25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra

J-3483-I-B Satara.

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that Scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;

(ii) The four-coloured map of the district ;

(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;

(iv) Supplementary information showing basic amenities available for each village ; and

(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set up and some of the Socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgements are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

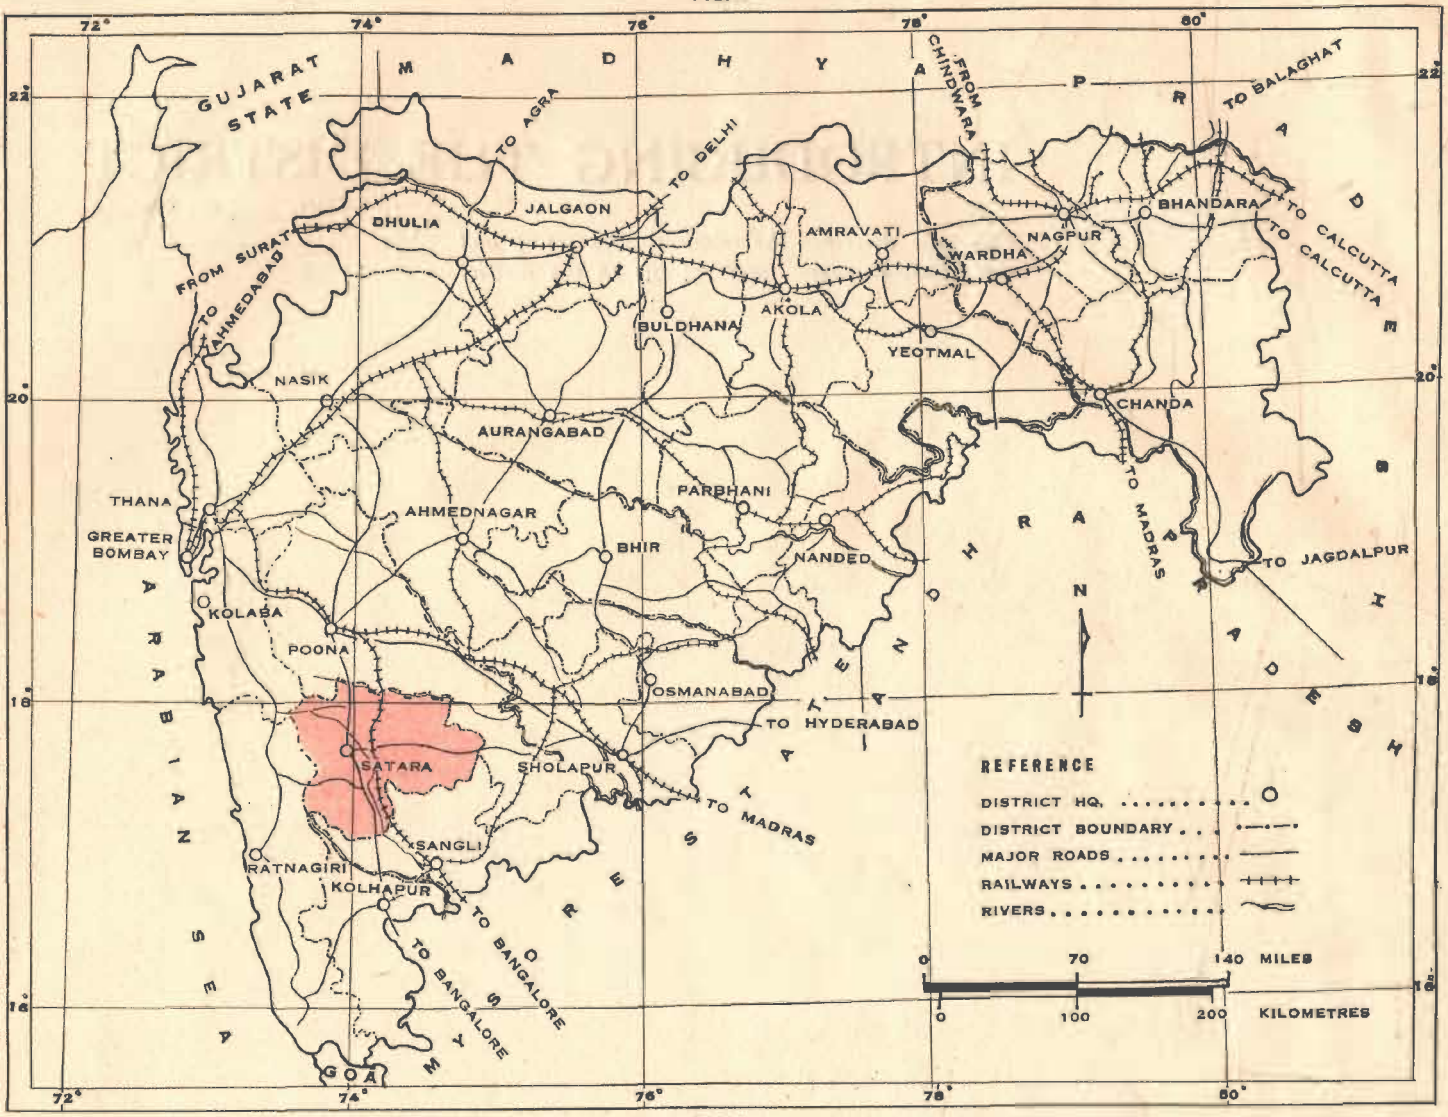

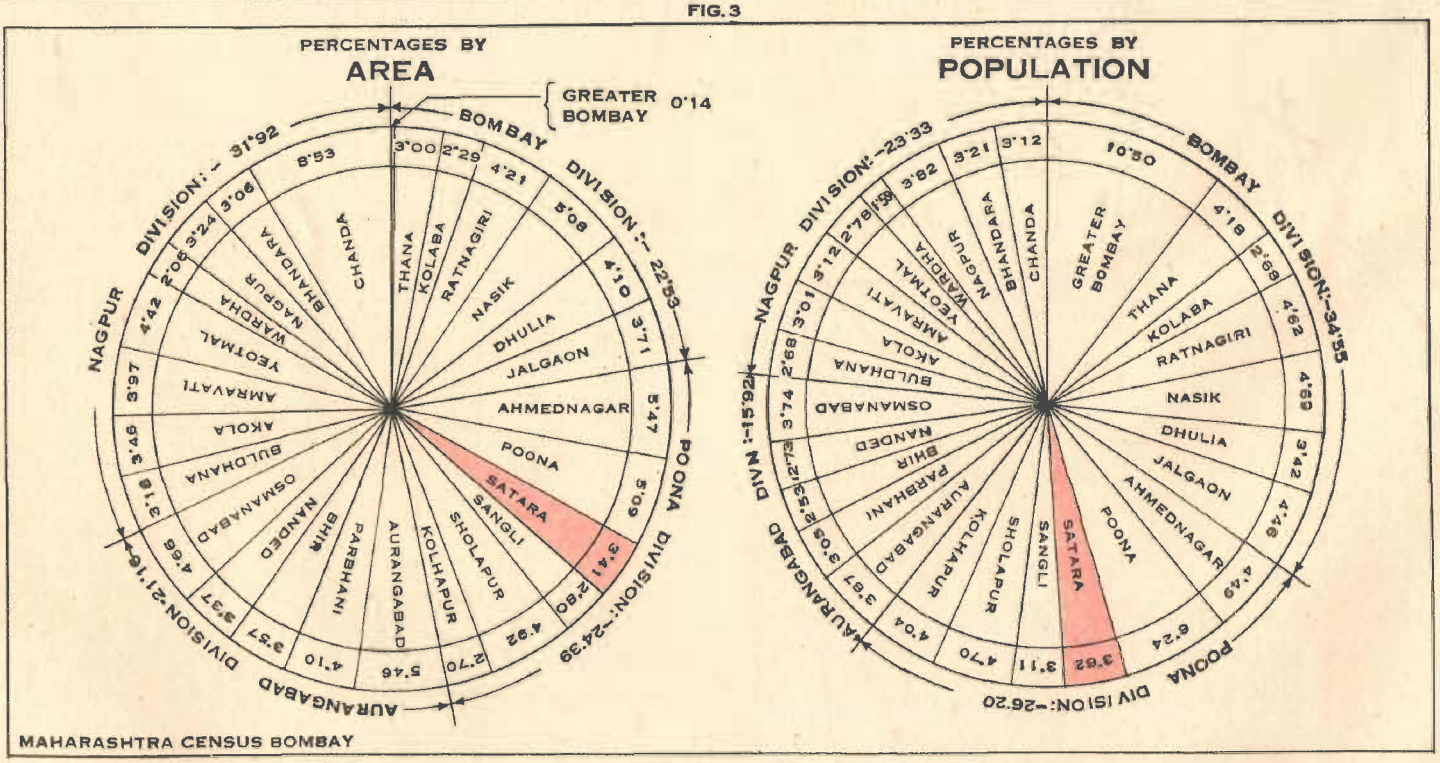

FIG. 3

MAHARASHTRA CENSUS BOMBAY

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

The district is situated partly in the Bhima river basin and partly in the Krishna river basin. Khandala mahal and Phaltan and Man talukas situated to the north and the east of Mahadeo hill ranges are in the Bhima basin and are served by Nira and Man rivers which are tributaries of the Bhima river. The rest of the district lies in the Upper Krishna basin.

Krishna river has a north-south direction parallel to the Sahyadri ranges. From Mahabaleshwar to Rahimatpur the valley is deep and narrow. Beyond Rahimatpur the valley opens out and forms a plain tract. South of Karad the plain further broadens out and merges in the well-known fertile triangle of Karad, Sangli and Kolhapur.

The district lies between 17° 5′ and 18° 11′ N. latitude and 73° 33′ and 74° 54′ E. longitude. It is surrounded by Poona district in the north, Sholapur district in the east, Sangli district to the south, and ranges of Sahyadri and beyond Sahyadri by Kolaba and Ratnagiri districts towards the west.

The area of the district is 4,029·7 square miles and its population in 1961 is 1,430,105. In terms of area and population the district makes 3·4 per cent and 3·6 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

There are two main systems of hills. The Sahyadri range and its off-shoots and the Mahadeo range and its off-shoots. The Sahyadri system includes the main range of the Sahyadris which with a length of sixty miles from north to south forms the western boundary of the district. The second system of Mahadeo hills, starts about ten miles north of Mahabaleshwar and stretches east and south-east across the whole breadth of the district. From the main range of the Mahadeo hills three spurs stretch to the south.

Except near Mahabaleshwar and Koyna valley, the hills are very low, barren and rugged. They form valleys through which several streams flow and make up the head water of the Krishna river. The off-shoots of the Sahyadri range separate the valleys of adjacent rivers, e.g., one of these off-shoots separates the main Krishna basin from the basin of Venna. Another separates the Venna basin from the basin of Tarali and still another separates the Tarali basin from that of the famous Koyna river.

Important Rivers

Krishna is the principal river of the region. The other important rivers are Koyna, Nira, Man, Venna, Kudali, Urmodi, Vasna, Yerla and Tarali.

Krishna rises in the eastern brow of Mahabalesh war plateau, with its source at about 4,500 feet above sea level. Of its 800 miles flow, nearly 100 miles lie within the limits of the district. The drainage system of the Krishna includes, besides the drainage of the central system, the drainage of five feeders from the right side, namely, Kudali, Venna, Urmodi, Tarali and Koyna and two feeders on the left, *viz.*, the Vasna and Yerla. Nira river which flows on the northern boundary of the district and Man which flows in the south-east are tributaries of Bhima, which itself meets Krishna about 300 miles downstream.

Koyna is the largest of Satara feeders of Krishna. It rises on the west side of the Mahabaleshwar plateau. In the first 40 miles of its course it runs nearly north-south up to Helwak in Patan taluka where the famous Koyna dam has been built. After that point it suddenly turns east and after a further course of 40 miles falls into Krishna at Karad.

Climate

Monthly temperature records are available only for one station at Mahabaleshwar which is over 4,000 feet above sea level (Table 1 in Part III). They do not naturally represent the climate of the district as a whole.

The rainy season starts from the middle of June and lasts up to the end of September. It is followed by sultry weather from the beginning of October to the middle of November, winter from the middle of November to the end of January, dry hot time in which easterly winds prevail from the beginning of February to the end of March and the hot weather from the beginning of April to the middle of June. On the whole, the seasons show considerable uniformity. They are not subject to abrupt changes or to extremes of heat or cold.

Within the district, the seasons show local variations also. The climate is cool and healthy in the hot weather in the western zone but becomes chilly during the rainy season. The plains of Wai taluka, however, have temperate climate throughout the year. The warmth increases as one proceeds from west to east. In the central part there is considerable heat during hot months. During the cold weather the days are warm and nights cool. The eastern zone has hotter climate than the central and western zones. It has a wider range of temperature variation from season to season and the climate there is in that respect more like the climate of Sholapur than that of Satara.

Rainfall

Table 2 in Part III shows talukawise figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall is not uniform in all parts of the district. It is heaviest in the regions of Sahyadri, with Mahabaleshwar getting on an average 6,000 mm. in the year. The western zone has sharp transitions in the rainfall pattern. The extreme west gets over 5,000 mm. rain while the eastern belt of the Sahyadri zone gets between 1,200 and 2,000 mm. The central or the transitional zone shows a further break from the western zone and gets a rainfall from 600 to 1,200 mm. The eastern zone has the lowest rainfall averaging to less than 600 mm. in the year.

The rains start about the middle of June and last till the end of September. The intensity of rainfall is greatest in July. Though the monsoon rains cease by the end of September, light drizzling intervals are not unusual till December.

The seasonal distribution of rainfall also varies from zone to zone. In the western zone, a major portion of the rainfall is in the south-west monsoonal period. This heavy rainfall in the Sahyadri area loses much of its economic value because of its concentration in a short period. The distribution changes in the central zone which also gets 150—175 mm. rainfall in October and November.

In the eastern zone the rainfall is low and precarious but it is distributed over a longer period. In the talukas of Khatav, Man and Phaltan which fall in this zone, the average rainfall for the years 1951—61 is about 500 mm. 80 to 100 mm. of this falls in October.

Dependability of Rainfall and Scarcity Areas

Parts of the district have been affected by scarcity from early times. The areas which have suffered in the past were in Khandala mahal and Man, Khatav, Koregaon and Phaltan talukas.

The Fact-Finding Committee appointed by the Government of Bombay in 1960 had reported that the rainfall is not dependable in the following areas and they are likely to be affected by scarcity conditions as shown below :—

Area	Grade	Estimated frequency
(1) Lonand Circle of Khandala Mahal.	B	Once in six years.
(2) Man Taluka	B	Once in six years.
(3) Southern part of Phaltan Taluka.	C	Once in ten years.
(4) Pussesavali and Vaduj Circles of Khatav Taluka.	C	Once in ten years.

Soils

In the western talukas of Mahabaleshwar, Wai, Jaoli and Patan the soil is formed from the red laterite of the ghats and is thin and poor on the hill slopes, but gets richer where natural or artificial terracing has accumulated soil and vegetable matter washed down by the rains. Rich black soils are, however, found in Wai, Jaoli and Patan talukas in low lands in the valleys of Krishna, Venna, Kudali, Koyna and Kole rivers.

The central portion of the district consists of medium to deep black alluvial soils. Krishna valley soils are said to be one of the richest in the Deccan and the portion which lies in Satara and Karad talukas is reported as the richest in the Krishna valley. For the most part it is the finest black alluvial soil highly retentive of moisture and very fertile.

In Khandala and Phaltan talukas, the soil is poor and stony in the vicinity of the hills but there are good black soils along the Nira and its tributary streams. In the eastern portion of Khandala, soils are poor, shallow and whitish but capable of producing wheat if enough water is available.

Towards the east of the Krishna valley, the soils get poorer and though there are wide stretches of good black soils along the numerous streams and rivers in Koregaon taluka the lands near the hills are very poor.

Further east in Khatav taluka, soils are of intermediate depth and more widely spreading than Man taluka but not as rich as in Koregaon taluka.

In Man taluka, the soils are extremely poor and shallow. Good soil is found only in narrow strips along the streams. But, between those streams lie wide stretches of *mal* (stony land) fit only for poor crops like Bajri or for grass. Grass grown on *mal* land is, however, of a better quality and accounts for a large number of cattle and sheep bred in the taluka.

The most remarkable fact is that in the two eastern talukas of Khatav and Man with an uncertain rainfall, water is reached within a moderate distance when wells are sunk. This makes sinking of wells comparatively easier and more profitable.

Minerals

Iron deposits are found in twenty villages of Jaoli taluka and thirty villages of Patan taluka in the murum or crumbled trap below the laterite.

The district is well supplied with stone for building and for road metal. The prevailing stone is trap in the plains and laterite on the hills. The trap is dark in colour and weighs 180 to 185 pounds per cubic foot. It is a hard compact stone well suited for masonry purposes.

Sand of good quality is found in the beds of all large streams on the plains. Limestone is found all over the district in the plains, especially near Wai. It occurs in seams along the banks of the rivers and is also found scattered as Kankar. Kankar, if properly burnt, makes a good mortar, but the river seams yield the best lime for building. Good clay for bricks and tiles is found in nearly all river banks.

Forests

An area of 574 sq. miles or 14·1 per cent of the geographical area of the district is under forests. It is scattered over the entire district. There are five forest ranges, *viz.*, Wai, Satara, Jaoli, Mahabaleshwar and Patan in the western zone. These forest ranges are fairly compact and have little cultivated land. The other five forest ranges are Khandala, Karad, Man, Khatav and Koregaon. They are on bare hills with a little scrub and teak here and there.

These forests belong to three groups: (i) the evergreen Sahyadri forests, (ii) the slopes of the off-shoots of Sahyadri hills that run east, and (iii) bush sprinkled hills to the east of Krishna.

The evergreen forests of the Sahyadri range form a belt along the west of the district six to fourteen miles broad. These forests extend without a break through the whole length of the district. They contain many trees valuable both as timber and firewood. The chief of these are Jambool, Anjan, Ain, Umbar, Kenja, Hirda, Phanas and Nara.

Teak mixed with brushwood is found in the second group of forest lands, *i.e.*, ranges which branch east from the Sahyadris. These forests are much broken by patches of cultivated land. The forests of the third group are only sprinkled with bush and are very much scattered.

Natural Zones

The district can be broadly divided into three zones. The western zone or Maval has very heavy rainfall, thick forests and a large proportion of rice lands. It makes one-fourth area of the district and comprises the hilly talukas of Patan, Jaoli, Mahabaleshwar and also the western portions of Satara and Wai talukas. The central zone making about half of the district area contains the fertile agricultural tracts of the district growing jowar, groundnut and sugarcane. The north-eastern zone is the scarcity area consisting of the talukas of Phaltan and Man and Khandala mahal. It has low rainfall and shallow soils. Main crop is Bajri though wheat and sugarcane are grown on irrigated lands.

Irrigation facilities are developed in all the zones. Rain-water is utilised for rice cultivation in the western zone. The central and eastern zones have irrigation under canals and wells. Areas irrigated by canals stand out as the most developed areas in the district.

ADMINISTRATIVE SET-UP

Brief History

Satara district was formed in 1848. It was first called a province and not a Collectorate. It had the following 11 sub-divisions: Bijapur (now in Mysore State), Jaoli, Karad, Khanapur, Khatav, Koregaon, Pandharpur, Satara, Targaon, Valva and Wai. In 1856, 12 new mahals were formed as follows: Pimpaude in Koregaon, Khandala in Wai, Bamnoli in Jaoli, Kole in Karad, Shirala and Peth in Valva, Helvak in Targaon, Mayni in Khanapur, Natepute and Pusegaon in Khatav and Sangola and Bhalvani in Pandharpur. In 1862, the boundaries of the sub-divisions were again overhauled and the district was divided in the following sub-divisions: Bijapur, Jaoli, Karad, Khanapur, Khatav, Koregaon, Malshiras, Man, Pandharpur, Patan, Satara, Targaon, Valva, Wai and Khandala peta in Wai and Shirala peta in Valva. Bijapur sub-division was transferred to Belgaum district in 1862. Tasgaon taluka was transferred to Satara district from Belgaum in 1863. Pandharpur was transferred to Sholapur in 1864. Targaon sub-division was abolished in 1867. Malshiras was transferred to Sholapur in 1875. Malcompeth peta was formed in 1884.

Khandala peta was abolished in the year 1927. Malcompeth peta was named as Mahabaleshwar. Khandala peta was reconstituted in the year 1947.

Consequent upon the merger of former Indian States, parts of Phaltan, Jamkhandi, Akalkot, Bhor, Aundh and Sangli and one village from Poona district were added. A new taluka of Phaltan was created in 1949. Four talukas of Khanapur, Tasgaon, Valva and Shirala peta were transferred to the new district of South Satara with headquarters at Sangli in 1949. The remaining portion of the district was called North Satara district.

One village from Khanapur taluka of Sangli district was transferred to Karad taluka in 1958.

With the Reorganisation of States in 1956 the district was included in Bombay State. Since 1960, it forms a part of Maharashtra.

The name of the district was changed from North Satara district to Satara district in 1960.

Present Set-up

For administrative purposes, the district is at present divided in 9 talukas and 2 mahals. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka and mahal are as follows :—

District/Taluka	Name of Headquarters	Area in sq. miles	Number of inhabited villages	Number of towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
SATARA DISTRICT	Satara	4,029·7	1,160	10	1,430,105	100·0	100·0
1 Khandala Mahal	Khandala	203·3	46	*Nil*	63,164	5·0	4·4
2 Phaltan Taluka	Phaltan	455·8	79	1	140,102	11·3	9·8
3 Wai Taluka	Wai	229·1	91	1	104,746	5·7	7·3
4 Mahabaleshwar Mahal	Mahabaleshwar ..	87·3	54	2	24,370	2·2	1·7
5 Jaoli Taluka	Medha	344·7	194	*Nil*	80,091	8·6	5·6
6 Koregaon Taluka	Koregaon	364·6	74	2	138,838	9·1	9·7
7 Khatav Taluka	Vaduj	509·1	89	*Nil*	155,930	12·6	10·9
8 Man Taluka	Dahivadi	556·0	70	1	99,410	13·8	7·0
9 Satara Taluka	Satara	353·4	151	2	191,313	8·8	13·4
10 Patan Taluka	Patan	513·5	197	*Nil*	180,501	12·7	12·6
11 Karad Taluka	Karad	412·9	115	1	251,640	10·2	17·6

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and three Deputy Collectors who hold charge of the three revenue divisions and have their headquarters at Satara, Phaltan and Mahabaleshwar, respectively. Nine Mamlatdars are in charge of nine taluka offices and two Mahalkaries in charge of the two Mahal offices.

Land Revenue Settlements

The original Revenue Survey and Settlement of different talukas in the district was completed between 1852 and 1863. The First Revision Settlement was completed between 1891 and 1892 and the Second Revision Settlement between 1926 and 1927. The land revenue rates have not been revised since then in spite of the expiry of the terms of the revision settlements.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during the second revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlements untaxed. The comparative incidence of land revenue from field to field is thus generally the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small bandharas, the land revenue is integrated and is inclusive of the charge for water supplied. For lands irrigated under Government Canals, the land revenue at dry land rates is assessed and recovered by the Revenue Department while the water rates determined annually on the basis of actual crops raised are assessed by the Irrigation Department and recovered by the Revenue Department.

Table 24 in Part III shows demand and collection of land revenue during the ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam or Jagir villages had not been covered by most of them. In fact, some of the Inam or Jagir villages were unsurveyed and unsettled as late as in 1947. That work has now been completed. Because of such recently settled villages and because of the territorial changes in the taluka boundaries from time to time, most of the talukas today have a more varied pattern of land revenue assessments than what is seen in the reports of earlier settlements. Even then the maximum rates fixed at each settlement or revision settlement or the average land revenue rates per acre should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. Those rates for dry, garden or rice lands for each taluka are as follows :

Taluka	Original settlement or Revision settlement	Year	Guarantee period	No. of villages	Average land revenue per acre	Group	Villages	Maximum rates per acre		
								Dry lands	Garden lands	Rice lands
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
			Years		Rs. nP.			Rs. nP.	Rs. nP.	Rs. nP.

Assembly and Parliamentary Constituencies

Since 1957 the district has 10 Assembly seats. In 1957, the Phaltan constituency was a double-member constituency with one of the two seats reserved for Scheduled Castes. After the abolition of the double-member constituencies in 1961, the seat from Man is reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly constituency	Number of voters on rolls
1 Wai	71,818
2 Satara	70,729
3 Koregaon	67,129
4 Khatav	74,562
5 Phaltan	71,243
6 Man	68,588
7 Karad North	71,988
8 Karad South	62,460
9 Patan	69,893
10 Jaoli	55,306
Total ...	683,716

In the 1962 General Elections, the Assembly constituencies Wai, Satara, Koregaon, Khatav, Phaltan and Man together made one Parliamentary constituency called Satara constituency and the remaining Assembly constituencies Karad South, Karad North, Patan and Jaoli combined with Assembly constituencies Walva and Shirala from Sangli district made another Parliamentary constituency called Karad constituency.

The total number of voters on rolls in the district in 1961 was 683,716. The total population 21 years and above according to the 1961 Census is 659,590. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The Judiciary is separated from the Executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Mamlatdars are vested with Magisterial powers. But those powers are limited to Chapters VIII, IX, X, XI and XII of the Criminal Procedure Code and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other Magistrates who try criminal cases in the district. This separation of Judiciary from the Executive was brought about in the year 1953.

The District and Sessions Judge is assisted by two Assistant Judges and Additional Sessions Judges. They have jurisdiction over the entire district. They attend to Civil and Criminal work both original and appellate.

The Civil Judge (Senior Division) attends to Civil suits in the whole district in which value of subject-matter is above Rs. 10,000. He also deals with Small Cause suits up to Rs. 800, Hindu marriage petitions, Land Acquisition cases, Insolvency petitions, cases under Workmen's Compensation Act and contested cases under the Indian Succession Act.

There are 10 Civil Judges (Junior Division) and First Class Judicial Magistrates with headquarters at different Taluka places. They deal with Civil suits of value of subject-matter below Rs. 10,000, cases under Payment of Wages Act, uncontested applications under Indian Succession Act and Small Cause suits up to Rs. 500, arising within their respective jurisdictions. They also try Criminal cases triable by a First Class Magistrate.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by 2 Deputy Superintendents and 2 Circle Inspectors. There are 20 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

		Police Station Headquarters	No. of Villages
Satara Taluka	1	Satara City	4
	2	Satara Taluka.. ..	107
	3	Borgaon	43
Jaoli Taluka	4	Medha	196
Mahabaleshwar Mahal	5	Mahabaleshwar ..	58
Wai Taluka	6	Wai	91
Khandala Mahal ..	7	Khandala	32
	8	Lonand	35
Phaltan Taluka ..	9	Phaltan	58
Koregaon Taluka ..	10	Koregaon	76
Khatav Taluka ..	11	Vaduj	40
	12	Aundh	50
Man Taluka	13	Dahiwadi	39
	14	Mhaswad	32
Karad Taluka	15	Karad Town	20
	16	Karad Taluka.. ..	53
	17	Umbraj	68
Patan Taluka	18	Patan	89
	19	Koyna Nagar ..	61
	20	Dhebewadi	33

Average number of villages and population per Police Station in the district is 59 and 71,505 against 69 and 62,547 in the State, respectively.

Crime statistics for the District for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

Nine out of 10 towns in the district have Municipal Committees established under Bombay Municipal Boroughs Act, 1925, and Bombay District Municipal Act, 1901. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and for Women are shown below for each Municipality separately :—

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 Population	Total No. of Municipal Councillors	Seats reserved for	
							Scheduled Castes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1	Panchgani	1910	1961	5	5,725	14	3	1
2	Wai	1854	1961	5	17,826	15	1	2
3	Rahimatpur	1853	1961	5	9,160	15	1	2
4	Satara City Borough	1853	1957	5	44,353	33	3	3
5	Mhasvad	1851	1960	5	10,405	15	2	2
6	Phaltan	1868	1962	5	19,003	16	2	2
7	Karad Borough	1855	1962	5	33,772	27	1	3
8	Satara Suburban	1890	1959	5	4,356	12	3	1
9	Mahabaleshwar	1867	1959	5	6,029	12	1	1

Satara City Borough and Satara Suburban Municipalities have been amalgamated with effect from 1st November 1962. The present term of the new board expires on 1st October 1963.

The Prant Officer, Mahabaleshwar Division, is an *ex-officio* President of Mahabaleshwar Municipality and the Mahalkari of Mahabaleshwar is an *ex-officio* member of the Municipal Board. Thus out of the 12 seats, 2 seats are held by nominated members.

The Prant Officer, Mahabaleshwar Division, is an *ex-officio* member of the Panchgani Municipality. Thus out of the 14 seats, one seat is held by a nominated member.

Five of the nine Municipalities are more than a hundred years old. The youngest is also more than fifty years old.

The nine Municipalities together cover 95·08 per cent of the urban population or 10·53 per cent of the total 1961 population of the district. Only one remaining town, *viz.*, Satara Road does not have a Municipality.

The taxation level of each of the Municipalities is shown below :—

Name of the Municipality	1961 Population	Year 1961-62		
		Total Receipts	Receipts from Municipal taxes	Per capita Municipal tax
		Rs.	Rs.	Rs. nP.
1 Panchgani	5,725	2,10,109	1,80,433	31 52
2 Wai	17,826	2,23,152	1,96,834	11 04
3 Rahimatpur	9,160	59,780	30,719	3 35
4 Satara City Borough.	44,353	12,02,802	9,71,226	21 90
5 Mhasvad	10,405	1,13,158	85,945	8 26
6 Phaltan	19,003	2,53,087	2,50,228	13 17
7 Karad Borough	33,772	16,87,571	16,16,011	47 85
8 Satara Suburban	4,356	87,571	71,981	16 52
9 Mahabaleshwar	6,029	3,55,464	2,46,999	40 97

Per capita Municipal tax appears to be high at Mahabaleshwar and Panchgani but they are hill stations and much of the incidence falls on the tourists.

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 11 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of Zilla Parishad and the Panchayat Samitis correspond to the district and taluka boundaries separately except in the case of Municipal towns which are not covered by them. One town, *viz.*, Satara Road which does not have a Municipal Committee but which is treated as a town in the 1961 Census is however included under the jurisdiction of the Zilla Parishad and the Panchayat Samiti concerned. The Zilla Parishad covers 97·12 per cent of the area and 89·46 per cent of the total population of the district. The population covered by Zilla Parishad includes the

entire rural population and 4·92 per cent of the urban population of the district in 1961. The number of villages, number of non-municipal towns and population included under the Zilla Parishad and each Panchayat Samiti are shown below. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961 :—

——	Name of Headquarters	Area in sq. miles	No. of inhabited villages	No. of non-municipal towns	Population in 1961	Percentage by area	Percentage by population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Zilla Parishad, Satara	Satara	3,914·2	1,160	1	1,279,476	100·0	100·0
1 Khandala Panchayat Samiti ..	Khandala	203·3	46	..	63,164	5·2	4·9
2 Phaltan Panchayat Samiti	Phaltan	425·5	79	..	121,099	10·9	9·5
3 Wai Panchayat Samiti	Wai	217·8	91	..	86,920	5·6	6·8
4 Mahabaleshwar Panchayat Samiti ..	Mahabaleshwar	72·2	54	..	12,616	1·8	1·0
5 Jaoli Panchayat Samiti	Medha	344·7	194	..	80,091	8·8	6·3
6 Koregaon Panchayat Samiti ..	Koregaon	352·3	74	1	129,678	9·0	10·1
7 Khatav Panchayat Samiti ..	Vaduj	509·1	89	..	155,930	13·0	12·2
8 Man Panchayat Samiti	Dahivadi	521·9	70	..	89,005	13·4	7·0
9 Satara Panchayat Samiti	Satara	349·8	151	..	142,604	8·9	11·1
10 Patan Panchayat Samiti	Patan	513·5	197	..	180,501	13·1	14·1
11 Karad Panchayat Samiti	Karad	404·1	115	..	217,868	10·3	17·0

Constitution

The Zilla Parishad has 54 directly elected councillors. Out of these 54 seats, 3 seats are reserved for Scheduled Castes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of three Panchayat Samitis are also *ex-officio* councillors. The chairmen of other eight Panchayat Samitis are out of the elected councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a chairman of a co-operative society conducting the business of purchase or sale of agricultural produce in the area of the block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of Village Panchayats are elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the Block.

Elections were held in 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two subject committees are presided by the Vice-President and four by two chairmen elected by the Zilla Parishad to preside over two specified subject committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the subject committees concerned. Co-ordination between the subject committees is achieved through the standing committee which includes the Chairmen of all the subject committees as members.

The Panchayat Samitis do not have subject committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy

Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now with the creation of these democratic bodies at the district and block level devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities at the district level but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Station, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayats, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Local Board, District School Board and District Panchayat Mandal. The functions of the non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as Municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan Schemes. If in pursuance of the proposal of a Zilla Parishad or of a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in a block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 178·8 lakhs. The major portion of the receipts is of receipts from Government. They are 94·5 per cent and the Zilla Parishad receipts are 5·5 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 181 lakhs. Following are the major items of expenditure :—

General Administration	...	3·7 per cent.
Education	...	59·9 ,, ,,
Community Development Project		9·3 ,, ,,
Buildings and Communications	...	10·4 ,, ,,
Miscellaneous	...	5·0 ,, ,,
Other items	...	11·7 ,, ,,

No new taxation measures were introduced by the Zilla Parishad during the year 1963-64.

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 4 Class I and 35 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV category is 7,389. Moreover an establishment of 178 gram sevaks, 314 talatics, 371 village panchayat secretaries and 1,901 kotvals has very recently been transferred from the Revenue Department to the Zilla Parishad.

VILLAGE PANCHAYATS

The number of independent village panchayats, group village panchayats and the number of villages covered by the group village panchayats are shown below :—

Taluka	No. of inhabited villages and non-municipal towns	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1 Khandala Mahal ..	46	25	9	21
2 Phaltan	79	50	13	29
3 Wai	91	39	17	49
4 Mahabaleshwar Mahal	54	..	11	54
5 Jaoli	194	18	34	133
6 Koregaon	74+1	70	2	5
7 Khatav	89	50	18	39
8 Man	70	40	13	30
9 Satara	151	69	25	81
10 Patan	197	71	43	118
11 Karad	115	100	7	14
Total ..	1,160+1	532	192	573

Most of the villages in the district are thus covered by village panchayats. The exceptions are the forest or revenue villages in Patan and Jaoli talukas which are likely to be submerged under the Koyna Project.

The break-up of the total annual income of all the Village Panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (In '000)	Percentage of total income
	Rs.	
Grants	1,048	48·68
Taxes on houses and properties	287	13·33
Octroi	74	3·44
Other taxes	419	19·46
Total taxes	780	36·23
Income from other sources	325	15·09
Total Income	2,153	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The Village Panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The Village Panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

The break-up of the total annual expenditure of all the Village Panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (In '000)	Percentage of total expenditure
	Rs.	
Administration	419	22·47
Health and Sanitation	174	9·33
Public Lighting	148	7·93
Other Items	1,124	60·27
Total Expenditure	1,865	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of Panchayat Ghars, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

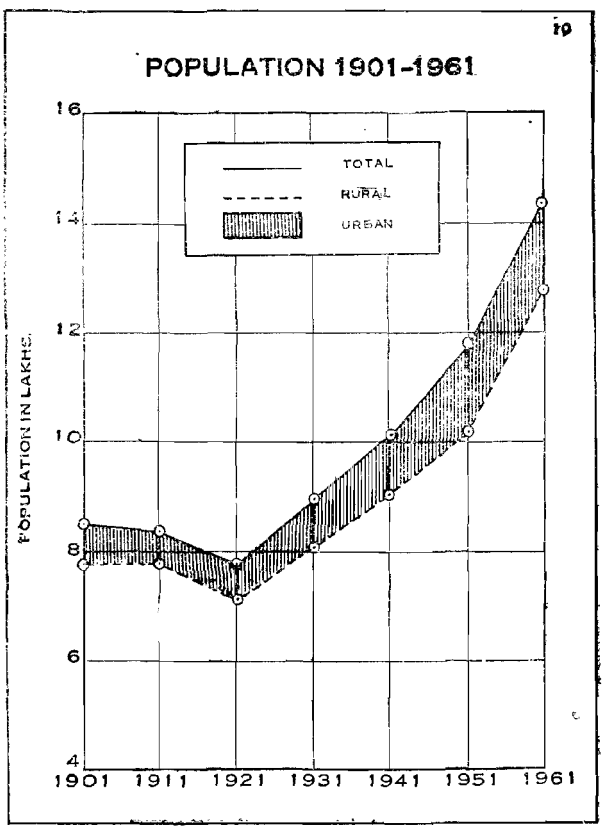

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—61.

Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Variation	Rate of variation
1901	849,672	..	..
1911	835,337	−14,335	−1·69
1921	786,436	−48,901	−5·85
1931	895,014	+108,578	+13·81
1941	1,013,212	+118,198	+13·21
1951	1,177,016	+163,804	+16·17
1961	1,430,105	+253,089	+21·50

Figure below shows the total, rural and urban population of the district for the last seven Censuses :—

Because of the draughts and famines the population of the district had actually decreased by 1·7 per cent in the decade 1901—11. In the following decade, the severe influenza epidemic took a heavy toll of life which was reflected in a decrease of 5·9 per cent in the population. Conditions improved after 1921 and there has been a distinct change in the trend of variation since then. The rate of growth has been consistent at 13·8 per cent in 1921—31, 13·2 per cent in 1931—41, 16·2 per cent in 1941—51. In the last decade (1951—61) the growth has, however, been at a very high rate of 21·5 per cent. Though that rate of growth of population is lower than the State average, the population of the district will, with that rate, be nearly double that of 1961 in the year 1991.

This significant increase in the growth rate during the decade 1951—61 is the result of control of epidemics and other diseases since 1950. Malaria, which used to be a major public health problem in the district, has now been controlled. Mass campaigns for BCG and vaccination against smallpox have their share in improving the survival rate. The death rate has thus been reduced and has resulted in the higher growth rate although the birth rate may not have increased at all.

The 1951—61 decade variation for the district and each of the talukas is as follows :—

	Percentage Variation 1951—61
SATARA DISTRICT	+21·50
1 Khandala Mahal	+31·33
2 Phaltan Taluka	+40·41
3 Wai Taluka	+18·71
4 Mahabaleshwar Mahal	+19·18
5 Jaoli Taluka	+12·67
6 Koregaon Taluka	+20·01
7 Khatav Taluka	+18·70
8 Man Taluka	+19·09
9 Satara Taluka	+17·71
10 Patan Taluka	+23·05
11 Karad Taluka	+20·05

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Satara	Maharashtra
1901—61	68·31	103·97
1921—61	81·84	89·71
1951—61	21·50	23·59

The district growth rates have always been lower than Maharashtra averages. This was due partly to the out-migration from the district to Greater Bombay.

Figure to the right shows the areawise pattern of 1951—61 growth of population within the district.

There are wide differences in the decade rates of variation of different talukas. Phaltan taluka recorded the highest increase (40·4 per cent) while Jaoli taluka had the lowest increase (12·7 per cent) over 1951. Phaltan and Patan talukas and Khandala Mahal are above the district average and the remaining talukas are below that average. The higher rate of growth in Patan taluka is due to the Koyna Project labour camps. Phaltan shows a very high rate because of expansion in sugarcane cultivation and labourers migrating from nearby areas temporarily to sugarcane farms, factories and on canal work. Out-migration to Bombay and internal migration for seasonal work are discussed later in this note. Talukas of Wai, Satara, Jaoli and Patan appear to be the areas sending large numbers of migrants outside the district.

FIG 8

The density of population has increased sharply from 195 to 355 during the last forty years. Satara density has always been higher than the State average.

Density of Population

The densities for Maharashtra, Satara district and its talukas for 1951 and 1961 are as follows :—

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA	271	334	..
SATARA DISTRICT ..	292	355	100·00
1 Khandala Mahal	237	311	4·42
2 Phaltan Taluka	219	307	9·80
3 Wai Taluka	385	457	7·32
4 Mahabaleshwar Mahal ..	234	279	1·70
5 Jaoli Taluka	206	232	5·60
6 Koregaon Taluka ..	317	381	9·71
7 Khatav Taluka	258	306	10·90
8 Man Taluka	150	179	6·95
9 Satara Taluka	460	541	13·38
10 Patan Taluka	286	352	12·62
11 Karad Taluka	508	609	17·60

Figure on page (13) shows the approximate contours of density of population in 1961 within the district.

Density of population varies from 609 persons per square mile in Karad taluka to 179 persons per square mile in Man taluka. The differences correspond to those of topography and land utilisation. The central zone consisting of rich soils on the Krishna river bank and high proportion of net sown area to geographical area has the highest density of population. In fact, Karad taluka is a part of the most densely populated region in Maharashtra. The density is reduced on both sides of the central zone. The reduction towards the east is, however, sharper because of poorer soils and chronic scarcity conditions in Man taluka. Western talukas have more lands under paddy cultivation because of higher rainfall and the fall in the density towards the west is not, therefore, as sharp as towards the east.

The talukas which have high percentage of the district population are also the areas of relatively higher density. The highest concentration of population is in Karad taluka which makes 17·60 per cent of the district population against only 10·25 per cent

of its area. Man taluka, on the other hand, has only 6·95 per cent of the district population against 13·8 per cent of its area. Wai, Koregaon, Satara and Karad talukas together make only one-third of the district area but contain nearly half the population of the district.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

Year	Satara District			Maharashtra		
	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901	7	..	8·63	219	..	16·59
1911	9	—22·68	6·79	232	+0·99	15·13
1921	10	+32·75	9·57	238	+18·72	18·50
1931	9	+15·08	9·68	258	+15·54	18·60
1941	9	+27·80	10·93	266	+27·11	21·11
1951	15	+44·84	13·62	383	+62·42	28·75
1961	10	—1·19	11·08	266	+21·32	28·22

In the figure on page (11), the actual urban population of the district since 1901 is shown by the shaded portion between the two lines.

The net growth in urban population of the district over that of 1901 is 116·03 per cent as against 246·96 per cent for the State.

Satara is less urbanised than Maharashtra State. The proportion of urban population decreased both for the district and the State in 1911. Since then it gradually increased to an all time high value in 1951. There was a decrease in the last decade. The number of towns had also increased continuously since 1901 till 1951. The drop in the number of towns in 1961 was due to the declassification of five towns because of the redefinition of urban areas in 1961. The five declassified towns are Koregaon, Kaledhon, Vaduj, Kale and Masure. There was no addition of any new town in 1961. The population of declassified towns was 32,150 or 20 per cent of the urban population in 1951. If population of those towns is excluded from the 1951 urban population the 1961 urban population would be higher by 23·6 per cent over 1951. The net decrease of 1·19 per cent now seen in the table above is thus due solely to the change of the definition of urban areas and the declassification of five towns.

Satara and Karad are the two important towns in the district. The population of Satara town-group has increased by 87·18 per cent over 1901 and 116·9 per cent over 1921. For Karad, the growth is 193·7 per cent over 1901 and 200·1 per cent over 1921. The population of the remaining towns taken together increased by 112 per cent since 1901. There was a serious set back in the population of all the towns in the decade 1901—11. During that decade the population of Wai had decreased by 61·9 per cent and that of Phaltan by 47·6 per cent.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows :—

Year	Satara District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	..	91·37	..	83·41
1911	0·30	93·21	12·68	84·87
1921	−8·66	90·43	−6·77	81·50
1931	13·67	90·32	14·77	81·40
1941	11·64	89·07	8·54	78·89
1951	12·65	86·38	7·72	71·25
1961	25·08	88·92	24·51	71·78

The net increase in rural population of the district has been 63·80 per cent over that of 1901 and 78·82 per cent over that of 1921. The same figures for the State are 75·53 per cent and 67·08 per cent, respectively. The rates of variation of the rural population have never followed any trend. The urban population had grown faster at the expense of rural population. As a result, the rural population increased at a lower rate than the total population. The percentage of rural population gradually decreased both for the district and the State since 1911, only in 1961 it has shown an opposite trend. That was partly due to the declassification of five towns and addition of their 1961 population in the rural population.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Satara District		Maharashtra	
	Percentage of the No. of villages to total No. of villages	Percentage of population to total rural population	Percentage of the No. of villages to total No. of villages	Percentage of population to total rural population
Less than 500 ..	36·55	8·64	47·72	15·02
500—999 ..	24·83	16·51	28·55	25·71
1,000—1,999 ..	23·79	30·55	16·62	28·55
2,000—4,999 ..	12·93	33·32	6·18	22·40
5,000 and over	1·90	10·98	0·93	8·32

Villages with less than 1,000 population are 61·38 per cent of the total number of villages in the district and have 25·14 per cent of the rural population. Villages with more than 1,000 population are 38·62 per cent of the total number of villages and account for 74·86 per cent of the rural population. Thus, one-third of the rural population of the district is concentrated in villages with population between 2,000—4,999.

The area, number of inhabited villages, total rural population, average population per village and the number of villages per 100 square miles are shown below for the State, district and each taluka separately :—

State/District/Taluka	Area in square miles (rural)	Number of inhabited villages	Rural population	Average population per inhabited village	Number of inhabited villages per 100 square miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31·0
SATARA DISTRICT	3,906·6	1,160	1,271,678	1,096	29·7
1 Khandala Mahal	203·3	46	63,164	1,373	22·6
2 Phaltan Taluka	425·5	79	121,099	1,533	18·6
3 Wai Taluka	217·8	91	86,920	955	41·8
4 Mahabaleshwar Mahal	72·2	54	12,616	234	74·8
5 Jaoli Taluka	344·7	194	80,091	413	56·3
6 Koregaon Taluka	344·7	74	121,880	1,647	21·5
7 Khatav Taluka	509·1	89	155,930	1,752	17·5
8 Man Taluka	521·9	70	89,005	1,272	13·4
9 Satara Taluka	349·8	151	142,604	944	43·2
10 Patan Taluka	513·5	197	180,501	916	38·4
11 Karad Taluka	404·1	115	217,868	1,895	28·5

Average population per village in 1961 is 1,096 in the district against 792 in Maharashtra. The average population per village within the district varied from 234 in Mahabaleshwar Mahal to 1,895 in Karad taluka. The number of villages per 100 sq. miles was 29·7 in the district and 31·0 in Maharashtra. In the western hilly zone, there are small villages situated very close to each other, while in the central and eastern plains they are comparatively larger but away from each other. This difference may also be seen in the various Taluka maps included in Part I.

The village described here is an administrative unit. It does not, in many cases, make one single residential unit and consists of two or more hamlets

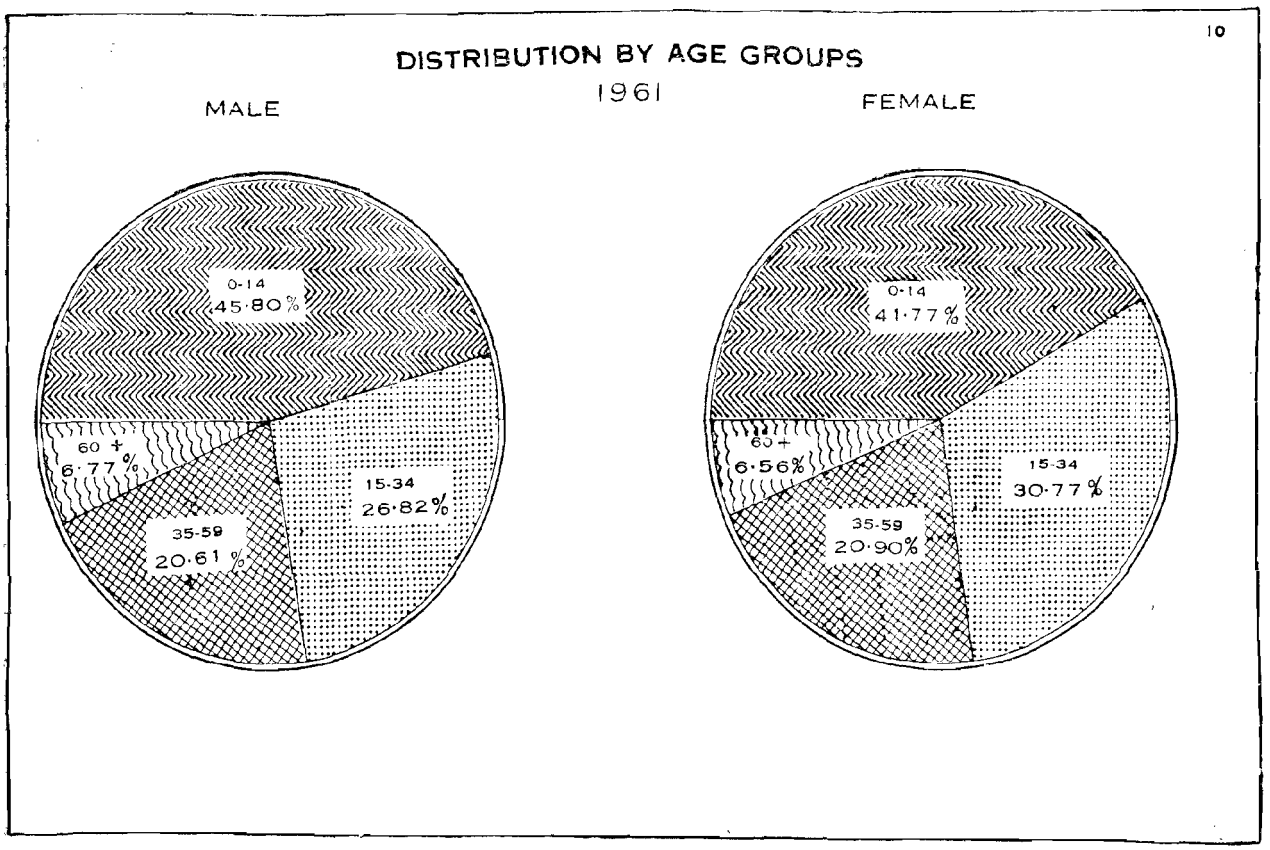

situated at a distance from the main village gaothan or *abadi*. In the 1931 Census Report, Jaoli taluka was reported as having 196 villages but 315 inhabited places, Karad with 101 villages and 231 inhabited places and Satara with 151 villages and 233 inhabited places. Hamlets have not been counted since 1931.

Age Distribution

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 are shown below separately for males and females compared with the corresponding proportions for 1951.

Age-groups	Percentages of population by age-groups			
	1951		1961	
	Males	Females	Males	Females
0—4 ..	17·99	13·22	16·41	15·01
5—14 ..	29·56	23·71	29·39	26·75
0—14 ..	47·55	36·93	45·80	41·76
15—34 ..	25·83	34·59	26·82	30·77
35—59 ..	20·90	22·15	20·61	20·90
15—59 ..	46·73	56·74	47·43	51·67
60 and more ..	5·72	6·33	6·77	6·57
Total ..	100·00	100·00	100·00	100·00

Figure below shows the distribution of the district population by broad age-groups for males and females separately :—

A marked change in the age distribution from 1951 to 1961 is the reduction of the wide disparity in the proportions for males and females for different age-groups. The distribution is nearer the normal in 1961 than 1951. This change may have come because—

(i) the out-migration of males in 15—59 age-group may have been smaller than the previous decade;

(ii) the out-migration of females in the corresponding age-groups may have been more than the past decade; and

(iii) the in-migration of males in 15—59 age-group for Koyna Project and other works may have now partly set off the effects of the traditional out-migration of males.

During the last decade, the proportion of children aged 0—4 decreased from 17·99 per cent to 16·41 per cent for males while it increased from 13·22 per cent to 15·01 per cent for females. The same trend is seen for age-group 5—14. In contrast, the proportion for 15—59 age-group increased from 46·73 to 47·43 per cent for males and decreased from 56·74 to 51·67 per cent for females.

The proportion of males of age-group 15—59 is 47·43 per cent in the district against 54·79 per cent for Maharashtra. The difference which can be attributed to the large number of people migrating for work to Bombay and other places would have been wider but for the compensatory factor of in-migration to Koyna Project. Out-migration from the district is discussed later in this note.

Dependency Ratio

The ratio between dependents (age-groups 0—14 and 60+) and 100 of supporting (group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State, separately:—

		Satara District			Maharashtra		
		Youth	Aged	Total	Youth	Aged	Total
1951	Total ..	81·3	11·6	92·9	69·9	9·3	79·2
1961	Total ..	88·2	13·4	101·6	75·2	9·7	84·9
	Rural ..	89·6	13·9	103·5	80·6	10·8	91·4
	Urban ..	78·0	9·9	87·9	63·1	7·3	70·4

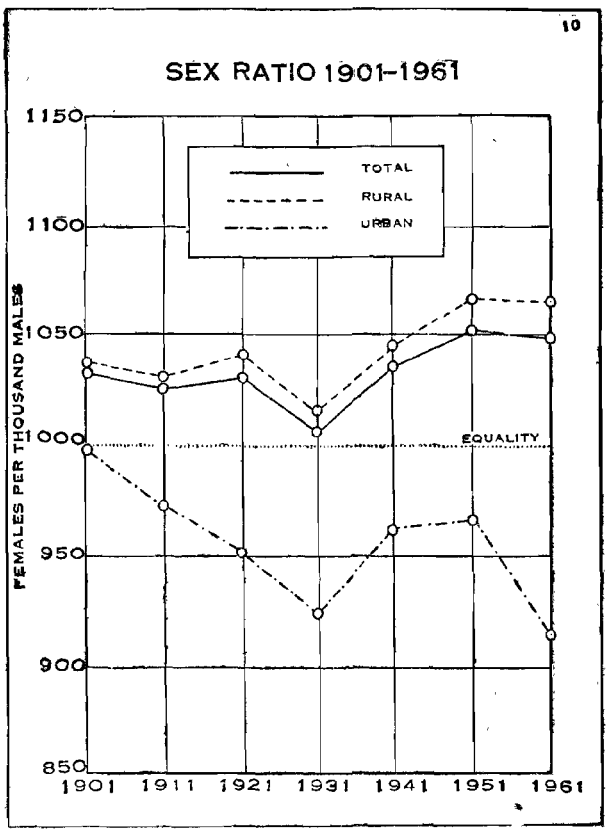

The dependency ratios are higher in Satara district than those for Maharashtra. It is because a part of the supporting population migrates for work out of the district. The dependency ratios for the State and the district are both higher in 1961 than those of 1951. Both the components of youth and aged have increased. The increase in dependency may be the result both of high fertility and declining mortality. The 1961 population in the district thus has a larger load of dependents than that of 1951. The dependency load is, moreover, larger in rural areas than urban areas. It is the effect of the differences in age structure of rural and urban population resulting from the migration of working age (15—59) people from rural to urban areas within and outside the district.

Sex Ratios

The following have been the sex ratios (No. of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately:—

	Satara District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	1,031	1,034	997	978	1,002	866
1911 ..	1,025	1,029	973	966	1,000	796
1921 ..	1,030	1,039	949	950	994	776
1931 ..	1,006	1,015	923	947	987	790
1941 ..	1,035	1,044	961	949	990	810
1951 ..	1,051	1,066	965	941	1,000	807
1961 ..	1,047	1,065	913	936	995	801

Figure in the next column shows the variation in the sex ratios since 1901 for the district total, rural and urban areas separately.

Since 1901, the sex ratio of the population of the district varied between 1,006 and 1,051 while that of Maharashtra varied between 936 and 978. At each census, Satara district has recorded a higher sex ratio than the State, *i.e.*, the district always has comparatively more females than the State average. It was due to the out-migration of males from the district. On the other hand, Maharashtra taken as a whole, has had a net in-migration of males.

1931 had recorded a sex ratio of 1,006 in the district which was very near equality. It was when many textile mills in Bombay had closed because of the slump and Satara labourers had returned home.

Rural urban differences in sex ratios indicate that out-migration is much more from rural areas than urban areas of the district.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas:—

Age-groups	Total	Rural	Urban
0—14	955	958	931
15—34	1,202	1,256	887
35—59	1,062	1,083	904
60+	1,016	1,021	966
All ages	1,047	1,065	913

Except for the age-group 0—14, the sex ratios are very high in rural areas compared to those in urban areas. The sex ratios of total population for all age-groups except 0—14 are higher than equality. This confirms a net out-migration of males of working age-group 15—59. The abnormal

sex ratio of 1,256 for age-group 15—34 in rural areas shows the out-migration of young adult males both for education and work. This can be seen from the wide differences in the age structure for males in rural and urban areas, while the age structure for females is more or less similar in rural and urban areas. The sex ratios for each taluka in the district for total, rural and urban areas separately are as follows.

Wai, Jaoli, Satara and Patan talukas have very high sex ratios and appear to be mainly contributing to the flow of out-migration from the district.

		Total	Rural	Urban
SATARA DISTRICT..		1,047	1,065	913
1	Khandala Mahal ..	1,024	1,024	..
2	Phaltan Taluka ..	982	1,000	872
3	Wai Taluka ..	1,128	1,156	1,004
4	Mahabaleshwar Mahal.	989	1,090	891
5	Jaoli Taluka ..	1,211	1,211	..
6	Koregaon Taluka ..	1,062	1,079	948
7	Khatav Taluka ..	1,042	1,042	..
8	Man Taluka ..	1,017	1,018	1,010
9	Satara Taluka ..	1,065	1,127	903
10	Patan Taluka ..	1,072	1,072	..
11	Karad Taluka ..	994	1,015	868

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951 :—

Year	Age-groups	Total	Marital status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14 ..	100	99·32	91·05	0·67	8·71	0·01	0·23	..	0·01
	15—34 ..	100	51·69	4·70	47·32	87·98	0·94	7·27	0·05	0·05
	35—54 ..	100	6·92	0·41	85·95	66·04	7·05	33·45	0·08	0·10
	55+ ..	100	8·36	0·27	65·30	19·89	26·18	79·80	0·16	0·04
	All ages ..	100	62·55	35·36	33·60	48·39	3·81	16·21	0·04	0·04
1961	0—14 ..	100	99·66	95·58	0·34	4·35	..	0·04	..	0·03
	15—34 ..	100	44·98	5·92	53·95	88·80	0·63	4·16	0·44	1·12
	35—54 ..	100	1·95	0·19	91·88	70·02	5·42	28·98	0·75	0·81
	55+ ..	100	1·33	0·13	76·36	22·05	21·82	77·60	0·49	0·22
	All ages ..	100	58·18	41·79	38·27	44·01	3·25	13·67	0·30	0·53

Figure below shows the distribution of the district population by marital status for males and females separately:—

During the 1951—61 decade, the proportion of never married has decreased for males and increased for females. There had been decrease in the proportion of widowed, both for males and females. The proportion of divorced and separated showed an increase, but the difference is not of any numerical importance. As can be expected, the proportions of married and widowed are higher in rural areas than in urban areas; the proportion of never married is higher in urban population. It may be explained by the slightly higher age at marriage and the more youthful population in urban areas.

The rise in the age at marriage of the total population may be seen from the marital status distribution by age-groups shown above. The proportion of never married in age-group 0—14 has increased both for males and females while for age-group 15—34 it has increased for females alone.

Child Woman Ratio

The following are the child woman ratios for 1951 and 1961, *i.e.*, the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows to 1,000 women of 15—44 years age-group is also shown for comparison :—

	Number of Children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of Children per 1,000 married women of 15—44 years age-group	Number of Widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	657	772	131
1961 District Total ..	743	862	94
Rural ..	752	858	95
Urban ..	671	896	85

The child woman ratio for rural areas is higher than that for urban areas. When standardised for married women of 15—44 years age-group, it is higher in urban areas. This may indicate either a higher fertility or a higher survival rate in urban areas of the district. Over the decade, the ratio has increased from 657 to 743. It may be due both to a higher birth-rate and somewhat reduced infantile mortality.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 131 in 1951 to 94 in 1961. The incidence of widowhood is higher in rural areas than in urban areas.

Migration

The 1961 Census showed the proportions of population enumerated at place of birth and other places as shown below.

57·43 per cent of the population was enumerated at places of birth. This percentage for males is 72 but for females it is only 43. The difference is due to women married outside their places of birth. This movement of females on marriage appears to be mostly within the district as the proportion of women born outside the district is only 11·36 per cent against 8·66 per cent for males.

Proportions of population by places of birth

——	Total population	Place of enumeration	Elsewhere in the District	Outside the district but in Maharashtra	Outside Maharashtra
(1)	(2)	(3)	(4)	(5)	(6)
Persons	1,430,105	820,815	464,916	124,793	18,674
Males	698,555	503,135	134,615	49,516	10,950
Females	731,550	317,680	330,301	75,277	7,724
Percentage to total population—					
Persons	100·00	57·43	32·53	8·73	1·31
Males	100·00	72·06	19·28	7·09	1·57
Females	100·00	43·46	45·18	10·30	1·06

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows:—

Age-group	Sex ratios		
	Total	Rural	Urban
All ages	1,047	1,065	913
0—4	958	961	934
5—9	997	1,001	964
10—14	899	900	893
15—19	994	1,042	732
20—24	1,341	1,428	908
25—29	1,304	1,340	1,063
30—34	1,227	1,277	918
35—39	1,163	1,192	965
40—44	1,125	1,155	920
45—49	1,030	1,051	872
50—54	1,021	1,033	923
55—59	887	901	759
60+	1,016	1,021	967

The rural-urban differentials of sex ratios are less in younger and older age-groups, though rural sex ratio is almost always higher than urban sex ratio. These differences are more significant in adult age-groups, among which the age-group 20—24 has the highest ratio. The same pattern can be observed for the total population. The high sex ratio in age-group 20—24 may be due to the movement of young adult males in search of jobs or for higher education outside the district. The balance is nearly attained in older age-groups possibly due to the return of migrants to their native places after retirement. The sudden drop in the sex ratio for age-group 55—59 for total, rural and urban population may also be partly due to mis-reporting of ages of women of that group in the higher age-group.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and of non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52:—

——	Categories of Workers									Non-Workers
	I	II	III	IV	V	VI	VII	VIII	IX	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	31·61	3·88	0·69	3·55	2·19	1·82	2·00	0·81	5·01	48·44
Born at the place of enumeration	37·26	3·08	0·38	3·31	1·48	0·56	1·43	0·60	3·17	48·73
Elsewhere in the district	20·36	5·95	1·63	4·42	3·07	2·39	2·84	1·16	8·38	49·80
Outside the district	9·76	5·89	1·24	3·58	6·05	11·08	4·78	1·84	12·73	43·05

The percentage of non-workers is lower in the population born outside the district. The percentage of cultivators is higher for those born at the place of enumeration. The percentage of agricultural labourers is higher among the people born outside. It may be so because of the seasonal migration of labourers for work on sugarcane farms. 11·08 per cent of persons born outside the district are engaged in construction. This is the reflection of a large number of workers from outside the district working on Koyna Project.

Satara today is a typical district as far as migration in and outside the district is concerned. It has traditionally been an area of out-migration to Bombay and other places. The average annual volume of emigration had been estimated in 1925 at thirty-five thousand. In the famine year 1918-19 it went over forty-five thousand. Recent expansion of irrigation and sugarcane cultivation, and setting up of sugar factories and construction work on Koyna Project, have on the other hand attracted considerable volume of migrants from outside the district and even from outside Maharashtra.

Migration to Greater Bombay

A special study of Migrants in Greater Bombay undertaken in the 1961 Census has revealed the following very interesting features regarding migrants from Satara district. The full report on that study is published in Part X (I) of the 1961 Maharashtra Census Report.

There are (in 1961) 140,520 persons in Greater Bombay who are born in Satara district. Of these, 98,710 or 70 per cent are males and 41,810 or 30 per cent are females. 80,736 or 82 per cent of the males are workers and the remaining 18 per cent are non-workers. Among the females only 3,231 or

8 per cent are workers and the remaining 92 percent are non-workers. Bulk of the migration is from rural areas. Twenty per cent of the females are, however, from urban areas of the district while the corresponding proportion for males is only 15 per cent.

A significant change in the migration pattern from the district is that, of late, more females and more non-workers both among males and females are going to Bombay. This would mean that the movement now-a-days is not of male workers alone. For Satara migrants with a stay of 15 years and more in Bombay there are only 364 females per 1,000 males. For migrants with stay of 5 to 9 years in Bombay there are 391 females for every 1,000 males. For migrants with less than one year stay in Bombay there are 812 females for every 1,000 males. Thesex ratio has thus been improving gradually.

Fifty-five per cent of the total male workers from Satara are engaged in Manufacturing Industries, 3·87 per cent in Trade and Commerce, 16 per cent in Transport and Communication and another 15 per cent in other services. By the occupational classification 58,129 or 72 per cent of the male workers from Satara are engaged as production process workers, 5,290 or 7 per cent as clerical and related workers, 4,467 or 6 per cent as sales workers, 3,450 or 4 per cent as drivers, conductors or telephone operators and 6,540 or 8 per cent in personal or domestic services.

By percentage of literacy and educational levels the distribution of workers among males and females from Satara is as follows :—

	Males	Females
Illiterate	40	83
Literate without educational standards ..	28	5
Primary or Junior Basic	27	4
Matriculation and above	5	8
Total ..	100	100

Satara migrants make 13 per cent of all migrants to Bombay from within Maharashtra State and 5 per cent out of all migrants to Greater Bombay. The current annual volume of migration for 1961 is 10,391 persons—5,734 males and 4,657 females. This annual migration also makes 13 per cent of the current annual migration to Bombay from within Maharashtra State and 5 per cent of the current annual migration to Greater Bombay from all parts of India.

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member	9·51	8·75	15·36
2—3 members..	23·01	22·85	24·22
4—6 members..	40·52	41·18	35·45
7—9 members..	19·75	19·94	18·30
10 members	7·21	7·28	6·67
All sizes	100·00	100·00	100·00

Among the different size groups, households with 4 to 6 members are more common (40·5 per cent) than others. The percentage distribution of rural and urban households by their size shows that single and small size households are more (40 per cent) in urban areas than in rural areas (31·6 per cent). The average size of the household is 5·1 in rural areas and 4·8 in urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district, is shown below :—

(1)	Total		Rural		Urban	
	Males (2)	Females (3)	Males (4)	Females (5)	Males (6)	Females (7)
(1) Heads of households	32·06	7·85	31·75	7·98	34·42	6·71
(2) Spouses of heads of households	0·19	24·99	0·20	24·70	0·17	27·62
(3) Married sons	6·27	..	6·51	..	4·37	..
(4) Other married relations	3·62	16·25	3·66	16·75	3·24	11·70
(5) Never married, widowed or divorced relations..	56·37	50·59	56·48	50·28	55·56	53·36
(6) Unrelated persons	1·49	0·32	1·40	0·29	2·24	0·61
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

32·06 per cent of the males are heads of households as against 7·85 per cent for females. Married sons are 6·27 per cent of the total males. 56·37 per cent males and 50·59 per cent females which incidentally form the largest group are never married, widowed or divorced relations. Proportion of unrelated persons is 1·49 per cent for males and only 0·32 per cent for females. Nearly 25 per cent females were spouses of heads of households. High proportion of females in other married relations includes the daughters-in-law and daughters or sisters of the heads. The heads of the households and their spouses have a higher proportion in urban areas. The proportion of married sons is less in urban areas. It may indicate that the joint family is being replaced by the biological family more in urban areas. Unrelated persons have a higher proportion in urban areas. Domestic servants are included in this category and they appear to be staying with the households more in urban areas than in rural areas.

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has worked out projections for the total population, population in school-going ages and the labour force 15—59 for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown below :—

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951 ..	1,175	*199	*609
Actual 1961 ..	1,430	260	709
Projected 1966 ..	1,627	295	916
Projected 1971 ..	1,833	332	1,033
Projected 1976 ..	2,066	374	1,167
Projected 1981 ..	2,339	423	1,324

* Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V at page 169 in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows:—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Gujarati ..	0·49	0·32	1·87	57·49	42·51
(2) Hindi ..	0·23	0·19	1·98	42·99	57·01
(3) Kannada ..	0·27	0·20	0·83	66·19	33·81
(4) Malayalam ..	0·04	0·03	0·12	64·30	35·70
(5) Marathi ..	94·69	96·24	82·53	90·35	9·65
(6) Punjabi ..	0·03	0·03	0·08	74·57	25·43
(7) Tamil ..	0·03	0·02	0·12	55·79	44·21
(8) Telugu ..	0·83	0·84	1·13	85·75	14·25
(9) Urdu ..	3·00	2·07	10·41	61·51	38·49
(10) Others ..	0·39	0·06	0·93	33·75	66·25
All Languages ..	100·00	100·00	100·00	88·92	11·08

Marathi is the principal language and is the mother-tongue of nearly 94·7 per cent of the population. In rural areas Marathi speakers account for 96·2 per cent of the population. They make only 82·5 per cent of the population in urban areas. Urdu has the second largest number of speakers. It makes 3 per cent of the total population of the district. It is spoken more in urban areas where its speakers make as much as 10·4 per cent against only 2·1 per cent for rural areas. The speakers of all other languages are similarly concentrated in urban areas. Telugu is an exception and its speakers are fairly distributed over rural and urban areas. They include Wadars the well-known stone quarry workers whose mother-tongue Wadari has been grouped in Table C-V with Telugu.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Gujarati	0·43	0·43	0·49
(2) Hindi	2·77	0·34	0·23
(3) Kannada	1·46	0·25	0·27
(4) Malayalam	..	..	0·04
(5) Marathi	94·87	95·78	94·73
(6) Punjabi	..	0·01	0·03
(7) Tamil	..	..	0·03
(8) Telugu	0·25	0·71	0·88
(9) Urdu	..	2·30	3·00
(10) Others	0·22	0·18	0·30
All Languages	100·00	100·00	100·00

The proportions of Marathi and Gujarati speakers have remained fairly constant. Urdu had been combined with Hindi in 1901. The percentage of Kannada speakers had decreased from 1901. But it is more or less the same in 1951 and 1961. The 1901 proportions shown here are for the district boundaries as they existed in that year. The decrease in the number of Kannada speakers from 1901 is obviously due to the transfer of the southern talukas having larger number of Kannada speakers to the adjoining Sangli district.

RELIGIONS

Table C-VII at page 170 in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is as follows :—

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	6·84	7·22	3·81	93·84	6·16
(2) Christians ..	0·14	0·05	0·85	31·60	68·40
(3) Hindus ..	89·11	90·04	81·65	89·85	10·15
(4) Jains	0·49	0·27	2·26	48·97	51·03
(5) Muslims ..	3·37	2·40	11·13	63·40	36·60
(6) Others ..	0·05	0·02	0·30	30·76	69·24
All Religions ..	100·00	100·00	100·00	88·92	11·08

Nearly 89 per cent of the population reported their religion as Hindu. Buddhists account for 7·22 per cent in rural areas and 3·81 per cent in urban areas. Muslims are only 2·4 per cent in rural areas but make as much as 11·13 per cent in urban areas. Christians and followers of other religions are similarly more numerous in urban areas. The Hindus and the Buddhists are more numerous in rural than urban areas. The Christians are the most urbanised group and the Buddhists the least urbanised.

The comparative position of religions in 1901 and 1961 is shown below :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists	..	6·84
(2) Christians	0·14	0·14
(3) Hindus	94·19	89·11
(4) Jains	1·64	0·49
(5) Muslims	4·01	3·37
(6) Others	0·02	0·05
All Religions	100·00	100·00

The proportion of Christians has remained the same over the last sixty years. Jains and Muslims have lower percentages in 1961 than in 1901. The 1901 percentages however applied to the boundaries of the district as it existed then. The southern talukas now transferred to Sangli perhaps had more Jains and Muslims. The percentage of Hindus has gone down from 94 per cent to 89 per cent because some persons belonging to Hindu Scheduled Castes returned their religion as Buddhist or Nav-Bauddha. The combined proportion for Hindus and Buddhists however shows an improvement over that of 1901.

Sex ratio for each religion is as follows :—

Buddhists 1,096, Christians 984, Hindus 1,048, Jains 934, Muslims 959, All religions 1,047.

Higher sex ratio for Buddhists indicates that more of their males are going out of the district for work.

SCHEDULED CASTES

Table SCT-I-Part A at pages 174 to 177 in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste by sex for the district and each taluka separately. Actually, 24 castes are notified as Scheduled Castes in the district but only 7 were reported in the district in 1961. The distribution of those seven castes by rural and urban areas of the district is as follows :—

Name of Scheduled Caste	Population		Percentage to total population of the district			Percentage of each Scheduled Caste population in	
	Males	Females	Total	Rural	Urban	Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
*All Scheduled Castes	37,477	37,398	5·24	4·48	0·76	85·47	14·53
(1) Bhangi	518	511	0·07	0·01	0·06	19·05	80·95
(2) Chambhar	9,343	10,480	1·39	1·24	0·15	89·37	10·63
(3) Dhor	1,306	1,241	0·18	0·07	0·11	41·11	58·89
(4) Holar	2,452	2,317	0·33	0·30	0·03	91·93	8·07
(5) Mahar	3,160	2,408	0·39	0·28	0·11	71·52	28·48
(6) Mahyavanshi	4	2	...	...	...	...	...
(7) Mang	20,688	20,439	2·88	2·57	0·31	89·14	10·86

* Inclusive of persons from the Scheduled Castes who have not reported their individual castes.

The remaining 16 Scheduled Castes for which no one was returned in the 1961 Census in the district are as follows :—

(1) Ager, (2) Baked, (3) Chalvadi, (4) Chenna Dasar, (5) Garoda, (6) Halleer, (7) Halsar, (8) Holaya, (9) Lingader, (10) Meghval, (11) Mukri, (12) Nadia, (13) Pasi, (14) Shenva, (15) Tirgar and (16) Turi.

Out of the seven Scheduled Castes enumerated in the district, the largest number is of " Mangs " who are concentrated in Karad, Khatav, Satara, Patan and Man talukas. The second largest group is of " Chambhars " who are concentrated in Karad, Khatav, Patan and Koregaon talukas. The remaining four Scheduled Castes together make less than one per cent of the total population. " Bhangi " and " Dhor " castes are concentrated in urban areas, which may be attributed to the scavenging and sweeping services or occupations pertaining to tanning of hides and skins with which these castes are traditionally associated. There are only six persons of Mahyavanshi caste in the district.

The comparative position of the Scheduled Castes population in 1951 and 1961 in the district is as follows :—

	Percentage to total population		
	Total	Rural	Urban
All Scheduled Castes—			
1951	11·29	9·98	1·31
1961	5·24	4·48	0·76

The reduction of the proportion from 11·29 to 5·24 is the result of a large number of persons from the Mahar caste returning their religion in the 1961 Census as Buddhists. Because of the change of religion they are not enumerated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. But for the change of religion, the total population of the Scheduled Castes would have made over 12 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (i) and B (i) at page 180 in Part II show the literacy and educational levels for each Scheduled Caste. The percentages of literacy for the district total population, all Scheduled Castes and each Scheduled Caste are as below.

Both males and females of the Scheduled Castes appear to have come out of their traditional backwardness in education as far as Satara district is concerned. They seem to be taking full advantage of the educational facilities and concessions available to them in the district and the gap between them and the district average is considerably reduced now.

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	31·52	45·00	18·86	53·72	65·25	41·09
All Scheduled Castes	22·91	34·93	11·00	37·80	52·78	21·78
(1) Bhangi	27·04	33·91	17·28	45·74	59·55	32·79
(2) Chambhar	29·58	42·82	18·03	44·42	58·88	28·87
(3) Dhor	39·45	54·53	23·98	49·53	63·02	35·08
(4) Holar	12·91	22·28	2·92	13·77	23·16	4·62
(5) Mahar	28·98	41·51	12·21	47·67	61·52	30·35
(6) Mahyavanshi	No literates					
(7) Mang	19·72	31·56	7·79	27·83	44·28	10·62

Economic Activity

The industrial classification of persons at work and non-workers for the district average, all Scheduled Castes and for each Scheduled Caste is as follows :—

	Percentage of workers in categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District Average	33·93	4·68	9·81	51·58
All Scheduled Castes ..	12·50	11·59	23·35	52·56
(1) Bhangi	0·10	..	35·86	64·04
(2) Chambhar	22·34	8·15	11·95	57·56
(3) Dhor	10·76	2·43	23·60	63·21
(4) Holar	7·59	27·93	14·72	49·76
(5) Mahar	9·99	11·01	27·60	51·40
(6) Mahyavanshi	..	..	83·33	16·67
(7) Mang	9·09	12·29	28·92	49·70

The proportion of workers for the Scheduled Castes is more or less the same as the average for the district. But the proportion in cultivation is lower and in agricultural labourers higher than the district average. This is due to the association of some Scheduled Castes with certain services as well as to a fewer persons owning lands amongst them.

Size of land cultivated

Table SCT-V-Part A at page 181 in Part II shows a broad classification of cultivating households by size of cultivated land for the district rural population and all Scheduled Castes. The proportions are as follows :—

Size of land cultivated	District rural population		All Scheduled Castes	
	Number of sample households	Percentage	Number of sample households	Percentage
Cultivating households.	38,728	100·00	1,199	100·00
Less than 5 acres	19,125	49·38	872	72·73
5 to 9·9 acres ..	10,065	25·99	194	16·18
10 to 29·9 acres	8,221	21·23	120	10·01
30 acres and over	1,317	3·40	13	1·08

Out of a sample of 38,728 cultivating households 1,199 or 3·1 per cent households are from the Scheduled Castes against 4·48 per cent population out of the total rural population. 72·73 per cent of the cultivating households of the Scheduled Castes are cultivating less than 5 acres of land in this district as against the corresponding average of 49·38 per cent for the district. The percentage of households cultivating land above 5 acres among Scheduled Castes is 27·27 per cent only as against the corresponding average of 50·62 per cent for the district. The proportion of cultivating households is thus smaller in the case of Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I-Part B at pages 178-179 in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Seven Scheduled Tribes were reported in the district in the 1961 Census. The distribution of their population by rural and urban areas is as follows :—

Name of Scheduled Tribe	Population		Percentage to total population of the district			Percentage of each Scheduled Tribe population in	
	Males	Females	Total	Rural	Urban	Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
*All Scheduled Tribes	1,261	1,156	0·17	0·16	0·01	94·87	5·13
(1) Bhil	23	12	0·00	0·00	0·00	80·00	20·00
(2) Gamit	9	11	0·00	..	0·00	..	100·00
(3) Kathodi	1,022	920	0·14	0·13	0·01	96·19	3·81
(4) Kokna	64	61	0·01	0·01	..	100·00	—
(5) Koli Dhor	79	96	0·01	0·01	0·00	92·00	8·00
(6) Naikda	9	7	0·00	0·00	0·00	87·50	12·50
(7) Pardhi	55	49	0·01	0·01	0·00	93·27	6·73

* Inclusive of persons from the Scheduled Tribes who have not reported their individual tribes.

The remaining 12 Scheduled Tribes for which no one was returned in the district in 1961 are as follows:—

(1) Barda, (2) Bavacha, (3) Chodhara, (4) Dhanka, (5) Dhodia, (6) Dubla, (7) Gond, (8) Patelia, (9) Pomla, (10) Rathawa, (11) Varli and (12) Vitolia.

"Kathodi" with 1,942 persons is the largest Scheduled Tribe in the district. The other six Scheduled Tribes have very small population and all the seven Scheduled Tribes together make only 0·17 per cent of the total population of the district. "Kathodies" are mainly found in the western talukas of Jaoli, Satara, Wai and Patan. Eastern talukas of Phaltan, Khatav, Man and Koregaon do not have any "Kathodi" population. Man has no Scheduled Tribes population at all.

The Scheduled Tribes population in the district has slightly gone down from 2,536 in 1951 to 2,417 in 1961.

Literacy and Education

The Scheduled Tribes are very much behind in literacy and education. Male literacy for the Kathodies is as low as 1·92 per cent in rural areas and 2·56 per cent in urban areas. Female literacy is negligible. They appear to be a much more depressed group than any one of the Scheduled Castes in the district.

Economic Activity

More than two-thirds of the workers from Scheduled Tribes are working as forest labourers. The rest work as cultivators and agricultural labourers.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of the Standing Committee which is the most powerful Committee of the Zilla Parishad, at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the subject committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the conditions of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

The following six types of schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district:—

(i) *Educational.*—These include schemes of granting tuition fees, examination fees and scholarships. Another scheme is of running or assisting hostels for boys and girls from those groups. In the year 1962-63, Rs. 31,542 were spent on 445 beneficiaries under the tuition fees scheme, Rs. 5,853 were spent on 352 pupils under the examination fees scheme and Rs. 1,15,315 were spent on 2,060 beneficiaries under the scholarship scheme. There were 35 backward class hostels and 18 cosmopolitan hostels in the district. Rs. 20 per month per boy and Rs. 25 per month per girl were paid in the case of backward class hostels and the entire actual expenditure of Scheduled Caste and Scheduled Tribe inmates of cosmopolitan hostels was paid under the hostel scheme;

(ii) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidiary for cottage industries and of assistance for purchase of milch cattle to Scheduled Castes and other backward classes;

(iii) *Housing.*—This covers the scheme of providing assistance in cash or kind for repairs of houses to Scheduled Castes and other backward classes. Rs. 4,600 were spent during the year 1962-63 under this scheme on 46 beneficiaries;

(iv) *Drinking water wells.*—An amount of Rs. 1,750 is given per well. Four wells were sanctioned and the expenditure of Rs. 7,000 incurred during 1962-63. Another scheme is to provide a subsidy of Rs. 750 per well for repairing wells for Scheduled Castes;

(v) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to Scheduled Castes. Rs. 555 were spent during the year 1962-63 on ten beneficiaries; and

(vi) *Scheme of Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras are organised, films shown and large gatherings are addressed at fairs and other places.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan Schemes. The expenditure described above against each scheme is out of the committed schemes and does not include expenditure on the Plan Schemes. There are in addition some more schemes sponsored by the Central Government.

Economic Criterion of Backwardness

Castewise basis of classification of " Other Backward Classes " has been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community, treated as belonging to the " Other Backward Classes ".

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Caste converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for the removal of untouchability, etc., which cannot by their very nature apply to Non-Hindus.

EDUCATION

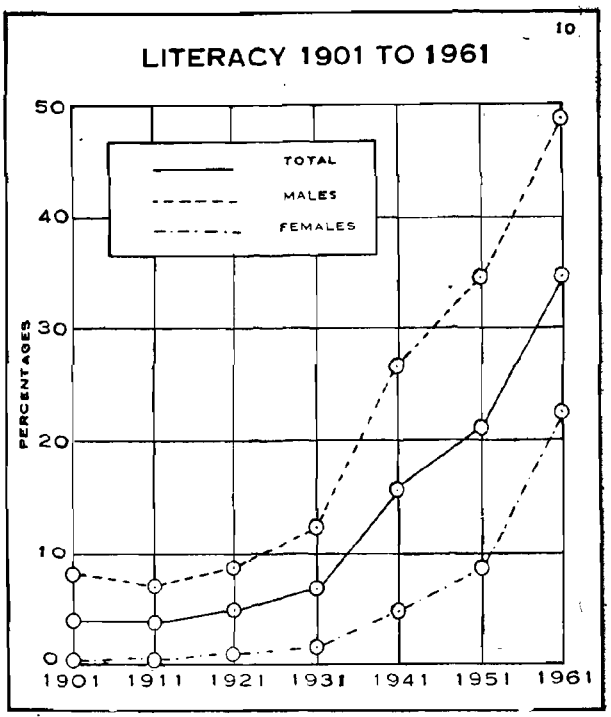

Satara District has made very substantial progress in the field of education. It now ranks as the highest district in Maharashtra in the level of literacy in rural areas and in respect of literacy for women.

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is as follows:—

	Total	Males	Females
1901	3·95	7·75	0·27
1911	3·50	6·70	0·39
1921	4·61	8·32	0·99
1931	6·52	11·79	1·30
1941	15·01	25·68	4·53
1951	20·60	33·50	6·30
1961	33·98	47·41	21·16

Figure to the right shows the growth of literacy in the district for total population, males and females, separately.

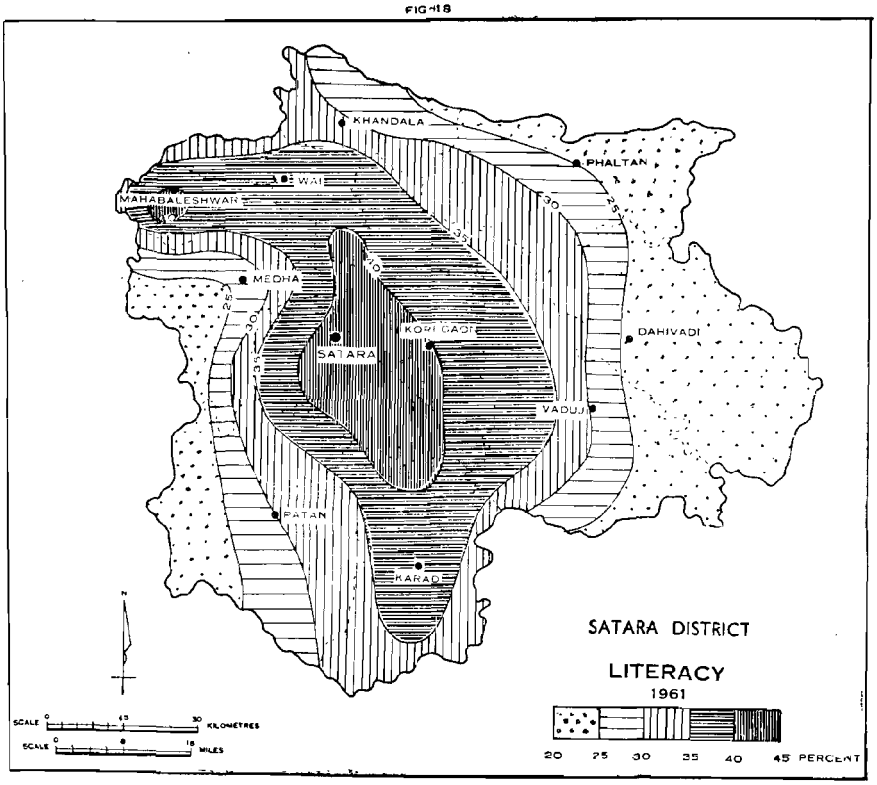

The literacy percentage has increased more than eight times during the last sixty years. The improvement has been very substantial in the decades 1931—41 and 1951—61. Particularly the progress of female literacy from 6·30 in 1951 to 21·16 in 1961 is a noteworthy achievement. A mass literacy campaign had been organised in the district and seems to have raised the levels of literacy so high. A scheme of compulsory primary education introduced by the State Government in 1947 and the schooling facilities provided by the well-known Rayat Shikshan Sanstha of Satara may be the other two contributing factors.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately:—

State/District/Taluka	Total			Rural			Urban		
(1)	Persons (2)	Males (3)	Females (4)	Persons (5)	Males (6)	Females (7)	Persons (8)	Males (9)	Females (10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·54	51·07	65·62	37·90
SATARA DISTRICT	33·98	47·41	21·16	31·52	45·01	18·86	53·72	65·25	41·09
1 Khandala Mahal	33·02	46·62	19·73	33·02	46·62	19·73	..	..	..
2 Phaltan Taluka	27·27	39·13	15·18	23·47	35·17	11·78	51·44	62·75	38·47
3 Wai Taluka	38·74	52·63	26·42	34·50	48·83	22·09	59·42	69·85	49·03
4 Mahabaleshwar Mahal	39·91	53·26	26·41	28·09	43·83	13·65	52·59	62·42	41·57
5 Jaoli Taluka	24·68	39·63	12·34	24·68	39·63	12·34	..	..	..
6 Koregaon Taluka	39·40	52·62	26·95	38·50	51·59	26·38	45·88	59·62	31·38
7 Khatav Taluka	35·54	47·41	22·17	34·54	47·41	22·17	..	..	..
8 Man Taluka	21·64	33·62	9·87	20·96	32·92	9·20	27·50	39·54	15·57
9 Satara Taluka	42·56	55·70	30·23	36·26	49·42	24·58	61·00	72·13	48·67
10 Patan Taluka	28·54	42·26	15·75	28·54	42·26	15·75	..	..	..
11 Karad Taluka	37·27	57·93	22·52	34·69	49·64	19·98	53·90	65·67	40·33

Figure to the right shows the spread of literacy in the district by isoplyths. The central portion of the district roundabout Satara town is the most literate area in the district. Satara town looks like working as a centre for spreading education all around. Its influence recedes with distance. The next highest literate region includes the most densely populated areas of Wai, Satara, Koregaon and Karad talukas. The literacy rate drops down beyond this region both towards the west and the east. The hilly areas in the west and the scarcity affected areas of Man taluka in the east have lowest rates of literacy. But it is significant that these lowest rates are higher than the averages of many other districts of Maharashtra. Within the district, Satara taluka has the highest literacy for total population. But Koregaon taluka has the highest literacy for rural areas, both for males and females. For urban areas also, Satara taluka is the highest for total and male literacy. The literacy for females is the highest in Wai taluka.

FIG-18

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urbar areas are as follows. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different education levels separately :—

Age-group (1)	Total			Rural			Urban		
	Persons (2)	Males (3)	Females (4)	Persons (5)	Males (6)	Females (7)	Persons (8)	Males (9)	Females (10)
All ages	33·98	47·41	21·16	31·52	45·01	18·86	53·72	65·25	41·09
0—4	..	..	..	..	..	..	..	..	..
5—14	45·85	57·27	33·86	43·96	56·19	31·17	61·21	65·98	56·09
15—34	49·74	72·24	31·02	46·46	69·67	27·98	72·26	86·98	55·68
35—59	28·38	46·37	11·44	25·32	42·81	9·17	53·89	73·49	32·20
60+	13·32	24·30	2·51	10·92	20·70	1·34	38·22	60·71	14·94

Average literacy rates both for males and females are so high in the district because of very high proportions in 15—34 years age-group and high proportions even in 35—59 years age-group. The progress of literacy and education in the district is the result of consistent efforts for spreading education during the last 40 years as well as the success of campaigns for adult education.

Primary Education

Table 15 in Part III shows the number of Primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of Primary schools and their classification as on 31st March 1962 are as follows :—

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV multi-teacher	Middle I-VII
Total No. of schools.	1,491	266	8	40	589	152	436
State Government.	1	1	..	..	..	..	..
Zilla Parishad ..	1,338	251	8	38	484	135	422
Municipal ..	20	..	..	..	..	8	12
Private ..	132	14	..	2	105	9	2

There has been a steady growth in the number of Primary schools in the district during the last ten years. The number rose from 1,298 in 1951 to 1,339 in 1956 and to 1,461 in 1961. On 31st March 1962, it stood at 1,491. Out of the 1,491 Primary schools, 1,338 or 89·74 per cent are managed by the Zilla Parishad and only 8·85 per cent are managed by private institutions. The State Government's share (in the year 1961-62) was 90·4 per cent of the total expenditure. The expenditure on primary education is incurred by the State Government through grants-in-aid to the Zilla Parishad and building loans and grants to primary teachers' training colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes and Scheduled Tribes get free education at the cost of the Government. Scholarships are given to students from Scheduled Castes and Scheduled Tribes at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools has also made steady progress in the district. At the end of the First Five-Year Plan, there were 93 basic schools. This number rose to 287 by the end of the Second Plan. On 31st March 1962, it stood at 314.

By 31st March 1962, 10 towns and 1,034 villages in the district had primary schools and 124 villages had schooling facilities, *i.e.*, primary schools situated within a mile from the village. Two villages did not have even schooling facilities. Total number of teachers was 5,197. Out of them, 4,029 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Satara District	Maharashtra
Average population served by a primary school.	971	1,135
Average area served by a primary school—(square miles).	2·7	3·4
Pupils per teacher	45	38
Pupils per school	156	127
Average annual salary per teacher (Rs.)	1,242	1,250
Average annual expenditure per school (Rs.)	4,457	4,903
Average number of teachers per school ..	3·5	3·3
Percentage of trained teachers	77·5	64·8

The scheme of Compulsory Primary Education was introduced in 1947. Initially it was applied to villages having a population of 1,000 or more. In 1951, it was applied to children in the age-group 7—11. On 1st September 1956, the scheme was applied to children in the age-group 7—8 in villages having a population between 500 to 1,000. Later it was applied for the same age-group 7—8 to villages having a population less than 500. As a result, the indices of the progress of primary education shown above, compare favourably with those of the State, in many respects. One of the Third Plan schemes is to extend the scheme of compulsory primary education to children in the age-group 6—11. A provision of Rs. 56·40 lakhs has been made for primary education in the Third Plan in Satara district. During the plan period, additional 490 teachers would be appointed in primary schools. The number of students is expected to rise by 24,500. Similarly, 205 class rooms would be built during this period. 330 class rooms had been built during the Second Plan period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools	
			Multi-purpose	Ordinary
State	1	1	..	..
Municipal ..	..	..	..	..
Private	149	1	15	133

Total number of students on roll in the secondary schools as on 31st March 1962 was 27,886. Out of them 22,740 were boys and 5,146 girls. Total number of teachers was 1,253. Out of them, 833 were trained teachers. Percentage of trained teachers was thus 66·5. Other indices of secondary education compared to the State averages are as follows :—

	Satara District	Maharashtra
Population served by each high school ..	9,650	13,805
Area served by each school (sq. miles) ..	26·9	40·8
Pupil-teacher ratio	22	25
Pupils per secondary school	186	338
Average annual salary per teacher (Rs.)	1,703	1,870
Average annual expenditure (direct) per secondary school .. .. (Rs.)	24,028	39,543
Average number of teachers per secondary school.	8·3	13·7

Figure on the next page shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

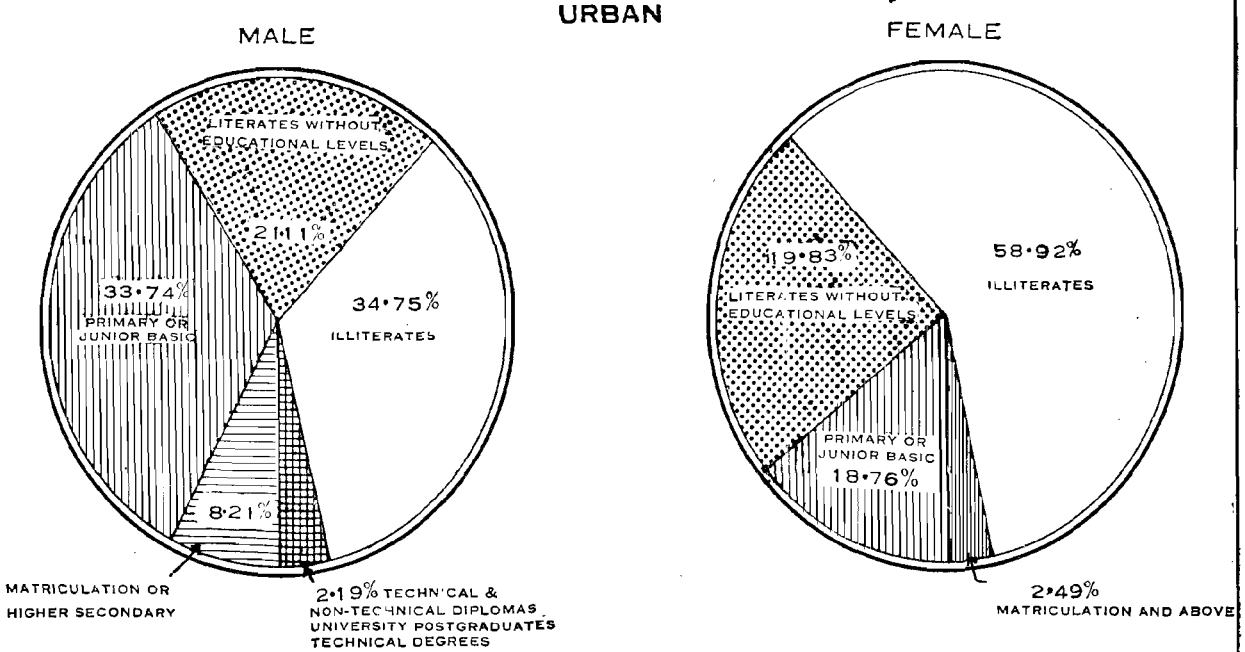

10

LITERACY AND EDUCATIONAL LEVELS
1961

RURAL

URBAN

The progress of secondary education in Satara district is also quite striking. The number of secondary schools increased from 41 in 1950-51 to 55 in 1955-56 and to 132 in 1960-61. This figure stood at 150 on 31st March 1962. The secondary schools are dispersed throughout the district. Khandala Mahal has five which is the smallest number in the district. Karad taluka has as many as 27 secondary schools.

Private institutions alone manage almost all the secondary schools in the district. The Government share in the total expenditure on secondary education is, however, 62·9 per cent and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 30,000 by 1965-66 and to 40,000 by 1970-71.

S. S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October and Karad, Phaltan, Wai and Satara are the examination centres in the district. The number of candidates who appeared and passed from those centres during the year 1962 are as follows :—

	Appeared	Passed
Examination held in—		
March 1962 ..	.. 3,944	1,775
October 1962 ..	.. 1,505	613
Total ..		2,388

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. The number of colleges increased from two in 1951 to seven in 1961. A new college has been started at Wai. The colleges now provide education in Arts, Science, Commerce and Engineering. The number of college students rose from 190 in 1950-51 to 1,786 in 1960-61. The Engineering College at Karad is managed by the State Government. All the other colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government.

Technical Education

The most important developments in respect of technical education are the opening of a polytechnic and an engineering college at Karad in 1957 and 1960, respectively. The polytechnic has an accommodation for 150 students for diploma courses in Civil, Electrical and Mechanical Engineering. The Engineering College admits 150 students for degree courses in Civil, Electrical and Mechanical Engineering. There are two industrial training institutes at Satara and Karad for training craftsmen in different trades. There is also an Industry-*cum*-Technical High School at Satara. The Third Plan includes a scheme for constructing a building for the Industrial Training Institute at Karad and raising its capacity from 240 to 376.

Libraries

The number of libraries in the district was 371 in 1951 of which 349 were recognised by Government. It rose to 411 in 1956, of which 376 were recognised. At the end of 1960-61 there were 864 libraries in the district.

The District Library (Nagar Vachanalaya, Satara) gets a Government grant at the rate of 75 per cent of the admitted expenditure, subject to a maximum of Rs. 6,000.

Nine taluka libraries situated at Wai, Panchgani, Patan, Karad, Phaltan, Khatav, Shirval, Dahiwadi and Koregaon and eight town libraries get similar grants at the rate of 75 per cent of the annual admitted expenditure, subject to a maximum of Rs. 1,000.

Printing Presses, Journals and Newspapers

There were 22 Printing Presses in Satara district in 1950. Their number rose to 49 in 1960. Eight Marathi periodicals are being published, out of which one is a bi-weekly.

Radio Licences

The number of radio licences in the district has increased during recent years. It rose from 2,735 in 1958-59 to 3,537 in 1959-60 and to 3,651 in 1960-61.

Cinema Theatres

There are at present nine permanent Cinema Theatres and nine Touring Talkies in the district.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health activities in the district.

Nineteen towns and villages have piped water supply. Out of the remaining 155 draw drinking water from rivers, 48 from nalas, 7 from canals, 18 from tanks and 298 from wells. The water supply is not adequate in summer in the case of 203 villages.

The scheme for eradication of malaria has been in operation since 1953. Phaltan, Man and Jaoli talukas and Khandala mahal were very much susceptible to malaria. In those areas, each house was sprayed with D.D.T. twice every year during the years 1953 to 1958. In 1959 a special Malaria Control Unit was opened for the district and additional workers have been appointed in all the areas of the district at the rate of one worker for 10,000 population.

Incidence of leprosy is high particularly in Patan and Karad talukas. A leprosy subsidiary centre has been organised at Karad. Besides, there are 6 survey, education and treatment units at Wai, Patan, Phaltan, Shirwal, Mhaswad and Aundh. A leprosy control unit is attached to the Civil Hospital at Satara. The American Marathi Mission is also doing work in this field.

With a view to check the spread of T.B., BCG vaccination campaign was launched in the district for carrying on mass-scale vaccination.

There were 364 deaths due to smallpox in 1958 and about the same number in 1959. In 1960, the number has come down to 52. The number of vaccinations has steadily increased from 1·9 lakhs in 1954 to 4·2 lakhs in 1960.

There are 11 family planning centres in the district. 1,809 vasectomy operations were performed up to 1960.

Medical Facilities

Medical facilities available in the district are shown in Table 17 of Part III. The figures in the Table relate to the facilities provided by Government and other aided institutions. The numbers of private practitioners, hospitals and dispensaries are not shown there.

The number of doctors and nurses, number of beds available and the number of indoor and outdoor patients treated have all increased between 1950-60. The number of doctors rose from 43 in 1950 to 52 in 1960. Similarly, the number of nurses increased from 20 in 1950 to 58 in 1960. The number of beds rose from 148 in 1950 to 234 in 1960. The number of indoor patients increased from 2,820 in 1950 to 7,079 in 1960. The number of outdoor patients also increased from 317, 113 in 1950 to 353,512 in 1960.

Hospitals.—There were 2 Government hospitals in 1960. One of them is located at Satara. It is called General Hospital, and has a mobile health dispensary and a maternity home attached. It also functions as an agency imparting training to nurses, midwives and X-ray and laboratory technicians with ancillary specialised sections. During the Second Plan the number of beds was increased from 54 to 80. Another hospital is at Mahabaleshwar and functions on similar lines. There is also a full-fledged private hospital attached to the Aryangla Vaidyak Mahavidyalaya. A cottage hospital has been started at Karad in 1961.

Dispensaries.—In 1960, there were 32 Government or Government-aided dispensaries of which 4 were run by Government, 23 by the District Local Board (now Zilla Parishad) and 5 by Municipalities.

Primary Health Centres.—At the end of 1960, there were 7 Primary Health Centres with 21 sub-centres functioning in the different development blocks in the district.

There were 21 subsidised medical practitioners working in rural areas of the district in 1960.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists, and other medical and health technicians in the district is 1,185.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 33 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

About 66 per cent of all the houses are used as dwellings, 19 per cent as cattle-sheds, etc., 9 per cent were vacant at the time of the Census and the remaining used as shops, workshops or factories, schools, etc.

The density of residential houses per sq. mile in the district has increased along with the density of population per sq. mile from 50·4 in 1951 to 65·2 in 1961. The number of persons per residential house has, however, decreased from 5·7 in 1951 to 5·43 in 1961. This may indicate an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by "owned" and "rented" categories, 84 per cent of the dwellings in the district are owned and only 16 per cent are rented. The proportion of owned in rural areas is slightly higher (89 per cent) and very much lower (46 per cent) in urban areas. Even this low proportion of 46 per cent for the urban areas in the district is somewhat higher than the average of 30 per cent for all urban areas in Maharashtra.

Out of the various materials used for walls, stone appears to be predominant in the district with a proportion of 65·5 per cent. Its proportions in the central talukas of Wai, Satara and Karad are, however, lower and the difference is made up by unburnt bricks. Stone is not used as much in urban areas as in rural areas. Its proportion is only 22 per cent in urban areas against 71 per cent in rural areas. Burnt bricks appear to be predominant in urban areas with a proportion of 45 per cent. Unburnt bricks are used in 16 per cent dwellings in rural areas and 22 per cent dwellings in urban areas.

Out of the materials of roof, tiles are predominant in the district with a proportion of 54·6 per cent. Tiled roofs are, however, less common in urban areas. Their proportion in urban areas is only 27·5 per cent against 58·1 per cent in rural areas. In the rural areas, tiled roofs have higher proportions in Khandala mahal and Wai, Jaoli and Koregaon talukas. Towards the east they are gradually replaced by flat roofs of earth on wooden beams and rafters. The distribution corresponds exactly to the pattern of annual rainfall in the district.

C. I. Zinc sheets appear to be predominant in urban areas with 50·9 per cent. They are less common in rural areas and make only 24 per cent. Roofs of grass, leaves, wood, etc., have the same proportions (16—17 per cent) in rural and urban areas.

Classified by the number of rooms occupied, 52·9 per cent of households are occupying one-room dwellings and 31·6 per cent are occupying two-room dwellings. Households occupying more rooms are more in urban areas than in rural areas. Average number of persons per room is 3·10 for total, 3·18 for rural and 2·55 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the most important economic activity in the district as it engages 80 per cent of the working population in the district. Most of the others also work in industries related to processing of agricultural produce or trade, transport and services ancillary to agriculture.

Tables 3 to 10 in Part III present 10-year statistics for land utilisation, crop pattern, irrigation, wholesale and harvest prices and livestock and agricultural implements for the district and each taluka separately.

Cultivating Seasons

As in the other areas of the State, there are two agricultural seasons, *viz.*, kharif and rabi. Rice, kharif jowar, bajri and groundnut are the main crops grown in kharif season and rabi jowar, wheat and gram are the main crops grown in rabi season. The sowing, harvesting and peak marketing periods for these crops are shown below.

Jowar is grown both in kharif and rabi seasons. Kalbondi, Utavli or Argadi and Dukri varieties are grown in kharif season and Dudhmogra, Shalu and Tambad varieties are grown in rabi season. Sixty per cent of the area under Jowar is, however, cultivated in the rabi season and Shalu is the most esteemed of its varieties.

	Sowing period	Harvesting period	Peak marketing period
(*a*) *Kharif*—			
(1) Rice	May-June	Oct.-Nov.	Jan.-Feb.
(2) Kharif Jowar ..	June-July	Nov.-Dec.	Jan.-Feb.
(3) Bajri	June-July	Oct.-Nov.	Nov.-Dec.
(4) Groundnut ..	June-July	Oct.-Nov.	Jan.-Feb.
(*b*) *Rabi*—			
(1) Rabi Jowar ..	Sep.-Oct.	Mar.-April	Mar.-April.
(2) Wheat	Oct.-Nov.	Mar.-April	April-May.
(3) Gram	Oct.-Nov.	Feb.-Mar.	April-May.
(*c*) *Perennial*—			
Sugarcane ..	Dec.-Jan.	Feb.-Mar.	April-May.

Land Utilisation

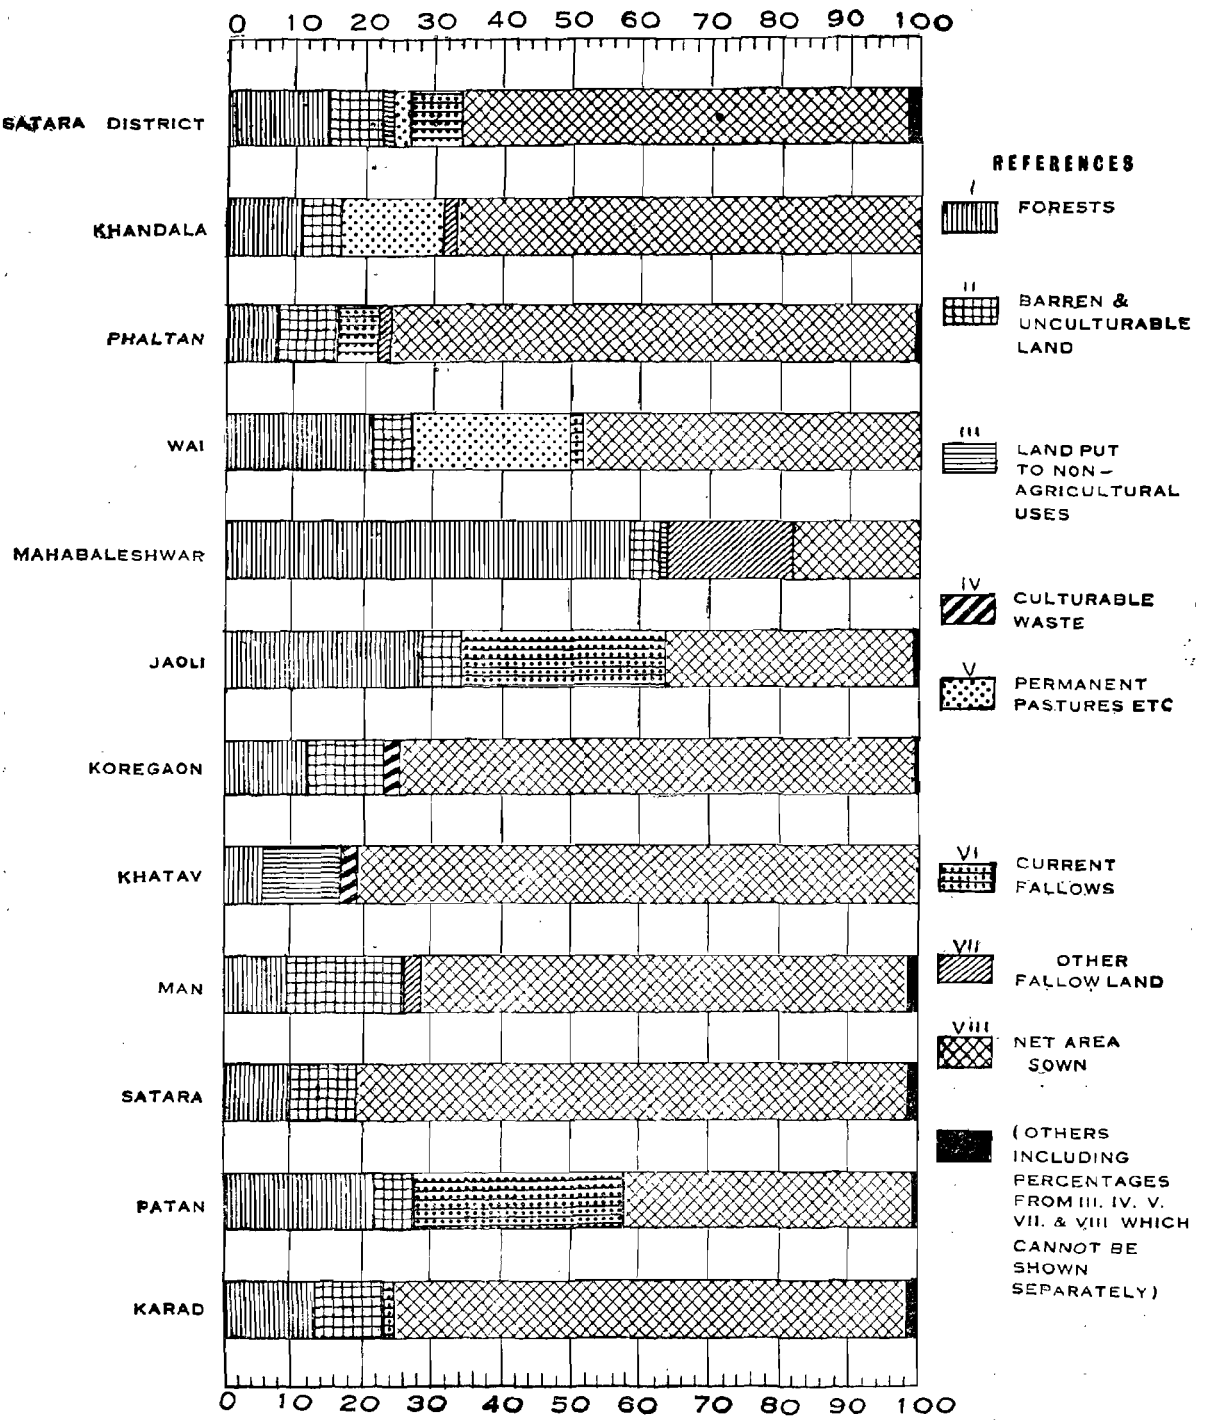

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on averages for three years from 1957-58 to 1959-60.

Administrative Unit	Percentage of geographical area										Gross cropped area
	Total geographical area	Forests	Barren and unculturable	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
MAHARASHTRA	100	17.54	6.08	2.29	2.80	4.75	0.62	3.77	4.46	53.69	60.55
SATARA DISTRICT	100	14.08	8.18	1.60	0.72	2.33	..	7.05	1.18	64.86	69.77

J-3483—vi—A—(Satara).

LAND UTILISATION

TALUKAWISE PERCENTAGES 1959-60

J-3483—vi—B—(Satara).

The figure facing this page shows the land utilisation pattern for the year 1959-60 for the district and each taluka separately.

The net area sown in the district is 64·86 per cent of the geographical area against 53·69 per cent for the State. The difference is consistent with the higher density of population in the district.

The percentages of net sown area to the geographical area within the district range between 18 per cent in Mahabaleshwar mahal to 81 per cent in Khatav taluka. The percentages are high for Phaltan (75·4), Koregaon (75·3), Khatav (81·2), Satara (79·7) and Karad (74·5). The western talukas of Jaoli and Patan and Mahabaleshwar mahal have more lands under forests or in the barren or unculturable categories. Net areas sown in those talukas are, therefore, considerably low, Mahabaleshwar mahal having the lowest figure of only 18·3 per cent.

Because of the changes in the administrative boundaries of the district as well as a change in the classification of land utilisation effected in 1950-51 it is not possible to determine if there has been any change in the pattern of land utilisation during the last 40—50 years or not.

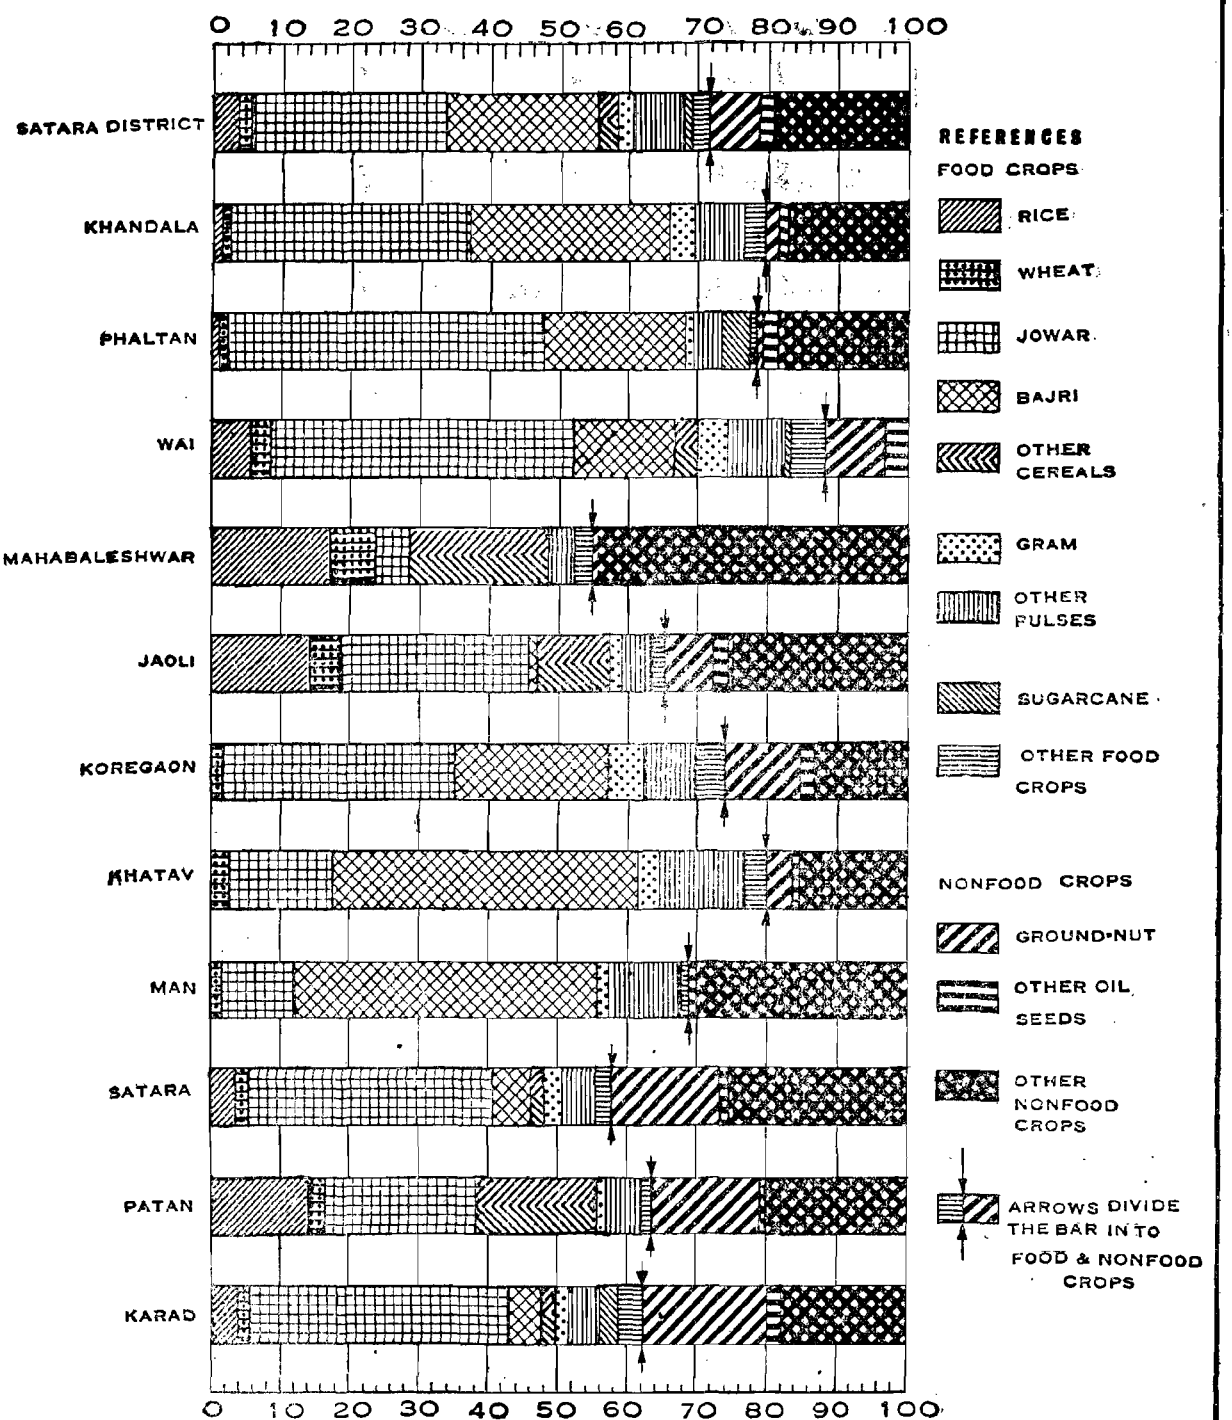

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All figures are averages for three years 1957-58 to 1959-60 :—

Details of cropped area	Percentage of gross cropped area in												
	Maharashtra	Satara District	Khandala Mahal	Phaltan Taluka	Wai Taluka	Mahabaleshwar Mahal	Jaoli Taluka	Koregaon Taluka	Khatav Taluka	Man Taluka	Satara Taluka	Patan Taluka	Karad Taluka
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
Gross Cropped Area	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00
Total area under food crops	69.33	70.81	78.24	78.23	88.97	56.52	65.45	72.85	79.41	69.03	57.43	62.95	61.13

Other non-food crops including fodder crops	8.20	19.66	18.17	17.21	0.08	43.17	26.15	13.95	16.14	29.83	25.75	20.65	17.64

CROP PATTERN 1959-60

TALUKAWISE PERCENTAGES

The figure facing this page shows the crop pattern for the district and each taluka separately.

Jowar occupies the first place among the crops of the district with 27·37 per cent of the gross cropped area. Bajri has 22·03 per cent, pulses 9·99 per cent, rice 3·24 per cent and wheat 1·86 per cent. All the food crops together make 70·8 per cent against 69·8 per cent for Maharashtra. Compared to the crop pattern of the State the district has much lower proportions for rice and wheat and slightly lower proportions for jowar and pulses. The proportion for bajri is, however, more than twice that for the State, though it has now come down as the second major crop in the district. In 1881-82 it occupied the first position in the district with 35 per cent of the total cultivated area.

Groundnut is predominant among the non-food or commercial crops with 9·16 per cent of the gross cropped area. Cotton hardly makes 0·26 per cent of the gross area sown.

As comparable statistics are not available for the district for years prior to 1950-51 it is not possible to determine if there has been any significant change in the cropping pattern during the last 40—50 years or not.

Generally speaking, the crop pattern in the district is poorer than the average for the State. The State's crop pattern is itself poorer in the all India setting because of the higher proportions of jowar, bajri and other low value crops. The district proportions of rice, wheat and jowar are lower and the proportion of bajri is higher than the State average. The relieving factors, however, are the higher proportion of irrigated lands, areas under sugarcane and better yields for all important crops except rice and sugarcane.

Within the district the cropping pattern varies according to rainfall and soil types. Khatav and Man talukas and Khandala mahal have very high proportions of areas under bajri. Phaltan, Wai, Koregaon, Satara and Karad have higher proportions for jowar. Wheat is mostly grown as an irrigated crop and its proportions are more or less even in all talukas except Mahabaleshwar mahal which has the highest proportion of 6·52 per cent. Proportions for areas under rice are high for Mahabaleshwar mahal (16·7 per cent), Jaoli taluka (13·5 per cent) and Patan taluka (13·1 per cent).

Proportion of non-food crops is the lowest in Wai taluka and highest in Mahabaleshwar mahal. Satara, Patan and Karad talukas have substantial areas under non-food crops being mostly groundnut and other oilseeds.

Nine-year average yields and 1958-59 acreages and outturns of important crops are shown below compared with the corresponding figures for Maharashtra taken as 100 :—

	Nine-year average yield per acre	1958-59 area	1958-59 outturn
MAHARASHTRA	100·0	100·00	100·00
Rice	84·3	1·88	1·46
Wheat	160·6	1·57	1·90
Jowar	110·8	3·39	3·62
Bajri	110·7	8·91	11·90
Groundnut	149·6	5·13	7·23
Sugarcane	87·2	5·92	5·04

Except for rice and sugarcane the district average yields are higher than the averages for the State. The difference is high for wheat and groundnut. The outturns of bajri and groundnut make sizeable proportions out of the State total. Sugarcane also makes more than 5 per cent out of the total outturn in Maharashtra.

The Techno-Economic Survey of Maharashtra has estimated the gross value of output per acre of cropped area in 1955-56 at Rs. 79 for the district against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportion of workers on land to total workers, gross area sown per worker on land and the proportion of irrigated area to gross cropped area are shown below for the district and each of its talukas compared with the State averages :—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land	Percentage of irrigated area to gross cropped area
MAHARASHTRA ..	334	69·91	3·50	6·23
SATARA DISTRICT ..	355	79·75	3·29	12·83
Khandala Mahal	311	73·96	4·43	13·02
Phaltan Taluka	307	76·36	4·63	31·62
Wai Taluka	457	83·28	2·07	17·78
Mahabaleshwar Mahal ..	279	55·90	1·87	16·98
Jaoli Taluka..	232	89·54	2·16	8·75
Koregaon Taluka	381	80·21	3·83	8·06
Khatav Taluka	306	84·45	4·57	10·24
Man Taluka..	179	80·68	6·78	9·30
Satara Taluka	541	74·80	2·87	8·07
Patan Taluka	352	83·81	1·95	8·52
Karad Taluka	609	76·72	2·21	11·62

70·08 per cent of the total workers in the district work as cultivators and 9·67 per cent as agricultural labourers. 79·8 per cent of the total working population thus works on land. The gross cropped area per worker on land in the district is 3·29 acres against

3·5 acres for Maharashtra. The redeeming feature is the higher percentage of irrigated lands and better yields which together bring the annual agricultural production per worker on land very near the average for the State.

The percentage of workers on land to total workers varies within the district from 55·9 per cent in Mahabaleshwar to 93·11 per cent in Patan. Gross area sown per worker on land ranges from 1·87 acres in Mahabaleshwar mahal to 6·78 acres in Man taluka. The figures are higher in Khandala mahal and Phaltan, Khatav and Man talukas which have poorer lands and scanty rainfall zones.

Because of the higher proportion of irrigated lands the district also has a higher proportion of net sown area (7·4) under double crops than the State average (5·05 per cent). In 1881-82 the area reported as twice cropped was only 3·3 per cent of the total cultivated area. The increase from 3·3 per cent to 7·4 per cent during the last eighty years is mainly due to the extension of irrigation under canals and wells.

The proportions of double cropped areas are very high in the western talukas, *viz.*, Khandala (17), Wai (15·3) and Patan (13·6).

The following combinations of different crops are commonly used for double cropping. They are raised mostly on lands having irrigation facilities :—

(1) Kharif jowar followed by summer groundnut.

(2) Paddy followed by wheat, gram or vegetables.

(3) Cotton followed by gram or wheat.

(4) Potatoes followed by rabi jowar or wheat.

Irrigation

The proportions of gross cropped area under irrigation vary from 8·06 per cent in Koregaon to 31·62 per cent in Phaltan, the district average being 12·80 per cent. It is significant that the figure for the taluka having the least proportion of irrigated area is also higher than the State average (6·23). The break-up for irrigated areas by sources of irrigation is shown for the district and each taluka in Table 4 in Part III. Areas irrigated by canals are 52·84 per cent of the total irrigated area, those irrigated by tanks are 0·8 per cent, those under wells make 43·35 per cent and those under other sources are 3·01 per cent. The entire area under tanks is in Man taluka. Government canals irrigate lands mainly in Phaltan, Karad and Khatav talukas. The private canals through which the rain water is utilised for cultivation of rice are predominant in western talukas, *viz.*, Wai, Satara and Patan. Well irrigation is heavier in Phaltan, Khatav, Man and Karad talukas. Talukas of Wai, Koregaon and Satara also have large number of wells. The area irrigated per well seems to be very high in Phaltan than the other talukas. It may be due to seepages from canals and rivers flowing perennially because of the high proportion of irrigated lands.

The irrigated area has increased from 1·16 lakh acres in 1950-51 to 1·76 lakh acres in 1959-60, which makes more than 51 per cent in nine years. The improvement has been in areas both under canals and wells. Canal area has increased from 52 thousand acres in 1950-51 to 93 thousand acres in 1959-60. Number of wells has gone up from 22,351 to 28,296 and the area irrigated under wells increased from 53 thousand acres in 1950-51 to 76 thousand acres in 1959-60. The increase in well irrigation has been remarkable in Koregaon and Khatav talukas.

Anotner improvement has been in the number of oil engines with irrigation pumps which has gone up from 1,028 in 1951 and 1,233 in 1956 to 2,747 in 1961. Phaltan and Karad talukas now have 843 and 710 oil engines used with irrigation pumps, respectively, and together make more than one-half of the district total.

Crop-pattern under Irrigation

Table 5 in Part III shows that 93·86 per cent of the irrigated area is in the year 1959-60 under food-crops and only 6·14 per cent under non-food crops. Among the food crops, jowar is 32·88 per cent, wheat 12·10 per cent, rice 10·04 per cent, sugarcane 8·58 per cent, bajri 8·45 per cent, gram 7·47 per cent, fruits and vegetables 4·59 per cent and spices 1·33 per cent. Among the non-food crops cotton is the chief irrigated crop but makes only 2·02 per cent, tobacco 0·43 per cent and groundnut also 0·43 per cent.

There are of course local variations in this pattern. Half of the district area under sugarcane is in Phaltan taluka alone while Karad makes another 28 per cent. These two talukas are served by two perennial systems of Government canals and also have sugar factories to encourage cultivation of sugarcane. Khatav, Koregaon and Wai talukas which depend more on well irrigation appear to have specialised in fruits and vegetables, Karad and Wai on turmeric and Satara and Koregaon on ginger.

The district acreage under sugarcane has doubled between 1950 and 1960. The area under irrigated cotton was hardly 50 acres in 1950-51. It has increased to 4,700 in 1959-60 and appears to be getting popular year by year. Turmeric seems to be an important irrigated cash crop in the district. The value of its total turnover in the regulated market is over Rs. 13 lakhs per annum.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains between 1951-56 and 1956-60 compares with 1950-51 as follows :—

	Average production in hundred tons per year during		
	1950-51	1951-56	1956-60
Rice	140	170	191
Wheat	82	64	81
Jowar	635	916	1,132
Bajri	367	397	484
Ragi	83	85	88
Other cereals	33	41	46
Total cereals	1,340	1,673	2,022
Pulses	239	236	254
Total foodgrains	1,579	1,909	2,276

The average total foodgrains production in the district increased by 21 per cent over 1950-51, during the First Plan period and by 44·1 per cent during the Second Plan period. All cereals production in 1959-60 is 70 per cent higher than that of 1950-51.

Agricultural Implements

Section C of Table 9 in Part III shows the number of agricultural implements for the district and each of its talukas for the years 1951, 1956 and 1961 separately. The remarkable increase in the number of oil engines has been described earlier. The number of iron ploughs has also increased by over 40 per cent during the decade. The number of sugarcane crushers worked by bullocks has gone down from 1,270 in 1951 to 454 in 1961 while the number of crushers worked by power has gone up from 294 to 411. The total for the two types combined has gone down from 1,564 in 1951 to 865 in 1961. This may be due to the setting up of the two new sugar factories during the decade. The number of electric pumps has increased from 22 to 39 but that of the tractors has actually gone down from 44 to 37.

By using standard average prices to the agricultural implements shown in Table 9 of Part III the total outlay on them for the year 1961 may be estimated at Rs. 143 lakhs or Rs. 8 per acre of the net sown area. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 10 per acre. This does not however include cattle which may perhaps make more than Rs. 100 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the District Agricultural Officer works as a Secretary to that Committee. There are Agricultural Extension Officers at the taluka level working under the Block Development Officer. The latter works as a Secretary to the Taluka Samiti. Talaties and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

There is a Research Station at Padegaon in Phaltan taluka. Research work is carried on sugarcane as the main crop and cotton and jowar as subsidiary crops. There is one more Research Station at Mahabaleshwar where research work is done on wheat rust.

Agricultural Improvement

(i) *Increasing the area under Irrigation.*—The most important single item for increasing agricultural production is to increase the area under irrigation. The remarkable increase of more than 50 per cent in the irrigated area over that of 1950-51 has already been described earlier. It has been brought about by an allround programme of new bandharas, tanks, wells, pumps and repairs to old wells. In addition to the minor irrigation works now in progress which will irrigate 16,353 acres, the Third Plan includes new works irrigating 2,460 acres and schemes for construction of 2,000 new irrigation wells and installation of 1,000 pumping sets.

With the increasing facilities for irrigation, the question of full utilisation of the created potential is likely to assume importance. Statistics of the available potential and actual utilisation are not, however, available for the district separately.

(ii) *Improved Seeds.*—The following improved varieties or strains have been recommended by the Agriculture Department: Wheat N 345 and N 146; Rabi Jowar M 35-I; Rice Chimansal—39, Ambemohor—157, EX-70 and Krishnasal; and Sugarcane CO-419, CO-740, CO-775 and CO-798. Seed Farms have been established at 11 places in the district to provide improved seed to the farmers. The combined area of all the seed farms is 425·72 acres.

(iii) *Soil Conservation or Bunding.*—An area of 32,438 acres has been bunded during the Second Five-Year Plan. The Third Plan target is 2 lakh acres involving an outlay of Rs. 95·3 lakhs. The Third Plan also includes schemes for terracing 3,000 acres involving an outlay of Rs. 15 lakhs.

Livestock

Table 9 in Part III shows the statistics on livestock for the district and each taluka separately for the years 1951, 1956 and 1961. The total livestock in the district is 1,113,300. It makes 66 livestock per 100 acres of cultivated area. The number of bullocks and buffaloes over 3 years in 1961 is 174,600 which makes 11 acres of cultivated land per pair.

The livestock has increased by 8·6 per cent during the decade. The growth in Bovines and in sheep and goats is 10·4 per cent and 11·0 per cent, respectively. The number of horses and ponies has decreased by 56·5 per cent and that of donkeys by 22 per cent. The growth in the number of working bulls is only 3·7 per cent against 12·3 in cows and buffaloes.

Veterinary Facilities

There are veterinary dispensaries at the following places :—

(1) Satara, (2) Karad, (3) Nagthane,
(4) Medha, (5) Wai, (6) Phaltan,
(7) Patan, (8) Mhaswad, (9) Mahabaleshwar,
(10) Rahimatpur, (11) Lonand, (12) Vaduj.

There are veterinary aid centres at the following big villages:—

(1) Vaduth, (2) Parali, (3) Nandgaon,
(4) Kumte, (5) Masur, (6) Ond,
(7) Shenoli, (8) Umbraj, (9) Asgaon,
(10) Bhuinj, (11) Tarale, (12) Dahiwadi,
(13) Ahire, (14) Shirwal.

Treatment of animal diseases, control of epidemics, castration of Bovines and control and destruction of animal parasites by the use of dipping tanks and sprays are the main services rendered at these dispensaries and aid centres.

Khillar and Dangi breeds have been recommended for the two tracts. There are 70 premium bulls kept at various places and an artificial insemination centre works at Satara, with sub-centres at Phaltan, Karad, Wai and Lonand. Two key village centres are functioning at Satara and Gogave (in Jaoli taluka).

A sheep breeding farm works at Dahiwadi in Man taluka which is known for its sheep and woollen blankets.

There are fourteen organised poultry farms in the district of which six receive aid from the Government.

There is a proposal to start a poultry demonstration farm soon.

AGRARIAN STRUCTURE AND LAND REFORMS

There used to be the following land tenures before the Survey Act of 1865 :—

(i) *Miras* which was a hereditary right of occupancy subject only to the payment of land revenue. It was also a transferable right.

(ii) *Upri* (or casual) was a sort of annual tenancy on behalf of Government terminable at the pleasure of the State.

(iii) *Sheri* (or crown lands) was the land directly held by and cultivated for the Government.

(iv) *Istavaa* was a lease on concessional terms for bringing waste lands under cultivation.

The Survey Act of 1865 abolished all the above tenures and introduced the Ryotwari tenure of heritable and transferable occupancy rights. This was the first important measure of tenurial reforms which has immensely benefited the region. Later on, lands granted by the Government were subjected to certain restrictions about transfer or sale and the new occupancy rights were called 'new' or 'restricted tenure'.

Public utility lands like grazing lands, etc., are held by Government and are now vested in the Village Panchayats.

There used to be another tenure of Inam lands which were gifted or granted by the Government for meritorious services in the past or in lieu or on condition of some continuing service useful to the Government or to the village community. Inam lands were held free of land revenue. There were five classes of Inams in the district :—

	Year of abolition
(i) Political or Saranjam Inams ..	1952
(ii) Personal Inams	1953
(iii) Hereditary Watan Inams	1951
(iv) Village servants useful to the—	
(*a*) community	1954
(*b*) Government—Patels ..	1963
Mahars ..	1959
(v) Deosthan Inams.	

All Inams, excepting the last category of Deosthan Inams held by religious institutions or for religious services, have now been abolished under various measures of land reform. The year in which each

class of Inam was abolished is shown above. All hereditary Watan lands held for village services have also been abolished and all village servants now work on salary basis. The occupancy rights of abolished Inam lands have been conferred on their holders or tenants, as the case may be, on conditions of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands Act which is in force since 1948. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "land to the tiller" policy the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1957, which is known as the "tiller's day". This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1963, ownership rights have been conferred upon 36,116 tenants for 59,084 acres of land in the district. Out of these, 4,507 tenants had mutually agreed with the landholders on the price to be paid by them. In the remaining cases, the prices were fixed by the Revenue Officers.

Size of Land Holdings

Census Table B-X in Part II shows that 72·1 per cent of the total number of households cultivate land and the remaining 27·9 per cent do not cultivate any land.

Census Table B-XI in Part II shows the break-up of cultivating households by size of land cultivated and by interest in land. 80·6 per cent of the cultivating households cultivate their owned lands only. Two per cent of the cultivating households cultivate tenanted lands only and the remaining 17·4 per cent cultivate lands partly owned and partly taken on lease.

Percentage distribution of cultivating households by size of land cultivated is shown below. The distribution of households in Table B-XI and the one shown in the percentages in column 2 below is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of those ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	5·92	21·15
1 to 4·9	43·47	37·35
5 to 9·9	25·95	19·49
10 to 14·9	11·20	8·96
15 to 29·9	10·04	9·22
30 to 49·9	2·57	2·59
50+	0·85	1·24
Total ..	100·00	100·00

The average size of a cultivation holding in the district in 1960-61 is 9·5 acres. Average size of an ownership holding in the district was 7·7 acres in 1952-53 against 12 acres for the State.

Average cultivation holding in the district is larger than the average ownership holding. This should be the result of many small owners handing over their lands for care and cultivation to others and themselves taking to some other jobs either in the district or outside.

Both ownership and cultivation holdings are smaller in the district than the State average obviously because of rice cultivation in which case, holdings are usually smaller. Within the district, the western talukas where rice lands predominate have very small cultivation holdings. Patan taluka, for example, has 80 per cent of its cultivation holdings of less than 7·5 acres.

The District Gazetteer reports the average size of ownership holding in the district in 1882-83 as 14·65 acres. In 1921-22, it is reported in the Statistical Atlas of Bombay Presidency as 7·9 acres. In 1952-53, it was 7·7 acres. The figures for the three periods had no doubt been collected on varying concepts and different administrative boundaries of the district.

The broad indication however is that the average size of ownership holding was not much lowered between 1922 and 1952. The reasons why it remained more or less constant in spite of the 50 per cent increase in population during the same period will need further investigation.

Ceilings on Holding of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Two local areas have been notified in the district with different ceiling areas for different categories of lands. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. The holders of land in excess of the ceiling area were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the order of priority. At the moment, the enquiries to be made by the Collectors are in progress. In a few cases, the surplus lands from sugar factory holdings have already been taken over by the Government.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1949 and work of consolidation of holdings was started in one taluka as an experiment in 1950. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Much spade work had to be done to remove the lurking suspicion in the minds of the landholders and to make them agree to part with their lands. The scheme has since been extended to four other talukas.

The number of villages and areas for which the work has been completed are as follows :—

	Number of villages	Area consolidated in acres	Holdings involved
Koregaon Taluka ..	41	98,318	62,792
Satara Taluka	19	36,529	38,862
Khandala Mahal ..	1	1,221	820
Wai Taluka	9	15,580	15,637
Karad Taluka ..	9	19,180	15,686
Khatav Taluka.. ..	1	3,048	1,077
Total ..	80	173,876	134,874

The target for work during the Third Plan period is 100 villages covering 1·6 lakh acres as a non-Plan item and 45 villages with 0·76 lakh acres as a Plan item.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

	Acres
(i) Dry crop lands	2·0
(ii) Rice lands	0·5
(iii) Bagait lands	1·0

All plots of land less in area than the standard area are treated as fragments and their transfer except to the holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the Co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement. One more Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration and supervision, decides appeals against non-admission of members, and approves bye-laws in respect of Co-operative Societies whose working capital does not exceed Rs. 5 lakhs and whose operations do not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of the co-operative movement in the district.

Since the introduction of the Five-Year Plan and with the emphasis on development of rural areas, the co-operative credit movement in the district has advanced at a very rapid pace. Activities related to Production, Processing, Distribution, Marketing and Banking are also being organised on co-operative basis. Except for the sugar factories, the other industrial, processing or farming societies have, however, yet to make good progress in the district.

The following description is based upon the Report for the year 1960-61.

Co-operative Credit

Agricultural Credit Societies.—The comparative position of Agricultural Credit Societies in 1950-51 and 1960-61 is as follows :—

	1950-51	1960-61
(1) Number of Agricultural Credit Societies	452	740
(2) Number of members ..	32,631	127,528
(3) Share Capital .. (Rs. in lakhs)	7·71	51·31
(4) Reserve and other funds (Rs. in lakhs)	5·7	11·7
(5) Working Capital .. (Rs. in lakhs)	30·1	187·2
(6) Number of members to whom loan was advanced	19,558	46,100
(7) Amount advanced .. (Rs. in lakhs)	15·1	118·7
(8) Amount recovered .. (Rs. in lakhs)	10·5	92·7
(9) Loans outstanding .. (Rs. in lakhs)	18·3	140·2
(10) Overdues .. .. (Rs. in lakhs)	6·4	36·6

Average membership per primary society is 173 against the average of 96 members for Maharashtra. All the villages in the district have been covered. The membership coverage of the rural families in the district is 61·8 per cent against 32·2 per cent for Maharashtra. An average Primary Society in the district is thus nearly twice as broad based as an average society in the State.

Total owned funds of the Primary Agricultural Credit Societies (share capital and reserve funds) in the district amounted in the year 1960-61 to Rs. 63·1 lakhs and formed 32 per cent of their working capital against 26 per cent for Maharashtra.

The loans advanced by all Primary Agricultural Credit Societies in the district amounted to Rs. 118·7 lakhs or about eight times the figure of 1950-51.

The increase of 291 per cent in the membership and 694 per cent in the amount of loans advanced indicates the magnitude of expansion of the Co-operative Credit during the last decade. The proportion of total overdue loans is however 26 per cent of the total outstandings and points out the need for improving recoveries.

Central Co-operative Bank.—The Central Co-operative Bank at the district headquarters was established in 1949 and has been working as a federal central financing agency catering for the requirements of all the Primary Credit Societies in the district. Since 1962, the Zilla Parishad also transacts its financial business through this Bank.

In the year 1960-61, the position of the Central Co-operative Bank was as follows :—

(1) Number of members—	
(*a*) Individuals	3,037
(*b*) Societies	900
(2) Paid-up sharecapital .. .. (Rs. in lakhs)	30·76
(3) Reserve and other funds .. (Rs. in lakhs)	6·29
(4) Deposits—	
(*a*) Individuals .. .. (Rs. in lakhs)	111·81
(*b*) Societies and Banks .. (Rs. in lakhs)	47·66
(5) Borrowings—	
(*a*) State Co-operative Bank and the Reserve Bank of India .. .. (Rs. in lakhs)	63·61
(*b*) Government .. .. (Rs. in lakhs)	0·82
(*c*) Other sources .. .. (Rs. in lakhs)	2·85
(6) Working Capital .. .. (Rs. in lakhs)	264·71
(7) Cash—	
(*a*) On hand .. .. .. (Rs. in lakhs)	10·77
(*b*) At Banks .. .. (Rs. in lakhs)	59·89
(8) Investments—	
Government and other Trustee Securities (Rs. in lakhs)	37·10
(9) Percentage of cash in hand to deposits.. ..	6·7
(10) Percentage of investment to deposits.. ..	23·3
(11) Loans outstanding—	
(*a*) Individuals .. .. (Rs. in lakhs)	16·31
(*b*) Societies .. .. (Rs. in lakhs)	122·89
(12) Percentage of loans outstanding to deposits..	87·4
(13) Percentage of loans outstanding to working capital	52·4
(14) Overdues .. .. .. (Rs. in lakhs)	12·11
(15) Percentage of overdues to loans outstanding..	8·7
(16) Cost of management .. (Rs. in lakhs)	2·89
(17) Percentage of cost of management to working capital	1·0
(18) Profit .. .. .. (Rs. in lakhs)	1·18
(19) Loss .. .. .. (Rs. in lakhs)	..
(20) Number of Branches and Pay Offices in the district	13

The Bank's paid-up share capital has almost doubled up and deposits increased by Rs. 38·59 lakhs during the year 1960-61. Individual deposits increased by Rs. 31·47 lakhs in the same year. The proportion of overdues has come down to 8·7 per cent from 12 per cent in the previous year.

Land Mortgage Bank.—The Primary Land Mortgage Bank was established in Karad in the year 1935 with a view to provide long-term finance to the cultivators. The Bank worked for Satara and Sangli districts and had five branches at Sangli, Islampur, Tasgaon, Satara and Phaltan. The number of members of the Land Mortgage Bank is 4,280. Paid-up share capital is Rs. 3·85 lakhs. The loan outstanding at the end of the year is Rs. 62·02 lakhs. A separate Bank has been established for Sangli district in October 1961.

Urban Banks and Credit Societies.—There are 46 Urban Banks and Credit Societies. Five are Urban Banks, 12 are Urban Credit Societies, 25 Salary

Earners' Co-operative Societies and 4 Factory Workers' Societies. Their combined membership is 18,675, paid-up share capital Rs. 20·64 lakhs, reserve and other funds Rs. 11·13 lakhs, deposit Rs. 73·56 lakhs and loans advanced during the year amount to Rs. 113·98 lakhs.

There has been a steady increase in membership and the working capital of all these societies. The system of monthly subscription from members is in vogue and the recoveries are reported as regular and assured.

Agricultural Processing Societies

There is a Co-operative Cotton Ginning and Pressing Factory at Phaltan, and three Co-operative Oil Mills at Koregaon, Nagthane and Karad. Four Gur Khandsari Societies have also been organised in the district. The total membership of these seven Processing Societies is (on 30th June 1961) 3,600 and their paid-up share capital is Rs. 5·88 lakhs. The State Government has contributed Rs. 2·55 lakhs towards the share capital.

The Oil Mills at Koregaon and Nagthane are completing installation and are to start operations from the ensuing season. The four Gur Khandsari Societies and the Cotton Ginning Society had not started production till June 1961.

Industrial Societies

There are 29 Weavers' Co-operative Societies covering 1,230 looms out of 2,137 looms registered in the district. Only 9 societies are reported working and the others have stopped work due to the rise in the price of yarn, heavy stocks of unsold goods and a few other difficulties.

Forest Labourers' Societies

There are 7 Forest Labourers' Co-operative Societies and 21 Labour Contract Societies in the district with membership of 849 and 1,215, respectively. The societies of the former category extracted forest produce of Rs. 54,905 while those of the latter type executed labour contracts worth Rs. 4·67 lakhs during the year.

Co-operative Farming Societies

Out of the 3 Better Farming Societies, 1 is continuing its irrigation activities and has brought 200 acres under irrigation. The other 2 societies are stagnant. There are 7 Collective Farming and 5 Joint Farming Societies, most of whom have been started recently and have yet to start functioning.

Co-operative Lift Irrigation Societies

There are 13 Co-operative Lift Irrigation Societies in the district. Two of them are new and yet to start work, 10 are working and 1 has ceased to work. The 10 Societies which are working have together brought 1,616 acres of land under irrigation. Administrators have been appointed to manage 4 Lift Irrigation Societies.

Co-operative Sugar Factories

There are 2 Co-operative Sugar Factories in the district, 1 at Phaltan and the other at village Rethare Bk. in Karad taluka. The former was registered in 1954 and started production in 1957. The other factory near Karad was registered in 1955 and started production in 1961. The State Government has contributed Rs. 30 lakhs towards the share capital of these Sugar Factories.

Dairy Societies

One Milk Supply Union with five feeder societies is working in Karad taluka. There are three other dairy societies in the district elsewhere. Two of them are however stagnant.

The Karad Milk Supply Union started work in July 1959. During the year 1960-61 it supplied 138,253 seers of milk and 23,125 seers of milk products to its consumers. The Union is at present handling 650 seers of milk per day. It has been given a loan of Rs. 23,125 and a subsidy of Rs. 10,975 for purchase of machinery and equipment. Another loan of Rs. 1·39 lakhs and a subsidy of Rs. 1·74 lakhs has also been granted for further expansion and for setting up a pasteurising plant and other heavy equipment. The Union is expected to supply milk to the Government Milk Scheme at Poona.

Fishery Societies

There are two Fishery Societies at Mhaswad and Karad with 92 members and a working capital of Rs. 2,783.

Marketing

Purchase and Sale Societies and Unions.—There are ten Taluka Purchase and Sales Unions, one for each taluka, except Mahabaleshwar which is included for this purpose under Wai. Total membership of these societies is 6,587. Their working capital is Rs. 36·84 lakhs. The volume of goods sold annually is worth Rs. 56·81 lakhs and brought them a commission of Rs. 1·12 lakhs during the year. Three Taluka Purchase and Sale Unions have also set up Adat (Commission Agents) shops at different market yards.

Consumers' Movement.—There are 17 Consumers' Societies in the district which had developed in the days of controls. They are now stagnant because of the loss of assured business. There are better possibilities of revival of these societies now. Those which do not show signs of revival may have to be liquidated.

Housing Societies

There are 37 Co-operative Housing Societies in the district, 13 in urban areas and 24 in rural areas. Three societies have completed construction of 42 tenements and work on 111 tenements for two other societies is in progress. Four of these five societies are of backward classes and a loan of Rs. 77,937 and a subsidy of Rs. 27,528 had been granted to them. Most of the remaining housing societies have been organised recently and are yet to start construction.

Co-operative Activity for Backward Classes

There are 30 Co-operative Housing Societies and 2 Farming Societies of Backward Classes. They were advanced a loan of Rs. 2·94 lakhs, have cultivated 65 acres of land and have constructed 12 tenements during the year 1960-61.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows:—

	No. of societies classified as				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Banks.	1	1	..	..	..	..	2
(2) Agricultural Credit Societies.	119	351	101	77	..	33	681
(3) No. of Agricultural Societies.	21	13	7	2	..	..	43
(4) Primary Land Mortgage Banks.	1	..	..	..	..	..	1

FORESTS

The district has an area of 574·38 sq. miles under forests. 468·34 sq. miles are in charge of the Forest Department and the remaining 106·04 sq. miles are in charge of the Revenue Department. The forest area makes 14·07 per cent of total geographical area as against 17·56 per cent for Maharashtra. The forests are mainly on the undulating terrain and hill ranges of Sahyadri on the eastern slopes.

The Divisional Forest Officer who is in charge of the forests of the district has his headquarters at Satara and works under the Poona Circle. The forests in charge of the Revenue Department are administered by the Collector of the district.

Broadly speaking there are three types of forests in the district: (i) evergreen in the western parts of the district, (ii) mixed deciduous in the middle and (iii) dry deciduous in the south-eastern parts of the district.

Teak and Ain are the two commercially valuable species.

Forest produce is generally transported in bullock-carts and trucks to Satara, Karad and Koregaon which are the chief marketing centres. Most of it is consumed in the district and the excess is transported by trucks to Sholapur district.

Two hundred and sixteen persons were returned in the 1961 Census as working in forestry and logging. Their distribution for industry minor groups is shown in Table B-IV-C in Part II.

The forests in charge of the Forest Department are exploited under the working plan under which regular plantations are raised in clear-felled areas as also in blank areas. The working schemes for forests of merged State areas of Aundh and Phaltan do not bring any income and the main work in these areas at present is of afforestation.

The total forest income of the district is Rs. 1,67,596.

The Third Five-Year Plan Schemes are shown below:—

(1) *Plantation of valuable trees*—

(i) Teak Plantation—

Plan Financial Target—Rs. 64,000.

Plan Physical Target—500 acres plantation.

Plan target achieved during the first two years of the plan period, *viz.*, 1961-62 and 1962-63—

Financial—Rs. 10,149·56.

Physical—100 acres.

(2) *Afforestation for soil conservation—*

(i) Singnapur—

Plan Financial Target—Rs. 21,000.

Plan Physical Target—200 acres.

Plan target achieved during the first two years of the plan period, *viz.*, 1961-62 and 1962-63—

Financial—Rs. 7,779·99.

Physical—50 acres.

(ii) Pratapgadh—

Plan Financial Target—Rs. 1,12,000.

Plan Physical Target—2 acres, park at Pratapgadh.

Work has not yet been started.

(3) *Development of Minor Forest Produce—*

(i) Bamboo Plantation—

Plan Financial Target—Rs. 20,000.

Plan Physical Target—Not fixed.

Plan target achieved during the first two years of the plan period, *viz.*, 1961-62 and 1962-63—

Financial—Rs. 2,165.

Physical—50 acres.

(ii) Agave Plantation—

Plan Financial Target—Not fixed.

Plan Physical Target—Not fixed.

Plan target achieved during the first two years of the plan period, *viz.*, 1961-62 and 1962-63—

Financial—Rs. 836 (approximately).

Physical—Pre-planting works over 4 miles (approximately).

FISHERIES

The length of the perennial rivers in the district is 184 kms. There are 15 perennial tanks and five seasonal tanks. In addition to this a fish farm is also being constructed at Shivaji Sagar (Koyna) which will have a total area of 28,800 acres.

1,057 persons were reported as engaged in fishing (as principal work), 721 of them were males and 336 females.

The following commercially important varieties of fish are found in the district :—

Vam, Aheer, Vadshi, Mhasheed, Kolshi, Khavli, Kanas, Tambir, Wanz, Kaliwanj, Vadshivada, Shingala, Murrels Gourami.

In addition, the following varieties are being propagated for pisciculture :—

Catla (*Catla-Catla*), Rohu (*Labeo rohita*), Mrigal (*Cirrhina Mrigala*) and Cyprinus carpio (Mirror & scale carps) .

Two fishermen's co-operative societies were organised during the First Five-Year Plan at Karad and Mhaswad.

The total number of carp fry stocked during the Second Five-Year Plan was 85·9 thousand and the total quantity netted during the plan period was over 3,600 kgs.

The total number of carp fry stocked so far during the Third Five-Year Plan was 23·5 thousand.

Fishermen belong to a community known as Bhoi. Their fishing methods are largely restricted to drag nets known as Vadap, cast nets—"Phekjal" or "Pag", bag nets—"Ghal" hooks and lines or in some places gill nets or "Kandal". The nets are largely made of cotton twine but nylon is also being used.

MINING AND QUARRYING

Laterite is widespread in the western portion of the district and 20 villages in Jaoli and 30 in Patan taluka contain iron ore in the murum or crumbled trap below the laterite. The ore is of a low grade but may become of economic importance at some future date. Iron ore from laterite used to be worked near Mahabaleshwar in the 19th century. It was smelted by a class of Muslims called Dhavdads. They gave up smelting partly for want of fuel and partly for the cheapness of imported iron.

Almost all the mining operations now in the district pertain to quarrying of stone, clay, sand and limestone. 1,221 persons were reported as working on these operations at the 1961 Census, 945 of them were males and 276 females.

INDUSTRIES

Except for the half a dozen large-scale factories, there is little development of modern industries in the district. The whole pattern of non-agricultural employment leans heavily towards village cottage industries, *i.e.*, the crafts and craftsmen working on traditional lines with locally available raw materials or for local demand alone. The district may, however, be said to be on the threshold of industrial advancement. Cheap power from Koyna is bound to attract more and more industries in the near future.

There are in all 53,176 workers engaged in industries, 36,889 in household industries and 16,287 in non-household industries. The total number of workers in the registered factories in 1961 is 6,014 which makes only 11 per cent of all workers engaged in industry or only 4 factory workers per thousand of total population against 20 per thousand total population for Maharashtra.

The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry major group and each industry minor group prepared from the Houselists are also shown separately for each village in the Village Industries Table presented at the end of Part II.

Large-scale Factories

There are only nine large-scale registered factories in the district working with 50 or more workers and using power. The Engineering Factory at Satara Road situated at 10 miles from Satara Town was established in 1922. Diesel Oil Engines, Shaping Machines, Powerlooms and Iron Ploughs and other Agricultural implements are manufactured there.

Two of the three sugar factories are in Phaltan taluka. One of them was established in 1933. It has 8,000 acres of its own land out of which 5,000 are used for growing sugarcane. The total sugar production in 1959-60 was 142,818 bags. The other sugar factory at Phaltan is run on co-operative lines. It started production in 1957 and had a crushing capacity of 871 tons of sugarcane per day in 1959-60. This capacity was expected to increase to 1,200 tons per day. In 1959-60, it produced 155,443 bags of sugar.

The third sugar factory is also a co-operative concern and has been set up near Karad. It has started production in 1961. Annual average production is 185,408 bags.

Ogale Glass Works at Ogalewadi was established in 1916. It was converted into a limited company in 1919 and started manufacturing paper weights, flower pots, dishes and glass tiles. Production of "Prabhakar" lanterns was started in 1925. Later on, it started making safety stoves and stainless steel utensils. Manufacture of electric motors was started in 1957.

A Soap factory and a Pharmaceutical factory are located at Satara.

There are two Oil Presses, one at Karad and the other at Vaduth.

Small-scale Registered Factories

There are 26 smaller establishments manufacturing diesel engine parts and accessories for the engineering works. Four factories manufacture motor bodies and 6 make bricks and tiles. Most of the remaining factories are engaged in textile weaving, making of gur, wooden furniture, copper and brass pots, footwear, paper, printing and binding.

The total number of registered factories has decreased from 131 in 1955 to 66 in 1961. The number of workers in the registered factories has, however, increased from 5,830 in 1955 to 6,014 in 1961. The reduction in the number of registered factories is due to the very significant reduction in the number of registered factories engaged in making gur because of the establishment of new sugar factories in the region.

According to the census of manufacturing industries in 1959, the manufacturing industries in the district had a fixed capital of Rs. 198·2 lakhs and a working capital of Rs. 134·5 lakhs. Total value of production was Rs. 402·5 lakhs and the value added by manufacture was Rs. 107·7 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district was only 0·53 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

The traditional crafts are conducted on household and cottage industries scale. They are mostly servicing or processing industries catering for the requirements of local population. Wood and wooden products industry engages the largest number of workers. They are the carpenters who manufacture, fix or repair doors and door-frames, wooden roof beams, furniture and agricultural implements in rural areas.

4,562 workers are engaged in miscellaneous textiles. These include the tailors engaged in making garments for men and women.

The next two important industries by the number of workers engaged are cotton spinning and weaving in mills engaging 1,235 workers and the cotton weaving in handlooms engaging 1,292 workers. At the end of May 1961, there were 2,137 cotton handlooms and only 56 powerlooms registered in the district.

Wool spinning other than in mills and wool weaving in handlooms, respectively, engaged 781 and 675 workers. Woollen blankets from Man still have a market outside the district.

There are 654 flour or rice mills engaging 899 workers.

2,599 workers are engaged in making and repairing shoes and other leather goods. 2,273 persons are engaged in production and rearing of

livestock and 7,084 in rearing of sheep and production of wool. A large majority of the latter group are from Man taluka which has more grazing lands. Some of these shepherds move down the ghats to Konkan districts in fair season.

2,058 workers are engaged in making earthen pottery. They are the village potters most of whom still work on the traditional baluta system under which they get a fixed quantity of foodgrains at the harvest time for supply of earthenware during the year.

Seventy-six workers are engaged in rearing of bees and collection of honey. They are mostly from Mahabaleshwar Mahal. The number of workers engaged in bidi-making is only 92. Those engaged in making of snuff are 40 and those making jarda 25.

The proportion of different groups of artisans to one lakh of total population in the district is as follows :—

Blacksmiths 81, Carpenters 235, Shoe-makers or repairers 146, Potters 180, Tailors and Dress-makers 257 and Spinners and Weavers 864.

The Industries Department has started a leather tanning centre at Satara.

Industrial Estates

An Industrial Estate has been set up at Karad for the development of industries like machinery, oil engines, utensils, aluminium products, wire nails, hosiery, textiles and agricultural implements. There is a proposal to set up two more industrial estates at Satara Road and Koregaon on co-operative lines.

POWER

The number of electrified towns and villages in the district is 58. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is 18·31 per cent of the total population of the district.

The district consumption of electricity on different items for eight years is shown in Table 30 in Part III.

The *per capita* consumption is naturally lower than the State average, as only 58 towns and villages in this district had so far been electrified up to 1960-61.

Before the commissioning of the Koyna Hydro Electric Project, the electric supply was through the diesel generating stations whose combined installed capacity was 1,620 K.W.H.

Work on Koyna Project is in progress near Helwak village in Patan taluka. The project is to be completed in three stages. In the first stage four generators have been commissioned and generate 240,000 K.W.H. of electric energy. This stage has now been completed and Karad, Patan, Satara, Lonand, Phaltan, Wai, Panchgani and Mahabaleshwar have started receiving power from there. On completion of the second stage, eight generating turbines (including the four installed in the first stage) will produce 480,000 K.W.H. of electricity. In the third and the last stage 60,000 K.W.H. of electricity will be generated from the Koyna waste waters. The total generation from Koyna will thus be over five lakhs of K.W.H. Power will be transmitted to Bombay and many other districts in Maharashtra.

Supply of abundant cheap power from Koyna is likely to attract new industries and strengthen the economy of the district with a strong industrial base.

TRADE AND COMMERCE

The trade in the district is mainly of importing salt, cocoanuts, betelnuts, dates, groceries, copper and brass pots, cloth and other piece-goods and selling them on cash payment in towns and rural areas and of collecting from the growers foodgrains, oilseed, turmeric, cotton, gur, sugar and other agricultural produce mostly for distribution within the district and some for export to Chiplun in Ratnagiri district or to Poona and Bombay. Agricultural produce is collected from the producers mainly at trading centres like Karad, Satara, Koregaon and Phaltan. The distribution of foodgrains and other articles of trade is through shops and pedlars or hawkers and in addition through the very well established institutions of weekly markets and fairs where sellers and buyers meet on fixed days of the week or the year.

Shops

Shops are found in almost all villages except in the smallest. They deal in all kinds of grain, salt, oil, sugar, spices and groceries. There are in all 6,006 shops in the district. 3,982 are in rural areas and 2,024 in urban areas. This does not include the shops temporarily set up in weekly markets or fairs. The number of shops to 1,000 dwellings is 21·3 for the district as a whole, 16·8 for rural areas and 66·1 for urban areas. It will be seen that the urban areas have four times more shops than rural areas. The ratio between the shops and 1,000 dwellings for the district is less than the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These markets or 'bazars' as they are called, are distributing rather than collecting centres. The articles sold at these markets are brass, copper or iron vessels, foodgrains, pulses, oil, chillies, turmeric, gur, piece-goods, cloth, fruit and vegetables. Pedlars and hawkers set up booths on the market days. Agriculturists from the nearby villages also bring their field produce. In addition, the traders and shopkeepers belonging to the market place also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The weekly markets fill about two in the afternoon and close by six to enable both the buyers and sellers to reach home before it is dark.

Column 7 of the Village Directory in Part I shows for each village in the district if a weekly market is held and if so on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 237 shows locations of all these markets and also the days on which each bazar is held.

The District Gazetteer had reported only 34 weekly and bi-weekly markets for the district in 1882. Their number in 1960-61 has increased to 120 out of which 14 are also cattle markets. Twenty-two weekly markets are held on Sunday, 16 on Monday, 14 on Tuesday, 14 on Wednesday, 10 on Thursday, 23 on Friday and 21 on Saturday. Five or six weekly markets will be seen in the map to cluster as subsidiaries around a central village. Each place has its bazar on one of the week days keeping the pedlar and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

Fairs

As far as trade is concerned, fairs differ little from the weekly markets except that they are attended by unusually large numbers. They are also chiefly distributing centres. A list of fairs held in the district showing their locations, duration and dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 238 shows the location of all the fairs in the district having 1,000 or more gathering.

Trade Centres

Apart from the weekly markets and fairs, Karad, Satara, Koregaon and Phaltan are important Trade Centres in the district, as far as collection and export of agricultural produce are concerned. Agricultural produce markets at those places are regulated under the Bombay Agricultural Produce Markets Act, 1939, and they are known as principal market yards. Each of them has the following sub-markets:—

Karad	(1) Umraj.
	(2) Kole.
	(3) Malharpeth.
	(4) Masur.
Satara	(1) Vaduth.
	(2) Surur.
	(3) Wai.
	(4) Atit.
Koregaon	(1) Rahamatpur.
	(2) Wathar.
Phaltan	(1) Lonand.

The combined turnover of commodities (by value in rupees) in all these markets during the year 1957-58 was as follows:—

Commodities	Principal Market Yards				Total
	Karad	Satara	Koregaon	Phaltan	
	Rs.	Rs.	Rs.	Rs.	Rs. in lakhs
(1) Groundnut ..	41,80,307	...	...	..	41.8
(2) Groundnut (unshelled).	..	5,83,785	23,430	..	6.1
(3) Groundnut (shelled).	..	32,844	10,99,638	..	11.3
(4) Gur ..	37,70,651	3,48,812	3,59,424	6,99,212	51.8
(5) Turmeric ..	15,80,174	24,864	...	...	16.0
(6) Jowar ..	48,22,542	..	1,30,520	9,02,251	58.6
(7) Bajri ..	1,15,023	..	13,806	3,54,281	4.8
(8) Chillies ..	3,35,476	...	76,966	...	4.1

(12) Mug ..	228	...	11,760	..	0.1
(13) Gram ..	..	15,720	44,330	..	0.6
(14) Chawali ..	..	..	34,710	..	0.3
(15) Safflower ..	..	..	..	2,63,603	2.6
(16) Wheat ..	..	..	..	2,37,320	2.4

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district is 17,287 out of which 10,373 or 60 per cent are in rural areas and 6,914 or 40 per cent are in urban areas. The number of workers in trade and commerce makes 2·5 per cent of all workers in the district. About one-fourth of the district number are in Karad taluka and little less than one-fifth in Satara taluka.

Only 3·55 per cent of the workers in trade and commerce are in wholesale trade, 85·82 per cent are in retail trade and 10·63 per cent in miscellaneous trade or commerce. Seventy-two per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is only 52. Mostly, the wholesale trade of cereals and pulses appears to be combined with wholesale trade of sugar, spices, oil, tobacco, bidi, etc., as their combined number is 227 for the district.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 of Part III. Their break-up by talukas and type is shown below.

Karad taluka is leading in banking activities and has about one-third of the total number of banking offices in the district. The Central Co-operative Bank has at least one branch office in each taluka.

The State Bank of India works for the treasury in the district and has branches at Satara, Karad and Phaltan.

	Number of Banking Offices			Total
	Scheduled	Non-scheduled	Co-operative	
DISTRICT TOTAL ..	10	12	16	38
(1) Khandala Mahal ..	3	..	1	4
(2) Phaltan Taluka ..	2	1	1	4

(9) Satara Taluka ..	2	3	2	7
(10) Patan Taluka	..	..	1	1
(11) Karad Taluka ..	3	6	3	12

COMMUNICATIONS AND TRANSPORT

The Poona-Bangalore line of the Southern Railway passes through the central part of the district. It is a metre gauge line and has a mileage of 74·13 miles and 13 stations in the district. The entire line is now being converted into a broad gauge.

Existing Railway mileage in the district is 1·84 miles per 100 square miles of area against 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break up by the type of road surface. The district map facing the Title Page shows all those roads.

The district is well connected by roads with the adjoining districts of Poona, Sholapur, Sangli and Kolhapur. Towards the west, however, there are only two roads across the Western Ghats, one *via* Mahabaleshwar to Mahad in Kolaba district and the other *via* Koyna Project to Chiplun in Ratnagiri district. The district headquarters is similarly well connected by roads with all the taluka headquarters. Roads are fewer in western parts of the district obviously because of the difficult hilly terrain.

During the last decade (1951—1960) there was no change in the mileage of National Highways. The State Highways increased by 27·5 miles, Major District roads by 33 miles, other District roads by 101 miles and Village roads by 115 miles. The total increase in all types of roads (excluding Municipal roads) is 276 miles.

New Roads

Construction of the following roads is in progress:—

(1) Aundh-Pusegaon-Budh-Mol-Phaltan Road, (2) Kudal-Panchgani Road, (3) Charegaon-Chaphal Road, (4) Kashil-Pal-Tarale Road and (5) Masur-Padali Road.

New Bridges

Work on the following six important bridges is in progress :—

(1) On Krishna river on Satara-Rahimatpur Road near Dhamner.

(2) On Krishna river on Umraj-Masur-Mayani-Pandharpur Road near Umraj.

(3) On Koyna river near Karad.

(4) On Koyna river near Sangwad on Patan-Nada-Dhebewadi Road.

(5) Small Bridge for the road near Indoli on Tarali river.

(6) On Tarali river on Kashil-Pal Road.

Under the Nagpur Plan, the district should have 2,091 miles of roads. It is short of that target by 540 miles on 31st March 1961.

Posts, Telegraphs and Telephones

The district is included in the Satara Postal Division. Head Post Office is situated at Satara and Sub-Offices at taluka headquarters and towns. Bigger villages have branch Post Offices. In the year 1960-61, there were 11 Sub-Post Offices and 314 Branch Post Offices in the district. Together, their number has increased by 48 per cent over that of 1954-55. The number of Post Boxes in the district has increased from 865 in 1954-55 to 959 in 1960-61.

There are Telegraph offices at the following 26 places :—

(1) Aundh, (2) Bhuinj, (3) Dahiwadi, (4) Bavda, (5) Khatav, (6) Koregaon, (7) Koyna, (8) Lonand, (9) Mahabaleshwar, (10) Malharpeth, (11) Medha,

(12) Masur, (13) Mhaswad, (14) Ogalewadi, (15) Panchgani, (16) Phaltan, (17) Patan, (18) Rahimatpur, (19) Satara, (20) Satara Road, (21) Sakharwadi, (22) Shirwal, (23) Umbraj, (24) Vaduj, (25) Wai, and (26) Vathar.

The following nineteen places have Telephone connections :—

(1) Bavda, (2) Khatav, (3) Koregaon, (4) Koyna, (5) Lonand, (6) Mahabaleshwar, (7) Medha, (8) Masur, (9) Ogalewadi, (10) Panchgani, (11) Phaltan, (12) Patan, (13) Rahimatpur, (14) Satara, (15) Satara Road, (16) Shirwal, (17) Umbraj, (18) Wai, and (19) Vathar.

Passenger Road Transport

During the plan periods, number of roads connecting the villages were constructed in the district and the buses of the State Road Transport Corporation are running regularly on these roads. This district is included partly in the jurisdiction of Poona, Sholapur and Kolhapur Divisions. The three depots at Satara, Koregaon and Wai are under Poona Division, the depot at Phaltan is under Sholapur Division and the depot at Karad is under Kolhapur Division. No separate figures for passenger transport are therefore available separately for the district. Those five depots together run buses on 120 routes which make 564 single trips per day. In addition the depot at Satara runs a Satara City Service between the bus-station and Sadar Bazar, Rajwada, Tank and the Mandir. Nationalisation of passenger road transport has been completed by the end of the Second Five-Year Plan. The Third Plan schemes include expansion of the services to new places on public demand, construction of permanent bus-stations and pick-up stands and extension of facilities to the travelling public.

Goods Transport

Separate figures for lorries operated in the district are not available as the Regional Transport Officer working at Poona keeps combined records for his region including Poona, Ahmadnagar, Sholapur, Satara, Sangli and Kolhapur districts.

Workers in Transport and Communications

5,077 persons are engaged in transport and 815 in postal, telegraphic and telephone communications in the district. Out of the workers in Transport, 931 are in Railway transport, 1,225 in Motor transport and 2,921 in other kinds of transport like bullock-carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a Railway or a Road or has a Post Office or not.

CONSTRUCTION

The total number of persons engaged in construction is 15,469. 12,719 are males and 2,750 females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

65·1 per cent of the workers are engaged in construction of dams, waterways and canals, 24·1 per cent in construction of buildings and 10·8 per cent in construction of roads, bridges, etc. The large proportion engaged in the construction of dams, etc., represents the workers on Koyna Project.

All the workers engaged in construction together make only 2·2 per cent of the total workers in the district.

OTHER SERVICES

42,082 persons are engaged in the district in "Other services". 34,970 are males and 7,112 are females. Major categories out of them were: (*i*) Public services, (*ii*) Educational services, and (*iii*) Personal services. "Public services" include administrative employees of Central, State and Local Governments. "Educational services" include all classes of teachers and "Personal services" include domestic servants as well as barbers, washermen, and others rendering services to persons or households. The distribution of the workers in other services by minor groups is shown in Table B-IV-C in Part II. 6·08 per cent of the total workers in the district are engaged in "Other services" as against 8·53 per cent for the State. 25·96 per cent of the total workers in "Other services" in the district were engaged in "Public services" and 19·62 per cent in "Educational services". Both these proportions are higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This may be so because the district does not have large urban centres and there are hardly any comparable business services, labour associations or recreation services. Even the proportion of "Personal services" in the district 21·09 per cent is lower than the State average of 27·15 per cent.

The number of domestic servants is also very small, *i.e.*, 1,838 or one for about 775 population. The number of barbers is 1,820. The number of washermen is 1,338.

There are 242 legal practitioners and 1,449 persons working in medical and health services excluding veterinary services.

The number of teachers in technical schools and colleges is 374. The number of teachers in other schools and colleges is 7,818.

The number of State Government employees including those now working under the Zilla Parishad is 6,500.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Ratio

The proportions of the total population, males and females, engaged in work for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA	47·91	57·09	38·10
SATARA DISTRICT ..	48·42	51·56	45·43
Khandala Mahal	48·97	53·09	44·94
Phaltan Taluka	46·32	52·81	39·71
Wai Taluka	47·38	47·07	47·66
Mahabaleshwar Mahal ..	41·62	49·80	33·34
Jaoli Taluka	54·69	50·79	57·90
Koregaon Taluka	43·26	49·11	37·76
Khatav Taluka	48·49	50·62	46·44
Man Taluka	50·43	53·99	46·94
Satara Taluka	45·98	47·74	44·33
Patan Taluka	55·43	56·79	54·16
Karad Taluka	47·40	52·74	42·03

The labour participation ratio, *i.e.*, percentage of workers to total population varies from 41·62 in Mahabaleshwar mahal to 55·43 in Patan taluka. Labour participation ratio for males varies from 47·07 in Wai taluka to 56·79 in Patan taluka and that for females from 33·34 in Mahabaleshwar mahal to 57·90 in Jaoli taluka.

The labour participation ratio for the district is slightly higher for the total population than the State average but is lower for males and considerably higher for females. These differences in the ratios for males and females are the result of the out-migration of working age male population. Western talukas have higher female participation ratios. It seems female participation is more in rice cultivation than in cultivation of other crops. Phaltan which has a large proportion of area under sugarcane has a small ratio of female participation. So has Karad.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows :—

		Total workers	Primary	Secondary	Tertiary
Maharashtra ..	Total	100	72·25	12·34	15·41
	Rural	100	88·73	5·68	5·59
	Urban	100	11·97	36·69	51·34
Satara District ..	Total	100	81·48	9·08	9·44
	Rural	100	85·86	7·82	6·32
	Urban	100	26·41	24·94	48·65

As may be expected, primary sector dominates in the district with 81·48 per cent of total workers against the State average of 72·25 per cent. Rural areas in the district are however better off both in secondary and tertiary sectors than the State average for rural areas. Urban areas in the district, however, lag very much behind in the secondary sector than the State average. It is significant that the primary sector engages a larger proportion of workers than the secondary sector even in urban areas. Tertiary services dominate in urban areas and consist mainly of trade, administrative and other services. It has been described earlier that even from among the workers engaged in the secondary sector a large proportion is engaged in traditional crafts and services ancillary to agriculture. The workers in factory industries make only 4 per thousand of total population against 20 for the State.

Categories of Economic Activity

The distribution of workers, males and females, by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			SATARA DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46.11	40.69	54.79	70.08	61.31	79.59
II Agricultural Labour ..	23.80	18.12	32.90	9.67	7.53	11.99
III Mining, Quarrying, Livestock, Fishing.	2.16	2.97	0.86	0.90	1.35	0.41
IV Household Industry ..	4.39	4.80	3.74	5.33	6.89	3.64
V Manufacturing other than Household Industry.	6.88	10.22	1.54	2.35	4.24	0.30
VI Construction	1.24	1.69	0.53	2.23	3.53	0.83
VII Trade and Commerce ..	4.52	6.61	1.17	2.50	3.87	1.00
VIII Transport, Communication and Storage.	2.36	3.65	0.29	0.86	1.57	0.10
IX Other Services	8.54	11.25	4.18	6.08	9.71	2.14
Total Workers ..	100.00	100.00	100.00	100.00	100.00	100.00

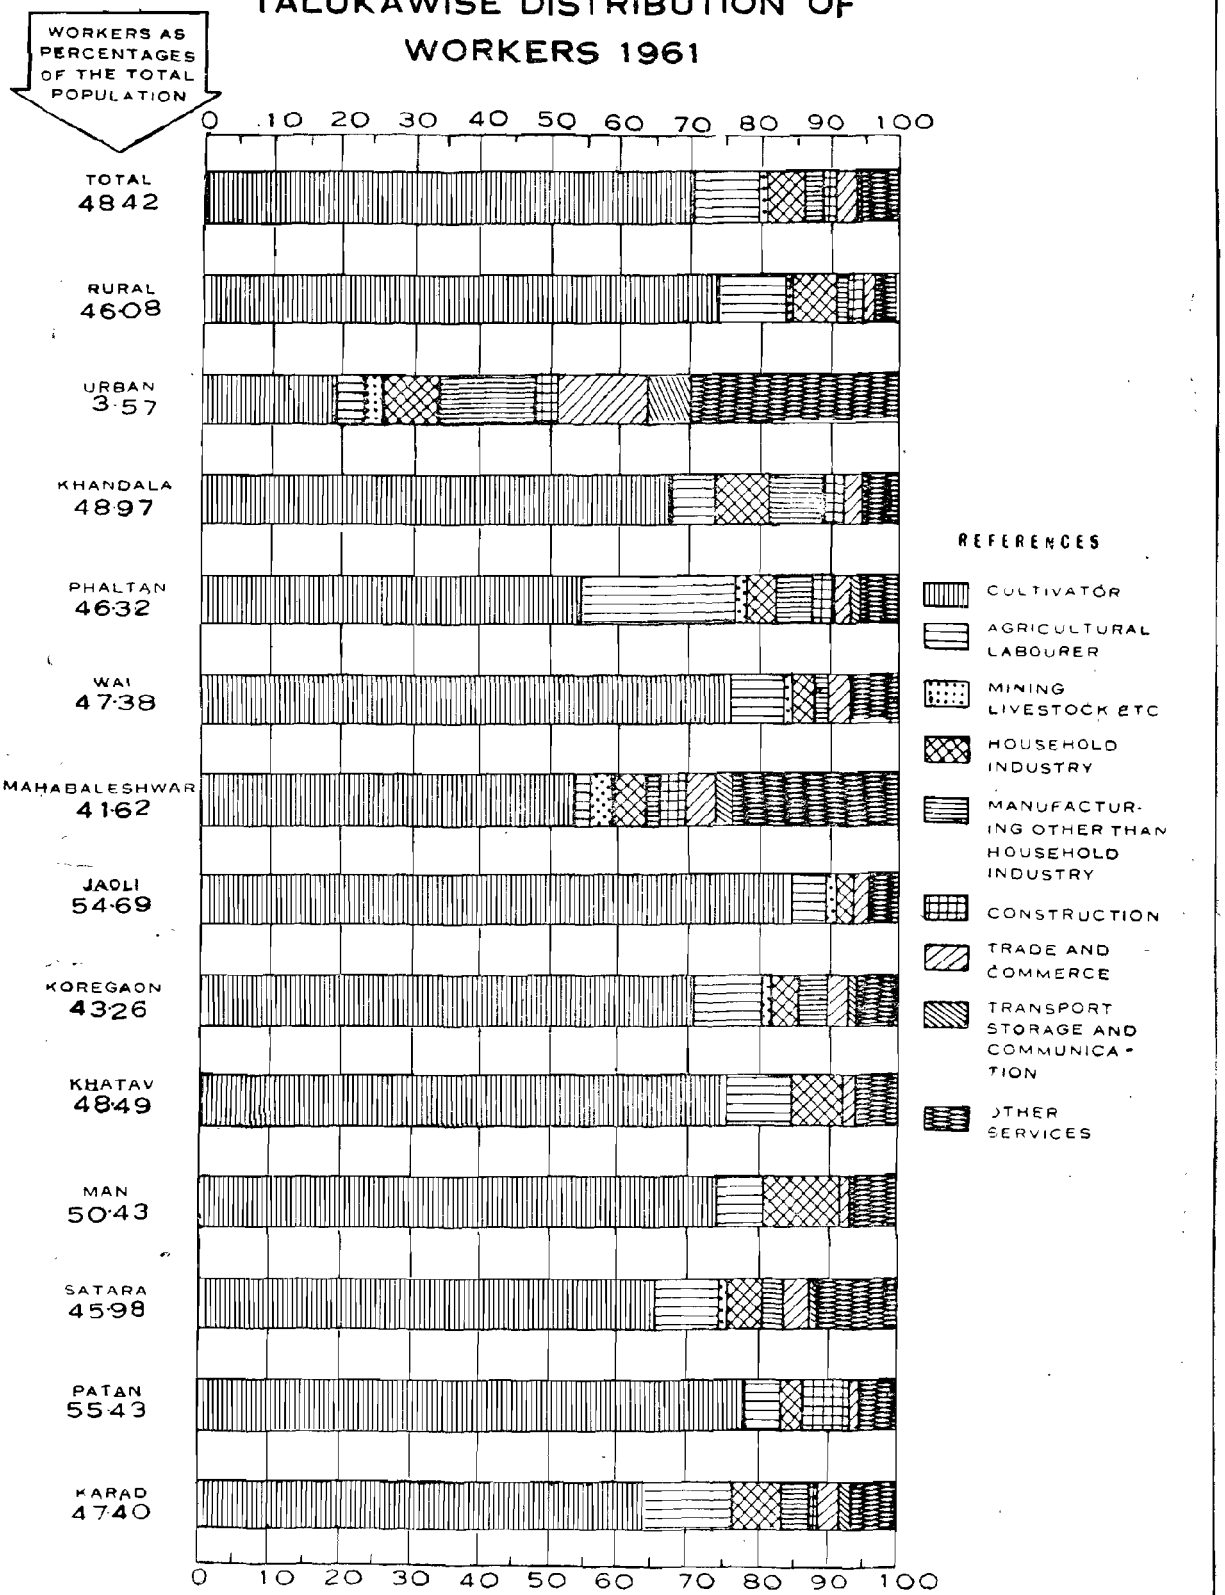

A remarkable departure from the State average is that the proportion of agricultural labourers is very low both for males and females and that the deficiency is more than made up by the higher proportions of cultivators. The State ratio between cultivators and agricultural labourers is 2 : 1 while for the district it is 7 : 1. Because the labour participation ratios are comparable with those of the State, the preponderance of cultivators over agricultural labourers appears to be a special feature of the district. This may be due to the crop pattern and cultivation practices in which either outside labourers are not hired as much as in other districts of Maharashtra and/or those who are so hired are themselves small cultivators and in addition work as agricultural labourers after harvesting their own kharif crops. There are over sixty thousand cultivators in the district who are also working as agricultural labourers.

The 1961 concepts of workers and non-workers have been described in the Explanatory Note to Part II. In spite of the changes in the method of economic classification, the 1961 pattern may be broadly compared with the livelihood pattern of 1951. In 1951, cultivators and agricultural labourers (including earning dependents) made 76·93 per cent and 4·89 per cent of the total workers, respectively. In 1961 the corresponding proportions are 70·08 per cent and 9·67 per cent. There is thus a reduction for the combined group working in land. It is partly due to an increase under construction which because of the Koyna Project accounts for 2·23 per cent in 1961. The increase in the proportion of agricultural labourers from 4·87 to 9·67 may be due to the increased area under irrigation and sugarcane. The low proportion of agricultural labourers in 1961 was still lower in 1951, and thus may not have anything to do with the implementation of land reforms. It may indicate that owner cultivation is seen in the district at its height.

Talukawise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and the district are also shown for comparison.

State / District / Taluka	I Cultivator	II Agricultural labourer	III Mining, quarrying, livestock, fishing, hunting	IV Household industry	V Manufacturing other than household industry	VI Construction	VII Trade and Commerce	VIII Transport, communication and storage	IX Other services	Total

TALUKAWISE DISTRIBUTION OF WORKERS 1961

Distribution of workers by nine categories of economic activity is also shown in the figure facing this page for the district and each taluka separately.

The proportion of agricultural labourers is higher in Karad and the highest in Phaltan probably because of large areas under sugarcane cultivation.

Workers by Age

The distribution of total workers by age-groups is shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Satara District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All Ages ..	48·42	51·56	45·53	47·91	57·09	38·10
0—14 ..	9·31	6·92	11·81	8·72	8·62	8·84
15—34 ..	78·82	85·74	73·06	74·53	87·45	60·90
35—59 ..	86·69	97·88	76·16	81·58	96·86	63·68
60+ ..	54·38	77·18	31·95	49·13	72·82	26·28

Participation ratios in the district for the total population and females are higher than the State averages in all age-groups. The ratios for males in 0—14 and 15—34 age-groups are lower and those for the other two age-groups are higher than the State average. These differences are consistent with the predominance of agriculture in the economy, the migration of 15—34 age-group male population and the educational drive which is attracting male boys of 5—14 to schools in larger proportions than the State average.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III in Part II is shown below by percentages for the district total, rural and urban areas separately. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra ..	70·19	14·67	12·77	2·37
Satara District ..	66·02	20·34	12·45	1·19

Because of a high literacy ratio, the proportion of literate workers in the district is higher than the State average. But that is the result of adult literacy campaigns and is limited to literacy without educational levels. The proportions are lower for higher educational levels. The proportion for Matriculation and above is actually half of the State average. More than half of the matriculate workers are in other services. But it is significant that 957 matriculates are working in agriculture, 98 in household industry, 1,139 in manufacturing industry, 1,367 in construction, 1,218 in trade and commerce and 501 in transport.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage of proportions of employers, employees, single workers and family workers in the district, for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in para. 58 in the Explanatory Note to Part II.

	Total Rural Urban	Total workers	Class of workers			
			Employers	Employees	Single workers	Family workers
Maharashtra..	Total	100	3·96	62·18	26·52	7·34
	Rural	100	1·57	46·47	38·58	13·38
	Urban	100	4·98	68·90	21·37	4·75
Satara District	Total	100	2·16	56·33	28·23	13·28
	Rural	100	0·92	57·08	27·98	14·02
	Urban	100	4·68	54·81	28·74	11·77

Family workers and single workers have higher porportions in the district than the State average. That difference is more marked in the case of urban areas. This is a reflection of the traditional crafts dominating the scene. The proportions of employers are low as a consequence of the preponderance of single workers and family workers.

The proportion of employees, *i.e.*, hired workers and others in household industries in the district total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

	Total Rural Urban	Total workers	Employees	Others
Maharashtra ..	Total	100	8·18	91·82
	Rural	100	4·91	95·09
	Urban	100	16·35	83·65
Satara District ..	Total	100	5·60	94·40
	Rural	100	4·62	95·38
	Urban	100	12·85	87·15

Household Industries in the district also work more with family workers and the proportion of hired workers is 5·6 per cent against 8·18 per cent for the State. The same difference persists for household industries both in rural and urban areas.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-B in Part II) :—

	Principal work	Tota Rural Urban	Percentage of total Workers by Categories of Secondary work		
			I	II	IV
MAHARASHTRA	I Cultivation ..	Total ..	..	17.85	1.97
		Rural ..	..	18.03	1.98
		Urban ..	..	10.54	1.32
	II Agricultural Labour ..	Total ..	13.17	..	0.94
		Rural ..	13.46	..	0.97
		Urban ..	7.12	..	0.31
	IV Household Industry ..	Total ..	14.78	6.97	..
		Rural ..	19.61	9.38	..
		Urban ..	2.70	0.95	..
SATARA DISTRICT.	I Cultivation ..	Total ..	..	12.69	2.76
		Rural ..	..	12.88	2.79
		Urban ..	..	3.57	1.33
	II Agricultural Labour ..	Total ..	31.53	..	2.89
		Rural ..	32.19	..	2.98
		Urban ..	12.46	..	0.27
	IV Household Industry ..	Total ..	25.88	7.63	..
		Rural ..	28.73	8.56	..
		Urban ..	4.69	0.71	..

There are more agricultural labourers working at cultivation as a subsidiary activity. In other words there is a larger proportion of cultivators who are working as agricultural labourers as principal work and to whom cultivation is a secondary activity. These may be the small landholders from western talukas. Similarly, a larger proportion of workers at household industry work at cultivation as secondary work than the State average. This may be the reflection of village craftsmen gradually taking to cultivation as the household industries do not alone provide full-time employment.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II.

	Occupational Division	Maharashtra	Satara District
0	Professional, technical and related workers.	6·42	8·63
1	Administrative, Executive and Managerial workers.	3·89	4·62
	cal and related workers ..	9·13	7·28
3	Sales workers	12·23	10·76
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	8·47
5	Miners, quarrymen and related workers.	0·75	0·87
6	Workers in Transport and Communication occupations.	3·57	2·58
7 & 8	Craftsmen, production process workers and labourers not elsewhere classified.	45·99	47·11
9	Service, sport and recreation workers	10·27	9·53
×	Workers not classifiable by occupation.	0·11	0·15
	Total ..	100·00	100·00

The proportion for the first occupational division is higher in the district mainly because of the comparatively larger number of teachers.

Corresponding proportions are not available for 1951 and the 1961 pattern cannot, therefore, be compared with that of 1951 or earlier Censuses.

Non-Workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	42.88	15.31	40.65	13.85	57.49	23.22
(2) Household duties	0.03	29.59	..	26.97	0.22	43.74
(3) Dependents, infants and disabled	55.52	54.69	58.34	58.89	37.08	32.10
(4) Retired, rentiers or independent means.	0.61	0.20	0.32	0.14	2.52	0.51
(5) Beggars, vagrants, etc.	0.26	0.15	0.21	0.13	0.58	0.24
(6) Inmates of institutions	0.05	0.03	0.02	0.01	0.25	0.11
(7) Persons seeking employment for the first time.	0.38	0.02	0.27	..	1.07	0.07
(8) Unemployed but seeking work ..	0.27	0.01	0.19	0.01	0.79	0.01
Total ..	100.00	100.00	100.00	100.00	100.00	100.00

There is a marked difference in the distribution pattern for non-workers among males and females. 42·88 per cent out of male non-workers are full-time students while the corresponding proportion for females is 15·31. The reason is that 29·59 per cent females who are engaged in household dutics are also included as non-workers. The rural urban differences are similar both for males and females. In urban areas the percentage of full-time students is higher and that for dependents lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 1·86 and 0·46 for males in urban and rural areas and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower also because the group of non-workers contains a large number of adult women engaged in household duties.

Review

The proportion of population in working ages, *i.e.*, 15—59 is smaller in 1961 than 1951. It may be still smaller in 1971 because of the high rate of growth of population. An average worker in the district has thus to bear an increasing burden of dependents. This change in the age composition of the population would itself depress the level

of living unless it is also accompanied by a corresponding rise in the per capita production. The gross agricultural production has no doubt shown an increase during the last decade but the number of workers on land has also increased by about the same proportions. The increase in industrial production in the district is not yet of much significance to influence the estimate of per capita production.

Agriculture dominates the economy and is bound to do so for long. About 4/5ths of the workers directly work on land. Most of the others are engaged in trade, commerce, processing industries or services which are ancillary to agriculture. The proportion of irrigated lands in the district is twice larger than the average for the State but the predominance of bajri and other coarse hill grains sets off that advantage and the gross value of the product per acre or per worker on land may be about the same as estimated for Maharashtra. A steep rise in the areas under irrigation and the increasing specialisation in sugarcane cultivation in canal irrigated areas with the backing of three sugar factories are, however, the relieving features.

With the average size of cultivation holding of 9 acres and an estimated value of gross produce of Rs. 76 per acre combined with frequent crop failures, the agricultural production alone would hardly suffice the needs of the growing population. The long-term migration from the district to Bombay and other places and the seasonal migration of a large number of people to work as agricultural labourers in nearby rabi or canal irrigated lands continue as before. So does the seasonal migration of shepherds from Man taluka who annually move long distances towards Konkan in the west or Sholapur in the east in search of fodder for their sheep and a supplementary source of livelihood for themselves.

PART I

VILLAGE DIRECTORY

This Directory renders an account of each Village and each ward of Town

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with words "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown in roman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from Census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.* shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F	*for* Females.
M	*for* Males.
P	*for* Persons.
I	Working as Cultivator.
II	Working as Agricultural Labourer.
III	Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV	Working at Household Industry.
V	Working in Manufacturing other than Household Industry.
VI	Working in Construction.
VII	Working in Trade and Commerce.
VIII	Working in Transport, Storage and Communications.
IX	Working in Other Services.

IN NOTATIONS

In Column (2)

E	*for* Electricity.
FV	*for* Forest Village.

In Column (3)

Po	*for* Post Office.
R	*for* Connected by Road.
Rh	*for* Rest-houses and Choultries.
Rly	*for* Connected by Railway.
To	*for* Telegraph Office.

In Column (4)

C	*for* Higher Institutions including Colleges.
H	*for* High School.
M	*for* Middle School.
P	*for* Primary School.
T	*for* Technical Institutions.

IN NOTATIONS

In Column (5)

C	*for* Canal.
N	*for* Nallah.
Riv	*for* River.
S	*for* Protected Water Supply.
Sp	*for* Spring.
Tk	*for* Tank.
W	*for* Well.
×	*for* Inadequacy of Drinking Water.

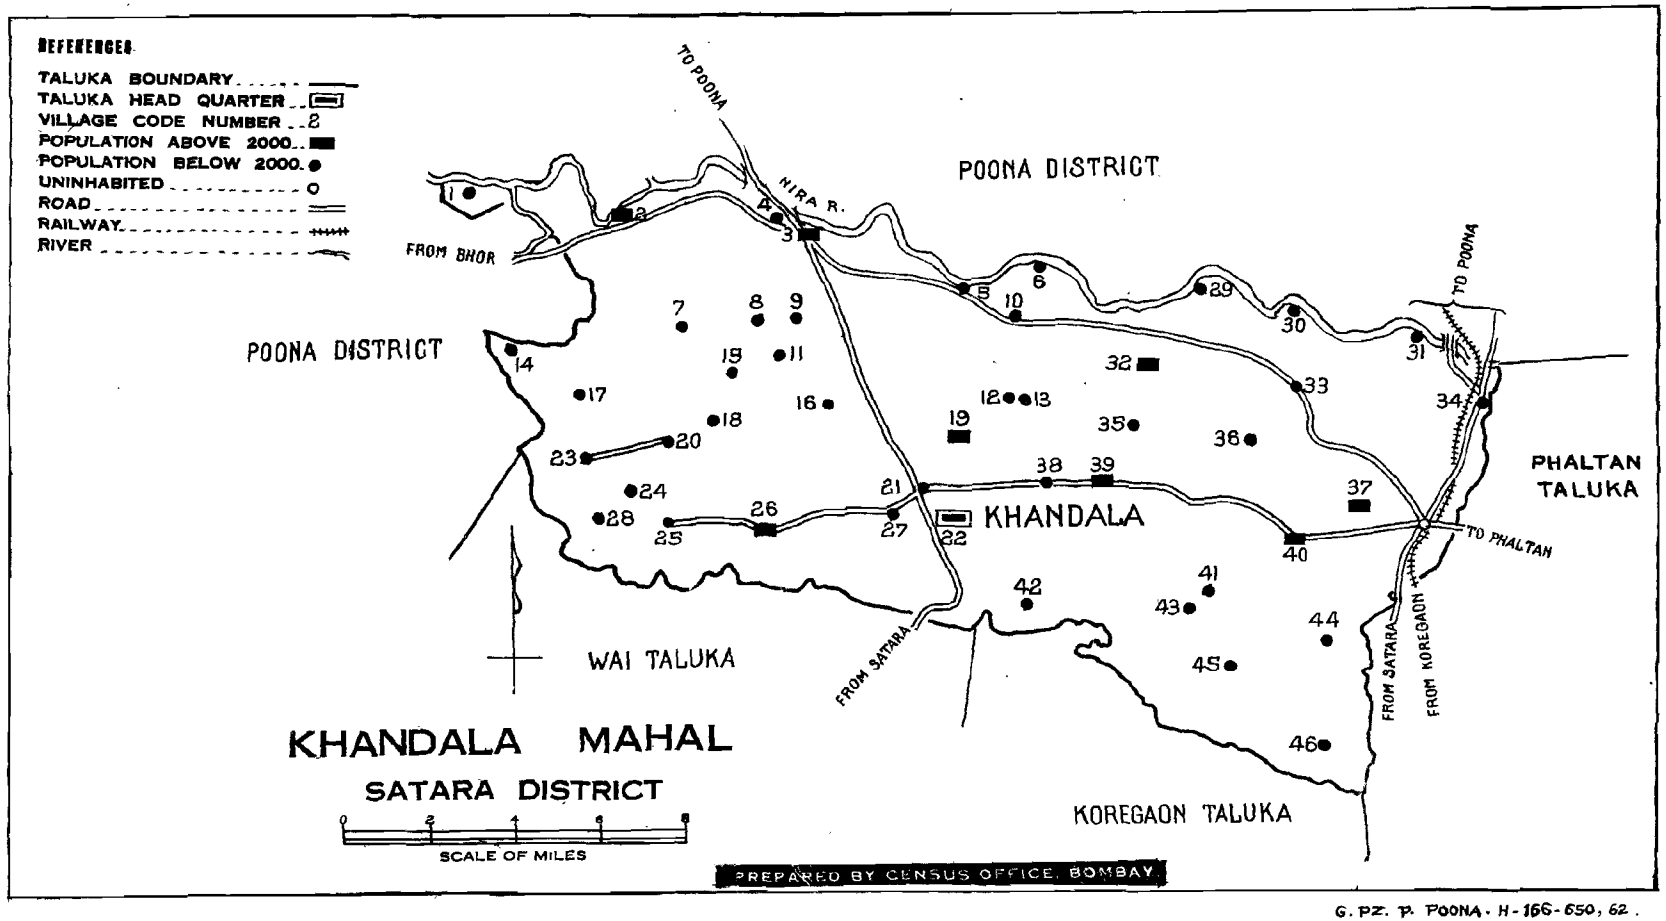

In Column (6)

D	*for* Dispensaries.
Hos	*for* Hospital.
Mp	*for* Medical Practitioner.

In Column (8)

NA	*for* Not Available.

EXPLANATORY NOTE

THIS PART contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (*e.g.*, A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (*e.g.*, B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical location for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. This shows the territorial changes that have taken place during the decade. Units which had some change in area in the decade are only shown here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The "household" is slightly different from a "family". A "household" is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Caste and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A "literate" is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I. As Cultivator.
II. As Agricultural Labourer.
III. In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV. At Household Industry.
V. In Manufacturing other than Household Industry.
VI. In Construction.
VII. In Trade and Commerce.
VIII. In Transport, Storage and Communications.
IX. In other services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified a agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, live-stock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, waterman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, proce sing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately, while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I.	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II.	Agricultural Labourer ..	
III.	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV.	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V.	Manufacturing	Divisions 2 and 3.
VI.	Construction	Division 4.
VII.	Trade and Commerce ..	Division 6.
VIII.	Transport, Storage and Communications.	Division 7.
IX.	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes "employer", "employee", "single worker" and "family worker":

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii), even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivation and II-Agricultural labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in cloumn (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka, separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry ;

(ii) engaged in cultivation only ;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and

by industry division and major group of the household industry (Appendix I). The table shows the sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 Tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. All the same, the table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0–9 years and 70 and over. The entire population in 0–9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Table C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bi-lingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-B of Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

112. Table SCT-V-B (same as Part A) for Scheduled Tribes is not presented here because of the small tribal population in the district not adequately represented in the 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five Tables in this Series. Four of them relate to housing conditions and urnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number o workers for each ndustry classified by industry division, major group and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering o houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part o. a tructure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place o. business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses clas ified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind o. production, processing, repairs or servicing of goods, goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages,

show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124. This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their code numbers are listed below—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, live-stock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Live-stock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Divisions 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal.
36	Basic Metals and their products except machinery and transport equipment.
37	Machinery (all kinds other than Transport) and Electrical equipment.
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services

Division 8—Services—*concld.*

83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations.
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described. (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting—*concld.*	
04	*Live-stock and Hunting*—	
	Production and rearing of live-stock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying*—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Divisions 2 and 3—Manufacturing	
20	*Foodstuffs*—	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugar-cane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages*—	
	Production of distilled spirits, wines, liquor, from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products*—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products.	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Divisions 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment*—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment*—	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries*—	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction*—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railways bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas*—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services*—	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade*—	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
63	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade*—	
..	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in food stuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobiloil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper ..	661
	Retail trading in metal, porcelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*—	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks shares and futures	692
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport*—	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport*—	
	Such as packing, carting travel agency ..	710
72	*Storage and Warehousing*—	
	Operation of storage such as ware-houses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication*—	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services*—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or inividuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note: n. e. c. = not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers
1 Administrative, executive and managerial workers
2 Clerical and related workers
3 Sales workers
4 Farmers, fishermen, hunters, loggers and related workers
5 Miners, quarrymen and related workers
6 Workers in transport and communication occupations
7-8 Craftsmen, production process workers, and labourers not elsewhere classified
9 Service, sport and recreation workers
X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers
- 00 Architects, Engineers and Surveyors
- 01 Physicists, Chemists, Geologists and other Physical Scientists
- 02 Biologists, Veterinarians, Agronomists and Related Scientists
- 03 Physicians, Surgeons and Dentists
- 04 Nurses, Pharmacists and other Medical and Health Technicians
- 05 Teachers
- 06 Jurists
- 07 Social Scientists and Related Workers
- 08 Artists, Writers, and Related Workers
- 09 Draughtsmen, Science and Engineering Technicians, n. e. c.
- 0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers
- 10 Administrators, and Executive Officials, Government
- 11 Directors and Managers, Wholesale and Retail Trade
- 12 Directors, Managers and Working Proprietors, Financial Institutions
- 13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers
- 20 Book-Keepers and Cashiers
- 21 Stenographers and Typists
- 22 Office Machine Operators
- 28 Clerical Workers, Miscellaneous
- 29 Unskilled Office Workers

3 Sales Workers
- 30 Working Proprietors, Wholesale and Retail Trade
- 31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
- 32 Commercial Travellers and Manufacturers' Agents
- 33 Salesmen, Shop Assistants and Related Workers
- 34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers
- 40 Farmers and Farm Managers
- 41 Farm Workers
- 42 Hunters and Related Workers
- 43 Fishermen and Related Workers
- 44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers
- 50 Miners and Quarrymen
- 51 Well Drillers and Related Workers
- 52 Mineral Treaters
- 59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations
- 60 Deck Officers, Engineer Officers and Pilots, Ship
- 61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen
- 62 Aircraft Pilots, Navigators and Flight Engineers
- 63 Drivers and Firemen, Railway Engine
- 64 Drivers Road Transport
- 65 Conductors, Guards and Brakesmen (Railway)
- 66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
- 67 Telephone, Telegraph and Related Telecommunication Operators
- 68 Postmen and Messengers
- 69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified
- 70 Spinners, Weavers, Knitters, Dyers and Related Workers
- 71 Tailors Cutters, Furriers and Related Workers
- 72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers
- 73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
- 74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
- 75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
- 76 Electricians and Related Electrical and Electronics Workers
- 77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
- 78 Painters and Paper Hangers
- 79 Bricklayers, Plasterers and Construction Workers, n. e. c.
- 80 Compositors, Printers, Engravers, Book Binders and Related Workers
- 81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
- 82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
- 83 Chemical and Related Process Workers
- 84 Tobacco Preparers and Products Makers
- 85 Craftsmen and Production Process Workers, n. e. c.
- 86 Testers, Packers, Sorters and Related Workers
- 87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
- 89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers
- 90 Fire Fighters, Policemen, Guards and Related Workers
- 91 House Keepers, Cooks, Maids and Related Workers
- 92 Waiters, Bartenders and Related Workers
- 93 Building Caretakers, Cleaners and Related Workers
- 94 Barbers, Hairdressers, Beauticians and Related Workers
- 95 Launderers, Dry Cleaners and Pressers
- 96 Athletes, Sportsmen and Related Workers
- 97 Photographers and Related Camera Operators
- 99 Service, Sport and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations
- X0 Workers without occupations
- X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
- X9 Workers Not Reporting Occupations

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note : n. e. c. = not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date Palmyra n. e. c
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal.
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses
048·3	manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and foodgrains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweet-meats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date plam fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkaha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Coaf making
266·2	Making of silk cordage, rope and twine n. e. c.
Major Group 27—Textile—Miscellaneous	
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*concld.*	
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat, and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including rain- coats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

J-3483-11-13-B—Sat.

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld.*
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of artwheels
289·4	Manufacure of other wood and allied products n.e.c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags
292·2	Papier mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
	Major Group 30— Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving , etching, block making, type cutting and other work connected with printing industry.
303	Book binding, stitching, sizing and other work connetced with book binding industry
	Major Group 31—Leather and Leather Products
310·1	Flying, processing of hides and skins including taxidermy
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals).
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur.
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths, etc.
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor' varnish, etc.
331·2	Manufacture of indigo '
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335·6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products —*concld.*
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemicals products n. e. c.
	Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346·1	Making of images from soap stone
346·2	Manufacture of images, toys and other articles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods, n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*	
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n.e.c.
366·1	Making of aluminium utensils
366·2	Making of other aluminium products n. e. c.
367·1	Making of tin utensils
367·2	Making of articles from tin sheets
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets
369·4	Making and repairing of locks and trunks
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n. e. c.
Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment	
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts.
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
Major Group 38—Transport Equipment	
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
Major Group 38—Transport Equipment—*concld.*	
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
Major Group 39—Miscellaneous Manufacturing Industries	
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including Silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc. n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets, balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n. e. c.

33.	Fairs	238

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. " Normal rainfall " [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India."

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, riverbeds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years ;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by " cereals, pulses and others ". Non-foodcrops are similarly shown under " oilseeds and others ".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1955-56 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area, and the gross irrigated area, are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The " harvest price " is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

" Poultry " in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, i.e., calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the re-organisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word "factories" here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960. The number of persons shown is based on eye estimates of the reporters.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
