FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census hand book is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part–A related to village and town directory, Part–B to village and town PCA and Part–C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC & ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class–I and Class–II towns.(Statement IV–A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes / centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part–A of the volume contains village and town directory and Part–B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi,
the 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day).

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operation is, in effect, a joint venture of the State Government and the Census Organisation of the Govt. of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables. analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other states in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts Part A and Part B. Part A includes villages and town directory and Part B village and townwise primary census absrtact. While designing the format of 1981 district census handbook data on some new items, such as adult literacy centres, primary health sub-centres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amerities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

The district derives its name from headquarters town Sangli. Sangli was erstwhile estate which now forms a part of the district. The district forms a part of Deccan plateau. Its history is essentially linked with the southern Maratha Courtry, also referred to as Kuntala during the ancient period. After the death of emperor Ashok, 236 B. C., this region witnessed rise and fall of the dynasties of Satavahanas, Vakatakas, Rashtrakutas, Chalukyas and Bahamani. After the invasion of Devagiri by Ala-ud-din Khilji, the Deccan passed under the overlordship of Delhi emperors. The first Moghal invasion in Deccan began in 1593 in the reign of Akbar. The successive history of this region is marked by prolonged struggles for domination among the forces of Moghals, Adil Sahi Kingdom and Marathas. Maratha chieftains belonging to the Patwardhan family are said to have been the rulers of small principalities such as Sangli, Miraj and Tasgaon which came under the domination of British in 1818–19 and finally these came to be merged with the State of Bombay during the post independence period in 1948.

Sangli district was formed in 1949 by transferring Tasgaon, Khanapur (Vita), Walwa and Shirala tahsils from old Satara district. Two more talukas of Miraj and Jat were formed out of the parts of erstwhile Indian States, and merged in the new district. After this merger, it was named as South Satara District. However, since 1960 the district was renamed as Sangli. In 1965 two talukas *viz.* Miraj and Khanapur were splitted and two new talukas *viz.* Kavathe-Mahankal and Atpadi respectively were added to the original set up of 6 tahsils. (Tahsil and taluka are synonymous terms and prior to 1971 tahsil was referred to as taluka). The district has therefore for the present 8 tahsils *viz.* Miraj, Khanapur, Jat, Tasgaon, Shirala, Walwa, Atpadi and Kavathe-Mahankal.

At the time of 1961 census, the district comprised of 5 talukas and 1 mahal which in themselves included 526 inhabited villages and 6 towns. At the time of 1971 census, the district had 8 tahsils comprised of 539 inhabited villages and 7 towns. Since then the number of tahsils in the district has remained unchanged. In the year 1981, one more town was added increasing the number to 8 and the number of inhabited villages has gone up to 708.

Location, Relief and Drainage

Forming part of famous Deccan Plateau, district Sangli lies between 16°45′ to 17°33′ North latitude and 73°42′ to 75°40′ East longitude. It is bound by district Solapur and Satara in the north, Bijapur in the east and Belgaum in the south. A narrow tapering part of the district, stretching towards the west, also bounds the coastal district of Ratnagiri.

District Sangli covers an area of 8572 km² and has a population of 1,831,212 as per 1981 census. It ranks 22nd in area and 18th in population among the 26 districts of the State. In other words Sangli is one of the smallest district in the state both in terms of area and population.

There are two main systems of hills in the district *viz.* Sahyadri range and its off-shoots, and the spur of Mahadev range. The Sahyadri system includes the main range of the Sahyadris which forms the western boundary of the district. Krishna is the principal river which flows south-east through

Walwa, Tasgaon and Miraj tahsils. The Warana which is one of the main tributaries of the Krishna rises close to the western crest of Sahyadri and runs from west to east along the southern boundary of the district and Shirala and Walwa tahsils until it joins the Krishna at Sangli. Other important rivers are Yerla, Agrani, Nanni, Manganga and Bor.

Climate

The climate of this district is characterised by general dryness in the major part of the year. The rainy season starts from the middle of June and lasts up to the end of September. It is followed by sultry weather from the beginning of October to the middle of November, winter from the middle of November to the end of January, dry hot time from February to the end of March and hot weather from April to the middle of June. Seasons do not show abrupt changes or extremes of heat or cold.

In the western part of the district, the climate is cool and healthy in the hot weather which becomes chilly during the rainy season. However, the plains of Walwa and Miraj tahsils have temperate climate throughout the year. Central part of the district becomes considerably hot during summer months, climate becomes hotter as one proceeds from west to east of the district. The average annual rainfall in the district is about 700 m. m. The rainfall in the western portion of the district, in the regions of Sahyadri is considerably higher than in the rest of the district. It decreases from the western ghat towards the eastern portion of the district. Western portion of Shirala tahsil on an average gets over 2000 m. m. of rainfall in the year. The central and eastern portion gets a rainfall of 750 m. m. The north eastern portion has the lowest rainfall about 500 m. m. in the year. The eastern tahsils of Jat, Kavathe-Mahankal, Atpadi and Khanapur are known as scarcity and drought prone areas.

Soil

Soil formations in Sangli district have been predominatly influenced by the three rainfall zones of the district. The western zone, mainly Shirala tahsil which receives very heavy rainfall, has red laterite soils on upghats and reddish brown soils on hill slopes, the latter being developed on parent material of trap rock. The central transition zone of Krishna valley (covering areas of Walwa, partly of Tasgaon and part of Miraj tahsil) has deep black soils of alluvial origin. It is recognised as rich agricultural tract. The third is the eastern drier zone (comprising areas of eastern parts of Khanapur, Miraj, Tasgaon tahsils; and tahsils of Jat, Kavathe-Mahankal and Atpadi), which consists largely of granular black soils and poor shallow soils. Saline-alkaline soils are met with in the low lying patches in the areas of low rainfall.

Census Houses and Households

Columns 4 and 5 of the Primary Census Abstract give total number of occupied residential census houses and the number of households. According to Indian Census, 'Census House' is a building or a part thereof having a main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant, residential, non-residential or both. A 'Household' is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. A household may be of persons related by blood or of unrelated persons, or having a mix of both. There may be one member or more than one member households. Households of unrelated persons termed as 'institutional households' include boarding houses, messes, hostels, residential hostels, rescue homes, jails, ashrams etc.

Houseless population or houseless households include persons who do not have any fixed place of residence but go on moving from place to place, camp at night, or just live on the streets, in gardens or in open places.

Distribution of Population in Rural and Urban Areas

As per 1981 census, the population of Sangli district stands at 1,831,212 including 931,187 males and 900,025 females. This makes 2.92 per cent of State's population over 2.79 per cent of its area. Among the 8 tahsils in the district, Miraj tahsil (506,320) is the most populous (Table. 1)

TABLE 1

Population, Number of Villages and Towns, 1981

5	Jat ..	193,096	98,416	94,680	193,096	98,416	94,680	..	..	..	118	118	..
6	Kavathe-Mahankal ..	97,274	48,977	48,297	97,274	48,977	48,297	..	..	..	53	53	..
7	Walwa ..	301,302	154,900	146,402	246,953	126,885	120,068	54,349	28,015	26,334	89	89	2
8	Shirala ..	130,649	63,236	67,413	130,649	63,236	67,413	..	..	..	105	104	..
	District total ..	1,831,212	931,187	900,025	1,437,123	725,872	711,251	394,089	205,315	188,774	710	708	8

Other tahsils in order of their size of population are Walwa (301,302), Tasgaon (300,597), Khanapur (217,958), Jat (193,096), Shirala (130,649), Kavathe-Mahankal (97,274) and Atpadi (84,016). It follows that within the district the most populous tahsil has more than six times the population of the least populous tahsil.

The basic unit for rural area is a revenue village. A 'village' may be defined as a statutory recognised unit having definite boundary and separate land records. Urban areas on the other hand are specially defined for census purposes. The criteria adopted for the 1981 census is—

(*a*) All places with a municipality, corporation or cantonment board or notified town areas;

(*b*) All other places which satisfy the following criteria :—

(*i*) a minimum population of 5,000;

(*ii*) at least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(*iii*) a population of at least 400 persons per km².

Out of 1,831,212 persons in the district, 1,437,123 (78.48%) live in the villages and the remaining 394,089 (21.52%) in the towns. Thus, in Maharashtra State (where 35.03% of the total population is urban), Sangli district is among the less urbanized districts.

Size Class and Status of Towns

For the purpose of comprehensive analysis of varied demographic characteristics towns have been divided into the following classes by population size :—

Class–I	..	100,000 and above
Class–II	..	50,000—99,999
Class–III	..	20,000—49,999
Class–IV	..	10,000—19,999
Class–V	..	5,000— 9,999
Class–VI	..	Below 5,000

In 1971, Madhavnagar in Miraj tahsil was considered as town for the first time. In 1981 also there has been an addition in the number of towns, *viz* Kirloskarwadi in Tasgaon tahsil as it qualified the specific criteria to declare as a census town (Table 2).

TABLE 2

New Town/Towns declassified in 1981 Census

Name of the towns 1		Population 1981-Census 2
(*a*) Added—		
(i) Kirloskarwadi (C.T.) ..	..	20.512
(*b*) (ii) Declassified—Nil	—	Nil

Of the eight towns in the district, two (Sangli and Miraj) are class I, five (Tasgaon, Kirloskarwadi, Vita, Uran Islampur and Ashta) are class III and the remaining one (Madhavnagar) is class-IV (Statement I). Except Madhavnagar and Kirloskarwadi the remaining towns are municipal towns.

Ubran Agglomeration

As in 1971 the concept of urban agglomeration has been adopted for 1981 census too. An urban agglomeration may constitute :

(*a*) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of adjoining village or villages);

(*b*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(*c*) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

In Sangli district, there is only one urban agglomeration (U. A.) *i. e.* Sangli U.A. and its constituent units are :

(*a*) Sangli City (M)

(*b*) Miraj City (M)

(*c*) Madhavnagar.

Standard Urban Area

Standard Urban Area (S.U.A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A. are :

(*i*) It should have a core town of a minimum population of 50,000 ;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Sangli-Miraj standard urban areas in Sangli district are as follows :—

Sangli-Miraj S.U.A. : Urban Components :

1. Sangli City (M). 2. Miraj City (M).
3. Madhavnagar.

Rural Components :

1. Budhgaon 2. Kupwad.
3. Savali.
4. Vanleswadi. 5. Bamnoli.

Table (3) below provides villages by population range and their percentage to total inhabited villages in the district.

TABLE 3

Distribution of Inhabited Villages by Population Ranges

Range of Population 1			No. of villages in each range 2	Percentage of villages in each range 3
—200	..	..	13	1.84
200—499	..	..	71	10.03
500—1,999	..	..	407	57.48
2,000—4,999	..	..	159	22.46
5,000—9,999	..	..	46	6.50
10,000+	..	..	12	1.69
	All ranges	..	708	100.00

A village on an average has a population of 2,030 persons and 11.68 km² of area. Of the 708 inhabited villages 13 (1.84%) are with a population of below 200; 71 (10.03%) in the size class 200–499; 407 (57.48%) in the size class 500–1999; 159 (22.46%) in the size class 2000–4999; 46 (6.50%) in the size class 5000–9999 and the remaining 12(1.69%) in the size class 10,000 and above. For a broader generalisation the villages have been further grouped as small sized (population below 500), medium sized (500–1999), large sized (2000-4999) and exceptionally large sized (5000 and above). Within the district small sized villages share 11.87 per cent of the total inhabited villages and 1.97 per cent of the rural population in the district, medium sized 57.48 per cent of villages and 32.57 per cent of population, large sized 22.46 per cent of villages and 34.10 per cent of population and exceptionally large sized 8.19 per cent of villages and 31.36 per cent of population.

Population Growth, Density and Sex ratio

Sangli district registered a growth rate of 18.92 per cent during the decade 1971–81. The decade added 291,392 persons to the 1971 population of the district. However, the growth rate of population in Sangli district was lower than that of Maharashtra State (24.54%). Within the district, Miraj tahsil experienced the highest (23.85%) growth rate followed closely by Shirala tahsil (23.04%) (Table 4).

TABLE 4

Decadal Change in Distribution of Population

Name of Tahsil	Population						Percentage decadal (1971–81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10
1 Miraj ..	408,804	207,207	201,597	506,320	237,332	268,988	+23.85	+14.54	+33.43
2 Tasgaon ..	250,679	229,096	21,583	300,597	253,926	46,671	+19.91	+10.84	+116.24
3 Khanapur ..	186,332	167,606	18,726	217,958	193,877	24,081	+16.97	+15.67	+28.60
4 Atpadi ..	74,580	74,580	..	84,016	84,016	..	+12.65	+12.65	..
5 Jat ..	171,729	171,729	..	193,096	193,096	..	+12.44	+12.44	..
6 Kavathe-Mahankal	87,190	87,190	..	97,274	97,274	..	+11.57	+11.57	..
7 Walwa ..	254,326	209,334	44,992	301,302	246,953	54,349	+18.47	+17.97	+20.8
8 Shirala ..	106,180	106,180	..	130,649	130,649	..	+23.04	+23.04	..
District total ..	1,539,820	1,252,922	286,898	1,831,212	1,437,123	394,089	+18.92	+14.70	+37.36

Among the remaining tahsils the only tahsil which recorded growth rate above the district average is *viz.* Tasgaon (19.91%). Walwa tahsil (18.47%) also falls close to the district average growth rate of Sangli. The tahsils of Atpadi, Jat and Kavathe-Mahankal register a very low growth rate, *i. e.* 12.65 per cent, 12.44 per cent and 11.57 per cent respectively, being located in the scarcity or drought prone area of the district. It is also observed that during the decade 1971–81 urban growth rate for Tasgaon tahsil (116.24%) was substantially high as compared to other tahsil growth rates for urban areas. This was due to the inclusion of Kirloskarwadi as census town for the first time in 1981 census.

During the last 30 years, 1951 census recorded the highest ever urban growth rate (106.39%) within the district and also in the State (62.42%) (Table 5).

TABLE 5

Growth Density and Sex-Ratio of Urban Population in the District in relation to the State

Census Year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per Km²)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per Km²)	Sex ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951 ..	998,434	286,930	28.74	+106.39	N.A.	953	32,002,564	9,201,013	28.75	+62.42	N.A.	807
1961 ..	1,230,716	192,430	15.64	- 32.93	670	912	39,553,718	11,162,561	28.22	+21.32	1,694	801

1981 ..	1,831,212	394,089	21.52	+ 37.36	1,314	919	62,784,171	21,993,594	35.03	+39.99	3,736	850

N. A.—Not Available

The successive decade, 1951–61, witnessed an abrupt fall in urban growth rate in Sangli district as well as in the Maharashtra State as a whole. While the Sangli district registered a negative growth of 32.93 per cent, this drop in the urban population is due to reduction in the number of towns in 1961 due to declassification of 21 towns as a result of a change in the definition. During 1961-71, urban areas recorded a growth of 49.09 per cent in the district as against 40.75 per cent in the State. During the next ten years, that is 1971–81, urban growth rate recorded for the district was 37.36 per cent against 39.99 per cent for the State. Among the various towns in the district, Miraj recorded the highest (35.89%) growth rate. It is followed by Sangli (32.35%), Vita (28.60%), Madhavnagar (25.88%), Uran Islampur (21.56%), Tasgaon (21.20%) and Ashta (19.63%). (stalement I).

Sangli district has an average density of 214 persons per km². This is somewhat higher than the State average density of 204 persons per km². Within the district, however, one can see wide variations, Miraj with density of 547 is the most thickly populated tahsil. On the contrary Jat tahsil has a density of barely 86 persons per km². Atpadi tahsil is also thinly populated with density of only 96 persons per km².

Table 6 shows distribution of villages according to density ranges.

TABLE 6

Distribution of Villages by Density

Range of density (per km²) 1	Total No. of villages in each density range 2	Percentage of villages in each density range 3
—10	4	0.56
11—20	7	0.99
21—50	29	4.10
51—100	149	21.04
101—200	217	30.65
201—300	103	14.55
301—500	94	13.28
501+	39	5.51
Not Known	66	9.32
All density ranges .	708	100.00

For convenient understanding of patterns, villages have been grouped under eight different categories. Table reveals that about two-third or (66.24%) of inhabited villages fall within the density range of 51–300 persons per km². In 40 (5.65%) villages density is upto 50 persons per km². In 94 (13.28%) villages it varied between 301-500, and 39 (5.51%) villages recorded a very high density of 500 and above persons per km². For the remaining 66 (9.32%) villages, density of population could not be worked out for want of their area figures. In conformity with the State pattern, there has been consistent rise in the urban density of population in the district since post independence period. It has increased from 670 persons per km² in 1961 to 1,314 persons per km² in 1981 (Table 5). Among the various towns in the district Madhavnagar has the highest density (21,431) as per 1981 census (Statement I).

In 1981, Sangli district recorded a sex ratio of 967 females per 1,000 males. This is somewhat higher than that of the State as a whole (937 females per 1,000 males).

TABLE 6 (i)

Sex Ratio 1901–1981

Year	District	State
1901	984	978
1911	951	966
1921	942	950
1931	950	947
1941	954	949
1951	968	941
1961	957	936
1971	949	930
1981	967	937

Above table shows that sex ratio in Sangli district, barring the censuses of 1911 and 1921, has remained higher than that of the State since the beginning of the century. It has not shown large variations since 1911 to 1971. However, it has gone up from 949 in the year 1971 to 967 in the year 1981.

TABLE 6 (ii)

Sex Ratio by Tahsils, 1981

District/Tahsils	Females per 1,000 males
Sangli District ..	967
Miraj tahsil ..	922
Tasgaon tahsil ..	956
Khanapur tahsil ..	1,046
Atpadi tahsil ..	1,002
Jat tahsil ..	962
Kavathe-Mahankal tahsil ..	986
Walwa tahsil ..	945
Shirala tahsil ..	1,066

Within the district, the sex ratio differs considerably, Shirala tahsil with a sex ratio of (1,066) ranks at the top and Miraj tahsil (922) is at the bottom, (Table 6 (ii)). The other tahsils where females are more than males are Khanapur (1,046) and Atpadi (1,002). Broadly speaking the sex ratio is higher in the northern as compared to the southern parts of the district.

The urban sex ratio (919) in the district is significantly higher than that of the State (850). Trend over past few decades (Table 5) reflects that during the decades 1951–71 the urban sex ratio has fallen down from 953 to 893 in the district. However, in 1981 it shows an upward movement and reaches the level of 919.

Scheduled Castes and Scheduled Tribes

After the independence of India in 1947, the orientation of census data underwent considerable change to meet the new requirements of social

planning and development. In pursuance of the national government's policy to discourage community distinctions based on caste, race etc., the 1951 Census, which was the first census after independence, gave up the questions on these aspects which were earlier given priority. The only relevent question on this aspect incorporated in the 1951 Census schedule confined itself to 'Special groups', *viz.* whether a person belonged to Scheduled Caste or a Scheduled Tribe or a Backward Class or the Anglo-Indian community, so as to meet the requirement, of the constitution for the weaker sections of the society. The 1961 Census, however, attempted in a comprehensive manner in generation of demographic data on Scheduled Castes and Scheduled Tribes. The same tradition, of providing detailed information on the socio-economic characteristics of the scheduled caste and scheduled tribe population, has been maintained in the 1971 and 1981 Censuses also. Thus census has been the main source for providing demographic data on scheduled castes and scheduled tribes. Such data are imperative for the government to evolve any suitable plan for socio-economic uplift of these weaker sections of the society.

There is no standard definition of scheduled castes and scheduled tribes. Scheduled castes include all of those castes communities declared as such and included in the schedule by the President of India by public notification under the article 341 of Indian Constitution. Similarly, scheduled tribes mean all such tribal communities or sub-tribes or groups thereof, which are declared by the President of India and included in the schedule under the article 342 (i) of the Indian Constitution. According to the Scheduled Castes and Scheduled Tribes orders (Amendment) Act, 1976 there are 59 scheduled castes and 47 scheduled tribes in Maharashtra State. A list of scheduled castes and scheduled tribes in the State is given below.

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halakhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari.
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda, Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (in Akola Amravati, Bhandara, Buldana, Nagpur, Wardha, and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari, Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha, Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar, Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Beed, Nanded, Osmanabad and Parbhani districts).
13. Dhanka, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.

17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koila bhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gawari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.
25. Kokna, Kokni, Kukna.
26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Beed, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

At the time of 1981 census scheduled caste population in Sangli district was 204.352 including 104,141 males and 100,211 females. They constitute 11.16 per cent as against 9.79 per cent in 1971. This proportion (11.16%) of 1981 is higher than the State (7.14%). Of the total scheduled caste population in the district, 159,664 (78.13%) live in the rural areas and 44.688 (21.87%) in the urban areas. There are 88 villages in the district having no scheduled caste population (Table 7).

TABLE 7

Proportion of Scheduled Caste Population to Total Population in the Villages

Percentage range of scheduled caste population to total population 1	No. of Villages in each range 2	Percentage of villages in each range 3
No S. C. Population ..	88	12.43
—5	177	25.00
6—10	172	24.29
11—15	162	22.88
16—20	65	9.18
21—30	36	5.09
31+ ..	8	1.13
All ranges	708	100.00

Among the remaining 620 villages, the proportion of scheduled caste population to the total population is less than 5 per cent in 177 villages, 6 to 10 per cent in 172 villages; 11 to 15 per cent in 162 villages; 16 to 20 per cent in 65 villages; 21 to 30 per cent in 36 villages and more than 31 per cent in 8 villages in the district.

As per 1981 census, the scheduled tribe population in Sangli district stands at 15,535 including 8,004 males and 7,531 females. They comprise 0.85 per cent as against 0.16 per cent in 1971. The proportion of scheduled tribes in the district (0.85%) is far less when compared against the corresponding figures for the State as a whole (9.19%) in 1981. Out of the total populatoin 13,199 (84.96%) live in the rural areas and 2,336 (15.04%) live in the urban areas.

Table 7(i) shows tahsiwise proportion of scheduled caste and scheduled tribe population to the total population in the district.

TABLE 7 (i)

Scheduled Caste and Scheduled Tribe Population 1971 and 1981

District/Tahsil	Percentage of scheduled castle population to total population		Percentage of scheduled tribe population to total population	
1	1971 2	1981 3	1971 4	1981 5
Sangli District ..	9.79	11.16	0.16	0.85
Miraj tahsil ..	10.70	12.66	0.09	1.06

N=Negligible

Out of the total 708 inhabited villages in the district, 444 villages have no scheduled tribe population (Table 8).

TABLE 8

Proportion of Scheduled Tribe Population to Total Population in the Villages

Percentage range of scheduled tribe population to total population 1	No. of villages in each range 2	Percentage of villages in each range 3
No S. T. Population ..	444	62.71
—5	247	34.89
6—15	12	1.69

26—35	1	0.14
36—50	..	..
51+	..	..
All ranges ..	708	100.00

Among the remaining 264 villages, the proportion of scheduled tribe population to total population is less than 5 per cent in 247 villages; 6 to 15 per cent in 12 villages; 16 to 25 per cent in 4 villages and 26 to 35 per cent in only 1 village.

In urban areas the scheduled castes and scheduled tribes constitute 11.34 per cent and 0.59 per cent of the total population respectively (Table 9).

TABLE 9

Proportion of Scheduled Castes/Scheduled Tribe Population in towns

Name and civic status of the town	Total population	Total scheduled caste population	Total scheduled tribe population	Percentage of scheduled caste population to total population	Percentage of scheduled tribe population to total population
1	2	3	4	5	6
Ashta (M. Cl.)	21,333	2,720	399	12.75	1.87
Kirloskarwadi (C. T.)	20,512	1,476	94	7.20	0.46
Madhavnagar (C. T.)	11,144	1,399	25	12.55	0.22
Miraj City (M. Cl.)	105,455	14,249	528	13.51	0.50

Tasgaon (M. Cl.)	26,159	2,332	248	8.91	0.95
Uran-Islampur (M. Cl.)	33,016	3,591	68	10.88	0.21
Vita (M. Cl.)	24,081	2,597	77	10.78	0.32
All towns ..	394,089	44,688	2,336	11.34	0.59

Proportionate concentration of scheduled castes is more in the towns of Miraj, Ashta and Madhavnagar and the scheduled tribes have comparatively larger concentration in towns of Ashta and Tasgaon.

Literacy

Any person who is able to read and write with understanding in any language is recorded as a literate by the Indian Census. The 1981 census reveals that 46.87 per cent of the population in the district is literate against the State average literacy rate of 47.18 per cent. Among the different districts in the State, Sangli district ranks 11th in terms of literacy rate. Within the district the literacy rate is maximum(55.82%) in Miraj tahsil and minimum (27.91%) in Jat tahsil (Table 12). Literacy rates by population ranges of villages are also indicated in Table 10.

TABLE 10

Literacy Rates by Population Ranges of Villages

Range of population	No of villages in each range	Literacy rate
1	2	3
—200 ..	13	14.63
200—499	71	26.93

5,000—9,999	46	49.41
10,000 + ...	12	51.72
All ranges ..	708	43.13

Among the various towns in the district Sangli recorded the highest literacy rate of 63.37 per cent in 1981 (Table11).

TABLE 11

Literacy Rates for Towns

Name and civic status of the town	Literacy rate
1	2
Ashta (M. Cl.)	53.01
Kirloskarwadi (C.T.)	60.90
Madhavnagar (C.T.)	60.75
Miraj City (M.Cl.)	58.97
Sangli City (M.Cl.)	63.37
Tasgaon (M. Cl.)	59.39
Uran-Islampur (M. Cl.)	58.79
Vita (M.Cl.)	59.22
All towns ..	60.53

Ashta town records the lowest literacy rate of 53.01 per cent.

TABLE 11 (i)

Progress of Literacy 1901–81

Year	Total	Males	Females
1901	4.36	8.40	0.22
1911	5.02	9.38	0.50
1921	6.05	10.83	1.07
1931	6.88	12.04	1.47
1941	N.A.	N.A.	N.A.
1951	17.20	27.80	6.30
1961	28.07	41.88	13.64
1971	37.48	50.98	23.24
1981	46.87	59.70	33.60

N. A.=Not Available

During the span of 80 years (1901–81) the literacy rate in the district has increased from 4.36 per cent to 46.87 per cent in 1981. The progress in literacy was slow till 1931 when hardly 6.88 per cent of the district population was literate. The post 1931 period experienced a comparatively fast growth. In 1951, one in every six persons (17.20%) was literate. Subsequently this ratio narrowed down consistently to one in four (28.07%) in 1961, one in three (37.48%) in 1971 and nearly one in two (46.87%) in 1981. Thanks to the opening of new schools and adult literacy centres under the five year plans in the post independence period.

Literacy rates of two sexes differ sharply; the ratio being nearly 10 : 6 (59.70%) male literates and (33.60%) female literates. This ratio was 10 : 5 (50.98%) males and (23.24%) females in 1971, and 10 : 4. (41.88%) males and (13.64%) females in 1961. Thus it may be seen that sex-wise literacy is narrowing down.

Like male-female differentials, there exists disparity in the literacy rates of rural and urban areas. 43.13 per cent of literates in rural areas and 60.53 per cent literates in urban areas of the district.

Working Population

'Work' may be defined as participation in economically productive activity. The participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the worker in 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961. However, while accepting this conceptual change the feasibility of making this data comparable with the previous censuses was duly considered. Conceptually, the main workers plus the marginal workers of 1981 are almost comparable with the 'Workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Further, for 1981 census on the recommendation of Planning Commission and Central Statistical Organisation, only four industrial categories of main workers that is cultivators, agricultural labourers, workers engaged in household industries and other workers have been adopted against the nine categories of workers in 1971 and 1961.

For main workers, major part of the preceding year (at least 6 months or 183 days) was adopted, while those who worked for sometime during the preceding year but not for the major part, have been treated as marginal workers. All those who had not worked at all during the last year, were considered as non-workers. Persons engaged in household duties, students, dependents, retired persons, rentiers, beggars are some of the categories grouped as non-workers.

1981 census recorded 34.16 per cent of the district population as main-workers, 4.74 per cent as marginal workers and the remaining 61.10 per cent as non-workers (Table 12).

29.27	47.88	9.02	1.02	0.70	1.37	30.29	48.58	10.39	69.71	51.42	89.61

The corresponding figures for the State as a whole are 38.71 per cent, 3.85 per cent and 57.44 per cent. Thus, one-third of the population of the district is engaged in economically productive activity. Compared to 1971, there has been little rise in the work participation rate both in the district (31.09% in 1971 and 34.16% in 1981) and in the State (36.48% in 1971 and 38.71% in 1981). Within the district participation rate for 1981 census was highest (38.01%) in Khanapur tahsil and lowest (30.74%) in Shirala tahsil.

Male participation rate (51.81%) is more than 3 times than that of female (15.89%) as per 1981 census. The female participation rate in the district increased from 10.72 per cent in 1971 to 15.89 per cent in 1981 (19.70% to 23.98% in the State). By contrast there is slight increase in the male participation rate (50.42% in 1971 to 51.81% in 1981). In the State, male participation showed a marginal rise (52.09% in 1971 to 52.51% in 1981).

1981 census results reveal that among the main workers in the district 47.85 per cent are cultivators, 22.37 per cent are agricultural labourers, 2.62 per cent engaged in household industry and the remaining 27.16 per cent have been categorised as other workers. The corresponding percentages for the State are 35.12 per cent, 26.63 per cent, 2.55 per cent and 35.70 per cent respectively. Evidently more than 70 per cent of the working population in the district is engaged in agricultural pursuits working either as cultivators or farm labourers. The proportion of cultivators is substantially more in the district (47.85%) when compared with corresponding percentage for the State as a whole (35.12%). However, this position somewhat alters in case of persons engaged as agricultural labourers, which is 22.37 per cent in the district as against 26.63 per cent for the State.

About 4.74 per cent of the persons in the district were recorded as marginal workers (1.14% among males and 8.47% among females). The high incidence of marginal workers among females as compared to males is understandable as the former, besides looking after their household duties, tend to engage themselves in some economically productive activity to lend support to their male counterparts.

Availability of Amenities-Education

Educational amenity is available in 700 Villages (98.87%) out of total 708 inhabited villages in the district (Table 13).

TABLE 13

Distribution of Villages according to the availability of different amenities

Serial No.	Name of tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Educational	Medical	Drinking water	Post & Telegraph	Market/ Hat	Communi-cations	Approach by pucca road	Power supply

7	Walwa	246,953	246,953 (100.00)	193,589 (78.39)	246,953 (100.00)	222,951 (90.28)	128,112 (51.88)	233,074 (94.38)	167,331 (67.76)	246,953 (100.00)
8	Shirala	130,649	129,726 (99.29)	53,136 (40.67)	130,649 (100.00)	95,714 (73.26)	50,084 (38.33)	116,797 (89.40)	54,704 (41.87)	97,239 (74.43)
	Total of all tahsils ..	1,437,123	1,434,299 (99.80)	871,289 (60.63)	1,437,123 (100.00)	1,204,738 (83.83)	630,851 (43.90)	1,296,043 (90.18)	678,925 (47.24)	1,331,661 (92.66)

The situation regarding schools in the villages is particularly commendable in case of 4 tahsils *viz.* Khanapur, Jat, Kavathe-Mahankal and Walwa wherein practically all the villages are having schools. Besides these, 2 more tahsils also do not appear to be much lagging behind in this respect. These are *viz.* Tasgaon wherein out of 102 inhabited villages 101 (99.02%) and Atpadi wherein out of 60 inhabited villages 59 (98.33%) are having schools. For the remaining 2 tahsils, namely Shirala and Miraj, educational facility is not available in 3 villages in each tahsil. By and large, the situtation of availability of educational amenity in the rural areas of the district is fairly satisfactory.

TABLE 15

Distribution of villages according to population range and amenities available

Population range	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of							
		Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by pucca road	Power supply
1	2	3	4	5	6	7	8	9	10
—500	84	79 (94.05)	1 (1.19)	84 (100.00)	5 (5.95)	..	27 (32.14)	9 (10.71)	25 (29.76)
500—1,999	407	404 (99.26)	50 (12.29)	407 (100.00)	210 (51.60)	20 (4.91)	299 (73.46)	102 (25.06)	332 (81.57)
2,000—4,999	159	159 (100.00)	105 (66.04)	159 (100.00)	153 (96.23)	69 (43.40)	151 (94.97)	66 (41.51)	156 (98.11)
5,000+	58	58 (100.00)	58 (100.00)	58 (100.00)	58 (100.00)	45 (77.59)	58 (100.00)	40 (68.97)	57 (98.28)
All ranges ..	708	700 (98.87)	214 (30.23)	708 (100.00)	426 (60.17)	134 (18.93)	535 (75.56)	217 (30.65)	570 (80.51)

Out of total 708 inhabited villages only 8 villages do not have schools. Out of the 8 villages devoid of schooling facility, 5 are in population range of below 500 and 3 are in the population range of 500-1,999 (Table 15). Among the villages without educational amenity, the same is available within a distance of less than 5 kms. in respect of 7 villages and at a distance of beyond 10 kms. in case of the remaining 1 village (Table 16).

TABLE 16

All towns ..	1.19	1.22	1.17	3.70

Table 18 shows schools per 10,000 of population in towns. On an average, the population to institution ratio in urban areas in the district is 10,000: 1.19 Higher Secondary/Int/PUC/Junior Colleges; 10,000 : 1.22 Secondary/Matriculation Schools; 10,000 : 1.17 Middle Schools and 10,000 : 3.70 Primary Schools.

Medical

Medical institutions of any type, as specified in the village directory exist in approximately 3 out of every 10 (30.23%) villages in the district and these villages in themselves contain 60.63 per cent of the rural population of the district. Unwillingness on the part of medical personnel to work in the villages has been one of the main reasons for having very less number of medical amenities in the rural sector of our country. However, the establishment of Primary Health Centres, opening of rural dispensaries and cottage hospitals are bound to improve the position steadily in future.

Within the district, the position is best in Miraj tahsil where 58.46 per cent of the villages have been provided with some kind of medical facility (Table 13) and 86.45 per cent of its population gets the benefit (Table 14). It is followed by Walwa tahsil. On the other hand, in Shirala tahsil, only 16.35 per cent of the villages covering 40.67 per cent of its population are getting medical facility in the village itself. Similar is the position of Jat tahsil. Considering only the number of villages within a tahsil possessing some kind of medical amenity, it is highest in Walwa (47 villages). However, these represent only 52.81 per cent of the total inhabited villages of the tahsil.

Among the 494 villages which do not have any medical facility, the same is available at a distance of less than 5 kms. for 238 villages, at a distance of 5 to 10 kms. in respect of 166 villages and the position is particularly pathetic in case of 90 villages where the inhabitants have to go more than 10 kms. for availing medical facilities (Table 16). It is also observed that all the big sized villages (population above 5,000) are possessing 58 (100.00%) of medical facility within the village while barely 1(1.19%) of the small village (population below 500) has this facility (Table 15).

Table 19 gives the number of beds per 1,000 of population in the towns. On an average there are 3.24 beds per 1,000 of population in the urban areas of the district.

TABLE 19

	All towns	3.24

Drinking Water

It is heartening to note that all the villages in the district have drinking water amenity.

Post and Telegraph

Nearly three-fifths 426 (60.17%) of the inhabited villages in the district have Post and Telegraph facility. These villages together comprise 83.83 per cent of the rural population of the district. Within the district, Khanapur tahsil has maximum, 89 (76.07%) villages having a post and telegraph facility and these villages serve 89.00 per cent of the rural population of the tahsil. The position is, however, far from being satisfactory in Atpadi tahsil where there are only 21(35.00%) villages having this amenity. 282 villages in the district do not have facility of post office. Among them it is available within a distance of 5 Kms. for 197 villages, at a distance of 5–10 Kms. for 75 villages and beyond 10 Kms. in respect of remaining 10 villages in the district. According to size-class 5 (5.95%) villages in the range of less than 500; 210 (51.60%) villages in the range of 500-1,999; 153 (96.23%) villages in the range of 2,000-4,999; and 58(100.00%) villages with a population 5,000 + have the availability of post office within their respective villages.

Market/Hat

The market/hat is held only in 134 villages in the district and these villages account for 43.90 per cent of the rural population of the district. Within the district, position appears to be comparatively better in Miraj, Jat, Kavathe-Mahankal and Walwa tahsils where the markets or hats are held in nearly one-fourth villages and serving about half of the rural population. Among the 574 villages where market/hat is not held, the same is available at a distance of less than 5 Kms. for 249 villages, 5–10 Kms. for 222 villages and beyond 10 Kms. in respect of 103 villages. Of the 134 villages where market/hat are held, 20 (4.91%) villages are in the population range of 500-1,999, 69 (43.40%) villages in the population range of 2,000-4,999 and 45 (77.59%) villages in the population range of 5,000+. On the other hand none of the 84 small sized villages in the district, has this facility.

Communications

535 villages in the district have the availability of bus-stop/railway station/water way within the village and they serve 90.18 per cent of the rural population. For the remaining 173 villages communication facility is available within a distance of less than 5 Kms. for 80 villages, between 5–10 Kms. in case of 25 villages and beyond 10 Kms. in respect of 68 villages. While only 27 (32.14%), small villages having a population of less than 500, have been provided with communication facility, as a contrast, all the 58 (100.00%) villages with population of over 5,000 enjoy this facility.

Approach by Pucca Road

217 (30.65%) villages in the district are approachable by pucca road and they serve 47.24 per

cent of the rural population of the district. The position is particularly poor in the eastern tahsil of Jat where only 16.10 per cent of the total 118 villages are linked by pucca road. Among the 217 (30.65%) villages linked with pucca road, 9 (10.71%) villages are in population range of less than 500, 102 (25.06%) villages are in population range of 500-1,999, 66 (41.51%) villages are in population range of 2,000-4,999 and 40 (68.97%) villages are in population range of over 5,000.

Power Supply

The rural electrification programme was given importance from the third five year plan and this has resulted in accelerating the supply of power in the rural areas. According to 1981 census, 570 (80.51%) of the villages in the district get the power supply. Within the district, Walwa tahsil ranks first having power supply in all the villages. It is followed by Miraj tahsil with 98.46 per cent villages with power supply. On the other hand, Shirala tahsil with only 59.62 per cent of its villages electrified ranks last. Among the 570 (80.51%) villages having availability of power supply, 25 are in the range of below 500, 332 in the range of 500-1,999, 156 in the range of 2,000-4,999 and 57 in population range above 5,000 and their proportion to total villages under various categories is 29.76 per cent, 81.57 per cent, 98.11 per cent and 98.28 per cent respectively.

An overall picture, emerging out of the foregoing account on availability of amenities to the rural folks in Sangli district shows that drinking water is the only amenity which is available in all the 708 villages of the district till 1981. Villages which do not have any amenity (except for drinking water) are three in number (Appendix III). These are Sherikavathe (Miraj Tahsil). Shere-Dudhond (Tasgaon Tahsil) and Gave (Shirala Tahsil). There are still 8 villages, which do not have any school. 494 villlages accounting for 39.37 per cent population are devoid of medical facility. Post office is not available in 282 villages. Market/hat is not available in 574 villages. 173 villages accounting for 9.82 per cent population are deprived of some kind of communication facility. 491 villages comprising of 52.76 per cent population are not approachable through pucca road. 7.34 per cent of the rural population inhabiting in 138 villages is still deprived of power supply.

Land Utilisation

Columns 15 to 19 of the village directory give the land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

Out of total area of 860,963.17 hectares of Sangli district 43,849.08 hectares are under forest. Thus only 5.09 per cent area of the district is under forest as against 21.08 per cent for the State. Sangli forests belong to four groups *viz.*, evergreen forest on the Sahyadri ghats and their slopes in the extreme west, wet and dry deciduous forests on the slopes of the hills that run east and from the catchment area of the Warna river, forest with bushy and stunted tree growth on the hills to the east of the Krishna and grassy area with sparse tree growth in Jat. Within the district, Shirala tahsil is having the largest forest area.

Hirda, Shikekai, Tadimodi, grazing grass and timber are important forest products in this district.

Irrigated, Un-irrigated and Culturable Waste Areas

Data pertaining to irrigated area (by source) and un-irrigated area are given under columns 16 and 17 respectively of the village directory (Table 20).

TABLE 20

Distribution of Villages according to the Land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
1	2	3	4	5	6
1	Miraj	65	82,300.00	93.46	17.48
2	Tasgaon	102	108,847.00	82.82	13.95
3	Khanapur	117	127,366.78	83.17	5.69
4	Atpadi	60	91,737.85	82.16	8.96
5	Jat	118	225,013.00	81.60	7.56
6	Kavathe-Mahankal	53	92,351.68	63.33	11.29
7	Walwa	89	69,944.86	83.28	21.21
8	Shirala	104	63,093.00	75.26	4.17
	Total of all tahsils ..	708	860,654.17	80.89	10.57

In Sangli district 80.89 per cent area has been recorded as cultivable area. Among the tahsils which exceed this district average are *viz.*, Miraj (93.46%), Walwa (83.28%), Khanapur (83.17%), Tasgaon (82.82%), Atpadi (82.16%) and Jat (81.60%). The tahsil of Kavathe-Mahankal is having the lowest (63.33%) of cultivable area.

10.57 per cent of the cultivable area of the district is irrigated. This percentage is highest in Walwa tahsil (21.21%) followed by Miraj (17.48%), Tasgaon (13.95%) and Kavathe-Mahankal (11.29%). In the remaining 4 tahsils the proportion of irrigated area to the total cultivable area is less than the district average. It is the lowest (4.17%) in Shirala tahsil.

Staple Food

Kharif and *Rabi*, are the two important agricultural seasons in the district. The crops which are taken in the early south-west monsoon are called *Kharif* crops while those harvested in the winter are known as *Rabi* crops. The latter are grown with the help of irrigation and occasional fair weather showers due in November. Generally cereals are produced as *Kharif* crops while wheat, some pulses, etc., are grown in *Rabi* season. Millets like jowar (*jondhala* or *javari*) and bajra (*bajari*) constitute the main staple food for the villages in Sangli district (Table 21).

TABLE 21

Main Staple Food in the Majority of Villages in each Tahsil

Serial No.	Name of tahsil	Main staple food	Serial No.	Name of tahsil	Main staple food
1	2	3	1	2	3
1	Miraj ..	Jowar	5	Jat ..	Jowar, Bajra
2	Tasgaon ..	Jowar	6	Kavathe-Mahankal ..	Jowar, Bajra
3	Khanapur ..	Jowar, Bajra	7	Walwa ..	Rice, Jowar
4	Atpadi ..	Wheat, Jowar	8	Shirala ..	Rice, Jowar

Of these jowar is the most important cereal crop of the district and it is grown in all the tahsils of the district. Bajra is the next important food crop in the district. Table 21 indicates that while jowar is the staple food in all the eight tahsils of the district, *bajra* is also consumed in Khanapur, Jat and Kavathe-Mahankal tahsils. Wheat in Atpadi tahsil and rice in the western tahsils of Shirala and Walwa also constitute as a part of staple food.

Municipal Finance

Table 22 gives per capita receipt and expenditure (in rupees) for every town in the district.

TABLE 22

Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects

III Tasgaon (M. Cl.) ..	69.77	27.72	42.05	68.12	3.40	12.58	24.62	1.49	26.03
III Uran-Islampur (M. Cl.) ..	68.66	24.41	44.25	40.40	7.36	16.60	13.87	0.15	2.42
III Vita (M. Cl.) ..	53.57	27.78	25.79	52.74	8.64	17.44	7.14	0.29	19.23
Total ..	79.64	45.47	34.17	66.32	4.55	23.95	16.99	9.07	11.76

On an average the per capita receipt is Rs. 79.64 out of which Rs. 45.47 is received through local taxes and Rs. 34.17 from all other sources. The total expenditure incurred per head is Rs. 66.32 of which Rs. 4.55 is on general administration, Rs. 23.95 on public health and conveniences, Rs 16.99 on public works, Rs. 9.07 on public institutions and Rs. 11.76 on all other aspects. Among all the towns, both the receipts received and the expenditure incurred per head are highest for Sangli Municipal Council.

Minerals

Limestone deposits occur around Miraj at Narwad, Waddi, Dedag, Arag, Belunki, Kannadwadi, Sawali, Tanang, Kalambi, Kupawad, Erandoli, Salgare, etc. The limestone is associated with trap formation and the quality is not uniform. Good clay for bricks and tiles is found on the banks of the rivers. No other mineral of importance is known to occur in any part of the district.

Fisheries

Fishing operations are carried out in the two main rivers Krishna and Warna. There are six perennial tanks. Commercially important varieties of fish which are found in Sangli district are Vam, Aheer, Vadshi, Mhasheed, Kolshi, Kavli, Kanas, Tambir, Wanz, Kaliwani, Valshivada, Shingala and Murrels.

Industries

In the first decade of the present century, Sangli district was very backward in industrial field. A few crafts, such as, preparation of gold and silver ornaments, copper and brass smithy, preparation of iron tools, carpentry, pottery and blanket weaving were existent. The history of industrialisation of the district dates back to 1901, when the Kirloskar Brothers factory was established at Kundal Road which later came to be known as Kirloskarwadi. This proved a land mark and a turning point in the history of the industrialisation of the district. Since then, the pace of industrialisation in the district has been rapid.

There are 18 large scale industries in the district employing about 12,500 workers. Out of them 3 sugar factories are in co-operative sector. Kirloskar Brothers Engineering Concern, Madhavnagar COTTON Mill and Marathe Engineering Industries are the important industrial units since they are labour oriented. In addition, there are 1,700 small scale industries employing about 10,000 workers, who are engaged in cement products, foundries and engineering units. Leather products including Kolhapuri chappals are exported every year from Sangli District. 'Shetkari Sahkari Sakhar Karkhana, Sangli,'. is the largest Co-operative Sugar Factory in Asia.

Besides, musical instruments, especially 'Sitar' of Sangli are famous throughout India. These musical instruments are also exported.

Trade and commerce

The main articles of export from the district are groundnut, yarn, cloth, gur, grapes, turmeric. Besides these, Kirloskarwadi exports electric motors also (Table 23).

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
III Ashta (M. Cl.)	.. Handloom Cloth	Groundnut	Sugarcane
III Kirloskarwadi (C. T.)	.. Electric Motors	Electric Motors	Casting Iron
IV Madhavnagar (C. T.)	.. Machinery spare parts	Machinery spare parts	Cloth
I Miraj City (M. Cl.)	.. Cotton yarn	Cotton yarn	Cloth
I Sangli City (M. Cl.)	.. Sugar	Turmeric	Cloth
III Tasgaon (M. Cl.)	.. Groundnut oil	Grapes	Cloth
III Uran-Islampur (M. Cl.)	.. Groundnut oil	Gur	Jowar
III Vita (M. Cl.)	.. Cloth	Cloth	Raw cotton

Sugarcane, cotton, jowar and casting iron are the main articles of import. Agriculture produce is collected from the producers mainly at trading centres like Sangli, Tasgaon and Takari.

Table 24 indicates the proportion of slum population in Sangli City.

TABLE 24

Proportion of Slums Population in towns

Class, name and civic status of the town	Proportion of the slums population to total population of the town	Density in slums (Per kms.^{2})
1	2	3
I Miraj City (M. Cl.)	(There are no notified slums within the municipal limits hence the information shows nil)	
I Sangli City (M. Cl.)	0.78	60,928
Total ..	0.78	60,928

Places of tourists importance

Though Sangli district does not figure in the tourist's map of India, however, it has a number of forts and old temples which may be of some interest to the visitors. One of them is fort of Bahadurvadi (located in Walwa tahsil) which belonged to the erstwhile *Raja* of Sangli. Another one Bhupalgad hill-fort lies at the extreme south-east of Khanapur tahsil. Bhupalgad formed the eastern out-post of Shivaji's territories. Machhindragad is the most southern chain forts built by Shivaji. It is located at a distance of about 16 kms. south-east of Karhad. In Devrastre in Khanapur there is a curious cluster of temples and ancient mankish cells. The main temple is dedicated to Samudreswar or Mahadev of the sea. Temple Dattatraya of Audumbar and Ganapati in Tasgaon tahsil are also well known. Bhose village in Miraj tahsil has cave temple of Dandoba Mahadev. Besides these Kundal (a village in Tasgaon tahsil lying about 8 kms. north of Walwa) has a set of ancient Brahmanical caves.

PART A--VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a Village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "un-inhabitated" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 *i. e.* the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (*i*) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (*ii*) Land utilisation data for census towns ;

Appendix (*iii*) Tahsilwise list of villages with no amenities available ; and

Appendix (*iv*) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in Km.^{2}

Column 4, which gives population and the number of households in each village has been introduced for 1981 Census to examine the correlation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referrent village, a dash (–) is shown in the column and next to it, in brackets the distance from the village in broad ranges *viz.*, upto 5 Kms. 5–10 Kms, and 10+Km to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities *viz.* primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit Pathshala, senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i. e.* secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been

used for presenting data on educational amenities :

Primary or Secondary School ..	P
Junior Secondary or Middle School ..	M
Matriculation or Secondary School ..	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC).	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C
Industrial School ..	I
Training School ..	Tr.
Adult Literacy Class/Centre ..	AC
Other Educational Institutions ..	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (–) has been placed and within the brackets the distance in broad ranges (upto 5 Kms, 5-10 Kms. and above 10 Kms. of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre ..	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre ..	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner ..	RP
Subsidised Medical Practitioner ..	SMP
Community Health Worker ..	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available ..	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office ..	PO
Telegraph Office ..	TO
Post and Telegraph Office ..	PTO
Telephone Connection ..	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail, and water-way and the same has been indicated as follows :—

Bus Stop ..	BS
Railway Station ..	RS
Navigable Water-way (including river, canal and back-water etc.).	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road ..	PR
Kaccha Road ..	KR
Navigable River ..	NR
Navigable Canal ..	NC
Navigable Waterway (Other than river or canal).	NW
Foot Path ..	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13, relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose ..	ED
Electricity for Agriculture ..	EAg
Electricity for other purpose like Industrial, Commercial etc. ..	EO
Electricity for all purposes listed above. ..	EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during

the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilisation. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation—
  (*a*) lands put to non-agricultural uses.
  (*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land–
  (*a*) permanent pastures and other grazing lands.
  (*b*) lands under miscellaneous tree crops and groves not included in the net area sown.
  (*c*) culturable wastes.

(4) Fallow lands—
  (*a*) fallow lands other than current fallows.
  (*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether State owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation *e. g.* canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

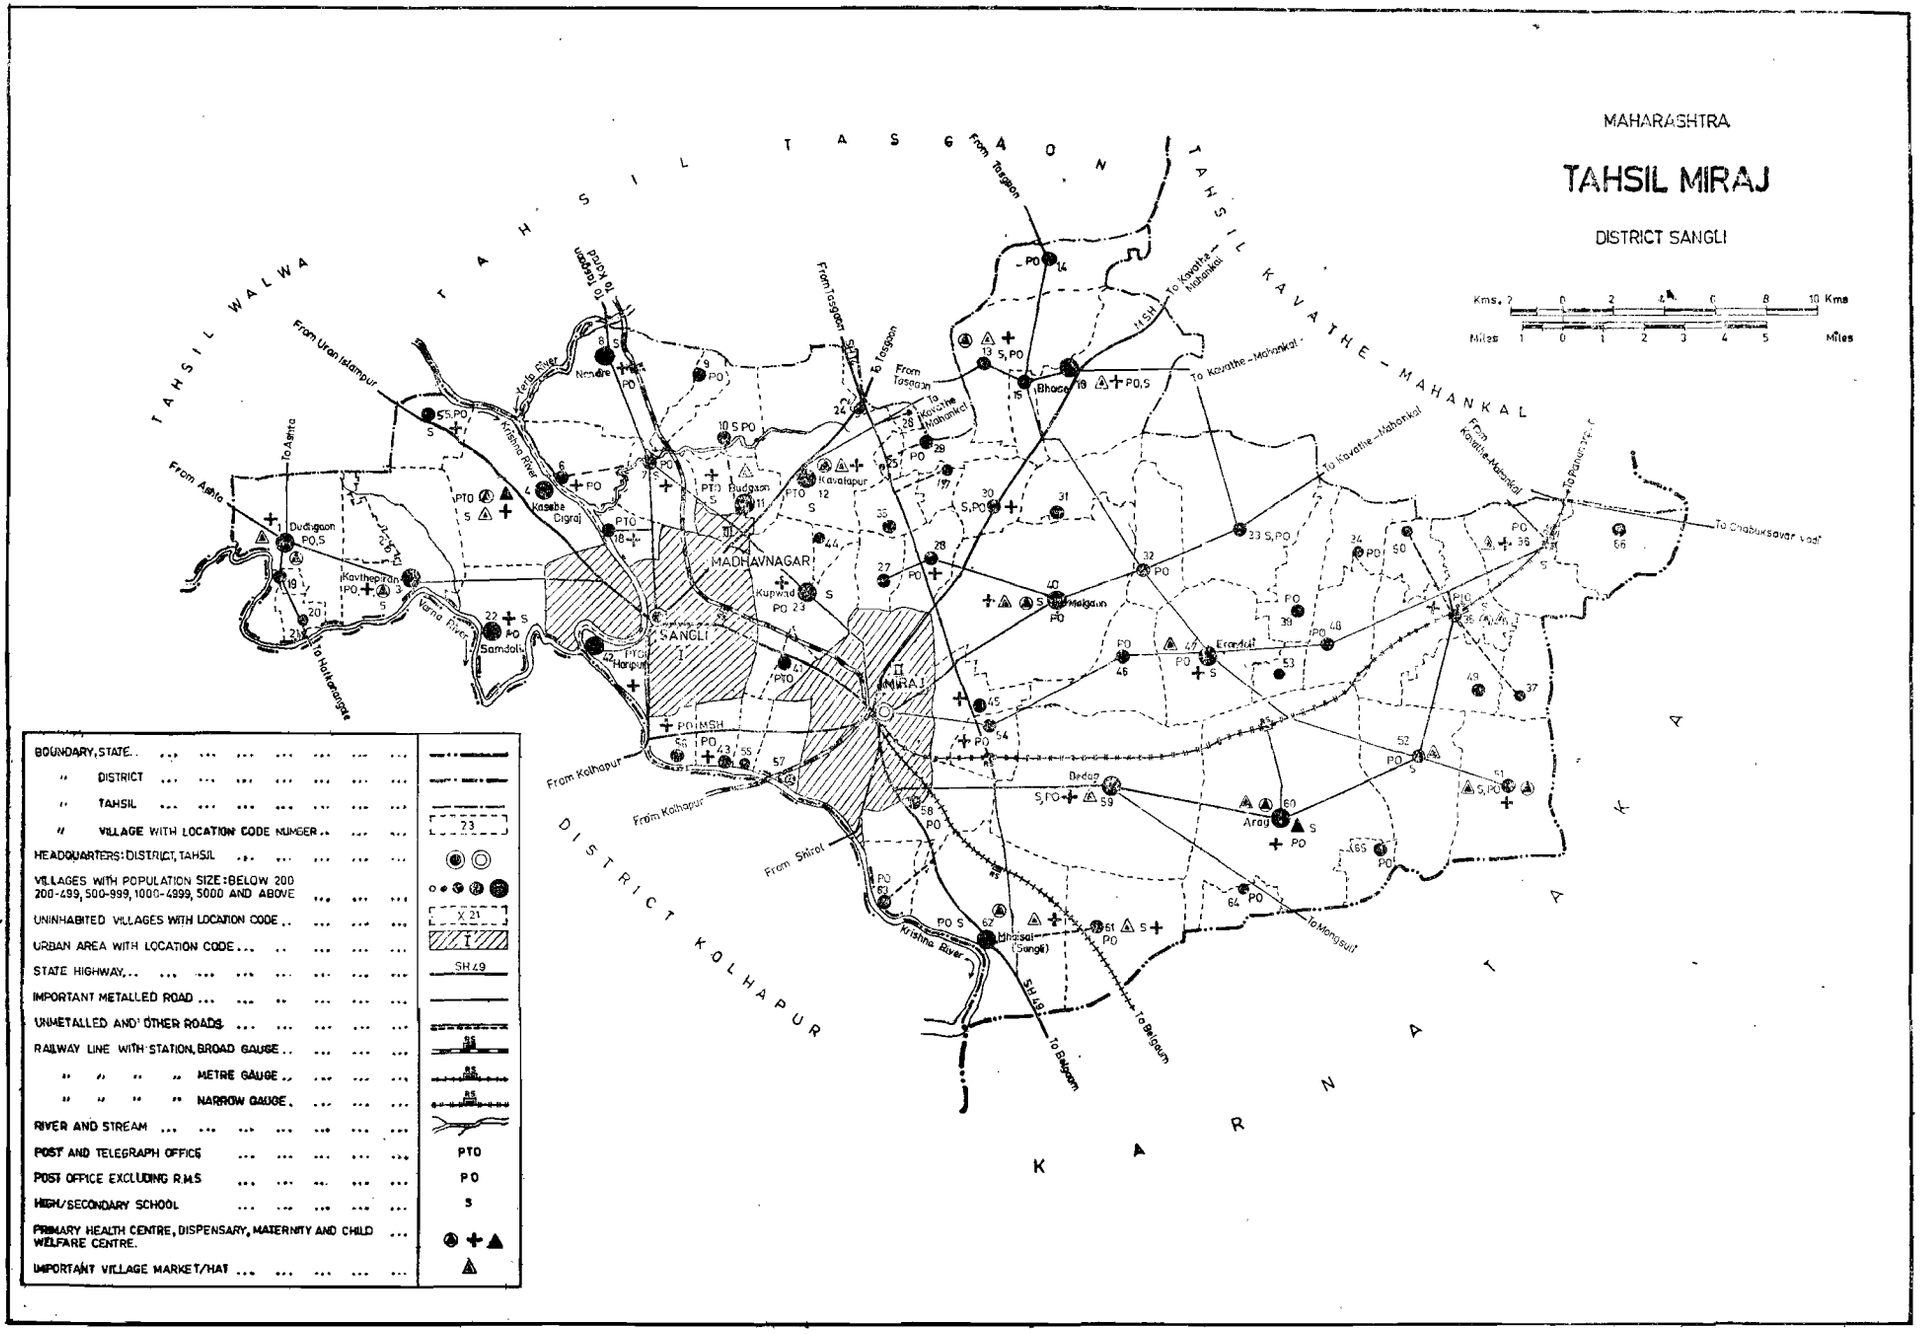

Government Canal ..	.. GC
Private Canal ..	.. PC
Well (without Electricity) ..	.. W
Well (with Elctricity) ..	.. WE
Tube Well (without Electricity)	.. TW
Tube Well (with Electricity)	.. TWE
Tank ..	.. Tk
River ..	.. R
Lake ..	.. L
Water Fall ..	.. WF
Others ..	.. O
Total ..	.. T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles / scooters, cars / jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N ..	Copies of Newspapers coming in the village.
M ..	Motor cycles/scooters available in the village.
C ..	Cars/jeeps available in the village.
T ..	Tractors available in the village.
PS ..	Police Station.

SECTION II

TOWN DIRECTORY

Note Explaining The Abbreviations Used In Town Directory

The ' Town Directory ' gives for each town area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry, and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town :—

Municipal Corporation/Corporation	M.Corp.
Municipality	M.
Municipal Council	M. Cl.
Non-Municipal	N. M.
Cantonment Board/Cantonment	C. B.
Notified Area/Notified Area Committee/Notified Committee.	N.A.C.
Census Town	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in Km.^{2} number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the State and the national level

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the State, district and tahsil headquarters and the nearest city (Urban area with a population of 100,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amentities available in the town, Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The informantion on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil.

Codes used are :—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	PT
Head Loads	HL
Baskets	B
Wheel Barrows	WB
Septic Tank Latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used :-

Overhead Tank	OHT
Service Reservoir	SR
River Infiltration Gallery	IG
Borewell pumping system	BWP
Pressure Tank	PT
Tubewell water/Hand pump	TW
Tap water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (*i. e.* class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	FC
T. B. Clinic	TB
Nursing Home	NH
Ayurvedic	A
Unani	U
Homoeopathic	Hom
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only ..	AC
Combined for all categories–Arts, Science and Commerce ..	ASC
Law	L

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B. Ed. college, teacher's training school, music / dancing institute, nursing school, etc. Various codes useds for indicating this data are :—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting ..	Sh. Type
Others	O

Keeping in view the ' Minimum Needs Programme ' of the Planning Commission, the information regarding adult literacy classes/centres etc. has also been collected and presented under Col. 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working women.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria / drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking service in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Note :— The source for the total area figures in respect of the districts is theSurveyor General of India, while that for the total area figures in respect of the tahsil in the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not, therefore, strictly add up to the corresponding figures shown against the district.

Name of towns treated as such for the first time in 1971 which continue as town in 1981 have been marked with an asterisk (*).

Names of towns treated as such for the first time in 1981 have been printed in italics.

APPENDIX TO DISTRICT URBAN PRIMARY CENSUS ABSTRACT
