PREFACE

The Registrar-General, India, recommended to State Governments, the publication of District Census Handbooks containing 1951 Census data for the districts and such other information as may be of general interest. The Government of Travancore-Cochin accepted the recommendation and sanctioned in Government Order No. RM. 3-3468|51|RD dated 23-5-1951 the publication of four District Census Handbooks for the State. The present volume is published in pursuance of this order.

The Handbook is divided into three parts: Part I contains a short sketch of the district and the people. Part II embodies the Census Tables for the district. For purposes of comparative study, three of the most important State Tables—A 1. Area, Houses and Population; A 2. Variation in Population during 50 years (1901-1951) and Economic Table—Livelihood Classes—have been placed at the beginning of this part. Each Table is preceded by a short note explaining its contents. Part III is devoted to Village Statistics. An attempt has been made here to incorporate all salient features of the villages in these pages. An index of place-names has been appended to this part to facilitate ready reference.

It is hoped that these Handbooks will serve as a frame for future studies and that its scope and coverage will be increased from time to time.

This work would not have been possible but for the co-operation and assistance of the State Government at every stage of its preparation. Almost all departments have helped me with their contributions. I wish to record my acknowledgement in particular to the departments of Agriculture, Public Health, Labour, Public Instruction, Electricity, Telephones, Forest and Geology.

The Tahsildars and Municipal Commissioners in the State have borne the brunt of the work involved in the collection of facts and figures contained in the Handbook. To them, I tender my special thanks.

Other agencies who have been of great assistance are the Travancore Devaswom Board, Indian Central Cocoanut Committee, Indian Rubber Board and Cochin Harbour Administration. It is a pleasure to acknowledge my thankfulness to them.

The printing of the Handbook was done by the Government Central Press, Trivandrum at a time when the Press was working at full pressure on other urgent and voluminous items of printing for Government. It is therefore, with very great pleasure, that I place on record my sense of gratitude to and appreciation of the untiring efforts of the Superintendent and his assistants in bringing out the Handbook.

It is only fair that I add a word about my office staff who were patiently at work evolving step by step the Tables from the large mass of data collected at the census. Checking and cross-checking of the Tables has been a severe task; so also has been the typing of the Tables. I wish to express my feelings of gratefulness to one and all of my assistants for their devoted labours in this behalf. I must single out my Personal Assistant, Sri K. Parameswara Menon, M. A., for the unfailing help he gave me at each stage of the work. He unstintedly shared with me the responsibility in producing the Handbook and I wish to express my appeciation of the work done by him.

I shall be failing in my duty if I do not place on record my gratefulness to Sri R. A. Gopalaswami, I. C. S., Registrar-General, for the guidance and stimulating suggestions received from him in this work.

U. SIVARAMAN NAIR

Office of the
Superintendent of Census Operations,
Trivandrum, 19th April 1952.

DISTRICT CENSUS HANDBOOK

QUILON

Part I

A SHORT SKETCH

A. DISTRICT AND PEOPLE

1. INTRODUCTORY

The Quilon district has an area of 2729·6 square miles, which is 29·8 per cent of the total area of the State. It has a sea-coast approximately 75 miles long. Alleppey and Quilon are the two important ports on this coast. The headquarters of the district is Quilon.

The district is divided into twelve taluks. The names, headquarters, relative areas and the percentage distribution of population in these taluks are as follows:—

Name of taluk	Headquarters	Percentage	
		Area	Population
Quilon	Quilon	5·38	13·14
Kottarakkara	Kottarakkara	7·75	8·27
Pathanapuram	Punalur	15·12	5·68
Shenkotta	Shenkotta	4·71	2·16
Pathanamthitta	Pathanamthitta	33·91	8·32
Kunnathur	Adur	5·48	6·11
Karunagapally	Karunagapally	3·24	8·48
Karthikapally	Harippad	2·71	6·04
Mavelikkara	Mavelikkara	4·08	7·65
Thiruvalla	Thiruvalla	7·73	14·95
Ampalapuzha	Alleppey	5·37	10·78
Sherthala	Sherthala	4·52	8·42

The population of the district according to 1951 Census is 3,026,822; this forms 32·6 per cent of the State population.

2. PHYSICAL FEATURES

Mountains

The Western Ghats which separate the district from the Madras State consist of several ridges and hill plateaus which diminish in altitude towards the coast. The chief hill ranges in this district are Kulathupuzha hills, Ariyankavu hills, Achankoil hills, Sivagiri hills and Peermede hills.

The Courtallam peak (5262 ft.) is in the Kulathupuzha hills and the Chittar famous for the Courtallam falls, has its source here. The Pullangudi peak (6329 ft.) stands on the northern edge of the Achankoil hills. The Sivagiri peak (5743 ft.) is the highest point in the Sivagiri hills. The peaks of Shetur (5768 ft.) and Kulamgudam (6617 ft.) are in the Peermede hills.

Two passes across the Ghats connect this district with the adjacent Thirunelveli district in the Madras State. The Ariyankavu pass is the principal pass into the Thirunelveli district. It has an easy descent from the mountains to the open country to the east of the ghats.

The Mekkarai pass lies north of Puliyara and connects Achankoil with Pumbliyapattom and Shenkotta. Communication through this pass is not so easy as at Ariyankavu.

Rivers

There are three important rivers in this district. The Ithikkara river (length 30 miles) rises in the hills near Madathurakkani and flowing through Pathanapuram, Kottarakkara and Quilon taluks, falls into the Paravur lake.

The Kallada river is formed by the union of five large streams and flows through the taluks of Pathanapuram, Kunnathur, Kottarakkara and Quilon. The main branch is formed by numerous streams that rise on the elevated plateau stretching from the Alvarkurichi peak to Chemmunji. Flowing west, it is joined by several small streams and after leaving the Kulathupuzha valley proper and running 5 miles, passes the Kulathupuzha village situated on its left bank. Here the river is about 80 yards wide and never gets dry even in hot weather. Three miles lower down

it is precipitated over the Minmutti cataract, the water rushing down with immense velocity. It is then joined by the Chenthroni and Kalduritty rivers. Passing Ottakkal where it pours over another cataract, the river runs for about 10 miles in a west-north-westerly direction and leaves the forest area 3 miles above the town of Punalur. Turning north and bending a little north-west, it passes Pathanapuram and 2 miles below Punalur, it is joined by the Chaliakkara Ar. It then flows in a westerly direction and then south-west until it falls into the Ashtamudi lake, a little north of Quilon, by several mouths. Its length is 70 miles of which 25 miles are navigable for boats.

The Pampa or Ranni river is formed by the junction of three main streams, Pampa, Azhuta, and Kakkad Ar. The Pampa which rises from the hills north of Pulachimala in the Pathanamthitta taluk is joined by the Azhutha issuing from the Peermede plateau ; the combined river (called the Valiya Ar) flows westward for six miles, and at Perunthenaruvi falls over a height of 90 ft. At this stage, the river is known as the Perunthenaruvi. Lower down it is joined by the Kakkad Ar and a few miles east of Ranni, by the Kallar. The river, now called the Ranni, runs west for 30 miles when it is joined by the Manimala river. Eight miles lower down it receives another tributary, the Achankoil river (Kulakkada). After a course of 20 miles, the Pampa flows into the Vembanad lake, through a number of distributaries. The river is 90 miles long, of which 45 miles are navigable. The Achankoil and Manimala rivers are two other tributaries of Pampa.

The Achankoil (Kulakkada) river rises from the Achankoil hills, and flowing through the taluks of Kunnathur, Mavelikkara, Thiruvalla and Karthikapally joins the Pampa river near Viyapuram. It is 70 miles long and is navigable for 40 miles. It also affords facilities for irrigation.

The Manimala river rises from the hills near Peermede in the Kottayam district. It enters the Thiruvalla taluk near Manimala and joins the Pampa river. It is 62 miles long.

Lakes or Backwaters

The coast is fringed with lakes or backwaters. Canals have been constructed to link up the lakes. The Paravur lake, though small, is deep and dangerous, as it is very close to the sea and is exposed to sudden land breezes. It has a bar which opens in the rainy season. The Ithikkara river flows into this lake.

The Ashtamudi lake is so called because it branches off into eight creaks. The extreme length and breadth of this lake are 10 and 9 miles respectively ; the area is however only 20 square miles. There is an outlet to the sea known as Neendakara bar ; an iron bridge, 1336 ft.. long has been constructed across the lake near Neendakara. Owing to the beauty of this lake and of its surroundings, it is known as the 'Loch Lomond' of Travancore.

Kayamkulam lake is 19 miles long, with an average breadth of a mile and a half, and an area of about 20 sq. miles. It is very shallow ; the Kayamkulam bar, its outlet to the sea is always open.

The Vembanad lake stretching from Alleppey to Cochin is 52 miles long and 9 miles broad at certain places. The average breadth of the lake is only 2 miles ; its total area is 79 sq. miles. It is deep in some parts and rather shallow in others. In the centre of the lake there is an island called Pathiramanel with cocoanut plantations. The Pampa, Muvattupuzha and Minachil rivers empty themselves into this lake. The shallow reaches of this lake have been extensively reclaimed in recent years for rice cultivation.

The tides, though the rise is small, ranging from 18 inches to 36 inches facilitate water-borne traffic over shallow reaches of these lakes.

There is also a small fresh-water lake at Sasthamkottah in Kunnathur taluk.

Coastline

The sea-coast is flat and unbroken. At Purakkad, Thrikunnapuzha and Neendakara, the sea has occasionally made inroads upon the coast. The mud banks near Alleppey are an interesting phenomenon ; they lie along the beach but extend some miles seaward and afford smooth-water anchorage for ships during the monsoon. They are not stationary but move along the coast within a range of 12 to 15 miles from Alleppey. It is believed that there is a subterranean passage of water into the sea from the lake and river system behind the Alleppey-Purakkad coast, that the discharge of the mud is due to hydraulic pressure from the backwater and that the smoothening influence of the water in the mud banks is due to the oil contained in it.

The chief harbours in this district are Alleppey and Quilon.

Natural sub-divisions

From the mountains in the east, the land-slopes to the west in a series of hills and valleys traversed by several rivers. Based on this physical configuration the district can be divided into three natural sub-divisions, the mountainous highland, the flat coastal strip (lowland) and the undulating country in between them (midland). The lowland occupies 21·4 per cent. the midland, 35·0 per cent and the highland, 43·6 per cent of the total area of the district.

3. GEOLOGY

The geological formation of this district has the following sequence :

(i) recent deposit—marine or alluvial sands,

(ii) sub-recent deposits—raised beaches and older alluvium,

(iii) Varkalai formations,

and (iv) crystalline rocks.

The crystalline rocks consist mainly of older gneisses, charnockite suite and granite-pegmatites.

Economic minerals

The beach sands between the Neendakara and Kayamkulam bars, are rich in heavy minerals, monazite, ilmenite, rutile, zircon and sillimanite. Four factories are now engaged in the processing of these mineral sands.

At Kundara on the shores of the Ashtamudi lake, Government Ceramic Concerns are mining and refining chinaclay and manufacturing porcelain-ware. In the Quilon taluk, there are good deposits of clay, quite suitable for the manufacture of bricks and roofing tiles and about a dozen factories engaged in this industry, are located in the neighbourhood of Quilon.

In the Pathanapuram taluk, some phologopite mica is mined.

4. CLIMATE, RAINFALL AND VEGETATION

Climate

The climate is moist and hot in the coast ; in the highlands it is cooler and drier, the temperature varying with the elevation. The diurnal variation of temperature in the coastal stations is small, seldom exceeding 10 degrees. The plains in Shenkotta on the eastern side of the Western Ghats, do not share the climate prevailing on this side of the ghats. Here, rainfall is less ; the climate is hotter and less humid. The dry season (so called because during this season, the air contains the least moisture) lasts from December to February. It is characterised by moderate humidity, occasional rains and absence of thunderstorms. The days are fairly hot but the nights are chilly. The hot season lasts from March to May. Fairly high temperature, occasional rains and frequent thunder storms are characteristics of these months. On the coast, the heat is moderated by sea breeze, but in the midland regions, it is excessive.

Rainfall

The south-west monsoon begins in June and lasts till September ; the skies are cloudy, the air is very humid and there is heavy rain with gusts and squalls of varying intensity. The month of maximum rainfall in this district is June. The monsoon weakens about the middle of August ; and the latter part of August and September witness only intermittent rain. The retreating south-west monsoon period includes the months of October and November. The rains begin towards the end of October and last during November. During this season the rains are generally preceded by thunder storms. By the beginning of December, the rains become less frequent and dry weather sets in. The distribution of rainfall is marked by two features—the gradual increase in rainfall on the coast from the south to the north and the steady increase in rainfall from the coast towards the mountains. The gap in the Western Ghats at Shenkotta influences rainfall markedly ; at Shenkotta on the eastern side of the Ghat the rainfall is only 21·5 inches. while at Ariyankavu on this side of the Ghats it is 58·5 inches. In this district, the north-east monsoon gives only about one-third of the total rainfall.

The two tables given below contain statistics of rainfall and rainy day in this disirict :

Forests

The major reserves are of the deciduous and ever-green types. The dominant species found in the ever-green forests are Hopea parviflora, Vateria indica, Myristica species and Dipterocarpus indicus. In the deciduous area Terminalai paniculata, Lagerstromia lanceolata and Ptero-carpus marsupum are commonly seen. There is also a large teak plantation in this district. Rattan, bamboos and reeds are found in plenty and collection of reeds is made on a large scale to meet the requirements of Punalur Paper Mills.

5. AGRICULTURE

Soils

The soils in the coastal tracts consist mainly of pure crystalline sand. The swamp paddy lands in the back-waters areas in Mavelikkara, Karthikapally, Ampalapuzha, Sherthala, and Thiruvalla taluks contain clay soils of different depths mixed with varying proportions of organic matter in different stages of decay. The soils in the valleys and deltas of rivers are alluvial in nature and consists mostly of fine silt. The soils in the hills are loamy in nature with great admixture of humus. 'Kari' or peaty marsh-soil occurs in Purakkad (extent 10,000 acres) in Ampalapuzha taluk and in Thuravur (extent 5,000 acres) in Sherthala taluk.

The soils in this district are generally deficient in nitrogen and phosphorous while the sands along the coast are deficient in potash also. Lime deficiency is a general defect in this district and is particularly marked in the punja lands of Kuttanad.

The results of the analysis of representative samples of soil from paddy lands in various taluks in the district are given below :

	Reaction (Ph)	Nitrogen (%)	Potash (K_2O)	Phosphoric acid (P_2O_5) %	Lime (CaO) %
1. Shenkotta (Samburvadakara)	8·1	0·06	0·28	0·03	0·42
2. Kunnathur (Adur)	6·2	0·12	0·15	0·05	0·04
3. Karunagapally (Kayamkulam)	6·8	0·04	0·03	0·02	0·08
4. Karthikapally (Harippad)	6·6	0·05	0·06	0·03	0·05
5. Mavelikkara (Thazhakara)	5·2	0·25	0·10	0·08	Trace
6. Thiruvalla (Karakkal)	5·5	0·18	0·31	0·08	0·05
7. Ampalapuzha (Monkompu)	5·8	0·22	0·34	0·03	0·17
8. Ampalapuzha (Purakkad-kari)	4·0	0·65	0·35	0·02	0·32
9. Sherthala (Sherthala)	6·5	0·02	0·06	0·04	0·06

Irrigation

Almost all the rivers in the district get dry during the hot months. Tanks and wells are the chief source of irrigation. In Shenkotta, there are a number of large tanks. Besides local water-lifting appliances like picottah, wooden spoons, and water baskets, small pumps worked by oil engines and electric power are installed at some places in the central taluks.

Implements

The implements chiefly used are the wooden plough and spades of different patterns to suit the different soils. A few tractors are used in the Kuttanad punja fields and in the estates.

Manures

The locally—used manures, green leaf, cattle-dung, and ashes are not available in sufficient quantities and are becoming rare. Municipal compost in the preparation of which all the municipalities are taking interest, is finding increasing favour amongst the agriculturists. There is also a large demand for fertilisers like oilcakes, bonemeal, ammonium sulphate, muriate of potash etc.

Principal crops

Rice and cocoanut are the chief crops in the lowland; plantain and arecanut are also grown. These crops are cultivated in the valleys in the mid-land region also. Betel vine is cultivated in certain areas in the Sherthala and Mavelikkara taluks. Tapioca, cashewnut, ginger and pepper are the principal crops in the mid-land. Robusta coffee is cultivated in many gardens in this region. Sugarcane is cultivated on the banks of the Pampa river in the Thiruvalla and Pathanamthitta taluks.

The plantation crops in this district are rubber and tea.

A variety of pulses—black gram, green-gram, horse-gram—and oil seeds like gingelly are grown in garden lands and paddy fields in the lowland and midland. Yams, sweet potatoes and various kinds of tuberous vegetables are also grown. Pineapple, plantain, mango and jack are the important fruits grown in the district.

The following table gives the areas under principal crops :—

Area of taluks and area under principal crops

	Area in sq. miles				Area in sq. miles under principal crops		
Name of Taluk	Total	Occupied	Wet land	Dry land	Paddy	Cocoanut	Tapioca
1	2	3	4	5	6	7	8
District	**2729·6**	**1389·5**	**389·6**	**999·9**	**374·7**	**420·1**	**368·7**

The areas under the other important crops in the district are :—

Rubber	56	Square miles
Tea	12	„ „
Pepper	30	„ „

Punja cultivation

The punja system of rice cultivation in Kuttanad deserves notice for "the singular struggle of human industry against the force of nature". Shallow regions of backwaters in the Ampalapuzha, Changanacherry and Kottayam taluks have been reclaimed by bunding during the last 100-odd years for rice cultivation. These lands now cover about 150,000 acres. In some tracts, cultivation is carried on only once in two years, in other areas, the practice is to cultivate the field for two or three consecutive years and then allow it to lie fallow for a year. Except during the cultivation season, the fields are under water varying in depth from 2 to 9 ft.

Cultivation operations begin in September-October with the raising and repairing of the bunds, enclosing the fields. The pumping out of water starts in October-November depending on the duration of the north-east monsoon. The pumping is done mostly by power-driven centrifugal pumps. The pumping and sowing operations are generally finished in November-December, though in the higher regions, the sowing season extends till December-January. As the harvest has to be gathered before the onset of the rains in April, short-duration varieties of rice, requiring about 90 to 100 days are selected. The harvest season extends from mid-February to about mid-April. The average yield is 10-fold but higher yields are secured with the use of fertilisers and improved methods of cultivation. After harvest, the fields are ploughed, taking advantage of occasional rains to soften the soil. With the outbreak of the south-west monsoon, the bunds are cut open in a few places and the fields get flooded. The alluvial silt brought down by the flood waters is deposited in the fields, which remain submerged under water till the next cultivating season.

Plant diseases and pests

Plant diseases and plant pests often do much havoc. The rice-swarming caterpillar is a constant menace in the Kuttanad area. In other areas, paddy is often attacked by the paddy-borer. The chief diseases of the cocoanut palm are bud rot, stem bleeding, leaf-disease, and root-disease. Plantain cultivation has been affected by the bunchy-top disease.

Live-stock

The local cattle are diminutive in size, poor in milk and in working capacity; cattle from Thirunelveli and Coimbatore are therefore imported every year for draught purposes. Efforts to improve the stock by the import of other breeds, particularly the Red Scindhi have been going on for some time. The poultry industry is becoming more and more popular.

One vital factor has however to be emphasized *viz.*, the insufficiency of the local production of food. The area cultivated with rice, the staple food is estimated at 375 sq. miles. Even with seasonable rains and other favourable conditions the yield will suffice only for less than six months in the year for the present population.

Inadequacy of production

Improvement of agricultural production can be achieved only by the introduction of improved methods of cultivation and increased facilities for irrigation. One of the chief obstacles to raising the efficiency of agriculture is the existence of uneconomic holdings. Owing to excessive sub-division and fragmentation, 73 per cent. of the wetland plots are less than 1 acre in extent; dry land is much more fractionalised. The size of average family holdings is also small. According to a survey conducted by the Government in 1941, it was 3·13 acres in the lowland, 2·94 in the midland, and 5·76 acres in the highland and 3·23 acres for the State as a whole. Judging from average family income and expenditure figures, most of these holdings were found to be distinctly uneconomic. Soil erosion and agricultural indebtedness are also major problems.

Fisheries

The chief marine fishes in this district are sardine, mackerel, butterfish, chooda, horse-mackerel; small quantities of seerfish, ribbonfish and perches are also caught. Of these sardine, butterfish and ribbon fish are seasonal occurring only for two to four months in the year. Sea prawns occur at Purakkad.

The chief fishing centres in the district are Paravoor, Wadi, Thangasseri, Neendakara, Puthenthurai, Pandarathuruthu, Cheriyazheekkal, Azheekal, (Kayamkulam), Arattupuzha, Thrikunnapuzha, Purakkad, Kakkazham, Alleppey, Thumboli, Sherthala and Panavally.

The inland fisheries in the district consist of backwaters, rivers, streams and tanks. The chief inland fishes are prawn, mullet, bhekti, milk fish and pearl spot. The most important fresh-water fishes are carps, cat fishes and snake heads.

There is a Government fish farm at Ayiramthengu. Burma is the chief market for the dried prawns exported from this district; other dried fish goes to Madras and Ceylon.

6. LAND TENURES

Land Tenures

Till a century ago, the State presented an interesting (though from the point of view of economic development, far too complex) system of land tenures derived from the peculiar conditions of its historical development. They have been considerably simplified by several pieces of land-tenure legislation.

The chief categories of tenure in this district may be broadly classified :—

I (a) Pandaravaka. These (comprising three-fourths of the total area of the State and including the vast majority of holdings) are lands belonging to the Sirkar or government. All tenants are now practically owners of their land, subject to payment of tax.

(b) Kandukrishi lands. They are the home-farm lands of the Maharaja of Travancore ; in this district the Ampalapuzha taluk contains some Kandukrishi lands.

In all government lands, the system of land-tenures is based on the ryot-wari principle, *i. e.* direct settlement with individual ryots.

II Jenmom lands. They are the absolute private property of the owners. Under the Jenmi kudiyan Acts, ryots holding jenmom lands have been given fixity of tenure, the dues to the jenmi being collected and paid to them by government, the collection being made along with the land-tax.

The chief systems of tenancy under which tenants hold lands owned by others are :—

I—Verumpattom (venpattom). They are tenants who hold lands on lease for periods and on conditions, stated in the contract ; they are liable to be evicted under the conditions of the contract.

II—Varamdars (Pankuvaramdars). They are people who raise crops on agricultural lands in partnership with the owners of the land ; the conditions of partnership vary in different localities.

III—Kudikidappukar. They are persons who were previously allowed by the owners of the land to occupy a small portion of it, generally to put up a small house to live in and watch the land or work on it.

IV—Otti (Mortgages). Tenancy under this head take different forms in different regions.

The question of giving fixity of tenure to cultivating tenants is under consideration. It may be stated that the ratio of cultivating tenants to non-cultivating owners of land in this district is 6 : 1.

7. COMMUNICATIONS

The lowland and midland areas in this district are served by numerous roads. The following table gives the length of roads and canals in the different taluks :

Length of Roads and Canals (in miles)

Name of Taluk		Main Roads	Planter's Roads	Village Roads	Canals
Total	..	1173·25	13·12	631·51	225·29
Quilon	..	108·85	..	69·58	33·00
Kottarakkara	..	121·60	..	76·43	12·00
Pathanapuram	..	125·81	..	54·71	12·00
Shenkotta	..	63·84	6·00	10·37	..
Pathanamthitta	..	108·00	7·12	68·36	1·00
Kunnathur	..	67·09	..	61·63	10·06
Karunagapally	..	52·33	..	51·12	27·12
Karthikapally	..	25·37	..	31·50	30·00
Mavelikkara	..	66·75	..	67·44	3·00
Thiruvalla	..	277·36	..	48·31	30·00
Ampalapuzha	..	61·50	..	32·75	45·75
Sherthala	..	94·75	..	59·31	21·36

Transport

Motor traffic is heavy along most of these roads. The State Transport Department has organized regular service between most of the important places in the district.

On roads not served by the Transport Department, there are several service buses owned by private companies. The Trivandrum-Thirunelveli Railway passes through this district for a length of 66 miles. There is also a large volume of water transport along the backwaters and rivers.

Posts, Telegraphs and Telephones

Almost all villages have post offices. Telegraph offices exist in all towns. Telephone connections in the district are detailed below :

Serial No.	Name of exchange or public call office		Number of connections
1	Mayyanad P. C. O.	..	Nil
2	Chathannoor P. C. O.	..	Nil
3	Quilon Exchange	..	251
4	Chavara P. C. O.	..	8
5	Kundara Exchange	..	20
6	Kottarakkara P. C. O.	..	3
7	Punalur Exchange	..	20
8	Shenkotta Exchange	..	30
9	Karunagapally P. C. O.	..	3
10	Kayamkulam Exchange	..	22
11	Karthikapally P. C. O.	..	Nil

23	Alleppey Exchange	..	175
24	Alleppey Iron Bridge P. C. O.	..	Nil

[P. C. O.—Public call office].

8. ELECTRIC POWER

A diesel-power station was in existence at Quilon from 1934, but with the extension of the Pallivasal hydro-electric system in 1940 to this district, after the construction of major transmission lines and transforming stations, it was closed down. Except the Shenkotta area where electricity distribution is done by a licensee, the electricity distribution in the district is entirely State-owned. Power drawn for distribution is from the Pallivasal system, supplemented by a certain quota imported from the Papanasam system. Industries that work on electricity include ceramics, textiles, minerals, chemicals, aluminium products, paper, cashewnut, plywood etc. A number of tile factories, saw mills and oil mills are also run by electric power. Electricity is also extensively used to de-water the paddy fields in Kuttanad area.

9. FACTORY INDUSTRIES

Factory industries are of comparatively recent growth though the coir-matting industry was established at Alleppey by James Darragh about the year 1865, and Darragh's Spinning Mills at Quilon, in 1884. The chief factory industries are mentioned below.

Coir

Door mats, cocoa matting and coir carpets are manufactured for both Indian and foreign markets; coir machine-belting is made for local requirements. Alleppey with its shipping facilities is the centre of the industry, though during the past few years, a number of factories have been established in Sherthala. A few British firms are also engaged in this industry.

Cocoanut oil

The production of cocoanut oil from copra is concentrated at Alleppey and Quilon; the extraction is done by steam or electric power.

Cashewnut

This industry is recent in origin but has developed into one of great size and importance. There are several cashewnut factories in this district. Cashewnuts are roasted under controlled conditions and the roasted nuts are carefully peeled, cleaned and packed in tin containers; the United States is the chief market for this product. Quilon is the centre of the industry. A tinware industry as auxiliary to the cashewnut industry for the manufacture of tin containers is located in Quilon.

Ceramics

China clay of excellent quality abundant in this district forms the raw material for a flourishing ceramic industry. The Government Ceramic Factory is located at Kundara; it produces high class crockery, refractories, insulators, firebricks, porcelainware, etc. There is also another private concern nearby.

The presence of good clay in the neighbourhood and the facilities for water transport have made Quilon the chief centre of this industry. The quality of the tiles made here is such as to secure for it a market in foreign countries like Ceylon and Africa.

Paper

The Punalur Paper Mills is an old-established factory (started in the eighties of the last century). The raw material for paper manufacture is the reeds abundant in the State Forests.

Cotton textiles

There are two textile factories, one at Quilon, the A. D. Cotton Mills making cotton yarn and piece goods and the other, Balaramavarma Textiles at Shenkotta, manufacturing cotton yarn.

Mining

Reference has already been made in section 3. Geology, to the processing of mineral sands at Chavara and the mica industry in Pathanapuram taluk.

Tea and rubber

There are a few tea factories located in the tea estates in the Pathanapuram and Shenkotta taluks. In some rubber estates, rubber latex is made into smoke sheets or lace crepe.

Other Industries

Smaller industries include timber mills, workshops, factories engaged in making splints for matches, and printing presses. Among the newer industries may be mentioned the bobbin industry (at Quilon), the pencil industry (the Quilon Pencil Factory and Krishnarayar Pencil Factory, both at Quilon), the plywood industry (Travancore Plywood Industries at Punalur, a Government concern producing among other things radio cabinets), the canning industry (canning of pine apples at Punalur), the starch industry (at Kundara), the manufacture of electrical accessories (Electrical and Allied Industries, Kundara), manufacture of aluminium conductors and cables (Aluminium Industries, Kundara) and the production of enamelware, signboards etc. (Travancore Enamel Industries, Kundara). The sugar factory (the Pampa Valley Sugar Factory at Thiruvalla), is the only factory in the State producing sugar from sugarcane.

The total number of registered factories in this district is above 330 and the number of factory workers about 59,000. The use of electricity for industrial purposes has registered a marked increase in recent years.

10. COTTAGE INDUSTRIES

Coir

The coir industry gives employment to a large number of people in all the coastal taluks, particularly Quilon, Karunagapally, Karthikapally, Sherthala and Ampalapuzha. This district produces some of the best varieties of coir yarn in the State. Coir fibre beaten out of retted cocoanut husks is spun into yarn either by hand or by a simple wheel and the yarn is made into cocoa mats and mattings.

Government are trying to organise the industry on a co-operative basis, with a view to eliminate middle men's profits, secure for the workers reasonable wages and also to standardise the quality of coir.

Weaving

Handloom weaving is carried on in all taluks in an attempt to meet local demands for towels and finer varieties of cloth, but Shenkotta, Quilon and Kottarakkara taluks have a larger share of this industry than the other taluks. (No textile establishment classified under small industries uses power looms). In Shenkotta, dyeing and printing are done by manual labour. The position of the industry is, however, unsatisfactory; its scope is being gradually restricted by the increasing use of mill-made articles.

Mats

In the coastal taluks, mats, both coarse and fine are made from two or three species of screw-pine growing abundantly on the banks of backwaters and canals. The chief production centres of fine mats are, Thazhava in Karunagapally taluk and Kayamkulam; this industry has however been losing ground owing to changes in demand.

Molasses

The manufacture of molasses (raw sugar) from sugarcane is carried on in the Thiruvalla and Pathanamthitta taluks.

Fish Curing

The preservation of fish by sun-drying is carried on at a number of stations along the coast; fish oil is also collected. Dry fish is sent to inland markets or exported.

Bell-metal

The chief centre of brass and bell-metal industry is Mannar in Thiruvalla taluk. The famed Aranmula metal-mirror is a unique example of bell-metal casting in which metallic surface is polished with locally available materials to attain almost the brightness of a mirror. This industry is dying out due to lack of encouragement.

Other industries

Oil crushing is carried on in all taluks with ghanies, which are however, giving place to small power mills mostly driven by electricity. The making of earthenware vessels is carried on in localities where good clay is available. Baskets and mats are made from bamboos and reeds obtained from the forests. Rattan work is carried on in a few localities. The making of beedies (Indian cigarettes) gives employment to a considerable number of people in both the towns and villages.

The furniture industry and leather industry are found in all towns.

Lace and embroidery-making are taught in convents; this industry is carried on at Quilon and Alleppey.

11. PUBLIC HEALTH

The chief communicable diseases noticed in the district are filariasis, malaria, small-pox, leprosy and tuberculosis.

Endemic filarial disease is observed in the coastal taluks of Karthikapally, Karunagapally, Ampalapuzha and Sherthala. All the different types of filarial affection are met with, elephantiasis being the most common disease. Both F. malayi and F. bancrofti infections are noticed; the chief control measures adopted are the removal of pistia and improvement of drainage.

Malaria

The malarial areas in this district are the forest tracts in the Pathanapuram taluk, Ranni pakuthy in Pathanamthitta taluk and Mekkara and Puliyara pakuthies in Shenkotta taluk. D. D. T. spraying on a large scale has brought down the incidence of the disease.

Small-pox

This disease often breaks out in the midland regions during the hot season. The vaccination campaign is prosecuted with vigour.

Cholera

Cholera occurs in a six-yearly cycle and is imported into Shenkotta from the adjacent Thirunelveli district. Mass inoculation during such periods checks its spread.

Leprosy

The incidence of leprosy is high in the Karunagapally and Sherthala taluks. There is a Government Leprosy Hospital at Nooranad and a Mission Hospital at Sherthala.

Birth and death rates

From the latest Public Health Department Report (1950) it is found that the birth rate for this district is 24·62 while the death rate is 8·13. The rate of infant mortality is 47·16.

12. EDUCATION

State activity in education dates from 1817 when Government established Malayalam schools at a few centres in the district. Two decades later English schools were established at Quilon and Kayamkulam; owing to financial difficulties however these schools were stopped after some years and had to be revived in 1874. Since then there has been steady progress in school education.

Schools and colleges

Taluk-wise details of the grades of schools and their strength for the school year 1950—51 in this district are given in a separate statement appended to this part. As shown in the statement, there are 1850 schools and 515,619 pupils.

For decades, this district lagged behind the others in regard to collegiate education. Thanks to the efforts made by private agencies during the last quinquennium there are now three colleges. Some details regarding these colleges for the academic year 1950—51 are given below:—

Name of college	Courses of study	Strength			No. of full-time teachers
		Total	Men	Women	
1. Sree Narayana College, Quilon	..	1,587	1,309	278	75
	Inter	1,178	950	228	
	B. A.	156	136	20	
	B. Sc.	253	223	30	
2. Nair Service Society College, Pandalam	Inter	566	409	57	15
3. Sanatana Dharma College, Alleppey	..	985	763	222	54
	Inter	628	467	161	
	B. A.	100	73	27	
	B. Sc.	131	99	32	
	B. Com.	126	124	2	

Periodicals

There are 109 printing establishments in this district. Two dailies are published from Quilon; the number of weeklies published in the district is thirteen and the number of monthlies, thirty-two. All journals devote a great deal of space to current political affairs; cultural subjects also receive attention. The high percentage of literacy and the almost universal habit of reading journals account for the large number of periodicals published in this district.

Libraries

The library movement is active in this State. There are 369 libraries distributed in various localities in the district; there are also one district library (at Quilon) and two taluk libraries. Government encourage the growth of libraries by giving grants.

13. LOCAL SELF-GOVERNMENT

Municipalities

There are six municipal towns in this district. Municipal councils consist partly of elected and partly of nominated members, the elected members forming not less than three-fourths of the total number. All municipal councils have the right of electing their chairmen and enjoy powers of taxation. Among the obligatory functions of the municipalities are sanitation, lighting of public streets, vaccination and registration of births and deaths. In addition, municipalities attend to the maintenance of existing roads and opening of new roads, the organisation of child welfare centres and free mid-wifery service. Some municipalities also run libraries and give grants-in-aid to Ayurvedic and other dispensaries.

Panchayats

Panchayats are the local self-government institutions in rural areas. Panchayats were instituted in 1925. There are now 91 panchayats in the district. A new Panchayat Act was passed in 1950, with a view to vesting the panchayats with more powers, particularly powers of taxation and providing for elections under adult franchise. Under the Act, there will be 184 panchayats in the district.

The activities of the panchayats cover all aspects of rural welfare. Conservancy arrangements, sweeping of streets, street-lighting, improvement of roads, construction of public wells, tanks, latrines, and midwifery service are some of the items of work attended to by these local bodies. Besides, some of them serve also as rural reconstruction centres by running libraries or reading rooms, encouraging compost-making, distributing improved seeds and maintaining stud bulls.

14. DEVELOPMENT PROJECTS IN QUILON DISTRICT

The most important development project in this district is the Kuttanad development scheme. The paddy fields in certain areas in Kuttanad are now lying uncultivated due to the flow of salt water from the lake into these fields. As the area is waterlogged, road communication is practically absent. The present project is intended to eliminate flood and salinity hazards in Kuttanad area and provide increased communication facilities. It comprises, (*a*) the construction at Thottapally of a spillway outlet channel—1,200 feet wide to divert the flood waters of the rivers in this region directly into the Arabian sea, (*b*) the construction of a salt-water barrier, 4,300 feet long across the Vembanad lake at its narrowest point *viz.*, between Thannirmukkom and Vetchur, and (*c*) the construction of a road, 40 feet wide and a canal 110 feet wide along—side of the road, from Alleppey to Changanacherry (length 14 miles). The total estimated cost of the scheme, inaugurated in July, 1951, is Rs. 130 lakhs.

15. BACKWARD CLASSES

Social reform

Time was when Kerala was considered as the most caste-ridden part of India. The old order has however, been changed and changed rapidly, during the past half century. A social reform movement with the avowed object of removing the social and economic disabilities of citizens belonging to the so-called "low castes" was inaugurated early in the 19th century by the ruling sovereigns of the erstwhile States of Travancore and Cochin. Several iniquitous taxes imposed on these castes were abolished. Sale or purchases of low caste people were restricted; taboos imposed on the use of several articles, dress covering the upper part of the body, ornaments etc. by low-castes were removed. Later, slavery in all forms was abolished. Public roads were thrown open to all castes. Schools were specially established for them, and subsequently free admission to Government as well as aided schools was given to them. Suitable provisions were made for the recruitment of backward classes to the public service. A comprehensive programme for the amelioration of the condition of backward communities was launched by the two Governments about 3 decades ago. Thanks to these measures, (the Temple Entry Proclamation, throwing open Hindu temples to all class and the enactment of the Civil Marriages Act were important milestones in the path of progress), the uplift work carried on by Christian and Hindu missions, caste barriers have broken down, so that today caste is no longer the controlling feature of social life.

Scheduled Castes

The number of people in this district belonging to the Scheduled Castes at this census is 322,443 or 16% of the total population.

Scheduled Tribes

3,008 people were enumerated as members of the Scheduled Tribes. These people living in the highland region, seem to be diminishing in numbers. How these communities can be helped to maintain their strength and their culture against the impact of modern civilization is a problem for social anthropologists.

16. SOCIAL CONDITION

--ouses

A peculiar feature of the country is the scattered disposition of houses or the complete absence of the street-system in rural areas; each house even the humblest stands in its own ground, surrounded by at least a few essential trees and plants, a practice conducive to personal and social hygiene. The street-system, however, occurs in some of the larger towns and in rural areas in Shenkotta Taluk. This factor accounts for the comparative freedom from epidemics in the State.

The houses of the poor people are built of mud with no doors or windows and thatched with plaited cadjan or palmyra leaves or, in some places, grass. The houses of the middle classes have

walls made of wood or sun-dried or burnt bricks; they have substantial roofs and also doors and windows and may either be thatched or tiled. The richer classes have large houses built according to new fashions, of brick or concrete and equipped with drainage and other modern conveniences.

Dress

In matters of dress, new fashions (based on those in vogue in other parts of India) like the shirt, the coat, the blouse, the sari, and coloured silk clothes are rapidly spreading among all classes. A similar transformation is taking place in regard to ornaments, too.

Food

Rice is the staple food of the people; owing to the increasing scarcity of rice in the State, the low-income-groups are compelled to use tapioca in the place of rice (the effect of this habit on physique and health has not yet been scientifically studied). Some sections of Hindus are vegetarians. The Christians and Mahomedans generally eat more fish and meat than the others. New tastes in food are beverages like tea and coffee which have spread even into the countryside.

Amusements

While time-honoured amusements like Kathakali, Thullal etc. are still enjoyed by the less sophisticated people of the countryside, the cinema has established itself everywhere as the most popular form of recreation; even the small towns have at least one cinema house. Music is in great demand; dramas especially those with accent on music are also appreciated. Western games like foot-ball, tennis, volley ball, badminton, etc. enjoy immense popularity, among the youth.

Festivals

The national festival is Onam (in August-September) celebrated by feasts and sports. Vishu (New year's day) in April, Dipavali (in November particularly for Tamilians) and Thiruvathira (in December—January) are also occasions for festivity and rejoicing among Hindu communities. The Christians and Mahomedans celebrate their religious festivals. There are, besides, important festivals in temples and churches lending gaiety and colour to life in the localities.

Inheritance

About quarter of a century ago, the marumakkathayam system of inheritance (the matriarchal system) was given up by most communities in favour of the makkathayam (patriarchal system). Along with the marumakkathayam system, the joint family system was also abandoned; few communities now follow it.

Position of Women

Women in Kerala have always enjoyed much freedom and respect in society. They have made rapid progress in modern education so that today women belonging to several communities are found in the professions and in public life.

B. POPULATION (Analytical Summary)

17. DISTRIBUTION OF POPULATION

The population of Quilon district has increased by 250 per cent. during the past fifty years. The number of inhabitants per square mile is 1109, giving per capita 58 cents of land. 87 per cent. of the population are confined to rural areas ; 58 per cent depend on agriculture, for their means of livelihood ; 49 per cent are literate.

The distribution of population according to the natural sub-divisions is given below :

Sub-division	Area as a percentage of the total	Population as a percentage of the total	Density
District ..	100	100	1109
Lowland ..	21·4	46·9	2424
Midland ..	35·0	49·9	1583
Highland ..	43·6	3·2	81

Natural Sub-divisions

The lowland forming slightly over one-fifth of the district has 47 per cent. of the population. The density is 2424 persons per square mile and the area of land per capita is only 26·5 cents. The midland covering a little over a third of the district, accommodates fifty per cent of the population. The density per square mile in the midland is 1583, giving 40·5 cents of land per person. The highland comprising over two-fifths of the district has only 3·2 per cent of the population.

This district has a large extent of land under forest and the area actually under occupation is about 1389 square miles. Calculated on this, the density becomes 2179 and per capita occupied land, 29·4 cents only.

The following table gives the distribution of population in the district and taluks :

Name of taluk	Percentage population in taluk	No. of inhabitants per square mile		Land per capita (cents)	
		Total	Occupied area	Total	Occupied area
ALL ..	100	1109	2179	57·7	29·4

Taluks

The taluks of Pathanapuram, Shenkotta and Pathanamthitta have considerably lower densities than the other tatuks when the total areas are taken into account. However, these taluk densities become comparable with the rest when calculated upon the basis of land under occupation.

In the taluks of Kottarakkara, Pathanapuram, Shenkotta, Pathanamthitta and Kunnathur, the land under occupation is approximately 40 to 50 cents per head. In the remaining taluks lying mostly in the lowland, the per capita extent of occupied land is only between 20 and 30 cents. The pressure on land in these taluks is particularly great. Further, the per capita figures of total area and occupied area go to show that practically no relief can be had by population movement, even if possible, to unoccupied areas in these taluks.

In Pathanapuram, Shenkotta and Pathanamthitta, the situation is apparently better. More land is available in these taluks for occupation. This would imply clearing the forests. But to what extent the movement into forests is desirable and practicable has to be decided by experts in land utilisation.

The density of population in the urban* and rural areas is as follows :—

Name of taluk	Percentage of taluk population		Density				
			Rural		Urban		
	Rural	Urban	Total	Occupied area	Total	Municipal	Non-municipal
ALL	86·5	13·5	996	2,030	4,113	8,442	2,260
Quilon	83·4	16·6	2,359	2,940	10,665	10,665	..
Kottarakkara	96·6	3·4	1,165	1,368	2,058	..	2,058
Pathanapuram	82·5	17·5	367	1,376	1,160	..	1,160
Shenkotta	35·7	64·3	199	546	3,758	20,153	2,394
Pathanamthitta	95·5	4·5	260	1,567	4,901	..	4,901
Kunnathur	92·6	7·4	1,201	1,403	1,992	..	1,992
Karunagapally	91·3	8·7	2,809	3,256	4,454	4,890	4,224
Karthikapally	91·7	8·3	2,355	2,605	5,435	10,547	4,775
Mavelikkara	88·7	11·3	1,976	2,110	3,505	4,886	2,080
Thiruvalla	92·2	7·8	2,053	2,646	4,522	4,761	4,221
Ampalapuzha	60·2	39·8	1,520	2,063	7,087	9,302	2,313
Sherthala	97·2	2·8	2,027	2,669	6,469	..	6,469

Urban-rural distribution

The percentage of rural population in Shenkotta taluk is very low when compared to that of the other taluks. The explanation for this is to be found in the practice of the vast majority of inhabitants of this taluk to build their homes in clusters which have developed into urban areas.

In Ampalapuzha taluk, the proportion of people living in rural areas is only 60 per cent. The presence of extensive stretches of waterlogged areas in this taluk where human habitation is difficult has naturally made the people crowd together in conservancy towns.

Rural density

The rural density based on occupied land is consistently high in all taluks except Shenkotta. In the midland taluks, the density varies approximately between 1,300 and 1,500; in the taluks of Ampalapuzha and Mavelikkara, the density is nearly 2,100; in Karthikapally and Thiruvalla, it is 2,600 and in Quilon it is almost 3,000 while in Karunagapally the density goes up to 3,250.

Urban density

The densities in Quilon municipality and a portion of Kayamkulam municipality lying in Karthikapally taluk, are almost near 10,500, while that in Shenkotta, goes up to 20,100. Alleppey municipality has about 9,300 persons to the square mile. The remaining municipalities—Kayamkulam, Mavelikkara and Thiruvalla—have almost equal densities.

* At the 1951 census all areas where conservancy arrangements area in force have been treated as towns.

The non-municipal urban areas in the taluks of Kottarakkara, Shenkotta, Kunnathur, Mavelikkara and Ampalapuzha have densities ranging between 2,000 and 2,300 nearly. In Karunagapally, Karthikapally, Thiruvalla and Pathanamthitta the non-municipal urban density lies between 4,200 and 4,900. In Sherthala it is almost 6,500.

18. SIZE AND COMPOSITION OF HOUSEHOLDS

In regard to dwelling houses, the following table summarises the information collected at this census: —

Name of taluk	No. of inhabitants per 100 houses			No. of houses per sq. mile of occupied area
	All	Urban	Rural	
ALL	570	622	562	382
Quilon	608	710	591	550
Kottarakkara	566	592	565	244
Pathanapuram	563	591	559	237
Shenkotta	520	490	583	233
Pathanamthitta	571	591	570	283
Kunnathur	540	586	537	266
Karunagapally	549	599	545	607
Karthikapally	560	617	556	486
Mavelikkara	541	600	534	409
Thiruvalla	591	636	588	463
Ampalapuzha	611	666	579	470
Sherthala	531	597	529	511

Number of inmates per house

Five to six inmates per house is the district average. In Quilon and Ampalapuzha taluks, the average is over six per house. In regard to urban areas, the district average is 6 inmates per house.

An analysis relating to distribution of households according to size is given below :

Size of households	District		Urban		Rural	
	Number	Density	Number	Density	Number	Density
ALL	1,000	5·51	1,000	5·72	1,000	5·48
Small (3 members or less)	214	2·40	219	2·30	214	2·42
Medium (4 to 6 members)	477	4·98	443	4·98	482	4·98
Large (7 to 9 members)	243	7·73	239	7·75	244	7·72
Very Large (10 or more)	66	11·31	99	11·58	60	11·24

Households

It will be seen from the above table that in the district as a whole, about 48 per cent of the households are medium-sized having five inmates on the average while 7 per cent. have over 11 persons in each. Small households with two or three members and large ones with eight members form 21 and 24 per cent. respectively. Very large households having over 11 persons are seen more in urban areas than in rural places.

In regard to family structure, an analysis of household population yields results summarised below : —

Relationship	No. of persons per 1000 of household population		
	District	Urban	Rural
ALL ..	1,000	1,000	1,000
Heads of households and wives ..	314	301	317
Sons of heads of households ..	244	226	247
Daughters of heads of households ..	208	191	210
Other male relations ..	90	111	87
Other female relations ..	130	145	128
Unrelated persons ..	14	26	11

Family Structure

An average household has therefore a little less than a third of the number of inmates as the heads of households and their wives, less than half as sons and daughters and about one-fifth as other relations. Only about one per cent. is unrelated to the head of the household ; this percentage rises to three in urban areas.

In regard to civil condition, the position is as follows : —

Civil condition		District	Urban	Rural
ALL	..	1,000	1,000	1,000
Unmarried	Total ..	549	549	549
	Males ..	605	610	604
	Females ..	494	486	495
Married	Total ..	381	372	382
	Males ..	370	361	371
	Females ..	393	383	394
Widowed or divorced	Total ...	70	79	69
	Males ..	25	29	25
	Females ..	113	131	111

Civil condition

It will be seen that in the district, the proportions of unmarried, married and widowed (or divorced) persons are respectively 55 per cent. 38 per cent. and 7 per cent. Among males, 60 per cent. are unmarried, 37 per cent. married and 3 per cent. are widowers. Among females, 49 per cent. are unmarried, 39 per cent. married and 12 per cent. are widowed or divorced. These proportions vary only slightly between rural and urban areas.

19. AGE, LITERACY AND CIVIL CONDITION

The distribution of population according to age is given below :—

Age group		Persons	Males	Females
ALL	..	1,000	1,000	1,000
0	..	30	31	30
1— 4	..	118	121	116
5—14	..	245	247	243
15—24	..	202	195	208
25—34	..	141	141	141
35—44	..	104	106	102
45—54	..	79	80	77
55—64	..	49	49	50
65—74	..	23	22	24
75 and over	..	9	8	9

Age

39 per cent. of the persons are below 15 years of age, 53 per cent. between the ages 15 to 54 and 8 per cent. above 55 years of age. Among males and females, these proportions are almost the same as those for the total population. Thus over fifty per cent. of the population may be considered as more or less fit for work. Further as there are only 8 per cent. in the group 45-54 as against 25 per cent. in the group 5-14, the fifty-three per cent. in the group 15-54 will be continuously replaced during the present decade. One should expect that at the end of the decade, allowing for removal due to death, the group 15-54 will have over 53 per cent. of the population.

Literacy

In regard to literacy, the following table gives estimates (per 1000 persons) of literates (sex-wise) in broad age groups.

Age group	Percentage of literates in each age group					
	Persons	Males	Females	Persons	Males	Females
ALL	485	576	395	49	58	40
0— 4	0	0	0	0	0	0
5— 9	35	36	34	28	29	28
10—14	88	94	82	72	77	67
15—24	142	153	130	70	79	63
25—34	94	113	75	66	80	53
35—44	59	79	39	57	74	39
45—54	37	55	20	47	68	26
55—64	19	29	10	39	59	20
65—74	8	13	4	36	57	16
75 & over	3	4	1	29	46	13

It will be seen that 48·5 per cent. are literates. The percentages of literacy for males and females are 57·6 and 39·5 respectively. Columns 2, 3 and 4 show the distribution of literates in the age-groups. The remaining three columns show the percentage of literates in each age group. The high values of percentage of literates in the age-groups 10 to 44 for all persons and particularly for males is an index of the progress of education in the State during the last few decades. Among females high values are seen only in the group 10—24 showing that the last two decades have shown rapid progress in female education also. This conclusion is further strengthened by the low values in older age-groups for females.

Civil condition

The marital status of household population has already been discussed. The following table summarises the marital status of the general population in broad age-groups :—

Age-group	Number per 1000 persons who are					
	Unmarried		Married		Widowed or divorced	
	Males	Females	Males	Females	Males	Females
ALL	301	248	184	196	14	57
0	15	15	0	0		
1— 4	60	58	0	0	0	0
5—14	123	122	0	0		
15—24	84	47	13	55	0	2
25—34	15	4	54	61	1	6
35—44	3	1	49	41	2	9
45—54			36	25	3	13
55—64	1	1	21	10	3	14
65—74			8	3	3	9
75 & over			3	1	2	4

It will be seen that 55 per cent. of the population are unmarried ; the remaining 45 per cent. consist of 38 per cent, married and 7 per cent, widowed or divorced. The percentages of married males and females are almost equal showing that polygamy is very rare. Seven per cent. of the population who are widowed or divorced consist mostly of women who have passed their forties.

The distribution of unmarried persons in the age-groups raises a very interesting problem. In the decade to come, the females in the age-groups 5-14 and 15-24 forming about 17 per cent, have normally to get married. The men have to come ordinarily from the age-groups 15—24 and 25-34 and these two groups give only 10 per cent. Hence the decade to come will witness a large number of young women remaining unmarried. This tendency can be avoided only by encouraging the younger men in the ages 22, 23 and 24 in the latter half of this decade to marry.

A scrutiny of the columns for married persons, shows that there is practically no child marriage here. Among males, marriage below 24 years of age is also not common.

20. RELIGION

In regard to religion, the following table gives the distribution of population :—

Religion		District	Urban	Rural
ALL	..	1000	1000	1000
Hindu	..	652	599	660
Muslim	..	85	153	75
Christian	..	263	248	265

65 per cent are Hindus, a little over 26 per cent. are Christians and a little less than 9 per cent. are Muslims. In the urban areas, both Hindus and Christians have lower proportions than those for the district, while the proportion for the Muslims is almost double. This goes to show that while Hindus and Christians in this district do not have a tendency to move towards urban areas the Muslims gravitate towards them.

Special groups

There are 2056 Anglo-Indians in this district of whom 1109 are in towns and 947 are in the villages. 322, 443 persons have been returned as belonging to Scheduled castes and 3008 as belonging to Scheduled tribes. No person has been enumerated under tribal religion.

21. LANGUAGES

In regard to languages, the distribution of persons according to their mothertongue is as follows :

		District	Urban	Rural
ALL	..	1000	1000	1000
Malayalam	..	957	804	981
Tamil	..	35	101	16
Konkani	..	4	20	2
Telugu	..	1	5	
Gujarathi	..	0·34	2	1
Hindi	..	0·24	1·50	
Marathi	..	0·10	0·56	
Canarese	..	0·09	0·33	
Others	..	2·23	65·61	

Mothertongue

Malayalam is the mothertongue of over 95 per cent of the people of this district and Tamil, that of 3·5 per cent. Persons having other Indian languages as their mother-tongue exist, but their numbers are very small. From the rural-urban distribution of persons having different languages as mothertongue, it is clear that persons with languages other than Malayalam and Tamil are living mostly in urban areas only. Even in regard to Tamil, the greater concentration is in urban places.

Subsidiary languages

The most common languages subsidiary to the mother-tongue are Malayalam and Tamil. The following statement gives the percentage of people having a subsidiary language.

Mothertongue		No. per 1000 having a subsidiary language	Subsidiary language		
			Malayalam	Tamil	Others
Malayalam	...	2·20	..	1·65	0·55
Tamil	..	279	278	..	1
Konkani	..	816	803	10	3
Telugu	..	822	321	500	1
Gujarathi	...	533	342	18	173
Hindi	..	713	616	84	13
Marathi	..	747	654	69	24
Canarese	..	741	669	68	4
Others	..	675	590	42	43

Except those who have returned their mothertongue as Telugu, almost all persons have Malayalam as their subsidiary language.

22. BIRTHPLACE

The distribution of persons according to their birth-place is as follows :—

Birth-place	Number per 10,000
Travancore-Cochin State	9908
Trivandrum District	93
Quilon ,,	9670
Kottayam ,,	111
Trichur ,,	34
Other States in India	73
Madras	70
Mysore	1
Others	2
Countries in Asia	0·3
do. Europe	0·36
Other countries	4·34
Birth place not returned	14

Nearly 97 per cent. of the people are born within the district while 1·1 per cent, 0·9 per cent. and 0·3 per cent. are born in Kottayam, Trivandrum and Trichur districts respectively. Thus 99 per cent of the people in this district are born in the State.

There are only 162 non-Indian nationals in this district. Four are from Pakistan, 25 from other Asiatic countries and 37 from European countries ; 82 are British nationals, 11 are American nationals and 3 Australian nationals.

23. MEANS OF LIVELIHOOD AND ECONOMIC STATUS

Means of livelihood

Means of livelihood and economic status of the people have been given special emphasis at this census. Means of livelihood have been classified under two broad groups—agricultural and non-agricultural. Each of these in turn have been sub-divided into four. The eight means of livelihood are :—

(a) Agricultural

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land ; agricultural rent receivers and their dependants

(b) Non-agricultural

5. Production other than cultivation
6. Commerce
7. Transport
8. Other services and miscellaneous sources

Means of livelihood classification

The four non-agricultural classes have been re-classified into ten divisions and each division has a number of sub-divisions corresponding to specific industry and service groups. A detailed list of these sub-divisions is given at page 103 of this volume.

Dependency

Persons under each livelihood class have been classified as self-supporting, non-earning dependants or earning dependants. A person has been treated as self-supporting when " he (or she) is in receipt of an *income and that income is sufficient at least for his (or her) own maintenance.* Such income may be in cash or kind. Anyone who is not " self-supporting person " in this sense is a ' dependant.' One who does not secure any income either in cash or in kind is a ' non-earning dependant '. A person, with an income which does not make him self-supporting, is an ' earning dependant '.

Employment

Self-supporting persons have been classified as employer, employee and independent worker. An employer is one who employs other persons in order to carry on the business from which he (or she) secures his (or her) livelihood. It should be remembered that a person who employs a cook or other person for domestic service should not be recorded as an employer merely for that reason. Further persons employed as managers, superintendents, agents, etc. who control other workers are also not employers. The term 'employees' requires no clarification. An independent worker is one who is not employed (in the sense explained above) by any one else and who does not also employ anybody else in order to earn his livelihood.

The distribution of persons according to their means of livelihood is as follows :—

Number of persons per 10,000 in agricultural and non-agricultural livelihood classes

Name of taluk	Agricultural classes			Non-agricultural classes		
	Persons	Males	Females	Persons	Males	Females
ALL ...	5,767	2,871	2,896	4,233	2,114	2,119
Quilon ...	480	244	236	834	413	421
Kottarakkara ...	633	316	317	193	97	96
Pathanapuram ...	388	193	195	181	94	87
Shenkotta ...	135	68	67	81	41	40
Pathanamthitta ...	618	312	306	215	110	105
Kunnathur ...	480	239	241	131	65	66
Karunagapally —	392	197	195	455	226	229
Karthikapally ..	308	151	157	296	145	151
Mavelikkara ...	518	253	265	222	111	111
Thiruvalla ...	1,085	541	544	436	217	249
Ampalapuzha ...	357	172	185	720	366	354
Sherthala ...	373	185	188	469	229	240

Distribution into agricultural and non-agricultural classes

It will be seen from this table that about 58 per cent. of the population belong to the agricultural classes while 42 per cent. belong to non-agricultural classes. Males and females are almost in the same numbers in both the groups. Thiruvalla, Pathanamthitta and Kottarakara have the largest numbers belonging to agricultural classes while Quilon and Ampalapuzha have the largest numbers belonging to non-agricultural classes.

In regard to the dependency status of the persons, the following table gives the distribution of 1000 persons in each livelihood class.

	Livelihood Class	Self-supporting	Dependency	
			Non-earning dependants	Earning dependants
I	Cultivators of land wholly or mainly owned and their dependants ..	220	710	70
II	Cultivators of land wholly or mainly unowned and their dependants ..	212	692	96
III	Cultivating labourers and their dependants ..	312	555	133
IV	Non-cultivating owners of land; agricultural rent receivers and their dependants ..	297	665	38
V	Production other than cultivation ..	336	556	108
VI	Commerce ..	238	687	75
VII	Transport ..	277	597	126
VIII	Other services and miscellaneous sources ..	300	634	66

Distribution according to dependency

It will be seen that in all the livelihood classes, the percentage of self-supporting persons lies between 21 and 34 while that of non-earning dependants is between 56 and 71. Earning dependants fall between 7 and 13 per cent. On an average, it may be said that each self-supporting person has to maintain 3 to 4 non-earning dependants.

Self-supporting persons falling within each industrial and services group have been divided into three groups employer, employee and independent worker. The distribution of self-supporting persons in the major industries divisions is summarised below.

Industries division	Number per 100 person in each sex who are					
	Employers		Employees		Independent workers	
	Males	Females	Males	Females	Males	Females
All	4	1	52	53	44	46
0	4	1	47	54	49	45
1	1	3	59	35	40	62
2	4	..	62	48	34	52
3	2	3	41	57	57	40
4	1	1	64	37	35	62
5	2	1	72	80	26	19
6	7	6	20	15	73	79
7	1	3	65	71	34	26
8	2	1	77	93	21	6
9	5	1	45	69	50	30

Distribution according to Employment

It will be seen that among males in all the divisions taken together, 4 per cent. are employers, 52 per cent. are employees and 44 per cent. are independent workers. Among females, 1 per cent. is employer, 53 per cent. are employees and 46 per cent. are independent workers. Division 6—commerce—has comparatively larger percentage of employers and independent workers and fewer employees. In divisions 5 (construction and utilities) 7 (transport, storage and communication) and 8 (health, education and public administration) the percentage of employees is high.

C. GAZETTEER

Quilon Taluk (area 146·8 sq. miles, population 397,760) is divided into 14 pakuthies. Cocoanut, tapioca and paddy are the chief crops. The taluk is well served by backwaters and is the seat of several industries.

Quilon (municipal town), one of the oldest sea-port towns on the Malabar coast, stands on the Ashtamudi lake ; the port is an open roadstead situated off a bay formed by the Tangasseri Point. In early days however, wooden ships crossed the Neendakara bar into the Ashtamudi lake. The natural facilities for shipping and the richness of the surrounding country in spices made it an important port from early times. It was frequented by merchants from European countries as well as from China ; early travellers have described the port as one of the largest in the world and the market as one of the finest in India. Quilon was so important and prosperous that it gave its name to the Malabar era founded in 825 A. D. The splendour and magnificence of the city gave rise to the Malayalam saying that 'one who saw Quilon would not care for one's home'. The gradual silting of the port and the rise of Cochin and Calicut led to its decline, even before the arrival of the Portuguese. The Portuguese established a trading settlement at Quilon in 1502, which, in 1661, was captured by the Dutch, who in turn were forced to surrender it to the English in 1795. This settlement known as Tangasseri is now a part of the town. When Travancore entered into subsidiary alliance with the East India Company, the Company's army was stationed at Quilon. Dalava Velu Tampi did much to improve the town. He built new bazaars and invited merchants from Madura and Thirunelveli to settle down here. Public offices, palace and temple were also constructed. Till 1830, Quilon was the capital of Travancore ; the Dewan, the Appeal Court and the Resident had their head-quarters there. The regiment stationed at Quilon was transferred to Trivandrum

only in the early years of this century. Quilon possesses a historic church and was the seat of the first Roman Catholic bishopric in India. The Thirunelveli-Quilon railway was opened in 1904; it was extended to Trivandrum in 1918.

Today Quilon is a busy industrial and commercial centre, being the seat of several industries (cashewnut, textiles, tiles, timber works, tin containers, oil mills etc.) The mineral factories at Neendakara and Chavara are within a dozen miles of Quilon. It is also the headquarters of the District Collector.

Kundara, on the bank of one of the creeks of the Ashtamudi lake is a rising industrial centre and is also a railway station. The presence of fine china-clay in the neighbourhood led to the establishment of the Government Ceramic Factory in 1940; since then several industries (starch, the manufacture of electrical accessories, aluminium conductors and cables, enamelware and chemicals) have been started here.

Kottarakkara Taluk (area 211·6 sq. miles, population 250,202) comprises 11 pakuthies. The Ithikkara and Kallada rivers flow through this taluk. The chief crops are tapioca, cocoanut, paddy and pepper. Forests occur in the southern portion of the taluk.

Kottarakkara, the headquarters of the taluk, was formerly the seat of the Elayadathuswarupam a collateral branch of the Venad royal family. In the town are an old temple and palace; the scenery round about the town is beautiful.

Pathanapuram Taluk (area 412·6 sq. miles, population 171,992) is subdivided into 7 pakuthies. It is watered by the Kallada river and its tributaries. A large portion of this taluk is under forests. There are a number of estates devoted to plantation crops, chiefly tea and rubber. Other crops are tapioca, paddy and pepper.

Punalur, the headquarters of the taluk on the Quilon-Shenkotta road is also an important railway station; in fact, it stands at the entrance of the ghat section of the Quilon-Thirunelveli line. The suspension bridge built here over the Kallada river in 1879 is still an attraction for visitors. A Paper Mill started in the neighbourhood, in the eighties of the last century, has grown into an important industrial unit. There are also a plywood factory (a government concern) and a few fruit canning factories here. A large quantity of pine apples is exported from Punalur to places outside the State.

Pathanapuram is a trade centre of some importance on the Kallada river.

Pattazhi is the seat of an ancient temple dedicated to Bhagavathi.

Kulathupuzha, a small village picturesquely situated on the 40th mile of Trivandrum-Shenkotta road, 6 miles from Tenmala Railway station is famous for its Sasta temple.

Ariyankavu, seat of another Sastha temple. It attracts large numbers of worshippers during the "mandala puja" and "Thrikalyanam" in December. It is on the ghat-section of the Quilon-Thirunelveli railway commanding the pass lying across the ghats. The railway here passes through a tunnel nearly half a mile long; the mountain scenery is very impressive.

Shenkotta Taluk (area 128·5 sq. miles, population 65,457) is sub-divided into 10 pakuthies. It consists of two disconnected parts—the larger mostly covered by forests, lying west of the ghats and the smaller lying on the eastern side of the ghats sharing the totographic and demographic characteristics of the adjacent Thirunelveli district and constituting a relic of the past when the sway of Travancore rulers extended over portions of that district. On the slopes of hills are estates growing rubber, tea and some coffee. In the transghatian area, the soil is fairly rich and there are a number of tanks and small irrigation canals; paddy is the chief crop.

Shenkotta (municipal town), the headquarters of the taluk lies at the foot of the ghats on the eastern side, on the main road from Thirunelveli to Quilon. It is also a railway station and an important centre of trade. Three miles to the south-east of the town is Courtallam falls, considered to be the finest freshwater bathing place in India. Courtallam is a sanitorium thronged by visitors during the monsoons when the falls are full and a bath under them most refreshing.

Pathanamthitta Taluk (area 925·8 sq. miles, population 251,779) is divided into 8 pakuthies. It is watered by the Pampa and Achankoil rivers. Much of this taluk is under forests. In the highland region are a number of rubber, tea and coffee estates; other crops are tapioca, cocoanut, paddy, pepper, sugarcane and ginger.

Pathanamthitta is the headquarters of the taluk.

Omallur is a small village famous for its cattle-fair.

Sabarimala, among the Peermede hills is the seat of an ancient Sasta temple. This temple recently suffered serious damage at the hands of miscreants and has been rebuilt. An increasing number of pilgrims visit this mountain-shrine in January for the 'Makaravilakku' festival; the last lap of the journey to the temple (covering about thirty miles) lies through dense forests infested with wild beasts.

Kozhencherry, on the left bank of the Pampa river is a growing trade centre; it contains a fine church. A religious convention held every year on the dry river-bed at Maramon near Kozhencherry during February attracts large numbers of Christians from all over the country.

Ranni, a market centre for countryproduce is connected by road to Punalur and by the Pampa river to Alleppey. On a rock overhanging the river is an old Christian church.

Konni, 18 miles from Punalur stands on the Achankoil river and commands enchanting views of hills and valleys covered with thick vegetation. There are an agricultural school and pepper and cloves farms here.

Perunthenaruvi is famous for the waterfall on the Pampa situated eight miles above the confluence of the Kakkad Ar with the Pampa. The water rushes down the rocky bed into a ravine sixty to one hundred feet deep. The place owes its name to clusters of bee-hives formerly found here.

Kunnathur Taluk (area 149·6 sq. miles, population 185,072) is divided into eight pakuthies. It is watered by the Kallada and Pallikkal rivers. The eastern portion of this taluk is hilly and covered by forests; there are a number of rubber and tea estates in this region. The chief crops are tapioca, paddy, cocoanut and pepper.

Adur is the headquarters of the taluk.

Sasthamkotta, a beauty-spot, twelve miles from Adur lies on the bank of the fresh water Sasthamkotta lake and is famous for its ancient Sasta temple. On a picturesque site overlooking the lake is a residential high school.

Karunagapally Taluk (area 88·4 sq. miles, population 256,578) is divided into twelve pakuthies. This is a fertile, thickly populated taluk; the chief crops are cocoanut and paddy. The taluk is an important centre of coir industry.

Karunagapally, the headquarters of the taluk contains a large mosque. It was formerly the seat of the Rajas of Karunagapally; the ruins of the ancient palace and a fort are still visible.

Krishnapuram, a populous village, formerly a military station of the powerful Rajas of Kayamkulam contains a palace, a temple and a fort. The palace contains fine specimens of Kerala murals of the 18th century. The Indian Central Cocoanut Committee has established here a research station for the study of cocoanut diseases.

Oachira, a village on the Quilon-Alleppey road is famous for *Oachirakali*, a mock fight held about the middle of June every year, in commemmoration of the battles fought on the spot between the Kayamkulam and Chempakasseri forces. The festival is accompanied by a big fair which draws thousands of people. Here there is no temple building and all classes and castes of people worship the presiding deity, Parabrahmam.

Chavara, a sea-side village is the seat of the mineral sands industry in this district.

Thazhava is an important centre for the screwpine mat industry. There is an image of the Buddha at Maruthurkulangara.

Karthikapally Taluk (area 74·0 sq. miles, population 182,910) another thickly populated taluk, is divided into 18 pakuthies. The alluvial soil is very fertile. The chief crops are paddy and cocoanuts. It is also a centre of coir industry.

Harippad, the headquarters of the taluk is famous for the Subramonia temple which was rebuilt (in the ancient style of Kerala architecture) after it was accidentally destroyed by fire in 1921. At Mannarsala, close to this town, is a temple of Nagaraja (serpent-god), the largest in Kerala, reputed to contain 30,000 images of snake-gods. This temple is built in a grove and attracts large numbers of worshippers. Though the grove and the temple are infested with serpents, no snake-bite has been reported within its precincts.

Kayamkulam (municipal town), on the Kayamkulam lake is midway between Quilon and Alleppey. It was the capital of the Kayamkulam rajas till 1746 when Kayamkulam surrendered to Travancore. Remains of some irregular fortifications are seen to the north of the town. The importance of the town in early and medieval times lay in the fact that ships used to enter the lagoon through the Kayamkulam bar and that the country around was rich in pepper. Kayamkulam is now connected by means of roads and waterways with other important places in the State and the town is an important centre of inland trade. The church here dates from 829 A. D.

Thrikkunnapuzha, formerly belonged to the Raja of Edapally and commanded considerable importance when water-transport was the only means of communication; there are a palace and a temple on the beach.

Mavelikkara Taluk (area 111·4 sq. miles, population 231,632) is divided into 15 pakuthies. The Achankoil river flows along the border of this taluk. The chief crops are paddy, cocoanuts and tapioca.

Mavelikkara (municipal town) is the headquarters of the taluk. It was formerly the capital of the Mavelikkara principality. The remains of a fort about two miles in circumference with twenty-four bastions, each side having a gate-way in the centre, are visible. There are also an ancient temple and a palace. Nearby is a Buddhist shrine.

Pandalam, a small inland town was formerly the seat of the Pandalam Rajas, an independent ruling power, also called Iroor Swarupam. The principality was absorbed in Travancore in 1821.

Kandiyoor is a historical village near Mavelikkara where Travancore forces gained a decisive victory over Kayamkulam forces. It is the seat of an ancient Siva temple, reputed to be one of the oldest in Kerala, containing ten sub-shrines, believed to be made specially sacred by the presence of all the gods in the Hindu pantheon.

Bharanikkavu, contains a Buddhist shrine.

Noornad is the seat of a Leper Colony run by Government.

Thiruvalla Taluk (area 211 sq. miles, population 452,464) is divided into 26 pakuthies. It is a fertile taluk watered by the Manimala, Pampa and Achenkoil rivers. The chief crops are cocoanut, tapioca, paddy and sugarcane. It stands second among all taluks in the State in regard to population.

Thiruvalla (municipal town), stands on the Manimala river and is served by the Main Central Road. The temple here dedicated to Sree Vallabha (Mahavishnu) is believed to have been founded so early as 84 B. C. The dhwajam (flag staff) of this temple, 50 ft. high and 2 ft. in diameter is hewn out of granite though there is no quarry in the neighbourhood. This temple exhibits in a marked degree the use of gables, one of the peculiar features of Kerala temple architecture. This temple is closed to women except on two days in the year.

Aranmula, on the Pampa river, 6 miles north east of Chengannur is growing in importance as a summer-resort. There is an ancient shrine dedicated to Parthasarathi (the Divine Charioteer). This temple owns ornamental lamps of fine workmanship and rare beauty. The boat-race held here in August-September is a great attraction. Aranmula is famous for its metal mirror (mirrors made from bell-metal by a process known only to one or two families here).

Kaviyoor, (a corruption of Kapiyoor) contains a temple dedicated to Sree Hanuman. It is believed to show traces of Pallava influence and is noted for exquisite wood-carving.

Chengannur, famous for its Bhagavathi temple, formed the southernmost village among the 64 villages into which Kerala is supposed to have been divided by Parasurama.

Mannar, a centre of bell-metal industry was an important place in former times.

Niranom, is the seat of an ancient Christian church.

Ampalapuzha Taluk (area, 146·6 sq. miles, population 326,202) is divided into 13 pakuthies. A large portion of this taluk consist of punja paddy fields (where cultivation is carried after dewatering the fields). The chief crops are paddy and cocoanuts. Elephantiasis is prevalent.

Alleppey (municipal town) is the headquarters of the taluk. It has an all-the-year-round port, thanks to the mudbanks off the coast. It is often called the 'Venice of Travancore' as it is almost surrounded by sea and backwater and has many canals intersecting it. The town was founded about 1762, by Raja Kesava Das, who cleared the jungle-country on the coast, constructed canals and built three ships for trade and invited merchants from Bombay and Sind to settle down here. For several decades, Alleppey was the chief depot of the Travancore Government for the sale of forest and other produce and the seat of the State Commercial Agent. The pier is nearly 1000 ft. long; there is also a light-house (built in 1862) whose light is visible 16 miles away. The chief industries are coir and cocoanut oil. Alleppey is the world's chief supplier of coir yarn and coirmattings. The town contains a small Jain temple.

Ampalapuzha, 8 miles south of Alleppey with which it is connected by canal and road, was formerly the capital of the Chempakasseri Rajas .There is an ancient temple dedicated to Sri Krishna. It is known as the Dwaraka of the South. The fame of the *palpayasam* (nivedyam offered to the deity) has spread far and wide. At Karumadi, nearby, is an image of the Buddha, a relic of the past when Buddhism flourished in the State.

Purakkad, (the Porca of the Portuguese) about twelve miles south of Alleppey was a port of considerable importance in early times, when small ships could anchor near the shore sheltered by the mud-banks. Both the Portuguese and the Dutch had factories here. It was the scene of fighting between Travancore and Cochin forces in 1754 and between Travancore and Zamorin's forces in 1756. In the middle ages, the fishermen-pirates of the coast used Purakkad as a centre of their operations. Even after piracy on the western coast was finally destroyed by Admiral Watson and Clive, the pirates of Purakkad continued to be active, harassing and robbing boats that plied on the backwaters ; hence the origin of the place name 'Kallarkode' (the land of thieves).

Champakulam, on the Pampa river is famous for the boat-race held here in July every year.

Thottappalli, a place of strategic importance in former times was the scene of battles between Travancore forces and the armies of Chempakasseri and Cochin. There is a lock here to prevent the ingress of saline water into the Kuttanad paddy fields. Under the Kuttanad development scheme a spill-way has been planned at Thottapally to divert the flood waters of the rivers into the sea.

Edathua, is the seat of an ancient church ; the festival of St. George, celebrated in April-May attracts large numbers of worshippers.

Sherthala Taluk (area : 123·3 sq. miles, population 254,774) is divided into 15 pakuthies. The soil is sandy ; paddy and cocoanuts are the chief crops. Elephantiasis is prevalent. The taluk along with the island of Pallippuram was ceded to Travancore by Cochin in 1761.

Sherthala, is the headquarters of the taluk and the seat of an ancient Bhagavati temple. It is now a centre of coir industry. A part of the canal projected to link Sherthala with Alleppey has been completed. Sherthala was the headquarters of the northern division till it was shifted to Kottayam at the beginning of this century. A private leprosy clinic has been organised here.

Thuravur is the seat of two large temples and a centre of Konkani population.

Arukutty on the Vembanad lake was the seat of a Travancore Customs Office before the integration of Travancore and Cochin.

Thannirmukkom, also on the Vembanad lake, contains a large temple. It is said that in former times, small ships found anchorage in the lake here.

DISTRICT CENSUS HANDBOOK

QUILON

Part II

CENSUS DATA

SCHEME OF CENSUS TABLES

Census Tables prepared this time fall under the following four broad groups :—

A GENERAL POPULATION TABLES
B ECONOMIC TABLES
C AGE TABLES
D SOCIAL AND CULTURAL TABLES

There are five Tables under General Population Tables. These are :—

A I AREA, HOUSES AND POPULATION
A II VARIATION IN POPULATION DURING FIFTY YEARS
A III TOWNS AND VILLAGES CLASSIFIED BY POPULATION
A IV TOWNS CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1901
A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

Economic Tables comprise three separate Tables. These are :—

B I LIVELIHOOD CLASSES AND SUB-CLASSES
B II SECONDARY MEANS OF LIVELIHOOD
B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS

There are five Tables in the Group of Age Tables. These are :—

C I HOUSEHOLD (SIZE AND COMPOSITION)
C II LIVELIHOOD CLASSES BY AGE GROUPS
C III AGE AND CIVIL CONDITION
C IV AGE AND LITERACY
C V SINGLE YEAR AGE RETURNS

Social and Cultural Tables consist of seven Tables :—

D I LANGUAGES
D II RELIGION
D III SCHEDULED CASTES AND SCHEDULED TRIBES
D IV MIGRANTS
D V DISPLACED PERSONS BY DISTRICT OF ORIGIN AND DATE OF ARRIVAL IN INDIA
D VI NON-INDIAN NATIONALS
D VII LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

The C Tables mentioned above have been prepared only for a ten per cent. sample of the total population, but the figures given in the tables are estimates for the total population calculated from the figures for the sample.

To facilitate the preparation of the Census Tables, the State was divided into forty-three census tracts, each census tract comprising approximately a population of two to three lakhs, urban and rural areas being kept separate. As such, the urban or rural areas in more than one taluk had to be combined into one census tract in a few cases. Separate population of figures for the A Tables have been prepared for all taluks and towns. The B, C and D series Tables give figures only for census tracts.

A summary of the State Tables is given at the beginning for comparison and general information.

GENERAL TABLES

A I AREA, HOUSES AND POPULATION

This Table is the same as Table A I for the State. The figures have been broken up into rural and urban, for each of the Natural Sub-Divisions—Lowland, Midland and Highland. The area figures for the State and the Districts are those furnished by the Surveyor-General, India. The figures for further sub-divisions are those obtained from the Land Revenue Department. Adjustments due to exchange of enclaves between this State and Madras, under the Provinces and States (Absorption of Enclaves) Order, 1950, have been made in the areas of the districts concerned.

The term " village " as applied to this State requires explanation. The concentration of dwelling houses characteristic of villages in most other parts of India is almost absent in this State. This is a country of scattered homesteads. The village in this State, represents the territorial unit, 'kara' (in Travancore) and 'proverthy' (in Cochin). These are the smallest recognised sub-divisions of the taluk and have existed as such from early times.

GENERAL TABLES

A II VARIATION IN POPULATION DURING FIFTY YEARS (1901—1951)

This Table is prepared from previous Census Reports. Adjustments have been made for the changes in the boundaries of districts and in the exchange of enclaves under the Provinces and States (Absorption of Enclaves) Order 1950.

In the Table columns 3, 6 and 9 give the increase in population during each decade. In columns 4, 7 and 10 are given mean decennial growth rates. The mean decennial growth rate expresses the net variation in the decade as a percentage of the mean population which is the arithmetic mean of the populations at the beginning and end of the decade. If P_0 and P_1 are respectively the populations at the beginning and end of the decade,

$$\text{the mean decennial growth rate} = \frac{P_1 - P_0}{P_1 + P_0} \times 200$$

A II VARIATION IN POPULATION

Census year	Persons	Variation	Mean decennial growth rate	Males	Variation
1	2	3	4	5	6
					TRAVANCORE—
1901	3,768,999			1,897,684

GENERAL TABLES

B ECONOMIC TABLES—LIVELIHOOD CLASSES

This Table is a summary of State Table B I—Livelihood Classes and Sub-Classes. Means of Livelihood are given under eight categories—four relating to agriculture, the remaining four being non-agricultural.

The figures under each category include all self-supporting persons having that as their Principal Means of Livelihood and also those dependants living with them.

GENERAL

A[illegible]I AREA, HOUSES AND POPULATION

The Quilon District consisting of twelve taluks was called "Central Division" in previous Census Reports. However, Sherthala taluk was added to it only after the 1931 Census. One enclave—Tangasseri (275 acres)—has been added to this district from the Madras State under the Provinces and States (Absorption of Enclaves) Order, 1950. Tangasseri has been incorporated as a separate kara in Quilon pakuthy of Quilon taluk.

The area of the district as given by the Surveyor-General, India is 2729·6 sq. miles. The area as recorded in 1931 Census Report is different due to the omission of Sherthala ; that in 1941 is slightly in excess. The figures for the areas of the taluks furnished by the State Superintendent of Survey have been adjusted to reconcile them with the figures supplied by the Surveyor-General, India.

In regard to Municipal towns, the figures for area have been furnished by the respective Municipal Commissioners. All localities where conservancy arrangements under the Department of Public Health are in force have been treated as non-municipal towns at this Census. The area figures for non-municipal towns have been collected from the Departments of Public Health and Land Revenue.

In the case of a few villages, parts of which have been included in non-municipal towns, the area figures are only approximate.

The figures for area, houses and population have been distributed among the natural sub-divisions and these in turn into urban and rural classifications.

The following are the towns included in the urban area in this district :—

Serial No	*Name of town*	*Name of taluk in which the town is situated*
1	Quilon (M)	Quilon
2	Shenkotta (M)	Shenkotta
3	Kayamkulam (M)	Karunagapally

A II VARIATION IN POPULATION DURING THIRTY YEARS, 1921—1951

In the General Table A II, variation in the population of the State and of the districts has been traced for the period 1901—1951.

The present Table gives the population growth of the Quilon district, taluk-wise, only for the period 1921—1951. It has not been possible to consolidate taluk figures for 1901 and 1911 as detailed information regarding the adjustments required in the population figures for different taluks due to changes in their boundaries, could not be gathered from the Census Reports.

Column 9 of the Table gives the population at each census year as a percentage of the 1921 population.

A IV TOWNS CLASSIFIED BY POPULATION, WITH VARIATION SINCE 1901

Towns in the district have been classified under the following six classes:—

Class of Town		*Population*
I	..	1,00,000 and over
II	..	50,000—1,00,000
III	..	20,000—50,000
IV	..	10,000—20,000
V	..	5,000—10,000
VI	..	Less than 5,000

The growth in the population of these towns has been traced from 1901 to 1951.

In this Table (M) denotes Municipal town

A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

This Table gives the number of persons (including dependants) in each town who derive their Principal Means of Livelihood from the following livelihood classifications:—

Non-Agricultural

(*a*) Production other than cultivation

(*b*) Commerce

(*c*) Transport

(*d*) Other services and miscellaneous sources

Agricultural

(*e*) Non-cultivating owners of land; agricultural rent receivers

(*f*) Cultivators and cultivating labourers

B I LIVELIHOOD CLASSES AND SUB-CLASSES

The Table gives the distribution of the population in the district according to the Principal Means of Livelihood. All persons have been classified as self-supporting or non-earning dependants or earning dependants. The Principal Means of Livelihood of non-earning or earning dependant is the same as that of the self-supporting person on whom he depends.

The Principal Means of Livelihood have been given under two major heads, agricultural and non-agricultural. Each of these has been divided into four groups. The following are the eight groups :

(a) Agricultural classes

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land ; agricultural rent-receivers and their dependants

(b) Non-agricultural classes

1. Production other than cultivation
2. Commerce
3. Transport
4. Other services and miscellaneous sources

The figures have been given sex-wise. Under each category there is also the sub-division under rural and urban classifications. It has not been possible to give taluk figures; instead, figures for the census tracts in the district are given.

B II SECONDARY MEANS OF LIVELIHOOD

In this Table, self-supporting persons and earning dependants in each of the eight Principal Means of Livelihood classes, are classified according to their secondary means of livelihood, if they have any. The classification for secondary means of livelihood is the same as that for Principal Means of Livelihood.

B II SECONDARY MEANS OF LIVELIHOOD

B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES BY DIVISIONS AND SUB-DIVISIONS

Self-supporting persons in non-agricultural classes are classified in this Table under employer, employee and independent worker and are distributed in the various divisions and sub-divisions of industries and services. In the Table, instead of the names of the divisions and sub-divisions, code numbers are used. A list of the divisions and sub-divisions of industries and services with their code numbers is given below.

This Table, however does not include self-supporting persons of livelihood class VIII—other services and miscellaneous sources—whose sources of income fall under the following :—

(i) Persons living principally on income from non-agricultural property
(ii) Persons living principally on pensions, remittances, scholarships and funds
(iii) Inmates of jails, asylums, almshouses and recipients of doles
(iv) Beggars and vagrants
(v) All other persons living principally on income derived from non-productive activity

The fly leaf to this Table gives the details of persons under the five categories mentioned above.

List of the divisions and sub-divisions of industries and services

DIVISION 0 Primary industries not elsewhere specified

0·1 *Stock raising*

0·11 Herdsmen and shepherds
0·12 Breeders and keepers of cattle and buffaloes
0·10 Breeders and keepers of other large animals including transport animals

0·2 *Rearing of small animals and insects*

0·21 Poultry farmers
0·22 Beekeepers
0·23 Silkworm rearers
0·24 Cultivators of lac
0·20 Rearers of other small animals and insects

0·3 *Plantation industries*

Owners, managers, and workers in
0·31 Tea plantations
0·32 Coffee plantations
0·33 Rubber plantations
0·30 All other plantations but not including the cultivation of special crops in conjunction with ordinary cultivation of field crops

0·4 *Forestry and woodcutting*

0·40 Planting, replanting and conservation of for (including forest officers rangers and guards)
0·41 Charcoal burners
0·42 Collectors of forest produce and lac
0·43 Woodcutters

0·5 *Hunting (including trapping and game propagation)*

0·6 *Fishing*

0·60 Fishing in sea and inland waters including the operation of fish farms and fish hatcheries
0·61 Gatherers of chanks and pearls
0·62 Gatherers of sea weeds, sea shells, sponges and other water products

DIVISION 1 Mining and quarrying

1·0 *Non-metallic mining and quarrying not otherwise classified—including mining and quarrying of such materials as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt, bitumen*

1·1 *Coal mining—mines primarily engaged in the extraction of anthracite and of soft coals such as bituminous, sub-bituminous and lignite*

1·2 *Iron ore mining*

1·3 *Metal mining except iron ore mining*

1·31 Gold

1·32 Lead, silver and zinc

1·33 Manganese

1·34 Tin and wolfram

1·30 Other metallic minerals

1·4 *Crude petroleum and natural gas*

Oil well and natural gas, well operations (including drilling) and oil or bituminous sand operations

1·5 *Stone-quarrying, clay and sand pits*

Extraction from the earth of stone, clay, sand and other materials used in building or manufacture of cement

1·6 *Mica.*

1·7 *Salt, saltpetre and saline substances*

DIVISION 2 Processing and manufacture—foodstuffs, textiles, leather and products thereof

2·0 *Food industries otherwise unclassified*

2·01 Canning and preservation of fruits and vegetables

2·02 Canning and preservation of fish

2·03 Slaughter, preparation and preservation of meat

2·00 Other food industries

2·1 *Grains and pulses*

2·11 Hand pounders of rice and other persons engaged in manual dehusking and flour grinding

2·12 Millers of cereals and pulses

2·13 Grain parchers and makers of blended and prepared flour and other cereal and pulse preparations

2·10 Other processes of grains and pulses

2·2 *Vegetable oil and dairy products*

2·21 Vegetable oil pressers and refiners

2·22 Manufacturers of hydrogenated oils

2·23 Makers of butter, cheese, ghee and other dairy products

2·3 *Sugar industries*

2·31 Gur manufacture

2·30 Other manufactures and refining of raw sugar, syrup and granulated or clarified sugar from sugarcane or from sugar beets

2·4 *Beverages*

2·41 Brewers and distillers

2·42 Toddy drawers

2·43 Ice-manufacturers

2·40 Manufacture of aerated and mineral waters and other beverages

2·5 *Tobacco*

2·51 Manufacture of bidis

2·50 Manufacture of tobacco products (other than bidis) such as cigarettes, cigars, cheroots and snuff. (Stemming, redrying and other operations connected with preparing raw leaf tobacco for manufacturing are also included)

2·6 *Cotton textiles*

2·61 Cotton ginning, cleaning and pressing

2·62 Cotton spinning, sizing and weaving

2·63 Cotton dyeing, bleaching, printing, preparation and sponging

2·7 *Wearing apparel (except footwear) and made-up textile goods*

2·71 Tailors, milliners, dress makers and darners

2·72 Manufacturers of hosiery, embroiderers, makers of crepe, lace and fringes

2·73 Fur-dressers and dyers
2·74 Hat-makers and makers of other articles of wear from textiles
2·75 Manufacture of house furnishing of textiles
2·76 Tent makers
2·70 Makers of other made-up textile goods, including umbrellas

2·8 *Textile industries otherwise unclassified*

2·81 Jute pressing, baling, spinning and weaving
2·82 Wollen spinning and weaving
2·83 Silk reeling, spinning and weaving
2·84 Hemp and flax spinning and weaving
2·85 Manufacture of rayon
2·86 Manufacture of rope, twine, string and other related goods from cocoanut, aloes, straw, linseed and hair
2·80 All other (including insufficiently described) textile industries, including artificial leather and cloth

2·9 *Leather, leather products and footwear*

2·91 Tanners and all other workers in leather
2·92 Cobblers and all other makers and repairers of boots, shoes, sandals and clogs
2·90 Makers and repairers of all other leather products

DIVISION 3 Processing and manufacture—metals, chemicals and products thereof

3·0 *Manufacture of metal products, otherwise unclassified*

3·01 Blacksmiths and other workers in iron and makers of implements
3·02 Workers in copper, brass and bell metal
3·03 Workers in other metals
3·04 Cutlers and surgical and veterinary instrument makers
3·05 Workers in mints, die sinkers, etc.
3·06 Makers of arms, guns, etc. including workers in ordnance factories

3·1 *Iron and steel (basic manufacture)*

Manufacture of iron and steel, including all processes such as smelting and refining; rolling and drawing; and alloying and the manufacture of castings, forgings and other basic forms of ferrous metals

3·2 *Non-ferrous metals (basic manufacture)*

Smelting and refining, rolling, drawing and alloying and the manufacture of castings, forgings and other basic forms of non-ferrous metals

3·3 *Transport equipment*

3·31 Building and repairing of ships and boats
3·32 Manufacture, assembly and repair of railway equipment, motor vehicles and bicycles
3·33 Manufacture of aircraft
3·34 Coach builders and makers of carriages, palki, rickshaw, etc., and wheel wrights
3·30 Manufacture of all other transport equipment

3·4 *Electrical machinery, apparatus, appliances and supplies*

3·41 Manufacture of electric lamps
3·42 Manufacture of electric fans and other accessories
3·43 Manufacture of electric wire and cable
3·40 Manufacture of electrical generating transmission and distribution apparatus; electrical household appliances other than lights and fans; electrical equipment for motor vehicles, aircraft and railway locomotives and cars; communication equipment and related products, including radios, phonographs, electric batteries, X-Ray and therapeutic apparatus; electronic tubes, etc.

3·5 *Machinery (other than electrical machinery) including engineering workshops*

Engineering workshops engaged in producing machine and equipment parts

3·6 *Basic industrial chemicals, fertiliser and power alcohol*

3·61 Manufacture of basic industrial chemicals such as acids, alkali salts
3·62 Dyes, explosives and fireworks
3·63 Synthetic resins and other plastic materials (including synthetic fibres and synthetic rubber)
3·64 Chemical fertilisers
3·65 Power alcohol

3·7 *Medical and pharmaceutical preparations*

3·8 *Manufacture of chemical products otherwise unclassified*

3·81 Manufacture of perfumes, cosmetic and other toilet preparations
3·82 Soaps and other washing and cleaning compounds
3·83 Paints, varnishes and lacquers and polishes
3·84 Ink
3·85 Matches
3·86 Candle
3·87 Starch
3·80 Other chemical products

DIVISION 4 Processing and manufacture—not elsewhere specified

4·0 *Manufacturing industries otherwise unclassified*

4·01 Manufacture of professional scientific and controlling instruments (but not including cutlery, surgical or veterinary instruments)
4·02 Photographic and optical goods
4·03 Repair and manufacture of watches and clocks
4·04 Workers in precious stones, precious metals and makers of jewellery and ornaments
4·05 Manufacture of musical instruments and appliances
4·06 Stationery articles other than paper and paper products
4·07 Makers of plastic and celluloid articles other than rayon
4·08 Sports goods makers
4·09 Toy makers
4·00 Other miscellaneous manufacturing industries, including bone, ivory, horn, shell, etc.

4·1 *Products of petroleum and coal*

4·11 Kerosene and petroleum refineries
4·12 Coke ovens
4·10 Other manufactures of products from petroleum and coal

4·2 *Bricks, tiles and other structural clay products*

Structural clay products such as bricks, tiles, etc.

4·3 *Cement—cement pipes and other cement products*

Manufacture of cement, cement pipes and cement concrete products

4·4 *Non-metallic mineral products*

4·41 Potters and makers of earthenware
4·42 Makers of porcelain and crockery
4·43 Glass bangles, glass beads, glass necklaces, etc.
4·44 Makers of other glass and crystal ware
4·40 Makers of other miscellaneous non-metallic mineral products

4·5 *Rubber products*

4·6 *Wood and wood products other than furniture and fixtures*

4·61 Sawyers
4·62 Carpenters, turners and joiners
4·63 Veneer and plywood makers, match veneer and splint makers
4·64 Basket makers
4·60 Other industries of woody materials, including leaves, but not including furniture or fixtures

4·7 *Furniture and fixtures*

Manufacture of household, office, public building, professional and restaurant furniture ; office and store fixtures, screens, shades, etc., regardless of material used

4·8 *Paper and paper products*

Manufacture of paper and paper board and articles of pulp, paper and paper board

4·9 *Printing and allied industries*

4·91 Printers, lithographers, engravers
4·92 Bookbinders and stitchers

DIVISION 5 Construction and utilities

5·0 *Construction and maintenance of works—otherwise unclassified*

5·1 *Construction and maintenance—buildings*

5·11 Masons and bricklayers
5·12 Stone-cutters and dressers
5·13 Painters and decorators of house
5·10 Other persons engaged in the construction or maintenance of buildings other than buildings made of bamboo or similar materials

5·2 *Construction and maintenance—roads, bridges and other transport works*

5·3 *Construction and maintenance—telegraph and telephone lines*

5·4 *Construction and maintenance operations—irrigation and other agricultural works*

5·5 *Works and services—electric power and gas supply*

5·51 Electric supply
5·52 Gas supply

5·6 *Works and services—domestic and industrial water supply*

5·7 *Sanitary works and services—including scavengers*

DIVISION 6 Commerce

6·0 *Retail trade otherwise unclassified*

6·01 Hawkers and street vendors otherwise unclassified
6·02 Dealers in drugs and other chemical stores
6·03 Publishers, booksellers and stationers
6·00 General storekeepers, shopkeepers and persons employed in shops otherwise unclassified

6·1 *Retail trade in foodstuffs (including beverages and narcotics)*

6·11 Retail dealers in grain and pulses ; sweetmeats, sugar and spices, dairy products, eggs and poultry ; animals for food ; fodder for animals ; other foodstuffs, vegetables and fruits
6·12 Vendors of wine, liquors, aeratad waters and ice in shops
6·13 Retail dealers in tobacco, opium and ganja
6·14 Hawkers and street-vendors of drink and foodstuffs
6·15 Retail dealers in pan, bidis and cigarettes

6·2 *Retail trade in fuel (including petrol)*

6·21 Petroleum distributors
6·20 Retail dealers (including hawkers and street-vendors) in firewood, charcoal, coal, cow dung and all other fuel except petroleum

6·3 *Retail trade in textile and leather goods*

Retail trade (including hawkers and street-vendors) in piece goods, wool, cotton, silk, hair, wearing apparel, made-up textile goods, skin, leather, furs, feathers, etc.

6·4 *Wholesale trade in foodstuffs*

Wholesale dealers in grains and pulses, sweet-meats, sugar and spices ; dairy products, eggs and poultry animal for food, fodder for animals, other foodstuffs, wholesale dealers in tobacco, opium and ganja

6·5 *Wholesale trade in commodities other than foodstuffs*

6·6 *Real estate*

House and estate agents and rent collectors except agricultural land

6·7 *Insurance*

Insurance carriers and all kinds of insurance agents and other persons connected with insurance business

6·8 *Money lending, banking and other financial business*

Officers, employees of joint-stock banks and co-operative banks, munims, agents or employees of indigenous banking firms, individual money lenders, exchangers and exchange agents, money-changers and brokers and their agents

DIVISION 7 Transport, storage and communications

7·0 *Transport and communications otherwise unclassified and incidental services*

Persons concerned with airfields and aircraft other than construction of airfields and air ports

7·4 *Railway transport*

Railway employees of all kinds except those employed on construction works

7·5 *Storage and warehousing*

The operation of storage facilities such as ware-houses, cold storage, safe deposits when such storage is offered as an independent service

7·6 *Postal services*

7·7 *Telegraph services*

7·8 *Telephone services*

7·9 *Wireless services*

DIVISION 8 Health, education and public administration

8·1 *Medical and other health services*

8·11 Registered medical practitioners

8·12 Vaids, hakims, and other persons practising medicine without being registered

8·13 Dentists

8·14 Midwives

8·15 Vaccinators

8·16 Compounders

8·17 Nurses

8·10 All other persons employed in hospitals or other public or private establishments rendering medical or other health services ; but not including scavengers or other sanitary staff

8·2 *Educational services and research*

8·21 Professors, lecturers, teachers and research workers employed in universities, colleges and research institutions

8·22 All other professors, lecturers and teachers

8·20 Managers, clerks and servants of educational and research institutions, including libraries and museums, etc.

8·3 *Army, Navy and Air Force*
- 8·31 Army
- 8·32 Navy
- 8·33 Air Force

8·4 *Police (other than village watchmen)*

8·5 *Village officers and servants, including village watchmen*

8·6 *Employees of municipalities and local boards (but not including persons classifiable under any other division or sub-division*

8·7 *Employees of State Governments (but not including persons classifiable under any other division or sub-division)*

8·8 *Employees of the Union Governments (but not including persons classifiable under any other division or sub-division)*

8·9 *Employees of Non Indian Governments*

DIVISION 9 Services not elsewhere specified

9·0 *Services otherwise unclassified*

9·1 *Domestic services (but not including services rendered by members of family households to one another)*
- 9·11 Private motor drivers and cleaners
- 9·12 Cooks
- 9·13 Gardeners
- 9·10 Other domestic servants

9·2 *Barbers and beauty shops*
Barbers, hair dressers and wig makers, tatooers, shampooers, bath houses

9·3 *Laundries and laundry services*
Laundries and laundry services, washing and cleaning

C I HOUSEHOLD SIZE AND COMPOSITION

This Table has been prepared from a four per cent. sample of households in the National Register of Citizens. Estimates for the whole district with urban—rural break-up were calculated from the figures obtained from the sample.

The figures are arranged under two broad groups:—

(i) Size of households

(ii) Composition of households

In (i) households have been called:

(a) "Small" if the number of inmates is 3 or less

(b) "Medium" if the number of inmates is between 4 and 6

(c) "Large" if the number of inmates is between 7 and 9

(d) "Very large" if the number of inmates is 10 or more

In (ii) the inmates in a household are described under 1

(a) Relationship to the head of the household

AGE GROUPS

Tables C II, CIIII, C IV and C V

These Tables have not been prepared for the entire population. At the time of sorting, a ten percent. sample of slips for every village and ward (in municipal towns) was extracted on a purely random basis and the slips in the sample were used for these Tables.

Based on the sample figures, estimates for the districts have been calculated.

C II LIVELIHOOD CLASSES BY AGE GROUPS

The Table gives the estimated figures for the district under the eight Livelihood Classes in broad age groups.

D III SCHEDULED CASTES AND SCHEDULED TRIBES

This Table gives the figures for Scheduled Castes and Scheduled Tribes. Hindu communities listed below fall under the category "Scheduled Castes" in this State.

1. Ayyanavar
2. Bharatar
3. Chakkiliyan
4. Domban
5. Eravalan
6. Kakkalan
7. Kanakkan
8. Kavara
9. Kootan (Koodan)
10. Kuravan
11. Mannan
12. Nayadi
13. Padannan
14. Pallan
15. Palluvan
16. Panan
17. Paravan
18. Parayan (Sambavar)
19. Pathiyan
20. Perumannan
21. Pulayan
22. Thandan
23. Ulladan
24. Uraly
25. Vallon
26. Valluvan
27. Vannan
28. Velan
29. Vetan
30. Vettuvan

The list of Scheduled Tribes for the State is given below:—

1. Hill Pulaya
2. Kadan
3. Kanikkaran
4. Kochuvelan
5. Mala Arayan
6. Mala Vedan
7. Mala Vedan
8. Malayan
9. Malayarayan
10. Mannan
11. Muthuvan
12. Palleyan
13. Palliyar
14. Ulladan (Hill dweller)
15. Uraly
16. Vishavan

DISTRICT CENSUS HANDBOOK

QUILON

Part III

VILLAGE STATISTICS

VILLAGE STATISTICS

The details presented in the Tables on Village Statistics have been compiled from census data, and reports from taluk census officers, supervisors and enumerators. The smallest area for which separate figures have been given is the village or ward. Information gathered for each village or ward falls under the following heads :—

(i) Name and code number
(ii) Area
(iii) Dwelling houses
(iv) Institutions
(v) General information
(vi) Population

(i) *Name and code number.* Just as every plot of surveyed land has been given a survey number, every unit of area covered by this census has been assigned a code number. The four districts in the State have been numbered 1, 2, 3 and 4, Trivandrum being 1, Quilon 2, Kottayam 3 and Trichur 4. Within each district, the taluks have been serially numbered, in relation to geographical position, as 1-1, 1-2, etc. Within each taluk, the pakuthies (in Travancore) and proverthies (in Cochin) are numbered serially. Within each pakuthy, the karas are once again given numbers. Thus the code number of a kara will involve 4 numerals, the first relating to the district, the second to the taluk, the third to the pakuthy and the fourth to the kara.

The municipal towns have similar code numbers. Within the district, the municipal towns are given Roman numerals. Within each municipality, the wards are also assigned code numbers.

It is hoped that in course of time, code numbers will come into common use.

(ii) *Area.* The area figures for each kara have been obtained from the Tahsildars while those for wards in municipal towns and portions of karas in non-municipal towns have been furnished by the municipal and public health officers. These figures are only approximate as correct area records for such divisions of the pakuthy do not exist.

For each kara, figures for areas under wet-land, dry-land and waste-land are also given. These figures are also only approximate.

(iii) *Dwelling houses.* The figures under this head give the number of dwelling houses in each kara or ward.

(iv) and (v) *Institutions and general information.* Information relating to these items was collected by each enumerator in schedules supplied for the purpose.

Though it is not exhaustive, it is claimed that details on most of the important aspects of social life in each locality are made available.

(vi) *Population.* The total population of each area, the number of literates and the number of males and females in each of the eight livelihood classes are given.

The following abbreviations have been used :—

L, M, or H, immediately following the name of a pakuthy or proverthy denotes the natural subdivision of the State in which it is situated—lowland, midland or highland respectively.

INDEX

[*The names of pakuthies are printed in thick type. Karas marked with asterisks are parts of non-municipal towns. Where more than one kara has the same name, the code numbers are given, to help their identification.*]
