training classes, coaching and shop classes	Restaurants, sweetmeat shops and eating places	Places of entertainment and Community gathering (Panchayat Ghar)	Public Health and Medical institutions, Hospitals, Health Centres, Doctors' Clinics, Dispensaries etc.	Others

EXPLANATORY NOTE

SCT-SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This series of Special Tables for Scheduled Castes and Scheduled Tribes gives the population of each Scheduled Caste and Scheduled Tribe classified by Religion, Age, Marital Status, Education and distributed by Industrial Categories adopted in Table B-I. After the 1931 Census, the population figures of individual Scheduled Castes and Scheduled Tribes are being given only at the present Census. The data are presented in the following five Tables :

SCT-I Industrial classification of persons at Work and Non-Workers by sex for Scheduled Castes and Scheduled Tribes

SCT-II Age and Marital Status for Scheduled Castes and Scheduled Tribes

SCT-III Education in Urban and Rural areas for Scheduled Castes and Scheduled Tribes

SCT-IV Religion for Scheduled Castes and Scheduled Tribes

SCT-V Sample Households engaged in Cultivation classified by interest in land and size of land cultivated *in Rural areas only* for Scheduled Castes and Scheduled Tribes.

All the above Tables except Table SCT-IV are reproduced upto district level in this book.

Besides the above five Tables, the following three Special Tables, relating to either Scheduled Castes or Scheduled Tribes exclusively are reproduced.

SC-I Persons not at work classified by sex, type of activity and educational levels for *Scheduled Castes only*

ST-I Mother-Tongue and Bilingualism for *Seheduled Tribes*

ST-II Persons not at work classified by sex and type of activity for *Scheduled Tribes*

These three Special Tables are also reproduced upto district level. The figures pertaining to the Rural areas of Salur, Parvathipuram, Palakonda, Pathapatnam and Sompeta Taluks in respect of Scheduled Tribes are however presented as their proportion is higher than the State average.

In view of the safeguards provided in the Constitution for these communities, the Tables in this series will be of much use and guidance, especially when the Government are taking measures for the improvement of the condition of these communities by suitable welfare schemes under the Five Year Plans. The total Scheduled Castes and Scheduled Tribes population is given talukwise separately for Total, Rural and Urban areas and for each Town under the State Primary Census Abstract. The villagewise particulars are given under Village Directory.

The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the Notification of the Ministry of Home Affairs, New Delhi, dated 29th October 1956. The list of Scheduled Castes in Andhra Pradesh is given below

NOTE : Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions such as Christianity or Islam or Buddhism cease to belong to these castes

(1) Throughout the State :

1 Chalavadi
2 Chamar, Mochi or Muchi
3 Madiga
4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts :

1 Adi Andhra
2 Adi Dravida
3 Arundhatiya
4 Bariki
5 Bavuri
6 Chachati
7 Chandala
8 Dandasi
9 Dom, Dombara Paidi or Pano
10 Ghasi, Haddi or Relli Chachandi
11 Godagali
12 Godari
13 Gosangi
14 Jaggali
15 Jambuvulu
16 Madasi Kuruva or Madari Kuruva
17 Mala Dasu
18 Madiga Dasu and Mashteen
19 Matangi
20 Mundala
21 Paky or Moti
22 Pambada or Pambanda
23 Pamidi
24 Panchama or Pariah
25 Relli
26 Samban
27 Sapru
28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad Medak, Karimnagar, Warangal, Khammam and Nalgonda :

1 Anamuk
2 Aray (Mala)
3 Arwa Mala
4 Beda (Budga) Jangam
5 Bindla
6 Byagara
7 Chambhar
8 Dakkal (Dokkalwar)
9 Dhor
10 Ellamalwar (Yellammalawandlu)
11 Holeya
12 Holeya Dasari
13 Kolupulvandlu
14 Mahar
15 Mala Dasari
16 Mala Hannai
17 Malajangam
18 Mala Masti
19 Mala Sale (Netkani)
20 Mala Sanyasi
21 Mang
22 Mang Garodi
23 Manne
24 Mashti
25 Mehtar
26 Mitha Ayyalvar
27 Samagara
28 Sindhollu (Chindollu)

The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule III of the Scheduled Castes and Scheduled Tribes lists (Modification Order, 1956) published in the same Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Tribes in Andhra Pradesh is given below :

Note : Members of Scheduled Tribes may belong to any Religion

(1) Throughout the State :

1 Chenchu or Chenchwar
2 Koya or Gond with its sub-sects Rajah or Rasha Koyas, Lingadhari Koyas (Ordinary), Kottu Koyas, Bhine Koya and Rajkoya

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad. Medak, Karimnagar, Warangal Khammam and Nalgonda districts

1 Bagata
2 Gadabas
3 Jatapus
4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Kondareddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongris Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity, Kondhs
10 Kotia-Bentho-Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putya Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 Reddi Dhoras
17 Rona, Rena
18 Savaras-Kapu Savaras, Maliya Savaras or Khutto Savaras
19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

(3) In the Districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam, and Nalgonda :

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (including Mannervarlu)
6 Pardhan
7 Thoti

(4) In the Agency tracts :

1 Goudu (Goud)
2 Nayaks
3 Valmiki

As would be clear from the Tables, not all the above Castes and Tribes, will be found in all the Taluks of the district.

An abstract of the total Scheduled Castes and Scheduled Tribes population in Srikakulam district and its percentage to the total general population is given taluk-wise in the following statement.

Name of the District/Taluk	Total Rural Urban	General Population	Scheduled Castes Population together with percentage to General Population	Scheduled Tribes Population together with percentage to General Population

TABLE SCT-I INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for the Rural and Urban areas of the district, the population of each Scheduled Caste and Scheduled Tribe classified by Industrial Category of persons at Work and Non-Workers by sex. The Table is divided into two parts. *Part A* relates to Scheduled Castes while *Part B* relates to Scheduled Tribes. This Table is important as it gives the strength of each of the Scheduled Castes and Scheduled Tribes, the working population among them, and the sector of Industry in which the working population is engaged. The data are presented for the Rural and Urban areas separately.

TABLE SCT-II AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Tables shows for each Scheduled Caste and Scheduled Tribe the total population by Age and Marital status. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This Table corresponds to Table C-II for the total population; however, the Age-groups are restricted to 0-14, 15-44, 45+ and Age not stated only in both the parts of this Table. This Table enables us to know the percentage of each of the Scheduled Castes and Scheduled Tribes to the total population in the corresponding Age-group Such communitywise data by Age and Marital Status. for Scheduled Castes and Scheduled Tribes are being

given for the first time at the present Census. The Age distribution and Marital Status data will give an indication as to whether the population of a Caste/ Tribe is growing or declining.

TABLE SCT-III EDUCATION IN RURAL AND URBAN AREAS ONLY FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows the literacy and educational levels for each Scheduled Caste and Scheduled Tribe separately for Rural and Urban areas. This Table is divided into *Part A (i)* and *Part A (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Urban areas and *Part B (i)* and *Part B (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in Rural areas. In the case of Urban areas the educational levels adopted for giving the data are the same as those adopted in Table B-III *Part A* and in the case of Rural areas the data are given as in Table B-III *Part B*. This Table, therefore, enables us to know the proportion of each of the Scheduled Castes and Scheduled Tribes among the total population in different literacy and educational levels.

TABLE SCT-V SAMPLE HOUSEHOLDS OF SCHEDULED CASTES AND SCHEDULED TRIBES ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AREAS ONLY

This Table shows the sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only, separately for Scheduled Castes and Scheduled Tribes. The Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. The sizes of landholdings and types of interest in land cultivated, adopted in this Table are the same as those adopted in Table B-XI.

TABLE SC-I PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR *SCHEDULED CASTES*

This Table shows persons belonging to the Scheduled Castes not at work classified by sex, type of activity *viz.*, fulltime students, persons seeking employment for the first time, persons employed before but now out of employment and seeking work and others, by educational levels. The broad educational levels adopted are, illiterate, literate (without educational level), Primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary. This Table is prepared for total Scheduled Castes as a whole and not separately for each individual caste and the figures are exhibited for Total, Rural and Urban population of the district. This Table will be very useful as it clearly illustrates the extent to which the Scheduled Caste children have taken to education and it also helps to plan employment for the unemployed members of the Scheduled Castes.

TABLE ST-I MOTHER-TONGUE AND BILINGUALISM FOR *SCHEDULED TRIBES*

This Table shows exclusively the Scheduled Tribes classified by Mother-Tongue and subsidiary languages spoken by them. The data are given for the Total, Rural and Urban areas in the district and for the Rural Population of Salur, Parvathipuram, Palakonda, Pathapatnam and Sompeta Taluks as the proportion of Scheduled Tribe population to total general population is higher than the State average. The Scheduled Tribes have their own peculiar languages and dialects and this Table gives the language or dialect of each Tribe. In respect of the members of the Scheduled Tribes who have moved out of their homes and as a result of contact with the local population speak some other languages also, those subsidiary languages are also shown in this Table. The number of male and female speakers of the subsidiary language is indicated in brackets after the subsidiary language under column 7 of the Table.

TABLE ST-II PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY FOR *SCHEDULED TRIBES*

This Table shows for the district the persons not at work classified by sex and type of activity for each individual Scheduled Tribe. The types of activity under which the persons not at work are classified are the same as those adopted in Table SC-I *viz.*, fulltime students, persons seeking employment for the first time, persons employed before but now out of employment and seeking work and others. In

this Table the particulars are given according to the individual Tribe while in Table SC-I similar particulars in respect of Scheduled Castes are given for total Scheduled Castes as a whole by educational levels. The present Table, however, shows the number of unemployed persons in each individual Tribe without reference to the literacy levels.

The data are presented for Total, Rural, and Urban areas of the district and for Rural areas only in respect of Salur, Parvathipuram, Palakonda, Pathapatnam and Sompeta Taluks as the proportion of Scheduled Tribe population to total General population in these Taluks is higher than the State average.

PART IV

VILLAGE AND TOWN DIRECTORY

EXPLANATORY NOTE
VILLAGE AND TOWN DIRECTORY

This Directory renders an account of each village, as also each Ward and each Enumerator's Block of a town. It gives the Location Code Number and name of each village/town, area of the village/town, and where inhabited, the number of occupied Residential Houses, Census Households, Total Population, Population of Scheduled Castes and Scheduled Tribes, Literate Population and Workers classified into the following nine Industrial categories of Workers and Non-Workers :—

I Cultivator
II Agricultural Labourer
III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
IV Household Industry
V Manufacturing other than Household Industry
VI Construction
VII Trade and Commerce
VIII Transport, Storage and Communications
IX Other Services; and
X Non-Workers

The data are presented taluk-wise, first for the rural portion in the "Village Directory" and next for the urban portion in the "Town Directory". In the Village Directory the villages have been arranged in the ascending order of the Location Code Numbers assigned to the villages within the taluk and in the Town Directory, in the ascending order of Location Code Numbers assigned to the towns in the taluk and also by each Ward and Enumerator's Block in the ascending order. The taluk map given at the beginning of the Village Directory of each taluk showing the Location Code Numbers of each village and town and other particulars will help the easy location of the villages.

In the Village Directory, villages uninhabited and villages that have been completely merged in towns have been indicated accordingly. In respect of villages which are partly included within the town limits and partly fall outside the town limits, the particulars for that portion included in the town limits, *i.e.*, "Urban Portion" are clubbed with the particulars of the town and given in the Town Directory and for that portion outside the town limits, *i.e.*, "Rural Portion" the data are given separately in the Village Directory along with other villages. The term "Rural" is indicated immediately after the name of such villages to make the position clear. In the presentation of data for the towns the particulars have been exhibited in ascending order of Municipal Wards or Blocks and also by Enumerators' Blocks and not according to the villages constituting the town. In order that each Enumerator's Block may be located, the jurisdiction of each Block, *i.e.*, the houses covered by each Enumerator's Block in towns is indicated at the beginning of the Town Directory.

Under column 8 the area is given for the villages and towns in square miles based on the information furnished by the State Central Survey Office, the Tahsildars and by the Municipal authorities concerned. In respect of certain villages for which the area particulars are not available the abbreviation 'N.A.' has been recorded in this column. As the area of a taluk comprises not only the area of the villages but also the area of Reserved Forests, *etc.*, within the taluk, the areas of all the villages put together may not be equal to the area of the taluk.

Under columns 9 to 41 particulars relating to the total population, Scheduled Castes and Scheduled Tribes population, Literate population, total number of Workers under each of the nine categories and Non-Workers are given by sex for each village/town.

The taluk map found at the beginning of the Village Directory of each taluk shows the boundaries of each village and town, the important roads and railway lines, the rivers, if any, in the taluk. In this map the Location Code Number of each village is shown and the names of the towns and villages having more than 5,000 population, important tourist centres and places of great religious importance *etc.*, if any, are given. Urban areas have been shown by shading the area covered. Uninhabited villages and villages of different sizes of population, *i.e.*, below 2,000, 2,000–4,999, 5,000 and above are distinguished by distinct symbols. An alphabetical list of villages with the Census Location Code Numbers indicated against them is given after the taluk map and before the Village Directory. This list enables one to find out the Location Code Number of any village and thereafter to get the required particulars of the village from the Village Directory.

The information relating to Educational facilities, Medical and Public Health facilities, Drinking water facilities, Communication and Transport facilities and Electrification is also given villagewise in this section for the first time besides the population data. These facilities are shown by symbols, as explained below, immediately after the names of the villages under columns 3 to 7.

(*i*) *Educational facilities are shown by the following symbols under column 3* :—

P : Primary School
M : Middle School
H : High School
C : Institutions of Higher Education including Colleges
T : Technical Institutions

(*ii*) *Medical and Public Health facilities are shown by the following symbols under column 4*:—

D : Dispensaries
Rhc : Rural Health Centres (Primary Health Centres)
Hos : Hospitals
Mcw: Maternity Child Welfare Centres

(*iii*) *Drinking water facilities are shown by the following symbols under column 5* :—

S : Safe or protected water supply including tube wells, *etc.*
W : Well
Tk : Tank or kunta
Riv : River
C : Canal or Gedda
Sc : Spring Channel

(*iv*) *Communication and Transport facilities are shown by the following symbols under column 6*:-

Po : Post Office
To : Telegraph Office and Public Call Office
Rh : Rest Houses and Choultries
R : Road
Rly : Railway

(*v*) *Electrification facilities are shown by the following symbols under column 7* :—

E : Electricity
E(I) : Electricity in Industrial use
E(A): Electricity in Agricultural use
E(D): Electricity in Domestic use

Where figures like 5P, 2H, *etc.*, occur they denote that the village or town has 5 Primary Schools, 2 High Schools, *etc.*

Besides presenting the information relating to the above facilities in the Village/Town Directory, certain other important particulars, *viz.*, sources of irrigation, crops raised, value of lands, Co-operative Societies, Police Stations, Veterinary Hospitals, Reading Rooms, Places of Public Entertainments (Cinemas), Industrial Establishments and Rural Handicrafts are also given taluk-wise in separate Sub-Tables immediately after the Village and Town Directory. The Sub-Tables are numbered as follows:-

Sub-Table 1 : Sources of irrigation, crops raised and value of land
Sub-Table 2 : Co-operative Societies
Sub-Table 3 : Police Stations
Sub-Table 4 : Veterinary Hospitals
Sub-Table 5 : Reading Rooms
Sub-Table 6 : Public Entertainments (Cinemas)
Sub-Table 7 : Industrial Establishments
Sub-Tables 8, 9 & 10 : Rural Handicrafts

In Sub-Table 1 relating to the sources of irrigation, crops raised and value of land, the particulars relating to the high and low prices of dry and wet land, the various important crops raised and the sources of irrigation are given villagewise. Only the Location Code Numbers have been given in the Sub-Table without giving the names of the villages. Villages having land of same value are grouped together. As the particulars are not available for most of the Agency Villages of Salur, Parvathipuram and Palakonda taluks they have not been shown in this Sub-Table. The following abbreviations are used in this Sub-Table.

Cereals

J : Jonna or Cholam or Jowar
K : Korra
M : Maize
P : Paddy
R : Ragi
S : Sajja or Cumbu
Sa : Samai

Pulses

Blg : Blackgram
Gg : Greengram
Hg : Horsegram
Rg : Redgram

Other crops

Ch : Chillies
G : Groundnut
Gi : Gingelly
Su : Sugarcane

Irrigation sources

C : Canal or Gedda
Riv : River or Stream
Tk : Tank or Kunta
W : Well

In Sub-Table 2 relating to Co-operative Societies, the various types of Co-operative Societies functioning in each village have been presented taluk-wise. The data for the district are given in the beginning followed by the particulars relating to taluks. The abbreviations used for the different types of Co-operative Societies are given below. If a village is served by a Co-operative Society of another village it has been indicated accordingly:—

AG & ICS	Agricultural and Industrial Co operative Society
CCS	Consumers' Co-operative Society
CICS	Cottage Industrial Co-operative Society
CS	Co-operative Society
ECS	Employees' Co-operative Society
FCS	Forest Co-operative Society
FICS	Fishermen's Co-operative Society
FLCS	Field Labourers' Co operative Society
HBCS	House Building Co-operative Society
ICS	Irrigation Co-operative Society
LCCS	Labour Contract Co-operative Society
LSCS	Large Sized Co-operative Society
LUCS	Local Union Co-operative Society
MCS	Marketing Co-operative Society
MPCS	Multipurpose Co-operative Society
MSCS	Milk Supply Co-operative Society
NCS	Neera Co-operative Society
N & DJCS	Neera and Date-Palm Jaggery Co-operative Society
N & PJCS	Neera and Palm Jaggery Co-operative Society
OP & SCS	Oil Production and Sales Co-operative Society
PSCS	Public Servants' Co-operative Society
SGCS	Sugarcane Growers' Co-operative Society
SSCS	Students' Stores Co-operative Society
TCS	Teachers' Co-operative Society
WCS	Weavers' Co-operative Society

In the other Sub-Tables 3 to 6 relating to Police Stations, Veterinary Hospitals, Reading Rooms and Places of Public Entertainments (Cinemas) also the data are presented in the same form as explained above *i.e.*, first for the district and then for each taluk. Only the names of places where such facilities exist are given.

In Sub-Table 7 relating to Industrial Establishments, the number of units under various industries existing in villages and towns are given. These particulars were mainly those collected through a schedule of Industries and Crafts issued to the village school teachers in connection with the Rural Craft Survey. In this schedule the data were to be given by the numbers of families; and as such, the families which had members engaged in any of the industries had been taken as units for that industry. In respect of some villages where the schedules had not been answered, the information was compiled from the Houselists. Certain data were taken from other sources as well, such as the Village Directory furnished by the Tahsildars and the survey of Industries conducted in the cities. It is, however, quite possible that there may be some villages for which the information could not be presented. Such omissions are, however, likely to be very few. The particulars are given separately for the rural and urban areas. Under the name of the district, the industries are arranged in the ascending order of Minor Groups of the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for total, rural and urban areas separately. Then, the figures for the various taluks are

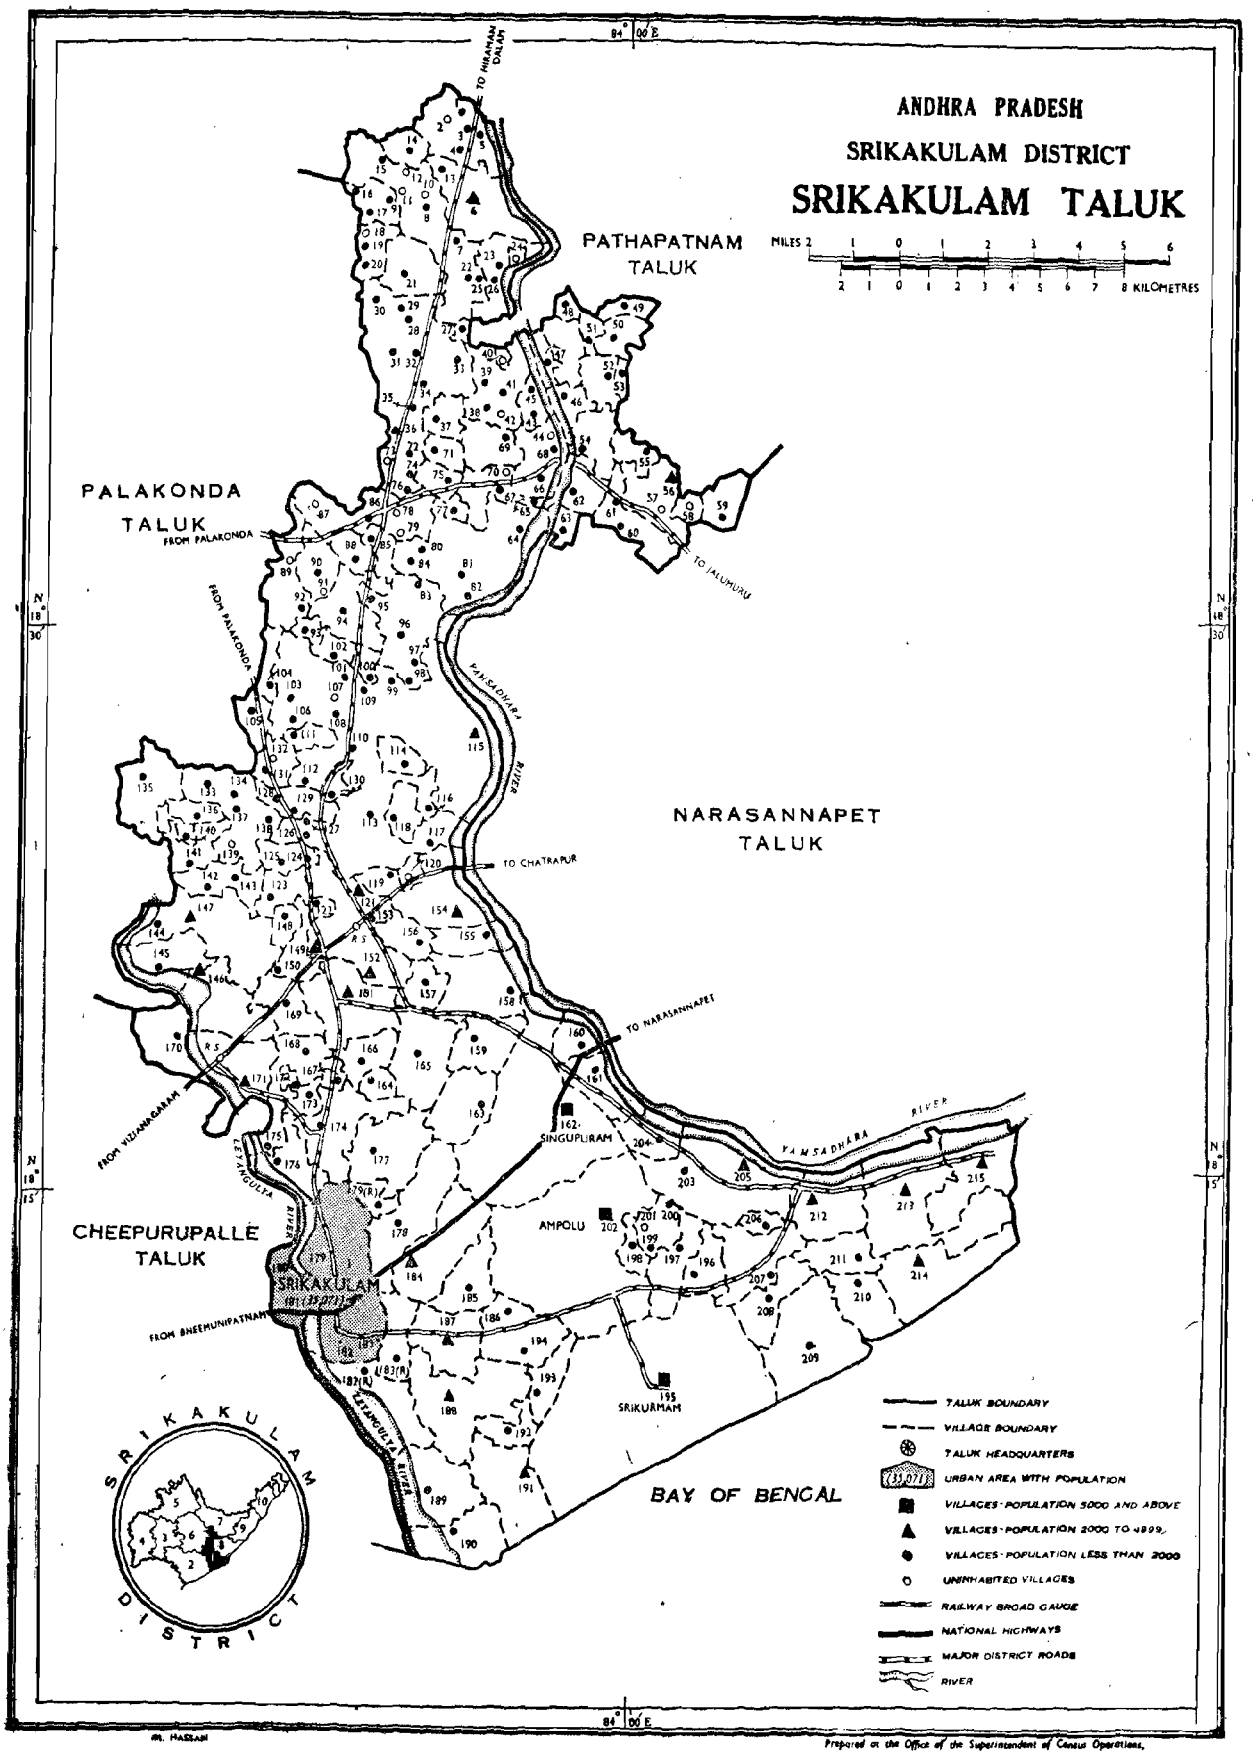

presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each Village/Town are shown the Minor Group Code Numbers of the industries or crafts found in that Village/Town with the number of units engaged in that Minor Group in brackets against each of the groups.

In the three Sub-Tables 8, 9 and 10 relating to Handicrafts information is given about the various crafts practised, the number of persons engaged, the distribution of Artisan Communities, the number of families engaged in the Handicrafts, and the names of highly skilled craftsmen of each community, and the distribution of articles of crafts by main material used, source of design, manufacture, marketing and earnings. These particulars were mainly collected through a schedule of Industries and crafts issued to the village school teachers in rural areas and to the Municipal Authorities in the Municipal areas. In respect of cities the information was collected through the staff of the Census Tabulation Offices specially appointed for the purpose. In respect of some villages where the schedules have not been answered the information was taken from the House-lists prepared at the time of Housenumbering in 1960. A detailed report on the Handicrafts Survey is given in "Census of India, 1961—Volume II—Andhra Pradesh—Part VII-A" and may be referred to.

In the Sub-Table relating to Fairs and Festivals given at the end of this section, the important fairs and festivals that take place in the village, the month in which they take place, *etc.*, are given for each village having such importance. A detailed report on the Fairs and Festivals is, however, given in "Census of India, 1961-Volume II-Andhra Pradesh-Part VII-B" and may be referred to.

All the information given in the various Sub-Tables in this section are based on the information furnished by the Heads of Departments, the District Officers, the Tahsildars and the Municipal Authorities concerned.

SRIKAKULAM TALUK

M. HASSAN

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

SRIKAKULAM TALUK

1961 Location Code No. (1)	Name of Village (2)
46	Achutapuram
152	Akkivalasa
176	Akkivaram

BOBBILI TALUK

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh Hyderabad

ALPHABETICAL LIST OF VILLAGES

BOBBILI TALUK

1961 Location Code No.	Name of Village
(1)	(2)
32	Ajjada
169	Akulakatta
112	Alajangi
162	Amiti
106	Ampavilli
133	Anavaram
88	Antipeta
140	Antlavara
147	Appalampeta
242	Arasabalaga
35	Arasada
123	Badangi
27	Badevalasa *alias* Latchannavalasa
192	Badevalasa (near Jakkuva)
3	Baggandhoravalasa
60	Bakkupeta
217	Balabhadra Rajapuram
4	Ballakrishnapuram
199	Bangarampeta
116	Bankuruvalasa
45	Barli
100	Bhairipuram
114	Bheemavaram
181	Bhojarajapuram (near Datti)
73	Bhojarajapuram (near Paradi)
69	Bhubandavalasa
220	Bhupalarajapuram
7	Buddipeta
25	Burja
177	Burjavalasa Agraharam
80	Burjavalasa Agraharam (near Mettavalasa)
146	Burjavalasa (near Amiti)
79	Butchempeta
36	Chakarapalle Agraharam
43	Chellmpeta
179	Cherukupalle
59	Chinabhogela
194	Chinachamalapalle
207	China Kada
188	Chinamedapalle
247	Chinapalavalasa
29	Chinaukalam
11	Chinnarayudupeta
239	Chinnayyapeta
48	Chintada
67	Chitrakuta Boddavalasa
176	Choudantivalasa
163	Chukkavalasa
211	Dasupeta
224	Datti
219	Dattirajeru
23	Dayanidhipuram *alias* Jagannadhapuram
234	Dommiganigadabavalasa
68	Donguruvalasa
122	Donkinavalasa
195	Gadabavalasa Agraharam
212	Gadasam
49	Gadelavalasa
119	Gajarayunivalasa
152	Galavilli
149	Gangada
166	Gangannapadu
18	Gangarajapuram
2	Geddaluppi
210	Gobhyam
115	Golladi
83	Gollapalle
145	Goluguvalasa
132	Gopalakrishnarangarayapuram
64	Gopalarayudupeta
39	Gouripuram
128	Gudepuvalasa
200	Gudivada
81	Gunnathotavalasa
10	Gutchimi
182	Gutchimi (near Vindhyavasi)
202	Ingilapalle
14	Ippalavalasa
246	Jadavarikottavalasa
93	Jagannadhapuram (near Bobbili)
17	Jagannadhapuram (near Nidagallu)
191	Jakkuva
89	Janardhanarangarayapuram *alias* Kintalavanipeta
113	Janardhanarangarayapuram *alias* Kunukuvanivalasa
102	Janardhanarangarayapuram (near Ampavilli)
167	Jannivalasa
24	Janthirayapuram *alias* Bommillapadu Agraharam
50	Janumallavalasa
8	Jogempeta
241	Kagam
96	Kalavarai Agraharam
117	Kamannavalasa
98	Kammavalasa
209	Kannam
110	Karada
70	Kasidoravalasa
159	Kavirayunivalasa
58	Khasapeta
170	Koduru
142	Kollivalasa
203	Komatipalle Agraharam
91	Komatipalle (near Bobbili)

Note :—Salur taluk partly consists of Agency area and partly Plains and the villagewise data are given in this Village Directory separately for the Agency Villages and Plains Villages under the captions "Agency" and "Plains" although the Location Code Numbers for all the villages have been given in one serial order for the whole taluk. The Location Code Numbers that are unaccounted for under "Agency Villages" will be found under "Plains Villages."

Note :—Parvathipuram Taluk partly consists of Agency area and partly Plains and the Villagewise data are given in this Village Directory separately for the Agency Villages and Plains Villages under the captions "Agency" and "Plains" although the Location Code Numbers for all the Villages have been given in one serial order for the whole taluk. The Location Code Numbers that are unaccounted for under "Agency Villages" will therefore be found under "Plains Villages."

Note :—Palakonda taluk partly consists of Agency area and partly Plains and the Villagewise data are given in this Village Directory separately for the Agency Villages and Plains Villages under the captions "Agency" and "Plains" although the Location Code Numbers for all the villages have been given in one serial order for the whole taluk. The Location Code Numbers that are unaccounted for under "Agency Villages" will therefore be found under "Plains Villages."

ICHCHAPURAM
IND SUB TALUK

M. HASSAN

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh Hyderabad

ALPHABETICAL LIST OF VILLAGES

ICHCHAPURAM IND. SUB-TALUK

1961 Location Code No.	Name of Village
(1)	(2)
20	Ameensahebpeta
5	Arakabhadra
16	Balakrishnapuram
49	Balliputtuga
7	Barampuram
45	Bejjiputtuga
42	Belagam
21	Bellupada *alias* Ichchapuram
35	Bhairipuram
8	Birlangi
1	Boddabada
10	Boddakhali
45	Borivanka
29	Burjapadu
36	Chandiputtuga
24	Dharmapuram
27	Edupuram
51	Gollagandi
31	Gonapaputtuga
9	Haripuram
44	Jagathi
32	Kapasakuddi
41	Karapadu
34	Kaviti
18	Kedaripuram
4	Keertipuram
28	Kesapuram
40	Kojiria
2	Koligam
26	Kotari
48	Kusumapuram
22	Loddaputti
14	Mandapalle
50	Manikyapuram
12	Mashaghapuram
15	Munibhadra
17	Mutchindra
30	Nelavanka
3	Paithari
25	Purnatakam
19	Purushottapuram
33	Putyadala
39	Raghunadhapuram
38	Rajapuram
13	Rattakanna
6	Sasanam
43	Silagam
11	Telukunchi
23	Tulasigam
47	Varakha
37	Vinjagiri

The following abbreviations have been used in the above Sub-table.

Cereals

J : Jonna or Cholam or Jawar
K : Korra
M : Maize
P : Paddy
R : Ragi
S : Sajja or Cumbu
Sa : Samai

Pulses

Blg : Blackgram
Gg : Greengram
Hg : Horsegram
Rg : Redgram

Other Crops

Ch : Chillies
G : Groundnut
Gi : Gingelly
Su : Sugarcane

Irrigation Sources

C : Canal
Riv : River
Tk : Tank
W : Well

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY

INDUSTRIAL ESTABLISHMENTS

SRIKAKULAM DISTRICT

Note :— In the Sub-Table below relating to Industrial Establishments, the units of various industries existing in villages and towns are given. The particulars are given separately for the Rural and Urban areas. The industries are arranged, first for the district total in the ascending order of Minor Groups of Industries under the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for Total, Rural and Urban separately. The figures for the various taluks are also presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village/Town Directory. Against each Village/Town are shown the Minor Group Code Numbers of the Industries or Crafts found in that Village/Town with the number of units engaged in the Minor Group in brackets against each of the Groups.

Detailed description of Industrial Code (Minor Group) Numbers under which the Industrial Establishments are arranged in the above Sub-Table

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
044	Rearing of bees for the production of honey, wax and collection of honey
200	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and food grains
201	Production of sugar and syrup from sugarcane in mills
202	Production of indigenous sugar, gur, from sugarcane or palm Juice and production of candy
205	Production of bread, biscuits, cake and other bakery products
207	Production of edible fats and oils (other than hydrogenated oil)
208	Production of Hydrogenated oils (Vanaspati)
209	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge
210	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
214	Production of aerated and mineral water
216	Production of ice cream
218	Processing of coffee in curing works
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
222	Manufacture of cigarette and cigarette tobacco
226	Manufacture of other tobacco products
230	Cotton ginning, cleaning, pressing and baling
231	Cotton spinning (other than in mills)
233	Cotton dyeing and bleaching
235	Cotton weaving in handlooms
236	Manufacturing of Khadi textile in Handlooms
238	Manufacturing of cotton nets
240	Jute pressing and baling
244	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta
272	Embroidery and making of crepe lace and fringes
273	Making of textile garments including raincoats and headgear
274	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags
277	Manufacture of coir and coir products
280	Sawing and planing of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
284	Manufacture of other wooden products such as utensils, toys, artwares
288	Manufacture of materials from cork, bamboo, cane leaves and other allied products

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY--*Concld.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
289	Manufacture of other wood and allied products not covered above
302	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry
310	Currying, tanning and finishing of hides and skins and preparation of finished leather
311	Manufacture of shoes and other leather foot-wear
320	Manufacture of tyres and tubes
335	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap
338	Manufacture of common salt
340	Manufacture of structural clay products such as bricks, tiles
341	Manufacture of cement and cement products
342	Manufacture of lime
343	Manufacture of structural stone goods, stone dressing and stone crushing
350	Manufacture of earthenware and earthen pottery
353	Manufacture of glass bangles and beads
365	Manufacture of brass and bell metal products
366	Manufacture of aluminium products
367	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can
368	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products
369	Manufacture of sundry hardwares such as G. I. pipe, wire-net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in Major Groups 36, 37, 38 and 39)
378	Manufacture of electronic equipment such as radio, microphone
384	Repairing and servicing of motor vehicles
386	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines
388	Repairing of bicycles and tricycles
389	Manufacture of other transport epuipment not covered above such as animal drawn and hand drawn vehicles
390	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies
392	Assembling and repairing of watches and clocks
393	Manufacture of jewellery, silver ware, and wares using gold and other precious metals
394	Manufacture and tuning of musical instruments
399	Manufacture and repair work of goods not assignable to any other group
