Gujarat is the home of 3,734,422 tribal people constituting 13.99 per cent of the State's total population of 26,697,475. They are the inheritors of an art tradition that is the product of long development and continues to this day in unbroken succession. Isolated communities till recent times, their traditions of art have been passed down by oral transmission from mother to daughter and father to son and reveals an inspiration and outward expression in forms and motifs that have remained basically unchanged through the years. Many of the art forms of the Adivasis are the result of deep spiritual experience or have their roots in dream, story, myth or legend. Significant forms have thus survived without major alteration through centuries during which the underlying myths and legends have remained basically the same.

They have taken the material of their crafts from the enviornment around them. One of the commonest materials used was wood which was available in profuse abundance and exploiting the plasticity of which they never seem to have tired.

The specimen shown on this volume is a rather unusual one. Generally Adivasi art is unseparably linked with the material used and in the case of wood, the craftsman would prefer working with a single piece, taking care to preserve and fully exploit all its natural bends, curves, projections and grains. This specimen is, however, shaped out of more than one piece of wood and has also been painted over. More than half the population of the District is tribal.

(Block from an ink tracing by K. D. Vaishnav, Geographer, from a photograph of a specimen at the Tribal Research Institute, Ahmadabad.).

CENSUS OF INDIA 1971
LIST OF PUBLICATIONS

Central Government Publications—Census of India 1971–Series–5–Gujarat is being published in the following parts :

Part Number	*Subject covered*	
I–A	General Report.	
I–B	Detailed Analysis of the Demographic, Social, Cultural and Migration Patterns.	
I–C	Subsidiary Tables	
II–A	General Population Tables ('A' Series).	
II–B	Economic Tables ('B' Series).	
II–C(i)	Distribution of Population, Mother Tongue and Religion, Scheduled Castes & Scheduled Tribes.	
II–C(ii)	Other Social & Cultural Tables and Fertility Tables, Tables on Household Composition, Single Year Age, Marital Status, Educational Levels, Scheduled Castes & Scheduled Tribes, etc., Bilingualism.

PREFACE

The District Census Handbooks are being published regularly since 1951. Earlier they were brought out under the name of "Village Handbooks" and contained only the population totals. They are prepared by the Census Organisation on behalf of the State Government and published by the latter. They are the first to be published in the series of 1971 Census publications, which are now to follow. The need for making available to the State Government, the Census data as early as possible after the taking of the count, has been recognised since long. It is a matter of deep satisfaction that the present volume is being published within a year of the taking of the Census.

The data collected during 1971 Census was tabulated initially at three Regional Tabulation Offices at Surat, Rajkot and Bhavnagar for rural areas and one more Tabulation Office at Ahmedabad which dealt with the slips of urban areas only. The data abstracted at the Regional offices was brought to Ahmedabad where it was compiled for the State as a whole and is now being published.

The District Census Handbook contains primary data upto the village level for rural areas and enumerator's block level for urban areas. It is for the first time that in 1971 Census we are giving information about urban areas of the State in a separate part called the "Town Directory". We are also giving comprehensive information about rural areas in the "Village Directory". This is further supplemented by the Alphabetical List of Villages for facility of reference.

It has been decided to bring out the District Census Handbooks of 1971 in three parts as under :—

Part A

(1) Town Directory

(2) Village Directory

Part B

(1) Urban Block and Villagewise Primary Census Abstract

Part C

(1) Analytical Report

(2) Administrative Statistics

(3) Census Tables

It was originally decided that each part would be brought out separately. But since the data for parts A and B has been prepared almost at the same time, it is decided to combine these parts into one volume. Part C which has to await the collection of official statistics from various Departments of the State Government and preparation of Census Tables, would be published separately.

The Town Directory consists of information about the status, growth history and functional category of towns and their physical aspects, location, Municipal finances, civic and other amenities like sewerage, protected water supply, fire fighting service, electrification etc. It also contains information about medical, educational, recreational and cultural facilities available at the towns. Detailed information about trade, commerce, industry and banking is also provided here. The population of the towns according to 1971 Census by religion and Scheduled Caste and Scheduled Tribe is furnished here. The Town Directory is a new feature of 1971 Census and the above information has been compiled in it for the first time.

The Village Directory contains comprehensive information about the amenities available at the village such as educational and medical, supply of electric power, drinking water facility, communication through road, rail, kutcha road, pucca road and bus route, existence of post, telegraph and telephone facilities, etc. Further information about staple food, area under various

uses like forest, cultivable land, source and extent of irrigation, cultivable waste and name of the nearest town and its distance, day on which 'bazar' is being held, if any, and its importance from religious, historical and archaeological point of view is recorded here.

The Primary Census Abstract contains information about the number of occupied residential houses and households, total population including houseless and institutional population, literacy, Scheduled Caste and Scheduled Tribe population and the distribution of working population into nine industrial categories of workers and non-workers.

The Analytical Report in Part C takes note of the social, economic and demographic changes which have occurred in the District during the last ten years. The administrative statistics are obtained from various Departments of the State Government and presented in this part which also incorporates a few of the tables generated from the data derived during 1971 Census.

There are 217 towns in Gujarat and 18,709 villages. Compilation of data for such a large number of units within such a short time was indeed a formidable task. The terms and definitions used in the schedules of the Directories were carefully studied and detailed instructions with explanatory notes, about the manner in which they were to be filled, and the source from which data was to be collected were issued by this Directorate to the Taluka Development Officers. The collection of land use data and tallying of area figures for each administrative unit presented an uphill task. The Settlement Commissioner and Director of Land Records was requested in August 1969 to confirm some of the presumptions and furnish necessary guidelines to this Organisation as to how the various figures required could be culled out from the revenue forms maintained at village level.

The printed forms of Village Directories were sent to the Taluka Development Officers with a request that they should be filled by the village officials and scrutinised at taluka level by the Statistical Assistant before returning to this office. The Development Commissioner and the Director, Bureau of Economics and Statistics, issued firm instructions to the field staff to ensure that the information was filled and scrutinised with the utmost care. After this information was received in the Census Directorate, it was subjected to a very close and rigorous checking by a cell which was specially created for the purpose. There were a number of points on which further probe became necessary, where the information was found to be incomplete or inconsistent. Our greatest hurdle was the reconciliation of area figures as reported by the village officials and those reported by the District Inspector of Land Records. A series of meetings had to be held at each District Headquarter, where the Deputy Director in charge of the District Census Handbook Unit had to remain present and point out the glaring inconsistencies reported to the Taluka Development Officers and District Inspectors of Land Records. Thanks to the dedicated efforts of all concerned, we were ultimately able to reconcile completely the area figures for each Village, Taluka and District.

It was noticed that there were minor differences in the spellings of village names reported by the Mamlatdar, Taluka Development Officer and District Inspector of Land Records. Similar differences were also noticed in the total number of villages reported by each agency. These discrepancies were reconciled on the basis of the list of villages published by Revenue Department, information obtained from taluka offices and other published sources. Location code number was given to each administrative unit at the time of taking of the Census in order to avoid repetition of their names.

The Census Directorate had obtained village-wise data relating to drinking water facility, primary and secondary school, post, telegraph and telephone, electrification etc, from the concerned Departments. The data reported in the Village Directory was cross-checked with the

official data to make it accurate and upto date. The data so processed was ultimately posted in the Village and Town Directory statements and typed in four copies. The typed data was again compared with the original manuscripts by a special cell handpicked for the purpose. The taluka totals for the area and amenities have been struck for each column. A number of inset tables have been prepared and included in the note to the District Census Handbook, as desired by the Registrar General, India.

The Town Directory statements were likewise scrutinised by a special cell in the Directorate, and the local authorities were asked to reconcile incomplete or inconsistent information wherever necessary. On account of the instructions issued by the Director of Municipalities, these references received immediate attention. The figures reported by the Municipalities have been cross checked with available statistical data.

Maps

No District Census Handbook can be complete unless it is accompanied by District and Taluka maps. We have, therefore, included at the beginning of each volume a District map showing the taluka boundaries, location of towns and large villages with population size 5000 +, communications, water features etc., and an inset map showing the position of the District in the State in hatching. A Taluka map is inserted before the Primary Census Abstract of each taluka, indicating the boundaries of each village and town within the taluka and the location code number of each village. The villages have been shown by dots of various sizes. One key map showing the location of the taluka within the District in hatching, and another key map showing the position of the District in the State have been inserted here. The urban area is hatched in both the District and Taluka maps, and is further represented by a sphere of varying size according to population.

The District and Taluka maps show several particulars by use of an appropriate symbol.

The preparation of District and Taluka maps, containing such varied information was a task of no small magnitude. The District Inspectors of Land Records had considerable difficulty even in preparing the basic maps and authenticating them. The problem was solved by requesting the Settlement Commissioner and Director of Land Records to call the District Inspectors of Land Records personally to the Office of Director of Census Operations and reconcile all the discrepancies pointed out to them and asking them to authenticate the same on the spot as far as possible, after due verification.

ACKNOWLEDGEMENTS

Compilation of such a large mass of data is impossible without the active help and co-operation of State Government. I am deeply indebted to Shri L. R. Dalal, ICS, Chief Secretary to Government of Gujarat, for agreeing to extend whatever help was sought for. I would like to make a special mention of the warm and wholehearted co-operation which was throughout extended by Shri K. V. Bhatt, Deputy Secretary in the General Administration Department, who was looking after the subject of Census. Whether it was a matter of sanction of staff or for supply of typewriters, or for additional funds for printing of the District Census Handbook volumes, it always received his most immediate attention and sanction was never denied or delayed. He showed a deep understanding of the problems of an organisation like ours, which could function in the State effectively only with the full backing of the State Government.

Shri P. B. Buch, Director of the Bureau of Economics and Statistics, Government of Gujarat, placed at my disposal the entire resources at his command for any work connected with Census. Not only he spared me a few of his best officers and men but his valuable guidance in the matter of presentation of data at several places has served us in good stead. He issued instructions to the District Statistical Officers to attend to

the collection and scrutiny of any Census data and its timely submission, as if it wa Bureau's own work. We were always assured that we could fall back upon the resources of the Bureau unreservedly in time of need. But for the wholehearted and most willing cooperation of the Bureau at all levels, the District Census Handbook volumes would not have been what they are today.

I also owe a deep debt of gratitude to Shri U. M. Bhatt, IAS, the then Settlement Commissioner and Director of Land Records for his help in finalising the meanings of terms and definitions used in the Village Directory. It is a matter of deep regret that he is no more with us today. His successor, Shri B. R. Mane Patil, IAS, was equally enthusiastic and helpful and but for the keen interest he took in the finalisation of District and Taluka maps, we would have been placed in serious difficulty.

My sincere and heartfelt thanks are due to the Collectors of the Districts for the wholehearted response I have received from them towards the efficient conduct of Census Operations. The interest and energy evinced by them in organising this vast operation is indeed praiseworthy. Their active participation and involvement in the programme had a far reaching effect on the countless enumerators and supervisors working under them. Their direct interest in the training programme has vastly improved the quality of our returns. The Assistant / Deputy Collectors working under them were made responsible for the urban areas of their jurisdiction. The Mamlatdars and Chief Officers of Municipalities who were appointed as Charge Officers of rural and urban areas respectively bore the real brunt of the work, and displayed great zeal and enthusiasm in shouldering these additional responsibilities. To the Commissioners of Ahmedabad and Surat Corporations I am particularly indebted for providing excellent accommodation for housing the Regional Tabulation Offices To the Special Charge Officers of Railways, Police, S.R.P., Irrigation Colonies and Forest Department and others I express my gratitude for the readiness with which they stood by us. Last but not the least, my grateful thanks are due to a large number of young boys and girls, coming from schools and colleges, to work as Sorters, Compiler Checkers and Supervisors, for the hard work they put in under difficult conditions of work. They displayed a very high sense of discipline and duty and enabled us to complete our work, at every stage, according to the deadlines set. I have no doubt the traditions of hard and systematic work they have imbibed will serve them in good stead and they will advance in life. They carry our best wishes with them wherever they go.

The District Development Officers who helped us so much in collection of data at the village level through the Taluka Development Officers and the District Statistical Officers working under them, who arranged for the scrutiny of the Town and Village Directory schedules at the taluka level through the Statistical Assistants, deserve a special mention. Had the basic work not been done by them accurately we would have been faced with a serious problem at the time of compilation. To the Heads of various other Departments, who always responded readily to any request made to them for help, I am also indebted. Limitation of space prevents me from making a separate mention of each one of them.

Shri G. J. Gonsalves, Director of Government Printing and Stationery, Government of Gujarat, who very kindly undertook to arrange the printing of some of the District Census Handbooks at Government presses and others through private presses had always been helpful in solving our difficult problems of printing. I hereby acknowledge the valuable help, guidance and assistance rendered by him in the matter of printing. Thanks are also due to the Manager, Government Photo Litho Press, Ahmedabad, at which all the District and Taluka maps as also the cover page have been printed. The care and patience with which they have attended to this work, has beautified our volumes to no small extent and increased their utility to the reader greatly.

Shri Hashim Ali Sayed, Printing Inspector, whose services were obtained on deputation from the Director, Government Printing and Stationery, rendered exemplary service by looking after the entire printing arrangement. His initiative, drive, and readiness to assume responsibility were a source of great strength to us. Everything he handled, he did perfectly well, and knew his job inside out.

I wish to place on record the valuable contribution made by my colleagues in bringing out this volume. Shri K. F. Patel, Deputy Director of Census Operations (HQ) was looking after this section before a separate staff was sanctioned by the State Government, headed by Shri S. C. Merh, Deputy Director from the Bureau of Economics and Statistics. Even after the creation of this separate cell, there were many occasions on which I had to look to him for help on account of the experience gained by him during 1961 Census. He never objected to the encroachments made on his time and energy, in spite of the fact that they were sometimes substantial. Shri S. C. Merh, Deputy Director of Census Operations (DCHB) put in hard and gruelling hours of work in spite of indifferent health to catch up with the time schedule which was once upset. Shri S. M. Shelke, Research Assistant, from the Bureau working under him, undertook almost the entire burden of Town Directories in addition to other work. Shri S. M. Nayak, Assistant Director of Census Operations, put in an indefatigable effort to ensure accuracy of the data at every stage and successfully coordinated the work throughout. The enthusiasm and energy displayed by Shri C. P. Vyas, Assistant Director of Census Operations, in the matter of preparation of inset tables for District Census Handbook volumes and several other matters connected with it deserve a special mention. The interpretation of the data of the Town and Village Directory is his personal contribution. Shri R.M. Pancholi, Statistical Assistant, prepared the inset tables to be included in the Town and Village Directory. Shri K. M. Patel, Tabulation Officer put in a very strenuous effort for the reconciliation of area figures and final checking of maps. Kr. Fateh Singh Jasol, IAS, Deputy Director of Census Operations, Urban Tabulation Unit, took upon himself, as a labour of love, the scrutiny of work with regard to the preparation of District and Taluka maps and the selection of different motifs which now decorate different volumes of the District Census Handbook. He involved himself in this work with the ardency and fervour so characteristic of him and greatly relieved me of the anxiety on this account. Shri K. D. Vaishnav, Geographer, and his team of draftsmen have produced excellent District and Taluka maps by working on them again and again to incorporate details which were pointed out or received after the maps were once prepared. Shri N. S. Bhatt, Statistical Assistant, has checked them thoroughly. Shri B. I. Patel, Tabulation Officer, in charge of the Central Tabulation Unit took upon himself the entire responsibility for the scrutiny of Primary Census Abstracts and their typing in record time. He discharged his duties with diligence and a high sense of duty. I had in him a pillar of strength on which I could lean for work demanding precision and exactitude. His capacity to turn out work at optimum efficiency in the face of time schedules rigidly set merits avowal. Shri V. A. Dhagia, Tabulation Officer, proved himself a stalwart by shouldering the burden not only of work entrusted to him, but part of the burden of every section, including the Map Section, and rendere yeoman's service. Both the Central Tabulation Units benefited greatly by the care and attention bestowed on them by Shri K. F. Patel, Deputy Director of Census Operations (HQ), whose trained eye could detect the slightest inaccuracy or inconsistency in compilation or presentation. It was due to this team work that we were able to compile such faultless data with admirable speed, and were the first to send the Primary Census Abstracts of all the Districts of the State in one bunch to the Registrar General's Office at New Delhi. Shri Patel's patience and thorough handling of work has yielded rich dividends to us. I have relied heavily on the expertise, acumen and experience of my colleagues and they have undoubtedly

given their best to the Organisation, for which I am deeply indebted to them.

Limitations of space prevent me from making an individual mention of all those who have contributed to the making of this volume so complete and faultless to all of whom I wish to express my sincere thanks.

Finally, I would like to express my very deep gratitude to Shri A. Chandra Sekhar, IAS, Registrar General, India and Dr. B. K. Roy Burman, Deputy Registrar General (Social Studies) for the valuable guidance received from them from time to time. The amount of advance thinking and planning done by them on the subject has now resulted in the production of volumes which will be of lasting value and interest to the general reader, research worker, scholar, administrator and academician.

AHMEDABAD
1st March, 1972.

C. C. DOCTOR,
Director of Census Operations,
Gujarat.

PART X-A

TOWN AND VILLAGE DIRECTORY

TOWN AND VILLAGE DIRECTORY

The Town and Village Directory of the District Census Handbook 1971 differs widely in content and presentation from the corresponding volume of 1961. The earlier volumes mainly contained the Primary Census Abstract for each village for rural area and town/ward/enumerator's block for urban area and was supplemented by some additional information which was collected from (a) village notes specially devised for the purpose and (b) information supplied by Heads of Departments on certain amenities. It was presented in Col. 2 in run on fashion for each village and town followed by the Primary Census Abstract in the remaining columns.

The Town and Village Directory of 1971 Census is presented in Part A of the District Census Handbook. An attempt has been made to interpret the data thrown up in the Town and Village Directories at the beginning under the heading "Introductory Note on Town and Village Directory".

Part B of the District Census Handbook contains purely the Primary Census Abstract.

A number of abbreviations have been used in both the Directories to facilitate presentation. The abbreviations used in each statement of the Town Directory are given below in Statement A. Statement B gives a list of abbreviations used in Village Directory.

STATEMENT A
List of Abbreviations used in the Town Directory

STATEMENT I

Column : 5

1. Corporation	...	C
2. Municipality	...	M
3. Town Committee/Town Area Committee/Board	...	TC
4. Notified Area Committee/Council	...	NAC
5. Cantonment Board	...	CB
6. Nagar Panchayat/ Panchayat	...	P
7. Non-Municipal/ Non-Town Committee/ Non-Panchayat Committee	...	NM

STATEMENT II

Column : 13

1. Navigable River	...	(R)	Appearing after the name of the River/Canal
2. Navigable Canal	...	(C)	

STATEMENT IV

Column : 3

1. Pucca Road	...	PR
2. Kutcha Road	...	KR

Column : 4

1. Sewer	...	S
2. Open Surface Drainage	...	OSD
3. Kutcha Drainage	...	KD
4. Cess Pool	...	CS
5. Pit System (or Soak Pits)	...	PT

Column : 8

1. Head Load	...	HL
2. Baskets	...	B
3. Wheel Barrows	...	WB
4. Septic Tank Latrines	...	ST
5. Sewerage	...	S
6. Soak Pits or Leaching Pits	...	PT
7. Tractor Trailor, Trolleys, or Night Soil Tankers	...	T

Column : 9

1. Tap Water	...	T
2. Well Water	...	W
3. Tank Water	...	Tk
4. Tube Well	...	TW
5. River	...	R
6. Fountain	...	F
7. Canal	...	C
8. Others	...	O

STATEMENT V

Column : 3

1. Hospital	...	H
2. Dispensary	...	D
3. T. B. Clinic	...	TBC
4. Health Centre	...	HC
5. Nursing Home	...	NH
6. Maternity Centre	...	M
7. Child Welfare Centre	...	CW
8. Family Planning Centre	...	FC
9. Other Medical Institutions	...	O

Column : 5

1. Arts College only	...	A
2. Science College Only	...	S
3. Commerce College Only	...	C
4. Arts & Science College	...	AS
5. Combined Arts, Science and Commerce College	...	ASC
6. Arts & Commerce College Only		AC
7. Law College	...	L
8. Law & Education College	...	LE

INTRODUCTORY NOTE ON TOWN AND VILLAGE DIRECTORY

1. History of District Census Handbook

In 1941, the population figures were exhibited according to communities in the "Village Handbooks" published by the erstwhile Government of Bombay. In 1951, the basis of classification of the Census was changed from a social to an economic one and the figures were given in the Primary Census Abstract according to eight Livelihood Classes. The Primary Census Abstract contained the basic information in respect of every village and town. A decision to bring out the District Census Handbooks giving the Primary Census Abstract and important Census tables for every district of the State was taken for the first time in 1951. Census statistics given in the Primary Census Abstract related to the area of the village, number of houses and households, total population, houseless and institutional population, literates and agricultural and non-agricultural classes distributed under eight main Livelihood Classes. These census statistics were further supplemented by the addition of useful administrative information on the availability of amenities in villages and towns on items like post offices, railway stations, the distance of a bazar from the village, primary schools, village panchayats, cooperative societies, etc. This was a unique achievement of the Indian Census. The 1951 series of District Census Handbooks, however, varied in content and size from State to State depending upon the resources offered by the State Governments. It was, therefore, decided during the Census of 1961 that the District Census Handbooks of 1961 Census should contain a certain minimum of statistical data, maps and other useful information to be adopted uniformly throughout the country. Thus the District Census Handbook of 1961 Census differed widely in the matter of content and coverage from that published in the 1951 Census. The District Census Handbooks of 1961 were sub-divided into the following three parts:—

PART I–THE DISTRICT

(i) Introductory Essay
(ii) Brief Gazetteer of place names

PART II–STATISTICS

(i) Census Tables
(ii) Villagewise list of Industrial Establishments
(iii) Handicraft Tables
(iv) Departmental or Official Statistics

PART III –VILLAGE DIRECTORY

(i) Explanatory Note
(ii) Village Directory
(iii) Taluka Maps

Besides Census data, the 1961 District Census Handbooks covered villagewise and townwise information on the availability of different types of amenities such as educational facilities, public health and medical facilities, supply of drinking water, electricity and its uses etc., shown by means of abbreviations placed against the name of each village. Thus, in the 1961 Census an attempt was made to make the District Census Handbooks more informative.

During the 1971 Census, efforts have been made to compile both census and non-census statistics in a uniform manner under an enlarged perspective. The District Census Handbook of 1971 Census has been divided into three sub-parts with a view to making the census and non-census information available to the data users as quickly as possible. Part A of the District Census Handbook contains the Town Directory and Village Directory. Part B contains the Primary Census Abstracts and Part C contains the Introductory Essay, Official Statistics, Census tables, etc. The details of the contents in each of the parts are described in the following paragraphs.

2. Scope of District Census Handbook 1971

The District Census Handbooks are the only publications which incorporate the data down to the village and block level of a town,which are urgently and frequently required by the data users. They are constantly referred to for several purposes by the administrator, planner, policy-maker and academician. The delay in the publication of

the District Censns Handbooks would reduce the value of these very useful publications. In order to avoid delay in the publication, the District Census Handbooks of 1971 are sub-divided into three parts, two of which are combined in one volume, and the third published separately. The details of the content of each of the parts are as follows:—

Part A : Town and Village Directory

Part A contains the non-census statistics of each village and town. The Town Directory portion furnishes the data for each town in the district in seven statements covering (1) the status of the civic administration and the functional category of towns, and the growth of population since 1901; (2) physical aspects and location; (3) civic finances; (4) civic and other amenities; (5) medical, educational recreational and cultural facilities; (6) trade, industry, commerce and banking facilities and (7) population by religion.

The Village Directory Section of Part A gives particulars of amenities available for each village in the matter of educational and medical institutions, power supply, drinking water facilities, post and telegraph facilities, communications, particulars of land use, weekly markets and places of religious, historical and archaeological interest in the village.

Part B : Primary Census Abstract

Part B gives for each village and for each block and ward of a town the primary census data incorporating area of the town in square kilometres, and of village in acres and gunthas, the number of occupied residential houses, the number of households, total population and its break up by sex, scheduled caste and scheduled tribe population, literate population, and working population by nine broad industrial categories namely (1) cultivators, (2) agricultural labourers, (3) those working in livestock, forestry, fishing, plantations, etc., (4) mining and quarrying, (5) manufacturing, processing, servicing and repairing, (6) in constructions, (7) in trade and commerce, (8) transport, storage and communications and (9) in other services and the non-working population.

Part C : Administrative Statistics and Report

Part C would incorporate the administrative statistics, pertaining to the district in various fields of development. The census tables pertaining to the district regarding mother tongue, religion, migration, etc., will also be reproduced here. A write up indicating the changes in the socio-economic and demographic characteristics of the district in the last decade would also be given.

The non-census data of the village directory and town directory were collected from the local bodies. The villagewise details regarding different types of amenities available at the village, land use data and other information were collected in the village directory form through the Taluka Panchayat offices. These forms were filled by the village officials and were scrutinised by the Statistical Assistants at the Taluka level. The District Statistical Officers supervised the work and carried out percentage scrutiny. The details regarding the number of villages having post and telegraph facilities in the State, those connected with electric power supply, those having all weather and fair weather bus facilities, and those without drinking water facilities etc., were obtained from the concerned departments by the Office of the Director of Census Operations. The information recorded in the village directory forms was cross checked with the data obtained from concerned departments, confirmed and made up-to-date.

The non-census data for each of the towns were obtained from the municipal authorities in the case of municipal towns and for other towns the data were obtained from the concerned Nagar and Gram Panchayats. The information received from the concerned municipalities and panchayats was scrutinised and cross checked with other published official statistics for a few items wherever it was possible.

3. Note on Town Directory

A. The list of urban areas, for the purpose of 1971 Census, was finalised in consultation with the State Government. The following criteria were applied for the purpose of determining any area as an urban area.

(1) All places where there is a Municipal Corporation, or a Municipality or a Town Committee or a Notified area or a Cantonment Board have been treated as urban areas.

(2) The remaining places were recognised as enjoying urban characteristics and declared urban areas only if the following conditions were fulfilled.

(a) The estimated population at 1971 Census should be at least 5000.

(b) The density of population per sq.kilometre should not be below 400.

(c) 75 per cent of the male working population should follow non-agricultural pursuits, and,

(d) In the opinion of the Director of Census Operations any other place where predominant urban characteristics are noticed.

B. The town directory has been compiled in the following seven statements for all the urban areas of a district. For presentation of the data all the towns of a district are arranged in alphabetical order. In Appendix I to the Town Directory all the towns of a district are arranged according to their location code numbers. The details of the data covered in these statements are given below:

Statement I

Statement I gives the details relating to the status of the towns, growth history of towns since 1901 and their functional categories in 1961 Census and 1971 Census.

Statement II

This statement gives details of physical aspects and location of the towns. Under physical aspects are given details relating to altitude of the towns (in metres) annual rainfall (in m.ms) and minimum and maximum temperature (in centigrade). The statement also gives the details of distance of the towns from the nearest city with population of 1 lakh and above, from State Headquarters, District Headquaters, sub-divisional and Taluka Headquarters, from the nearest railway station and bus route. It also gives details as to whether or not the town has a navigable river or canal within 10 km. and the name of sea ports within 50 km.

Statement III

This statement gives details of civic finance for the year 1968-69. It covers the receipts under different heads like receipt through taxes, receipt derived from municipal property and powers, government grant, loans, advances and other sources. It also covers the items of expenditure on different heads like general administration, public safety, public health and convenience, public works, public institutions and others.

Statement IV

This statement gives details about civic and other amenities. It covers information on the type of road with length, system of sewerage/ drainage, number of latrines by types, method of disposal of night soil, source and capacity of protected water supply and availability of fire fighting services. The statement also gives details of the number of electric connections by types.

Statement V

This statement gives details relating to medical, educational, recreational and cultural facilities in the town. Details relating to medical institutions by types and the number of beds in each type of institutions are also covered. Details regarding different types of educational institutions are given. It also covers details relating to facilities of stadia, cinemas, auditoria or drama halls and libraries.

Statement VI

This statement covers the details relating to trade, commerce industry and banking. The statement gives details of three most important commodities imported in the towns, three important commodities exported from the towns and three important commodities manufactured in the towns. It also gives details of the number of banks and cooperative credit societies.

Statement VII

This statement gives the population of the town by religion. Data for this table data is extracted from 1971 Census data.

C. It is during the 1971 Census that Valsad appears as a separate District for the first time. At the

1961 Census it formed a part of the composite Surat District which was then comprised of 21 Talukas and Mahals. The composite district at that time has seventeen urban areas. On the bifurcation of the District in 1964 into the two separate Districts of Surat and Valsad eight of the original 21 Talukas and Mahals were transferred to the newly constituted Valsad District. In the process of transfer ten of the original seventeen urban areas of the composite District were also transferred to the newly formed Valsad District. With Atul, Bansda, Chikhli and Udvada acquiring urban status during the 1971 Census the total of Valsad District's urban areas in 1971, therefore, goes up to 14. Atul and Udwada have acquired urban status for the first time during the 1971 Census. Bansda, which enjoyed urban status until the 1951 Census, was declassified during 1961 and again regains its urban status at the 1971 Census. Similarly, Chikhli which was recognised as an urban area at the 1901 Census and thereafter declassified, again regains its urban status in 1971.

D. There are two town agglomerations in the District. The Navsari agglomeration comprises of Navsari proper and Jalalpore which is agglomerated to it. The Valsad agglomeration similarly comprises of two units, Valsad itself and Abrama which is agglomerated to it. Valsad also has outgrowth in its non-municipal areas as well as some extending into the adjoining villages. Bilimora town has outgrowth in its non-municipal area and the adjoining village of Desara. The details of outgrowths of urban areas in the District may be found in Appendix II to the Town Directory Statements.

Details of standard Urban Areas in the district are as under :—

District	Standard Area and Component Units	Civic Status	Area in Km.²
1	2	3	4
Valsad	Total Navsari (S.U.A.)		40.17
	Urban Components		
	(a) Navsari	M	8.52
	Jalalpore	V.P	9.55
	Total Urban group		18.07
	Rural Components		
	Vejalpore		3.57
	Chhapra		2.89
	Jamalpor		1.73
	Tighra		2.32
	Kabilpor		2.55
	Chovisi		3.92
	Viraval		5.02
	Total Rural group		22.10

Note on Statement I

Townwise details relating to status, growth history and functional categories are given by arranging the towns in alphabetical order. The civic administration status of each town has been recorded in column 5 of the statement by using the following abbreviations.

	Status	*Abbreviation*
1.	Corporation	C
2.	Municipality	M
3.	Town Committee/Town Area Committee/Board	TC
4.	Notified Area Committee/Council	NAC
5.	Cantonment/Board	CB
6.	Nagar Panchayat/Panchayat	P
7.	Non-Municipal/Non-Town Committee/ Non-Panchayat Committee	NM

Three towns in the district have municipalities and 11 towns have panchayats. (4 have nagar panchayats and 7 have gram panchayats). With the implementation of the panchayat Act in Gujarat from 1-4-1963 places having a Population of more than 10,000 but less than 20,000 have been given the status of Nagar panchayats and those having a population of less than 10,000 persons have been notified as Gram Panchayats. It can be seen from the Statement that there is no town in the district having a population of more than one lakh. Those having a population of more than 50,000 but less than one lakh number 2 as against only 1 in 1961; those having a population of more than 20,000 but less then 50,000 number 1 as against 2 in 1961; those having a population of more than 10,000 but less than 20,000 number 4 as against 3 in 1961 and those having a population of more than 5,000 but less than 10,000 are 5 as against 4 in 1961. Two towns have less than 5,000 population against no town in this class during 1961 Census.

Columns 14 and 15 of the Statement give the functional category of the towns according to 1961 Census and 1971 Census. The method adopted for determining the functional category is uniform for 1961 (Atlas Volume) and 1971 Census. The functional categories are worked out on the basis of the following formula.

The nine Industrial categories of workers adopted in 1971 Census are grouped into five sectors as follows.

		Categories
(1)	Agricultural and its allied activities	I,II,III & IV
(2)	Industrial including construction	V,VI
(3)	Trade and Commerce	VII
(4)	Transport, Storage and Communications	VIII
(5)	Other Services	IX

The percentage of workers under each of the above five groups to total working population is worked out for each town. These towns are then classified according to their pertcentage values which will determine the characteristic of the town as primary activity, industrial, commercial, transport and services, etc., on the following basis.

(i) If one sector of the economy absorbs more than two-fifths of the total working population (i.e. more than 40 per cent), then the town would be designated by that particular industrial category which is found predominant, e.g. industrial, commercial, transport, service or primary.

(ii) If the percentage falling under any one industrial category is less than 40, then the next predominant industrial category is taken into account, so that their total reaches three fifths of the working population i.e. 60 per cent. Such a town would then be designated as industry-*cum*-service town or commerce-*cum*-transport town, etc., as the figures may indicate.

(iii) If the total of any two categories does not come upto 60 per cent, then the third predominant industrial category in order of merit is taken into account and after 60 per cent of the working population is accounted for, the town is designated as industry -*cum*-service-*cum*-transport town and so on.

On the above basis each of the towns has been assigned functional categories. Table No. 1 below gives the distribution of towns by different functional categories. It can be seen that 10 towns have one functional characteristic, two towns have two and the rest two have three characteristics.

TABLE No. 1

Distribution of towns by functional categories

Functional Category 1971	Number of Towns
1	2
1. One Characteristic :	
(a) Primary activities	4
(b) Industry	5
(c) Transport	1
	10
2. Two Characteristic:	
(a) Primary activities-*cum*-Industry	1
(b) Industry-*cum*-Services	1
	2
3. Three Characteristics:	
(a) Primary activities-*cum*-Industry-*cum*-Commerce	1
(b) Industry-*cum*-Services-*cum*-Commerce	1
	2
Total	14

Note on Statement II

This statement gives the physical aspects and the location particulars of towns. Particulars regarding data on the altitude of the towns have been obtained from the Director, Survey of India, western Circle, Abu. Details regarding temperature and rainfall have been obtained from the Director General of Observatories, Meteorological Department, Government of India and the Regional Meteorological Centre, Colaba, Bombay. However, data on rainfall and temperature were not available from the above offices for many towns. In such cases data have been collected from local sources, and remarks to that effect are given at the footnote of the statement.

As regards the altitudinal position of the towns of the District, Bansda and Dharampur

towns are higher as compared to the remaining towns. Bansda is located at an altitude of 121.0 metres above mean sea level and Dharampur at 73.0 meters above mean sea level. Vapi is at 28.0 meters M.S.L. while Chikhli is at 26 meters M.S.L. As regards the remaining towns the altitude varies from 9.0 meters in respect of Jalalpore and Valsad to 19.81 meters in respect of Udwada.

The rainfall varies considerably from town to town. The minimum and maximum rainfall recorded in the towns of the District in 1969 was 1491.3 mm. and 2356.0 mm. respectively in the towns of Navsari and Bansda respectively. The summer lasts from March to about late June during which temperatures range in the vicinity of 45° C. A temperature of 47°C was recorded at Vapi in 1969. The minimum temperature in the winter season which lasts between December and February was recorded at 5.0° C at Chikhli. Surat is the nearest city having a population exceeding one lakh in respect of all the towns of the District. Navsari is the nearest of the towns of the District to the city being located at a distance of 45.0 km. from Surat City. Dharampur on the other hand, is the farthest away from the city being at a distance of 168 km. from Surat. The distance of Gandhinagar the state Headquarters from the towns of the District varies from a minimum of 312.4 km. (from Navsari) to a maximum of 427.4 km. (from Dharampur). All the towns of the District except Dharampur, Navsari, Jalalpore and Umbergaon are within 50 km. of the District headquarters, Valsad. Seven towns of the District, viz., Atul, Bilimora, Gandevi, Navsari, Pardi, Valsad and Vapi are connected by rail while the remaining towns are not so connected. Dharampur is 64 km. away from its nearest rail head at Valsad, while Bansda is 11.5 km. away from its nearest rail head at Unai. The other towns are within 10 km. of a railway connection. All the towns are, however, connected by bus routes. The rivers Ambika, Purna, Par and Damanganga which flow through the District are navigable. The District also has sea ports at Valsad, Kolak, Kalai, Bilimora, Umarsadi, Bhagda, Maroli and Umbergaon.

Note on Statement III

The statement gives details of town finance. In Valsad district 3 towns have municipalities, 4 have Nagar Panchayats and 7 have Gram Panchayats. The following table shows the per capita receipt and expenditure by size class of town.

TABLE No. 2

Per capita receipt and expenditure by size class of towns

Size Class of Town	Number of Towns	Per Capita						
		Receipt (Rs.)			Expenditure (Rs.)			
		Total Receipt	Receipt through taxes	Receipt from all other sources	Total expenditure	Expenditure on public health and conveniences	Expenditure on public institutions	Expenditure on all other aspects
I 100,000 and over	..	..	..	..	..	..	..	..
II 50,000 to 99,999	2	53.25	24.80	28.45	54.16	11.34	3.95	38.87
III 20,000 to 49,999	1	40.44	26.22	14.22	37.09	10.05	10.47	16.57
IV 10,000 to 19,999	4	12.96	8.40	4.56	12.60	2.69	0.23	9.68
V 5,000 to 9,999	5	7.04	2.90	4.14	6.36	1.86	0.94	3.56
VI Below 5,000	2	15.49	7.25	8.24	15.61	0.23	..	15.38

It would be seen from the above figures that the per capita receipt in the towns having a population between 50,000 and 99,999 is highest at Rs. 53.25 as compared to the rest of the categories. It is followed by towns having a population between 20,000 and 49,999 (Rs. 40.44). The lowest per capita total receipt obtains in respect of towns having a population between 5,000 and 9,999 (Rs. 7.04). The per capita total receipt diminishes with the decline in population except for class VI towns where the per capita total receipt is greater than that obtaining in class IV and class V towns.

It would also be seen that the per capita receipt through taxes is highest (Rs. 26.22) in the towns having a population between 20,000 and 49,999. It is closely followed by the towns having a population between 50,000 and 99,999 (Rs. 24.80). The lowest per capita receipt through taxes is Rs. 2.90 in the towns having a population between 5,000 and 9,999. In class VI towns it is Rs. 7.25. The per capita receipt through all other sources declines with the decrease in population size of the towns except the last category where the per capita receipt from all other sources is Rs. 8.24.

The per capita expenditure is highest (Rs. 54.16) in the towns having a population between 50,000 and 99,999. It declines with the decrease in population size of the towns except for the last category (Class VI towns). The per capita expenditure on public health and conveniences similarly diminishes with the decrease in the population size and is highest (Rs. 11.34) in the towns having a population between 50,000 and 99,999. It is lowest (Rs. 0.23) in the towns having a population below 5,000. Per capita expenditure on public institutions is highest (Rs. 10.47) in Class III towns, while in Class II towns it is only Rs. 3.95. In the remaining categories of towns this figure is very low. Expenditure on all other aspects is highest (Rs. 38.87) in the towns having a population between 50,000 and 99,999 and lowest (Rs. 3.56) in the towns having a population between 5,000 and 9,999.

Note on Statement IV

Statement IV shows the civic and other amenities available in the town. The following abbreviations are used in the statement.

Column 3

Road length	**Abbreviation**
1. Pucca Road	PR
2. Kutcha Road	KR

Column 4

System of sewerage/drainage

1. Sewer	S
2. Open Surface Drainage	OSD
3. Kutcha Drainage	KD
4. Cess Pool	CS
5. Pit System (or soak pits)	PT

Column 8

Method of disposal of night soil

1. Head Load	HL
2. Baskets	B
3. Wheel Barrows	WB
4. Septic Tank latrines	ST
5. Sewerage	S
6. Soak Pits or leaching pits	PT
7. Tractor, Trailor, Trolleys or Night Soil Tankers	T

Column 9

Source of protected water supply

1. Tap Water	T
2. Tube Well	TW
3. Well Water	W
4. Tank Water	Tk
5. River	R
6. Fountain	F
7. Canal	C
8. Others	O

Only two towns viz. Bansda and Navsari have sewers. 5 towns namely Atul, Bilimora, Pardi, Umbergaon and Abrama have open surface drainage. The rest of the towns have soak pits for the disposal of waste water. Water borne latrines are found in most of the towns but service latrines outnumber water borne latrines in almost all the towns except Atul. In Bilimora, there are 1736 service latrines, while in Navsari there are 4318 and in Valsad there are 1191 service latrines. This shows that much remains to be done for conversion of service latrines into water borne ones. In four towns namely, Chikhli, Udwada, Abrama and Vapi

night soil is transported as head load. At the other towns wheel barrows are provided, except in Atul where septic tank latrines solve the problem of disposal of night soil. Protected water supply is available in all the towns except Chikhli, Gandevi, Jalalpore, Udwada and Umbergaon. Six towns of the district have fire fighting services, but the remaining towns are devoid of this facility. All the towns of the district are electrified.

Details regarding domestic, commercial, industrial and other connections are given in the statement. The following definitions have been applied for each of the terms used.

1. Domestic

(*i*) *Heat and Power*

Service to a household: supply to cooking ranges, refrigerators, air conditioners, etc., used in the household.

(*ii*) *Lights and Fans*

Service to a house which needs only lighting and fan connections.

2. Commercial

(*a*) *Heat and Power*

The same as 1(i) except that the use is for commercial purpose i.e. shops, restaurants, etc.

(*b*) *Lights and Fans*

Same as 1(ii) above except that the use is for commercial purposes i.e. shops, restaurants, etc.

3. Industrial

Power service to any installation at

(*i*) *Low and medium voltage*

Upto 100 HP load for use in establishments such as flour mills, oil mills, ice factories, etc.

(*ii*) *High voltage*

Connections given for industrial purpose at a voltage of 11 KV and above.

4. Street lighting

Power service given for providing light in the streets of a village or town.

5. Others

(*i*) *Irrigation and Agricultural dewatering*

Power given to farmers for pumping water for agricultural purpose.

(*ii*) *Public water supply and sewerage pumping*

Power service given for pumping and/or preparation of potable water supply in villages/towns and for pumping sewerage in the villages or towns.

Note on Statement V

The statement gives details relating to medical, educational, recreational and other cultural facilities in the town. In the case of medical institutions only Government, Semi-Government and charitable institutions have been covered. The abbreviations used in the statement to denote the various types of medical and educational institutions are explained below :

Column 3 :

Type of medical institutions	Abbreviation
1. Hospital	H
2. Dispensary	D
3. T. B. Clinic	TBC
4. Health Centre	HC
5. Nursing Home	NH
6. Maternity Centre	M
7. Child Welfare Centre	CW
8. Family Planning Centre	FC
9. Other Medical Institutions	O

Column 5 :

Type of College	Abbreviation
1. Arts College only	A
2. Science College only	S
3. Commerce College only	C
4. Arts and Science College only	AS
5. Combined Arts Science and Commerce College	ASC
6. Arts & Commerce College only	AC
7. Law College	L
8. Law & Education College	LE

Udwada and Abrama are completely devoid of any type of medical facility. Hospital facilities are available in five towns. One town has a maternity centre and seven have family planning centres. The following table gives particulars of the number of hospital beds available in each town :

TABLE No. 3

Medical Facilities

Sl. No.	Name of Town	Number of beds in medical institutions	Number of beds per 1000 population
1	Atul	..	..
2	Bansda	50	7.03
3	Bilimora	40	1.18
4	Chikhli	..	..
5	Dharampur	21	1.76
6	Gandevi	8	0.65
Navsari Town agglomeration :			
7	Navsari	292	4.00
8	Jalalpore	..	..
	Sub-total of agglomeration	292	3.65
9	Pardi	..	..
10	Udwada	..	..
11	Umbergaon	..	..
Valsad Town agglomeration :			
12	Valsad	108	1.96
13	Abrama	..	..
	Sub-total of agglomeration	108	1.71
14	Vapi	..	..
	Total	519	2.02

The total number of beds in the medical institutions in the towns of the district numbers 519. The highest number of beds (292) is available at Navsari followed by Valsad (108), Bansda (50), Bilimora (40), Dharampur (21) and Gandevi (8). The district average for all towns shows that there are 2.02 beds per 1000 population. Bansda and Navsari are above the average whereas the rest of the towns are below the district average.

No town of the district has a medical or engineering college, but Valsad has a polytechnic. Four towns (Bilimora, Chikhli, Navsari and Valsad) have one or more non-technical institutions. The rest of the towns are devoid of this facility. Seven towns have other recognised shorthand, typewriting or other such vocational institutions.

Primary and Secondary school facilities are available in all the towns except Abrama, where there is no Secondary school. The following table gives the details of the number of primary and Secondary schools per 1000 population.

TABLE No. 4

Secondary and Primary schools per 1000 population

Sl. No.	Name of the town	Number per 1000 population	
		Secondary school	Primary school
1	Atul	0.223	0.223
2	Bansda	0.141	0.281
3	Bilimora	0.059	0.236
4	Chikhli	0.200	0.400
5	Dharampur	0.084	0.167
6	Gandevi	0.082	0.163
	Navsari town agglomeration		
7	Navsari	0.096	0.260
8	Jalalpore	0.140	0.140
	Average of agglomeration	0.100	0.250
9	Pardi	0.078	0.235
10	Udwada	0.242	0.242
11	Umbergaon	0.129	0.575
	Valsad Town agglomeration		
12	Valsad	0.146	0.273
13	Abrama	...	0.123
	Average of agglomeration	0.127	0.254
14	Vapi	0.072	0.288
	Average	0.105	0.257

The average number of secondary schools per 1000 population for all the towns is 0.105. It can be seen from the above table that Atul, Bansda, Chikhli, Jalalpore, Udwada, Umbergaon and Valsad are above this average while the remaining towns are below the average.

The average number of primary schools per 1000 population comes to 0.257. The towns having this facility above the average are Bansda, Chikhli, Navsari, Umbergaon, Valsad and Vapi. The remaining towns are below this average.

Only Atul, Bansda and Valsad have stadia. One or more cinemas are found in all the towns except Atul, Chikhli, Jalalpore and Abrama. The services of public libraries are available in all the towns of the district.

Notes on Statement VI

Statement VI gives details relating to trade, commerce, industry and banking in the towns. All the towns of the district have banking facilities except Abrama, Jalalpore and Udwada. Agricultural co-operative credit societies are found in all the towns except Atul, whereas non-agricultural credit societies obtain in all the towns except Abrama, Udwada and Vapi.

The important commodities manufactured in the towns of the district are colour dye, medicines, chemicals, mill-made and power loom cloth, sugar and plastic goods. Atul is an industrial town manufacturing pharmaceuticals and synthetic colours. Gandevi is a centre for the production of power loom cloth. Metal utensils are manufactured at Navsari and Gandevi. At Bulsar, art silk and handloom cloth and chinaware are manufactured. There is a leather factory at Dharampur which manufactures rexine and other leather cloth. The commodities exported from these towns are pharmaceuticals, dyestuffs, brass utensils, power-loom cloth, rice, jowar, fruit, salt, fish and grass. The most important commodities imported into the district are cloth, food-grains and edible oils.

Notes and explanations on village directory

A brief outline on each of the statement of the Town Directory has been given in the earlier pages. The Handbook also incorporates, besides the town directory, villagewise particulars regarding different types of amenities and land use data for 1969 for each of the villages in the district in the village Directory section of the Handbook. In Valsad district there are 826 villages distributed in 8 talukas. The following is the distribution of the villages in the various Talukas/Mahals of the district.

Sl. No.	Name of Taluka	Number of village
1	Valsad	91
2	Pardi	78
3	Umbergaon	49
4	Gandevi	55
5	Navsari	138
6	Chikhli	84
7	Bansda	94
8	Dharampur	237
	Total	826

One taluka cover more than 200 villages, one covers more than 100 villages where as the remaining talukas have less than 100 villages each. Dharampur taluka has the largest number of villages (237) whereas Umbergaon has the least number(49).

The following abbreviations have been used in the Village Directory section of the Handbook for the terms listed in Col.2 of the Statement below.

Column Number	Item	Abberviation
4	Primary School	Pr.S
	Secondary School	Sec.S
	College	C
	Industrial School	IS
	Training School	Tr.S
	Other Educational Institutions	OS
5	Hospital	H
	Maternity Home/Centre	M
	Child Welfare Centre	CW
	Health Centre	HC
	Dispensary	D
	Family Planning Centre	FC
6	Electricity for any purpose	E
	Electricity for agricultural purpose only	E(Ag)
7	Tap Water	T
	Well	W
	Tank	Tk
	Tube Well	TW
	River	R
	Fountain	F
	Canal	C
	Other	O
	Not Available	N.A.
8	Pucca Road	PR
	Kutcha Road	KR
	Railway Station	T
	Navigable River	Ng(R)
	Navigable Canal	Ng(C)
	Bus facility	
	Whole Year	WY
	Fair Season	FS

9	Post Office	PO
	Telegraph Office	TO
	Post & Telegraph Office	PTO
	Telephone	Phone
12	Government Canal	C
	Private Canal	C
	Tube Well	TW
	Other wells	W
	Tank	Tk
	River	R
	Waterfall	WF
	Other Sources	O

(a) Taluka abstract of amenities

A talukawise abstract of the educational, medical and other amenities available at the villages is given in an Appendix to the Village Directory. It can be seen from the abstract that 757 villages have primary school facilities. There are thus only 69 villages without primary schools. The details of villages without primary schools are as follows:-

Sl. No.	Name of Taluka	Number of villages without Primary school	Number of deserted villages
(1)	Valsad	2	..
(2)	Pardi	2	..
(3)	Umbergaon	2	..
(4)	Gandevi	..	..
(5)	Navsari	12	..
(6)	Chikhli	..	..
(7)	Bansda	5	..
(8)	Dharampur	46	..
	Total	69	..

Forty six of the 69 villages without a primary school fall in Dharampur taluka, which has a considerable tribal population. In Navsari taluka 12 villages are without a primary school. Only five villages are without a school in Bansda taluka and only two villages each in Valsad, Pardi and Umbergaon talukas.

Only 80 villages or 9.69 per cent of the total have secondary schools and an equal number of villages have other educational institutions.

It can be seen that only 70 villages or 8.47 per cent have dispensaries. Only five villages have the facility of hospitals and 17 villages have maternity homes. Only seven villages have child welfare centres. 41 villages have primary health centres (including sub-centres) and 39 villages have family planning centres. Thus only a limited number of villages in the district have medical facilities. Only 232 or 28.09 per cent of the villages are electrified.

Ordinary surface wells are the main source of drinking water facility. Only 57 villages or 6.90 per cent of the total have tap water supply. Other sources of water supply include tanks (221 villages) and rivers (379 villages).

Only 322 villages or 38.98 per cent of the total are connected with pucca road. 381 villages or 46.13 per cent have post offices, and only 19 villages have both post and telegraph offices. 33 villages in the district have telephones.

(b) Bus Facilities

The details of villages connected by bus services have been incorporated in the village directory. Bus facility is considered to be available at the village if a bus stop is available within one mile from the village.

It would be seen from the following figures that 242 or 29.30 per cent of the villages are connected by bus services throughout the year. Those connected by bus services only during fair season number 265 and form 32.08 per cent of the total villages in the district. There are yet 319 villages or 38.62 per cent of the total villages which are devoid of this amenity even during fair season. A talukawise break-up of villages connected by bus services is given hereunder.

Villages connected by bus services

	Name of Taluka/ Mahal	Total Number of inhabited villages	Number of villages having bus facilities for the whole year	Number of villages having bus facilities during fair season only	Number of villages without bus facilities
	1	2	3	4	5
1	Valsad	91	36(39.56)	36(39.56)	19(20.88)
2	Pardi	78	31(39.74)	29(37.18)	18(23.08)
3	Umbergaon	49	27(55.10)	14(28.57)	08(16.33)
4	Gandevi	55	24(43.64)	27(49.09)	04(7.27)
5	Navsari	138	60(43.48)	44(31.88)	34(24.64)
6	Chikhli	84	27(32.14)	47(55.95)	10(11.91)
7	Bansda	94	23(24.47)	19(20.21)	52(55.32)
8	Dharampur	237	14(5.91)	49(20.67)	174(73.42)
	Total	826	242(29.30)	265(32.08)	319(38.62)

(Figures in brackets indicate percentage of total villages in each taluka)

It would be seen that the percentage of villages connected by bus services throughout the year varies considerably among different talukas. It varies from a minimum of 5.91 per cent in Dharampur taluka to a maximum of 55.10 per cent in Umbergaon taluka.

The percentage of villages connected by bus services only during fair season also varies from the minimum of 20.21 per cent in Bansda taluka to a maximum of 55.95 per cent in Chikhli taluka.

There are yet 319 villages which are not connected by bus services even during fair season. The maximum number of such villages are noticed in Dharampur taluka having 174, followed by Bansda with 52 and Navsari with 34. In the rest of the talukas this figure varies from a minimum of 4 villages in Gandevi taluka to a maximum of 19 villages in Valsad taluka.

(c) **Distribution of villages by area**

The distribution of villages by their areas is given in the following table in 8 size groups.

TABLE No. 5

Distribution of the villages by their areas in acres

Sl. No.	Area in Acres	Number of villages
1	2	3
1	50 acres or less	..
2	51 — 100	2 (0.24)
3	101 — 200	3 (0.36)
4	201 — 500	78 (9.44)
5	501 — 1000	258 (31.23)
6	1001 — 2000	298 (36.08)
7	2001 — 5000	174 (21.07)
8	5001 acres and above	13 (1.58)
	Total	826 (100.00)

It would be seen from the above table that the maximum number of villages (298) have an area between 1001 and 2000 acres. This group forms 36.08 per cent of the total. It is followed by the area group of 501 to 1000 acres with 258 villages which forms 31.23 per cent of the total. Thus nearly 67.31 per cent of the total have an area between 500 acres and 2000 acres. 174 or 21.07 per cent have an area between 2001 and 5000 acres. Only 13 villages or 1.58 per cent have an area of 5001 acres and above. Those below 500 acres are 83 of which only 3 have an area between 101 and 200 acres, and 2 have an area below 100 acres.

(d) Distribution of villages by Educational Amenities

Table No.6 below shows the distribution of villages having educational amenities by distance from the nearest town.

TABLE No. 6

Distribution of villages having educational amenities by distance from the nearest town

Sl. No.	Distance from the nearest town	Number of villages	Number of villages having				
			Primary school	Middle School	Higher secondary school	College	Others
1	5 km. or less	172	164(95.35)	..	20(11.63)	1(0.58)	23(13.37)
2	6 — 10 km.	199	193(96.98)	..	29(14.57)	..	22(11.06)
3	11 — 15 km.	154	149(96.75)	..	20(12.99)	..	19(12.34)
4	16 — 25 km.	141	130(92.20)	..	11(7.80)	..	11(7.80)
5	26 — 50 km.	133	101(75.94)	..	..	..	5(3.76)
6	51 — 100 km.	27	20(74.07)	..	..	..	..
7	101 — 200 km.	..	..	..	..	..	..
8	201 km. and above	..	..	..	..	..	..
	Total	826	757(91.65)	..	80(9.69)	1(0.12)	80(9.69)

(Figures in brackets indicate percentage of total number of villages in each distance group.)

Table 6 shows that 95.35 per cent of the villages situated within 5 km. from the nearest town have primary school facilities. This proportion slightly increases in the next distance group of 6 to 10 km. to 96.98 per cent. Thereafter it declines *pari passu* with the increase in the distance group from the nearest town. Only 74.07 per cent of the villages situated beyond 50 km. have primary school facilities. An almost similar trend is noticed for secondary schools. Regarding other

types of schools the proportion of villages having this facility declines *pari passu* with an increase in the distance from the nearest town.

(e) Medical facilities

Distribution of medical institutions per 100 sq. km. is given in the following table.

TABLE No. 7

Medical facility per 100 sq. km.

Sl. No.	Name of Taluka	Total area (in sq. km.)	Number of medical institutions of any kind per 100 sq. km.
1	Valsad	510	4.3
2	Pardi	428	4.7
3	Umbergaon	361	6.6
4	Gandevi	284	5.3
5	Navsari	735	4.8
6	Chikhli	575	4.3
7	Bansda	600	3.7
8	Dharampur	1650	1.0

The above table shows that the number of medical institution per 100 sq. km. is highest (6.6) in Umbergaon taluka. Umbergaon is followed by Gandevi with (5.3), Navsari (4.8), Pardi (4.7), and Valsad and Chikhli (4.3 each). The lowest proportion is noticed in Dharampur taluka (1.0 per 100 sq. km.).

(f) Electricity

Only 232 villages have electricity. The distribution of these villages by their distance from the nearest town is as under :—

TABLE No. 8

Distribution of villages with electricity and distance from the nearest town

Sl. No.	Distance from the nearest town	Total Number of villages	Number of villages with electric power supply
1	2	3	4
1	5 km. or less	172	102(59.30)
2	6 — 10 km.	199	70(35.18)
3	11 — 15 km.	154	43(27.92)
4	16 — 25 km.	141	16(11.35)
5	26 — 50 km.	133	1(0.75)
6	51 — 100 km.	27	..
7	101 — 200 km.	..	..
8	201 km. and above	..	..
	Total	826	232

(Figures in bracket indicate percentage to total number of villages in each distance groups)

It would be seen from the above table that the proportion of number of villages electrified diminishes *pari passu* with the increase in the distance from the nearest town. This proportion for villages within 5 km. is 59.30 per cent. It declines considerably in the next distance group of 6 to 10 km. to only 35.18 per cent. This proportion in distance group of 11 to 15 km. comes to 27.92 per cent and 11.35 per cent in 16 to 25 km. Only one out of 133 villages beyond 25 km. from the nearest town is electrified. No village beyond 50 km. from the nearest town is electrified.

(g) Communications

The following table gives the distribution of villages having different type of communication facilities by distance from the nearest town.

TABLE No. 9

Distribution of villages with different Communication facilities and distance from the nearest town

Sl. No.	Distance from the nearest town	Total number of villages	Number of villages connected by					
			Pucca Road	Kutcha Road	Pucca road and river	Pucca road and rail	Kutcha road and rail	Others
1	2	3	4	5	6	7	8	9
1	5 km. or less	172	86(50.00)	59(34.30)	..	18(10.47)	7(4.07)	1(0.58)
2	6 — 10 km.	199	86(43.22)	92(46.23)	..	12(6.03)	6(3.02)	1(0.50)
3	11 — 15 km.	154	62(40.26)	82(53.25)	..	8(5.19)	2(1.30)	..
4	16 — 25 km.	141	40(28.37)	94(66.67)	..	5(3.54)	2(1.42)	..
5	26 — 50 km.	133	5(3.76)	90(67.67)	..	..	..	..
6	51 — 100 km.	27	..	9(33.33)	..	..	..	..
7	101 — 200 km.	..	..	..	..	..	..	..
8	201 km. and above	..	..	..	..	..	..	..
	Total	826	279(33.78)	426(51.57)	..	43(5.21)	17(2.06)	2(0.24)

(Figures in brackets indicate percentage of the total number of villages in each distance group)

It would be seen from the above table that the proportion of pucca road facility to the villages diminishes *pari passu* with the increase in the distance from the nearest town. The number of villages having facility of pucca road within a distance of 5 km. from the nearest town is 86 which forms 50.00 per cent to the total villages in that group. This proportion is 43.22 per cent for those situated in the distance group 6 to 10 km. and 40.26 per cent for those in the distance group 11 to 15 km. It is 28.37 per cent for those in the distance group of 16 to 25 km. while it is only 3.76 per cent for those in the distance group 26 to 50 km. None beyond 50 km. has pucca road facility. The trend is almost reverse for kutcha roads.

It would similarly be seen from the table that the facility of pucca road and rail diminishes *pari passu* with the increase in the distance from the nearest town. A similar trend is also noticed in respect of the facility of kutcha road and rail.

(h) Number of post offices

The following table gives the distribution of post officer per 100 sq. km.

TABLE No. 10

Numbers of post offices per 100 sq. km.

Sl. No.	Name of Taluka	Total area in sq. km.	Number of post offices per 100 sq. km.
1	Valsad	510	11.2
2	Pardi	428	10.5
3	Umbergaon	361	8.6
4	Gandevi	284	12.7
5	Navsari	735	11.2
6	Chikhli	575	9.7
7	Bansda	600	4.8
8	Dharampur	1650	2.7

The above table shows that Gandevi taluka has the largest number of post offices per 100 sq. km. (12.7). It is followed by Valsad and Navsari talukas each with 11.2, Pardi with 10.5, Chikhli with 9.7 and Umbergaon with 8.6. The lowest number of post offices per 100 sq. km. is to be seen in Dharampur (2.7) followed by Bansda (with 4.8).

(i) Staple Food

Nagli, Jowar, Wheat and Rice constitute the staple food of the District.

Distribution of villages by staple food

Sl. No.	Name of Taluka	No. of villages reporting staple food				
		Nagli	Jowar	Wheat	Rice	Maize
1	Valsad	5	85	34	90	..
2	Pardi	21	50	24	78	..
3	Umbergaon	2	44	24	49	..
4	Gandevi	..	54	31	55	..
5	Navsari	..	137	115	138	..
6	Chikhli	20	82	37	84	..
7	Bansda	81	77	..	94	..
8	Dharampur	233	53	1	237	..

(j) Land Use

The following table gives the percentage of average cultivable waste per village to average cultivated land per village by distance from the nearest town. The cultivable waste land includes pastures and grazing land and area under miscellaneous trees and groves but does not include orchards.

TABLE No. 11

Percentage of average cultivable waste per village to average cultivated land per village by distance group from the nearest town.

Sl. No.	Distance from the nearest town	No. of villages	Total cultivated land (in acres)	Average cultivated land per village (in acres)	Total cultivable waste (in acres)	Average cultivable waste per village (in areas)	Percentage of average cultivable waste per village to average cultivated land per village
1	2	3	4	5	6	7	8
1	5 km. or less	172	147,374	856.8	16,344	95.0	11.09
2	6 — 10 km.	199	201,490	1,012.5	17,861	89.8	8.87
3	11 — 15 km.	154	156,664	1,017.3	15,806	102.6	10.09
4	16 — 25 km.	141	130,280	924.0	28,390	201.3	21.79
5	26 — 50 km.	133	58,198	437.6	18,310	137.7	31.47
6	51 — 100 km.	27	13,382	495.6	3,141	116.3	23.47
7	101 — 200 km.	..	..	..	..	..	..
8	201 km. and above	..	..	..	..	..	..
	Total	826	707,388	856.4	99,852	120.9	14.12

It would be seen from column 5 of the above table that the average area of cultivated land per village increases with the increase in distance from the nearest town in the first three distance groups upto 11 to 15 km. Thereafter it declines with the increase in the distance from the nearest town in the two subsequent groups.

It would also be seen from column 7 of the statement that the average area of cultivable waste land increases with the increase in the distance from the nearest town, in the first four distance groups upto 25 km. whereas in the subsequent two groups it declines with the increase in the distance from the nearest town.

It would likewise be seen from column 8 that the percentage of average cultivable waste land to average cultivated land per village is lowest in the distance group of 6 to 10 km. (8.87). In the rest of the groups it varies from 10.09 to 31.47 per cent. This percentage in the first three distance groups (upto 15 km.) is considerably lower than the subsequent three distance groups.

TOWN DIRECTORY

TOWN DIRECTORY
STATEMENT I
Status, Growth, History and Functional Category of Towns

Sl. No.	Name of Town	Location Code No.	Name of Taluka	Civic Administration status in 1970	Population of the Town at the Censuses of								Functional Category

Note :—

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of Primary, Secondary and other Schools. The figures in brackets under Col. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

Note :—

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of Primary, Secondary and other Schools. The figures in brackets under Cols. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

Note :—

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of Primary, Secondary and other Schools. The figures in brackets under Cols. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

Note :-

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of Primary, Secondary and other Schools. The figures in brackets under Cols. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

Note :—

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of Primary, Secondary and other Schools. The figures in brackets under Cols. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

Note :—

The figures in the last line indicate Taluka totals. The figures in brackets in this line under Col. 4 indicate the number of Primary, Secondary and other Schools. The figures in brackets under Cols. 5 to 9 indicate the number of villages having those particular amenities.

The area figures shown in Col. 3 may not tally with the total of Cols. 11 to 15 in some cases due to rounding.

PART X-B

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

Primary Census Abstract of 1971 Census provides information in respect of each village in rural area and town/ward/enumerator's block in urban area. It gives information about the area of the village in acres and towns in square kilometres, number of occupied residential houses and households, total population with sex break-up (including Houseless and Institutional Population) and population of Scheduled Castes and Scheduled Tribes, literate and educated persons. The entire population of each village/urban enumerator's block is divided into nine industrial categories of workers and non-workers as under :—

I Cultivators

II Agricultural Labourers

III Livestock, Forestry, Fishing, Hunting & Plantations, Orchards & Allied Activities

IV Mining and Quarrying

V Manufacturing, Processing, Servicing and Repairs
- (a) Household Industry
- (b) Other than Household Industry

VI Construction

VII Trade and Commerce

VIII Transport, Storage and Communications

IX Other Services

X Non-workers

The sexwise break-up of total workers (industrial category I to IX) have been presented, in addition to similar break-up for each industrial category of Worker and Non-worker.

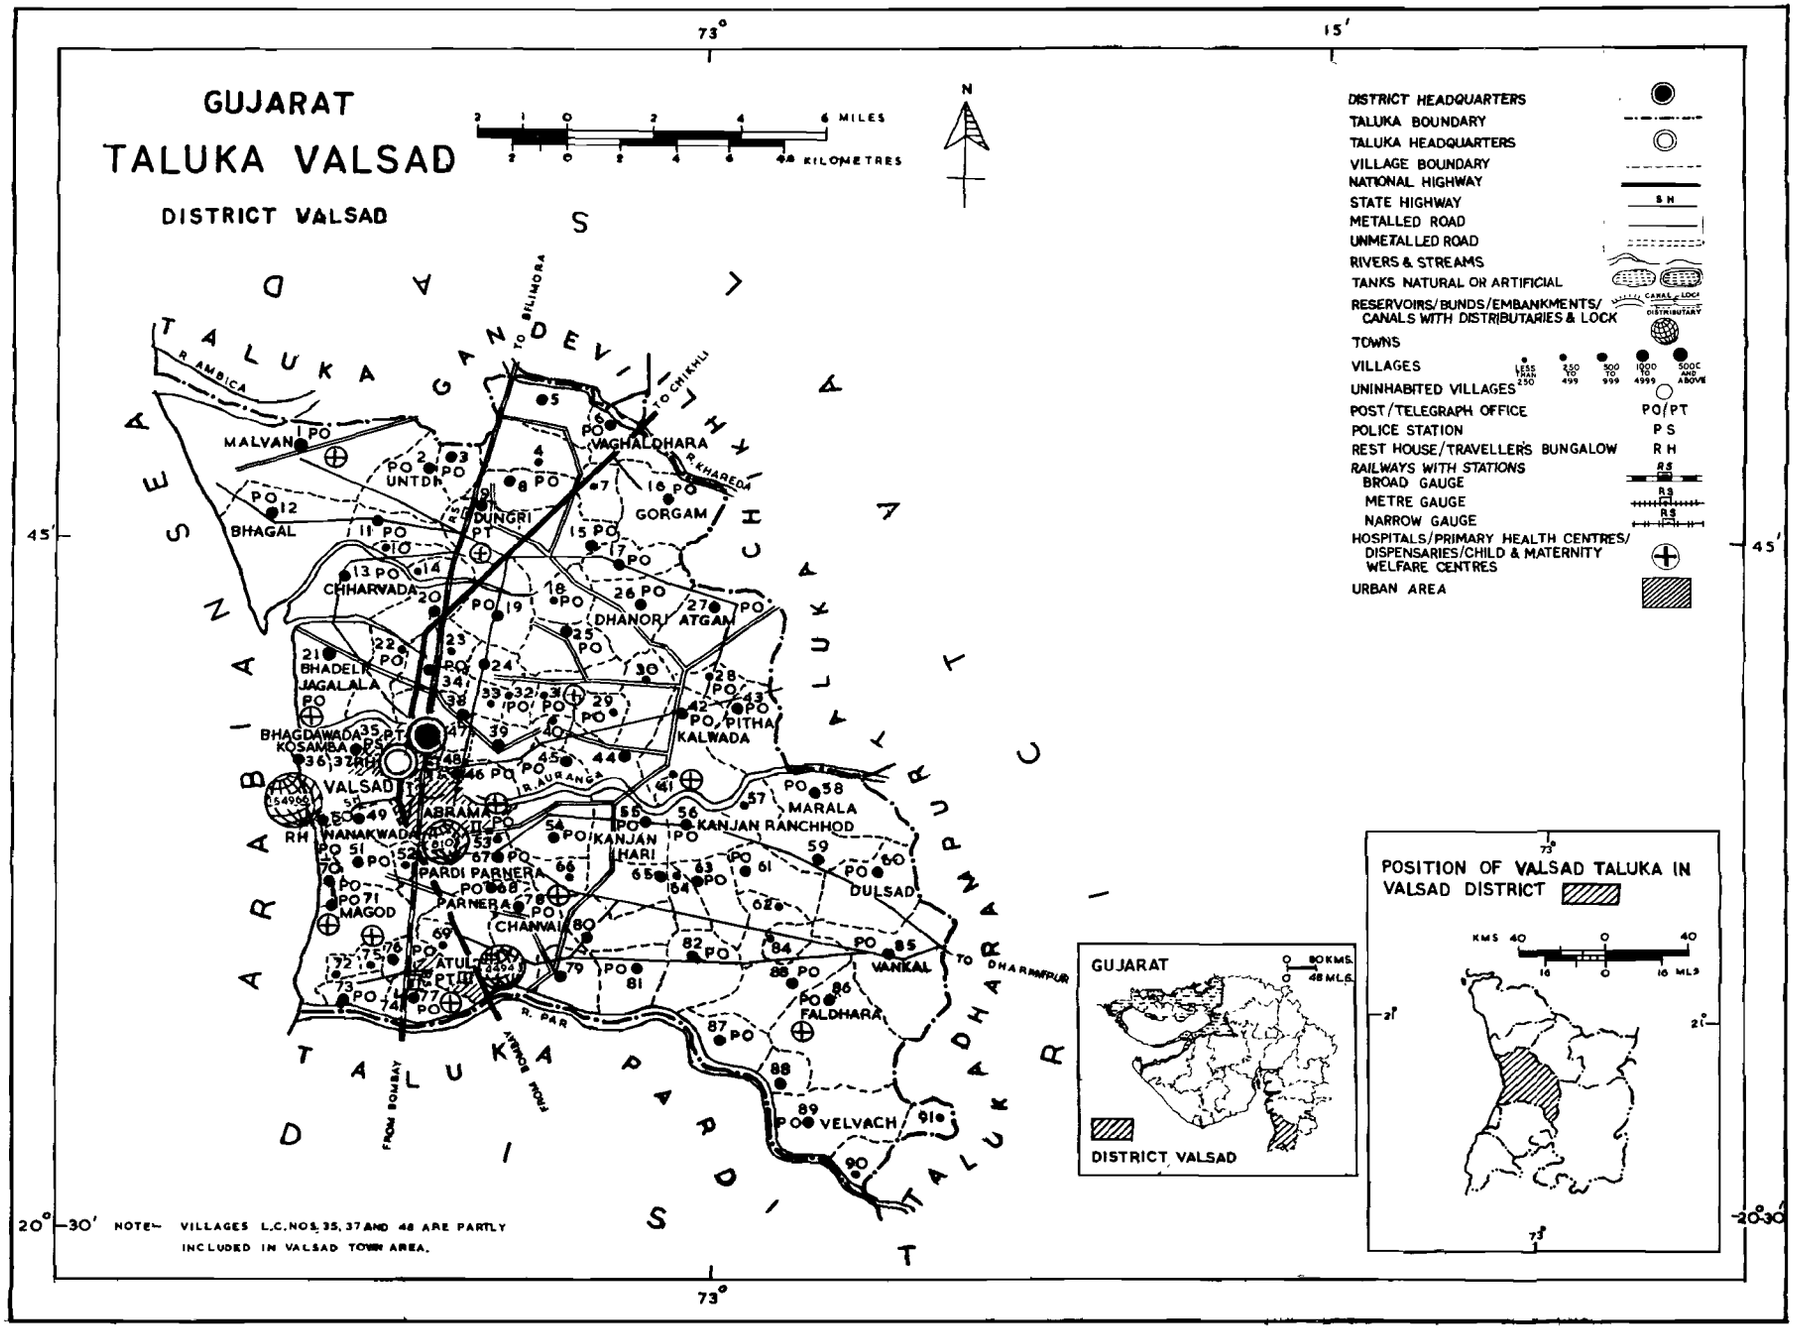

The following abbreviations have been used in the Primary Census Abstract for facility of presentation :-

1	Municipal Corporation	MC
2	Municipality	M
3	Non-Municipal Area	NM
4	Nagar Panchayat	NP
5	Village Panchayat	VP
6	Cantonment	Cantt.
7	Not Available	N A
8	Outgrowth	O G

The following conversion factor has been used for converting acres into $Km.^2$

Acres x 0.004047 = $Km.^2$

* These represent provisional 'geographical area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by substracting the urban area from the total area of the District. The total of the area figures of the Talukas/Mahals will not tally with the district figures because the former represent 'land use' area and are derived from the figures supplied by the Director of Land Records.
