SCT—III Pt.B(ii)	—	Education in rural areas only for Scheduled Tribes.....290
SCT—IV Pt.A	—	Religion for Scheduled Castes.....292—294
SCT—IV Pt. B	—	Religion for Scheduled Tribes.....295—297
SC—I —	—	Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes .....298—300
ST—I —	—	Mother tongue and Bilingualism for Scheduled Tribes.....301—306
ST—II —	—	Persons not at work classified by sex and type of activity for Scheduled Tribes.....307—309

8. INTRODUCING THE OFFICIAL STATISTICS.....310—313

9. TABLES ON OFFICIAL STATISTICS

1. RAINFALL AND TEMPERATURE

1.1 Monthly Total Rainfall at important centre in the district from 1951 to 1960.....314
1.2 Average Annual Rainfall at important centre in the district.....314
1.3 Maximum and Minimum Temperatures by station and by month in the district from 1951 to 1960.....315

2. VITAL STATISTICS

2.1 Number of births and deaths as reported in the district from 1951 to 1960.....316
2.2 Deaths from some selected causes in the district from 1951 to 1960.....317

3. LAND UTILISATION AND AGRICULTURE

3.1 Land Utilisation Statistics in the district for the decades 1901 to 1961.....318
3.2 Area under principal crops in the district for the decades 1901 to 1961.....319
3.3 Gross area irrigated under different crops in the district for the decades 1901 to 1961.....320
3.4 Sources of irrigation in the district for the decades 1901 to 1961.....321
3.5 Yield rates of principal crops in the district, 1951-52 to 1959-60.....322
3.6 Fortnightly wholesale prices of important commodities in the district from 1958 to 1960.....323—341

4. LIVESTOCK

4.1 Variation in the number of main Livestock in the district during 1945 to 1961.....342

5. INDUSTRIES

5.1 List of all categories of industries in the district based on Houselists.....343—344

6. ADMINISTRATION

6.1 Number of criminal cases tried and persons convicted in the district from 1951 to 1960.....346
6.2 Strength of Police in the district from 1951 to 1960.....347
6.3 Different types of Co-operative Societies in the district from 1951-52 to 1960-61.....348
6.4 Receipts of revenue under different heads in the district from 1951-52 to 1960-61.....349

7. PUBLIC HEALTH AND MEDICAL

7.1 Different classes of Public Health and Medical Facilities in the district from 1951 to 1960.....350

8. EDUCATION

8.1 Number of different types of educational institutions and number of students in the district in 1959-60 and 1960-61.....351—357

9. PUBLIC ENTERTAINMENT, PRESS AND JOURNALS

9.1 Number of Newspapers, Printing Presses, Cinema Houses, other places of public entertainment and Periodicals & Journals.....358

10. COMMUNICATION

10.1 Names and length of village roads in the district .....359—364
10.2 Different categories of roads in the district as on 31st March, 1961.....365
10.3 Abstract of bridges on National Highways in the district.....366—367
10.4 Railway Stations in the district from 1950-51 to 1960-61.....368

11. COMMUNITY DEVELOPMENT

11.1 Names and Stages of the Community Development Blocks in the district.....369

12. BANKS AND SMALL SAVINGS

12.1 Gross and Net collections on Small Savings in the district from 1951-52 to 1960-61.....370

13. FAIRS AND FESTIVALS AND HATS AND MARKETS

13.1 List of Fairs and Festivals—times of the year and duration in the district.....371—374
13.2 List of different types of Hats and Markets in the district.....375

14. ANCIENT MONUMENTS, PLACES OF WORSHIP AND GAZETTEER OF PLACE NAMES

A descriptive note on the Gazetteer of place names of the district.....376

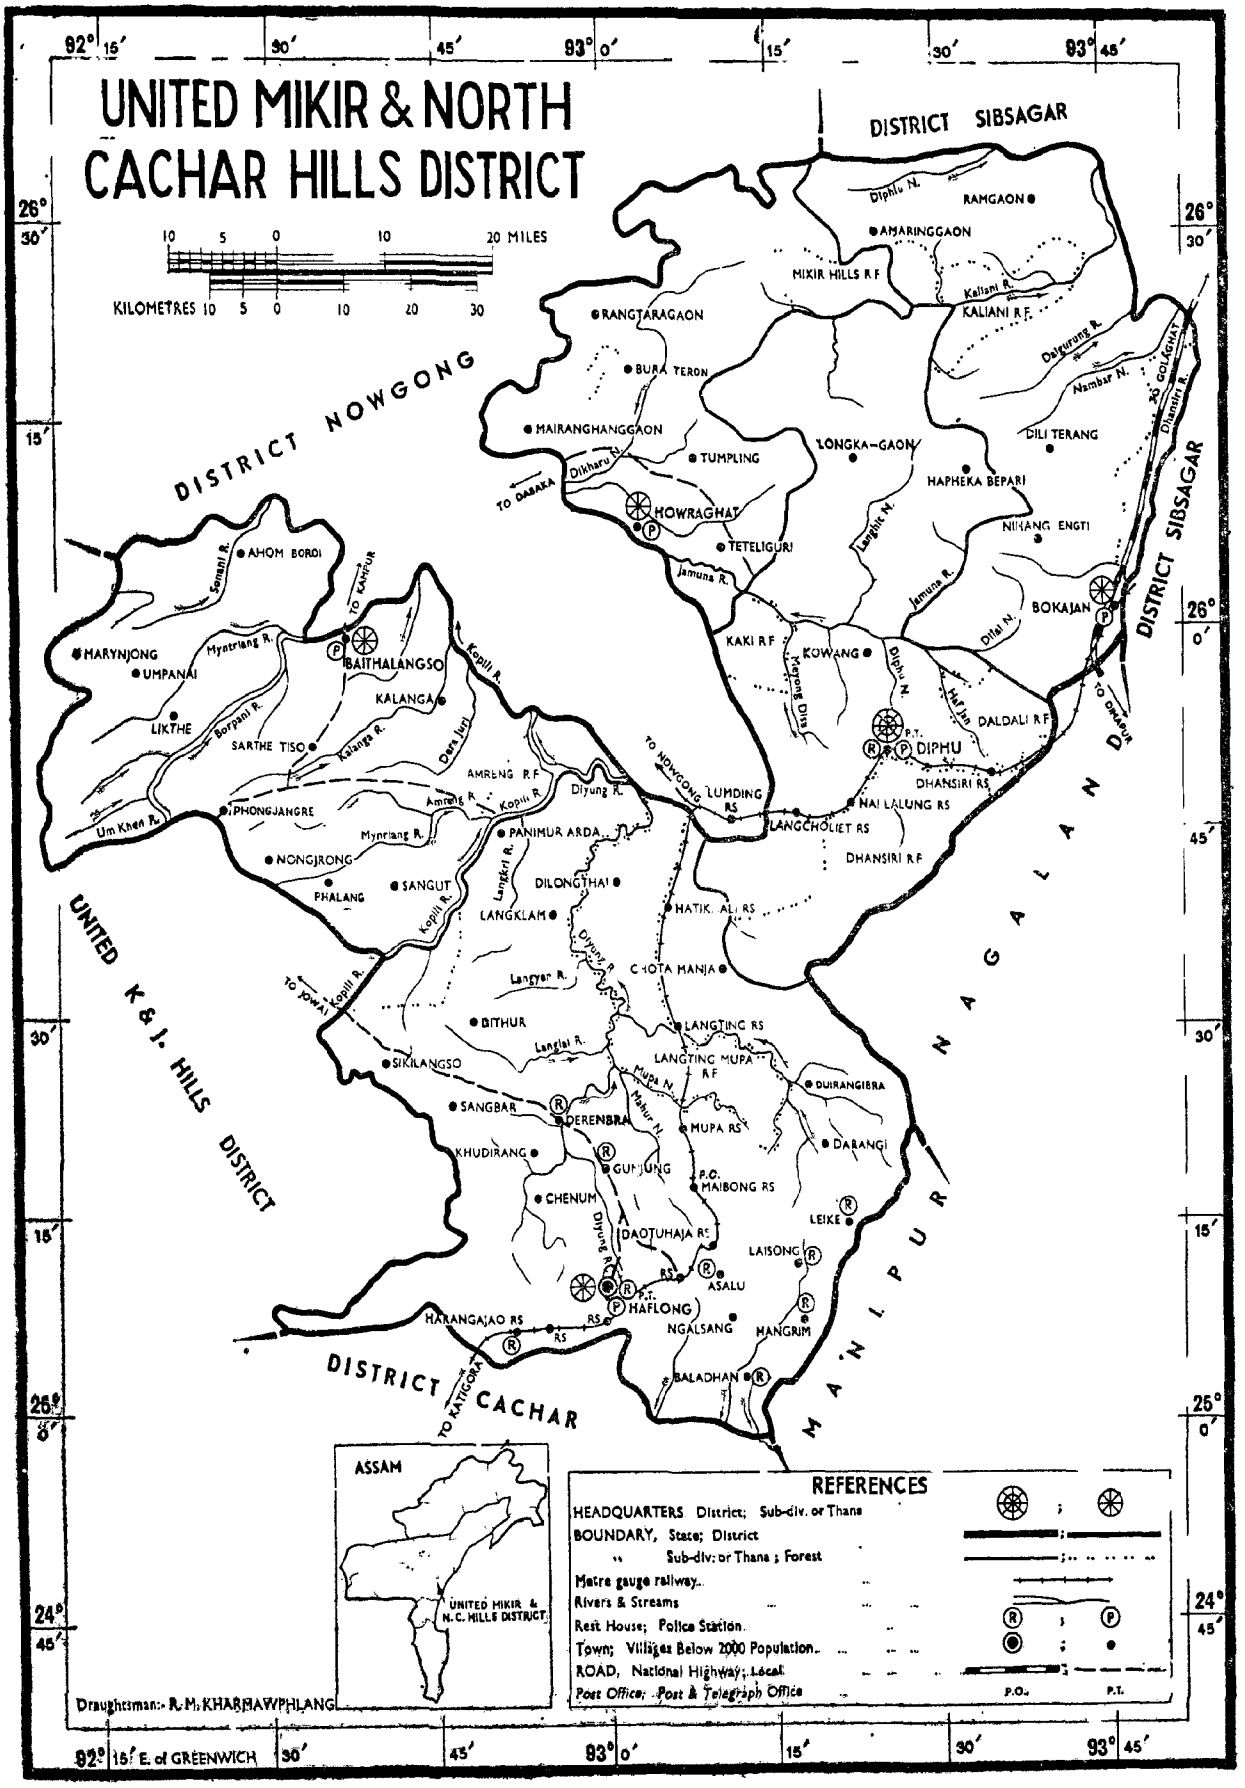

PREFACE

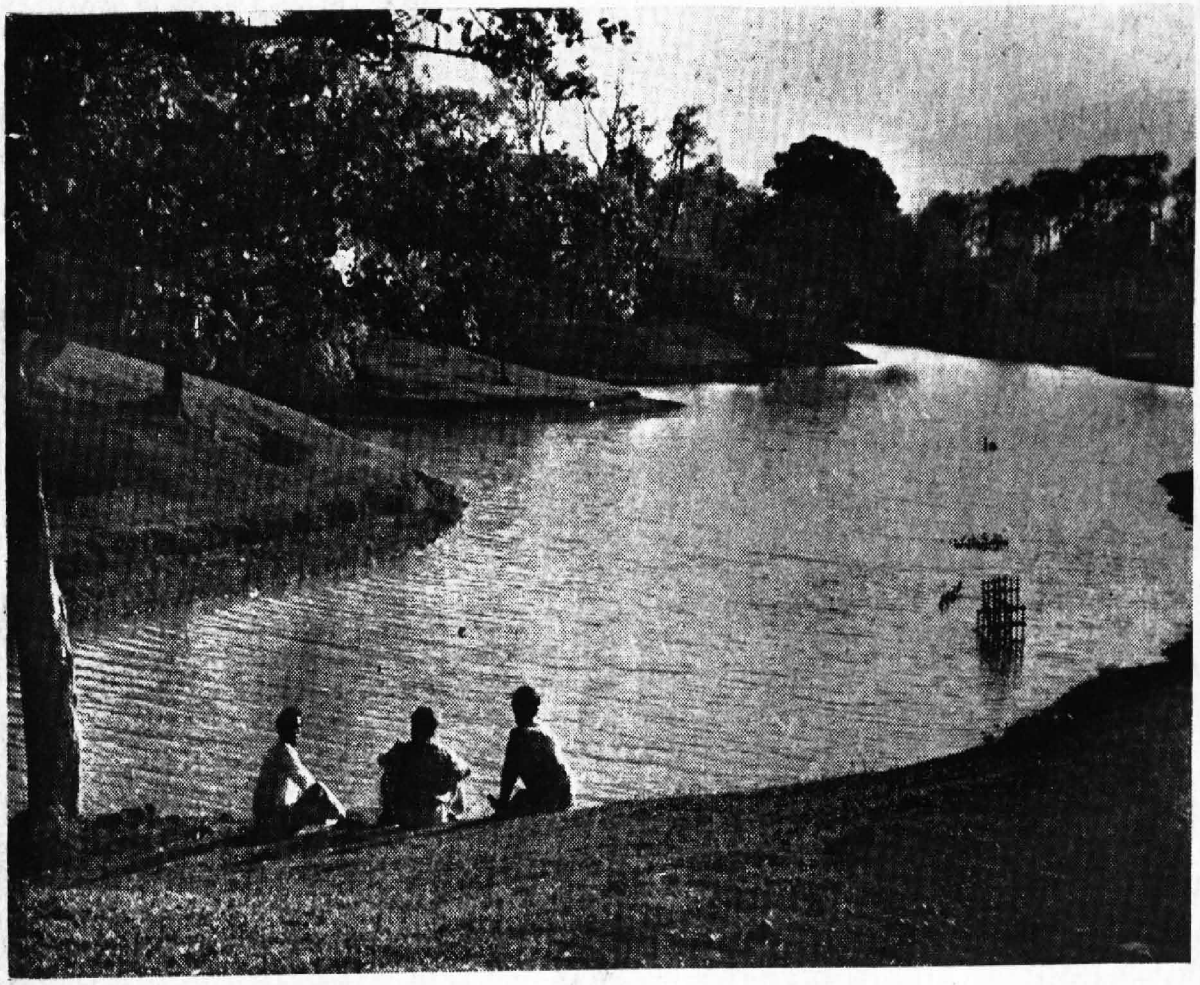

District Census Handbooks were introduced for the first time during the 1951 Census. In the 1961 Census, the District Census Handbooks have further been improved by making the introduction of the district more elaborate, by the addition of official statistics and by having separate tables for Scheduled Tribes and Scheduled Castes. The introduction to each district is a sort of gazetteer giving the physical features, geological data, climate, rainfall and temperature, flora and fauna etc. and a short history of the people inhabiting the district. Sociological data about the people have also been given briefly. Attempts have also been made to appraise the impact of the two Five Year Plans on the economy of each district. Official statistics are given in the form of tables, but there is also an introduction explaining the purpose and utility of the official statistics. For example, the District Census Handbook will supply the number of schools and dispensaries existing in each district as well as the road mileage and many other data which one would like to know about each district. Such data will be useful to the administrators, legislators and sociologists who want to study the people of any district.

Data on the various subjects mentioned above have been collected from the District Gazetteers prepared by Mr. B. C. Allen ICS, from monographs written on the people by well-known ethnographists and sociologists as well as from various Departments of Government, both Central and State. Many Deputy Commissioners and Subdivisional Officers have greatly helped me in supplying such data as are available with them concerning the district. The nature, quality and quantity of the data supplied by each Deputy Commissioner and Subdivisional Officer vary directly according to the interest that each officer has in his district/subdivision.

The preparation of tables was done under the able guidance of Sarvashri J. C. Bhuyan and K. S. Dey, Tabulation Officers, to whom I am greatly indebted. I could not have dictated my write-ups in such a short space of time had it not been for the great help given by my two Stenographers, Sarvashri G. Raghuram and J. Ramsden.

INTRODUCING THE DISTRICT

UNITED MIKIR & NORTH CACHAR HILLS

The United Mikir and North Cachar Hills district came into existence on 17th November 1951. Before that, the district formed parts of Nowgong, Sibsagar, United Khasi-Jaintia Hills and Cachar districts. The district covers an area of 5,883 square miles or 15,237.0 square kilometers and lies between latitudes 24°. 54' and 26°. 41' N and longitudes 92°. 8' and 93°. 53' E approximately. This newly constituted district is bounded on the north by the districts of Nowgong and Sibsagar ; on the east by Sibsagar, Nagaland and Manipur ; on the south by Cachar district and on the west by the United Khasi-Jaintia Hills district and comprises two subdivisions ; viz. Mikir Hills and North Cachar Hills. There are four police stations under the former subdivision, viz. Baithalangso, Howraghat, Bokajan and Diphu and the Haflong Police Station under the latter. Diphu is the district headquarter and Haflong the sub-divisional headquarters.

With regards to the constitution of the district, the following are the Government notifications, schedules and Regulation No. X of 1951 explaining the particular areas excluded from the above-mentioned districts and included in this newly constituted district, as well as the formation of the two Autohomous Councils known as the Mikir Hills District Council and the North Cachar Hills District Council respectively.

The 13th April, 1951

No. TAD/R/31/50/148.—In exercise of the powers conferred under clause (b) read with clause (e) of sub-paragraph (3) of paragraph 1 of the Sixth Schedule to the Constitution of India, the Governor, after consideration of the report of the Commission appointed in this Department Notification No. TAD/R/31/50 dated the 3rd October, 1950, as required under the proviso to the said sub-paragraph (3), is pleased to order that the area hitherto comprised within the United Khasi-Jaintia Hills District as defined in sub-paragraph (2) of paragraph 20 of the Sixth Schedule to the Constitution and as described in the Schedule to this Notification shall be excluded from the said United Khasi-Jaintia Hills District.

A. D. Pandit,
Chief Secretary to the Government of Assam.

SCHEDULE

(Area excluded from the United Khasi-Jaintia Hills District and included in the Mikir Hills).

North : Starting from confluence of the Kopili river and the Amring river, the boundary runs up the Amring river (which is known as Um-I at its upper reaches) to its source thence across the saddle of Mynkoi Ram (Mawkhoiram) to the source of a tributary of Um Shunam ; thence down this tributary to its junction with Um Shunam ; thence up Um Shunam for about one mile to a point on the Um Shunam $1\frac{3}{8}$ miles west of the Survey Hills Station (3508 height) ; thence northwards along a minor divide to a point on the range of Mawthadsning $2\frac{3}{4}$ miles from the source of the Um Panji ; thence eastwards following the range to the source of Um Panji ; thence down Um Panji to its confluence with the Um Ud ; thence down the Um Ud to its confluence with the Um Khen (Barapari River) ; thence down the midstream of Umkhen to its confluence with the Myntriang river ; thence up the Myntriang river to its confluence with the Um Kario ; thence up the Um Kario to its source ; thence across the saddle that divides it from the source of Wah Koh ; thence down the Wah Koh to its confluence with the Sunani river ; thence up the Sunani river to its source ; thence in a south-westerly direction along the ridge for a distance of $1\frac{3}{4}$ miles to a point about $\frac{1}{4}$ mile south-west of the point which is the source of three streams Am Thalong, Kakra Nadi and Amshodi, thence down the Umthalong to its confluence with the Umiam river.

West : Thence up the Umiam river to the mouth of the Umlet and up the Umlet

following the Jowai Subdivision boundary to the Umkhen river.

South : Thence down the Umkhen river to the mouth of the Umshunam about 2 miles south-east of Jingkahulu (3178) ; thence up the spur to the South of this stream to the source of the Um-I (Amring), thence in a south-easterly direction to the source of the Umsati and down the Umsati to a point opposite Thapat village. From there a straight line to the source of the Umkhyrmi (not located on the survey o India Sheets) and thence down to the Umkhyrmi to the Myntang river and down the Myntang to the Kopili.

East : Thence down the midstream of the Kopili river to the starting point.

GOVERNMENT OF ASSAM TRIBAL AREAS DEPARTMENT

The 13th April, 1951

No. TAD/R/31/50/149 : In exercise of the powers conferred under clause (a) read with clause (d) of sub-paragraph (3) of paragraph 1 of the Sixth Schedule to the Constitution of India, the Governor, after consideration of the report of the Commission appointed in this Department Notification No. TAD/R/31/50, dated the 3rd October, 1950, as required under the proviso to the said sub-paragraph (3), is pleased to order that the area excluded from the United Khas-Jaintia Hills District by the Department Notification No. TAD/R/31/50/148, dated the 13th April, 1951 shall be included in the Mikir Hills Autonomous District.

Secretary

The 13th April, 1951

No. TAD/R/50/150 : In exercise of the powers conferred under clause (b) read with (e) of sub-paragraph 1 of the Sixth Schedule to the Constitution of India, the Governor, after consideration of the report of the Commission appointed in this Department Notification No. TAD/R/31/50 dated the 3rd October, 1950 as required under the proviso to the said sub-paragraph (3), is pleased to order that the Ghiladhri, Larka and Gobha Mauzas and the whole of the Lumding, Sarupathar, Barapathar, Marangi, Dabagori and Duarsalana mauzas except the areas specified against each of them in the Schedule to this notification, shall be excluded from the Mikir Hills Autonomous District.

A. D. Pandit,
Chief Secretary to the
Government of Assam

SCHEDULE

(i) **Lumding Mauza :**

Starting from the junction of the eastern boundary of the Namati Mauza with the Jamuna river southwards along that Mauza boundary till that Mauza boundary meets the Kaki Jan ; thence up the midstream of the Kaki Jan to its source ; thence in a south-easterly direction in a straight line across the hill ridges to the confluence of Panpri stream with the Lanka Jan which form the boundary of the Lumding Forest Reserve, thence up the Lanka Jan, which is also the eastern boundary of the Lumding Reserved Forest to its source ; thence in a southerly direction along the boundary of the Lumding Reserved Forest to the junction of Langkanasang Nadi with the Bara Langpher river ; thence in a straight line due south till that line meets the southern boundary of the Lumding Mauza near the village Barajigthang ; thence along the southern and eastern boundary of the Lumding Mauza to the source of the Chaklangso Jan ; thence down the Chaklangso Jan, which also coincides with the eastern boundary of the Lumding Mauza to its confluence with the Meyong Disa ; thence down the Meyong Disa to its confluence with the Jamuna river, thence westwards down the Jamuna river to the starting point.

(ii) **Sarupathar Mauzas :**

(iii) **Barapathar Mauzas :**

Portions of the Sarupathar and Barapathar Mauzas falling on the west bank of the Dhansiri starting from the junction of the Lahuriajan with the Dhansiri and proceeding down along the midstream of the Dhansiri as far as the junction of the Nambar Nadi with the Dhansiri in Barapathar Mauza.

(iv) **Marangi Mauza :**

The portion of the Marangi Mauza falling to the south and west of the line described below :

Starting from the junction of the Nambar Nadi with the Dhansiri river east of the Garampani Inspection Bungalow on the

Golaghat—Dimapur Road the boundary shall run in a straight line to the forest road leading from the Garampani Inspection Bungalow to Kaliani ; thence along this road as far as the Daigurung Nadi (here marking the western boundary of the Upper Daigurung Reserve Forest) ; thence up the Daigurung and along the southern and western boundaries of this reserve forest so as to exclude it and the village lands of the Chatini Pathat, Dokhara Pathar and Murphulani to the Western boundary of the Lower Daigurung reserve forest ; thence along the western boundary of the Lower Daigurung reserve forest until the forest road from Garampani to Kaliani is met again ; thence along this road to the Kaliani river.

(v) **Duar-Baguri Mauzas :**

(vi) **Duarsalana Mauzas :**

The portions of the Duarsalana Mauza and Duar Baguri Mauza in Nowgong District south and east of the line described below ; starting from the base of the hills to where the Bar Dehing N. debouches into the plain about ½ mile south of the village of Baguri (vide Notification No. 2021-R, dated 8th July, 1933) ; thence continuing westwards along the base of the hills following roughly the 250-300 ft. contours headland to headland excluding the Deopani and other re-entrant valleys as far as the eastern boundary of the Bagser Reserve Forest (north-east of Bura Pabat, a station of triangulation height 1797) ; thence by the southern boundaries of this reserve so as to exclude it from the Mikir Hills to a point where the Dampoye Juri breaks through to the plain east of Sakmuthi Tea Garden, thence southwards by the base of the hills headland to headland across valleys following the 250-300 ft. contours but excluding cadastral villages and waste land grants in the Diju and other re-entrant valleys and the reserve forests of (i) Diju Valley, (ii) Suang and (iii) Kaphtali to the northern boundary of the Debaka Reserve Forest.

GOVERMENT OF ASSAM TRIBAL AREAS DEPARTMENT

NOTIFICATION

Shillong,
the 13th April, 1951.

No. TAD/R/31/50/151,

In exercise of the powers conferred under clause (G) of sub-paragraph (3) of paragraph 1 of the Sixth Schedule to the Constitution of India, the Governor is pleased to define as follows the boundaries of the Mikir Hills Autonomous District as it is reconstituted after inclusion therein, and exclusion therefrom, of the areas specified in this Department Notifications No. TAD/R/31/50/149 and No. TAD/R/31/50/150 dated the 13th April, 1951 respectively :

Boundary of the Mikir Hills Autonomous District

North : Starting from the junction of the Nambor Nadi with the Dhansiri river east of the Garampani Inspection Bungalow on the Golaghat-Dimapur Road the boundary shall run in a straight line to the forest road leading from the Garampani Inspection Bungalow to Kaliani ; thence along this road as far as the Daigurung Nadi (here marking the western boundary of the Upper Daigurung Reserved Forest) ; thence up the Daigurung and along the southern and western boundaries of this reserved forest so as to exclude it and the village lands of Chationi Pathar, Dokhara Pathar and Murphulani to the western boundary of the Lower Daigurung reserved forest ; thence along the western boundary of the Lower Daigurung reserved forest until the forest road from Garampani to Kaliani is met again ; thence along this road to the Kaliani river ; thence northwards along the Kaliani river to the mouth of the Rangsali stream ; thence up this stream in a north-westerly direction leaving Deo Parbat to the north-east, to a point where this stream turns up south-westwards, from there in a north-westerly direction to the foot of the hills below Chitan Parbat ; thence westwards along the base of the hills from headland following roughly the 400 feet contour and excluding outlying tea gardens and cadastral villages to a nameless hill stream flowing northwards from height 1268, about a mile east of Dalmara village ; thence down this stream to its confluence with the Diphlu Nadi ; thence down the midstream of the Diphlu Nadi to the point where it enters the plain and thence starting along the base of the hills below Lengea Parbat to the boundary of the Panbari Reserved Forest ; thence along the southern boundary of this reserve so as to exclude it and continuing westwards along the base of the hills to where the Bar Dehing N. debouches into the plain about ½ a mile south of the village of Baguri (vide Notification No. 2021-R dated 8th July, 1933). Thence continuing westwards along the base of the hills following roughly the 250-300 ft. contours headland to headland the Deopani and other re-entrant valleys as far as the eastern boundary of the Bagser Reserved

Forest (north-east of Bura Parbat, a station of triangulation height 1797) ; thence by the southern boundaries of this reserve so as to exclude it fron the Mikir Hills to a point where the Dampoye Juri breaks through the plain east of Sakmuthi Tea Garden.

West : From the last mentioned point southwards by the base of the hills headland to headland across valleys following the 250-300 ft. contours but excluding cadastral villages and wasteland grants in the Diju and other re-entrant valley and the reserved forests of (i) Diju valley, (ii) Suang and (iii) Kaphitali to the northern boundary of the Dabaka Reserved Forest. Thence along the northern boundary of the Dabaka Reserved Forest to the Udganga and then down the Udganga to its junction with Dikharu Nadi and then down this stream to its junction with Jamuna river ; thence up the midstream of the Jamuna to the eastern boundary of Namati Mauza, then southwards along that mauza bouudary till that mauza boundary meets the Kaki Jan ; thence up the midstream of the Kaki Jan to its source ; thence in a south-easterly direction in a straight line across the hills ridges to the confluence of Pampri stream with the Lanka Jan which forms the boundary of the Lumding Forest Reserve ; thence up the Lanka Jan, which is also the eastern boundary of Lumding R. F., to its source ; thence in a southerly direction along the boundary of the Lumding R. F. to the junction of Longkanasang Nadi with the Bara Langpher river ; thence in a straight line due south till that line meets the southern boundary of the Lumding Mauza near the village Borojigthang ; thence westwards along the Lumding Mauza boundary till it meets the North Cachar Hills boundary and along that boundary till it meets the Bara Langpher stream and ascending this latter to the railway line ; thence in a north-westerly direction along the western reservation of the railway line to the bridge over the Lanka Jan ; thence westwards by the existing Mikir Hills boundary here coinciding with the northern boundary of the Hawaipur P.G.R. demarcated in 1946 to the Kopili river (Notification No. 2021-R dated the 8th July, 1933) ; thence up the midstream of the Kopili to the northern boundary of Rongkhang Mauza ; thence westwards along this boundary till it strikes the Latumai N. which here forms the eastern boundary of the Latumai Reserved Forest ; thence southwards and westwards along the boundary of that reserve to the Borpani river and up the Borpani river to the eastern boundary of Duar Amla Mauza ; thence along the eastern and northern boundaries of the Duar Amla Mauza to the Umiam river. Thence up the Umiam river (here marking the western boundary of the Jowai Subdivision of the United Khasi-Jaintia Hills) to the mouth of the Umlet and up the Umlet and following the Jowai Subdivision boundary to the Umkhen river.

South : Thence down the Umkhen river to the mouth of the Um Shunam about 2 miles southeast of Jingkahula (3178) ; thence up the spur to the south of this stream to the source of the Um-I (Amring) and Myntriang stream and along the watershed to the source of the Um Sati and down the Um Sati to a point opposite Tahpat village. From there a straight line to the source of the Umkhyrmi (not located on the survey of India sheets but thought to be the stream shown here) and thence down the Umkhyrmi to the Myntang river and down the Myntang to the Kopili. Thence down the midstream of the Kopili to its confluence with Diyung river ; thence up the midstream of Diyung river which is called the Lumding river and Mithangdisa in its upper reaches to its source on the Sarkihading range ; thence along this range for a distance of about 2 miles to the source of a tributary of the Wati Disa ; thence down the midstream of this tributary to its confluence with the Wati Disa ; thence down the midstream of the Wati Disa to its confluence with the Dhansiri and Dima river which is the trijunction of District Mikir Hills, Cachar and Naga Hills.

East : Thence down the Dhansiri river (Notification No. 3102-R, dated 25th November, 1925) to its junction with the Tahaki or Khova stream ; thence in a straight line to a pucca pillar on the railway line about 4½ miles south of Manipur Road railway station ; thence in a straight line to the point, nearest to Dimapur, where the Lahurijan stream cuts the Mohendijua-Dimapur road ; thence down the Lahurijan stream to the Dhansiri river and thence down the Dhansiri river to the starting point.

The 27th August, 1951

No. TAD/R/31/50/190 : The following Regulation made by the Governor of Assam under clause (b) of sub-paragraph (1) of Paragraph 19 of the Sixth Schedule to the Constitution of India, and assented to by the President of India, published for general information.

The Assam United District of Mikir And North Cachar Hills (Administration) Regulation 1951

Regulation No. X of 1951

Whereas it is expedient for the good Government and efficient administration of

the two autonomous districts of Mikir and the North Cachar Hills to constitute a new administrative district to be named the United District of Mikir and North Cachar Hills.

Now, therefore, in exercise of the powers conferred by clause (b) of sub-paragraph (1) of paragraph 19 of the Sixth Schedule to the Constitution of India, the Governor of Assam is pleased to make the following Regulation :

Short title and commencement

1 (1) This Regulation may be called the Assam United District of Mikir and North Cachar Hills (Administration) Regulation, 1951

(2) It shall come into force on such date as the Governor, may, by notification in the Official Gazette, appoint in this behalf.

Definitions

2 (1) In this Regulation, unless there is anything repugnant in the subject or context.

(1) "appointed day" means the date appointed under sub-section (2) of section 1 of this Regulation ;

(2) "autonomous district" means a tribal area deemed as such under paragraph 1 (1) of the Sixth Schedule to the Constitution of India ;

(3) "Constitution" means the Constitution of India ;

(4) "Deputy Commissoner" means a Deputy Commissioner as defined in section 4 (15) of Assam General clauses Act, 1915 ;

(5) "District", otherwise than used in, or with reference to the expression "autonomous district" means an administrative district of the State of Assam within the meaning of section 7 of the Code of Criminal procedure, 1898 ;

(6) "Existing Law" means any law in force in the Mikir Hills, the North Cachar Hills or the United Khasi-Jaintia Hills District, as the case may be, immediately before the appointed day ;

(7) "Law means any Act, Ordinance, Regulation, rule, order or bye-law relating to any matter enumerated in List I, II and III in the Seventh Schedule to the Constitution.

(8) "Mikir Hills" means—

(a) as respects the period before the commencement of the Constitution the Partially Excluded Areas of the Mikir Hills (in Nowgong and Sibsagar Districts) declared as such under the Government of India (Excluded and Partially Excluded Areas) Order, 1936 ;

(b) As respects the period after the commencement of the Constitution and before the appointed day, the tribal areas of Mikir Hills specified under paragraph 20 of the Sixth Schedule to the constitution ; and

(c) as respects the period after the appointed day, the Mikir Hills Autonomous district comprising the tribal areas within the boundaries defined in Notification No. TAD/R/31/50/151, dated the 13th April, 1951.

(9) "North Cachar Hills" means the North Cachar Hills Autonomous district specified under paragraph 20 of the Sixth Schedule to the Constitution.

(2) The terms "District Magistrate" or "Magistrate of a District" and "Subdivisional Magistrate" or "Magistrate of a Subdivision" referred to in any law for the time being in force in the United District of Mikir and North Cachar Hills shall, unless there is anything repugnant in the subject or context, be construed as referring respectively to the Deputy Commissioner of the said District and the Subdivisional Officer of a Subdivision of the said District.

Administrative District And Subdivisions

3 (1) The Governor shall, by notification in the Official Gazette, declare that as from the appointed day, the Mikir Hills autonomous district and the North Cachar Hills autonomous district shall be constituted into an administrative District called the United District of Mikir and North Cachar Hills, hereinafter referred to as "the said District".

(2) The Governor may, by notification in the Official Gazette, divide the said District into two or more Subdivisions as may be considered necessary for the efficient administration of the District, and until such notification is issued, the said District shall consist of two Subdivisions, namely, (i) the Mikir Hills and (ii) The North Cachar Hills.

(3) The Mikir Hills shall, as from the appointed day, cease to form parts of the Nowgong and Sibsagar Districts.

(4) The North Cachar Hills shall, as from the appointed day, cease to form part of the Cachar District.

Appointment of Deputy Commissioner

4 The Governor shall, as from the appointed day, appoint a Deputy Commissioner for the said District.

Appointment of Additional Deputy Commissioner

5 The Governor may, if he thinks fit, appoint an Additional Deputy Commissioner for the said District and may direct that such Additional Deputy Commissioner, shall, either generally or for any particular purpose or purposes specified in the said direction, exercise all or any of the powers of the Deputy Commissioner :

Assimilation of Laws

6 (1) All laws which immediately before the appointed day extent to or are in force in, the Mikir Hills, but not in area specified in the Schedule to this Regulation, hereinafter referred to as "the Scheduled Area" shall from that day, extent to, or as the case may be, come into force in the Scheduled Area.

Provided that references to "Mauzadar", "Gaonburas" or "Village Authorities", in the Rules for the Administration of Justice and Police in the Sibsagar and Nowgong Mikir Hills Tracts, published with Notification No. 2617-AP, dated the 29th March, 1937, shall also include references to "Sardars," "Dolois" or "Village Authorities" in the Scheduled Areas, recognised as such by the Governor.

(2) All laws which immediately before the appointed day are in force in the Scheduled Area, but not in the Mikir Hills, shall on that day cease to be in force in the Scheduled Area, except as respects things done or omitted to be done before that date.

(3) All laws which immediately before the appointed day are in force in the North Cachar Hills shall continue to be in force therein.

(4) Subject to the provisions of the foregoing sub-sections of this section, all laws which immediately before the appointed day are in force in the Mikir Hills shall apply to the said District, in so far as they are not inconsistent with the existing laws in the different parts of the District :

Provided that except where the context otherwise requires, all references therein to the Deputy Commissioner or Additional Deputy Commissioner of Nowgong District or the Deputy Commissionar or Additional Deputy Commissioner of the Cachar District, as the case may be, and his Assistants shall be read as referring respectively to the Deputy Commissioner or Additional Deputy Commissioner of the United District of Mikir and North Cachar Hills and his Assistants ; and all references therein to "Mikir Hills Tracts" shall be read as referring to the "United District of Mikir and North Cachar Hills.

Provided further that every suit, appeal, application for revision of proceedings and other business, relating to both civil and criminal Justice, pending on the appointed day before the Court of the Deputy Commissioner, Khasi and Jaintia Hills District, Cachar District, Nowgong District or Sibsagar District, as the case may be, or before the Courts of his Assistants or before the Court of Subdivisional Officer, Jowai or Golaghat, as the case may be shall be transferred or deemed to have been transferred for disposal to the Court of the Deputy Commissioner, United District of Mikir and North Cachar Hills or to Courts subordinate to it, as the case may be, which would have been competent to entertain and dispose off such appeal application for revision, proceedings or business, had this Regulation been in force on the date of the institution or commencement of the same ; and the latter Court or Courts shall deal with and dispose off the same in accordance with law.

Removal of difficulty

7. If any difficulty arises in relation to the operation of the laws mentioned in section 6 or any of the provisions of this Regulation, the Governor may, by order notified in the official Gazette, make such provisions as he may consider necessary for the removal of such difficulty.

Savings

8. Nothing in this Regulations shall be construed as affecting the status of either the Mikir Hills or the North Cachar Hills as an autonomous district.

I have made this Regulation under clause (b) of sub-paragraph (1) of Paragraph 19 of the Sixth Schedule to the Constitution of India,

JAIRAMDAS DOULATRAM
Governor of Assam

Shillong,
The 24th July, 1951

I ASSENT TO THIS REGULATION

RAJENDRA PRASAD
President

New Delhi,
The 21st August, 1951

R. V. SUBRAMANIAN
Secy. to the Govt. of Assam,
Tribal Areas Deptt.

(Areas excluded from the Cachar District and included in the North Cachar Hills Autonomous District)

As defined by Notification No. TAD/R/50/190 dated the 27th August, 1951, the whole of of the North Cachar Hills Subdivision was transferred from Cachar district to form the newly created District of United Mikir and North Cachar Hills.

The 3rd November, 1951

No. TAD/R/31/50/204—In exercise of the powers conferred by Sub-section (2) of Section 1 of the Assam United District of Mikir and North Cachar Hills (Administration) Regulation, 1951, (Regulation No. X of 1951), the Governor of Assam is pleased to appoint the 17th November, 1951. as the date on which the said Regulation shall come into force.

R. V. SUBRAMANIAN,
Secy. to the Govt. of Assam,
Tribal Areas and Development Department.

The 8th November, 1951

No. TAD/R/31/50/205—In exercise of the powers conferred by Subdivision (1) of Section 3 of the Assam United District of Mikir and North Cachar Hills (Administration) Regulation, 1951 (Regulation No. X of 151), the Governor of Assam is pleased to declare that the Mikir Hills Autonomous District and the North Cachar Hills Autonomous District shall be constituted into an administrative District known as the United District of Mikir and North Cachar Hills, with effect from the 17th November, 1951.

Autonomous District Council

Introduction

With the Government policy aiming at, on the one hand, realisation of economic and social advancement of the hill areas within the frame-work of a common development and welfare programme for the entire State and, on the other hand, the provision of opportunities to the tribal people for their development in their own way consistent with their distinctive environment, age-old customs and social and administrative traditions, the State Government constituted the Autonomous District Councils under the provision of the Sixth Schedule of the Constitution of India. By the end of 1952, District Councils were were set up in all the Autonomous Hills Districts of the State, namely, the United Khasi-Jaintia Hills, the Garo Hills, the Mizo Hills and the United Mikir and North Cachar Hills—this last district having two separate and independent District Councils known as the North Cachar Hills District Council and Mikir Hills District Council respectively. These Councils were formally opened by the then Chief Minister of Assam, Shri Bishnuram Medhi, on separate occasions.

The five Autonomous Hill Districts are administered according to the provisions of the Sixth Schedule to the Constitution. Each Autonomous District has a District Council of not more than 24 members of whom not less then three-fourths are elected on the basis of adult franchise. The District Councils are empowered to make their own rules for the Constitution of the District Councils, holding of elections, transaction of business, etc. They have executive and legislative powers with respect to :—(1) administration of land, (2) the management of forests not being a reserved forests, (3) the use of any canal or water course for the purpose of agriculture, (4) the regulation of the practice of jhum or other forms of shifting cultivation, (5) the establishment of village or town committees or councils and their powers, (6) any other matter relating to village or town administration including village or town police and public health and sanitation, (7) the appointment of succession of chiefs or headmen, (8) inheritance of property, (9) marriage and (10) social customs.

They are further empowered to establish, construct or manage Primary Schools, dispensaries, markets, cattle pounds, ferries, fisheries, roads and waterways and to prescribe the language and the manner in which primary education shall be imparted in the primary schools of the district. They can as well levy and collect revenue and taxes such as, taxes on professions, trades callings and employment, taxes on animals and boats, taxes on vehicles including motor vehicles, tolls on passengers and goods carried on ferries, taxes for the maintenance of schools, dispensaries and roads. The District Councils are also entitled to share of the royalties on minerals found within their areas.

North Cachar Hills District Council

Under the Constitution of India, specified in the Sixth Schedule of the Constitution, a Council, known as the North Cachar Hills District Council, was formed with wide legislative and executive powers on certain matters. The Council was formally inaugurated by the then Chief Minister of Assam on the 29th April, 1952.

The District Council consists of sixteen members, twelve of them elected on the basis of adult suffrage, and four persons nominated by Government. The nominations were made in consulation with the elected representatives, bearing in mind the paramount importance of ensuring the stability of the Council and also the need for according representation to those important interests in the area which failed to secure representation through elections.

Under the provision of the Constitution, the Subdivisional Officer was the Chairman of the District Council for a period of six years from the date it was first constituted and that during this period had, subject to the control of the Governor, power to guide the Council in its deliberations and actions. This special provision was made in order that the advice and guidance of experienced officers may be available to the members of the Council in the conduct of its affairs at the initial stage. This being an area comparatively more backward than some of the other hill district, the Constitution makers have wisely decided that the advice and services of experienced officers be available to the members in the moulding of their future through this Council, where certain areas having their own special problems and where groups of people having their characteristics way of life, background and traditions, have their special needs. Power was decentralised to the maximum possible extent so that these special problems may be tackled effectively and the special needs catered to as best as possible, by those who have the requisite knowledge of these problems, needs and their solution. It is, therefore, of utmost importance that the powers so vested are exercised with the greatest caution. Decentralisation of power and the consequent delegation of administrative functions and the investment of small bodies with the necessary power to manage their own day-to-day affairs in consonance with the genius and tradition of the people whom they are intended to serve is democracy in its highest and purest form, in practical working, but vigilance and caution are the essence for the successful functioning of such a set-up.

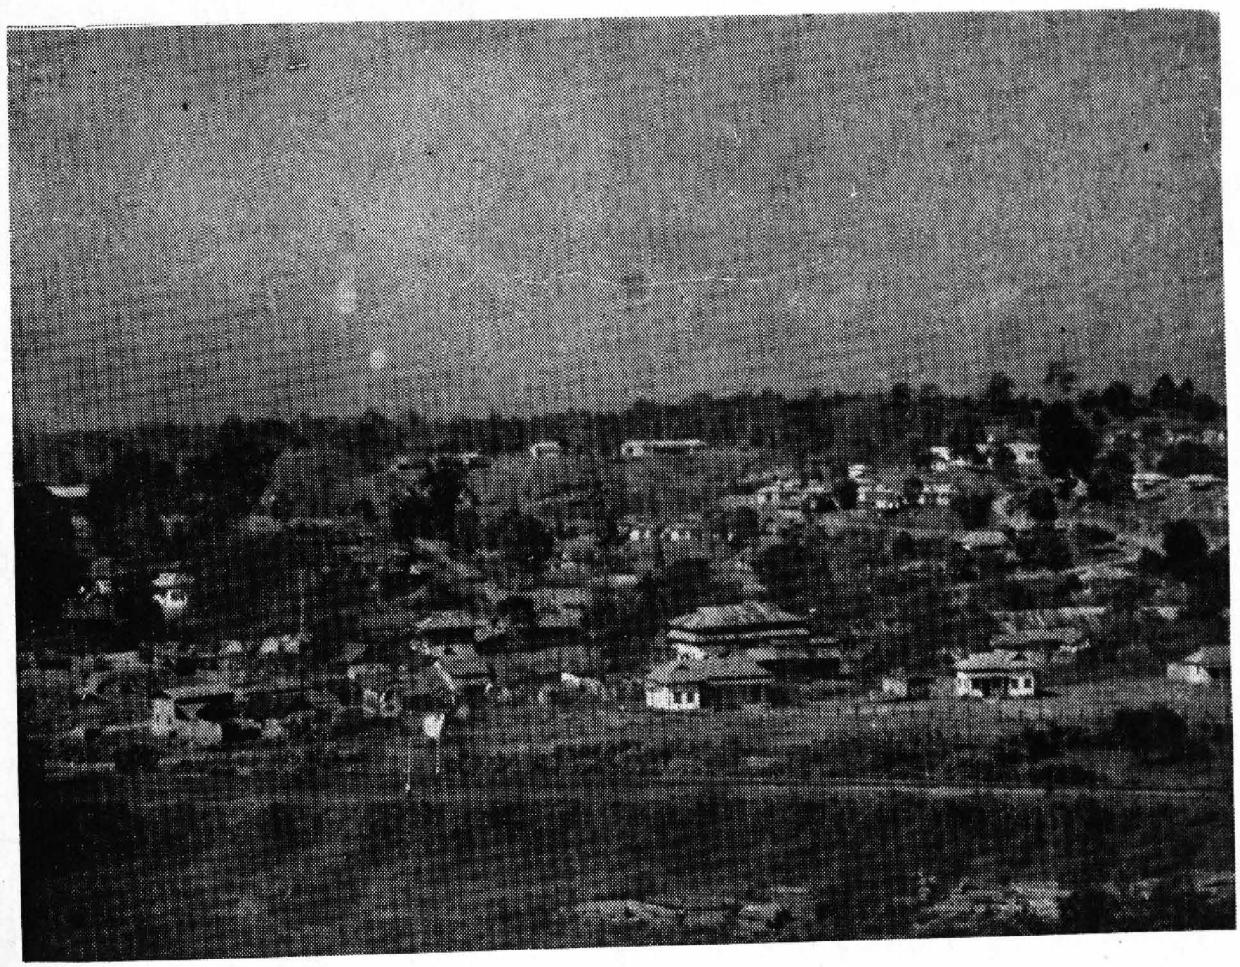

The functions and powers which have been vested in the District Council have been fully stated in the Sixth Schedule to the Constitution which have also been mentioned in the brief Introduction of the Autonomous District Councils to this note. They include practically the entire field of judicial administration, civil and criminal. To meet the expenditure arising from the discharge of the function allotted to the Council, certain important items of revenue have also been transferred to the District Council. These items include among others, land revenue, local rate, house tax, building tax, taxes on professions, trades, callings and employments, taxes on animals, vehicles and boat, ferry tolls and taxes levied for the maintenance of schools, dispensaries and roads. In addition, the income from the Unclassed State Forests and an agreed percentage of the royalties accruing from the grant of license and lease for the extraction of minerals in the area also goes to the District Council fund.

A number of important functions hitherto vesting in Government are being transferred to the District Council. However, Government are fully aware that the development of the area cannot wholly be left to the District Council. The Constitution makes it mandatory for the Government to step up the standards of administration in the backward areas with a view to bringing them on the same footing as the rest of the areas of the State. The Constitution also enjoins that speedy measures should be undertaken for the promotion of the welfare of the tribal and other backward sections of the community.

An Advisory Commitee for the development of the Tribal areas had been constituted. This Committee which is to be represented by one of its members in the legislature is to be selected by the District Council. The

SHILLONG-HAFLONG ROAD, N. C. HILLS
(Courtesy — Publicity, Assam)

DIPHU
(Courtesy — Publicity, Assam)

Committee will advise and formulate plans for the development of the Tribal Areas.

The North Cachar Hills Subdivision has always served as a model to other Tribal Areas in the matter of peace, co-operation and harmony among its people. Here we have the Kacharis, the Kukis, the Nagas, the Khasis and other communities living side by side happily and without the slightest friction. The people of the North Cachar Hills have set an example to the other hill areas in this respect which is a prelude to the fuller integration of the hill and plain areas of the State and the closer understanding and co-operation between the people of the hills and those of the plains.

MIKIR HILLS DISTRICT COUNCIL

Under the provisions of the Sixth Schedule of the Constitution of India, a separate administrative body for the Mikir Hills Subdivision, known as the Mikir Hills District Council, also came into being. The then Chief Minister of Assam, Shri Bishnuram Medhi, formally inaugurated it on the 23rd June 1952.

As in the North Cachar Hills District Council, the District Council for the Mikir Hills consists of sixteen members, twelve of whom are to be elected and four nominated with a view to provide representation to the minorities who constitute a considerable proportion of the total population. The Deputy Commissioner acted as the Chairman of the District Council for a period of six years with powers to guide the deliberations and actions of the Council, subject to the control of the Government for that period. This had been done, so that in the initial stages, the District Council may avail itself of the knowledge and guidance of experienced officers. The extent of local autonomy given to the Council is very considerable and it is imperative that the utmost caution and vigilance be exercised by that body to see that all interests are properly served and an all round development of the district be achieved.

The extent of authority given to the Council is very wide and covers a wide field of judicial administration, both civil and criminal. The Council is competent to enact regulation for the administration of unclassed State forests, for the distribution and occupation of land, for the establishment of town and village committees, for the establishment and the efficient management of bazars, ponds, fisheries, roads and waterways. The Council has also power to frame laws and regulate and control money-lending and trading in the district by persons other than Scheduled Tribes. Another important function coming under the purview of the Council is the framing of agricultural policies and devising of effective methods to control jhumming. The Council's activity also extends to developmental functions and has powers to frame policies for the growth of primary education, to make laws regarding public health and sanitation and to establish and manage dispensaries. Besides, the Council has power to regulate the system of marriage and inheritance and succession, power to appoint and regulate the succession of chiefs and headmen and to regulate social customs in genetal. In short, the sphere of activity of the District Council covers almost every aspects of life, and if the Council discharges its role satisfactorily there is every reason to believe that the economic position of the inhabitants will materially alter in the very near future.

For the efficient discharge of its functions, the Council has been allotted specific items of revenue. Land revenue, local rate, house and building taxes, taxes on professions and employments, ferry tolls, vehicle taxes and taxes levied for the maintenance of schools and dispensaries will all serve as sources of revenue from which the Council can meet its necessary expenses. Besides these items of revenue, the revenue from the Unclassed State Forests and an agreed percentage of the royalties from the licenses and leases for mineral extraction will also go the Council. These sources will yield a substantial sum of money every year. The handing over of such a substantial measure of local auotonomy to the representatives does not in the least reduce the responsibilities of the State Government with regard to the development of the district. The State Government will still continue to serve the interest of the area by implementing the schemes as expeditiously as practicable so that progressive development initiated in the future through the activities of the District Council will go hand in with the developmental programme undertaken by the State Government.

The main problem of the district continues to be one of communication. In view of the inherent difficulties in the construction of hill roads, progress in this field has been very slow. It is therefore left to the initiative of the District Council to encourage self-help and voluntary labour in the context of providing effective means of communication.

In the field of agriculture the District Council must by persuasion and by the

framing of judicious agricultural policies, do away with the scourge of jhumming which is not only denuding the district of its forest wealth but has given rise to serious problems of erosion in many areas. The District Council should achieve in this field a happy compromise between maximum afforestation and of bringing under the plough the maximum of cultivable land, so that both forest wealth and food production may be augmented side by side.

The District Council should discourage the nomadic tendency which has hitherto been an undesirable feature of this district, and induce the people to settle down permanently in particular areas not only with a view to achieve greater stability and economic prosperity, but also to facilitate the undertaking of other welfare and developmental schemes. Terraced cultivation has been taken up with no small measure of success in other hill districts, and it should be resorted to in this district also as far as possible.

On the undesirability of the opium habit which has taken fairly deep roots among the people of the district, it is the bounded duty of the District Council to devote its serious attention to this evil so that it may be eradicated in the very near future.

PHYSICAL ASPECTS

Physiographically, the district can be divided into three broad divisions—(a) The Mikir Hills, (b) the combined Kopili and Jamuna and (c) the North Cachar Hills Division.

(a) The Mikir Hills proper lies between the Assam Range and the Dhansiri river to the east, divided by the Kopili valley. It is a detached part of the peninsular shield and the oldest landmass in the district. The group of hills comprising the area is of relict type and has been subjected to extreme weathering and denudation with the result that it forms an extremely rugged and hilly terrain rising rather abruptly from the plains. Hills and valleys alike are covered with dense tree forest except in places where they have been cleared for the shifting cultivation of the Mikir Tribe. The country roughly has a northernly slope with the outer ranges of the Mikir Hills having an average elevation of about 450 metres above the mean sea level. In the central portion, east of the Kopili, the average elevation of the ranges is about 1,000 metres. The northern range with an average elevation of about 600 metres extend from Dabaka in the south-west to Bokakhat in the north-east. The main Peaks are Basundhari Parbat (774 m), Kud Parbat (626 m), Mokrang Parbat (470 m), Mehekongthu (638 m), Raisang (737 m) Kankochan (414 m), and others. The higher southern range with an average elevation of about 900 metres extend from Baguliaghat in the south-west to Barpathar in the north-east. The main peaks are Changhetison (1,279 m), Matikhala Parbat (841 m), Warek-mushak (1,050 m), Bhaluk Parbat (1,094 m), Cheniabirshon (915 m), Hunghi Parbat (831 m), Khunbaman Parbat (1,307 m) and others. These hills support a scanty population who grow dry rice, vegetables and cotton on their slopes and are seldom visided by the natives of the plains.

(b) The combined Kopili and Jamuna and the Dhansiri valleys between Lumding, Hojai and Diphu is an undulating plain having an elevation ranging from 75 to 250 metres. This low land is wedged in between the Mikir Hills on the north, the Barail range on the south-east and the North Cachar Hills on the south. Nonglai (354 m), Samkher (374), Inglonggiri (457 m) and other low hills north of Lumding form the main water divide between the Dhansiri valley in the east, the Jamuna valley in the north and the Kopili valley in the west.

(c) The North Cachar Hills division forms a rugged hilly country constituting the eastern flanks of the Jaintia hills and northern flanks of the Barail range. Trending east-west, south and west of Haflong swings the Barail range nearly N. E. east of Haflong and continues so into Nagaland. It forms the water divide between the Dhansiri in the north and the Surma in the South. The elevation of the range varies from 1,000 to 1,200 metres above mean sea level. The high peaks along the range are Jhingtubum (1,867 m), Nairakula (1,422 m), Hemeolowa (1,376 m), Mahadeo Kaukaha (1,460 m), Kolombot (1,316 m), Sherpai (1,656 m), Kalangtom (1,322 m), Longmai, Laikarang, Daojali Parbat and Sarkaheding and other NE-SW trending low ranges flanking the northern slopes of the Barail range, constituting the Langting-Mupa reserve forest. The eastern flanks of the Jaintia Hills consists of Saipung and Kurunming R. F. Hills along the eastern side of the Kopili valley and Sunngut (686 m), Bura Ingti (321 m). hills on the N. W. side of the Kopili river. The general elevation of these hills vary from 600 to 900 metres and the chief peaks are Kalimkhu (1,290 m), Thangnanship (995 m), Marpung (965 m), Khorungima (961 m), Konglong (559 m), Sunngut (716 m), Rongkhong (656 m) and Tirkim (686 m).

Near Haflong, the junction of the Shillong plateau and the hill country is very sharply marked, but in the northern part of the North-East Frontier Railway Hill Section the transition is more gradual.

Towards the north and the east, ancient rocks sink below the Brahmaputra alluvium.

THE MIKIRS

The Mikirs, a small tribe apparently of Bodo origin and perhaps of the latest migration live in the hills between the plains of the Sibsagar district and Naga Hills. In their own language they call themselves Arlengs meaning men. The word Mikir may have originated from Mi-kiri, meaning hill people. In origin, they may be a mixture of the Austrics and the Bodos. They are divided into twelve clans, but they were never of any account during the reign of any of the dynasties that ruled in Assam. These twelve clans form the four tribes of Chimtong, Ronghang, Amri, and Dumrali. Among these tribes, the Chintong and Ronghang rank rather higher than the Amri because the Amri excused itself from sending a man on the dangerous embassage to the Ahom king in Sibsagar, when a representative was required from each tribe. Hence the Amri is excluded from sharing the liquor at a sacrifice and and rather looked down upon by the western Mikirs especially. The Dumrali acted as interpreters to the embassy at the Ahom kings. Hence we may presume that they had been settled in the Assam Valley for some time.

The whole of the Mikir Hills area was under the full control of the Varman, the Mlechha and the Pala dynasties as testified to by innumerable archaeological Hindu temples and images all over the Mikir Hills area from Parokhoa to Dighalpani on one side and Numaligrah to Deopani on the other.

After the fall of the Pala dynasty, the Mikirs were left to themselves and when the Kachari kings established new kingdom in Sonapur, Vanpur and Dimapur, they were completely subjugated again. The Kacharis kept the Mikirs as subjects and exploited them to the greatest extent without doing anything for amliorating their condition. When the Kachari king shifted his headquarters from Sonapur to Dimapur and then to Maibong and Khaspur, the Mikirs were left to the administration of different Viceroys of the Kachari kings, and their troubles reached the extreme stage.

Being oppressed by Kachari officials, the Mikirs migrated to the Jaintia Kingdom and settled in Rongkhang near Lanka in the Nowgong district. Thong-Nok-bey, a Mikis wrestler and warrior became the Chief General of the Jaintia King, and the members of his family were given high offices in the State of Rongkhang. High social position accrued to the Royal Offices, and the descendants of Rongkhang still guide the social functions of the Mikirs.

When the Ahoms came to power, the Mikirs were not very much affected culturally ; but some chiefs near Roha were brought under the Ahom rule. Sarat Kumar, either a Mikir Chief or a Hindu who identified himself with the Mikir, tried to lead an agitation against this move of subjugation, but he was treacherously exposed and murdered though the Mikirs still believe that he will be coming back in time to relieve them of the bondage.

Before the arrival of the British, the Mikirs led a precarious life—one section was under the Ahom chief at Roha, another under Tularam Senapati at Moudanga being oppressed by the Naga frequently, and the third section under the Jaintia King. There was still the fourth group between Golaghat and Dimapur owing allegiance to none but strongly maintaining their position against the Nagas.

With the arrival of the British, along with the subjugation of the various ruling tribes, the Mikirs were automatically freed and they came directly under the British rule.

THE KACHARIS OF NORTH CACHAR HILLS

(C. A. Soppitt)

The Designation

The origin of the term 'Kachari' is somewhat doubtful. The name is unknown to the people themselves, who speak of each other as Bada, Barafisa or Bodo in the plains of Assam and as Dimasa, Dimasazao, in the North Cachar Hills and in the Cachar district generally. Barifisa signifies the children of the Bara, while Dimasa means the descendant, or son, of the head of big river. These names point conclusively to the two parts the Kachari empire was broken up into by the Koch and Ahoms when rulers of Central and Upper Assam. Though bearing different tribal designations, the Barafisa and Dimasa speak very nearly the same language, and have many customs in common ; in short, they are one and the

same people. It is very probable that the Dimasazao, on leaving Maibong and settling in the district known to the Sylhet Bengali as Cachar, were called Kacharis by their neighbour, and that the term was soon generally accepted by outsiders as the real designation of the people. A mistake of this sort is very easily perpetuated ; thus it is common for a member of the tribe who understands a few words of Bengali to state in answer to a question that he is a Kachari. He used the term, knowing, in all probability, it will convey a clearer significance to the questioner than the word Dimasazao.

Early History

The very early history of the Kacharis is somewhat a matter of surmise. The old legends handed down from father to son would lead one to suppose that the race originally inhabited the hills and slopes to the north of the Brahmaputra, and then gradually extended through Central Assam to the Mymensingh district, the headquarters of the Raj being established at Gauhati. But the first historical accounts we have of them shows the Chutiyas (a kindred race) as established in the eastern corner of Assam. After hostilities lasting through a century and a half, they were over-thrown by the Ahoms in 1500 A. D., and retreated to Dimapur, from which place being subsequently driven, the capital was transferred to Maibong, and the name of the kingdom henceforth appears as Kachari.

A large number of Kacharis, there can be no doubt, remained in Central Assam ; some being absorbed in the ruling race by inter-marriage, and others perhaps retiring to the surrounding hills, and gradually changing their customs and language either from contact with the then inhabitants or from their intercourse with the Koch race before leaving the plains, developing into what now appear separate and distinct tribes, Garos, etc. The similarity in the construction of many words in Garo would lead to the supposition that the two languages were nearly allied at some remote period.

On being gradually driven into Upper Assam from Gauhati, the king, or Raja, established himself at Dimapur, at the foot of Samaguting, in the present Naga Hills district. During this transit, however, in addition to the large numbers of the race left in Central Assam, further bodies were left in Tezpur (Darrang), Nowgong, and other districts through which the exodus took place. Some of these people still speak the language known as Kachari, though in a slightly different form from the pure dialect in use in the North Cachar Hills, and are known by the designations Bodo, Lalung, Mech and Hajong.

The large section of Kacharis thus left in the Assam Valley tendered its submission to the Koch Behar, during the sway of that dynasty in Western Assam, and subsequently to the new ruling race, the Ahoms ; and though many, by combining and forming large communities, retained their language to a great extent in its original form, like the Bodo already mentioned, many again lost all, or nearly all, trace of their nationality from contact with the ruling races, and have probably contributed largely to the Koch caste of Hindus throughout the valley of the Brahmaputra.

Taking 1563 as the probable year of the removal of the Kachari Raj from Dimapur to Maibong, we hear in the same year of fights between the Kacharis in Nowgong and Darrang and the Ahoms. As regards Darrang, it is known that considerable bodies of the Kacharis settled in the district, their decendants being there to this day, and it is probable that before resubmitting to the Ahoms, after the departure of the Koch, several engagements took place. They were defeated, however, and shortly after helped the Ahoms to repulse the Muhammadan invasion, 1610—1615. The Nowgong Kacharis spoken of as fighting were not the settlers of the tribe in Nowgong, though there were many, but armies sent from Maibong and North Cachar by the Kachari Raja under the command of Tularam and other generals.

Raj at Dimapur

The Kachari Raja having established himself with a part of his people at Dimapur, built temples and houses of brick, and reigned supreme for some time in that portion of Assam. Remains of these temples and edifices are still to be found in the jungles about Dimapur.

Although previous to the establishment of the Kachari Raj at Dimapur a great portion of the history is, to a certain extent, wrapped in doubt, it is very certain that the race was the ruling one for many years throughout Assam. This fact is established not only by the large number of the people now found, but by the names of all, or nearly all, the principal rivers ; thus, Dibru signifies in Kachari the river of rapids (di, water, bru, bubbling, broken) :

Disai means the small river, and the word di is traceable in the names of numberless other rivers and streams throughout the Assam Valley (Dijoi, Disang, Dihing, Diputa, Dikrang Diju etc.) Dimapur signifying the town on the big or head water" i. e. river town, was doubtless so named by the Kacharies on the Raj being established there.

At this period of their history, we may take the Kachari nation as being divided into two parties ; the one independent, headed by a king or Raja, with Dimapur as the headquarters and the other broken up into sections, spread through Assam, and submissive to the Ahoms. The larger factions have retained their nationality and language more or less intact, while the lesser ones may have, as already mentioned, retreated to the hills surrounding and amalgamated with the inhabitants, ultimately becoming a distinct race, with some affinity to the Kachari proper.

Stay at Dimapur

Raj at Maibong

It is, however, with the people now known as Kacharis and especially with the part of that people who remained with their king, or Raja, that we have to do. The exact length of time the Kacharis remained at Dimapur is unknown, but from the nature of the remains of edifices found it must have extended over some years. Being forced to leave, the Raja with his people proceeded southwards through the hills bordering the Assam Valley, and took possession of a place named Maibong, on the river Mahur, in the North Cachar Hills, a short distance from the Barail range. Here the kingdom was again established, and a wall constructed around the new town. Numerous temples were erected, and the place permanently occupied as the headquarters of the Raja and aristocracy, while the followers settled themselves in the surrounding country.

Other Tribes About Maibong

At this time the higher hills surrounding the valley Mahur were occupied by independent Nagas and Kukis. Both these tribes readily submitted to the Kacharis, and paid a yearly revenue in the shape of house-tax. They retained, however, their own customs as regards the dispensation of justice, settling disputes, etc. and were in no way interferred with.

Removal to Cachar Plains

During the Raj of Dharmadhwaj Chandra or his successor, Kartik Chandra, the Kacharis removed from Maibong to the plains of Cachar (1750). Two reasons are assigned for this change in the headquarters of the Raj, the first being that Dharmadhwaj had married the daughter of the Tipperah Raja, with whom he received as dower the valley of the Barak, and the second reason being the aggressions of the Jaintia Raja from the west. The latter reason is in all probability the more correct. As regards the marriage of Dharmadhwaj with the daughter of the Raja of Hill Tipperah, there is little or no evidence forthcoming. Some time during that reign, one of the sons of the Kachari royal family quarrelled with the Raja for having accused him of aspiring to the throne and removed with a considerable number of followers to Hill Tipperah. He there either married into the reigning familly, and subsequently became king, or was adopted by the people. Whichever event occurred, it is certain that the Maibong reigning family and that of Hill Tipperah were closely allied. The language of the hill Kacharis, even at the present day, is much the same as that spoken by Tipperahs in the Tipperah Hills. The fact, mentioned further on, of some difficulty having been encountered in persuading settlers bordering Sylhet to pay revenue, does not favour the assumption that the Cachar district was given as a present to the Maibong Raja, but points rather to a forcible occupation. At any rate, whatever the reason may have been, about the year 1750 the Raja, his court, and the Barmans (the aristocracy) crossed the Barail range, and established the Raj in the plains of Cachar at Khaspur.

Government of Hills

The great mass of the Kachari people, however, remained in the North Cachar Hills, which were still tributary to the Raj. A Bara Bhandari, or chief lawman, was not appointed, with a large establishment to aid him, and placed in charge of the hills. There was also a Senapati, or commander of the military forces, with other superior officers, exercising control over the tribute-paying tribes. In addition, a long list was drawn up of officials to whom Kachari subjects in the plains were to be subordinate. The list was a most complete one, and the appointments would have involved a thorough control over the subjects, had there only been any. With the exception of the aristocracy and immediate followers, few of the people followed their Raja to the plains, the result

that most of the posts were sinecures, and created, in all probability, more with a view to providing for favourites than for any purposes of utility.

Hindu influence on Kacharis

The Kachari Raja settled at Khaspur, in the plains of Cachar, about the year 1750. Hindu influence is supposed to have been brought to bear on the court when at Maibong, Brahman priests having resided there with the Raja and aristocracy but no actual conversion took place from any years after.

Conversion of Raja and Court

In 1790, the then Raja, Krishna Chandra, and his brother Govind Chandra made a public profession of Brahmanism. They were both placed inside the body of a large copper image of a cow, and thence produced as reclaimed Hindus by the Brahmans, who assigned them a place as Kshatriyas of the Rajbansi tribe. On embracing the new faith, the Kacharis practised the rites of Kali, the wife of the All-destroyer. To account for the admission of the Kacharis, the Raja, his court, and aristocracy (the Brahmans) into recognised Hinduism, the Brahmans were forced to invent a legend that the race was descended from Bhim, one of the brothers of the Mahabhrarata.

Legend of Descent

The Kachari legend runs that Bhim while wandering on earth, met with the daughter of a Rakshas, or demon. He immediately fell in love and married her. They had a son by name Ghatothkoch, the first of the Kachari race. From Ghatothkoch descended a line of 103 independent sovereigns, the list of those names, however, is entirely the invention of Brahmins, the last eight alone being accepted, who are genuine historical personages. The names of these rulers are as follows :— Suradarpa Chandra, Dharma-dhwaj Chandra, Kartik Chandra, Ram Chandra, Hari Chandra, Lakshmi Chandra, Krishna Chandra and Govind Chandra. While the Raja and aristocracy embraced Hinduism, the mass of the Kacharis, who had stayed in the hills when the court removed from Maibong, retained their old faith.

Legend of Ram Chandi

The tutelary goddess of Cachar was named Ram Chandi. While the seat of the Government was at Khaspur, Ram Chandi is stated to have appeared to Raja Nirbhayanarayan, and told him to meet her at a certain spot on a river the following day. In accordance with her instructions, he went to the place, and patiently waited some time. As he was about to leave, a huge snake appeared above the surface of the water and swam towards him. Remembering that the goddess had instructed him to seize anything that appeared by the neck, the Raja mustered up courage and put out his hand. At the last moment, however, his nerve failed him, and he seized the snake by the tail. Almost at the instant it changed into a sword, bent in and out, and bearing some resemblance to a snake in motion. This sword the Raja carried away with him. The night following, Ram Chandi again appeared, and upbraided him for not having obeyed her instructions, but informed him that, nevertheless, as long as the sword was preserved carefully, the State would prosper. This sword, on the assassination of Gobind Chandra, remained in the house of the Rani. What ultimately became of it, on the death of the Rani, is not known.

Expulsion of Kacharis from Khaspur

Early in the nineteenth century, the Kacharis were rendered insecure at Khaspur by Burmese invasions, and removed their capital to Garbetta, in the Bikrampur pargana. Shortly after this, the reign of Gobind Chandra, the last Kachari Raja, degenerated into one perpetual flight. We hear of him as taking refuge in Sylhet, and settling at Hari Thikar, on the north side of the Barak, and in other places. In 1826 he was restored to his throne by the British Government, when the Burmese were expelled. Some four years after his restoration he was assassinated.

Assassination of Gobind Chandra

It appears that one Gumar Shinge had been appointed a general of the forces in the place of one Tularam. On the occasion of a darbar, Gumar Shinge seated himself in presence of the Raja, who at once remonstrated with him. This was the commencement of quarrels. Ultimately, Gumar Shinge left the service and retired to Manipur. There he is supposed to have collected his friends and relations, and induced them to raid on the

palace of the Raja, and put him to death. On the assassination, as no legitimate successor was left, the British took possession of Cachar in accordance with a clause in the Treaty of 1826. Previous the death of Gobind Chandra, he had adopted an illegitimate son, but no claim was preferred on his behalf, and it is doubtful whether the people themselves would have hailed him as a ruler over them.

British annexation

North Cachar Independent

With the annexation of Cachar and the death of Govind Chandra, the Kachari Raj in the plains was at an end ; but the North Cachar Hills still remained independent. In order to account for this, it is necessary to go back to the latter days of the reign of Raja Khetri Chandra (Krishna Chandra of the list). The Senapati, or commander of the forces, at that time was one Tularam, an officer entrusted with great powers, and considered in a way the Governor of the North Cachar Hills. Any military undertakings were, as a rule, under the directions of this officer. On one occasion, it is stated he took a force from North Cachar, by order of the Raja down to Nowgong and the Assam Valley, for the purpose of raiding. On emerging from the hills, the party came across a herd of wild elephants, and, while Tularam deciding how best to avoid them, the leader of the herd approached and "salaamed" with his trunk. This was looked upon as a good omen, and the force proceeded, and after a successful raid returned to the hills. The fact of the elephants paying homage was now reported to the Raja who with his brother and subsequent successor, Govind Chandra, held a long consultation. The latter urged the Raja by some means or other, to put Tularam to death, as otherwise, after the respect paid to him by the beasts of the field, he would in all probability aspire to the throne. Khetri Chandra refused, however, to listen to this advice, and detained Tularam in North Cachar. Shortly before his death, feeling that his end was approaching, he ordered down the Senapati, and warned him that his successor, Govind Chandra, entertained anything but friendly feelings towards him, and would on succeeding to the Raj put him to death. Tularam, being forewarned, on the death of the Raja fled to Sylhet, and thence through the Jaintia jurisdiction to the country bordering Nowgong.

Tularam Senapati

Collecting a considerable body of men, he persuaded them to return with him to North Cachar, and, having reached the hills, established himself as Raja, and succeeded in forcing the surrounding villages, over whom he had always ruled, to swear allegiance. Govind Chandra hearing of the rising, deputed Tularam's successor, Karma Singh, to proceed from Cachar and subdue the rebel forces. The engagement took place in the Jatinga Valley, on what *might be considered neutral* ground by both parties, and a considerable number were killed and wounded on either side. It is difficult to ascertain exactly with whom the victory lay, because, though Tularam withdrew his army to the hills, the Raja's forces did not, or could not follow up their advantage if they did gain any. At any rate, subsequently to this engagement, Tularam remained in undistured possession of North Cachar, and when Cachar was annexed in 1830 by the British, a treaty was made with him, acknowledging his sovereignty north of the Barail range. In 1854, on the death of Tularam, the territory was annexed to the Assam district of Nowgong, subsequently, in 1866, a portion was given to the new Naga Hills district and finally, in 1880-81, new boundaries were fixed, and a subdivision subordinate to Cachar established.

Rising in North Cachar

THE ZEMI NAGAS

The Zemi Nagas are the well-known Indo-Mongoloids who came down to the north-eastern parts of India many centuries ago. They are more or less Mongolians in appearance with little sharp eyes, thick black hair, well-built, strong and healthy. They are not so tall as are all other hill tribes of Assam. Their complexion is tannish and it varies from one to another depending on the altitude of the place in which they live. But it may be said that the skin of both sexes is exceptionally fair. Beards and moustaches are seldom seen and shaving is practised.

The Zemi Nagas are living in three different districts, namely, the North Cachar Hills, Manipur and Naga Hills. Those living in Naga Hills call themselves 'Zeliang'. The Zeme Nagas of North Cachar Hills have

been living along with other tribes of the district like the Kacharis, Kukis, the Hmars etc. since the last eighteen century. They are classified as one of the sub-tribes of the so-called Kaccha Naga tribes. They originally came from the north-east of the subdivision and migrated down the Barail range and settled in the mountains south of Maibong. They also went as far as the bank of the Kopili river. They lived for many years under the Kachari suzerainty. After a lapse of two centuries the Kachari power waned. With decline of the Kachari power, the Zemes were an easy prey to the warlike Angami Nagas who raided them constantly and exacted tribute. Under such suppression, some of the villages in the north and east migrated to the west passing the Barail and colonising the hills beyond the Diyung valley. They still speak the Zeme dialect of Naga Hills and not that of the earlier Barail settlers.

The term 'Zeme' has two different meanings. One 'Zemene' from which it is derived, means 'man'. The other 'Nzieme' means 'those who are in hotter, plainer region'. The latter meaning is perhaps more appropriate because the Zeme Nagas are in the comparatively hot region of North Cachar Hills, though in the past, before their migration, they did belong to the cold region of the north-east.

As stated earlier, the Zeme Nagas occupy an area stretching from the bank of the Kopili river on the west to the eastern border of North Cachar Hills, forming a long chain with few Kuki and Hmar villages at places. Since the predilection of the Zemes are for the mountains rather than for the plain areas, most of the villages are established on the breezy hill-tops and hill slopes. In the past when village raids were considered as one of the daily routines, villages situated on the hill-tops provided better advantages for defence. Now, as is to be expected, they have less scope for wet rice cultivation ; they practice shifting cultivation on the hill slopes. Such being their lot, they are to be hard-working energetic, hardy and can be exposed to sun and rain for considerable period of time.

The Zeme Nagas have, in North Cachar Hills five different clans, namely 'Npame', 'Nkuame', 'Heneume', and 'Sogame'. Of them 'Npame' and 'Nkuame' are considered as belonging to the same clan and marriage between the clans is not encouraged. All the clans mentioned above are equal in status or in social position. There is no caste system.

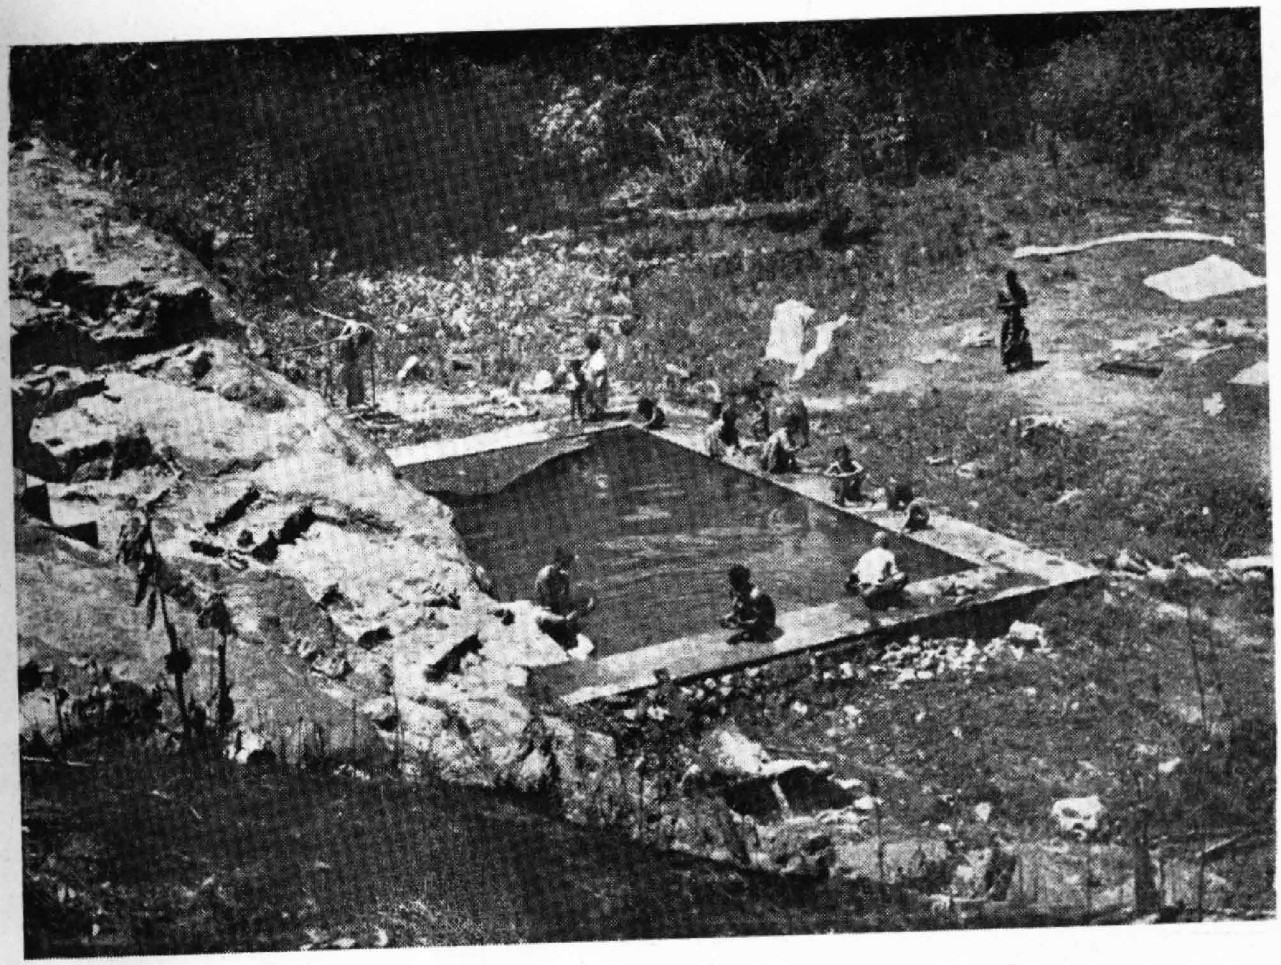

The impact of modern civilisation on the Zeme society is very insignificant. The term 'Civilisation' or 'modernism' has little or no effect on them. The total population live in the interior villages. They build their houses as their grandfathers did. They use the same agricultural implements. Improved methods of cultivation are not known as yet. They do not know much of the outside world except the limited vision they have of their own surroundings. They like to sing their old fashioned tunes and dance, put the same dresses, take the same quality of food and drink, perhaps less in quantity. This does not mean that they are happy and contented with their lot. They are struggling for betterment of their life. Adequate schools, dispensaries, communication and other factors that go to lead the society to the way of civilisation are wanted.

Manners and customs remain almost unchanged in spite of the long passage of time. Though their culture is primitive and pristine, it is fast dying for want of encouragement.

THE KUKIS

The Kukis are tribal people just like other tribes of India—such as the Santals the Kols, the Mundas, the Khasis, the Nagas etc. It is said that they first came to India from Central Asia through north-eastern passes. In Kuki history, it is said that their first settlement was Central Asia and thereafter moved towards the south by entering into the Shan States of Burma in which they are known as 'Chin'. The Kukis and the Chins are the same people. There is no difference between them. They are but called 'Chins' in Burma and 'Kukis' in India.

There were popular stories in the Kuki migration connected with three important rivers, viz., the Gun, the Tuihat and the Tuilien. These rivers were believed respectively to be the Manipur river, in Manipur, the Chindwin river and Irrawadi river in Burma. The Kukis were believed to have started from the bank of the river Mekong in the southern part of China. In their downward movement they came up to the Bay of Bengal ; but they were obstructed by big rivers and the ocean and could not proceed to Bengal. They turned back towards the north by passing through Mizo Hills, Tripura, Cachar, North Cachar Hills, Naga Hills and then proceeded up to the Manipur State and made their settlement there. That is why the Kukis are found in all the eastern parts of India. However, about 50% of the total Kuki Tribes are found in Manipur.

KACHARI DANCERS — N. C. HILLS

The name 'Kuki' is a vexed term. In Manipur the Kukis are called 'Khomsai' by the Manipuris as they were believed to be the first well-known or nearest people to the Manipuris. In the same way in Assam the Kacharis called them 'Thanggumsa'. According to the belief of the present Anthropology Department of Assam, the Kukis were the people of 'Ku' lake in China. In Chinese the literal meaning of 'Kuki' is the "people of the Ku lake".

The Kukis prefer to live in hilly places, and like most other tribes, they generally live in villages with closely grouped houses. In each village there is a chief or headman who exercises wide powers. There is a court called "dewan" which is also the chief's residence. Here cases are tried by the chief who acts as judge. In court cases, the chief is assisted by some wise men called 'Siemang and Pachong'.

The Kukis are subdivided into many groups. They have their own dialects, each slightly different from the other, but they can understand one another when using their own dialect. The people are generally stout and strong, and they live freely and happily in their villages although they have only a few of the good things of life. The chief occupation of the people is jhum cultivation the fruits of which go for their maintenance. They make their own simple domestic materials such as plates from wood and pots from clay. The men are fairly good blacksmiths and produce material such as dao, axe, spade, hoe etc. They are also good hunters and fishermen. On the other hand, besides performing their household duties, the women can spin and weave and supply the necessity of clothes themselves. The staple foods of the tribe are rice, maize, millet, meat and fish wherever available.

The Kukis are animists by religion. Never had they any connection with Hinduism or Islamism. They sacrifice animals to different spirits at the time of sickness and worship God in vague terms of their belief. With the coming of the foreign missionaries, the Gospel has been accepted by the great majority of the population which, apart from its message of salvation, is mainly responsible for literacy and better living of the Kuki tribes. Modern civilisation has considerbly influenced the social and economic life of the people. Many changes were wrought with regards to their manners and customs, their dresses and their mode of thinking. But in spite of these changes, the usual customs, laws and habits which their forefathers adopted from time immemorial are still observed and strongly adhered to.

RIVER SYSTEM

The drainage of the district is northwards into the Brahmaputra. The Dhansiri flowing from east to north-east and the Kopili, with its tributary the Diyung, flowing from south to north-west and the tributary of the Jamuna flowing from east to west constitute the two main drainage basins of the district. The Dhansiri river forms the natural boundary between this district, Nagaland and Sibsagar district. It rises from the northern flank of Thingtubum peak of the Barail range, flows north-east through Dimapur and Bokajan and then enters Golaghat. Almost the entire portion of its drainage is received from the innumerable streams on the north-western flanks of the Naga Hills and the Barail range.

The Kopili river rises in the Jaintia Hills and flows north-east between the Jaintia Hills and the North Cachar Hills. Its main tributaries are the Dikishm, the Wohkhynriam, the Umpung, the Kharkor, the Umsong, the Myntang and the Amring. It enters the plain of Panimur south-west of Lanka where it is joined by the Diyung at Doiangmukh and then continues its course through the alluvial valley in a general north-westerly direction. At Jamunamukh it is joined by the Jamuna from the right bank and the Borpani from the left bank further down stream. The Diyung rises from the northern flanks of the Barail range and flows in a northerly direction and enters the plains a few miles to the west of Lumding, from where it flows west to join the Kopili. Its main tributaries are the Longloi, the Langeon, the Mahur, the Mupa, the Langting, the Lumding, the Langlao, the Disa and the Bora Langpher river.

The Jamuna river forms the main drainage basin along the southern foot of Mikir Hills. It rises on eastern flank of the Khumbaman range, flows south-west and enters the Plains north of Jarapgaon and then flows west and west-north-west and joins the Kopili at Jamunamukh south of Dabaka. The main tributaries are the Dikharu, Dikak the Patra Disa, the Disobai Nala, the Longhit, the Dillai and the Diphu Nala, the Disama Nala, the Pakiangso Nala, the Keyong Disa Nala and others.

The Barapani or Umkhen rises from near Shillong and enters the Kopili near Chaparmukh and it mainly drains the northern portion of the Khasi and Jaintia

Hills. The main tributaries are the Umiud, and the Myntriang.

In the Mikir Hills proper, apart from the Jamuna river, the other important rivers are the Kaliani which flows in the east-north-east direction across the hills in the north-eastern part ; the Diphu stream on the northern slopes near Bokakhat ; the Deopani and Kalpani Nalas on the north-western slopes ; the Langkhangtang and tributaries of Nanoi on the western slopes and the Bar Dikharu, Horanghati and Chalabar Nalas on the south-western slopes.

GEOLOGY

The Archean gneissis complex is the oldest group of rocks that occur in the district and mainly occupy the Mikir Hills proper as inliers and in the north-western fringe of the North Cachar Hills. The Archeans are unconformably overlain by the Shillong series consisting of quartzites, quartz-biotite-schists, quartz-sericite-schists, slates and phyllites. They occur mainly in the north-west corner of the district around Nongrirong, Khinduli, Umbaso and Unisora areas. To the south-east of this belt they also occur as isolated patches. Both the gneisses and the Shillong series are intruded by granite in the north-western corner of the district. This rock often intrudes along the heading of the quartzites. Isolated patches of the Sylhet Trap, a volcanic rock of jurassic age, occur locally around Myntdu, a little north-west of the North Cachar Hills and Arterangso to the west of Djam village, along the western flank of the Long'oi hills and along the Sidobai Nala. Fresh trap is very rare in these areas and it is invariably lateritised or decomposed. Over the trap is an irregular bed of white clay.

The Jaintia series unconformably overlie the earlier formations at different places. It fringes the archaeans on the southern and south-eastern side in a semi-circular outcrop. The lowermost Therria stage rocks of the series are well developed along the Kopili valley on the western part of the North Cachar Hills and continues in the Jamuna Valley as occasional patches and bands up to Borpathar.

The Sylhet limestone stage, the next higher one, is more widespread and thick. The main exposures more or less continue along the Kopili and Umrang valley in the North Cachar Hills and as isolated patches along the eastern flank of the Mikir Hills as far as Garampani.

The Kopili stage which overlies the Sylhet limestone stage occurs as a continuous narrow belt along the eastern side of the Kopili valley, but continues as detached patches into the Jamuna valley until it slices out in the Dhansiri valley.

The Barail series overlies the Jaintia series and occupy a larger areas north of the Haflong-Disang thrust. It fringes the Jaintia series to the north-west and occupies areas measuring many hundred square kilometres. This wide belt extends from the Barail foothills up to the Dhansiri reserved forest and finally disappears in the Dhansiri basin. But in the Jamuna basin a few isolated patches are found around Rangpigaon. The Barails contain few coal seams east of the Dhansiri valley. Thin seams of coal and carbonaceous shale are exposed around Bagha in the Kopili valley.

The Surma series overlies the Barails with an unconformity and is best developed south of the Barails in the Surma valley. It mainly occupies an east-west belt south of the Haflong-Disang thrust boundary. In the North Cachar Hills, rocks belonging to the series are exposed in the Karem-Maibong-Mupa tract, Sarikading range and around Lumding and the Dhansiri valleys. In the Jamuna valley they directly overlie the Jaintia series unconformably. In the Mikir Hills the unconformity below the Surmas is well seen and the Surmas transgress over the Barails and the Jaintia unto the Metamorphics. The Upper Bokabil stage is not well developed especially in the Mikir Hills.

The Tipam series, overlying the Surmas with no marked unconformity, occupies a wide area on the north-western flank of the Barail range that extends norh-east along the Dhansiri valley up to Barpathar. The overlying Dihing series rests on the Tipams with an unconformity and at places transgresses over the older formations into the gneisses. In the Mikir Hills, it fringes the border of the gneissic complex and covers the eastern portion of the Jamuna valley, the western side of the Dhansiri river basin which extends to the north up to Garampani.

Laterite and lateritic soil of recent age covers the earlier formations at places. The grological succession is summarised below :—

Recent	Laterite
Pleistocene	Alluvium
Pliocene	Dihing series
	Unconformity

Miocene	Tipam series
	Unconformity
Lower Miocene	Surma series
	Unconformity
Lower Aligocene to Upper Eocene	Barail series
	Unconformity
Eocene	Jaintia series
	Unconformity
Jurassic	Sylhet Trap
	Granite
	Shillong series
	Unconformity
Archean	Gneissis complex

ECONOMIC MINERALS

The United Mikir and North Cachar Hills district is another mineralised area with deposits of coal, limestone and lithomargic clay. Limestone and lithomarge are virtually untapped, but coal has been mined for some years, Coal is being worked in the Koilajan area and occurences of coal are found at Longlai, Kherni, Selvatta, Disobai nala and Khumbaman range and also near Garampani in the Kopili valley. The coal is however of poor quality and is scattered in small patches. The total estimated reserve of coal in the Koilajan areas as given by the Directorate of Geology and Mining is 0.6 million tons. The chemical and physical properties of coal found in the Longlai areas are as below—

Moisture%	Volatile matter%	Fixed carbon%	Ash%
4.5	50.57	25	13.20

Good quality limestone occurs in the rock of the Sylhet limestone stage at Garampani, Koilajan, Manjali, Selvatta, Mayong Disa and Longlai areas. It contains reserves of 154 million tons as estimated by the Geological Survey of India. In most of the above-mentioned areas the limestone is low in magnesia and suitable for cement manufactufe. The deposits near Langting and in the area between the Diyung and the Kopili rivers are likely to be of value to the paper pulp industry which may spring up in Lamsakhang in the Fourth Plain.

The lithomarge found in the Mikir Hills in association with the coal-measure may easily yield both pottery clay and fire-clay. Clays also occur at Kaliani, Kidimithipa and the Disobai nala. In tha pegmatites and in the granite, soda potassic and felspar occur and are suitable for the ceramic industry. The widespread shales of the Kopili stage can be utilised in cement manufacture. The granite and granite-gneisses of Mikir Hills proper and quartzites granites and epidiorites of the North Cachar Hills and Sylhet limestone in the Kopili and Jamuna valleys can be usefully utilised for road metals and building materials.

CLIMATE, RAINFALL AND TEMPERATURE

The United Mikir and North Cachar Hills district is a malarious region and unhealthy for unacclimatised persons. It has a moist climate, devoid of the amenities of a breezy atmosphere as are available in the higher plateau of the Khasi and Jaintia Hills. There has been unprecedented havoc wrought by Kala-azar and the Mikir people still suffer, although much less severely, from the scourge of that terrific disease from time to time. But for this, the Mikirs, acclimatised for generations as they are, appear to have developed some degree of immunity against most of the noxious influences of the unhealthy hills. The Haflong area of the North Cachar Hills has a salubrious climate and is very healthy.

Rainfall records for the district have never been properly collected for the last decade but records made available by the Meteorological Department of Gauhati and Calcutta show the annual average rainfall of the Haflong centre as 2525.97 m. m. Rainfall is heavy during the months of June to September. As regards temperature, available records show the annual average mean maximum as 25.8°C and mean minimum as 17.2°C. The winter days are cold and bracing and in summer, the days are generally bright and sunny.

EARTHQUAKES

In the annals of the State of Assam, the visit of earthquakes is by no means a rare phenomenon. In fact, the State of Assam has been the target of several major earthquakes in the past. Geologically, the Assam region is regarded as very unstable. As a matter of fact, Montessus-de-Ballore has described Assam as one of the most unstable regions in the world. It is, therefore, no wonder that the State has been the scene of nearly a dozen major earthquakes during the last century.

The Mikir Hills proper lies in the epicentral tract, and the rest of the district is liable to severe damage. The North Cachar Hills was the worst hit area by the earthquake of 1869 with its epicentre on the north-east of the Shillong plateau. The great earthquake of 1897 also affected the district but the North Cachar Hills escaped with comparatively little injury. The residence of the Subdivisional Officer and the Dak Bungalow at Haflong were rendered uninhabitable.

FORESTS

The United Mikir and North Cachar Hills district contains within its fold the following Reserves covering approximately an area of 641,353 acres.

1	Kaliana	51,840 acres
2	Nambar North (part)	15,000 ,,
3	Mikir Hills	51,840 ,,
4	Nambar West	41,100 ,,
5	Daldali	30,952 ,,
6	Disama	27,717 ,,
7	Kaki (part)	30,020 ,,
8	Dhansiri	190,707 ,,
9	Chalabor	7,104 ,,
10	Sildharampur	4,191 ,,
11	Jungthung	8,047 ,,
12	Amring	14,071 ,,
13	Jakota	3,620 ,,
14	Rongkhang	8,631 ,,
15	Langting-Mupa	121,866 ,,
16	Krungmin	30,720 ,,
17	Barail (part)	3,927 ,,
	Total	641,353 Acres

In addition to the area under Reserved Forests, the tract bears an extensive area of Unclassed State Forests. The latter area is forests in name only due to the fact that unrestricted jhumming has virtually eaten up all forest trees. Moreover the whole area is covered with dence bamboos and grasses with a few scattered trees here and there.

The forest reserves of the district are potentially very rich as they sustain very valuable forest produce of trees, canes and bamboos and many other minor forest product such as Patidoi, Agar, Dhuna, Chalmugra, etc. which give a very high revenue to the district. But the great handicap to tap the forest resources and to attract purchasers to work out the forest for timber and other forest produce has been, as in the past, the lack of good road communication. Hence, the first priority in the two Five Year Plans has rightly been given to road communication next to regeneration works. As a result, coupes and mahals of forest produce which could not be disposed of in the past, have been sold at competiteve prices and the areas remaining untapped are now being tapped.

With a view to improving the indigeneous cane species, a scheme for planting them has been undertaken in Bokajan area under the State Development Scheme since the year 1955. The species planted are Wahing (calamus viminalis) and Tita (clamus rotang) in an area of approximately 120 acres.

The forest is chiefly of miscellaneous type, with wet and dry portions. The wet type of forests bear Ontenga species. A lot of Ajhar is also found. Sal of poor quality occurs in small patches in the Chalabor, Sildharampur, Jungthung and Rongkhang reserves. The area under sal was more extensive in the past, but due to wanton destructions by jhumming and burning, it has been reduced considerably. Other important species from the utilisation point of view are gomarai, sam, sonaru, amri, poma, bogapoma bhelu, pola, gonseroi, nagabhe, sidha, sopa and some others. Most of the timber species are untilised for constructional purposes by the public as well as by the Government Departments. Some of the reserves, Langting-Mupa for example, are very rich in bamboos and bhelu trees, providing excellent raw materials for the manufacture of paper. Another special item of immense importance grown by the Mikirs is lac which fetches a very substantial revenue to the district.

Some new roads were constructed in the Diphu Subdivision during the First Five Year Plan with the aim of penetrating the inaccessible forests and bringing forth their products. The following four roads were constructed, improved and maintained at a total cost of Rs. 93,600.

1	Daldali-Dhansiri Forest Road	12 miles
2	Neparpatty-Balipathar Road	5½ ,,
3	Extraction Road through Daldali reserve	6 ,,
4	Deopani Plantation Road	1½ ,,
	Total	25 Miles

As regards creation of regeneration of plantations, 89 acres of mixed plantations were created at Deopani and Lahorijan centres with valuable hardwood species such as karoi, ajhar, hollock and bogipoma etc. The total expenditure on this account was Rs. 15,000. There was no improvement of forest village, nor was there any khair plantation taken up during the plan.

During the Second Five Year Plan, only 7 miles of new roads were constructed in the subdivision and 35 miles of the existing ones maintained and improved at a total cost of Rs. 1,57,700. As far as plantations are concerned, there were 12 acres of new plantations created and a nursery raised. Besides, there were the match wood and khair plantations created in areas of 152 and 60 acres respectively.

Due to the creation of plantations of valuable species and the opening up of means of communications for exploitation of the forest reserves, the future scope of the forest is decidely better and the forest wealth of the district will likewise improve.

ARCHAEOLOGY

At Maibong, there are ruins which are probably the remains of the palace of the Kachari Raja. There are also some 15 rock sculptures in an indifferent state of preservation. A solid rock, the size of a small cottage, has been carved into an outward-seeming of a house. There is a rock-cut temple and two inscribed stones at Maibong. Some stone images and carving have also been discoverd at Maibong, some of which are brought to Haflong and kept in the Subdivisional Officer's court. But a large collection of such stone images are said to have been taken away by the former Assam Bengal Railway authorities to Chittagong. These are the relics of the Kachari kings of the 16th century A. D. Besides these, there are four monolithic groups at Derabra, Kharton and Kobak in this district. These are said to be the ruins of the Khasis who inhabited this part of the country before the Kacharis. The rock cut temple, 2 inscribed stones and the 4 monolithic groups are protected monuments under the Ancient Monument Preservation Act, 1893.

POPULATION

According the 1961 Census, the total population of the district has reached the level of 279, 726 souls of whom 150,127 are males and 129,599 females. The sex ratio thus comes to 863 females per 1,000 males. There is an increase of 114,286 persons over the 1951 Census. The percentage increase of population during the decade 1951-1961 is 69.08 which is the highest percentage among all the districts of the State. This growth of population appears to be of an abnormal phenomenon. This is due to the fact that the people are becoming more conscious of a better and healthy living. Better health facilities and education have been introduced in the district as a result of with there has been a decrease in the death rate. Dreadful diseases such as leprosy and other skin diseases, kala-azar, malaria and dysentry, which took a heavy toll of the population in the past, have partly been wiped out due to the persistent efforts of the Public Health Department. There has been a better coverage and an all-round development on the socio-economic condition of the people. But the chief factor responsible for the increase of the district population has been the heavy influx of Pakistanis into the district during the last part of 1960-61 who constituted more than 12,000 persons.

The percentage increase of population during the last 60 years. i.e. from 1901-1961 is 585.40 and the percentage decennial growth of population for the years 1911 to 1961 stands as follows :—

1901-1911	.. ..	– 33.12 p. c.
1911-1921	.. ..	+ 5.92 p. c.
1921-1931	.. ..	+ 13.60 p. c.
1931-1941	.. ..	+ 306.17 p. c.
1941-1951	.. ..	+ 24.02 p. c.
1951-1961	.. ..	+ 67.08 p. c.

The period during 1931-1941 also shows a high decennial growth of population compared with the earlier years. In the present population, the district ranks in the tenth position among the eleventh district of the State and third position among the four Autonomous Districts. In this Census, the density of population is 48 persons per square mile as against 28 in 1951. For the earlier decades, the density of population per square mile is as shown below :—

1901	1911	1921	1931	1941	1951
7	5	5	6	23	28

As far as the Rural and Urban population of the District is concerned, the 1961 Census records a population of 276,461 persons in the rural area out of which 148,135 are males and 128,326 females ; whereas the only urban area-which is Haflong—records a population of 3,265 persons only of whom 1,992 are males and 1,273 females. The rural area covering a space of 5881.0 square miles has a density of 47 persons per square mile, whereas the only urban area of Haflong which has an area of 2.0 square miles only has the highest density of population in the district numbering 1,633 persons per square mile. The percentage of

urban population to total population is 1.17 per cent in 1961. For the 1941 and 1951 Census years, the percentage are 1.10 and 1.31 respectively.

In the 1961 Census the population figure of the Mikir Hills Subdivision is 225,407 persons while that of the North Cachar Hills is 54,919 persons. The former subdivision records an increase of population by 79.21 p.c. and the latter by 36.95 p.c. In an area of 3,995.0 square miles, the Mikir Hills Subdivision records a density of 56 persons per square mile ; and the North Cachar Hills Subdivis ion, covering an area of 1,888.0 square miles, has a density of 29 persons per square mile.

The district consists of only five Police Stations out of which four are under the Mikir Hills Subdivision and one under the North Cachar Hill Subdivision. The five Police Stations with their respective population figures are as shown below :—

1.	Baithalangso P. S.	64,558
2.	Howraghat P. S.	72,898
3.	Bokajan P. S.	55,495
4.	Diphu P. S.	32,456
5.	Haflong P. S.	54,319

Howraghat Police Station with an area of 767.0 square miles appears to be having more people per square mile in comparison with the other Police Stations. It has 95 persons per square mile. Its rate of increase of population during the last decade is 76.13%. Bokajan Police Station stands second with 63 persons per square mile in an area of 880.0 square miles. Its rate of increase is 84.19%. The three other Police Stations, viz. Baithalangso, Diphu and Haflong occupy the 3rd, 4th and 5th place in density having 55 ; 28 and 29 persons per square mile in areas of 1,172.0, 1,176.0 and 1,888.0 square miles respectively. Their rate of increase of population for the last decade are 83.37%, 70.35% and 36.95% respectively.

FLORA AND FAUNA

A greater part of the hill region of the district abounds in various types of bamboo and tall grass. The bamboo wealth of the district is rich enough to support a huge paper mill in the area. On the higher altitudes, timbers of excellent quality are found. Teak and sal are the most important products of the forest which are used are railway sleepers, building materials and furnitures etc. The district is famous for the big and small game areas. There is the original home of the rhinos; the proud emblem of Assam. Elephants, deer, bears, buffaloes, tigers and leopards are found in large numbers. So also are the different species of birds.

ECONOMIC DEVELOPMENT

Economically the United Mikir and North Cachar Hills District is very very poor. The reasons for this economic backwardness are varied and manifold. As in the case with all hill areas, the problem of communication and transport which is the life line of the people present the greatest difficulty. Perhaps next to the Mizo District, this district is the most backward in respect of road communications. A host of villages, lying scattered about in the district, remain in isolation and are far away from any highway or railway station. Most of them are inccessible and the people have to tread hard through dense forests and jungles to sell their produce, footpaths or bridle paths being the only means of communication. Next comes the age-old practice of jhum cultivation which is a scourge to the people. The impact of such a system of agriculture on the economy of the people has no doubt been harmful in the sense that not only has such a system been responsible for developing a nomadic tendency in the people, but it has also denuded the district of its forest wealth and given rise to other disastrous consequences like soil erosion, silting up of navigable rivers and floods in the plains. Indiscriminate destruction of forests causes the soil to be washed away by the rains, adversely affected the fertility of the area and eventually lead to conditions of acute food scarcity.

The national income of this district in the year 1960-61 was Rs. 6.40 crores. The per capita income for the same years was Rs. 234 which occupied the ninth place in comparison with the other districts of Assam and second position among the Autonomous districts.

FISHERIES

The United Mikir and North Cachar Hills District with mostly low ranges of hills hardly offers conditions required for hill fisheries. The Mikir Hills, one of the two subdivisions of the district, though having an altitude of 458 ft. is constituted and over-flanked by more or less plain area particularly the

north-eastern and north-western sides adjoining Sibsagar and Nowgong districts respectively. In these areas few old tanks and beels are found which may be reclaimed successfully for fisheries. The other counterpart, the subdivision of North Cachar Hills is more elevated with its average height ranging from 1,000 to 1,200 metres ; but there is very little scope for the development of fisheries. In few natural lakes, fishes of high altitude variety may be tried to be introduced. The subdivision being hilly as a whole offers no scope for development of beels or river fisheries.

There are a number of natural fisheries as given below, some of which may be developed further. The variety of fish that can be introduced into these natural fisheries is the Indian major Carp.

NAME OF FISHERIES

1 Lankajan
2 Habaipur Beel No. 1, 2, 3
3 Joma beel
4 Bee-dengpi
5 Railway beel
6 Kachu pukhuri
7 Bet pukhuri

The following Departmental Fish Farms have so far been established in the district for introduction and distribution of Indian Major Carps in the district, in some of which fishes are growing satisfactorily.

1 Padumpukhuri Renovation Project
2 Howraghat Tank
3 Bokajan Tank

Besides the fisheries mentioned above the Haflong lake, owned by the Haflong Town Committee, is worth mentioning which may offer vast scope for fishery. Exotic fishes of high altitude may be introduced in this lake on an experimental basis.

There is no seed distribution centre in this district. However, fry and fingerlings are distributed to the Departmental tanks and intending private pisciculturists from the adjoining districts of Nowgong and Sibsagar.

AGRICULTURE

As is common with all the hill tribes of Assam, the people of this district also practise jhumming or shifting cultivation on the slopes of the surrounding hills. Jungles are felled each successive year and are burned, cleared, planted and cultivated for two or three seasons. Then it is left to lie fallow for a number of years until the jungle grows again for the next jhum. Paddy being the staple food is cultivated in larger areas of land which however does not meet the full requirement of the people throughout the whole year. Along with paddy, chillies, pumpkins, ginger, cotton, millet castor-seeds, lac and maize are also grown. The sowing season begins in April-May and the harvest in November-December. The land is good for jhumming but the yield is still poor. This is due to the fact that the land is infested by pests and insects and scarcity in rain often results in famine.

The jhumming practice in the district is fairly extensive. The impact of such a system of agriculture on the economy of the hills no doubt been harmful in the sense that it has denuded the district of its forest wealth and given rise to serious problems of soil erosion in many areas. A very small majority of the people are now adopting wet cultivation as well as some form of terraced cultivation in particular areas wherever possible.

Lac is a special produce of immense importance grown by the people fetching a substantial revenue in the form of royalty. Government have already established a Shellac Factory at Chaparmukh, but its functioning has not been satisfactory.

COTTAGE INDUSTRIES

The inhabitants of the district have few manufactures of their own. The women-folk are known to be good weavers of cotton and endi-cloths, usually for their consumption. The weaving is done in the primitive looms with cotton raised in their fields and subsequently spun in a wheel. They also raise endi silk, the cocoon of the attacus ricini, fed on castor oil plants and weave it into coarse, sometimes fine fabrics, chiefly the 'borkapor' or blanket used in the cold season. They dye their own yarns in fast colour prepared out of raw indigo and other herbs available in the vicinity. The cloth is often artistic in colour and design. Such richly coloured cloths are known by various names

such as 'Mpakpai', 'Meraipan', 'Nipai', 'Dekup', 'Paimang' and Pezene'.

With a view to impart training in improved and up-to-date methods of weaving, Government have started a Demonstration Silk Farm at Diphu since 1951, in addition to Demonstration work done by the Sericulture Inspector and his staff. Stipends have also been given for training at the Titabar Institute. The Weaving Training Class at Sarihajan continues functioning.

Another important industry practised by the people is blacksmithy. They used to manufacture various kinds of spearheads, daos, axes, spade-hoes knives, needles and books for fishing and hunting.

Another from of industry. is basketry. Baskets are made for a vareity of uses. There are baskets for carrying fire-wood, husked rice and for mixing and straining rice beer. The baskets vary in sizes and shape according to the use which they are put. Mats are also made of split bamboo and some of them are very neatly and finely woven. Necklets and armlets are also made of fine strips of cane.

Hard materials for their own use like Shells, ivory, bone and horn are also manufactured by the people. Polishing is not resorted to and the finished articles are left to acquire smoothness by constant use or wear.

EMBANKMENT AND DRAINAGE

The Investigation Embankment and Drainage Division of the Public Works Department has done some investigation works in the district with a view to find out the fersibility of irrigation and drainage schemes to be taken up in the Third Five Plan and to collect hydrological data of rivers of major and small tributaries. The following table shows the achievements carried out in the district during the Second Five Year Plan.

	Levelling	Compass Survey	Countour Survey	Cross Section
(1) Survey of Langparpan Irrigation Scheme.	20 miles	20 miles	3 sq. miles	100 Nos.
(2) Survey for Borjan Irrigation Seheme in Borjan Mauza in Mikir Hills.	48 miles	50 miles	6 sq. miles	70 Nos.

(3) Collection of Hydrological data :—

Gauge site established	Discharge site established	Permanent cross section	Sub-soil water table	Rain Gauze	Construction of temporary shed
12 Nos.	10 Nos.	10 Nos.	17	11	12

Sub-soil water table records for 17 wells observed.

(4) Collection of minimum data for Irrigation Schemes.

Survey for providing Irrigation facilities of Deopani river.	Levelling	Compass Survey	Cross Section
	23 miles	15 miles	10 Nos.

With a view to replacing jhum cultivation by wet paddy cultivation and thereby to increase the food production and rehabilitate the people, a few irrigation schemes have been completed during the Second Five Year Plan and quite a number of them are being taken up during the Third Plan period. About four other schemes have not yet been started but which may be taken up in the very near future.

The following table shows the years of construction and completion of these schemes, the areas benefitted as well as the estimated amount spent for their construction :—

Schemes completed during 2nd Five Year Plan.

Names of Schemes	Estimated amount	Year of construction	Year of completion	Benefitted area
1. Mahur River Irrigation Scheme in Kalachand and Salikantapur area Phase I	Rs. 112,646	1955-56	1958-59	500 acres
2. Mahur River Irrigation Scheme in Kalachand and Salikantapur area Phase II	Rs. 146,152	1955-56	..	300 acres
3. Training of the Mahur near Mahur Bazar in North Cachar Hills	Rs. 50,000	1955-56	1958-59	300 acres

Schemes taken up during 3rd Five Year Plan.

4. Construction of Noblaidisha Irrigation Scheme in N. C. Hills	Rs. 376,800	1959-60	Work in progress	
5. Construction of Hajadisha Irrigation Scheme in N. C. Hills	Rs. 307,400	1959-60	do	450 acres
6. Construction of Mailu Irrigation Schemes in N. C. Hills	Rs. 208,600	1961-62	do	300 acres
7. Construction of Natunhaja Irrigation Scheme in N. C. Hills	Rs. 193,000	1961-62	do	300 acres

Names of Schemes	Estimated amount	Year of construction	Year of completion	Benefitted area
8. Construction of Purana Maibong Irrigation Scheme in N. C. Hills	Rs. 53,500	1962-63	do	130 acres
9. Construction of Kajurbond Irrigation Schemes in N. C. Hills	Rs. 200,000	Not yet started	do	225 acres
10. Construction of Tarakahedi Irrigation Scheme in N. C. Hills	Rs. 181,900	Not yet started	..	150 acres
11. Construction of Umrangso vall y Irrigation Scheme in N. C. Hills	Rs. 140,606	..	..	200 acres
12. Protection of Lalabasti Irrigation of River Jatinga in N. C. Hills	Rs. 58,155	..	..	200 acres
13. Construction of Mikarhadi Irrigation Scheme in N. C. Hills	Rs. 122,790	...	..	300 acres

CO-OPERATIVE MOVEMENT

With the orientation of the Five Year Plans, the co-operative movent in Assam started taking shape. The introduction of this movement is meant chiefly for uplifting the agricultural communities from their age-old stagnation by means of loans and advances. Basically, its purpose is to evolve a scheme of co-operative community which touches all aspects of life. As far as the United District of Mikir and North Cachar Hills is concerned there were no co-operative societies of any kind formed during the First Five Year Plan ; but up to the end of the Second Five Year Plan there were 130 Primary Agricultural Credit Societies with 3,727 members. A sum of Rs. 0.67 lakhs was advanced to the cultivators as short and medium term loans so as to enable them to make use of the improved methods of cultivation and reap better results thereof. Upto 1961 there were 6 Primary Marketing Societies in the district and 43 Primary Agricultural Credit Societies affiliated serving 501 members. The volume of agricultural business conducted during the Second Plan was Rs. 45.89 lakhs.

The All-India Census Publications published by the Union Government contain data only down to the level of a district in some cases, or to the level of a police station in other cases. Data regarding each village cannot be had from the Central Government Census Publications. But the data down to the level of a village are very essential for the purposes of the State Government and the administration in the districts and subdivisions. So for the first time, the District Census Handbooks were compiled and printed for each district of Assam in 1951. The editing and compilation was done by the Superintendent of Census Operations, but the printing and expenditure thereof was borne by the State Government. The District Census Handbooks have become very popular ever since, because they are needed not only by Government and the Deputy Commissioners and Subdivisional Officers, but also by the Local Bodies and the general public. They are absolutely essential for the purposes of delimitation of constituencies, the establishment of Panchayats, the determination of quota of civil supplies, the establishment of police stations and many other administrative matters required by the State Government. It has, therefore, been decided that in the 1961 Census also, the District Census Handbooks should be edited and compiled by the Superintendent of Census Operations and printed at the cost of the Government of Assam.

The Primary Census Abstracts given in the 1951 Census will now appear in the form of Village Directories which not only give detailed Census data for each village, but they also give such other informations as the existence of communication facilities, drinking water facilities, educational facilities, Scheduled Castes and Scheduled Tribes and the different categories of workers. The Village Directories also give us the area in acres of each village, if the village has been cadastrally surveyed and if the area figure is available, and they also give us the number of literates and the number of workers classified according to the nine categories of the Standard Industrial Classification adopted by the Government of India. Such informations are furnished for each village and for each block of a ward of a town. Thus the Directory furnishes information on the primary economic activities of each village or ward of a town and the literacy proportion of the population. This abstract is useful therefore, not only for the State Government and the Local Bodies for their administrative purposes but they are also in great demand by various Ministries of the Union Government like the Ministry of Education, Ministry of Labour and Employment, Ministry of Food and Agriculture and the Planning Commission. These data are also required for all sample surveys, both rural and urban, based on villages or wards of a town. The District Census Handbooks also contain tables on mother tongue, religion and the various tables specially prepared for Scheduled Tribes and Scheduled Castes of each district. Official statistics relating to vital statistics, statistics of hous hold and small-scale industries, administrative statistics and other statistics relating to various activities of Government, especially those connected with the First and Second Five Year Plans, have also been given. There is therefore, no doubt that the District Census Handbooks of the 1961 Census will furnish most of the data that are required for administrative as well as for planning and development purposes.

Before 1951, the population had been classified by religion ; but at the 1951 Census, the economic classification was substituted for the classification based on religion. In 1951, the people had been divided into two broad livelihood categories, namely the agricultural classes and the non-agricultural classes, and these two classes had again been sub-divided into four classes each. Each of the eight livelihood classes was again divided into three sub-classes with reference to their economic status, namely—

(i) Self-supporting Persons ;
(ii) Non-earning Dependents and
(iii) Earning Dependents

In the 1961 Census, the classification based on livelihood has been done away with and the basis of the classification now is WORK. People have been divided into two classes, the Workers and Non-Workers. The working population has been divided into nine categories of workers namely—

I. Working as Cultivator

II. Working as Agricultural Labourer

III. Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

IV. Working at Household Industry

V. Working in Manufacturing other than Household Industry

VI. Working in Construction

VII. Working in Trade and Commerce

VIII. Working in Transport, Storage and Communications

IX. Working in Other Services

The working population has been classified separately according to the returns relating to occupation and industry. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely Industrial nor an Occupational Classification of the population, but it was a combination of both. There were only 10 divisions and 88 subdivisions of Industries and Services. In the 1961 Census, the National Classification of Industries and Occupations adopted by the Government of India has been used also for the Census and there are more than 300 Occupational Families and 300 Industrial Minor Groups for which figures are given for the total population sex-wise. Another unique feature of the 1961 Census is that all these Economic Tables are prepared on the basis of the principal work of a person.

Non-workers have again been classified into eight categories as follows :—

1. A full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. A person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. Any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.
5. A beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.
6. A convict in jail (an undertrial prisoner is shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. A person who has not been employed before but is seeking employment for the first time.
8. A person employed before but now out of employment and seeking employment.

In the 1951 Census, the population was shown according to certain units known as Census Tracts. These Tracts were selected by the Superintendent of Census Operations on an ad hoc basis and they may constitute one Police Station, two Police Stations or even three Police Stations and they may also consist of part of a Police Station only. Urban areas of each district were treated as separate Tracts in the 1951 Census. In the 1961 Census, I have taken Police Stations only as units of Census Divisions and so all census data are given down to the level of a Police Station. The exception is that urban areas are treated as separate entities for the Subdivision.

ABBREVIATIONS OR NOTATIONS USED IN THE VILLAGE DIRECTORY

As all details cannot be given in the Village Directory, certain abbreviations and notations have been used for the sake of easy reproduction and printing. The following notations have therefore been used in the Village Directory.

NOTATIONS

1. Transport and Postal Facilities

(i) Road, Bridle Path, Metalled Road, Tarred Road	'R'
(ii) Railway	'Rly'
(iii) Postal Facilities	
Branch Post Office	'BO'
Sub-Post Office	'SO'
Extra Departmental Branch Office	'Edbo'
Extra Departmental Sub-Office	'Edso'
Central Sub-Office	'CSO'

2. Educational Institutions

(i) Primary, Basic, Tol, Muktab, Night, Nursery School	'P'
(ii) Middle School (M.E. & M.V.)	'M'

(iii) High School or Higher Secondary	'H'
(iv) Higher Institutions including Colleges	'C'
(v) Technical Institutions	'T'

3. Drinking Water Supply

(i) Tanks or Beels	'Tk'
(ii) Kachha well	'Kw'
(iii) Pipes and Tube wells or Ring wells	'S'
(iv) Pucca well	'Pw'
(v) River, Running Stream or Springs	'Riv'

P. S. :—Distance of the items is considered up to five miles

4. Bazar Day and Medical Facilities

(i) Weekly Bazar	'Wb'
(ii) Daily Bazar	'Db'
(iii) Dispensaries	'D'
(iv) Hospitals	'Hos'

5. Veterinary Facilities and whether the village is covered by Community Development or National Extension Service Blocks

(i) Government Veterinary (ii) Private Veterinary (iii) Other Methods	'V'
(iv) Community Development	'Cd'
(v) National Extension Service	'Nes'

DEFINITIONS

The following definitions used in the 1961 Census are reproduced below for easy reference :

1. Town

For the purpose of the 1961 Census, a town means a Municipality, a Town Committee, or a Cantonment and any other area having the following urban characteristics :

(i) If the population is not less than 5,000

(ii) If the density is not less than 1,000 per square mile

(iii) If the three-fourth of the working population is outside agriculture

2. Village

In Assam, a village means a cadastral village where there has been a cadastral survey. In the Plains districts where there has been no cadastral survey, it is taken to be a gaon together with its adjacent 'tolas', 'paras' etc. provided that none of these independent collections of houses are so large or so distant from cadastral village, with distinct individual names. In the Hills districts, the most convenient definition of a village is that it is a collection of houses bearing a separate name and situated with certain boundaries traditionally recognized by the villagers.

3. House

It is a structure or part of a structure inhabited or vacant or a dwelling, shop, a shop-cum-dwelling or a place of business, workshop, school etc. with a separate entrance.

4. Household

It is a group of persons who commonly live together and take their meals from a common mess or kitchen unless the exigencies of work prevent any one of them from doing so.

5. Scheduled Tribes

They are members of the backward tribes who generally occupy the hilly areas or other rather inaccessible parts of the Indian Union. They are generally very backward and so the Government of India has prepared a schedule of such tribes for the purpose of giving them facilities in education and employment so that they may come up to the level of the other advanced people of India as soon as possible. Scheduled Tribes may belong to any religion.

6. Scheduled Castes

They belong to the lowest rung of the castes of the Hindu and Sikh religions. In order to help them rise to the level of other more advanced societies in India, the Government has made a schedule of such people—hence the name Scheduled Castes.

7. Houseless persons

They are people who have no houses to dwell and generally live in pavements or open places, such as beggars, who beg in people's houses by day and sleep under the trees by night.

8. Institutional populations

They are people who are inmates of institutions, like hostels, boardings, jails etc.

9. Worker

Is a person who is working as a cultivator, an agricultural labourer, at a household industry or he may be doing any other work but he must earn some income. Work includes not only actual work but also effective supervision and direction of work.

10. Non-worker

Is a person who is either not doing any work or who does some work from which he does not earn any income. For example, a pensioner and a rentier who earn some income but if they do not do any other work they are classified as non-workers. On the contrary, students and housewives may be doing some work either in school or in the house but as they do not earn any income they are classified as non-workers for the purpose of the Census.

11. Cultivator

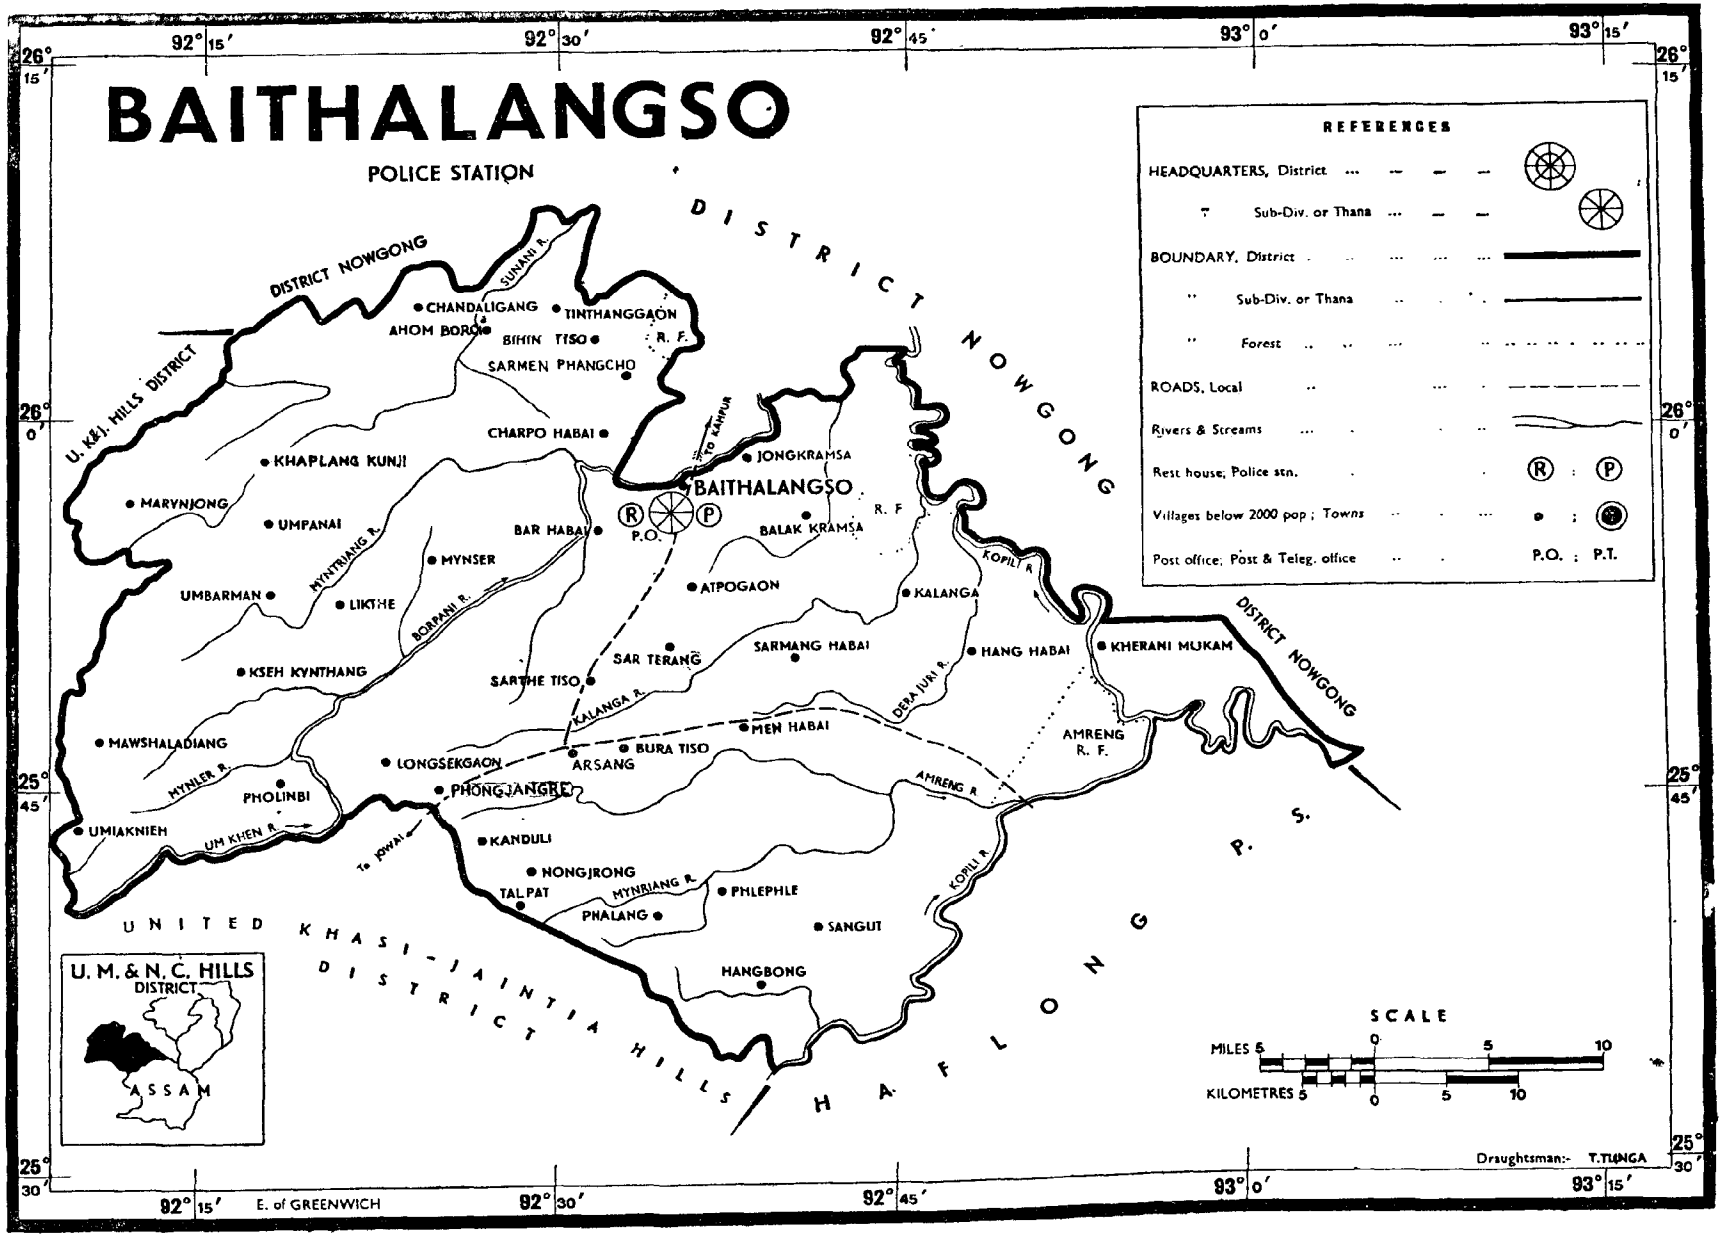

For purposes of the Census a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government, (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

12. Agricultural Labourer

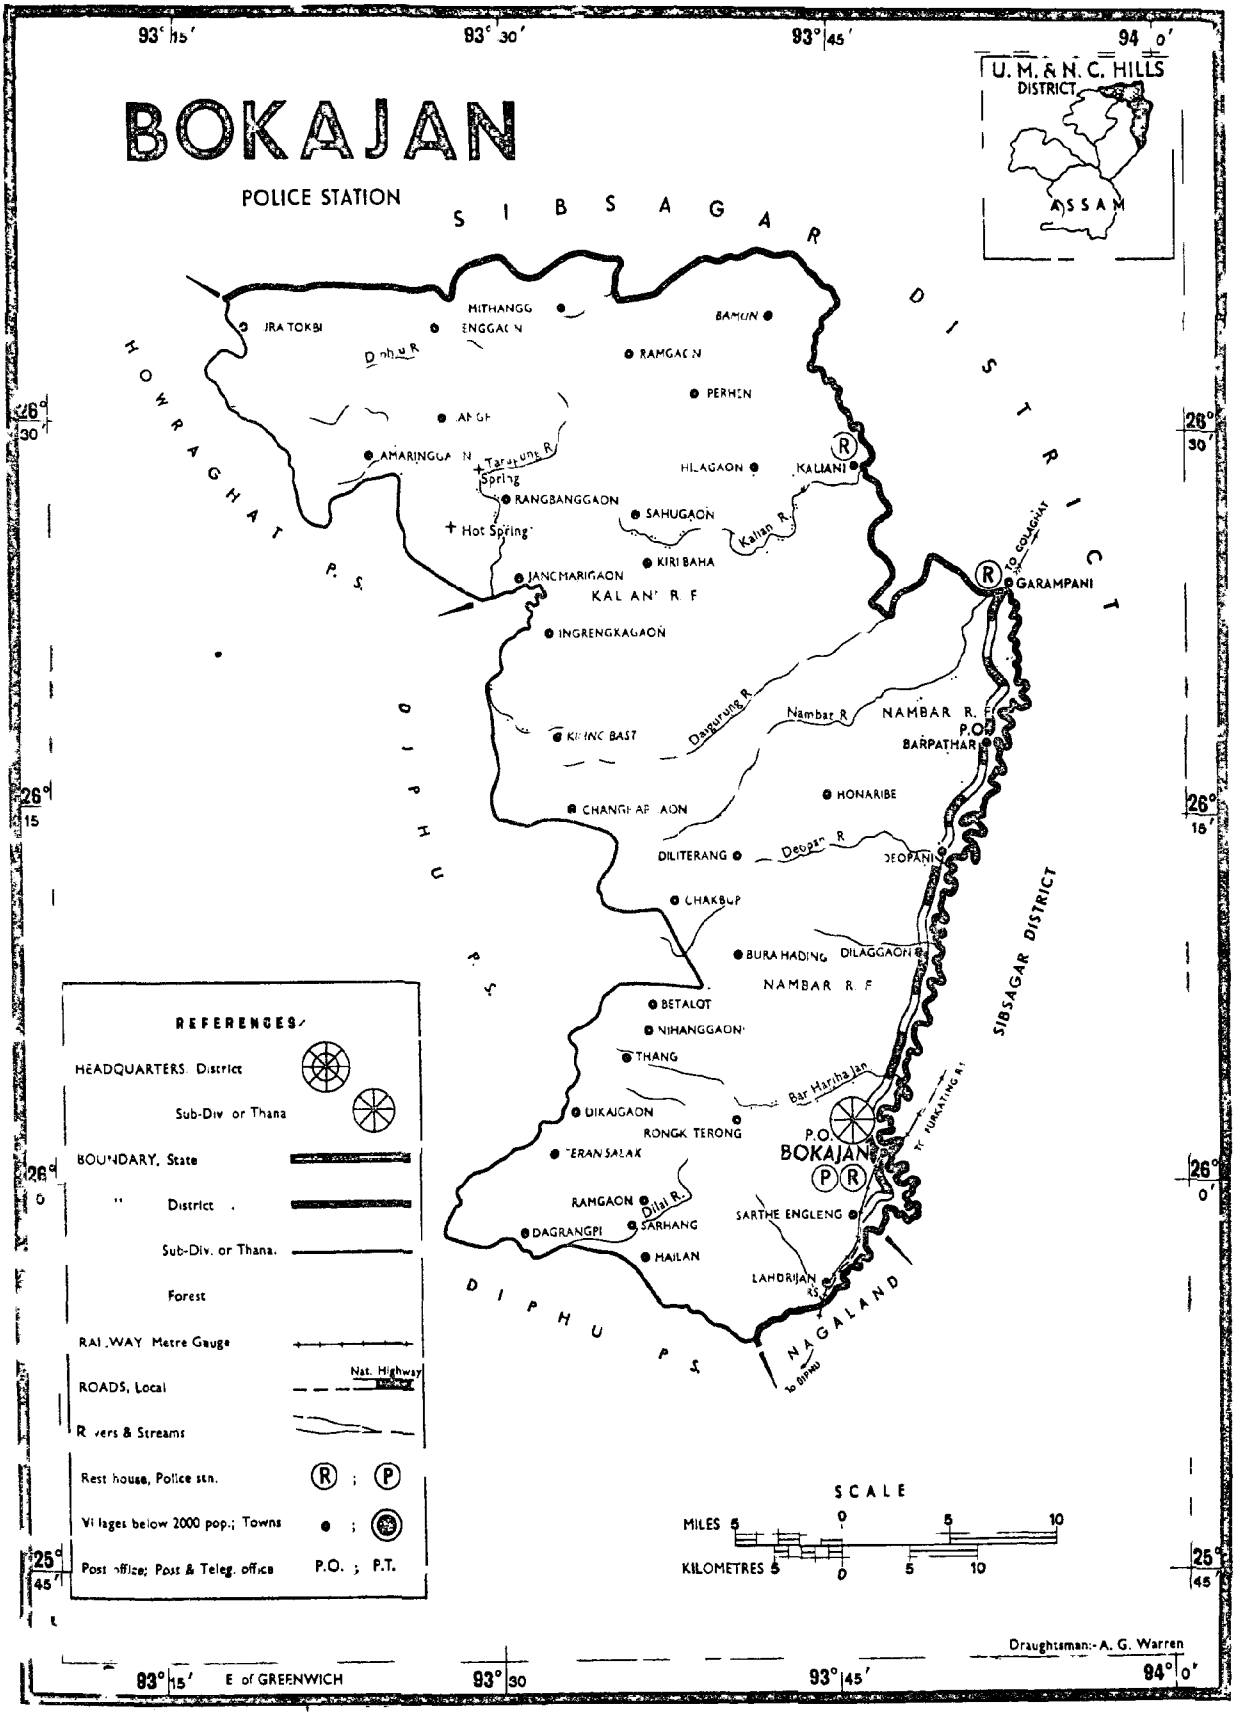

Is a person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in cash, kind or share, such as share of produce. The labourer should have no right of lease or contract on land on which he works nor should he be responsible for taking decision as to which crops to sow and when or taking the risk of cultivation. A share of the produce goes to him only as wages.

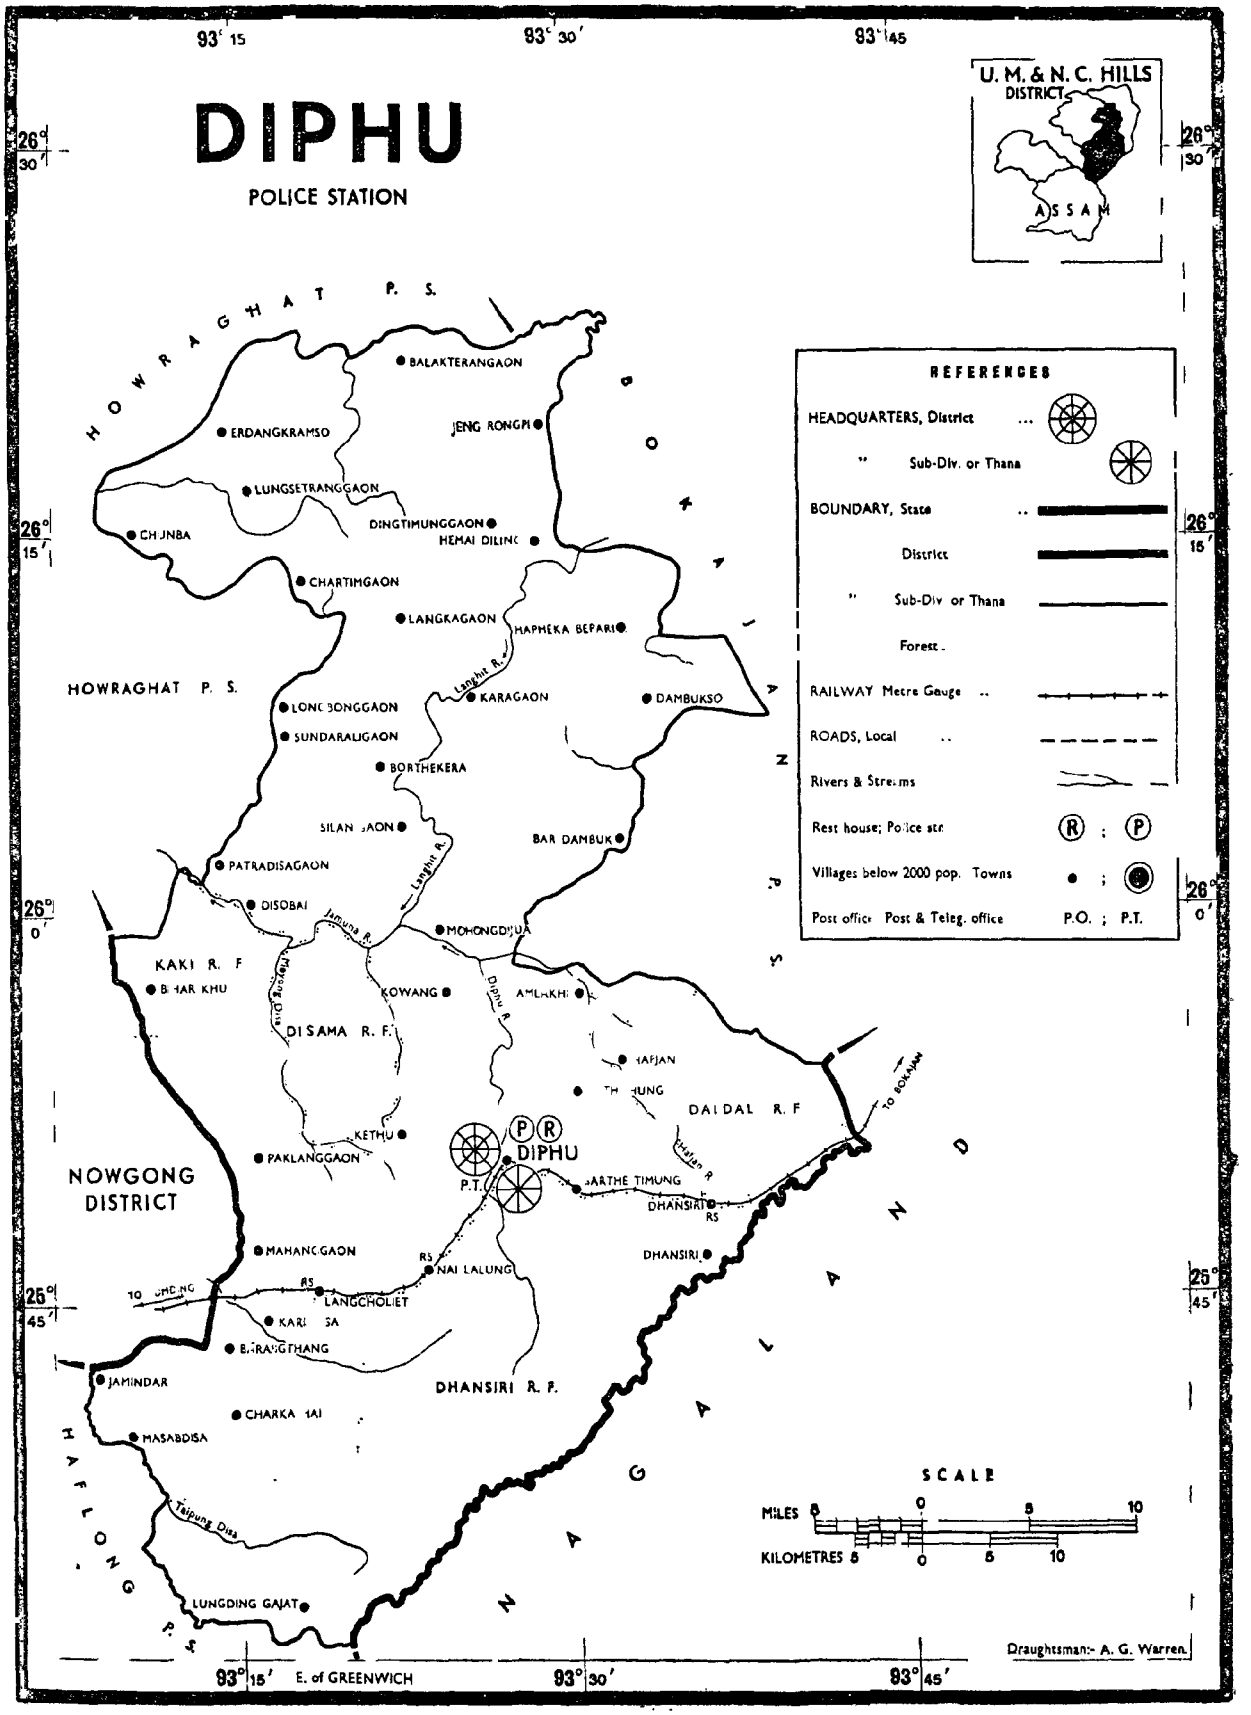

13. Household Industry

A household industry is defined as an industry conducted by the head of the household himself or mainly by members of the household at home or within the village in rural areas and only at home in urban areas.

TABLES

Besides the Village Directory which contains the Primary Census Abstracts for each village in the district in addition to other important informations relating to the village, all A-series tables with their appendices relating to the general population ; all B(i) i. e. General Economic Tables except B-II ; all C-series i. e. Social and Cultural Tables except C-I, C-IV & C-VI ; and all special tables for Scheduled Castes and Scheduled Tribes are reproduced in this volume. A short explanatory note for each of the above census tables presented in this volume is also given.

A—GENERAL POPULATION TABLES

TABLE A-I

AREA, HOUSES AND POPULATION

This is the basic population table for the Census. This table furnishes the data for each police station and town separately. The area is given both in square miles and square kilometres ; but the density is calculated from square miles only. In addition to the data on area and density, this table gives the number of inhabited and uninhabited villages, occupied residential houses and the population separately for males and females according to the 1961 Census for both rural and urban areas separately.

The area figures of the district and police stations are as supplied by the Director of Land Records and Surveys, Government of Assam. The area figures of the towns are collected from the respective Deputy Commissioners and Subdivisional Officers, Local Bodies and in some cases, from the Local Self-Government Department of the Government of Assam.

Appendix I to Table A-1

This appendix shows the 1951 territorial units constituting the present set-up of the district. The formation of United Mikir and North Cachar Hills District is shown in this appendix.

Appendix II to Table A-I

This appendix shows the number of villages in the district with a population of 5,000 and over which are not declared as towns because they do not satisfy all the three criteria required for their treatment as towns.

Appendix III to Table A-I

This table furnishes the figures for houseless and institutional population for total, rural and urban areas separately. For the purpose of studying different characteristics, this population is included in the household population.

A-I—AREA, HOUSES AND POPULATION

Note :— 1. The Sq. km. and density figures of Urban areas of Police Station/Subdivision/District are worked out by using the area figures corrected upto 2 places of decimals obtained by adding the areas of towns in the respective units and not using the area figures given in the table. In addition to this, the area figures relating to Sq. km. are further adjusted to make the Police Station/Subdivision/District totals tally.

APPENDIX I

Statement showing the 1951 Territorial Units constituting the present set-up of the District

1. Only those names/areas which have undergone changes since 1951 have been shown below.
2. The Location Code Number, revenue number, name and area of each village (Whatever available) transferred from one Police Station to another or incorporated in a Police Station by transfer from another is given in the Annexure I

TABLE A-II : VARIATION IN POPULATION DURING SIXTY YEARS

This table furnishes population data for the last seven Censuses from 1901 to 1961 and the variation of population in each decade. This is a very important table as it gives the growth of population from decade to decade and in the absence of reliable vital statistical data, forms the main source for estimation of population. One of the main changes in this table since the last Census is that percentage variation is given from decade to decade.

District	Year	Persons	Decade Variation	Percentage Decade Variation	Males	Females
1	2	3	4	5	6	7
	1901	40,812	..	..	27,355	13,457
	1911	27,296	— 13,516	—33.12	14,239	13,057
UNITED MIKIR &	1921	28,913	+ 1,617	+ 5.92	15,365	13,548
NORTH CACHAR	1931	32,844	+ 3,931	+13.60	17,302	15,542
HILLS DISTRICT	1941	133,402	+100,558	+306.17	68,965	64,437
	1951	165,440	+ 32,038	+24.02	86,430	79,010
	1961	279,726	+114,286	+69.08	150,127	129,599

A-III—VILLAGES CLASSIFIED BY POPULATION

This table gives figures for the number and population of villages in the various population groups which are less than 200, 200-499, 500-999, 1000-1999, 2000-4999, 5000-9999 and 10,000 and above. The group less than 500 of the last Census has been split up into two groups namely, less than 200 and 200-499.

District/Subdivision/ Police Station	Total number of inhabited villages	Total Rural Population			I—Villages with less than 2,000 population—(Contd.)

TABLE A—IV

TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

This table gives the growth of each town since 1901. This table furnishes the areas of the towns of the 1961 Census both in square miles and square kilometres. For the purpose of this table, all towns are divided into 6 classes according to population. As in table A-II, the percentage variation of each town is given from decade to decade.

A-IV—TOWNS (AND TOWN-GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1901

Class I—100,000 and above
Class II—50,000-99,999
Class III—20,000-49,999
Class IV—10,000-19,999
Class V—5,000-9,999
Class VI—less than 5,000

District	Name of Town	Status of Town	Year	Area		Persons	Decade Variation	Percentage Decade Variation	Males	Females
				Sq. miles	Sq. Km.

			1961	2.00	5.18	3,265	+1,097	+50.60	1,992	1,273

B — GENERAL ECONOMIC TABLES

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED
BY SEX AND BROAD AGE-GROUPS

This table is prepared separately for total, rural and urban population and it gives the total population classifying the nine industrial categories of workers and non-workers. Each category is divided into five age-groups namely, 0-14, 15-34, 35-59, 60+ and Age not stated. This is the basic economic table. The classification of workers and non-workers by age-groups is a special feature of the 1961 Census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons.

TABLE B-III

INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

Part A of this table relates to urban areas only. Each of the nine categories of workers and non-workers is shown by literacy and educational levels. This is an important table as it shows the employment of persons of different educational levels among the various categories of workers. This information may be of much use for the assessment of educational qualification of available man-power.

Part B of the table relates to rural areas. The educational level is confined only to (i) Literate (without educational level), (ii) Primary or Junior Basic and (iii) Matriculation and above.

TABLE B-IV

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN CULTIVATION BY SEX AND CLASS OF WORKER

This table corresponds more or less to the Union Table B-III of the 1951 Census.

It divides the working population, other than persons at work in cultivation, industrially into nine Divisions, 45 Major Groups, 343 Minor Groups and into four statuses of employment. The Indian Census Economic Classification adopted at the 1951 Census was neither a purely industrial nor occupational classification of the population but was a combination of both. There were only ten divisions and eighty eight subdivisions of industries and services. The present classification follows the National Classification of Industries adopted by the Government of India with some suitable minor modifications within the framework. This table deals only with the industrial classification of workers. The workers in Household Industries are classified into two employment statuses, namely, Employee and Others. The workers in Non-Household Industries are classified by the four statuses of employment, namely, Employer, Employee, Single Worker and Family Worker against Employer, Employee and Independent Worker in the 1951 Census. An Employer is a person who has to employ other persons in order to carry on the business from which he secures his livelihood. He is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others is **not** an employer, even if he has the power to employ another person (s) in his office on behalf of his own employer (s).

An Employee is a person who usually works under some other person for salary or wages in cash or kind. Persons employed as Managers, Superintendents, Agents, etc. and in that capacity, employ or control other workers on behalf of their own employers are only employees.

A Single Worker is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is treated as a Single Worker.

A Family Worker is a member who works without receiving wages in cash or in kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The Family Worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relatives.

This table has three parts. Part A restricts itself to an account solely of persons at work at Household Industry. It presents data for employee and others only for major groups separately for total, rural and urban.

Part B deals with the persons at work in Non-Household Industry, trade, business, profession or service by the four statuses of employment only for total and urban. This part of the table also gives data only for major groups.

Part C of the table furnishes data for each minor group of the Industrial Classification in respect of persons at work other than cultivation for total and urban. It does not classify the workers by status of employment.

This is a very important economic table as it gives the employment position in various sectors of the economy.

Explanations of the codes according to the Indian Standard Industrial Classification, used in the table are given below :—

DIVISION 0 : AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

Major Group	Description	Minor Group
00	**Field Produce & Plantation Crops**	
	Production of fruits and nuts in plantations, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of other agricultural produce (including fruits and nuts not covered by code 006 and flowers) not covered above	009
01	**Plantation Crops**	
	Production of tea in plantation	010
	Production of tobacco in plantation	013
	Production of other plantation crops other then coffee, rubber, ganja, cinchona and opium etc.	015
02	**Forestry and Logging**	
	Planting replanting and conservation of forests.	020
	Felling and cutting of trees and transportation of logs	021
	Production and gathering of other forest products not covered above	026
03	**Fishing**	
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
04	**Livestock and Hunting**	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Rearing of bees for production of honey, wax and collection of honey	044
	Rearing of silk-worms and production of cocoons and raw silk	045
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048

DIVISION 1 : MINING AND QUARRYING

10	**Mining and Quarrying**	
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107

Major Group	Description	Minor Group
20	**Foodstuffs**	
	Production of rice, atta, flour etc., by milling dehusking and processing of crops and foodgrains	200
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy	202
	Production of bread, biscuits, cake and other bakery products	205
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	**Beverages**	
	Production of distilled spirits, wines, liquor from alcoholic, malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of ice cream	216
	Production of other beverages	219
22	**Tobacco Products**	
	Manufacture of bidi	220
	Manufacture of hookah tobacco	223
23	**Textile-Cotton**	
	Cotton spinning (other than in mills)	231
	Cotton dyeing bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Printing of cotton textile	237
	Manufacture of cotton nets	238
25	**Textile-Wool**	
	Embroidery and art work in woolen textile	256
26	**Textile-Silk**	
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by handloom	264
27	**Textile-Miscellaneous**	
	Making of textile garments including rain coats and headgear	273

Major Group	Description	Minor Group
28	**Manufacture of Wood and Wooden Products**	
	Sawing and planning of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	**Paper and Paper Products**	
	Manufacture of products, such as paper begs, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
31	**Leather and Leather Products**	
	Manufacture of shoes and other leather footwear	311
	Manufacture of leather products (except those covered by code no. 311 and manufacturing of clothing and wearing apparel made of leather and fur) such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes & other leather footwear	314
32	**Rubber, Petroleum, and Coal Products**	
	Manufacture of tyres and tubes	320
33	**Chemicals and Chemical Products**	
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of soap and other washing and cleaning compounds	336
34-35	**Non-Metallic Mineral Products Other than Petroleum and Coal**	
	Manufacture of structural clay products such as brick, tile	340
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of earthenware and earthen pottery	350
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of other non-metallic mineral products not elsewhere specifid.	359
36	**Basic Metals and their Products except Machinery and Transport Equipment**	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture of armaments	362
	Manufacture of iron and steel furniture	364
	Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367

Division 2 & 3 :	MANUFACTURING (Concluded)	
Major Group	Description	Minor Group
37	**Machinery (All kinds other than Transport and Electrical Equipment)**	
	Manufacture of electric machinery and apparatus appliances not specified above	379
38	**Transport Equipment**	
	Manufacture of wagons, coaches, tramway and other rail road equipment other than that coverd by structural steel products such as joist, rail, sheet, plate.	381
	Repairing and servicing of motor vehicles	384
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equiments such as animal drawn and hand drawn vehicles	389
39	**Miscellaneous Manufacturing Industries**	
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metal	393
	Manufacture and repair work of goods not assignable to any other group	399

DIVISION 4 :	CONSTRUCTION	
40	**Construction**	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical & sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of waterways and water reservoirs such as bund, embankments, dam, canal, tank, tubewell, wells	403

DIVISION 5 :	ELECTRICITY, GAS, WATER & SANITARY SERVICES	
51	**Water Supply and Sanitary Services**	
	Carbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511

DIVISION 6 :	TRADE AND COMMERCE	
60-63	**Wholesale Trade**	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere)	601

Major Group	Description	Minop Group
	Wholesale trading in all kinds of fabrics and textile products such as garments, hessian, gunny bag, silk and woolen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in tyres tubes & allied rubber products	616
	Wholesale trading in all goods not covered above	639
64-68	**Retail Trade**	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wine liquor	642
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textile and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles)	650
	Retail trading in medicines and chemicals	652
	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in other household equipments not covered above	664
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock & watch, eye glass, frame	684
	Retail trading in precious stones and jewellery	686
	Book-selling	688
	Retail trading in goods unspecified	689
69	**Trade and Commerce (Miscellaneous)**	
	Providents and insurances	693
	Distribution of motion pictures	697

DIVISION 7 :	TRANSPORT, STORAGE AND COMMUNICATIONS	
Major Group	Description	Minor Group
70-71	**Transport**	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hacney carriage, bullock cart, ekka	703
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by other means not covered above	709
72	**Storage and Ware Housing**	
	Operation of storage such as ware-houses	720
73	**Communication**	
	Postal, telegraphic, wireless and signal communications	730

DIVISION 8 :	SERVICES	
80	**Public Services**	
	(This does not include Govt., Quasi Govt., or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industrial groups)	
	Public service in police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative department and offices of quasi-government organisation, municipalities, local boards etc.	805
	Public service in administrative departments and offices of State Governments	809
81	**Educational and Scientific Services**	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	**Medical and Health Services**	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821

Major Group	Description	Minor Group
83	**Religious and Welfare Services**	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, (this includes missions, ashrams and other allied organisations)	830
	Religious and other allied services rendered by pandit, priest, preceptors, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	**Legal Services**	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, muhurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	**Business Services**	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors	853
86	**Community Services and Trade & Labour Associations**	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
87	**Recreation Services**	
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus carnivals	872
88	**Personal Services**	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafe restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, drycleaning services	883

Division 8 :	SERVICES (Concluded)	
Major Group	Description	Minor Group
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	**Services (Not Elsewhere Classified)**	
	Services rendered by organisations or individuals not elsewhere classified	890

DIVISION 9 :	ACTIVITIES NOT ADEQUATELY DESCRIBED	
90	**Activities unspecified and not adequately described (This includes new entrants to the Labour market)**	
	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900

APPENDIX TO TABLE B-IV PART C

UNITED MIKIR AND NORTH CACHAR HILLS DISTRICT

Minor groups having less than 1% of workers of the respective Division (less than 0.5% in case of Minor Groups of Division 2 & 3), have been shown in this appendix.

The following abbreviations have been used :—

HI—Household Industry

NHI—Non-Household Industry

M—Males

F—Females

006 Total NHI (M 2) ; 007 Total HI (F 4), NHI (M 2) ; 009 Total NHI (M 8), Urban NHI (M 5) ; 010 Total NHI (M 3) ; 013 Total NHI (M 1) ; 015 Total NHI (M 2) ; 020 Total NHI (M 3) ; 021 Total NHI (M 5 F 1), Urban NHI (M 4 F 1) ; 031 Total NHI (M 1) ; 044 Total NHI (M 1), Urban NHI (M 1) ; 048 Total NHI (M 1) ; 202 Total NHI (M 1) ; 205 Total NHI (M 3), Urban NHI (M 1) ; 209 Total NHI (M 23), Urban NHI (M 15) ; 210 Total HI (F 1) ; 211 Total HI (F 2), NHI (M 2), Urban NHI (M 2) ; 212 Total NHI (M 3) ; 213 Total HI (M 32) ; 216 Total HI (M 1) ; 219 Total HI (F 2) ; 220 Total HI (M 19 F 2) ; 223 Total HI (M 6 F 15) ; 233 Total HI (F 12) ; 234 Total HI (F 5), NHI (F 1), Urban NHI (F 1) ; 237 Total HI (F 7) ; 238 Total HI (M 1 F 6) ; 256 Total HI (F 6), NHI (M 5) ; 262 Total HI (M 3 F 1) ; 280 Total NHI (M 18) ; 282 Total HI (M 1) ; 284 Total HI (M 7 F 3), NHI (F 1) ; 286 Total HI (M 19) ; 287 Total NHI (M 10) ; 289 Total HI (F 1), NHI (M 6) ; 292 Total NHI (M 4) ; 311 Total NHI (M 1), Urban NHI (M 1) ; 313 Total NHI (M 3) ; 314 Total NHI (M 11) ; 320 Total NHI (M 1) ; 331 Total NHI (M 3) ; 336 Total HI (F 1), NHI (F 1) ; 340 Total NHI (M 1) ; 343 Total HI (F 8) ; 350 Total HI (M 4 F 1), NHI (M 2) ; 355 Total NHI (M 1) ; 356 Total HI (M 19) ; 359 Total NHI (M 1) ; 360 Total NHI (M 1), Urban NHI (M 1) ; 362 Total NHI (M 5), Urban NHI (M 5), 364 Total HI (M 1), NHI (M 6) ; 367 Total NHI (M 2) ; 379 Total NHI (M 1) ; 381 Total NHI (M 1), Urban NHI (M 1) ; 384 Total NHI (M 1) ; 388 Total NHI (M 5) ; 389 Total HI (M 16), NHI (M 1) ; 392 Total NHI (M 4), Urban NHI (M 2) ; 393 Total NHI (M 4) ; 399 Total HI (M 8), NHI (M 4), Urban NHI (M 1) ; 601 Total NHI (M 5 F 2) ; 602 Total NHI (M 5) ; 611 Total NHI (M 1) ; 613 Total NHI (M 3) ; 616 Total NHI (M 2) ; 641 Total NHI (M 4) ; 642 Total NHI (M 2 F 1), Urban NHI (M 1) ; 644 Total NHI (M 11) ; 647 Total NHI (M 12), Urban NHI (M 12) ; 660 Total NHI (M 9) ; 664 Total NHI (F 1) ; 681 Total NHI (M 6) : 682 Total NHI (M 1) ; 683 NHI (M 3 F 3) ; 684 Total NHI (M 1) ; 686 Total NHI (M 2) ; 688 Total NHI (M 2), Urban NHI (M 2) ; 697 Total NHI (M 7) ; 701 Total NHI (M 13), Urban NHI (M 12) ; 705 Total NHI (M 6) ; 709 Total NHI (M 11) ; 720 Total NHI (M 1) ; 812 Total NHI (M 12) ; 821 Total NHI (M 8) ; 831 Total NHI (M 26 F 2), Urban NHI (M 4 F 2) ; 832 Total NHI (M 12), Urban NHI (M 1) ; 840 Total NHI (M 12), Urban NHI (M 4) ; 841 Total NHI (M 2) ; 850 Total NHI (M 4) ; 853 Total NHI (M 3) ; 860 Total NHI (M 7 F 14) ; 871 Total NHI (M 1) Urban NHI (M 1) ; 872 Total NHI (M 2) ; 881 Total NHI (M 28 F 3), Urban NHI (M 24 F 3) ; 883 Total NHI (M 35 F 4), Urban NHI (M 9 F 4) ; 884 Total NHI (M 60 F 1), Urban NHI (M 10) ; 885 Total NHI (M 4) Urban NHI (M 2).

TABLE B-V

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This is a new table for the 1961 Census. As discussed earlier in case of table B-IV, the classification adopted at the 1951 Census was a combination of industrial and occupational. Two separate tables are therefore prepared on the basis of industry and occupation of the workers in this Census.

This table classifies the workers other than at cultivation into 11 Occupational Divisions, 75 Groups and 331 Families according to their occupations. This classification follows the National Classification of Occupations adopted with minor modifications within the frame work. It gives data for each family of the National Classification of Occupations separately for total and urban and for persons, males and females, and thus brings out the distribution of occupations among males and females.

B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

UNITED MIKIR AND NORTH CACHAR HILLS DISTRICT

Families having less than 1% of the workers of the respective Division, (less than 0.5% in case of families of Division 7-8), have not been shown in this table, but are given in the appendix to this table. Divisions thus affected are marked with an asterisk (*).

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

This table is prepared only for urban areas and only up to the Division of the National Occupational Classification. The population under each Occupational Division is classified by the five age-groups ; 0-14, 15-34, 35-59, 60+ and Age not stated and further classified according to the broad educational levels. This table is likely to give useful informations about those occupations which attract personnel.

Note :—

Division 0—Professional, Technical and Related workers
„ 1—Administrative, Executive and Managerial workers
„ 2—Clerical and Related workers
„ 3—Sales workers
„ 4—Farmers, Fishermen, Hunters, Loggers and Related workers
„ 5—Miners, Quarrymen and Related workers
„ 6—Workers in Transport and Communication Occupations
„ 7-8—Craftsmen, Production Process workers, and Labourers not Elsewhere Classified
„ 9—Service, Sports and Recreation workers
„ X—Workers not Classifiable by Occupation

TABLE B-VII

Part A of this table shows persons working principally (i) as Cultivators or (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by Secondary work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer.

Part B of this table shows the Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also workers engaged in Household Industry.

Table B-VII is prepared separately for total, rural and urban population. Part A of the table is a cross tabulation in the case of persons whose principal and secondary works are any two of (i) Cultivation, (ii) Agricultural Labour and (iii) Household Industry. This table is important as it shows the extent to which cultivation is supplemented by household industry or vice versa.

Part B of table B-VII gives data in the case of persons who are principally engaged in Non-Household Industry etc., and also engaged in Household Industry as a Secondary work.

Divisions and Major Groups appearing in the table are described below :

DIVISION 0 : Agriculture, Livestock, Forestry, Fishing and Hunting

Major Group 00 : Field Produce and Plantation crops

,, ,, 04 : Livestock and Hunting

DIVISION 2 & 3 : Manufacturing

Major Group 20 : Foodstuffs

,, ,, 23 : Textile-Cotton

,, ,, 25 : Textile-Wool

,, ,, 28 : Manufacture of wood and wooden products

DIVISION 6 : Trade and Commerce

Major Group 64-68 : Retail Trade

DIVISION 8 : Services

Major Group 80 : Public Service (This does not include Govt., Quasi Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industrial groups)

,, ,, 88 : Personal Services

TABLE B-VIII

This table shows the persons unemployed aged 15 and above by sex, broad age-groups and educational levels.

Part A of this table relates to urban areas. This is a classification of unemployed persons by their educational levels and age-groups. This is prepared separately for those who are seeking employment for the first time and for those who were employed before but are now out of employment and seeking work. In the first case, the age-groups are 15-19, 20-24, 25-29, 30-34, 35+ and Age not stated and in the second case, 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated. This table will throw light on educated unemployed for purposes of planning for employment and also for assessing the available man-power.

Part B of this table relates to rural areas. In this table educational levels for total unemployed persons are given. The educational levels are limited to Illiterate, Literate (without educational level), Primary or Junior Basic and Matriculation and above as in Table B-III Part B.

TABLE B-IX

This table shows the persons not at work classified by sex, broad age-groups and type of activity.

This table is prepared separately for total, rural and urban population. It relates to the non-working population. The non-workers are divided into eight categories given in the table according to their activities. This kind of tabulation was never attempted before, nor were questions asked on the activities of non-workers.

The eight categories are based on the recommendations of the United Nations. This table makes the data available separately for those who have an earning without working. Separate data are also available in respect of housewives, who though they do domestic work are not classified as economically active. Separate data are also available for school-attending children which may be useful to the Education Department. There is a category which consists of all other dependents including children and disabled persons.

C — SOCIAL AND CULTURAL TABLES

TABLE C-II

AGE AND MARITAL STATUS

This table is prepared separately for total, rural and urban population. This is a very important demographic table. The age-groups conform to the international requirements. From this table, it can be ascertained whether proportions in the various marital statuses have increased or decreased since last Census and whether any trend is observed in the age of marriage. This table which was prepared on a 10% sample at the 1951 Census, is prepared on full count at the present Census.

C-II—AGE AND MARITAL STATUS

UNITED MIKIR AND NORTH CACHAR HILLS DISTRCT

Age-group	Total Rural Urban	Total Population			Marital Status

TABLE C-III

This table is prepared separately in three parts for total, rural and urban population. There are five yearly age-groups up to 34 and other age-groups are 35-44, 45-59, 60+ and Age not stated. While in the previous Censuses, only the total literate population for different age-groups was given, at the present Census, data for broad educational levels are also given. The educational levels are different for rural and urban areas as given in Table B-III. In this Handbook the Table C-III is presented for total and urban population only.

TABLE C-VIII

SCHEDULED CASTES AND SCHEDULED TRIBES

Classification by literacy and industrial category of workers and non-workers among Scheduled Castes/Scheduled Tribes

This table is presented in two parts—Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes. It is prepared separately for total, rural and urban population. The table gives the total population of Scheduled Castes and Scheduled Tribes separately and their distribution by literacy and classification of workers into different industrial categories and the total number of non-workers. Literacy figures of Scheduled Castes and Scheduled Tribes are given for the first time in the present Census. This table is important as it will be the basis for the allocation of Reserved Seats in Parliament and the State Legislature.

C-VIII—SCHEDULED CASTES AND SCHEDULED TRIBES

TABLE SCT—I

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

The SCT-I Tables are prepared in two parts. Part A relates to Scheduled Castes and Part B relates to Scheduled Tribes.

This table is prepared for each Scheduled Caste and Scheduled Tribe. This table gives the population of each Scheduled Caste and Scheduled Tribe separately for rural and urban, and also shows in which sectors of industry members of each Scheduled Caste and Scheduled Tribe are working. Data have also been given on the un-wholesome occupations in which the members of Scheduled Castes are working. The population figures of each individual caste and tribe are often required for welfare and other works.

SCT—II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This is an important demographic table corresponding to table C-II but it gives data for the total population only. The age-groups are restricted to 0—14, 15—44, 45+ and Age not stated. At present demographic data are not at all available in respect of these communities. This table thus fulfils a very useful purpose. The age and marital status data give an indication whether the population belonging to Scheduled Castes and Scheduled Tribes is decreasing, stable or increasing.

TABLE SCT—III

EDUCATION FOR SCHEDULED CASTES/SCHEDULED TRIBES

This table is prepared for each Scheduled Caste and Scheduled Tribe and separately, for rural and urban population. It gives the literacy and educational levels for each Scheduled Caste and Scheduled Tribe. In the case of urban areas, data are given for educational levels as in Table B-III Part A. In the case of rural areas, data are given only for mere literates, Primary or Junior Basic and Matriculation and above.

SCT-III PART A (i)—EDUCATION IN URBAN AREAS ONLY FOR SCHEDULED CASTES

UNITED MIKIR AND NORTH CACHAR HILLS DISTRICT

Name of Scheduled Caste	Educational Levels

TABLE SC—1

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

This table is prepared for total Scheduled Castes and not for individual castes. It is prepared separately for total, rural and urban population. The table gives data for students and unemployed persons in the non-working population. They are further classified according to broad educational levels consisting of Literates, Primary or Junior Basic, Matriculation or Higher Secondary and Above Matriculation or Higher Secondary. This table gives very useful informations on the students and unemployed persons among the Scheduled Castes.

SC-I—PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

UNITED MIKIR AND NORTH CACHAR HILLS DISTRICT

TABLE ST—I

MOTHER TONGUE AND BILINGUALISM FOR SCHEDULED TRIBES

Scheduled Tribes have their own peculiar languages and dialects and this table gives the language or dialect of each tribe. Those members of the tribes who have moved out of their homes, and as a result of their contact with the local population, speak some other languages, those languages also are shown in this table.

INTRODUCING THE OFFICIAL STATISTICS

The Tabulation Plan and other proposals for the 1961 Census envisaged the incorporation of official statistics on a large variety of subjects for each district in the District Census Handbook of the district concerned. This proposal was communicated to all the Chief Secretaries of State Governments by the Registrar General as early as November 1960 with the request that each State Government should take up the collection of the data in right earnest so that the same may enrich the informations of the District Census Handbook. Each State Government was also welcome to further enrich the District Census Handbooks by any additional information that they may like to incorporate in the handbook. The items with other details were listed by the Registrar General and he also indicated the periods against which such data were to be collected. Copies of the above letter and the contents therein were forwarded to all Superintendents of Census Operations by the Registrar General with the request that the matter may be pursued with the State Governments. The data were to be processed and compiled by the Superintendent of Census Operations and incorporated in the District Census Handbooks of each District.

In pursuance of this communication from the Registrar General, I opened a small cell with a Statistical Assistant, one Upper Division Assistant and a few experienced tabulation personnel to take up the work and I addressed all the State and Central Government departments dealing with the subjects under which the data were to be collected and compiled. I pursued the matter not only by letters and reminders, but also by sending my staff to the various departments concerned to copy out the data wherever it was not possible for the department concerned to supply the data to me without extra hands. But in spite of persistent pursuit for about two years, all the data could not be collected. Some informations were not available at all, while some departments were not very co-operative. As the Census Publications cannot wait indefinitely for these informations, I have to process and compile whatever data are available to me.

The subjects listed to be collected embraced almost all spheres of the socio-economic life of the people and the governmental activities connected therewith. From rainfall and temperature to places of ancient monuments and worship, from vital statistics to statistics of banks and insurances, from agricultural and land utilisation statistics to the statistics of local bodies, industries and so on, the plan was to appraise the stage of development of each one of the socially and economically important aspect of governmental activities during the last decade which coincides with the two Five Year Plans. Had it been possible to collect all the data in full, a clear picture would have been obtained of the stage of development of each district of Assam as well as the achievements and the impacts of the two Five Year Plans on the economy of each district of Assam. It would also have been possible to bring to light the inter-district and regional disparities in respect of development schemes in each district or region and these data could then be utilised as the basis for future plans and allocation of different schemes.

Realising the fact that well-conceived plans must be based on correct statistics, I started the work of collecting the data with earnestness and tried my utmost to collect as much informations as possible from all departments of Government. But in spite of the best of exertions by me and my staff, only about 60% to 70% of the data have reached me till the end of 1962. These available data have been duly processed, compiled and presented in the tables following this Note. Incomplete as they are, even the data thus presented in this book will surely give a picture of the various stages of developments in each district and region of Assam and I hope that my successor may improve upon the same in the next Census. I shall now briefly describe the original plan and the achievements in respect of the collection of data against each one of the broad heads in the cases below :—

1. RAINFALL AND TEMPERATURE

The aim was to give rainfall data of five centres and temperature data for two centres for each district of Assam for the period 1951-60. I addressed the Meteorologists in charge of the Regional Meteorological Centre, Calcutta and the Gauhati Airport. I also addressed the Deputy Commissioners and Subdivisional Officers as well as the Adviser, Assam Branch of the Indian Tea Association, and I was able to collect some data for one

centre only and that also from 1954 onwards so far as this district is concerned. The data thus collected and compiled are presented for whatever they are worth.

2. VITAL STATISTICS

I addressed the Director of Health Services, Assam, for supplying me with vital statistics which are so important for population planning and projection. Our plan was to show the births and deaths recorded for each month of the last decade against each police station in the district. The Public Health Department replied that they never have records of births and deaths down to the police station level and so I asked them to give the figures down to the district level, but even that also was not forthcoming. I sent my staff to the office of the Director of Health Services and they had to take much trouble in locating, extracting and compiling whatever data are available in that office regarding vital occurences from the vital statistics returns lying uncared for in the office premises of the Director of Health Services. But these data are absolutely inaccurate and they cannot give any picture of births and deaths in the district. However, the table is presented for whatever it is worth. In the General Report of the 1951 Census, the then Director of Health Services admitted that there is no doubt that the collection of registration data is defective. As far back as 1921, my predecessor Mr. Llyod remarks that "it is obvious that the vital statistical figures are useless for the purposes of comparison or checking with the Census figures." In 1911, Mr. McSwinney remarks that "the inaccuracies are so great that there is danger of inferring that the present system of collecting vital statistics is absolutely useless." If the collection of vital statistics had been so bad in the past decades, it has been worse during the decade 1951-61. The Deputy Director of Health Services told me that when the data were collected by the police, mauzadars and the municipalities, something could be had from them ; but when the collection has been entrusted to the Panchayats, no figures are available at all. Government may have to devise a definite scheme and a definite agency for the collection of these vital occurences, otherwise these important statistics are of no use as far as Assam is concerned.

3. LAND UTILISATION AND AGRICULTURE

In respect of land utilisation and agriculture, informations were proposed to be furnished under the heads—(i) land utilisation statistics (ii) area under principal crops (iii) gross area irrigated (iv) sources of irrigation (v) irrigation projects (vi) yield rates of principal crops (vii) statistics of daily agricultural wages (viii) fortnightly wholesale prices of important commodities month by month (ix) consumption statistics (x) details of socio-economic enquiries and (xi) agricultural extension schemes.

Statistics under these two heads are still in a very poor stage of development in Assam. In April 1961, I addressed the Director of Agriculture, the Director of Land Records and the Director of Statistics requesting them to supply me with as much data under the above heads as are available with each of them. The Director of Agriculture straightaway shifted this responsibility to the Director of Statistics. The Director of Statistics in his turn asked me to collect the data from his office records through some of my staff. The Director of Land Records directed the Settlement Officers and Deputy Commissioners concerned to supply the data direct to me. In accordance with the suggestion of the Director of Statistics, I sent a few employees of my office to collect the available data from his office records. Except for the periods 1901-12, 1952 and again from 1958 onwards, most of the data were available and were collected accordingly. In reply to the Director of Land Records' letter to all Settlement Officers and Deputy Commissioners, only the Deputy Commissioners of Cachar and Goalpara and the Settlement Officer, Sibsagar submitted some figures. The rest are silent till now. I also made direct correspondence with all the Revenue and Settlement Officers but to no effect. For the period 1901-12 and 1952, I wrote to the Registrar General to see if necessary figures could be extracted from some of the publications preserved in the archives of the Ministry of Food and Agriculture. The Registrar General was kind enough to take the trouble and get the figures collected and forwarded to me. These figures are included in the tables prepared under this head.

Within the above limitations, tables under Agriculture and Land Utilisation statistics have been prepared and presented. Most of the tables are limited in scope and practical usefulness from the point of view of studying the trends or projecting a policy decision owing to lack of informations for the gaps during the period under reference. The period of reference 1901-1960 is interpreted as consisting of the Census years, namely 1901, 1911, 1921, 1931, 1941, 1951 and 1961. Each Census year represents five years i. e. two years ahead and two years back of the Census year which is also included.

But the Census years 1901 and 1961 are exceptions to this rule. In view of the non-availability of data preceding the year 1901 and following the year 1961, the figures for the year 1901 has been worked out on the average of the years 1901 to 1905 and for that of 1961, the average was worked out from the year 1956-57 to 1960-61.

Although the original plan was to publish the prices of staple foodstuff and average prices of basic commodities month by month for the last decade with a cost of Living Index, the plan had to be restricted to the presentation of average retail prices of some important commodities due to the non-availability of data.

The construction of the cost of Living Index calls for informations regarding comsumption level, weightage, family budget etc. Such informations are not available even in the Department of Statistics. Consequently the idea had to be dropped. The Director of Agriculture had been requested to enlighten me with data regarding experiments in double and triple cropping and agricultural extension schemes, but even though a reply was received from him, no data could be extracted from it. The data relating to consumption statistics, details of socio-economic enquiries have also been left out altogether on account of non-availability of data.

4. LIVESTOCK

Variation in the number of main livestock during 1920-60 was proposed to be given. I addressed the Secretary, Veterinary Department, Government of Assam who directed the Director of Veterinary and Animal Husbandry Department to compile and forward the necessary figures to me. The Director of Veterinary Department could supply me with data only from 1951 onwards. For earlier period, he said the data were not available in the Department.

5. INDUSTRIES

I wrote to the Director of Industries for a list showing the Cottage and Small Scale Industries of the district, but he could not furnish me with a list of industries operating in the district. However, the list showing all categories of industries has been compiled from the Census data extracted from the Houselists and these are presented in the tables.

6. ADMINISTRATION

Under this head, informations were sought to be incorporated in this book in respect of the (1) number of criminal cases tried, (2) persons convicted, (3) strength of police, jails, (4) receipt of different kinds of taxes, (5) receipt of land revenue, (6) number of registered documents and (7) value of property transferred in the district for the latest period of time for which informations are available. The growth of co-operative societies from 1951 till 1960 was another item under this head.

Data regarding the number of criminal cases tried and persons convicted are collected from the "Report on the Administration of Criminal Justice in the State of Assam". Some data were also colleted by my staff from the office records of the Inspector General of Police, Assam. The Commissioner of Taxes was prompt enough to supply with the figures of collections of taxes under different categories. I wrote to the Revenue Department and the Director of Land Records to send me the figures showing the receipt of land revenue during the last decade. The Director of Land Records referred me back to the Revenue Department. The Revenue Department made a lot of correspondences but no data are available from them. At long last, the compilation team could collect some figures from the 'Statistical Abstract' published by the Director of Statistics and office records of the Revenue Department unofficially. For informations regarding the number of registered documents and value of property transferred in the district, I made necessary correspondences with the Director of Land Records and Inspector General of Registration who referred me to the Accountant General and the District Registrars. I had written to the District Registrar accordingly, but nothing has been received as yet. Data in respect of the different classes of co-operative societies were collected by my staff from the office records of the Registrar of Co-operative Societies.

7. PUBLIC HEALTH & MEDICAL

The list presented regarding this item was prepared from data supplied by the Civil Surgeon, Diphu.

8. EDUCATION

Under this head, the intention was to show the increase in the number of various categories of schools from 1951 to 1960. I wrote to the Director of Public Instruction, Assam accordingly and in spite of a number of reminders, he could not supply me with the required informations. My next course was to depute an assistant to that office and get the informations collected. In this way, my

staff with the co-operation of the office staff of the Director of Public Instruction, could collect informations for one year only. My staff were given to understand that informations for the earlier years were not available.

9. PUBLIC ENTERTAINMENTS, PRESSES AND JOURNALS

The informations furnished under this head were supplied by the Deputy Commissioner, United Mikir and North Cachar Hills, Diphu.

10. COMMUNICATION

Under this head, informations were attempted to be compiled regarding the number of (1) village roads, (2) roads and bridges and (3) railway stations.

For data on village roads, I wrote to the Development Commissioner who was good enough to get the data collected through the Block Development Officers. But the informations received so far are not complete for the whole district. On roads and bridges, the Chief Engineer (Roads & Buildings) was addressed and he supplied me with a booklet from which the informations presented in this book were extracted. The list of railway stations in the district was supplied by the Chief Commercial Superintendent, N. F. Railway, Pandu.

11. COMMUNITY DEVELOPMENT

The Development Commissioner, Assam, furnished me with a statement showing the names and stages of all the Community Projects in the district. After compilation to make it intelligible to the general reader, the statement is reproduced in this volume.

12. BANKS AND SMALL SAVINGS

There is no bank in the district. Data on Small Savings were supplied by the Regional Director, National Savings, Government of India, Assam, Shillong. Due to the non-availability of data, insurance statistics could not be incorporated.

13. FAIRS AND FESTIVALS AND HATS AND MARKETS

The data under this head were furnished by the Deputy Commissioner, Diphu, Sub-divisional Officer, Haflong and the Chief Executive Member, United Mikir & North Cachar Hills District Councils, Diphu and Haflong.

14. GAZETTEER OF PLACE NAMES

The informations given under this head are compiled by my staff.

A DESCRIPTIVE NOTE ON THE GAZETTEER OF PLACE NAMES OF THE DISTRICT

Haflong—It is a beautiful small hill station on the top of the Haflong hill, a spur of that of barail Range surrounded by high peaks. The Subdivisional headquarters of the North Cachar Hills subdivision was shifted from Gunjong to Haflong following the construction of the Assam Bengal Railway.

The town is mainly an administrative town. Railway is the main communication connecting the town with other places. Jeeps can ply on the roads connecting this town with other places.

Maibong—It is mainly a place of historical importance. It was the capital of Kachari king and the remains of forts and magnificent buildings of that time are still found. It is also an important railway station in the hill section of the N. F. Railway.

Diphu—Following the formation of the new district of United Mikir and North Cachar Hills, the district headquarters was established at Diphu in the Mikir Hills subdivision. It has also been made the headquarters of the Mikir Hills Autonomous District Council. It is a small place with some government offices, district council office, a small bazar and a railway station. It has not been treated as a town in the 1961 Census as it neither could satisfy the conditions laid down by the Census for treating a place as a town nor has it been declared as such by the Government. It is hoped that by 1971, if not earlier, the place will attain the status of a town.
