25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages and Towns in Maharashtra in Marathi

J-1078—i-B (Sholapur).

MAHARASHTRA CENSUS, BOMBAY.

G. PZ. P - 1965. H-294 6

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series:—

(i) The addition of a comprehensive note introducing the district;
(ii) The four-coloured map of the district;
(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages;
(iv) Supplementary information showing basic amenities available for each village; and
(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, everyone has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande, Shri D. G. Pansare and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

POONA: B. A. KULKARNI

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

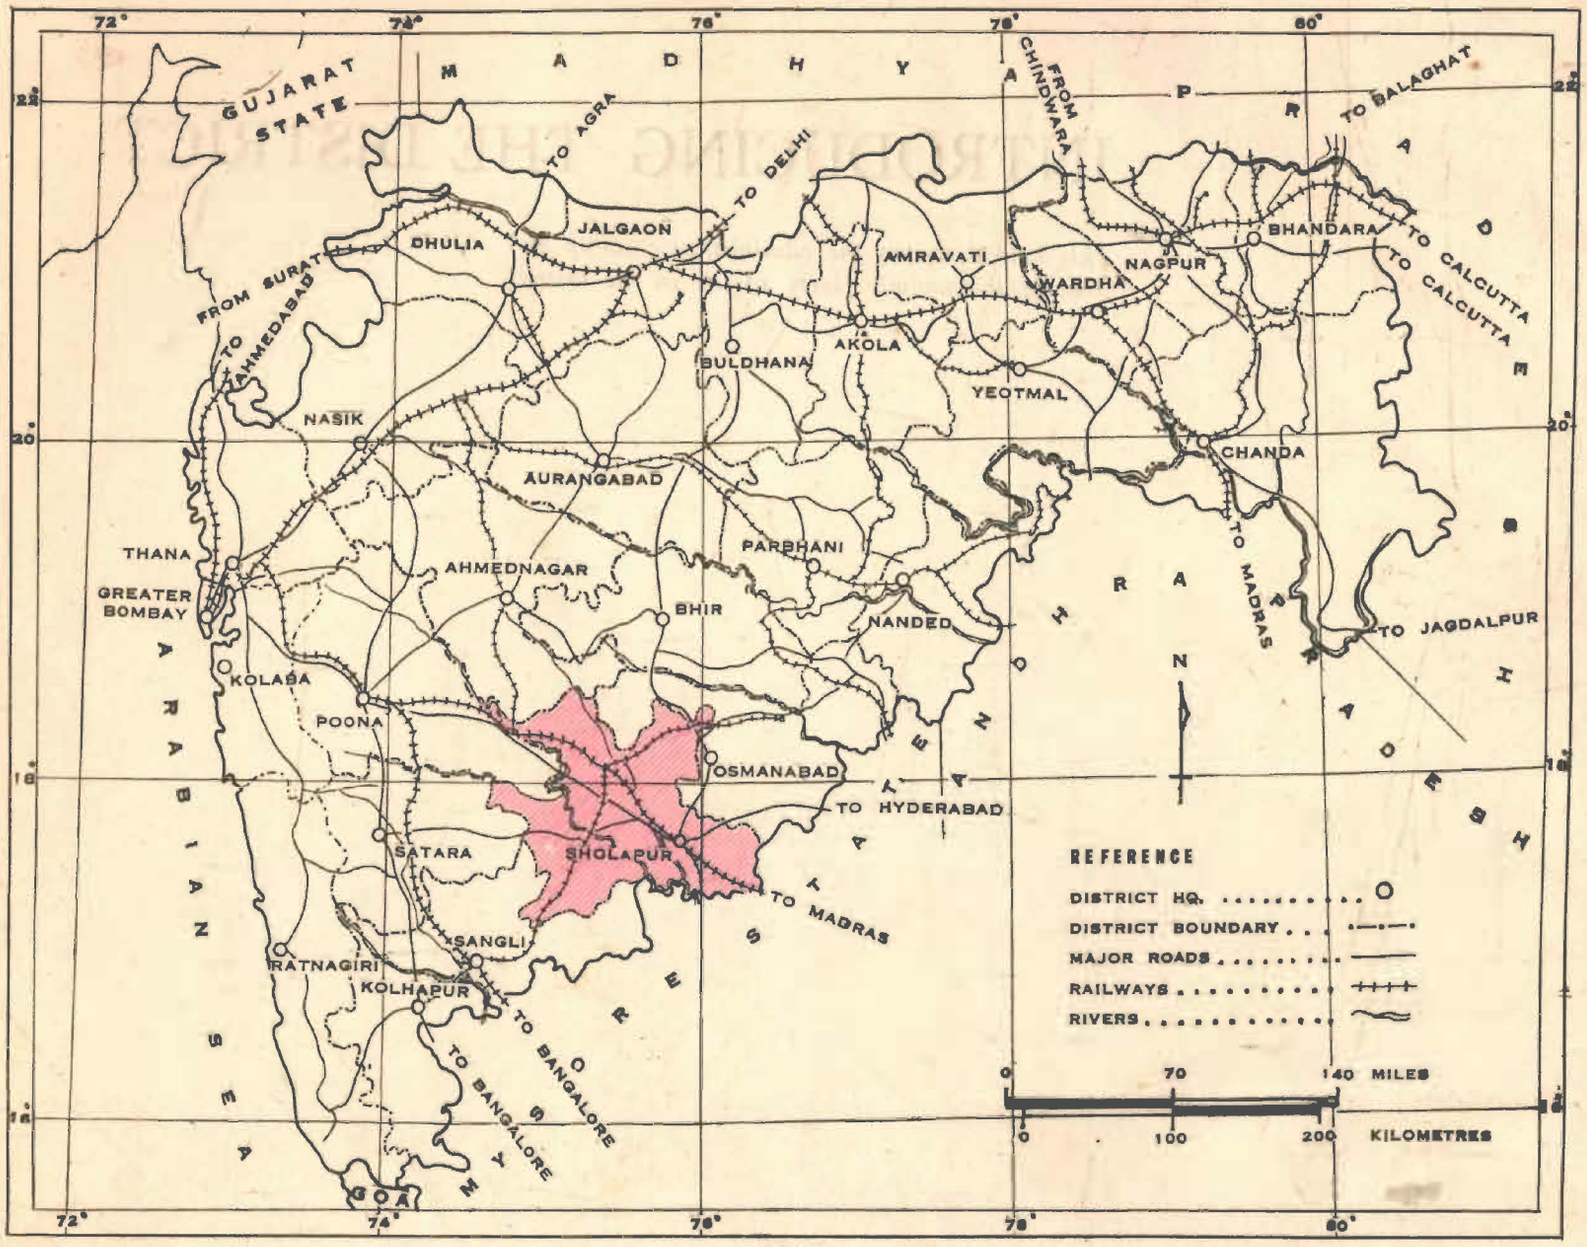

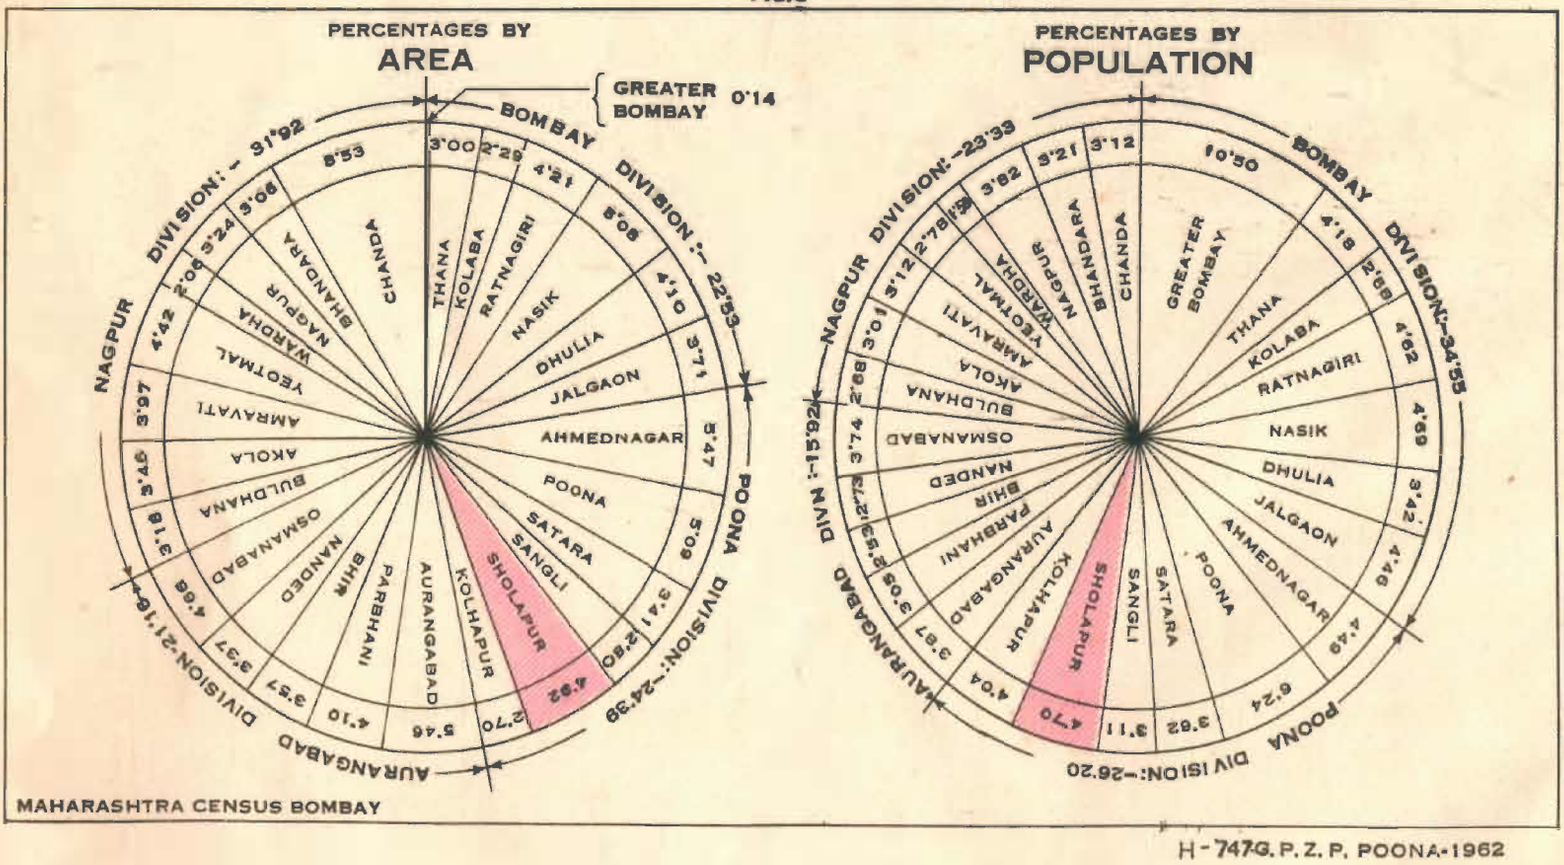

FIG. 3

H-747-G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

The district lies entirely in the Bhima and Sina basins and almost the whole of it is drained by either Bhima river or its tributaries.

The Bhima flows south-east through the central part comprising Karmala, Madha, Pandharpur, South Sholapur and Mangalwedha talukas. Most of the Malshiras taluka is drained by the river Nira, which is the right bank feeder of the Bhima. Sangola, parts of Pandharpur and Mangalwedha talukas are drained by the Man river, another tributary of the Bhima. The eastern talukas of Barshi and North Sholapur and parts of Karmala, Madha and South Sholapur talukas are drained by Sina river. Parts of Barshi and Madha talukas lie in the basin of Bhogavati river, a tributary of Sina river.

The slope of the district is towards east or south-east.

The district lies between 17° 10′ and 18° 32″ N. latitude and 74° 42′ and 76° 15′ E. longitude. It is surrounded by Ahmadnagar and Osmanabad districts in the north, Osmanabad district and the Andhra Pradesh in the east, Sangli district and the Mysore State to the south and Satara and Poona districts towards the west.

The area of the district is 5,813·5 sq. miles and its population in 1961 is 1,860,119. In terms of area and population it forms 4·92 per cent and 4·70 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

There is no important hill system in the district. Only in the north of Barshi taluka several spurs of Balaghat range pass south for a few miles. Of these, the chief is the Badshighat, about fourteen miles east of Barshi taluka.

There are also scattered hills in Karmala, Madha and Malshiras talukas. In Karmala, Baghoba hill about 210 feet high and Bodki hill about 190 feet high lie about sixteen miles south-east of Karmala. The top of these hills is flat. In Madha taluka, Chinchgaon hills, about 300 feet high, lie about four miles north of Madha taluka. The Gurnad hill is in Malshiras taluka.

The low table-land and small separate hills in Karmala and Madha talukas act as the watershed between Bhima river and Sina river.

Important Rivers

The chief rivers are the Bhima, with its right bank feeders Nira and Man, and its left bank feeders the Sina and Bhogavati.

The Bhima rises in the Sahyadris at Bhimashankar in Khed taluka of Poona district. It is one of the chief feeders of the Krishna. It runs south-east through Poona, Ahmadnagar and Sholapur districts and the Bijapur district of Mysore State and falls into the Krishna near Raichur in Andhra Pradesh. The drainage area of the Bhima within the district includes on the left bank western half of Karmala, Madha, Pandharpur and South Sholapur talukas and on the right bank the southern part of Pandharpur and Mangalwedha talukas. The length of the Bhima within the limits of the district is 180 miles.

The Nira rises in the Sahyadri in Poona district. It runs south-east and east along the borders of Poona, Satara and Sholapur districts. It falls into the Bhima about five miles south-west of Tembhurni in Madha taluka. The river Man on entering Sangola taluka from the western border flows eastwards draining Sangola taluka and parts of Pandharpur and Mangalwedha talukas. It meets Bhima near Pandharpur. The Sina, which flows from north to south-east parallel to Bhima, drains the talukas of Barshi and North Sholapur on the left and part of Karmala and Madha and South Sholapur on the right. Bhogavati, a tributary of the Sina, rises in the Balaghat range in the north-east of Barshi taluka and falls into Sina river near Mohol in Madha taluka.

Climate

Monthly temperature records are available for Jeur and Sholapur stations only.

The rainy season starts from mid-June and lasts up to the end of October. It is followed by cold season from November to February and hot season from March to mid-June.

During cold season the air is generally bright, clear and bracing. The hot season is marked by a dry scorching heat, strong hot winds and occasional dust-storms. Nights are, however, generally cool. The rainy months are pleasant. The temperature is generally mild and even. Except the hot months of March, April and May, the climate is free from extremes of heat or cold. Bitter cold is almost unknown.

There are very little variations in the climate in different parts of the district. The climate is dry and hot in all parts except that portion of Barshi taluka which lies above the Ghats, where it is somewhat cooler than in the rest of the district. While Madha and Karmala are comparatively hotter, Akkalkot taluka has fairly equable climate and fresh pleasant winter.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall all over the District is uncertain and scanty with an annual average of 625 mm. Only in Barshi taluka, which is nearer the Balaghat range the average is 725 mm.

The district gets rain from south-west as well as from north-east monsoons. Throughout the district the rain starts in June and continues up to October. The precipitation during June to August is rather precarious. The showers in September and October are heavy and more assured.

Dependability of Rainfall and Scarcity Areas

The mean rainfall at Sholapur station is 673·10 mm. The standard deviation is 195·07 mm. and the coefficient of variability is 28·97 per cent. As the coefficient of variability is 28·97 per cent the degree of reliability of rainfall in Sholapur may be said to be moderate.

Many parts of the district have occasionally suffered from scanty and uncertain rainfall in the past. The Fact-Finding Committee appointed by the Government of Bombay in 1960 had also reported that the rainfall is not dependable in the following areas and they are likely to be affected by scarcity condition as shown below :—

Area	Grade	Estimated frequency
Karmala Taluka	A ..	Once in three years.
Sangola Taluka	A ..	Do.
Madha Taluka	B ..	Once in six years.
Pandharpur Taluka	B ..	Do.
A small southern portion of Malshiras Taluka.	B ..	Do.
Mohol Taluka	C ..	Once in ten years.
Mangalwedha Taluka ..	C ..	Do.
Akkalkot Taluka	C ..	Do.
North Sholapur Taluka ..	C ..	Do.
South Sholapur Taluka ..	C ..	Do.
18 villages situated in the north-east corner of Barshi Taluka.	C ..	Do.

Thus, all the talukas of the district are generally scarcity areas.

Soils

The soil of South Sholapur is of three kinds, Kali or black, Barad or coarse gray and Tambadi or reddish. Except in Barshi where black soil is the rule and coarse gray is rare, most of the district is either gray or red.

In North Sholapur taluka, the soil is generally light and of moderate depth. Deep black soil of richer quality is, however, predominant between the two rivers, below Kamti Khurd on the Sina and Vadapur on the Bhima. Jowar, pulses, groundnut and bajri to a small extent are grown in this soil.

In the Pandharpur taluka, the soil is generally poor and capable of producing mostly jowar, bajri and kardai.

The soil of Sangola taluka is for the most part poor and shallow. Along the banks of the rivers, and in low-lying position, however, some small tracts of fairly black clayey soil of fair depth are found. Jowar, bajri, groundnut and pulses are grown in this taluka.

Barshi taluka has the best soil in the district. In this taluka the richest land is found at the bottom of the slopes which commonly become almost level with the banks of the streams. The soil is generally black and fertile. Rice, jowar, bajri, wheat, tur, cotton, mung, groundnut and til are grown in this soil. The soil of Malshiras taluka is in general shallow and light in colour and not retentive of moisture. Moreover, some part is stony. It is hard and sterile near the foot of the hills. Fertile black soil of sufficient depth is found in the numerous valleys and in a few villages on the banks of river. The principal crops are jowar and bajri. Wheat and kardai or safflower are also grown.

Larger portion of Madha taluka has generally shallow soil with varying depth and quality. Soils in the villages along the bank of the Sina are mostly black and of great depth and excellent quality. Along the slopes of the ridges, the soil is shallow and at times covered with loose stones. Where dams have been constructed, the soil is fertile. In the low-lying tracts, the soil is of brown to dark black colour and of richer quality, but the richest deep black soil of great depth is found along the river Sina. Jowar, bajri, pulses, cotton and oil-seeds are grown in it. Wheat is raised as a late crop mainly on irrigated lands.

In Akkalkot taluka, the soil is rich in the vicinity of the rivers Bhima and Sina. In other part though covered in some places with loose stones it is mostly black and of fairly good depth. There is a distinct difference between the quality of the soil on the high land and that of in the hollows.

The former is light and stony and in places uncultivable waste ; but elsewhere it produces quite a good crop of jowar. In the hollows the soil is richer and deeper and produces heavy crops when there is sufficient manure.

In Karmala taluka about one-half of the soils is black and one quarter each red and barad. The black soil here is somewhat short of depth, except along the banks of the nalla and in the valleys of the Sina river, it is somewhat stiff and clayey. There is also a small quantity of alluvial land which is chiefly found along the banks of the Bhima river. Jowar, karadi and bajri are grown in it.

The soils of Mangalwedha taluka are deep black soils.

Minerals

There are no minerals of any importance in the district.

Forests

The total area under forests which is scattered is 49·38 sq. miles. All these forests are scrub forests, growing thorny bushes. The forest area is much scattered. It may be roughly divided into two tracts, hills between Barshi and Osmanabad on the extreme north-east and hills to the south of Malshiras and Sangola in the extreme south-west.

Natural Zones

The district can be broadly divided into three natural zones. The eastern zone, comprising Barshi, North Sholapur, South Sholapur and Akkalkot talukas, has medium to deep black soils, somewhat assured rainfall and grows jowar, bajri and pulses. It accounts for 32·86 per cent of the total geographical area of the district. The central or the transitional zone, comprising Mohol, Mangalwedha, eastern parts of Pandharpur and Madha talukas, has uncertain rainfall, light to medium soil and grows kharif and rabi crops. The western zone comprises the scarcity areas of Karmala, Sangola and Malshiras talukas and western parts of Madha and Pandharpur talukas with lighter soils and uncertain rainfall. Mainly rabi crops are grown in Karmala, Pandharpur and Madha talukas and Kharif crops such as bajri and groundnut in Sangola taluka. Large part of Malshiras taluka receives protection from scarcity due to the irrigation provided by Nira Right Bank Canal and sugarcane is the major crop of that area.

ADMINISTRATIVE SET-UP

Brief History

The areas which now form Sholapur district were formerly in Ahmadnagar, Poona and Satara. Karmala was in Ahmadnagar, Mohol in Poona and Pandharpur, Malshiras and Sangola in Satara (which was then an Indian State). Barshi and Sholapur frequently changed between Ahmadnagar and Poona districts. The Sub-Collectorate of Sholapur was formed under Ahmadnagar district in 1830. The district of Sholapur was formed in 1838 and consisted of the following sub-divisions : Sholapur, Barshi, Mohol, Madha, Karmala, Indi, Hippargi and Muddebihal. That district was, however, abolished in 1864. In 1869, the sub-divisions of Sholapur, Barshi, Mohol, Madha and Karmala together with Pandharpur and Sangola from Satara district were again formed into Sholapur district to which Malshiras was transferred from Satara district in 1875.

There were no major changes in the district or taluka boundaries between 1891 and 1941.

Consequent upon the merger of the former Indian States, two villages of Jamkhandi, 21 villages of Jath State, 13 villages and one town of Kurundvad State, 13 villages of Miraj Senior State, 3 villages of Miraj Junior, 28 villages and one town of Sangli State and a part of Akkalkot State were added and three new talukas of Mohol, Akkalkot and Mangalwedha were newly formed in 1949. Sholapur taluka was split up in two talukas, *viz.*, Sholapur South and Sholapur North.

In 1950, 53 enclave villages were transferred from Hyderabad State and included in the district in exchange of 12 enclave villages belonging to this district transferred to Osmanabad and Gulbarga districts.

One village from Indi taluka of Bijapur district was also added to Mangalwedha taluka of this district in 1950.

With the Reorganisation of States in 1956, the district was included in Bombay State and since 1960, it forms part of Maharashtra.

Present Set-up

For administrative purposes, the district is at present divided into 11 talukas. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka are shown on the next page.

District/Taluka	Name of Headquarters	Area (in sq. miles)	No. of inhabited villages	No. of towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
SHOLAPUR DISTRICT	Sholapur	5,813·5	946	10	1,860,119	100·0	100·0
1 Karmala Taluka	Karmala	621·5	96	1	128,345	10·7	6·9
2 Barshi Taluka	Barshi	627·8	129	1	220,895	10·8	11·9
3 Madha Taluka	Madha	596·5	96	1	156,511	10·3	8·4
4 Malshiras Taluka	Malshiras	587·7	75	..	166,521	10·1	9·0
5 Pandharpur Taluka	Pandharpur	497·6	82	1	153,915	8·6	8·3
6 Mohol Taluka	Mohol	549·5	88	..	123,078	9·4	6·6
7 North Sholapur Taluka	Sholapur	284·3	43	1	405,833	4·9	21·8
8 South Sholapur Taluka	Sholapur	461·5	80	..	112,504	7·9	6·0
9 Sangola Taluka	Sangola	609·8	68	1	128,012	10·5	6·9
10 Mangalwedha Taluka	Mangalwedha	440·5	71	1	89,172	7·6	4·8
11 Akkalkot Taluka	Akkalkot	536·8	118	3	175,333	9·2	9·4

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and three Deputy Collectors who hold charge of the three Revenue Divisions, *viz.*, Sholapur, Madha and Pandharpur and have their headquarters at Sholapur, Kurduwadi and Pandharpur. Eleven Mamlatdars are in charge of eleven taluka offices.

Land Revenue Settlements

The original Revenue Survey and Settlement of different talukas in the district was completed between 1839 and 1871. The First Revision Settlement was completed between 1871 and 1909 and the Second Revision Settlement between 1904 and 1926. The Third Revision Settlement has been introduced in 1947-48 only in Karmala, Madha, Malshiras and Sholapur talukas.

The land revenue rates have not been revised since then in spite of the expiry of the term of the revision settlements. Mohol taluka was carved out of Madha and Sholapur talukas in 1949. Sholapur taluka being unwieldy, has been divided into two talukas—North Sholapur and South Sholapur—with headquarters at Sholapur.

Mangalwedha taluka formerly belonged to the Sangli State. After merger of States in 1948-49 it has been transferred to Sholapur district. 21 villages from Jath State, 10 villages each from Sangola and Pandharpur talukas have also been included in this taluka. At the time of original survey in 1868, there were 33 Darbari villages in the old Mangalwedha taluka. The rates were originally guaranteed up to 1882, but extended till 1902. Revision Settlement was taken up in 1908.

Akkalkot taluka formerly belonged to Akkalkot State. The original settlement was introduced in 1870 and was guaranteed for 20 years. The 1st and 2nd Revision Settlements were introduced in 1894-95 and 1925-26, respectively, and each guaranteed for 30 years.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during the second revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlement untaxed. The comparative incidence of land revenue from field to field is thus generally the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small bandharas, the land revenue is integrated and is inclusive of the charge for water supplied. For lands irrigated under Government canals, the land revenue at dry land rates is assessed and recovered by the Revenue Department while the water rates determined annually on the basis of actual crops raised are assessed by the Irrigation Department and recovered by the Revenue Department.

Table 24 in Part III shows demand and collection of land revenue during the last ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam or Jagir villages had not been covered by most of them. In fact, some of the Inam or Jagir villages were unsurveyed and unsettled as late as in 1947. That work has now been completed. Because of such recently settled villages and because of the territorial changes in the taluka boundaries from time to time, most of the talukas

today have a more varied pattern of land revenue assessments than what is seen in the reports of earlier settlements. Even then the maximum rates fixed at each settlement or revision settlement or the average land revenue rates per acre should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. Those rates for dry, garden or rice lands for each taluka are as follows :—

Taluka	Original settlement or Revision settlement	Year	Guarantee period	Number of villages	Average land revenue per acre	Group	Maximum rates per acre		
							Dry lands	Garden lands	Rice lands
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Assembly and Parliamentary Constituencies

Since 1957 the district has 12 Assembly seats. In 1957, Sangola and Madha constituencies were double member constituencies with one of the two seats from each constituency reserved for Scheduled Castes. After abolition of the double-member constituencies in 1961, the seats from Mangalwedha and Madha are reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly Constituency	Number of voters on rolls
(1) Akkalkot	64,998
(2) South Sholapur	64,219
(3) North Sholapur	65,215
(4) Barshi	73,524
(5) Sholapur City North	89,574
(6) Sholapur City South	70,021
(7) Pandharpur	76,702
(8) Malshiras	78,253
(9) Sangola	76,026
(10) Mangalwedha	65,512
(11) Karmala	75,928
(12) Madha	72,693
Total ..	872,665

In the 1962 General Elections, the Assembly Constituencies of Akkalkot, South Sholapur, North Sholapur, Barshi, Sholapur City North and Sholapur City South together formed one Parliamentary constituency called Sholapur constituency and the remaining Assembly constituencies of Pandharpur, Malshiras, Sangola, Mangalwedha, Karmala and Madha Assembly constituencies together formed another Parliamentary constituency called Pandharpur constituency.

The total number of voters on rolls in the district in 1961 was 872,665. The total population 21 years and above according to 1961 Census is 850,917. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and the Sessions Judge is the head of the judicial department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Mamlatdars are vested with magisterial powers. But those powers are limited to sections 107, 109, 110, 133 and 143 of the Code of Criminal Procedure, 1898 (V of 1898), and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other Magistrates who try criminal cases in the district. This separation of the judiciary from the executive has been brought about in the district in 1953.

The District and Sessions Judge is assisted by two Assistant Judges and Additional Sessions Judges and two Assistant Judges and Assistant Sessions Judges. They have jurisdiction over the entire district. They attend to civil and criminal work both original and appellate.

The Civil Judge (Senior Division) attends to civil suits in the whole of the district.

There are also 15 Civil Judges (Junior Division) and First Class Judicial Magistrates who have their headquarters at different taluka places in the district. They deal with civil and criminal cases.

Two Special First Class Judicial Magistrates deal with prohibition cases and municipal cases, respectively, in their respective areas.

There is also one First Class Judicial Magistrate for Sholapur Taluka Police Station and Sholapur City Sadar Bazar Police Station.

Police

The Police force in the district functions under the (District) Superintendent of Police who is assisted by 2 Deputy Superintendents and 2 Circle Police Inspectors. There are 21 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

	Police Station Headquarters	No. of Villages
Karmala Taluka ..	1 Karmala	96
Barshi Taluka ..	2 Barshi	1
	3 Vairag	66
	4 Pangri	61
Madha Taluka ..	5 Madha	52
	6 Tembhurni	48

North Sholapur Taluka ..	11 Fouzdar Chawadi ..	1
	12 Jail Road	
	13 Sadar Bazar ..	
	14 Salgar Wasti ..	
South Sholapur Taluka ..	15 Sholapur Taluka ..	56
	16 Mandrup	35
	17 Valsang ..	36
Sangola Taluka ..	18 Sangola	69
Mangalwedha Taluka ..	19 Mangalwedha ..	71
Akkalkot Taluka ..	20 Akkalkot North ..	50
	21 Akkalkot South ..	71

Average number of villages and population per Police Station in the district is 45 and 88,577 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

All the ten towns in the district have Municipal Committees established under the Bombay Municipal Boroughs Act of 1925 and the Bombay District Municipal Act of 1901. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and Scheduled Tribes and for women are shown below for each Municipality separately :—

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 Population	Total No. of Municipal Councillors	Seats reserved for		
							Scheduled Castes	Schedule Tribes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1	Karmala	1867	1962	4	11,248	15	2	..	2

10	Dudhani	1910	1959	4	6,423	12	2	..	1

*Municipal Corporation of Sholapur City came into existence in May 1964.

The municipalities of Pandharpur, Sangola and Sholapur are more than a century old, while those of Barshi and Karmala are nearly a hundred years old. Kurduwadi Municipality was formed only in 1954.

The 10 Municipalities together cover the entire urban population or 27·95 per cent of the total 1961 population of the district.

The taxation level of each of the Municipalities is shown in the next column.

Per capita municipal tax, appears to be high at Pandharpur and Barshi. However Pandharpur being a centre of pilgrimage most of the incidence falls on pilgrims who visit the town on various occasions. Barshi is a trade centre and the incidence of tax is borne by the cultivators who bring their produce for sale in the market.

Name of the Municipality	1961 Population	Year 1961-62		
		Total receipts	Receipts from municipal taxes	*Per capita* municipal tax
		Rs.	Rs.	Rs.
1 Karmala ..	11,248	2,74,228	1,46,462	13·02

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promoting development of democratic institutions and securing greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 11 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries except in the case of municipal towns which are not covered by them. There is now no town in this district which does not have a municipal committee. The Zilla Parishad covers 96·50 per cent of the area and 72·05 per cent of the total population of the district. The population covered includes total rural population. The number of villages and population included under the Zilla Parishad and each Panchayat Samiti are shown below. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961 :—

—— (1)	Name of Headquarters (2)	Area in sq. miles (3)	No. of inhabited villages (4)	Population in 1961 (5)	Percentage by area (6)	Percentage by population (7)
Sholapur Zilla Parishad	Sholapur	5,609·8	946	1,340,245	100·0	100·0

11 Akkalkot Panchayat Samiti	Akkalkot	491·5	118	136,668	8·7	10·2

Constitution

The Zilla Parishad has 54 directly elected councillors. Out of these 54 seats, 8 seats are reserved for Scheduled Castes. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of all Panchayat Samitis are also *ex officio* councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a chairman of a co-operative society conducting the business of purchase and sale of agricultural produce in the area of the Block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of village panchayats are also elected members of the Panchayat Samiti. The number of Sarpanchas elected is at the rate of two for each electoral division in the area of the Block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected Councillors.

An Officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as a Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two Subject Committees are presided by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the Subject Committees is achieved through the Standing Committee which includes the Chairmen of all the Subject Committees as members.

The Panchayat Samitis do not have Subject Committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards the developmental and administrative functions of Government are now, with the creation of democratic bodies at the district and Block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities, at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the village panchayats, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Local Board, District School Board and District Panchayat Mandal. The functions of non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalization grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants which will be paid by Government to Zilla Parishad will include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable. Incentive grants calculated to achieve speedier development and grants for Plan Schemes are also payable to Zilla Parishad.

If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in Block (taluka), the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 175·53 lakhs. The major portion of the receipts is of receipts from Government. They are 92·7 per cent and the Zilla Parishad receipts are 7·3 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 175·33 lakhs. Following are the major items of expenditure :—

	Per cent
General Administration	2·7
Education	57·9
Community Development Project	9·9
Buildings and Communications	10·6
Miscellaneous	5·3
Other Items	13·6

Taxation

The Zilla Parishad has raised the rate of cess on land revenue to 80 naye paise per rupee of land revenue from 19th February 1964.

Per capita annual expenditure of the Zilla Parishad over different development heads is as follows :—

	Rs.
General Administration	0·35
Education	7·57
Community Development	1·30
Buildings and Communications	1·38

Establishment

The establishment of the Zilla Parishad comprises the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 3 Class I and 32 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV categories is 2,005. In addition there are 4,714 primary teachers and 180 Gram Sevaks. The number of talatis is 346.

VILLAGE PANCHAYATS

The number of independent village panchayats, group village panchayats and the number of villages covered by group village panchayats are shown below :—

	Taluka	No. of inhabited villages	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1	Karmala	96	45	23	51
2	Barshi	129	88	15	41
3	Madha	96	40	22	56
4	Malshiras	75	37	16	38
5	Pandharpur	82	39	16	43
6	Mohol	88	46	15	42
7	North Sholapur ..	43	27	7	16
8	South Sholapur ..	80	50	12	30
9	Sangola	68	51	6	17
10	Mangalwedha	71	27	14	44
11	Akkalkot	118	36	28	82
	Total ..	946	486	174	460

All the villages in the district are thus covered by the village panchayats.

The break-up of the total annual income of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000)	Percentage of total income
	Rs.	
Grants	1,151	42·82
Taxes on houses and properties ..	350	13·02
Octroi	194	7·22
Other taxes	750	27·90
Total taxes	1,294	48·14
Income from other sources	243	9·04
Total income	2,688	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more.

The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The Village Panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

The number of village panchayats imposing taxes on houses and properties is 660. 55 villages have started collecting octroi.

The break-up of the total annual expenditure of all the village panchayats in the district for the year 1961-62 is as follows:—

Item	Amount (in '000) Rs.	Percentage of total expenditure
Administration	461	17·94
Health and Sanitation	376	14·63
Public Lighting	204	7·94
Other Items	1,529	59·49
Total Expenditure	2,570	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells or construction of Panchayat Ghars, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

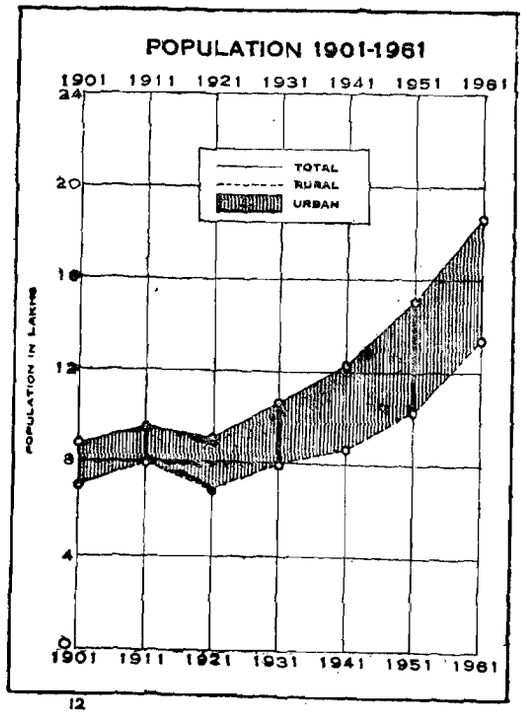

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—1961.

Variation

The population of the district and decade variation rates since 1901 are as follows:—

Year	Population	Decade Variation	Rate of Variation
1901	884,101	..	..
1911	956,207	+72,106	+8·16
1921	909,248	—46,959	—4·91
1931	1,069,524	+160,276	+17·63
1941	1,228,085	+158,561	+14·83
1951	1,505,316	+277,231	+22·57
1961	1,860,119	+354,803	+23·57

Figure below shows the total, rural and urban population of the district for the last seven Censuses.

The population of the district increased by only 8·2 per cent in the decade 1901—11. In the following decade the severe influenza epidemic took a heavy toll of life and the population decreased by nearly 5 per cent. Conditions improved after 1921 and there had been a distinct change in the trend of variation since then. The population increased by 17·6 per cent in 1921—31, 14·8 per cent in 1931—41 and 22·6 per cent in 1941—51. The high growth rate in 1921—31 than in 1931—41 may be attributed to the recovery from the influenza epidemic of 1918.

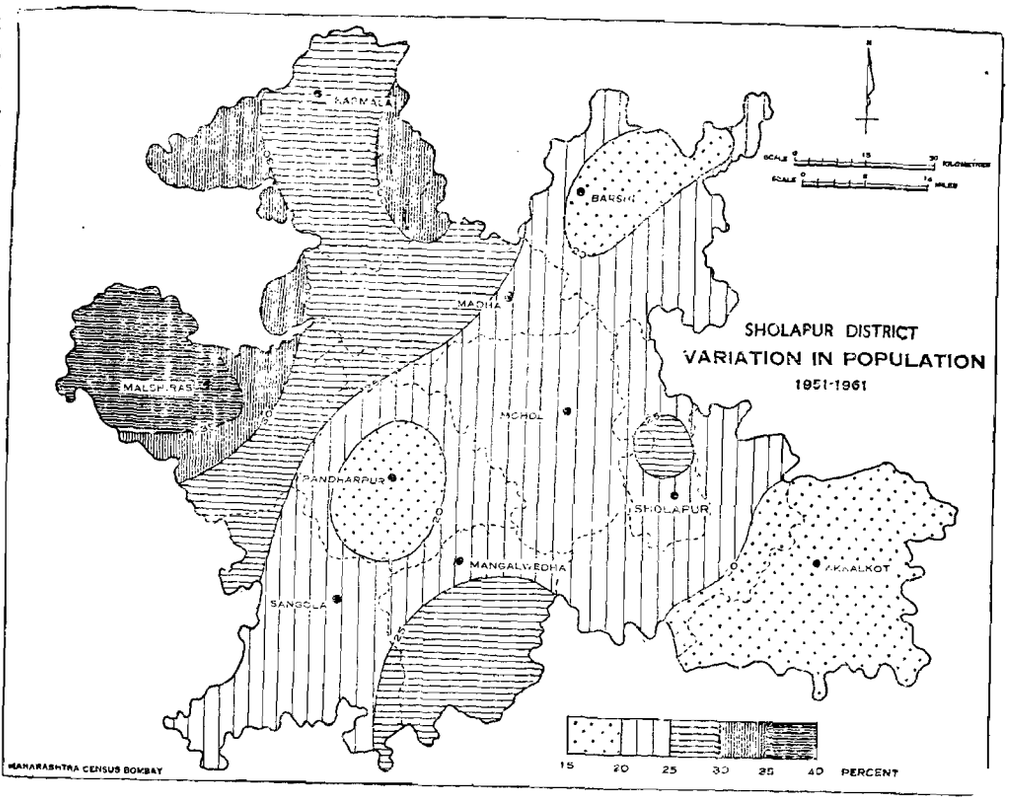

In the last two decades (1941—51 and 1951—61) the population has increased at very high rates of 22·6 per cent and 23·6 per cent, respectively. The rate of growth in 1951—61 is almost of the same order as that of the State.

The 1951—61 decade variation for the district and each of the talukas is as follows:—

	Percentage Decade Variation 1951—61
SHOLAPUR DISTRICT	+23·57
1 Karmala Taluka	+28·23
2 Barshi Taluka	+18·27
3 Madha Taluka	+28·10
4 Malshiras Taluka	+35·57
5 Pandharpur Taluka	+19·73
6 Mohol Taluka	+20·53
7 North Sholapur Taluka	+24·63
8 South Sholapur Taluka	+20·32
9 Sangola Taluka	+23·10
10 Mangalwedha Taluka	+27·37
11 Akkalkot Taluka	+17·16

Figure on page (12) shows the areawise pattern of 1951—61 growth of population within the district.

There are significant differences in the rates of growth of population in various talukas. Malshiras taluka recorded the highest increase (35·6 per cent) while Akkalkot taluka had the lowest increase (17·2 per cent) over 1951. The rates of variation in Malshiras, Karmala, Madha, Mangalwedha and North Sholapur talukas are above the district average and those of the remaining talukas are below that average. Malshiras taluka which has no town in its limits has shown the highest decade rate of growth in the district. This may be due to the growth of sugar industries in the taluka. It is rather surprising to note that Barshi taluka with textile industry has recorded a low rate.

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows:—

	Sholapur District	Maharashtra
1901—1961	+110·40	+103·97
1921—1961	+104·58	+89·71
1951—1961	+23·57	+23·60

During the 40 years of accelerated growth since 1921, the population of the district increased by 104·58 per cent and that of Maharashtra by 89·71 per cent. The district growth rate in the last decade had been slightly lower than the State.

Density of Population

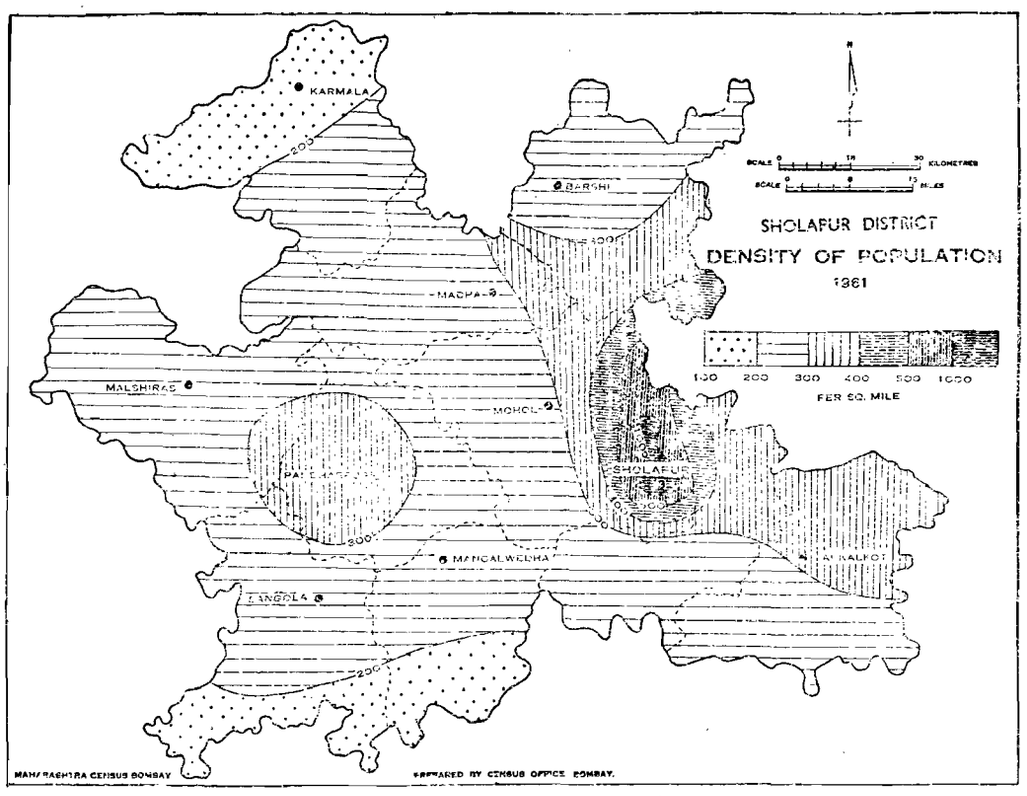

The densities for Maharashtra, Sholapur district and its eleven talukas for 1951 and 1961 are shown in the next column.

Figure on page (13) shows the approximate contours of density of population in 1961 within the district.

The density of population has increased sharply from 156 persons per square mile in 1921 to 320 persons per square mile in 1961. The district density has, however, always been lower than the State average. Within the district the density varies from 1,427 persons per square mile in Sholapur North taluka to 202 persons per square mile in Mangalwedha taluka. These differences correspond to those of topography and land utilisation and also the growth of urban areas. The high density in Sholapur North and Barshi talukas is due to large urban centres like Sholapur city and Barshi town. Mangalwedha, Karmala, Sangola and Mohol talukas are having very low density because of the hilly and mountainous regions existing in those talukas.

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
SHOLAPUR DISTRICT ..	259	320	100·00
1 Karmala Taluka	161	207	6·90
2 Barshi Taluka	298	352	11·88
3 Madha Taluka	205	262	8·41
4 Malshiras Taluka	209	283	8·95
5 Pandharpur Taluka ..	258	309	8·27
6 Mohol Taluka	186	224	6·62
7 North Sholapur Taluka ..	1,145	1,427	21·82
8 South Sholapur Taluka ..	203	244	6·05
9 Sangola Taluka	171	210	6·88
10 Mangalwedha Taluka ..	159	202	4·79
11 Akkalkot Taluka	279	327	9·43

The population of the district is concentrated more in the areas of relative high density. Sholapur North taluka forms 21·82 per cent of the population of the district with only 4·89 per cent of its area. Karmala taluka on the other hand has only 6·90 per cent of the district population against 10·69 per cent of its area. Excluding Sholapur North taluka concentration of population is observed in Barshi and Akkalkot talukas. Percentage distribution of population and that of area seems to be practically of the same order for Pandharpur taluka, *viz.*, 8·27 and 8·55, respectively.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

Year	Sholapur District			Maharashtra		
	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901 ..	11	..	20·47	219	..	16·59
1911 ..	11	—12·12	16·63	232	+ 0·99	15·13
1921 ..	14	+41·64	24·77	238	+18·72	18·50
1931 ..	14	+21·71	25·63	258	+15·54	18·60
1941 ..	14	+31·44	29·34	266	+27·11	21·11
1951 ..	14	+30·50	31·24	383	+62·42	28·75
1961 ..	10	+10·56	27·95	266	+21·32	28·22

In the Figure on page (11) the actual urban population of the district since 1901 is shown by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 187·31 per cent as against 246·96 per cent for the State.

The district had been highly urbanised up to 1951 than Maharashtra but in 1961, it is less urbanised than the State. The proportion of urban population decreased both for the district and the State in 1911. Since then it gradually increased to an all time high value in 1951. There was a decrease in the last decade. The number of towns had increased for the district in 1921 and remained constant up to 1951, whereas number of towns had increased continuously since 1901 till 1951 for the State. The drop in the number of towns in 1961 was due to the declassification of four towns because of the redefinition of urban areas in 1961. The four declassified towns are Madha, Akluj, Malshiras and Mohol. There was no addition of any new town in 1961. The population of declassified towns was 40,446 or 8·60 per cent of the urban population in 1951. If population of those towns is excluded from 1951 urban population, the 1961 urban population would be higher by 20·97 per cent over 1951. The net increase of 10·56 per cent now seen in the table above is thus due solely to the change of the definition of urban areas and the consequent declassification of four towns.

Sholapur city is the most important urban area in the district and is well-known for its cotton textile industries. The population of Sholapur city has increased by 348·39 per cent over 1901 and 182·30 per cent over 1921. Barshi and Pandharpur are the other two important towns in the district.

The population of Barshi town has increased by 107·86 per cent over 1901 and 146·41 per cent over 1921. For Pandharpur town, the growth is 40·17 per cent over 1901 and 80·17 per cent over 1921.

Rural Population

The rates of variation in rural population and the percentages of rural population to the total population of the district and the State since 1901 are as follows:—

Year	Sholapur District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	..	79·53	..	83·41
1911	+13·37	83·37	+12·68	84·87
1921	—14·20	75·23	—6·77	81·50
1931	+16·28	74·37	+14·77	81·40
1941	+9·10	70·66	+8·54	78·89
1951	+19·28	68·76	+7·72	71·25
1961	+29·48	72·05	+24·51	71·78

The net increase in rural population of the district has been 90·60 per cent over that of 1901 and 95·94 per cent over that of 1921. The corresponding figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The percentage of rural population gradually decreased both for the district and the State since 1911. Only in 1961 it has shown an opposite trend. The rates of variation in rural population have never followed any trend. The high rate of growth in rural population of the district in 1961 may be partly due to the declassification of four towns and addition of their 1961 population in the rural population. The urban population had grown faster at the expense of rural population. As a result the rural population increased at a lower rate than the total population.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Sholapur District		Maharashtra	
	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population
Less than 500 ..	13·64	2·89	47·72	15·02
500—999 ..	33·93	17·39	28·55	25·71
1,000—1,999 ..	33·19	32·44	16·62	28·55
2,000—4,999 ..	16·91	34·50	6·18	22·48
5,000 and over ..	2·33	12·78	0·93	8·32

Villages with less than 1,000 population are 47·57 per cent of the total number of villages in the district and have 20·28 per cent of the rural population. The corresponding percentages for Maharashtra are 76·27 and 40·73, respectively. There is thus a sharp contrast in the distribution of rural population in the district which has the highest proportion of population residing in villages of 1,000—1,999 or over 2,000 population. Villages with more than 1,000 population are 52·43 per cent of the total number of villages and account for 79·72 per cent of the district rural population. Thus, more than three-fourth of the rural population of the district is concentrated in villages with more than 1,000 population.

The area, number of inhabited villages, total rural population, average population per village, and the number of villages per 100 sq. miles of rural area are shown below for the State, district and each taluka separately :—

State/District/Taluka	Area in sq. miles (Rural)	Number of inhabited villages	Rural population	Average population per inhabited village	Number of inhabited villages per 100 sq. miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31
SHOLAPUR DISTRICT	5,609·8	946	1,340,245	1,417	17
1 Karmala Taluka	609·6	96	117,097	1,220	16
2 Barshi Taluka	598·8	129	170,506	1,322	22
3 Madha Taluka	577·7	96	142,695	1,486	17
4 Malshiras Taluka	587·7	75	166,521	2,220	13
5 Pandharpur Taluka	492·9	82	108,494	1,323	17
6 Mohol Taluka	549·5	88	123,078	1,399	16
7 North Sholapur Taluka	275·7	43	68,250	1,587	16
8 South Sholapur Taluka	461·5	80	112,504	1,406	17
9 Sangola Taluka	583·2	68	118,448	1,742	12
10 Mangalwedha Taluka	381·7	71	75,984	1,070	19
11 Akkalkot Taluka	491·5	118	136,668	1,158	24

Average population per village in 1961 is 1,417 in the district against 792 in Maharashtra. The average population per inhabited village in the district varies from 1,070 in Mangalwedha taluka to 2,220 in Malshiras taluka. The number of villages per 100 sq. miles of rural area is 17 in the district and 31 in Maharashtra. Within the district this number varies from 12 in Sangola taluka to 24 in Akkalkot taluka.

It may be added that the above discussion is based on villages with their administrative boundaries and does not take into account the existence of wadis, padas or hamlets within those boundaries.

Age Distribution

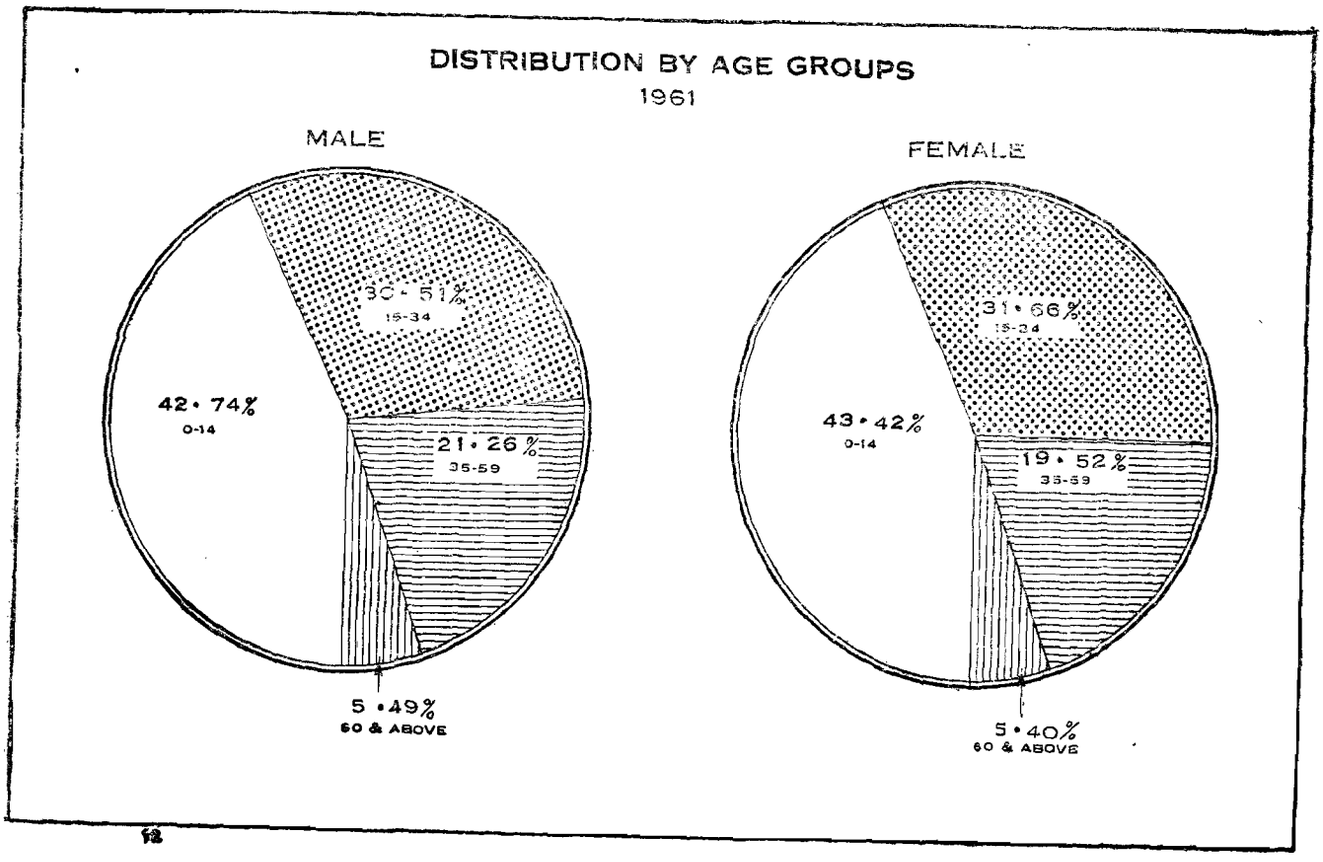

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single-year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 for the district and Maharashtra are shown in the next column separately for males and females compared with the corresponding proportions for 1951 for the district only.

Figure below shows the distribution of the district population by broad age-groups for males and females separately.

During the decade 1951—61 the proportion of children aged 0—4 increased from 14·54 to 15·47 per cent for males and from 15·52 to 16·11 per cent for females. The same trend is observed for the age-group 5—14 which is reflected in the noticeable increase in the proportion of males and females of age-group 0—14 during the last decade. The proportion of persons in the older age-group 60+ has increased both for males and females in the last decade. All these changes contributed to lower the proportion of persons in the age-group 15—59 both for males and females and males are affected to a greater extent in this age-group. Comparison with the age structure of the State reveals that the district population is more youthful.

Percentages of population by age-groups

Age-group	1951 District Total		1961 District Total		1961 Maharashtra Total	
	Males	Females	Males	Females	Males	Females
0—4 ..	14·54	15·52	15·47	16·11	14·65	15·39
5—14 ..	25·40	26·53	27·28	27·33	25·55	25·77
0—14 ..	39·94	42·05	42·75	43·44	40·20	41·16
15—34 ..	31·50	32·58	30·52	31·67	32·70	33·13
35—59 ..	23·74	20·21	21·27	19·52	22·09	20·16
15—59 ..	55·24	52·79	51·79	51·19	54·79	53·29
60 and over	4·82	5·16	5·46	5·37	5·01	5·55
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Dependency Ratio

The ratio between dependants (age-groups 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State separately :—

	Sholapur District			Maharashtra		
	Youth	Aged	Total	Youth	Aged	Total
1951 Total ..	75·8	9·2	85·0	69·9	9·3	79·2
1961 Total ..	83·7	10·5	94·2	75·2	9·7	84·9
Rural ..	85·2	11·1	96·2	80·6	10·8	91·4
Urban ..	79·9	9·2	89·0	63·1	7·3	70·4

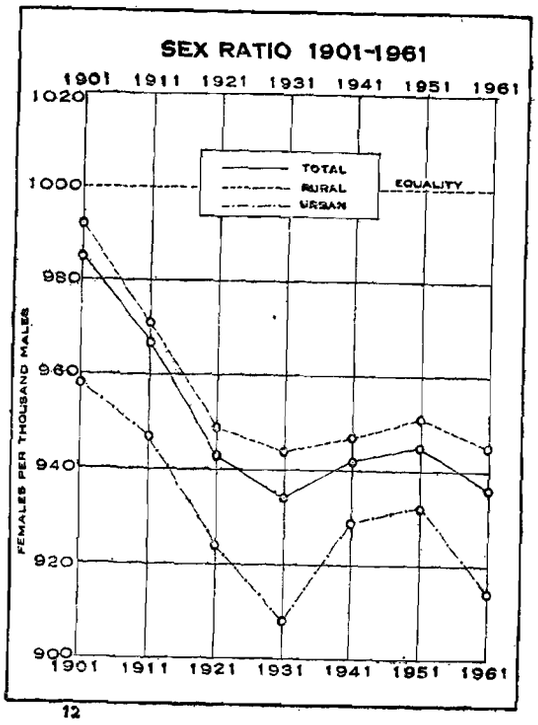

The dependency ratios are higher in Sholapur district than those for Maharashtra. This may suggest migration of a part of supporting population out of the district. The dependency ratios for the State and the district are both higher in 1961 than those of 1951. Both the components of youth and aged have increased. The increase in dependency may be the result both of high fertility and declining mortality. The 1961 population in the district thus has a larger load of dependants than that of 1951. The dependency load is, moreover, larger in rural areas than in urban areas. It is due to the differences in age structure of rural and urban population resulting from the migration of working age (15—59) people from rural to urban areas within and outside the district.

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

Year	Sholapur District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	985	992	958	978	1,003	862
1911 ..	967	971	947	966	1,000	796
1921 ..	943	949	924	950	994	776
1931 ..	934	944	908	947	987	790
1941 ..	942	947	929	949	989	810
1951 ..	945	951	932	941	1,000	807
1961 ..	936	945	914	936	995	801

Figure in the next column shows the variation in the sex ratios since 1901 for the district total, rural and urban areas separately.

Since 1901 the sex ratios of the district population varied between 934 and 985 while that of Maharashtra varied between 936 and 978. For all the Censuses since 1901 the sex ratio of the district was fairly close to that of the State. It may be inferred that the proportion of females in the district and the State population was almost the same. In 1961 Census the sex ratios of the district and the State are equal. Rural sex ratio of the district was always lower while the urban sex ratio was consistently higher than the corresponding sex ratios for the State. Rural-urban differences in sex ratios are not significant enough to establish a definite migration stream from rural to urban areas.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas :—

Age-groups	Total	Rural	Urban
0—14	951	957	936
15—34	972	983	945
35—59	859	880	807
60 and over	920	901	979
All ages	936	945	914

None of the broad age-groups has a sex ratio equal or higher than equality. Except for the older age-group the rural sex ratio is higher than urban sex ratio. Sex ratio is the least for age-group 35—59 both for rural and urban areas.

The sex ratios for each taluka in the district for total, rural and urban areas separately are as follows :—

		Total	Rural	Urban
SHOLAPUR DISTRICT	..	936	945	914
1 Karmala Taluka	..	944	949	888
2 Barshi Taluka	..	941	945	929
3 Madha Taluka	..	945	948	921
4 Malshiras Taluka	..	949	949	..
5 Pandharpur Taluka	..	943	946	936
6 Mohol Taluka	..	935	935	..
7 North Sholapur Taluka		906	929	902
8 South Sholapur Taluka		930	930	..
9 Sangola Taluka	..	962	963	946
10 Mangalwedha Taluka		950	941	1,004
11 Akkalkot Taluka	..	949	951	942

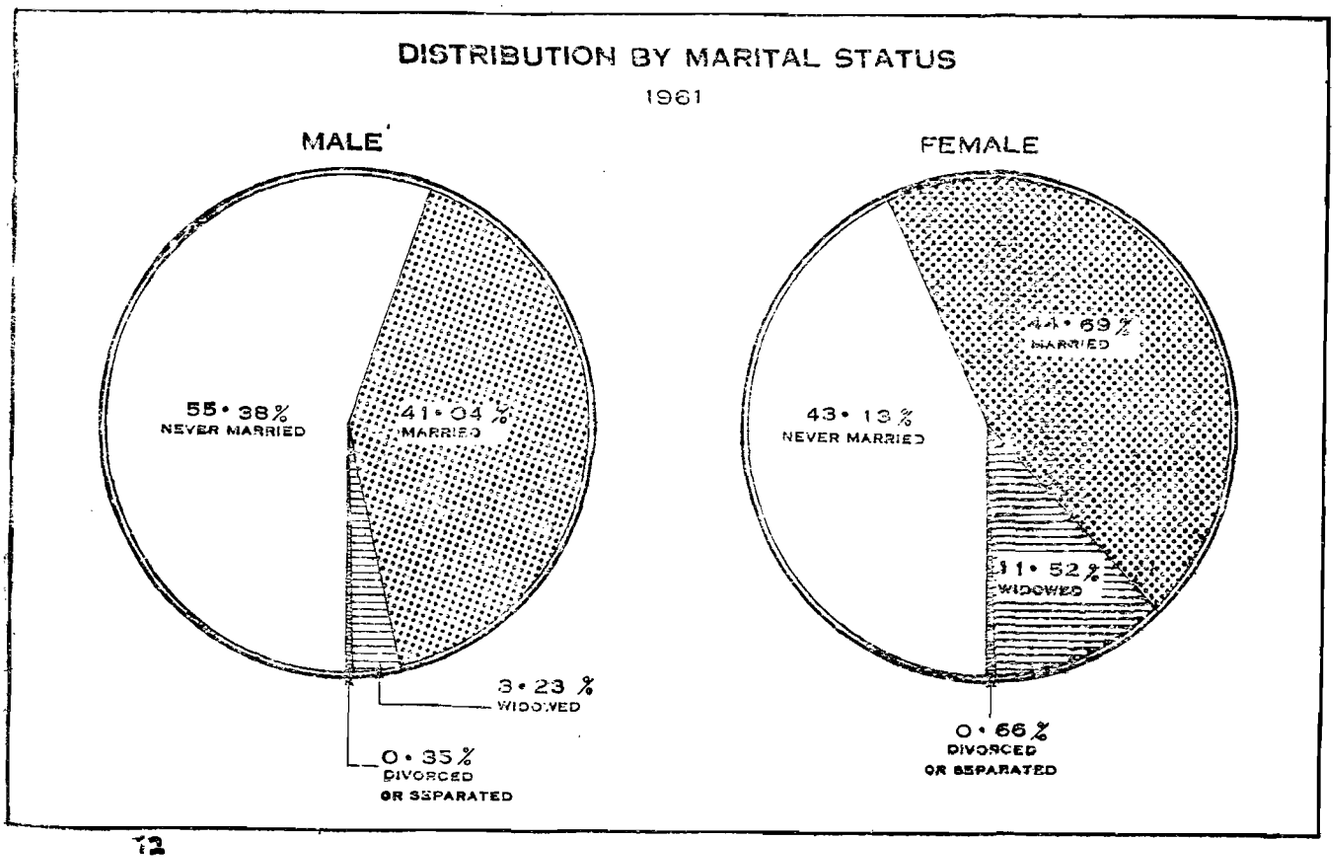

Within the district sex ratio varies from 906 in North Sholapur taluka to 962 in Sangola taluka. Only in Mangalwedha taluka with only Mangalwedha town in the urban area the urban sex ratio exceeds equality. The low sex ratio in North Sholapur taluka may be attributed to the existence of Sholapur city in that taluka. Strangely enough the urban sex ratio is the least for the tiny town of Karmala which is the only town in the taluka.

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status compared to those of 1951 are shown below.

Figure below shows the distribution of the district population by marital status for males and females separately.

Year	Age-group	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951 ..	0—14	100	98·71	87·61	1·24	12·19	0·04	0·19	0·01	0·01
	15—34	100	34·84	5·24	63·03	89·31	1·97	5·21	0·16	0·24
	35—54	100	2·70	0·78	88·05	64·54	9·14	34·54	0·11	0·14
	55+	100	1·75	0·51	70·48	17·90	27·61	81·53	0·16	0·06
	All ages	100	51·10	38·72	44·09	47·26	4·72	13·91	0·09	0·11
1961 ..	0—14	100	99·39	94·30	0·60	5·63	0·01	0·04	..	0·03
	15—34	100	40·63	6·46	57·84	88·81	1·03	3·41	0·50	1·32
	35—54	100	2·03	0·55	91·12	71·04	6·12	27·41	0·73	1·00
	55+	100	1·35	0·22	75·98	23·24	22·17	76·19	0·50	0·35
	All ages	100	55·39	43·14	41·05	44·71	3·23	11·52	0·33	0·63

12

During the last decade the proportion of never married has increased both for males and females. The proportion of widowed has decreased both for males and females. The proportion of divorced and separated showed an increase but it is hardly of any numerical importance. All these changes contributed to lower the proportion of married both for males and females. The rise in the age at marriage of the total population may be seen from the marital status distribution by age-groups. The proportion of never married in age-groups 0—14 and 15—34 has increased both for males and females.

Child Woman Ratio

The following are the child woman ratios for 1951 and 1961, i.e., the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows of 15—44 years age-group to 1,000 married women of 15—44 years age-group is also shown for comparison:—

	Number of children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	712	831	114
1961 District Total ..	777	896	80
Rural ..	808	916	83
Urban ..	701	844	73

The child woman ratio for rural areas is higher than that for urban areas. When standardised for married women of 15—44 years age-group, it is again higher in rural areas. This may indicate either a higher fertility or a higher survival rate in rural areas of the district. Over the decade, the ratio has increased from 712 to 777. It may be due both to a higher birth-rate and somewhat reduced infant mortality.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 114 in 1951 to 80 in 1961. The incidence of widowhood is higher in rural areas than in urban areas.

Migration

The 1961 Census showed the proportions of population enumerated at place of birth and other places as shown below.

64·32 per cent of the population was enumerated at places of birth. This percentage for males is 74·84 but for females it is 53·08. The difference is due to women married outside their places of birth. This is further evidenced by a very high proportion of females among persons born elsewhere in the district. This is also true for those born in other districts of the State as in the migration stream females outnumber males to a great extent. Even among persons from outside the State marriage seems to be the contributory factor in rendering females a preponderance over males.

Proportions of population by places of birth

——	Total Population	Place of enumeration	Elsewhere in the district	Outside the district but in Maharashtra	Outside Maharashtra
(1)	(2)	(3)	(4)	(5)	(6)
Persons	1,860,119	1,195,841	422,687	131,459	109,265
Males	960,655	718,574	139,674	49,498	52,457
Females	899,464	477,267	283,013	81,961	56,808
Percentage to total population—					
Persons	100·00	64·32	22·73	7·07	5·88
Males	100·00	74·84	14·55	5·15	5·46
Females	100·00	53·08	31·48	9·12	6·32

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows :—

Age-groups	Sex Ratios		
	Total	Rural	Urban
All ages	936	945	914
0—4	975	979	963
5—9	991	998	973
10—14	874	878	863
15—19	885	909	831
20—24	1,075	1,112	994
25—29	975	963	1,003
30—34	962	957	974
35—39	884	895	857
40—44	904	938	823
45—49	833	859	764
50—54	852	878	787
55—59	766	773	744
60 and over	920	901	979

The rural-urban differentials of sex ratios are less in younger and older age-groups, though rural sex ratio is higher than urban sex ratio except in age-groups 25—29, 30—34, 60 and over. These differences are more significant in adult age-groups, among which the age-group 20—24 has the highest sex ratio. The high sex ratio in age-group 20—24 may be due to the movement of young adult males in search of jobs or for higher education outside the district. The sudden drop in the sex ratio for age-group 55—59 for total, rural and urban population may also be partly due to mis-reporting of ages of women of that group in the higher age-group.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and of non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52.

The percentage of non-workers is lower in the population born at places other than the place of enumeration. Cultivators have a higher proportion among those born at the place of enumeration. Agricultural labourers have a higher proportion for those born elsewhere within the district. 14·64 per cent of the males born outside the district are engaged in manufacturing other than household industries. Textile industry in Sholapur city must be responsible for this high percentage as it attracts large number of migrants for employment so also in Barshi town.

	Categories of Workers									Non-workers
	I	II	III	IV	V	VI	VII	VIII	IX	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	23·63	11·08	1·19	4·58	5·43	0·72	3·00	1·39	4·43	44·55
Born at the place of enumeration	27·62	10·49	1·22	3·56	3·56	0·50	2·47	0·73	2·84	47·01
Elsewhere in the district	14·90	15·11	1·29	3·82	8·36	1·13	3·76	2·58	8·98	40·07
Outside the district	7·44	9·74	0·82	12·77	14·64	1·69	5·68	4·39	9·44	33·39

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows:—

	Total	Rural	Urban
Single member	7·76	7·14	9·29
2—3 members	21·45	20·83	23·00
4—6 members	41·27	41·86	39·80
7—9 members	21·16	21·61	20·06
10 members and more	8·36	8·56	7·85
All sizes	100·00	100·00	100·00

Among the different size groups, household with 4 to 6 members are more common (41·27 per cent) than others. The percentage distribution of rural and urban households by their size shows that single and small size households are more (32·29 per cent) in urban areas than in rural areas (27·97 per cent). The average size of the household for the district is 5·3. It is 5·3 in rural areas and 5·2 in urban areas. The size of household is slightly smaller in urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is shown on page (20).

Percentage distribution of population of sample households by relationship

(1)	Total		Rural		Urban	
	Males (2)	Females (3)	Males (4)	Females (5)	Males (6)	Females (7)
(1) Heads of households	32·39	4·05	32·15	3·93	33·02	4·37
(2) Spouses of heads of households	0·13	29·44	0·09	29·14	0·23	30·23
(3) Married sons	7·58	..	8·31	..	5·68	..
(4) Other married relations	4·40	15·08	4·50	16·12	4·13	12·36
(5) Never married, widowed or divorced relations	54·04	51·18	53·40	50·59	55·69	52·74
(6) Unrelated persons	1·46	0·25	1·55	0·22	1·25	0·30
Total	100·00	100·00	100·00	100·00	100·00	100·00

32·39 per cent of the males are heads of households as against 4·05 per cent of the females. Married sons are 7·58 per cent of the total males. 54·04 per cent males and 51·18 per cent females which incidentally form the largest group are never married, widowed or divorced relations. Proportion of unrelated persons is 1·46 per cent for males and only 0·25 per cent for females. 29·44 per cent females are spouses of heads of households. High proportion of females in other married relations includes the daughters-in-law and married daughters or sisters of the heads. The heads of the households and their spouses have a higher proportion in urban areas than in rural areas. The proportion of married sons is less in urban areas than in rural areas. It may indicate that the joint family is being replaced by the biological family more in urban areas. Unrelated females have a higher proportion in urban areas and unrelated males have a lower proportion in urban areas than in rural areas. Domestic servants and students are included among them and they may be staying with the households.

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has, on our request, worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown below:—

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951	1,505	244*	813*
Actual 1961	1,860	323	958
Projected 1966	2,130	348	1,079
Projected 1971	2,412	402	1,220
Projected 1976	2,729	441	1,395
Projected 1981	3,091	472	1,601

*Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows:—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Banjari	0·39	0·52	0·07	95·00	5·00
(2) Gujarati	0·62	0·45	1·06	51·99	48·01
(3) Hindi	1·15	0·39	3·08	24·79	75·21
(4) Kaikadi	0·10	0·07	0·18	49·13	50·87
(5) Kannada	11·45	11·17	12·18	70·27	29·73
(6) Marathi	71·46	80·13	49·10	80·79	19·21
(7) Tamil	0·09	0·01	0·29	11·72	88·28
(8) Telugu	5·67	1·23	17·12	15·62	84·38
(9) Urdu	8·82	5·93	16·30	48·40	51·60
(10) Others	0·25	0·10	0·62	30·16	69·84
All Languages	100·00	100·00	100·00	72·05	27·95

Marathi is the principal language and is the mother-tongue of 71·5 per cent of the population. In rural areas Marathi speakers account for 80·1 per cent of the population. They constitute 49·1 per cent of the population in urban areas. Kannada has the second largest number of speakers. It forms 11·5 per cent of the total population in the district. It is spoken more in urban areas where its speakers form as much as 12·2 per cent against 11·2 per cent for rural areas. Urdu has the third largest number of speakers. It forms 8·8 per cent of the total population of the district. It is spoken more in urban areas where its speakers form as much as 16·3 per cent against 5·9 per cent for rural areas. The speakers of Banjari language are concentrated in rural areas and so also of Gujarati speakers to some extent. Hindi, Tamil and Telugu speakers are mostly concentrated in urban areas. Kaikadi speakers are almost evenly distributed in rural and urban areas.

-1078—iv-B—(Sholapur).

The comparative position of the languages in 1901, 1951 and 1961 is as follows:—

Language	Percentage to total population		
	1901	1951	1961
(1) Banjari	..	..	0·39
(2) Gujarati	0·52	0·72	0·62
(3) Hindi	7·70	1·39	1·15
(4) Kaikadi	..	..	0·10
(5) Kannada	7·13	12·53	11·45
(6) Marathi	81·98	72·45	71·46
(7) Tamil	0·02	0·20	0·09
(8) Telugu	2·37	4·34	5·67
(9) Urdu	..	8·17	8·82
(10) Others	0·28	0·20	0·25
All Languages	100·00	100·00	100·00

The proportion of Marathi speakers decreased from 81·98 per cent in 1901 to 72·45 per cent in 1951 and further decreased to 71·46 per cent in 1961. The percentage of Hindi speakersdecreased since 1901. It is due to the reporting of Urdu Language as Hindi in 1901. The percentages of Kannada and Telugu speakers increased to a great extent during the last sixty years. However, there is again a slight decrease in the percentage of Kannada speakers during the decade 1951—61. The proportion of Gujarati speakers remained fairly constant. Banjari and Kaikadi are reported only in 1961. The proportion of Urdu speakers has increased in the last decade though not much. 1901 percentages are pertaining to the then Sholapur district.

RELIGIONS

Table C-VII in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is as follows:—

	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	3·31	3·39	3·11	73·75	26·25
(2) Christians ..	0·30	0·06	0·91	15·38	84·62
(3) Hindus ..	86·44	89·72	77·97	74·79	25·21
(4) Jains ..	0·83	0·60	1·41	52·42	47·58
(5) Muslims ..	9·10	6·22	16·54	49·23	50·77
(6) Others ..	0·02	0·01	0·06	28·06	71·94
All Religions ..	100·00	100·00	100·00	72·05	27·95

86·44 per cent of the population reported their religion as Hindu. Hindus account for 89·72 per cent in rural areas and 77·97 per cent in urban areas. Muslims are 9·10 per cent in the district. They are only 6·22 per cent in rural areas but form as much as 16·54 per cent in urban areas. Buddhists account for 3·39 per cent in rural areas and 3·11 per cent in urban areas. Jains are 0·60 per cent in rural areas and 1·41 per cent in urban areas. Christians and followers of other religions are similarly more numerous in urban areas. Hindus and Buddhists are more numerous in rural than in urban areas. Christians are the most urbanised group and Hindus the least urbanised.

The comparative position of the religions in 1901 and 1961 is as follows:—

	Percentage to total population	
	1901	1961
(1) Buddhists	..	3·31
(2) Christians	0·24	0·30
(3) Hindus	90·42	86·44
(4) Jains	1·12	0·83
(5) Muslims	8·17	9·10
(6) Others	0·05	0·02
All Religions	100·00	100·00

The proportions of Christians and Muslims have increased over the last sixty years. The proportion of Jains has decreased over the same period. The percentage of Hindus has gone down from 90·42 per cent in 1901 to 86·44 per cent in 1961 because some persons belonging to Hindu Scheduled Castes returned their religion as Buddhist or Nav-Bauddha. The combined proportion for Hindus and Buddhists has decreased than that in 1901. Most significant changes are the reporting of 3·31 per cent of the population as Buddhists in 1961 and the increase in Muslims by nearly one per cent.

Sex ratio for each religion is as follows:—

Buddhists 967, Christians 973, Hindus 934, Jains 880, Muslims 949, All religions 936.

Higher sex ratio for Christians indicates that more of their males are going out of the district for work. Sex ratio is the least among the Jains.

SCHEDULED CASTES

Table SCT-I—Part A in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste by sex for the district and each taluka separately. 24 Castes are notified as Scheduled Castes in the district but only 15 (including Mang-Garudi) are reported in the district in 1961.

The distribution of these 15 castes by (Mang-Garudi included in Mangs) rural and urban areas of the district is as shown in the table below.

The remaining 8 Scheduled Castes for which no one was returned in the 1961 Census in the district are as follows :—

(1) Ager,
(2) Garoda,
(3) Halleer,
(4) Meghval,
(5) Nadia,
(6) Shenva,
(7) Tirgar, and
(8) Turi.

Out of the 15 Scheduled Castes (Mang-Garudi included in Mang) reported in the district, the largest number is of Mahars. The second predominant group is of Mangs and the third of Chambhars. Holars and Dhors are the fourth and the fifth, respectively. The remaining Scheduled Caste have together 3,123 population which makes less than 0·2 per cent of the total population of the district. Halsar, Lingader, Mukri and Pasi castes have very small population in the district.

The comparative position of the Scheduled Caste population in 1951 and 1961 within the district is as follows:—

	Percentage to total population in		
	Total Area	Rural Areas	Urban Areas
All Scheduled Castes—			
1951	15·36	17·55	10·55
1961	12·84	14·87	7·62

The proportion of Scheduled Castes has decreased from 15·36 per cent in 1951 to 12·84 per cent in 1961. It is the result of conversion of a large number of persons from the erstwhile Hindu Scheduled Castes to Buddhism. Such conversion to Buddhism has, however, been chiefly from among the Mahars who were formerly also numerous in Scheduled Castes in the district. Due to the change of religion they are not enumerated as Scheduled Castes as the Constitution recognises Scheduled Castes from Hindu and Sikh religions only. The combined proportion of the Scheduled Castes and Buddhists is 16·15 per cent of the total population of the district in 1961 which is slightly higher than that of 1951.

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Castes	121,850	117,013	12·84	83·42	16·58

(10) Lingader	14	22	N	100·00	..
(11) Mahar	49,234	47,180	5·18	90·43	9·57
(12) Mahyavanshi	92	106	0·01	12·63	87·37
(13) Mang (including Mang-Garudi) ..	35,864	34,456	3·78	85·98	14·02
(14) Mukri	3	3	N	100·00	..
(15) Pasi	2	15	N	11·76	88·24

*Inclusive of persons from the Scheduled Castes who have not reported their individual castes. N = Negligible.

Literacy

Tables SCT-III—Parts A (i) and B (i) in Part II show the literacy and educational levels for each Scheduled Caste.

The percentages of literacy for the district population, for all Scheduled Castes and each Scheduled Caste are shown below.

Both males and females of the Scheduled Castes are much behind in literacy than the general population of the district. They are, however, trying to cover the gap. Among the major groups of the Scheduled Castes, 'Mangs' are the most depressed while 'Dhors' are found to be the most advanced in this respect.

Name of Scheduled Caste	Percentage of literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District average	19·17	29·93	7·78	40·56	54·54	25·25

(10) Lingader	No literates			..	..	..
(11) Mahar	11·38	19·90	2·58	29·60	43·47	13·68
(12) Mahyavanshi	20·00	45·45	No literates	4·62	9·88	No literates
(13) Mang (including Mang-Garudi) ..	7·83	14·07	1·36	18·62	30·39	6·11
(14) Mukri	No literates			..	..	..
(15) Pasi	50·00	50·00	..	6·67	..	6·67

Economic Activity

The industrial classification of persons at work and non-workers for the district average, for all Scheduled Castes and for each Scheduled Caste, is shown in the next column.

The proportion of workers among the Scheduled Castes is higher than the average for the total population of the district. This is so, because their participation in agriculture is comparatively very high than the district average. Although the proportion of workers among Scheduled Castes in cultivation is much low, their participation in agricultural labour is very high than the district average. This may be attributed to the association of some persons from the Scheduled Castes with scavenging, sweeping and such other services and a majority taking up agricultural activities amongst them.

	Categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District Average ..	19·09	11·36	13·38	56·17
All Scheduled Castes	9·12	27·44	12·19	51·25
(1) Baked ..	..	0·61	49·39	50·00
(2) Bhangi ..	0·69	3·11	38·99	57·21
(3) Chalvadi ..	..	2·21	33·82	63·97
(4) Chambhar ..	13·22	16·53	14·50	55·75
(5) Chenna Dasar	..	..	46·34	53·66
(6) Dhor ..	10·00	11·07	16·42	62·51
(7) Halsar ..	..	..	100·00	..
(8) Holar ..	8·06	32·06	10·71	49·17
(9) Holaya ..	3·49	44·77	18·50	33·24
(10) Lingader ..	..	25·00	27·78	47·22
(11) Mahar ..	10·02	32·71	7·84	49·43
(12) Mahyavanshi	3·53	9·60	25·76	61·11
(13) Mang (including Mang-Garudi).	5·29	29·67	15·36	49·63
(14) Mukri ..	..	..	..	100·00
(15) Pasi	11·76	..	..	88·24

Size of Land Cultivated

Tables C-I—Part A and SCT-V—Part A in Part II show a broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Castes in rural areas. The proportions are as follows :—

Size of land cultivated	District Rural Population		All Scheduled Castes	
	No. of sample households	Percentage	No. of sample households	Percentage
All sizes ..	30,893	100·00	2,782	100·00
Less than 5 acres	5,344	17·30	1,046	37·60
5—9·9 acres ..	6,669	21·59	742	26·67
10—29·9 acres ..	13,032	42·18	817	29·37
30 acres and over	5,848	18·93	177	6·36

Out of a sample of 30,893 cultivating households, 2,782 or 9·01 per cent households are from the Scheduled Castes in rural areas, against their population which is 14·87 per cent of the total rural population of the district. 37·60 per cent of the cultivating households of the Scheduled Castes are cultivating less than 5 acres of land against the corresponding average of 17·30 per cent for the district. The percentage of households cultivating land over 5 acres among the Scheduled Castes is 62·40 per cent against the corresponding average of 82·70 per cent for the district. The proportion of households cultivating large size holdings is thus smaller in the case of Scheduled Castes. Even though their participation in agriculture is comparatively more than the average for the general population of the district, as already mentioned it is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I—Part B in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Thirteen Scheduled Tribes out of 19 notified tribes of the district are reported in the 1961 Census. Their total population, however, is only 9,089 or 0·49 per cent of the total population of the district.

The distribution of the Scheduled Tribe population by rural and urban areas is shown below.

The remaining 6 Scheduled Tribes for which no one was returned in the district in 1961 are as follows :—

(1) Dhanka,
(2) Dhodia,
(3) Dubla,
(4) Kokna,
(5) Patelia, and
(6) Vitolia.

Pardhi with 5,064 persons is the largest Scheduled Tribe in the district. Rathawa with 2,533 persons is the second. The other eleven tribes together have a population of 1,475 which makes less than 0·1 per cent of the total population of the district.

Pardhis are mostly found in the talukas of Barshi, South and North Sholapur and Karmala. Rathawas are mostly located in Akkalkot and North Sholapur talukas. Koli Dhors come mostly from urban areas of the district.

The Scheduled Tribe population in the district has increased from 8,993 in 1951 to 9,089 in 1961.

Literacy and Education

The Scheduled Tribes as a group does not seem to have made much progress in literacy and education in spite of the various educational facilities available to them. Rathawa appears to be the most depressed group in this respect.

Name of Scheduled Tribe	Population		Percentage to total population of the district	Percentage of each Scheduled Tribe population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Tribes	4,636	4,453	0·49	79·17	20·83
(1) Barda	16	38	N	92·59	7·41

(13) Varli	3	..	N	..	100·00

*Inclusive of persons from Scheduled Tribes who have not reported their individual tribes. N = Negligible.

Economic Activity

76·84 per cent of the workers from the Scheduled Tribes work in agricultural activities. Like Scheduled Castes, their participation in agriculture is more as agricultural labourers. However, their participation in agriculture is more than twice the proportion for the district Scheduled Caste population although little less than half the population for the district average. The proportion of workers among the Scheduled Tribes is more or less the same as for the total population of the district. Their participation in cultivation and non-agricultural activities are also low compared to the general population of the district.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of Standing Committee which is the most powerful Committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the Subject Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the conditions of the Scheduled Castes, Scheduled Tribes and of the socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district.

(1) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, Nomadic and Semi-Nomadic Tribes, Vimukta Jatis and the Backward Classes. The concession is awarded in the Primary Schools, High Schools or Technical Schools. 4,256 students benefited from, and Rs. 2,57,127 were spent on, these schemes during the year 1962-63.

Rs. 4,06,556 were spent on 49 backward class hostels and 16 cosmopolitan hostels in the district. Rs. 35,367 were spent as a building grant to 4 backward class hostels.

(2) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for cottage industries and professions. Rs. 18,818 were spent on 75 beneficiaries. Assistance for purchase of milch cattle to the Scheduled Castes and other Backward Classes was given to the extent of Rs. 2,100 to seven beneficiaries.

(3) *Housing.*—A number of housing societies for Backward Classes and ex-criminal Tribes have been formed in the district. These societies construct houses for their members. Financial assistance in the form of loans and subsidies is given to these societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other backward classes is also provided.

(4) *Drinking Water Wells.*—An amount of Rs. 16,469 was spent under this scheme. Rs. 1,500 were spent for repairs of two wells in or near Scheduled Castes localities, while Rs. 14,969 were spent for drinking water wells for Scheduled Castes and other backward classes for 15 wells.

(5) *Medical Aid to Scheduled Castes.*—Monetary aid is given to the deserving persons belonging to Scheduled Castes.

(6) *Agricultural.*—Financial assistance is given to poor deserving agriculturists from Scheduled Tribes, Vimukta Jatis, persons in underdeveloped rural areas and other backward classes to purchase ploughs, bullocks, implements, seeds, carts, etc. Rs. 17,855 were spent on 126 beneficiaries under this scheme during the year 1962-63.

(7) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film shows exhibited and gatherings are addressed at fairs and other places. Kirtan programmes and melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability. Rs. 14,528 were spent under the schemes during 1962-63.

The Schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan Schemes. The expenditure described above against each scheme is out of the committed schemes and also include expenditure on the Plan Schemes. There are in addition some more schemes sponsored by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of ' Other Backward Classes ' has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are, irrespective of their religion, caste or community, treated as belonging to the ' Other Backward Classes '.

Concessions to Buddhists

From 1st May 1960, the Scheduled Caste converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot, by their very nature, apply to non-Hindus.

EDUCATION

Rapid improvement in facilities for technical and secondary education highlights the progress of education in the district.

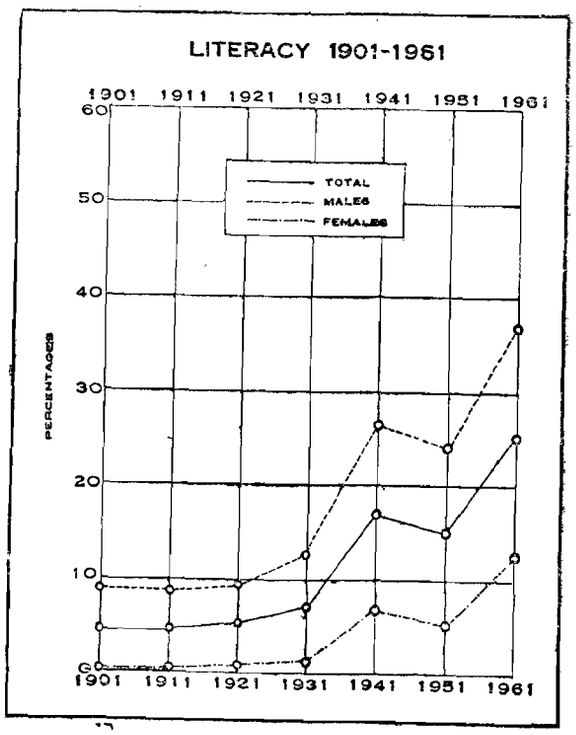

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is as follows :—

	Total	Males	Females
1901	4·62	8·81	0·37
1911	4·72	8·78	0·51
1921	5·30	9·37	0·98
1931	7·11	12·49	1·35
1941	15·04	23·28	6·27
1951	14·74	23·31	5·69
1961	25·15	36·89	12·60

Figure in the next column shows the growth of literacy in the district for total population, males and females separately.

The literacy percentage has increased more than five times during the last sixty years. However, substantial improvement has taken place only since 1931. Particularly female literacy showed phenomenal rise from 1·35 per cent in 1931 to 6·27 per cent in 1941. There was a fall in the literacy rate in 1951, because enumerators in the district were apparently more rigorous than in most other areas in returning school children and others as it literate rather than literate. The introduction of the scheme of compulsory education in 1947 might have helped to raise the level of literacy in the decade 1951—1961.

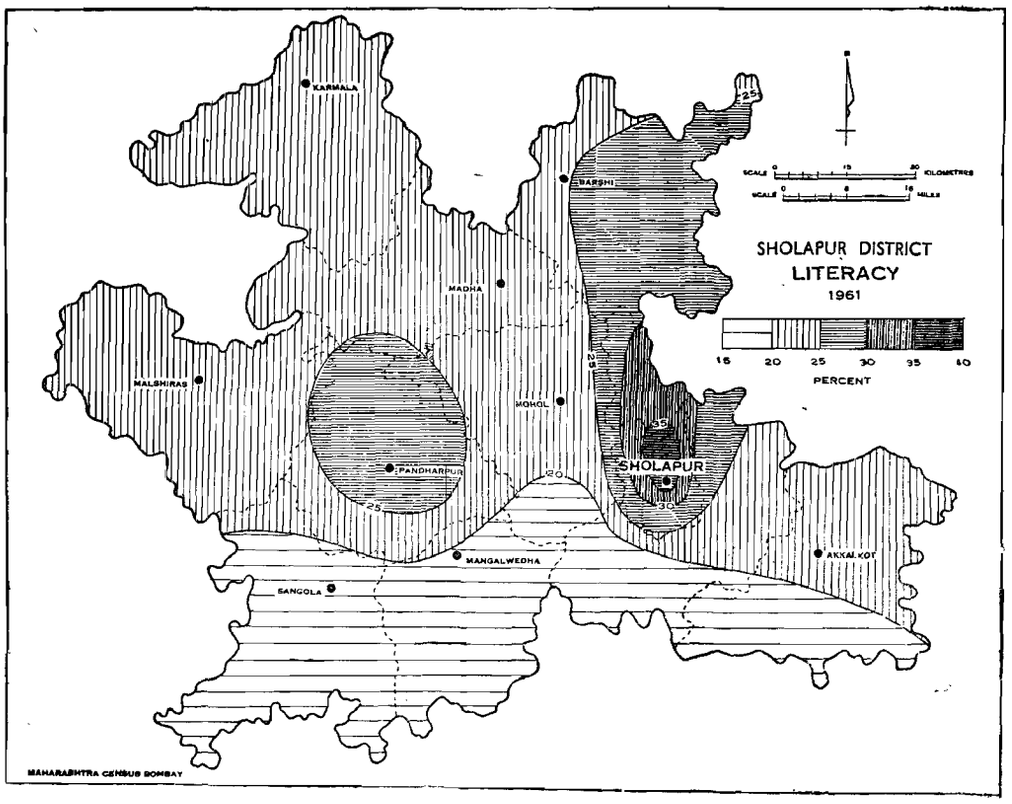

The improvement in literacy in the district has, however, to be viewed in the context of chronic scarcity conditions prevailing over a large part of the district and the consequent uncertainty of living conditions.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately.

Percentage proportions out of the total population for males and females are shown on page (27) for total, rural and urban areas of each taluka separately.

State/District/Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
SHOLAPUR DISTRICT ..	25·15	36·89	12·60	19·17	29·93	7·78	40·56	54·54	25·25
1 Karmala Taluka	21·18	31·78	9·95	18·95	29·12	8·23	44·43	58·64	28·44
2 Barshi Taluka	27·02	39·78	13·47	22·63	34·93	9·63	41·85	56·05	26·57
3 Madha Taluka	20·51	30·40	10·05	18·31	27·95	8·14	43·24	55·28	30·17
4 Malshiras Taluka	20·04	29·72	9·85	20·04	29·72	9·85	..	..	..
5 Pandharpur Taluka ..	26·65	38·35	14·25	17·64	28·17	6·51	48·19	62·53	32·85
6 Mohol Taluka	20·26	31·15	8·62	20·26	31·15	8·62	..	..	..
7 North Sholapur Taluka ..	37·44	51·03	22·45	20·90	32·58	8·33	40·79	54·71	25·35
8 South Sholapur Taluka ..	21·00	33·16	7·92	21·00	33·16	7·92	..	..	..
9 Sangola Taluka	16·52	26·48	6·17	15·37	25·13	5·24	30·76	43·09	17·72
10 Mangalwedha Taluka ..	17·76	27·98	7·00	15·86	25·76	5·33	28·75	41·19	16·31
11 Akkalkot Taluka	21·04	33·42	7·99	17·87	29·44	5·70	32·23	47·41	16·12

Figure to the right shows the spread of literacy in the district by isopleths.

The highest literacy rates are concentrated in a small area roundabout Sholapur town. Literacy rates drop down as we move away from this area, but higher rates are also found in the central and eastern regions of Barshi taluka and northern and central portions of Pandharpur taluka. The lowest rates are found in the southern zone comprising Sangola, Mangalwedha and parts of Mohol, Sholapur and Akkalkot talukas, which partly covers the scarcity zone in the district. Within the district, North Sholapur taluka has the highest literacy for males and females. In rural areas, Barshi taluka has the highest literacy rates for total and male populations while Malshiras has the highest literacy for females. In urban areas, Pandharpur has the highest literacy rates for total, males and females. The district literacy average is however somewhat lower than the State average for total, males and females in both rural and urban areas. The rural urban differences are similar for males and females and also they are in conjunction with the State pattern.

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are shown on page (28). Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	25·15	36·89	12·60	19·17	29·93	7·78	40·56	54·54	25·25
0—4	..	..	..	..	..	..	..	..	..
5—14	31·87	41·62	21·47	25·39	35·55	14·63	48·34	56·88	39·09
15—34	35·09	52·97	16·68	27·09	43·79	10·09	54·08	74·33	32·65
35—59	23·27	37·45	6·78	16·76	28·72	3·17	40·66	59·83	16·89
60+	14·64	25·88	2·42	10·56	19·12	1·05	26·87	46·96	6·36

Average literacy rates are high in the age-groups 15—34 and 5—14 both for males and females. It indicates that the improvement in literacy level has come about in recent years. Highest literacy rate for females is seen in the age-group 5—14 which reflects the result of the scheme of compulsory primary education.

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as follows :—

		Basic			Non-Basic		
	Total	Senior basic	Junior basic	Single teacher	Single teacher	I—IV multi-teacher	Middle I—VII
Total No. of schools.	1,602	272	26	16	621	203	464
Central Government.	4	..	..	..	3	1	..
State Government.	3	..	..	..	..	..	3
Zilla Parishad ..	1,303	228	25	16	523	117	394
Municipal ..	96	43	..	..	..	13	40
Private ..	196	1	1	..	95	72	27

There has been a steady growth in the number of primary schools in the district during the last ten years. The number of primary schools was 893 in 1951. It increased to 1,319 in 1956 and to 1,569 in 1961. On 31st March 1962 their number is 1,602. 81 per cent of the primary schools are managed by the Zilla Parishad and about 12 per cent are managed by private institutions. The State Government's share in the expenditure incurred in 1961-62 was 77·5 per cent. The expenditure on primary education is incurred by the State Government through grants-in-aid to the Zilla Parishad and building loans and grants to primary teachers' training colleges.

A-1076—V-A—(Sholapur).

Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes, Scheduled Tribes similarly receive free education and scholarships are given to them at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The policy of converting primary schools into basic schools has also made steady progress. During the First Five-Year Plan 219 schools were converted into basic schools. This number increased to 268 by the end of the Second Five-Year Plan. On 31st March, it was 314.

By 31st March 1962, 10 towns and 930 villages in the district had primary schools and 8 villages had schooling facilities, i.e., primary schools situated within a mile from the village. Eight villages did not have even schooling facilities. Total number of teachers is 5,917. Out of them 4,059 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are shown below :—

(As on 31st March 1962)

	Sholapur District	Maharashtra
Average population served by a primary school	1,175	1,135
Average area served by a primary school (sq. miles)	3·5	3·4
Pupils per primary teacher	41	38
Pupils per primary school	150	127
Average annual salary per teacher (Rs.)	1,224	1,250
Average annual expenditure per school (Rs.)	4,974	4,903
Average number of teachers per school ..	3·7	3·3
Percentage of trained teachers	68·6	64·8

The scheme of compulsory primary education was introduced in the year 1947-48 in 312 villages with a population of 1,000 and above according to 1941 Census for children in the age-group of 7—8 and was extended gradually to cover children in the age-group of 7—11 by the year 1951-52. One of the Third Plan schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11 years. A provision of Rs. 27·90 lakhs has been made for educational schemes in the field of primary education in the district. During the plan period, additional 130 teachers would be appointed in primary schools. The number of students is expected to rise by 6,500. Similarly, 205 class-rooms are proposed to be built during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools	
			Multi-purpose	Ordinary
Zilla Parishad	2	1	..	1
Municipal	1	..	..	1
Private	110	1	14	95

Total number of students on roll in the secondary schools during the year 1961-62 was 31,577. Out of them, 25,039 were boys and 6,538 girls. Total number of teachers was 1,238. Out of them 861 were trained teachers. Percentage of trained teachers was thus 69·5. Other indices of secondary education compared to the State averages are as follows :—

	Sholapur District	Maharashtra
Population served by each secondary school	16,654	13,805
Area served by each secondary school (sq. miles)	50·4	40·8
Pupil-teacher ratio	25	25
Pupils per secondary school	279	338
Average annual salary per teacher (Rs.)	1,637	1,870
Average annual expenditure (direct) per secondary school (Rs.)	30,271	39,543
Average number of teachers per secondary school	10·9	13·7

Figure on page (30) shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

The progress of secondary education in the district is quite rapid. The number of secondary schools increased from 34 in 1951 to 96 in 1961. It was 113 on 31st March 1962. The secondary schools are dispersed throughout the district. Karmala and Akkalkot have four each which is the smallest number in the district. North Sholapur has as many as 24 secondary schools.

Private institutions manage almost all the secondary schools in the district. The Government share in the total expenditure on secondary education (in 1961-62) is, however, 68·3 per cent. It is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the rapid growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 34,000 by 1965-66 and to 39,000 by 1970-71.

S. S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts public examinations at the end of the Secondary School Course. Two examinations are held every year in March and October and Barshi, Pandharpur, Sholapur and Akkalkot are the examination centres in the district. The number of candidates who appeared and passed from those centres during the year 1962 are as follows :—

	Appeared	Passed
Examination held in—		
March 1962	5,021	2,392
October 1962	1,997	828

Higher Education

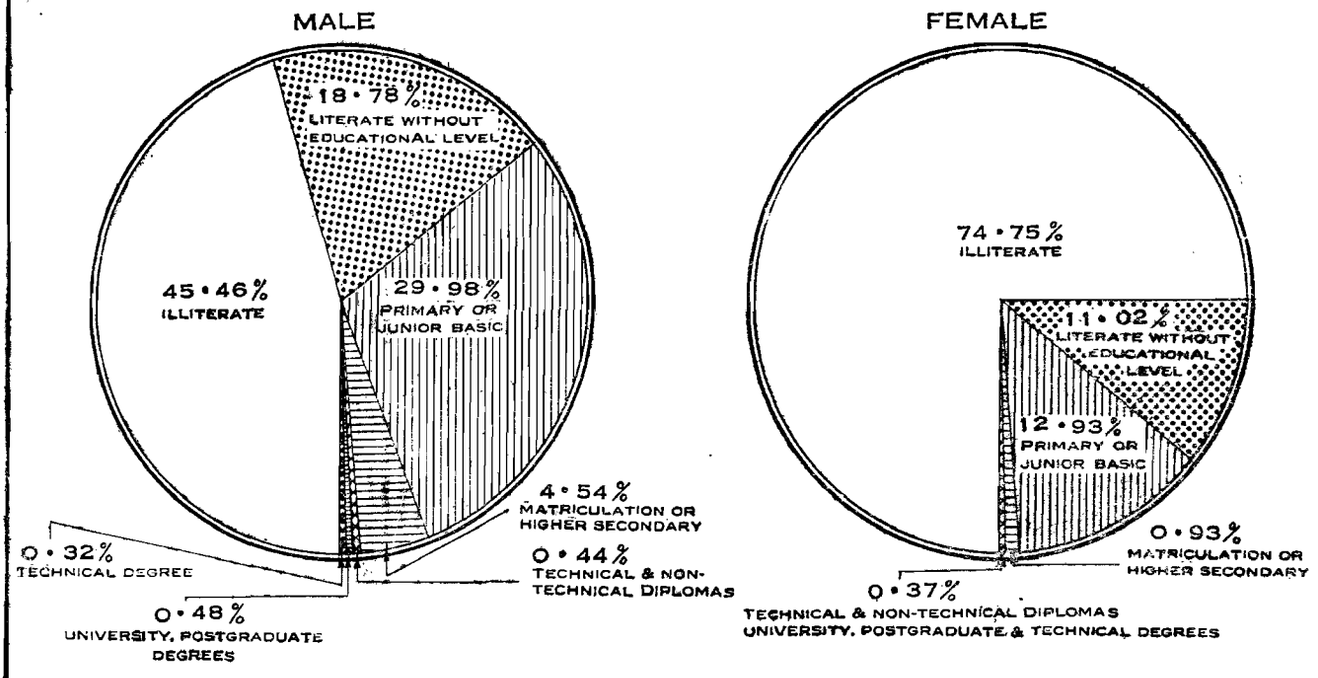

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college.

In 1960-61 there were six colleges in the district and the number of college students was 3,044. The number of colleges were eight in 1962-63. They provide education in Arts, Science and Commerce, Teaching and Medicine. All the colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government. Out of the eight colleges, six are situated at Sholapur and one each at Barshi and Pandharpur.

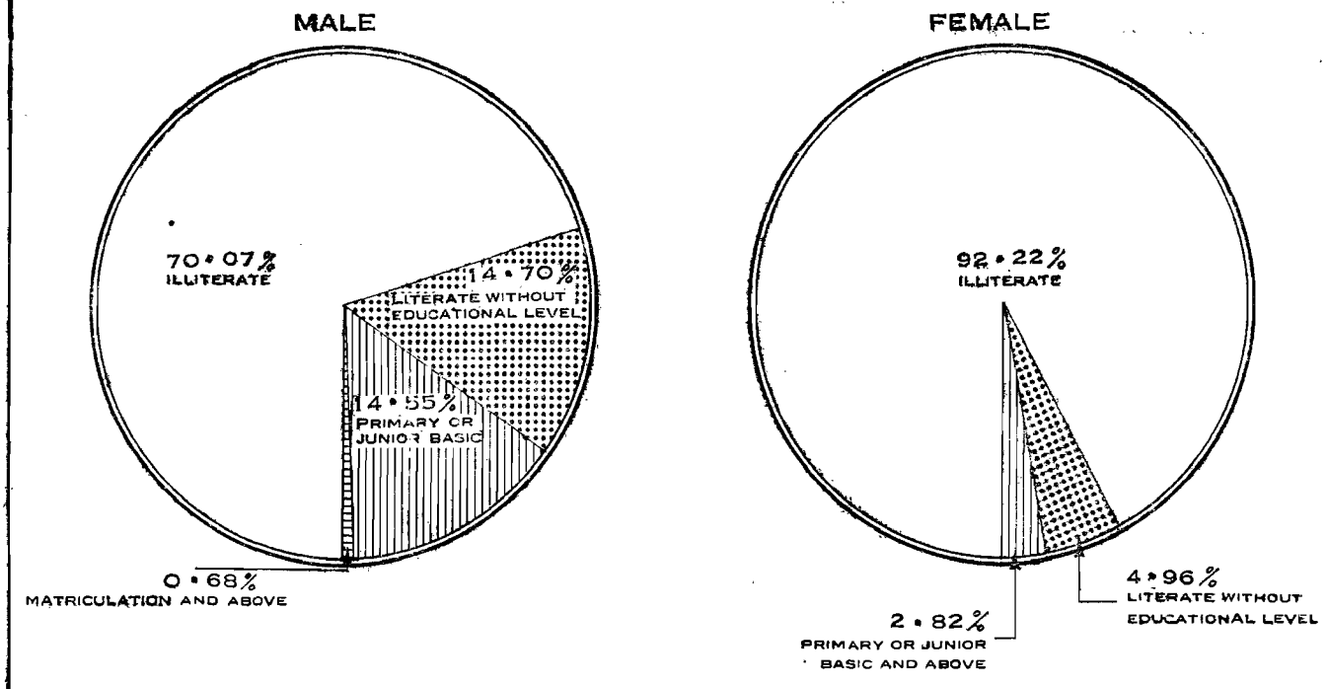

LITERACY AND EDUCATIONAL LEVELS

1961

URBAN

RURAL

Technical Education

The North Cote High School at Sholapur has a technical section which provides facilities for training in arts, technology, drawing, electrical engineering and mechanical engineering. A course in radio servicing and other courses in plumbing and civil-draftsmanship were introduced in this high school in 1957-58.

A Government Polytechnique was established at Sholapur in 1956 providing for diploma courses in civil, mechanical and electrical engineering. Students passing S. S. C. Examination are admitted to these courses. In 1960-61, 350 students were studying at this institute. During the Third Plan period this institute will be converted into an Engineering College. A new building and a hostel are being constructed with a total outlay of Rs. 19·05 lakhs at Sholapur on Sholapur-Akkalkot Road for the purpose.

There is also a Government Industrial Training Centre at Sholapur which provides training to poor students in tailoring, painting, carpentry, moulding and fitter's work.

Libraries

There are 15 libraries in the district (as on 31st March 1962) which are recognised by the State Government, among which one is a district library, nine are taluka libraries and five town libraries. The district library receives a maximum Government grant of Rs. 6,000 and taluka and town libraries, Rs. 1,000 each per year.

Printing Presses, Journals and Newspapers

There are 83 printing presses in the districts The total number of journals and newspapers is 14. Two of them are dailies, 9 weeklies, 2 monthlies and one journal.

Radio Licenses

The number of radio licenses in the district increased from 3,280 in 1954-55 to 3,610 in 1955-56 and to 7,258 in 1960-61.

Cinema Theatres

There are 22 permanent theatres, three quasi-permanent theatres and two touring talkies in the district as on 21st December 1963.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health Activities in the district.

Drinking Water Supply

Column (5) of the Village Directory in Part I shows the sources of supply and adequacy of drinking water for each village in the district.

Two towns have protected water supply. Out of the remaining towns and villages, 219 villages draw water from rivers, 23 villages from nallhas, 4 villages from tanks, 513 villages and 4 towns from wells and 187 villages and 4 towns have more than one of these sources of water.

Drinking water supply is not adequate in 98 villages and 3 towns.

Malaria Eradication

The district was surveyed by one of the survey squads of Malaria Organisation during 1947-48. It was then ascertained that, except for parts of Pandharpur, Malshiras and Sangola talukas irrigated by Nira Canals, the whole of the district can be regarded as free from malaria. Malaria control measures were introduced in 1953 and in 75 villages the work of DDT spraying was undertaken twice during the year.

Under the National Malaria Eradication Programme, an independent office has been opened at Pandharpur. The district has been divided for the purpose into four zones with a sub-centre in each zone. Spraying of DDT and house to house enquiry is made by these sub-centres.

Anti-T. B. Campaign

For control of T. B. the B. C. G. Vaccination Scheme was launched in 1954 and was applied in the first instance to three towns in the district, *viz.*, Sholapur, Pandharpur and Barshi in 1955. Till 1959 the mobile units which worked under the scheme, carried out vaccination programme in all parts of the district. During 1960 mass vaccination programme was again carried out for the second time in Sholapur, Barshi and Pandharpur.

For the treatment of T. B. patients, 50 beds are reserved at the General Hospital, Sholapur.

Leprosy Control

There are five Survey, Education and Treatment Centres at Karmala, Pangri, Mandrup, Pandharpur and Akkalkot for detecting leprosy cases and treatment.

Besides, leprosy patients are treated at the following places : (1) Leprosy Hospital at Sholapur which is managed by the Hindu Kushtha Nivaran Sangh. The hospital has accommodation for 275 patients and receives aid from the State Government and the

Sholapur Municipality, (2) Subsidiary Leprosy Centre at Vairag in Barshi taluka and (3) Kushta Dhama at Kedgaon in Karmala taluka. It is managed by Government and has accommodation for 50 beds.

Smallpox

The number of deaths due to smallpox in 1958 was 466 which was the highest number during the decade 1951—60. 39,623 persons were primarily vaccinated and 155,411 revaccinated till November 1960.

Family Planning Centres

There are seven family planning centres functioning at Karmala, Mohol, Natepute, Kole, Vairag, Pangri and Gadegaon in the district.

Medical Facilities

Medical facilities available in the district are shown in Table 17 in Part III. The figures in the Table relate to the facilities provided by Government and other aided institutions. The number of private practitioners, hospitals and dispensaries are not shown there.

The number of beds available and the number of indoor and outdoor patients have all increased between 1952—60. The number of beds increased from 376 in 1952 to 658 in 1960. The number of indoor patients increased from 9,832 in 1952 to 20,965 in 1960. The number of outdoor patients increased from 290,651 in 1952 to 544,977 in 1960. The number of doctors and nurses was 61 and 174, respectively, in 1960.

Hospitals

There are three Government Hospitals in the district. The Civil Hospital (now called the General Hospital) at Sholapur has a provision of 152 beds including a T. B. Ward with 50 beds. It is equipped with all the modern instruments including the X-Ray machine. The hospital also functions as centre for training midwives.

The other two Government Hospitals are Railway Hospital at Sholapur with 65 beds and Railway Hospital at Kurduwadi with 35 beds. There are 8 Government-aided private hospitals in the district and also two Municipal hospitals with 52 beds. Private hospitals are: N. M. Wadia Charitable Hospital (150 beds), Leprosy Hospital (280 beds), Sakharam Namchand Ayurvedic Hospital (40 beds), Dhanaraj Girji Hospital (135 beds), Kunkubai Eye Clinic (50 beds), Lady Duffrin Hospital (35 beds) and Doyce Maternity Home (25 beds). All these are situated at Sholapur. There is also a Poona Indian Village Mission Hospital at Pandharpur with 60 beds.

Dispensaries

The number of dispensaries was 32 in 1964 with 161 beds. Out of which one was managed by Government and 11 by Municipalities and 20 by Zilla Parishad.

Primary Health Centres

At the end of 1960 there were 8 rural health centres and two maternity homes in the district.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 1,816.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classification by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 46 as against 54 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

71·15 per cent of the houses are used as dwellings, 10·77 per cent as cattle-sheds, etc., 8·17 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 45·8 in 1951 to 58·2 in 1961. The number of persons per residential house has, however, decreased from 5·65 in 1951 to 5·49 in 1961. This may be a sign of an increased mobility of population from rural to urban areas, as well as a tendency towards smaller families in urban areas.

Classified by "Owned" and "Rented" categories, 68·19 per cent of the dwellings in the district are owned and 31·81 per cent are rented. The proportion of owned is higher (83·21 per cent) in rural areas but very much lower (30·69 per cent) in urban areas. This low proportion of 30·69 per cent for the urban areas in the district is slightly higher than the average of 30·28 per cent for all urban areas of the State.

Out of the various materials used for walls, stone appears to be predominant in the district with a proportion of 66·72 per cent. This may be attributed to the availability in abundance of good building stone like the deccan trap or basalt found either in quarries or in boulders in every part of the district. The proportion of stone used in North Sholapur taluka is very much lower and the predominant material used there is burnt bricks. Other material used second in predominance in the district is burnt bricks. Stone is used more in rural areas than in urban. Its proportion in the rural area is 83·10 per cent against 25·79 per cent in urban areas. Burnt bricks are used more in urban areas with a proportion of 55·59 per cent against only 1·25 per cent in rural areas. Grass, leaves, reeds, bamboo, etc., are used for 8·20 per cent of the dwellings in rural areas and 8·10 per cent in urban areas.

Out of the material of roof, grass, leaves, reeds, thatched wood, bamboos are predominant in the district with a proportion of 33·22 per cent. The corrugated iron, zinc or other metal sheets are also equally in use along with grass, leaves, thatch, etc., with a proportion of 33·15 per cent. Grass, leaves, thatched wood, etc., are, however, more common in rural areas of the district. Houses are generally built with flat roofs covered either with lime or mud. The proportion of dwellings using thatch, grass, etc., in rural areas is 40·24 per cent as against 15·68 per cent in urban areas. But corrugated iron, zinc or other metal sheets are used more in urban areas with a proportion of 53·68 per cent as against 24·93 per cent in rural areas. In some talukas of the district, mud-roofed houses with layer of bricks laid over the planking and covered with white earth or with "Karal" a kind of sandy oily loam, are generally noticed. Flat roofs are, however, more common all over the district for the fact that the rainfall is very scanty and uncertain causing recurring famine, near famine or scarcity conditions.

Classified by the number of rooms occupied, 74·06 per cent households are occupying one-room dwellings and 17·51 per cent are occupying two-room dwellings. The households occupying larger number of rooms are more in urban areas than in the rural. Average number of persons per room is 3·96 for total, 4·16 for rural and 3·53 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the most important activity in the district as it engages 69·49 per cent of the working population in the district. Many others also work in industries related to processing of agricultural produce or trade, transport and services ancillary to agriculture.

Tables 3 to 10 in Part III present statistics regarding land utilisation, crop pattern, irrigation, wholesale and harvest prices and livestock and agricultural implements, etc., for the district.

Cultivating Seasons

As in other areas of the State, in this district also there are two agricultural seasons, *viz.*, Kharif and Rabi. But the district on the average has considerably more area under rabi crops than kharif crops. The ratio of areas under rabi and kharif crops in 1959-60 was 80 : 20. The proportion is somewhat equal in Barshi taluka. All other talukas have very high proportion of areas under cultivation in rabi season. Bajri, ground nut, tur, cotton and rice are the principal crops grown in kharif season and rabi jowar, wheat, gram and safflower are the principal crops of rabi season.

Jowar is grown in both seasons. But the district has almost entire area under rabi jowar. Only Barshi taluka has some area under kharif jowar.

Sugarcane is a perennial crop and its importance is gradually increasing.

A crop calendar giving monthwise operations in respect of principal crops in the district is shown on page (34).

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown below compared to the average for the State. All the figures are based on average for three years from 1957-58 to 1959-60 : —

Administrative Unit	Percentage of geographical area									
	Total geographical area	Forests	Barren and unculturable land	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	Gross cropped area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)

The Figure on page (36) shows the land utilisation pattern for the year 1959-60 for the district and each taluka separately.

The net area sown in the district is 79·19 per cent of the geographical area as against 57·69 per cent for Maharashtra. Compared to the State averages the district has lower proportion of areas under barren and unculturable categories, culturable wastes and lands put to non-agricultural uses. The proportion of area under forests is only 2·55 per cent of the geographical area as against the State average of 17·54 per cent.

Within the district the proportion of net area sown to the geographical area ranges between 57·60 per cent for Malshiras taluka and 90·71 per cent for South Sholapur taluka. Malshiras taluka has very high proportion of areas under permanent pastures (13·92 per cent) and barren and unculturable categories (9·96 per cent), hence the proportion of net area sown is low there. The proportion of land put to non-agricultural uses is very low in almost all talukas except North Sholapur (7·30 per cent) which includes Sholapur city. About one-fifth part of Sangola taluka is under fallow lands. Forests have significant proportions in Sangola (5·17 per cent) and Malshiras (4·90 per cent) talukas only.

Because of the changes in classification of land utilisation effected in 1950-51, it is not possible to determine if there has been any shift in the pattern of land utilisation during the last 40—50 years.

Crop Pattern

The proportions of areas under the important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All figures are averages for 3 years from 1957-58 to 1959-60 :—

Details of cropped area	Percentage of gross cropped area in												
	Maharashtra	Sholapur District	Karmala Taluka	Barshi Taluka	Madha Taluka	Malshiras Taluka	Pandharpur Taluka	Mohol Taluka	North Sholapur Taluka	South Sholapur Taluka	Sangola Taluka	Mangalwedha Taluka	Akkalkot Taluka
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)

Figure on page (38) shows the crop pattern for the district and each taluka separately.

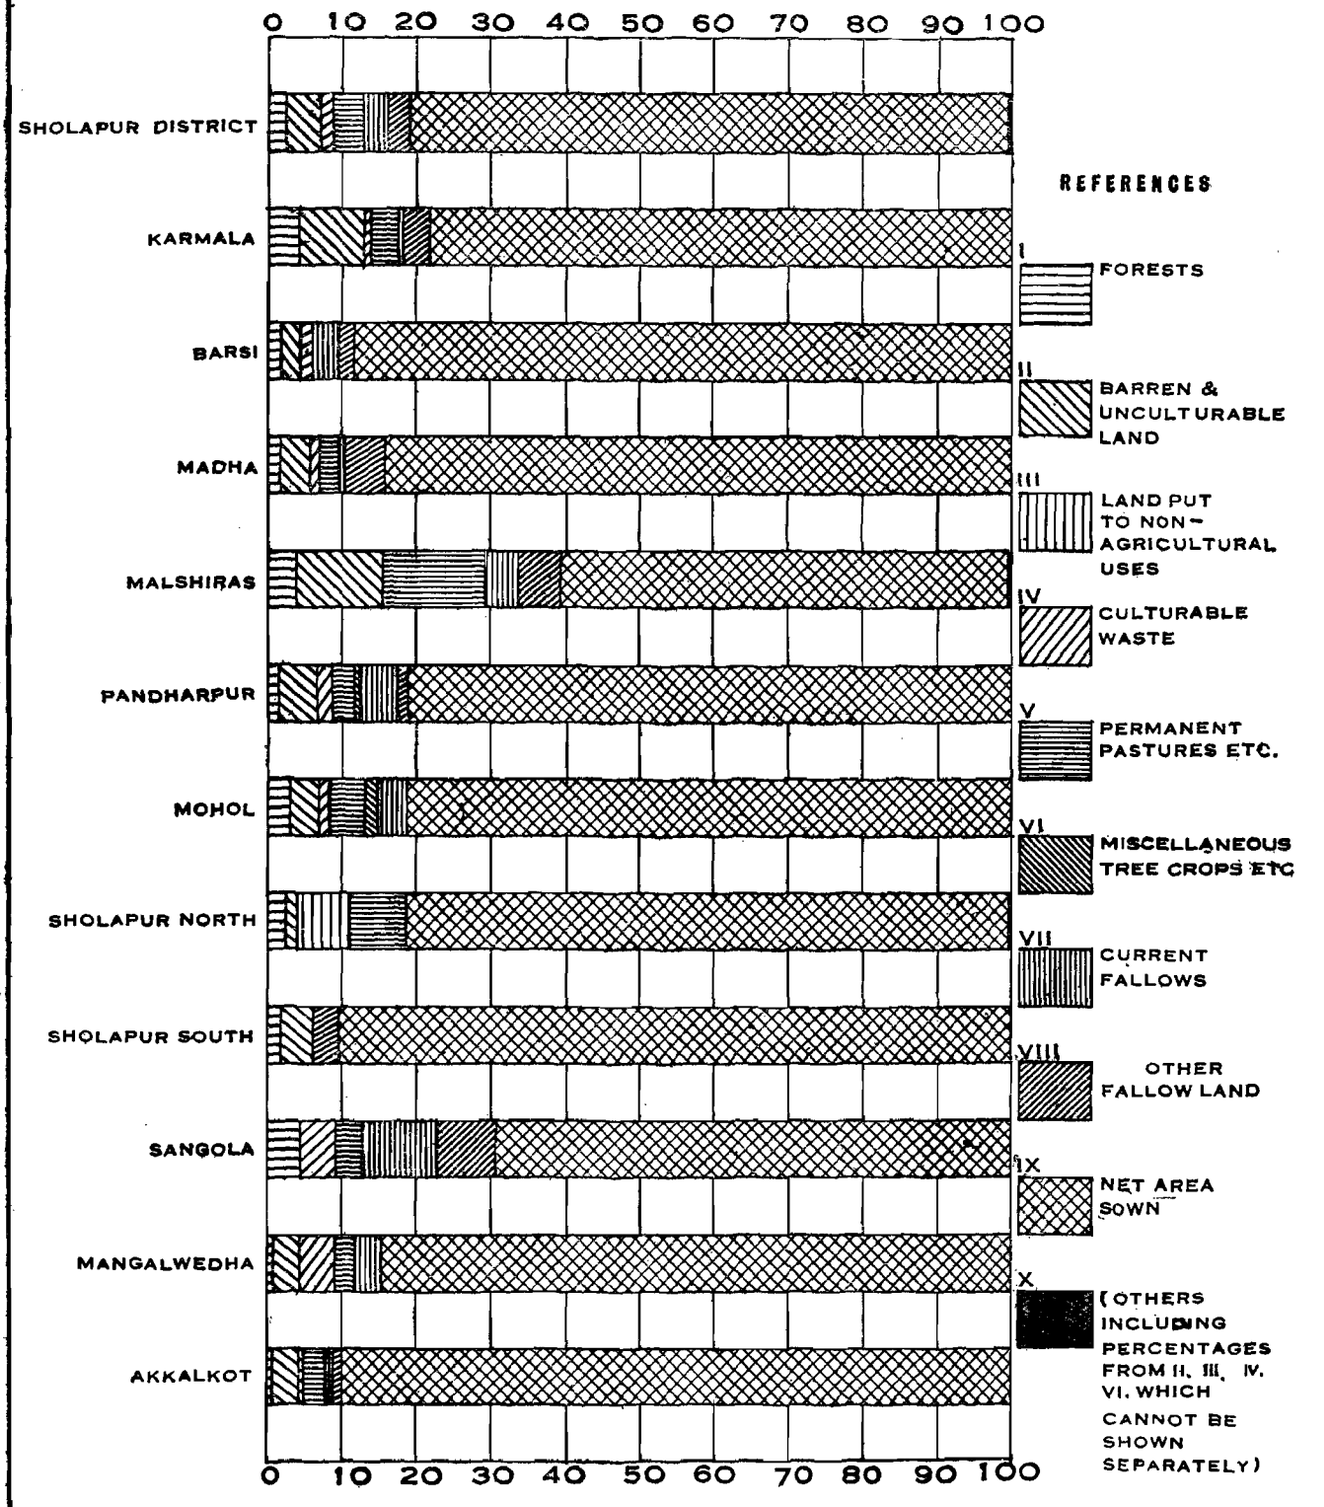

Jowar obviously ranks first amongst all the crops of the district covering 61·19 per cent of the gross cropped area which is almost double the average for Maharashtra (30·95 per cent). The district, in fact, is a major jowar producing area of the State, both in variety and in quantity. Among other food crops pulses come next in importance with 8·67 per cent of the gross cropped area. Tur, gram and mug are the important pulses of the district. Bajri covers another 7·73 per cent and is also an important cereal of the district. Rice (0·77 per cent) is rarely grown. Compared to the State averages, the district has lower proportions of areas under almost all the food crops. The district proportion of sugarcane (0·77 per cent) is slightly higher than the State average (0·63 per cent). Some of the important sugar factories in the State are located in this district.

Oil-seeds with nearly 1½ times the average proportion of Maharashtra and occupying little over the eighth part of gross cropped area are the most important among non-food crops. Groundnut is the most important oil-seed covering 61 per cent of the area under that group. Safflower is another important oil-seed which covers 35 per cent of the area under oil-seeds. The proportion of area under tobacco (0·05 per cent) is slightly less than half the State average (0·12 per cent). Cotton has almost insignificant area in the district.

From 1951-52 to 1959-60 there is a slight decrease from 89·02 per cent to 83·18 per cent in the proportion of food crops to the gross cropped area and

LAND UTILISATION

TALUKAWISE PERCENTAGES 1959-60

corresponding increase in the proportion of non-food crops. Amongst food crops proportion of cereals reduced from 77·02 per cent to 69·35 per cent but the proportion of pulses increased from 7·84 per cent to 8·87 per cent. The proportion of area under condiments and spices has also increased from 0·63 per cent to 0·68 per cent during the same period. Reduction in the acreages under the food crops is in respect of wheat (2·56 per cent), jowar (2·19 per cent) and bajri (1·40 per cent). The area under rice has increased by 300 acres or 1·16 per cent and the area under pulses by 22·44 per cent. The area under fruits and vegetables has reduced by 2,600 acres but that under condiments and spices increased from 17,900 acres to 20,900 acres or by 16·76 per cent. The area under sugarcane which was 18,200 acres in 1951-52 increased gradually to 25,900 acres in 1959-60. This may be due to setting up of new sugar factories. The area under groundnut has almost doubled during the period and that under other oil-seeds (chiefly safflower) multiplied more than 1½ times. The area under cotton, however, shows reduction by nearly 10 per cent.

Comparable statistics are not available for the entire district for years prior to 1950-51. The proportions of areas under different crops reported by District Gazetteer in 1881-82 were jowar 59·57 per cent, wheat 2·62 per cent, bajri 13·07 per cent, rice 1·53 per cent, cotton 1·76 per cent, sugarcane 0·23 per cent, pulses 8·01 per cent, oil-seeds 9·45 per cent and tobacco 0·19 per cent.

Generally speaking the crop pattern in the district is inferior to the average for the State. The State's crop pattern itself is poor in the All-India setting because of high proportion of jowar, bajri and other low value crops. The district proportions of low value crops like jowar and other cereals are higher and that of rich value crops like rice, wheat, cotton, etc., are considerably lower than the State averages. The district average yields for most of the crops are also lower than the State averages.

The relieving factors are higher proportion of areas under sugarcane and oil-seeds and larger proportion of irrigated areas.

Within the district, the cropping pattern varies according to soil types and rainfall. The high proportion of areas under food crops in 1959-60 is observed in all talukas, it being moret han 90 per cent in Malshiras, Pandharpur and Sangola talukas. Table on page (35) shows that rice has significant proportion in the eastern tract consisting of Akkalkot (1·82 per cent), South Sholapur (1·17 per cent), North Sholapur (1·07 per cent) and Barshi (1·32 per cent) talukas. Proportion of wheat is also more than 2 per cent in the same tract. More than half the cropped area is under jowar in all talukas except Akkalkot (45·46 per cent) and Barshi (49·74 per cent). The south-west zone consisting of Malshiras, Sangola and Mangalwedha talukas has sizable proportions under bajri. Malshiras taluka which has a large net work of canals has a very large proportion of area under sugarcane.

The proportion of area under non-food crops is highest (29·88 per cent) in Barshi taluka and lowest (7·62 per cent) in Sangola taluka. Oil-seeds have large proportions in the eastern tract, *viz.*, Akkalkot (21·36 per cent), Barshi (20·01 per cent), South Sholapur (14·83 per cent) and North Sholapur (13·42 per cent) talukas and in the northern zone consisting of Madha (12·25 per cent) and Karmala (11·45 per cent) talukas. Amongst oil-seeds, groundnut has large proportions in the eastern tract and safflower predominates in the northern zone.

Nine-year average yields and 1958-59 acreages and outturns of important crops for the district are shown below taking corresponding figures for Maharashtra as 100 :—

	Nine-year average yield per acre	1958-59 area	1958-59 outturn
MAHARASHTRA	100·00	100·00	100·00
Rice	56·00	0·68	0·47
Wheat	130·31	2·86	3·22
Jowar	66·97	13·09	10·81
Bajri	31·84	4·78	2·12
Tur	69·23	5·76	4·91
Gram	88·32	6·18	5·88
Sugarcane	104·21	7·81	7·55
Cotton	186·36	0·47	1·09
Groundnut	92·76	6·56	7·74
Seasamun	75·26	3·15	3·13
Rape, mustard and linseed..	112·11	2·74	3·38
Tobacco	109·78	2·97	2·86

The district average yields are higher than the State averages for wheat, sugarcane, rape, mustard, linseed and tobacco and highest for cotton. They are very low for rice and bajri. More than 8th part of acreage under jowar in Maharashtra is covered in the district and the district accounts for more than 10 per cent of contribution in the State's outturn of this crop.

The Techno-Economic Survey of Maharashtra has estimated the gross value of output per acre of cropped area in 1955-56 at Rs. 69 for the district as against Rs. 76 for the State and Rs. 126 for India.

CROP PATTERN 1959-60

TALUKAWISE PERCENTAGES

The density of population, proportion of workers on land to total workers, gross area sown per worker on land and the proportion of irrigated areas to gross cropped area are shown below for the district and each of its talukas compared with the State averages :—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land in acres	Percentage of irrigated area to gross cropped area
MAHARASHTRA ..	334	69·91	3·50	6·23
SHOLAPUR DISTRICT	320	69·49	5·40	10·73
Karmala Taluka	207	83·19	6·14	7·62
Barshi Taluka	352	77·17	4·67	6·29
Madha Taluka	262	83·59	5·47	8·05
Malshiras Taluka	283	76·28	4·45	28·85
Pandharpur Taluka.. ..	309	66·27	6·41	10·98
Mohol Taluka	224	87·31	5·08	9·72
North Sholapur Taluka ..	1,427	18·88	5·14	8·54
South Sholapur Taluka ..	244	87·67	5·72	4·29
Sangola Taluka	210	80·28	5·68	16·53
Mangalwedha Taluka ..	202	89·15	5·89	7·48
Akkalkot Taluka	327	77·16	5·45	12·09

69·49 per cent of the total workers work on land. 43·56 per cent are cultivators and 25·93 per cent are agricultural labourers. The proportion of workers working on land is very nearly the same as the State average (69·91 per cent). The gross cropped area sown per worker on land (5·40 acres) is, however, considerably higher than the State average (3·50 acres). This supplemented with higher proportion of irrigated areas have resulted in raising the gross value from agriculture in the district considerably above the State average.

Within the district the proportion of workers working on land to the total workers ranges from 18·88 per cent for North Sholapur taluka to 89·15 per cent for Mangalwedha taluka. North Sholapur taluka has large industrialised urban area in Sholapur city. The proportion is, therefore, very low there. In all other talukas except Pandharpur the proportion is higher than the State average. The gross area sown per worker on land ranges between 4·45 acres for Malshiras taluka and 6·41 acres for Pandharpur taluka.

The climatic conditions and soil types are most suitable for rabi crops and generally the proportion of net area sown more than once to the total net area sown in the district is considerably lower than the State average. In 1959-60 the proportion was only 2·70 per cent as against 5·05 per cent for Maharashtra. The proportion, however, varies from year to year. In 1951-52 the proportion was reported as 2·54 per cent, in 1954-55 as 2·29 per cent and in 1956-57 as 2·00 per cent. The net area sown more than once was largest (80,400 acres) in 1959-60. The District Gazetteer reports that net area cropped more than once in 1881-82 was only 26,184 acres. Within the district, the proportion of net area sown more than once to the net cropped area is highest (4·40 per cent) in Malshiras taluka and lowest (1·30 per cent) in Mangalwedha taluka. In 1959-60, the area sown more than once was largest in Barshi taluka (13,500 acres or 3·73 per cent of net area sown). Malshiras had 10,500 acres or 4·40 per cent of net area sown and Akkalkot taluka had 9,900 acres or 3·21 per cent of net area sown. The pattern of double cropping in the district is as follows :—

(1) Summer groundnut followed by rabi jowar and wheat;

(2) Onions followed by chillies or groundnut;

(3) Paddy followed by gram ;

(4) Chillies followed by wheat;

(5) Mug or udid followed by rabi jowar and wheat.

Irrigation

The proportion of gross irrigated area to gross cropped area in 1959-60 varies from 4·29 per cent in South Sholapur taluka to 28·85 per cent in Malshiras taluka. It is significant that except for South Sholapur taluka all other talukas have proportion higher than the State average (6·23 per cent).

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation separately for each taluka and the district. Well is the major source of irrigation irrigating 76·59 per cent of net irrigated area. Canals irrigate another 21·69 per cent and the remaining 1·72 per cent are irrigated by tanks. The major portion of canal irrigation is in Malshiras taluka (39,200 acres). The other talukas having significant areas under canal irrigation are Pandharpur (8,800 acres or 36·07 per cent of net irrigated area in the taluka), North Sholapur (3,800 acres or 39·18 per cent), Sangola (3,200 acres or 8·44 per cent) and Karmala (2,400 acres or 12·31 per cent). Private canals irrigate small areas in Barshi and Madha talukas. South Sholapur, Mangalwedha and Akkalkot talukas do not have canal irrigation. 10·42 per cent of net irrigated area (2,000 acres) in Barshi taluka and 5·28 per cent

(2,000 acres) in Sangola taluka is irrigated by tanks. Mangalwedha and South Sholapur talukas also have some area under tank irrigation. Excepting Malshiras taluka, in all other talukas, the major source of irrigation is wells. Even in Malshiras taluka the extent of well irrigation is appreciably high (22,500 acres or 36·47 per cent of net irrigated area. Akkalkot taluka has the largest number of wells in use for irrigation. The area irrigated per well is however higher in Malshiras taluka than any other taluka.

The net irrigated area has decreased from 274,800 acres in 1951-52 to 268,300 acres in 1959-60. The gross irrigated area has, however, increased from 314,600 acres to 328,300 acres during the same period. The net area irrigated by canals has reduced to a little over half but that irrigated by wells has increased by 54 per cent. The net area irrigated by tanks which was 400 acres in 1951-52 increased to 4,600 acres in 1959-60. The canal irrigation was extended to Karmala, Barshi, Madha, Mohol and North Sholapur talukas in 1959-60. However, there has been considerable decrease in areas under canal irrigation in Malshiras taluka which may be worth local investigation. The increase in area under irrigation by tanks is due to construction of tanks in Barshi and Sangola talukas. The increase in well irrigation during the decade is maximum in Karmala taluka.

Another remarkable improvement is observed in the number of oil-engines used for irrigation. The number of oil-engines increased from 1,022 in 1951 to 3,807 in 1961. Malshiras taluka has the highest number of oil-engines (581).

Crop Pattern under Irrigation

Table 5 in Part III shows the crop pattern under irrigation. In the year 1959-60, 83·06 per cent of the irrigated area was under food crops and 16·94 per cent under non-food crops. Among food crops jowar occupied 43·80 per cent, wheat 11·27 per cent, rice 1·95 per cent, sugarcane 7·80 per cent, pulses (mainly gram) 1·46 per cent, maize, bajri and other cereals 6·24 per cent, condiments and spices 5·94 per cent and other food crops 4·60 per cent. Among non-food crops, cotton occupied 5·39 per cent, tobacco 0·15 per cent, oilseeds 5·12 per cent and the remaining 6·28 per cent was covered by fodder crops. Jowar which although covered the largest area under irrigation, irrigated jowar occupied only 8·08 per cent of the total area under jowar. More than half the area under cotton is irrigated while the extent of irrigated wheat was nearly 70 per cent. The proportion of irrigated area under other crops to the total areas under other crops was bajri 5·25 per cent, maize 67·62 per cent, pulses 1·77 per cent, condiments and spices 93·30 per cent, groundnut 6·00 per cent and tobacco 33·33 per cent.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains, sugarcane, groundnut and cotton from 1951 to 1956 and from 1956 to 1960 compares with the production of 1950-51 as follows:—

	Average production in hundred tons during		
	1950-51	1951—56	1956—60
Rice	46	38	58
Wheat	153	92	111
Jowar	1,078	1,951	2,775
Bajri	99	78	80
Other cereals	32	31	35
Total cereals	1,408	2,190	3,059
Total pulses	212	287	337
Total foodgrains	1,620	2,477	3,396
Sugarcane (Gur)	457	481	735
Groundnut	352	426	546
Cotton (in bales of 392 lbs. each).	30	93	79

This comparison taking single year as a base may not be very much conclusive as the base year itself might perhaps have been a very favourable or a very bad agricultural season. However, such comparison brings out some very interesting results as follows.

In the First Plan period the average annual production of total foodgrains increased by 52·90 per cent over the 1950-51 production. The corresponding increase during the Second Plan period is 109·63 per cent. The production of total cereals during the Second Plan period is more than double the 1950-51 production. The production of pulses during the First Plan period and also during Second Plan period was higher than the 1950-51 production. Among cereals the average annual production of jowar during the Second Plan was more than two and half times the 1950-51 production. The production of rice was 17·39 per cent lower than 1950-51 production during the First Plan period but during the Second Plan period it was 26·09 per cent more than 1950-51 production. There is a substantial decrease in the annual average production of wheat and bajri during both Plan periods. There is however considerable increase in the production of sugarcane, groundnut and cotton.

Agricultural Implements

The number of agricultural implements for the district and for each of its talukas for the years 1951, 1956 and 1961 are separately shown in Section 'C' of Table 9 in Part III.

The remarkable increase in the number of oil-engines used for irrigation purposes has already been described earlier. Between 1951 and 1961, the number of iron ploughs has increased by 37·29 per cent but the number of wooden ploughs reduced by 22·26 per cent. Both the types together

however increased by 12·62 per cent. The number of sugarcane crushers operated by power has decreased from 1,107 in 1951 to 437 in 1961. Similarly, crushers worked by bullocks also decreased from 483 in 1951 to 360 in 1961 (i.e., by 25·47 per cent). The total for the two types combined is nearly half the number in 1951. The number of tractors which was 60 in 1951 decreased by 50 per cent in 1961. The number of electric pumps used for irrigation reduced from 81 to 19 during the same period.

By using standard average prices of the agricultural implements shown in Table 9 in Part III, the total outlay on them for the year 1961 may be estimated at Rs. 174 lakhs or Rs. 5·83 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 8 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as a Secretary to that Committee. There is Agricultural Extension Officer at taluka level working under the Block Development Officer. The latter works as a Secretary to the Taluka Samiti. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There are 4 Agricultural Research Centres carrying out experiments in the district. The Regional Agricultural Research Station established at Mohol in 1918 has an area of 145·37 acres. Research is conducted at this centre on rabi jowar as main crop and safflower, groundnut, tur, gram, mug and linseed as subsidiary crops.

There is Sugarcane Research Sub-station at Akluj in Malshiras taluka which was established in 1940. It has a farm area of 35·68 acres. At the Agricultural Research Main Station, Mulegaon, taluka South Sholapur (farm area 194·30 acres), research is conducted on dry-farming with rabi jowar as main crop and gram, bajri, tur and groundnut as subsidiary crops. Another Agricultural Research Sub-station was established at Jeur in Karmala taluka in 1941. It has a farm area of 47·25 acres. Research is carried out here on dry-farming with jowar as main crop and wheat and gram as subsidiary crops.

Agricultural Improvement

(*i*) *Increasing the area under irrigation.*—The most important single item for increasing agricultural production is to increase the area under irrigation. The increase in the gross irrigated area in 1959-60 over that in 1951-52 has already been described earlier. This has been brought about by building bandharas, constructions of new tanks and wells and renovations to old ones and installation of pumping sets. During the first two Plan periods work of construction of 6 new tanks, extension of one existing tank and extension of existing canals were taken up. The work of construction of Budhial tank on Belvan Nallah near Sangola has been carried over to the Third Five-Year Plan. All these existing works on completion will raise the irrigation potential by about 30,000 acres. Besides the spillover works of the Second Five-Year Plan, the Third Five-Year Plan includes new works irrigating 2,412 acres and schemes for construction of 11,000 wells and installation of 5,000 pumping sets.

With the increasing facilities for irrigation, the question of full utilisation of the created potential is likely to assume importance. Statistics of the available potential and actual utilisation are not, however, available for the district separately.

(*ii*) *Improved Seeds.*—Another item of improving food production is the recommendation of appropriate varieties or strains of crops suitable for the tract. The Agricultural Department has recommended the following improved varieties or strains of crops for the district :—

(1)	Jowar	M-35-1.
(2)	Bajri	Akola, 28-15, Hyb, 35.
(3)	Paddy	Krishnasal, Basmati.
(4)	Wheat	N-345, N-146, Hyb-65; N-59.
(5)	Cotton	Deviraj; 170-CO2; Virnar.
(6)	Sugarcane	C.O.-740; C.O.-775; C.O.-419.
(7)	Groundnut	Faizpur 1-5; Spanish Improved, K-3; K-4-11.
(8)	Gram	Chaffa.
(9)	Tur	N-84.
(10)	Safflower	N-62-8.

Seed farms have been established at 10 places in the district to provide improved seed to farmers. The combined area of all the seed farms is 670·08 acres.

(*iii*) *Soil Conservation or Bunding.*—During the First and the Second Plan periods an area of 1·72 lakh acres and 1·02 lakh acres, respectively, have been bunded. The third plan target is 6 lakh acres involving an outlay of Rs. 304·34 lakhs. An area of 1·97 lakh acres has already been bunded till September 1963.

Livestock

The number of livestock for the years 1951, 1956 and 1961 has been shown separately for each taluka and the district in Table 9 in Part III.

The total livestock as per 1961 Livestock Census in the district is 12·88 lakh. This makes 42·12 livestock per 100 acres of cultivated area. The corresponding figure for the State is 139.

The total bovine population in the district in 1961 is 54·22 per cent of the total livestock. The number of male bovines over 3 years are 2·42 lakh. The area cultivated per pair of male bovines over 3 years is thus 25·29 acres, as against 5·48 acres for Maharashtra. There are 2·36 lakh female bovines over 3 years in the district. That makes 127 female bovines over 3 years per 1,000 population in the district as against the State average of 159.

During the first half of the decade 1951 to 1961 there was a reduction in all the types of livestock except goats and other livestock. This was, however, made good during the latter half (1956—61) with the result that there has been an overall increase of 15·90 per cent in the total livestock during the decade. Increase is observed in all types of livestock except horses and ponies and sheep which have reduced from 5,900 to 2,600 and from 202,000 to 192,100, respectively. The number of cattle and buffaloes increased by 7·21 per cent and 22·97 per cent, respectively. During the same period, the increase in the number of goats is 41·55 per cent. The number of poultry has also increased by 201,600 or 80·16 per cent.

Veterinary Facilities

There are 11 veterinary dispensaries located at the following places :—

(1) Akkalkot,
(2) Sangola,
(3) Mangalwedha,
(4) Sholapur,
(5) Barshi,
(6) Karmala,
(7) Pandharpur,
(8) Malshiras,
(9) Madha,
(10) Mahud, and
(11) Mohol.

In addition to this there are veterinary aid centres located at 14 different places in the district.

Treatment of animal diseases, control of epidemics, castration of scrub bulls and control and destruction of animal parasites are the main services rendered at these dispensaries.

Majority of cattle and buffaloes found in the district are non-descript. The district is home place of famous Khillar Cattle and Pandharpur breed of buffaloes. For improving the local breed a number of schemes have been undertaken by Animal Husbandry Department. A full-fledged district Artificial Insemination Centre works at Kurduwadi.

Under the Key Village Scheme, key village centre has been established in 1952 at Mahud in Sangola taluka with six key village units. Each key village unit is provided with a breeding bull for natural services. This unit serves as a Veterinary Aid Centre for the first-aid of cattle. At Mahud Central Artificial Insemination laboratory is located and only insemination work is done here. There are also 16 Extension sub-centres for development of the breed which have been established roundabout the Key Village Block, Mahud.

Under the Premium Bull Scheme which started its operation nearly 20 years ago, premium bull centres have been located at different places in the district. There are about 67 premium bulls maintained to upgrade the non-descript village cattle.

In addition there are 12 supplementary cattle-breeding centres where 30 bulls and 364 premium cows are maintained. There is one full-fledged Khillar Cattle Breeding Farm at Junoni, in Sangola taluka for development of breed. There is also one sheep breeding station at Mahud where improved varieties of sheep are bred. Besides there are 4 sheep and wool extension centres at (1) Sangola, (2) Javale in Sangola taluka, (3) Piliv in Malshiras taluka and (4) Bhalawani in Pandharpur taluka.

A poultry breeding station at Kurduwadi is working since 1946. It has farm area of 13·20 acres. There are also 2 poultry demonstration centres, one at Sholapur and other at Sangola. Stock of White Leghorn breed is maintained at the station.

AGRARIAN STRUCTURE AND LAND REFORMS

Land Tenures

The most important tenure prevalent in the district is the Ryotwari tenure of heritable and transferable occupancy rights. Ryotwari means that, the State deals direct in matters of Land Revenue with the individual holder. There are two classes of occupancy tenure : (*a*) the old tenure and (*b*) the new tenure.

Under the old tenure, lands are heritable and transferable, but under the new or restricted tenure (introduced in 1901), lands in certain areas are not transferable without the previous sanction of the Collector.

There used to be another tenure of Inam lands which were gifted or granted by the Government for meritorious service in the past or in lieu or

on condition of some continuing service useful to the Government or to the village community. Inam lands were held free of land revenue. There were five classes of Inams in the district :—

	Year of abolition
(i) Political or Saranjam Inams	1952
(ii) Personal Inams	1953
(iii) Hereditary Watan Inams	1951
(iv) Village servants useful to the—	
(*a*) Community	1954
(*b*) Government—Patils	1963
Mahars	1959
(v) Deosthan Inams.	

All Inams, excepting the last category of Deosthan Inams held by religious institutions or for religious services, have now been abolished under various measures of land reforms. The year in which each class of Inam was abolished is shown above. All hereditary Watan lands held for village services have also been abolished and all village servants now work on a salary basis. The occupancy rights of abolished Inam lands have been conferred on their holders or tenants, as the case may be, on condition of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Record of Rights

A Record of Rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up-to-date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual revenue accounts are prepared on the basis of the Record of Rights.

Ceiling on Holdings of Agricultural Land

The Maharashtra Agricultural Land (Ceiling on Holdings) Act came in force from 26th January 1962. Two local areas, *viz.*, Sholapur and Karmala, have been notified in the district with different ceiling areas for different categories of land. For dry crop land, the ceiling areas fixed are : 108 and 114 acres, respectively. In the case of irrigated lands, the ceiling area is the same in all the local areas, *viz.*, 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in 2 seasons, and 48 acres in areas which get irrigation water for one season only. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands Act which is in force since 1948. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the " Land to the tiller " policy the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1957, which is known as the " Tillers' Day ". This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1964, ownership rights have been conferred upon 6,424 tenants for 64,380 acres of land in the district. 1,899 tenants had mutually agreed with the landlords on the price to be paid by them in respect of 25,480 acres. In the remaining cases, the prices were fixed by the Revenue Officers.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were first applied to the district in 1948 in Karmala taluka. Pandharpur was the last taluka to be taken up for consolidation work where consolidation work started in 1962. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to the end of March 1963, 152 villages have been completed covering an area of 382,685 acres. The number of holdings involved is 58,683.

The consolidation work in the district is going on smoothly.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

Dry crop land	2·0 acres.
Bagayat land	0·5 acres.

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

Size of Land Holdings

Census Table B-X (based on 20 per cent Sample) in Part II of this Volume shows that 48·24 per cent of the total number of households cultivate land and the remaining 51·76 per cent do not cultivate any land.

Census Table B-XI (based on 20 per cent Sample) in Part II shows the break-up of cultivating households by size of land cultivated and by the interest in the land. 87·98 per cent of the cultivating households cultivate their owned lands only. 2·51 per cent of the households cultivate tenanted lands only and the remaining 9·51 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown in the statement in the next column.

The distribution of sample households in Table B-XI and the same shown in percentage in column 2 of the statement in the next column is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of these ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	0·63	5·01
1·0 to 4·9 acres	16·58	19·95
5·0 to 9·9 acres	21·37	20·75
10·0 to 14·9 acres	16·63	14·44
15·0 to 29·9 acres	25·51	22·17
30·0 to 49·9 acres	12·51	10·75
50 acres and above	6·77	6·93
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 19·31 acres. Average size of the ownership holding in the district was 18·86 acres in 1952-53 as against the average of 11·95 acres for the State.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to byelaws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The co-operative movement lacked popular enthusiasm till attainment of independence. Since the introduction of Five-Year Plans and with emphasis on development of rural areas, concentrated efforts were made during the last decade which have resulted in a rapid progress in the co-operative movement in the district. All the villages in the district are now covered by rural co-operatives. Besides agricultural credit, the activities are now extended to processing of agricultural products, dairying, farming, marketing, etc. Many of these co-operatives have, however, to make much more stride and much remains to be achieved.

The following description is based on the report for the year 1960-61.

Co-operative Credit

(*a*) *Agricultural Credit Societies.*—The number and membership of Agricultural Credit Societies have increased at a rapid pace during the last decade especially during the Second Plan period.

The comparative position of Agricultural Credit Societies in 1950-51 and 1960-61 is as under :—

		1950-51	1960-61
(1)	Number of Agricultural Credit Societies	487	844
(2)	Number of members	36,058	92,719
(3)	Share Capital .. .. (Rs. in lakhs)	12·82	60·69
(4)	Reserve and other funds (Rs. in lakhs)	11·43	21·36
(5)	Working Capital .. (Rs. in lakhs)	65·70	200·51
(6)	Number of members to whom loan was advanced ..	19,723	48,453
(7)	Amount advanced .. (Rs. in lakhs)	37·61	150·53
(8)	Amount recovered .. (Rs. in lakhs)	23·65	112·46
(9)	Loans outstanding .. (Rs. in lakhs)	51·06	172·14
(10)	Overdues.. .. .. (Rs. in lakhs)	10·55	50·43

Average membership per primary society in the district is 110 against the average of 96 members for Maharashtra. All the villages in the district have been covered by these societies.

Total owned funds (share capital *plus* reserve funds) of the primary agricultural credit societies in the district amounted in 1960-61 to Rs. 82·05 lakhs and formed 40·92 per cent of their working capital against 26 per cent for Maharashtra.

The loan operations of all the primary agricultural societies in the district amounted to Rs. 150·53 lakhs in 1960-61. The average amount of loan per borrowing member in the district worked out to Rs. 311 as against Rs. 329 for Maharashtra.

During the decade 1951—1961, the number of agricultural credit societies has increased by 73 per cent and the membership multiplied more than 2½ times. Their share capital increased by Rs. 47·87 lakhs and the working capital went up from Rs. 66 lakhs in 1950-51 to Rs. 201 lakhs in 1960-61. There is also an increase of Rs. 112·92 lakhs in the amount advanced as loans by the societies in 1960-61 over the amount advanced in 1950-51. The pace of recoveries has however not been improved which has resulted in raising the proportion of overdues to the outstanding loans from 20·66 per cent in 1950-51 to 29·30 per cent in 1960-61. This indeed points out to the need of improving the recoveries.

Besides the financial activities good progress has also been made by agricultural credit societies in the sphere of services to agriculturists such as distribution of agricultural requisites (like seeds, manure, etc.), marketing of agricultural produces, etc.

(*b*) *Central Co-operative Bank.*—The Central Co-operative Bank was established at the district headquarters in the year 1918 and has been working as federal financing agency catering for the credit requirements of all the primary credit societies in the district. Since 1962, the Zilla Parishad also transacts its financial business through this bank.

In the year 1960-61, the position of the bank was as follows :—

(1)	Number of members—		
	(*a*) Individuals		3,917
	(*b*) Societies		1,095
(2)	Paid-up share capital	(Rs. in lakhs)	15·85
(3)	Reserve and other funds	(Rs. in lakhs)	14·30
(4)	Deposits—		
	(*a*) Individuals	(Rs. in lakhs)	109·88
	(*b*) Societies and Banks	(Rs. in lakhs)	49·58
(5)	Borrowings—		
	(*a*) State Co-operative Bank and the Reserve Bank of India	(Rs. in lakhs)	32·00
	(*b*) Government	(Rs. in lakhs)	0·26
	(*c*) Other Sources	(Rs. in lakhs)	4·87
(6)	Working Capital	(Rs. in lakhs)	226·74
(7)	Cash—		
	(*a*) on hand	(Rs. in lakhs)	11·43
	(*b*) at Banks	(Rs. in lakhs)	17·85
(8)	Investments—		
	Government and other Trustee Securities	(Rs. in lakhs)	50·53
(9)	Percentage of cash in hand to deposits ..		7·17
(10)	Percentage of investment to deposits ..		31·69
(11)	Loans outstanding—		
	(*a*) Individuals	(Rs. in lakhs)	9·39
	(*b*) Societies	(Rs. in lakhs)	133·84
(12)	Percentage of loans outstanding to deposits ..		89·82
(13)	Percentage of loans outstanding to working capital		63·17
(14)	Overdues	(Rs. in lakhs)	15·01
(15)	Percentage of overdues to loans outstanding ..		10·48
(16)	Cost of management	(Rs. in lakhs)	3·43
(17)	Percentage of cost of management to working capital		1·51
(18)	Profit	(Rs. in lakhs)	1·83
(19)	Number of branches and Pay Offices in the district ..		16

During the year 1960-61, the society membership of the bank increased by 10·05 per cent but the individual membership has fallen by 8 members over 1959-60. On the whole there has been a very small increase of 1·87 per cent in the total membership of the bank. The share capital of

the bank has however increased by 35·59 per cent and there is an addition of Rs. 5·42 lakhs in the owned capital. There is also an increase of Rs. 10·92 lakhs in the working capital. The bank advanced loans of Rs. 259·91 lakhs as against Rs. 101·71 lakhs advanced in the previous year. There has been an improvement in the recoveries also and the proportion of overdues to outstanding loans has slightly decreased from 11·88 per cent to 10·48 per cent. The bank made a profit of Rs. 1·83 lakhs during the year as against a profit of Rs. 1·62 lakhs in the previous year. All these statistics speak about the progress made by the bank during the year.

(*c*) *Land Mortgage Bank.*—Primary Land Mortgage Bank was established at Sholapur in the year 1959, with a view to providing long-term finance to the cultivators. The membership of the Bank is 3,521, paid-up share capital Rs. 1·67 lakhs and working capital Rs. 30·25 lakhs. Loans amounting to Rs. 23·11 lakhs were advanced during the year.

The Bank has recently been established and has yet to make good progress.

(*d*) *Urban Banks and Credit Societies.*—There are in all 80 urban banks and credit societies in the district. Five of them are urban banks, 12 urban credit societies, 43 salary earners' societies and 20 factory workers' societies. Their combined membership is 34,554, paid-up share capital is Rs. 43·05 lakhs and working capital Rs. 126·77 lakhs. The societies advanced loans of Rs. 135·40 lakhs during the year.

These urban banks and credit soeieties have proved very useful to the urban populace which are usually in need of regular credit at reasonable rate of interest. In addition to financing loans to members these societies have also undertaken the work of distribution of consumer goods to their members and other public. Consumer goods worth Rs. 44·70 lakhs were supplied during the year.

Industrial Societies

There are 60 weavers' societies and 138 other industrial societies in the district. Out of 60 weavers' societies, 51 are handloom weavers' societies, 7 wool weavers' societies and 2 khadi weavers' societies. Their combined membership is 8,303, share capital Rs. 8·82 lakhs and working capital Rs. 39·42 lakhs.

The District Co-operative Weavers' Association, included above, was sanctioned a sum of Rs. 60,000 by the Government for making bulk purchases of yarn and other raw materials at ex-mill rates. This enabled the Federation to supply the raw material to the weavers' societies at moderate rates. The Federation also obtained license for imported silk and supplied the same to the societies.

The Apex Weavers' Society for Maharashtra State was organised at Sholapur during the year. The Housing Colony of Weavers has been established by Sholapur and Maindargi Weavers' Societies. For this purpose the societies received Government grants of Rs. 10,719 and Rs. 60,000, respectively. A loan of Rs. 4,177 and subsidy of Rs. 2,720 was granted to the Maindargi Weavers' Society for construction of godown to store cloth.

The other types of industrial societies include 22 oil ghanis, 1 cane and bamboo workers, 10 tanning, 13 leather working, 8 carpentry and smithy, 6 metal working, 5 pottery and brick-making, 33 coir and rope making, 2 neera and palm gur, 38 miscellaneous, etc. Their combined membership is 4,051, share capital Rs. 4·89 lakhs and working capital Rs. 11·25 lakhs. The value of production of these societies is Rs. 34·93 lakhs and sale value Rs. 39·27 lakhs.

The Nutan District Industrial Co-operative Association, Sholapur, and the District Telghana Sahakari Sangha are also federal societies included in the above types. The District Industrial Co-operative Association runs a sales depot for sale of cloth and other products produced by weavers and industrial societies. It has secured sub-agency of kerosene. The "Zilla Bailghani Tel Utpadak Sangh" supplies oil-seeds to oil processing societies.

Forest Labourers' Societies and Labour Contract Societies

There are 29 Labour Contract Co-operative Societies in the district. However, there is not a single forest labourers' co-operative society. Most of these Labour Contract Societies belong to the Backward Class persons.

The combined membership of these societies is 1,125, share capital Rs. 33,000 and working capital Rs. 1·01 lakhs. The societies received Rs. 14 thousand as loans and Rs. 8 thousand as subsidy from the Government. Many of these societies are provided work by Public Works Department authorities and Block Development Officers and other private concerns. Work contract of Rs. 3·83 lakhs were executed by these societies during the year.

Farming Societies

There are 21 collective farming and 32 joint farming co-operative societies in the district. The collective farming societies have 466 members, Rs. 75,000 as share capital and working capital of Rs. 2·68 lakhs. The area cultivated by the societies is 1,844 acres out of 2,386 acres under their command.

The combined membership of 32 joint farming societies is 566, share capital of Rs. 37,000 and working capital of Rs. 3·40 lakhs. The societies have 3,943 acres under their command of which 1,681 acres are cultivated.

Co-operative Lift Irrigation Societies

Six Co-operative Lift Irrigation Societies have been registered in this district. The combined membership of these 6 societies is 509, share capital Rs. 86,000 and working capital Rs. 10·17 lakhs. The area under their command is 2,960 acres of which only 371 acres were irrigated during the year.

Two of these societies have schemes of lift irrigation on river Bhima and other 4 on river Sina. Of these, 4 schemes at (1) Kusur, (2) Chinake, (3) Darphal Bibi and (4) Chikhali are completed and the schemes at Save and Pasalewadi on Sina river are in progress. Among these societies, the progress of Chandrabhaga Lift Irrigation Society, Ltd., Kusur, taluka South Sholapur, is only worth mentioning. The society has brought 340 acres of land under irrigation out of 900 acres under command.

Co-operative Sugar Factory

A co-operative sugar factory called "Yeshwant Sahakari Sakhar Karkhana, Sholapur" has been recently organised in the district. The factory has membership of 2 societies and 1,812 individuals, share capital Rs. 39·15 lakhs and working capital of Rs. 39·28 lakhs. Government has contributed Rs. 15 lakhs towards the share capital of the factory. The factory is still under construction.

Dairy Societies

There are 24 milk supply societies in the district. Nine of these societies have been organised during the year under report. Only 12 societies were working during the year under report. The others had not started these activities because of non-availability of Government aid.

The combined membership of the milk supply societies is 707 individuals, paid-up share capital Rs. 18,000 and working capital Rs. 24,000. Milk worth Rs. 67,000 was sold during the year. Four of the societies made a profit of Rs. 2,000, 13 suffered a loss of Rs. 2,000 and 7 others neither showed profit nor loss.

Purchase and Sales Societies

There is one District Purchase and Sales Union and ten Taluka Purchase and Sales Unions in the district. The District Purchase and Sales Union has membership of 370 members. Its share capital is Rs. 63,000 in which Government's contribution is Rs. 25,000. The Union had not undertaken any marketing and distribution activities during the year. The Taluka Purchase and Sales Unions together have 449 society members and 1,780 individual members and Rs. 1·94 lakhs as share capital. The Government has contributed Rs. 41,000 in the share capital of the Unions. The value of purchases and sales by the Unions amounted to Rs. 106·49 lakhs and Rs. 8·63 lakhs, respectively.

The Taluka Purchase and Sales Unions are carrying out their marketing and distribution activities with good zeal and their performances are fairly satisfactory. However, looking to the magnitude of the district these Unions will have to strive hard to achieve success as marketing societies and agencies for recovery of agricultural loans of the Agricultural Credit Societies. At present there is no effective linking of Agriculture Credit with marketing. Much has to be done in this direction.

Consumers' Movement

There are 51 primary consumers' societies in the district mostly located in urban areas. More than half the societies are located in Sholapur city alone. The combined membership of all the societies is 3,909, share capital Rs. 1·85 lakhs and working capital Rs. 5·03 lakhs. During the year 1960-61, the value of sales of these societies amounted to Rs. 29·38 lakhs. 23 of these societies made a profit of Rs. 46,000 and 6 suffered a loss of Rs. 7,000 and 22 other neither showed profit nor loss.

These consumers' societies are doing the business of trading foodgrains and other essential commodities at a very moderate rates. The distribution of controlled commodities like sugar is also their important activity.

Housing Societies

There are 60 Co-operative Housing Societies in the district of which 51 are for persons belonging to Backward Classes. Their total membership is 2,723, share capital Rs. 3·23 thousand, and working capital Rs. 14·50 lakhs. 50 independent houses valued at Rs. 5·16 lakhs have been constructed by the societies. The societies have constructed 20 independent houses and 414 tenements.

The progress of societies appears to be slow in respect of construction of houses and tenements because of non-availability of land, building materials and technical assistance.

Co-operative Activity for Backward Classes

Thirty-four Farming Societies and 51 Housing Societies and 2 Credit Societies have been organised for Backward Class persons.

The farming societies have membership of 320 individuals, share capital of Rs. 27,000 and working capital of Rs. 4·24 lakhs. The area cultivated during the year by the societies is 1,680 acres. Their working is, however, not up to the mark.

The credit societies have been stagnant for a considerable period.

There is also nothing worth mentioning about the housing societies. Only few societies have actually started construction work. The others could not start work for want of land, Government aid, etc.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

	Number of societies classified as				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Bank.	1	1	..	..	..	..	2
(2) Agricultural Credit Societies.	160	398	120	70	..	96	844
(3) Non-Agricultural Societies.	36	26	7	5	..	6	80
(4) Primary Land Mortgage Bank.	1	..	..	..	..	..	1

FORESTS

The district has an area of 49·38 square miles under forests which hardly constitutes 0·85 per cent of the total geographical area in the district as against 17·56 per cent for Maharashtra. A part of the district forest is administered by Divisional Forest Officer, Satara Division, with headquarters at Satara, and the other part by Divisional Forest Officer, Ahmednagar Division, with headquarters at Ahmednagar. Both the divisions work under Conservator of Forests, Poona Circle, Poona.

The forests are mainly observed in Malshiras, Sangola and Barshi talukas on hill slopes and depressions. They are primarily mixed forests of dry deciduous type. The chief species found in the forest are Khair, Hiwar, Henkal, Amoni, Apta, Ber, Neem, Babul, Sissoo, Sandal and scattered Teak. The only commercially important species are teak and sandalwood but their proportion is very small. The forests also have extensive grassy areas, especially in Barshi taluka. The species of grasses commonly found are Kusal, Dongri Gavat, Sheda Paonya and Marvel.

Most of the forest produce of the district is consumed locally. In fact, the forest produce fall short of demand and the requirements have to be imported from other places like Nasik, Dandeli and, Dangs. The important centres of collection of forest produce in the district are Barshi and Sholapur. As per 1961 Census, 269 persons are reported as working in forestry and logging as principal work. 190 of them are males and 79 females.

The Forest Department has launched a large scale afforestation programme and so far an area of 1,390 acres has been afforested. In view of the abundance of grass a "Fodder Bank" has been established at Ramling valley near Yedshi (Barshi taluka) for building fodder reserve for supply during scarcity. There is also one wet nursery at Ramling which supplies plants for afforestation and also for annual Vana Mahotsawa programme.

FISHERIES

Fishing activities in the district are naturally restricted to inland waters only; rivers, tanks and ponds being the chief sources. The total length of perennial rivers in the district is about 740 km. There are also 20 tanks and ponds which provide about 20,000 acres of water spread area, which is not quite adequate for large scale development of pisciculture.

The commercially important varieties of fish found in the district are: Kirkit or Shinghala, Murrel, Shivda (Pahadi or Daku), Chamar or Chalat, Pal or Dandaonya, Khavlya, Khaval, Kolshi, Zinga, Boi, Kalundar, Kharabi and Muri.

These varieties are, however, of not fast growing type. As such, under Five-Year Plan Schemes, quick growing "Bengal Carps" are stocked annually in the perennial water tanks for propagation of pisciculture. The varieties stocked are "Catla Catla", Rohu and Mrigal. During the Second Five-Year Plan period about 4·72 lakhs of carp fry was stocked while during only the first 2 years of the Third Plan period the quantity stocked amounted to 4·22 lakhs.

In 1961 Census, 261 persons are reported as engaged in fishing as principal work. 242 of them are males and 19 females. Fishermen in the

district belong to the communities known as Bhoi. Since fishing industry has limited scope, some of the fishermen take to seasonal agriculture. Fishing is generally done with the help of Gill nets of different meshes known as Bhusi, Kut, Tiwari, Pandi, etc., and Cast nets known as Pagar. The nets are mostly made of cotton twine but these days nylon is also effectively used. Under the fishery requisite schemes financial assistance in form of subsidy is given for purchase of nylon and cotton twine.

Three Co-operative Societies of fishermen have been organised in the district. The co-operative societies are given financial assistance in form of loans and subsidy. They are also helped to secure tanks and ponds for purposes of pisciculture.

MINING AND QUARRYING

The district is covered mostly by Deccan Trap a material of great use in building industry. Deposits of other kind of mineral are not reported anywhere in the district. Mining activity in the district is, therefore, restricted only to quarrying of stones.

As per 1961 Census, 1,197 persons are reported as working on quarrying of stones, clay, sand, etc., 954 of them are males and 243 females.

INDUSTRIES

The industrialisation in the district started as back as in the Nineteenth century. Commencement of a railway line in 1870, establishment of textile mill in 1877 and completion of the work of a big reservoir known as Ekruk Tank are the three factors which had helped to a great extent the industrial development in the district. There are 35 large scale industries manufacturing textiles, sugar, gur, etc. The district has, therefore, become the third industrial centre in the State. In spite of all these developments, the non-agricultural employment leans heavily towards village and cottage industries, which form an integral part of the village economy. Village and cottage industries like handloom industry provides occupation to a larger sector of rural population and at the same time meets considerable portion of village requirements in regard to clothing. In addition there are persons engaged in village crafts, who work on traditional lines with the locally available raw materials and for local demand. There is further scope for industrial development in near future, as cheap power from Koyna is made available to the district, recently.

There are in all 127,972 workers engaged in manufacturing industries, 65,706 or 51·34 per cent of them are in household industries and 62,266 or 48·66 per cent in non-household industries. The total number of workers in the registered factories in 1961 is 36,804 which makes 28·76 per cent of all workers engaged in industries or 20 factory workers per thousand of total population which is identical with the respective proportion for Maharashtra.

The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from the houselists are also shown separately, for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

There are 35 large-scale registered factories in the district using power and employing 50 or more workers.

Sholapur and Barshi are the important textile centres. There are in all eight textile mills in the district which consume about one lakh bales of cotton every year. Out of those 8 mills 2 are composite units, 4 weaving units and the remaining 2 spinning units. 5 mills are located at Sholapur city, 3 at Barshi and 1 at Tikekarwadi, a place about 5 miles from Sholapur city. The details of these textile units are as follows:—

(1) *The Sholapur Spinning and Weaving Co. Ltd, Sholapur.*—This mill was established in 1877 by Sheth Morarji Gokuldas. At present there are two divisions of this mill employing more than six thousand workers. Out of 2,234 looms and 95,232 spindles, 1,772 looms and 82,652 spindles are working at present. This is a composite unit.

(2) *Narsingji Girji Manufacturing Co. Ltd., Sholapur.*—This mill is managed by the Government with the co-operation of the workers, since 1958. The mill was established in 1898 and was closed down in 1957 due to loss. There are at present 1,170 looms and 55,488 spindles, of which 1,166 looms and 55,272 spindles are working. More than 4,500 workers are employed in this mill.

(3) *Laxmi Cotton Manufacturing Co. Ltd., Sholapur.*—The mill was established in 1898 by Sheth Laxmidas Khimji. There are 1,219 looms and 56,272 spindles and over 4,200 workers are employed in this mill. This is the only textile unit manufacturing cloth of fine texture in the district.

(4) *Vishnu Cotton Mills, Ltd., Sholapur.*—Started in 1908 and managed by M/s Bombay Co. Pvt. Ltd. since 1910. There are 1,495 looms and 54,280 spindles and over 2 thousand workers working in this mill.

(5) *Shri Jam Ranjitsingji Mill, Sholapur.*—The mill was established in 1909, under the management of Lalji Morarji and Co. Since 1919 the management has been taken over by M/s Lalji Naranji & Co. This is a composite unit consisting of 512 looms and 22,132 spindles and employing more than 2,000 workers.

(6) *The Lokmanya Mills, Ltd., Barshi.*—Started in 1928, the mill has 12,872 spindles and employes more than 1,000 workers. This is a spinning unit.

(7) *The Jayashankar Mills, Ltd., Barshi.*—The mill was established in 1928 and has 14,520 spindles. It employes about 800 workers and is a spinning unit.

(8) *The Tikekar Textile Mills, Tikekarwadi.*—This is a powerloom unit manufacturing cloth, cotton blankets, bedsheets, etc., employing about 120 workers.

There are, in addition, 4 units which are yet to go into production. They are: M/s Rajen Textile Mills, Pvt. Ltd.—licensed to produce cotton Cloth; M/s Jan Shri Ratansingji Spinning and Weaving Mills Co. Ltd; M/s Jayashankar Mills—both licensed to produce cotton yarn and M/s Laxmi Cotton Manufacturing Co., Ltd.—licensed to manufacture cloth from staple fibre yarn.

Due to Nira Right Bank Canal, a large portion of cultivated land has been brought under irrigation for sugarcane cultivation in Malshiras taluka. This has, therefore, facilitated the establishment of the following sugar factories in the district:—

(1) Brahan Maharashtra Sugar Syndicate, Ltd., Borgaon, Malshiras taluka. This factory is also known as Shripur Sakhar Karkhana.

(2) Saswad Mali Sugar Factory, Ltd., Malinagar.

(3) Deccan Agriculture Sugar Factory, Ltd., Malshiras.

The crushing capacity of all these three factories is 2,650 tons per day during the season.

M/s Chitale Agricultural Products, Ltd. Gur Factory, Chitalenagar, is located near Natepute. This factory has two units and gur is manufactured. However, new machinery to manufacture sugar also has been installed in these units. In addition, a new sugar factory known as Yeshwant Co-operative Sugar Factory has started on co-operative basis at Akluj.

Due to availability of molasses from sugar factory, the Brahan Maharashtra Sugar Factory, Ltd., Shripur, manufactures rectified spirit. The capacity per year of this unit is 200,000 bulk gallons.

The Gujarat Oil Mills, Barshi, manufactures oil and oil-cakes.

There are 6 cotton ginning and pressing factories in the district, two each at Pandharpur and Kurduwadi and one each at Natepute and Karmala. All these units together employ over 700 workers.

There is a unit manufacturing R. C. C. hume pipes at Sholapur. Stone crushing is done at Hipparge. Casting of metal is done at Shivashahi, Tikekarwadi five miles from Sholapur by Shivaji Works, Ltd., which employes more than 400 workers. This factory has also been licensed to manufacture C. I. castings, tools and cutter grinding machines.

Loco axles (axle, boxes), horn checks and boilers are manufactured at Kurduwadi by the Central Railway Workshop. There are more than 700 workers employed in this unit. In addition there are workshops of State Transport and Auto Engineering Works at Sholapur. Sholapur Electrical Undertaking has a strength of about 240 workers.

Small-scale Registered Factories

There are about 280 small-scale establishments employing about 7,000 workers engaged in manufacturing dal, gur, oil and oil-cakes, bidis, handloom and powerloom cloth, cotton ginning, metal containers, repairing of vehicles etc. The handloom and powerloom industries have concentrated at Sholapur, Barshi, Tikekarwadi, etc. Because of these industries, some supplementary industries such as dyeing of handloom yarn have cropped up. Similarly, the oil-seeds crushing industry also has substantially expanded in the district. There are more than a dozen dal (pulse) mills esta lished in the district utilising raw materials from adjoining districts. There are about 27 units manufacturing bidis and employing more than 1,800 persons in the district.

The number of registered factories has increased from 320 in 1956 to 324 in 1961. The number of workers in the registered factories has, however, decreased from 36,968 in 1956 to 36,804 in 1961. This may be due to the closure of certain textile and gur manufacturing units in the district.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 397·4 lakhs and working capital of Rs. 302·4 lakhs. The total value of annual production was Rs. 1,361·7 lakhs and the value added by manufacturing was Rs. 384 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1959 was, however, only 1·90 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

Handloom, powerloom, gur manufacture, oil and oil-cakes, dyeing and printing of yarn, washing soap, manufacture of ink, metal containers, bolts, nuts, nails, screws, grooved heel tips, handloom and powerloom shuttles, surgical instruments, etc.,

are some of the industries in the cottage and small-scale sector in the district. Some of these manufacturing industries are traditional crafts conducted on household and cottage industries scale. Next to handloom and powerloom industry, the oil-seeds crushing industry has also substantially expanded in the district. There are 21 units manufacturing oil and oil-cakes and employing more than three hundred workers. Cotton weaving on handlooms, powerlooms and mills engage the largest proportion of non-agricultural workers in the district. The other industries are production and rearing of livestock, manufacture of bidis, textile garments, etc.

29,852 workers are engaged in cotton weaving in handlooms. At the end of May 1961, there were 24,578 cotton handlooms, i.e., next to Nagpur district which is having the highest number (36,784) in the State. The handloom industry had its existence in the district, early in the 19th century and still occupies a significant place. Valsang, Sangola, Maindargi and Sholapur are places known for handloom industry. Side by side, the powerloom industry has also developed and there were one art-silk and about 130 cotton powerlooms as on 31st March 1959. 1,224 persons are engaged in this industry. The cotton chaddars manufactured in the handloom industry are known for the design and durability. These chaddars are popularly known as "Sholapur Chaddars" and have demand both in the country and outside a like. The main centres of manufacture of these chaddars are (1) Tikekar Textile Mills, (2) Chippa Weaving Mills, (3) Marda Weaving Mills, (4) Gangji Weaving Mills, (5) Kshirsagar Weaving Mills, and 6) Rapeli Weaving Mills.

Cotton spinning and weaving in mills engage 28,312 workers. These are mostly the persons engaged in cotton textile mills in Sholapur and Barshi.

18,113 workers are working in the production and rearing of livestock. The district has a livestock population of nearly 13 lakhs and Sangola and Pandharpur talukas are known for a special breed of cows and bullocks, known as "Khillar". Similarly, sheep breeding on large scale is done at Mahud, Javale, Sangola, Piliv and Bhalawani in the district. Cattle is also reared for milk at places such as Kumbhari, Valasang, and Boramani, as milk from these places is collected for the Sholapur City Milk Supply Scheme.

7,465 persons are engaged in manufacture of bidis in the district.

There are 786 flour or rice mills engaging 1,530 workers.

Classified by occupation, 17,880 workers are engaged as drawers and weavers in the textile industry. 22,296 persons are working as farm workers and animal rearing. 6,960 workers are engaged as bidi makers. 5,685 persons are engaged as spinners while 5,041 workers are working as ginners, fibre preparers, cleaners, scourers, etc.

The proportion of different groups of artisans to one lakh population in the district is as follows :—

Blacksmiths 106, Carpenters 195, Shoe makers and repairers 138, Potters 88, Tailors and dress makers 270, Spinners and Weavers 1,267, Basketry weavers 90.

Cloth-dyeing is carried on extensively at Sholapur, Valsang and Karmala while Calico printing is carried on to a large extent in Sholapur, Barshi and Pandharpur. Woollen blankets or "Kamblis" are woven at Barshi and Sangola. The Karmala carpenters manufacture excellent carts which are used throughout the district. Cottage industries like tanning of leather and leather working are also located at various places in the district.

There are very few factories in Maharashtra manufacturing Chrome uppers required in the manufacture of shoes, etc., and picking bands required in textile mills.

A production centre in the district for Chrome uppers and picking bands was established in the district in the year 1957-58.

For rapid realisation of the objectives of improving the lot of artisans and of expanding production of consumer goods considerable emphasis is given by the Government for creating a sound structure of industrial co-operatives. The Industries Department has planned several schemes for training in wool and cotton weaving, coir, tanning and leather work, carpentry and smithy, etc. A wool weaving peripatetic school is working at Balawadi and training and production centre in wool and wool weaving at Mahud, both in Sangola taluka. The Village Industries Board in collaboration with the All India Khadi and Village Industries Board has undertaken the development of Khadi industry, hand-made paper industry, village industries workshop, leather industry, etc.

The "Master Plan" prepared by the Industries Department in 1960 had indicated scope for establishment of the following new industries in the district :—

(1) Cotton waste yarn.
(2) Processing and finishing plant for cloth.
(3) Surgical cotton.
(4) Solvent extraction of oil-seeds/cake.
(5) Sugar.
(6) Cold storage plant, refrigeration van service for vegetables, fruits, etc.
(7) Industrial alcohol.

Industrial Estates

Two Industrial Estates, one at Sholapur and the other at Barshi, are proposed to be established on co-operative basis, initially in the Third Five-Year Plan.

POWER

The number of electrified towns and villages in the district is 6 only. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is 26·69 per cent of the total population of the district.

The district consumption of electricity on different items for eight years is shown in Table 30 in Part III.

The *per capita* consumption is naturally much lower than the State average, as hardly 6 towns and villages in the district have been electrified.

The district gets its electric supply through the generating sets driven by steam turbines, diesel oil and from Koyna Project. The electric supply in Sholapur city was started in 1925 through generating sets driven by steam turbines and reciprocating steam engines owned by a private concern. It was, however, noticed that this private concern could not make sufficient supply of power to meet the demand of the city. The generating station was, therefore, taken over by the Maharashtra State Electricity Board and steps are taken to increase the load. The electric supply to other towns in the district is through the generating sets run on diesel oil and owned by private concerns. A diesel generating station of 200 kw. has been opened at Akluj in 1961. This station is supplying electricity to Akluj and the surrounding area.

Two sub-stations at Sholapur and Pandharpur have been installed to supply electricity available to the district from Koyna Project. Line is taken from Karad to Sholapur *via* Pandharpur, a distance of about 125 miles. Another line has been laid taking current from Pandharpur to Barshi. It is also proposed to join Barshi with Sholapur with 110 K. Volt lines so as to distribute electric supply to places on this line. Takali which is 18 miles from Sholapur has also been proposed to be connected with Sholapur with 33 K. Volts line. It is, therefore, hoped that with the introduction of electric power from Koyna, the position of supply and distribution of power in the district will not only improve the industrial development but will also help to electrify more towns and villages in the near future.

TRADE AND COMMERCE

The chief exports are vegetable products, cotton, grain, oil-seeds, groundnut, cloth, both handloom and mill-made, oil, gur, sugar, etc. Most of the goods are sent to Bombay, Madras, Hyderabad and other adjoining districts. Sholapur is known from historical times, as a city of trade. The district has a tradition for handloom cloth and the cotton bedsheets of Sholapur, known as Sholapur Chaddar and blankets have a market not only in the country but also outside. Of the imports, salt, coconut, drugs and cosmetics, oil, groceries, spices, brass and copperwares, wood, building material, hardware, fish, firewood, etc., are the important ones. A large part of these goods are brought from Bombay and Poona. Commodities like tur, gram, etc., are brought both from villages and outside the district through commission agents or the agents themselves go to the villages and purchase the produce from the producers. The distribution of goods beyond the wholesale trade centre is carried out at market places and weekly bazars held at different places and on different days of the week.

Shops

Nearly every village has one or more shops except the smallest. These shops provide the inhabitants with their day to day requirements. All kinds of grains, salt, groceries, oils, gur, chillies, coconuts, soaps, tea, tobacco, betelnut, chillies, and innumerable articles required by people for their daily use are kept in these shops. There are in all 13,701 shops in the district. 6,140 are in rural areas and 7,561 are in the urban areas. These do not include the shops temporarily set up in the weekly markets or fairs. The number of shops per 1,000 dwellings is 39·7 for the district as a whole, 25·0 for rural areas and 79·3 for urban areas. It will be seen that the shops per 1,000 dwellings in urban areas are three times more than in rural areas. The ratio between shops and 1,000 dwellings for the district is more than the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These markets are popularly known as "bazars" and are distributing rather than collecting centres. However, bigger markets like Sholapur are distributing as well as collecting centres. At these places, petty traders, pedlars and hawkers set up booths on market days and sale their goods consisting of foodgrains, pulses, oils, chillies, spices, gur, cloth, fruits, vegetables, etc. Agriculturists from nearby villages also bring their farm produce. The traders and shopkeepers belonging to the market places also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The

weekly markets are held generally for the whole day. In some places they are held during the heat of the day and are closed in the evening. But most of these markets are closed by six to enable both the buyers and the sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and if so, on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 231 shows locations of all these markets and also the days on which they are held.

The District Gazetteer had reported only 42 weekly and bi-weekly markets for the district in 1884. Their number in 1960-61 has increased to 111 out of which 23 are also cattle markets. 12 weekly markets are held on Sunday, 18 on Monday, 13 on Tuesday, 11 on Wednesday, 16 on Thursday, 21 on Friday, and 20 on Saturday.

The map at page 231 will show that four or five weekly markets cluster as satellites around a central village. Each has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or other.

Fairs

Fairs are complementary to weekly markets so far as trade is concerned. They are attended by unusually large number of people and pilgrims and considerable quantity of agricultural produce and other articles of daily use in addition to toys and other luxury goods are brought for sale. These fairs serve as places for distributing as well as collecting centres. A list of fairs held in the district showing their locations, duration and dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 232 shows the location of all the fairs in the district having 1,000 or more gatherings.

A volume giving details regarding fairs and festivals in Maharashtra is also issued separately.

Trade Centres

Apart from the weekly markets and fairs, there are nine wholesale trade centres in the district, as far as collection and export of agricultural produce are concerned. All these markets are regulated markets under the Bombay Agricultural Produce Markets Act, 1939. The main object of this measure is to secure to the cultivators a better price, fairer weighments and freedom from illegal deductions.

A list of principal market yards and their sub-markets is given below :—

Principal Market Yards	Sub-markets
(1) Sholapur	..
(2) Pandharpur	Mangalwedha.
(3) Barshi	Vairag.
(4) Karmala	Jeur.
(5) Akluj	Natepute.
(6) Kurduwadi	Modnimb, Temburni Madha.
(7) Akkalkot	Dudhani.
(8) Mohol	..
(9) Sangola	..

Sholapur, Barshi, Karmala, Pandharpur and Akluj are very important collecting and distributing centres for jowar, groundnut and safflower. The commodities regulated in most of the regulated markets in the district are jowar, groundnut, safflower, cotton, wheat, gram and paddy. To enable the market committees to take up development of the markets, loans are advanced by the Government for construction of market-yards, buildings, rest-houses, cattle-sheds, godowns, fencing, etc. For storage of agricultural produce, warehouses are also constructed by the State as well as Central Warehousing Corporation in the district.

The figures of value of annual turnover of commodities in some of the market centres in the district for the year 1958-59 are as follows :—

Market Committee	Rs.
Barshi	2,97,02,866
Akkalkot	96,67,461
Mohol	24,54,866
Kurduwadi	41,00,841
Karmala	1,29,50,867
Pandharpur	1,26,24,311
Akluj	1,11,24,748

Workers in Trade and Commerce

Total number of persons engaged in trade and commerce in the district in 1961 is 32,591, out of which 8,681 or 26·64 per cent are in rural areas and 23,910 or 73·36 per cent are in urban areas. The number of workers in trade and commerce forms 4 per cent of the workers in the district. About 45 per cent of the district total is in North Sholapur taluka only. 12·32 per cent of the workers in trade and commerce are engaged in wholesale trade, 83·98 per cent in retail trade and only 3·70 per cent in miscellaneous trade and commerce. 93·25 per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is 355. Mostly, the wholesale trade of cereals and pulses appears to be combined with wholesale trade of gur, sugar, spices, groundnut, oils, etc., as the number for this group is 641 for the district.

A detailed break-up of the workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking offices

A list of banking offices with their years of establishment, type and location is given in Table 23 in Part III. Their break-up by talukas and type is shown below :—

	Number of Banking Offices			
	Scheduled	Non-Scheduled	Co-operative	Total
DISTRICT TOTAL ..	26	2	18	46
1 Karmala Taluka ..	1	1	1	3
2 Barshi Taluka	6	..	3	9
3 Madha Taluka	2	..	3	5
4 Malshiras Taluka ..	3	..	2	5
5 Pandharpur Taluka ..	3	..	2	5
6 Mohol Taluka	..	..	1	1
7 North Sholapur Taluka	9	1	3	13
8 Sangola Taluka ..	..	..	1	1
9 Mangalwedha Taluka ..	1	..	1	2
10 Akkalkot Taluka ..	1	..	1	2

North Sholapur has naturally the largest number of banking offices because of the location of Sholapur city which is also the district headquarters. South Sholapur has no banking offices, as most of the banking and other activities of the taluka are made through the adjacent taluka of North Sholapur. All the talukas excepting Sholapur South taluka have at least one branch of the Central Co-operative Bank.

The State Bank of India works for the treasury in the district and has branches at Barshi, Kurduwadi, Akluj, Pandharpur, Sholapur and Akkalkot.

COMMUNICATIONS AND TRANSPORT

The Bombay-Madras broad gauge line of 138·86 miles of the Central Railway runs right across the district to Hotgi, *via* Kurduwadi, Sholapur, etc. The Sholapur Hubli metre gauge line of the Southern Railway starts from Sholapur and passes up to Tadwal, a distance of 25·85 miles from Sholapur through the district. The narrow gauge line of the Central Railway goes from Miraj to Latur and traverses mostly through the district a distance of 115·89 miles *via* Pandharpur, Kurduwadi, Barshi and Yedshi. The total length of the Railway lines in the district is thus 280·60 miles.

Existing railway mileage in the district is 4·83 miles per 100 sq. miles of area against 2·66 miles per 100 sq. miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page and the taluka maps in Part I show all these roads.

Sholapur city is well connected by roads with important centres like Bombay, Poona, Hyderabad, etc. The City is also the district headquarters and well connected with all the taluka headquarters. The district has also good communications by road as well as by rail with the adjoining district of Sangli, Satara, Poona, Osmanabad and the Bijapur district of Mysore State. 77·84 miles of Poona-Hyderabad National Highway passes through the district.

During the period 1951—61, there was no change in the mileage of National Highways. The State Highways, however, decreased by 3·70 miles. The major district roads increased by 60·34 miles. Other district roads by 86·92 miles and village roads by 110·85 miles. The total increase in all types of roads (including municipal roads) is 254·41 miles.

Under the Nagpur Plan, the district should have 2,353 miles of roads. It was short of this target by 1,066·26 miles on 31st March 1961.

New Roads

Improvement of the following roads has been undertaken (as on 31st March 1963) :—

(1) Poona-Sholapur Road—sections I & II.
(2) Sholapur-Hyderabad road.
(3) Sholapur-Barshi-Tuljapur road.
(4) Pandharpur-Miraj road.
(5) Sholapur-Barshi-Kharde (Ahmadnagar) road.
(6) Shetphal-Kurduwadi road.
(7) Satara-Pandharpur road.
(8) Kurduwadi-Barshi road.
(9) Indapur-Akluj-Velapur road.
(10) Malshiras-Pandharpur road.
(11) Malshiras-Akluj-Sangam-Kurduwadi road.
(12) Kurduwadi-Akluj road.
(13) Indapur-Akluj-Sangola road.
(14) Sholapur-Barshi road.
(15) Marawade-Katral road.
(16) Kurduwadi-Barshi road.

The following roads are under construction (as on 31st March 1963) :—

(1) Dahigaon-Ekshiv-Kalambuli road.
(2) Dahigaon-Kurbavi road.
(3) Dharmpuri-Gurusale-Dahigaon road.
(4) Borgaon-Mahalung road joining Kurduwadi-Malashiras road.
(5) Borgaon-Malkhambi-Bondale road.
(6) Khandali- B.M.S.S. Factory.
(7) Akluj-Boregaon road.
(8) Pirale-Kalamboli road.
(9) Lawang approach road.
(10) Sholapur-Sangola road—section V.
(11) Barshi-Tuljapur road.

(13) Pandharpur-Ozewadi road.
(14) Barshi-Kalamb road—section II.
(15) Kandar-Wadshivane road.
(16) Wagdari-Aland road.
(17) Malshiras-Akluj-Sangola road—section III.
(18) Akkalkot Rly. Stn.-Hanjagi road.
(19) Hotgi Rly. Stn.—Aherwadi-Bankalgi road.
(20) Upalai (Bk.) approach road.
(21) Masle-Choudhari to connect Sholapur-Barshi road at Wadala.

New Bridges

Work on the following bridges is in progress :—

(1) On Bashtha Nallah on Sholapur-Poona road.
(2) On Man river on Miraj-Pandharpur road.
(3) On Shelagi and Ule Nallahs on Sholapur-Osmanabad road.
(4) On Kasal Nallah on Satara-Pandharpur road.

Posts, Telegraphs and Telephones

The district is included in the Sholapur Postal Division. Head Post Office is situated at Sholapur and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1961-62 there were 37 sub-post offices and 246 branch post offices in the district. Together their number was increased by about 76 per cent over that of 1952-53.

There are telegraph offices at the following 20 places :—

(1) Akkalkot, (2) Akluj, (3) Barshi, (4) Chitalenagar, (5) Dudhani, (6) Jeur, (7) Karmala, (8) Kem, (9) Kurduwadi, (10) Madha, (11) Malinagar, (12) Malshiras, (13) Mangalwedha, (14) Modnimb, (15) Mohol, (16) Natepute, (17) Pandharpur (two), (18) Sangola, (19) Shreepur, (20) Sholapur (seven).

The following 15 places have telephone connections :—

(1) Akkalkot, (2) Akluj, (3) Barshi, (4) Chitalenagar, (5) Karmala, (6) Kurduwadi, (7) Madha, (8) Malshiras, (9) Mangalwedha, (10) Mohol, (11) Natepute, (12) Pandharpur, (13) Sangola, (14) Sholapur, (15) Shreepur.

Passenger Road Transport

Sholapur is connected by road with Poona, Ahmadnagar, Aurangabad, Bijapur, Satara, Kolhapur, Koyananagar, etc. During the plan period a number of roads connecting villages were constructed in the district and the buses of the State Road Transport Corporation are running regularly on these roads. This district is included in the jurisdiction of Sholapur State Road Transport Division. Depots are situated at (1) Sholapur, (2) Akkalkot, (3) Barshi, (4) Karmala, (5) Akluj and (6) Pandharpur. No separate figures of passenger transport are available for the district, as the division also includes parts of Poona and Satara districts. These depots together run buses on 107 routes which make 498 single trips per day. The district has 3 permanent and 5 temporary bus stations.

Special arrangements to run buses to and from Pandharpur on " Chaitra ", " Ashadhi ", " Kartiki ", and " Maghi " Ekadashi are made by the S. T.

Nationalisation of passenger road transport in the district has been completed by the end of the Second Five-Year Plan. The Third Five-Year Plan schemes include expansion of the services to new places on public demand, construction of permanent bus stations and pick-up stands and provision of other facilities for the travelling public.

Goods Transport

Separate figures for lorries operated in the district are not available, as the Regional Transport Officer, working at Poona, keeps combined records for his region including Poona, Ahmadnagar, Sholapur, Satara, Sangli and Kolhapur districts.

Workers in Transport and Communications

12,811 persons are engaged in transport and 825 persons in postal, telegraphic and telephone communications in the district. Out of the workers in transport, 5,831 are in railway transport, 2,925 in motor and bus transport and 4,055 in other kinds of transport like bullock carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a railway or a road or has a post office or not.

CONSTRUCTION

The total number of persons engaged in construction is 7,670, 6,904 are males and 766 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

7·43 per cent of the workers are engaged in the construction and maintenance of dams, waterways and canals, etc., 69·68 per cent in construction and maintenance of buildings, etc., and 22·89 per cent in construction and maintenance of roads, bridges, telegraph and telephone lines, etc. The large proportion of workers engaged in the construction of buildings include those working on private houses as well as those engaged in construction of buildings for administrative offices, schools, hospitals, residential quarters for Government employees, industrial labourers, co-operative housing societies, etc.

All the workers engaged in construction form only 0·94 per cent of the total workers in the district.

OTHER SERVICES

54,358 persons are engaged in the district in "Other Services". 42,573 are males and 11,785 are females. The major categories out of them are: (1) Public Services, (2) Educational Services, and (3) Personal Services. "Public Services" include administrative employees of Central, State and Local Governments. "Educational Services" include all classes of teachers and "Personal Services" include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of workers in other services by minor groups is shown in Table B-IV-C in Part II.

6·67 per cent of the total workers in the district are engaged in "Other Services" as against 8·53 per cent in the State. 23·50 per cent of the total workers in "Other Services" in the district are engaged in Public Services and 15·48 per cent in Educational Services. The former is slightly lower while the latter is higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. The low proportion of public services and high proportion of educational services may be attributed to the district not having large urban centres and comparatively less number of business services, labour associations or recreation services and more educational institutions. The proportion of personal services in the district (23·68 per cent) is also lower than the State average of 27·15 per cent.

The number of domestic servants is 3,270 or one for 569 population. The number of barbers is 2,700. The number of persons in laundry services including washermen is 1,467.

There are 265 legal practitioners and 2,079 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is 279 and that in other schools and colleges is 8,093.

The number of State Government employees including those now working under the Zilla Parishad is 7,510.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rates

The proportions of workers to total population, males and females, for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA	47·91	57·09	38·10
SHOLAPUR DISTRICT ..	43·83	55·44	31·42
1 Karmala Taluka ..	48·65	58·52	38·20
2 Barshi Taluka	47·15	55·79	37·97
3 Madha Taluka	45·82	56·09	34·95
4 Malshiras Taluka ..	44·11	55·88	31·71
5 Pandharpur Taluka ..	39·84	55·56	23·16
6 Mohol Taluka	50·44	58·34	42·00
7 North Sholapur Taluka	35·12	49·94	18·76
8 South Sholapur Taluka	47·98	58·53	36·63
9 Sangola Taluka	48·38	57·21	39·21
10 Mangalwedha Taluka ..	51·62	60·24	42·55
11 Akkalkot Taluka ..	43·14	56·93	28·61

Labour participation rates, i.e., the percentage of workers to the total population in the district varies from 51·62 per cent in Mangalwedha taluka to 35·12 per cent in North Sholapur taluka. Participation rates both for males and females are highest in Mangalwedha taluka, *viz.*, 60·24 per cent and 42·55 per cent, respectively. North Sholapur taluka has the lowest participation rates within the district both for males and females because of the existence of highly industrialised Sholapur city included in that taluka. Pandharpur taluka has also low participation rates next to North Sholapur taluka which includes Pandharpur, a pilgrim centre.

The district average rates of participation are lower than those of the State both for males and females.

Higher participation rates than those for the State are observed in Karmala, Mohol, Sangola and Mangalwedha talukas both for males and females because of the predominance of agriculture in those talukas.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and State is as follows :—

	Total Workers	Primary	Secondary	Tertiary
Maharashtra—				
Total	100	72·25	12·34	15·41
Rural	100	88·73	5·68	5·59
Urban	100	11·97	36·69	51·34
Sholapur District—				
Total	100	72·45	15·20	12·35
Rural	100	88·62	5·79	5·59
Urban	100	12·68	49·98	37·34

The primary sector dominates the economy of the district with 72·45 per cent of the total workers engaged in it. The rural pattern is almost similar to that of the average rural area of the State. But the urban areas have a larger proportion of workers in the primary sector and smaller proportion in the tertiary sector than the corresponding averages for the urban areas in Maharashtra. Tertiary sector, however, dominates in urban areas and comprises mainly trade, transport, administrative and other services. It is also seen that the proportion of workers in secondary sector is higher in the district than that for the State average. Secondary sector dominates to a greater extent in urban areas. It has already been described earlier that there are industrial establishments particularly the weaving mills and household industries in Sholapur city and Barshi town.

Categories of Economic Activity

The distribution of workers, males and females by nine categories of economic activities for the district and the State is as follows :—

		Maharashtra			Sholapur District		
		Persons	Males	Females	Persons	Males	Females
I	Cultivation	46·11	40·68	54·79	43·56	42·61	45·33
II	Agricultural labour ..	23·80	18·12	32·90	25·93	19·98	37·13
III	Mining, Quarrying, Livestock and Fishing	2·16	2·97	0·86	1·52	2·15	0·35
IV	Household Industry ..	4·39	4·80	3·74	8·06	8·26	7·69
V	Manufacturing other than Household Industry.	6·88	10·22	1·54	7·64	9·79	3·58
VI	Construction	1·24	1·69	0·53	0·94	1·30	0·27
VII	Trade and Commerce	4·52	6·61	1·17	4·00	5·41	1·34
VIII	Transport, Storage and Communications.	2·36	3·65	0·29	1·68	2·51	0·14
IX	Other Services ..	8·54	11·26	4·18	6·67	7·99	4·17
	Total Workers ..	100·00	100·00	100·00	100·00	100·00	100·00

Distribution of workers by nine categories of economic activity is shown in the Figure on page (58) for the district and each taluka separately.

As described earlier the district has larger proportion of workers engaged as agricultural labourers than the State average. Cultivators also have quite a sizable proportion in the district even though a little less than that for the State average. This is so because there is no alternative employment available except in Sholapur city and Barshi town. Proportions of workers engaged in household industry and manufacturing other than household industries are higher in the district than those for the State average. In manufacturing other than household industries the district has 7·64 per cent workers as compared to 6·88 per cent for the State. The proportion for household industry is 8·06 per cent which is little less than double the State average of 4·39 per cent. Household industry therefore provides employment significantly to larger number of persons in the district. The district does not however have significant proportion in construction. The proportions in other services, trade and commerce and transport, storage and communications are lower than the State averages.

Talukawise distribution of workers in nine categories of economic activities for the district is shown below. Corresponding figures for the State are also shown for comparison :—

State/District/Taluka	I Cultivator	II Agricultural Labourer	III Mining Quarrying, Livestock, Fishing, Hunting, etc.	IV Household Industry	V Manufacturing other than Household Industry	VI Construction	VII Trade and Commerce	VIII Transport, Storage and Communications	IX Other Services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA ..	46·11	23·80	2·16	4·39	6·88	1·24	4·52	2·36	8·54	100·00

12

The proportions both of cultivators and agricultural labourers differ considerably from taluka to taluka. The proportion of cultivators varies between 64·17 per cent for Sangola taluka and 9·14 per cent for North Sholapur taluka. The proportion of agricultural labourers varies between 41·71 per cent for South Sholapur taluka and 9·74 per cent for North Sholapur taluka. Very low proportions both of cultivators and agricultural labourers are seen in North Sholapur taluka which includes Sholapur city having large industries and trade and commerce. Within the district North Sholapur taluka has the highest proportions of workers in manufacturing other than household industry (31·68 per cent) and in household industry (18·91 per cent). The combined proportions in that taluka are more than 4½ times the corresponding average for the State. The proportion of workers in trade and commerce are also nearly 2¼ times the corresponding State average. Quite a sizable proportion of workers is seen in household industry in Sangola taluka which although much less than the North Sholapur taluka is nearly 2⅓ times the corresponding State average. Within the district proportion of workers in Other Services is also very much higher in North Sholapur taluka (12·97 per cent) which in turn is higher than the average for the State. In this category Pandharpur taluka also exceeds the State average of 8·54 per cent, large proportion being in Pandharpur town itself.

Labour Participation by Age

The labour participation rates by age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Sholapur District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All ages	43·83	55·44	31·42	47·91	57·09	38·10
0—14	7·83	9·51	6·07	8·72	8·62	8·84
15—34	70·39	87·68	52·59	74·53	87·45	60·90
35—59	78·11	97·00	56·14	81·57	96·86	63·68
60+	48·69	73·28	21·97	49·13	72·82	26·28

Participation rates are lower for the district than the State average in all age-groups for total and females and are high for the males in all the age-groups. It may be seen that the male participation rates are higher though the rate for all ages is lower than that for State average. These differences cannot be explained without further local investigation.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III in Part II is shown below by percentages for the district. Corresponding figures for the State are also shown for comparison:—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra ..	68·65	14·11	13·91	3·33
Sholapur District ..	71·84	11·27	14·87	2·02

Because of lower literacy rates in the district the proportion (71·84 per cent) of illiterate workers to total workers is higher than the State average (68·65 per cent). The proportion of literates without educational level is consequently much lower than that for the State. The proportion of primary or junior basic educational level is higher by nearly one per cent than that for the State. The proportion of workers with education level Matriculation and above on the other hand is lower than that for State average.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage proportions of employers, employees, single workers and family workers in the district for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in para 58 in the Explanatory Note to Part II :—

	Total workers	Class of workers			
		Employers	Employees	Single workers	Family workers
Maharashtra—					
Total	100	3·96	62·18	26·52	7·34
Rural	100	1·57	46·47	38·58	13·38
Urban	100	4·98	68·90	21·37	4·75
Sholapur District—					
Total	100	2·99	61·09	27·99	7·93
Rural	100	1·30	47·38	39·46	11·86
Urban	100	3·85	68·09	22·13	5·93

Single workers and family workers have larger proportions in the district than the State average. The proportions of single workers are higher both for rural and urban in the district to the corresponding State averages whereas for family workers the district proportions are higher in urban areas and lower in rural areas to those of the State urban and rural areas. The higher proportion of single workers

and family workers in the district is a reflection of the traditional crafts, small shops and pedlars dominating the scene. The proportion of employees are slightly lower as a consequence of the predominance of single workers and family workers. The district however has a much low proportion of employers than the State average.

Percentage Distribution in Household Industry by Employees and Others

The proportion of employees, i.e., hired workers and others in household industries in the district total rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

		Total workers	Employees	Others
Maharashtra	Total ..	100	8·18	91·82
	Rural ..	100	4·91	95·09
	Urban ..	100	16·35	83·65
Sholapur District ..	Total ..	100	26·74	73·26
	Rural ..	100	5·28	94·72
	Urban ..	100	48·43	51·57

Household industries in the district engage a much larger proportion of employees which is nearly $3\frac{1}{4}$ times the State average. The weaving units are included as household industries. They are worked more through hired workers.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (actual figures are shown in Table B-VII-A in Part II) :—

Principal Work	Total Rural Urban	Percentage of total workers by categories of secondary work I	II	IV
MAHARASHTRA—				
I Cultivation	Total ..	..	17·85	1·97
	Rural ..	..	18·03	1·98
	Urban ..	..	10·54	1·32
II Agricultural Labour ..	Total ..	13·17	..	0·94
	Rural ..	13·46	..	0·97
	Urban ..	7·12	..	0·31
IV Household Industry ..	Total ..	14·78	6·97	..
	Rural ..	19·61	9·38	..
	Urban ..	2·70	0·95	..
SHOLAPUR DISTRICT—				
I Cultivation	Total ..	..	9·77	2·12
	Rural ..	..	9·90	2·17
	Urban ..	..	5·81	0·71
II Agricultural Labour ..	Total ..	9·07	..	0·81
	Rural ..	9·23	..	0·84
	Urban ..	5·12	..	0·05
IV Household Industry ..	Total ..	7·55	3·23	..
	Rural ..	14·06	6·31	..
	Urban ..	0·97	0·11	..

Proportions of workers engaged in secondary work are lower for the district than the State averages for all the three categories excepting in the case of workers in cultivation with household industry as their secondary activity. It may indicate that each of the three sectors is already saturated and does not have much scope of employment for secondary workers.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

	Occupational Division	Maharashtra	Sholapur District
0	Professional, technical and related workers.	6·42	5·93
1	Administrative, executive and managerial workers.	3·89	2·42
2	Clerical and related workers	9·13	5·86
3	Sales workers	12·23	11·28
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	9·57
5	Miners, quarrymen and related workers.	0·75	0·13
6	Workers in transport and communication occupations.	3·57	2·51
7 & 8	Craftsmen, production process workers and labourers not elsewhere classified.	45·99	55·29
9	Service, sports and recreation workers	10·27	6·94
X	Workers not classifiable by occupations.	0·11	0·07
	Total ..	100·00	100·00

Workers in occupational division 4 and 7 & 8 have a higher proportion in the district than the State average. In all other occupational divisions the proportion of workers is lower than the State average. The proportions in occupational divisions 2 and 9 are significantly lower than the corresponding State averages.

Non-Workers

The distribution of non-workers by eight broad categories is shown in Table B-X in Part II. Percentage distribution for the district is shown below :—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students ..	34·55	9·47	29·77	6·77	44·42	14·84
(2) Household duties ..	0·24	40·82	0·27	37·27	0·17	47·88
(3) Dependants, infants and disabled.	61 77	49·06	68·44	55·41	47·97	36·46
(4) Retired, rentiers or persons of independent means.	0·89	0·25	0·35	0·21	2·01	0·34
(5) Beggars, vagrants, etc. ..	0·71	0·33	0·63	0·33	0·88	0·32
(6) Inmates of institutions ..	0·14	0·04	0·01	N	0·42	0·10
(7) Persons seeking employment for the first time.	0·77	0·01	0·33	N	1·69	0·02
(8) Unemployed but seeking work.	0·93	0·02	0·20	0·01	2·44	0·04
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

N=Negligible.

There is a marked difference in the distribution pattern for non-workers among males and females. 34·55 per cent out of male non-workers are full-time students while the corresponding proportion for females is 9·47 per cent. The reason is that 40·82 per cent of the female non-workers who are engaged in household duties are also included as non-workers. The rural urban differences are similar both for males and females excepting in categories 2 and 5. In urban areas the percentage of full-time student is higher and that for dependants, infants, etc., lower both for males and females. The percentage of females engaged in household duties is also higher in urban areas than in rural areas. The percentage of unemployed is 4·13 and 0·53 for males in urban and rural areas respectively and almost negligible in both cases for females. Proportions of full-time students among females are very much lower both in urban and rural areas than those for males. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower also because the group of non-workers contains a large number of adult women engaged in household duties. Other categories have less thana per cent in each of them both for males and females.

PART I

VILLAGE DIRECTORY

This Directory renders an account of each Village and each Ward of Town

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with word "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) Seventy-five per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetica lists of villages in capital letters with code numbers shown inroman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

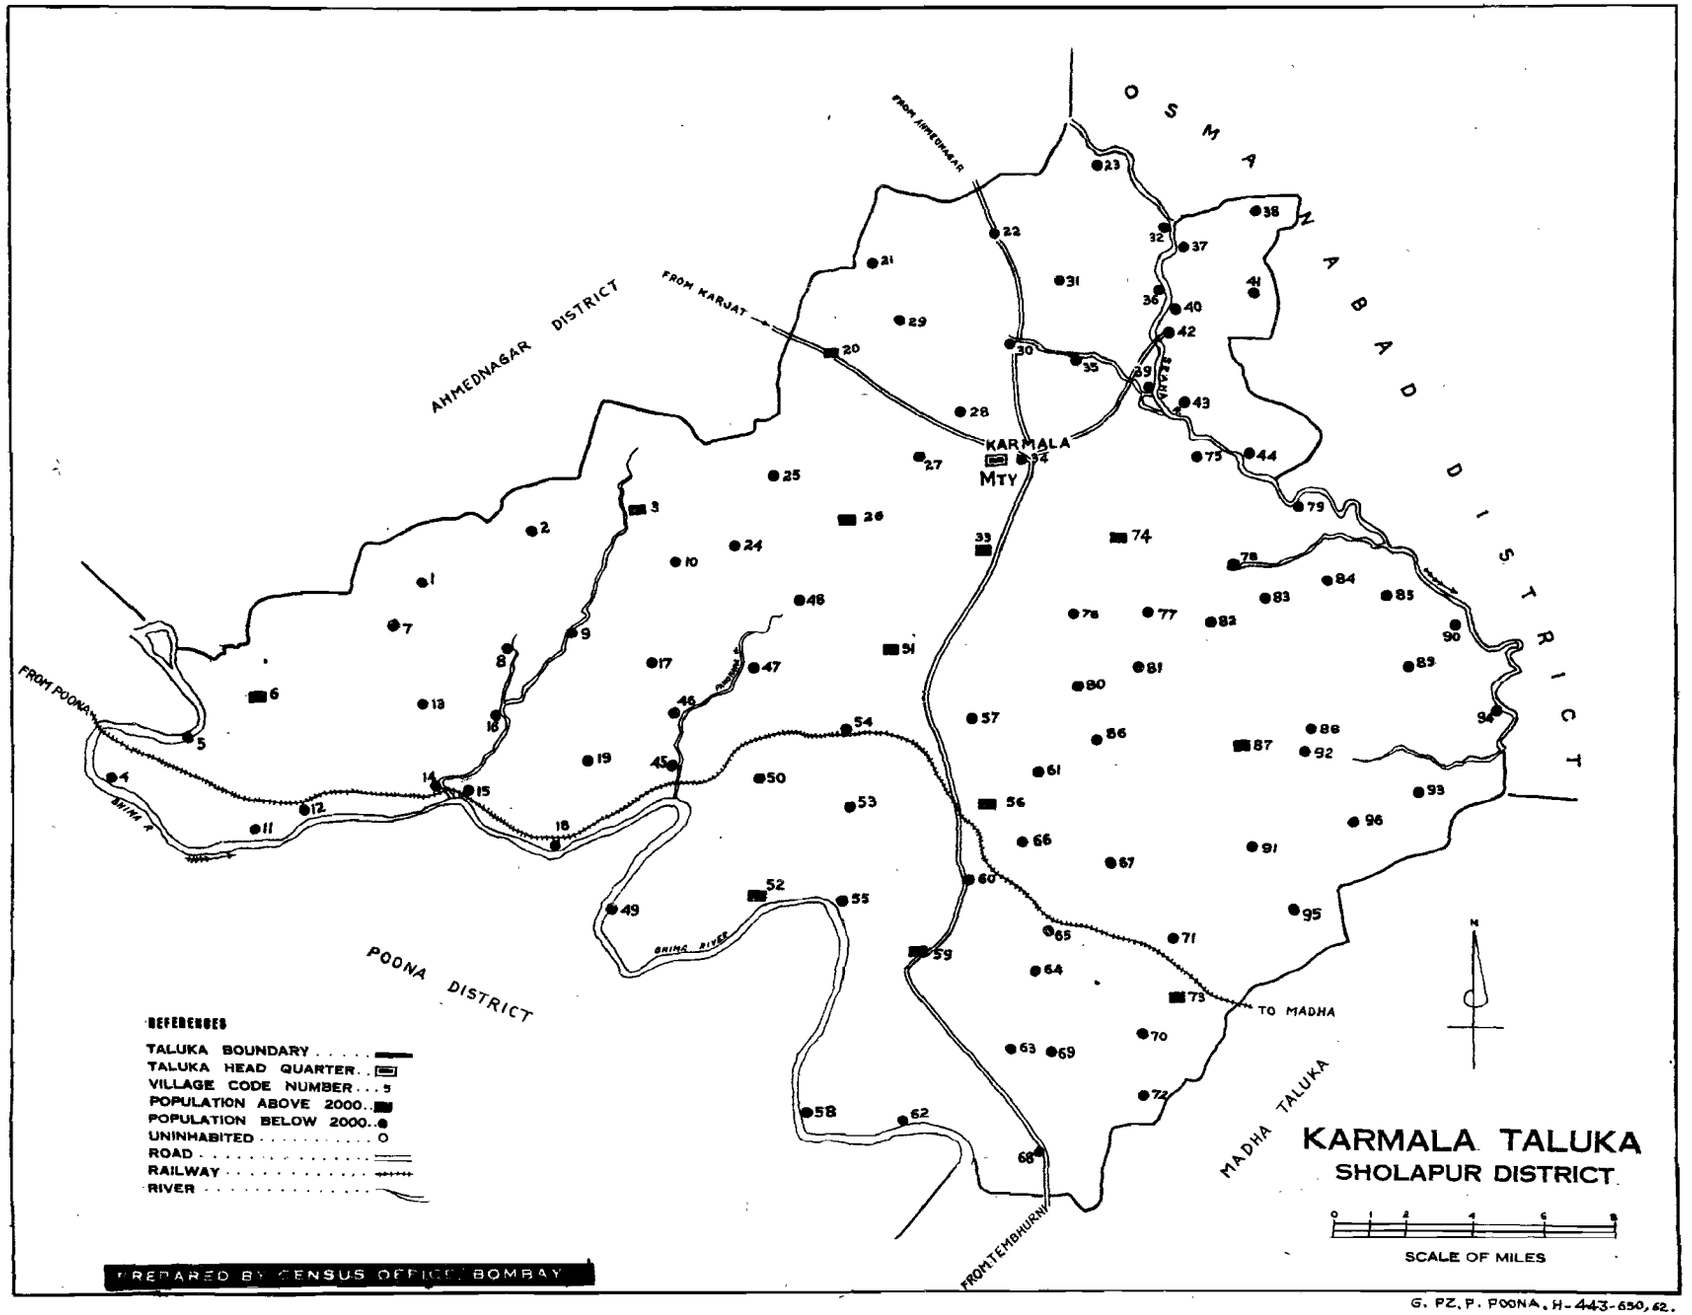

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

Number of Establishments and Workers for Industries classified by Minor Groups of Industrial Classification 181

EXPLANATORY NOTE

This Part contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. The talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (e.g., A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (e.g., B-III-D, B-VIII-B, B-IX, C-III-B, etc.) talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least $\frac{3}{4}$ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. There have been no territorial changes during the decade 1951—1961. Appendix I does not, therefore, appear here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons;

(ii) earning dependents; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The " household " is slightly different from a " family ". A " household " is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A " literate " is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I As Cultivator.
II As Agricultural Labourer.
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV At Household Industry.
V In Manufacturing other than Household Industry.
VI In Construction.
VII In Trade and Commerce.
VIII In Transport, Storage and Communications.
IX In Other Services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, washerman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in service incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water-supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II	Agricultural Labourer ..	
III	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 and 3.
V	Manufacturing	Divisions 2 and 3.
VI	Construction	Division 4.
VII	Trade and Commerce ..	Division 6.
VIII	Transport, Storage and Communications.	Division 7.
IX	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes " employer ", " employee ", " single worker " and " family worker ".

An " employer " is a person who employs other persons in order to perform economic activity in which he is engaged.

An " employee " is a person who usually works under some other person for salary, or wages in cash or kind.

A " single worker " is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A " family worker " is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group, is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii) even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, *viz.*, IV-Household Industry, I-Cultivator and II-Agricultural Labourer. Workers who may be engaged in secondary work in other categories, *viz.*, III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry—categories III and V to IX—as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in column (1), but who are doing additional work in any sector other than household industry, are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry ;

(ii) engaged in cultivation only ;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, *viz.*—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry (Appendix I). The table shows the

sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES
SOCIAL AND CULTURAL TABLES

80. There are 11 tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of Households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part III of the Maharashtra Census Report.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. The table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0—9 years and 70 and over. The entire population in 0—9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Tables C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top-ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-A of the Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from the household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, *viz.*—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, *viz.*—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES
HOUSING TABLES

116. There are five tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, courtyard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of " Others " includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. " Rent free " or " Caretaker " occupation is included in the " Rented " category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124. This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or overcrowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A " room " has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, *viz.*, September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers, are listed below:—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary Services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Livestock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Division 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal
36	Basic Metals and their products except machinery and transport equipment
37	Machinery (all kinds other than Transport) and Electrical equipment
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary Services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport.
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services

Division 8—Services—*concld.*

83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described (This includes new entrants to the labour market)

MINOR GROUPS

Major Group Code (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops.	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms..	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation ..	010
	Production of coffee in plantation ..	011
	Production of rubber in plantation ..	012
	Production of tobacco in plantation ..	013
	Production of ganja, cinchona, opium..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests.	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests.	023
	Production of fodder by exploitation of forests.	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea ..	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, ponds.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting—*concld.*	
04	*Livestock and Hunting—*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling ..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms ..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products*—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys, artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products*—	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing*—	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products*—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear	314
	Repair of all otherl eather products except footwear.	315
32	*Rubber, Petroleum and Coal Products*—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products*—	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal*—	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical Equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tunning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railway bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
63	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverware and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade*—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, ready-made garments of cotton, wool, silk and other textiles and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, headgear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobil oil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper..	661
	Retail trading in metal, procelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewelliery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*—	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money-lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport*—	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport*—	
	Such as packing, carting travel agency.. ..	710
72	*Storage and Warehousing*—	
	Operation of storage such as warehouses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication*—	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services*—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homoeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating-houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisations and individuals such as those by barber, hair dressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note.—n. e. c.=not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

5 Miners, quarrymen and related workers

6 Workers in transport and communication occupations

7-8 Craftsmen, production process workers and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

00 Professional, Technical and Related Workers

00 Architects, Engineers and Surveyors
01 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, Surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists and Related Workers
08 Artists, Writers and Related Workers
09 Draughtsmen, Science and Engineering Technicians, n. e. c.
0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

10 Administrators, and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

20 Book-Keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

3 Sales Workers

30 Working Proprietors, Wholesale and Retail Trade
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, Ship
61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen.
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers, Road Transport
65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers and Labourers not elsewhere classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors, Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n. e. c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n. e. c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters, Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations

X0 Workers without occupations
X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
X9 Workers not Reporting Occupations

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note—n. e. c.=not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date, Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries.
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds, *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses.
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill.
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and foodgrains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashewnut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweetmeats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbata and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date palm fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
226·2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
Major Group 27—Textile—Miscellaneous	
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*concld.*	
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat and other headgear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including raincoats and headgears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of waterproof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread), batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandalwood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
Major Group 28—Manufacture of Wood and Wooden Products—*concld.*	
288.7	Caning of chairs
288.8	Making of chicks, cuscus-tati and fans, sticks and poles from bamboo
288.9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289.1	Making of sticks and poles from wood
289.2	Making of wooden kharaus and other wooden sandals
289.3	Making of cartwheels
289.4	Manufacture of other wood and allied products n. e. c.
Major Group 29—Paper and Paper Products	
291	Manufacture of pulp and paper by hand
292.1	Making of envelopes and paper bags
292.2	Papier mache articles
293.3	Making of kite
292.4	Paper decorations for homes
292.5	Making of card-board boxes and cards
292.6	Making of paper toys
292.7	Making of paper flowers, etc.
292.8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
Major Group 30—Printing and Publishing	
301	Printing and publishing of books
302.1	Printing works, printing of handbills, invitation cards, etc.
302.2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry
303	Book binding, stitching, sizing and other work connected with book binding industry
Major Group 31—Leather and Leather Products	
310.1	Flying, processing of hides and skins including taxidermy
310.2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310.3	Stuffed animals.
311.1	Making of leather boots, shoes or chappals (slippers, sandals)
311.2	Making of Poola shoes
311.3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear), made of leather and fur
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
Major Group 32—Rubber, Petroleum and Coal Products	
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including raincoats, oil cloths, waterproof cloths, etc.
Major Group 33—Chemicals and Chemical Products	
331.1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331.2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones).
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335.1	Manufacture of incense and perfumes.
335.2	Manufacture of Agarbatti
335.3	Manufacture of rose water
335.4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335.5	Manufacture of kumkum and hinglo
335.6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
Major Group 33—Chemicals and Chemical Products —*concld.*	
335.7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335.8	Manufacture of perfumes, cosmetics and other toilet preparation n. e. c.
336.1	Manufacture of soap and washing soda.
336.2	Manufacture of other washing and cleaning compounds n. e. c.
337.1	Manufacture of plastic toys
337.2	Making of plastic buttons
337.3	Manufacture of other plastic goods
337.4	Making of celluloid goods
337.5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production.
339.1	Manufacture of ink including fountain pen ink
339.2	Making of candles
339.3	Making of tooth powder
339.4	Making of boot polish and inedible oils, etc.
339.5	Manufacture of other chemicals products n. e. c.
Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal	
340.1	Making of bricks
340.2	Manufacture of roofing tiles
340.3	Manufacture of other clay products n. e. c.
341.1	Manufacture of cement door frames and sanitary fittings
341.2	Manufacture of cement jali and tiles
341.3	Making of cement statues
341.4	Making of cement products n. e. c.
342.1	Manufacture of lishu
342.2	Manufacture of lime
343.1	Stone carving
343.2	Marble carving
343.3	Granite carving
343.4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys.
346.1	Making of images from soap stone.
346.2	Manufacture of images, toys and other articles of plaster of paris
348.1	Mica splitting
348.2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353.1	Making of glass bangles
353.2	Making of glass beads
353.3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356.1	Making of earthen toys and artware
356.2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment	
360.1	Re-rolling of M. S. Rods
360.2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture.
365.1	Making of utensils of brass and bell metal
365.2	Making of brassware
365.3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*	
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n. e. c.
366·1	Making of aluminium utensils
366·2	Making of other aluminium products n. e. c.
367·1	Making of tin utensils
367·2	Making of articles from tin sheets
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron, brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets
369·4	Making and repairing of locks and trunks
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n. e. c.
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n. e. c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
Major Group 38—Transport Equipment	
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles
Major Group 38—Transport Equipment—*concld.*	
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
Major Group 39—Miscellaneous Manufacturing Industries	
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n. e. c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including Silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc., n. e. c.
394	Manufacture, repairing and tunning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells.
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n. e. c. bats, rackets, balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair).
399·7	Making of garlands from flowers, camphor, sandalwood shavings, seeds and other materials like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n. e. c.

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.

(2) Agriculture—Tables 3 to 10.

(3) Industries—Tables 11 to 14.

(4) Education—Tables 15 and 16.

(5) Public Health—Tables 17 to 19.

(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. "Normal rainfall" [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where raingauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India ".

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, river beds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste* : This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years;

(ix) *Net area sown*: The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area*: This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by "cereals, pulses and others". Non-foodcrops are similarly shown under "oilseeds and others".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1955-56 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area and the gross irrigated area are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri, jowar (kharif and rabi), wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, *i.e.*, calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word " factories " here includes only the registered factories. They are of three types—

(i) Factories using no power but employing 20 or more workers;

(ii) Factories using power and employing 10 or more workers; and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

J-1078-III—27-A-(Sholapur)

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1952, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,
(ii) the name of the village in which the fair is held,
(iii) distance from Railway station and S. T. Bus stop,
(iv) name of the fair, and month and date of the fair, and
(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
