DISTRICT CENSUS HANDBOOK
1951

UNNAO DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is thirty nine. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh.

RAMPUR:
October 6, 1955.

INTRODUCTION

A—The District

1. The district of Unnao is bounded on the north by Hardoi, on the east by Lucknow, on the south by Rae Bareli and on the west by the river Ganga, which separates it from the Kanpur and Fatehpur districts. It has an area of 1,762 square miles and its population in 1951 was about 10·7 lakhs. It has 4 tehsils, 22 parganas and 16 thanas.

Topography

2. In its general aspect, the district may be divided into two main divisions—the low-lands or *tarai*, lying along the banks of Ganga ; and the uplands, which extend eastwards from the high bank. All along the immediate banks of the river lies a stretch of alluvial land which is constantly subject to inundations. Beyond this tract, which is directly subject to the fluvial action, lies a stretch of low land, containing a small population, with large areas unfit for cultivation and with a constant liability to disastrous floods. The whole of the low land is rendered precarious by the possibility of inundations whenever there is sudden rise in the river and in most years the *kharif* crop is a doubtful speculation.

The *tarai* is separated from the uplands by the old high bank of the river, which is in most cases well defined. Immediately underneath this bank we generally find a line of swampy depressions along which the Kalyani flows. In the Unnao tehsil the rise from the level of *tarai* is usually very gradual. The bank runs from north to south in an irregular course and is by no means parallel to the present channel of Ganga. On the top of the bank the soil is generally of a very inferior quality, light and sandy and deficient in means of irrigation.

Stretching eastwards from the high bank lies the upland portion, which extends as far as the valley of Sai. The surface is gently undulating, ridges of high and somewhat sandy soil giving place to wide depressions in which clay prevails. In the deeper of these depressions lakes of a more or less permanent character are to be found, while in the others there are shallow swamps, which dry up in hot weather and are of little use except for rice cultivation. The country is well wooded. Another conspicuous feature of the country consists of the wide expanses of arid *usar*, which in so many parts form the bulk of waste land. In the Safipur tehsil the surface is uneven and towards the Hardoi border the soils are light and sandy. There are large plains of barren *usar* in Hasanganj. In the north and west of Hasanganj the surface is undulating. In Unnao the upland is somewhat flat and there are none of the ridges of high sandy soil which form so marked a feature of the other portions of the district. Purwa tehsil has also large stretches of *usar*. In the extreme east lies the valley of river Sai. It is subject to floods and the villages along its course suffer from water logging and efflorescence of *reh*.

Soils

3. The district is of average but not exceptional fertility ; the cultivated land is usually fertile and the best land is of a high quality, but at the same time there are considerable stretches of inferior soil, light sandy *bhur*, which is peculiarly susceptible to drought and on this account to be regarded as generally precarious. The soil is for the most part a fertile loam (*dumat*) of light texture and similar to that which prevails throughout Avadh. Clay is found in places, while elsewhere, and generally in the west and north, there is a high proportion of sand. Here and there salt earth is to be found, but the manufacture of salt would not be profitable owing to the deficiency in quality and extent.

Classification of area

4. The figures of the classification of the area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	652,454	57·0
Culturable waste (excluding current fallow)	216 558	18·9
Current fallow	41,840	3·7
Forest	90	..
Area not available for cultivation of which—	233,110	20·4
(*a*) *Covered with water*	*67,033*	*5·9*
(*b*) *Under sites, roads and buildings*	*37,462*	*3 3*
(*c*) *Barren*	*128,615*	*11·2*

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a detailed enquiry through the District Officers regarding the nature of this area in each district.

The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total culturable waste (A+B+C)	**215,963**	**100**
A—Area under culturable waste land not available for immediate cultivation ..	72,217	33·44
(i) Forest under any legal enactment	90	0·04
(ii) Groves	61,536	28·49
(iii) Forests of timber trees	905	0·42
(iv) Thatching grasses, shrubs and bushes	7,095	3·29
(v) Land kept for grazing	2,591	1·20
B—Area under culturable waste land available for immediate cultivation but which could not be cultivated	98,375	45 55
Of which due to—		
(i) *Kans* growth	3,236	1·50
(ii) Threshing floors	6,863	3·18
(iii) Malaria	1,099	0·50
(iv) Floods	6,609	3·06
(v) Lack of drains	1,710	0·79
(vi) Lack of water	33,514	15·52
(vii) Distance from *abadi*	9,311	4·31
(viii) Damage from wild animals	10,497	4·86
(ix) Other causes	25.536	11·83
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against "E" ..	45,371	21·01

From the above it will appear that of the total area recorded as cultivable waste only 21·0 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 85·4 cents of which 65·1* cents have already been brought under cultivation and only about 4·3 cents can be further brought under the plough after some improvements. It is obvious that the saturation point for cultivation has already been reached in the district.

Climate and rainfall

5. The climate presents no unusual features and resembles that of the rest of the southern portion of Avadh. The district is generally healthy. The temperature is very much the same as in Kanpur and Lucknow.

The average rainfall for the last quinquennium was about 33·8 inches. During the last fortyfive years the rainfall has been less than 20 inches only in three years and is generally over 25 inches.

Irrigation

6. Irrigation is derived from canals, wells and other sources. In 1950-51 the irrigated area from canals covered 69·6 per cent. from wells 9·2 per cent. and from other sources 21·2 per cent.

Crops

7. The acreage under *kharif* crops is slightly more than that under *rabi* crops. The area under *kharif* in 1950-51 was 402,846 acres, that under *rabi* 373,978 acres and that under *zaid* crops 5,154 acres. The important *rabi* crop is barley followed by wheat. The important *kharif* crop is rice followed by *juar*, maize and *bajra*. Sugarcane has never been a very important crop of the district.

B—Analysis of the Statistics

Population : General distribution and density

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area *per capita*
Hasanganj	2·67	607	2·81	1·05
Purwa	3·25	590	3·53	1·08
Safipur	2·40	587	2·62	1·09
Unnao	2·35	584	2·57	1·10
Unnao district	*10·67*	*592* †	*11·53*	*1·08*

This district though thirty-first in order of area stands thirty-second in the State in respect of population. Its density is 592 while that of the State is 557. The rural density of the district is 565, the density of the rural parts of the tehsils being : Hasanganj 607, Purwa 560, Safipur 558 and Unnao 531. The density is fairly even throughout the district. (*Vide* Tables A-I and E).

* This figure also includes the area classed as current fallow.

† According to the area given by Surveyor General it is 606.

Growth of population

2. The population of the district in 1951 was only 9·3 per cent. higher than what it was fifty years ago. Compared to this the increase in population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades :

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	**976,639**	908,690	67,949			
1911 ..	**910,915**	864,885	46,030	**—65,724** (—6·7)	—43,805 (—4 8)	—21,919 (—32·3)
1921 ..	**819,128**	782,234	36,894	**—91,787** (—10·1)	—82,651 (—9·6)	—9,136 (—19·8)
1931 ..	**855,700**	812,929	42,771	**+36,572** (+4 5)	+30,695 (+3·9)	+5,877 (+15·9)
1941 ..	**959,542**	906,990	52,552	**+103,842** (+12·1)	+94,061 (+11 6)	+9,781 (+22·9)
1951 ..	**1,067,055**	1,010,474	56,581	**+107,513** (+11·2)	+103,484 (+11·4)	+4,029 (+7·7)

Between 1901 and 1921 the population of the district recorded a decrease of 16·1 per cent. when that of the State decreased by 4·0 per cent. only. The district suffered severely from plague during 1901—11 and from influenza during 1911—21. Since 1921 it recorded an increase of only 30·3 per cent. against an increase of 35·5 per cent. in the population of the State during the same period. The increase during the decade 1921—31 was well below the State average owing to low survival rate and loss on account of immigration. During the succeeding decades the increase has been almost at par with the State average.

The variation in the population of the tehsils during 1941—51 is shown in the marginal table. The increase in the population of the district is almost equal to that of the State (11·8 per cent.), and is spread evenly throughout the tehsils except in tehsil Safipur. The comparatively small increase in Safipur appears to be due to heavy migration of labour to Unnao Municipality and Kanpur.

Tehsil	Percentage variation 1941—51
Unnao district	*+11 2*
Hasanganj	+11·6
Purwa	+11·7
Safipur	+9·3
Unnao	+12·2

Vital statistics

3. Births and deaths mainly account for the trends in population growth. Migration also is a factor though of lesser importance. The following table gives the mean decennial birth and death-rates and the calculated natural increase and the population growth-rates of the last three decades for the district as a whole and for its rural and urban areas :

	Total	Rural	Urban
Mean decennial birth-rate			
1941—50	**15·6**	15·1	25 8
1931—40	**28·4**	28·7	23·1
1921—30	**28·9**	29·8	11·3
Mean decennial death-rate			
1941—50	**10·7**	10·4	15·4
1931—40	**19·0**	19·4	13·0
1921—30	**22·6**	23·3	9·3
Mean decennial rate of natural increase			
1941—50	**4·9**	4·7	10·4
1931—40	**9·4**	9·3	10·1
1921—30	**6·3**	6·5	2·0
Mean decennial growth-rate			
1941—50	**10·6**	10·8	7·4
1931—40	**11·4**	10·9	20·5
1921—30	**4·4**	3·8	14·8

There are larger omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death-rates have fallen during the last decade. The survival rate during the decades 1921—30 and 1941—50 was low.

The figures of natural increase and growth-rate suggest a loss during 1921—30 and again during 1931—40 and 1941—50, on account of balance of migration.

The average yearly mortality from various causes in the district during 1941—50 was as follows:

Causes	Number of deaths	Percentage of total deaths
Fever	8,852	82·1
Dysentery and diarrhoea	91	0·8
Respiratory diseases	119	1·1
Plague, cholera and small-pox	709	6·6
Others	1,013	9·4

As in the rest of the State ' fever ' is responsible for majority of deaths. But fever covers a large number of ailments which the reporters are unable to idnetify. (*Vide* Table I Part III of this Volume.)

Migration

4. About 92·8 per cent. of the people enumerated in the district at the census of 1951 were born there, 6·9 per cent. were born in the other districts of the State, 0·2 per cent. were born in other parts of India and 0·1 per cent. were born in other countries. Of the immigrants from the districts of the State as many as 66,870 (males 14,675, females 52,195) were from the other districts of the same natural division and 6,530 (males 2,593, females 3,937) were from other parts of the State. The sex proportion shows that most of the migration from the neighbouring districts is marriage migration. Of the 1,541 immigrants from the adjacent States 506 (males 207, females 299) are from Madhya Pradesh, 233 (males 8, females 225) from Vindhya Pradesh, 194 (males 110, females 84) from Rajasthan, 187 (males 97, females 90) from Bihar, 166 (males 87, females 79) from Madhya Bharat and 162 (males 113, females 49) from Punjab.

Of the immigrants who have come from the territories beyond India 861 (males 455, females 406) were born in Pakistan and 104 (males 68, females 36) had their birth places in other territories. The Pakistan-born are mostly the displaced persons who numbered 658 in the district. Of the immigrants born in other territories 85 (males 56, females 29) are Nepal-born, and 15 (males 9, females 6) are Burma-born.

The district had 5 non-Indian nationals one each belonging to Nepal, Pakistan, Burma, Great Britain and Greece.

Unfortunately the figures of emigration are not available. On the basis of vital statistics, however, the district appears to have lost 16,000 persons during 1921—30 and to have gained 19,000 persons and 57,000 persons during 1931—40 and 1941—50 respectively. But it should be borne in mind that these figures include a very large element of registration error. (*Vide* Tables D-IV and D-VI)

Decline of cultivation *per capita*

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation. The figures for the district are exhibited in the marginal table. (Figures of area shown under the census years are the quinquennial averages for the five years ending with the crop year immediately preceding the census year). It is obvious that the cultivation has failed to keep pace with population. The cultivated area *per capita* has gone down from 75·8 cents in 1921 to 59·9 cents in 1951. The magnitude of this drop is about one-fifth of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.

Census year	Population	Net area sown (in acres)	Area of cultivation *per capita* (in cents)
1921 ..	819,128	621,612	75·8
1931 ..	855,700	592,461	69·3
1941 ..	959,542	624.437	65·1
1951 ..	1,067,055	639,108	59·9

Double cropped cultivation *per capita*

6. It may be examined whether this shortage has been compensated by an increase in yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilization and better culture. The average (quinquennial) area sown more than once was 138,494 acres in 1921, 113,802 acres in 1931, 131,367 acres in 1941 and 150,910 acres in 1951. The figures of double crop cultivation *per capita* in cents are as follows :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation *per capita* in cents	14·1	13·7	13·3	16·9
Unirrigated double crop cultivation *per capita* in cents ..	13·4	13·1	12·6	16·1
Irrigated double crop cultivation *per capita* in cents ..	0·7	0·6	0·7	0·8

The double crop area *per capita* has been increasing since 1931 but the quinquennial average for 1951 has not touched the 1921 level.

Irrigated area *per capita*

7. The average area irrigated in the district was 222,289 acres in 1921. The figures were 157,883 acres in 1931, 204,304 acres in 1941 and 200,660 acres in 1951. The average area irrigated more than once was 6,450 acres in 1921, 5,905 acres in 1931, 6,100 acres in 1941 and 7,585 acres in 1951.

The figures of irrigation *per capita* are shown in the table below :

Particulars	Years			
	1951	1941	1931	1921
Irrigated single crop cultivation *per capita* in cents ..	18·1	20·7	17·8	26·3
Irrigated double crop cultivation *per capita* in cents ..	0·7	0·6	0·7	0·8

The irrigated area *per capita* has been alternately decreasing and increasing since 1921.

Cropped aera

8. During the quinquennium 1916—21, 92·9 per cent. of the cropped area was under food crops and 7·1 per cent. was under non-food crops. During 1946—51 the cropped area under food crops was 91·6 per cent. and under non-food crops 8·4 per cent.

The proportionate area under different crops between 1911 and 1951 was as below :

Quinquennial average of	Total cropped area	Percentage of cropped area under							
		Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	**773,853**	8·6	14·2	17·1	6·8	9·7	6·4	13·0	24·2
1916—21	**727,658**	10·8	14·0	15·6	7·4	8·9	6·9	11·2	25·2
1921—26	**740,207**	11·1	14·3	16·3	7·9	6·6	4·7	16·7	22·4
1926—31	**715,942**	12·3	16·1	17·1	7·8	5·3	5·8	13·3	22·3
1931—36	**717,149**	9·6	17·8	17·3	8·1	6·4	6·4	10·5	23·9
1936—41	**760,334**	11·2	19·3	15·3	6·9	5·3	6·3	11·9	23·8
1941—46	**779,816**	10·8	15·5	16·5	7·6	5·5	8·3	12·7	23·1
1946—51	**791,866**	13·1	16·4	18·7	7·7	3·9	6·5	10·7	23·0

The cultivation of indigo, opium, tobacco and cotton has declined. In 1901-02 the area under indigo was 1,287 acres ; in 1950-51 it was nil. In 1901-02 the area under opium was 9,066 acres ; in 1950-51 it was nil. In 1901-02 the area under tobacco was 1,042 acres ; in 1950-51 it was 342 acres. In 1901-02 the area under cotton was 14,339 acres, in 1950-51

it was only 54 acres. Sugarcane has shown an increase. The area under it was 13,885 acres in 1901-02 while in 1950-51 it was 27,998 acres.

Live-stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on the by-products of agriculture supplemented by green fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of supporting the cattle population.

As will appear from Table 3 Part III the total number of cattle and buffaloes which had decreased between 1935—44 has recorded an increase during 1944—51 from 6·2 lakhs to 6·9 lakhs.

The number of working cattle and buffaloes in the district was 21·1 lakhs in 1935, 2·31 lakhs in 1944 and 2·61 lakhs in 1951. The number of ploughs is steadily increasing since 1920. It now stands at 1·28 lakhs. This is apparently due to the progressive fractionalization of holdings. The number of carts is also steadily increasing since 1920 and now stands at 46 thousands. The average net cultivated area per plough works out to 5·1 acres in 1951 against 6·2 acres in 1920 and the average net cultivated area per pair of working cattle works out to 5·0 acres in 1951 as against 5·9 acres in 1935.

Breeding cows and she-buffaloes remained stationary at about 2·00 lakhs during 1935—44 and have now increased to 2·28 lakhs in 1951. The cows and females buffaloes in milk per 1,000 of human population were about 53 and 41 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep is steadily declining since 1930 and now stands at 36·5 thousands. The goats which had declined from 2·03 lakhs in 1935 to 1·16 lakhs in 1944 have again increased to 1·29 lakhs in 1951.

The number of horses and ponies has been also declining since 1935 and now stands at 8·5 thousands. The donkeys too have been declining since 1920 and were 2·6 thousands in 1951.

Poultry has increased from 18·3 thousands in 1944 to 26·4 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
452	194	34	121	25	34

10. To sum up, the population of the district is growing at the biological natural rate since 1921, but on the other hand the land area *per capita* and the irrigated area *per capita* have declined. There is at the same time, no evidence that crop yield per acre has increased. The magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation is, therefore, a great strain on the economy of the district.

Villages and towns

11. The district has 1,687 villages and 6 towns. Of the 10·7 lakhs of people who were counted at the census of 1951, 10·1 lakhs were found in villages and 0·6 lakhs in towns, *i.e.*, there are as many as 947 people per thousand of the population who live in the rural areas and only 53 of them live in towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 599. But the villages do not necessarily comprise of a single compact site. There are 4,704 hamlets in the district. The population per hamlet is 215. The medium-sized village—with inhabitants numbering between 500—2,000—is the dominant type in the district. Of the rural population 52·0 per cent. live in such villages. 27·9 per cent. of the rural population live in villages of population under 500 ; 17·8 per cent. live in villages of population between 2,000 and 5,000 and only 2·3 per cent. live in villages of population of 5,000 and over.

Towns vary in number of inhabitants more widely than villages. Of the urban population 44·6 per cent. of the people live in a town of population over 20,000 (*viz.*, Unnao), 49·9 per cent. live in towns of population between 5,000—10,000 (*viz.*, Bangarmau, Safipur, Maurawan and Purwa) and 5·5 per cent. live in a town of population under 5,000 (*viz.*, Bhagwantnagar). It is significant to note that Unnao has registered an increase of 25·5 per cent. in population since 1941. The other towns appear to be declining. (*Vide* Tables A-III and A-IV).

Occupations: Livelihood pattern

12. Out of the total population of 1,067,055 (rural 1,010,474, urban 56,581) 871,481 (rural 858,493, urban 12,988) or 81·7 per cent. depend on agriculture for their means of livelihood and 195,574 (rural 151,981, urban 43,593) or 18·3 per cent. depend on non-agricultural sources. The following table shows the distribution of 100 persons of the total, rural and urban population of the district under different livelihood classes :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	**81·7**	**71·6**	**6·7**	**1·4**	**2·0**	**18·3**	**5·9**	**3·1**	**0·5**	**8·8**
Rural	**85·0**	74·8	6·8	**1·4**	2·0	**15·0**	5·1	2·3	0·3	7·3
Urban	**23·0**	14·9	4·0	0·9	3·2	**77·0**	19·6	15·9	4·3	37·2

It is obvious that the district is one of the predominantly agricultural districts of the State. Here as many as 81·7 per cent. of the people depend on agriculture as against 74·2 per cent. in the whole State.

Of the total population of the district 597,788 (males 230,073, females 367,715) or 56·0 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 55·1 per cent. and that among the non-agricultural classes to 59·9 per cent. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 166,287 (males 50,386, females 115,901) or 15·6 per cent. of the population are earning dependants. Among agriculturists their proportion is 17·2 per cent. and among non-agriculturists 8·6 per cent. The remaining 302,980 persons (males 280,648, females 22,332) or 28·4 per cent. are self-supporting persons. Their proportion among agriculturists works out to 27·7 per cent. and among non-agriculturists to 31·5 per cent. Of the self-supporting persons 241,287 (males 225,977, females 15,310) belong to agricultural classes and 61,693 (males 54,671, females 7,022) to non-agricultural classes. On the average a self-supporting person maintains 2 non-earning dependants.

Of the 61,693 self-supporting persons belonging to the non-agricultural classes 1,851 persons (rural 1,588, urban 263) earn their livelihood from non-productive sources. Of the remaining 59,842 self-supporting persons (rural 47,402, urban 12,440) 647 (rural 411, urban 236) or 1·1 per cent. are employers, 10,962 (rural 6,821, urban 4,141) or 18·3 per cent. are employees and 48,233 (rural 40,170, urban 8,063) or 80·6 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultura l occupations classified according to economic divisions is as follows:

Name of division	Self-supporting persons by divisions
All Industries and Services	**10,000**
0—Primary industries not elsewhere specified	354
1—Mining and quarrying	2
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof ..	1,745
3—Processing and manufacture—metals, chemicals and products thereof	292
4—Processing and manufacture—not elsewhere specified	807
5—Construction and utilities	727
6—Commerce	1,578
7—Transport, storage and communications	306
8—Health, education and public administration	855
9—Services not elsewhere specified	3,334

The principal large scale industry of the district is distillery. There are no cottage industries worth the name.

Variation in the livelihood pattern

13. In the district the population dependant on agriculture was 81·1* per cent. in 1951. The unfortunate fact is that the agricultural proportion has been increasing ever since 1901. It was 72·5 per cent. in 1901, 74·3 per cent. in 1911 and 79·1 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 865,280 in 1951 from 648,186 in 1921 or by 33·5 per cent. while the cultivated area has increased by only 2·8 per cent. This has resulted in progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to have been a gradual decline of village arts and handicrafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in total population in 1951 was only 44·0 per cent. (agricultural 36·1 per cent., non-agricultural 7·9 per cent.) as against 55·7 per cent. (agricultural 44·4 per cent., non-agricultural 11·3 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 44·3 per cent. (agricultural 34·7 per cent., non-agricultural 9·6 per cent.) in 1921 to 56·0 per cent. (agricultural 45·0 per cent., non-agricultural 11·0 per cent.) in 1951. All this is an index of the increasing unemployment and underemployment. It is only by the diversion of the population to cottage and other industries and by providing subsidiary occupations to the agriculturists that the present severe disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III)

Houses and households

14. There were 182,114 occupied houses in the district—172,787 in villages and 9,327 in towns. That gives an average of 5,848 persons per 1,000 houses or 5·8 persons per house in the rural areas and 6,066 persons per 1,000 houses or 6·1 persons per house in the urban areas.

There were 214,279 households in the district—203,557 in villages and 10,722 in towns. That gives an average of 4,960 persons per 1,000 households or 5·0 persons per household in the rural areas and 5,174 persons per 1,000 households or 5·2 persons per household in the urban areas. The marginal table shows the developments in the size of the household since 1921. The rural household has been increasing ever since 1921 but is still smaller than the average State rural household (5·07). The urban household has also increased since 1941.

Census year	Persons per 1,000 households of	
	Rural population	Urban population
1921	3,579	4,367
1931	4,531	4,872
1941	4,859	4,339
1951	4,960	5,174

Out of 4,960 persons in every 1,000 rural households 2,603 are males and 2,357 females. There is a male excess numbering 246 in every 1,000 rural households. Out of 5,174 persons in 1,000 urban households 2,760 are males and 2,414 are females. There is a male excess numbering 346 in every 1,000 urban households. The type of imigration will account for the difference.

Information regarding types of households and household relationships was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,986 persons (males 2,640, females 2,346) in the district. The corresponding figure for the total count is 4,971.

The table below shows the distribution by size of 1,000 sample households :

Description	Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	**335**	412	**176**	**77**
Rural	331	416	176	77
Urban	399	339	188	74

*The figure includes earning dependants according to their secondary means of livelihood while the figure of 81·7 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Medium type households are the dominant type in the rural areas and small households aer more numerous in the urban areas. Quite a large number of people migrate to urban areas unaccompanied by their families.

Family composition of 1,000 sample households is as follows:

			Number in 1,000 households
A	Heads of households	Males (married)	719
		Males (widowers)	265
		Females	16
	Wives of heads of households		719
			1,719
B	Sons of heads of households		1,070
	Daughters of heads of households		745
			1,815
C	Male relations of heads of households (other than sons)		542
	Female relations of heads of households (other than daughters)		789
			1,331
D	Persons unrelated to the heads of households	Males	44
		Females	77
			121
		Grand Total	*4,986*

Sons outnumber the daughters of the heads of the households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

15. In the district as a whole the sex-ratio was 902 i.e. there were 902 females to every 1,000 males. It varied among the tehsils. The highest value was 948 in Purwa and the lowest value was 872 in Safipur. The ratio was 886 in Unnao and 888 in Hasanganj. **Sex-ratio**

The ratio is smaller in towns than in villages. For the district as a whole the sex-ratio in villages was 905 and in towns 844.

The corresponding figure of sex-ratio for the district was 889 in 1921, 890 in 1931 and 896 in 1941.

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately: **Age-structure**

Age-group		Total population			Rural population		Urban population	
		Persons	Males	Females	Males	Females	Males	Females
Infants and young children	0—4	**13·3**	**6·7**	**6·6**	6·8	6·6	6 9	5·9
Boys and girls	5—14	**25·8**	**13·6**	**12·2**	13·7	12·2	12·1	13·5
Young men and women	15—34	**31·6**	**16·5**	**15·1**	16·4	15 1	17·7	14·0
Middle-aged men and women	35—54	**21·1**	**11·5**	**9·6**	11·5	9·6	11·3	**9·2**
Elderly persons	55 and over	**8·2**	**4 4**	**3·8**	4·4	3·7	5·2	4·2

It will be seen that the population is progressive. 39·1 per cent. of the population is of age under 15 and only 8·2 per cent. of it consists of elderly persons. (*Vide* Table C-II)

17. Out of very 10,000 persons in the district there are 5,272 males and 4,728 females.* Among them 2,449 males and 1,763 females are unmarried. If we reckon males and females together, the unmarried people are 42·1 per cent. of the population. **Marital status**

Of the males 46·4 per cent. were unmarried, 46·2 per cent. were married and 7·4 per cent. were widowed or divorced. Among females 37·3 per cent. were unmarried, 50·8 per cent. were married and 11·9 per cent. were widowed or divorced.

Of the married males 4·4 per cent. were of ages below 15, 48·5 per cent. were of ages 15—34, 36·7 per cent. were of ages 35—54 and 10·4 per cent. were of ages 55 and over. Among the married females 8·0 per cent. were of ages under 15, 58·3 per cent. were of ages 15—34, 29·3 per cent. were of ages 35—54 and 4·4 per cent. were elderly women.

* The corresponding figures for the total count are 5,258 and 4,742.

Marriage is universal. Among males and females aged 35 years and over only 7·2 per cent. of the males and 0·8 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 5·2 per cent. of the males of ages 0—14 and 10·2 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. 99·95 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother tongues spoken the main is Punjabi (0·03 per cent.). Of the 10·7 lakhs of people in the district only 118 or 0·01 per cent. were biliugual (in an Indian language). (*Vide* Table D-I)

Religion and special groups

19. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 9,106, Muslims 891, Sikhs 2 and Christian 1 ; of 10,000 population in villages the numbers are : Hindus 9,265 and Muslims 735 ; and of 10,000 population in towns the numbers are : Hindus 6,280, Muslims 3,673, Sikhs 35 and Christians 12. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in other parts of the State.

There were 303 thousands persons belonging to the Scheduled Castes. Their number per 10,000 of population works out to 2,836. In the villages they are 2,947 for every 10,000 and in the towns their number per 10,000 is only 867. In the district there were 6 Anglo-Indians. (*Vide* Tables D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at the census was 658 (males 339, females 319). Of their total population 91·5 per cent. came from West Pakistan, 2·6 per cent. from East Pakistan and 5.9 per cent. from the districts which could not be traced. (*Vide* Table D-V)

Literacy

21. In 1951 the percentage of male literacy was 14·4 while that of females literacy was 2·3. As compared to this the percentage of male literacy in 1931 was 7·3 and that of female literacy 0·7*. On January 1, 1951 there were 477 primary schools in the district with enrolment of 43,649. (*Vide* Table D-VII)

C—Explanatory Note on the Statistics

The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools ", from information specially supplied by District Inspector of Schools.

Processing of census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural Classes—

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers, and their dependants

*The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literate are as below :

Males		Females	
1951	1931	1951	1931
150	85	26	

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

Tracts

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (*a*) *rural tracts*, comprising the rural population of each tehsil, (*b*) *urban city tracts*, comprising the population of areas which had been declared as cities, (*c*) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

Explanatory notes

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to "hamlets" has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a "hamlet".

A clear distinction has been made in this census between a "House" and a "Household". A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under "Occupied Houses" used to be that of households, while the figures under columns 7—9 of the present table refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

(i) Self-supporting persons ;

(ii) Non-earning dependants ; and

(iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

"A 'self-supporting person' is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be 'self-supporting' a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a 'self-supporting' person in this sense is a 'dependant'. A 'dependant' may be either an 'earning dependant' or a 'non-earning dependant'. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an 'earning dependant'. A person who does not earn any income either in cash or kind is a 'non-earning dependant'. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a 'non-earning dependant'. Each of them should be classed either a 'self-supporting person' or an 'earning dependant' according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such."

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of levihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(*a*) All self-supporting persons of Agricultural Class IV.

(*b*) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and fund ;

(iii) Inmates of alms-houses and recipients of doles;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers'.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars* etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-return and have not been smoothed.

Tables D-V (i) *and* (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."

PART I

DISTRICT CENSUS TABLES

A—GENERAL POPULATION TABLES

A-I—Area, Houses and Population

Serial number	Tehsil	Area in square miles	Villages	Hamlets	Towns	Occupied houses: Total	Occupied houses: Rural	Occupied houses: Urban
1	2	3	4	5	6	7	8	9
	District Total	***1,802***	***1,687***	***4,704***	***6***	***182,114***	***172,787***	***9,327***

NOTE—The area figures given in column 3 are based on the district records of tehsil areas. The area of the district as communicated by the Surveyor General of India is 1,762 square miles.

A-II—Variation in Population during Fifty Years

Years	Persons	Variation	Net Variation 1901—1951	Males	Variation	Females	Variation
