MOTIF

Thousands of people in small groups from as far as Vidharbha and Goa proceeding towards Pandharpur with 'Gyanba Tukaram' chanting (called 'Dindi') is a common sight during the month of Ashadha. These people carry with them the message of devotion. Congragation of these lakhs of people imersed in the devotion for the glory of God (Vithoba) on Ashadhi and Kartiki Ekadashi is a rare sight. Path of devotion was introduced by Sant Dnyaneshwar propagated by Sant Namdeo, strengthened by Sant Eknath and put into words by Sant Tukaram.

Pandharpur is 74 km away from district head-quarter town of Solapur.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the corelation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC & ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi,
the 26th April 1982

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day).

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsils is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district may not, therefore, strictly add up to the corresponding figures shown against the district.

APPENDIX 1 TO SUMMARY TABLE 1

Tahsilwise number of Villages with population of 5,000 or over and of Towns with population under 5,000
(Tahsils which have nothing to show for this statement have been omitted from presentation)

District/Tahsil	Villages with population of 5,000 or over			Towns with population under 5,000

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory, Part B to village and town-wise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra state (as also for many other states in India) only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook data on some new items, such as adult literacy centres, primary health sub-centres and community health workers, has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class-I and II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

Solapur, like any other district is largely influenced by what its geography has made it. The area is largely situated on the plains. The river Bhima flows from north-west to south-east and Sina from north to south right across the district. The south-west and north-east parts of the district are arid area. Solapur is the meeting ground for Maharashtra and Karnataka and from very old times the trade routes passed across Solapur district to Chaul on the western sea coast and later to Bombay under the British rule.

As per the mythological literacy sources, (Gazeteer Solapur) the region south of Godavari was covered with thick forest and was inhabitated by the aboriginals. Agastya was the first Aryan who crossed the Vindhya mountain and settled on the banks of Godavari. He was followed by other sages who established their hermitages in the different regions of the south.

The area which now form Solapur district was formerly parts of Ahmadnagar, Pune and Satara districts. Karmala was in Ahmadnagar, Mohol in Pune and Pandharpur, Malshiras and Sangola in Satara. Barshi and Solapur were frequently changed between Ahmadnagar and Pune districts. The Sub-collectorate of Solapur was formed under Ahmadnagar district in 1830. The district of Solapur was formed in 1838 and consisted of the eight sub-divisions namely Solapur, Barshi, Mohol, Madha, Karmala, Indi, Hippargi and Muddebihal.

With the Re-organisation of states in 1956, the district was included in Bombay state and since 1960, it forms part of Maharashtra.

At the time of 1961 census, the district comprised of 11 talukas which in themselves included 946 inhabited villages and 10 towns. During the decade 1961–71 there were no changes in the number of tahsils and towns. Even there was no jurisdictional change till the reference date of March 1, 1981. However, there have been certain changes as to the number of villages within the tahsils during the decade of 1971–81 With the upgrading of hamlets/wadis in the district, the number of villages has gone upto 1,110 (including 6 uninhabited), whereas number of towns in the district remains the same as 10.

Location, Relief and Drainage

Solapur district is one of the five districts of Pune division situated on the south-east fringe of Maharashtra state and lies between 17°-10′ and 18°-32′ North latitude and 74°—42′ and 76°-15′ East longitude. It is surrounded by Ahmadnagar and Osmanabad districts in the North. Osmanabad district and Karnataka state in the East, Sangli district and Karnataka state to the South and Satara and Pune districts towards the West. The district Head Quarters is at Solapur city. This city is at a distance of 456 kms from the State Head quarters at Bombay on the main broad guage rail line of Central Railway connecting Bombay and Madras.

District Solapur covers an area of 15,017 km.^{2} and has a population of 2,610,144 as per 1981 census. It ranks 6th in area and 7th in population among the 26 districts in the state. In other words, Solapur is one of the biggest districts in the state both in terms of area and population.

The district lies in the basins of the Nira, Bhima, Sina and Man rivers. Most of the Malshiras tahsil in the west drains northwards into the Nira river which falls into the Bhima river in the west of

the district. The drainage area of the Bhima, which winds south-east through the district, includes on the left bank Karmala, Madha, Pandharpur, Mohol and South Solapur and on the right bank Malshiras, Sangola and Mangalwedhe. The Sina which flows from north to south-east, parallel to the Bhima, drains eastern Karmala, Central Madha, Barshi, eastern Mohol and Solapur North and South.

Near about Solapur, the country is about 550 metres above the sea level, except north and eastern Barshi, Central Madha, Central Karmala, parts of Malshiras and southern Sangola which are hilly. Most of the surface comprises long, low uplands separated by hollows or shallow basins. The shallow soil covered uplands, are suited for pastures and deep-soiled lowlands for croping. In Karmala and Madha, the water shed between the Bhima and the Sina is marked by a table land and a dotting of individual, residual knolls. Except this, the Solapur uplands are generally rounded swellings of traps over grown with yellow sandy spear grass. The rest of the district is bare, bleak and tree less.

Except in Barshi, Karmala, Mohol, Malshiras and Sangole, the district of Solapur has a few hills and even these are isolated. The chief knolls are Vadshin ghat in Barshi, Waghoba and Bodki in Karmala, Chinchgaon in Madha, Gurvad in Malshiras, Phalten range in Malshiras and the Khanapur-Jat hills of Sangole.

Climate

Climate of the district is dry and healthy. Except in summer season, weather is amicable. Particularly in winter it is refreshing with bright sun-shine. In summer season, the climate is rather hot. The temperature rises upto 40.7 degree C. Occassionally dust storms and hot winds also occur in the summer season. In cold season, temperature declines to about 17.1 degree C. However, one does not feel cold. Stinging cold is thus normally not experienced in the district.

The rainfall throughout the district is scanty and uneven. The annual average for the Solapur centre is 678 mm. This meagre rainfall is received from south-west as well as north-west monsoons. The paucity of total amount of rainfall and large variations both in extent and the distribution makes the agriculture almost a gamble on the rains. The analysis of rainfall data since 1958 indicates that not only there are yearly variations in the total rainfall but its distribution is also unevenly spread in the Solapur district area. The number of rainy days varied very widely from year to year. Agro-climatically, the entire district, except Akkalkot tahsil falls in the rainfall shadow zone. The district witnesses recurrent scarcity conditions. The drought cycle having a very small span of the two to three years, has adversely affected the socio-economic conditions of the people, who are mainly dependent on agriculture.

Soil

The geographical foundation of soils prevailing in the district is mainly of Deccan trap of volcanic origin. The soil is partially decomposed basaltic rock, locally known as *murum* which over lies present material. On account of more or less complete absence of leading, the exchangable calcium being the predominant claimant The lime reserve is fairly high (3.5 to 10.1 per cent). The soil exhibits varying degrees of errosion and truncated profile is a common occurrence. They can be classified into four main categories, on the basis of depth and structure, *viz.*

1 Very shallow soils with depth less than 7.5 c. m.
2 Shallow soils with depth between 7.5 to 22.5 c. m.
3 Medium deep soils with depth between 22.5 to 90 c. m.
4 Deep soils with depth more than 90 c. m.

In Karmala half the soil is black and remaining is red-brown or grayish black and shallow, whereas Madha has shallow soil having varying depth and quality. Soil in Pandharpur is poor and capable of producing millets only. The soil of Malshiras is shallow and does not retain moisture. On the whole the district has shallow soil with low water holding capacity.

Census Houses and Households

Columns 4 and 5 of the primary census abstract give total number of occupied residential census houses and the number of households. According to Indian census, 'Census House' is a building or a part thereof, having a main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant, residential, non-residential or both. A 'household' is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. A household may be of persons related by blood or of unrelated persons, or having a mix of both. There may be single member or more than one member households. Households of unrelated persons termed as 'institutional households' include boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc.

Houseless population or houseless households include persons who do not have any fixed place of residence but go on moving from place to place, camp at night, or just live on the streets, in gardens or in open places.

Distribution of population in Rural and Urban Areas

As per 1981 census, the population of Solapur district stands at 2,610,144 including 1,344,147 males and 1,265,997 females. This makes 4.16 per cent of State's population over 4.88 per cent of its area. Among the 11 tahsils in the district, Solapur North tahsil (615,608) is the most populous (Table 1). Other tahsils in order of their size of population are : Malshiras (282,300), Barshi (276,757), Pandharpur (237,680), Akkalkot (215,510), Madha (207,550), Sangole (182,063), Karmala (165,714), Mohol (158,630), Solapur South (151,031) and Mangalvedhe (117,301). It follows that within the district the most populous tahsil has more than five times the population of the least populous tahsil.

TABLE 1

Population, number of villages and towns, 1981

	District total ..	2,610,144	1,344,147	1,265,997	1,842,678	946,725	895,953	767,466	397,422	370,044	1,110	1,104	10

The basic unit for rural area is a revenue village. A 'village' may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas on the other hand are specially defined for census purposes. The icrteria adopted for 1981 census is :

(*a*) All places with a municipality, corporation or cantonment board or notified town area.

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000;

(*ii*) At least 75% of male working population engaged in non-agricultural (and allied) activities;

(*iii*) A population of at least 400 persons per km².

Out of 2,610,144 persons in the district, 1,842,678 (70.60%) live in the country side and the remaining 767,466 (29.40%) in the towns. Thus, in Maharashtra state (where 35.03 per cent of the total population is urban), Solapur is among one of the urbanised districts.

Size, Class and Status of Towns

For the purposes of comprehensive analysis of varied demographic characteristics, towns have been divided into the following classes by population size :

Class I	..	1,00,000 and above
Class II	..	50,000—99,999
Class III	..	20,000—49,999
Class IV	..	10,000—19,999
Class V	..	5,000—9,999
Class VI	..	Below 5,000.

For 1981 census, there has been no addition of new towns or declassification of towns in the district.

TABLE 2

New Towns/Towns declassified in 1981 Census

Name of the towns	Population 1981-census
1	2
(*a*) Added—Nil	Nil
(*b*) Declassified—Nil	Nil

Of the 10 towns in the district, one (Solapur city) is class I, Two (Barshi and Pandharpur) are class II, One (Akkalkot) Class III, Five (Maindargi,

Mangalvedhe, Sangole, Karmala and Kurduwadi) are Class IV and remaining One (Dudhani) is class V. Six of these 10 towns are medium size. Three are bigger size and one is of small size.

Urban Agglomeration

As in 1971 the concept of urban agglomeration has been adopted for 1981 census too. An urban agglomeration may constitute;

(*a*) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of adjoining village or villages);

(*b*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(*c*) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

In Solapur district, there is only one urban agglomeration (U. A.) *i. e.* Solapur U. A. and its constituent units are :

(*a*) Solapur City (M. Corp.)

(*b*) Solapur O. G.

Standard Urban Area

Standard Urban Area (S. U. A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S. U. A. are;

(*i*) It should have a core town of a minimum population of 50,000;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Barshi, Pandharpur and Solapur standard urban areas in Solapur district are as follows :—

Barshi SUA : Urban Components :
1. Barshi (M)
Rural Components :
Nil.

Pandharpur SUA : Urban Components :
1. Pandharpur (M)
Rural Components :
1. Isbavi.

Solapur SUA : Urban Components :
(i) Solapur City (M. Corp.)
(ii) Solapur O. G.
Rural Components :
1. Solapur (Rural)
2. Salgarwadi.
3. Majarewadi.
4. Nehru Nagar.

Table (3) below provides villages by population ranges and their percentage to total inhabited villages in the district.

TABLE 3

Distribution of inhabited villages by population ranges

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
—200	16	1.45
200—499	116	10.51
500—1,999	688	62.32
2,000—4,999	241	21.83
5,000—9,999	37	3.35
10,000+	6	0.54
All ranges	1,104	100.00

A village on an average has a population of 1,669 persons and 13.22 km.^{2} of area. Of the 1,104 inhabited villages, 16 (1.45%) are small sized with a population of below 200; 116 (10.51%) in the size class 200–499; 688 (62.32%) in the size class 500–1,999; 241 (21.83%) in size class 2,000–4,999; 37 (3.35%) in size class 5,000–9,999 and the remaining 6 (0.54%) in size class 10,000+.

For a broader generalisation the villages have been further grouped as small sized (population below 500), medium sized (500–1,999), large sized (2,000–4,999) and exceptionally large sized (5,000+). Within the district small sized villages share 11.96 per cent. of the total inhabited villages and 2.46 per cent of the rural population in the district, medium sized 62.32 per cent of villages and 41.55 per cent of population, large sized 21.83 per cent of villages and 37.58 per cent of population, and exceptionally large sized 3.89 per cent of villages and 18.41 per cent of population.

Population Growth, Density and Sex Ratio

Solapur district registered the growth rate of 15.81 per cent during the decade 1971–81. The decade added 356,304 persons to the 1971 population of the district. However, the growth rate of population in Solapur district is lower than that of Maharashtra state (24.54 %). The comparatively lower growth rate in Solapur district during 1971–81 is probably due to out-migration of people to the industrial centres like Pune, Bombay and other places for better economic opportunities. Within the district, Pandharpur tahsil experienced the highest (26.69 %) growth rate followed closely by Solapur North tahsil (26.37 %) (Table 4). Other tahsils which recorded growth rate above the district average is Malshiras (24.65 %) and Sangole (17.07 %). Faster growth of population in these tahsils appears to be the result of immigration associated with the industrial expansion and better employment opportunities in these areas. It is also observed that during 1971–81 the urban growth rate was less than the rural in Pandharpur tahsil (29.35 % rural and 20.03 % urban).

TABEL 4

During 1961–71, urban growth rate in the district and the state was 18.60 per cent and 40.75 per cent respectively.

TABLE 5

Growth, Density and Sex–ratio of urban population in the district in relation to the state

N.A—Not Available.

At the latest census of 1981 the district recorded an urban growth rate of 24.48 per cent against the rural growth rate of 12.54 per cent. Among the various towns in the district, Sangole recorded the highest (32.76 %) growth rate. Solapur city (28.30 %) is the only other unit in the district where the urban growth rate exceeded the district average. By contrast the growth rate in Maindargi town was only 3.30 per cent during 1971–81. The growth rates of the other towns are Dudhani (23.40 %); Pandharpur (20.03 %); Karmala (19.06); Barshi (16.29 %); Mangalvedhe (10.97 %); Kurduvadi (9.47 %) and Akkalkot (7.12 %).

Solapur district has an average density of 174 persons per km². This is much lower than the state average density of 204 persons per km². Within the district, however, one can see wide variations. Solapur North (836) is the most thickly populated tahsil. On the contrary Mangalvedhe and Karmala tahsils have a density of barely 103 persons per km². It appears that industrially developed tahsils are relatively more densely populated.

Table 6 shows distribution of villages according to density ranges. For convenient understanding of patterns, villages have been grouped under eight different density ranges.

TABLE 6

Distribution of villages by density

Range of Density (per km².)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	5	0.45
11—20	5	0.45
21—50	39	3.53
51—100	356	32.25
101—200	547	49.55
201—300	72	6.52
301—500	23	2.09
501+	19	1.72
Not known	38	3.44
All density ranges ..	1,104	100.00

Table reveals that about one-third (405 of the inhabited villages recorded a density of upto 100 persons per km². In about half (547) villages it varied between 101–200, and 19 villages recorded a very high density of 501+ persons per km². For the 38 villages, density of population could not be worked out for want of their area figures. In confirmity with the state patterns there has been consistent rise in the urban density of population in the district since the post independence period. It has increased from 985 persons per km.² in 1961 to 2,265 persons per km.² in 1981 (Table 5). Among the various towns in the district, Solapur city (MC) recorded the highest density (20,178) at the 1981 census. Density of other towns in decending order is Akkalkot (8,756); Maindargi (5,711); Pandharpur (5,334); Dudhani (5,321); Kurduvadi (3,018); Barshi (2,000); Karmala (544); Sangole (216) and Mangalvedhe (110) (Statement I).

Sex composition is an important factor which influences births, deaths, marriages and availability of manpower. Most of the demographic, social, cultural and economic characteristics of the population are, therefore, shown separately for males and females in census tables.

1981 census recorded a sex ratio of 942 females per 1,000 males in the district. This is comparatively closer to the state as a whole (937 females per 1,000 males).

TABLE 6 (i)

Sex ratio 1901–1981

Year	District	State
1	2	3
1901 ..	985	978
1911 ..	967	966
1921 ..	943	950
1931 ..	934	947
1941 ..	942	949
1951 ..	945	941
1961 ..	936	936
1971 ..	933	930
1981 ..	942	937

Table 6 (i) reveals that sex ratio in Solapur district was higher than that of the state during 1901–1911. From 1921 onwards the reverse trend is noticed; except for 1951, 1971 and 1981 where the ratio of the district is higher than that of the state by 4, 3 and 5 counts respectively. Similarly in 1961 the state and district sex ratio is exactly equal (936).

Within the district, the sex ratio differs from 985 in 1901 to 942 in 1981. Sangole tahsil with a sex ratio of 975 ranks at the top and Solapur south tahsil (917) is at the bottom Table 6 (ii). Other tahsils as per ranks are Akkalkot (964); Karmala (950); Barshi (947); Madha (942); Mangalvedhe (941); Mohol (937); Malshiras (936); Pandharpur (934); Solapur North (933) and Solapur south (917). Broadly speaking the sex ratio is higher in the northern as compared to the southern parts of the district. It appears that northern areas are sending out higher proportion of male migrants to the Greater Bombay, Pune, Satara, Sangli and the other parts.

TABLE 6 (ii)

Sex ratio by tahsils, 1981

District/Tahsils	Females per 1,000 males
Solapur District ..	942
Solapur North tahsil ..	933
Barshi tahsil ..	947
Akkalkot tahsil ..	964
Solapur South tahsil ..	917
Mohol tahsil ..	937
Mangalvedhe tahsil ..	941
Pandharpur tahsil ..	934
Sangole tahsil ..	975
Malshiras tahsil ..	936
Karmala tahsil ..	950
Madha tahsil ..	942

The urban sex ratio (931) in the district is significantly higher than that of the state (850). Trend over the past three decades (Table 5) reflects rise in the urban sex ratio in the district as well as in the state.

Scheduled Castes and Scheduled Tribes

For evolving any suitable plan for socio-economic uplift of the scheduled castes and scheduled tribes, the Government need to have the necessary data about them and for this, census is the main source. One of the highlights of 1981 census, as that of 1971 and 1961 censuses, was the collection of detailed information on the socio-economic characteristics of scheduled caste and scheduled tribe population. There is no standard definition of scheduled castes or scheduled tribes. Scheduled castes include castes, races of tribes as are declared to be scheduled castes by the President of India by public notification under article 341(i) of the the Indian Constitution. Similarly, scheduled tribes mean all such tribes of tribal community or part or group within such tribe or tribal community as are declared by the President of India, to be treated as scheduled tribes under article 342(i) of the Indian Constitution. For Maharashtra state, 59 castes and 47 tribes have been declared to be recognised as scheduled castes and scheduled tribes in the state. The lists are given below :—

Scheduled Castes and Scheduled Tribes in Maharashtra State

I LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari.
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda, Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (in Akola, Amravati, Bhandara, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu, Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha, Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawai Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhui, Birhor.
12. Chodhara (excluding Akola, Amaravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.
17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki Gatta, Gatti Gaita, Gond Gawari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari, Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.
25. Kokna, Kokni, Kukna.
26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thaka., Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

At the time of 1981 census scheduled caste population in Solapur district was 373,083 including 191,587 males and 181,496 females. They constitute 14.29 per cent of the total district population as against 14.21 per cent in 1971. Of the total scheduled castes population in the district 287,330 (77.02%) live in the rural and the remaining 85,753 (22.98%) in the urban areas.

In the state as a whole the largest share of the scheduled caste population lives in Greater Bombay (8.91 per cent to total state scheduled caste population). This is followed by Solapur district (8.33%), 25 villages in the district have no scheduled caste population (Table 7).

TABLE 7

Proportion of scheduled caste population to total population in the villages

Percentage range of scheduled caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. C. Population ..	25	2.26
—5	128	11.59
6—10	205	18.57
11—15	289	26.18
16—20	237	21.47
21—30	173	15.67
31+	47	4.26
All ranges ..	1,104	100.00

Among the remaining 1,079 inhabited villages, the share of scheduled caste population is less than 5 per cent in 128 villages; 6 to 10 per cent in 205 villages; 11 to 15 per cent in 289 villages; 16 to 20 per cent in 237 villages; 21 to 30 per cent in 173 villages and more than 30 per cent in 47 villages in the district.

Table below shows tahsilwise proportion of scheduled caste and scheduled tribe population to the total population in the district for 1971 and 1981.

TABLE 7 (i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of scheduled caste population to total population		Percentage of scheduled tribe population to total population	
	1971	1981	1971	1981
1	2	3	4	5
Solapur District	14.21	14.29	0.38	1.98
Solapur North tahsil. ..	10.57	11.50	0.41	1.76
Barshi tahsil.	14.65	13.31	0.83	1.39
Akkalkot tahsil.	15.06	15.13	0.25	3.35
Solapur South tahsil. ..	16.20	16.13	0.54	5.47
Mohol tahsil.	16.77	15.61	0.29	2.14
Mangalvedhe tahsil. ..	15.86	15.61	0.04	1.81
Pandharpur tahsil. ..	14.44	14.50	0.48	2.52
Sangole tahsil.	12.62	14.71	0.01	0.82
Malshiras tahsil	15.92	17.21	0.20	1.02
Karmala tahsil	15.57	15.17	0.50	1.69
Madha tahsil	15.72	14.68	0.31	1.29

The proportion of scheduled tribes in the population works out to an average of 9.19 per cent for Maharashtra state as a whole. If the districts are considered separately, the proportion ranges from 0.64 per cent in Satara district to 40.53 per cent in Dhule district.

As per 1981 census, the scheduled tribe population in Solapur district stands at 51,577 (26,708 males and 24,869 females) and they comprise 1.98 per cent (as against 0.38 per cent in 1971) population of the district. The proportion of scheduled castes, as also the proportion of scheduled tribe, in the population has increased in 1981 as compared to 1971 in almost all districts. The main reason for this increase is the amendment effected in the notified Scheduled Caste and Scheduled Tribe lists under the Scheduled Castes and Scheduled Tribes orders (Amendment) Act, 1976 (108 of 1976). This Act virtually removed all area restrictions with regard to residence in the specified districts or tahsils, which prevailed previously in the matter of recognising persons as belonging to scheduled castes and scheduled tribes. Most of the castes/tribes included in the lists are now recognised as scheduled castes or scheduled tribes, as the case may be, throughout the state of Maharashtra, and not in particular districts/tahsils, as was the case previously. 72.79 per cent of the scheduled tribe population is rural by residence and 27.21 per cent resides in the urban areas.

Out of 1,104 inhabited villages in the district, 347 villages have no scheduled tribe population (Table 8).

TABLE 8

Proportion of scheduled tribe population to total population in the villages

Percentage range of scheduled tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. T. Population ..	347	31.43
—5	668	60.51
6—15	63	5.71
16—25	14	1.27
26—35	5	0.45
36—50	3	0.27
51+	4	0.36
All ranges ..	1,104	100 00

Among the remaining 757 villages, the proportion of scheduled tribe population to total population is less than 5 per cent in 668 villages; 6 to 15 per cent in 63 villages; 16 to 25 per cent in 14 villages; 26 to 35 per cent in 5 villages; 36 to 50 per cent in 3 villages and above 50 per cent in 4 villages of the district.

In urban areas the scheduled castes and scheduled tribes constitute 11.17 per cent and 1.83 per cent of the total urban population (Table 9).

TABLE 9

Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name and Civic status of the town	Total population	Total scheduled caste population	Total scheduled tribe population	Percentage of scheduled caste population to total population	Percentage of scheduled tribe population to total population
1	2	3	4	5	6
Akkalkot (M. Cl.)	28,371	3,487	660	12.29	2.33
Barshi (M. Cl.)	72,537	9,080	694	12.52	0.96
Dudhani (M. Cl.)	8,300	1,013	274	12.20	3.30
Karmala (M. Ci.)	16,729	2,537	314	15.17	1.88
Kurduvadi (M. Cl.)	19,554	3,842	207	19.65	1.06
Maindargi (M. Cl.)	11,079	1,111	368	10.03	3.32
Mangalvedhe (M. Cl.)	16,802	2,085	144	12.41	0.86
Pandharpur (M. Cl.)	64,380	6,525	3,093	10.14	4.80
Sangole (M. Cl.)	14,854	1,815	112	12.22	0.75
Solapur City (M. Crop)*	514,860	54,258	8,169	10.54	1.59
All towns ..	767,466	85,753	14,035	11.17	1.83

*Includes Solapur O. G. also.

Concentration of scheduled castes is more in the towns of Kurduvadi (19.65%) and Karmala (15.17%) and the scheduled tribes find concentration in the towns of Pandharpur (4.80%), Maindargi (3.32%) and Dudhani (3.30%).

Literacy

In the Indian census a 'literate' was defined as a person who can, with understanding, do both-read and write in any language. For a person to be classified as a literate, it was not necessary that he should have received formal education in any school or institution, or should have passed some minimum educational standard. All children below the age of five years were automatically treated as illiterate and were recorded as such. Thus, the figures of literates do not cover at all the population in the age group 0 to 4 years.

The latest 1981 census revealed that 40.68 per cent of the total population in the district is literate against the state average literacy rate of 47.18 per cent. Among the various districts in the state, Solapur district ranks 18th in terms of literacy rate. The district has maintained the same rank as that of 1971 even though it has gained 6.78 percentage points over to the level of 1971 census.

TABLE 9 (i)

Literacy rate of the district and state 1981

	District			State		
	P	M	F	P	M	F
1	2	3	4	6	6	7
Total	40.68 (33.90)	53.61 (46.40)	26.96 (20.49)	47.18 (39.18)	58.79 (51.04)	34.79 (26.43)
Rural	34.91 (28.16)	48.05 (40.32)	21.03 (15.23)	38.15 (30.63)	51.25 (43.22)	24.88 (17.84)
Urban	54.55 (49.12)	66.85 (62.35)	41.34 (34.66)	63.92 (58.07)	71.80 (66.88)	54.65 (47.33)

Note :—Figures in brackets indicate 1971 literacy rates.

The average literacy rate for Maharashtra state and Solapur district works out as shown above. The corresponding data for 1971 have also been shown within brackets for the sake of comparision.

Maharashtra state as a whole has gained by 8.00 per cent in the literacy rate during the decade 1971–81. Solapur has gained 6.78 per cent during the same period, when total population is considered. Males in the state have gained by 7.75 per cent and the females by 8.36 per cent. whereas in case of Solapur, males gained 7.21 per cent and the females by 6.47 per cent.

It is observed that size of the village and literacy rate are positively co-related (Table 10).

TABLE 10

Literacy rates by population ranges of villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
—200	16	30.21
200—499	116	30.49
500—1,999	688	31.85
2,000—4,999	241	35.37
5,000—9,999	37	39.93
10,000+	6	45.81
All ranges ..	1,104	34.91

Among the various towns in the district Kurduvadi recorded the highest literacy rate of 65.15 per cent in 1981 (Table 11).

TABLE 11

Literacy rates for towns

Name and civic status of the town	Literacy rate
1	2
Akkalkot (M. Cl.)	53.63
Barshi (M. Cl.)	58.94
Dudhani (M. Cl.)	41.07
Karmala (M. Cl.)	61.72
Kurduvadi (M. Cl.)	65.15
Maindargi (M. Cl.)	37.34
Mangalvedhe (M. Cl.)	52.36
Pandharpur (M. Cl.)	62.26
Sangole (M. Cl.)	51.98
Solapur City (M. Corp.)*	53.11
All towns ..	54.55

* Includes Solapur O. G. also.

By contrast the literacy rate was the lowest (37.34%) in Maindargi town.

Within the district the literacy rate is maximum (50.67%) in Solapur North tahsil and the minimum (32.65%) in Mangalvedhe tahsil (Table 12).

During the span of 80 years (1901–81) the literacy rate in the district increased from 4.62 per cent in 1901 to 40.68 per cent in 1981 [Table 11 (i)].

TABLE 11 (i)

Progress of literacy, 1901–81

Year	Total	Males	Females
1901	4.62	8.81	0.37
1911	4.72	8.78	0.51
1921	5.30	9.37	0.98
1931	7.11	12.49	1.35
1941	15.04	23.28	6.27
1951	14.74	23.31	5.69
1961	25.15	36.89	12.60
1971	33.90	46.40	20.49
1981	40.68	53.61	26.96

The progress in literacy was slow till 1931 when hardly 7.11 per cent of the district population was literate. The post 1931 period experienced a comparatively faster growth. Besides other factors, this faster growth in the post 1931 period was in association with the quickening pace of urbanisation. In 1951, one in every seven persons (14.74%) was literate. The ratio narrowed to one in four (25.15 %) in 1961, one in three (33.90 %) in 1971 and one in two and half (40.68 %) in 1981. Thanks to the opening of new schools and adult literacy centres under five year plans in the post independence period.

Literacy rates of two sexes differ sharply, the ratio being nearly 2 :1 during 1981 and 1971 (53.61 % males and 26.96 % females; 46.40 % males and 20.49 % females respectively) and 3 : 1 (36.89 % males and 12.60 % females) in 1961. Sexwise literacy has thus been narrowing although it continues to be wide in itself.

Like male-female differentials there exists disparity in the literacy rates of rural and urban areas. As against 34.91 per cent of literates in rural areas as per 1981 census, there are 54.55 per cent literates in urban areas of the district. Between the two sexes, the differential is larger for females (21.03 % rural, 41.34 % urban) than for the males (48.05 % rural and 66.85 % urban).

Working population

'Work' may be defined as participation in economically productive activity. The participation may be physical or mental in nature, work involves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the workers at the 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961. However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered conceptually, the main workers *plus* the marginal workers of 1981 are almost comparable with the 'workers *plus* non-workers with secondary work' of 1971 and 'workers' of 1961. Further, for 1981 census on the recommendation of planning

commission and Central Statistical Organisation, only four industrial categories cf main workers *i.e.* cultivators, agricultural, labourers, workers engaged in household industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

For main workers, major part of the preceding year (at least 6 months or 183 days) was adopted while those who worked for sometime during the preceding year but not for the major part, have been treated as marginal workers. All those who had not worked at all during the last year, were recorded as non-workers. Persons engaged in household duties, students, dependents, retired persons, rentiers, beggars are some of the categories grouped as non- workers.

1981 census recorded 37.66 per cent of the district population as main workers, 3.92 per cent as marginal workers and the remaining 58.42 per cent as non-workers (Table 12).

TABLE

Literates workers, Non-workers, Scheduled

The corresponding figures for the state as such are 38.71 per cent; 3.85 per cent and 57.44 per cent. Thus nearly two-fifth of the population of the district is engaged in economically productive activity. Compared to 1971, there has been little rise in the work participation rate both in the district (33.69% in 1971 and 37.66 % in 1981) and the state (36.48 % in 1971 and 38.71 % in 1981). Within the district participation rate recorded at 1981 census was the highest (43.13%) in Mohol tahsil and the lowest (32.20 %) in Solapur North tahsil.

Male participation rate (52.51 %) is two and half times than that of female (21.89 %) as per 1981 census. The female participation rate in the district increased from 14.63 per cent in 1971 to 21.89 per cent in 1981 (as compared to 19.70% to 23.98 % in the state). By contrast, there is a marginal increase in the male participation rate in the district (51.47 % in 1971 and 52.51 % in 1981) and also in the state (52.09 % in 1971 and 52.51 % in 1981).

1981 work participation rate is more in the rural (40.80 %) than that of urban (30.12 %). Between the two sexes the differential is larger among the females (25.48 % rural and 13.21 % urban) than the males (55.30 % rural and 45.87 % urban).

1981 census results revealed that among the main workers in the district, 34.46 per cent are cultivators, 29.54 per cent agricultural labourers, 3.08 per cent engaged in household industry and 32.92 per cent engaged in other services. The corresponding percentages for the state are 35.12 per cent 26.63 per cent, 2.55 per cent and 35.70 per cent. Evidently, two-third of the workers in the district are directly engaged in agriculture as cultivators or agricultural labourers. Male participation as cultivators (37.87 %) and agricultural labourers (21.08 %) in the district is higher than that of the state (33.69 % and 18.51 % respectively). Whereas the position is reverse in case of female participation in the district as cultivators. But female participation as agricultural labourers is more in the district (51.07 %) than that of the state (45.61 %).

In Solapur (3.92 %) of the population was recorded as marginal workers of (0.90 % among the males and 7.13 % among females). The high incidence of marginal workers among females as compared to males is understandable as the former besides, looking after their household duties tend to engage themselves in some economically productive activity to lend support to their male counterparts.

Availability of Amenities–Education

Educational amenity is available in 1,093 villages out of 1,104 inhabited villages in the district. In terms of percentage 99.00 per cent of villages are having schooling facility and these villages contain 99.71 per cent of the rural population of the district. (Table 13 and 14)

	Total of all tahsils ..	1,842,678	1,837,344 (99.71)	829,286 (45.00)	1,842,678 (100.00)	1,292,132 (70.12)	553,338 (30.03)	1,390,712 (75.47)	852,140 (46.24)	1,609,441 (87.34)

The situation regarding schools in the villages is still better in five out of eleven tahsils namely; Solapur North (100.00); Sangole (100.00); Malshiras (100.00); Karmala (100.00); and Madha (100.00); where all the villages are having schooling facility. On the contrary, Solapur south tahsil with 96.55 per cent of its villages having educational amenity and serving 98.94 per cent of its population, is at the bottom. Of the 11 villages devoid of educational amenity, 6 are in the population range of less than 500; and remaining 5 in the size class 500–1,999 (Table 15).

TABLE 15

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply

I Solapur City (M. Corp.)	3.66	0.70	0.67	5.54
All towns ..	2.92	0.91	0.86	4.99

On an average, the population to institution ratio in urban areas in the district is : 10,000 : 2.92 Higher secondary /Int/PUC/Junior Colleges ; 10,000 : 0.91 Secondary/Matriculation schools; 10,000 : 0.86 Junior secondary/Middle school and 10,000 : 4.99 Primary schools.

Medical

Medical institution of any type (specified in the village directory) exist only in one out of every five (23.28 %) villages in the district and these villages in themselves contain 45.00 per cent of the rural population of the district. This of course, is not a happy situation. As is true with other rural areas of Maharashtra state, more so in the country as such, unwillingness on the part of medical personnel to work in the rural sector is one of the main causes. However, the establishment of primary health centres, opening of rural dispensaries and cottage hospitals are bound to steadily change the complexion in the years to come.

Within the district, the position is best in Solapur North tahsil where 65.31 per cent of the villages are equipped with some kind of medical facility (Table 13) and 84.43 per cent of its population gets the benefit (Table 14). On the other hand, in Karmala tahsil, just 12.71 per cent of villages covering 25.63 per cent of its population enjoy the facility in the villages itself. Even Mohol tahsil, which is adjoining to the Solapur North, the medical facility is available only in 15.53 per cent of its villages, covering 35.69 per cent of population.

Among the 847 villages which do not have any medical facility, the same is available at a distance of up to 5 kms. for 213 villages, at a distance of 5 to 10 kms. in respect of 390 villages, and beyond 10 kms. for the remaining 244 villages in the district (Table 16). It is also observed that 42 big sized villages (5,000+) are equipped with some kind of medical facility within the villages, except 1, while barely 7 villages are in the population range below 500 (Table 15).

Table 19 gives the number of beds per 1,000 of population in the towns.

TABLE 19

No. of beds in medical institutions in towns

Class, name and civic status of the town	No. of beds in medical institutions per 1,000 population
1	2
III Akkalkot (M. Cl.)	1.80

IV Maindargi (M. Cl.)	0.36
IV Mangalvedhe (M. Cl.)	0.36
II Pandharpur (M. Cl.)	4.60
IV Sangole (M. Cl.)	1.89
I Solapur City (M. Corp.) ..	27.434 3.15
All towns	3.28

On an average there are 3.28 beds per thousand of population in the urban areas of the district.

Drinking Water

Drinking water facility is available in all the 1,104 inhabited villages of the district (Table 13).

Post and Telegraph

Nearly one-half (45.47 %) of the inhabited villages in the district have post and telegraph facility and these villages have 70.12 per cent of the rural population of the district. Within the district, Solapur North tahsil having 71.43 per cent of villages with post and telegraph facility and serving more than four-fifth (83.83 %) of its population enjoys the place of pride. The position is, however, not good in Mangalvedhe tahsil.

602 villages in the district do not have this facility. Among them it is available within a distance of 5 kms. for 335 villages; at a distance of 5–10 kms. for 200 villages and beyond 10 kms. for the remaining 67 villages in the district. Among the 502 villages 9 villages in the size class less than 500; 231 villages in the size class 500–1,999; 219 villages in the size class 2,000–4,999 and remaining 43 villages in the size class 5,000+ have the availability of post and telegraph facility within their respective villages.

Market/Hat

Market/hat is held only in 172 villages in the district and these villages account for 30.03 per cent of the districts rural population. It is also observed that in three tahsils namely; Solapur North, Solapur South and Mohol, in very few places, market/hat is held.

Among the 932 villages where market/hat is not held, the same is available at a distance of upto 5 kms. for 243 villages; 5–10 kms. for 414 villages and beyond 10 kms. in respect of 275 villages in the district. Of the 172 villages where market/hat are held, 8 are in population range of less than 500, 61 in population range of 500–1,999, 73 in the population range of 2,000–4,999 and 30 in the population range of 5,000+.

Communications

665 villages in the district have the availability of bus stop/railway station/water way within the village and they serve about three-fourths (75.47%) of the rural population of the district. Among the 439 villages, where this facility is not available it is available within a distance of 5 kms. in respect of 232 villages, at a distance of 5–10 kms. in respect of 149 villages and beyond 10 kms. for the remaining 58 villages. Among the 665 villages 59 villages with this amenity are in the population range of below 500, 360 villages in the population range of 500–1,999 and 203 villages in the population range of 2,000–4,999 and the remaining 43 villages are in the population range of 5,000+.

Approach by Pucca Road

336 (30.43 %) villages in the district are approachable by pucca road and they serve 46.24 per cent of the rural population of the district. The position is rather poor in Mangalvedhe tahsil where only 13.92 per cent of the villages are linked with pucca road. Among the 336 villages linked with pucca road 24 villages are in the population range below 500, 160 villages in the population range of 500-1,999; 116 villages in the population range of 2,000-4,999 and 36 villages are in the population range of 5,000+.

Power Supply

The rural electrification programme assigned importance from the third five year plan and this has resulted in accelerating the supply of power in the rural areas. 842 villages in the district now get the power supply. It is also observed that in Pandharpur tahsil 92.47 per cent of the villages get power supply. In Karmala tahsil only one half of the villages have this facility. Among the 842 villages with availability of power supply, 74 are in the population range of below 500, 492 in the population range of 500-1,999; 233 in the population range of 2,000-4,999 and 43 in the population range of 5,000+and their proportion to total villages under respective categories is 56.06, 71.51, 96.68 and 100.00 per cent.

Villages which do not have any amenity (except for drinking water) are 5 in number (Appendix III). Tahsilwise break-up of these villages is; Barshi (3), Mohol (1) and Pandharpur (1). The non-availability of any kind of amenity (except for drinking water) in 5 villages, 11 villages without any school, 847 villages devoid of medical facility, 602 villages not having postal facility, no market/hat in 932 villages, 439 villages without the facility of bus stop/railway station/water ways, 768 villages not approachable through pucca road and 262 villages not having power supply, is certainly not a happy situation. A positive relationship between the size of village and amenity provided is observed.

Land Utilisation

Columns 15 to 19 of the village directory give land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

The district has a very limited area of forest, mostly arid and scrub forest patches in Barshi and Malshiras tahsils. In the past the forests were fairly dense on the hills and lower down in the plains with good growth of *babul* and *neem*. At present, however, most of these forest have disappeared. What remains today are poor, stunted and mal formed trees and shrubs in scattered patches.

Irrigated, Un-irrigated and Culturable Waste Areas

Data pertaining to irrigated area (by source), un-irrigated area and culturable waste is given under columns 16, 17 and 18 respectively of the village directory. Within the district Akkalkot is the tahsil where 92.99 per cent of the area is cultivated. Other tahsils where proportion of cultivated area exceeds the district average (87.90%) include Barshi (91.14%), Solapur South (91.77%) Mangalvedhe (89.34 %), Sangole (88.00 %) and Madha (91.37 %). In the remaining tahsils proportion of cultivated area is less than the district average *i. e.* Solapur North (73.98 %), Mohol (87.31 %) Pandharpur (85.26 %), Malshiras (84.35%) and Karmala (84.57 %.) (Table 20).

TABLE 20

Distribution of villages according to land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivabie area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Solapur North	49	69,416.35	73.98	9.00
2	Barshi	142	181,138.78	91.14	5.17
3	Akkalkot	126	144,031.00	92.99	4.15
4	Solapur South	87	118,972.50	91.77	3.92
5	Mohol	103	132,605.00	87.31	8.20
6	Mangalvedhe	79	112,808.20	89.34	7.32
7	Pandharpur	93	128,092.00	85.26	16.52
8	Sangole	87	152,697.00	88.00	12.89
9	Malshiras	104	159,801.48	84.35	23.27
10	Karmala	118	167,611.02	84.57	3.40
11	Madha	116	158,161.80	91.37	10.54
	Total of all tahsils ..	1,104	1,525,335.13	87.90	9.45

Merely 9.45 per cent of the cultivated area is irrigated. Malshiras and Pandharpur are the only exceptions having fair proportion (23.27 %) and (16.52 %) respectively.

Staple Food

Generally speaking the crop pattern in the district is inferior to the average for the state. Amongst the food crops in the district, jowar and wheat are the most important. Throughout the district wheat and jowar is the main staple food of majority of the population : (Table 21).

TABLE 21

Main staple food in the majority of villages in each tahsil

Serial No.	Name of tahsil	Main staple food	Serial No.	Name of tahsil	Main staple food
1	2	3	1	2	3
1	Solapur North	.. Wheat, Jowar	7	Pandharpur	.. Wheat, Jowar

IV Mangalvedhe (M. Cl.)	103.92	24.82	79.10	61.18	10.24	8.15	9.52	..	33.27
II Pandharpur (M. Cl.)	187.56	47.10	140.46	186.67	12.75	53.01	..	30.96	89.95
IV Sangole (M. Cl.) ..	64.36	36.42	27.94	48.54	2.49	18.38	15.89	0.54	11.24
I Solapur City (M. Corp.)	152.33	75.09	77.24	132.11	7.48	19.86	89.45	0.21	15.11
Total	138.99	62.51	76.48	123.27	8.72	22.98	62.63	6.02	22.92

On an average, the per capita receipt is Rs. 138.99 out of which 62.51 is received through local taxes and the remaining Rs. 76.48 from all other sources. The total expenditure incurred per head is Rs. 123.27 of which Rs. 8.72 is on general administration, Rs. 22.98 on public health and conveniences, Rs. 62.63 on public works, Rs. 6.02 on public institutions and Rs. 22.92 on all other aspects. Among all the towns, both the receipts received and the expenditure incurred per head are highest in Pandharpur town.

Minerals

There are no minerals of economic importance. However, minerals like building stone, sand and clay are found in sufficient quantity all over the district. Clay which is useful for manufacture of bricks, is also found in the river beds and along the banks of rivers respectively.

Fisheries

Fishing activities in the district are naturally restricted to inland waters only. The river Bhima along with its feeders, the Neera, the Man, the Sina and the Bhogawati are the sources of fishing. There are also irrigation projects and tanks which offer a good scope for development of fisheries.

The commercially important varieties of fish found in the district are *Kirkit* and Shinghala, Murral, Shivala, Chamar or Chalat, Pal or Dandaonya, Zinga, Muri etc. Since, these varieties are of not fast growing type, quick growing, "Bengal Carps" are stocked, annually in the perennial water banks or propagation of pisci-culture. About 4,000 persons are engaged on the fishing activity in the district. There are 16 fisheries co-operative societies in the district.

Industries

Solapur is an important centre of cotton textile industry ever since the third quarter of the nineteenth century, and the district ranks fourth as regards industrialisation in the state. At present there are eight cotton textile mills, and a number of factories manufacturing bed-covers. The Jacquard *Chaddars* (bed-covers) manufactured at Solapur are very famous all over Maharashtra. Besides the modern textile mills, Solapur is a congenial home of the handlooms wearing industry which provides employment to a considerable number of workers.

Besides the cotton textile industry, the sugar industry has also found a congenial home in parts of the district. As a matter of fact the sugar industry occupies a very important position in the industrial land scape as also the general economy of the district. The sugar factories are concentrated

in the areas of Akluj, Malshiras, Malinagar, Chitalenagar and Akkalkot.

Bidi manufacturing and ready-made garments are also important industries in the district.

The important cottage industries in the district are hand-loom, weaving, tanning, leather working, fibre working, bamboo working, oil-pressing, carpentary, smithy, dyeing and printing, silk processing, pottery, brick making and lime burning, *'bidi'* making, metal working, soap-making and miscellanous industries like *'kun-ku'* making *'agarbatti'* making, and cap manufacturing.

Trade and Commerce

The chief articles of export in the district are Solapur *Chaddars* (bedsheets), ground nut, jowar, betal leaves, sweet oil, food grains, grocery, raw cotton etc. (Table 23)

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
III Akkalkot (M. Cl.)	Stationery	.. Groundnut	.. Grocery
II Barshi (M. Cl.)	Turdal	.. Jowar	.. Wheat

IV Karmala (M. Cl.)	Sweet oil	.. Sweet oil	.. Jowar
IV Kurduvadi (M. Cl.)	Sweet oil	.. Grocery	.. Cloth
IV Maindargi (M. Cl.)	Sarees	.. Groundnut	.. Jowar
IV Mangalvedhe (M. Cl.)	Cotton bales	.. Jowar	.. Wheat
II Pandharpur (M. Cl.)	Agarbatti	.. Jowar	.. Cloth and Engine materials
IV Sangole (M. Cl.)	Sweet oil	.. Raw cotton	.. Jowar
I Solapur City (M. Corp.)	Solapur chaddars	.. Solapur chaddars	.. Cotton yarn

The other items of exports are sugar, gur, pulses, grapes and cotton textiles, both handloom and mill made. Most of the export are sent to Bombay Pune, Tamil Nadu and Andhra Pradesh. Jeoquard *Chhaddars* produced at Solapur have market not only in the country but also outside. The important commodities of import at present comprise salt, wheat, coconuts, bettlenuts, cloth, copper and other metal vessels, glassware etc. The other important imported commodities are hardware, building material, provision articles, stationary and cutlery, medicines, electrical goods and appliances, machinery, footware, watches and a number of other consumer articles. These imports are from the important places such as Bombay, Ahmedabad, Madras, Malegaon, Pune and Culcutta.

Table 24 indicates the proportion of slum population to total population in towns and density of slum per km².

Places of Tourist's Importance

Akkalkot is considered to be an important centre of Datta Sect. The 'Vata Vriksh temple' of Shri Swami Samarth Maharaj of Akkalkot, popularly known as Akkalkot Swami Math is an important religious place where many devotees visit Phandharpur, the city of Pandhari Vithoba is one of the most frequented place of pilgrimage not only in the state of Maharashtra but also in the whole of India, and ranks first amongst the fairs in the state with an aggregate congregation of four to five lakhs on *Ashadhi* and *Kartiki* Ekadashi., Solapur being a historical place and a place with religious, industrial and commercial importance, there are number of objects of interest in the city, *viz.* Ground fort, Siddheshwar Temple, Mallikarjuna temple, Parasnath Temple, Adinath Temple, Shubharai Math, Indrabhuvan, Masjids, Churches and Agyari. Vairag village in Barshi tahsil, situated at a distance of 14 miles to the south east of Barshi and 30 miles to the north of Solapur, is a meeting place of saints of Nath Sect who have renunciated wordly life for meditation. Because of this particular aspect, the village seems to have been named as "Vairag". The fair is held at Saint Nath Temple of Vairag in honour of Saint Nath for a period of six days from *Shravana Shud* 11 (*Ekadashi*) to *Vad.* 1 (pratipada.) About 20 to 25 thousand people attend the fair on the full moon day which is the main day of the fair.

PART A--VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Villages' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "uninhabitated" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 *i. e.* the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (*i*) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (*ii*) Land utilisation data for census towns ;

Appendix (*iii*) Tahsilwise list of villages with no amenities available ; and

Appendix (*iv*) Tahsilwise list of villages according to proporation of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (iii) and (iv) added in 1981 are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :-

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however the area figures are in Km^2.

Column 4 which gives population and the number of house holds in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in board ranges viz., upto 5 km 5—10 km and 10+ km to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/ pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.)

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i.e.* secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed

abbreviation. Following abbreviations have been used for presenting data on educational amenities :

Primary or Secondary school	P
Junior Secondary or Middle School	M
Matriculation or Secondary School	H
Higher Secondary/Intermediate/ Pre-University/Junior College(PUC)	PUC
College, any College (graduate level and above) like Arts, Science, Commerce etc.	C
Industrial School	I
Training School	Tr
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in board ranges (upto 5 kms., 5—10 kms. and above 10 kms. of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railyway Station	RS
Navigable Water-way (including river, canal and back water etc.)	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Waterway (other than river or canal)	NW
Foot path	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various source of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for all purpose listed above	EA

In case the power supply is realeased only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation
   (*a*) lands put to non-agricultural uses—
   (*b*) barren and unculturable land.

(3) Other uncultivated lands exculding fallow land—

   (*a*) permanent pastures and other grazing lands.
   (*b*) lands under miscellaneous tree crops and grooves not included in the net area sown.
   (*c*) culturable wastes.

(4) Fallow lands—
   (*a*) fallow lands other than current fallows.
   (*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included the appropriate heading of cultivated or uncultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e. g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

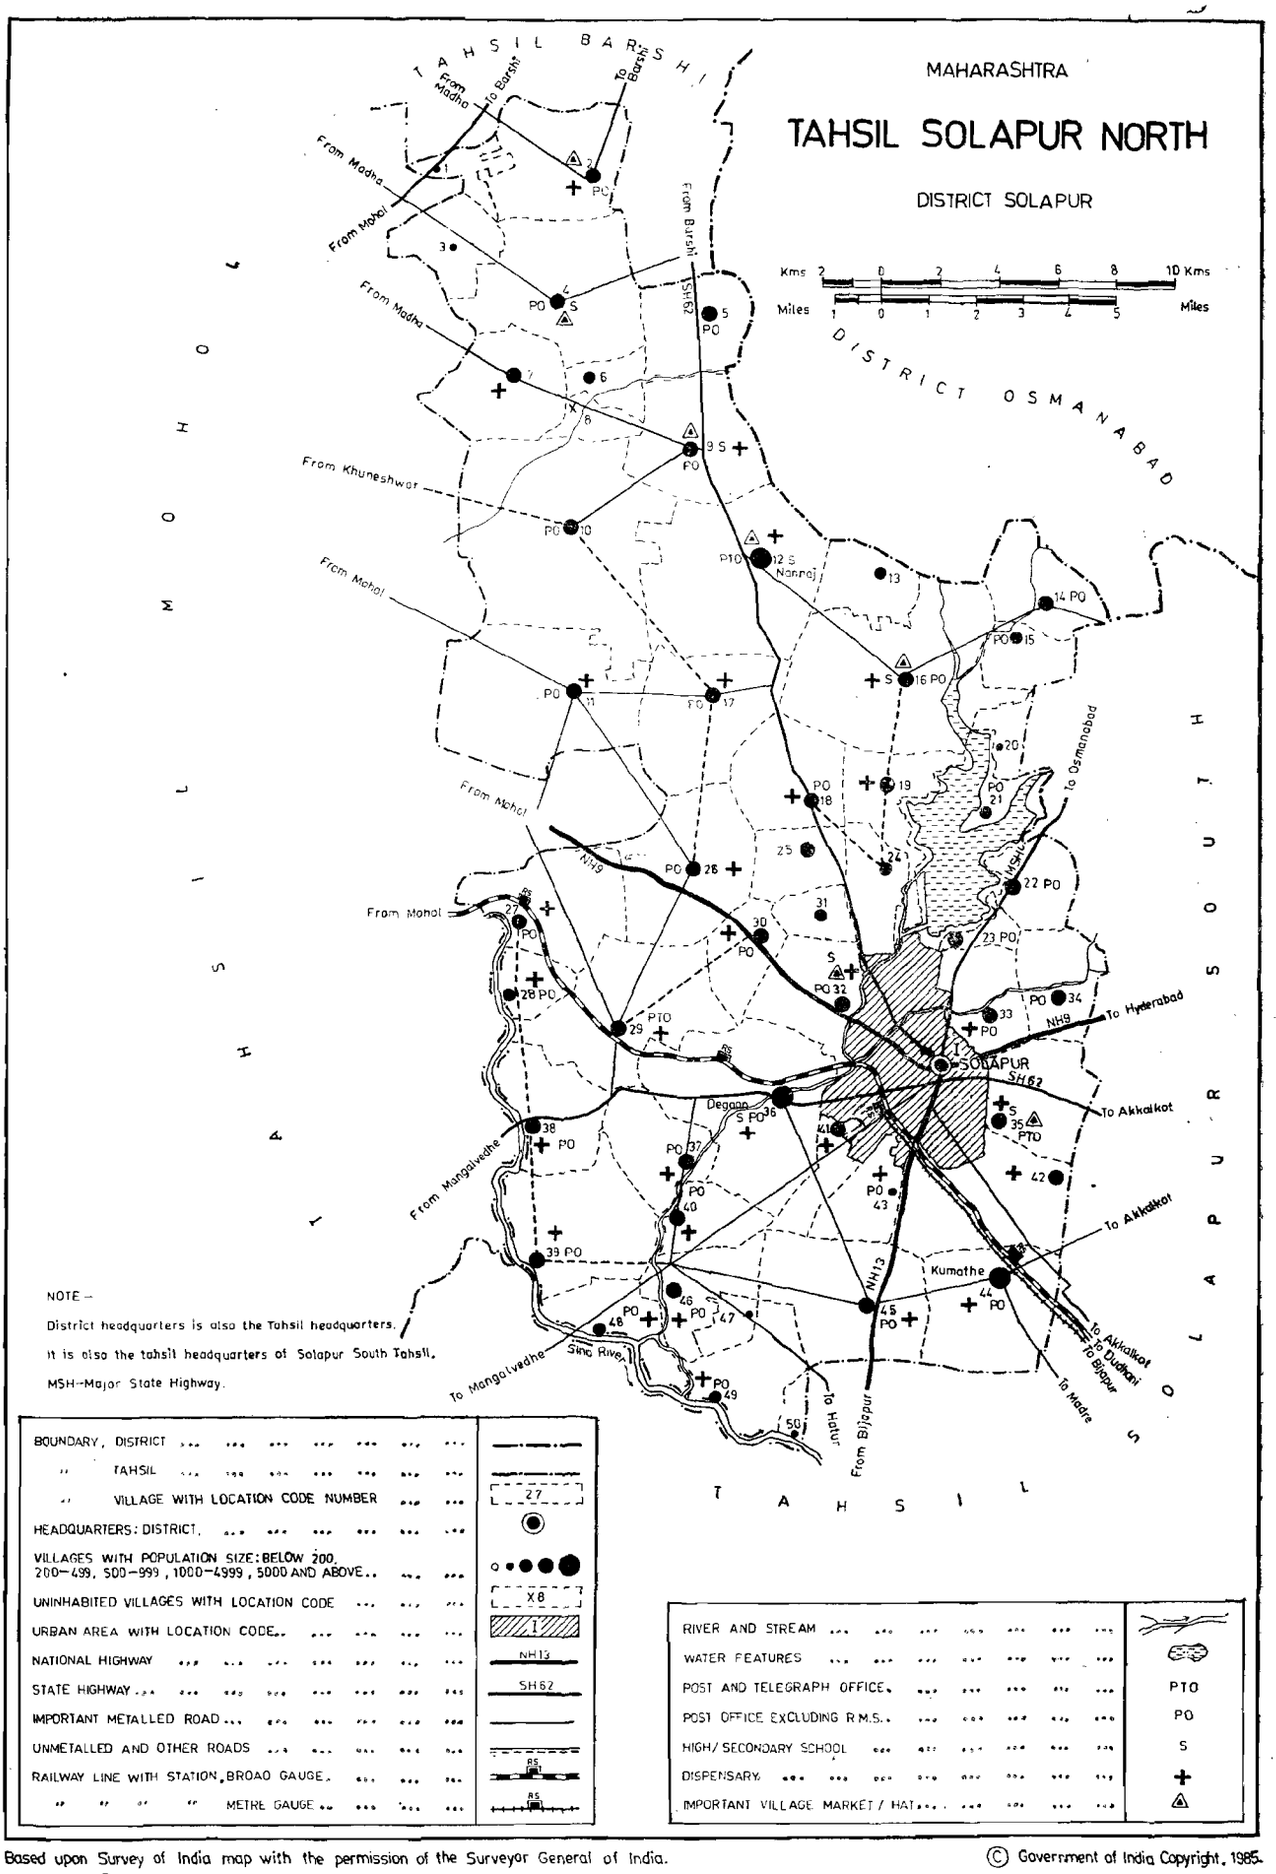

Government Canal	GC
Private Canal	PC
Well (without Electricity) ..	W
Well (with Electricity)	WE
Tube Well (without Electricity) ..	TW
Tube Well (with Electricity) ..	TWE
Tank	TK
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other grooves for fuels etc., which are not included under orchards or forests are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands includes mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very highcost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooteers available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note Explaining The Abbreviations Used In Town Directory

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry, and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town. :—

Municipal Corporation/Corporation ..	M. Corp.
Municipality	M.
Municipal Council	M. Cl.
Non-Municipal	N.M.
Cantonment Board/Cantonment ..	C.B.
Notified Area/Notified Area Committee/ Notified Committee	N.A.C.
Census Town	C.T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in km^2, number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil headquarters and the nearest city (Urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town, Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil. Codes used are :—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt
Head Loads	HL
Baskets	B
Wheel Barrows	WB
Septic Tank Latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used :—

Overhead Tank	OHT
Service Reservoir	SR
River Infiltration Gallery ..	IG
Borewell pumping system ..	BWP
Pressure Tank	PT
Tubewell water/Hand pump ..	TW
Tap Water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting point etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (*i. e.* class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre ..	FC
T. B. clinic	TB
Nursing Home	NH
Ayurvedic	A
Unani	U
Homoeopathic	Hom
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only ..	AC
Combined for all categories—Arts, Science and Commerce	ASC
Law	L

Column 10 pertains to the number of recognised shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music/dancing institute, nursing school, etc. Various codes used for indicating this data are :—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting ..	Sh. Type
Others	O

Keeping in view the 'Minimum Needs Programme' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Status and Growth History

Serial No.	Class, name and civic administration status of Town	Location Code No.	Name of Tahsil	Area (in km.²)	Number of households including Houseless households (in 1981 Census)	Population and growth rate of the town at the censuses of									Density (1981 Census)	Sex Ratio

Note :—(1) The Source for the total area of figures in respect of the districts to the Surveyor General of India, while that for the total area figures in respect of the tahsils is the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not, therefore, strictly add up to the corresponding figures shown against the district.
