DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry	Divisions 2 & 3
VI	Workers in construction	Division 4
VII	Workers in Trade and Commerce	Division 6
VIII	Workers in Transport Storage and Communications	Division 7
IX	Workers in other services	Divisions 5, 8 & 9

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including *lithography, engraving, etching,* block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately descirbed:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	999

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)
75 Occupational Groups (two-digit code numbers)
11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—
- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—
- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—
- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists
- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—
- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—
- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—
- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers

1 *Administrative, Executive and Managerial Workers*
- 0X3 Librarians, Archivists and Related *Workers*:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists. Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

Service, Sports and Recreation Workers.

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

by

G. N. Tiwari

Deputy Superintendent of Census Operations, Madhya Pradesh

Carved out of the Raghurajnagar tahsil of the North Rewa district of erstwhile Rewa State and as many as ten other *sanad* States, the district of Satna is situated between latitudes 23°58′ and 25°12′ north and longitudes 80°21′ and 81°23′ east in mid-northern part of Rewa Commissioner's division. The district takes its name from Satna, the headquarters town, which in its turn takes it from Satna river which flows near the town. The district is rather irregular in shape and does not conform to any known geometrical or other figure. In the north, the district's boundary marches with that of Banda district of Uttar Pradesh. Eastern boundary of the district runs with the Teonthar, Sirmour and Huzur tahsils of Rewa district and a very small portion of the Gopadbanas tahsil of Sidhi district. The entire western boundary of the district is made by Panna district, while the southern boundary abuts on the Murwara tahsil of Jabalpur district in the west, and Bandhogarh and Beohari tahsils of Shahdol district on the east.

Including in its 2,866 square miles of territory 1.68% of the State's area as against 2.33% which on an average a district should contain, the district is clearly much below the average in size. It occupies 27th rank in the decreasing order of area in the State. Damoh (2,815 sq. miles) and Vidisha (2,819 sq. miles) are districts having areas closely comparing with that of Satna district. As regards populousness, however, the district improves its rank in the State by ten places, its population of 694,370 making 2.14% of the State's total population. Ujjain, East Nimar and Mandla districts have populations comparable (lying within ±5%) with the population of Satna district. Some idea of the uneven size of area and population of the the district in the State context can be had from the following interesting comparisons. Bastar, the biggest and Bilaspur the most populous, districts in the State are respectively five times as large, and thrice as populous, as Satna district. In its turn Satna district is more than five times as big and three times as populous as Datia, the smallest and least populated district in the State.

Administratively the district is divided into four tahsils: Raghurajnagar (formed out of part of former Raghurajnagar tahsil of Rewa State, and the sanad States of Sohawal, Barondha, Paldeo, Pahra, Kamta-Rajauli and Taraon) in the north, Nagod (Nagod and Jasso *sanad* States) in the west, Maihar (consisting of the erstwhile Maihar State) in the south-west and Amarpatan (consisting of major part of the erstwhile Raghurajnagar tahsil of Rewa State, and of the *sanad* State of Kothi) in the south-east. In the past, administrative pattern in the different merging units was different and it was only after independence that the pattern more or less on the lines of the former British India districts was adopted. Now administrative pattern in the district is similar to that obtaining in other parts of the State governed by uniform sets of revenue and other legislation and rules and executive instructions. Thus, there is a Collector and District Magistrate in overall charge of general and revenue administration of the district, assisted by the usual hierarchy of Assistant and Deputy Collectors, Tahsildars and Naib Tahsildars etc. Also, as in other districts, there are the local district heads of development and welfare departments like education, public health, animal husbandry and veterinary, panchayat and social welfare, agriculture, etc. with the usual hierarchy of subordinate officials. Since the district does not have much of forest, it comes under a divisional forest officer stationed at Rewa. Judiciary was separate from the executive even in the erstwhile princely state days. For judicial administration, the district is under the District and Sessions Judge Rewa.

*Physical-Features**.

Satna district lies on the Vindhyan plateau, which has an average altitude of 1,000′, to 1,100′. From this

*Based on topo sheets published by the Survey of India.

plateau rise several hills, some of them enclosing higher plateaus, belonging to the Vindhyan system.

The southern portion of Nagod tahsil below 24°30′ north latitude is a hilly country consisting of a tangled mass of low hills, and enclosing considerable stretches of level ground. The height of the plateau enclosed by these hills is from 1700′ to 1800′ generally but occasionally, some of the hills in the south of the tahsil rise to more than 800 feet in height above the plateau. Examples are the hill near village Karimati (2,034′), Durha (1834′), in the north of village Kothi 2078′, (on railway line) etc. The general slope of the country in the tahsil is towards the east, inclined towards the north in the centre of the tahsil. Satna, the important river of the tahsil rises from the Panna hills and flows east as long as it is in Nagod tahsil. Near village Kathkone in Nagod tahsil it is joined by the Amran river, and from this point of junction, it bends towards the south, making the boundary of Nagod and Raghurajnagar tahsils, till it meets the Tons river a few miles to the south-east of Satna town. Barua is another river of some importance in the tahsil, which rises from the hills in the south of the tahsil and flowing almost due west joins the Tons a few miles below village Karaia, at the border of Maihar and Nagod tahsils.

Amarpatan tahsil is bounded on the south by the Son river. The Kaimur ridge, with its scarp side to the south, rises suddenly like a wall about eight miles to the north of Son river, going towards the east, with slight northerly inclination, almost parallel to the Son river. Between the Kaimur and the river is an alluvial plain, about eight miles wide towards the west of the tahsil, but getting narrower towards the east. A line of hills runs along the north bank of the river, which gets split into various separate hills in the east of the tahsil. In the extreme south-east of the tahsil there are three, more or less parallel, such hills. The main scarp rises to more than 2000′ at many points. North of Ramnagar, an isolated small hill rises to 2,354′. Rest of Amarpatan tahsil is again an alluvial plain drained by the Behar river, which flows more or less parallel to the Mirzapur road, in a north-easterly direction.

The south-western Maihar tahsil consists mainly of sandstones of Bhander series, concealed in great part by alluvium. This tahsil is bound for considerable distance on the south-west by the Kaimur range, which runs almost parallel to the Mirzapur road, at a distance of about three to four miles from it. Beyond 80°44′ east longitude the Kaimur ridge runs through the heart of the broader eastern portion of the tahsil dividing the basin of the Mahanadi from that of the Tons. Beyond villages Mouhwas and Mankaihri it crosses into the Amarpatan tahsil and leaves that tahsil after crossing 81°15′ east longitude. On the other side of the road also, the tahsil is bound by another lower hill, which is about one mile from the road. The river Tons, which drains the tahsil runs between the railway line and the Kaimur and is joined by numerous small nullahs which run along the northern slopes of the Kaimur. The south eastern extremity of Maihar tahsil is bound by river Mahanadi, which marches with the boundary of Maihar tahsil first with Murwara tahsil of Jabalpur district and then with Beohari tahsil of Shahdol district.

Raghurajnagar, the biggest tahsil in the district consists in the south of an alluvial plain watered by the Tons and its tributaries the Satna, and the Simrawal from the north-west and the Magardha and Nar from the south. In the region to the east of villages Atarhar, Itama, Kaitha and Gowhari in the south of the tahsil is a small hill with north-south strike, enclosing a narrow plateau. In the extreme south-east of the tahsil, east of villages Etma and Bida also there is a small hill rising to a height of 2059′. In the north also, the country is hilly. The Panna hills cross the narrowest portion of the tahsil in a west-east direction slightly inclined to the north and separate the valley of the Paisuni, in part ravinous, from the plateau to the south. Further north is the Vindhyachal range running from west to east, almost parallel to the Panna hills, through the former sanad States of Baraundha, Patharkachhar and the Chaube Jagirs. Between the two ranges, the country consists of a plateau, interspersed by hills. In the north of the Vindhyachal range there is a narrow strip of plain country.

Mountains and hills :

The Kaimurs, the Panna hills, and the Vindhyachal ranges, all belonging to the Vindhya system together with their spurs constitute the principal hills of the district. The Kaimur range enters Maihar tahsil of the district at village Jhukehi on the border of Murwara tahsil, and runs through the entire length of Maihar and Amarpatan tahsils in an easterly direction slightly inclined to the north. At Jhukehi, the strike of the Kaimurs is displaced, producing the only gap in the whole length of the Vindhyas. Advantage of this gap is taken in the construction of the Mirzapur road and the Jabalpur-Allahabad section of Bombay-Calcutta railway line. The Panna hills enter northern portion of

the district from Panna district and traverse the Raghurajnagar tahsil in a west-east direction and enter the Sirmour tahsil of Rewa district. The Vindhyachal range is in the extreme north of the district cutting across in a west-east direction slightly inclined to the north.

Rivers :

Tons, Son, and Paisuni are the important rivers of the district draining it into the Bay of the Bengal through the Ganga. The Kymore and the Panna hills act as water-divides. Most of the rivers flow towards the east, with an inclination towards the north. The Simrawal and the Satna rivers are, however, inclined towards the south.

Tons (or Tamasa) is the main river of the district. It rises in the Kaimur hill in the Maihar tahsil, its nominal source, called Tamasa Kund being a tank on the Kaimur hills, 2,000 feet above the sea-level. From this point it follows a general north-easterly course, traversing the rough hilly country around Maihar, flowing through the level fertile country of the Amarpatan and Raghurajnagar tahsils, and then enters the Rewa district. Satna, an important affluent of the Tons, rises in the Panna hills, flows through the northern, narrower portion of the Nagod tahsil almost in a due west-east direction and bends towards the south from the point where it is joined by Amran river. Thereafter it makes the boundary of the Nagod and Raghurajnagar tahsils till it meets the Tons a few miles to the south-east of Satna town. Simrawal, another important affluent of the Tons, flows south of Kothi in Raghurajnagar tahsil through a level plain till it joins the Tons near Atarhar about a mile or two below the point of its confluence with Asarwal. The latter is a small river, flowing through a ravinous course. Among other, smaller tributaries of the Tons that meet it from the west are Gurser in Maihar tahsil, and the Barua that flows past Unchehra town in Nagod tahsil. Tributaries of Tons meeting it from the south and the east are the Sirainji in Maihar tahsil, the Magardha in Amarpatan tahsil and the Nar and the Kariar in Raghurajnagar tahsil. The last mentioned rivulet marches along the boundary of Raghurajnagar tahsil in the Rewa district till it meets the Tons.

The Son, the great river to the south of the Kymore hills does not actually enter the district but makes the southern boundary of Amarpatan tahsil with Beohari tahsil of Shahdol district. It is joined by the Mahanadi river, which flows along the boundary of Maihar and Beohari tahsils just at the point where the Son takes a turn towards the east between villages Sukwari and Bamaraha.

Forests :—Flora and Fauna* :

Forests in the district are included in the Rewa forest division with headquarters at Rewa. Forests, which are mostly mixed forests cover an area of 900 square miles in the district, extending over four ranges with headquarters at Satna, Majhagawan (both in Raghurajnagar tahsil), Nagod and Maihar. The break-up of the forests according to whether they are protected or reserved forests is given below for each range.

Name of range	Territorial constitution	Reserved forests (in acres)	Protected forests (in acres)	Remarks
1	2	3	4	5
Satna	Amarpatan and adjoining parts of Raghurajnagar tahsil.	51,840	22,400	Mostly spread over Kaimur and Nara hills and to some extent also on the plains.
Majhgawan	Part of Raghurajnagar tahsil (Panna hills)	8,320	137,600	Spread over small hills in the area
Nagod	Nagod tahsil and part of Raghurajnagar tahsil	5,120	197,120	Spread over small hills in the area
Maihar	Maihar Tahsil	nil	153,600	Spread over Kaimur hills and slopes of Panna plateau
	Total	65,280	510,720	

*Based on a note kindly furnished by Shri O. P. Saxena, Divisional Forest Officer, Rewa Division, Rewa.

Teak (*Tectona grandis*) occurs in about 10 square miles of Satna range, 8 square miles of Nagod range and 5 square miles of Maihar range. There is no *sal* (*Shorea robusta*) in any one of the ranges. Bamboo is found in all the ranges. Other trees that occur in the district are *saja* (*Terminalia tomentosa*), *salai* (*Boswellia serrata*), *tendu* (*Diospyros tomentosa*), *Woodfordia floribunda*, *khair* (*Acacia catechu*), *etc.*

Fauna :

Common animals found in the forests are tiger (*Felis tigris*), panther (*Felis pardus*), sambhar (*Rusa unicolor*), chital (*Axis-axis*), wild bear (*Melursus ursinus*), deer, etc.

History* :

History of Satna district is part of the history of the region known as Baghelkhand, a very large portion of which was ruled by the treaty State of Rewa, while a small part towards the west was ruled by feudatory chiefs, holding their States under *sanads* given by the British rulers. There were eleven in all ; important ones being Maihar, Nagod, Kothi, Jaso, Sohawal and Baraundha and the five Chaube Jagirs of Paldeo, Pahra, Taraon, Bhaisundha and Kamta-Rajula.

The early Buddhist books, the Mahabharat etc. connect the Baghelkhand tract with rulers of the Haihaya, Kalchuri or Chedi clan, who are believed to have gained sufficient importance sometime during the third century A.D. Their original habitat is placed on the Narbada with Mahishmati (identified by some with Maheshwar in west Nimar district) as the capital ; from where they seem to have been driven eastwards. They had acquired the fort of Kalinjara (a few miles beyond the border of Satna district, in U.P.), and with this as base, they extended their dominions over Baghelkhand. During the fourth and fifth centuries, the Gupta dynasty of Magadha was paramount over this region as is shown by the records of the feudatory chiefs of Uchchakalpa (Unchehra in Nagod tahsil) and the Parivrajak Rajas of Kho† (in Nagod tahsil). The chief stronghold of the Chedi clan was Kalinjar, and their proudest title was *Kalanjaradhishwara* (Lord of Kalanjar). The Kalchuris received their first blow at the hand of Chandel chief Yasovarmma (925-55), who seized the fort of Kalinjar and the tract surrounding it. The Kalchuris were still a powerful tribe and continued to hold most of their possessions until the 12th century.

The chiefs of Rewah were Baghel Rajputs descended from the *Solanki* clan which ruled over Gujarat from the tenth to the thirteenth century‡. Vyaghra deo, brother of the ruler of Gujarat, is said to have made his way into northern India about the middle of the thirteenth century and obtained the fort of Marpha, 18 miles north-east of Kalinjar. His son Karandeo married a Kalchuri (Haihaya) princess of Mandla and received in dowry the fort of Bandhogarh (now in the tahsil of the same name in Shahdol district), which, until its destruction in 1597 by Akbar was the Baghel Capital.

In 1298, Ulugh Khan, acting under orders of emperor Alauddin drove the last Baghel ruler of Gujarat from his country and this is believed to have caused a considerable migration of the Baghels to Bandhogarh. Until the 15th Century the Baghels of Bandhogarh were engaged in extending their possessions and escaped the attention of the Delhi kings. In 1498-9, Sikandar Lodi failed in his attempt to take the fort of Bandhogarh. The Baghel king Ramchandra (1555-92), was a contemporary of Akbar. Tansen, the great musician, was in the court of Ramchandra and from there he was summoned by Akbar to his court. After the death of Birbhadra, Ramchandra's son, a minor named Vikramaditya acceded to the throne of Bandhogarh. His accession gave rise to disturbances. Akbar intervened and captured and dismantled the Bandhogarh fort in 1597 after a seize of eight months. It is after this that the town of Rewa started gaining in importance. It is said to have been founded by Raja Vikramaditya in 1618 (which perhaps means that he undertook the construction of palaces and other buildings there because the place had already assumed importance in 1554 when it was held by Jalal Khan son of emperor Shershah).

In 1803, after the treaty of Bassein, the British made overtures of alliance to the ruler of Rewa, but the latter rejected them. In 1812, during the time of Raja Jaisingh (1809-35), a body of Pindaris raided Mirzapur from Rewa territory. Upon this Jaisingh was called upon to accede to a treaty, in which he acknowledged the protection of the British Government, and agreed to refer all disputes with neighbouring chiefs to their arbitration and to allow British troops to march through or be cantoned in his territories. At the mutiny of 1857, Maharaja Raghurajsingh helped the British in quelling the uprisings in the neighbouring Mandla and

*Based on accounts given in the Imperial Gazetteers of India.
†Imperial Gazetteer of India, Vol. VI. page 187.
‡Imperial Gazetteer of India, Vol. XXI, Page 281.

Jabalpur districts, and in Nagod which is now a part of Satna district. For this, the King was rewarded by restoration to him of the Sohagpur (Shahdol) and Amarkantak *parganas*, which had been seized by the Marathas in the beginning of the century. The rulers of Rewa State bore the title of 'His Highness' and 'Maharaja' and received a salute of 17 guns. Most of the Raghurajnagar and entire Amarpatan tahsil of the present Satna district were in the Rewa State prior to the formation of Vindhya Pradesh.

Nagod State : Until the 18th century, the State was known as *Unchahara* from the name of its original capital. The chiefs of Nagod were *Parihar Rajputs* belonging traditionally to Mount Abu. In the seventh century, *Parihar Rajputs* drove out the Gaharwar rulers from and established themselves in the country between Mahoba and Mau. In the ninth century, they were repulsed eastwards by the Chandels, where Raja Dharasingh seized the fort of Naro from the Teli Rajas in 1344. In 1478 Raja Bhoja obtained Unchahara, which he made the chief town, and which remained so until 1720, when the capital was moved to Nagod by Raja Chainsingh. Later on the Parihars lost all their territories to the Baghels and Bundelas except the limited territory that they held before 1947.

When the British became paramount after the treaty of Bassein (1820), Nagod was held to be a tributary to Panna and was included in the *sanad* granted to that State in 1807. In 1809, however, a separate *sanad* was granted to Lal Shesrajsingh confirming him in his possessions. In the mutiny of 1857, the chief Raghvendra Singh behaved most loyally in assisting the Britishers and was rewarded by the grant of 11 villages, which had belonged to the confiscated State of Bijeraghogarh. The Nagod chiefs had the title of Raja and received a salute of 9 guns.

Maihar : The chiefs of Maihar claimed descent from the Kachwaha Rajput clan. The family apparently migrated from Alwar in the 17th or 18th century, and obtained land from the Orchha chief. Thakur Bhimsingh later entered the service of Chhatrasal of Panna. His grandson Beni Singh became minister to Raja Hindupat, who granted him the territory that now forms most of the Maihar tahsil in about 1770. Originally it had been a part of Rewa. Beni singh, who was killed in 1788, constructed numerous tanks and buildings. His son Rajdhar was conquered by Ali Bahadur of Banda early in the nineteenth century. Ali Bahadur, however, restored the State to Durjansingh, a younger son of Benisingh. In 1806 and 1814, Durjansingh received sanads from the British Government confirming him in the possession of his lands. On his death in 1826 the State was divided between his two sons, Bishansingh, the elder, succeeding to Maihar, while Pragdas, the younger, obtained Bijai Raghogarh. The latter State (now in Murwara tahsil of Jabalpur district) was confiscated in 1858 owing to the rebellion of the cheif. Rulers of Maihar enjoyed the title of Raja and were entitled to a salute of 9 guns.

Kothi was a small sanad state of about 169 square miles, now included in the Raghurajnagar tahsil. The state was formerly ruled by chiefs of the *Bhar* tribe but Jagat Rai Singh Baghel drove out the original Bhar chief and founded the *jagir*. On the establishment of British supremacy Kothi was held to be subordinate to Panna, because in the eighteenth century when Chhatrarao Bundela was in power in Panna, the Kothi chiefs were his tributary. Thereafter, however, during the domination of Alibahadur of Banda, and afterwards, the Kothi chiefs maintained their independence. In view of this the British granted in 1810 a *sanad* to Rais Lal Duniyapatisingh, making him directly dependent on British Government.

Sohawal :

This also was a small *sanad* State of about 213 square miles, separated into two sections by the Kothi State. Its founder Fatehsingh was one of the two sons of Maharaja Amarsingh of Rewa. He had revolted against his father in the sixteenth century. Originally the State was of considerable extent including Birsinghpur, Kothi and other tracts in the neighbourhood. On the rise of Panna under Chhatrasal, Sohawal became a tributary but retained its independence. Later on, however, Jagatrai and Hirdeshah, sons of Chhatrasal, actually seized much of its territory, while the Kothi chief, taking advantage of these disturbances, threw off his allegiance, and attacked and killed the Sohawal chief, Prithipal Singh. On the establishment of British supremacy in nineteenth century, Sohawal was first held to be subordinate to Panna. But a separate *sanad* was granted to Rais Amansing in 1809 on the ground that, the State had existed before Chhatrasal's rise to power and had remained independent throughout the supremacy of Alibahadur of Banda. The state has been merged in Raghurajnagar tahsil since 1950.

Baraundha (or Pathar-Kachhar) :

This was also a petty *sanad* State of about 218 square miles. Formerly it was much larger, compri-

sing most of the present Banda district of U. P., the family having held the country for at least 400 years. The name Pathar-Kachhar was derived from its position on the skirts of the Vindhyas. The ruling family claimed to be an old one and to belong to the Raghuwansi clan of the solar division of Rajputs. The original seat of the family was in *Rasin* in Banda district, originally called Raja Vasini, where there are many old remains. The early history is, however, very obscure. During Bundela supremacy, the State appears to have been held on a *sanad* from Hirdeshah of Panna. On the accession of British to paramount power, Raja Mohansingh was recognised and confirmed in his territory by a *sanad* granted in 1807. The rulers of the State bore the title of Raja and received a salute of 9 guns.

Chaube Jagirs :

This was a collection of five petty *sanad* states between Baraunda State and Banda district of U. P. The five States were Paldeo, Pahara, Taraon, Bhaisundha and Kamta-Rajauli with an area of about 126 square miles. The holders of these estates were Jijhotia Brahamins and bore the appellation of Chaube. They originally held land at village Dadri near Nowgon cantonment. Their aptitude for military service brought them to notice and they rose to high rank under Raja Chhatrasal of Panna. The owners of the first four estates were descended from Ramkishan who was governor of Kalinjar fort under Raja Hirdeshah of Panna. The *jagirs* are now in Raghurajnagar tahsil.

Rainfall :

Like any other part of the State, Satna district receives its rainfall from the precipitation of the Arabian sea monsoon. June to September are the months when most of the rainfall is received. The downpour, as well as the number of rainy days are maximum in the months of July and August.

Table 1.1 in part II of the Handbook gives the rainfall figures for the last ten years (i.e. 1951 to 1960), for each month of the year for the eight recording stations of the district. These are Satna, Maihar, Baraundha, Sohawal, Nagod, Unchehra, Jaso, and Birsinghpur. The average rainfall recorded at each of these stations for the last ten years [for Baraundha, Sohawal, Unchehra, Jaso and Birsinghpur, the year 1957 has been excluded from calculation of average because in that year rainfall for July and August was not recorded at any of the stations. For these stations, therefore, the average is for nine years i. e. 1951 to 1956 and 1958 to 1960] is : Satna 1141 mm. (44.8″); Maihar 1,094 mm. (43.1″); Baraundha 1,126 mm. (44.3″); Sohawal 1,251 mm. (49.3″); Nagod 1,048 mm. (41.2″); Unchehra 1,115 mm (43.9″); Jaso 1,091 mm. (43.0″) and Birsinghpur 1,013 mm. (40″). The average for the eight stations, which may be termed the average for the district is 1,110 mm. or 43.7″. It may be seen that amount of rainfall received does not show sizeable variation from one station to another and is thus evenly distributed all over the district.

Climate :

The year is more or less clearly divided into three seasons; namely the hot season extending roughly from middle February to middle June; the rainy season from middle June to September and the winter from November to middle February. The month of October witnesses the transition from the rainy to the cold weather.

The following table gives the averages based on the ten years 1951 to 1960 of the mean maximum, maximum, mean minimum and minimum temperatures for each month of the year.

Table—Average mean maximum (A) maximum (B) mean minimum (C) and minimum (D) temperatures for each month of the year.

Month	Average temperature in centigrade			
	A	B	C	D
1	2	3	4	5
January	24.4	29.2	9.3	4.0
February	27.8	33.1	11.3	6.6
March	33.4	38.6	16.6	11.4
April	38.6	42.6	22.2	16.9
May	42.3	45.0	27.2	22.3
June	39.7	41.8	28.4	23.1
July	32.0	37.0	25.2	22.8
August	30.5	33.5	24.5	22.4
September	31.3	33.8	23.9	21.6
October	31.3	33.7	19 5	14.1
November	28.9	31.8	11.8	8.0
December	26.1	29.5	8.8	5.0

January and December appear to be the coldest months of the year. The day temperatures seem to be somewhat lower in January than in December whereas the nights are, on the whole, cooler in December than in January. After January, the averages of the mean maximum, maximum, mean minimum and minimum temperatures go on rising steadily. The average mean maximum and maximum temperatures reach their highest levels in the month of May, while the average mean minimum and minimum temperatures do so in the

month of June. This shows that whereas the days are hotter, on an average, in May, the June nights are hotter than May nights. May and June thus emerge as the hottest months in the year. The average mean maximum and maximum temperatures during the month of May are 42.3°C (108.1°F) and 45°C (113°F) respectively. The average mean minimum and minimum temperatures (which are higher in June than in May) during June are 28.4°C (83°F) and 23.1°C (74°F) respectively.

After May, the average mean maximum and maximum temperatures start falling till the month of August; from May to August the average mean maximum temperature falls by 11.8°C (21°F). After August the fall in mean maximum and maximum temperatures is arrested, there being actually slight increases during September and October. As regards the mean minimum and minimum temperatures, they go on falling steadily after June till the month of January. Thus, we have the peculiar but well known phenomenon of hot days but cooler nights in the months of September and October, particularly the later month This phenomenon is a feature common to many other districts of the State, and is explained from the fact that in the months of the rainy season, the rains have a moderating influence on temperature. After October, which is a transition month for the season, the temperature again starts declining till the mercury touches the minimum levels in the months of December and January, which are the coldest months. The mean maximum temperature in the month of January is 24.4°C (75.9°F), while the mean minimum temperature for December is 8.8°C (47.8°F).

During the ten year period 1951 to 1960, the mercury touched the highest level of 47.8°C (118°F) in June 1954. It also touched the lowest level of 1.7°C (35.1°F) in the month of January in the same year. The year 1954 thus seems to have been one of extremes of temperature in the district.

Distribution of Area and Population.

The distribution of the district's area and population among the tahsils is presented in the inset below:

Table—Percentage distribution of Area and Population.

District/Tahsil	Area	Rank	Population	Rank
1	2	3	4	5
SATNA DISTRICT	100.00	...	100.00	...
Raghurajnagar tahsil	43.5	1	44.3	1
Nagod tashil	24.4	2	19 6	3
Amarpatan tahsil	16.9	3	20.4	2
Maihar tahsil	15.2	4	15.7	4

The distribution of area and population over the tahsils is lop-sided, and this is not likely to be conducive to administrative convenience. More than two-fifth of the area and almost an equal proportion of population of the district is concentrated in Raghurajnagar tahsil, which though having the same name, has hardly anything to do with the old Raghurajnagar tahsil of Rewa State, but consists instead of former Sohawal, Barondha, Kothi States and some of the Chaubiana jagirs. Nagod, the second biggest tahsil contains roughly a fourth of the district's area, but less than a fifth of its population. It ranks third in the district in respect of populousness. Amarpatan and Maihar, in this order, the smallest tahsils in the district together contain a little less than a third of its area, and a little more than third of its population. Amarpatan, which is roughly only two-thirds the size of Nagod tahsil has, however, greater population than that tahsil. Raghurajnagar and Maihar tahsils have identical ranks in area and population. Another noteworthy feature about these two tahsils is that each contains almost an equal proportion of the area and population of the district.

Figures in the preceding table above give only a broad indication of the relative populousness of each tahsil; for a clearer picture, we must consider the population density index i. e. number of persons per square mile in each tahsil. This is done in the table below which also gives changes in population density since 1951. The density figures both for 1961 and 1951 have been calculated from the 1961 area of the district and each tahsil.

Table—Density of poulation, 1961 and 1951

	Population per square mile				
District/Tahsil	1961	rank	1951	rank	%increase
1	2	3	4	5	6
SATNA DISTRICT	242	...	194	...	24.7
Raghurajnagar tahsil	246	3	191	3	28.8
Nagod tahsil	194	4	156	4	24.4
Amarpatan tahsil	294	1	245	1	20.0
Maihar tahsil	251	2	206	2	21.8

Amarpatan, which was the most densely populated tahsil in the erstwhile Vindhya Pradesh State in 1951 remains the most densely populated tahsil in 1961 also. Other tahsils have also maintained their relative population density rankings since 1951. Maihar and Raghurajnagar, respectively second and third in rank, have comparable population density and are nearer the district average than the other two tahsils. The low

population density of Nagod tahsil is possibly a result of its containing extensive forests (35% of the tahsils area) and also comparatively poorer soils.

In the State perspective, Satna district ranks thirteenth in respect of population density. Balaghat (227), Tikamgarh (236), Raipur (247) and Durg (251) districts have comparable (lying within a range of ±5%) population densities with Satna district. The district is about $1\frac{1}{4}$ times as densely populated as the State as a whole (the actual proportion is 1.26). Considering rural areas alone, Satna District with 221 persons per square mile ranks fourth in the State with Bhind (346); Rewa (301) and Bilaspur (240) above it.

Discrepancy in Area figures :

Area figures for the district are given by the Surveyor General, India and the State Directorate of Land Records. The methods employed by these two agencies in surveying and computing the area are different and this results sometimes in considerable discrepancies in the areas given by the two agencies. In case of Satna district, the discrepancy between the two sets of figures comes to 1.5% of the DLR's figures, which, though not large, is still appreciable.

Territorial changes during 1951—61 :

Eight villages, involving an area of 30.1 square miles were transferred from Satna district to Rewa and Panna districts. All these eight villages were in Raghurajnagar tahsil ; six villages, with an area of 27.1 sq. miles, have been transferred to Sirmour tahsil of Rewa district and 2 villages with an area of 3.0 sq. miles have been transferred to Ajaigarh tahsil of Panna district. Details i.e. names etc. of the villages involved in the transfers are given in the annexure to Appendix I to Table A-I of the Handbook.

Variation in Population during sixty years :

The following table gives percentage variations in the population of the District between 1901-61; corresponding figures for the State also are given for comparison.

	Satna District			State		
Year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901-11	+17.4	+17.0	+ 25.8	+15.3	+17.8	— 10.9
1911-21	— 13.1	—13.7	— 1.3	— 1.4	— 2.3	+ 10.9
1921-31	+ 8.3	+ 7.5	+ 21.6	+11.4	+10.5	+ 23.0
1931-41	+15.4	+15.6	+ 12.3	+12.3	+10.5	+ 32.8
1941-51	+ 4.7	— 1.1	+ 99.6	+ 8.7	+ 6.0	+ 33.2
1951-61	+25.2	+27.9	+ 3.4	+24.2	+21.0	+ 47.7
1901-31	+10.4	+ 8.6	+ 50.9	+26.7	+27.2	+ 21.5
1931-61	+51.3	+46.2	+131.8	+51.6	+41.7	+161.2
1901-61	+67.1	+58.7	+249.8	+92.0	+80.1	+217.4

During the sixty years 1901-61, population in the district has grown by 67% as against a growth of 92% in the State as a whole. The latter half of the sixty- year period, i.e. 1931-61, were almost equally favourable to growth of population in the district as well as in the State ; but in the first half i.e. 1901-31, the district grew much less in population than the State as a whole. Prominent features of the variation of population in each decade are set out below :—

(i) The very large decrease in population during the decade 1911-21.

(ii) Slow growth in 1941-51 ; decrease in rural and very high increase in urban population in that decade.

(iii) The very high rate of increase in 1951-61 ; high rural but very low urban growth in 1951-61.

As regards (i), the population of the district fell by 13.1% during the decade comparing with a much smaller decrease of 1.4% in case of the State as a whole. An important cause of reduction in population was the fatal influenza epidemic of 1918-19 ; helped by the scarcity of the same year, the famine of 1919-20 and the plague. Maharaja Sir Venkat Raman of Rewa State died of influenza, and during the interregnum of 10 weeks till the council was formed and regency administration was declared, owing to scarcity and absence of action by the Darbar there was considerable exodus from the various tahsils including Raghurajnagar, which represents the present Amarpatan and part of present Raghurajnagar tahsil.* This exodus was in quest of labour in the neighbouring territories of the then Central Provinces and Uttar Pradesh. The 'Harwaha' system of agricultural labour which virtually amounted to slavery and the prevalence of better agricultural wages in the British India also contributed to emigration. The conditions in the erstwhile Maihar, Nagod and other States that now form part of Satna district could not have been much different.

The 1951 Census report of erstwhile Vindhya Pradesh does not assign any cause for the slow rate of growth of Satna district duriug 1941—51. Perhaps, generally lower levels of fertility owing to depletion of women in the child bearing ages as a result of excessive mortality in 1918-19 is the cause for this slow rate of increase. As regards the high urban increase it is due to the raising of ten villages to the status of towns for the first time in 1951. The small decrease in rural popu-

*Rewa State Census, Report 1921, Vol. III, Page 14.

lation is also explained by this. As regards the high rate of increase during the last decade—which is an all time high, it may be observed that it is a feature shared by the whole State and we have, therefore, to eliminate immigration as a possible important cause. Natural increase in population of a high order owing to higher levels of fertility (the factors that tended to reduce the fertility in 1941–51 were not operative during this decade) and effective arrest of mortality as a result of the various public health programmes seem to be the possible causes of the very high rate of increase in the district as well as in the State as a whole. The very low rate of increase in the urban population is a result of declassification of all but four of the fourteen towns of 1951. This also explains the higher rural increase. It is worthwhile to analyse the 1951—61 rate of increase into its tahsil components.

Table—Population variation by tahsils, 1951–61.

District/Tahsil	Percentage variations		
	T	R	U*
1	2	3	4
SATNA DISTRICT	25.2	22.9	33.7
Raghurajnagar tahsil	29.1	23.6	88.5
Nagod tahsil	24.0	26.7	3.2
Amarpatan tahsil	20.0	20.0	...
Maihar tahsil	21.8	21.0	28.9

It appears from the foregoing table that the rate of increase during 1951–61 is the highest in Raghurajnagar tahsil, mainly owing to the unusual growth of Satna town. The rural rate of increase in this tahsil is correspondingly lower. Nagod, the most sparsely populated tahsil in the district, is the second as regards rate of increase. Considering rural areas alone, this tahsil has experienced the highest rate of increase during the decade. This is, as suggested by linguistic evidence, perhaps due to immigration of Bengali displaced families. The families as per report of tahsildar Nagod settled in villages Medhkadi Usrarn, Paharia, Gonda and Mahtar. Amarpatan, the most densely populated tahsil, has recorded the lowest rate of increase. Thus, if we consider rates of increase in rural areas alone, there seems to be an inverse relationship between it and density of population.

Village and towns :

The table below gives distribution of the population of the district and of each tahsil by residence in rural and urban areas.

Table—Percentage distribution of population by rural-urban—1961 and 1951†

District/Tahsil	1961			1951		
	Total Population	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
SATNA DISTRICT	100	90.9	9.1	100	92.7	7.3
Raghurajnagar tahsil	100	87.6	12.4	100	91.5	8.5
Nagod tahsil	100	90.2	9.8	100	89.9	10.1
Amarpatan tahsil	100	100	...	100	100	...
Maihar tahsil	100	88.9	11.1	100	89.5	10.5
M. P. State	100	85.7	14.3	100	88.9	11.1

With nine out of every ten persons living in rural areas, the district has a greater rural component in its population than the State as a whole. Correspondingly it is comparatively less urbanised than the State as a whole. Raghurajnagar tahsil containing the biggest town Satna has the highest proportion of urban population in the district; while Maihar containing the second biggest town is second in respect of size of its urban proportion also. Amarpatan is an entirely rural tahsil. In 1951, Maihar tahsil had a bigger urban component in its population than Raghurajnagar. The position now stands reversed because of the abnormally high increase in the population of Satna town during 1951-61. In the district as a whole, also the urban proportion has registered a significant increase. In the Nagod tahsil, however, the proportion of urban population has registered a decline since 1951.

In 1951, the district had as many as fourteen towns, all but four of which have lost that status in 1961

*Towns as per 1961 classification both for 1961 and 1951.

†Towns as per 1961 classification have been taken for calculating the 1951 proportions.

owing to the new definition of a town. The following statement gives the names of 1951 towns with their 1951 populations.

Name of town	1951 population
Satna	20,183
Unchehara	6,371
Nagod	4,712
Maihar	9,397
Madhogarh	3 282
Amarpatan	3,124
Rampur-Baghelan	2,149
Ramnagar	2,125
Sohawal	2,019
Deorajnagar	1,919
Jhukehi	1,736
Jaitwara	1,678
Jaso	1,593
Amdara	1,077

Villages :

Satna district has 2,116 villages, of which only 1,753 are inhabited. It contains 2.5% of all the inhabited villages of the State and 2.3% of its rural population. The district has 363 uninhabited villages, which come to 17.2% of all villages in the district. The proportions of uninhabited to all villages for individual tahsils are: Raghurajnagar tahsil 17.9%, Nagod 16.0%, Amarpatan 19.4% and Maihar 12.6%. For the State as a whole, the proportion of uninhabited villages is only 8.4%, so that such villages are more than twice as numerous in the district. Of every 100 inhabited villages in the district Raghurajnagar tahsil contains 42.4%, Nagod 23.9%, Amarpatan 21.1% and Maihar 12.6%. The distribution is clearly uneven.

Distribution of villages by population size :

Table inset below gives (i) distribution of 100 villages in the district and in each tahsil by population-size of the village (ii) of 100 persons in district and each tahsil living in villages of these sizes.

Table—Distribution of 100 villages and 100 persons in the District and each tahsil

	Population size											
	All villages		Villages with less then 200		Villages with 200-499 persons		Population 500-999		Population 1000-1999		Population 2000 & abovc	
District/tahsil	No.	Pop.	No.	Pop.	No.	Pop.	No.	Pop.	No.	Pop.	No.	Pop.
1	2	3	4	5	6	7	8	9	10	11	12	13
SATNA DISTRICT	100	100	45.6	11.8	32.1	29.4	15.9	30.4	4.9	17.8	1.5	10.6
Raghurajnagar tahsil	100	100	48.7	13.0	29.1	26.3	15 5	29.8	5.0	18.2	1.7	12.7
Nagod tahsil	100	100	53.9	16.3	31.3	34.8	10.0	23.8	3.8	17.7	1.0	7.4
Amarpatan tahsil	100	100	38.9	8.8	37.3	32.5	17.3	30.2	4.9	16.6	1.6	11.9
Maihar tahsil	100	100	30.8	7.0	35.3	26.7	26.2	40.6	6.3	18.8	1.4	6.9
M. P. State	100	100	37.2	10.0	38.1	31.8	18.2	31 6	5.4	18.2	1.1	8.4

For the sake of convenience, in the discussion that follows it is proposed to call villages with less than '200' population 'very small villages'; with population more than 200 but less than 500, 'small villages'; those with 500 to 999 inhabitants, 'medium-sized villages'; those with population 1000-1999 'big villages'; and villages with a population of more than 2000 'very big villages'.

Satna is predominantly a district of 'very small' and 'small' villages. More than two-fifths (45.6%) of the villages in the district belong to the category 'very small' villages, comparing with a much smaller proportion of 37.2% in the State as a whole. 'Small' villages, next in numerousness, account for a little less than a third of all the villages in the district comparing with a higher proportion 38% of such villages in the State as a whole. The two classes together i.e. —'very small' and 'small' villages account for almost four-fifths (78%) of all the villages, comparing with a corresponding proportion (75%) for the State as a whole. Medium-sized villages account for between one-sixth and one-seventh of all villages ; cumulatively, villages with a population below 1000 include all but six out of every hundred villages in the district.

'Big' and 'very big' villages together account for only 6.4% of all the villages ; the proportion for the State as a whole of these villages is 6.5%.

Among the tahsils, Nagod contains the maximum frequency (54%) of very small villages, with Raghurajnagar (49%) in close pursuit. Amarpatan (39%) and Maihar (31%) have smaller proportions of 'very small villages'. Considering 'very small' and 'small' villages

together, again Nagod has the maximum proportion (85%), and Maihar the least (66%). Raghurajnagar (78%) and Amarpatan (76%) have nearly equal proportion of these villages. The proportion of these villages in the State as a whole is 75%, which is slightly less than that for the District (78%).

Medium-sized villages with populations varying from 500 to 1000 add to roughly one in six of all villages in the district. Maximum proportion of these villages is in Maihar tahsil where they number more than one in four; while Nagod has the minimum frequency of one in ten of these villages. Amarpatan and Raghurajnagar tahsils are nearer the District average in respect of these villages. Bigger villages with more than 1,000 population each are slightly more frequent in Maihar and Raghurajnagar tahsils.

Distribution of population over villages of various population-sizes in the district follows more or less the same pattern as in the case of the State as a whole. 'Very small' villages constituting 46% of all the villages in the district account for only 12% of the population; while 32% of the small villages contain 29% of the population. The two classes of villages together accounting for 78% of all villages contain 41% of the district's population. Thus roughly three-fifth (59%) of the district's population lives in 22% of the medium-sized and bigger villages. The same proportion, nearly lives in 48% of the 'small' and medium-sized' villages. Individually, 16% of the medium-sized villages contain the maximum proportion (30%) of the population. In a nutshell, out of every ten rural inhabitants in the District four live in 'very small' and 'small' villages, three in medium-sized villages and three in big and very big villages. The tendency thus is for a large number of people to live in a small number of big and medium-sized villages and for a small number to be dispersed in a very large number of small and very small villages.

Coming to distribution of rural population in tahsils, a few facts deserve particular notice. Maihar and Amarpatan tahsils have the smallest proportion of their rural populations in 'very small' villages. Preference for these tiny villages is clearly greater in Nagod and Raghurajnagar tahsils. In Maihar tahsil population shows a pronounced preference for medium-sized villages with more than two-fifths of its rural population residing in them. Thus as between the tahsils, the tendency for more people to live in a smaller number of medium-sized and bigger villages is more pronounced in Maihar tahsil, while the reverse tendency *i. e.* for more people to live in a very large number of smaller villages is more pronounced in Nagod tahsil.

Average population of a village.

A study of rural population by residence in villages of different degrees of populousness is not complete without a mention of the average size to which villages in each size-group tend to converge. Given below, therefore, is a table which gives, separately for the district and for each tahsil, average size of a village in each size-group of villages.

Table

District/Tahsil	Average population of a village in villages with population					
	All villages	Less than 200	200–499	500–999	1,000—1,999	2,000-4,999
1	2	3	4	5	6	7
SATNA DISTRICT	360	93	330	687	1,322	2,574
Raghurajnagar Tahsil	362	97	328	697	1,322	2,634
Nagod Tahsil	293	89	325	696	1,353	2,273
Amarpatan Tahsil	384	87	335	671	1,307	2,807
Maihar Tahsil	439	99	332	678	1,304	2,245
M. P. State	394	106	329	685	1,323	2,880

Average size of a village in the district is somewhat smaller than that in the State as a whole. The difference between the district and State averages is conspicuous in the bottom and the top size-groups, but the three middle ranges show surprisingly closer agreement.

As may well be anticipated by now the least populous village on an average is in Nagod tahsil, the average being pulled down by the very large number of smaller villages in that tahsil. Maihar tahsil at the other extreme has the most populous villages on an

average. Another fact deserving notice is the surprising closeness in the average population of a village in size-range 1000-1999 in the District, tahsils and the State.

Census houses and households.

Satna district had 190,257 census houses at the time of house-listing, an operation which preceded the census count proper by about five months. Of these 5.0% were vacant (i. e. one out of every twenty house was found vacant), 68% were entirely dwellings, 0.9% were shop-cum-dwellings and 4.4% were workshop-cum-dwellings. The remaining census houses, which added upto roughly one-fifth (21.7%) of all census-houses were being used exclusively for non-residential purposes.

At enumeration, the district had 147,088 households living in 137,450 census houses giving 1.07 households per residential census house. Roughly two-fifths (43.5%) of the households lived in census-houses having only one living room, giving, on an average, 3.5 persons per room. A little more than one-fourth but below three-tenths (27.4%) of the households lived in census houses with two rooms each, having on an average 2.4 persons per room. Yet another 14.5% of the households had three rooms each, giving 1.8 persons per room, on an average. About an equal proportion (14.6%) of households were more fortunate, and had four or more rooms each. These figures indicate the degree of living congestion in census houses as measured by number of persons living in each room. Requirements of a room for census were very modest *viz.* a part of a house with four walls and an exit door and space enough for one man to sleep.

Nine-tenths (91.4%) of the households in rural areas and a little more than half (53.3%) in urban areas live in census houses with walls made of mud. Next in frequency in rural areas were houses with walls of unburnt bricks; these accommodated 2.6% of the rural households. About an equal proportion (2.5%) of rural households lived in census houses with stone-walls, while 1.8% lived in houses with walls made of timber. Only 0.6% (i. e. 6 per 1,000) of the households in rural areas lived in houses with walls of burnt bricks. In urban areas, more than one-fourth (27%) of the households lived in census-houses with walls made of burnt bricks, 13.6% in houses with walls of unburnt bricks and 4.2% in houses with walls of stone.

As regards roofs, they are commonly covered with tiles in rural as well as urban areas. About 96% of the households in rural and 70% in urban areas lived in houses which had tiled roofs. Next common in rural areas were roofs covered with grass, leaves, or thatch, accounting for 3% of the households. In urban areas, however, roofs with cement concrete or stone-slabs were next in popularity, houses with this type of roofing accounting for the residence of 15.6% of the households. About one-twelfth (8.5%) of urban households lived in census-houses covered with asbestos cement sheets. Thus about one-fourth (24.1%) of the households in urban areas lived in houses with roofs covered by cement-concrete or stone-slabs or asbestos sheets. This somewhat higher frequency is suggestive of the influence of geographical and other factors on dwelling houses.

Roughly nine-tenths (91.7%) of the households live in their own houses, and 8.3% in rented houses. In urban areas, however, roughly half (47.9%) of the households live in rented houses, a fact emphasizing the importance of the migrant element in the constitution of urban population.

Sex-ratio :

Sex-ratio is an index number employed to measure the difference in numbers between the two sexes, because quite contrary to general expectations that males and females exist (or should exist) in equal numbers in the population, the numbers of the two sexes vary not only over time, but also from region to region, and even from ethnic group to ethnic group. There may be many more factors, demographic, social or economic that may be affecting the proportion of the two sexes in the population. In Madhya Pradesh, the number of females per 1,000 males is as low as 839 in the northern Morena district, and is as high as 1,037 in Raipur district on the eastern border of the State. In Satna district, sex-ratio, or what is the same thing, number of females per 1,000 males was 965. It varied appreciably among the tahsils. The lowest value, 939, was in Raghurajnagar tahsil. The highest value for the ratio 1,015 was in Amarpatan tahsil. The sex-ratio was 961 and 981 respectively in Nagod and Maihar tahsils.

In general, in urban areas, sex-ratio is disadvantageous to the fair sex, and goes on decreasing with increasing urban population. On the other hand, unless it is otherwise for historic or other reasons, the sex-ratio tends towards equality of the sexes in rural areas. For the rural areas of the district thus, we find the sex-ratio to be 979, comparing with 965 for all areas of the district, which has a greater feminine deficiency. In urban areas of the district, sex-ratio has the very

low value of 836. Urban sex-ratio is lowest in Raghurajnagar tahsil i. e. 789; which has the highest proportion (12.4%) of urban population. In Nagod and Maihar tahsils, urban sex-ratio has respectively the values 915 and 905. The high female deficiency in urban areas is not difficult to understand. It arises mainly from migration of people who go there in search of employment. This migration is, to begin with, only of men, and generally, there is considerable time-lag before the women go and settle with the men migrants. Hence as long as a town continues to grow, its sex-ratio has a tendency to decline. This observation is borne out in Satna district from the fact that sex-ratio has the highest disparity in Satna town, which has recorded the maximum percentage increase of 88.5% in all the towns of the district. In 1951, its sex-ratio was 892 whereas it is 789 in 1961. In Nagod and Maihar tahsils the sex-ratio had the values 921 and 967 respectively, and thus whereas there has been a drop in the sex-ratio of urban Maihar tahsil, that in Nagod tahsil has actually shown a little increase, which is as it should be, because during the last ten years urban population has grown faster in Maihar than in Nagod tahsil.

It is interesting to examine how sex-ratio in the district has changed over time during the past six decades. The following table gives the values of sex-ratio in the district for the past six censuses :

Sex-ratio, 1901-1961

	Sex ratio in					
	Satna district			State		
Year	T	R	U	T	R	U
1	2	3	4	5	6	7
1901	1,041	1,043	996	990	995	937
1911	1,034	1,037	981	986	991	913
1921	1,016	1,019	956	974	982	878
1931	1,006	1,012	925	973	983	872
1941	986	989	946	970	980	882
1951	976	981	937	967	975	907
1961	965	979	836	953	970	856

The table at once brings home one important fact that the number of females relative to males has been steadily falling over time since 1901, both in the State and the district. Since the fall is a characteristic common to the State as a whole, it is not possible to ascribe it simply to migrational factors.

The district started with a female excess of 41 at the beginning of the century. The State as a whole, even then had a deficiency of females, which continued to grow from decade to decade. The decline in sex-ratio in the district was somewhat steeper in the 1911-21 and 1931-41 decades. In the case of the State as a whole, the decline in sex-ratio was very gradual from 1921 to 1951, the total decline during the thirty years being only 7. In the district, the sex-ratio registered a fall of 40 during the same period. During the sixty years 1901-61, while the sex-ratio in the district has fallen by 76, that in the State as a whole has fallen by less than half of that number. The result is that in 1961, the State and the district sex-ratios are nearer each other than they were in 1901.

Sex-ratio by age :

The following table is an attempt at analysing the sex-imbalance by age; it gives sex-ratio in the childhood ages 0-14 by quinquennial ages, and thereafter by broad age-groups. In childhood, the age is within the comparatively more recent memory of the members of the household and is likely to be returned with reasonable accuracy, whereas in ages beyond 14, in view of the faulty nature of the age- returns, sex-ratio by even quinquennial ages will not have much sense.

Sex-ratio by age-groups 1961

Age-group	Sex-ratio
0— 4	1,000 (999.6)
5— 9	967
10—14	846
0—14	947
15—34	963
35—59	969
60+	1,129

It appears that in the very early ages, boys and girls are almost in equal numbers. The number of girls compared with that of boys falls steadily in the age-groups 5-9 and 10-14. In the last mentioned age-group, it has the low value of 846. The evidence before us, thus points to reduction in number of girls after the first five years, owing perhaps to greater mortality in their case. The female infant is regarded as better equipped by nature for survival than the male, but this natural advantage is neutralised by the comparatively greater neglect to which she is subjected in the childhood years.

In the composite age-group representing children (0-14) and in the youthful age-group, sex-ratio has almost the same value, i. e. females are equally deficient in both the age-intervals. In middle-ages, however, there is a shift towards equality of the two sexes. This seems to indicate that in the middle-ages, the mortality is greater in males than in females, perhaps, because, in these ages, the females represent that comparatively sturdier section of their sex who have withstood the onslaught of the first few childbirths. The trend towards an increasing sex-ratio continues and in the upper extremes of ages, i. e. ages beyond 60, it exhibits considerable imbalance advantageous to the female sex. This fact is supported from the marital status data also, where, as will be seen, widows are far more numerous in the oldest ages than widowers. This comparative paucity of males than females in the higher middle and old age is a result of two factors. First, the male who has to bear the burden of maintaining a family and the attendant stresses and strains is sapped of much of his vitality as age advances and is the easier to be eliminated. On the other hand, as observed above, the females who survive to ages beyond sixty have well earned their title to longer age by surviving the risks of early and improvident maternity.

Age and sex :

The age and sex structure of the population of the district is given in the following table; for comparison, corresponding data for the State are also given.

Table—Distribution of 100 persons by age-groups and by sex

	Satna District			State		
Age-group	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
0— 4	16.4	8.2	8.2	16.4	8.2	8.2
5— 9	13.6	6.9	6.7	14.3	7.3	7 0
10—14	10.5	5.7	4.8	10.1	5.4	4.7
0—14	*40.5*	*20.8*	*19.7*	*40.8*	*20.9*	*19.9*
15—19	8.5	4.5	4.0	7.9	4.1	3.8
20—24	9.0	4.4	4.6	8.6	4.2	4.4
25—29	8.9	4.6	4.3	8.8	4.5	4.3

45—49	4.3	2.2	2.1	4.2	2.2	2.0
50—54	4.1	2.1	2.0	4.0	2.1	1.9
55—59	1 9	1.0	0.9	2.1	1.1	1.0
35—59	*21.4*	*10.9*	*10.5*	*21.4*	*11.2*	*10.2*
60—64	2.3	1.1	1.2	2.4	1.2	1.2
65—69	0.8	0.4	0.4	0.9	0.4	0.5
70+	1.4	0.6	0.8	1.8	0.8	1 0
60+	*4.5*	*2.1*	*2.4*	*5.1*	*2.4*	*2.7*
A. N. S.	Neg.	Neg.	Neg.	0.1	Neg.	Neg.

The age-data presented in this table are based on ungraduated ages—i. e. ages that were actually returned at enumeration without subjecting them to any smoothening process. The quinquennial (upto 70 year of age) age-groupings adopted above do suppress to some extent the distorting effects of age-heapings at multiples of 5, and at ages ending in even rather than odd digits, even then the effects of digit-preference are not entirely absent. Thus the table shows greater number of persons in age-groups 20-24 and 25-29 than in '15-19'; and in ages '60-64' than in '55-59'. It is improbable that these proportions represent the correct state of affairs. In the normal age distribution (i. e. where migrationary effects do not change the shape of age-curve materially), the age-distribution starts with a maximum at the lowest age-group, and goes on steadily decreasing. In the case before us, the excess in age-groups 20-24 and 25-29, and 60-64 appear to be the result of the preference for ages 20, 25 and 60.* In analysing the above data, therefore, it would be safer

* For a detailed discussion of digital preference patterns in age returns, the reader is referred to the Chapter on age and sex in the main report.

to restrict ourselves to the broader age-groups 0-14, 15-34, 35-59 and 60+, in which effects of age-preferences mutually cancel out to a considerable extent. It is convenient to speak of the age-groups 0-14, 15-34, 35-59 and 60+ as corresponding to children, young persons, middle-aged persons and old persons.

The age-distribution for broad age-groups discloses a remarkably close similarity between the district and the State as a whole. The maximum proportion—roughly 2 in 5—is naturally found in the age-group 0-14. Young persons between 15 and 34 years of age form about a third of the total population of the district, while the middle-aged segment is a little more than a fifth of the total population. The proportion of older persons, more than 60 years of age, is less than even one in 20. The youthful character of the population is evident from the fact that roughly three-fourths of it are below 35 years of age, while more than four-fifths are below 45 years.

Changes in age-pattern since 1951 :

Changes in the age-composition of a population over time, if estimated satisfactorily, are of immense demographic significance. The following table, therefore, gives the proportion of persons in the broad age-groups for 1951 and 1961 censuses. In appreciating the 1951 data, it has to be remembered that it is based on a 10% sample of population as in that census and in comparing it with figures derived from the data of 1961 (which is based on total count) we are tacitly assuming that the sample represents the universe. This assumption is justified because the 1951 sample was random and large.

100 persons by broad age-groups in 1951 and 1961

Age group	Proportion of population in it	
	1951	1961
1	2	3
All ages	100.00	100·00
0—14	38.4	40.5
15—34	33.2	33.6
35—59	24.2	21.4
60+	3.6	4.5
A. N: S.	0.6	Neg.

The table shows that proportion of children and juveniles below fifteen years of age has registered a significant increase of 2.1 points since 1951. This is quite in keeping with the observed high rate of increase in population experienced by the district during the decade. For, ruling out immigration as a factor in the high rate of increase (because of the generally high rates of growth in the neighbouring districts), the increase is mostly a result of addition of children in the age-group 0—9 to the survivals of 1951 population of the district. The figures thus testify to the high fertility levels, and an effective reduction in infant mortality during the decade. To a great extent, the reduction in death-rate is a result of the greater availability of medical help, but to some extent, it also indicates the improvement in the levels of prosperity of the population as compared with those of 1951.

The segment of youth has also recorded a small increase since 1951, which becomes significant when seen in conjunction with the general broadening of the population base. On the other hand, there is a sizeable reduction in the proportion of persons in middle-ages. No doubt, to some extent this may be due to the effects of age-misreporting, but by and large, this large decrease in the proportion of middle age shows that death rate in that segment of age has not been checked. On the other hand, it might have registered a small increase perhaps because of persons in these ages being subjected to the constant strain of bread winning, which as is well known, is increasing day by day.

The proportion of persons in the old age also has registered an increase since 1951, showing the improvement in the chances of survival of persons in older ages.

Marital status :

Marital status returns of the population by age have very great demographic and sociological significance. For one thing, barring a negligible number of cases of of extra-marital births, population grows entirely on account of births to married females. "The age-group 15–20 is most fertile ; the next age-group is also fertile though less than the previous one, but once women are past that age, their reproductive power decreases rapidly until it exhausts itself generally at the age of 45*". Hence the proportion of females in the earlier reproductive period has a direct bearing on the growth of population. In other words, population growth shall be kept in check by excluding as large a proportion as possible of females in the age 15–20 from getting married. Late marriages among males also tend to check the birth-rate. Then there is the social problem of widows, related on the one hand with the considerable disparity in the ages of husband

* 'India's Population Problem', by Dr. C. B. Mamoria, p. 150.

and wife, and on the other with child and early marriages. All these demographic aspects of the population are presented in the following table on marital status by age. In appreciating the data in this table, the remarks made earlier in connection with the age-data may be kept in mind.

100 males and 100 females in the district classified by age and marital status, 1961.

Age-group	Total population		Never married		Married		Widowed		Divorced or Separated		Unspecified

The table discloses that in the population as a whole, 54.4% among males and 64.0% among females, are either married with their spouses living or are leading a widowed existence, or have been divorced or otherwise separated from their spouses. Even at a cursory glance, the figures speak to the prevalence on a wide (even alarming in case of females) scale of child and early marriages. Children below 15 years constitute roughly two-fifths of the population, so that in case of the girls at any rate, about four percent of all marriages relate to girls who are below 15 years of age.

49.4% of the males and 52.3% of the females are returned as married with their spouses living. The lower proportion of married women in the population points to emigration (immigration of married females can, without much difficulty be ruled out) of married males from the district ; though to some extent it may also be due to the relative paucity of females in the population as a whole. 11.5% or more than 1 in 10 of the females are widows. The incidence of widowhood is about $2\frac{1}{2}$ times as great in females as in males, mainly because of the wide disparity in the ages at marriage of husband and wife, and also owing to death-rate increasing progressively with age. The proportion of divorced persons, or persons otherwise separated from their spouses is of negligible dimensions in the population.

Child marriage :

No person has been returned as married in the youngest age-group 0–9, thus indicating that infant or child marriages do not take place in the district. This is not, strictly speaking, correct. No tabulation by marital status was done in the age-group 0–9, but all persons belonging to it were tabulated as never-married under the usually valid assumption that no marriages took place in these tender ages. Whereas generally, this assumption was justified, and did not introduce any statistical distortion in the marital status data, it seems from the high proportions of married persons in the ages 10–14, that in Satna district, in any case, this

instruction has led to the suppression of some statistically significant information. Three-tenths of the males and more than half of the females in the age-group 10–14 are returned as having entered matrimony. In the wider age-group 0–14 of children below 15 years of age, 8% males and 13% girls are returned as married as against 21% males and 32% females returned married in 1951. The proportions do not necessarily signify reduction in the extent of child marriages ; but perhaps indicate the magnitude of error owing to the tabulations instruction referred to earlier. In the next higher quinquennial age-group 15–19, more than three-fifths of males, and nine-tenths of females find themselves married. Hardly one out of every thirty-seven girls finds herself out of matrimony in the age-group 20–24, but even in this age-group roughly one-fifth of the boys manage to remain out of the wedlock. It may be observed, however, that the proportion of never-married males never assumes very low dimensions. In the wider age-group representing middle-age, as many as 7% males are never married, while as many as 6% are never-married in the oldest age-group 60+. This rather high incidence of celibacy in the marrigeable males is unusual, and is not apparently explained by the readily available material. To sum up, the statistical evidence before us shows that in Satna district both boys and girls start getting married between ten to fourteen years of age, the frequency being much higher in case of girls. Most of the girls and majority of the boys are married in the next higher age-group 15–19. Most of the boys and almost all the girls get married before they have attained 24 years of age. *Inter alia*, the figures also point to a large number of marriages having been performed in contravention of the law which prohibits marriages of girls below fourteen, and boys below eighteen years of age.

Seen in the context of the recent population explosion against the background of an ever worsening economy, however, one should regard all marriages of girls below 20 and of boys below 25 years of age as early and accordingly should discourage them. From this point of view, the evidence before us shows that early marriages are a rule both in case of boys and girls, though in case of the former a sizeable proportion manages to remain unmarried even after 25 years.

The proportion of widowed persons is within reasonable limits till 30 years of age. But after that age the incidence of widowhood starts rising both in case of males and females, of course, much more sharply in case of the latter. In ages beyond 50 almost half of the females and between one-sixth to one-fourth of the males are leading widowed existences. In the survivors beyond sixty, the incidence of widowhood is more than seven-tenths in case of females, and three-tenths in case of males. The figures reinforce the observation made earlier as to the greater longevity of the females owing partly to their being representatives of the sturdier section of the sex that has withstood the onslaughts of improvident and early maternity and partly to the males getting sapped of vitality with the tension of breadwinning.

Education and literacy :

With only 15.6% of the population returned as literate and educated, Satna district is below the State literacy rate of 17.1% and much below the national average of 24% literate and educated. In the State, Satna ranks 22nd among the districts in descending order of literacy percentage, and is thus the medium district in the sense that it has as many districts above it in literacy ranking as it has below it. It has, however, the highest percentage of literate and educated among districts of the Rewa division, which has an average literacy percentage of 11.8 only. Proportion of rural literates in the district is 13.6%, comparing with 12.7% for the State as a whole. Satna is thus above the State average in rural literacy. With only 38.9% literate and educated in the urban population, however, the district is much behind the State literacy percentage of 43.5 for urban areas. Among males proportion of literate and educated is as high as 26.3%, comparing with 27.0% in case of State as a whole and 20.0% in case of the Rewa division. Among women, however, proportion of literate and educated in the district has the low value of 4.5%, comparing with 6.7% for the State as a whole, and 3.1% for Rewa division. Satna is thus the leading district in Rewa division also as regards literacy among males and females separately.

The table inset below gives the percentages of literacy by tahsils.

Percentage of literate and educated in total, rural and urban areas of each tahsil.

	Percentage of literates				
	Total			Persons	
Name of tahsil	P	M	F	Rural	Urban
1	2	3	4	5	6
Raghurajnagar tahsil	17.4	28.4	5.8	13.8	43.1
Nagod tahsil	15.4	26.1	4.3	13.6	32.2
Amarpatan tahsil	13.3	23.8	2.8	13.3	...
Maihar tahsil	13.6	23.6	3.4	11.2	32.8

It is thus seen that only Raghurajnagar tahsil is above the district average in literacy and education. The proportion of literate and educated is the lowest in the Amarpatan, and next lowest in Maihar tahsils. In rural literacy ranking Maihar is the last in the tahsil, while in female literacy the last position goes to the entirely rural Amarpatan. We may, thus, conclude that Maihar and Amarpatan tahsils are comparatively backward educationally, particularly as regards education of women ; and it is the pull of these two tahsils that accounts for the low literacy percentage of the district in the State context. Another reason for the low literacy percentage of the district is the fact that a little more than one-fourth of the district's population consists of scheduled castes and scheduled tribes, among whom literacy rates are shockingly low. Thus, among scheduled castes who contribute 12.6% to the population, only 3% are literate and educated (among females, literacy is only 1.3%), while among scheduled tribes forming 14.6% of the population, the position is still bad, with only 2.1% among them having some claims to education (in scheduled tribes females, the proportion has the ludicrously low value of 0.4%). One reason for the comparative backwardness of Maihar and Amarpatan tahsils seems to be the fact that they contain higher proportions of scheduled tribes among their population.

Of the educated and literate persons in the district, as many as seven-tenth (70.6%) are merely literates without any educational levels. These include persons who might have read for a few years in a school, but who could not pass the primary school examination. Between one-fifth and one-fourth (23.7%) of all literate and educated have the 'primary or junior basic' educational level, corresponding State proportion being 21.9%. These are persons who have passed the primary or junior basic level examination including those who may have read in higher classes but who have not passed the matriculation examination. Roughly 1 in every 18 (5.7%) among the literate and educated persons has been returned with matriculation or higher educational qualifications. For the State as a whole persons with matriculation or higher educational levels constitute 6.2% of all literate and educated persons in the State. We may thus note that whereas the district is below the State average in *total* literacy, it compares well with it as regards educational levels.

Progress since 1951, Educational institutions, Proportion of children in schools :

1961 literacy percentage in the district, though low in comparison to many other districts, is yet high when compared with the poor literacy percentage (9.95) of 1951. Thus during 1951-61 proportion of literate and educated in the population has risen by 57%. This improvement is the result of the establishment of educational institutions. In December 1960, thus, there were 679 primary schools in the district—268 in Raghurajnagar tahsil, 120 in Maihar tahsil, 159 in Amarpatan tahsil and 132 in Nagod tahsil. On an average in December 1960, there was one school for every 2.6 inhabited villages. Each primary school served an area of 4.2 square miles. The attendence in the primary schools however is not very encouraging. As against 92,075 children in the primary school going ages 6-10, only 30,716 attended primary schools. In other words, only 33% of the children in the school-going ages attended schools When seen in the context of our declared objective of universal literacy, these figures disclose a very distressing state of affairs and indicate the magnitude of the ground that yet remains to be covered.

Religion :

97.5% of the population professes Hindu religion. Muslims are next in numerical strength, though their proportion is only 2.3%. Jains, Sikhs, Christians and Buddhists comprise the remaining about 0.2% of the population. Persons belonging to religions other than Hindu are mostly concentrated in the urban areas. In the urban areas, Hindus form only 86% of the population, Muslims form 12%, while Jains, Sikhs and Christians form the remaining 2%.

Hindus have lost in relative strength since 1951 by about 0.4% ; while during the same period the Muslims have improved their proportion by about 0.3%. Other religions also have improved their relative strengths since 1951.

Mother tongues :

In all, forty-one languages were returned as mother-tongues from the district. Almost 94% of the population has returned Hindi as mother tongue, which together with Bagheli or Baghelkhandi (the language which has given its name to the region east of river Ken) accounts for more than 9[illegible]% of the speakers. Thus speakers of the 39 other mother tongues contribute only 2% speakers to the population of the district. Of these, numerically more significant languages to-

gether with the number of their speakers—given within brackets against each—are Sindhi (5,856) ; Punjabi (1,496); Urdu (1,225) ; Bengali (1,799) ; Gujarati (452); Marathi (451) and Bundelkhandi (386). Other languages have each less than hundred speakers. With the exception of Bengali, speakers of which are concentrated mainly in the rural areas of Nagod tahsil, speakers of most of the numerically significant mother tongues other than Hindi and Baghelkhandi are concentrated in urban areas. Another significant feature is the absence of a tribal tongue claiming more than hundred speakers, which shows that the tribals have been linguistically integrated with the rest of the population in the district. As compared to 1951 data, it is found that Bengali, Punjabi, Gujarati and Marathi speeches have registered significant increases as shown by the following statement :—

Language	Speakers in 1951	Speakers in 1961
1	2	3
Bengali	240	1,799
Punjabi	341	1,496
Gujarati	130	452
Marathi	75	451

The reason for these abnormally high increases is almost certainly recent immigration. As against these, the Sindhi speech, which had 6,035 speakers in 1951 has reduced its speakership to 5,856 in 1961, suggesting some emigration in their case.

The Hindi returned as mother tongue by 94% of the population is in fact its dialect *Bagheli*.

Scheduled Castes :

Scheduled castes constitute 12.1% of the population in the district. The percentage is somewhat less than the State percentage of 13.1%, or the divisional percentage 13.3. Of the fifteen castes or synonymous caste-groups scheduled in the district, only thirteen have been returned and these are concentrated in rural areas to the extent of 91.5% of the total scheduled castes population. Among tahsils, the scheduled castes are more numerous in Raghurajnagar and Nagod tahsils, forming 14 1% of the general population of each of these tahsils. The proportion of scheduled castes is the lowest (9.1%) in Amarpatan tahsil, while the southernmost Maihar has 11.3% of its population in scheduled castes. It is interesting that both these tahsils show a heavier concentration of scheduled tribes in them. The distribution of the total scheduled castes population of the district among tahsils is : Raghurajnagar (49.4%), Nagod (21.9%), Amarpatan (14.7%) and Maihar (14.0%).

Of the thirteen scheduled castes returned from the district, only four, namely Basor or Bansphor, Chamar and synonymous castes, Domar or Doris, and Kumhar are numerically significant. Chamar caste alone forms 80.3% of the scheduled castes population of the district; Kumhar, the next in numerousness account for 11.6%, while Basor and Domar or Doris constitute respectively 4.0% and 1.6% of the total scheduled castes population. The remaining nine castes or synonymous caste-groups thus form only 2.5% of the total scheduled castes population. They are, together with their population, Beldar or Sunkar (623); Dharkar, Balmik or Lalbegi (47); Dom (67) ; Kuchbandhia (41) ; Mehtar, Bhangi or Dhanuk (817) ; Moghia (1) ; Mushkan (96) ; Pasi (92) ; Sansia or Bedia (162). Dher and Ghasia castes, though scheduled, have not been returned.

The progress of education in the scheduled castes is still depressing. Percentage of literacy is 3.0%, as compared to 15.6% for general population. The percentage is higher (9.2) for urban areas (comparing with 38.9% for urban general population) and lower (2.4%) for rural areas. Female literacy is 1.3% which is much better than that of Rewa district where it is only 0.3%. Percentage of persons who are educated upto primary or junior basic level, or possess higher qualifications is only 0.9% of all educated and literate persons ; for females alone, the proportion is 1.1. Only 11 males have been returned as matriculates.

Participation rate is 60.4%, which is distinctly higher than the rate (51.8%) for the general population in the district. The rate is pulled up by the higher participation (57.1%) by scheduled caste women as against 42.9% for women in general population. Working classification of scheduled castes is presented in the following inset.

Distribution of 100 workers in scheduled castes by the nine categories of workers

Caste	Workers								
	I	II	III	IV	V	VI	VII	VIII	XI
1	2	3	4	5	6	7	8	9	10
All scheduled castes	24.8	49.9	2.4	12.2	1.9	0.9	0.4	0.9	6 6
Basor	3.6	4.0	0.9	89.7	...	...	Neg.	1.2	0.3
Chamar	25.5	58.7	2.6	3.3	1.6	0.6	0.5	0.5	6.7
Kumhar	32.1	14 0	2.0	44.4	3.2	2.2	0.1	0.1	1.9

Three-fourths of the entire working force is seen from the table to depend on agriculture; of this, one-third are cultivators and the remaining two-thirds are agricultural labourers. In fact, scheduled castes contribute 30% to all the agricultural labourers in the district. (Scheduled castes and scheduled tribes together constitute 68.3% of the district's working force in category II). The high proportion of working force in agricultural labour points to the land hunger of the scheduled castes, a fact to reckon with in any scheme for welfare of scheduled castes in the district. Household industry (12.2%), 'other services' (6.6%) and mining etc. i.e. category III (2.4%) are other important sectors of industry for the scheduled castes.

Chamar :

This caste accounts for four-fifths of total scheduled castes population in the district. 84% of the working force is in agriculture. 59% being agricultural labourers, most of whom have either no land, or at best have little land hardly enough to support them. Surprisingly enough shoe-making and tanning of leather, their traditional household industry gives principal work to only 3.3% of the workers (assuming that the persons in category IV all pursue the traditional household industry), unlike Basor or Kumhar in whose case the household industry is the mainstay of the economy. 'Other services'—giving principal work to 6.7% of the working force is next to agriculture in the economy of the caste. Category III and category V account respectively for 2.6 and 1.6 percent of the working force of the caste. Employment in categories VI, VII and VIII is not numerically significant. Percentage of literacy in the caste is 2.9, which is slightly lower than the percentage for all the scheduled castes.

Kumhar :

Next in numerousness to the Chamar (11.7% of all scheduled castes), the Kumhars differ from the Chamar caste in that their economy is not agriculture-dominated. Employment in agriculture, and household industry is more or less equal (46% in agriculture and 44% in household industry). With only 14% of workers in category II, and more than double that proportion in category I, the economy of the caste apparently stands on a comparatively sounder base than that of Chamar. The household industry traditionally associated with the caste is the making of earthen utensils. A significant feature of the economy of the caste is its comparatively greater participation (3.2% as compared to 1.9% for all scheduled castes) in category V. Employment in category VI and III has also somewhat significant proportions. Percentage of literacy in the caste is 2.4.

Basor and Bansphor :

This caste accounts for 4.0% of the total scheduled castes population and is third in numerical strength. Percentage of literacy in the caste is 2.4. A distinctive feature of the caste's economy is its overwhelming dependence on household industry, which accounts for nine out of every ten workers in the caste. The traditional household industry of the caste is making of bamboo artifacts. Agriculture, employing roughly 8% of the workers, is second in importance in the caste's economy. Participation in other sectors of economy is unimportant,

Scheduled Tribes :

Scheduled tribes form 14.6% of the population of the district, comparing with 20.6% for the State as a whole and 21.5% for Rewa division. Individually for the tahsils the proportions are : Raghurajnagar 11.9% ; Nagod 10.2% ; Amarpatan 19.3% and Maihar 21.3%. They are, therefore, concentrated in the east and south of the district. 98.1% of the scheduled tribes population of the district lives in rural areas.

Of the entire scheduled tribal population of the district, Raghurajnagar tahsil contains 36.2%, Nagod 13.7%, Amarpatan 27.1% and Maihar 23.0%. Of the sixteen tribes scheduled in the district, all but twelve were returned. Of these, only six namely Kol, Gond, Mawasi, Bhumia, Pao and Khairwar, together accounting for almost 99% of the scheduled tribal population;

are numerically significant. Most numerous tribe in the district is Kol, which makes 70.4% of its scheduled tribal population. Gond constitute roughly a fifth ; whereas Mawasi, Bhumia, Pao and Khairwar respectively account for 4.5%, 1.9%, 1.2% and 1.1% of the total scheduled tribal population of the district.

Progress of education in the scheduled tribes is even more depressing than in scheduled castes. Percentage of literacy is 2.2% ; in females it is as low as 4 in 1,000.

Participation rate for scheduled tribes in the district is 63.2%, which is considerably higher than the rate (51.8%) for the general population in the district. As in case of scheduled castes the rate is obviously pulled up by higher participation of women (60.3) belonging to scheduled tribes, as compared to a rate of 42.9% for women in the general population. The high participation rate is also suggestive of comparatively younger persons taking to work, obviously at the cost of education.

Working classification of scheduled tribes in the district is given in the table below :—

Distribution of 100 workers by category of workers

Tribe	Categories								
	I	II	III	IV	V	VI	VII	VIII	IX
1	2	3	4	5	6	7	8	9	10
All scheduled tribes	28.5	52.8	5.6	0.5	3.6	0.6	0.3	0.2	7.9
Kol	14.2	64.1	7.0	0.5	4.6	0.6	0.4	0.2	8.5
Gond	74.9	16.1	1.6	0.5	0.5	0.6	0.1	0.6	5.0
Mawasi	45.5	44.0	2.6	0.1	0.3	1.1	...	...	6.4
Bhumia	26.2	51.6	2.4	0.1	0.7	...	0.1	0.2	18.7
Pao	43.5	54.0	2.1	0.4	..	...	...	...	...
Khairwar	64.7	11.7	...	1.7	13.2	...	...	...	8.7

With more than four-fifths of the workers dependent on agriculture, the predominantly agricultural character of the working force is clear. Greater proportion of the workers however, swells the ranks of landless agricultural labourers, who outnumber the cultivators to the extent roughly of 2 to 1. It may be stated that scheduled tribes contribute 38.4% to the working force of the district in category II. 'Other services' accounting for the principal work of roughly 8% of the workers are the second in importance in the tribal economy of the district ; but participation in category III, (Mining, forestry etc.) and category V (Manufacturing) is also significant. The two categories together make more than 9% of the working force. The economy thus shows slightly greater diversification.

Kol :

Most numerous among scheduled tribes in the district, Kols count more than 70% of the district's scheduled tribe population. If not the autochthones of the district, the Kols are definitely one of the oldest tribes inhabiting the Rewa country. According to Census Superintendent of C.I. Agency, 1931, they "were the dominant race in the region between the eastern Vindhyas and the Gangetic plain before they were overwhelmed by the people of the plains from the north and by the incursion of the Gonds from the south." Commenting on their social and economic status, Venkatachar observes "short of being sold as a slave in an open market, the status of a Kol is nothing but that of a slave." It appears that the lot of Kol has not much improved since 1931 when this statement was made. Agriculture, employing 78% of its working force is mainstay of Kol economy and the weakness of the Kol economy can be judged from the fact that 64% of the Kol workers are landless agricultural labourers. Only 14% Kols cultivate on their own account. Another salient feature of Kol economy in the district is its proportionately greater participation in category V presumably in the lime kilns in Maihar tahsil. Categories IV, VI, VII and VIII do not attract many Kol workers. Percentage of literacy in the Kols is 1.3, which is much lower than the percentage (2.2) for the total tribal population.

Gond :

Gonds forming roughly a fifth of the scheduled tribal population of the district, are next in numerousness to the Kol. Unlike Kols, who are dispersed in all the tahsils, the Gonds show concentration in Maihar and Amarpatan tahsils. Economically and educationally, the Gonds seem to be better of than Kols and other tribes in the district. Percentage of literacy in the Gonds is 5.9, which is more than twice the average for all scheduled tribes,

and more than four times the percentage for Kols. Their economy is mostly dependent on agriculture. The comparative soundness of their economy follows from the fact that 75% of their working force consists of cultivators and only 16% of agricultural labourers. Land-hunger is thus apparently less in the Gonds than in the Kols and other tribes. 'Other services' are next in importance in Gond economy in the district, though the participation in it is only one in twenty. Category III has a participation of 1.6% in the working force, but other sectors of economy i.e. categories IV, V, VI, VII and VIII have more or less no appeal for the Gond workers. To sum up, though the Gonds appear to be somewhat better than the Kols in agriculture they do not exhibit a comparable mobility of the working force from one sector of industry to another. The result is concentration of the working force only in three sectors of industry.

Mawasi :

The tribe probably belongs to the Kol group of tribes and forms 4.5% of the district's tribal population. It has a low literacy percentage of 0.3. The tribe is mostly concentrated in Raghurajnagar tahsil. Economy of the tribe is mainly—to the extent of 90%—dependent on agriculture, with cultivators and agricultural labourers being more or less equally frequent. 'Other services' and category III are other sectors of industry having sizeable proportions of Mawasi workers.

Bhumia :

This tribe forms roughly 2% of Scheduled tribes population in the district. It has a literacy percentage of 2.6. The economy is predominantly agricultural, dependence on that sector being to the extent of 78%. An important feature, however, is the higher—roughly one in five—rate of participation in 'other services'.

Pao :

Another tribe of the Kol group, the Pao makes 1.2% of the total scheduled tribal population. The economy is almost entirely dependent on agriculture (97.5%) ; which with category III accounts for all but 0.4% of the working force.

Khairwar :

Making a little more than 1% of the scheduled tribe population, this tribe also depends mostly on agriculture. A heartening feature is the smaller proportion of agricultural labourers. Another distinguishing feature is the high rate (13.2%) of participation in category V (manufacturing).

Medical and Public Health :

Table B-V in the Handbook gives data bearing on the public health of the district with regard to the availability of various types of medical services. It appears from this table that at the time of census in 1961, Satna district had 125 physicians and surgeons of all categories i.e. belonging to allopathic, ayurvedic, homeopathic and to sundry other types of systems of treatment. As a total public health picture in the district, *vis a vis* the availability of medical help, thus, we have a population-physician ratio of 5,555 in the district. Urban areas, with one physician for every 961 persons are much better served by medical and health services than rural areas which have a population-physician ratio of 10,693.

It is, however, useful to consider physicians in allopathy separately, because these are invariably technically qualified (whereas in case of other systems of treatment, even persons who do not hold certificates from any recognised institution are also found to practise) and hence matter most in the public mind. 47 doctors in allopathy were returned from the district, 31 in the urban areas and only 16 in rural areas. There is thus concentration of physicians in allopathy to the extent of about two-thirds of their total strength in urban areas, which contribute less than one-tenth to the total population. The grossly uneven distribution of allopathic medical help between rural and urban areas is also clear from the population-doctor ratio in the two populations. Thus in the rural population, the population-doctor ratio is 39,432 comparing with a much smaller ratio 2,047 in case of the urban population. For the total population, the population-doctor ratio in the district is 14,774. In the State as a whole, population-doctor ratio is 41,535 for rural and 1,826 for urban areas.

Physicians in ayurved show a more even distribution,with 39 out of the 67 ayurvedic physicians having been returned from rural areas of the district. As regards ayurvedic physicians, the population-physician ratio in the district is 10,364 in the total, 16,177 in the rural and 2,266 in the urban population. The somewhat poorer condition of the district as regards ayurvedic medical help in the rural areas is seen in clearer relief when set against the much smaller rural population-physician value of 11,460 in the State as a whole.

Besides the above, the district has returned 343 persons (149 in urban areas) in major group '04', representing 'nurses' pharmacists, and other medical and health technicians. This included 15 nurses (13 in

urban areas), 33 midwives and health visitors (21 in urban areas), 27 nursing attandents and related workers (22 in urban areas), 113 pharmacists and pharmaceutical technicians (47 in urban areas) and 17 vaccinators (1 in urban area).

Vital Statistics.

Figures of births and deaths are reportedly not available. In fact maintenance of vital statistics in the district is neglected from the old State days. We can, however, form some idea of the fertility levels in the district from the population aged 'O', as also from the child-women ratio. The minimum birth rate as estimated from population aged 'O' comes to 44 per mille for the year preceding enumeration. The actual birth rate should be much above this figure because (i) in population aged 'O' the number of children born and dying during the year is not taken into account and (ii) population as at the end of the year is used for computing the rate rather than the mid-year population. The effect of both these factors is to bring down the birth-rate. Another means of judging the fertility level is by means of the child-women ratio i. e. number of children below 5 years divided by women in the reproductive ages '15-44'. For Satna district, this comes to 742 per mille, which compares with 769.

Land use pattern.

Table 2 A-1 in part II of the Handbook gives the area under various types of uses in the district from the year 1950-51 to 1960-61. Tahsilwise break-up of the area under the different types of land-use is not available except for the year 1960-61, to which the following description relates.

About one-fifth of the district's area according to village papers is covered by 'forests'. The proportion of area under forests is highest in Nagod tahsil, where it accounts for more than one-third (35.0%) of the tahsil's area. We had already observed this fact when considering the low population density of the tahsil. At the other extreme stands Amarpatan tahsil, which has only 6% of its area recorded as 'forests'. In Raghurajnagar tahsil forest acreage is almost representative of the average position of the district, while in Maihar tahsil it is 11.9%.

About one-sixth (17.3%) of the district's area is recorded as 'not available for cultivation', varying between a minimum of 12.5% in case of Nagod tahsil and a maximum of 31.5% in case of Amarpatan tahsil.

9% of the area in the district is under grazing lands, cultivable wastes, miscellaneous tree-crops and groves. Obviously, this low proportion indicates the absence of any potential for extension of cultivation in future. This type of area varies from a lowest of 3.6% in Nagod tahsil to 14.9% in Raghurajnagar tahsil. In Amarpatan and Maihar tahsils also, cultivable wastes and pastures occupy smaller areas, making 5% of the total area of the concerned tahsil in each case.

However, the area recorded as old and current fallow can perhaps be reduced to a minimum thereby increasing the area urder crops by the use of organic and chemical fertilizers, by irrigation and by proper crop-rotations. This type of area accounts for about one-seventh (13.5%) of the area of the district, fluctuating among tahsils from a minimum of 12.0% in Raghurajnagar tahsil to a maximum of 16.3% in Maihar tahsil. In a way, the high proportion of fallow land area indicates the wastage of land resources.

Highest proportion of the district's area is recorded as 'net area sown'. In 1960-61 this was two-fifth (40.3%) of the total area of the district. This also shows a wide range of variation among tahsils. It is as high as half the total area in Maihar tahsil, but is as low as 36% in Nagod tahsil. In Amarpatan and Raghurajnagar tahsils, net sown area is respectively 50.7 and 38.9 per cent of the tahsil's area.

Net sown area in the district has been steadily increasing from year to year, except in the year 1957-58, when it suddenly shrank by over 1 lac acres of the previous year's level. Over the ten years 1951-52 to 1960-61 the net area sown has increased by 109,244 acres i. e. 17% of the 1951-52 area. The population during the same period has increased by 25.2% and has obviously outstripped the growth in net area sown. The gross area sown has increased somewhat faster - i. e. by 18%of the 1951-52 level, but even then it has failed to keep pace with the proportion of population increase. This fact is also reflected in the *per capita* variations in the sown area during the decade. The *per capita* net area sown that was 1.14 acres in 1951 has decreased to 1.06 in 1961. The *per capita* gross area sown has also decreased from 1.34 acres in 1951 to 1.27 acres in 1961. Hence, unless the productivity per acre has gone up in the mean while, the figures show that food situation in the district has slightly worsened during the interregnum.

Irrigation.

There is not much of irrigation in the district, the

acreage of area under irrigation being approximately 0.3% of the net area sown in 1951-52 and about 0.4% in 1960-61. Irrigation in the district is mostly by wells. It appears from table 2A.5 in part II of the Handbook that four medium irrigation works that are in progress in the district, two in Nagod and two in Raghurajnagar tahsils will increase the irrigated area by about 15,000 acres.

Cropping pattern (1960-61)

The following table presents the cropping pattern of the district and of each tahsil for the year 1960-61.

Proportion of area under certain crops to total cropped area under all crops, 1960-61

District/Tahsil	Total crops	Cereals and Millets					Pulses		
		Rice	Jowar	Wheat	Barley	Cereals & millets	Gram	Tur	All pulses
1	2	3	4	5	6	7	8	9	10
SATNA DISTRICT	100	22.1	2.6	32.4	5.4	74.2	8.4	4.0	15.8
Raghurajnagar tahsil	100	15.7	4.4	28.0	8.4	70.8	10.5	5.9	19.5
Nagod tahsil	100	24.7	1.2	42.3	3.4	78.0	9.4	1.8	13.9
Amarpatan tahsil	100	28.1	0.9	30.7	3.2	75.9	4.9	2.8	12.6
Maihar tahsil	100	26.1	2.4	32.7	3.5	75.0	6.9	3.7	13.9

District/Tahsil	All food grains	Oilseeds				Area cropped more than once
		Linseed (alsi)	Rape & mustard	Sesamum (tilli)	All oil seeds	
1	11	12	13	14	15	16
SATNA DISTRICT	90.0	7.5	0.2	1.6	9.3	16.2
Raghurajnagar tahsil	90.2	7.5	N	1.5	9.1	11.7
Nagod tahsil	91.9	6.2	0.3	0.9	7.4	17.2
Amarpatan tahsil	88.5	8.5	0.1	2.2	10.8	21.4
Maihar tahsil	89.0	7.9	0.5	1.9	10.3	19.0

Food-grains were grown on nine-tenth of total cropped area of the district; the tahsilwise variation being from 88.5% of the total cropped area in Amarpatan tahsil to 91.9% in Nagod tahsil. Highest acreage among foodgrains is under cereals and millets. This is roughly three-fourth of the total cropped areas for the district, and varies from a minimum of 70.8% in Raghurajnagar tahsil to 78% in Nagod tahsil. Wheat is the principal cereal grown in the district and in all the tahsils. In the district about one-third (32.4%) of gross cropped area is under wheat. In Nagod tahsil acreage under wheat is more than two-fifth (42.3%) of the gross cropped area of that tahsil; whereas Raghurajnagar, which has the lowest proportion of area under wheat among tahsils of the district, has between one-fourth and three-tenth (28%) of its gross cropped area under wheat. The area under wheat has steadily increased during the decade except in the year 1957-58, when it shrank by 173 thousand acres. As observed earlier the net area sown also had shrunk in that year. Most of the area usually under wheat was diverted to *jowar* and pulses in that year. In 1960-61 acreage under wheat was almost the same as it was in the year 1956-57. During 1951-60, acreage under wheat has increased by 48%.

Next important cereal grown in the district and in each tahsil is paddy. It is the principal *kharif* crop of the district, occupying between one-fifth and one-fourth (22%) of the district's gross cropped area in 1960-61. Tahsilwise, the proportion of gross-cropped area under rice varies from a minimum of 15.7% in case of Raghurajnagar to a maximum of 28.1% in Amarpatan tahsil. In the last-mentioned and in Maihar tahsil the acreages under wheat and rice are more or less comparable, while in Nagod and Raghurajnagar wheat area is much higher than rice area. Acreage under rice registered small decreases from 1951-52 to 1955-56; increased in 1956-57 and again decreased in 1957-58. The acreage devoted to the crop has however, steadily increased during the last three years of the decade. During the ten years 1951-52 to 1960-61, the acreage under rice has registered a modest increase of about 5% only.

Barley is also a cereal of some importance grown in

the district, having about one-nineteenth (5.4%) of the gross-cropped area under it. This area under barley is as high as 8.4% in Raghurajnagar tahsil, but is between 3 and 3.5 percent in the other three tahsils. *Juar* has some importance only in Raghurajnagar tahsil where it had 4.4% of the area under it. But the millets *kodon*, *saman* and *kakun* are grown on sizeable areas. The area under these millet crops is not directly available from the table inset above but may be taken to be roughly the difference between the areas under all cereals and millets and the sum of areas under rice, wheat, jowar and barley. This comes to about 12% of the gross cropped area in the district; varying between a minimum of 6.4% in Nagod tahsil to a maximum of 14.3% in Raghurajnagar tahsil. Amarpatan and Maihar tahsils have respectively 13% and 10.3% of their gross cropped area under the millets named above. Whereas the millet *kodon* and *kutki* are grown in sizeable quantities in all the tahsils, *saman* and *kakun* have relatively greater area under them in Raghurajnagar, Maihar and Amarpatan tahsils.

Pulses occupy about one-sixth (15.8%) of the gross-cropped area in the district, tahsilwise variation being 19.5% in Raghurajnagar tahsil, 13.9% in Nagod tahsil, 12.6% in Amarpatan tahsil and 13.9% in Maihar tahsil. Gram seems to be the most important pulse in the district, and in all tahsils except perhaps Amarpatan tahsil. Highest proportion of area under gram is in Raghurajnagar tahsil, and lowest in Amarpatan tahsil. *Tur* is also an important pulse. Among other, less widely grown pulses, are *Masur*, *Tiura* etc. Area under pulses has fluctuated in an erratic manner during the decade. It had the highest value of the decade in 1957-58 when area under food-grains generally had gone down considerably perhaps because of diversion of area normally under wheat. Drought was probably the cause for such diversion. Acreage under pulses in 1960-61 is only 6% higher than the acreage under them in 1950–51.

Among non-food crops, oilseeds cover all but a very small proportion of the area that is not under food-crops. In the district oilseeds account for a little less than one-tenth of the area. This varies between a minimum of 7.4% in Nagod tahsil to a maximum of 10.8% in Amarpatan tahsil. Linseed is most important oilseed in the district and in each tahsil, while sesamum or *tilli* also has sizeable area under it. Rape and mustard seem to be grown sparingly in the district.

Non-grain food crops cover about 0.5% of the gross-cropped area of the district.

Double Cropping :

In 1960-61, area sown more than once during a year added upto roughly one-sixth (16.2%) of the gross cropped area or roughly one-fifth of the net cropped area. It was highest-21.4% of the gross cropped area in Amarpatan tahsil and lowest–11.7% in Raghurajnagar tahsil.

Economy—Workers and non-workers :

The table below gives a distribution of the population into the nine categories of workers and non-workers separately for the district and each tahsil. Figures for State as a whole also appear for comparative purposes.

District/Tahsil	Total workers	WORKERS									Non-workers
		I	II	III	IV	V	VI	VII	VIII	IX	X
1	2	3	4	5	6	7	8	9	10	11	12
SATNA DISTRICT	51.8	27.4	12.7	1.4	3.8	1.1	0.4	1.1	0.6	3.3	48.2
Raghurajnagar tahsil	51.7	26.5	12.0	1.5	3.2	2.0	0.6	1.5	1.0	3.4	48.3
Nagod tahsil	49.6	26.1	12.2	0.8	5.6	0.4	0.6	0.8	0.1	3.0	50.4
Amarpatan tahsil	53.8	28.7	17.3	1.2	3.8	Neg	0.1	0.9	0.1	2.0	46.2
Maihar tahsil	51.9	29.5	2.7	2.4	2.9	0.8	0.2	0.9	0.6	4.9	48.1
M. P. State	52.3	32.8	8.7	1.5	2.6	1.0	0.5	1.3	0.5	3.4	47.7

The participation rate i.e. proportion of workers to total population for the district is 51.8% which is only slightly less than the State average. The small difference for the district is traceable to the somewhat lower (42.9%) female participation in the district (as compared to 44.0% for the State) ; the male participation (60.3%) in the district is actually slightly greater than the male participation in the State (60.2%). The lower participation rate for women in the district is perhaps ascribable to rigidity of social inhibitions amongst the non-tribal population. Generally in areas of low productivity, a higher participation rate,

or what is the same thing, a lower dependency ratio, is an index of economic backwardness rather than of a developed economy. This fact follows from the observed lower participation rate or a greater dependency ratio for urban areas whose economy, as is well-known, is non-agricultural and has a firmer and more diversified base than that of the rural areas. For Satna district this remark seems to be borne out from the fact that its urban areas have a participation rate of 39.9% only; (for females, the rate is only 18.5%). Amarpatan, an entirely rural tahsil, has the highest participation rate of 53.8% in the district.

With 77.4% of the working force in agriculture—i.e. categories I and II of the census working classification, the district's predominantly agricultural economic base is clear. The base is somewhat narrower than for the State as a whole (79%). The highest degree of dependence on agriculture (85 0%) is observed in the entirely rural Amarpatan tahsil. The western Nagod tahsil is next (77.3%) in respect of dependence on agriculture and represents the average picture for the district as a whole. The northernmost Raghurajnagar tahsil has the least (74.5%) dependence on agriculture.

An important feature of the working force in the district is the somewhat larger proportion of workers in category II i.e. agricultural labourers. This is 24.5% for the district comparing with 16.6% for the State as a whole. Most of these belong to the ranks of landless agriculturists, or those who own only a pittance in the name of land. A considerable proportion of them do not probably have any gainful employment during the slack season. The proportion of agricultural labourers is highest (31.6%) in Amarpatan tahsil and the least (18.7%) in Maihar tahsil. Household industry and 'other services' are the sectors of economic activity next in importance to agriculture in the district.

Since more than three-fourth of the district's working force is principally employed in agriculture, either as cultivators or as agricultural labourers, it is worthwhile to enquire into two important aspects of the economy connected with agriculture i. e., prevalence of absentee-landlordism or sub-tenancy which now stands repealed by Law, and the existence of small or fragmentary holdings. Some information relating to these aspects is available in tables B-X and B-XI of the Handbook. These tables are prepared from a 20% random sample of the households that existed on the enumeration day, and since this is decidedly a large sample, the results deducible from it may, within negligible error margins, be extended to the entire universe of households in the district.

Of *all* the households in the district, 53.5% were returned as engaged in *cultivation only* without any household industry; while 9.9% were engaged in cultivation and household industry. Thus, in all, 63.4% of the households were engaged in household cultivation, with or without household industry. In the rural areas the proportion of households engaged in cultivation was 69.6% including 10.7% households engaged in household industry also in addition to cultivation.

As regards prevalence of sub-tenancy or absentee-landlordism, table B-XI tells us that 71% of the cultivating households were holder-cultivators i. e. they owned the holdings cultivated by them. Roughly 1 out of every 16 (6.4%) cultivating households cultivated holdings not belonging to the households but taken from others on sub-lease. Another 22.7% or more than one-fifth of the cultivating households cultivate holdings partly belonging to the household and partly taken on lease from other households. Thus in all, 29% of the cultivating households, cultivate holdings that do not belong to them, or only partly belong to them. This proportion may, therefore, be taken as an index of the prevalence of sub-tenancy among cultivators of the district.

The picture, as regards existence of uneconomic fragmentary holdings, is more depressing. This is presented in the table inset below, which shows proportion of cultivating households cultivating holdings of various sizes. Cumulated proportions showing households cultivating holdings of less than specified sizes are also given.

Table—Percentage of households cultivating holdings of specified sizes to all cultivating households, 1961.

Size of holding	Percentage of households cultivating holdings of the size shown in column 1	Households cultivating holdings less than the upper limit shown in column 1
1	2	3
Below 1 acre	10.3	10.3
1 —2.4	16.1	26.4
2.5—4.9	19.9	46.3
5.0—7.4	15.7	62.0
7.5—9.9	8.9	70.9
10.0—12.4	8.2	79.1
12.5—14.9	3.8	82.9
15.0—29.9	11.6	94.5
30.0—49.9	3.8	98.3
50+	1.7	100.0

The table shows that one-tenth of the cultivating households are doing so on holdings of less than one acre each and that more than one-fourth are cultivating fragmentary holdings of less than 2.5 acres each. It is not difficult to see that all these 26.4% households must be very badly off agriculturally, and without any subsidiary support to their income, they are not expected to attain even to a bare subsistance level of living. Roughly one-fifth (which is the highest proportion of households cultivating a given size-range of holdings) cultivate holdings bigger than 2.5 but below 5 acres each. Even these are, generally speaking, very small holdings; and the households cultivating them must of necessity, look to other pursuits if they want to make the two ends meet. Thus between two-fifth and half of the cultivating households cultivate small, clearly uneconomic holdings.

15.7% of the cultivating households cultivate holdings below 7.5 but above 5 acres; and 8.9% on holdings more than 7.5 but below 10 acres. Together, the two classes of holdings include one-fifth of the cultivating households. The soil being generally poor, and irrigation next to nil, even these holdings may not be considered to be big enough for giving a reasonable economic support to the households depending on them. Thus there is good reason to think that as many as seven-tenth of the cultivating households that hold fields of less than 10 acres in size are poorly off economically.

In a nutshell, the evidence before us is to the effect that more than two-fifths (46%) of the cultivating households holding lands below 5 acres each are clearly very badly off economically, while another one-fourth, cultivating between 5 to 10 acres of lands are, more often than not, poorly off. There is also evidence, of concentration of much land in the hands of households holding more than 30 acres of land each. These add to 5.5% of all cultivating households.

Category III—Mining and quarrying, forestry, fishing, livestock and hunting :

This category employs roughly three of every 100 workers in the district. The proportion of workers in this category is the least in Nagod tahsil, but is maximum (roughly 5 in 100) in Maihar tahsil. Production of wood, bamboo, cane reeds, that hing grass, etc., (minor group 007) and of vegetables accounts for 16.8% of the workers in this category. A little more than half of the workers in this category are engaged in the production and raising of livestock (minor group 040) for milk and animal power, while 22.2% are engaged in the mining and quarrying of limestone (107), clay etc. These come mostly from Maihar tahsil.

Category IV—Household Industry :

Household industry is next to agriculture in respect of participation size. Maximum proportion of workers in household industry is in Nagod tahsil ; while the minimum proportion is in Maihar tahsil. Most important household industry in the district is biri-making, which accounts for 39% of all workers in household industry. Manufacture of bamboo artifacts—having 11% of all workers in category IV–an industry traditionally pursued by the Basor caste is next in importance. Pottery, livestock-raising, etc. are other important household industries. The first 11 household industries in the district are given below together with the proportion that the number of workers in each bears to all workers in category IV.

Table

S. No.	Code No.	Description of the industry	Percentage of all workers in category IV
1	2	3	4
1	220	Biri-making	38.7
2	288	Manufacture of bamboo artifacts	11.0
3	350	Manufacture of earthen work and pottery	9.2
4	040	Production & rearing of livestock for animal power and milk	6.7
5	31	Making of leather products	4.8
6	207	Production of edible fats and oils	4.7
7	393	Manufacture of jewellery & silver ware and wares using gold & other precious metals	4.7
8	282	Manufacture of structural wooden goods	3.9
9	273	Making of textile garments	3.1
10	369	Making of sundry hardware etc.	3.1
11	365	Manufacture of brass and bell metal products	1.7

One noticeable thing about the brass and bell metal industry (minor group 365) is its concentration in urban area. This is in the town of Unchehra in Nagod tahsil. The household industries listed above account for more than 92% of the workers in household industry.

Category V :

Participation in manufacturing (on a scale bigger than household industry) is about 2% of the working

force. The proportion of workers in this category is maximum in Raghurajnagar tahsil, followed by Maihar, Nagod and Amarpatan. Most important is the manufacture of lime–carried on in kilns in Maihar town and rural areas of Maihar tahsil. This accounts roughly for two-fifths of all workers in category V. Manufacture of cement–there is a cement factory on the outskrits of Satna town–employs about a fifth of the workers in category V. Below is given a list of the first nine manufacturing industries in the district.

S. No.	Industrial Code	Description	Percentage to total workers in category V
1	2	3	4
1	342	Manufacture of lime	38.8
2	341	Manufacture of cement and cement products	19.3
3	220	Making of biri	9.1
4	20	Foodstuffs	7.0
5	273	Making of textile garments	4.4
6	340	Making of structural clay products such as clay and tile	3.6
7	209	Production of sweet-meats, condiments etc.	3.4
8	282	Manufacture of structural wooden products	2.2
9	202	Production of indigenous sugar, gur, from sugarcane or palmjuice, production of candy	2.0

These industries account for roughly 90% of the working force in category V.

As shown by the list of industrial establishments of the Chief Inspector of Factories, Satna district had, by the end of 1960, forty-six registered factories. Of these 22 were lime-factories, 6 bidi-factories, one cement factory, one distillery, six paints and ochres, 4 dal and oil mills, one flour mill, 3 saw mills, one petrol depot and one was a power house. With the exception of the lime and ochre factories which were spread over Maihar and Satna tahsils, the others were mainly located in Satna town.

Category VI—Construction :

The low level of constructional activities in the district is manifest from the fact that workers in category VI account for less than 1% of all workers in the district. The proportion is about 1.1% in the Raghurajnagar and Nagod tahsils, but is as low as 0.2% in the Amarpatan and Maihar tahsils. About half (48.8%) of the workers in construction have been returned in minor group 400 i.e. construction and maintenance of buildings ; 27.8% in the construction and maintenance of roads, railways, bridges etc. and the remaining in the construction and maintenance of waterways and water reservoirs such as bund, embankments, tank etc.

Category VII—Trade and Commerce :

Participation in activities connected with trade and commerce is to the extent of 2.2% of the district's working force ; being as high as 3% in Raghurajnagar tahsil, but only 1.6 to 1.8 percent in the remaining three tahsils. Of the 7,928 workers in trade and commerce, more than half (53.7%) are concentrated in urban areas, and about one-fifth are females. 16.4% of the workers in trade and commerce have been returned in 'wholesale trade', 81.5% in retail trade and the remaining 2.1% in 'trade and commerce–miscellaneous.'

About four-fifth (78%) of the workers in 'wholesale trade' are in the wholesale trade of cereals and pulses. The remaining one-fifth (22%) are in (i) 'wholesale trading in fabrics and textile products' (minor group 602), (ii) wholesale trading in wood, bamboo, cane etc. (minor group 621), (iii) wholesale trading in vegetables and other food-stuffs not covered under cereals and pulses (minor group 601) ; (iv) wholesale trading in tobacco and its products (minor group 606) etc.)

Since retail traders attend to the day to day consumption needs of the community and grow in response to such need, it is only natural that most of them will be concentrated in the retail trades that supply the basic consumption needs i. e. food, clothes, tobacco, fuel etc. Accordingly, we find that about half of the workers in retail trade are concerned in the trade of "cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry" (minor group 640). About one-sixth are returned as engaged in "retail trading of unspecified goods" (minor group 689). Retail trading in cloth and other textile products (minor group 650) employs a little more than one-tenth of the workers in retail trade, The others are engaged in retail trading in (i) food-stuffs like sweet-meats, condiments, cakes, biscuits etc. i. e. minor group '646' (ii) retail trading in tobacco, biri, cigarettes etc. minor group '644' (iii) retail trading in metal, porcelain and glass utensils (iv) retail trading in animals (v) retail trading in medicines and chemicals and numerous other pursuits employing less than 50 workers each.

Most workers in 'trade and commerce-miscellaneous' have been returned in 'real estate and properties',

(minor group 691); banking and similar type of financial institutions' (minor group 695); and 'providents and insurances'. Except in urban areas, and some of the bigger villages that have regular daily markets, most of the retail trading activity in rural areas takes place in the weekly markets. A list of the villages where these markets are held is given as Appendix X in the Handbook.

Category VIII—Transport, storage and communications.

This category, includes about 1.2% of the working force, the proportion being high-2% in Raghurajnagar tahsil; 1.1% in Maihar tahsil and as low as 0.2% in Amarpatan and Nagod tahsils. More than nine-tenth (94.1%) of the workers in category VIII are in transport; 5.7% in communications and the remaining 0.2% in storage.

Railway transport (minor group 700) accounts for more than half (55.2%) of workers in category VIII. More than two-thirds of these are in urban areas, i. e. in the towns Satna, Maihar and Unchehra and village Jhukehi, which are railway stations on the line that joins Jabalpur to Allahabad.

Bus transport absorbs more than one-tenth (12.9%) of the workers in category VIII, while transporting by motor vehicles other than bus (i. e. trucks etc. minor group 702) absorbs 11.5%. Road transport by motor vehicles thus accounts for one-fourth of all workers in category VIII. Satna town is an important centre of road transport in the district. Others are Maihar, Nagod and Amarpatan. The district has a total of 680 miles of roads which includes 63 miles of national highway, 90 miles of State highway, 189 miles of major district roads, 183 miles of other district roads and 155 miles of village roads. Excluding the last mentioned, the district has 183 miles of roads per 1,000 square miles of area, which compares with a lower average of 129 miles in case of the State as a whole. Inclusion of village roads increases the district mileage per 1000 square miles of territory to 237 miles, and that of the State as a whole to 189. The district is thus better served by roads than the State as a whole. A list of roads in the district is given in Table 7.1 in Part II of the Handbook.

Bulk of the workers in 'communications are in 'post and telegraphic communications' and only a small proportion in telephone communications.

Category IX—'Other Services'.

From the standpoint of size of participation, 'other services' rank after agriculture and household industry in the district's economy. Proportion of workers in 'other services' varies between a minimum of 3.7% in case of Amarpatan tahsil to a maximum of 9.4% in Maihar tahsil. About one-fourth (24.6%) of the workers in the category are returned from urban areas.

More than half of the workers in the category are those whose economic activities were not adequately described and who, therefore, could not be assigned to any of the known 'other services'. The distribution of the others is shown in the table inset below.

Table—Proportion of workers in major groups of industry to all workers in category IX.

S. No.	Code No.	Description	Proportion	Remarks
1	2	3	4	5
1	80	Public service	12.7%	54.8% in minor group 809 29.2% in '803' 8.8% in '805' and 3.8% in '804'
2	81	Educational and scientific services	11.6%	95.7% in '811' 4.3% in '810'
3	82	Medical and health services	2.6%	About 92% in '820'; 8% in '821'
4	83	Religious and welfare services	2.0%	52% in '830', 41% in '831', 7% in '832'
5	84	Legal services	0.3%	
6	85	Business services	0.1%	
7	86	Community services and trade and labour associations	0.1%	
8	87	Recreation services	0.6%	About 69% in '872' and 31% in '873'
9	88	Personal services	11.1%	40.3% in '884', 39.4% in '880,.
10	89	Services not elsewhere classified	3.4%	
11	50	Electricity and gas.	0.8%	
12	51	Water supply and sanitary services	3.5%	About 99% in '511'.

'Public service' is the biggest employer in 'other services', accounting for about one-eighth (12.7%) of the workers in the category. Of these, more than half (54.8%) are in public service in administrative departments and offices of the State Government; about

three-tenth (29.2%) in 'public service in the police', 8.7% in public service in administrative offices of local bodies and 3.8% in public service in administrative departments and offices of the Central Government'.

11.6% of workers in 'other services' are in 'educational and scientific services', of which about 96% are teachers in primary schools, middle and high schools and colleges. Next numerous are workers in 'personal services', forming 11.1% of all workers in the category. About two-fifths of these are hairdressers and barbers (minor group 884) and about an equal proportion in 'personal services rendered to households such as those by domestic servants, cooks etc.' Others in major group '80' (personal services) include washermen and launderers, workers in hotels, restaurants etc.

SUMMING UP

Satna district derives its importance from the headquarters town Satna, the premier trading town and railhead for the erstwhile Rewa State, and from the rich lime stone resources in Maihar tahsil. The latter have given rise to a cement factory in Satna town. The district lies in the Vindhyan plateau, considerably cut up in its northern and southern parts by hills. Chitrakut, the place of some religious importance owing to its mythological association with god Ram is also situated in Satna district. The district has a rich historical past as evidenced from inscriptional records of Unchahara and Kho in Nagod tahsil. It enjoys an extreme type of climate and receives a rainfall of about 43 inches.

Satna is the 27th biggest district in the State in size, but its rank moves up by 10 places as regards populousness. Distribution of district's area (2,866 sq. miles) and population (694,370 persons) among tahsils is lopsided with one, Raghurajnagar alone, containing 44% of each. Nagod, the second biggest, contains a quarter of the area but only a fifth of the district's population, yielding in populousness to the smaller Amarpatan tahsil which contains more than one-fifth of the district's population. Maihar is the smallest and the least populous tahsil in the district, containing comparable proportions (15.2 and 15.7 respectively) of its area and population.

Satna district occupies a respectable rank (13th) in the State as regards denseness of population, having 242 persons to a square mile. It greatly improves its rank, if attention is confined to density of population in rural areas only, its rural density of 221 persons to a square mile, being fourth in the State. Distribution of density between tahsils, in descending order is Amarpatan (294) ; Maihar (251) ; Raghurajnagar (246) and Nagod (194). The low population density in Nagod is ascribable to its containing greater proportion of hilly and forested areas and correspondingly low net cultivated area.

The district contains 2,116 villages including 363 uninhabited villages. The distribution of the 1,753 populated villages among tahsils is uneven with Raghurajnagar, Nagod, Amarpatan and Maihar tahsils containing respectively 42.4, 23.9, 21.1 and 12.6 percent. Satna is mainly a district of 'very small' and 'small' villages, the two types of villages, contributing 45.6 and 32.1 percent to all inhabited villages in the district. The frequency of these villages below 500 in population fluctuates between a maximum of 85.2% in Nagod tahsil and a minimum of 66.1% in Maihar tahsil. Naturally, villages are more populous (439 persons per village) on an average in the last-mentioned tahsil, and least populous (293 persons per village) in Nagod tahsil. In the district as a whole population per village is 360 on an average, comparing with 394 in case of the State.

The district has in 1961 an urban component of 9.2% in its population as against a distinctly smaller component of 7.3% in 1951. This improvement in the urban proportion is inspite of the deurbanisation of ten places which were treated as towns in 1951. Satna, the district head-quarters in Raghurajnagar tahsil, is the biggest town in the district. Maihar in Maihar tahsil, and Nagod and Unchahara in Nagod tahsil are the other towns in the district. Amarpatan tahsil is entirely rural.

The growth of population in the district was very slow during first half (1901-31) of the 60 year period 1901-61, being less than 2/5th of the State's rate of increase during the same period. This was mainly owing to a disproportionately high (13.1% comparing with 1.4% only in case of the State) reduction in the district's population during the influenza decade 1911-21. The latter half of the sixty-years was almost equally favourable to growth of population in the district as well as in the State. During the decade just gone by, population in the district has increased by 25.2%, which is slightly higher than the State average growth of 24.2%. Separately for rural and urban areas, the growth is 27.9% and 3.4% respectively. If, however, we allow for the declassification in 1961 of ten towns of 1951, the rural and urban proportions of increase become 22.9%

and 33.7% respectively, and these show the significant fact that inspite of ten 1951 towns having lost their urban status, the urban population has increased much faster than the rural population in the district. This is ascribable mostly to the high rate of increase of Satna town, owing, among other things, to establishment of the cement factory there during the decade. This also explains the somewhat greater (29.1%) population increase in Raghurajnagar tahsil. Rates of increase in other tahsils during 1951-61 are Nagod 24.0%, Amarpatan 20.0% and Maihar 21.8%.

Sex-ratio, or the number of females per 1,000 males is 965 in the district, comparing with 953 in case of the State. It shows considerable variation among tahsils, having the lowest value (939) in the most urbanised Raghurajnagar tahsil and highest (1,015) in the entirely rural Amarpatan tahsil. In Nagod and Maihar tahsils the ratio has the values 961 and 981 respectively. In 1951, the sex-ratio in the district was 976, so that it has fallen by 11 during 1951-61. During the same period sex-ratio in the State as a whole has fallen by 14.

Marital status returns show prevalence on a considerable (alarming in case of females) scale of child and very early marriages. More than half of the girls, and three-fourths of the boys in the ages 10-14 have been returned as married. Not many girls are left unmarried beyond 19 years of age. Incidence of widowhood is also rather high, with 4.8% of the males and 11.5% of females leading widowed existences.

Proportion of literate and educated in the population is 15.6% which compares with 17.1% in case of the State. The district occupies the median position in literacy ranking. It, however, outdoes the State in rural literacy, having 13.6% as against 12.7% in case of the State, of its rural population literate and educated. Separately for males and females literacy proportions are 26.3 and 4.5 percent respectively comparing with corresponding State proportions of 27.0 and 6.7 respectively. Distribution of literacy among tahsils is Raghurajnagar 17.4%, Nagod 15.4%, Amarpatan 13.3% and Maihar 13.6%. However, about seven-tenths of the literate and educated in the district are literates without any educational levels. 23.7% of the literate and educated claim to have crossed the primary educational level and only 5.7% possess matriculation and higher educational level.

97.5% of the population is Hindu by religion. Muslims, the second most populous religious group in the district form 2.3% of the population while Jain, Sikh, Christian and Budhist religions have a following of only 0.2% of the population.

As many as forty-one languages have been returned as mother-tongues in the district. 94% of the population, however, has returned Hindi as mother-tongue, which with Bagheli accounts for more than 98% of the speakers.

Scheduled castes and scheduled tribes contributing respectively 12.1 and 14.6 percent to the district's population represent the socially, culturally and economically weaker section of the population. Chamar etc. (80.3%), Kumhar (11.6%), Basor (4.0%) and Domar or Doris (1.6%) account for 97.5% of the district's scheduled castes' population; while among the tribes, Kols (70.4%), Gond (20%), Mawasi (4.5%), Bhumia (1·9%), Pao (1.2%) and Khairwar (1·1%) account for 99% of the population. Educationally the scheduled castes and tribes are very much behind the general population, having literacy rates of 3.0% and 2.2% respectively. In fact, the castes and tribes are responsible to a very great extent in pulling down the general literacy rate. Both the scheduled castes and tribes are dependent mainly on agricultural labour, which accounts for half of the working force in case of each. The scheduled castes have, however, a sizeable participation in household industry also, which are mostly the caste-based industries of shoe-making, earthen pottery, bamboo-work etc.

Participation rate in the general population is 51.8% which is comparable with the State average of 52.3%. The economy hinges round agriculture, which is its mainstay and gives principal work to about four-fifth (77.4%) of the working force. The district has somewhat higher proportion of workers in agricultural labour, (coming mostly from scheduled castes and tribes) than in the State as a whole. More than seven-tenths of cultivating rural households cultivate holdings below ten acres each, with more than a quarter cultivating extremely small holdings of less than 2.5 acres, and more than two-fifths (46.3%) cultivating small holdings of less than 5 acres. These figures denote rather a poor, agricultural economy. Employment in mining and quarrying is to the extent of 3% of the working force in the district. These are mainly employed in the limestone quarries in Maihar tahsil. Household industry giving principal work to about 7% of the workers is also important in the district's economy. Majority of the workers are in the household industry of bir.-rolling; but the traditional caste based industries like making

of bamboo artifacts, earthen pottery, livestock, shoe-making, oil-pressing, silver and goldsmithy, carpentry, cloth-weaving on handlooms, ironsmithy, and brass and bell metal industry also account for sizeable number of workers in household industry. The district is yet backward in largescale manufacturing industries, having only 2% participation in category V. These are mostly engaged in lime-kilns, and the cement-factory at Satna. The district has a proportionately narrow tertiary sector (categories VII, VIII and IX) employing roughly one-tenth of the workers.

The district is as yet poor in power resources though it is much ahead in that respect of the State as a whole. Power is supplied from the Thermal Generating Station at Satna. By March 1961, all the four towns and 20 villages in the district were electrified. This gives a rate of 1.1% electrified inhabited villages as against a much smaller rate of 0.5% in case of the State as a whole. Eventually the district will get its power supply from the Amarkantak Thermal Station under construction in Shahdol district. This is expected to accelerate the pace of development in this district, whose progress in the past was checked by feudalistic forces, but which, as has been seen in the preceding analysis, has given ample evidence of its power of recovery. There is possibility, as suggested by the Survey team of the National Council of Applied Economic Research,† of a fuller utilisation of the district's abundant limestone resources by setting up a plant for the manufacture of calcium carbide at Jhukehi and by increasing the capacity of the existing cement plant at Satna. Future progress of the district, however, seems to be connected, in the main, with agricultural development. For this, there is undoubtedly, considerable scope.

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note: —This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups; showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been persented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above note clear :—

Satna District Total 200 (122) signifies that there are 122 establishments in Satna District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling, dehusking and processing of crops and foodgrains". Raghurajnagar Tahsil Total 206 (1) signifies that there is one establishment in Raghurajnagar Tahsil pertaining to Minor Group 206, which stands for "Production of butter, ghee, cheese and other dairy products". Village 12 Chaubeypur 207 (5) signifies that in Village Chaubeypur which has 5 as its location code number there are 5 establishments pertaining to Minor Group 207, which stands for "Producation of edible fats and oils other than hydrogenated Oil." Satna Town, Ward No. 1 209 (19) signifies that there are 19 establishments located in Ward No. 1 of Satna Town pertaining to Minor Group 209 which stands for "Producation of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge."

SATNA DISTRICT

Total—200 (122), 205 (3) 206 (9), 207 (885), 209 (171), 212 (1), 215 (1), 220 (448), 230 (2), 231 (5), 233 (15), 235 (67), 244 (81), 255 (148), 270 (1), 273 (299), 274 (2), 280 (5), 281 (10), 282 (2), 283 (986), 284 (58), 288 (868), 289 (3), 302 (8), 310 (14), 311 (1,788), 313 (2), 314 (3), 320 (4), 333 (19), 336 (3), 340 (1), 342 (32), 343 (1), 344 (7), 350 (1,229), 360 (2), 362 (1), 365 (129), 367 (21), 368 (5), 369 (1,143), 372 (4), 377 (3), 378 (2), 379 (4), 382 (2), 384 (16), 388 (56), 392 (9), 393 (853), 384 (2), 399 (83)-

Rural—200 (67), 206 (6), 207 (844), 209 (77), 220 (368), 230 (1), 231 (5), 233 (11), 235 (67), 244 (81), 255 (148), 270 (1), 273 (241), 274 (2), 280 (2), 281 (3), 282 (2), 283 (980), 284 (49), 288 (789), 289 (3), 310 (12), 311 (1.757), 313 (2), 314 (3), 333 (16), 340 (1), 342 (20), 344 (7), 350 (1,192), 365 (25), 367 (1), 368 (1), 369 (1116), 384 (3), 388 (6), 392 (1), 393 (729), 394 (1), 399 (74).

Urban—200 (55), 205 (3), 206 (3), 207 (41), 209 (94), 212 (1), 215 (1), 220 (80), 230 (1), 233 (4), 273 (58), 280 (3), 281 (7), 283 (6), 284 (9), 288 (79), 302 (8), 310 (2), 311 (31), 320 (4), 333 (3), 336 (3), 342 (12), 343 (1), 350 (37), 360 (2), 362 (1), 365 (104), 367 (20), 368 (4), 369 (27), 372 (4), 377 (3), 378 (2), 379 (4), 382 (2), 384 (13), 388 (50), 392 (8), 393 (124), 394 (1), 399 (9).
