PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the District Gazetteers (Revision) Editorial Board, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that Scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;

(ii) The four coloured map of the district ;

(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;

(iv) Supplementary information showing basic amenities available for each village ; and

(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers,

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande and Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgements are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photozincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

BOMBAY :
The 31st December 1963.

B. A. KULKARNI

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

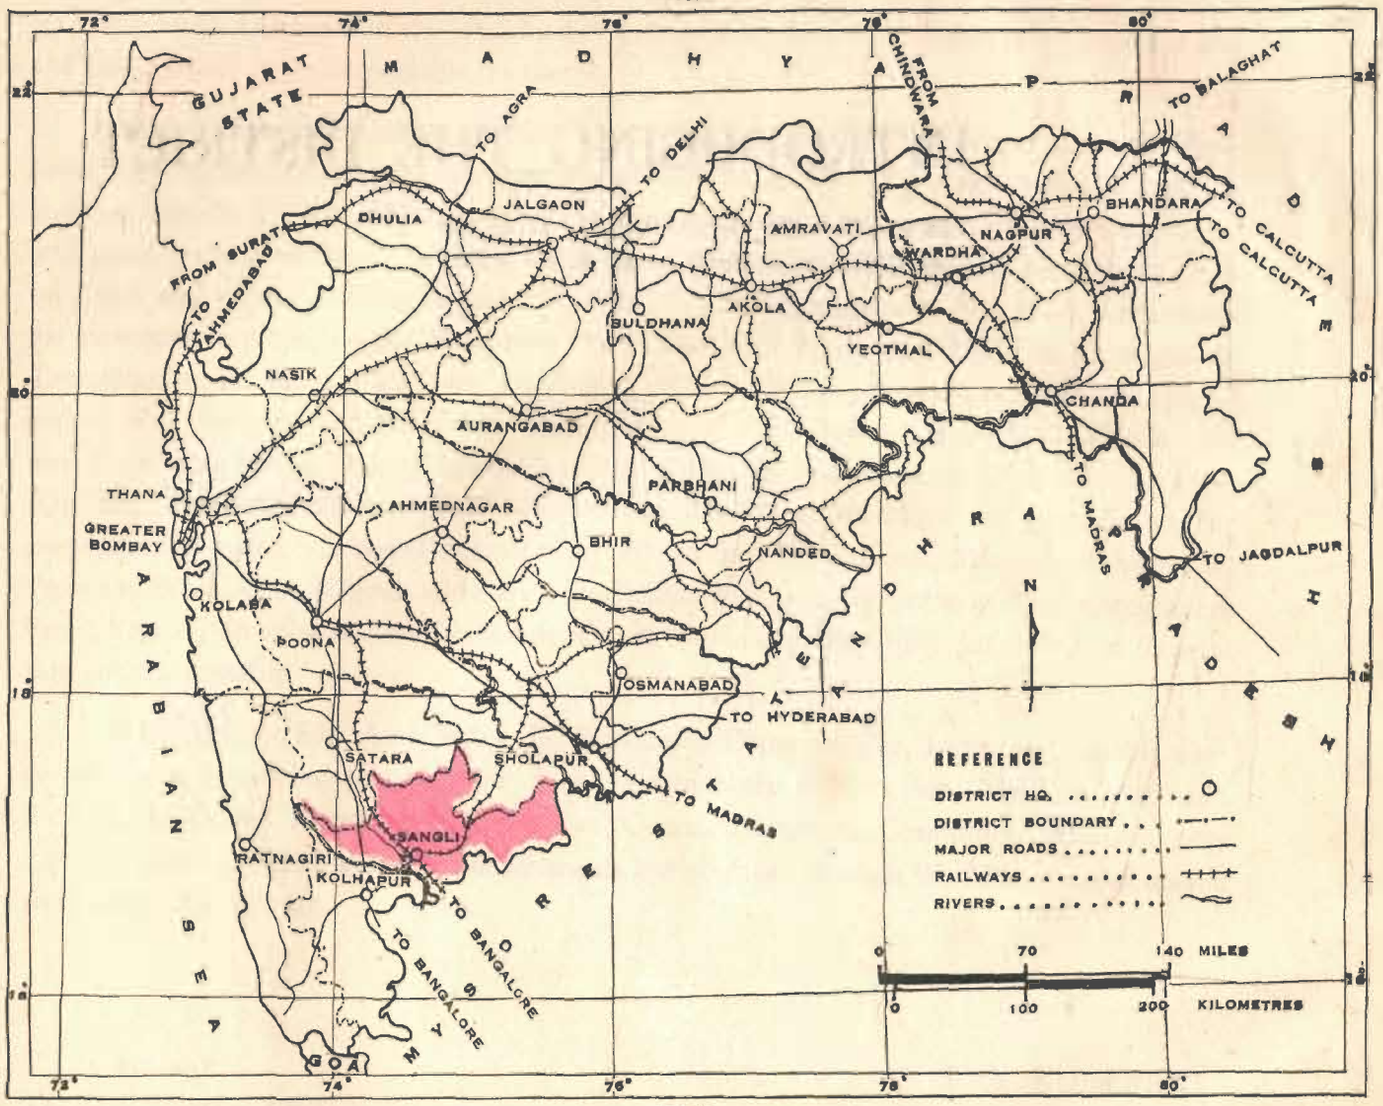

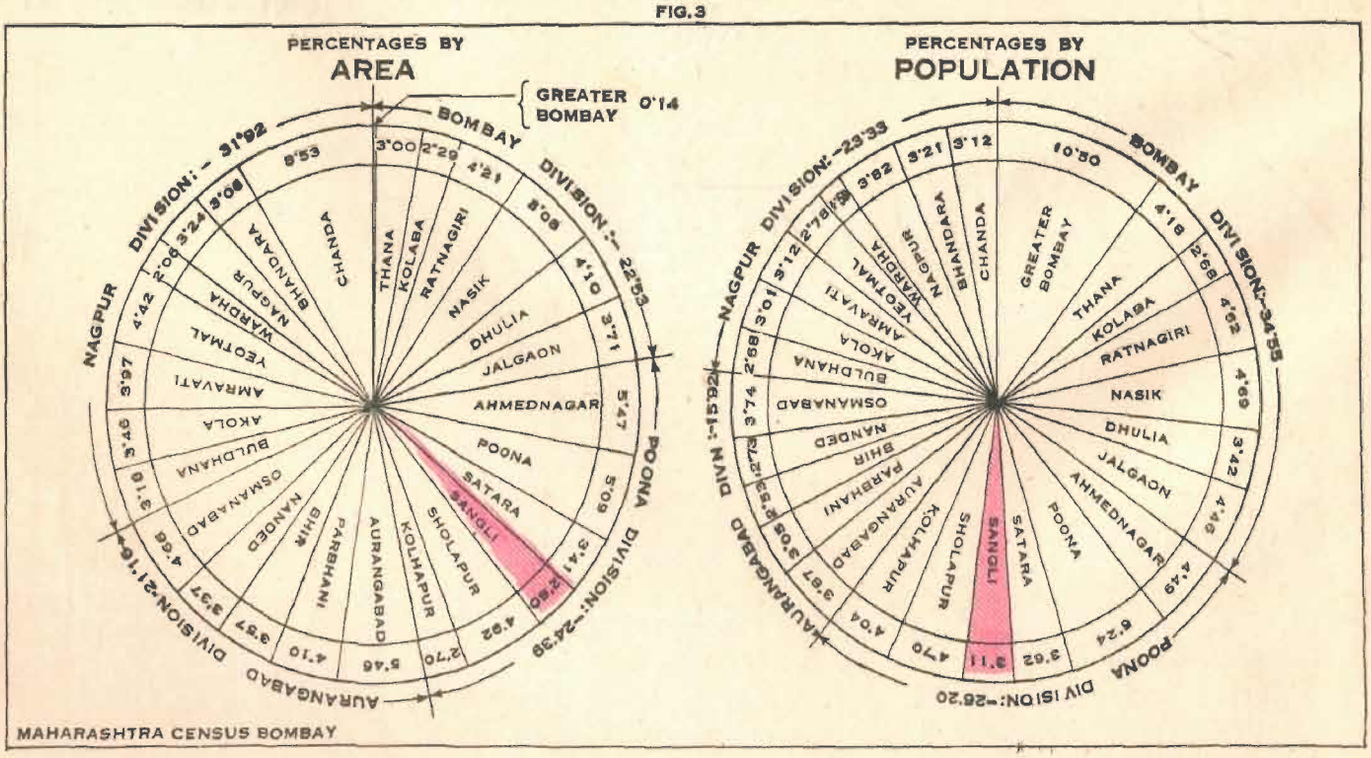

FIG. 3

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

The district is a part of Deccan plateau. Most of it is situated in the upper Krishna basin. Small portions in the north-east and east are, however, drained by the Man and Bor rivers which are tributaries of Bhima. Krishna flows through the central talukas of Walwa, Tasgaon and Miraj and the plains on its sides are the most fertile lands in Maharashtra. From this central plain several valleys branch off to the hills on both sides. Warna and Yerla are the two important valleys, one in the west and the other in the east.

The district lies between 16° 45′ and 17° 33′ N. latitude and 73° 42′ and 75° 40′ E. longitude. It is surrounded by Satara and Sholapur districts in the north, Bijapur district of Mysore State in the east, Kolhapur and Belgaum districts in the south and Ratnagiri district towards the west.

The area of the district is 3,317·1 sq. miles and its population in 1961 is 1,230,716. In terms of area and population, the district makes 2·80 per cent and 3·11 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

There are two main systems of hills. The Sahyadri range and its off-shoots, and the off-shoots of Mahadev range. The Sahyadri system includes the main range of the Sahyadris which forms the western boundary of the district. One of the spurs of the Mahadev range known as Mahimangad-Panhala spur stretches up to Khanapur. At Khanapur it splits in two branches—one branch passes twenty miles in the south till it ends in the old Panhala Fort, 15 miles from Athni Road Railway Station. The other branch stretches south-east to Belur about five miles south-west of Jath. It forms the water parting between the valley of the Yerla, a tributary of the Krishna on the right and the valley of Man, a tributary of the Bhima on the left.

Important Rivers

Krishna is the principal river. The other important rivers are Warna, Yerla, Agrani, Nanni, Manganga and Bor (Bare). Krishna flows south-east for about 35 miles through Walwa, Tasgaon and Miraj talukas. The Warna which is one of the main tributaries of the Krishna rises close to the western crest of Sahyadri and runs from west to east for about 80 miles along the southern boundary of the district and Shirala Mahal and Walwa taluka until it joins the Krishna at Sangli. Yerla is the largest of the left hand or eastern feeders. It rises in Solaknath hill in the extreme north of Khatav taluka in Satara district and runs south for about 75 miles till it meets Krishna about six miles south of Bhilvadi.

Climate

Monthly temperature records are available for Miraj Station only. Table 1 in Part III shows monthly temperature records for ten years 1951 to 1960.

The rainy season starts from the middle of June and lasts up to the end of September. It is followed by sultry weather from the beginning of October to the middle of November, winter from the middle of November to the end of January, dry hot time from the beginning of February to the end of March and the hot weather from the beginning of April to the middle of June. On the whole, the seasons show considerable uniformity. They are not subject to abrupt changes or to extremes of heat or cold.

Within the district, the seasons have local variations also. The climate is cool and healthy in the hot weather in the western zone but becomes chilly during the rainy season. The plains of Walwa and Miraj talukas, however, have temperate climate throughout the year. The warmth increases as one proceeds from west to east. In the central part there is considerable heat during hot months. During the cold weather the days are warm and nights cool. The eastern portion of the district has hotter climate than the central and western zones. It also has a wider range of temperature variation from season to season.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years 1951 to 1960.

Rainfall is heaviest in the regions of Sahyadri. Western portion of Shirala Mahal on an average gets over 2,000 mm. in the year. The central and eastern portions get a rainfall of 750 mm. The north-eastern portion has the lowest rainfall averaging to about 500 mm. in the year.

The rains start about the middle of June and last till the end of September.

The district gets major part of the rain between July and September. The pre-monsoon rain usually comes all of a sudden with thundering noise and rains heavily. During the first half of monsoon, most of the days are cloudy with drizzling rains, whereas during the latter half it rains a bit heavily.

In the eastern zone the rainfall is low and precarious but it is distributed over a longer period. In Jath taluka and parts of Khanapur taluka, which fall in this zone, the average rainfall for the years 1951–61 is about 572 mm. Between 125 to 130 mm. of this falls in October and November.

Mean rainfall at Miraj is 600 mm. The standard deviation is 176 mm. and the coefficient of variability is 29·90 per cent. Rainfall reliability is measured by the coefficient of variability. In fact, variability is inverse to reliability. Since the coefficient of variability is nearly 30 per cent rainfall reliability may be said to be slightly low.

Dependability of Rainfall and Scarcity Areas

Parts of the district have been affected by scarcity from early times. The areas which have suffered in the past were in Jath and Khanapur talukas.

The Fact-Finding Committee appointed by the Government of Bombay in 1960 had reported that the rainfall is not dependable in the following areas and they are likely to be affected by scarcity conditions as shown below :—

Area	Grade	Estimated frequency
Jath Taluka	B	Once in six years.
Atpadi Circle of Khanapur Taluka.	B	Once in six years.

Soils

The soils are of varied texture and structure. They vary from deep black in the river valleys of the Krishna, Warna and Yerla to shallow murmad red or grey in the hilly areas of Shirala Mahal and parts of Khanapur, Tasgaon and Jath talukas.

In Walwa taluka and eastern parts of Tasgaon and Miraj talukas, the soils are heavy deep black capable of yielding bumper kharif crops. These soils, which are highly retentive of moisture also grow jowar, wheat and gram. They are good for irrigated crops also and produce excellent crops of chillies, cotton, sugarcane, turmeric, etc.

The soil of Khanapur as a whole is predominantly light murum with patches of medium black. Along the Nanni and Yerla rivers there are fair stretches of good black soil but the ground rises rapidly from the banks and the soil deteriorates to a poor light stuff. The villages lying between the Nanni and Yerla rivers in Khanapur taluka have the poorest soils in the taluka. Along the Vite-Khanapur road there are excellent stretches of soils growing unirrigated wheat, between the hills. Half the soil in Atpadi circle is black, one-fourth grey and the remaining one-fourth red.

In Tasgaon taluka the soil between the Krishna river and the taluka headquarters is rich alluvial but further east it is stony and unproductive "mal". The grey soil found in the hilly tract which includes portion of Tasgaon and Miraj and western part of Khanapur is of medium fertility. This is not as fertile as the black soil and is not as poor as the "mal" land.

The soil in Shirala Mahal in general is red laterite mixed with hard murum due to the hill ranges of the Sahyadri.

In Jath, about one-sixth soil is black, one-sixth red and the remaining two-thirds stony and gravelly.

In Miraj taluka the lands lying on the Krishna and north of it up to the district headquarters have very rich dark deep alluvial soils. Fertility gradually reduces from south to north. In the eastern portion the soil is poor and light "mal". Along the Agrani river the soil is good and some times black and much of it is under well irrigation.

Minerals

Departmental survey has shown that limestone deposits occur around Miraj at Narwad, Waddi, Dedag, Arag, Belunki, Kannadwadi, Sawali, Tanang, Kalambi, Kupwad, Erandoli, Salgare, etc. The limestone is associated with trap formation and the quality is not uniform. The reserves are indicated at a few million tons and do not seem to be useful for cement industry. Good clay for bricks and tiles is found on the banks of the rivers. No other mineral of importance is known to occur in any part of the district.

Forests

Area under forest is 115,647 acres which is only 5·4 per cent of the total geographical area of the district. It is distributed in the talukas of Tasgaon, Khanapur, Walwa and Jath and Shirala Mahal.

Natural Zones

The district can be broadly divided into four zones. The western zone (or Maval) has heavy rainfall, forests and a large proportion of paddy and nachani lands. It makes more than 7 per cent of the area of the district and comprises the hilly region of Shirala Mahal only. The central zone making about 41 per cent of the area of the district contains the rich agricultural tracts of the district growing jowar, wheat and gram. It produces excellent irrigated crops such as chillies, cotton, sugarcane and turmeric. The hilly tract comprising parts of Khanapur, Tasgaon and Miraj talukas grows jowar and bajri. The eastern zone is a scarcity area consisting of Jath taluka and the eastern parts of Khanapur taluka. It has low rainfall and poor soils. Irrigation facilities are developed in the central zone. Rain water is also used for rice cultivation in the western zone.

ADMINISTRATIVE SET-UP

Brief History

The areas now constituting Sangli district were up to 1948 partly included in old Satara district and partly in the former Indian States of Aundh, Jath, Sangli, Kurundwad (Senior), Miraj (Senior), Miraj (Junior) and Wadi. The new district known as South Satara district was formed in 1949 with headquarters at Sangli. It included four talukas of Tasgaon, Khanapur, Walwa and Shirala peta transferred from old Satara district and two new talukas of Miraj and Jath formed out of the parts of former Indian States merged in the new district.

With the Reorganisation of States in 1956, the district was included in Bombay State. Since 1960 it forms a part of Maharashtra.

The name of the district was changed from South Satara district to Sangli district in the year 1960.

Present Set-up

For administrative purposes, the district is at present divided in five talukas and one mahal. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka and mahal are as follows :—

District/Taluka (1)	Name of Headquarters (2)	Area in sq. miles (3)	Number of inhabited villages (4)	Number of towns (5)	1961 Population (6)	Percentage of area (7)	Percentage of population (8)
SANGLI DISTRICT	Sangli	3,317·1	526	6	1,230,716	100·0	100·0
1 Khanapur Taluka	Vite	839·4	129	1	222,563	25·3	18·1
2 Shirala Mahal	Shirala	246·0	80	..	89,845	7·4	7·3
3 Walwa Taluka	Uran Islampur	300·4	56	2	203,428	9·1	16·5
4 Tasgaon Taluka	Tasgaon	433·4	70	1	202,758	13·1	16·5
5 Jath Taluka	Jath	873·7	97	..	138,983	26·3	11·3
6 Miraj Taluka	Miraj	624·2	94	2	373,139	18·8	30·3

General Administration and Revenue

The Collector is in charge of General Administration, Law and Order, Elections, Treasury, Land Revenue and Civil Supplies. He is assisted by a Resident Deputy Collector in his office and two Deputy Collectors who hold charge of the Walwa and Miraj Revenue divisions and have their headquarters at Sangli and Miraj, respectively. Five Mamlatdars are in charge of five Taluka offices and one Mahalkari in charge of one Mahal office.

Land Revenue Settlements

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never reclassified during the second revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlements untaxed. The comparative incidence of land revenue from field to field is thus still the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments in the district is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small bandharas, the land revenue is integrated and is inclusive of the charge for water supplied. For lands irrigated under Government canals, the land revenue at dry land rates is recovered by the Revenue Department while the water rates determined annually on the basis of actual crops raised are assessed by the Irrigation Department and recovered by the Revenue Department.

The remaining two talukas of Jath and Miraj consist of villages which were before the merger of States in 1948 parts of different States. Each of those States had its own settlement pattern. The prevailing systems in those two talukas are, therefore, described separately.

Jath Taluka.—It consists of a few villages of Bijapur and Indi talukas and the entire territory of the erstwhile Jath State. Original settlement was introduced in that State in 95 Khalsa villages in 1879 and guaranteed for 30 years. Twenty-five Inam villages were also settled at the same time. The settlement period expired in 1911-12 but instead of undertaking a Revision Survey, the assessment was raised by 25 per cent from 1911-12 and guaranteed for 15 years. The guarantee period expired in 1926 and assessment was raised by another 25 per cent from 1926-27 and guaranteed for 25 years, till 1950.

Miraj Taluka.—Miraj taluka is formed as follows : 36 villages from Sangli State, 27 villages from Miraj Senior, 9 villages from Miraj Junior, 1 village from Kurundwad, 1 village from Kolhapur and 21 from Athani, Bijapur, Tasgaon and Walwa talukas.

Original and Revision Settlements were made at different times in different States and had different guarantee periods. Guarantee period of the villages from Sangli State which were originally settled in 1879 expired in 1894. The Chief of Sangli extended the period of guarantee for a further period of 22 years up to 1915. Details of settlements of the two Miraj States are not readily available.

Khanapur, Walwa, Shirala and Tasgaon talukas previously belonged to old Satara district. The original Revenue Survey and Settlement in these talukas was completed between 1856 and 1863. First Revision Settlement was completed between 1887 to 1894 and the Second Revision Settlement between 1918 and 1926. The land revenue rates have not been revised since then in spite of the expiry of the guarantee period of the Second Revision Settlement.

Table 24 in Part III shows demand and collection of land revenue during the last ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam or Jagir villages had not been covered by most of them. In fact, some of the Inam or Jagir villages were unsurveyed and unsettled as late as in 1947. That work has now been completed. Because of such recently settled villages and the territorial changes in the taluka boundaries from time to time most of the talukas to-day have a more varied pattern of land revenue assessments than that seen in the reports of earlier settlements. Even then the maximum rates or average land revenue rates per acre fixed at each settlement or revision settlement should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. The table on page (5) shows those rates for dry, garden or rice lands for each taluka separately.

Assembly and Parliamentary Constituencies

Since 1957 the district has 8 Assembly seats. In 1957, the Vite constituency was a double-member constituency with one of the two seats reserved for Scheduled Castes. After abolition of the double-member constituencies in 1961, the seat from Vite is reserved for Scheduled Castes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

	Assembly constituency	Number of voters on rolls
1	Jath	84,555
2	Miraj	76,840
3	Sangli	83,504
4	Tasgaon	69,240
5	Khanapur	83,382
6	Vite	68,914
7	Walwa	74,446
8	Shirala	75,118
	Total ..	615,999

In the 1962 General Elections, the Assembly constituencies Jath, Miraj, Sangli, Tasgaon, Khanapur and Vite together made one Parliamentary constituency called Miraj constituency and the remaining Assembly constituencies Walwa and Shirala combined with Assembly constituencies Karad North, Karad South, Patan and Jaoli from Satara district made another Parliamentary constituency called Karad constituency.

The total number of voters on rolls in the district in 1961 was 615,999. The total population 21 years and above according to 1961 Census is 566,382. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The Judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Mamlatdars are vested with magisterial powers. But those powers are limited to executive matters and preventive measures such as recording confessions, prevention of riots, crimes, etc., and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other Magistrates who try criminal cases in the district. This separation of the Judiciary from the Executive has been brought about in the year 1953.

The District and Sessions Judge is assisted by one Assistant Judge and Additional Sessions Judge. He has jurisdiction over the entire district. He attends to civil and criminal work, both original and appellate.

The Civil Judge (Senior Division) attends to civil suits in the whole district.

There are 10 Civil Judges (Junior Division) and Judicial Magistrates, First Class, with headquarters at different taluka places. They deal with civil and criminal suits.

Taluka	Original Settlement/ Revision Settlement	Year	Guarantee period	No. of villages	Average land revenue per acre	Group	Villages	Maximum rates per acre

NA = Not available

* These figures are the present rates after the assessment of all lands has been raised by 50 per cent as compared to original settlement.

Police

The Police force in the district works under the (District) Superintendent of Police who is assisted by two Deputy Superintendents and two Circle Police Inspectors. There are 15 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

	Police Station Headquarters	Number of villages
1 Khanapur Taluka ..	1. Vite	59
	2. Kadegaon	46
	3. Atpadi	32
2 Shirala Mahal	4. Shirala	74
	5. Kurlap	25
3 Walwa Taluka.. ..	6. Ashta	14
	7. Islampur	27
4 Tasgaon Taluka ..	8. Tasgaon	55
	9. Kundal	16
5 Jath Taluka	10. Jath	60
	11. Omdi	37
6 Miraj Taluka	12. Sangli Town	
	13. Miraj Town	
	14. Budhgaon	40
	15. Kavathe-Mahankal..	45

Average number of villages and population per Police Station in the district is 35 and 82,048 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

All the six towns in the district have Municipal Committees established under the Bombay District Municipal Act of 1901. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and Scheduled Tribes and for Women are shown below for each municipality separately :—

Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 Population	Total Number of Municipal Councillors	Seats reserved for		
						Scheduled Castes	Scheduled Tribes	Women
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1. Uran Islampur ..	1853	1961	4	20,817	15	1	..	2
2. Tasgaon	1865	1959	4	16,649	15	1	..	2
3. Vite	1854	1962	4	13,391	15	2	..	2
4. Miraj	1875	1962	4	53,345	29	1	..	3
5. Ashta	1853	1961	4	14,390	15	2	..	2
6. Sangli	1876	1962	4	73,838	33	2	..	3

All the six Municipalities in this district are quite old. Municipalities at Uran Islampur, Ashta and Vite are more than 100 years old.

The six Municipalities together cover 100 per cent of the urban population and 15·64 per cent of the total 1961 population of the district.

The taxation level of each of the Municipalities is shown in the next column.

The per capita tax in Sangli is as high as Rs. 17·70. It is as low as Rs. 2·05 in Ashta. Sangli is, however, a great centre of trade and the incidence of municipal tax is shared by agriculturists bringing their produce for sale in the Sangli Market.

Name of the Municipality	1961 Population	Year 1961-62		
		Total receipts	Receipts from Municipal taxes	Per capita Municipal tax
		Rs.	Rs.	Rs. nP.
1. Vite	13,391	1,10,865	84,150	6 28
2. Uran Islampur	20,819	2,15,685	1,74,130	8 36
3. Ashta	14,390	64,617	29,510	2 05
4. Tasgaon ..	16,649	1,51,454	1,16,394	6 99
5. Sangli	73,838	20,13,155	13,06,836	17 70
6. Miraj	53,345	6,85,690	4,42,342	8 29

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 6 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The areas under the jurisdiction of the Zilla Parishad and the Panchayat Samitis

correspond to the district and taluka boundaries except in the case of Municipal towns which are not covered by them. The Zilla Parishad covers 96·7 per cent of the area and 84·4 per cent of the total population of the district. The population covered includes total rural population of the district in 1961. The number of villages, number of non-municipal towns and population included under the Zilla Parishad and each Panchayat Samiti are shown below. The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961 :—

——	Name of Headquarters	Area in Sq. Miles	Number of inhabited villages	Number of non-municipal towns	Population in 1961	Percentage by area	Percentage by population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Sangli Zilla Parishad	Sangli	3,206·2	526	..	1,038,286	100·0	100·0
1. Khanapur Panchayat Samiti	Vite	818·1	129	..	209,172	25·4	20·1
2. Shirala Panchayat Samiti	Shirala	246·0	80	..	89,845	7·7	8·7
3. Walwa Panchayat Samiti	Islampur	255·0	56	..	168,221	8·0	16·2
4. Tasgaon Panchayat Samiti	Tasgaon	416·6	70	..	186,109	13·0	17·9
5. Jath Panchayat Samiti	Jath	873·7	97	..	138,983	27·3	13·4
6. Miraj Panchayat Samiti	Miraj	596·8	94	..	245,956	18·6	23·7

Constitution

The Zilla Parishad has 49 directly elected councillors. Out of these 49 seats, 4 seats are reserved for Scheduled Castes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of all Panchayat Samitis are also *ex-officio* councillors.

At the Block (taluka) level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a chairman of a co-operative society conducting the business of purchase or sale of agricultural produce in the area of the Block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of Village Panchayats are also elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the Block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An Officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are Officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture, Co-operation, Education and Health. Two subject committees are presided by the Vice-President and four by two chairmen elected by the Zilla Parishad to preside over two specified subject committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the subject committees concerned. Co-ordination between the subject committees is achieved through the standing committee which includes the Chairmen of all the subject committees as members.

The Panchayat Samitis do not have subject committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month,

respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspections and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now with the creation of democratic bodies at the district and block level devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities, at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions, and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishad have been absorbed as employees of the Parishad. The Village Talathi (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayat, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as District Local Board, District School Board and District Panchayat Mandal. The functions of the non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as Municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water-supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III), District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rate during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plans Schemes. If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 160 lakhs. The major portion of the receipts is of receipts from Government. They are 92·4 per cent and the Zilla Parishad receipts are 7·6 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 158 lakhs. Following are the major items of expenditure :—

General Administration ..	8·5	per cent
Education ..	58·8	,, ,,
Community Development Project	6·5	,, ,,
Buildings and Communications	11·2	,, ,,
Miscellaneous ..	2·8	,, ,,
Other items ..	12·2	,, ,,

Establishment

The establishment of the Zilla Parishad comprises of the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 5 Class I and 24 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV categories is 984. Moreover an establishment of 126 gram sevaks, 217 talaties, 234 Village Panchayat Secretaries has been transferred from the Revenue Department to the Zilla Parishad. There were 1,186 kotwals transferred to the Zilla Parishad, but under recent Government order the services of kotwals have been re-transferred to the Revenue Department.

VILLAGE PANCHAYATS

The number of independent village panchayats, the number of group village panchayats and the number of villages covered by group village panchayats in each taluka are shown below:—

Taluka	No. of inhabited villages and non-municipal towns	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
1 Khanapur ..	129	93	17	36
2 Shirala Mahal	80	42	15	39
3 Walwa ..	56	58	..	..
4 Tasgaon ..	70	69	1	2
5 Jath	97	50	20	48
6 Miraj	94	71	10	23
Total ..	526	383	63	148

The break-up of the total annual income of all the Village Panchayats in the district for the year 1961-62 is as follows:—

Item	Amount (in '000)	Percentage of total income
	Rs.	
Grants	908	45·47
Taxes on houses and properties	271	13·57
Octroi	5	0·25
Other taxes	256	12·82
Total taxes	532	26·64
Income from other sources	557	27·89
Total income	1,997	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more. The Village Panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The Village Panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

421 Village Panchayats have imposed taxes on houses and properties. Others have not. One Village Panchayat has started collecting octroi. Others have not.

The break-up of the total annual expenditure of all the Village Panchayats in the district for the year 1961-62 is as follows:—

Item	Amount (in '000)	Percentage of total expenditure
	Rs.	
Administration	552	30·87
Health and Sanitation	211	11·80
Public Lighting	174	9·73
Other Items	851	47·60
Total Exper diture	1,788	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of Panchayat Ghars, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

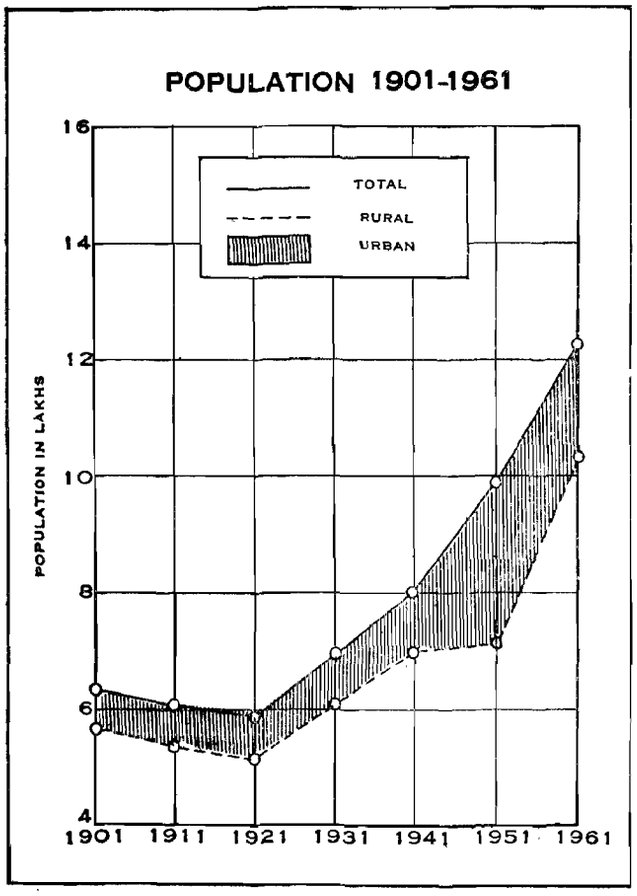

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—61.

Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Variation	Rate of variation
1901	644,556	..	..
1911	612,518	—32,038	—4·97
1921	596,199	—16,319	—2·66
1931	707,479	+111,280	+18·66
1941	812,865	+105,386	+14·90
1951	998,434	+185,569	+22·83
1961	1,230,716	+232,282	+23·26

Figure below shows the total, rural and urban population of the district for the last seven Censuses :—

Because of unusual agricultural seasons and intermittent famines, the population of the district decreased by nearly 5 per cent in the decade 1901-11. In the following decade also the severe influenza epidemic took a heavy toll of life and the population decreased further by 2·7 per cent. Conditions improved after 1921 and there has been a distinct change in the trend of variation since then.

The population increased by 18·7 per cent in 1921—31, 14.9 per cent in 1931—41 and 22.8 per cent in 1941—51. The higher growth rate in 1921—31 than in 1931—41 may be attributed to the recovery from the influenza epidemic in 1918.

In the last two decades (1941—51 and 1951—61) the population has increased at very high rates of 22·8 per cent and 23·3 per cent. In 1961 the population is more than double of the district population in 1921. Though the rate of growth of population in 1951—61 is slightly lower than the State average of 23·60 per cent the population of the district will, with that rate, be nearly double that of 1961, in the year 1991.

The high increase in the population during the decade 1951—61, is the result of control of epidemics and other diseases since 1950. Malaria, which used to be a major public health problem in the district, has been controlled by D D T spraying. Campaigns for BCG and vaccination against smallpox also have their share in improving the survival rate. The death rate has thus been reduced and has resulted in the higher growth rate although the birth rate may not have increased at all.

The 1951—61 decade variation for the district and each of the talukas is as follows :—

	Percentage variation 1951—61
SANGLI DISTRICT	23·26
1 Khanapur Taluka	22·47
2 Shirala Mahal	13·13
3 Walwa Taluka	16·86
4 Tasgaon Taluka	23·73
5 Jath Taluka	28·37
6 Miraj Taluka	28·20

The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows :—

	Sangli District	Maharashtra
1901—1961	90·94	103·97
1921—1961	106·43	89·71
1951—1961	23·26	23·60

Figure on page (11) shows the areawise pattern of 1951—61 growth of population within the district.

Jath taluka in the east has recorded the highest increase (28.37 per cent) while Shirala mahal on the west had the lowest increase (13·13 per cent) over 1951. Jath, Miraj and Tasgaon talukas are above the district average and Khanapur and Walwa talukas and Shirala mahal are below that average.

The high growth rate in Miraj taluka is partly due to the increase in the population of Miraj and Sangli towns which together account for about 44 per cent of the total addition in the taluka population. Jath taluka which has no town in its limits has shown the highest decade rate of growth in the district. There is no specific reason to explain this rapid growth. The age composition of population of this taluka does not show any departure from the average pattern of the district. Local investigation may be necessary to explain the high growth rate in Jath.

Density of Population

The densities for Maharashtra, Sangli district and its talukas for 1951 to 1961 are as follows :—

	Density per sq. mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA ..	271	334	..
SANGLI DISTRICT ..	301	371	100·00
1 Khanapur Taluka ..	217	265	18·08
2 Shirala Mahal ..	323	365	7·30
3 Walwa Taluka ..	579	677	16·53
4 Tasgaon Taluka ..	379	468	16·48
5 Jath Taluka ..	124	159	11·29
6 Miraj Taluka ..	467	598	30·32

The density of population of the district has increased sharply from 180 per sq. mile in 1921 to 371 per sq. mile in 1961. The district density has, however, always been higher than the State average.

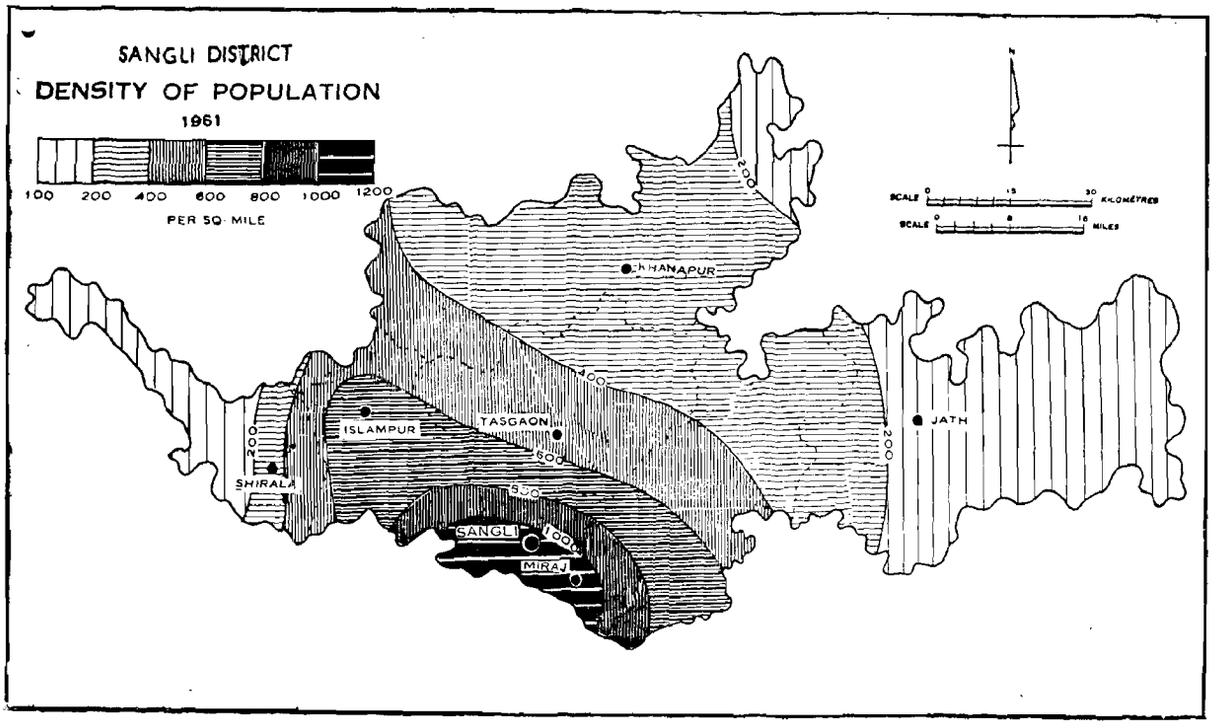

Figure on page (12) shows the approximate contours of density of population in 1961 within the district.

Density of population varies from 677 persons per sq. mile in Walwa taluka to 159 persons per sq. mile in Jath taluka. These differences generally correspond to those of topography and land utilisation. Lands in Walwa taluka are the richest and yield the best garden and dry crops. Lands in Jath taluka are comparatively the poorest in the district and the area suffers from scarcity once in six years.

The concentration of population is in Walwa and Miraj talukas. Because of the Sangli-Miraj town group the concentration of population is the highest in Miraj taluka which alone makes more than one-fourth of the district population. Rural density of population is the highest in Walwa taluka which has been described as having the richest soils in the district.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district.

The number of towns, the rate of decade variation in the urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—

	Sangli District			Maharashtra		
Year	No. of Towns	Rate of variation in urban population	Percentage of urban population to total population	No. of Towns	Rate of variation in urban population	Percentage of urban population to total population
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1901	11	..	14·74	219	..	16·59
1911	12	—6·40	14·52	232	+0·99	15·13
1921	11	+3·67	15·46	238	+18·72	18·50
1931	12	+28·24	16·71	258	+15·54	18·60
1941	12	+17·58	17·10	266	+27·11	21·11
1951	27	+106·39	28·74	383	+62·42	28·75
1961	6	—32·93	15·64	266	+21·32	28·22

In the figure on page (10) the actual urban population of the district since 1901 is represented by the shaded portion between the two lines.

The net growth in urban population of the district over that of 1901 is 102·52 per cent as against 246·96 per cent for the State.

In 1961 the district is less urbanised than Maharashtra State. The proportion of urban population in the district in 1951 was almost equal to that in the State. The drop in the number of towns in 1961 is due to the declassification of 21 towns, as a result of a change in the definition explained in paragraphs 8 and 9 in the Explanatory Note to Part II. The All-India definition of urban areas has been so rigidly applied in 1961 that the number of towns in 1961 is reduced only to six against 11 in 1901. The names of declassified towns treated as villages in 1961 are as follows :—

(1) Atpadi.
(2) Khanapur.
(3) Bagani.
(4) Borgaon.
(5) Kameri.
(6) Nerle.
(7) Peth.
(8) Walwa.
(9) Bhilwadi.
(10) Kundal.
(11) Mane-Rajuri.
(12) Palus.
(13) Sawlaj.
(14) Jath.
(15) Arag.
(16) Bedag.
(17) Budhgaon.
(18) Dudhgaon.
(19) Kavathe Mahankal.
(20) Kavathe Piran.
(21) Malgaon.

No new town has been added in the 1961 Census. The population of these declassified towns was 145,725 or 50·79 per cent of the urban population in 1951. If that is excluded from the 1951 urban population of the district its 1961 urban population would be higher by 36·28 per cent over that of 1951. The net decrease of 32·93 per cent now seen in the table above is thus due solely to the change of the definition of urban areas and the consequential declassification of 21 towns.

Sangli and Miraj are the two most important towns. Population of Sangli has increased by 262·6 per cent over 1921 and 338·8 per cent over 1901. Population of Miraj has increased by 149 per cent over 1921 and 189·5 per cent over 1901. During the last decade the population of the two towns taken together has increased by 40·52 per cent. Together they now make 1·27 lakhs population and because of their nearness to each other may as well have been treated as a City.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows :—

Year	Sangli District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901	..	85·26	..	83·41
1911	—4·72	85·48	+12·68	84·87
1921	—3·74	84·54	—6·77	81·50
1931	+16·91	83·29	+14·77	81·40
1941	+14·36	82·90	+8·54	78·89
1951	+5·59	71·26	+7·72	71·25
1961	+45·93	84·36	+24·51	71·78

The net increase in rural population of the district has been 88·94 per cent over that of 1901 and 106·01 per cent over that of 1921. The same figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The rates of variation in rural population have never followed any trend. The urban population had grown faster at the expense of rural population. As a result, the rural population increased at a lower rate than the total population. The percentage of rural population gradually decreased both for the district and the State since 1911. In 1961 it has shown an opposite trend, mostly due to declassification of 21 towns, whose population is now included in the rural population of the district.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Sangli District		Maharashtra	
	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population	Percentage of No. of villages to total No. of villages	Percentage of population to total rural population
Less than 500 ..	9·70	1·35	47·72	15·02
500—999 ..	23·57	8·83	28·55	25·71
1,000—1,999 ..	36·31	25·76	16·62	28·55
2,000—4,999 ..	22·62	34·94	6·18	22·40
5,000 and over ..	7·80	29·12	0·93	8·32

The number of villages with less than 1,000 population are 33·27 per cent of the total number of villages and have only 10·18 per cent of the district rural population. For Maharashtra as a whole such villages make 76·27 per cent of the total number of villages and account for 40·73 per cent of the total rural population. This is a sharp contrast in the distribution of rural population in the district which has the highest proportion of population residing in villages of 1,000—1,999 or over 2,000 population. Villages with more than 1,000 population are 66·73 per cent of the total number of villages and account for 89·82 per cent of rural population.

The area, number of inhabited villages, total rural population, average population per village, and the number of villages per 100 sq. miles are shown below for the State, district and each taluka separately :—

State/District/Taluka	Area in sq. miles (Rural)	No. of inhabited villages	Rural population	Average population per inhabited village	No. of inhabited villages per 100 sq. miles of rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31·0
SANGLI DISTRICT	3,206·2	526	1,038,286	1,974	16·4
1 Khanapur Taluka	818·1	129	209,172	1,621	15·8
2 Shirala Mahal	246·0	80	89,845	1,123	32·5
3 Walwa Taluka	255·0	56	168,221	3,004	22·0
4 Tasgaon Taluka	416·6	70	186,109	2,659	16·8
5 Jath Taluka	873·7	97	138,983	1,433	11·1
6 Miraj Taluka	596·8	94	245,956	2,617	15·8

Average population per village in 1961 is 1,974 in the district as against 792 in Maharashtra. An average village in the district thus has more than double the population of an average village in the State.

The average population per village within the district, varies from 1,123 in Shirala mahal to 3,004 in Walwa taluka. The number of villages per 100 sq. miles is 16·4 in the district against 31 in Maharashtra. Among the talukas of the district Shirala mahal has 32·5 villages per 100 sq. miles compared to 11·1 in Jath taluka.

It may be added that the above discussion is based on villages with their administrative boundaries and does not take into account the existence of wadies, padas or hamlets within those boundaries.

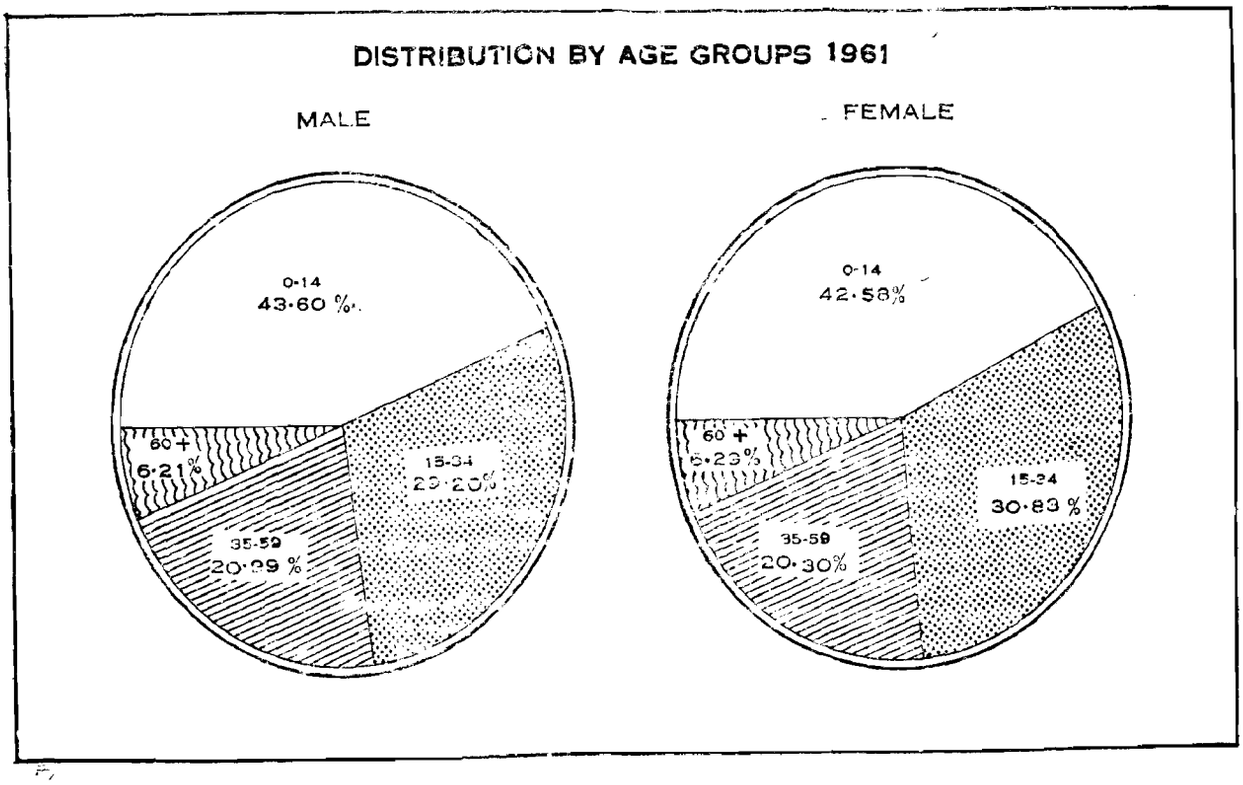

Age Distribution

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I and B-II and C-III. The percentage proportions of population in broad age-groups in 1961 are shown below for males and females separately compared with the corresponding proportions for 1951 :—

Percentages of population by age-groups

Age-group	1951		1961	
	Males	Females	Males	Females
0—4	14·20	14·15	15·20	15·13
5—14	27·16	26·98	28·43	27·46
0—14	41·36	41·13	43·63	42·59
15—34	29·52	31·27	29·21	30·84
35—59	23·53	21·08	21·00	20·30
15—59	53·05	52·35	50·21	51·14
60 and over ..	5·59	6·52	6·16	6·27
Total ..	100·00	100·00	100·00	100·00

Figure below shows the distribution of the district population in 1961 by broad age-groups for males and females separately :—

During the last decade the population of children aged 0—4 increased from 14·20 to 15·20 per cent for males and from 14·15 to 15·13 per cent for females. The same trend is observed for age-group 0—14. The proportion of the population aged 60 and over has increased for males but slightly decreased for females. Consequently the proportion of the population in age-group 15—59 decreased for both males and females. The proportion of males in the age-group 15—59 is lower than that of females in 1961. In the old age-group females have a slightly higher proportion. The proportion of males of age-groups 15—59 is 50·21 per cent in the district against 54·79 per cent for Maharashtra. The difference can be attributed, partly to the out-migration of working males from Shirala mahal and Khanapur taluka. The main reason however is that the district population is more youthful because of the high rate of its natural growth though the net increase in the district population is slightly lower than that of the State.

Dependency Ratio

The ratio between dependents (age-group 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State separately :—

		Sangli District			Maharashtra		
		Youth	Aged	Total	Youth	Aged	Total
1951	Total ..	78·3	11·5	89·8	69·9	9·3	79·2
1961	Total ..	85·1	12·3	97·4	75·2	9·7	84·9
	Rural ..	86·9	12·7	99·6	80·6	10·8	91·4
	Urban ..	76·0	9·9	85·9	63·1	7·3	70·4

The dependency ratios are higher in Sangli district than those for Maharashtra due to a part of the supporting population migrating for work out of the district. The dependency ratios for the State and the district are both higher in 1961 than those for 1951. Both the components of youth and aged have increased. The increase in dependency may be the result both of high fertility and declining mortality. The 1961 population in the district, thus, has a larger load of dependents than that of 1951. The dependency load is larger in rural areas than in urban areas.

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

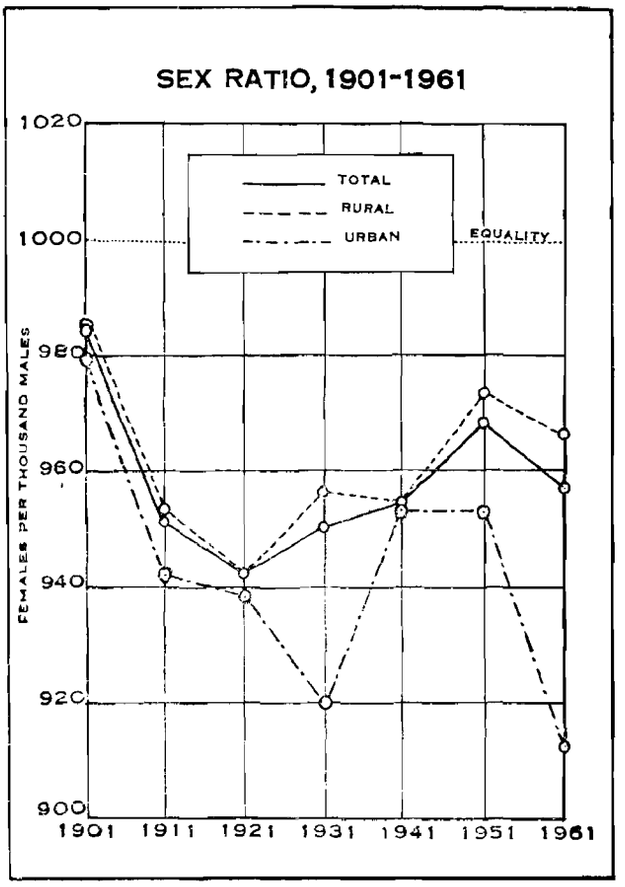

Year	Sangli District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	984	985	979	978	1,002	866
1911 ..	951	953	942	966	1,000	796
1921 ..	942	942	938	950	994	776
1931 ..	950	956	920	947	987	790
1941 ..	954	954	953	949	990	810
1951 ..	968	974	953	941	1,000	807
1961 ..	957	966	912	936	995	801

Figure in the next column shows the above variation in sex ratios since 1901 for the district total, rural and urban areas separately.

Since 1901 the sex ratio of the population of the district changed from 984 to 957 while that of Maharashtra varied between 978 and 936. Excepting 1911 and 1921, the district had always a higher sex ratio than the State.

Rural urban differences in sex ratios have widened from 6 points in 1901 to 54 points in 1961. It may indicate that urban areas are attracting more and more male migrants from rural areas.

Rural sex ratio is higher for Maharashtra but urban sex ratios are consistently higher in the district than in the State.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas separately :—

Age-group	Total	Rural	Urban
0—14	935	937	922
15—34	1,011	1,031	920
35—59	926	938	863
60+	974	974	979
All ages	957	966	912

Sex ratio is the lowest in the age-group 35—59 for total and urban areas of the district.

The following are the sex ratios for each taluka in the district for total, rural and urban areas separately :—

District/Taluka	Total	Rural	Urban
SANGLI DISTRICT	957	966	912
1 Khanapur Taluka	1,009	1,017	898
2 Shirala Mahal	1,038	1,038	..
3 Walwa Taluka	949	953	934
4 Tasgaon Taluka	958	961	921
5 Jath Taluka	939	939	..
6 Miraj Taluka	920	928	906

Sex ratios by talukas also show that urban sex ratio is lower than that of rural areas. Miraj taluka which includes Miraj and Sangli towns has the lowest sex ratio (920) and Shirala mahal which has entirely rural population has the highest sex ratio (1,038). Rural sex ratio is the least in Miraj taluka (928).

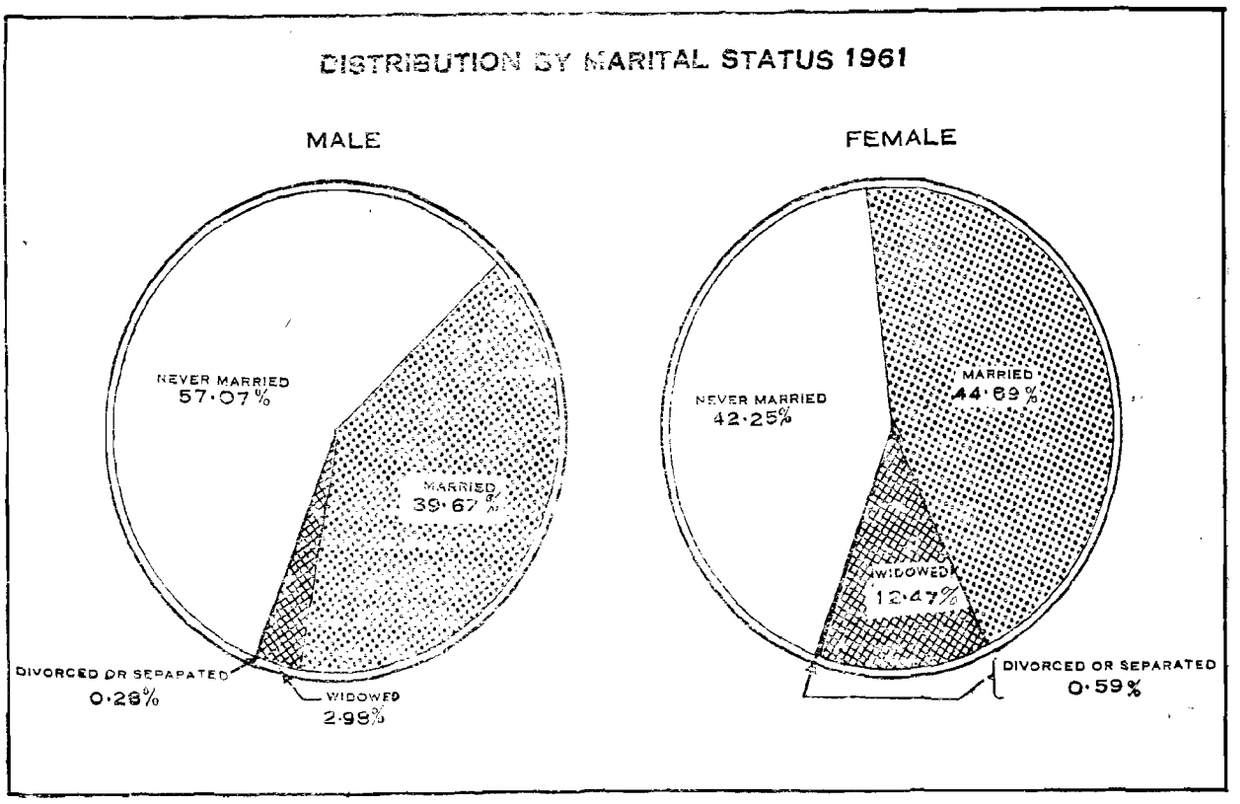

The rural-urban differentials within the talukas are wider than the differences from taluka to taluka. Jath taluka has exclusively rural population but has a low sex ratio of 939. Shirala and Khanapur have high sex ratios and appear to be mainly contributing to the flow of out-migration from the district.

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951 :—

Year	Age-group	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14	100	99·23	88·98	0·75	10·79	0·02	0·22	..	0·01
	15—34	100	42·72	4·75	56·12	89·61	1·07	5·48	0·09	0·16
	35—54	100	2·67	1·13	89·92	67·51	7·25	31·15	0·16	0·21
	55+	100	1·31	0·33	73·25	17·94	25·37	81·66	0·07	0·07
	All ages	100	54·31	38·33	41·61	46·78	4·01	14·79	0·07	0·10
1961	0—14	100	99·59	94·08	0·40	5·86	0·01	0·04	..	0·02
	15—34	100	45·07	6·73	53·87	88·42	0·65	3·61	0·41	1·24
	35—54	100	1·79	0·33	92·51	71·96	5·00	26·72	0·70	0·99
	55+	100	1·18	0·31	77·33	23·26	21·14	76·17	0·35	0·26
	All ages	100	57·07	42·25	39·67	44·68	2·98	12·45	0·28	0·59

Figure below shows the distribution of the district population by marital status for males and females separately :—

During the 1951—61 decade, the proportion of never married has increased for both sexes. The proportion of "widowed" showed a decrease both for males and females. The proportion of "divorced and separated" showed an increase. As can be expected, the proportions of married and widowed are higher in rural areas than in urban areas. The proportion of never married is higher in urban population. The proportion of unmarried is higher for males. Proportion of married is higher for females and that of widowed is still higher than that of males.

The rise in the age at marriage of the total population may be seen from the marital status distribution by age-groups shown above. The proportions of never married in age-group 0—14 and 15—34 have increased both for males and females.

Child-woman Ratio

The following table will show child-woman ratios for 1951 and 1961, i.e., the number of children 0—4 years per 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows for 1,000 women of 15—44 years age-group is also shown for comparison :—

	Number of Children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of Children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of Widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	681	790	115
1961 District Total ..	750	868	83
Rural ..	768	868	83
Urban ..	659	871	82

The child-woman ratio for rural areas is higher than that for urban areas. When standardised for married women of 15—44 years age-group, it is slightly higher in urban areas. This may indicate either a higher fertility or a higher survival rate in urban areas of the district. Over the decade, the ratio has increased from 681 to 750. It may be partly due both to a higher birth rate and a reduced infant mortality.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 115 in 1951 to 83 in 1961. There had been a significant decrease in the proportion of widows over a decade.

Migration

The 1961 Census showed the following proportions of population enumerated at place of birth and other places :—

Proportions of population by places of birth.

—	Total population	Place of enumeration	Elsewhere in the district	Outside the district but in Maharashtra	Outside Maharashtra
(1)	(2)	(3)	(4)	(5)	(6)
Persons..	1,230,716	764,375	300,606	112,320	52,401
Males	628,754	475,497	92,048	38,782	22,013
Females	601,962	288,878	208,558	73,538	30,388
Percentage to total population—					
Persons..	100·00	62·16	24·45	9·13	4·26
Males	100 00	75·68	14·65	6·17	3·50
Females	100·00	48·04	34·68	12·23	5·05

62·16 per cent of the population was enumerated at places of birth. This proportion for males is 75·68 per cent but for females it is only 48·04 per cent. The difference is due to women married at places other than their places of birth. Two-thirds of this movement of females on marriage appears to be within the district and one-third outside the district. As the district is on the State boundary the volume of inter-State migration of females is as much as 5·05 per cent.

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are shown in the next column.

Age-groups	Sex Ratios		
	Total	Rural	Urban
All Ages	957	966	912
0—4	953	954	945
5—9	960	964	938
10—14	883	884	877
15—19	872	888	801
20—24	1,095	1,128	960
25—29	1,061	1,067	1,031
30—34	1,050	1,080	916
35—39	999	1,020	893
40—44	980	1,005	855
45—49	883	894	815
50—54	885	885	883
55—59	816	810	859
60+	974	974	979

Rural sex ratio is almost always higher than urban sex ratio except in the age-groups 55—59 and 60 and over. These differences are more significant in adult age-groups among which the age-group 20—24 has the highest ratio. The rural sex ratio is very high in this age-group compared to the corresponding ratio for urban areas. Age-groups 25—29 and 30—34 also have very high sex ratios in rural areas. The sex ratios for age-groups 20—24 and 25—29 are very high for urban, rural and total population. This may be due to the movement of males in these age-groups outside the district in search of employment and/or for higher education. The balance in sex ratio is almost attained in the old age-group, partly it may be due to the return of the migrants to their usual places of residence after retirement from jobs and services. The low sex ratio for the age-group 55—59 may be partly the effect of mis-reporting of ages of women of that group in the higher age-group.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and non-workers is shown below. Explanation of the nine categories may be seen in the Explanatory Note to Part II, paragraphs 42 to 52 :—

	Categories of Workers									Non-Workers
	I	II	III	IV	V	VI	VII	VIII	IX	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	33·32	6·23	0·41	3·45	2·24	0·64	2·19	0·91	4·16	45·45
Born at place of enumeration	37·73	5·94	0·35	3·28	1·48	0·45	1·58	0·51	2·50	46·18
Elsewhere in the district	23·10	7·01	0·55	3·83	3·42	1·01	2·92	1·37	7·89	43·99
Outside the district	14·44	7·26	0·64	4·23	6·39	1·64	5·85	3·38	11·50	44·67

The percentage of workers in cultivation is higher for those born at the place of enumeration. The percentage of agricultural labourers is higher among the people born outside.

Migrants were engaged more in non-agricultural sectors. The differences in the percentage distribution of migrants and non-migrants are more significant in categories VII, VIII and IX. The percentage of non-workers is higher among the people migrating from within the district. It may indicate that a substantial part of such migration is for education.

Size of the Household

Table C-I-A in Part II shows the proportion of sample households classified by size. Percentage proportions of different types of households are shown in-the next column.

	Total	Rural	Urban
Single member	7·78	6·97	11·78
2—3 members	20·43	19·74	23·86
4—6 members	40·78	41·41	37·65
7—9 members	21·72	22·26	19·03
10 members and more	9·29	9·62	7·68
All sizes	100·00	100·00	100·00

Among the different size groups, households with 4 to 6 members are more common (40·78 per cent) than others. The percentage distribution of the rural and urban households by their size shows that single and small size households are more (36 per cent) in urban areas than in rural areas (27 per cent). The average size of the household is 5·47 persons for the district. It is 5·56 for rural areas and 5·01 for urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district, is shown below :—

	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	31·41	4·58	31·02	4·45	33·53	5·33
(2) Spouses of heads of households	0·11	27·57	0·08	27·28	0·27	29·17
(3) Married sons	7·48	..	7·83	..	5·64	..
(4) Other married relations	4·34	16·27	4·46	16·97	3·67	12·37
(5) Never married, widowed or divorced relations	55·21	51·31	55·26	51·05	54·92	52·76
(6) Unrelated persons	1·45	0·27	1·35	0·25	1·97	0·37
Total	100·00	100·00	100·00	100·00	100·00	100·00

31·41 per cent of the males are heads of households as against 4·58 per cent for females. Married sons are 7·48 per cent of the total males. 55·21 per cent males and 51·31 per cent females which, incidentally, form the largest group, are never married, widowed or divorced relations. Proportion of unrelated persons is 1·45 per cent for males and only 0·27 per cent for females. Nearly 28 per cent of the females were spouses of heads of households. High proportion of females in other married relations include the daughters-in-law and daughters or sisters of heads. The heads of households and their spouses have a higher proportion in urban areas. The proportion of married sons is less in urban areas. It may indicate that the joint family is being replaced by the biological family more in urban areas. Unrelated persons have a higher proportion in urban areas. Domestic servants are included in this category and they appear to be staying with the households more in urban areas than in rural areas.

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown below :—

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951	998	*167	*526
Actual 1961	1,231	218	623
Projected 1966 ..	1,428	256	715
Projected 1971 ..	1,633	296	808
Projected 1976 ..	1,860	340	910
Projected 1981 ..	2,107	388	1,025

* Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V at page 115 in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas is as follows :—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural areas	Urban areas
(1) Gujarati ..	0·48	0·24	1·76	42·80	57·20
(2) Hindi ..	0·39	0·25	1·17	53·20	46·80
(3) Kachchhi ..	0·05	..	0·32	4·23	95·77
(4) Kannada ..	8·81	9·15	6·98	87·62	12·38
(5) Marathi ..	83·24	85·24	72·44	86·39	13·61
(6) Sindhi ..	0·10	0·01	0·61	6·57	93·43
(7) Tamil ..	0·05	0·04	0·10	65·74	34·26
(8) Telugu ..	0·86	0·82	1·07	80·52	19·48
(9) Urdu ..	5·83	4·12	15·07	59·59	40·41
(10) Others ..	0·19	0·13	0·48	59·98	40·02
All Languages ..	100·00	100·00	100·00	84·36	15·64

Marathi is the principal language and is the mother-tongue of more than 83 per cent of the population. In rural areas Marathi speakers account for 85 per cent of the population. They make only 72·4 per cent of the population in urban areas. Kannada has the second largest number of speakers. It makes 8·8 per cent of the total population in the district. It is spoken more in rural areas where its speakers make as much as 9·15 per cent against nearly 7 per cent for urban areas. Urdu has the third largest number of speakers. It makes 5·8 per cent of the total population of the district. It is spoken more in urban areas where its speakers make as much as 15 per cent against 4·1 per cent for rural areas. The speakers of all other languages are similarly concentrated in urban areas. Telugu is an exception and its speakers are fairly distributed over rural and urban areas. They include Wadars—stone quarry workers, whose mother-tongue Wadari has been grouped in Table C-V with Telugu.

The comparative position of the languages in 1951 and 1961 is as follows :—

Language	Percentage to total population	
	1951	1961
(1) Gujarati	0·51	0·48
(2) Hindi	0·24	0·39
(3) Kachchhi	0·01	0·05
(4) Kannada	10·16	8·81
(5) Marathi	82·60	83·24
(6) Sindhi	0·01	0·10
(7) Tamil	0·10	0·05
(8) Telugu	0·90	0·86
(9) Urdu	5·38	5·83
(10) Others	0·09	0·19

The proportion of Marathi speakers increased from 82·60 in 1951 to 83·24 in 1961. The percentage of Kannada speakers decreased by 1·35 per cent in the decade 1951–61. Urdu has increased from 5·38 per cent in 1951 to 5·83 per cent in 1961 Compared with the proportions of religions, some Muslims who may have returned Kannada as mother-tongue in 1951 appear to have returned Urdu as their mother-tongue in 1961.

Languagewise data for the district is not available for earlier Censuses. Language changes cannot, therefore, be compared over a longer period.

RELIGIONS

Table C-VII at page 116 in Part II shows the population by religions for the district and each taluka and town separately. The distribution of main religions by rural and urban areas is as follows:—

Religion	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural areas	Urban areas
(1) Buddhists ..	4·57	5·05	2·00	93·17	6·83
(2) Christians ..	0·82	0·67	1·63	69·01	30·99
(3) Hindus ..	84·49	86·24	75·03	86·12	13·88
(4) Jains	3·93	3·64	5·50	78·11	21·89
(5) Muslims ..	6·17	4·39	15·78	60·03	39·97
(6) Others ..	0·02	0·01	0·06	31·28	68·72
All Religions ..	100·00	100·00	100·00	84·36	15·64

Nearly 84·5 per cent of the population reported their religion as Hindu. Buddhists account for 5·05 per cent in rural areas and 2 per cent in urban areas. Muslims are only 4·4 per cent in rural areas but make as much as 15·8 per cent in urban areas. Christians and followers of other religions are similarly more in urban areas. The Hindus and Buddhists are more numerous in rural areas than in urban areas. The Muslims are the most urbanised group and the Buddhists are the least urbanised.

The comparative position of religions in 1901 and 1961 is as follows :—

Religion	Percentage to total population	
	1901	1961
(1) Buddhists	..	4·57
(2) Christians	0·09	0·82
(3) Hindus	89·49	84·49
(4) Jains	4·38	3·93
(5) Muslims	6·04	6·17
(6) Others	..	0·02
All Religions	100·00	100·00

The proportion of Christians increased from 0·1 per cent to 0·8 per cent from 1901 to 1961. Muslims have almost the same percentage over the last sixty years. The percentage of Hindus has gone down by 5 per cent because some persons belonging to Hindu Scheduled Castes returned their religion as Buddhist or Nav-Bauddha. The combined proportion for Hindus and Buddhists has, however, remained the same over the last sixty years.

Sex ratio for each religion is as follows :—

Christians 1,128, Buddhists 1,021, Hindus 956, Jains 925, Muslims 931, All religions 957.

Higher sex ratio for Christians indicates that more of their males are going out of the district for work.

SCHEDULED CASTES

Table SCT-I-Part A at page 118 in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste for the district and each taluka separately. Actually, 24 castes are notified as Scheduled Castes in the district but only 13 are reported in the 1961 Census. The distribution of those 13 Scheduled Castes by rural and urban areas of the district is as follows:—

Name of Scheduled Caste	Population		Percentage to total population of the district			Percentage of each Scheduled Caste population in	
	Males	Females	Total	Rural	Urban	Rural areas	Urban areas
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
*All Scheduled Castes	52,062	50,018	8·29	7·26	1·03	87·57	12·43
(1) Bhangi	252	312	0·05	0·01	0·04	26·42	73·58
(2) Chalvadi	5	5				60·00	40·00
(3) Chambhar	13,304	13,082	2·14	1·94	0·20	90·68	9·32
(4) Chenna Dasar	18	10			..	100·00	..
(5) Dhor	990	958	0·16	0·11	0·05	70·64	29·36
(6) Garoda	15	16			..	100·00	..
(7) Halleer	..	4			..	100·00	..
(8) Halsar	3	4			..	100·00	..
(9) Holar	2,869	2,810	0·46	0·45	0·01	96·88	3·12
(10) Holaya	208	144	0·03	0·03	..	100·00	..
(11) Mahar	14,697	13,885	2·32	2·03	0·29	87·32	12·68
(12) Mang †	19,406	18,396	3·07	2·63	0·44	85·61	14·39
(13) Turi	2	3			..	100·00	..

* Inclusive of persons from the Scheduled Castes who have not reported their individual caste.

† Includes Mang Garudi also.

Note.—Blank indicates negligible entries.

J-1077—IV-B (Sangli).

The remaining ten Scheduled Castes for which no one was returned in the district in 1961 are as follows :—

(1) Ager.
(2) Baked.
(3) Lingader.
(4) Mahyavanshi.
(5) Meghval.
(6) Mukri.
(7) Nadia.
(8) Pasi.
(9) Shenva.
(10) Tirgar.

Out of the thirteen Scheduled Castes enumerated in the district, the largest number is of Mangs. The second largest group is of Mahars and the third of Chambhars. The remaining ten Scheduled Castes have together 8,628 population and make less than 1 per cent of the total population. Chalvadi, Halleer, Halsar and Turi castes have less than eleven persons in the district.

The comparative position of the Scheduled Castes population in 1951 and 1961 within the district is as follows :—

	Percentage to total population		
	Total	Rural	Urban
All Scheduled Castes –			
1951	12·18	9·70	2·48
1961	8·29	7·26	1·03

The reduction of the proportion from 12·18 to 8·29 is the result of a large number of persons from Mahar caste returning their religion in 1961 Census as Buddhist or Nav-Bauddha. Because of the change of religion they are not enumerated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. But for that change of religion, the total population of the Scheduled Castes would have made over 13 per cent of the district population in 1961.

Literacy

Tables SCT-III-Parts A (i) and B (i) at pages 122 and 124 in Part II show the literacy and educational levels for each Scheduled Caste. The percentages of literacy for the district population, for all Scheduled Castes and each Scheduled Caste, are as below.

The males among the Scheduled Castes are not much behind in literacy than the general population of the district. Their females are, however, comparatively behind. The Scheduled Castes appear to be taking advantage of the educational facilities and concessions available in the district.

Name of Scheduled Caste	Percentage of Literacy					
	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District average	24·81	38·51	10·63	45·66	59·59	30·38
All Scheduled Castes	16·08	26·98	4·81	27·24	41·50	11·72
(1) Bhangi	25·50	59·18	9·00	21·69	36·45	7·55
(2) Chalvadi	16·67	25·00	No literates	50·00	100·00	33·33
(3) Chambhar	18·13	29·69	6·44	30·91	46·71	13·80
(4) Chenna Dasar	No literates			No literates		
(5) Dhor	26·96	41·92	11·52	43·18	59·79	25·98
(6) Garoda	54·84	86·67	25·00	No literates		
(7) Halleer	No literates			No literates		
(8) Halsar	No literates			No literates		
(9) Holar	11·49	21·36	1·36	12·43	25·00	1·08
(10) Holaya	8·81	12·98	2·78	No literates		
(11) Mahar	19·31	31·38	6·63	33·78	49·14	16·61
(12) Mang	12·59	22·17	2·56	20·43	32·97	6·70
(13) Turi	20·00	50·00	No literates	No literates		

Economic Activity

The industrial classification of persons at work and non-workers for the district average for all Scheduled Castes and for each Scheduled Caste is as follows :—

	Percentage of Workers in categories			Non-workers
	Cultivation	Agricultural labour	All other activities	
District average ..	28·66	5·87	8·66	56·81
All Scheduled Castes.	15·10	14·68	14·39	55·83
(1) Bhangi ..	..	8·33	32·98	58·69
(2) Chalvadi ..	10·00	..	50·00	40·00
(3) Chambhar ..	24·24	8·87	8·29	58·60
(4) Chenna Dasar	..	..	..	100·00
(5) Dhor ..	19·15	6·72	11·55	62·58
(6) Garoda ..	..	25·81	9·68	64·51
(7) Halleer ..	..	..	..	100·00
(8) Halsar ..	..	..	..	100·00
(9) Holar ..	11·66	21·41	13·75	53·18
(10) Holaya ..	7·95	17·05	5·40	69·60
(11) Mahar ..	15·01	20·55	7·90	56·54
(12) Mang ..	9·24	13·96	23·83	52·97
(13) Turi ..	..	..	20·00	80·00

The proportions of workers and non-workers for the Scheduled Castes are more or less the same as for the total population of the district. The proportion of workers in cultivation is lower and that of agricultural labourers higher than the district average. This is due to the association of a few Scheduled Castes with certain services as well as to a fewer persons owning lands amongst them.

Size of Land Cultivated

Table SC-I and SCT-V-Part A at pages 110 and 124 in Part II show a broad classification of cultivating households by size of cultivated land for the district rural population and all Scheduled Castes in rural areas respectively. The proportions are as follows:—

Size of land cultivated	District Rural population		All Scheduled Castes	
	No. of sample households	Percentage	No. of sample households	Percentage
Cultivating households.	29,341	100·00	1,919	100·00
Less than 5 acres..	12,179	41·51	1,239	64·56
5—9·9 ..	7,522	25·64	347	18·08
10—29·9 ..	7,789	26·54	287	14·96
30 and over ..	1,851	6·31	46	2·40

Out of a sample of 29,341 cultivating households, 1,919 or 6·50 per cent households are from the Scheduled Castes against their population which is 8·61 per cent of the total rural population. 64·56 per cent of the cultivating households of the Scheduled Castes are cultivating less than 5 acres of land against the corresponding average of 41·51 per cent for the district. The percentage of households cultivating land over 5 acres among Scheduled Castes is 35·44 per cent only against the corresponding average of 58·49 per cent for the district. The proportion of cultivating households is thus smaller in the case of Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I-Part B at page 122 in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. Nine Scheduled Tribes are reported in the district in the 1961 Census. Their total population, however, is only 595 which is less than 0·05 per cent of the total population.

The distribution of the Scheduled Tribe population by rural and urban areas is as follows :—

Name of Scheduled Tribe	Population		Percentage to total population of the district			Percentage of each Scheduled Tribe population in	
	Males	Females	Total	Rural	Urban	Rural areas	Urban areas
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
*All Scheduled Tribes	337	258	0·05	0·05	..	97·14	2·86
(1) Barda	..	3	..	..	..	..	..
(2) Bhil	8	10	..	..	..	..	..
(3) Gond	3	3	..	..	..	..	..
(4) Kathodi	15	15	..	..	..	100·00	..
(5) Kokna	15	33	0·01	0·01	..	100·00	..
(6) Koli Dhor	128	93	0·02	0·02	..	100·00	..
(7) Naikda	7	11	..	..	..	..	..
(8) Pardhi	90	71	0·01	0·01	..	91·30	8·70
(9) Rathawa	25	..	..	..	..	100·00	..

*Inclusive of persons from the Scheduled Tribes who have not reported their individual tribe.

The remaining ten Scheduled Tribes for which no one was returned in the district in 1961 are as follows :—

(1) Bavacha.
(2) Chodhara.
(3) Dhanka.
(4) Dhodia.
(5) Dubla.
(6) Gamit.
(7) Patelia.
(8) Pomla.
(9) Varli.
(10) Vitolia.

Koli Dhor with 221 persons is the largest Scheduled Tribe in the district. Pardhi with 161 is the next group. The other tribes have less than 50 persons each.

Koli Dhors are reported from the talukas of Miraj, Jath and Khanapur. Pardhis are mostly from Jath. The other tribes have very few persons in the district.

The Scheduled Tribes population in the district has slightly gone down from 611 in 1951 to 595 in 1961.

Literacy and Education

The Scheduled Tribes are very much behind in literacy and education. Rathawa and Gond appear to be the most depressed groups in this respect, as there are no literates among them in the district. Male literacy for Pardhis is as low as 2·63 in rural areas while there are no literates among them in urban areas. Female literacy is also negligible.

Economic Activity

More than four-fifths of the workers from Scheduled Tribes work as cultivators and agricultural labourers.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of the Standing Committee which is the most powerful Committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the Subjects Committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of the Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district.

(*i*) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, Nomadic and Semi-Nomadic Tribes, Vimukta Jatis and the Backward Classes. The concession is awarded through Primary schools, High schools or Technical schools. 4,508 students benefitted from and Rs. 1,31,455 were spent on these schemes during the year 1961-62. It has also been decided to award scholarships to the students in primary, secondary and technical schools getting 50 per cent and above marks. There are 34 backward class hostels and one cosmopolitan hostel in the district. 1,168 students were admitted in these hostels and Rs. 2,18,346 were spent on them in the year 1961-62. It is proposed to open 5 more backward class hostels and 6 cosmopolitan hostels.

(*ii*) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for Cottage Industries and Professions and assistance for purchase of milch cattle to Scheduled Castes and other backward classes.

(*iii*) *Housing.*—This covers the scheme of providing assistance in cash or kind for repairs to houses of Scheduled Castes and other backward classes. Under this scheme Rs. 750 each were given to 20 beneficiaries and Rs. 14,965 were spent over this scheme during 1961-62 as per centrally sponsored programme. Two new housing colonies have also been constructed for Scheduled Castes—one at Tung (Miraj taluka) and another at Ghogaon (Tasgaon taluka). Rs. 18,800 were spent during 1961-62 on 25 beneficiaries in these colonies.

(*iv*) *Drinking Water Wells.*—An amount of Rs. 14,000 was spent under this scheme. Rs. 5,000 were spent for the repairs of wells in or near Scheduled Castes localities for 8 beneficiaries while Rs. 9,000 were spent for drinking water wells for Scheduled Castes for 9 beneficiaries.

(*v*) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to Scheduled Castes and Rs. 300 were spent during the year 1961-62 on 11 beneficiaries.

(*vi*) *Schemes of Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, films shown and gatherings are addressed at fairs and other places. Kirtan

programmes and Melavas are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are awarded to villages which show outstanding work for removal of untouchability.

Economic Criterion of Backwardness

Castewise basis of classification of "Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes".

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Castes converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for the removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

There has been a substantial progress in the field of education in the district during the last ten years. The progress is notable especially in the sphere of female education and secondary education.

Growth of Literacy

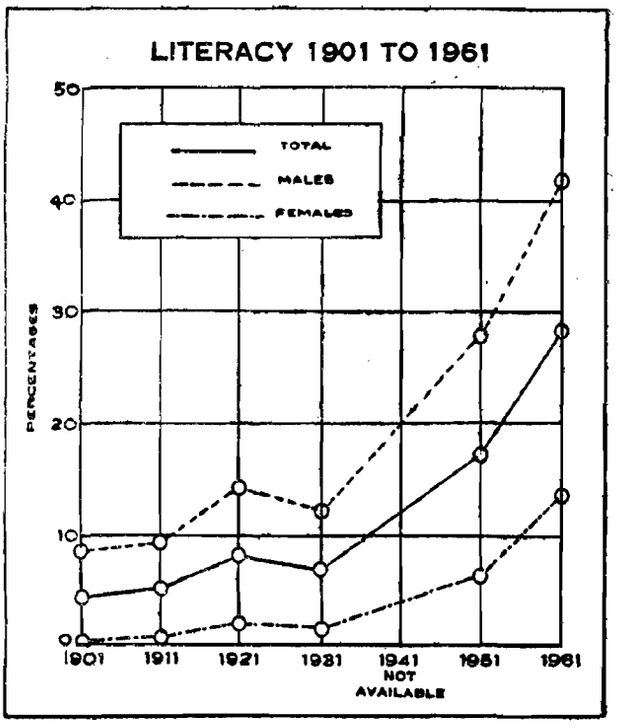

Percentage of literacy in the district for total, males and females since 1901 is as follows :—

Year	Total	Males	Females
1901	4.36	8·40	0·22
1911	5.02	9·38	0·50
1921	6.05	10·83	1·07
1931	6.88	12·04	1·47
1941	Not available.		
1951	17.20	27·80	6·30
1961	28.07	41·88	13·64

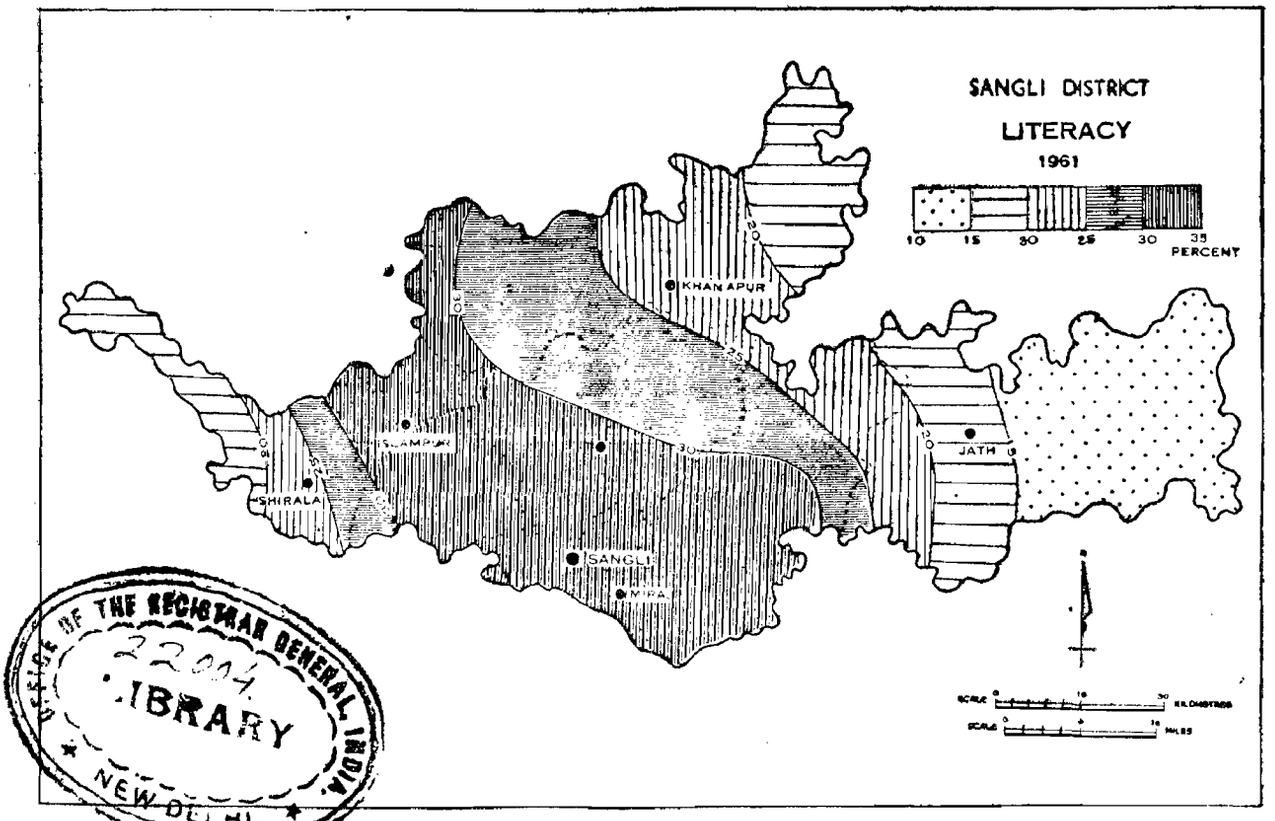

Figure in the next column shows this growth of literacy in the district for total population, males and females, separately.

The literacy percentage has increased nearly seven times during the last sixty years. The improvement has been very substantial in the decade 1951—61. Female literacy has more than doubled during the last decade. This rapid improvement in female literacy may be due to the general awakening in the country after 1931 and particularly to the scheme of compulsory primary education introduced by the State Government in 1947.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately. The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately :—

State/District/Taluka (1)	Total Persons (2)	Total Males (3)	Total Females (4)	Rural Persons (5)	Rural Males (6)	Rural Females (7)	Urban Persons (8)	Urban Males (9)	Urban Females (10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
SANGLI DISTRICT	28·07	41·88	13·64	24·81	38·51	10·63	45·66	59·59	30·38
1 Khanapur Taluka	24·24	38·37	10·23	23·11	37·06	9·39	41·84	57·62	24·27
2 Shirala Mahal..	20·07	34·27	6·39	20·07	34·27	6·39	..	..	..
3 Walwa Taluka	32·36	47·75	16·15	29·84	45·32	13·60	44·40	59·27	28·47
4 Tasgaon Taluka	30·02	45·19	14·17	29·04	44·21	13·27	40·86	55·95	24·47
5 Jath Taluka	14·10	22·18	5·50	14·10	22·18	5·50	..	..	..
6 Miraj Taluka	34·09	47·97	19·02	27·40	41·49	12·22	47·03	60·35	32·34

OFFICE OF THE REGISTRAR GENERAL INDIA
LIBRARY
NEW DELHI.

Figure above shows the spread of literacy in the district by isoplyths. The central portion of the district has highest literacy rates. Literacy rates are lower both towards west and the east. Eastern-most portion of Jath taluka has the lowest rate of literacy in the district.

Within the district, Miraj taluka has the highest literacy for total, male and female population. But Walwa taluka has the highest literacy for rural areas, both for males and females. For urban areas also Miraj taluka is the highest for total, male and female literacy. The lead of Miraj taluka is obviously due to the two great urban centres of Sangli and Miraj.

Literacy by Age

The percentages of literates by age groups for the district total, rural and urban areas are as shown in the statement below. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

Average literacy rates both for males and females are so high in the district because of very high proportion for the age-group 15—34 and high proportions even in 35—59 years age-group. The progress of literacy and education in the district is the result of consistent efforts for spreading education during the last forty years including the campaigns for adult education.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	28·07	41·88	13·64	24·81	38·51	10·63	45·65	59·39	30·38
0—4	..	..	..	..	..	..	..	..	..
5—14	35·90	47·42	23·45	33·01	45·34	19·74	52·16	59·04	44·60
15—34	39·93	61·74	18·35	35·41	57·42	14·07	61·19	80·92	39·74
35—59	25·22	42·21	6·86	21·43	37·58	4·22	46·30	67·06	22·23
60 and above	13·69	24·68	2·40	10·93	20·46	1·15	31·50	52·03	10·43

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as follows :—

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV multi-teacher	Middle I-VII
Total No. of schools.	1,102	106	23	26	351	147	449
Zilla Parishad..	1,017	105	23	26	297	127	439
Private ..	85	1	..	..	54	20	10

There has been a steady growth in the number of primary schools in the district during the last ten years. The number of primary schools rose from 791 in 1950-51 to 870 in 1955-56 and to 1,046 in 1960-61. On 31st March 1962 it stood at 1,102. Out of the 1,102 primary schools, 1,017 or 92·3 per cent are managed by the Zilla Parishad and only 7·7 per cent are managed by private institutions. Although Zilla Parishad is managing 92 per cent of the schools State Government's share in the expenditure incurred (in the year 1961-62) was 90 9 per cent. The expenditure on primary education is incurred by the State Government through grants-in-aid to Zilla Parishads and building loans and grants to Primary Teachers' Training Colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes and Scheduled Tribes get free education at the cost of the Government. Scholarships are given to students from Scheduled Castes and Scheduled Tribes at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools has also made steady progress in the district. At the end of the First Five-Year Plan, there were 60 basic schools. This number rose to 150 by the end of the Second Plan. On the 31st March 1962, it stood at 155.

By 31st March 1962, 6 towns and 515 villages in the district had primary schools and 11 villages had schooling facilities, i.e., primary schools situated within a mile from the village. There is not a single village in the district without schooling facilities. Total number of primary school teachers was 4,344. 3,740 out of them were trained teachers.

Other indices of the progress of Primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Sangli District	Maharashtra
Average population served by a primary school..	1,131	1,135
Average area served by a primary school (sq. miles)	3·1	3·4
Pupils per teacher	44	38
Pupils per school	174	127
Average annual salary per teacher (Rs.)	1,273	1,250
Average annual expenditure per school (Rs.)	5,267	4,903
Average number of teachers per school ..	3·9	3·3
Percentage of trained teachers	86·1	64·8

The scheme of Compulsory Primary Education was introduced in 1947. Initially it was applied to villages having population of 1,000 or more. In 1951, it was applied to children in the age-group 7—11. Compulsory primary education scheme was extended to all places with a population of 1,000 and over according to 1951 Census, including merged state areas from 1st August 1954. On 1st September 1956, the scheme was applied to children in the age-group 7—8 in the villages having a population between 500 to 1,000. Later it was applied for the same age-group, i.e., 7—8 to villages having a population less than 500. As a result the indices of the progress of primary education shown above compare favourably with those of the State in many respects.

One of the Third Plan schemes is to extend the scheme of compulsory primary education to all children in the age-group 6—11 years. A provision of Rs. 13·13 lakhs has been made for educational schemes in the field of primary education in the district. During the plan period, additional 130 teachers would be appointed in primary schools. The number of students is expected to rise by 6,500. Similarly, 205 class rooms are proposed to be built during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools	
			Multipurpose	Ordinary
State		..	..	..
Municipal		..	..	..
Private	127	..	9	118

Total number of students on roll in the secondary schools as on 31st March 1962 was 23,351. Out of them 18,974 were boys and 4,377 girls. Total number of teachers was 1,015. Out of them 674 were trained teachers. Percentage of trained teachers was thus 66·4. Other indices of secondary education compared to the State averages are as follows :—

	Sangli District	Maharashtra
Population served by each high school ..	9,811	13,805
Area served by each school (sq. miles)	27·0	40·8
Pupil-teacher ratio	23	25
Pupils per secondary school	184	338
Average annual salary per teacher .. (Rs.)	1,570	1,870
Average annual expenditure (direct) per secondary school .. (Rs.)	21,103	39,543
Average number of teachers per secondary school	8·0	13·7

Figure on page (28) shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

The progress of secondary education in Sangli district is quite noteworthy. The number of secondary schools increased from 29 in 1950-51 to 51 in 1955-56 and to 95 in 1960-61. This figure stood at 127 on 31st March 1962. The secondary schools are dispersed throughout the district. Jath taluka has two which is the smallest number in the district. Miraj taluka has as many as 33 secondary schools.

Private institutions alone manage all the secondary schools in the district. The Government share in the total expenditure on secondary education is, however, 68·7 per cent (in 1961-62) and is incurred through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes or other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 25,000 by 1965-66 and to 35,000 by 1970-71.

S. S. C. Examinations

Secondary School Certificate Examination Board, Poona, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October and Uran-Islampur, Miraj, Sangli, Ashta and Vite are the examination centres in the district. The numbers of candidates who appeared and passed from these centres during the year 1962 are as follows :—

	Appeared	Passed
Examination held in—		
March 1962	3,809	1,764
October 1962	1,386	603
Total ..		2,367

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. The number of colleges increased from two in 1951 to five in 1961. In 1962-63 there were nine colleges in the district. In 1961 an Arts College has been started at Uran-Islampur. The colleges now provide education in Arts, Science, Commerce, Engineering, Medicine and Ayurved. A Medical College has also been started at Miraj. The number of college students rose from 1,038 in 1950-51 to 2,346 in 1960-61. Eight out of the nine colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings, from Government. Medical College at Miraj is managed by Government.

Technical Education

Walchand College of Engineering at Sangli was established in 1947 and imparts instruction in Degree and Diploma courses.

Libraries

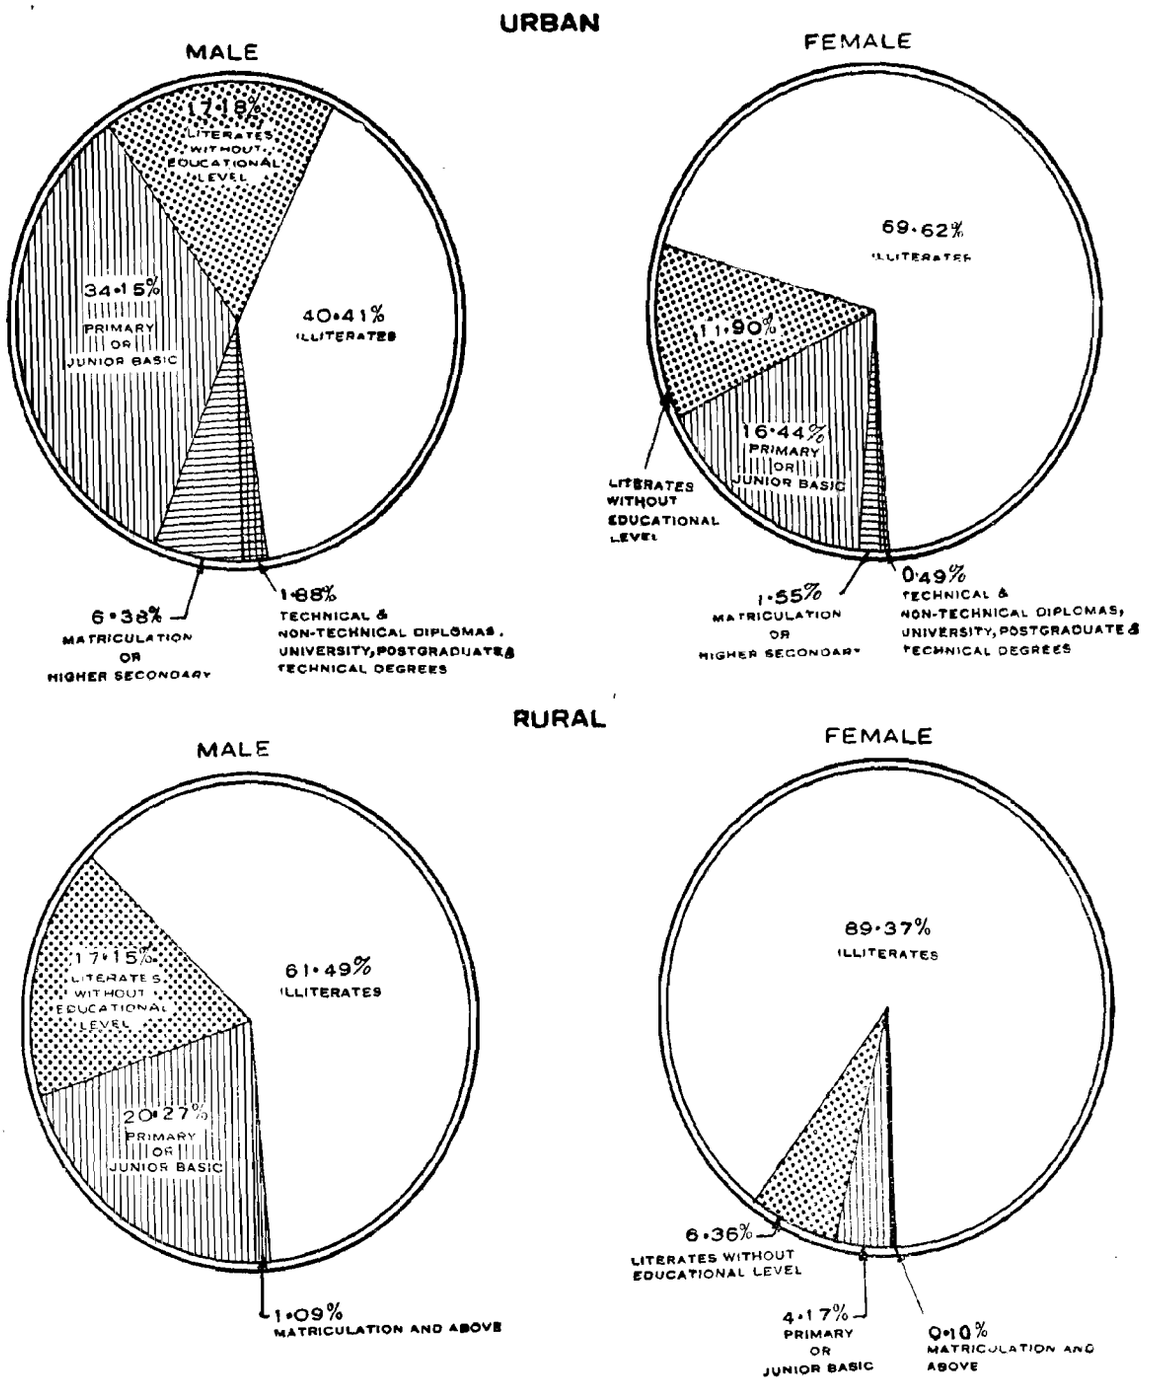

There are on 31st March 1962, 24 libraries in the district which are recognised by the Government among which one is a district library, 6 are taluka and peta libraries and 17 are town libraries.

The District Library gets an annual Government grant of Rs. 6,000. All the taluka libraries together got grants of Rs. 5,279 and the town libraries together got grants of Rs. 9,184 in 1961-62.

Printing Presses, Journals and Newspapers

There were 57 Printing Presses and 35 journals and newspapers in the district. Among the newspapers and journals, one is a daily, 14 weeklies, 7 monthlies and 13 other journals.

LITERACY AND EDUCATIONAL LEVEL
1961

Radio Licences

The number of radio licences in the district has increased during recent years. It rose from 2,967 in 1958-59 to 3,077 in 1959-60 and to 5,055 in 1960-61.

Cinema Theatres

There are 17 permanent cinema theatres and eight touring theatres in the district.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health activities in the district.

Drinking Water-Supply

Three towns, viz., Miraj, Islampur and Sangli, and one village from Miraj taluka have piped water-supply. Out of remaining 525 villages, 41 draw drinking water from rivers, 24 from nalas and springs and 214 from wells. Villages which draw water from more than one of these sources are 246. The water-supply is not adequate in summer in 95 villages.

Malaria Eradication

The scheme for eradication of malaria has been in operation since April 1959. For the purpose of D.D.T. spraying the district has been divided into four sub-divisions. Since 1st November 1960, 88 malaria surveillance workers have been appointed to carry out surveys and to treat malaria patients. Also 22 Inspectors supervise over the work of these workers. D.D.T. spraying is done once a year in all talukas except Jath taluka where it is done twice a year.

Leprosy Control

There are six centres at Khanapur, Kasegaon, Arale, Palus, Kavathe-Piran and Shirala for treating leprosy patients. During the Second Five-Year Plan, one sub-centre has been started at Peth with arrangements for temporary hospitalization of patients.

Anti-T.B.

There is a T.B. Sanatorium at Wanleswadi (Sangli-Miraj). Twenty-five beds in this hospital are now reserved for poor patients and for Government servants suffering from T.B.

Family Planning Centres

Six Family Planning Centres have been opened at Atpadi, Arag, Kavathe-Piran, Palus, Vite and Kadegaon.

Medical Facilities

Medical facilities available in the district are shown in Table 17 of Part III. The figures in the table relate to the facilities provided by Government and other aided institutions. The numbers of private hospitals, dispensaries and practitioners are not shown there.

The number of doctors and nurses, number of beds available and number of indoor and outdoor patients treated have all increased between 1950—60. The number of doctors and nurses increased from 76 and 52 in 1950 to 98 and 192 in 1960, respectively. The number of hospital beds increased from 584 in 1950 to 1,163 in 1960. The number of indoor patients and outdoor patients increased from 363 and 45,880 in 1950 to 4,068 and 137,336 in 1960, respectively.

Hospitals.—There are four hospitals in the district. One of them is situated at Sangli, the headquarters of the district. It is called General Hospital, Sangli. It has 38 beds, an X-Ray plant and a clinical laboratory. A maternity home with 14 beds is attached to it. An ambulance car is provided to bring patients from rural areas. The present building of the hospital is too small and a new building is being constructed with accommodation for 100 patients. The Mission Hospital at Miraj has an accommodation of 353 beds. The T.B. Sanatorium at Wanleswadi and Richardson Leprosy Hospital at Miraj accommodate 355 patients.

Dispensaries.—In 1960, there were 33 Government or Government-aided dispensaries in the district of which 4 were run by Government, 26 by the District Local Board (now Zilla Parishad) and 3 by Municipalities.

Primary Health Centres.—At the end of 1960, there were 7 primary health centres with 21 sub-centres functioning in the district.

There were 12 subsidised medical practitioners working in rural areas of the district in 1960.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other medical and health technicians in the district is 1,352.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classifications by sex are shown in Table B-V in Part-II. The number of medical personnel per one lakh population in the district is 38 as against 55 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

About 66 per cent of all the houses are used as dwellings, 15 per cent as cattle sheds, etc., 9 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per sq. mile in the district has increased along with the density of population per sq. mile from 46·2 in 1951 to 67·2 in 1961. The number of persons per residential house has, however, decreased from 6·3 in 1951 to 5·5 in 1961. This may indicate an increased mobility of population from rural to urban areas as well as a tendency towards smaller families in urban areas.

Classified by "owned" and "rented" categories, 83 per cent of the dwellings in the district are owned and only 17 per cent are rented. The proportion of "owned" in the rural areas is slightly higher (90 per cent) and very much lower (49 per cent) in the urban areas. Even this low proportion of 49 per cent for the urban areas in the district is somewhat higher than the average of 30 per cent for all urban areas of Maharashtra.

Out of the various materials used for walls, stone appears to be predominant in the district with a proportion of 65 7 per cent. Its proportions in the talukas of Walwa, Tasgaon and Miraj are a little lower and the difference is made up by burnt or unburnt bricks. Stone is not used as much in urban areas as in rural areas. Its proportion is only 42 per cent in the urban areas against 71 per cent in the rural areas. Burnt bricks appear to be predominant in urban areas with a proportion of 25 per cent. Unburnt bricks are used in 9 per cent dwellings in rural areas and 16 per cent dwellings in urban areas.

Out of the materials of roof, tiles are predominant in the district with a proportion of 51·6 per cent. Tiled roofs are, however, more common in urban areas. Their proportion in the urban areas is 71·5 per cent against 47·6 per cent in rural areas. In the rural areas along with the tiled roofs, roofs of grass, leaves, reeds, etc., are also common and have a proportion of 33·7 per cent. In rural areas, the tiled roofs have higher proportions in Shirala Mahal, Walwa, Tasgaon and Miraj talukas. Towards the east they are gradually replaced by flat earthen roofs on wooden beams or ratters. The distribution corresponds more or less to the pattern of annual rainfall in the district.

Corrugated Iron and Zinc sheets appear to be more in use in urban areas with 17·2 per cent. They are less common in rural areas and make only 11·1 per cent.

Classified by the number of rooms occupied, 64 per cent of households are occupying one-room dwellings and 22 per cent are occupying two-room dwellings. Households occupying larger number of rooms are more in urban areas than in rural areas. Average number of persons per room is 3·61 for total, 3·83 for rural and 2·77 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the most important economic activity in the district. Nearly 80 per cent of the working population is engaged in agriculture.

Tables 3 to 10 in Part III present statistics for land utilisation, crop pattern, irrigation, wholesale and harvest prices, livestock and agricultural implements for the district and each taluka separately.

Cultivating Seasons

As in the other areas of the State, there are two agricultural seasons, viz., kharif and rabi. The important crops of the kharif season are jowar, bajri, rice, cotton and tobacco. Rabi jowar, wheat and gram are the important crops of rabi season. Jowar is grown in both the seasons. Kharif jowar however dominates in the district. Its area in the year 1959-60 was 60 per cent of the total area under jowar.

The calendar of seasonal agricultural operations in respect of principal crops is shown on page (31).

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown on page (32) compared with that of the State. All the figures are based on average for three years from 1957-58 to 1959-60.

Calendar of Seasonal Agricultural Operations

Serial No	Name of the crop	March	April	May	June
(1)	(2)	(3)	(4)	(5)	(6)
1	Kharif Jowar ..	Preparation of land.	Preparation continued.	Preparation of land continued. Application of Farm Yard Manure	Sowing.

Pattern of Land Utilisation

Administrative Unit	Percentage of geographical area										
	Total geographical area	Forests	Barren and uncultivable	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	Gross cropped area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
MAHARASHTRA	100	17·54	6·08	2·29	2·80	4·75	0·62	3·77	4·46	57·69	60·55
SANGLI DISTRICT	100	5·41	4·60	0·27	0·81	2·87	..	0·86	10·11	75·07	77·33
Khanapur Taluka	100	5·57	6·42	..	0·63	1·64	..	1·25	16·49	68·00	71·55
Shirala Mahal	100	20·78	4·52	..	1·85	2·36	..	..	0·25	70·24	75·59
Walwa Taluka	100	3·80	9·31	0·15	..	0·31	..	..	3·60	82·83	84·52
Tasgaon Taluka	100	4·66	3·93	1·42	2·04	2·26	..	2·69	1·27	81·73	83·95
Jath Taluka	100	5·08	3·08	0·09	0·21	2·63	..	0·56	15·33	73·02	73·97
Miraj Taluka	100	0·92	2·48	0·22	1·04	6·72	..	0·27	7·34	81·01	82·42

Figure at page (33) shows the land utilisation pattern for the district and each taluka separately for the year 1959-60.

The net area sown in the district is about 75 per cent of the total geographical area which is much higher than the corresponding figure 57·69 per cent for the State. This is, however, consistent with the topography and the very high density of population in the district.

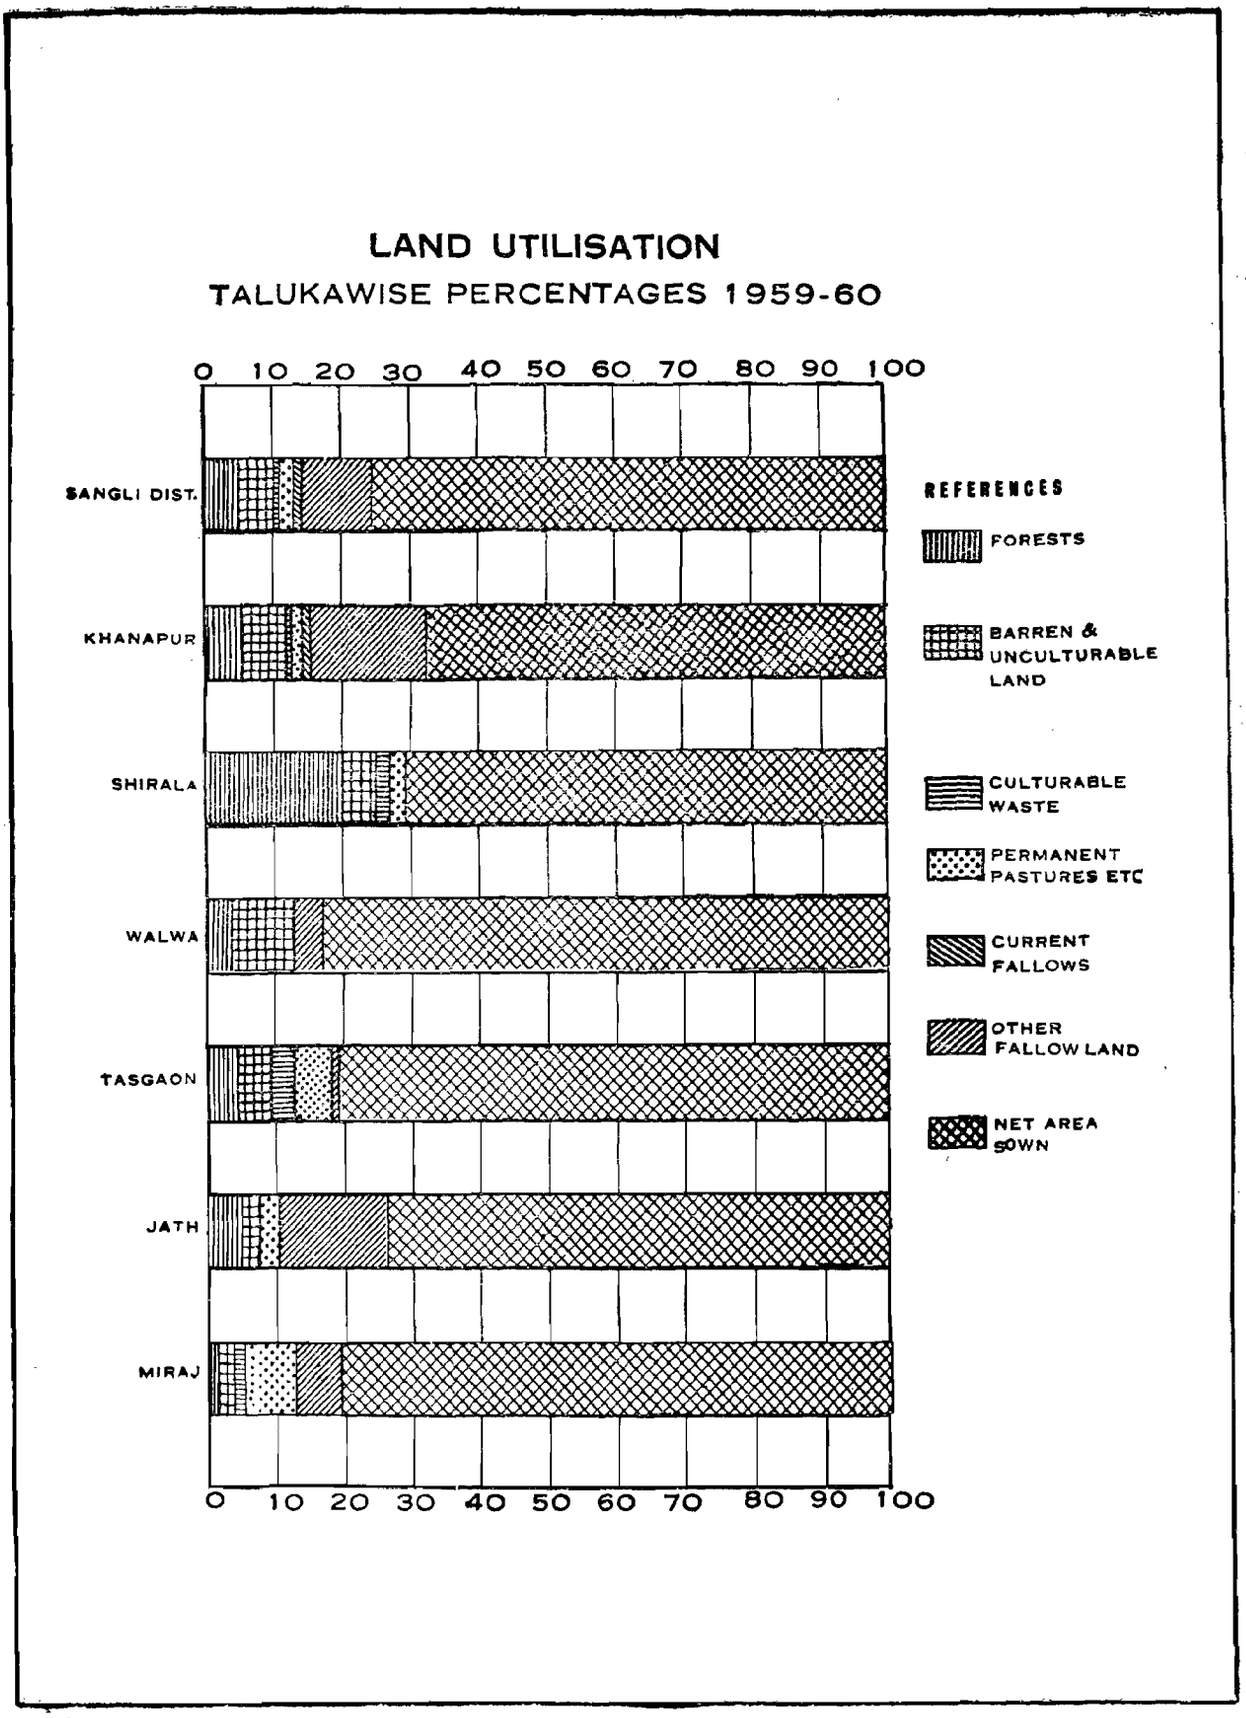

The proportion of net area sown to the geographical area does not vary much within the district. It is lowest (68 per cent) in Khanapur taluka and highest (82·83 per cent) in Walwa taluka. In Walwa taluka the percentage of barren land is also nearly 10 per cent. But there are no culturable wastes or current fallows and the taluka, therefore, has the highest proportion under net area sown. This high rate of land utilisation combined with the most fertile soils sustains a very high density of population in this taluka. The western mahal of Shirala has more than 20 per cent of its area under forest. The percentage area under permanent pastures is considerably high (6·72 per cent) in Miraj taluka.

Because of the changes in the administrative boundaries of the district as well as a change in the classification of land utilisation effected in 1950-51, it is not possible to determine if there has been any change in the pattern of land utilisation during the last 40--50 years or not.

Crop Pattern

The proportions of gross cropped area under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All figures are averages for three years from 1957-58 to 1959-60 :—

Details of cropped area	Percentage of gross cropped area in							
	Maharashtra	Sangli District	Khanapur Taluka	Shirala Mahal	Walwa Taluka	Tasgaon Taluka	Jath Taluka	Miraj Taluka
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Gross cropped area	100	100	100	100	100	100	100	100
Total area under food crops	69·88	78·37	92·36	42·16	69·04	74·33	84·00	75·37
Area under cereals	52·97	63·87	72·53	36·00	51·40	56·64	74·78	61·35
Rice	6·67	1·88	1·03	16·27	1·64	0·35	0·78	0·30
Wheat	4·68	2·08	2·75	0·76	3·10	2·04	1·75	1·62
Jowar	30·95	38·34	32·74	12·56	44·40	47·35	44·34	37·45

The figure facing this page shows the crop pattern for the district and each taluka separately.

Jowar obviously is the predominant crop of the district occupying 38·3 per cent of the gross cropped area. The next in importance is bajri occupying 20·5 per cent. Wheat and rice have very small proportions as compared to those for the State. The proportion of all food crops (78·37 per cent) in the district is higher than the average (69·88 per cent) for Maharashtra.

Groundnut is the most important non-food crop in the district occupying nearly 12 per cent of the gross cropped area. Amongst oil-seeds it has more than 90 per cent of the area and has more than half the area under non-food crops. Compared to the State average, the district has a smaller proportion of area under cotton (0·97 per cent).

The area under oil-seeds has slightly increased from 10·6 per cent in 1950-51 to 12·5 per cent in 1959-60. As comparable statistics are not available for the district for years prior to 1950-51, it is not possible to determine if there has been any significant change or not in the cropping pattern during the last 40—50 years.

Among the other food crops, chillies and turmeric are important. The area under turmeric makes a small proportion of the gross cropped area yet the district has 44 per cent of the total Maharashtra acreage under that crop. Sangli is an important trade centre for turmeric and also has a forward market for that commodity.

The crop pattern in the district is generally poorer than the average for the State. The State's crop pattern is itself poorer in the all-India setting because of the higher proportions of jowar, bajri and other low value crops. The district proportions of rice, wheat and cotton are lower and proportions of jowar and bajri are higher than the State average. Moreover the average yields for most of the crops (except wheat and jowar) are lower than the State averages.

Within the district the cropping pattern varies considerably according to rainfall and soil types. Shirala mahal in the west has a heavy rainfall and has a high proportion (16 per cent) of gross cropped area under rice. It does not grow bajri at all. The proportion of area under jowar is highest (47·3 per cent) in Tasgaon taluka and very high in Walwa and Jath talukas. Proportion of bajri is highest (34·75 per cent) in Khanapur taluka and very high (27·7 per cent) in Jath taluka.

The proportion of non-food crops is highest in Shirala mahal (57·84 per cent) and lowest in Khanapur taluka (7·64 per cent). However, more than 90 per cent of the area under non-food crops in Shirala mahal is under fodder or miscellaneous non-food crops. Walwa, Tasgaon and Miraj talukas have substantial areas under groundnut.

Nine-year average yields and 1958-59 acreages and outturns of important crops for Sangli district are shown below taking corresponding figures for Maharashtra as 100 :—

	Nine-year average yields per acre	1958-59 area	1958-59 outturn
MAHARASHTRA ..	100·00	100·00	100·00
Rice	82·45	0·90	0·77
Wheat	113·03	1·56	1·79
Jowar	132·10	5·92	5·71
Bajri	71·30	7·65	5·43
Groundnut	95·76	6·96	6·55

The district yields are higher than the State averages for wheat and jowar. The yields of rice and bajri are very much lower than the State average. The outturns of jowar, bajri and groundnut make more than 5 per cent of the total outturns in Maharashtra. The proportion of the outturn of rice and wheat in the district to the State outturn is negligible.

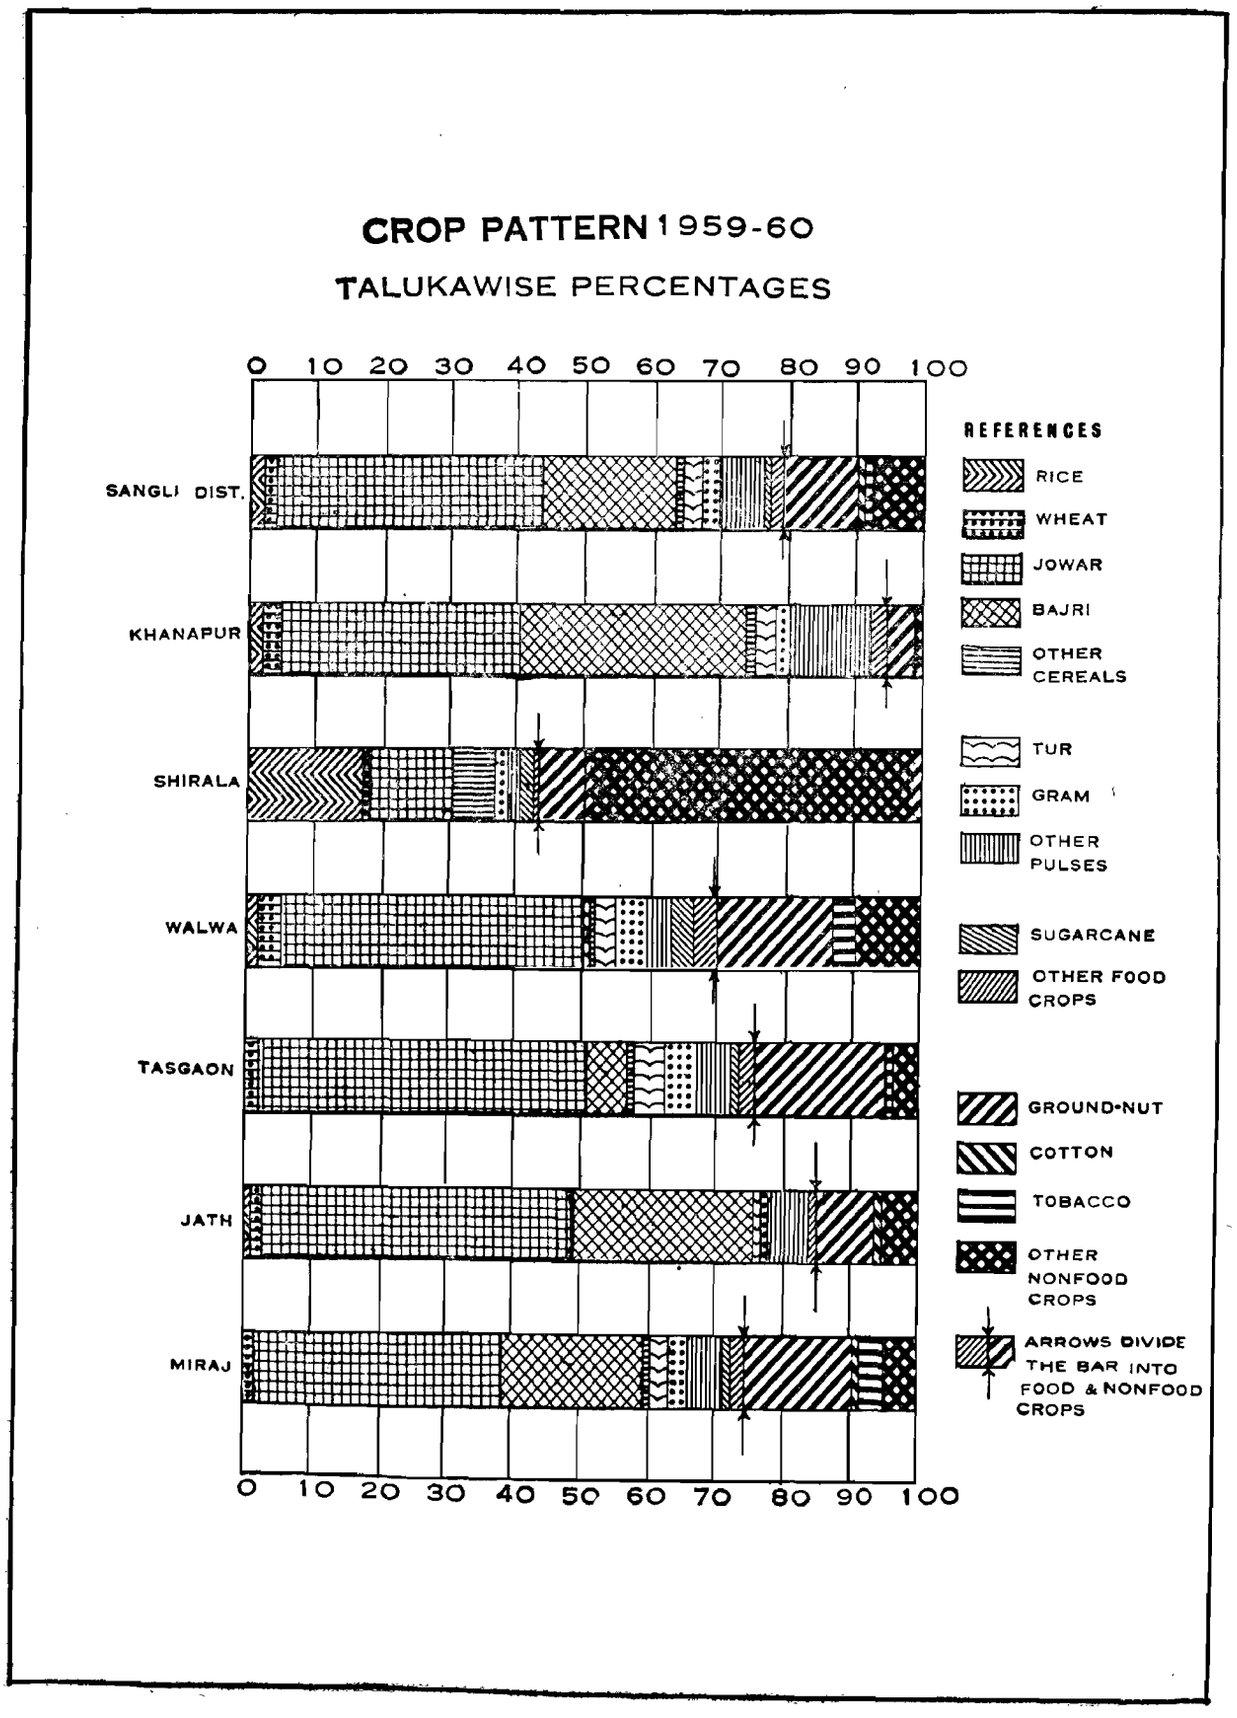

The Techno-Economic Survey of Maharashtra has estimated gross value of output per acre of cropped area in 1955-56 at Rs. 79 for the district against Rs. 76 for the State and Rs. 126 for India.

The density of population, the proportion of workers on land to total workers, gross area sown per worker on land and the proportion of irrigated area to gross cropped area are shown below for the district and each of its talukas compared with the State averages :—

	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown in acres per worker on land	Percentage of irrigated area to gross cropped area
MAHARASHTRA ..	334	69·91	3·50	6·23
SANGLI DISTRICT	371	79·95	3·88	5·51
Khanapur Taluka ..	265	85·41	4·33	4·91
Shirala Mahal ..	365	89·42	3·19	4·05
Walwa Taluka ..	677	83·30	2·42	7·85
Tasgaon Taluka ..	468	84·16	3·05	5·16
Jath Taluka	159	87·00	7·06	5·43
Miraj Taluka	598	65·63	3·48	5·93

79·95 per cent of total working population works on land. 66·37 per cent are cultivators and 13·58 per cent are agricultural labourers. The gross cropped area per worker on land in the district is 3·88 acres as against 3·50 acres for Maharashtra.

Within the district the percentage of workers working on land to total workers is almost even for all talukas except Miraj taluka (65·63) which has a lower percentage because of a large urban population of the Sangli-Miraj town-group. The area sown per worker on land, however, varies considerably. Walwa taluka has the smallest acreage (2·42) per worker and Jath the highest (7·06). The figure is higher also for Khanapur taluka.

J-1077-VI-A (Sangli)

The proportion of net area sown under double crops (3·55 per cent) is lower than the State average (5·05 per cent). The proportions are significant in Khanapur taluka (5·16 per cent) and Shirala mahal (9·25 per cent). In other talukas they are negligible.

Irrigation

The proportion of gross irrigated area to gross cropped area in the district is almost equal to the State average. It is higher in almost all talukas except Shirala mahal and Tasgaon taluka. Shirala mahal is a hilly tract and as such the proportion is considerably low (4·15 per cent). Table 4 in Part III gives the break-up of irrigated areas by sources of irrigation for the district and each taluka separately. Wells are the chief source of irrigation and 87·2 per cent of the total irrigated area in the district is under them. Nine per cent is under canal and 3·8 per cent is under other sources. Khanapur, Walwa and Tasgaon talukas have some areas under Government canals. In Shirala mahal the irrigation is mainly under private channels through which rain water is taken for cultivation of rice.

The irrigated area has increased from 78 thousand acres in 1950-51 to 91 thousand acres in 1959-60. The area under irrigation by canals increased from 6 thousand acres in 1950-51 to 8 thousand acres in 1959-60. This increase is mainly in Tasgaon and Walwa talukas and is due to the extension of the Krishna Canal. The area irrigated by wells has also increased by 14·14 per cent during the last decade.

The number of oil engines and electric pumps used for irrigation have increased from 1,232 in 1950-51 to 1,819 in 1956 and to 4,496 in 1961.

The increase in oil engines and pumps is remarkable in Walwa and Tasgaon talukas.

Crop-pattern under Irrigation

Table 5 in Part III gives the crop-pattern under irrigation. In the year 1959-60, 87·07 per cent of the irrigated area was under food crops and only 12·93 per cent under non-food crops. Amongst the food crops 55 per cent were cereals. Gram was the only variety of pulses which was irrigated and occupied 3·92 per cent of the total irrigated area. Though jowar occupies the highest percentage of the irrigated area (20·67 per cent), the area irrigated is only 3·5 per cent of the total area under jowar. Sugarcane is grown in all the talukas. Walwa and Miraj talukas have substantial areas under that crop.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of foodgrains between 1951—56 and 1956—60 compares with 1950-51 as follows :—

	Average production in hundred tons during		
	1950-51	1951—56	1956—60
Rice	68	81	96
Wheat	54	49	66
Jowar	1,163	1,311	1,849
Bajri	242	235	254
Ragi	8	17	14
Other cereals	35	37	25
Total cereals	1,570	1,730	2,304
Pulses	330	319	367
Total foodgrains	1,900	2,049	2,671

The total food production had increased by 7·8 per cent during the first plan period. The average annual food production during the second plan period was 40·5 per cent over that of 1950-51. There has been a substantial increase in the production of cereals but there has been no significant increase in the production of pulses. Production of pulses had actually decreased during the first plan period.

Agricultural Implements

The number of agricultural implements for the district and for each of its talukas for the years 1951, 1956 and 1961 are separately shown in section C of Table 9 in Part III. During the first and second plan periods there has been a reduction in the number of wooden ploughs and a steep rise in the number of iron ploughs. The rapid increase in the number of oil engines and electric pumps for irrigation has already been mentioned earlier. The number of sugarcane crushers worked by power increased from 208 in 1951 to 302 in 1956 and to 441 in 1961. The number of crushers worked by bullocks also increased from 452 in 1951 to 499 in 1961.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the District Agricultural Development Officer works as a Secretary to that Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officer. Talaties and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

A Research Station has been established in 1958 at Digraj in Miraj taluka. It has an area of 16 acres. Research is carried out on jowar (Kharif and Rabi) as main crop and groundnut and matki as subsidiary crops.

Agricultural Improvement

(*i*) *Increasing the Area under Irrigation.*—The most important single item for increasing agricultural production is to increase the area under irrigation. The increase of 16·88 per cent in area under irrigation over that in 1950-51 has already been described earlier. This has been brought about by extending the Krishna River Canal, construction of bandharas, tanks and wells, setting of oil engine pumps and repairs to old irrigation wells. During the second plan period, the number of old wells repaired and new wells constructed was 565. 436 oil engine sets were distributed. The third plan scheme includes construction of 3,000 new wells, installation of 1,500 pumping sets and new minor irrigation works which will irrigate 1,431 acres of land. In addition to this the minor irrigation works which are in progress will irrigate 9,835 acres of land.

(*ii*) *Improved Seeds.*—The following improved varieties or strains of crops have been recommended by the Agriculture Department: Wheat—Kenphad, Bajri—Akola, Paddy—Krishnasal, Rabi Jowar—M. 35-I, Cotton—Co.4B-40. Seed farms have been established at eight places in the district to provide improved seed to farmers. The combined area of all the seed farms is 546·58 acres.

(*iii*) *Soil Conservation or Bunding.*—During the first plan period an area of 16,543 acres was bunded. In the second plan period 60,422 acres have been bunded against a target of 44,274 acres. The third plan scheme is to complete bunding of 3 lakh acres with an outlay of Rs. 151·30 lakhs.

Livestock

The number of livestock for the years 1951, 1956 and 1961 has been shown separately for each taluka and the district in Table 9 of Part III. The total livestock in the district is 947,400. The number of bullocks and he-buffaloes over three years in 1961 is 166,600. It makes 59 livestock per 100 acres of cultivated area or 19·15 acres of cultivated land per pair of bullocks or he-buffaloes.

There had been a general decrease in livestock between 1951 and 1956 mainly because of the decrease in the number of sheep and he-buffaloes. That decrease has been made good between 1956 and 1961 and livestock in 1961 is 21·8 per cent more than that in 1951. Each category of livestock has increased. The only exceptions are horses and ponies which are reduced by as much as 41·9 per cent.

Veterinary Facilities

There are 8 Veterinary Dispensaries and 15 Veterinary Aid Centres at the following places:—

Dispensaries.—(1) Sangli, (2) Miraj, (3) Kavathe-Mahankal, (4) Tasgaon, (5) Vite, (6) Jath, (7) Shirala, (8) Islampur.

Aid Centres.—(1) Erandoli, (2) Kavathe-Piran, (3) Dhalgaon, (4) Bhilwadi, (5) Palus, (6) Savalaj, (7) Hatnoor, (8) Mane-Rajuri, (9) Khanapur, (10) Alsund, (11) Atpadi, (12) Mahuli, (13) Kadegaon, (14) Dattapur, (15) Sankli.

There are three Artificial Insemination Centres in Miraj, Tasgaon and Khanapur talukas. Premium bulls are kept at various centres in the district.

The Khillar breed belongs to this region and is famous in all parts of Maharashtra. Amongst the buffaloes the "Pandharpuri" breed is very popular in the district.

There are 20 private poultry farms.

AGRARIAN STRUCTURE AND LAND REFORMS

There used to be the following land tenures before the Survey Act of 1865: (i) *Miras* which was a hereditary right of occupancy subject only to the payment of land revenue. It was also a transferable right. (ii) *Upri* (or casual) was a sort of annual tenancy on behalf of Government terminable at the pleasure of the State. (iii) *Sheri* (or crown lands) was the land directly held by and cultivated for the Government. (iv) *Istavaa* was a lease on concessional terms for bringing waste lands under cultivation.

The Survey Act of 1865 abolished all the above tenures and introduced the Ryotwari tenure of heritable and transferable occupancy rights. This was the first important measure of tenurial reforms which has immensely benefitted the region. Later on, lands granted by the Government were subjected to certain restrictions about transfer or sale and the new occupancy rights were called "new" or "restricted tenure".

In the erstwhile States of Sangli, Miraj, etc., the main tenures were Sheri, Inam and Ryotwari. The Sheri lands were the crown lands which were periodically leased to the highest bidders. The Inams were those granted for military or other service and the Ryotwari tenure was the same as the occupancy tenure of other Government areas.

Public utility lands like grazing lands, etc., are held by Government and are now vested in the Village Panchayats.

There used to be another tenure of Inam lands which were gifted or granted by the Government for meritorious service in the past or in lieu or on condition of some continuing service useful to the Government or to the village community. Inam lands were held free of land revenue. There were five classes of Inams in the district :—

	Year of abolition
(i) Political or Sarenjam Inams ..	1952
(ii) Personal Inams	1953
(iii) Hereditary Watan Inams	1951
(iv) Village servants useful to the—	
(*a*) community	1954
(*b*) Government—Patels ..	1963
Mahars ..	1959
(v) Deosthan Inams.	

All Inams, excepting the last category of Deosthan Inams held by religious institutions or for religious services, have now been abolished under various measures of land reform. The year in which each class of Inam was abolished is shown above. All hereditary Watan lands held for village services have also been abolished and all village servants now work on a salary basis. The occupancy rights of abolished Inam lands have been conferred on their holders or tenants, as the case may be, on conditions of payment of occupancy price to the Government and/or compensation to the erstwhile holders. Consequential processes of determining titles for occupancy rights and of recovery of occupancy price or compensation are in some cases still in progress. The process of abolition of intermediary interests in land is thus being completed in the district.

Record of Rights

A Record of Rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up-to-date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual revenue accounts are prepared on the basis of the Record of Rights.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands Act which is in force since 1948. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the " Land to the tiller " policy, the Act also provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1957, which is known as the " tiller's day ". This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1963, ownership rights have been conferred upon 15,227 tenants for 50,703 acres of land in the district. 5,060 tenants had mutually agreed with the landholders on the price to be paid by them. In the remaining cases, the prices were fixed by the Revenue Officers.

Size of Land-holdings

According to the Census Table B-X in Part II of this Volume 70·59 per cent of the total number of households cultivate land and the remaining 29·41 per cent do not cultivate any land.

Census Table B-XI in Part II shows the break-up of cultivating households (based on 20 per cent Sample) by size of land cultivated and by the interest in the land. 82·10 per cent of the cultivating households cultivate their owned land only. 2·34 per cent of the households cultivate tenanted land only and the remaining 15·56 per cent cultivate land partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown below.

The distribution of households in Table B-XI and the same shown in percentages in column 2 below is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of those ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	4·89	16·17
1 to 4·9	36·88	35·89
5 to 9·9	25·63	19·86
10 to 14·9	13·04	10·11
15 to 29·9	13·38	11·58
30 to 49·9	4·22	4·13
50+	1·96	2·26
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 11·25 acres. Average size of the ownership holding in the district was 9·9 acres in 1952-53 against the average of 12 acres for the State.

Ceilings on Holding of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Three local areas, viz., Walwa, Miraj and Tasgaon have been notified in the district with different ceiling areas for dry crop land, viz., 78, 84 and 96 acres, respectively. In the case of irrigated lands, the ceiling areas are the same in all the three local areas, viz., 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons, and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1950 and work of consolidation of holdings was started in Khanapur taluka as an experiment in 1954. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Much spade work had to be done to remove the lurking suspicion in the minds of the landholders and to make them agree to part with their lands. The scheme has since been extended to three other talukas. The number of villages and areas for which the work has been completed are as follows :—

	Villages notified	No. of villages in which the work is done	Area covered (acres)	Holdings involved
Khanapur Taluka	55	23	86,117	38,765
Tasgaon Taluka ..	73	10	6,875	9,820
Miraj Taluka ..	25	7	1,739	3,778
Walwa Taluka ..	54	6	7,900	8,977
Total ..	207	46	102,631	61,340

The target for work during the third plan period is 100 villages.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

	Acres
(i) Dry crop lands	2·0
(ii) Rice lands	0·5
(iii) Bagait lands	1·0

All plots of land less in area than the standard area are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

Till June 1951 the administration of co-operative movement in the district was in charge of the Assistant Registrar of Co-operative Societies, Satara. In July 1951, it was transferred to the Assistant Registrar of Co-operative Societies, Sangli. Since March 1961, however, a Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition, one Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of membership, approval of bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of the co-operative movement in the district.

Concentrated efforts have resulted in the rapid progress of co-operative movement in the district during the decade 1951—61. Co-operative activities have now been extended to banking, dairy farming, sugar factories, processing of agricultural products, transport, etc. All the villages in the district are now covered by co-operative societies and the percentage rural population covered is 47. The number of co-operative societies has increased at a rate of 28 per year, their number in 1961 being 53 per cent higher than that of 1951.

Co-operative Credit

Agricultural Credit Societies.—The position of Agricultural Credit Societies in 1950-51 and 1960-61 is as follows :—

		1950-51	1960-61
(1) Number of Agricultural Credit Societies.		376	511
(2) Number of members	..	25,101	86,000
(3) Share capital	(Rs. in lakhs)	7·45	56·12
(4) Reserve and other funds	(Rs. in lakhs)	3·86	17·02
(5) Working capital	(Rs. in lakhs)	34·38	214·75
(6) Number of members to whom loan was advanced.		..	57,531
(7) Amount advanced	(Rs. in lakhs)	19·04	162·59
(8) Amount recovered	(Rs. in lakhs)	15·24	132·33
(9) Loans outstanding	(Rs. in lakhs)	24·05	166·63
(10) Overdues	(Rs. in lakhs)	7·33	22·97

Average membership per primary society is 168 as against the average of 96 members for Maharashtra. All the villages in the district have been covered and the membership coverage of rural families in the district is 47 per cent against 32·2 per cent for the State. This means that the average primary society is 1½ times as broadbased as an average society in the State. The coverage of rural families is however lower than that (61·8 per cent) in the adjoining Satara district.

Total owned funds (share capital and reserve funds) of the Primary Agricultural Credit Societies in the district amounted in 1960-61 to Rs. 73·14 lakhs and formed 34 per cent of their working capital as against 26 per cent for Maharashtra. The corresponding figure for owned funds for the year 1950-51 was only Rs. 11·31 lakhs.

The loans advanced by all Primary Agricultural Credit Societies in the district amounted to Rs. 162·59 lakhs. This amount is more than 8 times higher than that of 1951. The average amount of loan per borrowing member in the district is Rs. 282 as against Rs. 329 for Maharashtra.

With 242 per cent rise in membership and 550 per cent increase in the working capital during the last decade Agricultural Credit Societies appear to be making a rapid progress in the district. The proportion of overdues to the total outstandings is reduced to 13 per cent in 1960-61 against 30 per cent in 1950-51.

Central Co-operative Bank.—A Central Co-operative Bank called the Sangli State Central Co-operative Bank was established in the year 1927 at Sangli. On the merger of States, the Bank was renamed as the South Satara District Co-operative Central Bank, Ltd., Sangli. Since 1961 this Bank is now called Sangli District Co-operative Central Bank, Ltd., Sangli. The Bank has been working as a federal financing agency catering for the credit requirements of all the Primary Credit Societies in the district. Since 1962, the Zilla Parishad also transacts its financial business through this bank.

In the year 1960-61, the position of the Central Co-operative Bank was as follows :—

(1) Number of members—		
(*a*) Individuals		735
(*b*) Societies		650
(2) Paid-up share capital	(Rs. in lakhs)	23·38
(3) Reserve and other funds	(Rs. in lakhs)	3·50
(4) Deposits—		
(*a*) Individuals	(Rs. in lakhs)	64·11
(*b*) Societies and Banks	(Rs. in lakhs)	40·32
(5) Borrowings—		
(*a*) State Co-operative Bank and the Reserve Bank of India	(Rs. in lakhs)	61·74
(*b*) Government	(Rs. in lakhs)	7·64
(*c*) Other sources	(Rs. in lakhs)	4·64
(6) Working Capital	(Rs. in lakhs)	205·35
(7) Cash—		
(*a*) On hand	(Rs. in lakhs)	8·88
(*b*) At Banks	(Rs. in lakhs)	7·86
(8) Investments— Government and other Trustee Securities	(Rs. in lakhs)	39·23
(9) Percentage of cash in hand to deposits		8·51
(10) Percentage of investments to deposits		37·56
(11) Loans outstanding—		
(*a*) Individuals	(Rs. in lakhs)	2·93
(*b*) Societies	(Rs. in lakhs)	145·74
(12) Percentage of loans outstanding to deposits		142·35
(13) Percentage of loans outstanding to working capital		72·39
(14) Overdues	(Rs. in lakhs)	3·66
(15) Percentage of overdues to loans outstanding		2·5
(16) Cost of management	(Rs. in lakhs)	1·24
(17) Percentage of cost of management to working capital		0·61
(18) Profit	(Rs. in lakhs)	1·66
(19) Loss		*Nil.*
(20) Number of Branches and Pay Offices in the district		10

Within three years 1958-59 to 1960-61, the owned capital has been doubled, and the deposits have increased by 30 lakhs. The proportions of overdues to the outstanding loans which was already as low as 2·7 per cent has been further reduced to 2·5 per cent in 1960-61.

Agricultural Processing Societies

There is only one society of this kind in this district. It is the "Groundnut Producers Co-operative Society, Ltd., Sangli" registered in 1960. On 30th June 1961 it had 2,371 members and a working capital of Rs. 4·41 lakhs. The Society will undertake the processing of groundnut on an intensive scale. It has yet to start production. A master plan has been prepared for organisation of a network throughout the district.

Weavers and Industrial Societies

At the beginning of the decade there were 16 Weavers Co-operative Societies and equal number of other Industrial Societies. During the decade these numbers have increased to 26 and 71 respectively. On 30th June 1961 out of 1,859 registered handlooms in the district, 1,354 looms are covered by co-operative societies. Some of the societies have, in addition to production of cloth, also undertaken ancillary activities such as dyeing of yarn, marketing, etc.

The other types of industrial societies are tanning, oil-pressing, wool weaving, wicker products, wooden products, etc. Most of these societies have been organised recently and have yet to make progress. However with the availability of Koyna power their prospects are certainly bright.

Land Mortgage Bank

During the last decade "The Satara District Co-operative Land Mortgage Bank, Ltd.," with headquarters at Karad, district Satara, was functioning as the Land Mortgage Bank for this district also. Since 1st October 1961 a separate Land Mortgage Bank has been established for this district with headquarters at Sangli. 154 agriculturists had received Rs. 3·04 lakhs as long-term loans from the Satara Bank. In addition, Tagavi loans amounting to Rs. 11·81 lakhs had been advanced by that Bank to 544 agriculturists in this district. All these transactions have now been transferred to Sangli Land Mortgage Bank.

Forest Labourers Societies

There are 36 Co-operative Labour Contract Societies and one Forest Labourers Co-operative Society in the district, with membership of 1,316 and 98, respectively. During the last year forest produce worth Rs. 30,000 was extracted by the Forest Labourers Society while the other type of societies together executed labour contracts worth Rs. 2·27 lakhs.

Since there are no more felling series in the forests, there is no scope for organising more labour societies.

Urban Banks and Credit Societies

There are in all 42 Urban Banks and Credit Societies in the district, 10 of which are Urban Banks, 7 Urban Credit Societies, 15 Salary Earners' Societies, 5 Millhands' Societies and 5 Factory Workers' Societies. Their total membership is 16,762 and working capital is Rs. 134·87 lakhs. The loans advanced during the year amount to Rs. 243·73 lakhs. There is an Urban Bank at each taluka headquarters except Shirala where there is an Urban Credit Society.

Co-operative Farming Societies

There is one Joint Farming Society and 10 Collective Farming Societies with membership of 21 and 391, respectively. Eight out of these collective farming societies have been organised by Backward Class persons. Government waste lands have been given on annual rent to them for cultivation. The area cultivated by Collective Farming Societies is 1,300 acres. The working capital of the Joint Farming Society and the Collective Farming Societies is Rs. 0·11 lakhs and Rs. 1·4 lakhs, respectively.

Co-operative Lift Irrigation Societies

There are 10 schemes organised by different Lift Irrigation Societies. Besides six other Irrigation Schemes have been undertaken by other types of Co-operatives such as Farming Society, Co-operative Sugar Factory, etc. Of these 16 schemes, 13 are on river waters, 2 on nallas and 1 is on wells. Eight schemes have been completed so far and work on others is in progress. So far 912 acres have been brought under irrigation.

Co-operative Sugar Factory

There is one Co-operative Sugar Factory in the district. It is the Shetakari Sahakari Sakhar Karkhana, Ltd., Sangli. The factory was registered in October 1956 and started production in November 1958. It has a crushing capacity of one thousand tons per day and produced 186,925 bags of sugar in the year 1960-61.

The Co-operative Sugar Factory has 2,382 members and its share capital is Rs. 30·32 lakhs. Government's contribution towards the capital is Rs. 10 lakhs. There are proposals to start a distillery, a paper mill and a wax-plant as subsidiary units.

Dairy Societies

One Dairy Union with seven feeder societies has been organised in Miraj and Walwa talukas. The membership of the Union and the Societies is 216 and 643, respectively. The value of sales during the year 1960-61 amounted to Rs. 31 thousand and 60 thousand, respectively. The Union and the societies have received Rs. 30 thousand as loan and subsidy to purchase equipments, etc.

Fishery Societies

Six Fishermen's Co-operative Societies have been organised in the district. Three of them are at Miraj, Sangli and Uran-Islampur.

Purchase and Sales Societies and Unions

There is one District Purchase and Sales Society and five Taluka Societies functioning in the district. The combined membership of the societes is 1,346 and their working capital is Rs. 29·5 lakhs.

These societies supply good seed, manure and fertilizers to the agriculturists and undertake sale of consumer's goods, iron, steel, cement and also run fair price shops. The Government has contributed Rs. 69 thousand towards their share capital and Rs. 97 thousand as loans and subsidies.

Consumers' Movement

In 1950-51 there were 39 Consumers' Societies. On the abolition of controls on essential consumer goods, 24 societies have been liquidated. Of the remaining 15 societies, only six are working and others are stagnant.

Housing Societies

There were 51 housing societies in June 1961 as against 7 in 1950-51. Thirty-three societies are of Backward Class persons. Backward Class Housing Societies have received Rs. 4·59 lakhs as loan and Rs. 9 thousand as subsidy. Till 1960-61, 333 tenements have been constructed and 98 are in progress.

Co-operative Activity for Backward Classes

There are 7 credit, 8 farming and 33 housing co-operative societies of the Backward Classes. During the year 1960-61, 812 acres of land were cultivated and 141 tenements have been constructed by those societies.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

Type	No. of Societies classified as				No. of Societies not classified	No. of Societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Banks.	1	..	..	..	..	..	1
(2) Agricultural Credit Societies.	208	222	47	16	18	..	511
(3) Non-agricultural Credit Societies.	16	14	3	5	..	4	42

FORESTS

The district has an area of 189·58 sq. miles under forests. 109·23 sq. miles are in charge of the Forest Department and the remaining 80·35 sq. miles in charge of the Revenue Department. The forest area accounts for 5·71 per cent of the total geographical area as against 17·56 for Maharashtra. The forests are mainly on hills and hillocks of north-western and north-eastern sides of the district.

The Divisional Forest Officer who is in charge of the forests of the district, has his headquarters at Satara and works under the Poona Circle. The forests in charge of the Revenue Department are administered by the Collector of the district.

Broadly speaking, there are two types of forests in the district: (1) Evergreen forests in the north-western side and (2) Dry deciduous type in the remaining areas.

Teak and Ain are the two commercially valuable species.

As this district is under the Divisional Forest Officer, Satara, separate figures of revenue for forests of the district are not available.

Forest produce is generally consumed within the district and there is practically no export.

Forty-one persons are returned in the 1961 Census as working in forestry and logging. Their distribution by industry minor groups is shown in Table B-IV-C in Part II.

The forests in charge of the Forest Department are exploited under the working plan under which regular plantations are raised in clear-felled areas as also in blank areas. The forests in charge of the Revenue Department are rather treeless and blank.

The Third Five-Year Plan Schemes are shown below :—

(1) *Scheme for afforestation of Dandoba hills—*

Plan Financial Target .. Rs. 1,00,000.
Plan Physical Target .. Afforestation work to be carried out in 400 acres.

Plan target achieved during the first two years of the Plan period, viz., 1961-62 and 1962-63—

Financial .. .. Rs. 20,434.
Physical .. .. 80 acres.

(2) *Scheme for afforestation of Arid and blank areas in Jath taluka—*

Plan Financial Target Rs. 50,000.
Plan Physical Target .. Afforestation work to be carried out in 500 acres.

Plan target achieved during the first two years of the Plan period, viz., 1961-62 and 1962-63—

Financial .. .. Rs. 11,475.
Physical .. .. 100 acres.

FISHERIES

The length of the perennial rivers in the district is 59·65 miles. Fishing operations are carried out in the two main rivers Krishna and Warna. There are six perennial tanks.

175 persons are reported as engaged in fishing (as principal work). 170 of them are males and 5 females.

The following commercially important varieties of fish are found in Sangli district :—

Vam, Aheer, Vadshi, Mhasheed, Kolshi, Khavli, Kanas, Tambir, Wanz, Kaliwanj, Valshivada, Shingala and Murrels.

In addition, the following varieties are being propagated for pisciculture :—

Gorami, Catla, Rohu, Mrigal and Cyprinus carpio.

The total number of carp fry stocked during the Second Five-Year Plan was 20 thousand and the total quantity netted during the plan period was 2,130 kgs.

The total number of carp fry stocked so far during the Third Five-Year Plan (first two years) was 1,250 and the total fish netted 5,100 kgs.

Six co-operative societies of fisheries were organised during the first two years of the Third Plan period. Leases of rivers and tanks are granted to those societies by negotiations and assistance is given to locate suitable nurseries for rearing fast-growing baby fishes.

Fishermen belong to Koli, Bhoi and Bagadi communities. Their fishing methods are largely restricted to drag nets known as "Vadap", cast nets "Phekjal" or "Pag", bag nets "Ghal", hooks and lines or in some places gill nets or "Kandal". The nets are largely made of cotton twine but nylon is also being used effectively.

All workers from these fishing communities are not, however, employed in fishing. Some of them work on land and some others in sugar mill.

MINING AND QUARRYING

Mining activity in the district is very much limited, as the only deposits so far known are of limestone and a small extent of bauxite. Limestone deposits occur around Miraj at Narwad, Waddi, Bedag, Arag, Belanki, Kannadwadi, Sawali, Tanang, Kalambi, Kapwad, Erandoli, Salgare, etc.

The limestone is associated with trap formation and the quality is not uniform. The reserves are indicated at a few million tons but do not seem to be useful for cement industry. These deposits can, however, be utilised for manufacture of lime in modern kilns.

Clay suitable for manufacture of bricks is found in river alluvium and bricks are being manufactured on co-operative lines at many places.

Mining operations at present entirely relate to quarrying of stone, clay, sand and limestone. 558 persons are reported as working in these activities at the 1961 Census. 500 of them are males and 58 females.

INDUSTRIES

There are 30 large-scale industries such as engineering, textile, sugar, oils, etc., in the district. However, the general pattern of non-agricultural employment leans heavily towards village and cottage industries, i.e., crafts and craftsmen working on traditional lines with locally available raw materials or for local demand alone. There is now a great scope for the development of industries nearabout Sangli, Miraj, Tasgaon, Madhavnagar, Vite and Kirloskarwadi. With the availability of cheap power from Koyna, more and more industries are bound to spring up in the district in the near future.

There are in all 46,634 workers engaged in manufacturing industries. 31,714 or 68 per cent of them are in household industries and 14,920 or 32 per cent in non-household industries. The total number of workers in the registered factories in 1961 is 5,127 which makes only 10·99 per cent of all workers engaged in manufacturing industries or only four factory workers per thousand of total population against 20 per thousand total population for Maharashtra.

The distribution of workers engaged in each industry major and minor groups is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from houselists are also shown separately for each village in the Village Industries. Table presented at the end of Part II.

Large-scale Factories

There are 30 large-scale registered factories in the district working with 50 or more workers and using power. Five of them are engineering factories, one at Kirloskarwadi, one at Miraj and three at Sangli together employing 1,500 workers. The biggest of them is the Kirloskar Engineering Works established in 1910. It manufactures centrifugal pumps, iron ploughs, crushers, water lifts (*"mots"*), groundnut breaking machines and other agricultural implements, chairs, cots, furniture and hospital equipment, lathes, drilling machines, shaping machines, oil engines, electric motors, etc. Some of these goods are exported to foreign countries. The factory has also four branches at Harihar, Bangalore, Poona and Lonavala.

The Sugar Factory is at Madhavnagar, three miles from Sangli, and is run on co-operative lines. It started production in 1958 and has a crushing capacity of 1,000 tons per day. It employs 6,000 workers. There are proposals to start three more sugar factories on co-operative lines at Shirala, Bhilwadi and Islampur.

There are two spinning mills one at Sangli and the other at Madhavnagar. Two cotton weaving mills are located at Sangli and one at Miraj. 1,400 workers are employed in these textile mills.

There are eleven oil presses together employing 300 workers. Five of them are at Sangli, two each at Islampur and Madhavnagar and one each at Miraj and Tasgaon.

Five factories at Sangli and one at Tasgaon undertake the work of breaking unshelled groundnuts and polishing turmeric. These six factories together employ 100 workers.

There are two factories (one at Sangli and the other at Miraj) together employing 150 workers and manufacturing cement pipes, cement sheets, etc.

Small-scale Registered Factories

There are about 51 registered smaller establishments manufacturing bricks, tobacco products, pharmaceuticals, spare parts of oil engines, etc.

The total number of registered factories has increased from 61 in 1951 to 85 in 1961. The number of workers in the registered factories has also increased from 4,153 in 1951 to 5,127 in 1961.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 210·2 lakhs and working capital of Rs. 152·3 lakhs. The total value of annual production was Rs. 281·1 lakhs and the value added by manufacturing was Rs. 81·3 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1959 is only 0·40 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

The traditional crafts are conducted on household and cottage industries scale. They are mostly servicing and processing establishments, catering for the requirement of local population. Wood and wooden products industry engages the largest number of workers in the district. They are the carpenters who manufacture, fix or repair doors, door frames, wooden roof beams, basket weaving, cane-work, agricultural implements and bullock-carts.

6,986 workers are engaged in livestock and hunting. These include shepherds from Khanapur and Miraj talukas who are engaged in rearing of sheep and a few in rearing of bees for production of honey in the forest areas of Petlond in Shirala mahal.

The next two important industries in the district are miscellaneous textile and cotton textile industries where 4,843 and 6,966 persons are respectively engaged. Miscellaneous textile includes tailors engaged in making garments for men and women.

At the end of May 1961, there were 1,859 cotton handlooms and 214 power-looms registered in the district.

Manufacture of gur by open pan method is one of the important processing industry in the district.

224 persons are engaged in the manufacture of brasswares in the district and the Sangli market for brass and copper utensils is well known in the State. Miraj is well known for manufacture of special types of musical instruments and there is a demand for these instruments from all over the country.

The other important cottage industries in the district are mainly, manufacture of Khadi, hand-made paper, rope, soap, oil pressing, leather and leather products, etc.

Cotton-weaving in handlooms engaged 2,513 persons, while 464 workers were in cotton-weaving in power-looms. 384 workers were engaged in wool-weaving in handlooms and no power-looms were utilised for wool-weaving in this district.

There are 622 flour or rice mills engaging 890 workers.

3,909 workers are engaged in rearing of sheep and production of wool. 2,549 persons are engaged in manufacture of bidi and 8,226 persons are engaged in the manufacture of material from bamboo, cane and allied products.

The proportions of different groups of artisans to one lakh of total population in the district are as follows : Blacksmiths 44, carpenters 216, shoemakers and repairers 159, basket weavers 131, potters 134, tailors and dress-makers 268 and spinners and weavers 1,020.

The Industries Department has started peripatetic industrial training schools for imparting training in different industrial occupations to artisans in the district.

The "Master Plan" prepared by the Industries Department in 1960 had indicated scope for establishment of the following new industries in the district :—

(1) Expansion of Spinning Mill;
(2) Surgical Cotton ;
(3) Solvent Extraction of Oil-seeds/Cake ;
(4) Hydraulic Lime ; and
(5) Nicotine Sulphate.

An Industrial Estate has been set up at Sangli, on Sangli-Madhavnagar road, for the development of large-scale as well as small-scale industries like engineering, textile, rolling mills, foundries, forging mills, hosiery, etc. Another Industrial Estate is being set up at Miraj. In addition, there are proposals for construction of worksheds at Uran-Islampur, Tasgaon, Vite and Budhgaon.

POWER

The number of electrified towns and villages in the district is 91 in 1961. Their talukawise lists are given in Table 31 in Part III. The total population of these electrified places is 45·07 per cent of the total population of the district.

The district consumption of electricity on different items for eight years is shown in Table 30 in Part III.

The *per capita* consumption is naturally much lower than the State average, as only 91 towns and villages in this district had been electrified up to 1960-61.

The electric supply is through the State Electricity Board as well as from the private concerns from a powerhouse at Sangli and from Radhanagari in Kolhapur district. There was a growing demand and the supply was not sufficient to meet it. The work of laying transmission lines for bringing power from Koyna Project was completed in 1962 and the line from Karad to Vishrambag is now to distribute power through feeders to Kirloskarwadi, Jath and Kolhapur.

Supply of cheap power from Koyna will further accelerate the agro-industrial development of the district.

TRADE AND COMMERCE

Trade in the district is mainly of export of commodities like gur, groundnut and turmeric to Bombay, Gujarat and upcountry markets while jowar and chillies are exported to Konkan by road. Chillies are also exported to Bombay, Madras and Gulberga. Salt, cocoanuts, betel-nuts, groceries, cloth and other piecegoods, stationery, etc., are the main articles of import. Copper and brass utensils are also sold to a great extent in this district. Betel-nut leaves grown extensively near Miraj and Sangli are exported in large quantities to Bombay.

Agricultural produce is collected from the producers mainly at trading centres like Sangli, Tasgaon and Takari. Sangli is known as an important Agricultural Market Centre in the State.

The distribution of foodgrains and other articles of trade is through shops and pedlars or hawkers and in addition through the very well-established institutions of weekly markets and fairs where sellers and buyers meet on fixed days of the week or the year.

Shops

Shops are found in almost all villages except in the smallest. These deal in all kinds of grains, salt, oil, sugar, spices and groceries. There are in all 7,095 shops in the district. 4,443 are in rural areas and 2,652 in urban areas. This does not include the shops temporarily set up in weekly markets or fairs. The number of shops per 1,000 dwellings is 31·9 for the district as a whole, 23·3 for rural areas and 72·6 for urban areas. It will be seen that the urban areas have three times more shops than rural areas. The number of shops per 1,000 dwellings for the district (31·9) is less than the State average of 36·4. Talukawise number of shops may be seen in Table E-I in Part II.

Weekly Markets

These markets or "bazars" as they are called are distributing rather than collecting centres. The articles sold at these markets are brass, copper, aluminium or iron vessels, foodgrains, pulses, oils, chillies, turmeric, other spices, gur, piecegoods, cloth, fruit and vegetables. Pedlars and hawkers set up booths on the market days. Agriculturists from the nearby villages also bring their farm produce. Moreover, the traders and shop-keepers belonging to the market place also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The weekly markets start by about two in the afternoon and close by six to enable both the buyers and sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and if so on which day of the week. A list of weekly markets in the district presented in Table 32 in Part III shows the location and day on which each bazar is held. The map facing page 167 shows locations of all these markets and also the days on which each bazar is held. The map will show that five or six weekly markets cluster as satellites around a central village. Each has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

There are altogether 114 weekly and bi-weekly markets in the district. Out of this ten are also cattle markets. 22 weekly markets are held on Sunday, 15 on Monday, 15 on Tuesday, 21 on Wednesday, 10 on Thursday, 18 on Friday, and 13 on Saturday.

Fairs

As far as trade is concerned, fairs differ little from the weekly markets except that they are attended by unusually large numbers. They are also chiefly distributing centres. A list of fairs held in the district showing their locations, duration and dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 168 shows the location of all the fairs in the district having 1,000 or more gathering.

Trade Centres

Apart from the weekly markets and fairs, Sangli, Tasgaon, Takari and Khanapur are important trade centres in the district, as far as collection and export of agricultural produce are concerned. Agricultural Produce Markets at these places are regulated under the Bombay Agricultural Produce Markets Act, 1939, and they are known as principal market yards. The principal and sub-markets are as follows:—

Sangli	(1) Miraj.
	(2) Jath.
Tasgaon.	
Takari	(1) Vite.
	(2) Shirala.
	(3) Islampur.
Khanapur.	

Sangli Tobacco Market Committee.

Sangli market is the biggest regulated market in the district and the second largest in the State. The annual turnover in rupees for the last three years for some of these markets and sub-markets is as follows :—

Year	Sangli Market	Miraj Sub-Market	Jath Sub-Market	Takari Market
	Rs.	Rs.	Rs.	Rs.
1959-60	.. 4,66,88,514	32,45,362	26,77,435	55,67,032
1960-61	.. 4,52,95,584	32,19,942	27,46,587	49,69,454
1961-62	.. 5,19,91,673	42,85,785	29,54,793	26,16,755

The commodities having large annual turnover at the regulated markets in the district are turmeric, gur, groundnut and jowar.

Marketing of agricultural produce at Sangli is regulated by the Agricultural Produce Marketing Committee which is supposed to be the best market committee of the country. The Central Directorate of Marketing runs an institution at Sangli to train Secretaries of regulated market committees from all over India.

Sangli has long been a centre of forward trading in turmeric. This trade is now regulated by a committee consisting of representatives from trade, agriculture and co-operative societies.

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district is 15,466 out of which 7,066 or 45·69 per cent are in rural areas and 8,400 or 54·31 per cent are in urban areas. The number of workers in trade and commerce makes 2·91 per cent of all workers in the district. More than half of the district number are in Miraj taluka only.

Only 7·85 per cent of the workers in trade and commerce are in wholesale trade. 84·18 per cent are in retail trade and 7·97 per cent in miscellaneous trade and commerce. 83 per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is only 155. Mostly, the wholesale trade of cereals and pulses appears to be combined with wholesale trade of sugar, spices, oil, etc., as their combined number is 327 for the district.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 of Part III. Their break-up by talukas and type is shown below :—

	Number of Banking Offices			Total
	Scheduled	Non-Scheduled	Co-operative	
District Total ..	17	3	14	34
(1) Khanapur Taluka ..	..	..	4	4
(2) Shirala Mahal ..	..	..	1	1
(3) Walwa Taluka ..	..	2	1	3
(4) Tasgaon Taluka	1	1	1	3
(5) Jath Taluka ..	..	..	1	1
(6) Miraj Taluka..	16	..	6	22

Miraj taluka is leading in banking activities and has more than half of the total number of banking offices in the district. The Central Co-operative Bank has at least one Branch Office in each taluka.

The State Bank of India works for the treasury in the district and has branches at Miraj and Sangli.

COMMUNICATIONS AND TRANSPORT

The Poona-Bangalore, Miraj-Sangli, Miraj-Kolhapur lines of the Southern Railway and Miraj-Pandharpur line of the Central Railway pass through the district. The first three lines are metre gauge while the last is a narrow gauge. The total railway mileage in the district is 96 miles out of which 46 miles belong to the Southern Railway and 50 miles to the Central Railway. The Miraj-Sangli and Poona-Bangalore lines are now being converted to broad gauge.

Existing railway mileage in the district is 2·9 miles per 100 sq. miles of area against 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page shows all these roads.

The district is well connected by roads with the adjoining districts of Satara, Sholapur, Kolhapur and Bijapur district of Mysore State. Although Ratnagiri is one of the adjoining districts, there is no direct road link from the district to Ratnagiri.

The district headquarters is well connected by roads with all the taluka headquarters. The western part of the district is a hilly terrain and roads are, therefore, fewer in Shirala Mahal and Walwa taluka.

During the last decade (1951-60), major district roads increased by 27·99 miles, other district roads by 16·32 miles and village roads by 11·13 miles. The total increase in all types of roads (excluding municipal roads) is 48·49 miles.

New Roads

Construction of the following new roads is in progress :—

(1) Vaiphale-Bhiwaghat Road,
(2) Nandre-Yelawi Road.

The following roads are being improved :—

(1) Miraj-Pandharpur Road,
(2) Kolhapur-Miraj-Bijapur Road,
(3) Karad-Nagaj-Jath-Bijapur Road,
(4) Sangli-Tasgaon-Vite-Mayani Road,
(5) Karad-Tasgaon Road,
(6) Six roads in the area of sugar factories.

New Bridges

Work on the following important bridges is in progress :—

(1) On Krishna river at Bhilwadi on Tasgaon-Ashta-Kolhapur Road,
(2) on Krishna river at Karve on Tasgaon-Karad Road,
(3) on Krishna river at Behe on Uran-Islampur-Yede-Machindra Road,
(4) on Varna river at Kokrud on Malkapur-Karad Road,
(5) on Agrani river at Shirdhon on Miraj-Pandharpur Road,
(6) on Yerla river at Vasgade on Sangli-Pusewadi (Tasgaon) Road,
(7) on Karnal nala at Karnal on Sangli-Tasgaon-Karad Road,
(8) on Nagewadi nala at Nagewadi on Vite-Pingali Road,
(9) on Mahuli nala at Mahuli on Tasgaon-Vite-Pingali Road,
(10) on Limb nala at Limb on Tasgaon-Vite Road,
(11) on Kundal nala at Kundal on Tasgaon-Karad Road,
(12) on Shirgaon nala at Shirgaon on Tasgaon-Vite Road,
(13) on Kadegaon nala at Kadegaon on Guhagar-Chiplun-Karad-Jath-Bijapur Road.

Under the Nagpur Plan the district should have 1,607 miles of roads on 31st March 1961. It was short of that target by 224 miles.

Posts, Telegraph and Telephones

The district is included in the Sangli Postal Division. Head Post Office is situated at Sangli and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1961-62 there were 25 sub-post offices and 260 branch post offices in the district. Together, their number has increased by 113 per cent over that of 1951-52. The number of Post Boxes in the district has increased from 102 in 1951-52 to 134 in 1961-62.

There are Telegraph Offices at the following 19 places :—

(1) Sangli, (2) Jath, (3) Vite, (4) Budhgaon, (5) Miraj, (6) Miraj Mission Hospital, (7) Miraj Station Road, (8) Market Yard, Sangli, (9) Madhavnagar, (10) Wanleswadi, (11) Willingdon College, Sangli, (12) Shirala, (13) Tasgaon, (14) Kirloskarwadi, (15) Ashta, (16) Uran-Islampur, (17) Kavathe-Mahankal, (18) Kundal and (19) Kasegaon.

The following 17 places have Telephone connections :—

(1) Sangli, (2) Jath, (3) Vite, (4) Miraj, (5) Madhavnagar, (6) Tasgaon, (7) Kirloskarwadi, (8) Uran-Islampur, (9) Budhgaon, (10) Wanleswadi, (11) Gajanan Mills, Sangli, (12) Market Yard, Sangli, (13) Miraj Mission Hospital, Miraj, (14) Station Road, Miraj, (15) Shirala, (16) Kundal and (17) Ashta.

Passenger Road Transport

During the plan periods, a number of roads connecting the villages were constructed in the district and the buses of the State Road Transport Corporation are running regularly on these roads. This district is included in the jurisdiction of the Kolhapur Division. The State Transport operations in the district are maintained through five depots situated at (1) Tasgaon, (2) Sangli, (3) Islampur, (4) Vite and (5) Jath. No separate figures for passenger transport are available for the district. The five depots together run buses on 113 routes which make 595 single trips per day. In addition, the depot at Sangli runs a Sangli-Miraj city bus service. Special buses from Sangli are also run on bazar days to important places. Special parcel booking and delivery services have also been arranged by the State Road Transport Corporation at 18 important places in the district.

Nationalisation of passenger road transport in the district has been completed by the end of the Second Five-Year Plan. The Third Five-Year Plan Schemes include expansion of the services to new places on public demand, construction of permanent bus stations and pick-up stands and provision of other facilities for the travelling public.

Goods Transport

Separate figures for lorries operated in the district are not available as the Regional Transport Officer, working at Poona, keeps combined records for his region including Poona, Ahmadnagar, Sholapur, Satara, Sangli and Kolhapur districts.

Workers in Transport and Communications

5,180 persons are engaged in transport and 586 in postal, telegraphic and telephone communications in the district. Out of the workers in transport, 1,981 are in railway transport, 1,513 in motor transport and 1,686 in other kinds of transport like bullock-carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a Railway or a Road or has a Post Office or not.

CONSTRUCTION

The total number of persons engaged in construction is 4,472. 4,047 are males and 425 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

8·38 per cent of the workers are engaged in construction of dams, waterways and canals, etc., 78·58 per cent in construction of buildings and 13·04 per cent in construction of roads, bridges, etc. The large proportion engaged in the construction of buildings includes the persons employed on the construction of stadium, hostels and school buildings in rural areas and administrative offices, residential quarters for Government servants and police quarters, hospitals, etc., in the urban areas of the district.

All the workers engaged in construction together make hardly 0·84 per cent of the total workers in the district.

OTHER SERVICES

31,265 persons are engaged in the district in "Other Services". 26,148 are males and 5,117 are females. The major categories out of them are: (i) Public services; (ii) Educational services; and (iii) Personal services. Public services include administrative employees of Central, State and Local Governments. Educational services include all classes of teachers and Personal services include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of the workers in other services by minor groups is shown in Table B-IV-C in Part II.

5·88 per cent of the total workers in the district are engaged in "Other Services" as against 8·53 per cent in the State. 23·5 per cent of the total workers in "Other Services" in the district are engaged in public services and 19·13 per cent in educational services. The former proportion is slightly lower while the latter is higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This may be so because the district does not have large urban centres and there are hardly any comparable business services, labour associations or recreation services. Even the proportion of personal services in the district (20·09 per cent) is lower than the State average of 27·15 per cent.

The number of domestic servants is also very small, i.e., 912 or one for about 1,349 population. The number of barbers is 1,271. The number of washermen is 1,060.

There are 149 legal practitioners and 1,700 persons working in medical and health services excluding veterinary services.

The number of persons including teachers in technical schools and colleges is 325 and that in other schools and colleges is 5,651.

The number of State Government employees including those now working under Zilla Parishad is 4,438.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rates

The proportions of the total population, males and females, engaged in work for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA ..	47·91	57·09	38·10
SANGLI DISTRICT ..	43·18	53·55	32·36
Khanapur Taluka	46·80	53·61	40·06
Shirala Mahal	46·02	54·35	37·99
Walwa Taluka	40·21	52·62	27·14
Tasgaon Taluka	44·62	52·10	36·80
Jath Taluka	48·68	60·51	36·09
Miraj Taluka	39·14	52·04	25·12

Labour participation rates in the district for the total population, males and females, are lower than the corresponding averages for Maharashtra. They are so in all the talukas of the district except Jath which has a higher rate for the total population and males.

The differences in the participation rates both for males and females are due to the differences in the age composition of the population. The proportions of working age males and females are lower in the district than the State averages.

Within the district, male participation varies within a narrow margin except in Jath where it is 60·5 per cent. Female participation is highest in Khanapur taluka due perhaps to the out-migration of working age males. It is lowest in Miraj taluka because of the large sector of population residing in urban areas. It is significant that female participation is very low (27·14 per cent) in Walwa taluka which has the highest density of population, the most fertile soils and the most intensive cultivation in the district.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all non-agricultural workers. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows :—

		Total Workers	Primary	Secondary	Tertiary
Maharashtra ..	Total	100	72·25	12·34	15·41
	Rural	100	88·73	5·68	5·59
	Urban	100	11·97	36·69	51·34
Sangli District ..	Total	100	81·41	8·70	9·89
	Rural	100	87·86	6·43	5·71
	Urban	100	35·28	24·91	39·81

The primary sector dominates in the district with 81·41 per cent of the total workers against the State average of 72·25 per cent. Rural areas in the district are slightly better off both in secondary and tertiary sectors than the State average for rural areas. Urban areas in the district, however, lag behind the State average of urban areas in respect of both the secondary and tertiary sectors. Even in urban areas of the district the primary sector engages a larger proportion (25·28 per cent) of workers than the secondary sector (24·91 per cent). Tertiary services are no doubt dominant in urban areas. They consist of trade, administrative, teaching and other services. Even among the small number of workers engaged in the secondary sector, a large proportion is engaged in traditional crafts and processing or repairing services ancillary to agriculture. The workers in factory industry make only 4 per thousand of total population against 20 for the State.

Categories of Economic Activity

The distribution of workers, males and females by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			SANGLI DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46·11	40·69	54·79	66·37	62·21	73·54
II Agricultural labour	23·80	18·12	32·90	13·58	11·63	16·97
III Mining, quarrying, livestock, fishing ect.	2·16	2·97	0·86	0·54	0·76	0·16
IV Household Industry ..	4·39	4·80	3·74	5·97	6·45	5·13
V Manufacturing other than Household Industry.	6·88	10·22	1·54	2·81	4·18	0·43
VI Construction	1·24	1·69	0·53	0·84	1·20	0·22
VII Trade and Commerce ..	4·52	6·61	1·17	2·91	4·09	0·87
VIII Transport, Storage and Communication.	2·36	3·65	0·29	1·10	1·71	0·05
IX Other services	8·54	11·25	4·18	5·88	7·77	2·63
Total Workers ..	100·00	100·00	100·00	100·00	100·00	100·00

The proportion of cultivators in the district is comparatively very high (66·37 per cent) against that (46·11 per cent) of the State. The proportion of agricultural labourers (13·58 per cent) is lower than the State average (23·80 per cent) but not as low as that of the neighbouring Satara district (9·67 per cent). The ratio between cultivators and agricultural labourers is 5 :1 in the district against 7: 1 in Satara and 2 :1 for the State. The cultivators and agricultural labourers together make 79·95 per cent in the district against 69·91 per cent in the State.

The 1961 concepts of workers and non-workers have been described in the Explanatory Note to Part II. In spite of the changes in the method of economic classification the 1961 pattern may be broadly compared with the livelihood pattern of 1951. In 1951, cultivators and agricultural

labourers (including earning dependants) made 71·55 per cent and 7·73 per cent of the total workers, respectively. In 1961, the corresponding proportions are 66·37 per cent and 13·58 per cent. There is thus no significant change for the combined working in land. The increase in the proportion of agricultural labourers from 7·73 per cent to 13·58 per cent may be partly due to the increased area under irrigation and sugarcane. It is also possible that out of the persons engaged both as cultivators and agricultural labourers more persons have returned agricultural labour as their principal work than in 1951.

Talukawise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and the district are also shown for comparison :—

State/District/Taluka	I Cultivator	II Agricultural labourer	III Mining, quarrying, livestock, fishing, hunting	IV Household industry	V Manufacturing other than household industry	VI Construction	VII Trade and Commerce	VIII Transport and Communications	IX Other services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA	46·11	23·80	2·16	4·39	6·88	1·24	4·52	2·36	8·54	100·00
SANGLI DISTRICT	66·37	13·58	0·54	5·97	2·81	0·84	2·91	1·10	5·88	100·00
1 Khanapur Taluka	77·09	8·32	0·52	6·16	1·23	0·75	1·51	0·41	4·01	100·00
2 Shirala Mahal ..	81·72	7·70	0·64	4·36	0·45	0·49	1·25	0·19	3·20	100·00
3 Walwa Taluka ..	66·73	16·57	0·42	6·07	1·17	0·78	2·54	0·55	5·17	100·00
4 Tasgaon Taluka ..	70·93	13·23	0·31	5·20	2·67	0·74	2·02	0·51	4·39	100·00
5 Jath Taluka ..	67·07	19·93	0·78	6·53	0·17	0·40	1·40	0·33	3·39	100·00
6 Miraj Taluka ..	51·01	14·62	0·62	6·45	6·83	1·31	5·83	2·88	10·45	100·00

Within the district the proportion of cultivators varies from 82 per cent in Shirala mahal to 51 per cent in Miraj taluka. Shirala mahal appears to have owner cultivation at its highest. The proportion of agricultural labourers is highest in Jath. The proportions of workers engaged in manufacturing industry, construction, transport, trade and other services are highest in Miraj taluka because of the large sector of urban population in the Sangli-Miraj town-group, which is also the headquarters of the district.

Distribution of workers by nine categories of economic activity is also shown in the figure at page (51) for the district and each taluka separately.

The proportion of agricultural labourers is higher in Walwa and the highest in Jath probably because of large areas under cultivation.

Workers by Age

The distribution of total workers by age-groups is shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Sangli District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All-ages ..	43·18	53·55	32·36	47·91	57·09	38·10
0—14 ..	7·12	7·52	6·69	8·72	8·62	8·84
15—34 ..	69·99	86·22	53·93	74·53	87·45	60·90
35—59 ..	78·18	97·56	57·26	81·57	96·86	63·68
60+ ..	47·83	74·97	19·98	49·13	72·82	26·28

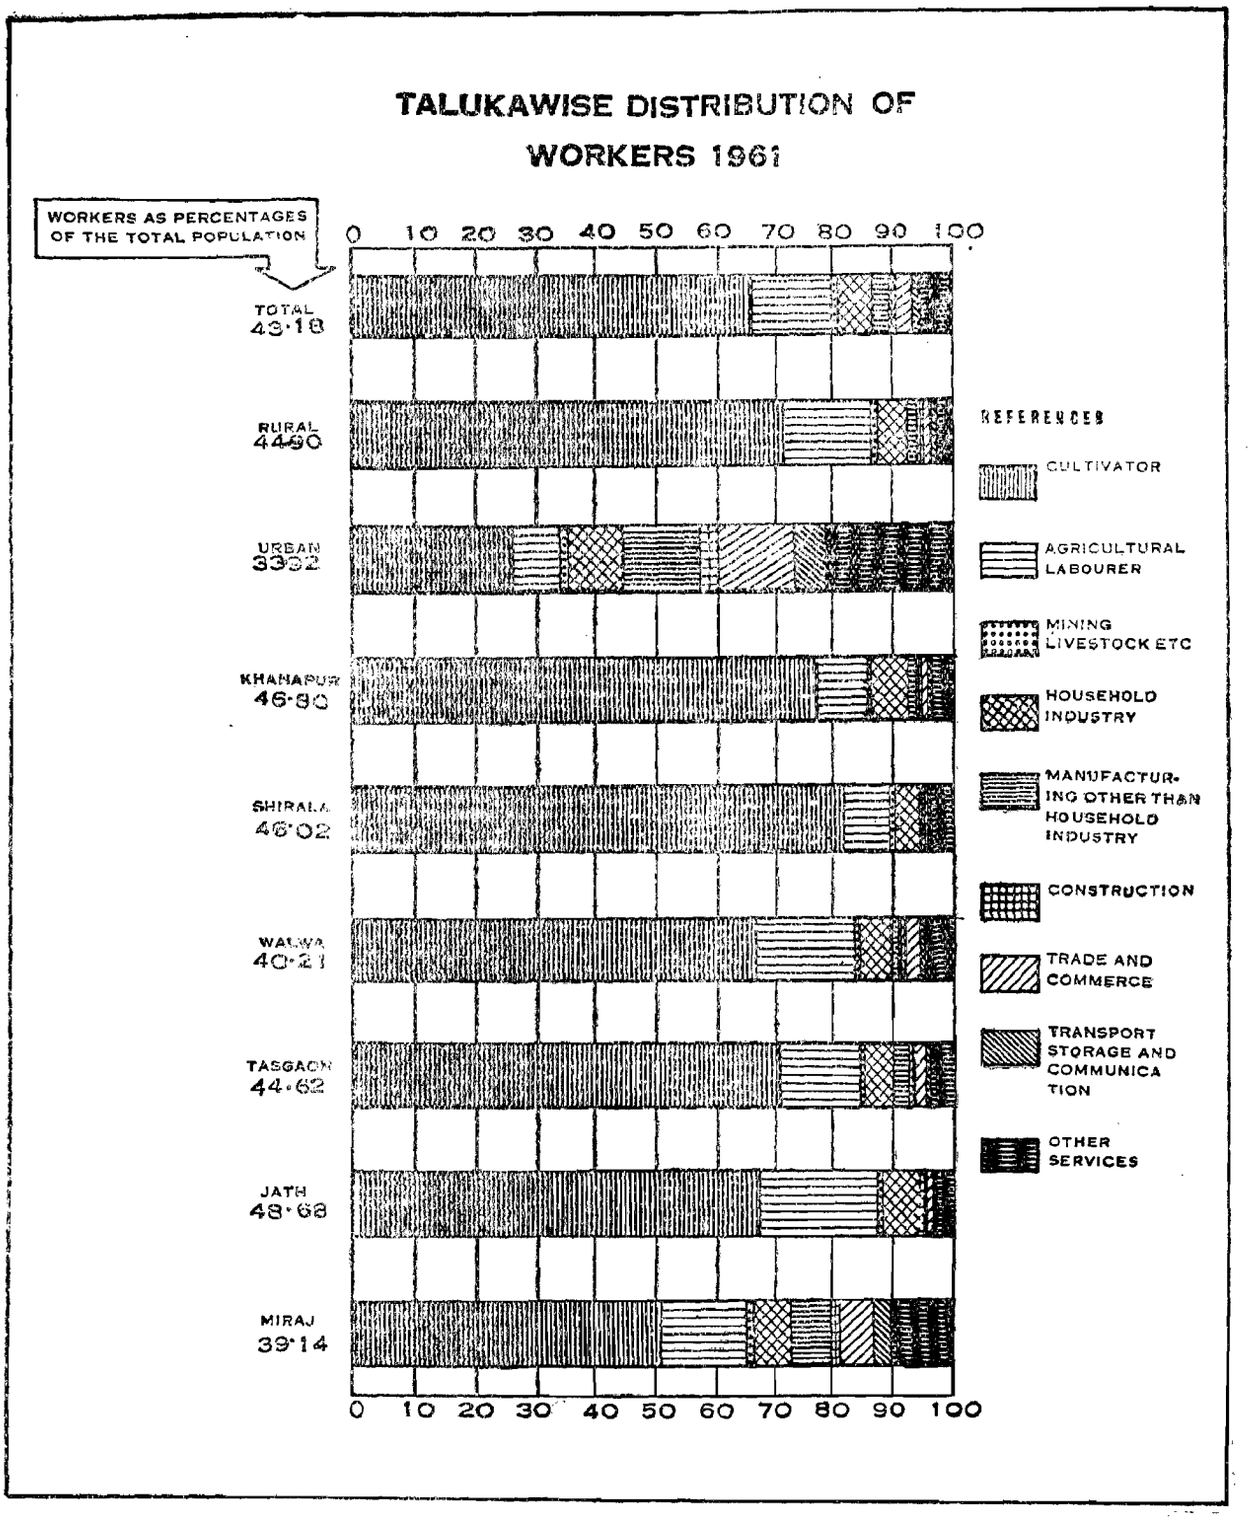

Participation rates for the total population and females are lower than the State averages in all age-groups. They are lower for males also in the age-groups 0—14 and 15—34. Male participation is higher in age-groups 35—59 and 60+ because of the preponderance of agriculture. Participation in the age-group 0—14 may be lower both for males and females in the district because of the greater urge in sending boys and girls to schools.

Workers by Educational Levels

Distribution of workers by educational levels shown in Table B-III in Part II is also shown below by percentages. Corresponding figures for the State are shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra	68·65	14·11	13·91	3·33
Sangli District	68·13	11·87	18·05	1·95

Literacy percentage of workers of the district is higher than the State average. The proportion of workers who are literate without educational level is however lower. The difference is, however, more than made up by workers who are educated up to primary or junior basic level. It may indicate that smaller number of pupils is withdrawing from schools in the district before reaching primary or junior basic level. 5,696 matriculates are in other services, 803 in transport and communications, 1,202 in trade and commerce, 1,181 in manufacturing (including household industry) and as many as 1,312 as cultivators.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage of proportions of employers, employees, single workers and family workers in the district for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in para 58 in the Explanatory Note to Part II :—

	Total Rural Urban	Total workers	Class of Workers: Employers	Employees	Single workers	Family workers
Maharashtra..	Total	100	3·96	62·18	26·52	7·34
	Rural	100	1·57	46·47	38·58	13·38
	Urban	100	4·98	68·90	21·37	4·75
Sangli District	Total	100	3·17	54·61	33·48	8·74
	Rural	100	1·43	53·27	36·62	8·68
	Urban	100	4·98	56·01	30·21	8·80

Family workers and single workers have larger proportions in the district total and urban areas than the corresponding State averages. That difference is more marked in the case of urban areas. This is a reflection of the traditional crafts dominating the scene. As consequence of the preponderance of family workers and single workers the proportions of employees are lower in the total and urban areas than the corresponding proportions for the State. The rural areas of the district are however better off than the average rural areas of the State. Here the proportions of both family workers and single workers are lower and the proportion of employees is higher than the corresponding proportions for rural areas of the State.

The proportion of employees, i.e., hired workers and others in household industries in the district for total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

	Total Rural Urban	Total workers	Employees	Others
Maharashtra ..	Total ..	100	8·18	91·82
	Rural ..	100	4·91	95·09
	Urban	100	16·35	83·65
Sangli District ..	Total ..	100	5·40	94·60
	Rural ..	100	4·86	95·14
	Urban ..	100	7·63	92·37

Household industries in the district also work more with household members than the State average. The proportions of employees are lower in the district than the State for total, rural and urban areas.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II) :—

Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work		
		I	II	IV
MAHARASHTRA—				
I Cultivation ..	Total ..	..	17·85	1·97
	Rural ..	..	18·03	1·98
	Urban ..	..	10·54	1·32
II Agricultural Labour	Total ..	13·17	..	0·94
	Rural ..	13·46	..	0·97
	Urban ..	7·12	..	0·31
IV Household Industry	Total ..	14·78	6·97	..
	Rural ..	19·61	9·38	..
	Urban ..	2·70	0·95	..
SANGLI DISTRICT—				
I Cultivation ..	Total ..	..	9·56	2·04
	Rural ..	..	9·72	2·10
	Urban ..	..	6·47	0·94
II Agricultural Labour	Total ..	29·97	..	1·77
	Rural ..	31·28	..	1·90
	Urban ..	12·35	..	0·06
IV Household Industry	Total ..	22·30	7·52	..
	Rural ..	25·76	8·99	..
	Urban ..	7·73	1·33	..

A large proportion of 30 per cent of agricultural labourers also works at cultivation as secondary work. Most of them may be small holders from Shirala and other areas of poorer soils who temporarily migrate to nearby areas after harvesting their first crops. About one-third of the workers engaged in household industry similarly works in cultivation as agricultural labourers. This is an indication that village craftsmen are gradually taking to cultivation as the household industries do not alone provide full time employment.

Occupational Classification

Table B-V in Part II shows the distribution of non agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

	Occupational Division	Maha-rashtra	Sangli District
0	Professional, technical and related workers.	6·42	8·50
1	Administrative, Executive and Managerial workers.	3·89	3·88
2	Clerical and related workers	9·13	7·43
3	Sales workers	12·23	12·93
4	Farmers, fishermen, hunters, loggers and related workers.	7·64	7·10
5	Miners, quarrymen and related workers.	0·75	0·50
6	Workers in Transport and Communition Occupations.	3·57	3·30
7 & 8	Craftsmen, Production Process workers and labourers not elsewhere classified.	45·99	46·71
9	Service, Sport and recreation workers	10·27	9·54
X	Workers not classifiable by occupation	0·11	0·11
	Total ..	100·00	100·00

The proportion for the first occupation division is higher in the district mainly because of the comparatively larger number of teachers. Corresponding proportions are not available for 1951 and the 1961 pattern cannot therefore be compared with that of 1951 or earlier Censuses.

Non-workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below:—

	District Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	38·80	10·34	36·63	8·67	48·76	17·71
(2) Household duties	0·02	39·93	..	38·98	0·12	44·12
(3) Dependants, infants and disabled	59·09	49·19	61·95	51·85	45·90	37·41
(4) Retired, rentiers or independent means.	0·66	0·14	0·35	0·12	2·08	0·20
(5) Beggars, vagrants, etc. ..	0·52	0·33	0·48	0·30	0·72	0·50
(6) Inmates of institutions ..	0·21	0·04	0·18	0·05	0·36	0·01
(7) Persons seeking employment for the first time.	0·36	0·01	0·25	0·01	0·91	0·02
(8) Unemployed but seeking work..	0·34	0·02	0·16	0·02	1·15	0·03
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

There is a marked difference in the distribution pattern for non-workers among males and females. 38·8 per cent out of male non-workers are full-time students while the corresponding proportion for females is 10·34 per cent. The reason is that 39·93 per cent females who are engaged in household duties are also included as non-workers. There are rural-urban differences in the proportion of dependants. They are due to the larger proportion of females in urban areas as non-workers. Other categories have less than a per cent of population. The rural-urban differences are similar both for males and females. In urban areas, the percentage of full-time students is higher and that for dependants lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 2·06 and 0·41 for males in urban and rural areas and negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to social customs of attending more to the education of boys than that of girls. The proportions for females are lower because the group of non-workers contains a large number of adult women engaged in household duties.

Seasonal Out-Migration

The houselist population reported for the district on 1st October 1960 was 12·37 lakhs. With the decade average rate of growth, it was estimated for first March 1961 at 12·49 lakhs. The actual population enumerated in the district on that day is however 12·31 lakhs which is lower by 18 thousand than the estimate. This indicates a net seasonal out-migration from the district, Small landholders and agricultural labourers move temporarily out to nearly sugarcane growing areas in Kolhapur and Sholapur districts. This seasonal out-migration is mainly from Khanapur and Walwa talukas. Some movement also takes place within the district and mainly to Miraj taluka. The net seasonal out-migration may be estimated between 15 to 20 thousands. The movement is mostly of males as would appear from the following differences in the sex ratios for the District and its talukas for the houselist population as on 1st October 1960 and Census population as on 1st March 1961 :—

		1st October 1960	1st March 1961
Sangli District	Total	953	957
	Rural	960	966
	Urban ..	914	912
Khanapur Taluka		955	1,009
Shirala Mahal		1,031	1,038
Walwa Taluka..		936	949
Tasgaon Taluka		955	958
Jath Taluka		935	939
Miraj Taluka		926	920

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district. In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with words "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions. Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown in roman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from Census records and not, as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.* shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory:—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank.

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

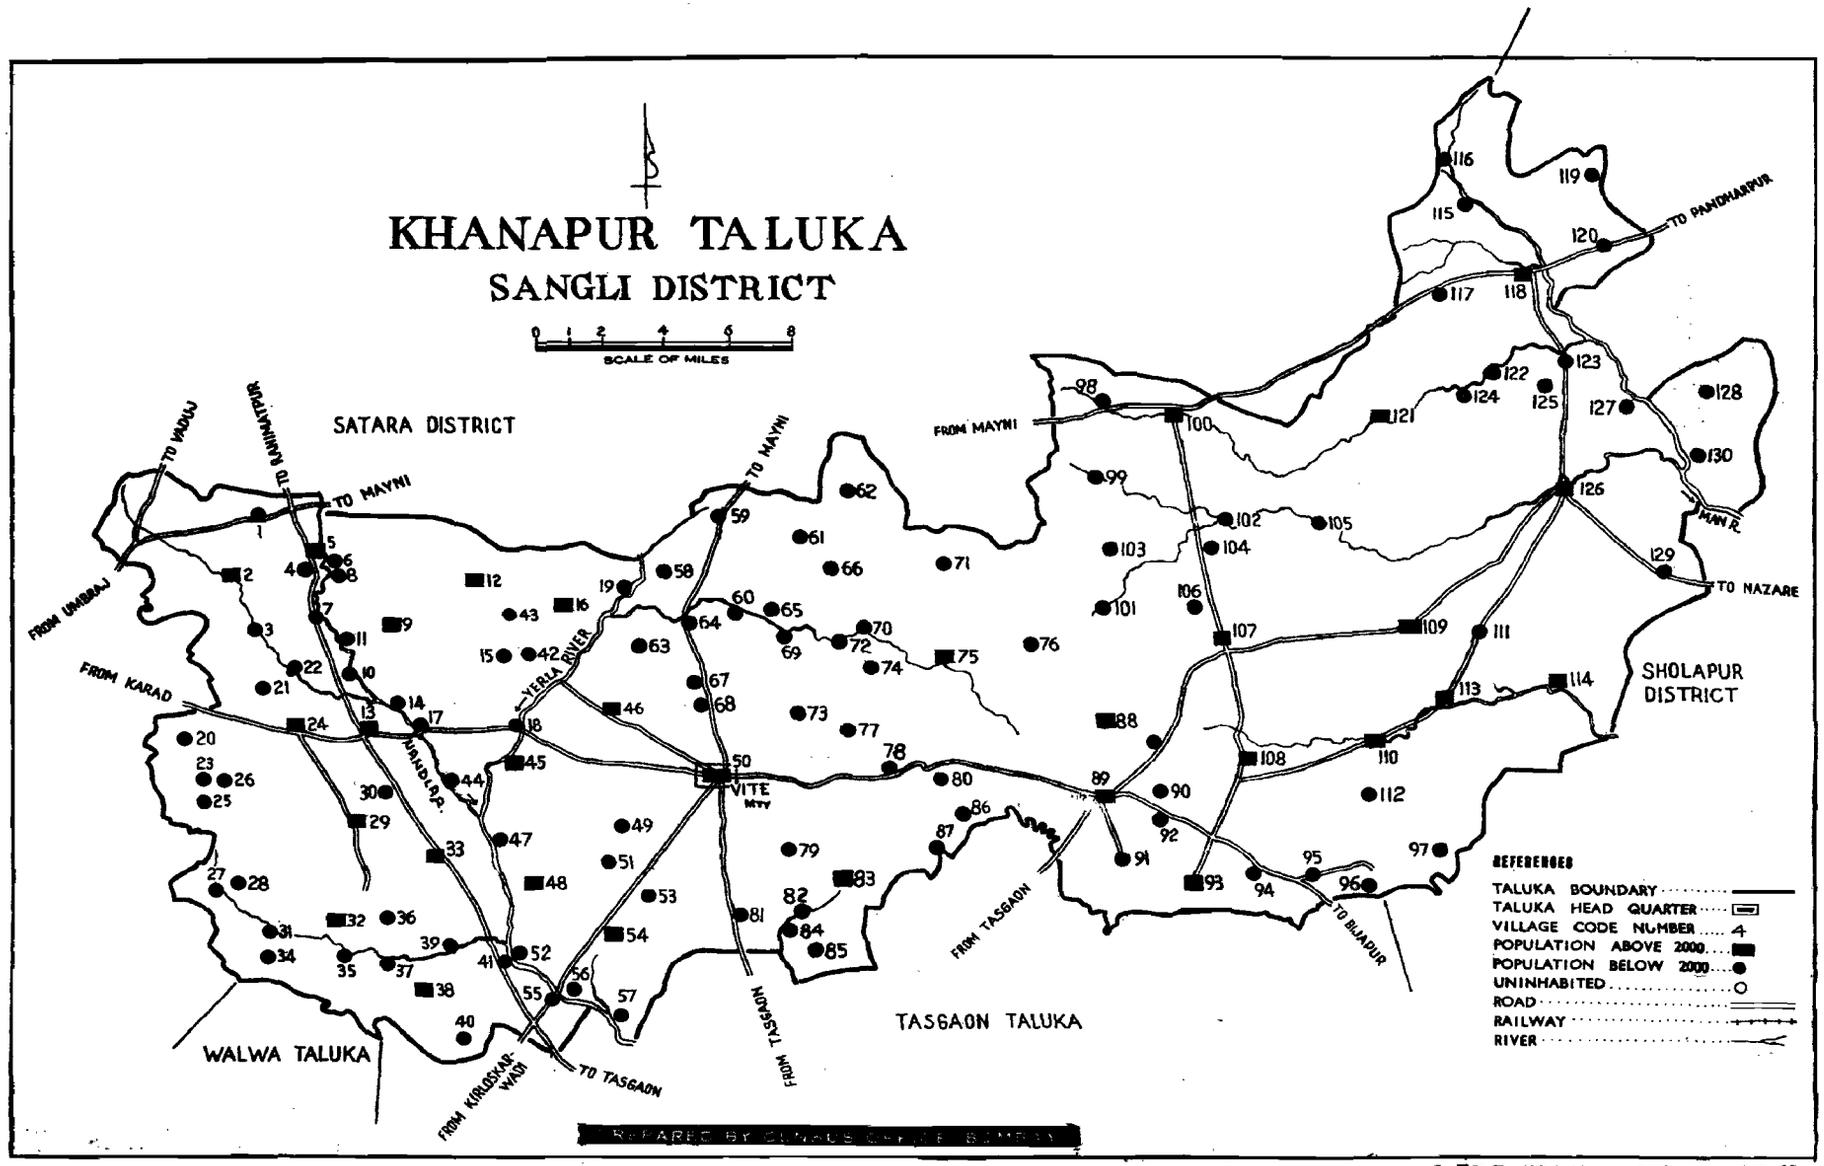

Hos *for* Hospital.

Mp *for* Medical Practitioner.

In Column (8)

NA *for* Not Available.

PART II

CENSUS TABLES

These include General Population, Economic, Household Economic, Social, Cultural, Housing and other Special Tables

CONTENTS

		PAGE
Explanatory Note (With Appendices I—III) :		45
A—GENERAL POPULATION TABLES		
A-I ..	Area, Houses and Population ..	
	Appendix I—Statement showing 1951 Territorial Units constituting the present 1961 set-up.	67
	Appendix II—Number of Villages with a population of 5,000 and over and Towns with a population under 5,000 presented talukawise.	68
	Appendix III—Houseless and Institutional Population for the District andTalukas.	68
A-II ..	Variation in population during sixty years (for the District variation since 1901 to 1961 and for Talukas for 1951 to 1961).	68
A-III..	Villages classified by population for the District and Talukas.	68
A-IV..	Towns (and Town-groups) classified by population in 1961 with variation since 1901.	69
B—ECONOMIC TABLES :		
(1) General Economic Tables		
Primary Census Abstract		
B-I and B-II.	Workers and Non-workers in Talukas and Towns classified by sex and by broad age-groups.	70
B-III..	Industrial classification of workers and non-workers by educational levels—	
	Part A—District Total	76
	Part B—District Rural	76
	Part C—District Urban	76
	Part D—Talukawise Rural only..	77
B-IV..	Part A—Industrial classification by sex and class of worker of persons at work at household industry.	78
	Part B—Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service.	79
	Part C—Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation.	81
B-V ..	Occupational classification by sex of persons at work other than cultivation.	88
B-VI..	Occupaticnal divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in Urban Areas only.	92
B-VII	Part A—Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural Labourer.	94
	Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry.	94
B-VIII	Part A—Persons unemployed, aged 15 and above, by sex, broad age-groups and educational levels in Urban areas only.	95
	Part B—Persons unemployed aged 15 and above, by sex and educational levels in Rural Areas only.	95
B-IX	Persons not at work classified by sex, broad age-groups and type of activity.	96
(2) Household Economic Tables :		
B-X ..	Sample Households (i) engaged neither in cultivation nor household industry, (ii) engaged either in cultivation or household industry but not in both and (iii) engaged both in cultivation and household industry.	97
B-XI ..	Sample Households engaged in cultivation classified by interest in land and size of land cultivated.	97
B-XII..	Sample Households engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers.	98
B-XIII..	Sample Households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry.	100
B-XIV..	Sample Households engaged only in Household Industry classified by principal household industry—	
	Part A—Households classified by major groups of Principal Household Industry and number of persons engaged.	100
	Part B—Households classified by minor groups of Principal Household Industry.	101
B-XV ..	Sample Households engaged both in cultivation and household industry classified by size of land.	101
B-XVI..	Sample Principal Household Industry classified by period of working and total number of workers engaged in household industry.	104

E-IV..	Distribution of sample households living in Census Houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof.	129
E-V ..	Sample households classified by number of members and by number of rooms occupied.	129
	Number of Establishments and Workers for Industries Classified by Minor Groups of Industrial Classification.	130

EXPLANATORY NOTE

This Part contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (*e.g.*, A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (*e.g.*, B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawi e break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least 3/4ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. *Total* includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. There have been no territorial changes during the decade 1951—1961. Appendix I does not, therefore, appear here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

J—1077-II—8-A Sang.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

J—1077-II-8-B-Sang.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The " household " is slightly different from a " family ". A " household " is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribe , respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A " literate " is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I. As Cultivator.
II. As Agricultural Labourer.
III. In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV. At Household Industry.
V. In Manufacturing other than Household Industry.
VI. In Construction.
VII. In Trade and Commerce.
VIII. In Transport, Storage and Communications.
IX. In other services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, live-stock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, waterman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, proce sing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in service incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately, while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-II'.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

Category	Industry Division
I. Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II. Agricultural Labourer ..	
III. Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV. Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V. Manufacturing	Divisions 2 and 3.
VI. Construction	Division 4.
VII. Trade and Commerce ..	Division 6.
VIII. Transport, Storage and Communications.	Division 7.
IX. Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes "employer", "employee", "single worker" and "family worker":

An "employer" is a person who employs other persons in order to perform economic activity in which he is engaged.

An "employee" is a person who usually works under some other person for salary, or wages in cash or kind.

A "single worker" is a person who works by himself. He is not employed by anyone else and in his turn does not employ anyone else, not even members of his household, except casually.

A "family worker" is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The material is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii), even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivation and II-Agricultural labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in cloumn (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka, separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry ;

(ii) engaged in cultivation only ;

(iii) engaged in household industry only ; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classifid in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and

by industry division and major group of the household industry (Appendix I). The table shows the sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 Tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample.

82. The classification by size is as one member, small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. All the same, the table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0–9 years and 70 and over. The entire population in 0–9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Table C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group "Others". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A footnote is added to show the number of speakers in the district for each of the mother-tongues combined in the group "Others".

90. "Mother-tongue" is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bi-lingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group "Others". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-B of Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

J-1077-II—9-A-Sang.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and for rural areas only for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This Table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from household scheduled on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five Tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here for the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods, goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants an also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

J-1077-II—9-B-(Sang.)

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124 This table pre ents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—

9 Divisions
45 Major Groups
343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, live-stock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Live-stock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Divisions 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal.
36	Basic Metals and their products except machinery and transport equipment.
37	Machinery (all kinds other than Transport) and Electrical equipment.
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services

Division 8—Services—*concld.*

82	Medical and Health Services
83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations.
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described. (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, masur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond.	032

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 0—Agriculture, live-stock, forestry, fishing and hunting—*concld.*	
04	*Live-stock and Hunting—*	
	Production and rearing of live-stock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugar-cane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor, from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes.	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of Wood and Wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Divisions 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products.	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Divisions 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railways bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other food stuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
63	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade—*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in food stuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobiloil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper ..	661
	Retail trading in metal, porcelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous—*	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport—*	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport—*	
	Such as packing, carting travel agency ..	710
72	*Storage and Warehousing—*	
	Operation of storage such as ware-houses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication—*	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting..	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services—*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or inividuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market	999

J-1077-II—10-A-Sang.

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note: n. e. c. = not elsewhere classified

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

5 Miners, quarrymen and related workers

6 Workers in transport and communication occupations

7-8 Craftsmen, production process workers, and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

0 Professional, Technical and Related Workers

- 00 Architects, Engineers and Surveyors
- 01 Physicists, Chemists, Geologists and other Physical Scientists
- 02 Biologists, Veterinarians, Agronomists and Related Scientists
- 03 Physicians, Surgeons and Dentists
- 04 Nurses, Pharmacists and other Medical and Health Technicians
- 05 Teachers
- 06 Jurists
- 07 Social Scientists and Related Workers
- 08 Artists, Writers, and Related Workers
- 09 Draughtsmen, Science and Engineering Technicians, n. e. c.
- 0X Other Professional, Technical and Related Workers

1 Administrative, Executive and Managerial Workers

- 10 Administrators, and Executive Officials, Government
- 11 Directors and Managers, Wholesale and Retail Trade
- 12 Directors, Managers and Working Proprietors, Financial Institutions
- 13 Directors, Managers and Working Proprietors, Other

2 Clerical and Related Workers

- 20 Book-Keepers and Cashiers
- 21 Stenographers and Typists
- 22 Office Machine Operators
- 28 Clerical Workers, Miscellaneous
- 29 Unskilled Office Workers

3 Sales Workers

- 30 Working Proprietors, Wholesale and Retail Trade
- 31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
- 32 Commercial Travellers and Manufacturers' Agents
- 33 Salesmen, Shop Assistants and Related Workers
- 34 Money Lenders and Pawn Brokers

4 Farmers, Fishermen, Hunters, Loggers and Related Workers

- 40 Farmers and Farm Managers
- 41 Farm Workers
- 42 Hunters and Related Workers
- 43 Fishermen and Related Workers
- 44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

- 50 Miners and Quarrymen
- 51 Well Drillers and Related Workers
- 52 Mineral Treaters
- 59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

- 60 Deck Officers, Engineer Officers and Pilots, Ship
- 61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen
- 62 Aircraft Pilots, Navigators and Flight Engineers
- 63 Drivers and Firemen, Railway Engine
- 64 Drivers Road Transport
- 65 Conductors, Guards and Brakesmen (Railway)
- 66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
- 67 Telephone, Telegraph and Related Telecommunication Operators
- 68 Postmen and Messengers
- 69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

- 70 Spinners, Weavers, Knitters, Dyers and Related Workers
- 71 Tailors Cutters, Furriers and Related Workers
- 72 Leather Cutters, Lasters and Sewers (Except Gloves and Garments) and Related Workers
- 73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
- 74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
- 75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
- 76 Electricians and Related Electrical and Electronics Workers
- 77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
- 78 Painters and Paper Hangers
- 79 Bricklayers, Plasterers and Construction Workers, n. e. c.
- 80 Compositors, Printers, Engravers, Book Binders and Related Workers
- 81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
- 82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
- 83 Chemical and Related Process Workers
- 84 Tobacco Preparers and Products Makers
- 85 Craftsmen and Production Process Workers, n. e. c.
- 86 Testers, Packers, Sorters and Related Workers
- 87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers
- 89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

- 90 Fire Fighters, Policemen, Guards and Related Workers
- 91 House Keepers, Cooks, Maids and Related Workers
- 92 Waiters, Bartenders and Related Workers
- 93 Building Caretakers, Cleaners and Related Workers
- 94 Barbers, Hairdressers, Beauticians and Related Workers
- 95 Launderers, Dry Cleaners and Pressers
- 96 Athletes, Sportsmen and Related Workers
- 97 Photographers and Related Camera Operators
- 99 Service, Sport and Recreation Workers, n. e. c

X Workers not Classifiable by Occupations

- X0 Workers without occupations
- X8 Workers Reporting Occupations Unidentifiable or Unclassifiable
- X9 Workers Not Reporting Occupations.

J-1077-II—10-B-(Sang.)

APPENDIX III

COMMON HOUSEHOLD INDUSTRIES

(With their Industrial Code Numbers)

Industrial Code Number	Household Industry
	Major Group 00—Field Produce and Plantation Crops
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	*Production of fruits and nuts in plantation*, vines and orchards
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date Palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
	Major Group 01—Plantation Crops
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
	Major Group 02—Forestry and Logging
023·1	Production of Charcoal.
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·2	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above
	Major Group 03—Fishing
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
	Major Group 04—Livestock and Hunting
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
	Major Group 10—Mining and Quarrying
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
	Major Group 20—Foodstuffs
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and food-grains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small machines
209·1	Confectionery
209·2	Making of sweet-meats, laddu, peda, barphi, batasa, etc
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
	Major Group 21—Beverages
210·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbats and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Note : n. e. c. = not elsewhere classified

Industrial Code Number	Household Industry
	Major Group 22—Tobacco Products
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
	Major Group 23—Textile—Cotton
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
	Major Group 24—Textile—Jute
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date plam fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
	Major Group 25—Textile—Wool
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkaha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
	Major Group 26—Textile—Silk
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
	Major Group 27—Textile—Miscellaneous
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
	Major Group 27—Textile—Miscellaneous—*concld.*
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, malh garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat, and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including rain- coats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of water proof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
	Major Group 28—Manufacture of Wood and Wooden Products
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld.*
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of artwheels
289·4	Manufacure of other wood and allied products n.e.c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags
292·2	Papier mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
	Major Group 30— Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving , etching, block making, type cutting and other work connected with printing industry.
303	Book binding, stitching, sizing and other work connected with book binding industry
	Major Group 31—Leather and Leather Products
310·1	Flying, processing of hides and skins including taxidermy
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals).
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur.
313	Manufacture of leather products such as leather upholstery suit cases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including rain-coats, oil cloths, waterproof cloths, etc.
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335.6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products —*concld.*
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemicals products n. e. c.
	Major Group 34-35—Non-metallic Mineral Products other than Petroleum and Coal
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
346·1	Making of images from soap stone
346·2	Manufacture of images, toys and other articles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods, n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n.e.c.
366·1	Making of aluminium utensils
366·2	Making of other aluminium products n. e. c.
367·1	Making of tin utensils
367·2	Making of articles from tin sheets
367·3	Copper utensils
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n. e. c.
368·1	Lacquerware (if on metal)
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n. e. c. including silverplating, goldplating, E. P. N. S., etc.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets
369·4	Making and repairing of locks and trunks
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n. e. c.
	Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts.
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
	Major Group 38—Transport Equipment
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
	Major Group 38—Transport Equipment—*concld.*
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
	Major Group 39—Miscellaneous Manufacturing Industries
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlay work with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including Silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacture of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc. n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, tabla, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets, balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n. e. c.

APPENDIX I

Statement showing 1951 Territorial Units constituting the present 1961 set-up of the District

District/Taluka	1951 Territorial Units			
		Name	Area	
			Sq. Miles	Sq. Km.
(1)		(2)	(3-a)	(3-b)
SANGLI DISTRICT .. .. (Satara South)		As in 1951	3,324.2	8,609.7
	Minus	Village Shamgaon transferred to Karad Taluka of Satara Dstrict	−7.1	−18.4
		Total ..	3,317.1	8,591.3
Khanapur Taluka		As in 1951	846.5	2,192.5
	Minus	Village Shamgaon transferred to Karad Taluka of Satara District	−7.1	−18.4
		Total ..	839.4	2,174.1
Tasgaon Taluka		As in 1951	446.2	1,155.7
	Minus	Villages Kakadwadi and Nandre transferred to Miraj Taluka	−12.8	−33.2
		Total ..	433.4	1,122.5
Miraj Taluka		As in 1951	611.4	1,583.5
	Plus	Villages Kakadwadi and Nandre transferred from Tasgaon Taluka	+12.8	+33.2
		Total ..	624.2	1,616.7

J-1077—III—20—(Sang.)

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. " Normal rainfall " [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India."

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

J-1077-III-21-A-Sang.

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, riverbeds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years ;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by "cereals, pulses and others". Non-foodcrops are similarly shown under "oilseeds and others".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1955-56 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area, and the gross irrigated area, are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tobacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

J-1077-III-21-B—Sang.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crops are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1959-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years: 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, i.e., calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the re-organisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word "factories" here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960. The number of persons shown is based on eye estimates of the reporters.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
