PREFACE

The Registrar-General, India, recommended to State Governments, the publication of District Census Handbooks containing 1951 Census data for the districts and such other information as may be of general interest. The Government of Travancore-Cochin accepted the recommendation and sanctioned in Government Order No. RM. 3-3468|RD dated 23-5-1951 the publication of four District Census Handbooks for the State. The present volume is published in pursuance of this order.

The Handbook is divided into three parts: Part I contains a short sketch of the district and the people. Part II embodies the Census Tables for the district. For purposes of comparative study, three of the most important State Tables—A 1. Area, Houses and Population, A 2. Variation in Population during 50 years (1901-1951) and Economic Table—Livelihood Classes—have been placed at the beginning of this part. Each Table is preceded by a short note explaining its contents. Part III devoted to Village Statistics is the result of an attempt made to bring together the main details relating to villages in this district. An index of place-names has been appended to this part to facilitate ready reference.

It is hoped that the Handbook will serve as a frame for future studies and that its scope and coverage will be increased from time to time.

This work would not have been possible but for the co-operation and assistance of the State Government at every stage of its preparation. Almost all departments have helped me with their contributions. I wish to record my acknowledgment in particular to the departments of Agriculture, Public Health, Labour, Public Instruction, Electricity, Telephones, Forest and Geology.

The Tahsildars and Municipal Commissioners in the State have borne the brunt of the work involved in the collection of facts and figures contained in the Handbook. To them, I tender my special thanks.

Other agencies who have been of great assistance are the Travancore Devaswom Board Indian Central Cocoanut Committee, Indian Rubber Board and Cochin Harbour Administration. It is a pleasure to acknowledge my thankfulness to them.

The printing of the Handbook was done by the Government Central Press, Trivandrum, at a time when the Press was working at full pressure on other urgent and voluminous items of printing for Government. It is therefore, with very great pleasure, that I place on record my appreciation of the untiring efforts of the Superintendent and his assistants in bringing out the Handbook.

It is only fair that I add a word about my office staff who were patiently at work evolving step by step the Tables from the large mass of data collected at the census. Checking and cross-checking of the Tables has been a difficult task ; so also has been the typing of the Tables. I wish to express my feelings of gratefulness to one and all of my assistants for their devoted labours in this behalf. I must single out my Personal Assistant, Sri K. Parameswara Menon, M. A., for the unfailing help he gave me at each stage of the work. He unstintedly shared with me the responsibility in producing the Handbook and I wish to express my appreciation of the work done by him.

I shall be failing in my duty if I do not place on record my gratefulness to Sri R. A. Gopalaswami, I. C. S., Registrar-General, for the guidance and the stimulating suggestions received from him in this work.

U. SIVARAMAN NAIR.

Office of the
Superintendent of Census Operations,
Trivandrum, 23rd August 1952.

DISTRICT CENSUS HANDBOOK

KOTTAYAM

Part I

A SHORT SKETCH

A. DISTRICT AND PEOPLE

1. INTRODUCTORY

The Kottayam district has an area of 2954·1 square miles which is 32·3 per cent of the total area of the State. The headquarters of the district is Kottayam.

The district is divided into eight taluks. The names, headquarters, relative areas and the percentage distribution of population in these taluks are as follows:—

Name of taluk	*Headquarters*	*Percentage*	
		Area	*Population*
Changanachery	Changanachery	9·10	20·26
Kottayam	Kottayam	7·25	19·26
Vaikom	Vaikom	4·65	11·07
Minachil	Palai	9·43	15·65
Peermede	Peermede	15·28	5·40
Devikulam	Devikulam	22·60	4·83
Thodupuzha	Thodupuzha	12·25	8·96
Muvattupuzha	Muvattupuzha	19·44	14·57

The population of the district according to 1951 census is 1,783,771; this forms 19·2 per cent of the State population.

2. PHYSICAL FEATURES

The mountainous amphitheatre of the Western Ghats, which bound the district on its eastern side, (except for the Anchanad valley) dominates the topography of the district and shapes its climate. The Ghats do not form a single chain but consist of a series of ridges.

Mountains

To the north, the mountains rise to an elevation of 8,000 feet with plateaus over 7,000 feet; this group of mountains is known as the Anamalais. Anamudi, the highest peak in the Anamalais, rises to 8,837 feet, a summit higher than any south of the Himalayas. Around Anamudi, there are several other peaks varying in elevation from 6,500 feet to 8,400 feet. The chief among them are Eravimala or Hamilton's plateau 7,880 feet, Kattumala 7,800 feet, Chenthavara 7,664 feet, Kumarikal 7,540 feet, Karinkulam 7,500 feet and Devimala 7,200 feet. These hills together with the lower ground from which they rise form the High Ranges. Though often called a plateau, the tract of land known as the High Ranges is really a succession of high hills with deep valleys between them and contains several small plateaus, among which the most important are:—

Gudarmala lies between Karinkulam and Devimala—average elevation 6,000 feet; area 4 sq. miles.

Devikulam lies to the west of the above—average elevation 6,000 feet; area 3 sq. miles.

Anaycudoo lies west of Devikulam plateau.

Eravimala lies north of Anamudi and is separated from it by a deep valley-elevation 7,300 feet; area 18 sq. miles.

Perumalmala—elevation 7,000 feet; area 3 sq. miles.

Anchanad—elevation 3,100 feet; area 30 to 40 sq. miles.

Vattavada—elevation 6,000 feet.

Some of the valleys in the High Ranges are Anaycudoo (west of Devikulam plateau; elevation 5,120 feet). Anchanad—elevation 3100 feet and Kundala—elevation 5,500 feet.

From the High Ranges the land slopes down steeply in three directions; north-east to the Anchanad valley, to the west into the valley of the Idiyara river and southwards to the Cardamom and Peermede Hills. The Cardamom and Peermede Hills form an extensive hill

plateau 60 miles long and 20 miles broad, with an elevation of about 3,000 to 3,500 feet; some peaks and hills rise to 5,000 feet. Chains of hills which diminish in altitude as they go to the west, run from the mountain ranges and plateaus to the west and north-west; the valleys formed by these hills are drained by several rivers.

Passes

There are a few mountain passes in this district. *Bodinaickannur* pass is the northernmost of the passes; it connects Bodinaickannur in Madura district with the High Ranges and leads to Devikulam, Chitrapuram and Kothamangalam.

Thevaram pass connects Thevaram with the Cardamom Hills. It reaches the top of the Ghats by a very steep ascent and is little used.

Kambam pass though rugged for 1½ miles is one of the best passes across the hills between Travancore and Madura. In ancient days much trade was carried through this pass but as this trade has been diverted to other routes the pass is now practically closed.

The *Gudallur* or *Kumili* pass connects Peermede and Kanjirappalli with Kambam and Uttamapalayam across the Ghats. A large volume of traffic passes through this pass.

South of Gudallur the *Sivagiri* pass ascends the hills to Sabarimala but is of little importance and is only frequented by cattle.

Rivers

The chief rivers in this district from south to north are :—

The *Manimala* river, a tributary of the Pampa river in Quilon district rises in the hills near Peermede, flows through the Peermede and Changanachery taluks receiving a number of tributaries; then it takes a south-westerly course to join the Pampa in the Thiruvalla taluk.

The *M'nachil* river (length 35 miles) rises on the Peermede plateau a little above Nallatannippara at an elevation of 3,500 feet; in its course through mountainous country it is joined by two tributaries, the Kavanar and the Kodamurutty river. It then takes a south-westerly course and passing Irattupettah, Kidangoor and Kottayam, flows into the Vembanad lake (south of Vechur) through a number of distributaries. It is navigable for 26 miles.

The Muvattupuzha river (length 62 miles) is formed by the union of three streams, the Thodupzha, the Vadakkan and the Kothamangalam, which rising on the western slopes of the Peermede plateau, unite near the town of Muvattupuzha. It then flows for about 8 miles in a westerly direction and then turns south passing Ramamangalam and Piravam. At Vettikkattumukku it divides itself into two branches, both flowing into the Vembanad lake. It is navigable for 42 miles from its mouth.

The Periyar (length 142 miles) is the longest and largest river in the State. It rises from the forest-clad Sivagiri peak, south of Devikulam, at an elevation of 8,000 feet. After a course of ten miles northward it is joined by the Mullayar at an elevation of 2,800 feet. It then turns due west and continues in that direction for about 10 miles, over a sandy bed. About 7 miles below Mullayar Thavalam it runs through a gorge where the Periyar dam has been constructed. From the Periyar dam the river flows north receiving a number of tributaries, Perumthura, Kattapanayar, Chittar, Perinjankutty and Muthirappuzha. *The Muthirappuzha* river is made to flow through a tunnel cut out of solid rock to generate electricity for the Pallivasal hydro-electric scheme. From the Muthirappuzha junction the Periyer flows north-west; it descends about 800 feet in 4½ miles. At Kokkaranippara the river falls over a cliff 100 feet high. Ten miles lower down the river becomes navigable for boats. Flowing northwest it is joined by the Deviar, and the Idiyara or Idamala before it comes to Malayattur.

From Malayattur it takes a winding course for 14 miles up to Alwaye: at Alwaye it divides itself into two branches, one flowing northwest into the Cranganur backwater and the other flowing southwest into the backwater near Varappuzha. It is navigable for 60 miles above its mouth.

Lake

The Vembanad lake forms the western boundary of this district. It is the largest backwater in the State; the maximum length is 52 miles and maximum width, 9 miles. There is an island in the centre (called Pathiramanal) with cocoanut plantations. Shallower portions of the lake have been reclaimed for rice cultivation. Being connected with the sea at Cochin the Vembanad lake is subject to tidal action; the maximum height of the tides is three feet and the average, 18 inches.

Natural sub-divisions

Based on physical features, the district falls into three natural sub-divisions. The lowland bordering the lake on the west covers 7·4 per cent. of the total area. The midland, consisting of the undulating country east of the lowland occupies 31·0 per cent. of the area. The highland on the extreme east is covered by thick forests and forms 61·6 per cent. of the area of the district.

3. GEOLOGY

Crystalline rocks predominate in this district. They can be grouped under older gneisses, charnockite suite, amphibolites, granite-pegmatites etc. Some of them are igneous and others metamorphic in origin.

In the coastal taluk of Sherthala which is of recent emergence, there are extensive superficial beds of loose, clean, quartz-sand suitable for glass manufacture. The Travancore Ogale Glass manufacturing Co. Ltd., Alwaye, is using this raw material for glass making. This high grade material, much in demand, is meeting also the requirements of several glass factories outside the State.

Economic minerals

The backwaters of the coastal areas particularly the Vembanad lake contain large quantities of lime shells, a pure form of calcium carbonate. As the live shells come in from the sea and thrive for a time in the backwaters and then die, the deposit of dead shells is being replenished from time to time. A cement factory located on the banks of this lake is using this raw material for the manufacture of cement.

Lime shells

Pure milk-white quartz, suitable for ceramic industry occurs in Iraviperur near Thiruvalla.

China clay or kaolin free from iron compounds also occurs in many localities in the region of lateritised gneiss. It is found in many places at varying depths below the surface. An inferior type of clay used for tile and brick manufacture also occurs abundantly in the district.

Graphite occurs in workable quantities in many parts of the district—Muvattupuzha, Thodupuzha, Kunnathunad etc.

A vein of mica (Biotite) occurs at Kurinjee, north of Ramapuram.

4. CLIMATE, RAINFALL AND VEGETATION

The diversity of the physical features of the district results in a corresponding diversity of climate. In some of the mountain peaks pinching cold is experienced; lower down at an elevation of between three and five thousand feet one meets with a bracing cold claimate. In the coast fringing the lake the climate is generally hot with a high degree of atmospheric humidity.

Climate

The temperature in the plains ranges from 70° to 80°; at the base of the Ghats it goes up by 5 or 6 degrees on either side. Higher up in the mountains it falls to 50° in the day and to freezing point in winter nights. On the High Ranges, the thermometer ranges from 45° to 60° in March and April and between 30° to 60° in November, December and January.

The seasons are largely controlled by the two periods of rainfall viz., the south-west monsoon from June to August and the retreating or north-east monsoon from October to December.

January and February are the driest and coolest months of the year. March, April and May are the hot months; during the latter part of this period, summer storms occur during afternoon hours accompanied by thunder and lightning. The south-west monsoon extends from June to August, the month of maximum precipitation for this district being July. The monsoon weakens towards the middle of August. August and September are generally marked by intermittent rains. The northeast monsoon begins in October and lasts till December but owing to the height of the Western Ghats it does not produce much rain in this distrtct. The latter half of December witnesses the change to dry weather.

This district receives more rain than the others; about 80 per cent of the rainfall is received during the south-west monsoon. The highest rainfall in the State occurs at Neriamangalam in the Muvattupuzha taluk, at the foot of the mountains; here the average rainfall is 208 inches per annum. Peermede receives on an average 201 inches (in 1882 a rainfall of 297 inches was recorded here). Stations like Chinnar facing the eastern slopes of the Ghats get little rain.

Rainfall

The following tables give statistics of rainfall and of rainy days in the district:

Forests

The forests in this district can be roughly divided into two types, deciduous and evergreen. In the deciduous areas the chief trees are teak, irul, themba, venga, anjali and unnom; in the evergreen areas karanjily, pyne, nangu and cotton wood are the chief trees. In addition to small teak plantations there are a few sandal wood plantations also in this district. The elephant, bison, bear, leopard, and wild buffalo are common in the forests; sambur and spotted dear are also met with occasionally. There are, besides, several varieties of birds.

5. AGRICULTURE

Soils

Swamp paddy (Punja) lands occur in the taluks of Changanachery, Kottayam and Vaikom; they constitute the chief rice growing region in this district. Patches of kari soils are found in Vaikom taluk. The soils in the hills are loamy with a great admixture of humus. The soils in the district are generally deficient in nitrogen, phosporus and lime. The results of the analyses of representative samples of soil from paddy lands in various taluks are given below:

Taluk	Reaction (Ph)	Nitrogen (%)	Potash (K_2O)	Phosphoric acid (P_2O_5) %	Lime (CaO) %
1. Changanachery (Vazhappalli)	4·4	0·20	0·15	0·02	Trace
2. Kottayam (Pallom)	5·2	0·18	0·15	0·05	0·15
3. Kottayam (Kayal Reclamation Block)	7·0	0·14	0·46	0·13	0·25
4. Vaikom (Mundar—Kari)	4·5	0·43	0·52	0·01	0·32
5. Kunnathunad (Perumpavur)	6·5	0·18	0·20	0·08	0·07
6. Parur (Edappalli)	5·8	0·18	0·43	0·03	0·18

Irrigation

Cultivation depends mostly on the rains which here are generally heavier than in the other districts of the State. Lift irrigation by electric power is carried on, on a very limited scale at Muvattupuzha.

Implements

The implements used are the wooden plough and spades of different patterns. A few tractors are used in the punja lands and in the estates devoted to plantation crops like tea, rubber, and coffee.

Manures

All available green leaf, cattle dung and ash are used; they are however insufficient and in recent years, agriculturists have begun to use fertilisers like ammonium sulphate, bonemeal etc. Municipal compost is also in demand.

Principal crops

In the lowland the principal crops are rice and cocoanut; plantain and arecanut are also cultivated. Sugarcane is cultivated in the Kottayam taluk. Cocoanut is cultivated fairly extensively, in some of the midland areas also. The other crops in the midland are tapioca, pepper and ginger. Lemon grass is cultivated in the Minachil, Thodupuzha and Muvattupuzha taluks. Fruit trees include jack, mango, tamarind, breadfruit and papaya. Both in the lowland and midland pulses and root crops like yams, sweet potatoes etc. are also grown. The plantation crops in the district are tea, rubber and cardamom. In the High Ranges orange and English vegetables are also grown.

The following table gives the areas under principal crops:—

Area of taluk and area under principal crops

Name of taluk	Area in sq. miles		Area in sq. miles under principal crops		
	Total	Occupied	Paddy	Cocoanut	Tapioca
District	**2954·1**	**1572·1**	**208·1**	**242·9**	**125·0**
Changanachery	268.9	213·0	41·8	37·7	22·0
Kottayam	214·2	178·8	63·7	47·5	15·2
Vaikom	137·3	119·3	39·5	44·9	26·9
Minachil	278·7	191·3	15·6	49·8	22·8
Peermede	451·3	128·9	5·5	..	0·88
Devikulam	667·5	410·8	12·5	..	0·40
Thodupuzha	361·9	135·7	13·5	47·0	14·0
Muvattupuzha	574·3	194·3	16·0	16·0	22·8

The area under the other important crops in the district are :—

Rubber	102·9	square miles
Tea	121·5	,, ,,
Pepper	63·4	,, ,,
Ginger	41·7	.. ,,
Coffee	16·3	,, ,,

Plant diseases and pests

The most injurious pest to paddy is the swarming caterpillar which often appears in huge swarms when the crop is young and causes large-scale destruction. Other pests are the rice bug, the stem borer and the rice hispa. The cocoanut is subject to the leaf rot, leaf blight and bud rot diseases; the cocoanut leaf roller pest is present in many areas. Plantain is seriously affected by the bunchy top disease. Ginger is often attacked by maggots of a species of flies.

Among plantation crops, tea is subject to blister blight, a fungous disease and also attacked by the tea mosquito and the red slug. Thrips cause considerable damage to the cardamom crop.

Livestock

The local cattle are diminutive in size, poor in milk yield and in working capacity. A good species of cow, small in size but of good milk yield is found in Vechur, a village in Vaikom taluk. Small dairy herds of crossbreds (with English cows) are maintained by the staff of the Kanan Devan Hills Tea Co., at Munnar. During the last few years efforts have been made to upgrade local stock by the import of the Red Scindhi breed.

Inadequacy of production

In the context of the present food shortage the insufficiency of local production has to be emphasised. Local production does not suffice even for six months. Schemes for increased food production include the reclamation of more shallow stretches of the Vembanad lake for rice cultivation. Under a combined colonisation and food production scheme a compact area of 32,000 acres of swamp land at Vandanmettu, suitable for cultivation of rice, tapioca and vegetables has been allotted to colonists in blocks of five acres.

It is however clear that improvement of agricultural production can be achieved only by the introduction of improved methods of cultivation and increased facilities for irrigation. One of the chief obstacles to raising the efficiency of agriculture is the existence of uneconomic holdings. Owing to excessive sub-division and fragmentation, 73 per cent. of the wet land plots are less than 1 acre in extent; dry land is much more fractionalised. The size of average family holdings is also small. According to a survey conducted by the Government in 1941, it was 3·13 acres in the lowland, 2·94 in the midland, and 5·76 acres in the highland and 3·23 acres for the State as a whole. Judging from average family income and expenditure figures, most of these holdings were found to be distinctly uneconomic. Soil erosion and agricultural indebtedness are also major problems.

Fisheries

This district has no sea coast; its fisheries therefore, consist only of backwaters, rivers and tanks. Prawns, mullets, bhetki, milk fish and pearl spot are the chief inland fishes. Carps, snake-heads and cat fishes constitute the major freshwater fishes of this district.

6. LAND TENURES

Land Tenures

Till a century ago, the State presented an interesting (though from the point of view of economic development, far too complex) system of land tenures derived from the peculiar conditions of its historical development. They have been considerably simplified by several pieces of land-tenure legislation.

The chief categories of tenure in this district may be broadly classified :—

I. (a) Pandaravaka. These (comprising three-fourths of the total area of the State and including the vast majority of holdings) are lands belonging to the Sirkar or Government. All tenants are now practically owners of their land, subject to payment of tax.

(b) Kandukrishi lands. They are the home-farm lands of the Maharaja of Travancore.

In all government lands, the system of land-tenures is based on the ryot-wari principle, *i. e.* direct settlement with individual ryots.

II. Jenmom lands. They are the absolute private property of the owners. Under the Jenmikudiyan Acts, ryots holding jenmom lands have been given fixity of tenure, the dues to the jenmi being collected and paid to them by government, the collection being made along with the land-tax.

The chief systems of tenancy under which tenants hold lands owned by others are :—

I—Verumpattom (Venpattom). They are tenants who hold lands on lease for periods and on conditions, stated in the contract; they are liable to be evicted under the conditions of the contract.

II—Varamdars (Pankuvaramdars). They are people who raise crops on agricultural lands in partnership with the owners of the land ; the conditions of partnership vary in different localities.

III—Kudikidappukar. They are persons who were previously allowed by the owners of the land to occupy a small portion of it, generally to put up a small house to live in and watch the land or work on it.

IV—Otti (Mortgages). Tenancy under this head take different forms in different regions.

The question of giving fixity of tenure to cultivating tenants is under consideration.

7. COMMUNICATIONS

Being the most rugged and mountainous district in the State road communications were slow in development. The Main Central road traverses this district on its western side connecting it with other districts in the State. Road connection with the neighbouring Madura district in Madras State was secured by the construction of the Kottayam-Kumili road across the Ghats ; it was completed in 1885. For lack of direct road connection with the High Ranges the hill produce of the area used to be transported for a long time to Madura district for export through Tuticorin. The Muvattupuzha-Munnar road (now known as the Cochin-Munnar road) was planned to remedy this defect ; it crosses Periyar at Neriamangalam by a fine concrete bridge, completed in 1935 and secures for the produce of the High Ranges a direct outlet to Cochin Harbour. From Munnar this road leads to Udumalpet in Madura district.

High Ranges.

There was no direct road between Devikulam and Kumili until this year ; the cardamom estates in the region were more accessible from the villages on the Madras side than from Travancore. A motorable road (total length 66 miles) has been opened between these places by the completion of the Santhanpara-Vandanmettu stretch (33 miles long) early this year. The Santhanpara-Vandanmettu road which took four years to build passes entirely through the High Ranges at an elevation of over 2,500 feet, across mountainous country full of scenic beauty. Besides shortening the distance between Devikulam and Kumili (the circuitous route previously used was 166 miles long) the new road opens up the Cardamom Hills area and helps to divert cardamom trade from centres outside the State to places like Peermede and Kottayam, within it.

Motor traffic, both passenger and goods, has expanded enormously in recent years. The State Transport Department is operating passenger buses and goods lorries on some of the chief roads.

A very large volume of water traffic is carried over the Vembanad lake and the rivers flowing into it. There are also a few navigation canals. Kottayam, an inland town is connected by canal to the Vembanad lake and is thus a centre of water communication with Ernakulam, Alleppey and Quilon. There are also canals from Kottayam to Vaikom (length 16 1/2 miles) and from Vaikom to Muvattupuzha (length 41 miles).

The following table gives the length of roads and canals in the different taluks:

Length of Roads and Canals (in miles)

Name of taluk		Main Roads	Planter's Roads	Village Roads	Canal
Total	..	1108·45	30·00	172·41	80·24
Changanachery	..	173·50	5·00	4·25	8·62
Kottayam	..	208·12	5·00	3·75	33·12
Vaikom	..	58·29	..	41·87	..
Minachil	..	168·50	..	21·62	21·00
Peermede	..	111·62	10·50	..	..
Devikulam	..	103·19	9·50	36·42	..
Thodupuzha	..	85·36	..	41·00	..
Muvattupuzha	..	199·87	..	23·50	17·50

Posts, Telegraphs and Telephones

Most of the villages in the lowland and midland have post offices. There are telegraph offices in all the municipal towns and a few other places. Telephone connections in the district are detailed below :

Serial No.	Name of Exchange or public call offices		Number of connections
1	Changanachery Exchange	..	36
2	Erumeli P. C. O.	..	Nil
3	Pallom P. C. O.	..	9

8. DEVELOPMENT OF HYDRO-ELECTRIC POWER

The Kanan Devan Hills Produce Co., a British firm owning extensive tea estates in the High Ranges was the first in the field ; in 1906 they installed a plant of 200 K. W. capacity for the supply of power to their factories and for running a ropeway for the transport of their goods over mountainous country.

The Pallivasal hydro-electric scheme was taken up in 1933 ; it utilises the water in the Muthirappuzha river, a tributory of the Periyar over a head of 2,000 feet. The first-stage works of the scheme were put into commercial use in 1940, with an effective plant capacity of 9,000 K. W. Additions to this have subsequently been made raising the installed capacity to 28,500 K. W. One additional machine of 7,500 K. W. is being installed and with certain modifications to the original plant, the station will have an ultimate capacity of 37,500 K. W.

In order to enable the power station to run on full load during the dry season the construction of reservoirs in the upper reaches of the Muthirappuzha river has been taken up. The Sethuparvathipuram dam, already completed, impounds 270 m. c. ft. The Mattupatti dam which is now under construction is calculated to provide a further storage of about 2,000 m. c. ft.

The demand for electric power has been so great that the question of exploiting further resources had to be taken up. Accordingly, the investigation and execution of the Sengulam hydro-electric scheme was put in hand. This scheme is a tail-water development of the Pallivasal Power station and utilises the discharge water from the latter station over a head of 1,200 feet. The installed capacity of the station will be 48,000 K. W. and the first 12,000 K. W. unit is expected to go into operation this year.

The power produced at the Pallivasal station is transmitted to major stepdown stations (66 K. W.)through a net work of 60 K. V. lines; 11 K. V. feeders from these stations convey power to bulk consumers and distribution centres where voltage transformation is effected for the distribution of electricity.

The important industries that have sprung into existence in this district as a result of the availabity of cheap electric power are :—

(1) Tea factories at Munnar owned by Messrs. K. D. H. P. Co., Ltd.
(2) Travancore Rayons Factory at Perumpavur.
(3) Travancore Cement Factory at Pallom.
(4) Electro-chemical Industries at Chingavanam.

In addition to these a very large number of small scale industries also utilise electricity as motive power. Electricity is also used to de-water paddy lands in the taluks bordering the Vembanad lake; several miles of lines have been laid for this purpose. Electric power is employed for irrigation in a few places and for sugarcane crushing. The electrification of rural areas is also receiving great attention.

A thermal station was in existence at Kottayam, under licensee ownership, from 1931 but with the supply of electricity from the Pallivasal hydro-electric system for distribution at Kottayam, this has been closed down.

9. FACTORY INDUSTRIES

Tea and rubber

Tea and rubber are the chief factory industries in this district; the tea industry is for the most part concentrated in the Peermede and Devikulam taluks. There are 50 tea factories in the Peermede taluk and 33 in the Devikulam taluk. A number of these factories are worked by electricity, others by oil or gas engine. Many large rubber estates have their own factories for the conversion of latex into crepe rubber and lace crepe. The largest number of rubber estates is in Peermede taluk. There are four small factories making various kinds of rubber goods in Kottayam and one in Changanachery.

Plywood

There are four plywood factories in Kottayam mostly engaged in the manufacture of tea-chests for tea factories.

Tiles

Two tile factories are working at Ettumanur and one at Kottayam; there is also another at Ramamangalam in the Muvattupuzha taluk.

Coir

In Vaikom taluk there are three coir factories.

Cement

The Travancore Cements, Kottayam, the only cement factory in the State, uses lime shells collected from the Vembanad lake. It started production in 1949; its estimated capacity is 50,000 tons of cement per annum.

Other industries

At Thodupuzha there is an Ayurvedic pharmacy where Ayurvedic drugs are made in large quantities. Kottayam is a centre for printing industry and also for the furniture industry.

The number of registered factories is about 140 and the number of factory workers 9,000.

10. COTTAGE INDUSTRIES

Cotton weaving

Cotton weaving is carried on in all coastal taluks and in a few places in the midland region.

Oil crushing

Oil crushing is carried on in all the coastal and midland taluks.

Bidi

Bidi making is a flourishing industry in towns and even in the countryside, giving employment to a considerable number of men and children.

Mats and baskets

Mats and baskets are made from reeds and bamboos obtained from the forests or jungles; this industry is carried on in all taluks mostly by low caste men and women.

Pottery

In localities where good clay is available village potters make a number of articles for domestic use.

Lemon grass oil

The distillation of lemon grass is an important cottage industry in the hilly areas, particularly in Minachil, Thodupuzha and Muvattupuzha taluks.

Molasses

Molasses or raw sugar is made from sugarcane juice in the Kottayam taluk.

Collection of lime Shells

The collection of lime shells from the Vembanad lake gives employment to a number of men in the Kottayam and Vaikom taluks; the industry has been organised on a co-operative basis.

Leather

Leather works engaging employees (belonging mostly to certain castes) are found in all towns.

Bell metal and bronzeware

Vazhappalli in Changanachery taluk is famous for the manufacture of bell metal articles, and bronzeware.

11. PUBLIC HEALTH

Public health conditions in this district may be considered to be generally satisfactory though filariasis is prevalent in the western taluks bordering the lake, and malaria, in a narrow belt of foot hill regions. The rainfall is heavy and the temperature moderate. The water supply is adequate, generally, though in certain places there is scarcity of water in summer, and the water is brackish, in some of the coastal areas. A number of places in Devikulam and Peermede taluks have grown in importance as summer resorts.

Communicable diseases.

The following are the chief communicable diseases in the district. Water-borne diseases like typhoid, dysentery and diarrhoea are present in some taluks but seldom assume the proportions of an epidemic.

Leprosy.—The incidence of leprosy is higher in Vaikom taluk bordering the lake than in other regions where only stray cases are found.

Filariasis.—This too is found mostly in the Vaikom taluk.

Malaria.—As a result of sustained control measures (chiefly D. D. T. spraying) adopted during the last few years, the incidence of malaria has been considerably brought down. New villages have sprung up in places previously considered hyper-endemic for malaria.

Small pox.—Stray cases occur occasionally.

Cholera is known to break out in six-yearly cycles; the disease is generally imported from places outside the State.

Plague used to be reported previously from the mountainous villages on the eastern frontier, but during the last few years, there has been no outbreak.

12. EDUCATION

Under a system of grants-in-aid, education has made great progress particularly during the last fifty years. The beginnings of English education in the district date back to 1816 at which date the Syrians had a college at Kottayam for training their priests and ministers. Rani Lakshmi Bayi sanctioned a donation of Rs. 20,000 to the funds of the college and a monthly grant of Rs. 70 for the hospital attached to it. Some years later, it was thrown open for secular education and non-Christians were admitted. In 1837 the college was handed over to the C. M. Society. The first batch of students for the Madras University Matriculation examination was sent up in 1862. In 1892 the F. A. classes were started.

Organised efforts in the field of female education began in 1822 when Mrs. Bailey opened a girls' school at Kottayam. The curriculum in the school included besides scriptural instruction, history, geography, arithmetic, elements of natural philosophy, vernacular and a few lessons in English.

Taluk-wise details of grades of schools in this district for the academic year 1950-51 are given in a statement appended to this part. It may be seen from the statement that the total number of schools in the district is 1033 and that the total number of pupils is 284,379.

A few details regarding the colleges in the district for the academic year 1950-51 are given below :—

Sl. No.	Name of institution	Course of study	Strength			Number of students living in hostels			No. of full-time teachers
			Total	Men	Women	Total	Men	Women	
1	St. Berchman's College, Changanachery		1,595	1,372	223	523	430	93	66

4	St. Thomas College, Palai	Inter	600	600	..	60	60	..	28

Printing Presses and Periodicals

The number of printing establishments is over 50. It is believed that the first journalistic venture in Malayalam was the publication of *Vijnana nikshepam* (containing mostly church matters) from Kottayam in 1840. There are five Malayalam dailies in this district, all published from Kottayam, 6 weeklies and 14 monthlies; there is also one quarterly journal. The number of journals furnishes an index of the reading habit of the people. All journals devote a great deal of space to current political affairs; cultural subjects also receive attention.

Libraries

There is one district library at Kottayam (the Kottayam Public Library), two taluk libraries and 208 other libraries in various parts of the district. Government help these libraries with grants.

13. LOCAL SELF-GOVERNMENT

Municipalities

There are four municipal towns in this district. Municipal councils consist partly of elected and partly of nominated members, the elected members forming not less than three-fourths of the total number. All municipal councils have the right of electing their chairmen and enjoy powers of taxation. Among the obligatory functions of the municipalities are sanitation, lighting of public streets, vaccination and registration of births and deaths. In addition, municipalities attend to the maintenance of existing roads and opening of new roads, the organisation of child welfare centres and free midwifery service. Some municipalities also run libraries and give grants-in-aid to Ayurvedic and other dispensaries.

Panchayats

Panchayats are the local self-government institutions in rural areas. Panchayats were instituted in 1925. There are now 32 panchayats in the district. A new Panchayat Act was passed in 1950, with a view to vesting the panchayats with more powers, particularly powers of taxation and providing for elections under adult franchise. Under the Act, there will be 112 panchayats in the district.

The activities of the panchayats cover all aspects of rural welfare. Conservancy arrangements, sweeping of streets, street-lighting, improvement of roads, construction of public wells, tanks, latrines and midwifery service are some of the items of work attended to by these local bodies. Besides, some of them promote rural reconstruction work by running libraries or reading rooms, encouraging compost-making, distributing improved seeds and maintaining stud bulls.

14. DEVELOPMENT PROJECTS

The most important development projects in this district are :—

(i) *The second-stage extension of the Pallivasal hydro-electric scheme.* The major items included in this stage are the construction of the Mattupatti dam in the upper reaches of the Muthirappuzha river to create a reservior of 2,000 million c. ft. and the installation of the sixth generating set. The total estimated cost of the work, expected to be completed in 1953, is Rs. 228·5 lakhs.

(ii) *Sengulam hydro-electric project.* This scheme, estimated to cost Rs. 269 lakhs, is expected to produce 48,000 K. W. of power.

15. BACKWARD CLASSES

Social reform

Time was when Kerala was considered as the most caste-ridden part of India. The old order has however, been changed and changed rapidly, during the past half century. A social reform movement with the avowed object of removing the social and economic disabilities of citizens belonging to the so-called "low-castes" was

inaugurated early in the 19th century by the ruling sovereigns. Several iniquitous taxes imposed on these castes were abolished. Sale or purchase of low caste people was restricted; taboos imposed on the use of several articles, dress covering the upper part of the body, ornaments etc. by low-castes were removed. Later, slavery in all forms was abolished. Public roads were thrown open to all castes. Schools were specially established for them, and subsequently free admission to Government as well as aided schools was given to them. Suitable provisions were made for the recruitment of backward classes to the public service. A comprehensive programme for the amelioration of the condition of backward communities was launched by the Government about three decades ago. Thanks to these measures, (the Temple Entry Proclamation, throwing open Hindu temples to all classes and the enactment of the Civil Marriages Act were important milestones in the path of progress), and the uplift work carried on by Christian and Hindu missions, caste barriers have broken down, so that today caste is no longer the controlling feature of social life.

Scheduled Castes

In this district the number of people belonging to the Scheduled Castes is 154,461 or 8 % of the total population.

Scheduled Tribes

11,110 people were enumerated as members of Scheduled Tribes. These people living in the highland region, seem to be diminishing in numbers. How these communities can be helped to maintain their strength and their culture against the impact of modern civilization is a problem for social anthropologists.

16. SOCIAL CONDITION

Houses

A peculiar feature of the country is the scattered disposition of houses or the complete absence of the street-system in rural areas; each house even the humblest stands in its own ground, surrounded by at least a few essential trees and plants, a practice conducive to personal and social hygiene. This factor accounts for the comparative freedom from epidemics in the State.

The houses of the poor people are built of mud with no doors or windows and thatched with plaited cadjan or palmyra leaves or, in some places, grass. The houses of the middle classes have walls made of wood or sun-dried or burnt bricks; they have substantial roofs and also doors and windows and may either be thatched or tiled. The richer classes have large houses built according to new fashions, of brick or concrete and equipped with drainage and other modern conveniences.

Dress

In matters of dress, new fashions (based on those in vogue in other parts of India) like the shirt, the coat, the blouse, the sari, and coloured silk clothes are rapidly spreading among all classes. A similar transformation is taking place in regard to ornaments, too.

Food

Rice is the staple food of the people; owing to the increasing scarcity of rice in the State, the low-income-groups are compelled to use tapioca in the place of rice (the effect of this habit on physique and health has not yet been scientifically studied). Some sections of Hindus are vegetarians. The Christians and Mahomedans generally eat more fish and meat than the others. New tastes in food are beverages like tea and coffee which have spread even into the countryside.

Amusements

While time-honoured amusements like Kathakali, Thullal etc. are still enjoyed by the less sophisticated people of the countryside, the cinema has established itself everywhere as the most popular form of recreation; even the small towns have at least one cinema house. Music is in great demand; dramas especially those with accent on music are also appreciated. Western games like foot-ball, tennis, volley ball, badminton, etc. enjoy great popularity, among the youth.

Festivals

The national festival is Onam (in August-September) celebrated by feasts and sports. Vishu (New year's day) in April, Dipavali (in November particularly for Tamilians) and Thiruvathira (in December-January) are also occasions for festivity and rejoicing among Hindu communities. The Christians and Mahomedans celebrate their religious festivals. There are, besides, important festivals in temples and churches lending gaiety and colour to life in the localities.

Inheritance

About quarter of a century ago, the marumakkathayam system of inheritance (the matriarchal system) was given up by most communities in favour of the makkathayam (patriarchal system). Along with the marumakkathayam system, the joint family system was also abandoned; few communities now follow it.

Position of Women

Women in Kerala have always enjoyed much freedom and respect in society. They have made rapid progress in modern education so that today women belonging to several communities are found in the professions and in public life.

B. POPULATION (Analytical Summary)

17. DISTRIBUTION OF POPULATION

The population of Kottayam district has increased by 183 per cent. during the past fifty years. The number of inhabitants per square mile is 604, giving per capita 106 cents of land, 89 per cent. of the population are confined to rural areas; 64 per cent. depend on agriculture for their means of livelihood; 52 per cent. are literate.

The distribution of population according to the natural sub-divisions is given below:

Sub-division		Area as a percentage of the total	Population as a percentage of the total	Density
District	..	100	100	604
Lowland	..	7·4	20·2	1,646
Midland	..	31·0	62·4	1,215
Highland	..	61·6	17·4	171

Natural Sub-divisions

The lowland forming 7 per cent. of the district has one-fifth of the population. The density is 1646 per square mile and the area of land per capita is only 39 cents. The midland covering 31 per cent. of the area, accommodates 62 per cent. of the population. The density in the midland is 1215 giving 53 cents of land per person. The highland comprising 62 per cent. of the area has 17 per cent. of the population.

This district has a large extent of land under forests and the area actually under occupation is about 1572 sq. miles. Calculated on this, the density becomes 1135 and per capita occupied land 56 cents.

The following table gives the distribution of population in the district and taluks.

Name of taluk		Percentage population in taluk	No. of inhabitants per square mile		Land per capita (cents)	
			Total	Occupied area	Total	Occupied area
ALL	..	100·0	604	1,135	106	56·4
Changanachery	..	20·3	1,344	1,697	47·6	37·7
Kottayam	..	19·2	1,604	1,922	39·9	33·3
Vaikom	..	11·1	1,438	1,655	44·5	38·7
Minachil	..	15·6	1,001	1,459	63·9	43·9
Peermede	..	5·4	213	747	300·0	85·7
Devikulam	..	4·8	129	210	495·7	305·1
Thodupuzha	..	9·0	442	1,178	144·9	54·3
Muvattupuzha	..	14·6	453	1,338	141·4	47·8

Taluks

Peermede and Devikulam have low densities. These two taluks are mountainous and are covered by thick forests. In spite of the opening of tea, rubber and cardamom estates in these taluks it is only very recently that the forests are being cleared, for purposes of cultivation by individual owners. Quite a large extent of forest land still remains as reserve and density of persons on the land is bound to be low.

The taluks of Thodupuzha and Muvattupuzha are also hilly and contain forests. This explains the low densities in the taluks. In the remaining four taluks, the pressure on land is high.

The density of population in urban* and rural areas is as follows :—

Name of taluk	Percentage of taluk population		Density				
			Rural		Urban		
	Rural	Urban	Total	Occupied area	Total	Municipal	Non-Municipal
ALL ..	89·2	10·8	549	1,051	3,376	5,042	2,344
Changanachery ..	84·5	15·5	1,181	1,507	5,430	6,596	4,092
Kòttayam ..	84·5	15·5	1,422	1,721	5,320	7,071	2,399
Vaikom ..	88·8	11·2	1,352	1,570	2,876	4,636	1,502
Minachil ..	93·5	6·5	972	1,441	1,784	2,033	1,325
Peermede ..	93·3	6·7	200	710	2,696	..	2,696
Devikulam ..	96·6	3·4	125	203	2,099	..	2,099
Thodupuzha ..	96·8	3·2	429	1,150	4,284	..	4,284
Muvattupuzha ..	89·3	10·7	414	1,285	2,040	..	2,040

Urban-rural distribution

In each of the taluks of Changanachery and Kottayam 15·5 per cent. of the population live in towns while the corresponding percentages for Vaikom and Muvattupuzha are respectively 11·2 and 10·7. In the remaining four taluks, the urban population is very small.

The low percentages of population in towns in the taluks are due to the hilly and mountainous nature of the land. Growth of towns naturally has been very slow.

In rural areas, excluding Peermede and Devikulam, the number of persons per square mile of occupied land is not small showing that the pressure on land is high. Clearing of forests will relieve this pressure, but the economy and the desirability of such a step require careful study.

18. SIZE AND COMPOSITION OF HOUSEHOLDS

In regard to dwelling houses, the following table summarises the information collected at this census :—

Name of taluk	No. of inhabitants per 100 houses			No. of houses per square mile of occupied area
	All	Urban	Rural	
ALL ..	623	661	619	182
Changanachery ..	623	727	611	272
Kottayam ..	605	671	594	318
Vaikom ..	567	577	566	292
Minachil ..	618	677	615	236
Peermede ..	852	599	879	88
Devikulam ..	1,121	1,277	1,117	19
Thodupuzha ..	594	579	594	198
Muvattupuzha ..	571	635	564	234

* At the 1951 Census all areas where conservancy arrangements are in force have been treated as towns.

Number of inmates per house

Six to seven inmates per house is the district average. In Peermede and Devikulam, the averages are 8·5 and 11·2 respectively. In these mountainous taluks, there is great scarcity of houses. Further, the large population of estate labourers in these taluks live in one-room apartments built by estate managers in the form of "lines". The climate is also extremely cold particularly in winter months so that the labourers huddle together in the rooms available for them; considerations of health and hygiene are completely disregarded.

An analysis relating to distribution of households according to size is given below :—

Size of households	District		Urban		Rural	
	Number	Density	Number	Density	Number	Density
ALL	1,000	5·57	1,000	5·94	1,000	5·53
Small (3 members or less)	224	2·36	208	2·35	226	2·36
Medium (4 to 6 members)	459	5·05	416	5·06	463	5·05
Large (7 to 9 members)	250	7·83	269	7·86	248	7·83
Very Large (10 or more)	67	11·42	107	11·51	63	11·40

Households

Large and very large households form 25 per cent and 7 per cent respectively; 46 per cent are medium-sized. Large and very large sized households are seen in greater proportions in towns than in rural areas.

In regard to family structure, an analysis of household population yields results summarised below :—

	No. of persons per 1000 of household population		
	District	Urban	Rural
ALL	1,000	1,000	1,000
Heads of households and wives ..	319	292	322
Sons of heads of households ..	251	241	252
Daughters of heads of households ..	208	201	209
Other male relations ..	78	97	76
Other female relations ..	126	131	126
Unrelated persons ..	18	38	15

Family Structure

An average household has therefore a little less than a third of the number of inmates as the heads of households and their wives, less than half as sons and daughters and about one-fifth as other relations. About 2 per cent. are unrelated to the head of the household; this percentage rises to four in the urban areas.

In regard to civil condition, the position is as follows :—

Civil condition			District	Urban	Rural
ALL		..	1,000	1,000	1,000
Unmarried	Total	..	540	560	538
	Males	..	580	618	575
	Females	..	500	499	500
Married	Total	..	400	373	403
	Males	..	390	350	395
	Females	..	410	398	412
Widowed or divorced	Total	..	60	67	59
	Males	..	30	32	30
	Females	..	90	103	88

Civil condition

The percentage of unmarried persons in the district is 54, 58 for males and 50 for females; in towns, the percentage of unmarried males is slightly in excess of that in rural areas. Forty per cent. of the persons are married, the figure for towns being a little less than that for rural areas. Six per cent. are widowed or divorced. In towns, this category of persons is slightly in excess of that in the country-side.

19. AGE, LITERACY AND CIVIL CONDITION

The distribution of population according to age is given below :—

Age group		Persons	Males	Females
ALL	..	1,000	1,000	1,000
0—	..	32	33	32
1— 4	..	117	117	117
5—14	..	250	249	251
15—24	..	207	201	213
25—34	..	139	141	137
35—44	..	101	104	98
45—54	..	75	78	72
55—64	..	46	46	46
65—74	..	23	22	23
75 and over	..	10	9	11

Age

40 per cent. of the population are below 15 years of age, 52 per cent. are between 15 and 54 and the remaining 8 per. cent are above 55 years of age. Thus over 52 per cent. of the population may be considered as more or less fit for work. Further, as there are only 8 per cent. in the group 45-54 years, as against 25 per cent in the group 5-14, the 52 per cent. in the ages 15-54 will be continuously replaced during the present decade.

In regard to literacy, the following table gives estimates (per 1000 persons) of literates and percentages in broad age groups.

Age group	No. of literates per 1000 persons.			Percentage in each age group		
	Persons	Males	Females	Persons	Males	Females
ALL	518	595	439	52	60	44
0— 4	0	0	0	0	0	0
5— 9	34	35	34	27	28	27
10—14	92	95	88	74	77	70
15—24	156	166	146	75	83	69
25—34	99	114	82	71	81	60
35—44	62	79	44	61	76	45
45—54	41	56	25	54	72	35
55—64	22	31	12	46	67	26
65—74	9	14	6	41	63	24
75 & over	3	5	2	33	51	17

It will be seen that 52 per cent. are literate, 60 per cent. being males and 44 per cent. being females. In each of the groups between the ages 10 to 44, the percentage of literates is high particularly for males. This is an index of progress of education in the State during the last few decades. Among females, high values are seen only in the groups 10 to 14 and 15 to 24 showing that the last two decades have shown rapid progress in female education also. This conclusion is further strengthened by the low values in older age-groups for females.

Civil condition

The marital status of household population has already been discussed. The following table summarises the marital status of the general population : —

Age-group	Number per 1000 persons who are					
	unmarried		married		widowed or divorced	
	Males	Females	Males	Females	Males	Females
ALL	293	247	197	203	15	44
0	16	16	..	..	..	..
1— 4	59	58	..	..	..	..
5—14	126	124	..	..	..	..
15—24	79	45	23	59	..	2
25—34	10	3	59	61	1	4
35—44	2	1	49	41	2	6
45—54	1	..	36	25	3	10
55—64	..	..	20	12	4	10
65—74	..	..	8	4	3	8
75 & over	..	..	2	1	2	4

54 per cent. of the population are unmarried. The remaining 46 per cent. consist of 40 per cent. married and 6 per cent. widowed or divorced. The percentages of married males and females are almost equal showing that polygamy is very rare. The widowed or divorced are mostly women who have passed their forties.

The distribution of unmarried persons in the age-groups raises a very interesting problem. In the decade to come, the girls in the age-groups 5-14 and 15-24 forming about 17 per cent. have normally to get married. The men have to come ordinarily from the age-groups 15—24 and 25-34 and these two groups give only 9 per cent. The present decade will therefore witness a large number of young women remaining unmarried. This tendency can be avoided only by encouraging the younger men in the ages 22, 23 and 24 in the latter half of this decade to marry.

There is no child marriage here. Among males, marriage below 24 years of age is also uncommon.

20. RELIGION

In regard to religion, the following table gives the distribution of population :—

Religion		District	Urban	Rural
ALL	..	1000	1000	1000
Hindus	..	455	441	457
Muslims	..	47	117	38
Christians	..	498	442	505

45·5 per cent. are Hindus, 49·8 per cent. are Christians and 4·7 per cent. are Muslims. In the towns, both Hindus and Christians have lower proportions than those for the district, while proportion of Muslims is more than double. This goes to show that while Hindus and Christians do not have a tendency to move into towns, the Muslims gravitate towards them.

Special groups

There are 384 Anglo-Indians in this district, of whom 91 are in towns and 293 are in the villages. 154,461 persons have been returned as belonging to Scheduled castes and 11,110 as belonging to Scheduled Tribes. No person has been enumerated under tribal religion.

21. LANGUAGES

In regard to languages, the distribution of persons according to their mother-tongue is as follows :—

Language		District	Urban	Rural
ALL	..	1000	1000	1000
Malayalam	..	923	938	921
Tamil	..	70	52	72
Konkani	..	1	6	0
Telugu	..	3	1	4
Gujarathi	..	0	0	0
Hindi	..	0	1	0
Marathi	..	0	0	0
Canarese	..	1	0	1
Others	..	2	2	2

Mother-tongue

Malayalam is the mother-tongue of 92 per cent of the people of the district and Tamil that of 7 per cent. Only a very small section of the people have other Indian languages as their mother-tongue.

Subsidiary languages

The most common languages subsidiary to the mother-tongue are Malayalam and Tamil. The following statement gives the percentage of people having a subsidiary language.

Mother-togue		No. per 1000 having a subsidiary language	Subsidiary language		
			Malayalam	Tamil	Others

22. BIRTH-PLACE

The distribution of persons according to their birth-place is as follows :—

Birth-place		Number per 10,000
Travancore-Cochin State	..	9,554
Trivandrum District	..	45
Quilon „	..	320
Kottayam „	..	9,039
Trichur „	..	150
Other States in India	..	432
Madras	..	430·9
Mysore	..	0·5
Others	..	0·6
Countries in Asia	..	3
do. Europe	..	1
Other countries	..	0
Birth place not returned	..	10

Nearly 90 per cent of the people are born within the district while 0·5 per cent. 3·2 per cent and 1·5 per cent. are born in Trivandrum, Quilon and Trichur districts respectively. Thus 95·5 per cent. of the people in this district are born in the State. 4·3 per cent. are from Madras State comprising mostly the estate labourers in the district.

There are 734 persons born in countries outside India; out of this 527 have been born in other Asian countries, 187 in Europe, 14 in Africa and 6 in America.

23. MEANS OF LIVELIHOOD AND ECONOMIC STATUS

Means of livelihood

Means of livelihood and economic status of the people have been given special emphasis at this census. Means of livelihood have been classified under two broad groups—agricultural and non-agricultural. Each of these in turn have been sub-divided into four. The eight means of livelihood are :—

(a) Agricultural

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land; agricultural rent receivers and their dependants

(b) Non-agricultural

5. Production other than cultivation
6. Commerce
7. Transport
8. Other services and miscellaneous sources

Means of livelihood classifications

The four non-agricultural classes have been re-classified into ten divisions and each division has a number of sub-divisions corresponding to specific industry and service groups. A detailed list of these sub-divisions is given at page 80 of this volume.

Dependency

Persons under each livelihood class have been classified as self-supporting, non-earning dependants or earning dependants. A person has been treated as self-supporting when "he (or she) is in receipt of an *income and that income is sufficient at least for his (or her) own maintenance*". Such income may be in cash or kind. Anyone who is not "self-supporting person" in this sense is a 'dependant.' One who does not secure any income either in cash or in kind is a 'non--earning dependant'. A person, with an income which does not make him self-supporting, is an 'earning dependant'.

Employment

Self-supporting persons have been classified as employer, employee and independant worker. An employer is one who employs other persons in order to carry on the businesses from which he (or she) secures his (or her) livelihood. It should be remembered that a person who employs a cook or other person for domestic service should not be recorded as an employer merely for that reason. Further, persons employed as managers, superintendents, agents, etc. who control other workers are also not employers. The term 'employees' requires no clarification. An independent worker is one who is not employed (in the sense explained above) by any one else and who does not also employ anybody else in order to earn his livelihood.

The distribution of persons according to their means of livelihood is as follows :—

Number of persons per 10,000 in agricultural and non-agricultural livelihood classes

Name of taluk	Agricultural classes			Non-agricultural classes		
	Persons	Males	Females	Persons	Males	Females
All	**6,440**	**3,223**	**3,217**	**3,560**	**1,836**	**1,724**
Changanachery	1,352	690	662	674	351	323
Kottayam	1,198	586	612	728	368	360
Vaikom	711	355	356	395	195	200
Minachil	1,192	595	597	373	192	181
Peermede	157	88	69	382	199	183
Devikulam	75	41	34	409	220	189
Thodupuzha	684	343	341	213	113	100
Muvattupuzha	1,071	525	546	386	198	188

Distribution into agricultural and non-agricultural classes

It will be seen that about 64 per cent. of the population belong to the agricultural classes while 36 per cent. belong to non-agricultural classes. The largest numbers of agricultural classes are seen in the taluks of Changanachery, Kottayam, Minachil and Muvattupuzha. Eventhough the agriculturists predominate in Vaikom and Thodupuzha, their numbers are comparatively small. In Peermede and Devikulam, the non-agricultural classes outnumber the agricultural classes. The estate labourers who form a large section of the population in these two taluks have been included in the non-agricultural classes.

In regard to dependency status, the following table gives the distribution of 1,000 persons in each livelihood class :—

Livelihood Classes	Dependency		
	Self-supporting persons	Non-earning dependants	Earning dependants
I Cultivators of land wholly or mainly owned and their dependants ..	220	740	40
II Cultivators of land wholly or mainly unowned and their dependants ..	241	700	59
III Cultivating labourers and their dependants ..	329	594	77
IV Non-cultivating owners of land; agricultural rent receivers and their dependants ..	291	681	28
V Production other than cultivation ..	345	550	105
VI Commerce ..	246	714	40
VII Transport ..	274	666	60
VIII Other services and miscellaneous sources ..	356	601	43

Distribution according to dependency

In the different livelihood classes, the percentages of self-supporting persons lie between 24 and 36 while those for non-earning dependants are between 55 and 71. Earning dependants range between 2·8 and 10·5 per cent. On an average it may be said that each self-supporting person has to maintain 3 to 4 non-earning dependants.

Self-supporting persons in each industry and service group have been divided into employers, employees and independent workers. The distribution of self-supporting persons in the major industries and services divisions is summarised below:

Industry or service division	Number per 100 persons in each sex who are					
	Employer		Employee		Independent worker	
	Males	Females	Males	Females	Males	Females
All	2	0	62	73	36	27
0	1	0	87	94	12	6
1	0	0	55	92	45	8
2	2	0	50	30	48	70
3	1	3	30	18	69	79
4	1	0	55	9	44	91
5	1	0	77	93	22	7
6	8	5	23	9	69	86
7	1	3	70	61	29	36
8	2	0	77	93	21	7
9	4	0	57	74	39	26

Distribution according to employment

It will be seen that in the divisions as a whole there is only a very small percentage of employers. The largest percentage of employers is in division 6 (commerce). Divisions 5 (construction and utilities) and 8 (health, education and public administration) have the largest percentages of employees. In regard to independent workers, the largest percentages of males are in divisions 3 (processing and manufacture) and 6 (commerce) while among females the largest percentages are in divisions 3 and 4 (processing and manufacture) and 6 (commerce).

C. GAZETTEER

Changanachery Taluk (area 269 sq, miles; population 361,454) is divided into 19 pakuthies. The eastern part of this taluk is mountainous; there are several rubber and a few tea estates in this taluk. The western part of the taluk is covered by extensive punja fields. The rainfall is heavy, (about 125 inches per annum) and the soil rich. The chief crops are rice, cocoanut rubber, tapioca, pepper and tea.

Changanachery (municipal town) established on the elevated land on the eastern boundary of the Kuttanad area, is the headquarters of the taluk. Several canals lead to it, and there is regular water communication with Ernakulam, Alleppey and Quilon. The bi-weekly market here established by Dalawa Velu Thampi is one of the largest in the State; the chief articles are pepper, banana and other vegetables. There are a large Syro-Roman Church and two colleges.

Changanachery was formerly the seat of Thekkumkoor Rajas. As the Rajas conspired with the Chempakasseri and Kayamkulam Rajas against Travancore, Marthanda Varma invaded the country and annexed it.

Kanjirappalli stands on the main road from Kottayam to Kumili and is a place of considerable commercial importance. Even in former times, it carried a large volume of trade with Tamilnad, across the Ghats.

Mundakkayam (lying partly in Changanachery and partly in the Peermede taluks), on the Manimala river is situated in the centre of a rubber producing area.

Vazhappalli a suburb of Changanachery is famous for the manufacture of bronzeware and for the Hindu temple containing fine wood carving.

Kottayam taluk (area 214 sq. miles, population 343,584) comprises 16 pakuthies. The eastern part of the taluk is hilly ; the soil though hard is very fertile. The average annual rainfall is about 122 inches. The taluk is drained by the Minachil river. The principal crops are paddy, cocoanut, tapioca, tea, pepper, sugarcane and ginger.

Ettumanur a town on the main central road, 8 miles north of Kottayam is famous for its ancient Siva temple. Originally built in 1285, it was rebuilt during 1541—44. It possesses a great wealth of jewelry, besides ' the seven and a half golden elephants', presented to it by the Maharaja of Travancore, after the retreat of Tippu Sultan ; the temple also contains excellent specimens of wood-work.

Kottayam (municipal town) the headquarters of the Taluk and of the District is an important commercial centre. Situated on the bank of a large navigable stream, Kottayam is a centre for inland water communication. It also commands the direct road to the High Ranges area. Kottayam was formerly the seat of the Thekkumkoor Rajas and ruins of an old fortress—Thaliyil Kotta—can still be seen. The Thirunakkara temple in the town is a typical example of Kerala temple architecture. Two of the renowned Ashtavaidyans of Malabar (proficient in the Ashtangahridaya system of Indian medicine) belong to Kottayam. An ancient Syrian church known as Valiapalli (believed to have been built between 1550 and 1577) possesses two crosses with inscriptions in Pahlavi characters. These are now taken to be copies of the inscription on the Mount Cross (St. Thomas Mount, Madras). It is believed that the smaller of the two crosses was removed here from an older church at Cranganur. Kottayam has been the centre of the Church Missionary Society from the early years of the 19th century. The C. M. S. College is one of the oldest educational institutions in the State.

Kumaranalloor, four miles north of Kottayam is famous for its Bhagavathi temple, containing a wealth of excellent wood carving.

Vaikom taluk (area 137 sq.miles, population 197,425) consisting of 14 pakuthies is situated on the eastern shore of the Vembanad lake. Most of the taluk is made up of alluvial deposits brought down by the rivers in historical times The surface is generally flat and the land is devoted either to rice or cocoanut. The annual rainfall is about 110 inches. The northern part of the taluk is watered by the Muvattupuzha river. The chief crops are rice, cocoanut, tapioca, pepper and ginger.

Kaduthuruthi now an inland village on the eastern side of the taluk is believed to have been in olden times an island [Kadal (sea) thuruthu (island)]. It was the seat of the Vadakkumkoor Rajas until the annexation of the country by the Maharaja Marthanda Varma, and is mentioned in some ancient Malayalam works.

Thalayolapparampu. The market at this place was established by Dalawa Velu Thampi.

Udayamperur situated on the Kottayam-Ernakulam road contains a famous Hindu temple. The local church was the venue of the synod held by Archibishop Menezes in 1599 " to cure the Syrian Christians of their Nestorian heresy and to bring them under the sway of the Papacy in Rome".

Udayanapuram about a mile and a half north of Vaikom on the Kottayam-Ernakulam road is renowned for its Subramonia temple, containing some old mural paintings.

Vaikom (municipal town) headquarters of the taluk, is situated on the eastern shore of the Vembanad lake, and is easily accessible by road and by water. Vaikom was a seat of the Vadakkumkoor Rajas who were subdued by Maharaja Marthanda Varma in 1750. The ancient Siva temple here has made this town an important place of pilgrimage. There are records to show what in 1329 the managers of this temple (Ooranma) met the Raja of Travancore at Attingal and granted him the right of appointing *Melkoimma* over the temple. It is also learnt that there was a fire in the 14th or 15th century after which the temple was rebuilt and consecreated. It contains some old mural paintings. There are two important festivals in the temple on the Ashtami days in Vrischikom (November-December) and Kumbhom (February-March). In 1925 the road surrounding the temple was the scene of famous *sathyagraha* for opening temple roads to Harijans.

The place—name ' Vaikom ' has been interpreted as " that which was newly formed ". showing the origin of the land in historical times.

Vechur a village on the shore of the Vembanad lake in the southern extremity of the taluk is noted for a breed of small cattle with high milk yield. In 1741, the Vadakkumkoor Rajas allied themselves with Elayadathu Swarupam and the Dutch against Marthanda Varma and granted the Dutch a piece of land at Vechur where they erected a fort.

Minachil taluk (area 279 sq. miles population 279,087) consisting of 13 pakuthies, is a hilly region with an annual rainfall of about 152 inches. It is watered by the Minachil river. The chief crops are cocoanut, arecanut, tapioca, rubber, rice, ginger, pepper, coffee and turmeric.

Palai (municipal town) on the Minachil river is the headquarters of the taluk. It is an important commercial centre for hill produce.

Punjar on the Minachil river was formerly the seat of the Punjar chiefs, one of whose ancestors purchased the country round Punjar from the Raja of Thekkumkoor and ruled as a feudatory of the latter until the absorption of Thekkumkoor in Travancore in the 18th century. Punjar contains a famous Sastha temple.

Peermede taluk (area 451 sq. miles, population 96,289) comprises the southern portion of the High Ranges and is divided into 5 pakuthies. There are several deep and fertile valleys between the high hills. The annual rainfall is about 180 inches. The Periyar, Minachil and the Azhutha rivers flow through this taluk. Much of the area is under reserve forests, containing a variety of game, big and small. There are several plantations on the hill slopes, growing tea and some rubber.

Kumili stands on the road from Peermede to Periyakulam in the Madura District across the Ghats. The Kumili ghat is 7 miles long; the surrounding country offers facilities for hunting. Members of several hill tribes are to be found in the locality.

Peermede, the headquarters of the taluk takes its name from a Mahommedan saint Peer Mahamed whose tomb is at Kuttikanam, 4 miles away. With an elevation of 3,500ft. Peermede enjoys a cool and delightful climate and is a favourite sanatorium during summer months.

The Periyar Dam. The head works of the Periyar Irrigation Project are situated in this taluk. The Periyar Project is an irrigation work intended to "utilise a portion of the superabundant rainfall on the western slopes of the Ghats for the purpose of irrigation in the district of Madura". The headwork consists of a concrete dam erected below the junction of the Periyar and Mullayar (length at top 1241 ft., maximum height above river bed, 158 ft, width at top 12 feet, width of lower portion of dam, 115¾ ft.) and a subterranean aqueduct 6650 feet long cut through the mountains. The water spread of the lake formed by the dam is about 13 sq. miles. The full reservoir level is 152 feet above the bed. The catchment area of the dam is 305 sq. miles. Channels take the water over a distance of 80 miles to irrigate about 190,000 acres in the Madura district.

The investigations for this project were started in 1850 and completed about 1880. The lease agreement between the Government of Travancore and the Secretary of State for India was executed in 1886 and the dam was completed in 1896. Some years ago, there was a dispute between the Governments of Travancore and of Madras about the claim made by Madras to use the waters for the development of hydro-electric energy, Travancore contending that the agreement did not provide for it; this contention was finally upheld.

The Periyar Lake. The Periyar Lake has been formed by the construction of a dam across the Periyar river at an elevation of 2,900 ft (mentioned above) and the submergence of wooded hill slopes and valleys; it is now a famous recreation centre. The area of the lake is 13 sq. miles. The forest

country surrounding the lake has been made a game sanctuary. There is a wildlife nursery at the Nellikkampatti isthmus. A shooting box has been constructed at Edapplayam for visitors to halt during their cruise on the lake. There are motor boats for the use of visitors and picnic sheds have been constructed at selected places. A cruise on the lake gives glimpses of several wild animals (elephant, tiger, bison, panther, bear, sambur, spotted deer, etc.) in their natural habitat. The lake also offers good fishing. The scenery of the lake and the surrounding region is very beautiful and the climate delightful.

The Game Sanctuary was established in 1938. It covers an area of 300 sq. miles with the Periyar lake in the centre. The sanctuary is believed to be among the best of its kind.

Thekkadi, is a village on the Periyar lake within two miles of Kumili and 14 miles from Kambam. Eight miles from Thekkadi is the Periyar dam ; the Game Sanctuary is near by. There is regular bus service between Thekkadi and Madura.

Devikulam Taluk (area 668 sq. miles, population 86,185) is the most mountainous taluk in the State, and contains several high peaks and valleys drained by the tributaries of the Periyar. The annual rainfall is about 112 inches. The climate is cold throughout the year. Forests abounding in big game of all kinds cover a large portion of the taluk. The principal crops are tea and cardamom; a little rice is cultivated in the valleys. English cows and oxen are kept in some of the estates. The head works of the Pallivasal hydroelectric scheme are situated in this taluk. The taluk is divided into eleven pakuthies.

Chithirapuram, a town of recent origin, has been so named in honour of the visit of His Highness Sri Chithira Thirunal, Maharaja of Travancore to the place in March 1935. Located seven miles west of Munnar and 2½ miles away from the Power House at Pallivasal, Chithirapuram is the seat of the offices and quarters for the staff of the Pallivasal hydroelectric works. The town is situated about 3,800 ft. above sea level and commands fine views of mountain scenery.

Pallivasal is the seat of the Pallivasal hydro-electric works. Water from the Muthirappuzha river, a tributary of the Periyar is diverted and made to flow to a lower level along a tunnel cut through the mountains. The Power House was opened in March, 1940.

Devikulam (old) the former headquarters of the Cardamom Department lies 10 miles to the south-east of Munnar with which it is connected by a motor road. The place takes its name from a small lake which adds to the charm of the town. Devikulam is rich in mountain scenery with endless vistas of thick green forests and mountain tops draped in mists and clouds.

Devikulam (new) the headquarters of the taluk is situated in a valley near the summit of the High Ranges. It is one of the oldest and most famous hill stations in this State; ideal weather prevails in Devikulam when the plains below are sweltering in summer heat.

Munnar situated at the confluence of the three rivers stands almost on the summit of the High Ranges at an elevation of nearly 5,000 ft. With good roads and commanding excellant mountain scenery all round, Munnar is a beautiful health resort. The northern outlet road, (through Chinnar to Udumalpet) connects Munnar with the Coimbatore district. Munnar is the centre of the tea industry in the State. There is an aerial ropeway (length 18 miles) from Munnar to Top Station and thence to Bottom Station, worked by a small turbine driven by a stream at the foot of the hills. The Bottom Station is connected by a motor road to Bodinaickannur on the Southern Railway.

Lockhart Gap (height 5,584 feet) at the southern extremity of this taluk, commanding extensive views of the Cardamom Hills lying below and covering 300 sq. miles, forms one of the beauty spots of the State.

Udumbanchola in the heart of the forest country contains ruins of some temples. The village is surrounded by a deep elephant trench.

The *View Point* 65 miles eastward on the Alwaye-Munnar road gives a charming view of the Cardamom Hills and of Chithirapuram and its buildings.

The Peermede and Devikulam taluks contain several megalithic monuments including cromleches, dolmens and menhirs; some of them have been partly studied while others await excavation.

Thodupuzha Taluk (area 362 sq. miles, population 159,862) consists of five pakuthies ; it is hilly, the highest peak being Kodayathoor. The rainfall is about 140 inches. The taluk is watered by the tributaries of the Muvattupuzha river. The principal crops are, cocoanut, pepper, rice, tapioca, rubber, ginger and coffee ; arecanut and lemon grass are also extensively cultivated.

Thodupuzha is the headquarters of the taluk and is a market for hill produce.

Muvattupuzha Taluk (area 574 sq. miles, population 259,885) is also hilly with several valleys between series of hill ranges, and has a rainfall of about 130 inches. It is watered by the Periyar and the Muvattupuzha rivers. The chief crops are rice, tapioca, cocoanut, pepper, rubber, and ginger ; arecanut and lemon grass are extensively grown. The taluk is divided into eleven pakuthies.

Kothamangalam was an important trading centre in former times, when it carried on a large volume of trade with Thirunelveli and Dindigul. The opening of the Neriamangalam-Pallivasal road has added to its importance in recent years.

Neriamangalam on the Periyar and at the foot of the Western Ghats has grown into prominance as a result of the extension of the Muvattupuzha—Neriamangalam road to Munnar, and the completion in 1935 of a fine concrete bridge over the Periyar. There is evidence to show that it was a populous and an important place in ancient times. It commands the only pass that connected this country with Coimbatore, and seems to have been the seat of some royal power. There are ruins of irrigation works in Mannankandom about 10 miles from Neriamangalam.

The highest average rainfall in the State is that recorded at Neriamangalam.

Muvattupuzha, the headquarters of the taluk is situated at the junction of the two rivers forming the Muvattupuzha river ; another tributary joins the combined river below the town. Muvattupuzha is a communication centre and an important market for hill produce. Ruins of a fortress of Vadakkumkoor Rajas are found here.

Ramamangalam contains ruins of the palace and fort of the Vadakkumkoor Rajas.

Thrikkariyur contains an ancient Siva temple, which seems to have enjoyed much importance and prosperity in ancient times. It is mentioned in the *Keralolpathi* as the capital of one of the Cheraman Perumals. The remains of an old temple and also of some old buildings are found here ; it has therefore been claimed by at least one historian that it is the 'Karur' of Chera kings.

DISTRICT CENSUS HANDBOOK

KOTTAYAM

Part II

CENSUS DATA

SCHEME OF CENSUS TABLES

Census Tables prepared this time fall under the following four broad groups :—

A GENERAL POPULATION TABLES
B ECONOMIC TABLES
C AGE TABLES
D SOCIAL AND CULTURAL TABLES

There are five Tables under General Population Tables. These are :—

A I AREA, HOUSES AND POPULATION
A II VARIATION IN POPULATION DURING FIFTY YEARS
A III TOWNS AND VILLAGES CLASSIFIED BY POPULATION
A IV TOWNS CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1901
A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

Economic Tables comprise three separate Tables. These are :—

B I LIVELIHOOD CLASSES AND SUB-CLASSES
B II SECONDARY MEANS OF LIVELIHOOD
B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS

There are five Tables in the Group of Age Tables. These are :—

C I HOUSEHOLD (SIZE AND COMPOSITION)
C II LIVELIHOOD CLASSES BY AGE GROUPS
C III AGE AND CIVIL CONDITION
C IV AGE AND LITERACY
C V SINGLE YEAR AGE RETURNS

Social and Cultural Tables consist of seven Tables:—

D I LANGUAGES
D II RELIGION
D III SCHEDULED CASTES AND SCHEDULED TRIBES
D IV MIGRANTS
D V DISPLACED PERSONS BY DISTRICT OF ORIGIN AND DATE OF ARRIVAL IN INDIA
D VI NON-INDIAN NATIONALS
D VII LIVELIHOOD CLASSES BY EDUCATIONAL STANDARDS

The C Tables mentioned above have been prepared only for a ten per cent. sample of the total population, but the figures given in the tables are estimates for the total population calculated from the figures for the sample.

To facilitate the preparation of the Census Tables, the State was divided into forty-three census tracts, each census tract comprising approximately a population of two to three lakhs, urban and rural areas being kept separate. As such, the urban or rural areas in more than one taluk had to be combined into one census tract in a few cases. Separate population of figures for the A Tables have been prepared for all taluks and towns. The B, C and D series Tables give figures only for census tracts.

A summary of the State Tables is given at the beginning for comparison and general information.

GENERAL TABLES

A I AREA, HOUSES AND POPULATION

This Table is the same as Table A I for the State. The figures have been broken up into rural and urban, for each of the Natural Sub-Divisions—Lowland, Midland and Highland. The area figures for the State and the Districts are those furnished by the Surveyor-General, India. The figures for further sub-divisions are those obtained from the Land Revenue Department. Adjustments due to exchange of enclaves between this State and Madras, under the Provinces and States (Absorption of Enclaves) Order, 1950, have been made in the areas of the districts concerned.

The term " village " as applied to this State requires explanation. The concentration of dwelling houses characteristic of villages in most other parts of India is almost absent in this State. This is a country of scattered homesteads. The village in this State, represents the territorial unit, ' kara ' (in Travancore) and ' proverthy ' (in Cochin). These are the smallest recognised sub-divisions of the taluk and have existed as such from early times.

GENERAL

A I AREA, HOUSES

GENERAL TABLES

A II VARIATION IN POPULATION DURING FIFTY YEARS (1901—1951)

This Table is prepared from previous Census Reports. Adjustments have been made for the changes in the boundaries of districts and in the exchange of enclaves under the Provinces and States (Absorption of Enclaves) Order 1950.

In the Table columns 3, 6 and 9 give the increase in population during each decade. In columns 4, 7 and 10 are given mean decennial growth rates. The mean decennial growth rate expresses the net variation in the decade as a percentage of the mean population which is the arithmetic mean of the populations at the beginning and end of the decade. If P_0 and P_1 are respectively the populations at the beginning and end of the decade,

$$\text{the mean decennial growth rate} = \frac{P_1 - P_0}{P_1 + P_0} \times 200$$

GENERAL TABLES

B ECONOMIC TABLES—LIVELIHOOD CLASSES

This Table is a summary of State Table B I—Livelihood Classes and Sub-Classes. Means of Livelihood are given under eight categories—four relating to agriculture, the remaining four being non-agricultural.

The figures under each category include all self-supporting persons having that as their Principal Means of Livelihood and also those dependants living with them.

A I AREA, HOUSES AND POPULATION

The Kottayam district consisting of eight taluks corresponds to the "Northern Division" in the previous Census Reports. However, in 1931, the taluks of Devikulam and Peermede now included in this district formed a separate division called the 'High Range Division'. Also, the taluks of Kunnathunad and Parur (now included in the Trichur District) were included in this district in 1931 and 1941. The area of the district as given by the Surveyor-General, India is 2954·1 sq. miles. The figures for the areas of the taluks are those furnished by the State Superintendent of Survey.

In regard to municipal towns, the figures for area have been furnished by the respective Municipal Commissioners. All localities where conservancy arrangements under the Department of Public Health are in force have been treated as non-municipal towns at this Census. The area figures for non-municipal towns have been collected from the Departments of Public Health and Land Revenue.

In the case of a few villages, parts of which have been included in non-municipal towns, the area figures are only approximate.

The figures for area, houses and population have been distributed among the natural sub-divisions and these in turn into urban and rural classifications.

The following are the towns included in the urban area in this district :—

Serial No	*Name of town*	*Name of taluk in which the town is situated*
1	Changanachery (M)	Changanachery
2	Kottayam (M)	Kottayam
3	Palai (M)	Minachil
4	Vaikom (M)	Vaikom
5	Ponkunnam	Changanachery
6	Mundakkayam	Changanachery
7	Kanjirappalli	Changanachery
8	Ettumanur	Kottayam
9	Thalayolapparampu	Vaikom
10	Erattupettah	Minachil
11	Azhutha	Peermede
12	Vandiperiyar	Peermede
13	Munnar	Devikulam
14	Thodupuzha	Thodupuzha
15	Piravam	Muvattupuzha
16	Kuthattukulam	Muvattupuzha
17	Muvattupuzha	Muvattupuzha
18	Kothamangalam	Muvattupuzha

A II VARIATION IN POPULATION DURING THIRTY YEARS 1921—1951

In the General Table A II, variation in the population of the State and of the districts has been traced for the period 1901—1951.

The present Table gives the population growth of the Kottayam district, taluk-wise, only for the period 1921—1951. It has not been possible to consolidate taluk figures for 1901 and 1911 as detailed information regarding the adjustments required in the population figures for different taluks due to changes in their boundaries, could not be gathered from the Census Reports.

Column 9 of the Table gives the population at each census year as a percentage of the 1921 population.

A II VARIATION IN POPULATION DURING THIRTY YEARS, 1921—1951

Census Year	Persons	Variation	Mean decennial growth rate	Males	Variation	Females	Variation	Population at each Census as a percentage of 1921 Population

A IV TOWNS CLASSIFIED BY POPULATION, WITH VARIATION SINCE 1901

Towns in the District have been classified under the following six classes:—

Class of Town		*Population*
I	..	100,000 and over
II	..	50,000—100,000
III	.	20,000—50,000
IV	..	10,000—20,000
V	..	5,000—10,000
VI	..	Less than 5,000

The growth in the population of these towns has been traced from 1901 to 1951.

In this Table (M) denotes Municipal town.

A IV TOWNS CLASSIFIED BY POPULATION, WITH VARIATION SINCE 1901

A V TOWNS ARRANGED TERRITORIALLY WITH POPULATION BY LIVELIHOOD CLASSES

This Table gives the number of persons (including dependants) in each town who derive their Principal Means of Livelihood from the following livelihood classifications :—

Non-agricultural

(v) Production other than cultivation

(vi) Commerce

(vii) Transport

(viii) Other services and miscellaneous sources

Agricultural

(iv) Non-cultivating owners of land; agricultural rent receivers

(i ii & iii) Cultivators and cultivating labourers

B I LIVELIHOOD CLASSES AND SUB-CLASSES

The Table gives the distribution of the population in the district according to the Principal Means of Livelihood. All persons have been classified as self-supporting or non-earning dependants or earning dependants. The Principal Means of Livelihood of non-earning and earning dependant is the same as that of the self-supporting person on whom he depends.

The Principal Means of Livelihood have been given under two major heads, agricultural and non-agricultural. Each of these has been divided into four groups. The following are the eight groups :

(a) Agricultural classes

1. Cultivators of land wholly or mainly owned and their dependants
2. Cultivators of land wholly or mainly unowned and their dependants
3. Cultivating labourers and their dependants
4. Non-cultivating owners of land ; agricultural rent-receivers and their dependants

(b) Non-agricultural classes

1. Production other than cultivation
2. Commerce
3. Transport
4. Other services and miscellaneous sources

The figures have been given sex-wise. Under each category there is also the sub-division under rural and urban classifications.

It has not been possible to give taluk figures; instead, figures for the census tracts in the district are given.

B II SECONDARY MEANS OF LIVELIHOOD

In this table, self-supporting persons and earning dependants in each of the eight Principal Means of Livelihood classes, are classified according to their secondary means of livelihood, if they have any. The classification for secondary means of livelihood is the same as that for Principal Means of Livelihood.

B II SECONDARY MEANS OF LIVELIHOOD

Livelihood classes	Number of persons deriving their secondary means of livelihood from Cultivation of owned land

B III EMPLOYERS, EMPLOYEES AND INDEPENDENT WORKERS IN INDUSTRIES AND SERVICES BY DIVISIONS AND SUB-DIVISIONS

Self-supporting persons in non-agricultural classes-category (b) in the note to Table B. II, are classified in this Table under employer, employee and independent worker and are distributed in the various divisions and sub-divisions of industries and services. In the Table, instead of the names of the divisions and sub-divisions, code numbers are used. A list of the divisions and sub-divisions of industries and services with their code numbers is given below.

This Table, however does not include self-supporting persons of livelihood class VIII—other services and miscellaneous sources—whose sources of income fall under the following :—

(i) Persons living principally on income from non-agricultural property
(ii) Persons living principally on pensions, remittances, scholarships and funds
(iii) Inmates of jails, asylums, almshouses and recipients of doles
(iv) Beggars and vagrants
(v) All other persons living principally on income derived from non-productive activity

The fly leaf to this Table gives the details of persons under the five categories mentioned above.

List of the divisions and sub-divisions of industries and services

DIVISION 0 Primary industries not elsewhere specified

0·1 *Stock raising*

0·11 Herdsmen and shepherds
0·12 Breeders and keepers of cattle and buffaloes
0·10 Breeders and keepers of other large animals including transport animals

0·2 *Rearing of small animals and insects*

0·21 Poultry farmers
0·22 Bee-keepers
0·23 Silkworm rearers
0·24 Cultivators of lac
0·20 Rearers of other small animals and insects

0·3 *Plantation industries*

Owners, managers and workers in
0·31 Tea plantations
0·32 Coffee plantations
0·33 Rubber plantations
0·30 All other plantations but not including the cultivation of special crops in conjunction with ordinary cultivation of field crops

0·4 *Forestry and woodcutting*

0·40 Planting, replanting and conservation of forests (including forest officers rangers and guards)
0·41 Charcoal burners
0·42 Collectors of forest produce and lac
0·43 Woodcutters

0·5 *Hunting (including trapping and game propagation)*

0·6 *Fishing*

0·60 Fishing in sea and inland waters including the operation of fish farms and fish hatcheries
0·61 Gatherers of chanks and pearls
0·62 Gatherers of sea weeds, sea shells, sponges and other water products

DIVISION 1 Mining and quarrying

1·0 *Non-metallic mining and quarrying not otherwise classified—including mining and quarrying of such materials as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt, bitumen*

1·1 *Coal mining—mines primarily engaged in the extraction of anthracite and of soft coals such as bituminous, sub-bituminous and lignite*

1·2 *Iron ore mining*

1·3 *Metal mining except iron ore mining*
- 1·31 Gold
- 1·32 Lead, silver and zinc
- 1·33 Manganese
- 1·34 Tin and wolfram
- 1·30 Other metallic minerals

1·4 *Crude petroleum and natural gas*
- Oil well and natural gas, well operations (including drilling) and oil or bituminous sand operations

1·5 *Stone-quarrying, clay and sand pits*
- Extraction from the earth of stone, clay, sand and other materials used in building or manufacture of cement

1·6 *Mica*

1·7 *Salt, saltpetre and saline substances*

DIVISION 2 Processing and manufacture—foodstuffs, textiles, leather and products thereof

2·0 *Food industries otherwise unclassified*
- 2·01 Canning and preservation of fruits and vegetables
- 2·02 Canning and preservation of fish
- 2·03 Slaughter, preparation and preservation of meat
- 2·00 Other food industries

2·1 *Grains and pulses*
- 2·11 Hand pounders of rice and other persons engaged in manual dehusking and flour grinding
- 2·12 Millers of cereals and pulses
- 2·13 Grain parchers and makers of blended and prepared flour and other cereal and pulse preparations
- 2·10 Other processes of grains and pulses

2·2 *Vegetable oil and dairy products*
- 2·21 Vegetable oil pressers and refiners
- 2·22 Manufacturers of hydrogenated oils
- 2·23 Makers of butter, cheese, ghee and other dairy products

2·3 *Sugar industries*
- 2·31 Gur manufacture
- 2·30 Other manufactures and refining of raw sugar, syrup and granulated or clarified sugar from sugarcane or from sugar beets

2·4 *Beverages*
- 2·41 Brewers and distillers
- 2·42 Toddy drawers
- 2·43 Ice-manufacturers
- 2·40 Manufacture of aerated and mineral waters and other beverages

2·5 *Tobacco*
- 2·51 Manufacture of bidis
- 2·50 Manufacture of tobacco products (other than bidis) such as cigarettes, cigars, cheroots and snuff (Stemming, redrying and other operations connected with preparing raw leaf tobacco for manufacturing are also included)

2·6 *Cotton textiles*
- 2·61 Cotton ginning, cleaning and pressing
- 2·62 Cotton spinning, sizing and weaving
- 2·63 Cotton dyeing, bleaching, printing, preparation and sponging

2·7 *Wearing apparel (except footwear) and made-up textile goods*
- 2·71 Tailors, milliners, dress makers and darners
- 2·72 Manufacturers of hosiery, embroiderers, makers of crepe, lace and fringes

2·73 Fur-dressers and dyers
2·74 Hat-makers and makers of other articles of wear from textiles
2·75 Manufacture of house furnishing of textiles
2·76 Tent makers
2·70 Makers of other made-up textile goods, including umbrellas

2·8 *Textile industries otherwise unclassified*

2·81 Jute pressing, baling, spinning and weaving
2·82 Woollen spinning and weaving
2·83 Silk reeling, spinning and weaving
2·84 Hemp and flax spinning and weaving
2·85 Manufacture of rayon
2·86 Manufacture of rope, twine, string and other related goods from cocoanut, aloes, straw, linseed and hair
2·80 All other (including insufficiently described) textile industries, including artificial leather and cloth

2·9 *Leather, leather products and footwear*

2·91 Tanners and all other workers in leather
2·92 Cobblers and all other makers and repairers of boots, shoes, sandals and clogs
2·90 Makers and repairers of all other leather products

DIVISION 3 Processing and manufacture—metals, chemicals and products thereof

3·0 *Manufacture of metal products, otherwise unclassified*

3·01 Blacksmiths and other workers in iron and makers of implements
3·02 Workers in copper, brass and bell metal
3·03 Workers in other metals
3·04 Cutlers and surgical and veterinary instrument makers
3·05 Workers in mints, die sinkers, etc.
3·06 Makers of arms, guns, etc. including workers in ordnance factories

3·1 *Iron and steel (basic manufacture)*

Manufacture of iron and steel, including all processes such as smelting and refining; rolling and drawing; and alloying and the manufacture of castings, forgings and other basic forms of ferrous metals

3·2 *Non-ferrous metals (basic manufacture)*

Smelting and refining, rolling, drawing and alloying and the manufacture of castings, forgings and other basic forms of non-ferrous metals

3·3 *Transport equipment*

3·31 Building and repairing of ships and boats
3·32 Manufacture, assembly and repair of railway equipment, motor vehicles and bicycles
3·33 Manufacture of aircraft
3·34 Coach builders and makers of carriages, palki, rickshaw, etc., and wheel wrights
3·30 Manufacture of all other transport equipment

3·4 *Electrical machinery, apparatus, appliances and supplies*

3·41 Manufacture of electric lamps
3·42 Manufacture of electric fans and other accessories
3·43 Manufacture of electric wire and cable
3·40 Manufacture of electrical generating transmission and distribution apparatus; electrical household appliances other than lights and fans; electrical equipment for motor vehicles, aircraft and railway locomotives and cars; communication equipment and related products, including radios, phonographs, electric batteries, X-Ray and therapeutic apparatus; electronic tubes, etc.

3·5 *Machinery (other than electrical machinery) including engineering workshops*

Engineering workshops engaged in producing machine and equipment parts

3·6 *Basic industrial chemicals, fertiliser and power alcohol*

3·61 Manufacture of basic industrial chemicals such as acids, alkali salts
3·62 Dyes, explosives and fireworks
3·63 Synthetic resins and other plastic materials (including synthetic fibres and synthetic rubber)
3·64 Chemical fertilisers
3·65 Power alcohol

3·7 *Medical and pharmaceutical preparations*

3·8 *Manufacture of chemical products otherwise unclassified*

3·81 Manufacture of perfumes, cosmetic and other toilet preparations
3·82 Soaps and other washings and cleaning compounds
3·83 Paints, varnishes and lacquers and polishes
3·84 Ink
3·85 Matches
3·86 Candle
3·87 Starch
3·80 Other chemical products

DIVISION 4 Processing and manufacture—not elsewhere specified

4·0 *Manufacturing industries otherwise unclassified*

4·01 Manufacture of professional scientific and controlling instruments (but not including cutlery, surgical or veterinary instruments)
4·02 Photographic and optical goods
4·03 Repair and manufacture of watches and clocks
4·04 Workers in precious stones, precious metals and makers of jewellery and ornaments
4·05 Manufacture of musical instruments and appliances
4·06 Stationery articles other than paper and paper products
4·07 Makers of plastic and celluloid articles other than rayon
4·08 Sports goods makers
4·09 Toy makers
4·00 Other miscellaneous manufacturing industries, including bone, ivory, horn, shell, etc.

4·1 *Products of petroleum and coal*

4·11 Kerosene and petroleum refineries
4·12 Coke ovens
4·10 Other manufactures of products from petroleum and coal

4·2 *Bricks, tiles and other structural clay products*

Structural clay products such as bricks, tiles, etc.

4·3 *Cement—cement pipes and other cement products*

Manufacture of cement, cement pipes and cement concrete products

4·4 *Non-metallic mineral products*

4·41 Potters and makers of earthenware
4·42 Makers of porcelain and crockery
4·43 Glass bangles, glass beads, glass necklaces, etc.
4·44 Makers of other glass and crystal ware
4·40 Makers of other miscellaneous non-metallic mineral products

4·5 *Rubber products*

4·6 *Wood and wood products other than furniture and fixtures*

4·61 Sawyers
4·62 Carpenters, turners and joiners
4·63 Veneer and plywood makers, match veneer and splint makers
4·64 Basket makers
4·60 Other industries of woody materials, including leaves, but not including furniture or fixtures

4·7 *Furniture and fixtures*

Manufacture of household, office, public building, professional and restaurant furniture ; office and store fixtures, screens, shades, etc., regardless of material used

4·8 *Paper and paper products*

Manufacture of paper and paper board and articles of pulp, paper and paper board

4·9 *Printing and allied industries*

4·91 Printers, lithographers, engravers

4·92 Bookbinders and stitchers

DIVISION 5 Construction and utilities

5·0 *Construction and maintenance of works—otherwise unclassified*

5·1 *Construction and maintenance—buildings*

5·11 Masons and bricklayers

5·12 Stone-cutters and dressers

5·13 Painters and decorators of house

5·10 Other persons engaged in the construction or maintenance of buildings other than buildings made of bamboo or similar materials

5·2 *Construction and maintenance—roads, bridges and other transport works*

5·3 *Construction and maintenance—telegraph and telephone lines*

5·4 *Construction and maintenance operations—irrigation and other agricultural works*

5·5 *Works and services—electric power and gas supply*

5·51 Electric supply

5·52 Gas supply

5·6 *Works and services—domestic and industrial water supply*

5·7 *Sanitary works and services—including scavengers*

DIVISION 6 Commerce

6·0 *Retail trade otherwise unclassified*

6·01 Hawkers and street vendors otherwise unclassified

6·02 Dealers in drugs and other chemical stores

6·03 Publishers, booksellers and stationers

6·00 General storekeepers, shopkeepers and persons employed in shops otherwise unclassified

6·1 *Retail trade in foodstuffs (including beverages and narcotics)*

6·11 Retail dealers in grain and pulses ; sweetmeats, sugar and spices, dairy products, eggs and poultry ; animals for food ; fodder for animals ; other foodstuffs, vegetables and fruits

6·12 Vendors of wine, liquors, aeratad waters and ice in shops

6·13 Retail dealers in tobacco, opium and ganja

6·14 Hawkers and street-vendors of drink and foodstuffs

6·15 Retail dealers in pan, bidis and cigarettes

6·2 *Retail trade in fuel (including petrol)*

6·21 Petroleum distributors

6·20 Retail dealers (including hawkers and street-vendors) in firewood, charcoal, coal, cow dung and all other fuel except petroleum

6·3 *Retail trade in textile and leather goods*

Retail trade (including hawkers and street-vendors) in piece goods, wool, cotton, silk, hair, wearing apparel, made-up textile goods, skin, leather, furs, feathers, etc.

6·4 *Wholesale trade in foodstuffs*

Wholesale dealers in grains and pulses, sweet-meats, sugar and spices ; dairy products, eggs and poultry animal for food, fodder for animals, other foodstuffs, wholesale dealers in tobacco, opium and ganja

6·5 *Wholesale trade in commodities other than foodstuffs*

6·6 *Real estate*

House and estate agents and rent collectors except agricultural land

6·7 *Insurance*

Insurance carriers and all kinds of insurance agents and other persons connected with insurance business

6·8 *Money lending, banking and other financial business*

Officers, employees of joint-stock banks and co-operative banks, munims, agents or employees of indigenous banking firms, individual money lenders, exchangers and exchange agents, money-changers and brokers and their agents

DIVISION 7 Transport, storage and communications

7·0 *Transport and communications otherwise unclassified and incidental services*

7·1 *Transport by road*

Owners, managers and employees connected with mechanically driven and other vehicles (excluding domestic servant) palki, etc., bearers and owners, pack elephant, camel, mule, ass and bullock owners and drivers, porters and messengers, persons engaged in road transport not otherwise classified, including freight transport by road, the operation of fixed facilities for road transport such as toll roads, highway bridges, terminals and parking facilities

7·2 *Transport by water*

Owners and employees, officers, mariners, etc., of ships plying on the high seas, ships and boats plying on inland and coastal waters, persons employed in harbours, docks, rivers and canals, including pilots, ship brokers

7·3 *Transport by air*

Persons concerned with airfields and aircraft other than construction of airfields and air ports

7·4 *Railway transport*

Railway employees of all kinds except those employed on construction works

7·5 *Storage and warehousing*

The operation of storage facilities such as ware-houses, cold storage, safe deposits when such storage is offered as an independent service

7·6 *Postal services*

7·7 *Telegraph services*

7·8 *Telephone services*

7·9 *Wireless services*

DIVISION 8 Health, education and public administration

8·1 *Medical and other health services*

8·11 Registered medical practitioners

8·12 Vaids, hakims, and other persons practising medicine without being registered

8·13 Dentists

8·14 Midwives

8·15 Vaccinators

8·16 Compounders

8·17 Nurses

8·10 All other persons employed in hospitals or other public or private establishments rendering medical or other health services ; but not including scavengers or other sanitary staff

8·2 *Educational services and research*

8·21 Professors, lecturers, teachers and research workers employed in universities, colleges and research institutions

8·22 All other professors, lecturers and teachers

8·20 Managers, clerks and servants of educational and research institutions, including libraries and museums, etc.

8·3 *Army, Navy and Air Force*

8·31 Army
8·32 Navy
8·33 Air Force

8·4 *Police (other than village watchmen)*

8·5 *Village officers and servants, including village watchmen*

8·6 *Employees of municipalities and local boards (but not including persons classifiable under any other division or sub-division)*

8·7 *Employees of State Governments (but not including persons classifiable under any other division or sub-division)*

8·8 *Employees of the Union Governments (but not including persons classifiable under any other division or sub-division)*

8·9 *Employees of Non Indian Governments*

DIVISION 9 Services not elsewhere specified

9·0 *Services otherwise unclassified*

9·1 *Domestic services (but not including services rendered by members of family households to one another)*

9·11 Private motor drivers and cleaners
9·12 Cooks
9·13 Gardeners
9·10 Other domestic servants

9·2 *Barbers and beauty shops*
Barbers, hair dressers and wig makers, tatooers, shampooers, bath houses

9·3 *Laundries and laundry services*
Laundries and laundry services, washing and cleaning

9·4 *Hotels, restaurants and eating houses*

9·5 *Recreation services*
Production and distribution of motion pictures and the operation of cinemas and allied services, managers and employees of theatres, opera companies, etc., musicians, actors, dancers, etc., conjurers, acrobats, recitors, exhibitors of curiosities and wild animals, radio broadcasting studios

9·6 *Legal and business services*

9·61 Lawyers of all kinds, including qazis, law agents and mukhtiars
9·62 Clerks of lawyers, petition writers, etc.
9·63 Architects, surveyors, engineers and their employees (not being State servants)
9·64 Public scribes, stenographers, accountants, auditors
9·65 Managers, clerks servants and employees of trade associations, chamber of commerce, board of trade, labour organization and similar organisation of employers and employees

9·7 *Arts, letters and journalism*

9·71 Artists, sculptors and image makers
9·72 Authors, editors and journalists

9·8 *Religious, charitable and welfare services*

9·81 Priests, ministers, monks, nuns, sadhus, religious mendicants and other religous workers
9·82 Servants in religious edifices, burial and burning grounds, pilgrim conductors and circumcisors, etc.
9·83 Managers and employees of organisations and institutions rendering charitable and other welfare services

C I SIZE AND COMPOSITION OF HOUSEHOLDS

(ESTIMATES ONLY)

This Table has been prepared from a four per cent. sample of households in the National Register of Citizens. Estimates for the whole district with urban—rural break-up were calculated from the figures obtained from the sample.

The figures are arranged under two broad groups:—

(A) Size of households
(B) Composition of households

In (A) households have been called:

(a) "Small" if the number of inmates is 3 or less
(b) "Medium" if the number of inmates is between 4 and 6
(c) "Large" if the number of inmates is between 7 and 9
(d) "Very large" if the number of inmates is 10 or more

Under (B) the inmates in a household are described under relationship to the head of the household.

AGE GROUPS

Tables C II, C III and C IV

These Tables have not been prepared for the entire population. At the time of sorting, a ten percent. sample of slips for every village and ward (in municipal towns) was extracted on a purely random basis and the slips in the sample were alone used for these Tables.

Based on the sample figures, estimates for the districts have been calculated.

C II LIVELIHOOD CLASSES BY AGE GROUPS

(ESTIMATES ONLY)

The Table gives the estimated figures for the District under the eight Livelihood Classes in broad age groups.

D I LANGUAGES

(i) Mother-tongue

This Table gives the distribution of the population according to the returns for mother-tongue. The mother-tongue of infants has been considered to be the same as that of their mothers. The languages returned are listed below:

1. Malayalam
2. Tamil
3. Telugu
4. Hindi
5. Gujarathi
6. Canarese
7. Konkani
8. Marathi

D III SCHEDULED CASTES AND SCHEDULED TRIBES

This Table gives the figures for Scheduled Castes and Scheduled Tribes. Hindu communities listed below fall under the category "Scheduled Castes" in this State.

(i) *List of Scheduled castes*

1. Ayyanavar
2. Bharatar
3. Chakkiliyan
4. Domban
5. Eravalan
6. Kakkalan
7. Kanakkan
8. Kavar
9. Kootan (Koodan)
10. Kuravan
11. Mannan
12. Nayadi
13. Padannan
14. Pallan
15. Palluvan
16. Panan
17. Paravan
18. Parayan (Sambavar)
19. Pathiyan
20. Perumannan
21. Pulayan
22. Thandan
23. Ulladan
24. Uraly
25. Vallon
26. Valluvan
27. Vannan
28. Velan
29. Vetan
30. Vettuvan

The list of Scheduled Tribes for the State is given below :—

1. Hill Pulaya
2. Kadan
3. Kanikkaran
4. Kochuvelan
5. Mala Arayan
6. Mala Pandaran
7. Mala Vedan
8. Malayan
9. Malayarayan
10. Mannan
11. Muthuvan
12. Palleyan
13. Palliyar
14. Ulladan (Hill dweller)
15. Uraly
16. Vishavan

TABLE D IV MIGRANTS

The Table gives the distribution of population enumerated in each district in the State according to their places of birth. The places of birth have been broadly grouped as follows :—

1 Districts within the State
2 Other States in India
3 Countries in Asia beyond India
4 Countries in Europe
5 Countries in Africa
6 Countries in America
7 Countries in Australia
8 At sea

D IV MIGRANTS

District or State in India or country of birth	Persons	Males	Females
1	2	3	4
Total population	**1,783,771**	**902,282**	**881,489**
1 Districts within the State	**1,704,213**	**860,349**	**843,864**
Trivandrum	8,059	4,611	3,448
Quilon	57,157	25,695	31,462

C

DISTRICT CENSUS HANDBOOK

KOTTAYAM

Part III

VILLAGE STATISTICS

VILLAGE STATISTICS

The details presented in the Tables on Village Statistics have been compiled from census data, and reports from taluk census officers, supervisors and enumerators. The smallest area for which separate figures have been given is the village or ward. Information gathered for each village or ward falls under the following heads :—

(i) Name and code number
(ii) Area
(iii) Dwelling houses
(iv) Institutions
(v) General information
(vi) Population

(i) *Name and code number.* Just as every plot of surveyed land has been given a survey number, every unit of area covered by this census has been assigned a code number. The four districts in the State have been numbered 1, 2, 3 and 4, Trivandrum being 1, Quilon 2, Kottayam 3 and Trichur 4. Within each district, the taluks have been serially numbered, in relation to geographical position, as 1-1, 1-2, etc. Within each taluk, the pakuthies (in Travancore) and proverthies (in Cochin) are numbered serially. Within each pakuthy, the karas are once again given numbers. Thus the code number of a kara will involve 4 numerals, the first relating to the district, the second to the taluk, the third to the pakuthy and the fourth to the kara.

The municipal towns have similar code numbers. Within the district, the municipal towns are given Roman numerals. Within each municipality, the wards are also assigned code numbers.

It is hoped that in course of time, code numbers will come into common use.

(ii) *Area.* The area figures for each kara have been obtained from the Tahsildars while those for wards in municipal towns and portions of karas in non-municipal towns have been furnished by the municipal and public health officers. These figures are only approximate as correct area records for such divisions of the pakuthy do not exist.

For each kara, figures for areas under wet-land, dry-land and waste-land are also given. These figures are also only approximate:

(iii) *Dwelling houses.* The figures under this head give the number of dwelling houses in each kara or ward.

(iv) and (v) *Institutions and general information.* Information relating to these items was collected by each enumerator in schedules supplied for the purpose.

Though not exhaustive, it is claimed that details on most of the important aspects of social life in each locality are made available.

(vi) *Population.* The total population of each area, the number of literates and the number of males and females in each of the eight livelihood classes are given.

The following abbreviations have been used :—

L, M or H, immediately following the name of a pakuthy or proverthy denotes the natural subdivision of the State in which it is situated—lowland, midland or highland respectively.

T	stands for	..	temple
