PREFACE

The Registrar-General, India, recommended to State Governments, the publication of District Census Handbooks containing 1951 Census data for the districts and such other information as may be of general interest. The Government of Travancore-Cochin accepted the recommendation and sanctioned in Government Order No. RM. 3-3468|51|RD dated 23-5-1951 the publication of four District Census Handbooks for the State. The present volume is published in pursuance of this order.

The Handbook is divided into three parts: Part I contains a short sketch of the district and the people. Part II embodies the Census Tables for the district. For purposes of comparative study, three of the most important State Tables—A 1. Area, Houses and Population, A 2. Variation in Population during 50 years (1901-1951) and Economic Table—Livelihood Classes—have been placed at the beginning of this part. Each Table is preceded by a short note explaining its contents. Part III devoted to Village Statistics is the result of an attempt made to bring together the main details relating to villages in this district. An index of place-names has been appended to this part to facilitate ready reference.

It is hoped that the Handbook will serve as a frame for future studies and that its scope and coverage will be increased from time to time.

This work would not have been possible but for the co-operation and assistance of the State Government at every stage of its preparation. Almost all departments have helped me with their contributions. I wish to record my acknowledgement in particular to the departments of Agriculture, Public Health, Labour, Public Instruction, Electricity, Telephones, Forest and Geology.

The Tahsildars and Municipal Commissioners in the State have borne the brunt of the work involved in the collection of facts and figures contained in the Handbook. To them, I tender my special thanks.

Other agencies who have been of great assistance are the Travancore Devaswom Board, Indian Central Cocoanut Committee, Indian Rubber Board and Cochin Harbour Administration. It is a pleasure to acknowledge my thankfulness to them.

The printing of the Handbook was done by the Government Central Press, Trivandrum at a time when the Press was working at full pressure on other urgent and voluminous items of printing for Government. It is therefore, with very great pleasure, that I place on record my sense of gratitude to and appreciation of the untiring efforts of the Superintendent and his assistants in bringing out the Handbook.

It is only fair that I add a word about my office staff who were patiently at work evolving step by step the Tables from the large mass of data collected at the census. Checking and cross-checking of the Tables has been a severe task; so also has been the typing of the Tables. I wish to express my feelings of gratefulness to one and all of my assistants for their devoted labours in this behalf. I must single out my Personal Assistant, Sri K. Paramaswara Menon, M. A., for the unfailing help he gave me at each stage of the work. He unstintedly shared with me the responsibility in producing the Handbook and I wish to express my appreciation of the work done by him.

I shall be failing in my duty if I do not place on record my gratefulness to Sri R. A. Gopalaswami, I. C. S., Registrar-General, for the guidance and the stimulating suggestions received from him in this work.

U. SIVARAMAN NAIR

Office of the
Superintendent of Census Operations,
Trivandrum, 26th June 1952.

DISTRICT CENSUS HANDBOOK

TRIVANDRUM

Part I

A SHORT SKETCH

A. DISTRICT AND PEOPLE

1. INTRODUCTORY

Trivandrum is the southernmost district in the State and has an area of 1491·8 sq. miles. Out of this, towns cover an area of 97·0 sq. miles, the rest—1394·8 sq. miles—being rural. This forms the smallest district in the State, covering 16·3 per cent. of the total area. It has a seacoast, approximately 80 miles long. Cape Comorin, the Land's End of India is the southernmost point of this district. The headquarters of the district and also the capital of the State, is Trivandrum.

The district is divided into eight taluks. The names, headquarters, and relative areas of these taluks are as follows :—

Name of taluk	Headquarters	Percentage	
		Area	Population
1. Agasthiswaram	Nagercoil	7·18	10·46
2. Thovala	Bhoothappandi	9·56	2·46
3. Kalkulam	Thakkala	15·37	13·35
4. Vilavancode	Kuzhithura	11·18	12·09
5. Neyyattinkara	Neyyattinkara	15·67	18·35
6. Trivandrum	Trivandrum	6·54	17·22
7. Nedumangad	Nedumangad	24·68	12·37
8. Chirayinkil	Attingal	9·87	13·70

The population of the district according to 1951 Census is 2,154,192; this forms 23·2 per cent. of the State population.

2. PHYSICAL FEATURES

Mountains

The Western Ghats which form the eastern boundary of the State lie closer to the sea in this district than in the other districts ; the average height of the Ghats is also less. The chief peaks are Mahendragiri (5419 ft.) Samikuchi (6040 ft.) the Knuckles (6104 ft.) and Agastier peak (6125 ft.) In the extreme south the mountains gradually sink to the level of the midland plains and finally lose themselves in the Indian Ocean near Cape Comorin. The disappearance of the mountain wall in the extreme south leaves open, at Aramboly, an easy gateway into the State. Among the most important of the isolated hills in the district are Maruthwamala in the Agastiswaram taluk, Velimala in the Kalkulam taluk and Mookunnimala in the Neyyattinkara taluk.

Rivers

The rivers in the district are short. In their upper courses their beds are rocky and they are therefore unfit for navigation or even irrigation ; in their lower reaches they generally flow through deep beds and often dry up during the hot season.

The chief rivers from the south to north are :

The Vadasseri river or the Pazhayar (length 23 miles) flows through the taluks of Thovala and Agasthiswaram into the Manakkudi lake. Though short, it is important for purposes of irrigation.

The Kuzhithura or Thamravarni river (length 37 miles) is formed by the union of the Kothayar and the Paraliyar. The Paraliyar rises in the Mahendragiri hills and running through the hilly tracts of Kalkulam enters the plains at Thiruvattar. The Kothayar rises from the Muthukuzhivayal plateau and flows along the southern boundary of the Vilavancode taluk. It is joined by the Paraliyar near Thiruvattar and enters the sea at Thengappattanam. The Kothayar Project consisting of a dam and reservoir at Pechippara and a net work of distribution canals utilises the waters of this river for irrigation.

The Neyyar (length 35 miles) rises on the slopes of the Agastier Peak, flows through Neyyattinkara taluk and joins the sea near Poovar, where a small lagoon is formed.

The Karamana river (length 42 miles) rises from the mountains to the north of the Agastier peak and flowing through the Nedumangad and Trivandram taluks joins the sea at Poonthura, 3 miles south of Trivandrum. At Aruvikkara, about 8 miles to the north of Trivandrum, the river has been dammed up for the Trivandrum Water Works.

The Killiyar (length 15 miles), a tributary, joins the Karamana river at Thiruvallam, three miles south of Trivandrum.

The Attingal or Vamanapuram river (length 35 miles) has its source in the hills near Kallar and Ponmudi and flows through Nedumangad and Chirayinkil taluks. It falls into the Anjengo lake.

Lakes or Backwaters

A number of lakes or backwaters lie along the coast. At some points, the backwaters meet the sea during the monsoons; such places are called *pozhies*. The backwaters have been connected by canals. This extensive backwater and canal system stretching along the coast links Trivandrum with Tirur in South Malabar, a distance of about 228 miles.

The chief backwaters in this district, from south to the north are, the Veli, the Katinamkulam, the Anjengo, the Edava and the Nadayara. All these backwaters are comparatively small and shallow. At Varkala, where there is a cliff formation, two tunnels 924 feet and 2364 feet in length were constructed in 1877 and 1880 respectively; they enable uninterrupted water communication along the coast.

Besides this system of backwaters and canals, there are two lakes—the Manakkudi (or Tamarakkulam) in Agasthiswaram taluk and the Vellayani in Neyyattinkara taluk. The latter is a small freshwater lake. There is also an artificial lake at Pechippara with a water-spread of .5 sq. miles formed by the construction of the Pechippara dam.

Coastline

Except for some points of land projecting into the sea at Cape Comorin, Muttam and Kovalam, the coast line is regular. There are small harbours at Colachel and Trivandrum. At Varkala, there are cliffs overhanging the sea.

Natural sub-divisions

From the mountains in the east, the land slopes to the west in a series of hills and valleys traversed by several rivers. Based on this physical configuration, the district can be divided into three natural sub-divisions, the mountainous highland, the flat coastal strip (lowland) and the undulating country in between them (midland); the lowland occupies 31·5 per cent., the midland 35·9 per cent. and the highland, 32·6 per cent. of the total area of this district.

3. GEOLOGY

The geological formation of this district has the following sequence :

(i) recent deposits—marine or alluvial sands,

(ii) sub-recent deposits—raised beaches, alluvium,

(iii) Varkalai formations, consisting of sand-stones, variegated clays and lignite of miocene age,

and (iv) crystalline rocks—among them are found Archaean gneisses, charnockites and pegmatites; the pegmatites contribute to the rare minerals, monazite, ilmenite and zircon found in the district.

Economic minerals

The beach deposits at Cape Comorin and Manavalakkuruchi contain such heavy minerals of industrial use as monazite, ilmenite, rutile, zircon, sillimanite and garnet.

Other minerals in the district are graphite or plumbago, used for making crucibles, pencils, electrodes etc., occurring in workable quantities in Neyyattinkara and Nedumangad taluks. Limestone, both of the kankar and shelly varieties occur near the Cape and is used generally for the production of lime for building construction. China clay of good quality occurs at Puthenkotta near Trivandrum and in certain parts of Chirayinkil taluk. Quartz sand of the required purity for glass manufacture occurs in the coastal dunes of Trivandrum.

4. CLIMATE, RAINFALL AND VEGETATION

In describing the climate, rainfall and vegetation of this district, it is desirable to consider the southernmost taluks of Agasthiswaram and Thovala and the southern portions of Kalkulam separately. The rest of the district, like the other parts of the State, has a damp and uniform climate.

Southern region

In the southern portion of the district, the climatic features resemble more or less those of the adjacent Thirunelveli district, in its scantiness of rainfall and the presence of dry winds for the major part of the year; places like Nagercoil are therefore frequented by those suffering from chest diseases.

Northern region

In the northern region the Ghats shut out the dry winds from the east. There is also a fairly good rainfall. These account for the humidity of the atmosphere and the small diurnal variation in temperature, which are the most striking features of the climate of this area.

The climate of hill sanatoria like Ponmudi and Muthukuzhivayal are largely controlled by their elevation, the average temperature there, for each season, being lower than that at coastal stations by about 4° F. per 1,000 ft. of elevation.

Monsoons

The seasons are controlled by the two periods of rainfall *viz.*, the southwest monsoon and the retreating or the northeast monsoon. The southwest monsoon sets in June and lasts till August, the month of maximum precipitation being June for this district. The monsoon weakens towards the middle of August and the latter part of August as well as the whole of September is generally a period of intermittent rain. The northeast monsoon strikes in October. As the Western Ghats are narrow and broken up in the southern part of this district, the current from the Bay of Bengal has easier access and in some places in the south, this monsoon produces more rain than the southwest monsoon. During the latter half of December, dry and settled weather sets in. January and February are the driest and coolest months of the year. The summer season lasts from March till May. Both days and nights are hot, though the heat may be moderated by occasional showers and in the coastal regions, by the sea-breeze.

During the southwest monsoon, the rainfall at coastal stations shows a progressive increase from the south to the north. There is a similar or even marked increase from the coast towards the mountains. In the extreme south where the salt pans in the State are situated the rainfall is as low as 35 inches while that at Ponmudi is as high as 160 inches per annum.

The tables given below contains statistics of rainfall and rainy days in this district.

Average rainfall (in inches) and number of rainy days

Vegetation

The average rainfall in the Agasthiswaram and Thovala taluks is very much less than that in the other taluks. The vegetation in these taluks is naturally less dense and the palmyra takes the place of the cocoanut tree. The Thovala taluk is noted for the extensive cultivation of "Arali", a shrub whose flowers—usually pink or white—are used for decoration.

Forests

The forests in this district are of the deciduous type with patches of evergreens. In the higher elevations, sholas are found in extensive patches between grassy hills. Reeds and bamboos are also found in plenty in the forests.

5. AGRICULTURE

Soils

The soils in the three natural sub-divisions fall under three types. The soil in the highland region is clay-loam and rests on a bed of rocks ; it is black in colour and is rich in organic matter, nitrogen and potash and is slightly acidic. In the midland, the soil is clay-loam of lateritic origin with an admixture of gravel and sand. In parts of Vilavancode and Kalkulam, the gravel content is low and the gravel finally powdered. In Trivandrum, Nedumangad and Chirayinkil, the gravel content is high and the gravel bigger-sized. The valleys in the midland have loamy clay soil with high sand content. The coastal strip is sandy with a laterite foundation.

The results of the analysis of representative samples of soil from paddy lands in various taluks in the district are given below :

Taluk	Reaction (Ph)	Nitrogen (%)	Potash (K_2O) %	Phosphoric acid (P_2O_5) %	Lime (CaO) %
1. Thovala (Thiruppathisaram)	7·8	0·13	0·26	0·08	1·91
2. Thovala (Vellamadom)	8·4	0·06	0·08	0·07	2·17
3. Kalkulam (Thakkala)	6·8	0·08	0·09	0·02	0·17
4. Vilavancode (Kaliyikkavila)	7·1	0·07	0·05	0·04	0·03
5. Neyyattinkara (Nemam)	6·8	0·04	0·10	0·05	0·03
6. Nedumangad (Palode)	5·8	0·14	0·08	0·04	0·02
7. Trivandrum (Thampanur)	6·8	0·10	0·10	0·02	0·34

Irrigation

In the southern taluks of Thovala, Agasthiswaram and Kalkulam, paddy fields get water from the Kothayar irrigation scheme, completed in 1907. With about 148 miles length of main channels and 181 miles length of distributaries it supplies water to nearly 55,500 acres of paddy lands as detailed below :—

	Ayacut Acres	Conversions Acres	Total Acres
Thovala	10,598·9	1,849·7	12,448·6
Agasthiswaram	13,942·7	10,851·9	24,794·6
Kalkulam	11,012·1	6,771·3	17,783·4
Vilavancode	142·9	..	142·9
Total	35,696·6	19,472·9	55,169·5

In other places tanks and channels are used to irrigate fields but the fate of the crops depends on adequate rains at the proper time.

Agricultural implements

The country (wooden) plough and the spade form the chief agricultural implements. Water lifting appliances are mostly absent, though in recent years, diesel pumps are coming into vogue gradually.

Manures and manuring

Farm yard manure, green leaves, municipal compost and ash are the common manures that are used for the paddy crop all over the district. Farm yard manure and ash, mixed together is applied as a basal dressing, during the preliminary ploughing of land for dry sowing of paddy (broadcasting) in the kharif season. Green leaves are chopped and buried under the wet puddled soil, just before transplanting the seedlings during the rabi season ; a top dressing of ash is added.

Garden crops like cocoanuts are given green leaves, ashes and common salt once a year while tapioca is given farm yard manure or municipal compost and ash at the time of planting the cuttings.

In recent years, as a result of the continued and sustained propaganda of the Agricultural department, imported organic manures (groundnut cake and boneneal) and fertilisers like ammonium sulphate and superphosphate are largely used by the ryots for manuring the paddy crop. The demand for these manures is very keen.

Principal crops

The principal crops in the lowland are paddy and cocoanut; plantain and arecanut are also grown. In a few selected areas betel vine is cultivated. In the midland the chief crops are tapioca and pepper. The chief fruit trees in the district are mango and jack.

The plantation crops in the highland are tea, rubber and a little coffee.

The following table gives the area under principal crops :—

Name of taluk	Area in sq. miles				Area in sq. miles under principal crops		
	Total	Occupied	Wet land	Dry land	Paddy	Cocoanut	Tapioca
ALL	1,491·8	890·7	187·6	703·1	178·1	200·7	282·1
Agasthiswaram	107·1	84·4	38·9	45·5	38·9	17·4	..
Thovala	142·5	45·2	21·9	23·3	22·4	1·4	3·0
Kalkulam	229·2	125·0	34·8	90·2	32·0	19·1	28·9
Vilavancode	166·7	108·8	13·2	95·6	12·1	14·0	36·8
Neyyattinkara	233·6	185·1	23·1	162·0	23·6	49·9	79·3
Trivandrum	97·5	58·2	17·1	41·1	12·7	33·0	16·7
Nedumangad	368·0	232·3	22·6	209·7	20·4	18·9	88·5
Chirayinkil	147·2	51·7	16·0	35·7	16·0	47·0	28·9

The area under the other important crops in the district are :—

Rubber	15·3	square miles
Tea	6·2	„ „
Pepper	35·3	„ „
Coffee	0·3	„ „

Plant pests

Paddy is often badly attacked by the stem borer and the rice bug. The rhinoceros beetle and the red palm weevil, cause damage to cocoanut trees.

Mangoe trees are subject to large scale attacks by insect flies especially in the flowering season.

Livestock

The local cattle are diminutive in size, poor in milk and in working capacity; cattle from Thirunelveli and Coimbatore are imported every year for draught purposes. Efforts to improve the milking capacity of indigenous cattle by cross breeding with imported breeds, particularly the Red Scindhi have been going on for some time. The poultry industry is becoming more and more popular.

One important factor *viz.*, the insufficiency of the local production of food has however to be emphasized. The area cultivated with rice, the staple food is estimated at 178 sq. miles. Even with seasonable rains and other favourable conditions the yield will hardly suffice for six months in the year for the present population.

Inadequacy of production

Improvement of agricultural production can be achieved only by the introduction of improved methods of cultivation and increased facilities for irrigation. One of the chief obstacles to raising the efficiency of agriculture is the existence of uneconomic holdings. Owing to excessive sub-division and fragmentation, 73 per cent. of the wet land plots are less than 1 acre in extent; dry land is much more fractionalised. The size of average family holdings is also small. According to a survey conducted by the Government in 1941, it was 3·13 acres in the lowland, 2·94 in the midland, and 5·76 acres in the highland and 3·23 acres for the State as a whole. Judging from average family income and expenditure figures, most of these holdings were found to be distinctly uneconomic. Soil erosion and agricultural indebtedness are also major problems.

The marine fisheries of this district include the Wage Bank, the richest fishing ground in the Indian Ocean.

Fisheries

Whitebait (4 varieties), murrel (rainbow sardine), butter fish, ribbon fish, perches, seer fish, tunny, red mullet, sharks, rays, small shoals of sardine, dorab, catfish, horse mackerel, sailfish, barracuda, jew fish and balistis are the chief marine fishes. Of these, cat fish, perches, sharks and rays are caught nearly throughout the year. Whitebait, murrel, sardine, dorab, butterfish, ribbonfish, tunny, seerfish and jewfish are seasonal, occurring only for about two to four months in the year; red mullet, barracuda, sailfish, etc., are found less often, and balistis only once in four or five years.

The chief fishing centres in the district are Cape Comorin, Kovilam, Rajakkamangalam, Muttom, Colachel, Kadiapattanam, Chinnamarthandanthurai, Poovar, Vizhinjam, Poonthura, Trivandrum, Kazhakkoottam, Puthenthope, Puthukurichi, Perumathurai, Anjengo, Varkala and Edava.

The inland fisheries in this district are comparatively of little importance.

Dried fish is exported from this district to Ceylon and Madras.

6. LAND TENURES

Land Tenures

Till a century ago, the State presented an interesting (though from the point of view of economic development, far too complex) system of land tenures derived from the peculiar conditions of its historical development. They have been considerably simplified by several pieces of land-tenure legislation.

The chief categories of tenure in this district may be broadly classified:—

I. (a) Pandaravaka. These (comprising three-fourths of the total area of the State and including the vast majority of holdings) are lands belonging to the Sirkar or government. All tenants are now practically owners of their land, subject to payment of tax.

(b) Kandukrishi lands. They are the home-farm lands of the Maharaja of Travancore.

(c) Sripandaravaka lands (extent, 28,000 acres). These are lands belonging to the temple of Sri Padmanabhaswami in Trivandrum and lie scattered in the various taluks of this district.

(d) Sripadam lands—(area about 15,000 acres). These, lying in the pakuthies of Edakkodu and Attingal in the Chirayinkil taluk, are the private property of the Maharaja of Travancore.

In all government lands, the system of land-tenures is based on the ryot-wari principle, *i. e.* direct settlement with individual ryots.

II. Jenmom lands. They are the absolute private property of the owners. Under the Jenmikudiyan Acts, ryots holding jenmom lands have been given fixity of tenure, the dues to the jenmi being collected and paid to them by government the collection being made along with the land-tax.

The chief systems of tenancy under which tenants hold lands owned by others are:—

I—Verumpattom (venpattom). They are tenants who hold lands on lease for periods and on conditions, stated in the contract; they are liable to be evicted under the conditions of the contract.

II—Varamdars (Pankuvaramdars). They are people who raise crops on agricultural lands in partnership with the owners of the land; the conditions of partnership vary in different localities.

III—Kudikidappukar. They are persons who were previously allowed by the owners of the land to occupy a small portion of it, generally to put up a small house to live in and watch the land or work on it.

IV—Otti (Mortgages). Tenancy under this head take different forms in different regions.

The question of giving fixity of tenure to cultivating tenants is under consideration. It may be stated that the ratio of cultivating tenants to non-cultivating owners of land in this district is 4:1.

7. COMMUNICATIONS

The main arterial road known as the Main Southern Road from Trivandrum to Aramboly, length 52 miles, connects the State with the adjoining Thirunelveli district; within the district a net work of subsidiary and feeder roads is linked to it. This road is concreted for a length of 44 miles and tar-creted for 7 miles, so that there is a dustless road from Trivandrum to Cape Comorin. The volume of motor traffic since 1911, when the first automobile was registered in this State, has increased rapidly; bullock-carts are being displaced as carriers by lorries. The State Transport department is running buses for passenger transport and lorries for goods traffic.

The Quilon-Trivandrum Railway was opened in 1918 and the extension from the beach to the Central Station, completed in 1931. The total length of railway passing through this district is 30 miles.

Trivandrum is an air port. There is now daily service to Madras *via* Cochin, Coimbatore and Bangalore. There is also a service to Bombay (Trivandrum—Cochin—Bombay) thrice a week.

The following table gives the mileage of roads and canals in this district.

Length of Roads and Canals

Name of taluk		Main Roads	Planter's Roads	Village Roads	Canals
		Miles	Miles	Miles	Miles
Total	..	1273·27	21·85	62·68	41·00
Agasthiswaram	..	156·82	..	0·90	..
Thovala	..	96·42	..	..	..
Kalkulam	..	230·41	9·10	9·23	..
Vilavancode	..	95·65	..	13·15	..
Neyyattinkara	..	188·50	..	3·87	..
Trivandrum	..	192·26	..	9·75	14·00
Nedumangad	..	188·25	12·75	4·49	..
Chirayinkil	..	124·96	..	21·29	27·00

Posts, Telegraphs and Telephones

Almost all villages have post offices. Telegraph offices exist in all towns. Telephone connections in the district are detailed below :

Serial No.	Name of exchange or public call office		Number of connections
1	Aramboly P. C. O.	..	3
2	Cape Comorin P. C. O.	..	6
3	Kottaram P. C. O.	...	Nil
4	Suchindram P. C. O.	..	Nil
5	Nagercoil Exchange	..	81
6	Thakkala P. C. O.	..	9
7	Iraniel P. C. O.	..	6

[P. C. O.—Public call office].

8. ELECTRIC POWER

The first electric supply undertaking in Travancore was inaugurated at Trivandrum in 1929 as a State-owned and managed system with a small power station having 3 oil engine-driven generating sets, each of 65 K. W. In 1940 power from the Pallivasal Hydro-Electric Works was made available in Trivandrum through H. T. lines from Kundara K. V. Sub-station. The present capacity of the Trivandrum station is 1146 K. W.

Trivandrum is the biggest distribution centre in the district and also the State, the number of consumers being about 9100. Electricity has been made available at most places in the district including Kannyakumari, the Land's End of India.

9. FACTORY INDUSTRIES

Salt

The salt industry confined to a few places on the beach in the southern taluks of this district is an important factor in the economy of the State. Salt is manufactured by solar evaporation in two seasons yearly *viz.*, the interval between the closing of the south-west monsoon and the setting in of the north-east monsoon and the interval between the north-east and south-west monsoons. The total period of working lasts for nearly 7 1/2 months in an year. There are 18 salt factories in this district, located at Thamarakkulam, Cape Comorin, Rajakkamangalam and Colachel. The total area of salt factories is about 1380 acres but the acreage of salt pans is only 580. These factories are able to produce all the salt required in this State.

Mining

Reference has already been made in Section 3 Geology, to the mining of mineral sands at Manavalakurichi.

Titanium products

The Titanium Oxide Factory, Trivandrum (managing agents, Indian Titan products, an associate of British Titan Products) the first of its kind in the east, is manufacturing titanium-di-oxide pigments from Travancore ilmenite.

Rubber

The Travancore Rubber Works, Trivandrum, now a Government concern, manufactures a large variety of rubber goods from the rubber produced in the State.

Tinctures

The Travancore Sugars and Chemicals, Trivandrum is engaged in the manufacture of tinctures and other pharmaceutical preparations for the Indian market.

Cotton textiles

The cotton textile industry in this district is of very recent growth. The Vijayamohini Mills, Trivandrum, manufactures cotton yarn. The Lekshmi Textiles and C. S. S. Weaving works, Trivandrum are engaged in weaving. There is also a small factory in Trivandrum for the production of knitted goods At Nemam, near Trivandrum there is another factory (The Travancore Textiles) for the production of textile goods.

Fisheries

The West Coast Fisheries has three fishing vessels for deep-sea fishing operations.

Cashew and Tea

There are five cashewnut factories in the Chirayinkil taluk, and a few tea factories in the tea estates in the Kalkulam and Nedumangad taluks.

Palmyra fibre and other industries

The processing of palmyra fibre for brush manufacture is carried on at Colachel. There are a number of printing establishments in Trivandrum and Nagercoil. There are a few workshops in Trivandrum and a smaller number in Nagercoil.

The number of registered factories in this district is 57 and the number of factory workers about 5000.

10. COTTAGE INDUSTRIES

Weaving

Cotton weaving is the most important cottage industry in this district. Among textile establishments classified as cottage industries there are none using power looms. Weavers are found in all taluks ; the chief centres of the industry are Kottar and Iraniel, places famous from ancient times for the quality of their textiles, particularly laced cloth. Even though the main products of the handloom industry are towels and finer varieties of cloth which do not have to face much competition from the mills, the industry is in a bad plight. Some of the obstacles to the success of the industry are changes in tastes and fashions, inability of the weavers to adopt improved methods of manufacture, and lack of organised marketing facilities.

Coir

The coir industry in this district is concentrated mostly in the Chirayinkil taluk, Kadakkavur, Vaikom, Perumkuzhi, and Anjengo being the chief centres. This industry is also carried on in the coastal tracts of Trivandrum, Neyyattinkara, Vilavancode and Kalkulam taluks. Coir fibre is prepared from retted cocoanut husks and the fibre spun into coir yarn either by hand or on a wheel.

Oil crushing

Ghanies for the extraction of oil from copra and other oil seeds are found in all taluks ; a marked tendency for electric-driven power mills to displace the ghanies is, however, noticeable.

Mats and baskets

The making of baskets from reeds, bamboos and palmyra leaves gives employment to a number of people, mostly low caste men and women. Kora grass mats are made in some localities in the south.

Rattan work

The rattan cane from the forests is made into various articles of domestic furniture; Varkala and surrounding places in Chirayinkil taluk and Trivandrum are famous for skilled workmanship in rattan.

Fish curing

The preservation of fish by sun-drying is carried on at several places in the coast. Some fish oil is extracted ; but the methods employed are, however, crude.

Pottery and bricks

Red clay is found in several places in the district, and village potters (mostly belonging to a caste called "Kusavan") make several varieties of articles required for domestic use. Burnt bricks are also made in some localities.

Jaggery

The parepration of jaggery (palm gur) from palmyra juice is carried on extensively in the southern taluks.

Carving

There are several establishments in Trivandrum where carving in ivory, wood, horn and cocoanut shells is carried on ; the skill of the craftsman of this State is well-known.

Bell-metal

The casting of non-malleable brass for the manufacture of oil lamps, domestic utensils, etc. has steadily declined owing to competition from cheap imported articles and substitutes. A large variety of bronze and bell metal articles are still made for domestic use ; the principal centre of this industry is Kottar, near Nagercoil.

Toys

The furniture industry is carried on in all urban centres ; the wooden toy industry is centred in Trivandrum.

Soap

There are a few small soap-making establishments in this district whose products find sale in the neighbour hood of these factories.

Lace and embroidery

Lace and embroidery work introduced by Christian missionary societies in the nineteenth century is taught in convents and carried on by a number of women and children ; Mulukumood, Kuzhithura and Nagercoil are the centres of this industry.

Leather

Leather works mostly engaged in making sandals, shoes, suit cases, bags, etc. have sprung up in all towns.

Other industries

The making of beedies (Indian cigarettes) is carried on in all towns, and even in rural areas. Smithies engaged in making or repairing agricultural implements and domestic articles are still found seattered in the countryside but in the towns repair shops and small workshops using modern tools and appliances are increasing in numbers.

11. PUBLIC HEALTH

The public health conditions in the district may be considered to be generally satisfactory, though there is a scarcity of good drinking water in several localities.

Small pox, malaria and cholera are the chief epidemic diseases in the district.

Control of communicable diseases

Malaria is hyper-endemic in the forest hills particularly in the belt between Thovala and Palode and often shows a tendency to flare up under climatic conditions favourable to the spread of the disease. Anti-malarial measures like the D. D. T. residual spraying programme and the distribution of malaria drugs have brought down the incidence of the disease.

Small-pox is sought to be controlled by mass vaccination.

Investigations into the epidemics of cholera show that the disease ordinarily occurs in long waves the crests of which are reached in 5 or 6 years. The disease is often introduced into the district from Thirunelveli during the Suchindram Car Festival and the St. Xavier's Festival at Kottar. The presence of fishing villages, and the unclean habits of the lower classes often contribute to the spread of the epidemic. Preventive inoculation on a mass scale in affected areas is the chief control measure adopted.

Filarial infection has been noted in a few places like Trivandrum and Iraniel. Mosquito control measures are in force.

Large-scale B. C. G.Vaccination has been adopted against tuberculosis.

Birth and death rates

From the latest Public Health Department Report (1950) it is found that the birth rate for this district is 24·99 while the death rate is 8·02. The rate of infant mortality is 51·92.

12. EDUCATION

The history of State activity in education, goes back to 1817 when Her Highness Rani Gouri Parvathi Bayi issued a rescript directing "that the State should defray the entire cost for the education of its people in order that there may be no backwardness in the spread of enlightenment among them, that by diffusion of education they may become better subjects and public servants and that the reputation of the State might be advanced thereby".

Schools were accordingly opened in many places. A system of awarding grants to educational institutions fostered the rapid growth of education. At present, compulsory primary education is in force in some selected taluks.

English Education

Though W. T. Ringletaube, a Prussion missionary, conducted during his stay here between 1806 and 1815, some schools in the district where instruction was given in English, the Nagercoil Seminary founded in 1818 by Rev. Mead, of the London Mission Society, was the first institution to offer regular instruction in English. In 1893, the Seminary was made a second-grade college, under the University of Madras. State participation in English education dates from 1834 when H. H. Swathi Thirunal Maharaja invited Mr. Roberts, Headmaster of the English Seminary, Nagercoil to open an English School at Trivandrum. In less than a year the private school was taken over by Government and made H. H. the Maharaja's Free School. In 1866 it was raised to a College, affiliated to the University of Madras and soon grew into one of the most important educational institutions in South India. The rapid spread of higher education in the State led to the demand for the creation of a separate university for the State. The University of Travancore was accordingly founded in 1937 as a teaching university, with its headquarters at Trivandrum, though the four private colleges in the State were admitted to its privileges. Latterly, the opening of several colleges in the state, due to the pressure of demand for admission to university courses of study, has brought into prominence the affiliating function of the University. The following table gives some details regarding the colleges in this district for the academic year 1950-51.

Sl. No.	Name of institution	Courses of study	Strength			No. of full-time teachers	Number of students living in hostels		
			Total	Men	Women		Total	Men	Women

Taluk-wise details of schools in this district and their strength for the school year 1950-51 are given in a separate statement appended to this part; there are 1303 schools and 364,601 pupils.

Periodicals

There are 66 printing establishments in this district. Four dailies are issued from Trivandrum; there are also 28 weeklies and 13 monthlies.

Libraries

The library movement is active in this State. Besides a district library at Trivandrum and a taluk library, there are 310 other libraries in this district: Government encourage the growth of libraries by giving grants.

13. LOCAL SELF-GOVERNMENT

Municipalities

There are six municipal towns and one municipal corporation (Trivandrum) in this district. Municipal councils consist partly of elected and partly of nominated members, the elected members forming not less than three-fourths of the total number. All municipal councils have the right of electing their chairmen and enjoy powers of taxation. Among the obligatory functions of the municipalities are sanitation, lighting of public streets, vaccination and registration of births and deaths. In addition, municipalities attend to the maintenance of existing roads and opening of new roads, the organisation of child welfare centres and free midwifery service. Some municipalities also run libraries and give grants-in-aid to Ayurvedic and other dispensaries.

Panchayats

Panchayats are the local self-government institutions in rural areas. Panchayats were instituted in 1925. There are now 33 panchayats in the district. A new Panchayat Act was passed in 1950, with a view to vesting the panchayats with more powers, particularly powers of taxation and providing for elections under adult franchise. Under the Act, there will be 114 panchayats in the district.

The activities of the panchayats cover all aspects of rural welfare. Conservancy arrangements, sweeping of streets, street-lighting, improvement of roads, construction of public wells, tanks, latrines, and midwifery service are some of the items of work attended to by these local bodies. Besides, some of them serve also as rural reconstruction centres by running libraries or reading rooms, encouraging compost-making, distributing improved seeds and maintaining stud bulls.

14. DEVELOPMENT PROJECTS IN TRIVANDRUM DISTRICT

The Perinchani—Thripparappu Project comprises the construction of a dam (length 1137 ft.) at Perinchani across the Paraliyar and a pick-up weir at Thripparappu on the Kothayar. This project started in 1948 is intended to ensure the better utilisation of the water supply available from the Kothayar project and also to irrigate an additional 5000 acres of land. The total estimated cost of the project is Rs. 68 lakhs.

The Neyyar Irrigation Scheme started in 1951, is intended to use the waters of Neyyar for irrigation by the construction of a dam (length 965 ft., maximum height 122 ft.) and a reservoir with a water spread of 3 sq. miles. The scheme provides for adequate water supply to 30,000 acres at a total cost of Rs. 2·21 crores.

15. BACKWARD CLASSES

Social reform

Time was when Kerala used to be considered as the most caste-ridden part of India. The old order has, however, been changed during the past half century. A social reform movement with the avowed object of removing the social and economic disabilities of citizens belonging to the so-called "low castes" was inaugurated early in the 19th century by the ruling sovereigns of Travancore. Several iniquitous taxes imposed on these castes were abolished. Sale or purchases of low caste people were restricted; taboos imposed on the use of several articles, dress covering the upper part of the body, ornaments etc., by low-castes were removed. Later, slavery in all forms was abolished. Public roads were thrown open to all castes. Schools were specially established for them, and subsequently free admission to Government as well as aided schools was given to them. Suitable provisions were made for the recruitment of backward classes to the public service. A comprehensive programme for the amelioration of the condition of backward communities was launched about three decades ago. Thanks to these measures, (the Temple Entry Proclamation, throwing open Hindu temples to all classes and the enactment of the Civil Marriages Act were important milestones in the path of progress), the uplift work carried on by Christian and Hindu missions, caste barriers have broken down, so that today caste is no longer the controlling feature of social life.

Scheduled Castes

The number of people in this district belonging to the Scheduled Castes, at this census, was 133,265 or 6% of the total population.

Scheduled Tribes

7721 people were enumerated as members of Scheduled Tribes. These people living in the highland region, seem to be diminishing in numbers. How these communities can be helped to maintain their strength and their culture against the impact of modern civilization is a problem for social anthropologists.

16. SOCIAL CONDITION

Houses

A peculiar feature of the country is the scattered disposition of houses or the complete absence of the street-system in rural areas; each house, even the humblest, stands in its own ground, surrounded by at least a few essential trees and plants, a practice conducive to personal and social hygiene; the street-system, however, occurs in some of the larger towns and in rural areas in Agastiswaram and Thovala taluks. This factor accounts for the comparative freedom from epidemics in the State.

The houses of the poor people are built of mud with no doors or windows and are thatched with plaited cadjan or palmyra leaves. The houses of the middle classes have walls made of wood or sun-dried or burnt bricks; they have substantial roofs and also doors and windows and may either be thatched or tiled. The richer classes have large houses built according to new fashions, of brick or concrete and equipped with drainage and other modern conveniences.

Dress

In matters of dress, new fashions (based on those in vogue in other parts of India) like the shirt, the coat, the blouse, the sari, and coloured silk clothes are rapidly spreading among all classes. A similar transformation is taking place in regard to ornaments, too.

Food

Rice is the staple food of the people; owing to the increasing scarcity of rice in the State, the low-income-groups are compelled to use tapioca in the place of rice (the effect of this habit on physique and health has not yet been scientifically studied). Some sections of Hindus are vegetarians. The Christians and Mahomedans generally eat more fish and meat than the others. New tastes in food are beverages like tea and coffee which have spread even into the countryside.

Amusements

While time-honoured amusements are still enjoyed by the less sophisticated people of the countryside, the cinema has established itself everywhere as the most popular form of recreation; even the small towns have at least one cinema house. Music is in great demand; dramas especially those with accent on music are also appreciated. Western games like foot-ball, tennis, volley ball, badminton, etc. enjoy immense popularity among the youth.

Festivals

The national festival is Onam (in August-September) celebrated by feasts and sports. Vishu (New year's day) in April, and Dipavali (in November, particularly for Tamilians) are also occasions for festivity and rejoicing among Hindu communities. The Christians and Mahomedans celebrate their religious festivals. There are, besides, important festivals in temples and churches which lend gaiety and colour to life in the localities.

Inheritance

About quarter of a century ago, the marumakkathayam system of inheritance (the matriarcha system) was given up by most communities in favour of the makkathayam (patriarchal system). Along with the marumakkathayam system, the joint family system was also abandoned; few communities now follow it.

Position of Women

Women in Kerala have always enjoyed much freedom and respect in society. They have made rapid progress in modern education so that today women belonging to several communities are found in the professions and in public life.

B. POPULATION (Analytical Summary)

17. DISTRIBUTION OF POPULATION

The population of Trivandrum district has increased by 256 per cent. during the past fifty years. The number of inhabitants per square mile is 1,444, giving per capita 44 cents of land. 76 per cent. of the population are confined to rural areas ; 40 per cent are literate and 51 per cent depend on agriculture for their means of livelihood.

Density

Even though the density of population in the district has been stated to be 1,444, it is very much higher when the total occupiable area alone is taken. The density rises to 2,418 and the extent of land actually available for occupation shrinks to 26 cents per head.

The distribution of population according to the natural sub-divisions is given below :

Sub-division	Area as a percentage of the total	Population as a percentage of the total	Density
District ..	100	100	1,444
Lowland ..	31·5	63·9	2,930
Midland ..	35·9	32·6	1,308
Highland ..	32·6	3·5	157

Natural Sub-divisions

The lowland comprising an area slightly less than a third of that of the district has 64 per cent. of the population. The density per square mile is 2,930. The rest of the population is mostly confined to the midland region with a density of 1,308 persons to the square mile.

The following table gives the distribution of population in the district and the taluks :

Name of taluk	Percentage population in taluk	No. of inhabitants per square mile		Land per capita	
		Total	Occupied area	Total	Occupied area
District ..	100	1,444	2,418	44	26
Agasthiswaram ..	10·5	2,105	2,671	31	24
Thovala ..	2·7	372	1,173	172	55
Kalkulam ..	13·3	1,254	2,301	51	28
Vilavancode ..	12·1	1,563	2,393	41	27
Neyyattinkara ..	18·2	1,692	2,136	38	30
Trivandrum ..	17·1	3,805	6,370	17	10
Nedumangad ..	12·4	724	1,147	88	56
Chirayinkil ..	13·7	2,005	5,703	32	11

Taluks

In Thovala and Nedumangad taluks, the density of population is low compared to that of the remaining taluks where the densities vary between 1,250 and 3,800. The area of land per-capita based on total extent, except in Thovala and Nedumangad, is very small. The position becomes still worse when land available for occupation alone is considered. In Trivandrum and Chirayinkil taluks where only 10 cents of land are available per individual, the situation is most distressing.

The following table gives the distribution of population in rural and urban *areas in the district and the taluks ;

Name of taluk	Percentage of population		Number of inhabitants per square mile				
			Rural		Urban		
	Rural	Urban	Total	Occupied area	Total	Non-Municipal towns	Municipal towns
District ..	76	24	1,169	2,055	5,394	4,437	6,110
Agasthiswaram ..	60	40	1,421	1,861	8,021	3,146	9,910
Thovala ..	61	39	235	819	3,481	3,481	..
Kalkulam ..	79	21	1,037	1,976	6,115	5,487	7,106
Vilavancode ..	82	18	1,364	2,159	4,819	4,539	6,033
Neyyattinkara ..	88	12	1,606	2,070	2,777	5,657	1,412
Trivandrum ..	47	53	2,178	4,282	11,192	16,754	10,996
Nedumangad ..	95	5	703	1,127	1,760	1,760	..
Chirayinkil ..	83	17	1,906	7,427	2,698	6,072	1,404

Urban-rural distribution

Over 75 per cent of the people of the district are confined to rural areas. In Nedumangad taluk, the percentage of rural population is as high as 95 while in the taluks of Neyyattinkara, Chirayinkil and Vilavancode, the percentage of rural population is over 80. Trivandrum taluk has only 47 per cent rural population.

Rural density

Except in Nedumangad and Thovala taluks, the rural density is high. And these figures become still greater when calculated on the extent of occupiable land. In Chirayinkil taluk, the density exceeds 7,400 which is only a little less than thrice the urban density of the taluk. This abnormality arises as a result of conservancy towns and the municipality in this taluk not covering the really thickly populated areas.

Urban density

The density of population in urban areas is consistently high in all taluks. The grouping of municipal towns with non-municipal towns has in general increased the density in non-municipal towns and decreased that in municipal towns. The density in non-municipal towns in Neyyattinkara and Chirayinkil, is very much higher than that in municipal towns. In Trivandrum, the non-municipal towns cover only a very small area and form highly congested localities.

18. SIZE AND COMPOSITION OF HOUSEHOLDS

In regard to dwelling houses, the following table summarises the information collected at this census.

Name of taluk	No. of inhabitants per 100 houses			No. of houses per square mile
	Total	Urban	Rural	
District ..	593	638	580	244
Agasthiswaram ..	514	550	493	410
Thovala ..	484	497	475	77
Kalkulam ..	609	613	608	206
Vilavancode ..	622	634	619	251
Neyyattinkara ..	594	659	586	286
Trivandrum ..	665	734	601	573
Nedumangad ..	568	585	567	127
Chirayinkil ..	587	597	584	342

* At the 1951 Census all areas where conservancy arrangements are in force have been treated as towns.

Number of inmates per house

Six inmates per house is the district average. In Thovala and Agasthiswaram, the number of inmates per house is only approximately five. The number of houses per square mile shows wide variations from taluk to taluk with the lowest values in Thovala and Nedumangad and the highest in Trivandrum.

An analysis relating to distribution of households in this district according to size is given below:

Size of households	District		Urban		Rural	
	Number	Density	Number	Density	Number	Density
ALL	1,000	5·18	1,000	5·31	1,000	5·13
Small (3 members or less)	277	2·36	280	2·36	278	2·36
Medium (4 to 6 members)	451	4·96	436	5·02	456	4·95
Large (7 to 9 members)	219	7·78	223	7·84	218	7·76
Very Large (10 or more members)	53	11·25	61	11·74	48	11·06

Households

It will be observed from the above table that about 45 per cent of the families are medium-sized, having five inmates on the average while 5 per cent of the families have over 11 persons in each. Small-sized families with 2 or 3 members and large-sized ones with about eight members form 28 per cent and 22 per cent respectively. Very large-sized familes having over 11 inmates are seen more often in urban areas than in rural places.

In regard to family structure, the analysis of household population yields the results summarised below.

Relationship	Population		
	District	Urban	Rural
ALL	1,000	1,000	1,000
Heads of households and wives ..	334	323	338
Sons of heads of households ..	256	237	262
Daughters of heads of households ..	221	211	225
Other male relations ..	73	87	68
Other female relations ..	101	114	96
Unrelated persons ..	15	28	11

Family Structure

An average household has therefore a third of the inmates forming the head, one half forming sons and daughters, and less than one fifth forming other relations. Unrelated persons in the household are rarely seen. In the urban areas, the unrelated persons, probably belonging to the servant class, are more common than in the rural areas.

In regard to civil condition, the position is as follows : —

Civil condition			Population		
			District	Urban	Rural
ALL		..	1,000	1,000	1,000
Unmarried	Males	..	313	307	313
	Females	..	252	250	253
Married	Males	..	177	179	176
	Females	..	186	186	187
Widowed or divorced	Males	..	11	12	11
	Females	..	61	66	60

Civil condition

Among men, 31 per cent. are unmarried, 18 per cent. are married and 1 per cent. is widower. For women, 25 per cent. are unmarried, 19 per cent. are married and 6 per cent. are widowed or divorced.

19. AGE, LITERACY AND CIVIL CONDITION

The distribution of population according to age is given below : —

Age group		Persons	Males	Females
ALL	..	1,000	1,000	1,000
0— 4	..	152	153	151
5— 9	..	126	127	126
10—14	..	125	125	124
15—24	..	197	195	200
25—34	..	139	138	140
35—44	..	106	108	104
45—54	..	79	81	78
55—64	..	47	46	47
65—74	..	21	20	22
75 and over	..	8	7	8

Age

40 per cent. of the persons are below 15 years of age, 52 per cent. between ages 15 and 54 and 8 per cent. above 55 years of age. Among males and females, these proportions are almost the same as those for the population. Over 50 per cent. of the population may be considered as more or less fit for work. Further as there are only 8 per cent. in the group 45-54 as against 25 per cent. in the group 5-14, the 52 per cent. in the group 15-54 will be continuously replaced during the present decade. One should expect at the end of the decade, allowing for removal due to death in the age group 5-14, the group 15-54 will have over 52 per cent. of the population.

In regard to literacy, the following table gives estimates (per 1000 persons) of literates (sex-wise) in broad age groups.

Age group	Literates per 1000			Percentage of literates in each age group		
	Persons	Males	Females	Persons	Males	Females
ALL	399	497	302	40	50	30
0— 4	0	0	0	0	0	0
5— 9	36	37	34	28	29	27
10—14	77	84	70	62	67	56
15—24	113	131	94	57	68	47
25—34	71	92	50	51	67	36
35—44	46	63	29	43	58	27
45—54	30	47	15	39	59	19
55—64	17	28	7	37	60	14
65—74	7	11	3	32	53	12
75 & over	2	4	0	29	53	9

Literacy

It will be seen that 40 per cent. are literates ; the percentages of literacy for males and females are 50 and 30 respectively. Columns 2, 3 and 4 show the distribution of literates in the age-groups. The remaining three columns show the percentage of literates in each age group. The high values of percentage of literates in the age-groups over 10 for males serve as an index of the progress of education among males during the past decades. Among females the percentages except for the age group 10-14 are low showing that female education has not been very popular in the past decades, except the last.

The marital status of household population is summarised below :

Age-group	Number per 1000 persons who are					
	Unmarried		Married		Widowed or divorced	
	Males	Females	Males	Females	Males	Females
ALL	314	253	174	186	12	61
0— 4	77	76	..	..	..	..
5—14	126	125	..	..	..	..
15—24	90	48	7	51	..	2
25—34	17	3	50	61	1	6
35—44	3	1	50	41	2	10
45—54	1	..	37	23	3	15
55—64	..	..	20	8	3	15
65—74	..	..	8	2	2	9
75 & over	..	..	2	..	1	4

Civil condition

It will be seen that 57 per cent. of the population are unmarried ; the remaining 43 per cent. consist of 36 per cent, married and 7 per cent, widowed or divorced. The percentages of married males and females are almost equal showing that polygamy is very rare. The widowed or divorced persons consist mostly of women who have passed their forties.

The distribution of unmarried persons in the age-groups raises a very interesting problem. In the decade to come, the females in the age-groups 5-14 and 15-24 forming about 17 per cent, of the total population have normally to get married. The men have to come ordinarily from the age-groups 15—24 and 25-34 and these two groups give only 11 per cent. Thus the decade to come will witness a large number of young women remaining unmarried. This tendency can be avoided only by encouraging the younger men in the ages 22, 23 and 24 in the latter half of this decade to marry.

A scrutiny of the columns for married persons, shows that there is practically no child marriage here. Among males, marriage below 24 years of age is also not common.

20. RELIGION

The following table gives the distribution of population according to religion :—

Religion		District	Urban	Rural
ALL	..	1000	1000	1000
Hindu	..	665	669	664
Muslim	..	79	100	72
Christian	..	256	231	264

Nearly 66 per cent. are Hindus, 26 per cent. are Christians and 8 per cent. are Muslims. While the Hindus are seen in almost equal proportions in rural and urban areas, the proportion of Muslims in urban centres is very much higher than that in rural areas while a contrary trend is seen for the Christians.

Special groups

There are 186 Anglo-Indians in this district, out of whom 174 are in towns and 12 are in the villages. 133,265 persons have been returned as belonging to Scheduled castes and 7,721 as belonging to Scheduled Tribes. No person has been enumerated under tribal religion.

21. LANGUAGES .

In regard to languages, the distribution of persons according to their mothertongue is as follows :—

Language		District	Urban	Rural
ALL	..	1000	1000	1000
Malayalam	..	606	504	643
Tamil	..	385	475	356
Telugu	..	2	6	1
Hindi	..	0·6	2·1	
Others	..	6·4	12·9	

In the district as a whole, about 61 per cent. and 39 per cent. of the people have returned their mother-tongue as Malayalam and Tamil respectively. Among the Malayalam-speaking persons, there is a greater proportion in rural places than in urban areas. In regard to Tamil-speaking persons, the greater proportion is seen in urban areas than in rural places. Persons speaking languages other than Malayalam or Tamil are very rare, particularly in rural areas.

22. BIRTH-PLACE

The distribution of persons according to their birth-place is as follows :—

Birth-place		Number per 10,000
Travancore-Cochin State	..	9,899
Trivandrum District	..	9,747
Quilon „	..	108
Kottayam „	..	27
Trichur „	..	17
Other States in India	..	86
Madras	..	83
Mysore	..	1
Others	..	2
Countries in Asia	..	4
do. Europe	..	1
Other countries	..	1
Birth place not returned	..	9

Birth place

Over 97 per cent. of the people are born within the district. Out of the remaining 3 per cent. 1½ per cent. are from the other three districts in the State and 1½ per cent. are mostly from the adjoining districts of the Madras State.

There are only 276 non-Indian nationals in this district ; 2 are from Pakistan, 31 are from other Asiatic countries, 53 are British, 142 are from European countries, 37 are Americans, 10 are Australians and 1 is an African.

23. MEANS OF LIVELIHOOD AND ECONOMIC STATUS

Means of livelihood

Means of livelihood and economic status of the people have been given special emphasis at this census. Means of livelihood have been classified under two broad groups—agricultural and non-agricultural. Each of these in turn has been sub-divided into four. The eight means of livelihood are :—

(a) Agricultural

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land ; agricultural rent receivers and their dependants

(b) Non-agricultural

5. Production other than cultivation
6. Commerce
7. Transport
8. Other services and miscellaneous sources

Means of livelihood classification

The four non-agricultural classes have been re-classified into ten divisions and each division has a number of sub-divisions so that persons could be classified under specific industry and service groups. A detailed list of these sub-divisions is given at page 93 of this volume.

Dependency

Persons under each livelihood class have been classified as self-supporting persons, non-earning dependants or earning dependants. A person has been treated as self-supporting when "he (or she) is in receipt of an *income and that income is sufficient at least for his (or her) own maintenance*". Such income may be in cash or kind. Anyone who is not "self-supporting person" in this sense is a 'dependant'. One who does not secure any income either in cash or in kind is a 'non-earning dependant'. A person, with an income which does not make him self-supporting, is an 'earning dependant'.

Employment

Self-supporting persons have been classified as employer, employee and independent worker. An employer is one who employs other persons in order to carry on the business from which he (or she) secures his (or her) livelihood. It should be remembered that a person who employs a cook or other person for domestic service should not be recorded as an employer merely for that reason. Further persons employed as managers, superintendents, agents, etc. who control other workers are also not employers. The term 'employees' requires no clarification. An independent worker is one who is not employed (in the sense explained above) by any one else and who does not also employ anybody else in order to earn his livelihood.

The distribution of persons according to their means of livelihood is as follows :

Number of persons per 10,000 in agricultural and non-agricultural livelihood classes

Name of taluk	Agricultural classes			Non-agricultural classes		
	Persons	Males	Females	Persons	Males	Females
District ...	5,137	2,582	2,555	4,863	2,423	2,440
Agasthiswaram ..	481	241	240	565	281	284
Thovala ...	167	83	84	79	38	41
Kalkulam ...	754	384	370	581	297	284
Vilavancode ...	596	305	291	612	308	304
Neyyattinkara ...	1,078	549	529	757	372	385
Trivandrum ..	473	235	238	1,249	632	617
Nedumangad —	923	465	458	315	160	155
Chirayinkil ...	665	320	345	705	335	370

Agricultural and non-agricultural classes

It will be seen that the number of persons in agricultural classes is only very slightly in excess of that in non-agricultural classes. Males and females are also almost in equal numbers in both the classes. Neyyattinkara and Nedumangad have the largest number of agriculturists.

In regard to the dependency status of the persons, the following table gives the distribution of 1000 persons in each livelihood class.

	Livelihood Classes	Self-supporting persons	Non-earning dependants	Earning dependants
	ALL ...	261	659	80
I	Cultivators of land wholly or mainly owned and their dependants ..	230	696	74
II	Cultivators of land wholly or mainly unowned and their dependants ..	223	689	88
III	Cultivating labourers and their dependants ..	278	627	95
IV	Non-cultivating owners of land; agricultural rent receivers and their dependants ..	332	603	65
V	Production other than cultivation ..	278	625	97
VI	Commerce ..	255	685	60
VII	Transport ..	270	668	62
VIII	Other services and miscellaneous sources ..	275	669	56

Distribution according to dependency

It will be seen that 26 per cent. are self supporting, 66 per cent. are non-earning dependants and 8 per cent. are earning-dependants. It may, therefore, be concluded that each self-supporting person has to maintain three dependants.

Self-supporting persons falling within each industrial group have been divided into three groups, employer, employee and independent worker. The distribution of self-supporting persons in the major industries divisions is summarised below:

Industries division	Number per 100 persons in each sex who are					
	Employer		Employee		Independent worker	
	Males	Females	Males	Females	Males	Females
All	5	1	48	59	47	40
0	5	2	31	33	64	65
1	1	0	80	78	19	22
2	6	1	39	72	55	27
3	3	2	40	50	57	48
4	2	0	52	46	46	54
5	4	1	75	91	21	8
6	10	2	22	9	68	89
7	1	1	72	74	27	25
8	1	1	90	96	9	3
9	6	1	48	64	46	35

Distribution according to employment

It will be seen that among males in all the divisions taken together, 5 per cent. are employers, 48 per cent. are employees and 47 per cent. are independent workers. Among females, 1 per cent. is employer, 59 per cent. employees and 40 per cent. independent workers. In divisions 1 (Mining and quarrying), 5 (construction and utilities), 7 (transport, storage and communication) and 8 (health and education and public administration) the percentage of employees are very high for both sexes. In divisions 2 (processing and manufacture) and 9 (services not elsewhere specified), women are in greater proportion than men. In divisions "0" (primary industries) and 6 (commerce), the percentage of independent workers in both sexes is also great.

C. GAZETTEER

Agasthiswaram taluk (area 107 sq. miles, population 225,405) consists of 16 pakuthies. The soil except on the coast where it is sandy, is loamy and has been made fertile by the Kothayar Irrigation Project. The chief crops are paddy and cocoanut. This taluk contains most of the salt pans in the State.

Nagercoil, the headquarters of the taluk lies within seven miles of the Aramboly Pass through which the Trivandrum-Thirunelveli road runs. It is really composed of several urban centres, the chief being Nagercoil, Kottar and Vadassery. It has a protected water-supply.

The Nagaraja (serpent-god) temple from which the town derives its name was originally a Jain shrine. There are images of Mahavira and Parsvanatha on the pillars of the mandapam; a lithic record of 1521 testifies to the fact that it was used as a Jain temple at that time.

Kottar was a manufacturing and trading centre from early times famous for its textiles. Ptolemy (second century A. D.) refers to Kottar as a great centre of trade. Rajaraja Chola (985-1014) captured Kottar and renamed it Mummudicholanallur and made it the southernmost military outpost of the Chola empire. Kottar and other adjacent places passed to Travancore in the 12th century. In 1544 Travancore forces defeated Vijayanagar forces at Kottar. Raja Kesava Das improved the trade of the town by establishing bazaars and inviting artisans from Madura and Thirunelveli to settle here. Kottar is now the seat of textile and bell metal industries.

The St. Xavier's Church at Kottar, whose annual festival in December draws a large number of pilgrims, is believed to have been founded in the early years of the 16th century.

Nagercoil owes much of its present position to Christian missionaries who established here an English Seminary so early as in 1819.

At *Asaripallam*, four miles to the north-west of Nagercoil, is a T. B. Hospital, the largest in the State.

Suchindram, 3 miles to the south of Nagercoil on the road to Cape Comorin, is the seat of the Sthanunatha (Siva) temple. It is situated in a spacious court having an outer gate surmounted by a lofty gopura of seven storeys. The size, sanctity and wealth of art-work in the temple have earned for it the title of the 'Parthenon of the State'. The antiquity of the temple is proved by the fact that the sacred margosa tree in it was found to be more than 2000 years old by scientists. The temple was liberally endowed by Pandya, Chola and Vijayanagar rulers who held sway over this part of the country at different times. Though the older structures have perished or have undergone alterations, there are inscriptions in the temple to show that some of the present buildings are at least a thousand years old. Rajaraja Chola (985-1014) conquered Suchindram and renamed it Sundaracholachathurvedimangalam. Other inscriptions show that the Chitrasabha, the pillared portico near the flagstaff, was built in 1410 and the Chempakaraman-mandapa, a large hall, by the Chera king Chempakaraman before 1471. Vithaladeva the Vijayanagar general is said to have built a gopura in 1544 but the present gopura was constructed between 1881 and 1887. The temple contains several inscriptions valuable to the student of history.

The most beautiful structures are the oonjal mandapa, the large Chempakaraman mandapa Virapandyamanimandapa and the Alankaramandapa (built out of a single block of stone). The chief features of the temple are well-wrought monolithic pillars remarkable for the variety of their shapes and forms, richness of ornamentation, fine modeling and intricate chiselling and a large number of attractive images of gods among which the 18-feet high image of Hanuman merits special mention. Besides deific figures there are stone portraits and metal images of great distinction; the fine stone sculpture illustrating the stories of Mahabharatha and Bhagavatha is a marvel of workmanship.

In this temple worship is offered as in some east coast temples, to sixty-three Saivite saints including Nanda and Kampa, belonging to the Paraya and Veda castes; Cheramanperumal, a former ruler of Kerala is also worshipped. Trial by ghee ordeal used to be held in this temple till about 1824. There are two festivals of which the car festival in December attracts large numbers of pilgrims from all the adjoining districts.

Cape Comorin (*Kannyakumari*)—the Land's End of India, 12 miles south-east of Nagercoil is the terminus of the 54 mile-long dustless road from Trivandrum. The Durga (Bhagavathi) temple here has been famous from early times as a place of pilgrimage; it is referred to both by the author of the Periplus (1st centuary A. D.) and Ptolemy (2nd centuary A. D.). It is also mentioned in the Mahabharatha and in the Taitariya Upanishad. In the course of centuries this temple has been renovated by several south Indian monarchs. This temple (along with Shenkotta) was ceded to Travancore by the Nawab of the Carnatic in 1766 in exchange for territories in the Thirunelveli district.

The temple, which is surrounded by a stone wall, stands on the edge of the ocean. The image of the goddess is considered to be one of the most beautiful in India. The saba mandapa contains elaborately wrought pillars on which are sculptured puranic stories. The concept of the maiden goddess praying for her Lord living in the Himalayas symbolises the physical and spiritual unity of India.

Nearby is the Guhanathaswami temple, a small beautiful structure, the shrine and mandapam of which were built at the end of the tenth century.

Cape Comorin is a beauty spot of unique grandeur and also a health resort. Three seas meet at this point where " the continent ends in a swan-song of broken rocks and mingling oceans." Here sunrise and sunset are both glorious sights.

Among the rocks lying off shore are the Vivekananda rock (about 200 yards away from the temple), so called because towards the end of 1892, the Swami came to the Cape and was so fascinated by the place that he swam to a rock and sat there in meditation for a time. It is said " that he looked northwards at the great land and its teaming millions " and resolved to dedicate himself to the service of his country and spread the messages of Vedanta to the west.

Agasthiswaram, a village near Cape Comorin famous for its Agasthyalinga shrine, containing inscriptions dating from the 11th century. The village was first colonised in 1439 under commands from a Maharaja of Travancore, who set apart lands for men of different castes and professions.

Leepuram, known also as Sipuram and Sreemulapuram is a place, two miles east of the Cape, where the bight and roadstead afford safe anchorage. The sea here is 5 to 8 fathoms deep at a distance of a mile from the shore and is calm for most part of the year. Leepuram is, therefore, believed to possess possibilities for development as a port.

Vattakkotta, a granite fort three miles north-east of the Cape, forms the terminal of a line of ramparts known as the South Travancore lines built by Marthanda Varma to serve as a defence for Nanjinad. The fort is enclosed by walls 25 to 28 feet high (including the parapet), 29 feet thick at the front, 18 feet at the corners and 6 feet at the rear. The area of the fort is 3¾ acres. The bastion running into the sea is the most strongly built.

Thovala taluk (area 143 sq. miles, population 52,980) consists of 12 pakuthies. The northern part of the taluk is covered by hills and forests. On the slopes of hills are a few plantations devoted to rubber, tea and coffee. Parts of the southern portion of the taluk get water from Kothayar Irrigation Project and paddy is the chief crop.

Bhoothappandi, the headquarters of the taluk, is set in picturesque surroundings with the low spurs of the Western Ghats on one side and paddy fields on the other.

Thittavila, a suburb of Bhoothappandi is famous for the manufacture of kora grass mats.

Aramboly, is situated on this side of the mountain pass of the same name, lying across the Western Ghats and affording an easy gateway in the South Travancore from Thirunelveli. Through this historic gap, three miles wide, repeated invasions have rolled in, during early and medieval times, leaving their imprint on the language and culture of the people in this area. In the middle of the eighteenth century, Marthanda Varma fortified Aramboly (and other places on the frontier) to defend Nanjinad. For a long time a detatchment of troops was also stationed here, to check border raids. In 1809, at the time of Velu Tampi's rebellion, Col. Welsh's troops captured the fortification at Aramboly by an escalade carried out during the night. The highway from Travancore to Thirunelveli runs through this pass.

Thovala, about a mile to the west of Aramboly is famous for its Arali (Nerium ordorum) flowers.

Thiruppathisaram (about 3 miles from Nagercoil) is famous for its ancient temple dedicated to Sri Venkitachalapathi (Vishnu). The temple stands amidst the scenes of great natural beauty and contains several examples of fine sculpture.

Azhakiapandipuram, is a highland village, full of archaeological interest. It was the headquarters of the Kurava chiefs who ruled over Nanjinad for a time and of the Mudaliars who succeeded them.

Ashamboo, a plateau on the Mahendragiri hills is a health resort. Nearby is the famous water-fall Olakkayaruvi. There are estates devoted to plantation crops in this region.

At *Thadikarankonam* a syphon in the Thovala channel (of the Kothayar Project) carries water across the Thadavayar river without losing its level. The syphon is of steel pipe, 5 feet diameter, encased in surki concrete. The total length of the pipe is 592 feet.

Kalkulam taluk (area 229 sq. miles, population 287,519) comprises 18 pakuthies. The Tamravarni and Kothayar rivers flow through this taluk. Palmyra is largely grown here. A considerable extent of paddy fields in this taluk is irrigated by the Kothayar Project. Paddy, tapioca and cocoanut are the chief crops. In the highland region there are a few estates growing rubber and tea.

Thakkala, the headquarters of the taluk is a station on the main road from Trivandrum to Nagercoil.

Padmanabhapuram (municipal town) was the capital of Travancore and the residence of the royal family till they were shifted to Trivandrum in the middle of the 18th century. The place was known as Kalkulam in earlier times. There are records to show that there were palaces at Kalkulam in 16th century and that a fort was built there about the year 1600. The Dutch captain John Neiuhoff has recorded in 1664 that Kalkulam was the seat of Travancore royalty and that the fort contained an army of 10,000 Nayars. Maharaja Marthanda Varma rebuilt the forts at Kalkulam and Udayagiri and repaired the palace buildings; he also constructed the Ramaswami Temple. When these works were completed in 1744, he dedicated the palace to Sri Padmanabha, thus changing the name of the place to Padmanabhapuram. During his time, however, the capital and royal residence were shifted to Trivandrum to suit the requirements of his expanding dominion. His successor Rama Varma however seems to have preferred Padmanabhapuram to Trivandrum. A royal mint was established at Padmanabhapuram by Dewan Raja Kesava Das in 1790; it used to mint gold, silver and copper coins of fine quality. Padmanabhapuram was the headquarters of the southern division from 1859 till 1921, when the southern division was abolished.

The Padmanabhapuram Fort is a square structure and encloses an area of 186 acres. The walls about 30 feet high are built partly of granite and partly of laterite. The fort has several bastions, four main gates and five small entrances.

The Padmanabhapuram Palace, covers an area of about 6½ acres and serves as one of the best examples of Kerala architecture. Some of the oldest structures in the palace date back to the 16th century. The main building was constructed during the time of Marthanda Varma about 1740-44. Several improvements were carried out in the 19th century. In one of the rooms are the mural paintings of Hindu gods and goddesses, believed to be about three centuries old. Other noteworthy features are the elaborate carvings in wood on the pillars, the ceiling of the council hall and the reception hall and in the *nerapura* (small auxiliary structures). Another attraction is the clock in the palace tower made by a local blacksmith about 400 years ago.

The Nilakantaswami Temple inside the fort, built in the Dravidian style with a gopura, is an ancient and impressive edifice. It contains inscriptions dating from the early years of the 13th century.

The Ramaswami Temple constructed by Maharaja Marthanda Varma is famous for the carving of the Ramayana story in 45 wooden panels, each about 7 ft. long and 10 inches broad, placed between the eaves and the *vilakkumadom* all round the four walls. The work (completed in the year 1744) shows fine decorative taste and excellent workmanship in wood.

The Padmanabhapuram Palace is an Archaeological Museum since 1940. The Museum contains epigraphic records, a collection of stone sculpture, ancient coins, military weapons used in early times, and other objects of archaeological interest.

Udayagiri fort (at the 33rd mile on the Trivandrum-Nagercoil road, a mile south of Thakkala), was the most important military station of the Travancore rulers. The fort was originally built about the year 1600. During Marthanda Varma's time it was rebuilt according to the plans prepared by Thaikkad Namboodiri, (and not those of De Lannoy as is generally believed). The construction was completed in three years, 1741-44. The Maharaja also established there a foundry for the manufacture of guns, mortars and cannon balls, and a powder manufactury under the supervision of De Lannoy. De Lannoy's tomb, as also those of his wife and son, can still be seen inside a partly ruined chapel in the fort. A few of the prisoners caught in the campaign against Tippu Sultan were confined in this fort for some time. In 1809, the East India Company's army under Colonel St. Leger marched into the country through Aramboly, to quell Velu Thampi's rebellion and captured the fort. Col. Welsh in his 'Military Reminiscences' has recorded that there were 100 guns in the fort besides fifty thousand stand of arms, it is also reported that a brass gun 16 feet long bored as a 22 pounder found inside the fort, which excited their curiosity, could not be moved even a few yards by 1,200 people with the help of 16 elephants. The Company's troops were stationed here till about the middle of the 19th century. On one corner of this fort is a travellers' bungalow.

The Fort encloses an area of about 90 acres and contains an isolated hill 260 feet high which affords a panoramic view of the surrounding country. At the top of the hill are the ruins of a platform and a flagstaff. The granite walls of the fort are 18 feet high and 15 feet thick; there are 10 bastions.

Nearby is Kumarakovil (Subramonia shrine) set at the foot of the Velimala hills amidst picturesque surroundings and attracting every week a large number of pilgrims.

Keralapuram, (near Padmanabhapuram) known as Veerakeralapuram in historical documents and the seat of an ancient temple containing several inscriptions is believed to have been one of the earliest capitals of Venad.

Thiruvattar, the seat of the Adikesavaperumal temple is one of the thirteen divyadesams (places sacred to Vaishnavites). The Tamil classic Purananuru mentions Thiruvattar as the seat of a chieftain famous for his charity and patronage of men of letters. The Vaishnavite saint Nummalwar has eulogised the sanctity of the temple in his Thiruvaimozhi. The present shrine dates from the 12th century; inscriptions in the temple show that the Ottakkal mandapa was erected by King Vira Ravi Varma of Venad between 1603-1607; there are some inscriptions of Chola and Travancore kings also in the temple. The vestiges of old mural paintings belonging to a period not later than the 17th century are seen in a damaged condition on the walls of the inner shrine. Wood carving of great delicacy adorns some structures.

The small rock-cut temple at *Thirunandikkara* (dedicated to Siva) contains vestiges of ancient murals. They are perhaps the best examples of post-Ajanta mural art in the State and are believed to belong to the 9th century. These paintings show "an art in all respects equal to that of Ajanta just about the termination of that classical era".

Pechippara reservoir reached by a short tour from the 25th mile of the Trivandrum-Nagercoil road is formed by a dam built across the Kothayar. The work was completed in 1907; the water-spread of the reservoir, which irrigates 55,000 acres is about 5 square miles. Surrounded by forests, the reservoir is an attraction for tourists; there are facilities for boating. Another dam is now under construction at Perinchani to supplement the water supply from the Pechippara reservoir.

Muthukkuzhivayal, health resort, situated on a plateau near Pechippara at an elevation of about 4,400 feet is 32 miles from Nagercoil. At the time of the gold rush in the latter half of the 19th century, a European company started digging operations for gold but abandoned it soon afterwards.

Iraniel, was a seat of the Travancore Royal Family in former times. The ancient palace with its wood-carving is a noble specimen of Kerala architecture. Iraniel is now a centre for the weaving of fine handloom cloths.

Colachel, was much frequented by European merchants from the 16th to the 18th centuries; the Danes, the Dutch and English had trading settlements here. It was the scene of a combined land and naval battle in August, 1741 in which Marthanda Varma inflicted a crushing defeat on the Dutch. This victory which "put an end to the Dutch dreams of conquest of Malabar" is commemorated by pillar errected at the site.

Colachel now exports fibre obtained from the palmyra and aloe plants, mineral sands, fish and salt. Shipping is facilitated by a group of outlaying rocks forming a partial backwater. Small steamers anchor less than a quarter of a mile off and large steamers 3|10 of a mile off.

Neyyoor is famous for the L. M. S. Hospital located here.

Thiruvithamkode called Srivazhumkode in earlier times was also a former capital of Venad. In course of time the kingdom itself came to be known by this name.

Mandakkad situated near the road from Eraniel to Monday Market is well known for the Bhagavathi temple here. The annual festival (Koda) attracts a large number of worshippers; a religious convention is held along with the festival.

Vilavancode taluk (area 167 sq. miles, population 264,076) consists of 18 pakuthies. The Tamravarni flows through this taluk. Palmyra is extensively grown. The other chief crops are, tapioca, cocoanut and paddy. In the highland are a few rubber estates.

Kuzhithura the headquarters of the taluk is an ancient town on the banks of the Tamravarni (Kuzhithura river).

Marthandam a comparatively new town, named Marthandapuram in commemoration of a visit made by Vishakom Thirunal, possesses a fine Church and a rural reconstruction centre (conducted by the Y. M. C. A.); it is part of Kuzhithura municipal town.

Munchira contains the large Parvathisekharapuram temple, founded by a Pandya king in the ninth century. In earlier times a great educational centre with provision for 95 selected students was attached to this temple,

Chitaral. The Bhagavathi temple at Chitaral north-west of Kuzhithura was a Jain shrine in the 13th century ; there are images of Jain saints in the temple.

Neyyattinkara taluk (area 234 sq. miles, population 395,205) consists of 18 pakuthies and extends from the sea-coast to the Western Ghats. It is watered by the Neyyar. The chief crops are tapioca, cocoanut and paddy.

Neyyattinkara, the headquarters of the taluk contains a temple dedicated to Sri Krishna founded and endowed by Marthanda Varma in 1757. Inside the temple premises is a jack tree in the hollow of which the king is reported to have hid himself from his enemies and which therefore is known as Ammachipilavu (mother tree). There is an important vegetable and cattle market at Aralum- mood now a part of the town.

Parassala was founded by Dalawa Mallanchempakaraman Pillay about the year 1740.

Aruvippuram two miles from Neyyattinkara is a charming spot for holiday seekers. The small temple founded by Sri Narayanaguru attracts a large number of worshippers during the Sivarathri festival.

Balaramapuram was founded by Thampi Iravi, Dewan, in 1810 in honour of the then reigning Maharaja, Balarama Varma. He cleared the jungles and invited weavers to settle here ; he had also an idea of constructing a navigable canal from Balaramapuram to Vizhinjam. Balaramapuram is now a centre for handloom weaving.

Nemam has a factory for weaving and dyeing of textile goods.

Vizhinjam now a fishing village and a port of occasional call for small steamers, was an important port in former times. It seems to have been a naval centre of the Chera kings for we read of Chola emperors repeatedly attacking and capturing it during the 10—12th centuries. Rajaraja Chola (984—1014) captured Vizhinjam and renamed it Rajendracholapattanam (it was known also as Vilinjamana Rajendracholapattanam).

The early European traders seem also to have been attracted to this port. The Danes built there a factory which was sacked and burnt by the Portuguese in 1508. The Dutch had also a factory there. In 1644 Unni Kerala Varma of Venad granted permission to the East India Company to build a factory ; this was the first English settlement in the State ; its importance declined with the rise of Anjengo.

Kovalam about 10 miles from Trivandrum, is a fine bathing beach. A high rocky promontory jutting into the sea makes bathing in the sea comparatively safe. A modern bathing ghat was constructed some years ago. The view from the headland is magnificent. In its early days the East India Company had a warehouse at Kovalam.

Trivandrum taluk (area 98 sq. miles, population 371,001) consists of 23 pakuthies. Though small, it contains hills, valleys and rivers and presents a variety of natural scenery.

The chief crops are cocoanut, tapioca and paddy.

Trivandrum, the capital of the State takes its name from the celebrated temple of Anantasayanam (Sri Padmanabha) inside the Fort. This Vaishnavite temple is of great antiquity being mentioned in several ancient literary works. The management of the temple originally vested in a council known as Ettarayogam, seven Brahmin jenmies, one Nayar chieftain and the ruling Maharaja of Travancore who exercised only half a vote, signifying the Maharajas's non-interference in the affairs of the temple. In course of time, however, the authority of the Maharaja became supreme. There are records in the temple to show that it was thoroughly renovated towards the end of the 10th century. Even in the 14th century the Maharajas of Travancore styled themselves Sri Padmanabhapadakamala Paramaradhakars (the greatest worshippers of the lotus feet of Sri Padmanabha). The foundations of the present gopuram were laid in 1566, but for various reasons it was not completed for a long time ; it was left to Marthanda Varma to complete it upto the fifth storey. Marthanda Varma also effected extensive repairs and several additions to temple buildings. The Sivelippura, (stone corridor) 20 feet in breadth, 23 feet in height, 420 ft. from east to west and 226 ft. from north to south, supported by numerous sculptured stone pillars, was constructed in his time. He also set up the Ottakkal mandapam, constructed out of a single block of granite measuring 20 feet squre and two and a half feet thick, cut from a rock at Thirumala, 4 miles north of the town. Walls were constructed round the temple ; a golden flagstaff was set up and the image of Sri Padmanabha was reconstructed and reconsecrated. These items of work were carried out between 1729 and 1733. In January 1750 (5th Makarom 925 M. E.) Marthanda Varma dedicated the State to Sri Padmanabha, assuming the title of (Padmanabhadasa). It was during the reign of his successor Rama Varma that the sixth and seventh storeys of the gopuram were completed and the Kulasekhara mantapam constructed. The temple contains several inscriptions and mural paintings. Some paintings were destroyed by the fire which burnt down portions of the temple in 1934.

There are two festivals in the year, one in March—April, and the other in October—November both of which are impressive ceremonies. On the concluding day of the festival the image of Sri Padmanabha is carried in procession to the beach where it is bathed and worshipped ; the Maharaja accompanied by Hindu officers walks at the head of the procession.

There is also a sexennial ceremony, the Murajapam lasting 56 days and concluded by a magnificent illumination of the temple, the Lakshadipam or 100,000 lights.

The Fort contains Palaces of former rulers (among others that of Sri Swathi Thirunal Maharaja 1829-1847) which are masterpieces of Kerala architecture, exhibiting fine workmanship in wood. Some of the chief institutions in the city are mentioned below.

The Public Gardens covering about 56 acres contain beautifully laid out hills and dales, lawns and lakes, shrubberies and rockeries, interspersed with the runs and cages of the Zoo. The Museum, founded in 1853 is located in one of the terraced gardens is a beautiful building (completed in 1880) showing "a delightful fusion of Indian styles (Hindu and Muslim) under fascinating groupings of the Kerala roof and Malabar gable." It contains an excellent collection of natural history specimens, South Indian bronzes and specimens of Kerala arts and crafts (wood work, ivory kuftgari and metel work, jewellery and musical instruments).

An annexe to the Museum contains a rare collection of specimens of Java-Bali art and also a few paintings by the Russian artists, Nicholas Roerich and his son.

The Sri Chitralayam (temple of painting), founded in 1935 and enlarged in 1948, is located in the Public Gardens. It is one of the finest art gallaries in India, presenting as it does a survey of painting in India and other Asiatic countries from early times down through the Ajanta period to recent times.

The Zoo started in 1859 contains a large collection of animals and birds. The Trivandrum Observatory situated on a hillock, 196 feet high, dates from 1836 and has made important contributions to the study of terrestrial magnetism. The Public Library dates from 1847. The School of Arts contains examples of the Indian arts and crafts.

The University of Travancore was founded in 1937 ; there are several colleges in the city including two Women's Colleges, a Training College, a College of Engineering and a Medical College.

The University stadium near the Public Gardens is among the best of its kind in India.

Perhaps one of the greatest attractions of the capital is the beach, three miles from the centre of the town, with its expanse of white sands. The Aquarium is located at the beach.

Trivandrum is the terminus of the Travancore branch of the Southern Railways. The sea port is at Valiathura about two miles from the town. The air port is located at the beach ; there is daily service to Madras and tri-weekly service to Bombay.

The city is famous for ivory works of art and laced clothes.

Veli, a suburb on the Veli lake, lies about three miles north of the aerodrome. Boating on the lake is enjoyable. The Titanium Oxide Factory is located here.

Thiruppappoor, is a village ten miles north of Trivandrum from which the Travancore royal house takes its title, "Thiruppappoor Swarupam." Previously the Travancore Maharajas used to go there and worship in the temple at the time of their coronation.

Nedumangad taluk (area 368 sq. miles, population 266,424) consisting of 16 pakuthies falls within the midland and the highland in almost equal divisions. The Karamana river and Killiyar rise in the hills in this taluk and flow through it. The chief crops are tapioca, pepper, paddy and cocoanut. There are estates growing rubber, tea and a little coffee.

Nedumangad—the headquarters of the taluk is a small town of growing importance.

Aryanad—Pass, and village is 6 1/4 miles east of Nedumangad. There was formerly a petty chieftain here called Aryanattu Pillai who lived in a small fort on the banks of the Karamana river. He was reduced to subjection and killed by Marthanda Varma about 1748 A. D. The village is now in ruins. The communication with the Pandyan kingdom by this pass was closed long ago.

Ponmudi—3,000 feet above sea level is 38 miles to the north east of Trivandrum with which it is connected by road. As the climate is cool and bracing particularly during the summer, it can be developed into a health resort near the capital.

Agastier peak—(6,200 ft.) An observatory was in existence here between 1855 and 1865.

Aruvikkara, eleven miles north of Trivandrum contains the head works of the water supply to Trivandrum city. An overflow dam constructed on the Karamana river has created the reservoir for storage of water. Below the dam the river tumbles over groups of rocks ; nearby is a Bhagavathi temple. Aruvikkara commands fine views of woodland scenery.

Chirayinkil taluk (area 147 sq. miles, population 295,182) comprises 31 pakuthies. The taluk is partly hilly and partly interspersed with backwaters or lagoons. The Attingal river flows through it. The chief crops are cocoanut, paddy, tapioca and pepper.

Attingal—(municipal town) the headquarters of the taluk on the Attingal river, is an historic village. With the adoption of the two princesses from Kolathunad into the Travancore Royal family a royal residence was established here in 1254-55. For a long time, it was a usual place of residence of the female members of the Travancore royal family, the eldest female member taking the title of 'Attingal Moothathampuran'. The Maharajas used to go there periodically to perform certain religious ceremonies. The Bhagavathi temple here is an ancient one.

Anjengo—now a small fishing port standing on a narrow bank of sand, its western side bounded by the seas, and the estern by the Attingal river, was an important port in the 17th and 18th centuries. Facilities for water communication seems to have attracted the Portuguese and the Dutch traders to this place. In 1673, English East India Company established a factory here for trade in calicoes and pepper. In 1684, Ummayamma Rani of Venad gave them certain trade privileges and later, in spite of protests from the Dutch, permission to fortify the place. The port was completed in 1695. Anjengo soon became the first port of call for outward-bound ships, and the most important trading centre of the Company south of Bombay. The trading stations at Vizhinjam, Colachel and Edava were placed under its control and the chief of Anjengo was made second member of the Council in Bombay. In 1729 the Company was given the monopoly of pepper trade in the State. During the Carnatic war, Anjengo was of great use to the English as a depot for military stores and as a place from which news of outward-bound ships reached Madras. In a few decades, however, Anjengo declined in importance. In 1776, it was reduced to the status of a Residency. In 1801, during Velu Tampi's rebellion the fort was blockaded. In 1810 the commercial residency was placed under the Resident in Travancore and in 1813 the factory was abolished. It continued to be under the jurisdiction of the Madras State till 1950 when the territory was added to Travancore-Cochin. Robert Orme, the historian of British India, the son of a chief of Anjengo, was born here in 1728. Mrs. Eliza Draper, the object of Sterne's rhapsodies was the wife of a chief of Anjengo and lived here for some time. The Anjengo Records extant from 1744 to 1810 are of some value to the student of history. There are two Christian churches, remains of a flagstaff and fort and Dutch and British tombs at the place.

Varkkala—on the Trivandrum-Quilon railway, 22 miles north of Trivandrum is a well-known health resort famous for its natural springs of mineral waters believed to possess medicinal properties (there are convenient public baths for men and women), salubrious climate and fine natural scenery. The Varkkala cliffs overhanging the sea are very interesting from geological point of view; patches of lignite occur in this area. Two navigation tunnels were cut through the cliffs to provide through water communication between Trivandrum and Tirur (South Malabar.). The first tunnel completed in 1877, is 924 feet and the second completed in 1880, is 2364 feet, long ; the longer tunnel has been provided with a ventilating shaft. The maximum width of the tunnels is 16 feet and the maximum height 17 feet.

Known in other parts of India as *Janardhanam* and considered as sacred as Gaya itself, Varkkala is a famous place of pilgrimage for Hindus. The temple dedicated to Janardhanan (Vishnu) built on a hill-top reached by a long flight of steps is an ancient one, showing a mixture of Kerala and Dravidian styles of architecture. From inscriptions in the temple it is seen that the central shrine was rebuilt in 1252 by a king of Travancore. Formerly Varkkala was known also as Udayamarthandapuram after a great Travancore king, Udaya Marthanda Varma (1516—35). The temple possesses a bell with a Dutch inscription, believed to have been presented by the Dutch when they evacuated Anjengo where they had a factory. The East India Company in its early days, had a trading settlement at Vettur near Varkkala. Varkkala is associated with the work of the famous saint Sri Narayana Guru who founded here the Sarada Temple and a mutt; the annual festival in the temple attracts a large number of worshippers. A religious convention is held along with the festival.

Edava on the Edava lake was a centre of some commercial importance in former times. The Danes had a trading settlement here ; the East India Company opened a factory here in 1726.

Kizhperoor 8 miles from Attingal seems to have been an old residence of Travancore royalty, (older than Attingal) as inferred from its mention among the titles of Travancore Kings in ancient documents.

Kilimanur is the seat of the Kilimanur Edavagai. This was created about 1,700 by the grant of a large extent of land to the husband of one of the Ranis of Travancore who at the cost of his own life saved the lives of the Rani and some princes, proceeding from Chengannur to Attingal from an attack by ruffians. In their wars against Travancore, Dutch and Kayamkulam troops advancing from Quilon captured Kilimanur and held it for 68 days, before they were compelled to surrender to Marthanda Varma (1742). The famous painter Ravi Varma Raja belonged to the Kilimanur family.

DISTRICT CENSUS HANDBOOK

TRIVANDRUM

Part II

CENSUS DATA

SCHEME OF CENSUS TABLES

Census Tables prepared this time fall under the following four broad groups :—

A GENERAL POPULATION TABLES
B ECONOMIC TABLES
C AGE TABLES
D SOCIAL AND CULTURAL TABLES

There are five Tables under General Population Tables. These are :—

A I AREA, HOUSES AND POPULATION
A II VARIATION IN POPULATION DURING FIFTY YEARS
A III TOWNS AND VILLAGES CLASSIFIED BY POPULATION
A IV TOWNS CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1901
A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

Economic Tables comprise three separate Tables. These are :—

B I LIVELIHOOD CLASSES AND SUB-CLASSES
B II SECONDARY MEANS OF LIVELIHOOD
B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS

There are five Tables in the Group of Age Tables. These are :—

C I HOUSEHOLD (SIZE AND COMPOSITION)
C II LIVELIHOOD CLASSES BY AGE GROUPS
C III AGE AND CIVIL CONDITION
C IV AGE AND LITERACY
C V SINGLE YEAR AGE RETURNS

Social and Cultural Tables consist of seven Tables :—

D I LANGUAGES
D II RELIGION
D III SCHEDULED CASTES AND SCHEDULED TRIBES
D IV MIGRANTS
D V DISPLACED PERSONS BY DISTRICT OF ORIGIN AND DATE OF ARRIVAL IN INDIA
D VI NON-INDIAN NATIONALS
D VII LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

The C Tables mentioned above have been prepared only for a ten per cent. sample of the total population, but the figures given in the tables are estimates for the total population calculated from the figures for the sample.

To facilitate the preparation of the Census Tables, the State was divided into forty-three census tracts, each census tract comprising approximately a population of two to three lakhs, urban and rural areas being kept separate. As such, the urban or rural areas in more than one taluk had to be combined into one census tract in a few cases. Separate population of figures for the A Tables have been prepared for all taluks and towns. The B, C and D series Tables give figures only for census tracts.

A summary of the State Tables is given at the beginning for comparison and general information.

GENERAL TABLES

A I AREA, HOUSES AND POPULATION

This Table is the same as Table A I for the State. The figures have been broken up into rural and urban, for each of the Natural Sub-Divisions—Lowland, Midland and Highland. The area figures for the State and the Districts are those furnished by the Surveyor-General, India. The figures for further sub-divisions are those obtained from the Land Revenue Department. Adjustments due to exchange of enclaves between this State and Madras, under the Provinces and States (Absorption of Enclaves) Order, 1950, have been made in the areas of the districts concerned.

The term " village " as applied to this State requires explanation. The concentration of dwelling houses characteristic of villages in most other parts of India is almost absent in this State. This is a country of scattered homesteads. The village in this State, represents the territorial unit, ' kara ' (in Travancore) and ' proverthy ' (in Cochin). These are the smallest recognised sub-divisions of the taluk and have existed as such from early times.

GENERAL TABLES

A II VARIATION IN POPULATION DURING FIFTY YEARS (1901—1951)

This Table is prepared from previous Census Reports. Adjustments have been made for the changes in the boundaries of districts and in the exchange of enclaves under the Provinces and States (Absorption of Enclaves) Order 1950.

In the Table columns 3, 6 and 9 give the increase in population during each decade. In columns 4, 7 and 10 are given mean decennial growth rates. The mean decennial growth rate expresses the net variation in the decade as a percentage of the mean population which is the arithmetic mean of the populations at the beginning and end of the decade. If P_0 and P_1 are respectively the populations at the beginning and end of the decade,

$$\text{the mean decennial growth rate} = \frac{P_1 - P_0}{P_1 + P_0} \times 200$$

A II VARIATION IN POPULATION

Census year	Persons	Variation	Mean decennial growth rate	Males	Variation
1	2	3	4	5	6
					TRAVANCORE—
1901	3,768,999			1,897,684

GENERAL TABLES

B ECONOMIC TABLES—LIVELIHOOD CLASSES

This Table is a summary of State Table B I—Livelihood Classes and Sub-Classes. Means of Livelihood are given under eight categories—four relating to agriculture, the remaining four being non-agricultural.

The figures under each category include all self-supporting persons having that as their Principal Means of Livelihood and also those dependants living with them.

GENERAL

A I AREA, HOUSES AND POPULATION

The Trivandrum district consisting of eight taluks was called "Southern Division" in previous Census Reports. Two enclaves—Anjengo (100 acres) and Panagudi (15·15 acres)—have been added to this district from the Madras State under the Provinces and States (Absorption of Enclaves) Order, 1950. The Anjengo bit has been incorporated as a separate kara in the Kadakkavur pakuthy in Chirayinkil taluk and the Panagudi bit added to the Thovala pakuthy in Thovala taluk.

The area of the district as given by the Surveyor-General, India is 1491·8 sq. miles. The areas as recorded in 1931 and 1941 Census Reports are slightly different. The figures for the areas of the taluks furnished by the State Superintendent of Survey have been adjusted to reconcile them with the figures supplied by the Surveyor-General, India.

In regard to municipal towns, the figures for area have been furnished by the respective municipal commissioners. All localities where conservancy arrangements under the department of Public Health are in force have been treated as non-municipal towns at this census. The area figures for non-municipal towns have been collected from the departments of Public Health and Land Revenue.

In the case of a few villages, parts of which have been included in non-municipal towns, the area figures are only approximate.

The figures for area, houses and population have been distributed among the natural sub-divisions and these in turn into urban and rural classifications.

The following are the towns included in the urban area in this district:

Serial No.	*Name of town*	*Name of taluk in which the town is situated*
1	Trivandrum Corporation	Trivandrum
2	Nagercoil (M)	Agasthiswaram
3	Colachel (M)	Kalkulam
4	Padmanabhapuram (M)	Do.

A II VARIATION IN POPULATION DURING THIRTY YEARS 1921—1951

In the General Population Table A II, variation in the population of the State and of the districts has been traced for the period 1901—1951.

The present Table gives the population growth of the Trivandrum District taluk-wise only for the period 1921—1951. It has not been possible to consolidate taluk figures for 1901 and 1911, as detailed information regarding the adjustments required in the population figures for different taluks due to changes in their boundaries, could not be gathered from the Census Reports.

Column 9 of the Table gives the population at each census year as a percentage of the 1921 population.

A II VARIATION IN POPULATION DURING THIRTY YEARS, 1921-1951

A IV TOWNS CLASSIFIED BY POPULATION WITH VARIATION SINCE 1901

Towns in the district have been classified under the following six classes :

Class of town	*Population*
I	100,000 and over
II	50,000—100,000
III	20,000—50,000
IV	10,000—20,000
V	5,000—10,000
VI	Less than 5,000

The growth in the population of these towns has been traced from 1901 to 1951. In this Table (M) denotes municipal town.

A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

This Table gives the number of persons (including dependants) in each town who derive their Principal Means of Livelihood from the following livelihood classifications :—

Non-agricultural :

(a) Production other than cultivation

(b) Commerce

(c) Transport

(d) Other services and miscellaneous sources

Agricultural

(e) Non-cultivating owners of land ; agricultural rent receivers

(f) Cultivators and cultivating labourers

A V TOWNS ARRANGED TERRITORIALLY

B I LIVELIHOOD CLASSES AND SUB-CLASSES

The Table gives the distribution of the population in the district according to the Principal Means of Livelihood. All persons have been classified as self-supporting or non-earning dependants or earning dependants. The Principal Means of Livelihood of non-earning and earning dependant is the same as that of the self-supporting person on whom he depends.

The Principal Means of Livelihood has been given under two major heads, agricultural and non-agricultural. Each of these has been divided into four groups. The following are the eight groups:

(a) Agricultural classes

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land; agricultural rent receivers and their dependants

(b) Non-agricultural classes

1. Production other than cultivation
2. Commerce
3. Transport
4. Other services and miscellaneous sources

The figures have been given sex-wise. Under each category there is also the sub-division under rural and urban classifications. It has not been possible to give taluk figures; instead, figures for the census tracts in the district are given.

B1 LIVELIHOOD CLASSES AND SUB-CLASSES

B II SECONDARY MEANS OF LIVELIHOOD

In this Table, self-supporting persons and earning dependants in each of the eight Principal Means of Livelihood classes, are classified according to their secondary means of livelihood, if they have any. The classification for secondary means of livelihood is the same as that for Principal Means of Livelihood.

B II SECONDARY MEANS OF LIVELIHOOD

B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES BY DIVISIONS AND SUB-DIVISIONS

Self-supporting persons in non-agricultural classes—category (b) in the note to Table B II are classified in this Table under Employer, Employee and Independent worker and are distributed in the various divisions and sub-divisions of industries and services. In the Table, instead of the names of the divisions and sub-divisions, code numbers are used. A list of the divisions and sub-divisions of industries and services with their code numbers is given at the end of this note.

This Table, however does not include self-supporting persons of Livelihood Class VIII—Other services and miscellaneous sources—when sources of income fall under the following :—

(i) Persons living principally on income from non-agricultural property,
(ii) Persons living principally on pensions, remittances, scholarships and funds,
(iii) Inmates of jails, asylums, alms-houses and recipients of doles,
(iv) Beggars and vagrants,
(v) All other persons living principally on income derived from non-productive activity.

The fly leaf to this table gives the details of persons under the five categories mentioned above.

List of the Divisions and Sub-Divisions of Industries and Services

DIVISION 0 Primary Industries not elsewhere specified

0·1 Stock raising

0·11 Herdsmen and shepherds
0·12 Breeders and keepers of cattle and buffaloes
0·10 Breeders and keepers of other large animals including transport animals

0·2 Rearing of small animals and insects

0·21 Poultry farmers
0·22 Beekeepers
0·23 Silkworm rearers
0·24 Cultivators of lac
0·20 Rearers of other small animals and insects

0·3 Plantation industries

Owners, managers and workers in
0·31 Tea plantation
0·32 Coffee plantation
0·33 Rubber plantation
0·30 All other plantations but not including the cultivation of special crops in conjunction with ordinary cultivation of field crops

0·4 Forestry and wood-cutting

0·40 Planting, replanting and conservation of forests (including forest officers, rangers and guards)
0·41 Charcoal burners
0·42 Collectors of forests produce and lac
0·43 Woodcutters

0·5 Hunting (including trapping and game propagation)

0·6 Fishing

0·60 Fishing in sea and inland waters including the operation of fish farms and fish hatcheries
0·61 Gatherers of chanks and pearls
0·62 Gatherers of sea weeds, sea shells, sponges and other water products

DIVISION 1 Mining and quarrying

1·0 Non-metallic mining and quarrying not otherwise classified—including mining and quarrying of such materials as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt, bitumen

1·1 Coal mining—Mines primarily engaged in the extraction of anthracite and of soft coals such as bitumenous, sub-bitumenous and legnite

1·2 Iron ore mining

1·2 Metal mining except iron ore mining

1·31 Gold
1·32 Lead, silver and zinc
1·33 Manganese
1·34 Tin and wolfram
1·30 Other metallic minerals

1·4 Crude petroleum and natural gas

Oil well and natural gas, well operations (including drilling and oil or bitumenous sand operations

Stone-quarrying, clay and sand pits

Extraction from the earth of stone, clay, sand and other materials used in building or manufacture of cement

1·6 Mica

1·7 Salt saltpetre and saline substances

DIVISION 2 *Processing and manufacture—foodstuffs, textiles, leather and products thereof*

2·0 Food industries otherwise unclassified

2·01 Canning and preservation of fruits and vegetables
2·02 Canning and preservation of fish
2·03 Slaughter, preparation and preservation of meat
2·00 Other food industries

2·1 Grains and pulses

2·11 Hand pounders of rice and other persons engaged in manual dehusking and flour grinding
2·12 Millers of cereals and pulses
2·13 Grain parchers and makers of blended and prepared flour and other cereal and pulse preparations
2·10 Other processes of grains and pulses

2·2 Vegetable oil and dairy products

2·21 Vegetable oil pressers and refiners
2·22 Manufacturers of hydrogenated oils
2·23 Makers of butter, cheese, ghee and other dairy products

2·3 Sugar industries

2·31 Gur manufacture
2·30 Other manufactures and refining of raw sugar, syrup and granulated or clarified sugar from sugarcane or from sugar beets

2·4 Beverages

2·41 Brewers and distillers
2·42 Toddy drawers
2·43 Ice-manufacturers
2·40 Manufacture of aerated and mineral waters and other beverages

2·5 Tobacco

2·51 Manufacture of bidis
2·50 Manufacture of tobacco products (other than bidis) such as cigarettes, cigars, cheroots and snuff. Stemming, redrying and other operations connected with preparing raw leaf tobacco for manufacturing are also included

2·6 Cotton textiles

2·61 Cotton ginning, cleaning and pressing
2·62 Cotton spinning, sizing and weaving
2·63 Cotton dyeing, bleaching, printing, preparation and sponging

2·7 Wearing apparrel (except footwear) and made up textile goods

2·71 Tailors, milliners, dress makers, and darners
2·72 Manufacturers of hosiery, embroiderers, makers of crepe, lace and fringes
2·73 Fur dressers and dyers
2·74 Hat-makers and makers of other articles of wear from textiles
2·75 Manufacture of house furnishing of textiles
2·76 Tent makers
2·70 Makers of other made-up textile goods, including umbrellas

2·8 Textile industries otherwise unclassified

2·81 Jute pressing, baling, spinning and weaving
2·82 Woollen spinning and weaving
2·83 Silk reeling, spinning and weaving
2·84 Hemp and flax spinning and weaving
2·85 Manufacture of rayon
2·86 Manufacture of rope, twine, string and other related goods from cocoanut, alows, straw, linseed and hair
2·80 All other (including insufficiently described) textile industries, including artificial leather and cloth

2·9 Leather, leather products and footwear

2·91 Tanners and all other workers in leather
2·92 Cobblers and all other makers and repairers of boots, shoes, sandals and clogs
2·90 Makers and repairers of all other leather products

DIVISION 3 Processing and manufacture—metals, chemicals and products thereof

3·0 Manufacture of metal products otherwise unclassified

3·01 Blaksmiths and other workers in iron and makers of implements
3·02 Workers in copper, brass and bell metal
3·03 Workers in other metals
3·04 Cutlers and surgical and veterinary instrument makers
3·05 Workers in mints, die sinkers, etc.
3·06 Makers of arms, guns, etc., including workers in ordnance factories

3·1 Iron and steel (basic manufacture)

Manufacture of iron and steel, including all processes such as smelting and refining; rolling and drawing; and alloying and the manufacture of castings, forgings and other basic forms of ferrous metals

3·2 Non-ferrous metals (basic manufacture)

Smelting and refining, rolling, drawing and alloying and the manufacture of castings, forgings and other basic forms of non-ferrous metals

3·3 Transport equipment

3·31 Building and repairing of ships and boats
3·32 Manufacture, assembly and repair of railway equipment, motor vehicles and bicycles
3·33 Manufacture of aircraft
3·34 Coach builders and makers of carriages, palki, rickshaw, etc. and wheel wrights
3·30 Manufacture of all other transport equipment

3·4 Electrical machinery, apparatus appliances and supplies

3·41 Manufacture of electric lamps
3·42 Manufacture of electric fans and other accessories
3·43 Manufacture of electric wire and cable
3·40 Manufacture of electrical generating, transmission and distribution apparatus, electrical household appliances other than lights and fans; electrical equipment for motor vehicles, aircraft and railway locomotives and cars; communication equipment and related products, including radios, phonographs, electric batteries, X-Ray and therapeutic apparatus; electronic tubes, etc.

3·5 Machinery (other than electrical machinery) including engineering workshops

Engineering workshops engaged in producing machine and equipment parts

3·6 Basic industrial chemicals, fertiliser and power alcohol

3·61 Manufacture of basic industrial chemicals such as acids, alkali salts
3·62 Dyes, explosives and fireworks
3·63 Synthetic resins and other plastic materials (including synthetic fibres and synthetic rubber)
3·64 Chemical fertilisers
3·65 Power alcohol

3·7 Medical and pharmaceutical preparations

3·8 Manufacture of chemical products otherwise unclassified

3·81 Manufacture of perfumes, cosmetic and other toilet preparations
3·82 Soaps and other washings and cleaning compounds
3·83 Paints, varnishes and lacquers and polishes
3·84 Ink
3·85 Matches
3·86 Candle
3·87 Starch
3·80 Other chemical products

DIVISION 4 Processing and manufacture—not elsewhere specified

4·0 Manufacturing industries otherwise unclassified

4·01 Manufacture of professional scientific and controlling instruments (but not including cutlery, surgical or veterinary instruments)

4·02 Photographic and optical goods
4·03 Repair and manufacture of watches and clocks
4·04 Workers in precious stones, precious metals and makers of jewellery and ornaments
4·05 Manufacture of musical instruments and appliances
4·06 Stationery articles other than paper and paper products
4·07 Makers of plastic and celluloid articles other than rayon
4.08 Sports goods makers
4·09 Toy makers
4·00 Other miscellaneous manufacturing industries, including bone, ivory, horn, shell, etc.

4·1 Products of petroleum and coal

4·11 Kerosene and petroleum refineries
4·12 Coke ovens
4·10 Other manufactures of products from petroleum and coal

4·2 Bricks, tiles and other structural clay products

Structural clay products such as bricks, tiles etc.

4·3 Cement—cement pipes and other cement products

Manufacture of cement, cement pipes and cement concrete products

4·4 Non-metallic mineral products

4·41 Potters and makers of earthenware
4 42 Makers of porcelain and crockery
4·43 Glass bangles, glass beads, glass necklaces, etc.
4·44 Makers of other glass and crystal ware
4·40 Makers of other miscellaneous non-metallic mineral products

4·5 Rubber products

4·6 Wood and wood products other than furniture and fixtures

4·61 Sawyers
4·62 Carpenters, turners and joiners
4·63 Veneer and plywood makers, match veneer and splint makers
4·64 Basket makers
4·60 Other industries of woody materials including leaves, but not including furniture or fixtures

4·7 Furniture and fixtures

Manufacture of household, office, public building, professional and restaurant furniture; office and store fixtures, screens, shades, etc., regardless of material used

4·8 Paper and paper products

Manufacture of paper and paper board and articles of pulp, paper and paper board

4·9 Printing and allied industries

4·91 Printers, lithographers, engravers
4·92 Bookbinders and stitchers

DIVISION 5 Construction and utilities

5·0 Construction and maintenance of works otherwise unclassified

5·1 Construction and maintenance—Buildings

5·11 Masons and bricklayers
5·12 Stone-cutters and dressers
5·13 Painters and decorators of house
5·10 Other persons engaged in the construction or maintenance of buildings other than buildings made of bamboo or similar materials

5·2 Construction and maintenance—road, bridges and other transport works

5·3 Construction and maintenance—telegraph and telephone lines

5·4 Construction and maintenance operations—irrigation and other agricultural works

5·5 Works and services—electric power and gas supply

5·51 Electric supply
5·52 Gas supply

5·6 Works and services—domestic and industrial water supply

5·7 Sanitary works and services—including scavengers

DIVISION 6 Commerce

6·0 Retail trade otherwise unclassified

6·01 Hawkers and street vendors otherwise unclassified

6·02 Dealers in drugs and other chemical stores

6·03 Publishers, booksellers and stationers

6·00 General storekeepers, shopkeepers and persons employed in shops otherwise unclassified

6·1 Retail trade in foodstuffs (including beverages and narcotics)

6·11 Retail dealers in grain and pulses; sweetmeats, sugar and spices, dairy products, eggs and poultry; animals for food; fodder for animals; other foodstuffs, vegetables and fruits

6·12 Vendors in wine, liquors, aerated waters and ice in shops

6·13 Retail dealers in tobacco, opium and ganja

6·14 Hawkers and street-vendors of drink and foodstuffs

6·15 Retail dealers in pan, bidis and cigarettes

6·2 Retail trade in fuel (including petrol)

6·21 Petroleum distributors

6·20 Retail dealers (including hawkers and street-vendors) in firewood charcoal, coal, cowdung and all other fuel except petroleum

6·3 Retail trade in textile and leather goods

Retail trade (including hawkers and street-vendors) in piece goods, wool, cotton, silk, hair, wearing apparel, made up textile goods, skin, leather, furs, feathers, etc.

6·4 Wholesale trade in foodstuffs

Wholesale dealers in grains and pulses, sweetmeats, sugar and spices; dairy products, eggs and poultry, animal for food, fodder for animals, other foodstuffs, wholesale dealers in tobacco, opium and ganja

6·5 Wholesale trade in commodities other than foodstuffs

6·6 Real estate

House and estate agents and rent collectors except agricultural land

6·7 Insurance

Insurance carriers and all kinds of insurance agents and other persons connected with insurance business

6·8 Moneylending, banking and other financial business

Officers, employees of joint stock banks and co-operative banks, munims, agents or employees of indigenous banking firms, individual money lenders, exchangers and exchange agents, money changers and brokers and their agents

DIVISION 7 Transport, storage and communications

7·0 Transport and communications otherwise unclassified and incidental services

7·1 Transport by road

Owners, managers and employees connected with mechanically driven and other vehicles (excluding domestic servant) palki, etc., bearers and owners, pack elephant, camel, mule, ass and bullock owners and drivers, porters, and messengers, persons engaged in road transport not otherwise classified, including freight transport by road, the operation of fixed facilities for road transport such as toll roads, highway bridges, terminals and parking facilities

7·2 Transport by water

Owners and employees, officers, mariners etc., of ships plying on the high seas, *ships and boats plying on inland and coastal waters*, persons employed in harbours, docks, rivers and canals, including pilots, ship brokers

7·3 Transport by air

Persons concerned with airfields and aircraft other than construction of airfields and air ports

7·4 *Railway transport*

Railway employees of all kinds except those employed on construction works

7·5 *Storage and warehousing*

The operation of storage facilities such as ware-houses, cold storage, safe deposits when such storage is offered as an independent service

7·6 *Postal services*

7·7 *Telegraph services*

7·8 *Telephone services*

7·9 *Wireless services*

DIVISION 8 Health, education and public administration

8·1 *Medical and other health services*

8.11 Registered medical practitioners
8·12 Vaids, hakims, and other persons practising medicine without being registered
8·13 Dentists
8·14 Midwives
8·15 Vaccinators
8·16 Compounders
8·17 Nurses
8·10 All other persons employed in hospitals or other public or private establishments rendering medical or other health services but not including scavengers or other sanitary staff

8·2 *Educational services and research*

8·21 Professors, lecturers, teachers and research workers employed in universities, colleges and research institutions

8·22 All other professors, lecturers and teachers

8·20 Managers, clerks and servants of educational and research institutions, including libraries and museums, etc.

8·3 *Army, Navy and Air Force*

8·31 Army
8·32 Navy
8·33 Air Force

8·4 *Police (other than village watchmen)*

8·5 *Village officers and servants, including village watchmen*

8·6 *Employees of municipalities and local boards (but not includiug persons classified under any other division or sub-division)*

8·7 *Employees of State Governments (but not including persons classifiable under any other division or sub-division)*

8·8 *Employees of the Union Governments (but not including persons classifiable under any other division or sub-division)*

8·9 *Employees of non-Indian Governments*

DIVISION 9 Services not elsewhere specified

9·0 *Services otherwise unclassified*

9·1 *Domestic services (but not including services rendered by members of family households to one another)*

9·11 Private motor drivers and cleaners
9·12 Cooks
9·13 Gardeners
9·10 Other domestic servants

9·2 *Barbers and beauty shops*

Barbers, hair dressers and wig makers, tatooers, shampooers, bath houses

9·3 *Laundries and laundry services*

Laundries and laundry services, washing and cleaning

9·4 *Hotels, restaurants and eating houses*

9·5 *Recreation services*

Production and distribution of motion pictures and the operation of cinemas and allied services, managers and employees of theatres, opera companies, etc., musicians, actors, dancers, etc., conjurers, acrobats, recitors, exhibitors of curiosities and wild animals, radio broadcasting studios

9·6 *Legal and business services*

9·61 Lawyers of all kinds, including qazis, law agents and mukhtiars

9·62 Clerks of lawyers, petition writers, etc.

9·63 Architects, surveyors, engineers and their employees (not being State servants)

9·64 Public scribes, stenographers, accountants, auditors

9·65 Managers, clerks, servants and employees of trade associations, chamber of commerce, board of trade, labour organization and similar organisation of employers and employees

9·7 *Arts, letters and journalism*

9·71 Artists, sculptors and image makers

9·72 Authors, editors and journalists

9·8 *Religious, charitable and welfare services*

9·81 Priests, ministers, monks, nuns, sadhus, religious mendicants and other religious workers

9·82 Servants in religious edifices, burial and burning grounds, pilgrim conductors and circumcisors, etc.

9·83 Managers and employees of organisations and institutions rendering charitable and other welfare services

Tvm.

C I HOUSEHOLD SIZE AND COMPOSITION

(Estimates only)

This Table has been prepared from a four percent. sample of households in the National Register of Citizens. Estimates for the whole District with urban—rural break-up were calculated from the figures obtained from the sample.

The figures are arranged under two broad groups :

(i) Size of households;

(ii) Composition of households

In (i) households have been called

(a) " Small " if the number of inmates is 3 or less

(b) " Medium " if the number of inmates is between 4 and 6

(c) " Large " if the number of inmates is between 7 and 9

(d) " Very large " if the number of inmates is 10 or more

Under (ii), the inmates in a household are described under

Relationship to the head of the household

AGE GROUPS

Tables C II, C III, C IV and C V

These Tables have not been prepared for the entire population. At the time of sorting, a ten percent. sample of slips for every village and ward (in municipal towns) was extracted on a purely random basis and the slips in the sample were alone used for these tables.

Based on the sample figures, estimates for the Districts have been calculated.

C II LIVELIHOOD CLASSES BY AGE GROUPS

(Estimates only)

This Table gives the estimated figures for the District under the eight Livelihood Classes in broad age groups.

C II LIVELIHOOD
(Esti

Livelihood

Age group	All classes			Agricultural classes: Persons (including their dependants) who derive their: 1. Cultivators of land wholly or mainly owned and their dependants		2. Cultivators of land wholly or mainly unowned and their dependants		3. Cultivating labourers and their dependants

D I LANGUAGES

(i) Mother-tongue

This Table gives the distribution of the population according to their returns for mother-tongue. The mother-tongue of infants has been treated as the same as that of their mothers. The languages returned are listed below: —

1 Malayalam
2 Tamil
3 Telugu
4 Hindi
5 Gujarathi
6 Canarese
7 Konkani
8 Marathi

D III SCHEDULED CASTES AND SCHEDULED TRIBES

This Table gives the figures for Scheduled Castes and Scheduled Tribes. Hindu communities listed below fall under the category "Scheduled Castes" in this State.

(i) List of Scheduled Castes

1	Ayyanavar	16	Panan
2	Bharatar	17	Paravan
3	Chakkiliyan	18	Parayan (Sambavar)
4	Domban	19	Pathiyan
5	Eravalan	20	Perumannan
6	Kakkalan	21	Pulayan
7	Kanakkan	22	Thandan
8	Kavara	23	Ulladan
9	Kootan (Koodan)	24	Uraly
10	Kuravan	25	Vallon
11	Mannan	26	Valluvan
12	Nayadi	27	Vannan
13	Padannan	28	Velan
14	Pallan	29	Vetan
15	Palluvan	30	Vettuvan

The list of Scheduled Tribes for the State is given below:—

1	Hill pulaya	9	Malayarayan
2	Kadan	10	Mannan
3	Kanikkaran	11	Muthuvan
4	Kochuvelan	12	Palleyan
5	Mala Arayan	13	Palliyar
6	Mala Pandaran	14	Ulladan (Hill dweller)
7	Mala Vedan	15	Uraly
8	Malayan	16	Vishavan

DISTRICT CENSUS HANDBOOK

TRIVANDRUM

Part III

VILLAGE STATISTICS

VILLAGE STATISTICS

The details presented in the Tables on Village Statistics have been compiled from census data, and reports from taluk census officers, supervisors and enumerators. The smallest area for which separate figures have been given is the village or ward. Information gathered for each village or ward falls under the following heads :—

(i) Name and code number
(ii) Area
(iii) Dwelling houses
(iv) Institutions
(v) General information
(vi) Population

(i) *Name and code number.* Just as every plot of surveyed land has been given a survey number, every unit of area covered by this census has been assigned a code number. The four districts in the State have been numbered 1, 2, 3 and 4, Trivandrum being 1, Quilon 2, Kottayam 3 and Trichur 4. Within each district, the taluks have been serially numbered, in relation to geographical position, as 1-1, 1-2, etc. Within each taluk, the pakuthies (in Travancore) and proverthies (in Cochin) are numbered serially. Within each pakuthy, the karas are once again given numbers. Thus the code number of a kara will involve 4 numerals, the first relating to the district, the second to the taluk, the third to the pakuthy and the fourth to the kara.

The municipal towns have similar code numbers. Within the district, the municipal towns are given Roman numerals. Within each municipality, the wards are also assigned code numbers.

It is hoped that in course of time, code numbers will come into common use.

(ii) *Area.* The area figures for each kara have been obtained from the Tahsildars while those for wards in municipal towns and portions of karas in non-municipal towns have been furnished by the municipal and public health officers. These figures are only approximate as correct area records for such divisions of the pakuthy do not exist.

For each kara, figures for areas under wet-land, dry-land and waste-land are also given. These figures are also only approximate.

(iii) *Dwelling houses.* The figures under this head give the number of dwelling houses in each kara or ward.

(iv) and (v) *Institutions and general information.* Information relating to these items was collected by each enumerator in schedules supplied for the purpose.

Though not exhaustive, it is claimed that details on most of the important aspects of social life in each locality are made available.

(vi) *Population.* The total population of each area, the number of literates and the number of males and females in each of the eight livelihood classes are given.

The following abbreviations have been used :—

L, M, or H, immediately following the name of a pakuthy or proverthy denotes the natural subdivision of the State in which it is situated—lowland, midland or highland respectively.

T	stands for	..	temple
