	(Urban)	166-169

PREFACE

Prior to the 1951 Census, there was no regular separate publication at the district level regarding the data collected, although the seeds of the District Census Handbooks can be traced to the 'Village Lists brought out for every district in 1901 and 'Village Statistics' of every district published in 1911 and 1941. No. definite answer is forthcoming as to why such publications, giving village-wise information of occupied houses, break-up of population into males/females and literates, were not brought out in 1921 and 1931 The reason could be transfer from 1921 of certain charges on Census previously met from the provincia. revenues to the Central revenues and the Government of India may not have considered it necessary to publish statistics up to the village level. 'Village Statistics' in 1941 were brought out by the Central Provinces & Berar Government and this practice of bringing out district-wise publications at the cost of the State Government has since been continuing.

2. The scope of the district-wise publications, now called the District Census Handbooks, has been undergoing change with each successive Census from 1951. In 1951, the District Census Handbooks only contained the Primary Census Abstract and the Census tables. In view of the usefulness of separate publication for each district, improvements were made at the time of the 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, education, etc. An 'Introductory Note' was also added to highlight the more striking features. Unfortunately, the desire to make district-wise Census publications very comprehensive resulted in late availability of the books to the users. Therefore, this time the District Census Handbooks have been divided into three parts in order to release maximum data, as and when finalised, so that the publications may have a useful life of about seven to eight years of inter-Censal decennium. Part A will contain Primarily non-Census statistics, Part B the Primary Census Abstract and Part C various administrative statistics with a chapter titled "Introducing the district". It may be mentioned here that subsequently a decision has been taken to merge Parts A and B in one volume on grounds of economy.

3. Much of the delay in the publication of the District Census Handbooks after the 1961 Census was due to delay in collection of administrative statistics and the decision to write the Introductory Note in the head office. Separation of administrative statistics as Part C of the District Census Handbook and the kind Co-operation of the State Government, permitting Collectors of the 1961-71 decade to write the chapter on "Introducing the District," is likely to go a long way in early publication of all the parts of the District Census Handbooks. Another favourable factor this time is the early decision of the State Government to permit printing in private presses as and when the work-load on the State Government Presses is heavy and likely to result in delay in the bringing out of the District Census Handbook of any district. It would not be out of place to point out here that the work-load in connection with the District Census Handbooks is very much more this time, not only on account of wider coverage but largely due to the decision to bring out the District Census Handbooks in Hindi as well as English. In all, there will be 172 publications, 4 per district of which 2 will be in hindi and 2 in english. Advance action was taken this time to collect the non-Census data and it is hoped that the combined volume of Parts A and B of all the 43 districts would be out by the end of 1973 and Part C of all the districts by the middle of 1975. This would be a definite improvement on the 1961 performance when printing of the District Census Handbooks covered the period 1964 to 1967.

4. In his Preface to the 1961 District Census Handbooks, my predecessor, Shri G. Jagathpathi, had observed thus, "It was not possible at this Census to base all Census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.". It has not been possible to adopt the development block as the basic unit for operation and presentation in this Census for more than one reason. Firstly, the office of the Block Development Officer was abolished in December, 1965; its resurrection in the form of office of the Block Development Assistant from 2-10-69 had not taken firm roots up to the time field arrangements for the 1971 Census were finalised. Secondly, the tahsil as a unit of field arrangements has many more advantages, the most significant being the ready availability of that legendary functionary—the patwari—without whose active co-operation it would be a formidable task to determine whether a habited structure in a cultivated field is part of village X or Y. Even, otherwise, since village-wise figures are available, it should not be difficult for those in need of data for intermediate units between the village and the tahsil, like the development block or patwari halka, to compile it by adding figures of concerned villages. The tahsil has for long been a fixed unit of administration and, to my mind, should be retained in preference to the development block whose jurisdiction may undergo a change in accordance with the pace of future development.

5. In conclusion, I would like to place on record my grateful thanks to the Government of Madhya Pradesh for having so kindly agreed to undertake the publication of the Handbooks in hindi as well as english to the various government and semi-government offices for un-hesitatingly making available the non-Census statistics, and to the Controller, Government Press, and his staff for arranging early printing in the Government and private Presses.

BHOPAL :
15 *th August*, 1972.

VILLAGE AND TOWN DIRECTORY

PART X (A)

EXPLANATORY NOTE

History :

Prior to 1951 there were no separate Census publications for every district. But at the time of preparatory arrangements for the first Census of Independent India, it was felt that Census statistics should be made available for smaller territorial units basic to the needs of an administration wedded to welfare of the masses. Accordingly, the scheme of District Census Handbooks was conceived and implemented. In view of the usefulness of separate publications for each district, further improvement was made at the time of 1961 Census by including non-Census data like climate, agriculture, co-operation, industry, banking, education, health etc. An introductory note was also added to highlight the more striking features. Unfortunately the desire to make district-wise Census publication very comprehensive resulted in late availability of the book to the users. Therefore the organisers of the 1971 Centenary Census decided in favour of splitting the District Census Handbooks into three parts and thereby release maximum data, as and when available, so that the publication may have a useful life of seven to eight years of inter-censal decennium

Scope :

(a) Part A of the book is the Village and Town Directory. The Village Directory contains for each village particulars of amenities available in the field of education, medicine, power supply, drinking water supply, post and telegraph facilities and communications. In addition, data relating to particulars of land use, weekly market, places of religious, historical or archaeological interest in the village has also been included. The Town Directory gives for each town in the district in the form of suitable statements, the origin and status of the town administration, growth of population, functional category of the town, physical aspects and location, latest municipal financial statements, civic and other amenities, medical, educational and cultural facilities, trade, industry, commerce and banking facilities, population by religion and Scheduled Castes and Scheduled Tribes. The abbreviations used in the Directory have been explained separately.

(b) Part B Contains for each village and town, the primary census data incorporating area, occupied, residential houses, number of households, total population and its break-up by sex, Scheduled Caste and Scheduled Tribe population, literate population and working population by nine broad categories.

(c) Part C will mainly incorporate the administrative statistics pertaining to the district in all the fields of development. The other Census tables pertaining to the district regarding language, religion migration etc., will also be reproduced. There will be a write-up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade.

Village Directory :

This is in the form of one statement. Important statistics for each village have been given under the mainhead—Amenities and Land Use Data. Other information regarding nearest town with distance, market, staple food, and places of religious, historical or archaeological interest have also been given in separate columns. The information regarding "Amenities" cover items like educational and medical institutions, power supply, drinking water, communications and post and telegraph. Under "Land use", the break-up of the total area of the village has been indicated under sub-heads forest, irrigated, unirrigated, cultivable waste and area not available for cultivation.

(a) There are 1,125 villages in the four tahsils of the district and the number of villages tahsil-wise in 1961 and 1971 is as under :—

	Tahsil	1961	1971	Difference
	1	2	3	4
1	Susner	220	219	—1
2	Agar	279	279	Nil
3	Shajapur	362	362	Nil
4	Shujalpur	266	265	—1
		1,127	1,125	—2

It may be seen that there has been a decrease of two villages. The reasons for the difference are :—

1. **Susner Tahsil** :—Dokarpur village (1961 L.C. No. 23/1/152) has been brought within the boundary of Nalkhera municipality.

2. **Shujalpur Tahsil** :—Akodia village (1961 L.C. No. 23/4/84) has been recognised as a town in 1971.

The distribution of the villages with reference to their area in acres is as shown in the inset table below:—

Area (in Acres)	No. of villages
1	2
50 acres or less	4
51 — 100	5
101 — 200	17
201 — 500	135
501 — 1,000	339
1,001 — 2,000	428
2,001 — 5,000	183
5,001 acres and above	14
Total	1,125

Village Barwa (L.C. No. 23/3/166) in Shajapur tahsil has the smallest area of 35 acres and is located at a distance of 6.4 kms. from the nearest town, Shajapur, while village Polan Kalan(L.C.No.23/4/217) in Shujalpur tahsil has the largest area of 10,437 acres in the district and is located at a distance of 19.2 kms. from the nearest town, Akodia. Out of 1,125 villages, 767 villages are in the range of 501-2,000 acres. Maximum villages in Susner, Agar and Shujalpur tahsils come within the area range of 1,001-2,000 acres, while in Shajapur tahsil they come within the range of 501-1,000 acres as will be seen from the following table containing tahsil-wise data :-

Area in acres	Susner	Agar	Shajapur	Shujalpur	Total
1	2	3	4	5	6
50 acres or less	1	...	2	1	4
51 — 100	...	...	2	3	5
101 — 200	2	6	6	3	17
201 — 500	22	25	62	26	135
501 — 1,000	59	92	122	66	339
1,001 — 2,000	97	113	107	111	428
2,001 — 5,000	34	42	57	50	183
5,001 and above	4	1	4	5	14
Area not available	...	...	...	...	...
Total	219	279	362	265	1,125

(*b*) *Educational Amenities* :—The total number of villages having various educational facilities within various distance ranges from the nearest town are as indicated in the inset table below :-

Distance from the nearest town	Total No. of villages	Number of villages having				
		Primary School	Middle School	High or Higher Secondary School	College	Others
1	2	3	4	5	6	7
5 kms. or less	109	41	1	...	...	...
6 — 10 kms.	250	113	17	...	...	...
11 — 15 kms.	242	84	10	1	...	...
16 — 25 kms.	349	154	23	3	...	...
26 — 50 kms.	175	67	13	5	...	...
51 — 100 kms.	...	...	...	...	...	...
101 — 200 kms.	...	...	...	...	...	...
201 kms. and above	...	...	...	...	...	...
Total	1,125	459	64	9	...	...

Maximum number of villages (349) lie within the distance range of 16-25 kms. and maximum number of villages having educational facilities also lie within this range. The number of educational institutions in the villages of different tahsils is given below :—

Tahsil	Number of Educational Institutions			
	Higher Secondary/ High School	Middle School	Primary School	Others
1	2	3	4	5
Susner	1	12	83	...
Agar	1	4	100	...
Shajapur	3	24	153	...
Shujalpur	4	24	130	...
Total	9	64	466	...

Seven villages have two primary schools each. The area of these villages with distances from the nearest town are indicated below :—

Sl. No.	Name of village	Tahsil	L.C.No.	Area of the village in acres	Distance from the nearest town in kms. with name	Educational Institutions & number (if more than one)	
						Primary School	Middle School
1	2	3	4	5	6	7	8
1	Dongargaon	Susner	23/1/7	5,666.00	Susner 40.0	2	...
2	Badod Kasba	Agar	23/2/34	3,428.00	Agar 25.6	2	...
3	Tanodiya	Agar	23/2/182	5,856.00	Agar 16.0	2	...
4	Kasba Kanad	Agar	23/2/225	4,197.00	Agar 17.6	2	...
5	Badodiya	Shajapur	23/3/32	2,986.00	Sarangpur 14.4	2	...
6	Padli	Shajapur	23/3/241	1,228.00	Shajapur 24.0	2	...
7	Manglai	Shajapur	23/3/286	2,406.00	Sarangpur 9.6	2	...
			Total			14	...

(*c*) *Medical Facilities* :—The availability of medical facilities, per 100 sq.kms. and tahsil-wise, is as given in the following inset table :—

Tahsil	Total area (in sq.km.)	No. of Medical institutions of any kind per sq.km.
1	2	3
Susner	1,239	0.4
Agar	1,433	0.6
Shajapur	1,807	0.7
Shujalpur	1,614	0.8

The above table will show that the villages of Shujalpur tahsil have, comparatively, greater medical facilities per 100 sq. kms. The number of medical institutions, tahsil-wise, is as indicated below :—

Tahsil	No. of Medical institutions
1	2
Susner	6
Agar	9
Shajapur	15
Shujalpur	14
Total	44

About 66 percent of the medical institutions in the rural areas of the district are in the villages of Shajapur and Shujalpur tahsils.

(*d*) *Power Supply* :—The number of villages having electric power supply within various distance ranges from the nearest town are as indicated in the inset table below :—

Distance from the nearest town	Total No. of villages	No. of villages with electric power supply
1	2	3
5 kms. or less	109	18
6 — 10 kms.	250	21
11 — 15 kms.	242	14
16 — 25 kms.	349	32
26 — 50 kms.	175	16
51 — 100 kms.	...	...
101 — 200 kms.	...	...
201 — kms. and above	...	...
Total	1,125	101

It would be seen from the above that only about 9 percent of the total number of villages have electricity and about 84 percent of them are in the distance range up to 25 kms.

The number of villages having electric power supply, tahsil-wise, is as below :—

Tahsil	Total No. of villages	Villages having electric power supply	Percentage of villages covered by electricity
1	2	3	4
Susner	219	23	10.50
Agar	279	19	6.81
Shajapur	362	34	9.39
Shujalpur	265	25	9.43
Total :	1,125	101	

The percentage of villages (about 9) having electric power supply in the district is slightly more than the State average percentage (about 7). Within the district, villages of Agar tahsil have comparatively less of this facility.

(*e*) *Communications* :—The total number of villages and the number of villages connected by different types of communications, falling in different distance ranges from the nearest town are indicaied in the inset table below :-

Distance from the nearest town	Total No. of villages	Number of villages connected by				
		Pucca road	Kutcha road	Pucca road & Rail	Kutcha road & Rail	Others
1	2	3	4	5	6	7
5 kms. or less	109	23	30	1	2	...
6 — 10 kms.	250	49	56	...	...	...
11 — 15 kms.	242	24	72	...	...	2
16 — 25 kms.	349	20	111	4	...	6
26 — 50 kms.	175	8	75	2	...	4
51 —100 kms.	...	...	...	...	...	...
101 —200 kms.	...	...	...	...	...	...
201 — kms. and above	...	..	...	...	...	...
Total	1,125	124	344	7	2	12

Few villages are served by "Pucca" road. Out of 1,125 villages in the district, 477 villages are served by either "Pucca" or "Kutcha" roads. The number of villages served by "Pucca" roads, tahsil-wise, and the total number of villages with percentage covered are as under :—

Tahsil	Total No. of villages	No. of villages having 'pucca' road	Percentage
1	2	3	4
Susner	219	22	10.04
Agar	279	35	12.54
Shajapur	362	55	15.19
Shujalpur	265	19	7.17
Total	1,125	131	

Comparatively, Shajapur and Agar tahsils have better communication facilities, while Shujalpur tahsil is poor in this facility.

(*f*) *Post and Telegraphs* :—The total number of villages in the tahsils of the district having post offices are given below :—

Name of tahsil	Total No. of villages	No. of villages having post office	No. of villages having telegraph office	No. of villages having telephone
1	2	3	4	5
Susner	219	14	...	...
Agar	279	19	2	...
Shajapur	362	36	2	1
Shujalpur	265	40	...	...
Total	1,125	109	4	1

The number of post offices per 100 sq.kms. area in each tahsil is as indicated in the following inset table :—

Name of tahsil	Total area in sq.kms.	Post office per 100 sq.kms.
1	2	3
Susner	1,239	1.1
Agar	1,433	1.3
Shajapur	1,807	1.9
Shujalpur	1,614	2.4

Comparatively, rural area of Shujalpur tahsil has better postal facility, while Susner tahsil has less of this facility. In Shajapur tahsil, two villages have telegraph offices while one village Berchha, L.C. No. 23/3/350 has telephone also. Telegraph facility is also available in two villages of Agar tahsil.

(*g*) *Staple Food* :—"Jowar" wheat and maize constitute staple food in the villages of every tahsil.

(*h*) *Land Use Pattern* :—(i) According to the village papers, about 0.62 percent of the area in the district is under forest. The percentage of the forest area, tahsil-wise, is as indicated below :—

Tahsil	Percentage
1	2
Susner	1.90
Agar	0.97
Shajapur	...
Shujalpur	...

It may be noticed that there is no forest in the villages of Shajapur and Shujalpur tahsils, while in the villages of the other two tahsils, the forest area is negligible.

(ii) The net cropped area in the year 1969 increased by 8.18 percent as compared to the area in 1960-61. The percentage of area under irrigation to area under crops during the year 1960-61 and 1968-69 comes to 3.83 and 4.49, respectively. The area under irrigation during the period increased by 26.80 percent.

(iii) The following inset table shows the average percentage of cultivable waste per village in different distance ranges from the nearest town :—

Distance	Number of villages	Total cultivated land	Average cultivated land per village	Total cultivable waste	Average cultivable waste per village	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7
5 kms. or less	109	76,630	703.03	28,618	262.55	37.35
6 — 10 kms.	250	198,189	792.76	71,692	286.77	36.17
11 — 15 kms.	242	167,312	691.37	70,876	292.88	42.36
16 — 25 kms.	349	289,005	828.09	107,012	306.62	37.03
26 — 50 kms.	175	124,293	710.25	48,128	275.02	38.72
Total	1,125	855,429	...	326,326	...	...

Ordinarily, the nearer a village to an urban area, the lesser is the proportion of cultivable waste but the above inset table will show that there is some deviation in the distance ranges 6-10 kms. and 16-25 kms.

In the whole district, 326,326 acres (in round figures) of land has been classified as cultivable waste which constitutes 21.67 percent of the total arfea of the villages in the district. The percentage of cultivable waste in each tahsil is indicated below :—

Name af tahsil	Percentage of cultivable waste
1	2
Susner	23.81
Agar	21.13
Shajapur	21.37
Shujalpur	20.85

This table would show that comparatively more cultivable waste is located in Susner tahsil and it comes to slightly less than one-fourth of the total area of the villages in this tahsil.

Town Directory :

This is in the form of seven Statements. But before discussing the information collected in the seven Statements, it would be better to first understand certain concepts which determines urban areas.

(*i*) *Definition of town* :—A 'town' in the 1961 Census was either - (i) a Municipality, Cantonment or Corporation; or (ii) a habitation with a population of at least 5,000, with atleast three-fourths of the adult male population engaged in non-agricultural pursuits. Accordingly there were 219 towns in the State. However, seven towns did not satisfy either the minimum population criterion or the one relating to ratio of non-agricultural adult males being 75% or more. But the list already finalised was not changed subsequently; the reason for not disturbing the original list of town was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to get included in the list of towns as Municipalities and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than what was already present. In the 1971 Census there was no material change in the concept of town and a list of 247 towns was prepared originally. Three more towns were added in the list due to the fact that two places were declared as municipal and the third fulfilled the necessary criterion to qualify a place as urban and ultimately 250 towns were recognised in the State. All areas which are not towns have been included in the list of villages.

(*ii*) *Urban Agglomeration* :— The concept of Urban Agglomeration has been adopted for the 1971 Census with the intention to present the population data in the District Census Handbook in respect of urban areas in such a manner that "*de-facto* urban agglomeration" is a recognisable entity, data pertaining to which will be the sum of the data of not only the *de-jure* (within Municipal/other statutory limits) urban area but also of its outgrowths in different directions which are obviously urban in character and form a continuous urban spread. This has been considered necessary so that future comparisons or studies of the particular urban agglomeration is factual and not vitiated by the time differential which exists between the delineation of municipal boundaries and the actual growth of the urban area.

(*iii*) *Standard Urban Area* :—This new concept has been developed for the 1971 Census and the essentials of a Standard Urban Area are :—

(1) It should have a core town of a minimum population size of 50,000.

(2) The continuous areas made up of other urban as well as rural administrative units should have close socio-economic links with the core town and

(3) The probabilities are that this entire area will get fully urbanised in a period of two to three decades. This concept has been developed to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture.

The Seven Statements :—Very useful data regarding the town have been given in the statements and they have been collected and compiled from various agencies and official publications. The source and period of the information has been indicated below each Statement. It would not be out of place to mention here that analysis of data collected from diverse sources has its own limitations, mostly due to sketchy and incomplete information. All the same, the data compiled and presented throws sufficient light on the present stage of progress in each town.

(*i*) *Statement No. I* :—This statement presents the basic data relating to population of the towns for each decennium from 1901 to 1971 and the civic administration status in 1970. The civic administration status of the town indicates the authority incharge of its administration. Thus a town could have a Municipal Corporation, a Municipality, a Cantonment Board, a Gram Panchayat, a Notified Area Committee, etc.

(*ii*) *Statement No. II* :—This statement contains information regarding Location (latitude and longitude) annual rainfall, temperature, distance from the nearest city with population of 1 lac or more and State, District

and Tahsil headquarters. Distances from Railway Station and Bus route have also been indicated.

(*iii*) *Statement No. III* :—This statement contains information regarding receipt and expenditure of local bodies under different main heads indicating the indebtedness and general financial position and expenditure on public utility works. The information has been furnished for the years 1968-69, 1969-70 and 1970-71 in order to have an idea whether the concerned urban body is improving financially or not.

(*iv*) *Statement No. IV* :—This statement contains information regarding amenities, *e.g.*, road length, sewerage system, types of latrines, water supply, fire-fighting service etc. in the different towns.

(*v*) *Statement No. V* :—This statement contains information regarding various important facilities available in the town *viz.*, medical, educational, recreational and cultural.

(*vi*) *Statement No. VI* :—This statement throws light on the business and credit facilities commanded by the towns and contains information regarding trade, commerce, industry and banking.

(*vii*) *Statement No. VII* :— This statement contains data regarding population by religion and Scheduled Castes/Scheduled Tribes with male/female break-up for the year 1971. This is the only statement based on 1971 Census figures.

Towns :

There are four tahsils and six towns in Shajapur district as indicated below :—

Tahsil	Town	Location Code No.	Class
1	2	3	4
Susner	1. Nalkhera	23/II	V
	2. Susner	23/I	V
Agar	3. Agar	23/III	IV
Shajapur	4. Shajapur	23/IV	III
Shujalpur	5. Akodia	23/V	V
	6. Shujalpur	23/VI	IV

All the tahsil headquarters are towns. Shajapur town is also the headquarter of the district. Out of the above six towns, only three towns, namely Agar Shajapur and Shujalpur, continue to be recognised as a town since 1901. The other three towns were recognised as a town for the first time in the years indicated below :—

	Town	Year
1	Akodia	1971
2	Nalkhera	1941
3	Susner	1941

Out of the six towns of the district, only two towns, Nalkhera and Susner, stood derecognised only in 1951.

Incidentally, it may be indicated here that in 1901, 1911, 1921 and 1941 Agar Cantonment was enumerated as a separate town*.

There is no outgrowth in any town of the district. There is no town in the district having population of over 50,000 and, therfore, there is no Standard Urban Area.

Statement I :— Akodia town has a gram panchayat, while the rest of the towns have municipalities. The population of the towns fell during the decades 1901=1911, 1911-1921 and 1921-1931 as mentioned below :—

Name of town	Decade population		Reduction in population
	Year	Population	
1	2	3	4
Agar	1901	10,442	
	1911	9,221	1,221
	1911	9,221	
	1921	6,189	3,032
Shajapur	1901	9,953	
	1911	8,876	1,077
	1911	8,876	
	1921	7,894	982
	1921	7,894	
	1931	7,765	129
Shujalpur	1921	6,072	
	1931	5,126	946

The population of the towns have, by and large, shown constant increase in every decade after their recognition as towns, except during the periods mentioned above.

* District Census Handbook—Census of India 1961—Shajapur District—Page xlix.

The 1911-1921 decade proved to be the most disastrous due to high mortality resulting from plague in 1911=12 and wide spread fatal influenza in 1918-19.** The following extract from the district Census Handbook of 1961 (Census of India 1961-Shajapur District) at page xlvi is relevant:—

"From 1901 to 1931 the urban areas suffered a loss of population which was very high in 1921. In 1921 towns with better medical facilities showed some increase ..... It is only after 1931 that the increase in urban areas is consistent."

During the decade 1921-1931, the district population, however, increased by 10.60 percent while the population of Shajapur and Shujalpur towns showed a slight decrease.

Column 14 of the statement shows the functional classification of the towns in 1961 as indicated in the following inset table :—

Functional category	Total No. of towns
1	2
Primary Activities-*cum*-Services	1
Services-*cum*-Industry-*cum*- Primary Activities	2
Services-*cum*-Industry	1
Services-*cum*-Primary Activities	1
	5

The method adopted for the functional classification is elucidated below :—

The nine industrial categories were grouped into the following five functional characteristics :-

(i) Primary Activities (Comprising Categories I—Cultivation, II—Agricultural Labourer and III—Mining and Quarrying, Fishing, Livestock, Hunting, etc.)

(ii) Industrial (Comprising Categories IV—Household Industry, V—Manufacturing other than Household Industry and VI—Construction)

(iii) Commercial (Comprising Category VII—Trade and Commerce)

(iv) Transport (Comprising Category VIII—Transport, Storage and Communications)

(v) Services (Comprising Category IX—Other Services)

** District Census Handbook—Census of India-1961 Shajapur District—page xlvi

The percentage of total workers under the above five functional characteristics were calculated for each town and the predominant function(s) of each town was/were determined. If one functional characteristic of a town absorbed more than 40 percent of the total workers the town was designated by that function, In case no single characteristics claimed 40 percent of the workers, two predominant characteristics, together claiming a percentage of 60 or above were taken to represent the town. If these two failed to account for 60 percent of the total workers, the first three characteristics were taken to represent the town.

Statement II :—The Physical and locational aspects as in 1969 have been covered. The district enjoys a mild climate being on the Malwa plateau. The towns get annual rainfall of about 865 m.m. to 1094 m.m. and the range of maximum and minimum temperature is from 32.9° C to 18.4° C. All the towns are on bus routes. Raiway facility is available in three towns only. Bhopal city is the nearest city from Akodia and Shujalpur towns while Ujjain city is nearest from the rest of the towns of the district.

Statement III :—On the basis of population of 1971, the six towns of the district have been categorised as under :—

Name of town	Population in 1971	Class
1	2	3
Agar	14,448	IV
Akodia	5,125	V
Nalkhera	6,933	V
Shajapur	25,189	III
Shujalpur	18,957	IV
Susner	7,129	V

The statement would show that the total expenditure is within the total receipts of the local bodies except in the following cases :—

Local body in the town of	Year of excess expenditure	Amount by which the expenditure is more than receipt	Percentage of excess expenditure to total receipt
1	2	3	4
Akodia	1969-70	8,200	33.61
	1970-71	1,300	8.39
Shujalpur	1970-71	35,600	9.52
Susner	1969-70	16,200	12.95

Column 5 of the above table would show that the percentage of excess expenditure to total receipts of the local bodies of Akodia and Susner is more than ten for the years indicated in the table. The total receipts of the local bodies have, by and large, shown an upward trend.

The total receipts of local bodies of Akodia, Nalkhera and Shujalpur, however, reveal a fall during the years 1970-71, 1969-70 and 1970-71, respectively. This is mainly due to fall in the receipts through taxes etc. of the local bodies of Akodia and Shujalpur and absence of loan to the local body of Nalkhera. Receipts through taxes have also shown, by and large, an upward trend during these years except in the following cases :—

Local body in the town of	Year	Shortfall in receipts through taxes etc.
1	2	3
Akodia	1970-71	4,700
Nalkhera	1970-71	30,700
Shujalpur	1970-71	28,300
Susner	1969-70	22,500

The above table would show that the shortfalls are substantial as against the total receipts of the local bodies. No local body, except those of Nalkhera, Shajapur and Susner, took loan. Government grant has substantially contributed to the receipts of these local bodies. The per capita receipt and expenditure under broad heads is indicated in the inset table below :—

			Per Capita						
			Receipt			Expenditure			
Class of town	Year	No. of towns	Total receipt	Receipt through taxes etc.	Receipt from all other sources	Total expenditure	Expenditure on Public Health Conveniences	Expenditure on Public Institutions	Expenditure on all other aspects
1	2	3	4	5	6	7	8	9	10
Class III	1968-69	1	16.66	13.58	3.08	14.59	6.04	...	8.55
20,000 —49,999	1969-70	1	17.50	15.46	2.04	15.59	1.43	0.10	14.06
	1970-71	1	27.89	16.92	10.97	16.44	1.23	0.02	15.19
Class IV	1968-69	2	17.00	11.97	5.03	16.66	3.20	...	13.46
10,000 —19,999	1969-70	2	20.90	15.27	5.63	19.35	3.54	...	15.81
	1970-71	2	21.63	16.04	5.59	21.58	3.81	...	17.77
Class V	1968-69	3	13.60	9.91	3.69	10.90	2.35	0.15	8.40
5,000 — 9,999	1969-70	3	14.39	9.13	5.26	15.47	5.36	1.64	8.47
	1970-71	3	19.77	8.16	11.61	13.58	3.66	0.64	9.28

The above inset table would show that the total per capita receipt matches fairly well with the total per capita expenditure. The per capita expenditure on public health and conveniences, by and large, is fair as against per capita receipt through taxes etc., except in the case of class III local body for the years 1969-70 and 1970-71. The expenditure of the local bodies shown in column 15 of statement No. III under head "others", constitutes quite a high percentage of the total expenditure.

Statement IV :—All the towns have electricity and electric connections have also been given for industrial purpose. Street lights have also been provided in all the towns. Water tap facility is available only in Agar, Shajapur and Shujalpur. Fire brigade is not available in any town.

Statement V :—(i) *Medical facilities* : Hospital facility is availabe at Agar, Nalkhera, Shajapur and Shujalpur, while susner has only a health centre.

In addition to the above, Shajapur has a Tuberculosis Hospital and a Family Planning Clinic. The number of beds per 1,000 population has been indicated in the inset table below :—

Total No. of beds in Medical institutions	No. of beds per 1,000 population
1	2
139	1.7

(ii) *Educational facilities* : Shajapur has a combined college. Shujalpur has an arts and science college, while only an arts college is located at Agar. College facility is not available in the other towns. Higher secondary/high schools are located in all the towns.

The number of higher secondary/high schools, middle schools and primary schools per thousand population is shown in the following inset table. For a more realistic appreciation, the population in the age-group 0-14 has been considered for primary and middle schools, while population in the age-group 15-19 has been considered for higher secondary/high schools :—

Name of the town	Number Per 1,000 Population		
	Higher Secondary or Secondary School	Middle School	Jr.Secondary/ Primary School
1	2	3	4
Agar	1.5	0.5	0.8
Akodia	2.5	0.9	0.4
Nalkhera	1.9	0.7	0.3
Shajapur	0.8	0.6	1.1
Shujalpur	1.1	0.5	1.1
Susner	1.7	0.6	0.6

(*iii*) *Recreational and cultural facilities* :—All the towns except Akodia, Nalkhera and Susner, have cinema houses. Public libraries and reading rooms are available in all the towns except Akodia and Susner.

Statement VI. All the towns have bank facility. Agricultural credit societies are available in all the towns except Shajapur, while non-agriculture credit societies are also available in all the towns except Akodia and Nalkhera. Sugar, cloth and vegetable "ghee" are the main items of import in all the towns, while wheat, cotton and groundnut are the important items of export. "Gud" is the important item of local manufacture.

Statement VII. About 32 percent of the urban population is in Shajapur town and it is followed by Shujalpur and Agar where the percentage of urban population is about 24 and 19, respectively. Majority of the urban population follow hindu religion ; next come followers of islam religion. Town-wise percentage of the population following the above two religions is as indicated below :—

Town	Percentage in round figures	
	Hindu	Islam
1	2	3
Agar	65	25
Akodia	77	18
Nalkhera	63	26
Shajapur	65	33
Shujalpur	70	23
Susner	61	28

The percentage of people following other religions is not very significant except that about 12 and 11 percent people of Susner and Nalkhera, respectively, follow jain religion. There is no population following Boudh religion in the towns.

In Susner, there is no population following christian and sikh religions. Scheduled Caste population in Shujalpur and Akodia is about 11 and 12 percent, respectively, while in other towns, it is less than ten percent. In Shajapur and Agar, the percentage of Scheduled Tribes is insignificant, while in other towns there is no Scheduled Tribe population.

PRIMARY CENSUS ABSTRACT

PART X (B)

EXPLANATORY NOTE

I. General :

In Part A, the picture of the district as revealed by non-Census data has been discussed. In this note, the progress made by the district in the 1961-71 decade would be dealt with on the basis of information collected in the individual slip that was canvassed in the 1971 Census. Broadly speaking, the changes that have come about in the matter of total population, its growth-rate and density, sex-ratio, literacy, Scheduled Castes and Scheduled Tribes, working population, occupied residential houses and number of households have been discussed.

II. Population :

The population of Shajapur district is 678,359, while the population of Madhya Pradesh is 41,654, 119. The population of Shajapur district thus comes to 1.63 percent of the State population. The rural population is about 88.53 percent of the district population whereas the urban population is 11.47 percent as against the State percentage of 16.29. In other words, the district is rural in character. Highest percentage of the district population is found in Shajapur tahsil (about 33 percent) and the reasons for this are that (i) the population of Shajapur town which is the district headquarter, is included in Shajapur tahsil, and (ii) the tahsil has comparatively the highest number of villages (362) in the tahsils of the district. Shajapur district ranks 30th among the 43 districts of the State in population. During the decade 1961-71, the district population growth—rate has been 28.93 against the State growth-rate of 28.67. The area of the district is 6,201 sq. km. In other words, it has 1.40 percent of the State area and ranks 34th in area among the districts of the State. The density of population per sq. km. of the district is 109 against the State density of 94 and the district ranks 15th in density in the State. The sex—ratio, number of females per 1,000 males, of the district and the State is 931 and 941, respectively. Tahsils Susner and Agar have got sex=ratio higher than the district sex-ratio while the other tahsils have lower sex-ratio.

III. Literacy :

1. The percentage of literacy in the district comes to about 19 as against the State literacy percentage of about 22. In 1961 also, the literacy percentage of the district (14.13) was lower than the State percentage of 17.13. The district has made some progress to increase the rate of literacy during the decade 1961-71.

2. The literacy percentage among the males in the district (30.28) is lower than the State percentage of about 33. Among females also, the literacy percentage in the district (6.84) is lower than the State percentage of about 11.

3. Among the tahsils, Shajapur tahsil has the highest literacy percentage of about 21, while Agar tahsil has the lowest percentage of about 15.

4. Among males, Shujalpur tahsil is at the top (33.71 percent), while Agar tahsil with about 23 percent comes last. Among females Shajapur tahsil leads in literacy (about 8 percent), while Susner tahsil with 5.34 percent comes last.

IV. Workers :

In the district, about 36 percent of the population comes under the category of workers (main activity) against the State percentage of about 37. The percentage of female workers to total population (about 17) is less than the State percentage (about 19). The percentage of female workers to total workers in the district is about 23. Within the district, comparatively greater percentage of workers (males and females) have been returned from Shujalpur tahsil. Agar tahsil has returned the lowest percentage of workers (34.48). Among female workers, Shujalpur tahsil with 19.78 percent leads other tahsils of the district, while Agar tahsil with 11.31 percent comes last. Among the workers in the district, about 49 and 32 percent are cultivators and agricultural labourers, respectively, as against the State percentage of about 53 and 27. Under the category "Other workers", the district percentage (about 19) is less than the

State percentage of 20.58. Among females, the district percentage of cultivators (about 24), and other workers (about 8) is less than the State percentage of about 41 and 10 respectively, while for agricultural labourers the district percentage (about 69) is higher than the State percentage (about 49). Comparatively, highest percentage of cultivators (about 55) has been returned from Susner tahsil while Shajapur tahsil has returned highest percentage of agricultural labourers. Lowest percentage of cultivators (about 45) and agricultural labourers (about 27) have been returned from Shujalpur and Agar tahsils, respectively.

V. Scheduled Caste and Scheduled Tribe :

The percentage of Scheduled Castes to total population of the district (about 22) is higher than the State percentage (about 13). The percentage of Scheduled Tribes of the district (0.05) is significantly lower than the State percentage (20.14).

VI. Occupied Residential Census Houses :

The district has 110,763 occupied residential Census Houses against the State figure of 6,822,767 which comes to 1.62 percent. During 1961, there were 103,299 occupied residential Census Houses in the district against the State figure of 6,230,854 which came to 1.66 percent. There has been very slight change in the percentage during the decade. The number of households and persons per occupied residential Census house in 1961 and 1971 are indicated below :

State/ District	Year	No. of Residential Census houses	No. of Households	No. of households per occupied residential Census house	No. of persons per residential Census house
1	2	3	4	5	6
State	1961	6,230,854	6,615,580	1.06	5.2
District	1961	103,299	106,880	1.03	5.1
State	1971	6,822,767	7,740,289	1.13	6.1
District	1971	110,763	122,269	1.11	6.1

It would thus be seen that the pressure on occupied residential Census houses has increased during the decade in the district as well as in the State. Comparatively, Shajapur tahsil (with about 34 percent) claims the highest percentage of occupied residential Census houses in the district.

VII. Villages and Towns :

There are 1,125 villages in Shajapur district which comes to 1.46 percent of total villages in the State. The percentage of inhabited villages to total villages in the district is 94.67 against the State percentage of about 92. There are 250 towns in the State out of which the district claims 6 :- Akodia, Agar, Nalkhera, Shajapur, Shujalpur, and Susner.
