STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapid'y as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the *sunrise of 1st March, 1961, unless otherwise* stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers ...	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services ..	Divisions 5, 8 & 9

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:
Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38, and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately descirbed:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(**Code Structure**)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)
75 Occupational Groups (two-digit code numbers)
11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X3 Librarians, Archivists and Related Workers
- 0X4 Geographers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.

1 *Administrative, Executive and Managerial Workers*:

10 Administrators and Executive Officials, Government:—
- **100** Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations:*

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified:*

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers: Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

9 *Service, Sports and Recreation Workers.*

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

By
G. N. Tiwari
Deputy Superintendent of Census Operations, Madhya Pradesh

Sidhi district lies between longitudes 81°28′ and 82°49′ east and latitudes 23°47′ and 24°42′ north in the north-east corner of Rewa division. It is bounded by Mirzapur district of Uttar Pradesh in the north-west and east, by Surguja district in the south, by Rewa district in the north, by Amarpatan tahsil of Satna district in the north-east and by Shahdol district in the west. The district takes its name from the district headquarters town Sidhi. In shape, the district may be compared to an irregular quadrilateral broadest in the east and gradually tapering towards the west.

Containing 2.36% of the State's area within its 4,012 square miles of territory, Sidhi district is the fourteenth biggest district in size in the State. Bastar, the biggest district in the State is more than $3\frac{3}{4}$ times as big. On the other hand, Sidhi itself is more than five times as big as Datia, the smallest district in the State. These comparisons bring out the extreme unevenness that prevails in area distribution among districts of the State, though it may be mentioned that Sidhi very nearly approaches the average size of a district in the State. As regards populousness, Sidhi descends by fourteen places, ranking twenty-eighth in the State in descending order. In terms of the most populous and the least populous districts in the State, it may be mentioned that Bilaspur-the most populous district in the State—is about $3\frac{1}{2}$ times as populous as Sidhi district, while, in its turn Sidhi district has about three times as many inhabitants as Datia, the least populated district in the State. The districts of Shivpuri, East Nimar, Sagar and Jabalpur have closely comparing (within +5%) areas with Sidhi district, while in respect of populousness such comparability extends to Shivpuri, Guna, Chhatarpur and Betul districts. Shivpuri thus compares with Sidhi both in size and population.

In pre-independence days, greater portion of the district was included in the Bardi tahsil of erstwhile Rewa state. Between 1911 and 1921, a new tahsil Gopadbanas was formed of 319 villages from Bardi, 195 villages from Beohari and 190 villages from Huzur tahsil. Now the district is divided into three tahsils, Gopadbanas occupying almost the western half of the district and Deosar (in the north) and Singrauli (in the south) the eastern half. Administrative pattern in general now is the same as is found in other districts of the State and does not merit a detailed and separate mention.

With the addition of Chitrangi block in Deosar tahsil on 2nd October, 1962 the district is now fully covered by seven community development blocks. First to come was Deosar development block in October, 1953, which was followed by Siawal block in Gopadbanas tahsil after the lull of $2\frac{1}{2}$ years. Waidhan block in Singrauli tahsil came a year later but it took two years thereafter for the headquarters tahsil to have the Sidhi block. Thereafter, the district got a block every year; Majholi in Gopadbanas tahsil in April, 1960, Rampur in the same tahsil in October, 1961, and Chitrangi block in 1962 as already stated. Thus of the seven development blocks four are in Gopadbanas, two in Deosar and only one in Singrauli tahsil.

Physical aspects :—

Except for a small portion of Deosar tahsil in the north-east, the district almost entirely lies

to the south of the southern scarp of the Kymore. The latter makes the boundary of the part of the district falling within Gopadbanas tahsil with Rewa district. Flowing in the north of the district, almost parallel to the scarp of the Kaimur is river Son, between which and the Kaimur scarp is a narrow, but fertile strip of land cut up by ravines at a few places. This strip, with irrigation would be extremely valuable but unfortunately there is but little hope of getting irrigation in to the tractas the Kaimurs on the south drop sheer into the Son valley. Rampur, Chorhat, Ghoghrad and Sihawal are some important villages in the valley. A line of low hills passes through this strip, starting near village Rampur and marching along the Rewa—Sidhi road on the north of Son, disappearing beyond village Chorhat.

South of the Son, hills and jungles predominate. The hills generally run in parallel ranges, with a west to east strike and send out numerous spurs. The hills and their spurs are very numerous in the Deosar tahsil. The hills, however, enclose some open plains of considerable size. One such open plain is to the south of the fair-weather road joining Sidhi with Beohari, around village Pathrora. The valley of the river Gopat and its affluent Sehra rivulet is another such open plain. The extreme south-eastern portion of the district, watered by the Rihand and its affluents the Mear, and the Kichan is also an open country of considerable expanse. Waidhan, the headquarters of Singrauli tahsil lies in this plain. As indicated by the course of the rivers, slope of the country is generally towards the north, while in the north itself it is towards the east.

Rivers:—

The district is wholly drained into the Bay of Bengal by its rivers Son, Gopat, Banas, Rihand and their numerous tributaries, which belong to the Ganga-system. Son flows in the north of the district, almost parallel to the Kaimur ridge. Banas, which makes the western boundary of the district and Gopat-banas tahsil, rises in the hills of Bharatpur tahsil in Surguja district. In the initial stages the river makes the boundary between Surguja and Shahdol district. After leaving Surguja district, the river marches along the boundary of Shahdol and Sidhi districts, flowing in an open country for about 15 miles. After crossing village Bara Duberi, it enters into a broken country of low hills, which again broadens out into a plain near village Chonradol and then near Ratwar. It joins Son near village Dembha. The Gopat river also rises in the Surguja district from the hills in the north-west of Surajpur tahsil. In the initial stages it flows almost due west, but turns north after being joined by the Lodhar river from the west. When it reaches the boundary of Surguja district, it again turns west and marches for some distance along the boundary of Singrauli tahsil of Sidhi district and Surguja district. At the point it leaves the boundary of Surguja district, the river turns to the north and marches first along the boundary of Gopat-banas and Singrauli tahsils, and then, after taking a turn to the west (with a northerly inclination) along the Gopadbanas and Deosar tahsils. After being joined by the Sehra stream in Gopadbanas tahsil the river takes a sweep to the north-east and maintains that direction till it meets the Son near village Bardi. Part of the river's course in Gopadbanas and Deosar tahsils is ravenous. One of its main tributaries is Mohan river. This rises in the north-west of Singrauli tahsil, flows past the village Jiyawan or Deosar the tahsil headquarters, where it opens out in a small plain, and joins the Gopat.

The Rihand flows through the big open plain in the south-eastern part of the district and the Singrauli tahsil. Waidhan or Singrauli the tahsil headquarters village is in the plain. The Kachan and the Mear are affluents of some size of the Rihand in Singrauli tahsil, both draining the open country referred to earlier. Before joining the Rihand, the two rivers unite, a few miles to the south-west of Singrauli.

History :

Early history of the district is a matter of guess, though it may safely be presumed that the district must have nominally been included in the dominions of the imperial Mauryas and Guptas, the actual sway being in the hands of forest tribes. Before the settlement of the Chandels, probably in the 15th century, much of the terri-

tories now included in the district were under Bhar and Balanda Chiefs[1] . Ruins of their fortresses are still found in several places. The following notice of the history of the district after its occupation by Chandels is taken from the Rewa State Gazetteer[2].

"The Chandella Chief Parmardideva (Parmal) (1167-1213) of Mahoba had five sons. One of them Ranjit Dev in Samvat 1313 (A.D. 1256) establishsd himself at Agori (Mirzapur district). The second son Asajit Singh became the Raja of Kabar. The third Sobhajit Singh remained in Mahoba, while Bramha Dev and Brahmajit were killed. Hariharshah, 20th in descent from Ranjit Dev, the Raja of Agori, had two sons, of whom the elder succeeded to Agori while the younger Rudrashah, received the *Ilaka of Bijaura* (Bardi tahsil) as his share. Rudrashah removed to the village Garhwa in the *Bijaura Ilaka*, where his descendents remained for two generations. In the 18th century (24th generation) Raja Mayurshah removed from Garhwa to Bardi, at the junction of the Son and Gopad rivers. Bodhrai, the younger brother of Rao Ratan, 40th in descent from Ranjit Dev, received as his share the village of Bhopari, 6 miles to the west of Sihawal where he built a stone fort..... The Rajas of Bardi made over the *Ilaka oj Singrauli* to Maharaja Jaisingh in lieu of tribute, and later Ajit Singh, the Chandel Raja of Bardi, being constantly harassed by his clansmen came to Rewah with his Rani Jagat Kunwari and formally made over his estate to Maharaja (Then Babu Sahib) Visvanath Singh in 1819, retaining for himself only as much as was sufficient for his own and Rani's maintenance.

The *Singrauli ilaka* was formerly held by Zamindars of the Khairwar tribe from whom it passed to the Venuvanshis, a ruling family of Jhunsi.

Perhaps the Khairwar rulers of Singrauli tract were subordinate to the chiefs of Bardi."

Rainfall :

Sidhi district may be said to fall in the medium rainfall area. It receives rainfall from the precipitation of south-west monsoon, which reaches the district sometime towards the third or fourth week of June. Rainfall is recorded at the three tahsil headquarters. Monthwise rainfall for the ten years separately for each of these stations is given in Table 1.1 in part II of the Hand Book. In case of Singrauli station, figures of rainfall for the years 1958 and 1959 are not reported; while those for the month of July have not been reported for any of the three stations for 1957. It appears from these figures that the highest rainfall of 1132.4 m m. or 44 5" (1180.5 m.m. or 46.5" if we exclude year 1957 when figures for July were not reported) is received at Sidhi, while the lowest rainfall of 912.3 m.m. or 36" (974..8 m.m. or 38.3" if we exclude year 1957 from computation of the average) is received at Deosar. The average rainfall at Singrauli station is intermediate being 986.1 m.m. or 38.8"[3] (1069.7 m.m. or 42.1" if we exclude year 1957). The average of these three stations, which may be called the district average is 1,011.9 m.m. or 39 9" (1,075.4 m.m. or 42.3" if year1957 is omitted from computation of average). The rainfall is not distributed uniformly over the four rainy months, the heaviest downpour being received in the months of July and August. The intensity of the downpour as well as the frequency of rainy days starts decreasing in the month of September and by the first week of October rains almost completely cease.

Climate :

There was perhaps no observatory in the district prior to August 1958, which is the month when temperature records for the district became available for the first time. The temperature record to the extent of its availability (i.e. from August 1958 to December 1960) is printed as Table 1.2 in part II of the Handbook. Sidhi district seems to experience extreme climate, the range of variation of mean minimum and mean-maximum

1 Rewa State Gazeteer (1907), page 80.

2 Ibid

3 Based on eight years 1951 to 1957 and 1960.

temperature for the period for which temperature records are available being 34.9°.c (or 62. 8° F).

January and December are the coldest months of the year. From the month of January, the temperature starts rising steadiy till the highest levels of day temperature are touched in the month of May. The mean maximum temperature in May was 41.9°c (107.7° F) in 1960 and 42. 5°c (108.5°.F) in 1959. Highest temperature of 46.6° c (115. 9°F) was reached in May, 1959. While the days are on on average warmer in May, the nights appear to be warmer in June than in May, the mean-minimum temperature being highest in the month of June. It was 28.4° c (83.1° F) in 1959 and 28. 5° c in 1960. The mean day and night temperatures start declining in value respectively from the months of May and June. The downward trend of the day temperature is interrupted in September and October, which have warmer days on an average than August. The night temperature continues to decrease almost uninterrupted resulting in the curious but well-known phenomenon of warm days but pleasant nights of October. The explanation is that whereas the August temperature is kept under control by rains, no such moderating influence on temperature is at work in October, the prevailing humidity in the atmosphere in that month making the heat somewhat oppressive. After this brief interruption, the day temperatures also start decreasing till they touch the lowest level in December and January. The mean-minimum temperature varied between 6.9°c in December, 1959 to 7.2° c in 1960 and from 8.2° c in January 1960 to 9° 1° c in December 1959. The mean-maximum temperature has on the other hand higher values in December than in January. The mercury touched the lowest level of 1.8° c (35.2° F) in January 1959.

Distribution of area and population.

The distribution of the district's area and population among the tahsils is presented in the table below :

Percentage Distribution of Area and Population 1961.

District/Tahsil.	Area	Rank in area.	Population	Rank in Population
1	2	3	4	5
Sidhi District	100	..	100	..
1. Gopad Banas tahsil	45.3	1	57.4	1
2. Deosar tahsil	36.1	2	24 4	2
3. Singrauli tahsil	18.6	3	18.2	3

The table at once brings out the very uneven distribution of area and population among the tahsils, which is hardly conducive to administrative convenience. More than 45%of area, and a little less than three-fifth of population is concentrated in Gopadbanas tahsil which contains the district headquarters town of Sidhi. Deosar, the second biggest tahsil accounts for more than one-third of the district's area, and a little less than a fourth of its population. Singrauli the smallest and least populated tahsil contains almost equal proportions of the area and population of the district. The areas of Singrauli, Deosar, and Gopadbanas tahsils are roughly in the proportions 2 : 4 :5; while their populations are in the proportion 3: 4 : 9. All the tahsils have identical ranks in respect of population and area. The district ranks 14th in area in the State, while its population rank is 28th.

Figures in the table above give only a broad indication of the relative populousness of each tahsil; for a clearer picture, we must consider the population density index i.e. number of persons per square mile in each tahsil. This is done in the following table which also gives changes in population density since 1951. The density figures both for 1961 and 1951 are calculated on the 1961 area of the district and each tahsil.

Density of population, 1961 and 1951

District/Tahsil	Population per square mile. 1961	Rank	1951	Rank
1	2	3	4	5
SIDHI DISTRICT	147	..	117	..
Gopadbanas tahsil	186	1	149	1
Deosar tahsil	99	3	80	3
Singrauli tahsil	144	2	115	2

Sidhi district is a low-density area in the State, its density being about 25% below the State average of 190 persons to a square mile. There are only eight districts in the State having smaller population densities than Sidhi. These, with their respective population densities are Shivpuri (142); Guna (141); Panna (119); Raisen (126); Betul (144); Mandla (134); Surguja (121) and Bastar (77). In respect of population density, Sidhi district may be compared with Guna, Shivpuri, Betul, Shahdol (density 155), Damoh (156) and Seoni (157) districts. The low density in the district is to be ascribed to its being a highly forested area (43.7% of the district's area was covered by forests in 1959-60), poor communications, absence of any industrialisation and hilly terrain.

The biggest Gopadbanas tahsil is the most densely populated in the district, having 186 persons on an average on a square mile. Singrauli the smallest tahsil occupies intermediate position in the district in respect of population; while Deosar being almost half as densely populated as Gopadbanas is the most sparsely populated tahsil. Population density variation among the tahsils is also a function of the forested area, gross cropped area, communications etc. in each tahsil. Deosar tahsil has a hilly terrain and large proportion of forested area. Singrauli tahsil, though equally forested consists of a large plain. Gopadbanas also cantains the rich valleys of Son and its tributaries the Gopad and Banas.

Discrepancy in area figures :

Area figures for the district are given by the Surveyor General, India and the State Directorate of Land Records. The methods employed by these two agencies in surveying and computing the area are different. This results sometimes in considerable discrepancies in the area figures given by the two agencies. In the case of Sidhi district the discrepancy between the two sets of figures comes to 2.7%, which though not very large is still appreciable.

Territorial Changes Since 1951 :

The district did not see any territorial changes during the decade.

Variation in Population during 1901--1960 :

Variation in population of the district during the last sixty years is presented in the table below. Figures for the State as a whole are also given for comparison :

Population Variation (%)—1901-61

Year.	SIDHI DISTRICT Total	Rural	Urban	M. P. STATE Total	Rural	Urban
1	2	3	4	5	6	7
1901-11	+16.5	+16.5	..	+15.3	+17.8	− 10 9
1911-21	−13.9	−13.9	..	−1.4	− 2.3	+ 10.9
1921-31	+14.7	+14.7	..	+11.4	+10 4	+ 23.0

With the exception of the decade 1911-21, population of the district has shown an increasing trend, the percentage increases being, in each decade, more than the corresponding State increases. In the 1911-21 decade, the district witnessed a sizeable decrease in its population mainly owing to the fulminating influenza epidemic of that decade. The higher proportionate decrease, however, points to the possibility of incomplete enumeration and perhaps emigration. The relatively higher decadal percentages of increase in the district also show that the district is a good field for colonisation, having received waves of immigrants from the overcrowded districts of neighbouring U. P. During 1901-61, the district has grown somewhat slower than the State as a whole. During the first half of the period, the district grew almost half as fast as the State, but stole a march over the State during the later half.

In 1961, the district has multiplied its population by a quarter of its 1951 population, the rate of increase being the highest recorded in all the decades of the century. The distribution of the increase has been surprisingly uniform among the tahsils, being 25.1, 24.5 and 25.1 percent respectively in Gopadbanas, Deosar and Singrauli tahsils. This rules out migration within the district as a possible cause of population variation during the decade. High population increase was a feature shared by almost all other districts in the State and the causes leading thereto must also be common. These are mainly the control of epidemic diseases like cholera, plague and malaria, elimination of famine, decrease in infant mortality and higher fertility levels. In support of the last contention, it may be stated that the minimum birth-rate estimated from children aged '0' in the district for 1951 census is 24*, whereas the corresponding rate based on 1961 data is 36?. No doubt the increase in the rate is contributed partly by reduction in infant mortality also.

Rural-Urban break-up :

Till 1951 the district did not have any town. The last census saw the addition of one town in the district, that is, Sidhi the district headquarters. Deosar and Singrauli tahsils are thus entirely rural. 99.1% of the population of the district lives in rural areas. The proportion of rural to total population in case of Gopadbanas tahsil, which contains Sidhi town, is 98.5%.

Villages :

Sidhi district has 1,909 villages (inhabited and uninhabited) which account for 2.5% of all villages in the State. 9.2% of the villages are uninhabited. Tahsilwise the proportion of uninhabited villages is : Gopadbanas 9 6%; Deosar 9.6% and Singrauli 7.0%. The distribution of uninhabited villages is thus more or less even in the district. Of the district's total number of inhabited villages Gopadbanas alone contains 57.1%—that is about 3 in 5; Deosar tahsil which contains more than one-third of the districts to al area contains only 28% of the inhabited villages; while Singrauli, the smallest tahsil contains only 15% of the inhabited villages of the district.

Villages by population—Size :

Table given hereafter gives distribution of 100 inhabited villages in the district and in each tahsil by certain population—sizes; corresponding distribution for the State also is given for comparison.

---

* Basad on 10% sample population.

? Basad on total population.

Distribution of 100 Villages in the district and each tahsil by populatian size.

District/Tahsil	Total No. of Villages	Number of villages in population ranges. Less than 200	200—499	500—999	1,000—1,999	2,000—4,999	5,000+
1	2	3	4	5	6	7	8
Sidhi district	100	45	33	17	4	1	..
Gopadbanas tahsil	100	47	31	16	5	1	..
Deosar tahsil	100	46	34	18	2	..	..
Singrauli tahsil	100	33	42	18	5	2	..
M. P. State	100	37	38	18	6	1	..

Sidhi is predominantly a district of small villages. More than three-fourth of its villages have less than 500 inhabitants each. Even smaller villages below 200 in population outnumber comparatively bigger villages, having populations between 200 and 500; differing in that respect from the average State pattern where villages below 200 and those lying between 200 and 500 show almost equal frequencies.

Medium-sized villages with populations varying between 500 and 1,000 make 17%of all villages in the district comparing with the proportion 18% for the State as a whole. Bigger villages with populations above 1,000 are not common, their frequency being 1 in 20 in the district.

As between tahsils, the distribution of villages almost follows a common pattern in case of Gopadbanas and Deosar tahsils which approximates with the average district pattern. The smallest Singrauli tahsil deviates from the district pattern in having a smaller frequency of very small villages below 200, and a corresponding high frequency of villages having between 200 and 500 population. Also Singrauli has higher proportion than the district of bigger villages with more than 2,000 population.

The following table examines the distribution of villages from the standpoint of the population residing in villages of various specified population sizes.

Percentage of poputation living in villages of different population size.

District/tahsil	Total Population	Proportion living in villages with population below 200	200—499	500—999	1,000—1,999	2,000+
1	2	3	4	5	6	7
Sidhi District	100	12.1	32.1	35.0	16.8	4.0
Gopadbanas tahsil	100	12.5	29.6	33.9	20.3	3.7
Deosar tahsil	100	14.2	36.0	40 9	8.9	..
Singrauli tahsil	100	8.2	35.4	30.4	16.4	9.6
Madhya Pradesh State	100	10.0	31.8	31.6	18.2	8.5

44% of the district's population live in villages with a population below 500, which is slightly higher than the corresponding State proportion of 42%. The most frequent (45%) smaller villages below 200 population each account for only 12% of the population. On the other hand population in villages in the size-group 200-499 is almost proportionate to the frequency of such villages in the district Highest proportion of population in the district. lives in villages of the medium size, having population between 500 and 1,000; deviating in that respect from the State as a whole which has maximum population residing in small villages of 200-499 size-range. Villages ranging in population between 200 and 1,000, which include half of all inhabited villages in the district account for more than two-thirds of the distrct's rural population. Bigger villages with population greater than 1,000, having a frequency of 1 in 20, contain almost 1 in 5 of the district's rural population. Thus for the district as a whole the tendency is for a large number of persons to live in smaller number of medium-sized and big villages.

As regards, tahsils no close similarity of pattern is observed in the pattern of distribution of population among the various population ranges. Deosar tahsil has roughly half its population living in villages with population below 500, the proportion is much smaller in case of Singrauli and Gopadbanas tahsils. Again Deosar has roughly 2 in every 5 of its population resident in medium-sized villages, the proportion being much smaller in the two other tahsils. Proportion of population living in big villages (more than 1,000) is relatively greater in Singrauli and Gopadbanas tahsils; being 24%and 26.0% respectively. Deosar tahsil has only 8.9%of its rural population in bigger villages.

Average population per village

The average population of a village in the district and in each tahsil by population size is shown below.

District/tahsil	Average Population per Village in All Villages	villages having population Less than 200	200–499	500–999	1,000–1,999	2,000–4,999
1	2	3	4	5	6	7
Sidhi District	332	90	322	682	1,285	2,491
Gopadbanas tahsil	331	87	320	687	1,302	2,441
Deosar tahsil	295	90	314	682	1,255	..
Singrauli tahsil	401	100	337	670	1,242	2,553
M. P. State	394	106	329	685	1,323	2 880

Average size of a village in the district is distinctly smaller than in the State as a whole. The difference between the district and the State averages is more conspicuous in the bottom and top size-groups; but the three middle ranges show agreement.

A village in Singrauli tahsil is on an average bigger than a village in any other tahsil in the district, being slightly bigger than a village even in the State as a whole. Villages in Deosar tahsil are, on the other hand, least populous in the district.

Houses and Households :

103, 617 census houses were enumerated in the district at the time of houselisting, an operation which preceded enumeration proper by a few

months. Of these 5% were found vacant. About four-fifth (78%) of these census-houses were used only as dwellings,6% as workshop-cum-dwellings, 0·7% as shop-cum-dwellings, 0.7% as places of entertaiment and community gathering, 0.6% as schools and other educational institutions, and 0·1% as shops excluding eating houses. The remaining 8% of the census houses were put to various other but unspecified uses.

At the time of houselisting the population of the district lived in 113,369 census households. From table E-II, which is based on a 20% random sample data of these households, it appears that as many as 97.4% of the households lived in dwellings of which they themselves were the owners. Thus, a very small number, 2.6% of all households in the district, lived in rented dwellings. In Sidhi town, however, the proportion of households living in rented dwellings was as high as 44.6%, showing the domination of the migrant element in the population of Sidhi town.

Houses with mud-walls seem to be the most favoured in rural areas of the district. More than nine-tenth (92%) of the households live in such houses Next in frequency are households with walls of grass, leaves, reeds or bamboo; these accounted for the dwellings of about 4% of the rural households. 2% of the rural households lived in houses with walls made predominantly of timber. Houses with walls made of unburnt bricks, or of burnt bricks were rarely met with, accounting respectively for the residence of 0.5 and 0.2 percent of the rural households.

In urban area too, houses with walls made predominantly of mud were most common, with about three-fifth (59%) of the urban households living in them. Urban households showed next preference for semi-pacca houses with walls made of unburnt bricks. Such houses accommodated roughly one-third (35%) of the urban households. 4% of the urban households lived in houses with walls predominantly made of timber, and 1.5 in houses with walls made predominantly of stone.

As regards roofing, tiling appears to be the common practice both in villages and in Sidhi town. About nine-tenths of the houses both in rural and urban areas lived in houses which had tile-covered roofs. Houses with roofs covered with grass or thatch were next most frequent in the rural areas, 7% of the rural households living in them. Such houses however, were not met with in Sidhi town. In Sidhi town, houses with roofs covered with stone appeared to be about equally frequent, with 6% of the urban households living in them. Also of some importance in urban area were houses with roofs of corrugated iron or zinc sheets, or of concrete or stone slabs. Each of these two types served as dwelling for about 3% of the urban households.

Table E-V of the Handbook gives data regarding rooms in dwelling houses. This table shows that in 1961 every household in the district had 2.1 rooms on an average, each such room accommodating 2.5 persons. A room, for the purpose of house-listing meant part of a census house enclosed by walls and having an exit door, and with space enough to enable one man to sleep. It is therefore not possible from this data to form any idea as to the actual room area available per household, though, as is the general experience the average room cannot lay claim to any size in the rural areas. A little more than two-fifth (43.1%) of all households in the district had only one room to live in, with four persons on an average living in it. This spotlights the congestion prevailing in a large number of households in the district, and the attendant low living standards. Roughly three-tenth (29.3%) of the households are slightly more fortunate and have two rooms each on an average per household, with 2.6 persons per room. Though, comparatively better, even these households have to be regarded as living in congested dwellings. Between one-fourth and three-tenth (27.6%) of the households live in houses with three or more rooms each.

Age and Sex :

Age structure of the population of Sidhi district is presented in the following table, which

also shows the corresponding structure of the population of the State as a whole :

100 Persons in the district and theState distributed by age and sex.

Age-group	Sidhi District			Madhya Pradesh		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
0–4	16.6	8.2	8.4	16.4	8·2	8.2
5–9	15.2	7.7	7.5	14.3	7.3	7.0

25–29	8.8	4.5	4.3	8.8	3.5	4.3
30–34	7.2	3.6	3.6	7.3	3.9	3.4
15–34	**32.3**	**16.2**	**16.1**	**32.6**	**16.7**	**15.9**
35–39	5.6	2.9	2.7	5.8	4.1	2.7
40–44	5.0	2.5	2.5	5.3	2.7	2.6
45–49	3.7	1.9	1.8	4.2	2.2	2.0
50–54	3.8	2.0	1.8	4.0	5.1	1.9
55–59	1.7	0.9	0.8	2.1	1.1	1.0
35–59	**19.8**	**10.2**	9.6	**21.4**	**11.2**	**10.2**
60–64	2.3	1.1	1.2	2.4	1.2	1.2
65–69	0.7	0.3	0.4	0.9	0.4	0.5
70+	1.5	0.7	0.8	1,8	0.8	1.0
60+	**4.5**	**2.1**	**2.4**	**5.1**	**2.4**	**2.7**
A. N. S.	0.3	0.2	0.1	0.1	Neg.	Neg.

The age-data presented in the above table are based on ungraduated ages i. e. ages actually returned at enumeration without subjecting them to any statistical smoothing process. The quinquennial (upto 70 years of age) age-groupings adopted above do suppress to some extent the distorting effects (on the shape of the age-curve) of age-heapings at multiples of 5, and at ages ending in even rather than in odd digits. Still the effects of age-preference are not entirely absent. Thus the table shows greater number of persons in ages 20-24 than in 15-19; in 25-29 than in 15-19 and 20-24; in 50-54 than in 45-49 and in 60-64 than in 55-59. It is improbable, therefore, that these proportions represent the true state of affairs because in a normal age-distribution (i. e. where migrationery and other violent effects like war and epidemic do not change the shape of the age-curve materially), the age-distribution starts with a peak at the lowest age-group and goes on dropping in more or less a smooth progression. In the case before us,

the excesses in age-group 20-24, 25-29, 50-54 and 60-64 appear to be results of preference for ages 20, 25, 50 and 60.* In considering the above data we would be on safer grounds, therefore, if we restricted the scope of discussion to the broader age-groups 0-14, 15-34, 35-59 and 60+, in which it may reasonably be assumed that digital preferences mutually cancel out to a considerable extent It is convenient to speak of the broader age-groups 0-14, 15-34, 35-59 and 60+ as corresponding to children, young persons, middle-aged persons and old persons.

In Sidhi district, as in the State as a whole, children, (boys and girls below fifteen years of age) constitute the biggest segment of population. Their proportion in the district is more than 8, but less than 9, in 20; which is more than the State proportion of 8 in 20. It may be noticed that children are more numerous in the district than in the State as a whole in each of the quinquennial age-groups that go to make the broader age-group 0-14. This evidence would suggest that comparatively more children are born, and survive in the district than in the State as a whole.

The segment of youth-i e. age group 15-34 contains roughly one-third of the population, and is somewhat narrower than the corresponding State segment. Middle aged persons, forming almost a fifth of the population in the district, are less numerous in the district than in the State as a whole. Finally, old persons, surviving beyond 60 years, form a small fraction of the population of the district. They number 1 in 22 in the district, comparing with a slightly greater proportion of 1 in 20 in the State as a whole. To sum up, in more concrete terms, if we choose at random twenty persons in the district, nine are likely to be infants and children below 15 years of age, six young persons between 15 and 35 years of age, four middle-aged persons between 35 and 60 years of age, and only one an old person of more than sixty years.

The youthful character of the population of the district seems also to follow from the fact that little more than three-fourths of it belongs to the younger ages-i.e. consists of persons less than 35 years of age. The corresponding State average is 73%, so that the district's population has somewhat greater proportion youth of than that of the State as a whole. The some what crude test of Sundburg's age-groups states that the proportion of children below 15 years of age should be around 40, 33 and 20 percent in a progressive, stationery and regessive population. Applying this rule of thumb measure to Sidhi district, its 1961 population is found to be very much progressive : not at all a happy prospect in view of the population explosion, of the last decade.

Changes in age-distribution since 1951.

Changes in age-composition of a population over time, if capable of reasonably accurate estimation, afford useful indications regarding the future behaviour of the population. It is proposed, therefore, to compare the age-structures (by broad age-groups) of the district's population for 1951 and 1961 censuses in the table in-set below.

Changes in age distribution 1951-61

Age-group	Proportion of population in it	
	1961	1951
1	2	3
All ages	100	100
0-14	43.2	37.3
15-34	32.2	31.6
35-39	19.9	25.5
60+	4.5	5.6
A. N. S.	0.3	0.0

In appreciating the data for 1951, it may be remembered that it is based on a 10%sample of the 1951 population so that we are implicitly assuming that the age-structure of the sample also represents the age-structure of the universe. Since

* For a full discussion of patterns of digital preference in the State the reader in referred to the chapter on age and sex of the State Report.

the smaple is big, the assumption seems to be justified. The 1961 figures are based on total population.

The table shows that inter-censal decade has witnessed an impressive increase in the proportion of children below 15 years, and a small increase in the proportion of youth. The table also brings out that such increases in the proportion of young persons have been mostly at the cost of the middle-aged segment, and to some extent the old-age segment. The former has lost in proportion by 5.6%—a big loss by all standards, and the latter by 1.1%.The pattern of broad ages,thus has materially changed since 1951. The big increase in the proportion of children, mostly added during the intercensal decade, would lead one to expect the district to register a bigger overall increase in population. The distrct, however, has recorded an increase which is only slightly greater than the State average, and is only slightly below the increase registered by such districts as East Nimar, West Nimar, Raisen etc. This is apparently owing to the losses sustained by the district's population in its middle-age segment. Even if we assume that some of the differences in proportions are attributable to age-misreporting, we have no alternative but to ascribe major portion of it to heavier mortality and emigration in the middle and old age segments. Variation in sex-ratio during the decade shows increase in feminity, which corroborates this observation. It is difficult to reach a conclusion firmer than this, on the strength of the data before us. The question however, is of immense demographic and social interest, and may be subject of useful research.

Sex and age :

In Sidhi district females are outnumbered by males in all broad age-groups, except the one representing old age, in which they outnumber males. The disparity in sexes is marked in the age-group, 0-14 and 35-59. In fact, in the youngest age-group, females outnumber males in the ages 0-4, but perhaps owing to heavier mortality, they become less numerous than the males in the higher ages. It is difficult two hazard any guess on this seemingly selective mortality of females in the young ages. The higher proportion of females in ages beyond 60 is a phenomenon exhibited by the State as a whole and it testifies to the greater vitality of such members of the fairer sex who have survived the comparatively greater risks of frequent childbirths.

Sex-ratio :

Sex-ratio is an index number employed to measure the difference in numbers between the to sexes. Quite contrary to the general expectation that males and females exist (or, should exist) in equal numbers in the population, the numbers of the two sexes vary not only from region to region, but also over time and even from one ethnic group to another. There may be many more factors, social, economic and demographic that may be affecting the relative poportions of the two sexes in the population. In Madhya Pradesh,the sex-ratio varies between the lower limit of 839 for the northernmost Morena district and the upper limit of 1,037 for Raipur district on the eastern border of the State. In Sidhi district, sex-ratio or what is the same, the number of females per 1,000 males, is 977. It varies somewhat among the tahsils. The highest value for the ratio is in the Gopadbanas tahsil. Deosar tahsil shows the lowest value-960-for the sex-ratio. The value for the sex-ratio is 965 in Singrauli tahsil, which is thus closer to Deosar tahsil than to Gopadbanas tahsil in this characteristic. In general, sex-ratio is disadvantageous to the fair sex in urban areas and goes on decreasing with increasing urban population. On the other hand, unless it is otherwise for historic or other reasons, sex-ratio tends towards equality of the two sexes in rural areas. The urban element is however, not of much importance in Sidhi district which has only one town, but even then the truth of the foregoing observation is brought out from the low urban sex-ratio of 715. The high female deficiency in urban areas is not difficult to under-

stand. It arises mainly from migration of people who go there in search of employment. This migration is, to begin with, only of men, and generally there is a considerable time-lag before the women go and settle with the men migrants. Sex-ratio in rural areas of the district is 979, which is not much different from sex-ratio for all areas. This is because of the very low urban component in the population. The value of the sex-ratio in rural areas of the Gopadbanas tahsil is 992 which is much nearer parity of the two sexes in the population of that tahsil.

The foregoing discussion shows that sex-ratio is higher in rural Gopadbanas tahsil which has, on an average 3 females more per 100 males than the other two tahsils. The latter two tahsils almost have the same proportion of females in their respective populations. It is not possible to state, with any amount of authority, the reasons for this tahsilwise variation in the female proportion. As far as known to the present writer and as stated by Venkatachar in Central India Agency Report 1931 (Part 1-page 87),"what causes a variation in sex-ratio is still one of Nature's secrets". The various theories put forward from time to time by way of an explanation, and some of these will be considered in the following paragraphs, are but tentative propositions, lacking scientific confirmation.

Variation in sex-ratio over time :

Sex-ratio is known to show considerable variation over time. For Sidhi district, this will be clear from the following table which gives the sex-ratio from the census of 1901. Variation in the sex-ratio of the State as a whole is also given for the sake of comparison.

Sex-ratio 1901—1961

Year 1	Sidhi District 2	Madhya Pradesh 3
1901	999	990
1911	1,006	986
1921	1,000	974
1931	995	973
1941	987	970
1951	971	967
1961	977	953

This table shows that at the beginning of the century males and females existed almost in equal numbers in the population of the district. It also brings out the differences in the pattern of sex-ratio variation over time between the district and the State as a whole. Whereas the latter shows a steadily declining trend over time in the sex-ratio, there is no undirectional trend in the sex-ratio variation pattern of the district. Secondly the population of the State had always a greater degree of masculinity than that of Sidhi district. As early as 1901, when Sidhi district had equal number of males and females, the State had a deficit of one female for every hundred males in its population. In the next decade, whereas the State registered a slight fall in its feminine proportion,that in the district registered a small increase. In 1911, the district had a small excess (of 6) of females over males. In the next influenza decade, whereas the State recorded a sizeable fall of 12 points in the sex-ratio, the district lost only by six points, restoring the parity of sexes with which it had started in 1901. It is generally thought that epidemics caused a greater mortality among women, and the decrease in sex-ratio in 1921 is attributed by some to the influenza epidemic of 1918-19. There is no clear evidence,

however, to correlate the small fall in sex-ratio in 1921 in Sidhi district to the influenza epidemic. In the decade 1921-31, Sidhi registered a further decrease in sex-ratio by 5 points, whereas the State as a whole exhibited a near stagnancy. Considered as a whole, in the first half of the sixty year period 1901-31, sex-ratio in the district maintained a near balance in the feminine proportions. The next two decades witnessed somewhat greater declines in the sex-ratio in the district whereas in the State as a whole the decline was of a very low order. In fact, in 1951, sex-ratio had a closely comparing value for the State and the district. During the last decade, in contrast with the general trend, the females gained in relative proportion in the district whereas the State as a whole registered a fall of 14 points in the ratio. What are the factors responsible for this increase in the sex-ratio—whether male emigration to other districts, or higher male mortality—cannot be said on the basis of the material available ? Separate investigation in the field is called for.

Sx-ratio by age :

A study of sex-ratio cannot be regarded as complete if it does not include consideration of its variation with age; for the relative proportion of the two sexes in the population shows numerically significant imbalance at the various periods of ages. It is now universally accepted that nature is usually partial to the male child at birth, who thus scores a slight initial advantage over its female counterpart at the beginning of the life. All theories advanced by way of explaining this imbalance in the ratio at birth are tentative; and not have any biological basis. Empiric data has also shown that whereas nature favours a male birth more than a female birth, it has also made the latter organically more suited for survival in the initial months. This organic superiority of the female child is now more or less accepted biologically also. The result is that the lead gained by the male child at birth is soon not only neutralised by greater mortality, but even becomes converted into a measurable deficit before the first year is out.

The following table gives the sex-ratio of the the population of Sidhi district at age 'O', and for the broader age intervals 0-14, 15-34, 35-59, and 60+.Since, for the first fourteen years, age is within comparatively fresh memory of the respondents so that the age-returns in the first broad-age-interval have greater likelihood of being correct, the sex-ratio for first fifteen years is also presented by quin-quennial age-groups.

Sex-ratio by age, Sidhi District.

Age-group	Sex-ratio
1	2
All ages	977
'O'	952
0-4	1,024
5-9	977
10-14	856
0-14	961
15-34	992
35-59	950
60+	1,155

The table at once brings out the truth of the observation made earlier. Though vital statistics data for the district is reportedly not available, there should not be any hesitation in accepting the generally established fact of greater male-births. In the first few years of their existence,however, the male children are outnumbered by their female counterparts. In the lowest age-group 0-4 also, the girls maintain the numerical lead in the population wrested by them from the boys. But from the 2nd or third year of life, perhaps as a result of greater neglect in their case, the girls start losing the lead and the sex-ratio progressively declines in the next two quin-quennial ages. The somewhat higher female deficit in the 10-14 age-group may perhaps be a result of age-misreporting to some extent, but is by and large an evidence of greater mortality among girls in that

age-group. In the broader age-interval representing childhood and juvenility, the sex-ratio is adverse to the fair sex by about 4 per hundred males.

In youth, there is a conspicuous shift towards equality of the sexes. If this is not entirely due to age-misreportings at the upper and lower extremes of the age-interval, then it points to three possibilities :—(i) emigration of young males outside the district perhaps in search of employment, a fact, also suggested by the increase in the total sex-ratio during the decade; (ii) absence, or low frequency of mortality at childbirth or post-natal mortality (iii) greater male mortality among the youths. Which of these causes are operative in the case of Sidhi district belongs again to the realm of the unknown though one might perhaps rule out the third cause.

In middle-age, there is again perceptible increase in masculinity of the population, suggesting greater female mortality. This suggestion is not entirely untenable, though in the absence of age and sex specific death-rates it is not possible to hazard a definite opinion about it. Inspite of the biological organic superiority of the famales, the more vulnerable among them succumb perhaps to the harsh and negligent treament meted to them, so that the surviving females are sturdier. This perhaps enables them to survive the risks of initial child-births. Improvident maternity however continuously saps their vitality and weaker ones of the sex again succumb at the close of, and after, the fertility cycle. Those of the females who survive this onslaught of improvident maternity are decidedly more virile and survive to very old ages. This is partly why we find a very substantial female excess at the upper extremes of ages i.e. in ages beyond sixty years. On the other hand, males who have to bear the unilateral strain of bread-earning are exposed to a gradual process of decay of their vitality and find it extremely difficult to survive long after the middle age. This also contributes to feminine excess in old age

Marital status by age and sex

Age group	Never married		Married		Widowed		Divorced or separated		Unspecified

Forty-five out of every 100 males, and thirty-eight out of the same number of females in the district are never-married. One fact however, deserves to be noticed in connection with these figures. Marital status was not tabulated for ages upto and including 9 years under the generally valid assumption that all persons upto nine years of age were never-married. Whereas this assumption did not introduce any measurable inaccuracies in the marital status proportions ordinarily, in the case of Sidhi district it seems to have, to some extent affected the marital status returns. This inference follows from the observed high proportions of married males and females particularly the latter, in the district in age-group 10-14. Hence, the actual proportions of never-married males and females in the population at large should in fact be somewhat smaller than they appear in the table.

Child Marriages :

The law of the land has made child marriages punishable offences. A woman cannot legally be married if she has not attaind fourteen years, and a male, if he has not attained eighteen years of age. The figures before us therefore point to the prevalence of unlawful child marriages in the district on a sizeable if not alarming scale. As adverted to earlier, proportions of marriages in persons below 9 years of age are not tabulated. In the next higher age-group i. e. 10-14, in which also marriages are forbidden by law, about 36% males and 59% females have been returned as married. The proportions are definitely alarming. In the broader age-group 0-14, *at least* one out of every ten males, and one out of every seven females, is married. As we proceed to higher ages, the proportion of never-married persons goes on sharply dropping till it assumes very small dimensions. In the age-group 15-19, in more than half of which it is an offence for males to contract marriages, the proportion of married males is 64%. It is not unreasonable to suppose that a large number of these are in contravention of law. In the same age-group, more than 87% of females are married. Though well within the framework of law, in view of the population explosion of the last decade, even these marriages should be regarded as rather early. The age-group 20-24, more than half of which may still be regarded as early in case of male marriages, contains only 15% never-married males. The proportion of never-married females however sinks to negligible dimensions from this age-group onwards. On the other hand, in case of males the never-married proportion is one in fourteen even in 25-29 age-group, and unlike females, it never sinks to negligible dimensions even in the highest of ages. The proportion of these confirmed bachelors, perhaps ineligible for marriage owing to physical or other incapacity, varies generally between 2 to 3 percent in ages beyond thirty years. In a nutshell, child and early marriages are very much in vougue in the district, much more so in case of girls. The latter start entering matrimony with considerable frequency between ten to fourteen years of age, and not many are left unmarried after nineteen years. In case of boys also, marriages start taking place between ten to fourteen years of age but most of the boys get married between 15 and 19 years of age and not many are left unmarried beyond 25 years. In case of boys, a sizeable fraction is doomed to bachelorhood, a social phenomenon calling for enquiry.

Widowhood :

Upto fourteen years of age the proportion of widowed persons is unimportant numerically. It assumes significance from age-group 15-19 and onwards. It may be noticed that upto 24 years of age, widowers outnumber widows, a fact suggestive of greater feminine mortality in the earlier years of marriage. In the broader age-group 15-34, only 2 out of every 100 males, and 3 out of every 100 females were returned as having lost their spouses. The proportion of widowed persons steadily increases as one moves higher along the age-ladder, more sharply in case of females than males. Starting from 4% in age-group 35-39, the proportion of widowed males

increases to 17.1% in the age-group 55-59; the corresponding figures for females are 11% and 47%. In the broader age-group representing middle age, on an average, 9% of the males and 27% of females were widowed. In the oldest of ages beyond 60, the proportion of widowers is 30%, while that of widows is 75%, a fact corroborating the greater longevity of females who outlive the earlier risks of childbirth.

The proportion of divorced and separated persons of either sex is numerically in significant and does not justify a separate discussion.

Literacy and education:

Sidhi district has literacy percentage of 7 8% which compares with a much higher literacy percentage of 17.1 for the State as a whole, and still higher national average of 24%. In the field of education and literacy, the position of Sidhi district is inglorious among other districts of the State, only two districts in the state have lower percentages of literacy than Sidhi. These are Jhabua, with a literacy percentage of 6.1 and Bastar with a literacy percentage of 6.9 Educationally, the most advanced district in the State is Indore, with a literacy proportion of 38.2% which is about five times as high as that of Sidhi district. The proportion of rural literates in the district is 7.47%, which is not sensibly different from the proportion in all areas because of smallness of urban component in the district's population, and its consequent inability to push up the total percentage to an appreciable degree. In Sidhi town, which is the only urban area in the district, the percentage of literacy has the high value of 42.8. This is in accordance with expectations, because in urban areas there is not only greater awareness of the need for education but these also have greater availability of schools and other educational facilities. As is usually the case every where in Sidhi too, there are more literate and the educated among males than females. Among males, literacy in the district is 14.2%, which compares with a small percentage of only 1.2 in case of the females. The corresponding propotrions for the State as a whole are 27 and 6.7 percent for males and females respectively, showing the backwardness of Sidhi district in the State context even for males and females separately.

Geographical distribution of literacy

The following table gives distribution of literacy among tahsils of the district separately for their total, rural and urban areas.

Percentage of literacy by sex and by total, rural and urban for each tahsil, 1961

Name of District/Tahsil	Persons			Males			Females		
	T	R	U	T	R	U	T	R	U
1	2	3	4	5	6	7	8	9	10
Sidhi district	7.8	7.5	42.8	14.2	13.8	61.2	1.2	1.0	17.1
Gopadbanas tahsil	9.1	8.6	42.8	16.5	15.7	61.2	1.6	1.4	17.1
Deosar tahsil	5.7	5.7	...	10.6	10.6	...	0.5	0.5	...
Singrauli tahsil	6.4	6.4	...	12.0	12.0	...	0.6	0.6	...

The most noticeable fact about the distribution of literacy among tahsils of the district is its sligt concentration in the headquarters tahsil Gopadbanas, which besides containing the only town in the district is also relatively more open. Deosar and Singrauli tahsils have more or less the same proportion of literate and educated among their population. The very low proportions of female literates in Singrauli and Deosar tahsils also deserve to be noticed.

Growth of Literacy Since 1951.

The picture regarding literacy and educational levels in the district, though dismal in comparison with other districts in the State, ceases to be so when viewed in retrospect. In 1951, proportion of literate and educated in the population of the district was only 3.6%, so that it has more

than doubled during the intercensal decade. In case of females the rate of literacy, which had the shockingly low value of 0.1% in 1951, has increased about twelve times, while in case of males, the percentage of literacy (6.9% in 1951) stands more than doubled in 1961.

Viewed in historical perspective, thus, we may say that the district has made remarkable progress in the field of literacy and education during the interregnum.

This impressive improvement over time has been made possible by the liberal policy of opening primary, and higher educational institutions. Table 5.1 in part II of the Hand book gives the yearwise picture of expansion of educational institutions and attendance in those institutions. In the first year of the last decade, the district had only 222 primary schools. The number of primary schools increased by more than 100 in 1954, after which year the number went on increasing more or less steadily till it stood at 659 at the end of the year 1960. The number of primary schools has thus increased threefold during the decade. In 1951, a school on an average served 7.8 villages involving on an average 17.4 square miles of area. Some idea of the improvement effected during the interregnum can be had from the fact that in 1960, a school on an average served 2.6 inhabited villages, involving an area of 6.0 square miles. The number of male scholars that was 6,660 in 1951 has increased more than fourfold during the decade, while the number of female scholars which was ludicrously small in 1951 has inereased more than ten times. It still however remains very small, in absolute terms. The number of teachers has also increased by more than three times. The number of female teachers still remains very small.

Number of middle schools has increased from 20 in 1951 to 25 in 1960. The attendance in these schools has registered an impressive increase of more than four times. The number of higher secondary schools/institutions, which was only 1 in 1951 was 8 in 1960, with the number of male scholars in them having increased more than ten times and that of girl scholars more than 7 times. The latter number however continues to be very small as is clear from the fact that for every 32 male scholars in Higher Secondary institutions there is only one female scholar.

The attendance in primary schools, though magnificently improved since 1951, continues to be low. Treating all children in ages 6-10 as those who should be in primary schools. we find the actual attendance to be only 36% of the number. Whereas the attendance had the respectable magnitude of 66% in case of boys, it has the ludicrously small value of 4.4% in case of girls. Universal Primary education being our declared objective, the figures bring out the size of the ground that remains to be covered in that direction.

Leveles of education

The proportion 7.8% stand for all literate and educated among the total population irrespective of the educational levels they have attained. Literacy has been defined for census purposes as merely the ability to read and write a simple letter which it will be unanimously agreed, is a very modest requirement of a person. In order to judge the real quality of the population as regards education, one should therefore know the levels of education possessed by those returned as literate and educated. This information is given in Table C—III Part –A of the Handbook which shows that 87.1% of all literate and educated in the district have been returned as without any educational levels. This large number includes not only the mere literates but also such persons who studied in some of the pre-primary classes but did not pass the primary or junior basic level examination. Those who have been returned with primary or junior basic levels make 9.6% of all literate and educated in the district. This proportion includes persons who might have joined middle or higher secondary classes but have failed to pass the matriculation examination. Persons with matriculation or higher educational

levels make only 3.4% of all literate and educated. Thus the position regarding educational levels can be summed up as follows : if ten literate and educated persons are picked up at random in the district, about nine of them are persons who have not passed even the primary examination, while the remaining one is either a person with a primary level qualification or a matriculate. The chances of this one person being a matriculate or with higher educational qualification are however only 1 in 3.

There is a degree college at the district headquarters Sidhi. Higher educational facilities exist at Rewa, 60 miles from Sidhi.

Mother-Tongues :

In all twenty speeches have been returned as mother-tongues from Sidhi district at the 1961 Census. This multiplicity of languages is more apparent than real, because as many as 99% of the population has returned only one mother-tongue, namely Hindi. Another 0.8% have returned Baghelkhandi, a dialect of Hindi, as their mother tongue. Of the other eighteen speeches also, at least four, that is, Awadhi, Bundhelkhandi, Chhattisgarhi and Gondani are, and have been so grouped, dialects of Hindi. Together these account for 471 speakers and push up the proportion of speakers of the Hindi group of speeches by a little less than 0.1%. The remaining fourteen speeches together thus account for less than 0.1% of the district's population. With the exception of Gondi, Sindhi and Urdu speeches, the remaining of these thirteen speeches have less than 100 speakers each. Indeed with the exception of Marathi which claims sixty speakers, the remaining have less than 20 speakers each. The evidence before us thus points to the almost complete linguistic assimilation of the vari us tribes residing in the district.

In 1951, Awadhi, Baghelkhandi, Bundelkhandi and Godin had not been returned as mother-tongues from the district. This does not mean that in 1951, the district did not have any speakers of these speeches. It only shows that in 1951, speakers of these speeches-which are of course, all dialects of Hindi-were merged with the main language Hindi. This will be borne out from a scrutiny of the 1931 census language returns of the district. In that year, as many as 272,124 persons which was 75.2% of the district's population in 1931-had returned Baghelkhandi as mother-tongue and about 1% (3,787) Bundelkhandi and 3% (10,484) Awadhi. Thus, it appears that the Hindi returned as mother tongue by 99% of the population in 1961 is mostly its dialect Baghelkhandi, as also, Awadhi and Bundelkhandi.

Religion :

Distribution of the districts population by religion is presented below:—

Percentage distribution of population by religion—1961 and 1951.

Year	Total Rural Urban	Proportion in religion					
		Hindus	Sikhs	Jains	Muslims	Christians	Others
1961	T	97.9	Neg.	Neg.	2.1	Neg.	..
	R	98.0	Neg.	Neg.	2.0	Neg.	..
	U	92.2	Neg.	0.3	7.2	0.3	..
1951	T	98.3	Neg.	..	1.7	..	..

Population of Sidhi district is overwhelmingly Hindu, followers of that religion accounting for all but 2.1% of the population. These 2.1% belong mostly to the Muslim religion. In the total and urban areas of the district, persons professing religions other than Hinduism and Islam are negligible in numbers. They assume some numerical significance only in the urban areas, where Hindus come down to 92% of the population. Muslims, numbering 7.2% of the urban population, retain their second position, while Christians and Jains each account roughly for 0.3% of the urban population. Sikhs are negligible numerically even in urban areas. There were no returns of other religions in the district.

In 1951, only three religions were returned but the number of the followers of the third religion i.e., Sikhs was negligible. It may be noted that Hindus have lost in proportion by about 0.4% since 1951. The gainers have been Muslims, who have increared by roughly the same percentage.

Scheduled Castes and Scheduled Tribes:

The tables inset below show (i) the proportions of scheduled tribes in the district and each tahsil and (ii) the proportion which the scheduled castes or scheduled tribes population of each tahsil bears to the total scheduled castes or scheduled tribes population of the district.

TABLE I

District/ Tahsil	Total Population	Scheduled Castes	Scheduled Tribes
Sidhi District	100	9.6	33.7
Gopadbanas Tahsil	100	8.3	30.0
Deosar Tahsil	100	9.4	48.1
Singrauli Tahsil	100	13.8	26.2
Madhya Pradesh	100	13.1	20.6

TABLE II

District/ Tahsil	Sch. Castes	Sch. Tribes
Sidhi District	100	100
Gopadbanas Tahsil	49.6	51.1
Deosar Tahsil	24.1	34.8
Singrauli Tahsil	26.3	14.1

43.3% or more than two-fifth of the district's population is 'scheduled', which compares with a 'scheduled' percentage of 33.7 in case of the State as a whole. Proportion of 'scheduled' population is largest (57.5%) in Deosar tahsil, and least (38.3%) in Gopadbanas tahsil. But even in the last mentioned tahsil, the 'scheduled' population proportion is greater than the State proportion.

Scheduled Castes:

Scheduled Castes make 9.6% of the district's population, comparing with 13.1% for the State as a whole. The proportion is maximum in Singrauli tahsil, where it even exceeds the State average. Gopadbanas and Deosar tahsils have comparatively smaller representation of scheduled castes in their populations. Almost half the population of scheduled castes is in the most populous, and the biggest Gopadbanas tahsil, while Deosar and Singrauli tahsils respectively contain a little less than, and a little more than one-fourth of the district's scheduled castes.

Enumeration of scheduled castes and tribes in the district, as elsewhere in the State, was done in accordance with the 'Scheduled Castes and Scheduled Tribes lists (Modification) Order, 1956'. Out of a total of fifteen castes or synonymous caste-groups scheduled under this order, all but four have been returned from the district. The scheduled castes not returned from Sidhi are Dher, Kuchbandhia, Mushkan and Sansia or Bedia. Of those returned from the district, only five castes are numerically significant (*i.e.*, count more than 1% of the total scheduled castes popu-

lation). These are, in the order of their numerical strength: Chamar and synonymous castes (66.5%); Kumhar (14.3); Dharkar and synonymous castes (8.0%); Basor or Bansphor (6.8%); Ghasia (1.0%). 3% of the scheduled castes returns were unclassified. The remaining six scheduled castes thus make only 0.4% of the scheduled castes population. These are, with their populations. Beldar or Sunkar (5); Dom (7); Domar or Doris (43); Mehtar, Bhangi or Dhanuk (166); Moghia (2) and Pasi (1).

Progress of literacy among scheduled castes is in a deplorable state. Only 1.2% of the scheduled castes can claim to be literate and educated comparing with 7.8% for the general population. These are almost wholly 'literates' without any educational levels. Proportion of male literates amongst the scheduled castes is 2.3%, and the average for persons is pulled down by the very low proportion—0.1%—of female literacy.

Sex-ratio amongst scheduled castes is 981, which compares with 977 for the general population.

Economy of the scheduled castes in the district is predominantly agricultural, with 78% of the working force in categories I and II. 42% of the workers are cultivators, while 36% are agricultural labourers. The high proportion of agricultural labourers in the scheduled castes is an indication of their land-hunger, because we may presume almost all of them to be landless. Even of these who own lands, a fairly large proportion own but uneconomic holdings. Table SCT-V shows that of all cultivating (sample) households among the scheduled castes, 16.2% or roughly one-sixth, cultivated lands belonging to other persons; and about 30% did so on lands held partly from Governments and partly from private persons or institutions. Thus only 53.8%, or a little more than half of the sample cultivating households among scheduled castes own the lands cultivated by them. One-fourth of even these households own less than an acre of land each; while 52.5% households hold less than 2.5 acres. All these are clearly uneconomic holdings. Proportion of households owning below 5 acres of land is 72.1%; even these are uneconomic holdings. The figures thus testify to the very weak agricultural economy of the scheduled caste population of the district.

Chamars who constitute two-third of the scheduled castes population of the district have 88% of their working force in agriculture, with agricultural labourers preponderating over cultivators by a small margin. The participation in agriculture for scheduled castes is in fact pulled down by the low participation in agriculture of Basor (participation in agriculture 29.9%), Kumhar (participation in agriculture 68.7%) and Dharkar, Balmiki or Lalbegi (participation in agriculture 49.3%) castes.

After agriculture, economy of scheduled castes is dominated by household industry, which gives principal work to 18.1% of the working force. 68% of the Basor working force is in household industry. Their traditional cottage industry is the making of bamboo artifacts. Kumhar caste also has sizeable-29.3% of their working force-participation in household industry. In their case, the household industry is making of earthen utensils and pots. The Dharkar, Balmik or Lalbegi caste has 45.4%of its working force in household industry. The nature of their household industry could not be ascertained. Chamar and synonymous castes have only 8%of their working force in household industry. Employment in 'other services', and category III is to the extent of 2.2 and 1.8% respectively of all workers. Employment in other working categories is insignificantly small in magnitude.

Scheduled Tribes:

Sidhi district contributes 2.9% to the scheduled tribes population of the State. Scheduled tribes constitute one-third of the district's total population. In Deosar tahsil the proportion of scheduled tribes is highest 48%; while Singrauli, which has proportionately higher percentage(13.8%) of scheduled caste has only 26% of its population

belonging to scheduled tribes. But even Singrauli has a greater proportion of scheduled tribes in its population than the state as a whole.

Of the district's scheduled tribes population, a little more than half are in Gopadbanas tahsil; 35% in Deosar tahsil and only 14% in Singrauli tahsil.

The enumeration of scheduled tribes in the district also was done in accordance with the Presidential Order referred to earlier. Of a total of sixteen tribes scheduled for the district, census returns included all but four. These four are Mawasi, Sahariya, Saur and Sonr. Of the tribes returned from the district, four tribes, namely Gond, Kol, Baiga and Panika include 92% of the total scheduled tribes population of the district. Gond, the most numerous tribe, in the district account for 46% of the scheduled tribal population, while Kol and Baiga respectively account for 27.6 and 10.5 percent of the district's scheduled tribal population.

Other numerically strong tribes in the district are Panika (8.0%); Khairwar (3.4%), Agariya (2 5%) and Biar or Biyar (1.2%). Tribes enumerated in small numbers are Bhil (2); Bhumia including Bharia and Paliha (48); Majhi (8); Nat, Navdigar, Sapera and Kubutar (52); Pao (105). Approximately 1% of the tribes could not be classified to one or the other of known scheduled tribes.

With 2.0% of the population returned as literate and educated, the scheduled tribes are educationally still much behind, the general population which has a literacy percentage of 7.8. They are, however, better than the scheduled castes in this respect, who have a literacy rate of 1.2% only. Literacy among scheduled tribe males is 3.8% and the general rate is pulled down by the hopelessly low percentage - 0.1 - of literate females.

Participation rate among scheduled tribal population is 60%, which is conspicuously higher than the corresponding rate 54% for the general population. Distribution of the tribal working force over the nine census categ ries of w.rkers is shown in the inset below :-

Distribution of working force over nine categories of workers, 1961.

Name of Tribe	Total workers	Workers								
		I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10	11
All Scheduled Tribes	100	53.1	41.4	1.8	2.1	0.2	0.1	0.1	Neg.	1.2

The economy of scheduled tribes in the district is overwhelmingly agricultural, as is obvious from the fact that 94% of the working force is in the agricultural categories I and II. In agriculture,

though cultivators outnumber agricultural labourers, the latter are still more than two-fifth of the working force and are more numerous than in the general population. The high proportion of agricultural labourers in the tribal working force is indicative of their land hunger. It appears from table SCT V in the handbook that of the sample tribal cultivating households, 12.6% do not own the land cultivated by them, while 21.1% only partly own their holdings. Roughly only two-thirds of the tribal houses engaged in cultivation hold their land directly from the Government. These figures make interesting reading in the background of the far-reaching land reforms introduced by the Government, in the direction of abolishing absentee landlordism. The figures speak to the existence on a considerable scale of sub-tenancies in agriculture amongst the scheduled tribes of Sidhi district. Of cultivating households owning their holdings, as large a proportion as 11.7% own less than an acre of land, while 14% own between 1 to 2.4 acres of land. Thus roughly a quarter of the tribal cultivating households who own their holdings have holdings of less than 2 5 acres in size and should be making their living with great difficulty. More than two-fifths of the tribal households owning their lands have holdings of less than 5 acres in size, which are all clearly uneconomic holdings. Only 18.9% of the households holding land directly from Government have economic holdings of more than 15 acres in size. The evidence before us would thus suggest that most of the cultivating tribal households who own their lands do not have adequate land and must of necessity, take to other economic activities.

Household industry employs one out of every fifty workers among scheduled tribes. The industries are generally of the traditional caste-based type. Category II, and Category IX, also have numerically significant participation of the tribal workers. Other categories of workers do not attract many scheduled tribal workers.

Gonds : Accounting for 46% of the scheduled tribal population of the district, the Gond tribe ranks first in respect of populousness. The Gonds are not considered as autochthones of the district though they are dispersed in all the tahsils. Educationally, the Gonds appear to be somewhat better than other scheduled tribes, having a literacy percentage of 2.8, as against a literacy of 2.0% for all scheduled tribes. All but 4% of the Gond workers are in agriculture, where cultivators outnumber agricultural labourers to the tune approximately of 4 to 1. Category III and Category IV respectively employ 1.8 and 1.5 percent of the working force of Gonds. Other sectors of economy do not attract sizeable proportion of Gond workers. The Gond do not speak the tribal dialect Gondi in the district.

Kol : Second in respect of numerical strength, this tribe makes 27.6% of the scheduled tribal population of the district. Sidhi district accounts for 17.8% of the state's Kol population. Though found in all the tahsils, the Kols are comparatively less numerous in Singrauli tahsil. They do not have a tribal speech of their own but speak the dialect of Hindi prevalent in the district. C.S. Venkatachar, Census Superintendent of Central India in 1931* described the Kol as a 'perfect specimen of subjugated aborigine, as one of the most servile castes in the eastern parts.' He even went to the extent of remarking that 'short of being sold as a slave in the open market, the status of a Kol is nothing but that of a slave'. The condition of the Kol does not seem to have improved much since this observation was made. Even to this day, roughly four-fifths of the Kol are agricultural labourers-mostly landless. About one in six of every Kol worker is a cultivator. 'Other services', category IX, and Category III have equal participation—2.3% of the working force. Educationally, the Kol seem to be backward even than other scheduled tribes, having a literacy percentage of only 0.9.

Baiga : Contributing 10.5% to the scheduled

* Central India Agency Report Part I, page 233.

tribal population of the district, and 14.3% to that of the State, the Baiga are third most numerous tribe in the district. They are more or less evenly dispersed in tahsils. Bhumia is another name for the tribe in the Maikal hills. They are one of the most primitive, and economically backward tribes in the State, mostly dependent on forest and primitive agriculture. It is possible that quite a few of them still practise their traditional shifting cultivation known as 'bewar'. The tribe is more isolated than the Gond and Kol, preferring to live in their own villages, generally in remote jungly tracts. In the name of dress, Baiga even wear next to nothing by way of a *lingoti*, while their women wear a short *dhoti* in the Chhattisgarhi fashion, and do not put on any blouse.

In the matter of education, they do not come up even to the level of Kols, having a literacy percentage of 0.7% as against 0.9% for the Kols. Almost all of them speak the dominant dialect of Hindi prevalent in the region in which they live, and not 'Baigani', a dialect of Chhattisgarhi, which is returned as mother tongue by many Baigas in Mandla district. Their economy is dominated by agriculture, participation in the agricultural working categories being to the extent of 95% of the working force. Roughly 50% of the workers are cultivators; but the proportion of agricultural labourers is also high—45%. Next from the point of view of size of participation is household industry, which employs 2.7% of the Baiga workers. Their traditional household industry is making artifacts of split bamboo. Category III—mainly forestry, and 'other services' account for respectively 1.6% and 1.0% of the Baiga working force. Other categories do not seem to have much appeal to the Baiga workers.

Panika : This community, which has been treated as a scheduled tribe only in the districts of former Vindhya Pradesh, has been returned almost entirely from Sidhi and Shahdol districts. Members of the community, however, are found in sizeable strength in Mandla, Bilaspur, Raipur, Durg and some other districs in eastern Madhya-Pradesh. In Sidhi district the Panikas account for 8.0% of the scheduled tribal population. Though dispersed over all tahsils they are somewhat more numerous in Deosar and Singrauli tahsils. Percentage (2.5%) of literacy in the Panikas is much higher than the average of all scheduled tribes and almost compares with that of the Gonds. Traditionally the Panikas are a weaving caste, but in Sidhi district they seem to have taken to agriculture in the main. Agriculture includes 94% of their workers, with cultivators and agricultural labourers being almost equally frequent. Household industry occupies the third place in Panika economy, but includes only 2.2% of their working force. From the viewpoint of size of participation 'other services' come second, employment in category IX being 2.5% of the workers. Category III—Livestock, forestry, hunting etc. accounts for 1.2% of the working force. Participation in other economic activities is negligibly small.

Khairwar : Regarding the ethnology of this tribe the 1931 Census Report of Central India Agency observes "There are differing accounts regarding Khairwars. Dalton identified them with the Cheros while Crooke identified the Mirzapur Khairwars with Savars and Gonds. I should consider their ethnology to be doubtful. The name Khairwar itself is an occupational term and it denotes persons taking to the business of boiling catechu. Very possibly some may be of mixed origin but there is no doubt that a tribe called Khairwar or Kairwar is an aboriginal tribe inhabiting southern Rewa for a long time. The Baland Rajas of this tribe had held considerable sway in the neighbouring parts till the Chandels expelled them. Their descendents still reside in Marwas in Southern Rewa. It is more probable that the Rewa Khairwars are of Kol origin rather than of Savara who have not extended so far into Rewa." The tribe ruled over portions of Sidhi district also before the advent of the Chandels. Sidhi District contains 34.6% of the scheduled Khairwar population of the State. The tribe accounts for 3 4% of the tribal population of the district. They are concentrated in Deosar and Singrauli tahsils.

* Part I—Repart, page 218.

Though mostly dependent on agriculture, the tribe is distinguished from other tribes in having a significantly large—3.6%— participation in category V, manufacturing. This probably refers to small-scale industries carried on by workers outside the village. Household industry is also important, employing 2.1% of the Khairwar working force. The two manufacturing categories together account for 5.7% of the working force. For want of data, it is not possible to pronounce upon the nature of the household industry carried on by the Khairwars.

Agariya:— This tribe of primitive iron smelters has been separately scheduled in the districts of erstwhile Vindhya Pradesh, while it has been clubbed together as a sub-caste of Gond in the rest of the State. It constitutes 2 5% of the district's scheduled tribal population. The Agariyas are more numerous in the Deosar tahsil, though they also inhabit the other two tahsils. Agriculture dominates the economy in their case also, but participation in it is only 72.6% of tbe working force. This is much smaller than the participation in case of scheduled tribes generally, which is 94.4%. A distinguishing feature of the tribe's economy is the high rate of participation in Category IV or household industry. This, presumably, is their traditional household industry of smithy, perhaps of primitive iron-smelting also.Category III and Category IX employ 1.7% and 1.0% of their workers. Employment in other categories is either nil, or is of negligibly small order.

Biar or Biyar— This tribe is returned only from Deosar and Singrauli tahsils, the latter tahsil containing a larger proportion of the tribes population. Sidhi district contains 99.7% of the State's population of this tribe. In the 1931 Central India Agency Report*, they are described as rearing cocks and pigs and following field labour and agriculture as their occupation. The Report adverted to above considered them to be a "mixed caste with some Hindu blood in them". They used to be engaged as waterman and domestic servants by the Rajputs. The tribe is mostly dependent on agriculture now.

Medical and Public Health:— Table B—V of the Handbook gives the occupational classification of workers in the district and incidentally furnishes us with some valuable information bearing on the public health of the district *vis-a-vis* availability of medical and public health services. Group '03' of occupational classification includes all persons working as 'physicians, surgeons and dentists'. It appears that in 1961 Sidhi district had 35 'physicians, surgeons and dentists', the number covering not only doctors in allopathy but also physicians in ayurvedic, homeopathic and sundry other systems of treatment. This gives us a population—physician ratio of 16,575 comparing with a population-physician ratio of 3,416 in the State as a whole. The district is thus rather poorly served by medical and public health services as compared with the State as a whole. Three of the 35 physicians were in urban areas that is Sidhi town, which gives us a population—physician ratio of 1,674 there. In rural areas of the district, on the other hand, there is one physician for every 17,972 of the population, and these are therefore even more poorly served.

It is, however, necessary to consider the availability of doctors in allopathy alone because these are invariably technically qualified, and seem for that reason, to matter most in the public mind [whereas physicians belonging to other systems of medical treatment frequently include self-taught persons (or even quacks) who have not passed any prescribed examination]. The shockingly backward condition of the district as regards doctors in allopathy is brought out from the high population-doctor ratio of 52,739 for the total, and 63,901 for the rural population of the district. The deplorable state of public health services in rural areas of the district is brought in bolder relief when compared with the State as a whole which has a better (comparatively speaking) rural population-doctor ratio of 41,580. The hopelessness of the situation is further brought out when it is considered that the 11 and odd doctors have to serve an area of more than 4,000 square miles.

* Part I, Repart, page 230.

Physicians in ayurved are more than twice as numerous in the district as the doctors in allopathy, and have all been returned from rural areas. Even as regards doctors in ayurved, rural areas of the district are more poorly served than the rural areas of the State as a whole; the latter has one physician in ayurved for 11,473 while in the rural areas of the district, there is one ayurved physician for as many as 25,000 persons. Only one doctor in homeopathy has been returned from the district, and that is from Sidhi town.

Group '04' of the occupational classification includes workers following the pursuits of "nurses pharmacists, and other medical and health technicians". In 1961 the district had 148 such workers, of whom 114 were in rural areas. 11 of these were nurses (all in urban area), 21 midwives and health visitors (one in urban area), 14 nursing attendants and related workers (12 in urban area), 26 Pharmacists and pharmaceutical technicians (2 in urban area), 6 vaccinators (1 in urban area), 24 sanitation technicians (7 in urban area) and 46 medical and health technicians not elsewhere classified (all in rural areas).

Vital Statistics— Vital statistics registration seems to be in a very neglected state. Figures of births and deaths are available only for the last two years of the decade and these are given in Table 6 B.1 of the Handbook. Though for want of data for the whole decade, it is not possible to directly compare the increases revealed by census and the vital statistics (or natural) increase during the decade, still it is not difficult to see that there is gross under registration. Assuming that the Census increase of 115,827 during the decade was uniformly distributed over time (though, it is natural to presume that with progressive decline in the death rate, the annual increase should be greater in later years), there should be an annual addition of 11,529 souls in the district. As against this expected increase, which itself is on the lower side, the vital statiatics show increases of 714 and 679 only for 1959 and 1960 respectively which are less than one-sixteenth each of the expected (conservative) additions. No use emphasising that vital statistics registration claims the urgent and immediate attention of the district authorities in the years to come.

Land-use pattern— Table 2A.1 in part II of the Handbook gives the areas of land under different types of land-use for the ten years 1951-52 to 1960-61 for the district as a whole. Pattern of land utilisation in the district is shown in the following table for the year 1959-60 (the year for which tahsilwise break-up of the areas under different types of land-use was available with State Census Organisation) for the district as a whole and individually for each tahsil.

Land utilisation Pattern 1959—60.

District/Tahsil	Total area	Area under													
		Forests	Not available for cultivation			Other uncultivated land excluding fallow lands				Fallow lands			Cropped area		
			Land put to non-agricultural uses	Barren and unculturable land	Total	Permanent pastures and other grazing lands	Land under miscellaneous tree crops and groves not included in net area sown	Culturable waste	Total	Fallow lands other than current fallows	Current fallows	Total	Net area sown	Area sowh more than once	Total cropped area
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Sidhi District	100	43.65	3.65	9.75	13.40	0.55	0.08	6.69	7.32	6.49	3.11	9.60	26.04	6.44	32 48
Gopadbanas tahsil	100	38 97	4.80	10.83	15.63	0.78	0.14	4.55	5.47	5.07	2.93	8.00	31.92	7.72	39.64

Singrauli tahsil	100	49.00	3.93	3.85	7.78	0.18	0.04	7.18	7.40	8.97	3.31	12.28	23.53	7.33	30.86

Sidhi is one of the five most extensively forested districts of the State. More than two-fifths of its total land area in 1959-60 (also in 1960-61) was covered by forests. A note on the *flaura* and *fauna* of these forests is already given; the predominant species in the forests is *sal (Shorea robusta)*; with *bamboo (Dandrocalamus strictus)* occuring as forest floor. Area under forests is somewhat higher in Singrauli tahsil where it covers almost half of the tahsil's area and is high in Deosar tahsil. Gopadbanas is less extensively forested than these two tahsils.

About one-seventh of the area of the district is recorded as 'not available for cultivation'. Included in this is about one-twenty-seventh of the area recorded as being used for such non-agricultural purposes as house-sites, roads etc. But most of it—about one-tenth of the district's total area—is recorded as 'barren and unculturable land'. The classification, however, has not yet stabilised because, as would appear from Table 2 A.1, in the very next year (i. e. 1960-61) area under 'barren and unculturable' category falls to 3.4% of the total area, while that under 'put to non-agricultural uses' swells to 9.4%.

Culturable wastes occupy one-fifteenth of the district's area; the proportion showing higher values in Deosar and Singrauli tahsils. There is however, very small area—less than 1%—under pastures and unless the cattle are fed from the area recorded as forests, this area does not indicate the potentiality for future extension of cultivation.

Fallow lands also occupy a considerable chunk of the area of the district. This is distributed over old and current fallows in the ratio 2 : 1. The proportion of fallow lands is higher in the Singrauli and Deosar tahsils. Since fallow lands (particularly the old follows) indicate wastage of land resources, it appears from the foregoing table that there is considerable such wastage in Sidhi district.

Net area sown which governs to some extent denseness of population in rural areas accounts for a little more than one-fourth of the total area of the district. This is much smaller than the corresonding State proportion of 36.7% and the difference is, as aforesaid, ascribable to high proportion of forest area in the district, as well as to the high proportion under fallows. The proportion of net sown area exhibits considerable variation among tahsils, fluctuating between the minimum value of 20% for the least densely populated Deosar tahsil to 32% for the most densely populated Gopadbanas tahsil. Density of population and net area sown thus vary directly, which conforms to the expected behaviour pattern.

About 6% of the district's area is reported to have been sown more than once. The proportion has a little higher value of 8% in Gopadbanas tahsil and a smaller value of 4% in Deosar.

Net area sown in the decade has more or less steadily (except in the year 1957-58 when it showed a decline) increased during the decade 1951-61. The shrinkage in cultivated area in 1957-58 seems to have been due to the partial failure of rains in 1957-58 resulting in less area being sown with wheat, barley and other *rabi* crops. However, the net area sown in the district has increased by 40.7% during 1951-61, which is much more than the increase in population during the decade. This means a reduction in the strain on land, the *per capita* net sown area having increased from 1.00 acres in 1951-52 to 1.12 acres in 1960-61.

Cropping pattern : Table 2A.2 in part II of the Handbook shows the cropping pattern in the district during 1951-52 to 1960-61in respect of some principal crops. The table inset below, which pertains to year 1960-61, gives the cropping pattern separately for each tahsil.

Area sown under major Crops in each tahsil of Sidhi district 1961

District/tahsil	Net area sown	AREA UNDER																
		Rice	Jawar	Maize	Wheat	Barley	Total cereals & millets	Gram	Tur	Other pulses	Total pulses	Total food grains	Total food crops	Sesa-mum	Lin-seed	Total oil seeds	total non-food crops	Area sown more than once
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
Sidhi district	100	26.94	2.80	5.21	7.02	13.21	82.29	10.31	7.03	6.95	24.29	106.59	106.86	12.78	4.87	18.96	19.13	26.00
Gopadbanas tahsil	100	32.87	3.32	3.81	10.72	11.83	80.85	15.01	7 40	5.25	27.65	108.50	108.73	10.97	5.63	17.68	17.78	26.48
Deosar tahsil	100	15.02	2.1	7.84	2.87	16.59	82.56	5.51	8.50	8.95	22.96	105.52	105.71	13.52	1.93	17.30	17.43	23.15
Singrauli tahsil	100	26.81	2.15	5.57	1.47	12.20	86.75	2.43	3.31	9.38	15.12	101.87	102.46	17.68	7.18	26.06	26.56	29.02

Food crops—almost entirely food-grains-occupy most of the gross cropped area of the district. In 1960-61, area under food crops was 107% of the net sown area in that year (showing considerable extent of double-cropping in the district). The area under foodcrops was more than the net sown area in each tahsil. Non-grain food crops covered only 0.27% of the net sown area in 1960-61, which shows the relative unimportance of these crops in the district.

Most of the area under food-grains is under cereals and millets, the porportion under them being 82% of the net sown area (in 1960—61) of the district. Rice and *kodon*, both *kharif crops*, together with barley and wheat are the imortant cereal and millet crops grown in the district. Rice which accounted for more than a quarter of the net sown area of the district in 1960-61 is the most widely grown crop.

Proportion of area under rice crop fluctuated from the lowest of 15% in Deosar to the highest of 33% in Gopadbanas tahsil. In Singrauli tahsil rice covered 27% of the net sown area. It would appear from Table 2A.2 that acreage under rice behaved rather erratically during the first four years of the decade, having the lowest value in 1954-55. From this year, however, the area under the crop has steadily increased. In 1960-61, area under rice is 8.1% higher than area under it in 1951-52.

The millet *Kodon* is about as extensively grown as rice in the district. Area under the crop is not directly available from the data, though it can roughly be estimated to have covered 27% of the net sown area in 1960- 61. It occupied a smaller area of about 18% of the net sown area (in 1960-61) in Gopadbanas tahsil, and a higher area of 44% in Deosar tahsil. In Singrauli tahsil, area under *kodon* occupied about 38% of the net sown area in 1960-61.

Barley seems to be the third most important cereal in the district, acreage under it being 13% of the net sown area of the district in 1960-61. The area under this crop was somewhat higher 17%in Deosar tahsil where it is more extensively grown than even rice and has almost the same proportionate value in the other two tahsils.

Wheat, with about one-fourteenth of the net-cropped area under it, is also an important crop. In Gopadbanas tahsil wheat acreage is more than one-tenth of the tahsil's net sown area and almost matches the acreage under barely. Area under wheat is, however, very small in Deosar and Singrauli tahsils. The cereal *jowar* has about 3% of the net sown area devoted to it and it does not show any sizeable variation among the tahsils. Maize, mainly a back garden crop, more or less, matches the area under wheat; infact, in Deosar and Singrauli tahsils it has much more area under it than wheat.

Also important in the cropping pattern of the district are pulses, which were grown on almost one-quarter of the net sown area in 1960-61. Important pulses are gram and *tur*. Proportion of area under pulses fluctuated between the lowest

value of 15% in Singrauli and the highest value of 28% in Gopadbanas, tahsil.

Non-food crops, mostly oilseeds, cover almost one-fifth of the districts' net sown area in 1960-61, the acreage being as high as 27% in Singrauli tahsil and having low comparable—17 to 18 per cent—values in the other two tahsils. Seasamum and linseed are the two important oilseeds grown, the former much more extensively than the latter.

Irrigated area

There is not much of irrigatiom in the district, total irrigated area in 1960-61 being a mere 1,890 acres which is only 0.29% of the net cropped area. During the decade irrigated area per year has fluctuated between 939 acres in 1951-52 and 2,105 acres in 1959—60. In 1960—61, more than three-fourth of the irrigated area was under food crops. Wells are the chief source of irrigation in the district. Two minor irrigation works-the Sidhi dam project at village Guryara in Gopadbanas tahsil and Bamraha nullah project at village Jamhunia Khurd in the same tahsil—are estimated to bring an additional 5,000 acres under irrigation. The first of these was under execution, while the later was still under survey and investigation stage till 1961.

Economy : The table inset below gives a distribution of the district and of each tahsil among the nine categories of workers and non-workers.

District/Tahsil	Total Population	Total Workers	Workers in Category									Non Workers
			I	II	III	IV	V	VI	VII	VIII	IX	X
1	2	3	4	5	6	7	8	9	10	11	12	13
Sidhi District	100	54.1	34.5	14.0	1.1	2.4	0.1	0.1	0.5	Neg.	1.4	45.9
Gopadbans Tahsil	100	51.6	31.3	14.7	1.2	2.1	Neg.	0.1	0.6	Neg.	1.6	48.4
Deosar Tahsil	100	56.2	37.1	14.0	0.7	3.0	Neg.	0.1	0.4	Neg.	0.9	43.8
Singrauli Tahsil	100	59.4	41.4	12.1	1.3	2.5	0.2	0.2	0.3	Neg.	1.4	40.6

Participation rate in the district is 54.1%, which is slightly higher than the State average of 52.3%. This small difference is to be ascribed to the higher proportion of urban population in the State as a whole than in Sidhi district because urban areas have lower participation. In fact, participation rate for the rural population of the State is 55 2%, which is greater than the rate (54.2%) for rural areas of the district. Sexwise, the participation rate is 60.9% for males while for females it is 47.1%. Since the district has 43% of its population in the age-group 0-14, it follows that the working force draws in sizeable numbers from the ranks of children below 14 years, particularly in case of males. Table B-II in Part I of the Handbook shows that 15.9% of the children in ages 0—14 have to work. Child-workers (i. e., below 15 years of age) account for 12.7% of the district's working force.

Participation in the working force is the least in Gopadbanas tahsil, while it is significantly high in Singrauli tahsil. Deosar occupies an intermediate position in this respect. It appears from the table inset above that the higher participation rates in Deosar and Singrauli tahsils are because of higher ratio of workers in agriculture.

Household Economy : Table B—X, prepared from a 20% sample of households, shows that 67%, or about two—thirds of the households in the district are engaged only in cultivation; and 10.6% are engaged in cultivation as well as in household industry. Thus more than 77% of the rural sample households depend upon agriculture.

About a fifth of the rural households are engaged neither in cultivation nor in household industry.

Table B-XI in the Handbook gives a distribution of sample households engaged in cultivation by interest in land cultivated and by size of land cultivated. It shows that 67% of rural cultivating households are masters of the land cultivated by them, holding it directly from the Government. Households who cultivate lands not belonging to them, but taken from others on lease make 8.4% of the cultivating rural households; while 25% cultivate lands partly owned by them or held directly from the Government and partly taken on lease from others. These figures assume considerable importance when seen in conjunction with the land reform measures enacted by the State Government with a view to secure a more equitable distribution of land, and to abolish absentee landlordism. It appears that considerable ground remains to be covered in securing complete fulfilment of the objectives of the enactments.

In an economy almost wholly dependent on agriculture, the size of land cultivated per family is very important. Table B-XI shows that as large a proportion as 8.8% of all cultivating sample households hold less than one acre of land. 14.5% of the rural cultivating households cultivate on holdings between 1 and 2.5 acres in size, 18.7% on holdings between 2.5 and 5 acres while 16.8% cultivate on holdings between 5 and 7.5 acres in size. Taking cumulative percentages, we observe that 23.3% of the rural cultivating cultivate holdings households of less than 2.5 acres; 42.0% on holdings below 5 acres in size while 58.8% cultivate holdings below 7.5 acres in size. For a district like Sidhi where irrigation facilities do not exist, and where the soils are not very fertile, a holding of less than 7.5 acres is any thing but economic, in the sense that it will not ensure even a bare subsistence living to the family. The evidence before us would therefore show that more than two-thirds of the cultivating households in the district depend on uneconomic holdings. The lot of about two-fifths of the households who cultivate less than 5 acres of land must be pitiable.

Taking the sum of net area sown, current follows and old follows as the area held under tenures in the district, we find that in 1960-61, an average cultivating household in the district should own about 10.4 acres of land.* Even of the net sown area in 1960-61, an average cultivating household in the district should own 7.6 acres. When set against the fact that 68.5% of the cultivating households own less than 7.5 acres and 42.0% hold less than even 5 acres of land each, these figures give us some idea of the magnitude of concentration of landwealth in the hands of a smaller number of households.

The following table gives a distribution of 100 workers in the district and in each tahsil by the nine categories of workers.

Working force distributed over Categories, 1961.

District/tahsil	Total workers	Worker in Category								
		I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10	11
Sidhi district	100	63.8	26.0	2.0	4.4	0.1	0.2	0.9	Neg.	2.6
Gopadbanas tahsil	100	60.7	28.5	2.3	4.1	Neg.	0.1	1.1	Neg.	3.2
Deosar tahsil	100	65.9	24.9	1.3	5.3	Neg.	0.1	0.8	Neg.	1.7
Singrauli tahsil	100	69.8	20.4	2.1	4.2	0.4	0.3	0.5	Neg.	2.3
Madhya Pradesh State	100	62.7	16.6	2.9	5.0	2.0	1.0	2.4	0.9	6.5

*Total cultivating households in the district have been taken as five times the sample cultivating households.

The table clearly brings out the overwhelming dependence of the economy on agriculture, which principally employs nine-tenths of the workers. The degree of dependence on agriculture in the district is considerably greater than in case of the State as a whole, the latter including only 79% of its working force in agriculture. This concentration of the workers in the two agricultural working categories, and the consequent want of diversification of economic effort over other sectors of economy is again indication of its backwardness and of the low levels of urbanisation and industrialisation.

Nearly two-third of the working population of the district has been returned as cultivators, by which term are meant persons who cultivate on their own account, whether on owned (including family holdings) or unowned lands, as against agricultural labourers who work on land for others on wages. The proportion of cultivators varies from nearly three-fifths in the slightly urbanised Gopadbanas tahsil to about seven-tenths in the Singrauli tahsil. Agricultural labourers add upto a little more than quarter of the district's working force. In the State as a whole, labourers in agriculture contribute only one—sixth (16.6%) to the working force. The greater proportion of agricultural labourers in the district suggests greater intensity of pressure on land in the district than in the State as a whole.

Category III—Mining and quarrying etc.

This category includes industry in the primary sector of economy other than agriculture, such as mining and quarrying, livestock and animal husbandry, forestry,fishing gardening etc. In Sidhi district roughly 1 out of every 50 workres engages himself in such economic activity. The proportion is lower than the proportion of such workers in the State as a whole. Within the distrct, Gopadbanas and Singrauli tahsils have greater proportion of workers in the category than Deosar tahsil.

In Sidhi district, the activity comprised in Category III, which accounts for more than nine-tenths (95%) of the category's working force is the raising of livestock for milk and animal power (minor group '040' of the industrial classification). The role of mining and quarrying, or of the other actvities comprised in category III is insignificantly small in the district. The Singrauli tahsil of the district is known to contain rich and extensive deposits of coal, but these had not begun to be exploited by the census day and therefore their effect on the economy is not reflected in the working returns of the district.

Category IV—Household Industry.

This category is next to agriculture from the point of view of size of the working force in it. Participation in household industry does not show much variation in the individual tahsils; being owest (4.1%) in Gopadbanas and highest (5.3%) in Deosar tahsil. The household industries commonly pursued in the district are those traditionally associated with the functional castes, like Basor, Ahir, Chamar, Agaria, Luhar, Kumhar, Teli etc. The table inset below lists the first fourteen household industries in the district, indicating against each the proportion af workers in it to all workers in Category IV.

Important household industries in Sidhi, 1961.

S. No.	Code No. of Industry	Description	Proportion of workers in the industry to all workers in Category IV	Remarks (Caste with which associated)
1	2	3	4	5
1	288	Manufacture of materials from bamboo, cork, cane, leaves and other allied products.	27.2	Associated with Basor caste; also Baiga.
2	040	Production and rearing of livestock mainly for milk and animal power such as cow, buffalo, goat	18.6	Ahir caste

S. No.	Code No. of Industry	Description	Proportion of workers in the industry to all workers in Category IV	Remarks (Caste with which associated)
1	2	3	4	5
3	311	Manufacture of shoes and other leather footwear	10.6	Chamar caste
4	369	Manufacture of sundry hardwares such as G. I. pipe, wire, nut, bolt etc.	9.2	Luhar and Agaria
5	207	Production of edible fats and oils (other than hydrogenated oil)	7.1	Teli
6	350	Manufacture of earthenware and earthern pottery	5.6	Kumhar
7	340	Manufacture of structual clay products such as bricks and tiles	4.8	Kumhar
8	200	Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains	3.5	...
9	393	Manufacture of jewellery, sliverwares and wares using gold and other precious metals	3.4	Sunar
10	282	Manufacture of structual wooden goods (including treating timber) such as beams, posts, doors, windows	2.8	Barhai
11	273	Making of textile garments including raincoats and headgear	1.9	...
12	235	Cotton-weaving in handlooms	1.5	...
13	220	Manufacture of bidi	0.9	...
14	231	Cotton-spinning (other than in mills)	0.9	...

Category V-Manufacturing other than household industry

This category employs only 1 out of every 1,000 workers in the district, and is thus not of much importance economically. Participation in it is of negligible dimensions in the Gopadbanas and Deosar tahsils. The figures thus clearly bring out the other wise well-known fact of the extreme industrial backwardness of the district. By 1960, there was not even one registered factory in the district. Hence the figures returned in category V therefore either refer to industries of a registered factory scale, but not registered; or a household scale industry not technically qualifying for inclusion in the definition of household. More than half the workers in category V have been returned in minor group '220' i,e, manufacture of bidi. Tailoring (minor group 273) and manufacture of ammunition, explosive, and fire-work's (minor group 333) and gold smithy employ most of the remaining workers in category V.

Category VI-Construction.

The backwardness of the district as regards constructional activites is apparent from the low proportion—1 per 500—of workers in Category VI. It is somewhat higher in Singrauli tahsil but is only 1 per 1000 in Gopadbanas and Singrauli tahsils. About two-thirds of the workers returned in the category are in the construction and maintenance of roads (minor group 400), while the others are engaged mainly in the construction and maintenance of buildings, and to some extent in the construction and maintenance of tanks, dams bunds waterways or reservoirs etc.

Category VII —Trade and Commerce —

Trade and commerce employs roughly 1 out of every 100 workers in the district and in Gopadbanas and Deosar Tahsils. In Singrauli the proportion of workers in trade and commerce is as low as 1 in 200.

7% of the 2,773 workers in trade and commerce are engaged in wholesale trade mostly in (i) cereals and pulses (ii) in all kinds of fabrics and textile products (iii) in skins, leather and fur and (iv) in intoxicants such as wines, liquors etc.

About 92.5% of the workers in trade and commerce are in retail trade. As is expected about half of these are engaged in retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, poultry eggs, etc. (minor group 640), and a little less than one-sixth in retail trading in "fibres, yarns, dhoti, sari, readymade garments etc". Of the remaining, most of the workers are engaged in retail trading in (i) food-stuffs like sweet-meats, condiments, cakes etc. (ii) tobacco, biri etc. (iii) intoxicants such as liquors (iv) metal, porcelain and glass utensils.

A very small proportion of workers in trade and commerce has been returned in banking and other similar commercial institutions.

Category VIII—Transport, Storage and Communications.

Employment in this category is of negligible dimensions in the district and in each tahsil. Of the 107 workers in the category, 74 are in transport (mostly passenger transport by buses and goods transport by motor vehicles), 32 in communications (mostly in postal and telegraphic communications) and only 1 in storage.

The district has no railway line and is very poorly served by roads The districts headquarters town Sidhi is connected with pacca, all weather roads with the towns of Rewa and Shahdol in case of both *via* Govindgarh. Sidhi is also connected by pacca road with the tahsil headquarters Deosar and Singrauli. The district is reported to have 44 miles of State highway, 93 miles of major district roads, 17 miles of other district roads under the maintenance of PWD 132 miles of forest roads and 430 miles of village roads. Its backwardness as regards road communications is clear from the fact that it has only 38 miles of all weather, pacca roads per 1,000 square miles of area which compares with 129 miles of such roads in the case of the State as a whole. Inclusion of forest roads increases the figure to 71 linear miles per 1,000 square miles of area in the district, while if village roads are also included, the number of miles of road per 1000 square miles rises to 177 miles. In the State as a whole, inclusion of village and forest roads increases the number of linear miles road per 1000 square miles to 184.

The district does not have any railway line. Nearest railhead for Sidhi town is Satna town, about 60 miles away.

Category IX—'Other Services'.

'Oher Services' rank after 'agriculture' and household industry' in the district's economy, judging from the standpoint of size of participation alone. The proportion of workers in 'other services' is highest in Gopadbanas tahsil and lowest in Deosar tahsil.

The table inset below shows the important major groups of 'other services', together with the proportion in each to total workers in 'other services'.

Proportion of workers in certain major groups of 'other services' to all workers in other services.

S. No.	Code No. (Major group)	Description	Proportion in the major group to all workers in 'other services'	Remarks
1	2	3	4	5
1	90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation.	41.7	
2	81	Educational and Scientific Services	19.6	
3	80	Public Services	18.2	
4	88	Personal services	9.7	
5	82	Medical and Health Services	3.9	
6	51	Water-supply and Sanitary services	2.8	
7	83	Religious and Welfare Services	1.2	
8	89	Services not elsewhere classified	1.1	
9	87	Recreation Services	0.8	
10	86	Community services and trade and labour associations	0.6	
11	84	Legal services	0.3	
12	50	Electricity and gas	0.1	

The table shows that of the workers who could be classified, the highest proportion —about one—fifth of all workers in the category— was in educational services. There were most by teachers in schools. More or less equally frequent were workers in 'public service'. About two—thirds of these were in public service in administrative offices and departments of the State Government and about one—fifth in public service in police.

About one—tenth of the persons in Category IX were in 'personal services' . About half of these were household servants like cooks etc. about two—fifths in hair—drsessing (i.e. barbars), and remaining in laundry services (washerman) etc.

Workers in other 'major groups' are in small numbers.

Electrification

The district has not made much headway in electrification, only Sidhi town having been electrified till 31st March 1961.

Summing up

14th biggest and 28th most populous in the State, Sidhi district is typical of the economically undeveloped and educationally backward districts of the State. The district is, though, rich in natural wealth : Singrauli tahsil has seemingly unlimited resources in high—grade coal, while the whole district is rich in forest wealth. The district lies mostly to the south of the southern scarp of Kaimur, and consists of a tangled mass of hills, enclosing numerous valleys, some of them of considerable expanse..

Enjoying a rather extreme climate, the district receives about 40" of rainfall.

The district has an area of 4,012 square miles, accounting for 2.36% of the State's total area, which is distributed among the Gopadbanas, Deosar and Singrauli tahsils more or less in the proportion 5: 4: 2. The western biggest Gopadbanas tahsil is thus about 2-$\frac{1}{2}$ times as big as the smallest Singrauli tahsil, while Deosar is about twice as big as it. Distribution of population among tahsils is even more lopsided with Gopadbanas alone containing almost three-fifth (57.4%) of district's population, Deosar about one—fourth (24.4%) and Singrauli between one-fifth and one—sixth (18.2%). The district ranks 28th in the State in descending order of populousness.

Having on an average 145 persons on square mile against 190 in case of the State as a whole, Sidhi district is the ninth most sparsely populated districts in the State. Tahsilwise variation of population density is Gopadbanas (183); Deosar (97) and Singrauli(144). Proportion of forest area and net cropped

area are important factors reacting on population density of the district in the State context and of the tahsils amongst themselves in the district, the one negatively and the other positively correlated with it.

Except in the decade 1911—21 when it lost heavily in population, population in the district has grown in all the decades of the period 1901—61, at a rate faster than that of the State as a whole. The decade just gone by witnessed an all time high increase of 25% in the district's population, which is slightly higher than the corresponding State increase of 24%. The distribution of this increase has been surprisingly uniform being 25 1,24.5 and 25.1 percent respectively in Gopadbanas, Deosar and Singrauli tahsils.

Till 1951, the district did not have any town; but in 1961, the district headquarters Sidhi has been treated as a town. It has a population of 5,021 which accounts for only 0.9% of the district's population. Sidhi has 1,909 villages, which come to 2.5% of all villages in the State. of these only 1,733 are inhabited, which are distributed among the tahsils as follows: Gopadbanas 57% Deosar 28%; and Singrauli 15%. 45% of the villages in the district have populations below 200 each, about one—third or 33% between 200 and 500, 17% between 500 and 1,000 and only 5% above 1,000. Sidhi is thus a district predominantly of small villages. The most numerous small villages below 200 in population, however, contain only one—eighth of the population. The population living in the somewhat bigger (200—499) of the small villages is proportionate to the frequency of these villages. About a fifth of the rural population lives in medium—sized villages between 500 and 1,000 population.

Age—distribution of the population of Sidhi district is broadly similar to the distribution of the population of the State as a whole,though the district has conspicuously higher proportion of children below 15 years than the State as a whole. More than two—fifths of the population consists of juveniles and children below15 years, about one— third of young persons below 35 but above 15years, about one—fifth of middle—aged persons above 35 but below 60 years and a small proportion—about 1 in 22— of persons above 60 years. According to the rule—of thumb measure of Sundburg, the population of the district is a growing one. The district has 977 females per 1000 males, comparing with 953 females per 1000 males in the State as a whole. Within the district lowest sex—ratio (960) is found in Deosar tahsil, while the highest value of 987 is seen in Gopadbanas tahsil. During 1951—61, sex—ratio has increased in the district by 6 points, which is against the State trend in which the sex—ratio in 1961 is less than the corresponding 1951 ratio by 14 points. This points to some male emigration from the district.

Marital Status data of the population shows that child marriages have still an alarmingly high freqnency in the district, particularly in case of girls. More than one—third of the boys and about three-fifth of the girls in age group 10-14 (starting point of marital status tabulation) have been returned as married. Almost nine-tenth of the girls and two-third of the boys in the ages 15-19 are married. These should also be regarded as cases of early marriages in case of boys generally and of most of the girls.

Sidhi is as yet one of the most backward districts in the march of education and literacy. It has a literacy percentage of 7.8 which compares with the State average of 17.1% and national average of 24%. Only two districts in the State, namely Jhabua and Bastar have lower literacy percentages than Sidhi district. Deosar tahsil with only 5.7% of literate and educated in its population is the educationally most backward tahsil in the district. Singrauli with a literacy percentage of 6.4 is also lagging behind while Gopadbanas with 9.1% has the highest percentage of literacy in the district. Looked in retrospect, however, the performance of the district cannot be said to be bad. In 1951 only 3.6% of the population was literate and educated, which stands more than doubled in 1961. This remarkable achievement has been possible largely owing to the very rapid expansion of educational institutions in the district particularly the primary schools whose

number has increased almost three times since 1951.

Though twenty speeches have been returned as mother tongues in the district, as many as 99.8% of the population speak Hindi—its Bagheli dileot mainly. Other speeches are thus spoken by about 0.2% of the population.

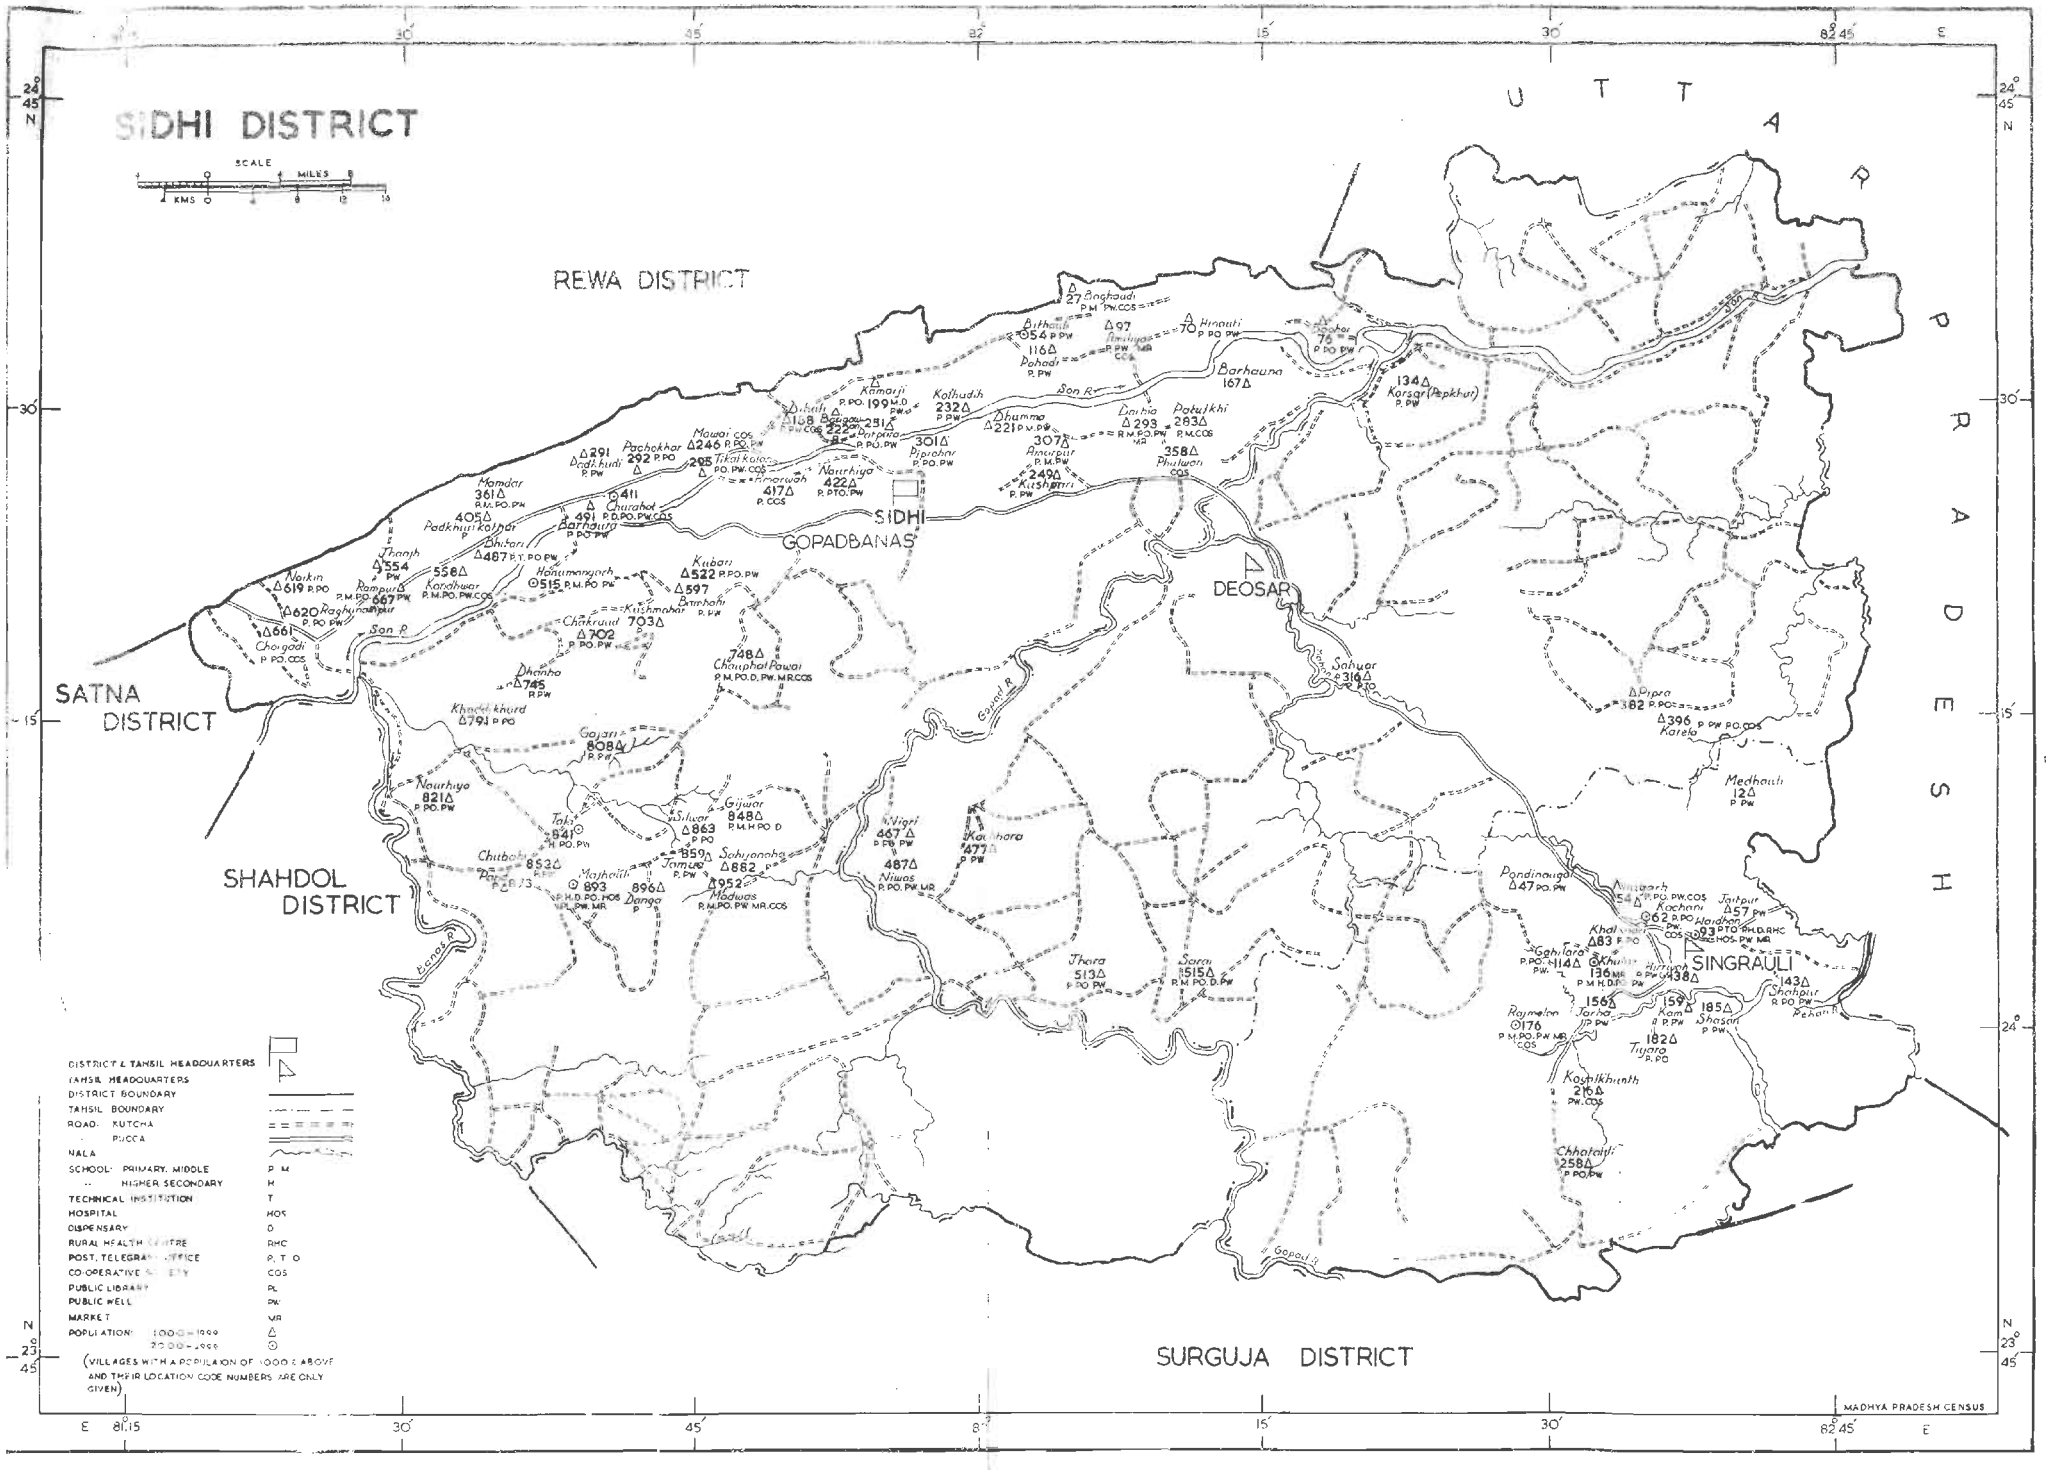

As elsewhere Hindus constitute the vast majority of population accounting for 98%. Muslims who are the next largest group constitute 2% of the population. Followers of other religions are negligibly small in number in the district.

More than two—fifth (43.3%) of the population belongs to the 'scheduled' category enjoying certain constitutional protection. Scheduled castes make roughly one—tenth of the district's population, spread more or less uniformly in the tahsils. Chamar (and synonymous castes) constitute two-thirds of the scheduled caste population followed by Kumhar (14.3%), Dharkar (8.0), Basor or Bansphor (6.8) and Ghasia (1.0%). Scheduled Tribes account for one—third of the district's population the proportion being almost half (48%) in Deosar tahsil and a quarter (26%) in Singrauli tahsil. Important among scheduled tribes are Gond, Kol, Baiga Panika, Agaria, and Biar or Biyar which respectively account for 46, 28, 11, 8, 3, 2, and per cent of the district's scheduled tribal population. Progress of education among scheduled castes and tribes is very low, percentage of literacy being 1.2 in the castes and 2.0 in the tribes. In fact the scheduled population plays no small part in bringing down the general literacy percentage in the district.

54.1% of the population of the district is economically active, matching with a slightly smaller proportion 52.3% in case of the State as a whole. About nine-tenth of the working population is in the two agricultural working categories, 63.8% in Category I and 26% in Category II corresponding State proportions are 62.6% in category I and 16.6% in Category II. The district has thus a larger proportion of workers in agricultural labour. 77% of rural (sample) households are engaged in cultivation. Of these 8.3% do not own the lands cultivated by them while 25% only own part of their cultivated holdings. As regards distribution of land wealth, it may be noted that 8.8% of the cultivating rural households hold ludicrously small holdings of less than 1 acre each, 14.5% hold very small holdings between 1 and 2.5 acres, 18.7% hold small holdings between 2.5 and 5 acres while 16.8% hold somewhat bigger but still uneconomic holdings of 5 to 7.5 acres. Thus almost three-fifths (58.8%) of the cultivating rural households do so on uneconomic holdings of less than 7.5 acres, so that much of the land-wealth is concentrated in the hands of a small number of households.

The lop-sided concentration of working population in the primary sector to the resultant neglect of the tertiary and secondary sectors is an index of the low levels of industrialisation and urbanisation in the district. Household industry comes next to agriculture in the economy of the district as regards size of working force in it. This category gives principal employment to 4.4% of the workers engaged mainly in the traditional caste-based cottage industries. 'Other services' and "mining, quarrying, forestry, livestock etc." employ respectively 2.6 and 2.0% of the working force. The district has very low level of employment in trade and construction, and negligible number of workers in transport.

The district is extremely poor in power resources with only Sidhi town electrified till March 1961. Its extreme backwardness in communications has been noted earlier. The pace of development in the district particularly as regards communications and power requires to be quickened, if it is to reasonably catch up with other parts of the State. The district's richness in high-grade coal and its forest resources point to a hopeful future which depends mainly on their expeditious and proper utilisation.

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note:—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups, showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above note clear :—

Sidhi District total 200(11) signifies that there are 11 establishments in Sidhi District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains." Gopadbanas Tahsil total 207 (1,046) signifies that there are 1,046 establishments in Gopadbanas Tahsil pertaining to Minor Group 207, which stands for "Production of edible fats and oils" (other than hydrogenated oil).' Village 5 Ghopari 369(4) signifies that in village Ghopari which has 5 as its location code number there are 4 establishments pertaining to Minor Group 369, which stands for "Manufacture of Sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery." Sidhi Town, Ward No. 2 209 (5) signifies that there are 5 establishments located in ward No. 2 of Sidhi Town pertaining to Minor Group 209, which stands for "Production of other food products such as sweetmeat, condiments, muri, murki, chira, khoi, cocoa, chocolate toffee and lozenge."

SIDHI DISTRICT
