MOTIF

Temples, mosques, churches, gurudwaras are not only the places of worship but are the faith centres to obtain peace of the mind.

This beautiful temple of eleventh century is dedicated to Lord Shiva and is located at Ambernath town, 28 km away from district headquarter town of Thane and 60 km from Bombay by rail. The temple is in the many-cornered Chalukyan or Hemadpanti style, with cut-corner-domes and close fitting mortarless stones, carved throughout with half life-size human figures and with bands of tracery and belts of miniature elephants and musicians.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data up to village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The District Census Handbook series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part A related to village and town directory, Part B to village and town PCA and Part C comprised analytical report administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approached to the village is to have an idea about the villages in the district which are inaccessible. A new coloumn, " total population and number of households " has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC and ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information

on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part A of the volume contains village and town directory and Part B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies), of my office. Dr. B. K. Roy, Deputy Registrar General (Map), provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi:
Dated the 26th April 1982

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay:

*Kulgaon ..	U	3.63	3,663	..	..	1	2,800	2,838	13,297	7,090	6,207

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsils in the State Land Records Department. The total areas, as also the rural areas, for the tahsils in district, may not, therefore, strictly add up to the corresponding figures shown against the district. Names of towns treated as such for the first time in 1971 which continue as towns in 1981 have been marked with an asterisk(*). Names of towns treated as such for the first time in 1981 have been printed in *italics*.

APPENDIX 1 TO SUMMARY TABLE 1

Tahsilwise number of villages with population of 5,000 or over and of Towns with population under 5,000

(Tahsils which have nothing to show for this statement have been omitted from presentation)

District/Tahsil	Villages with population of 5,000 or over			Towns with population under 5,000		
	Number	Population in the concerned villages	Percentage to rural population of the respective District/Tahsil	Number	Population in the concerned towns	Percentage to urban population of the respective District/Tahsil
1	2	3	4	5	6	7

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts. Part A related to the village and town directory, Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other States in India), only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health subcentres and community health workers has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in Class I and Class II towns are oriented to minimum needs programme especially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

Thane or Thane port is famous since pre-historic times, particularly for its leading part in the foreign commerce of Western India. It had relations with lands beyond the Indian Ocean. From 2500 B.C. to 500, B.C. there were signs of trade with Egypt, Phoenicia and Babylon; from 250 B.C. to A.D. 250 there were dealings with perhaps settlements of Greeks and Parthians; from A.D. 250 to A.D. 640 there were Persian alliances and Persian settlements; from A.D. 700 to A.D. 1200 there were Musalman trade relations and Musalman settlements from Arabia and Persia; in 1530 there was the part conquest by the Portuguese; and in 1664 the settlement of the British.

Thane, as we see today, was a part of North Konkan district till 1817. Those days also Thane was the district headquarters. Since then, however, its boundaries have undergone numerous changes. Some parts of South-Konkan district were merged with the North-Konkan district in 1830 and in 1833. The expanded North-Konkan district was renamed as Thane District in 1833. Again, in 1853, the three sub-divisions of Pen, Roha and Mahad together with Underi and Revdanda agencies of then Kolaba (now Raigarh district) were formed into the sub-collectorate of Kolaba, under Thane, and were finally separated to become independent district in 1869. The administrative sub-divisions of Thane were reorganised and renamed in 1866. Thus Sanjan was named as Dahanu, Kolvan as Sahapur, and Nasrapur as Karjat. Wada Peta was elevated to the level of a Taluka. In 1861 Uran Mahal was separated from Salsette and bracketted with Panvel. Subsequently Panvel, together with its mahals of Uran and Karanja were transferred to Kolaba district in 1883. Karjat was also transferred in 1891. A new mahal with Bandra as headquarters was carved out in 1917. 1920 witnessed the division of Salsette into the two talukas of North Salsette and South Salsette. Later, South Salsette comprising of eighty-four villages was separated from Thane district to form a part of newly created Bombay Suburban district. North Salsette was made a mahal under Kalyan taluka in 1923 and renamed as Thana in 1926. Kelve-Mahim was also renamed as Palghar. 33 villages of Bombay suburban district were transferred to Thane district in 1945 and 14 of them were retransferred to Bombay Suburban district in 1946. This was the time when Aarey Milk Colony was constituted. In 1949, Jawhar State was annexed to Thane district and made into a separate taluka. In 1956, 27 villages and 8 towns from Borivali taluka and one town and one village from Thana taluka were transferred to the Bombay Suburban district when the limits of Greater Bombay were extended northwards in Salsette. Following the bifurcation of bilingual Bombay State in 1960, 47 villages and 3 towns from the Umbargaon taluka were transferred to Surat district in Gujrat and its remaining 27 villages were first included in Dahanu and later in 1961 made into a separate mahal, Talasari. In 1969 the taluka of Kalyan was bifurcated into two Kalyan and Ulhasnagar and since then the district has experienced no jurisdictional change.

Within the district, however, with the declaration of hamlets as full fledged villages, the number of inhabited villages has swelled from 1,588 in 1971 to 1,746 in 1981. The number of uninhabited villages has, on the other hand, shrunk from 34 in 1971 to 27 in 1981. As regards

the towns, the same numbered 24 in 1971. Since then with the recognition of 11 villages as towns and declassification of one town; viz. Badlapur, the number of towns in the district has risen to 34. Infact the largest number of towns in the State has been found in this district. The district ranks fourth in the State in terms of proportion of urban population to its total population.

Location, Relief and Drainage

Thane district is in the north-west of Maharashtra State adjoining the Arabian sea. It lies between 18° 42′ and 20° 20′ north latitude and 72° 45′ and 73° 45′ east longitude. Its northern boundaries are contiguous with the Union territories of Dadra, Nagar Haveli and the state of Gujrat. Nashik and Ahmadnagar districts fall in its east and Pune in the south-east. Raigarh and Greater Bombay districts border it in the south and south-west respectively. The district is spread over an area of 9,558 km.^{2} and in 1981 its population has been returned at 3,351,562 persons. This population constitutes 5.34 per cent of the population of the State and ranks 3rd among the districts. So far as its position in area is concerned it ranks 20th.

Geographically it forms a part of Konkan low lands. It comprises the wide amphitheater like basin of the Ulhas and the more hilly Vaitarna valley together with plateaus skirting the Sahyadrian scrap.

Sahyadri range and its off-shoots comprise the main hill system of the district. From the steep scraps of the Sahyadri in the east, the land of the district falls through a succession of plateaus in the north and centre of the district to the Ulhas valley in the south centre. These low lands are separated from the coastal flats by a fairly well-defined narrow ridge of hills that runs north-south to the east of the Thane creek, maintaining parallelism to the shores. A number of isolated hills and spurs dot the entire district area. As such the district as a whole appears hilly. Vaitarna is the principal river of the district. It rises in the Tryambak hills in the Nashik district opposite the source of Godavari and enters Thane at Vihigaon near Kasara. It has a length of 154 kms. Of its number of tributaries, the Pinjal, the Surya and the Tansa are most important.

Ulhas is the other important river. It rises in the north of Tungarli near Lonavala. Initially it has a southerly flow. For a short distance it adopts a westerly course. Subsequently it discards the scrap slopes of the Sahyadris near Borghat. The river has many tributaries and the most important ones are the Kalu and the Bhatsai.

Climate

Round the calendar the district is conspicuous by high humidity, an oppressive summer season, and well distributed and heavy rainfall during the south-west monsoon season. The year may be divided into four seasons. Winter from December to February is followed by summer from March to June. The south-west monsoon season is from late June to September, October and November, however, constitute the post-monsoon season. No doubt, the district receives very heavy rainfall. but the same is not uniform throughout the district. It is considerably more inland than on the coast. Also it is less towards the north than towards the south. The rainfall varies from 1,730.5 mm (68.13″) at Mahim on the coast to 2,588.7 mm (101.91″) at Shahapur in the interior. The rainfall during the south-west monsoon season, i.e. June to September, constitutes about 94 per cent of the annual rainfall. July is the rainiest month with a rainfall of about 40 per cent of the annual total.

Being a coastal district variations in temperature are not large. After February, however, temperatures progressively increase till May which is the hottest month with the mean daily temperature at 32.9° centigrade. In summer season and in June before the onset of monsoon day temperatures may sometimes go above 37° centigrade in the coastal parts while in the interior it may be a couple of degrees higher. The oppressive heat is on most days relieved by cool sea-breezes particularly in the coastal regions. Owing to its proximity of the sea the district is on the whole very humid nearly all the year round.

Some of the cyclonic storms in the Arabian sea in the latter part of the summer and the post-monsoon season either more in a northerly direction in the vicinity of the coast or across the coast in this district or its neighbourhood. On such occasions the district experiences torrential rains and winds sometimes reaching gale force particularly in the coastal region.

Soil

Blackish soil containing sand is found all along the coast particularly in parts of Dahanu, Palghar and Vasai tahsils. It is suitable for horticulture, paddy cultivation and vegetable growing. Red and brown soil is found in the east of the district. Though it is not very deep, but it is suitable for rice growing. Further east on the hill slope, the soil is poor and is used for growing grass or coarse grains like Nagli, Vari etc. In the valleys there are patches of black soil in Bhiwandi, Kalyan, Mokhada and Shahapur tahsils where rice is grown.

Census Houses and Households

The primary census abstract in columns 4 and 5 reveals the number of occupied residential houses as also the households in the district. In census a ' Census House' has been defined as a building or a part thereof having a main entrance from the road or common courtyard or staircase etc. It may be vacant or occupied, residential, non-residential or both. A ' household' is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. A ' household' may comprise of persons related by blood or of unrealated persons or having a mix of both. A household may be a single member or more than one member household. The households constituted of

unrelated persons are called ' institutional households' and include boarding houses, measses, hostels, residential hotels, rescue homes, jails, ashrams etc.

Yet another category comprises of houseless house holds. Such households comprise of persons who do not have any fixed place of residence but go on moving from place to place, camp at night on their own choosing or just live on streets, pavements, gardens or in open places.

At 1981 census, the number of residential houses in the district stands at 640,193 and the number of households at 655,516. It obiviously implies in some cases, one residential house occupies more than one household. These households absorb 3,351,562 population of the district yielding an average size of household of 5.11 persons, which is lower than the state average of 5.37 persons.

Distribution of Populatinn in Rural and Urban Areas

As returned at 1981 census, the population of the district stands at 3,351,562 comprising of 1,779,645 males and 1,571,917 females. When compared with the state population of 62,784,171 persons, the population of the district constitutes 5.34 per cent of the same. This population of the district is spread over an area of 9,558 km.^{2} In terms of population the district ranks 3rd and in geographical area 20th in the state. There are 13 tahsils in the district and Thane tahsil is the most populous one (638,651). Kalyan and Ulhasnagar rank second and third with a population of 474,708 and 452,209 respectively. The remaining tahsils in order of size of their population are : Bhiwandi (396,455), Vasai (278,631), Palghar (264,065), Dahanu (222,241), Shahapur (172,810), Murbad (115,369), Jawhar (109,479), Vada (95,652), Talasari (67,056), and Mokhada (64,236) (Table 1).

TABLE 1

Population, Number of Villages and Towns, 1981

11	Murbad ..	115,369	58,267	57,102	115,369	58,267	57,102	....	....	....	173	170	..
12	Kalyan ..	474,708	254,903	219,805	144,838	78,199	66,639	329,870	176,704	153,166	114	112	8
13	Ulhasnagar ..	452,209	239,629	212,580	68,897	35,697	33,200	383,312	203,932	179,380	92	88	3
	District total ..	3,351,562	1,779,645	1,571,917	1,865,342	965,472	899,870	1,486,220	814,173	672,047	1,773	1,746	34

As would be seen from the above figures, the most populous tahsil is about ten times larger than the least populous tahsil.

In the rural areas the basic administrative unit is a revenue village. A ' village' may be defined as a statutory recognised unit having definite boundaries and independent land records. Urban areas on the other hand are specifically defined for census purposes. The criteria adopted for 1981 census is :—

(*a*) All places with a municipality, corporation or cantonment board or notified town areas.

(*b*) All other places which satisfy the following criteria :—

(*i*) A minimum population of 5,000;

(*ii*) Atleast 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(*iii*) A population of at least 400 persons per km.^{2}

There are 1,773 villages in the district inclusive of 27 uninhabited one. These villages are inhabited by 1,865,342 persons. Thus the rural population constitutes 55.7 per cent of the total population of the district. As already mentioned the district has the largest number of towns (34) and these towns absorb the remaining 44.3 per cent population. The proportion of urban population to population in the district is significantly higher than found at the state level (35.0%).

Size, Class and Status of Towns

Towns have been divided into the following classes to facilitate a comprehensive analysis of various demographic variables :—

Class I	..	100,000 and above
Class II	..	50,000 — 99,999
Class III	..	20,000 — 49,999
Class IV	..	10,000 — 19,999
Class V	..	5,000 — 9,999
Class VI	..	Below 5,000

For 1981, eleven new towns have been considered and one town, namely Badlapur has been declassified (Table 2).

TABLE 2

New Towns/Towns declassified in 1981 Census

Name of the town	Population 1981 Census
1	2
(*a*) Added—	
(*i*) Ayare (C.T.)	19,320
(*ii*) Balkum (C.T.)	9,019
(*iii*) Chikanghar (C.T.)	9,976
(*iv*) Chole (C.T.)	8,444
(*v*) Gajabandhan Patharli (C.T.)	13,474
(*vi*) Ghansoli (C.T.)	8,062
(*vii*) Kolshet (C.T.)	10,190
(*viii*) Mumbra (C.T.)	22,657
(*ix*) Nagaon (C.T.)	29,513
(*x*) Narpoli (C.T.)	25,788
(*xi*) Sopara (C.T.)	4,337
(*b*) Declassified—	
(*i*) Badlapur (N.A.)	5,973

As per above Classification five towns viz., Bhiwandi, Dombivli, Kalyan, Thane and Ulhasnagar are Class I towns. Ambarnath is the only class II town in the district. 9 class III towns are Bhayandar, Kalwa. Katemanivali, Majivade, Mumbra, Nagaon, Narpoli, Vasai and Virar. There are 6 class IV towns viz ; Ayare, Gajabandhan Patharli, Kolhset, Kulgaon, Mohone and Palghar. Largest number of towns falls in size class V (11) and the remaining 2 are class VI towns. It may be pointed out here that of the 34 towns in the district there are only 8 municipal towns and the remaining 26 are census towns.

Urban Agglomeration

As in 1971 the concept of urban agglomeration has been adopted for 1981 census too. An urban agglomeration may constitute;

(*a*) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of adjoining village or villages);

(*b*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); or

(*c*) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

In Thane district, there are only four urban agglomerations (U.A.) i.e. Dahanu U.A., Thane U.A., Ulhasnagar U.A, Vasai U.A. and its constituent units are :

1. Dahanu U.A.
   (*a*) Malyan
   (*b*) Dahanu
2. Thane U.A.
   (*a*) Thane City (M.)
   (*b*) Majivade
   (*c*) Kalwa
3. Ulhasnagar U.A.
   (*a*) Ulhasnagar City (M).
   (*b*) Kalyan City (M).
   (*c*) Dombivli City (M.)
   (*d*) Ambarnath (M).
   (*e*) Katemanivali
   (*f*) Mohone
4. Vasai U.A.
   (*a*) Vasai (M.)
   (*b*) Manikpur
   (*c*) Sandor.

Standard Urban Area

Standard Urban Area (S.U.A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirements for the constitution of S.U.A. are :

(*i*) It should have a core town of a minimum population of 50,000;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the, core town; and

(*iii*) In all probability this entire area should get fully urbanised within a span of two or three decades.

The constituent units of Bhiwandi and Kalyan-Ulhasnagar standard urban ' areas in Thane district are as follows:—

1. Bhiwandi S.U.A : Urban Components :—

(1) Bhiwandi City (M), (2) Nagaon, (3) Narpoli.

Rural Components :—

(1) Kawad Kh., (2) Sontaka, (3) Khandape, (4) Vadpe, (5) Dhamangaon, (6) Kashivali, (7) Vaghivali, (8) Katai, (9) Karivali, (10) Khoni, (11) Dahyale, (12) Shelar, (13) Savandhe, (14) Gorsai, (15) Bhinar, (16) Nimbavali, (17) Yavai, (18) Pogaon, (19) Chavindre, (20) Gauripada, (21) Kaneri, (22) Bhadvad, (23) Fene, (24) Kamatghar, (25) Temghar, (26) Sainagar, (27) Saravali T. Sonale, (28) Ranjanoli, (29) Pimpalgaon, (30) Pimpalghar.

2. Kalyan-Ulhasnagar S.U.A: Urban Components:—

(1) Ulhasnagar City (M), (2) Kalyan City (M), (3) Dombivali City (M), (4) Ambarnath (M), (5) Katemanivali, (6) Mohone, (7) Ayare, (8) Gajabandhan Patharli, (9) Chikanghar, (10) Chole.

Rural Components :—

(1) Adivali Dhokli, (2) Chinchpada, (3) Javasai, (4) Ashele, (5) Manere, (6) Dwarli, (7) Umbroli, (8) Bhal, (9) Chikhaloli, (10) Sabe, (11) Titawala, (12) Diva, (13) Mande, (14) Mhatardi, (15) Dativali, (16) Ambivali, (17) Agasan, (18) Balyani, (19) Mohili, (20) Galegaon, (21) Atali, (22) Vadavali T. Barhe, (23) Gauripada, (24) Barae, (25) Kolivali, (26) Umbarde, (27) Sapad, (28) Vadeghar, (29) Gandhare, (30) Varap, (31) Kambe, (32) Mharal, (33) Shahad, (34) Khadegolavali, (35) Tis, (36) Netivali, (37) Kachore, (38) Kanchangaon, (39) Navagaon, (40) Shivaji Nagar, (41) Gavdevi, (42) Thakurli, (43) Juni Dombivali, (44) Kopar, (45) Pisavali, (46) Nandivali T. Pachanand, (47) Golavali, (48) Asdegolavali, (49) Mangaon, (50) Sagaon Sonarpada, (51) Nandivali T. Ambarnath, (52) Bhopar, (53) Sandap, (54) Gharivali, (55) Sonarpada, (56) Davadi, (57) Hedutane, (58) Usarghar, (59) Katai, (60) Kole, (61) Nilaje, (62) Ghesar.

Table (3) indicates the villages in the district, their classification into various ranges and their percentage to total inhabited villages in the district.

TABLE 3

Distribution of Inhabited Villages by Population Ranges

Range of population	No. of villages in each range	Percentage of villages in each range
1	2	3
—200 ..	142	8.13
200—499 ..	434	24.86
500—1,999 ..	982	56.24
2,000—4,999 ..	151	8.65
5,000—9,999 ..	31	1.78
10,000 ..	6	0.34
All ranges ..	1,746	100.00

On an average a village has a population of 1,068 persons. There are 1,746 inhabited villages in the district. Of these 142 villages have a population of less than 200 each. Against this 6 villages have more than 10,000 population. The largest number of villages (982) accounting for 56.24 per cent of the villages in the district fall in the size class 500—1,999. Second largest number of villages (434) are found in the size class 200—499. The remaining 151 and 31 villages lie in the population range of 2,000—4,999 and 5,000—9,999 respectively. For a broader generalisation the villages have been grouped as : small sized (below 500), medium sized (500—1,999), large sized (2,000—4,999) and exceptionally large sized (5,000+). Accordingly 576 are small sized, 982 medium sized, 151 large sized and 37 exceptionally large sized villages in the district. Here again medium sized villages claim the highest proportion of villages (56.24%).

Population Growth, Density and Sex Ratio

During the decade 1971-81, 1,069,898 persons were added to the 1971 population of 2,281,664. Needless to say, the growth rate revealed by the district (46.89%) is much higher than the state growth rate of 24.54 per cent during the same period. The highest growth rate can safely be attributed to rapid industrial growth in the district coupled with over flow of population from adjoining areas. Thane district might have partly absorbed the influx into the Bombay city. Within the district during the decade 1971-81, Thane tahsil revealed the highest growth rate (92.31%) followed by Kalyan tahsil (73.01%). Other tahsils revealing a growth rate higher than the district average are Bhiwandi (61.14%) and Ulhasnagar (58.65%). Vada tahsil has experienced the lowest growth rate (13.99%). Rural urban differentials reveal the urban growth rate of the order of 79.77 per cent and rural of 28.21 per cent. Highest rural growth rate has been found in Thane tahsil (51.80%) and the highest urban growth rate in Bhiwandi tahsil (114.38%). No urban growth has, however, been observed in Talasari, Mokhada and Murbad tahsils because these tahsils are wholly rural (Table 4).

TABLE 4

Decadal Change in Distribution of Population

Name of Tahsil	Population						Percentage decadal (1971-81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10

8. Vada	83,914	75,746	8,168	95,652	86,268	9,384	+13.99	+13.89	+14.89
9. Bhiwandi	246,024	166,448	79,576	396,455	225,856	170,599	+61.14	+35.69	+114.38
10. Shahapur	143,325	135,438	7,887	172,810	163,986	8,824	+20.57	+21.08	+11.88
11. Murbad	99,585	99,585	..	115,369	115,369	..	+15.85	+15.85	..
12. Kalyan	274,382	102,736	171,646	474,708	144,838	329,870	+73.01	+40.98	+92.18
13. Ulhasnagar	285,043	48,844	236,199	452,209	68,897	383,312	+58.65	+41.06	+62.28
District Total ..	2,281,664	1,454,915	826,749	3,351,562	1,865,342	1,486,220	46.89	+28.21	+79.77

Decadal variation in population shows that except for the decade 1911–21 when the severe influenza epidemic took a heavy toll of life, the population has increased all along though not at uniform rate. As conditions improved after 1921, there has been a distinct change in the trend of variation. In 1921–31 and 1931–41, the rate of growth has been consistent and moderate standing at 10.44 per cent and 12.02 per cent respectively. The very high rate of growth experienced during 1941–51 (45.36%) could be due partly to the industrial growth which might have caused migration of population from other areas; and the post partition immigration of large

members of displaced persons from Pakistan. In the decade 1951–61 the growth rate has been at a lower rate (28.86%) which was, however, higher than the state average. During the decade 1961–71, the district population increased at a higher rate (38.06%) as compared to the 1951–61 rate. The mushroom growth of industries in the Thane-Kalyan region contributed to this high rate of growth. Since the Maharashtra government has imposed a ban on setting up a new industrial establishment in the Greater Bombay district, such industries have found a cushion in nearby Thane district. As a result the highest evergrowth rate has been observed during 1971–81 (46.89%). As a corollary to this drift in population we see Greater Bombay district has for the first time yielded to Thane district with a lower growth rate.

Greater Bombay district apart, Thane district has revealed the highest density of population. 33,51,562 persons spread over an area of 9,558 km² yields a density of 351 persons per km². This is higher than the state average of 204 persons per km². From amongst the various tahsils in the district, Thane tahsil has revealed the highest density of 1,794 persons per km². Kalyan and Ulhasnagar tashils follow with the density of 1,433 and 1,256 persons per km² respectively. There are two other tahsils *viz.*, Bhiwandi and Vasai which have revealed a density above the district average. The same is 549 in the former case and 517 in the latter. All other tahsils have returned the same below the district average the lowest density of 94 persons per km² has been observed in Mokhada tahsil. In the urban areas of the district the density per km² has shown a significant upward trend. From 2,637 persons per km² in 1961, the same was found at 4,066 in 1971. At 1981 census density of 6,395 persons per km² has been observed. Corresponding densities at the state level are at 1,694, 2,555 and 3,736 (Table 5).

TABLE 5

Growth, Density and Sex-Ratio of Urban Population in the District in relation to the State

Census Year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (Population per km².)	Sex Ratio (No. of females per 1,000 males)	Total Population	Urban Population	%Urban population	Decadal percentage variation in urban population	Denity (Population per km²)	Sex Ratio (No. of females per 1,000 males)
1	2	3	4	5	6	7	8	9	10	11	12	13
1951 ..	1,282,572	378,500	29.51	+273.56	N.A.	851	32,002,564	9,201,013	28.75	+62.42	N.A.	807
1961 ..	1,652,678	499,328	30.21	+31.92	2,637	823	39,553,718	11,162,561	28.22	+21.32	1,694	801
1971 ..	2,281,664	826,749	36.23	+65.57	4,066	812	50,412,235	15,711,211	31.17	+40.75	2,555	820
1981 ..	3,351,562	1,486,220	44.34	+79.77	6,395	825	62,784,171	21,993,594	35.03	+39.99	3,736	850

N.A. = Not available.

Amongst the various towns, the highest density of 44,301 persons per km² has been found in Dombivli. Bhiwandi follows with a density of 27,985. Ulhasnagar and Kalyan rank third and fourth with densities of 20,515 and 17,808 respectively.

TABLE 6

Distribution of Villages by Density

Range of density (per km²)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	7	0.40
11—20	19	1.09
21—50	114	6.53
51—100	302	17.30
101—200	592	33.91
201—300	235	13.46
301—500	174	9.96
501+	201	11.51
Not known	102	5.84
All density ranges ..	1,746	100.00

As would be seen from Table 6, of the 1,746 inhabited villages in the district 7 are such as have a density of less than 10 persons per km². On the other hand 201 villages have a density of more than 501 persons per km². The largest number of villages (592) fall in the density range of 101–200 persons per km². The remaining villages fall in various density ranges as shown in the table. There are, however, 102 villages in the district in whose case the density could not be worked out for want of area figures.

Sex ratio which is an indicator of number of females per 1,000 males has been returned at 883 at the 1981 census in case of the district. This is lower than state average of 937 females per 1,000 males. Greater Bombay is the only district in the state with a lower sex ratio (772) than Thane district. This lower sex ratio observed in both the industrial districts of the state is indicative of the male selective migration of population.

Table 6(*i*) reveals the trend of sex ratio in the state and in the district since 1901.

TABLE 6(i)

Sex Ratio 1901—1981

Year	District	State
1901	939	978
1911	947	966
1921	937	950
1931	935	947
1941	940	949
1951	920	941
1961	919	936
1971	894	930
1981	883	937

As would be seen, the sex ratio of the district population has shown continuous decline since 1911 except 1946 census. It reached the level of 883 from 947. At each census the district has recorded a lower sex ratio than the state.

Within the district Bhiwandi tahsil has revealed the lowest sex ratio (751). Thane and Kalyan tahsil have also revealed a sex ratio lower than the district average. Table 6 (*ii*) reveals the number of females per 1,000 males in respect of all the tahsils of the district.

TABLE 6 (ii)

Sex Ratio by Tahsils, 1981

Distaict/Tahsil	Females per 1,000 males
Thane District	883
Thane tahsil	821
Vasai tahsil	935
Palghar tahsil	932
Dahanu tahsil	975
Talasari tahsil	1,039
Jawhar tahsil	1,005
Mokhada tahsil	980
Vada tahsil	981
Bhiwandi tahsil	751
Shahapur tahsil	959
Murbad thasil	980
Kalyan tahsil	862
Ulhasnagar tahsil	887

Talasari and Jawhar are the only two tahsils in the district where females outnumber the males.

Scheduled Castes and Scheduled Tribes

Scheduled castes and scheduled tribes are two such sections of our community as are socially, culturally and economically backward since antiquity. Soon after assuming power in 1947, the popular government enshrined in the constitution the guarantee to ameliorate the condition of these classes. The welfare programmee for these sections can be drawn up only when the data relating to the socio-economic and demographic characteristics of the members of these sections are available. Census infact, is the only source that can make available such data and it has taken up this assignment in 1961 and since then each census has been providing detailed information with regard to various characteristics of the members of these sections. There is no standard definition for a scheduled caste or scheduled tribe. Scheduled castes include castes, races of tribes as are declared to be scheduled castes by the President of India by a public notification under article 341(*i*) of the Indian Constitution. Likewise, Scheduled tribes include all such tribes of tribal community or part or group. Within such tribe or tribal community as are declared by the President of India, to be treated as scheduled tribes under article 342(*i*) of the Indian Constitution. Accordingly for Maharashtra State, 59 castes and 47 tribes have been recognised as scheduled castes and scheduled tribes respectively and the same are given below.

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi,
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjayaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari.
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda, Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (in Akola, Amravati, Bhandara, Buldhana, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.

31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral, Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari, Garudi, Rddhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha, Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Radvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts).
13. Dhanha, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.
17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arahh, Arrakh, Agaria, Ausr, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gawari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonijhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Kathkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattri.
23. Khairwar.
24. Kharia.
25. Kokna, Kohni, Kukna.
26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari, Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar, Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura tahsil of Chandrapur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

Thane district has returned a scheduled caste of 83,825 persons comprising of 44,498 males and 39,327 females at the 1981 census. Thus it constitutes 2.50 per cent of the total population of the district. The proportion is, however, less than the one found at the state level (7.14%), 64.76 per cent of this population has been found in the urban areas and the remaining 35.24 per cent in the rural areas of the district. From amongst 1,746 inhabited villages of the district as many as 1,162 (66.55%) do not have such population. In case of remaining villages, the proporation of such population ranges between less than 5 per cent and above 31 per cent as shown in Table 7.

TABLE 7

Proportion of Scheduled Caste Population to Total Population in the villages

Percentage range of Scheduled Caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. C. Population ..	1,162	66.55
—5	495	28.35
6—10	57	3.27

Scheduled tribe population has been found at 729,424 persons at 1981 census. The same is made up of 368,944 males and 360,480 females. The members of this section constitute a sizeable chunk of the district population (21.76%). 94.97 per cent scheduled tribe population lives in rural areas against 5.03 per cent in urban areas. Scheduled tribe population appears evenly distributed among the villages of the district. There are, however, 121 villages which do not have such population at all (Table 8).

TABLE 8

Proportion of Scheduled Tribe Population to Total Population in the villages

Percentage range of Scheduled tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
No S. T. Population ..	121	6.93
—5	280	16.04

36—50	137	7.85
51 + ...	710	40.66
All ranges ..	1,746	100.00

280 inhabited villages have less than 5 per cent of such population. The largest number of villages (710) have such population to the tune of more than 50 per cent.

In the various towns of the district scheduled caste population constitutes 3.65 per cent and scheduled tribe population 2.47 per cent of the total urban population of the district. The highest proportion of scheduled caste population has been found in Ambarnath town (10.23%) whereas the highest proportion of scheduled tribe population has been observed in Jawhar town (26.56%) (Table 9).

Literacy

A person who can read and write with understanding in any language is treated as literate in Indian Census. Literacy rate in the district has been found at 50.50 per cent which is higher than the state average of 47.18 per cent. In comparison to other districts, Thane occupies the 6th place in terms of literacy in the state. Within the district Kalyan tahsil ranks at the top with a literacy rate of 66.67 per cent. Thane tahsil ranks second with a literacy rate of 63.60 per cent while Ulhasnagar stands third with 57.81 per cent. There is yet another tahsil viz. Vasai with a literacy rate above the district average (57.42%). All other tahsils have returned a literacy rate lower than the district average and the lowest has been observed in Talasari tahsil (16.09%). Table 10 indicates literacy rates by population ranges of the villages. Positive correlation of the size of the village and literacy rate is noticeable.

TABLE 10

Literacy Rates by Population Ranges of villages

Range of population	No. of villages in each range	Literacy rate
1	2	3
— 200	142	24.88
200—499	434	28.95
500—1,999	982	32.51
2,000—4,999	151	45.66
5,000—9,999	31	51.21
10,000 + ...	6	55.86
All ranges ..	1,746	38.58

Sex differentials in literacy reveal male literacy at 59.64 per cent and female literacy at 40.15 per cent. The corresponding proportion at the state level stands at 58.79 per cent and 34.79 per cent. Kalyan tahsil again leads with male and female literacy of 73.38 and 58.89 per cent respectively.

Rural-urban differentials vary sharply. Against a literacy rate of 38.58 per cent in rural. Thane, the same stands at 65.46 per cent in urban. Corresponding proportions at the state level stand at 38.15 and 63.92 per cent (Table-12). Average urban literacy for the district has been found at 65.46 per cent. Among the towns, Dombivli has returned the highest literacy rate of 79.87 per cent. Manikpur town has the second highest literacy rate of 79.07 per cent. Towns with a literacy rate at the lower side and below the district average are Narpoli (40.27%), Nagaon (41.54%) and Ghansoli (49.23%) (Table 11).

All towns ..	65.46

Over the years since 1901, there has been a tenfold progress in literacy in the district. Against 5.31 per cent in 1901 the same has touched 50.50 per cent in 1981, Decadal variations are shown in Table 11(i).

TABLE 11(i)

Progress of Literacy 1901-81

Year	Total	Males	Females
1901	5.31	9.09	1.21
1911	5.98	9.99	1.66
1921	5.34	8.80	1.68
1931	7.50	12.39	2.31
1941	16.95	25.84	7.58
1951	24.34	33.52	14.19
1961	30.54	41.09	19.06
1971	40.65	50.34	29.80
1981	50.50	59.64	40.15

During the last 50 years there has been Phenomenal growth of literacy in the district. From 7.50 per cent in 1931, the same has progressed by about seven times by 1981. Female literacy during the same period has appreciably progressed over seventeen folds. Against this male literacy has progressed by about five times. General awakening and introduction of the scheme of compulsory primary education in 1947 might have substantially contributed to the growth of literacy in the district.

Working Population

" Work " may be defined as participation in economically productive activity. The participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction.

There has been some conceptual change for defining the worker at the 1981 census. A trichotomy of main workers, marginal workers and non-workers has been adopted instead of the dichotomy of workers and non-workers in 1971 and 1961. However, while accepting this conceptual change the feasibility of making the data comparable with the previous censuses was duly considered. Conceptually, the main workers *plus* the marginal workers of 1981 are almost comparable with the ' workers *plus* non-workers with secondary work ' of 1971 and ' workers ' of 1961. Further, for 1981 census on the recommendation of Planning Commission and Central Statistical Organisation, only four industrial categories of main workers *i.e.* cultivators, agricultural labourers workers engaged in household industries and other workers have been adopted against the nine industrial categories of workers in 1971 and 1961.

Workers who worked for the major part of the preceding year (at least 6 months or 183 days) were treated as main workers, while those who worked for sometime only during the preceding year were treated as marginal workers. Non-workers are those who did not work at all during the preceding year and comprised of those engaged in household duties, students, dependents beggars, rentiers and retired persons.

As would be seen from Table-12, main workers constituted 37.83 per cent and marginal workers 2.44 per cent of the total population of the district at 1981 census. Remaining 59.73 per cent of the population comprised of non-workers. The corresponding proportions at the state level worked out to 38.71 per cent 3.85 per cent and 57.44 per cent. Compared to 1971, the work participation rate for main workers has revealed an improvement, though not of much significance. The same has risen from 37.41 per cent in 1971 to 37.83 per cent in 1981. At the state level, however, it has improved from 36.48 per cent to 38.71 per cent during the same period. Within the district Talasari tahsil has revealed a significant upward trend in the participation rate. From 39.93 per cent in 1971, the same has been found at 49.85 per cent in 1981.

Rural-urban differentials in the work participation rate for main workers do not reveal any significant fluctuation between the two censuses. In 1971 the rural participation rate was 40.10 per cent, the same has been found at 41.70 per cent in 1981. However, at the state level it has increased from 38.60 per cent in 1971 to 42.70 per cent in 1981. In respect of urban areas, the participation of main workers has remained almost stable in both the cases. (District 32.69% in 1971 and 32.96% in 1981; and state 31.80% in 1971 and 31.31% in 1981).

Sex-differentials in the participation rate for main workers do not give any significant variations except that female participation has improved from 24.61 per cent in 1971 to 27.60 per cent in 1981 at the district level for rural. Correspondingly at the state level it has gone up from 24.39 per cent to 31.39 per cent.

Among the main workers in the district, cultivators constitute 28.21 per cent. Agricultural labourers, those engaged in household industry and other workers work out to 12.94, 2.71 and 56.14 per cent respectively. Corresponding proportions at the state level stand at 35.12, 26.63, 2.55 and 35.70 per cent. Thus over 40 per cent of the main workers are engaged in agricultural sector in the district against over 60 per cent found at the state level. Proportion of main workers engaged in household industry corresponds almost favourably with the state average (district 2.71% and state 2.55%). However, the proportion of 'other workers' in the district is much higher than the one observed in the state (district 56.14 and State 35.70%). Higher proportion of industrial activity than agricultural activity seems to be the reason for this variation.

Marginal workers in the district constitute 2.44 per cent of the total population against the corresponding state average of 3.85 per cent. In both the situations the proportion of female marginal workers is higher than their male counterparts. This is not surprising because females though are largely non-workers do augment the family resources by working marginally beyond their household chores.

Availability of Amenities—Education

Educational amenity is available in 1,663 of 1,746 inhabited villages of the district. These villages encompass a rural population of 1,827,662 persons. In other words 19 out of 20 villages have been provided with one or the other schooling amenity and 97.98 per cent of the rural population benefits from the same. Within the district Talasari and Jawhar tahsils with have educational amenities available in all the villages. In Murbad tahsil such facilities are found in 98.24 per cent villages. Vasai and Thane tahsils trail behind other tahsils with this amenity available in 89.13 and 89.29 per cent of their villages respectively (Tables 13 and 14).

The remaining 957 and 148 villages fall in the population range of 500—1,999 and 2,000—4,999 respectively. Again, of the total 83 villages are not provided with the educational amenity. 55 have less than 500 population, 25 fall in the population range of 500—1,999 and the remaining 3 in 2,000—4,999. From amongst the 83 villages devoid of educational facilities, 59 villages have these facilities available within a distance of 5 kms. Homever, the inhabitants of another 20 and 4 villages have to tread a distance of 5–10 kms and more than 10 kms respectively to avail this facility (Table 16).

TABLE 16

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

Village not having the amenity of	Number of villages where the amenity is not available and available at a distance of

In the various towns of the district the population and the educational institutions bear the ratio :

10,000 : 0.44 Higher Secondary/Inter/PUC/Junior Colleges; 10,000 : 0.75 Secondary/Matriculation Schools; 10,000 : 0.75 Junior Secondary/Middle Schools and 10,000 : 2.32 Primary Schools. To render the above proportions more lucid it can be said that there is a Higher Secondary Inter/PUC/Junior College for every 22,865 persons; Secondary/Matriculatin schools for every 13,389 persons; Middle school for every 13,389 persons and Primary school for every 4,308 persons in the urban areas of the district (Table 18).

Medical

Medical institutions of one kind or the other are available in just 293 of the 1,746 inhabited villages of the district. These villages have a population of 743,774 persons. As such medical amenities cater to 16.78 per cent villages of the district and 39.87 per cent of the rural population benefits from the same. Among the tahsils, Vasai appears better placed with medical amenities available in about 70 per cent of its villages. Jawhar tahsil looks very less cared for. Out of 122 villages in that tahsil, hardly 6 villages are equipped with some kind of medical amenity. In the district where hardly 4 out of 10 persons have the medical amenity available, Vasai tahsil has the same available to about 9 out of 10 persons. On the other hand it is agonising to note that in Jawhar tahsil only 8 out of 100 persons have the benefit of medical facilities (Tables 13 and 14).

From amongst the 293 villages having one or the other medical amenity available 18 villages have a population of less than 500 each. On the other hand

there are 33 villages with a population of 5,000 or more. The remaining 153 and 89 villages fall in the population size class of 500—1,999 and 2,000—4,999 respectively. There are 1,453 villages in the district devoid of any medical facility. Of these 558 have less than 500 population each and 4 have 5,000 or more. 829 and 62 lie in the population range of 500—1,999 and 2,000—4,999 respectively (Table-15). Again of the villages not provided with medical amenities, the inhabitants of 591 villages have them available within a distance of 5 kms. Villages of 545 villages have to travel a distance of 5–10 kms. in search of such amenities while those of another 317 have to tread more than 10 kms. in search of the same (Table 16).

As regards the availability of medical amenities in various towns of the district, it has been found that, on the whole, there are 1.24 beds available for every 1,000 population. Amongst the towns Malyan town looks favourably cared for with 8.41 beds per 1,000 population, followed by another town Mohone with 7.75 beds per 1,000 population.

	All towns ..	1.24

As would be seen from table-19, as many as 16 towns have no beds available for their population.

Drinking Water

All the villages have drinking water facility.

Post and Telegraph

About 2 of the 10 (19.42%) villages in the district have the availability of some kind of post and telegraph amenity and about 4 out of 10 (40.51%) persons get benefit from these amenities. Within the district, the largest network of post and telegraph facility has been found in Vasai tahsil where such institutions are available in 68 of the 92 inhabited villages (73.91%). Murbad tahsil ranks at the bottom with 15 of its 170 villages (8.82%) having the benefit of some kind of post and telegraph amenity. Again, in Vasai 90.55 per cent of the rural population is covered by this amenity against just 21.45 per cent in Murbad tahsil.

From amongst the 339 villages having some kind of post and telegraph facility, 20 villages have the population of less than 500 each. In the same population range there are other 556 villages devoid of this amenity. There are 30 villages with a population of 5,000 or more which have the availability of some kind of post and telegraph services. The remaining 200 and 89 villages having this amenity fall in the population range of 500—1,999 and 2,000—4,999 respectively (Table 15).

In all there are 1,407 villages in the district which do not have the benefit of post and telegraph amenities. Of these the inhabitants of 787 have these available within a distance of 5 kms. The villages of 467 have to negotiate a distance of 5–10 kms. to reach these facilities and the inhabitants of yet another 153 villages have to tread a distance of more than 10 kms. to get these amenities.

Market/Hat

For the sale and purchase of goods and commodities markets/hats are organised in just 124 villages and 11.64 per cent of the rural population benefit from these markets/hats. However, as would be seen from Table-13 such markets are held in very few villages. In Ulhasnagar such markets are conducted in about 2 of the 10 villages (19.32%). Similarly in Palghar 1 of the 10 villages has such a market/hat (11.95%). Of the villages having the market/hat arrangements 29 have a population of less than 500 each and 9 have more than 5,000 each. The remaining 67 and 19 lie in the population size classes of 500—1,999 and 2,000—4,999 (Tables 13, 14 and 15).

There are 1,622 villages devoid of any market/hat amenity. For the sale and purchase of goods and commodities, the inhabitants of 592 villages have such markets within a distance of 5 kms. whereas 610 villages have to tread a distance of 5–10 kms. for such markets. There are yet another 420 villages whose inhabitants have to travel a distance beyond 10 kms. to reach such markets/hats.

Communications

About 6 of the 10 villages (59.05%) in the district encompassing 73.44 per cent of the rural population have a bus stop/railway station/water way. The largest net work of communication facilities has been found in Jawhar tahsil where 116 of the 122 villages are connected by one or the other means of communication. Against this Vada tahsil looks poorly cared for. Out of 166 of its villages only 48 (28.92%) have been provided with communication amenities. Of 1,031 villages having the availability of various means of communication, 240 villages have less than 500 population each whereas 35 villages have above 5,000. Remaining 628 and 128 villages fall in the population range of 500—1,999 and 2,000—4,999 respectively. 715 villages are devoid of any means of communication. 415 villages have one or the other means available within a distance of 5 kms. Another 205 villages have them available within a distance of 5–10 kms. Yet another 95 villages have them at a distance of more than 10 kms.

Approach by Pucca Road

979 (56.07%) villages are connected by pucca roads. They serve 71.71 per cent rural population of the district. Jawhar tahsil leads within the district with 121 of its 122 villages having the benefit of approach by pucca roads. On the other hand Mokhada tahsil looks the least cared for. Only 14 of its 79 villages are connected by such roads. Of the villages connected by pucca roads 236 (40.97%) villages have a population of less than 500 each. Against this 35 villages have more than 5,000 each. The remaining 580 and 128 villages fall in the population range of 500—1,999 and 2,000—4,999 respectively.

Power Supply

Availability of electricity has been one of the factor for the rapid industrial development of the district. The district gets large supply of electricity from the Koyana Hydro-Electric Project and the hyrdo-electric projects owned by Messrs. Tata Hydro-Electric Company. The power distributing agencies in the district which purchase electricity in bulk from Messrs. Tata include the Bombay Suburban Electric Supply Ltd; The Thana Electric Supply Company Ltd; The Amalgamated Electricity Company Ltd; and the Bassein Electric Supply Company Ltd. The Maharashtra State Electricity Board is, however, the largest power distributing agency in the district. Besides, there are three diesel power stations located in Dahanu, Palghar and Jawhar. The Tarapur Automic Power Station which has ushered an era of utilisation of atomic energy for electricity generation is also situated in this district.

Of the 1,746 inhabited villages of the district 1,116 have been electrified. In other words 6 out of 10 (63.92%) villages have been provided with the power supply. It would be seen from Table 14 about 8 out of 10 rural inhabitants benefit from this amenity. Vasai and Talasari tahsils have all the villages electrified. More industrialised tahsils *viz.*, Thane, Kalyan and Ulhasnagar have respectively 84.52, 80.36 and 80.68 per cent villages electrified. 254 out of all the electrified villages in the district have a population of less than 500 each. There are 37 villages in the district with a population of more than 5,000 each which have the benefit of power supply. The remaining 685 and 140 villages lie in the population size classes of 500—1,999 and 2,000—4,999 respectively.

Land Utilisation

Columns 15 to 19 of the village directory reveal the land use pattern of each village in the district. Classification of land use adopted here corresponds to the classification recommended by the Ministry of Food and Agriculture.

Forest

Forests occupy about one-third of the total geographical area of the district. These forests of Thane are very valuable. Proximity to Bombay has added considerably to its value. In the district the forest area falls under three categories viz., reserved forests, protected forests and unclassed forests. A small area of reserved forests from Junnar tahsil of Pune district has been included in the Thane district for administrative convenience. The reserved and protected forests have been solely under the control of the State Forest Department. The forests in the catchment areas of Tulsi and Vihar lakes, and Krishnagiri Upavan belonging to the Bombay Municipal Corporation are unclassed forests and have been transferred to the forest department since 1968 for administration.

The major forest produce includes teak, timber, injarli timber of various species viz., ain, bibla, khair, dhavda, hed, kalamb, sawar etc. and firewood and charcoal. The minor forest products include bamboo, grass, apta leaves, temburni leaves, palas, bel, tad, palm, bark of chilhar and ain, kadhi-patta, babul branches, mohwa flowers and seeds, hirda fruits, karvi, honey, gum, vavding etc.

Irrigated, Un-irrigated and Culturable Waste Areas

Data pertaining to irrigated area (by source), un-irrigated area and culturable waste is given under columns 16, 17 and 18 respectively of the village Directory. In so far as the rural areas of the district are concerned cultivable area constitutes 45.22 per cent of the total rural area of the district and irrigated area works out to 1.35 per cent of the cultivable area. The irrigated area thus constitutes just 1.35 per cent of the cultivable area. Against this un-irrigated area claims 72.79 per cent and culturable waste 25.86 per cent. Within the district the largest cultivable area of the order of 59.58 per cent has been found in Talasari tahsil and lowest of 31.21 per cent in Thane tahsil. Ulhasnagar tahsil has the highest proportion of irrigated area in the district (12.06%). On the contrary Mokhada, Vada and Kalyan tahsils have no irrigated area at all (Table 20).

TABLE 20

Distribution of villages according to the land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total Area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area

	Total of all tahsils ..	1,746	952,046.94	45.22	1.35

Staple Food

Rice is the staple food in all the tahsils of the district. However, in Dahanu, Mokhada, Murbad and Ulhasnagar, Nachani is also a supplement while Jowar and Vari supplement rice in Talasari and Jawhar tahsils respectively as revealed in Table 21.

TABLE 21

Main staple food in the majority of villages in each tahsil

Serial No.	Name of tahsil	Main staple food	Serial No.	Name of Tahsil	Main staple food

Municipal Finance

As would be seen from Table-22, the average per capita receipts work out to Rs. 136.68, out of which Rs. 73.55 are realised through taxes and remaining Rs. 63.13 from other sources. The highest per capita receipts to the tune of Rs. 295.93 have been observed in Thane town. Bhiwandi ranks second with an average per capita receipts of Rs. 273.80. Ambernath town is the only other town with average per capita receipts above the district average (Rs. 153.83). All the remaining towns have returned the per capita receipts below the district average.

TABLE 22

Total ..	136.68	73.55	63.13	123.59	9.32	33.07	33.92	8.63	38.65

On the expenditure side, the average per capita expenditure has been found at Rs. 123.59. Rs. 9.32 are spent on general administration, Rs. 33.07 on public health and conveniences, Rs. 33.92 on public works, Rs. 8.63 on public institutions and Rs. 38.65 on all other aspects. Corresponding to the per capita receipts, Thane town is marked by highest per capita expendiiure also (Rs. 285.85), Bhiwandi follows with Rs. 214.57 and Ambarnath with Rs. 142.72. Kalyan is the only other town with average per capita expenditure above the district average (Rs. 126.78).

Minerals

Thane district is not rich in mineral deposits. However, Bauxite occurs on Tungar hill in Vasai tahsil. Also inferior reddish and yellowish lateric clay is available at Gokhivare near Vasai Road Station. The material is stated to be suitable for bricks, drainage pipes, tiles and cheap red glazed ware.

Fisheries

Over the west coast line of about 110 kms. 27 marine fishing villages are situated and many of them are tidal ports. The tide, to an extent, adversely affects the free movement of fishing fleet except in a few ports like Dahanu, Arnala, Dongri Chowk and Datewara which are more convenient for free movement. During the peak fishing periods, the villages bustle with fishing activity almost round the clock. The important marine fishes which are caught in large quantities in the district are Bombay duck, golden anchoy, prawns and shrimps, pomfret, eel, ribbon fish, clupeid, shark, rays etc.' cat fish, silver bar, jow fish, croaker, thread fins and fam gadida. Inland fishing is also carried out in the

district over a perennial river length of about 400 kms. Besides there are tanks and irrigation reservoirs also. The fishes available are major carp, mirror carp, cat fish, murrel, wallago, feather back, carps, mullet, prawns, pearl spot, gobies, tilapia, cock up and big eye.

Industries

Thane occupies a unique position in the economic map of Maharashtra. In fact the large scale industrial development in Greater Bombay has triggered a cumulative process of expansion in the Thane industrial belt. In other words the spectacular industrial growth in the Thane belt is the out come of the transmission of the spread effects from the Bombay industrial complex.

The history of modern industry in the district dates back to the establishment of the Wadia Woollen Mills subsequently renamed as Raymond Mills. As a matter of fact, the industrial development in the district gathered momentum only after the dawn of Independence. Many of the industries in Thane area are in the nature of ancillary and feeder industries of those in the neighbouring city. The establishment of industrial estates at Thane, Ulhasnagar, Ambarnath and Dombivli accelerated the process of industrialisation as they provided an infrastructure which encouraged the development of numerous industries.

The Thane industrial complex includes modern industries such as chemicals, drugs and medicines, synthetics, nylon and terene fibres, cotton and woollen textiles, rubber, radio sets, electrical appliances, iron and steel goods, plastic industries, spare parts and machine tools.

Trade and Commerce

The district has an advantage of being in proximity to Bombay which is by far the most developed centre of trade and commerce in India, and is one of the biggest harbours in the country. This virtue makes Thane a connecting link between Bombay and rest of the country. The Central as also the Western Railway which start from Bombay pass through the district. The district also has a coast line of about 113 kms. In addition, the highways starting from Bombay traverse through this district to northern, eastern and southern India. The south-west area of the district has developed into an industrial belt. Thus, Thane occupies a unique position in the commercial field.

The district imports chemical raw material, plastic raw material, sugar cloth, edible oil, ambadi food grains, chemical dyes and medicines (Table 23).

TABLE 23

Most important commodities, manufacture, imported and exported in towns

Class name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
1	2	3	4
II Ambarnath (M. Cl.)	Matches	Matches	Chemical raw materials.
IV Ayare (C. T.)	Information not available		
V Balkum (C. T.)	Information not available		
III Bhayandar (C. T.)	Plastic footware	Salt	Plastic raw materials
I Bhiwandi (M. Cl.)	Power loom, cloth	Powerloom cloth	Cotton yarn.
V Chikanghar (C. T.)	Information not available		
V Chole (C. T.)	Information not available		
V Dahanu (C. T.)	Balloons	Fish	Edible oil
I Dombivli (M. Cl.)	....	....	Food grains
IV Gajabandhan Patharli (C. T.)	Information not available		
V Ghansoli (C. T.)	Information not available		
V Jawhar (M. Cl.)	Soap	Coal	Cloth
III Kalwa (C. T.)	Information not available		
I Kalyan (M. Cl.)	Bricks	Sugar	Edible oil.
III Katemanivali (C. T.)	....	....	Rice
IV Kolshet (C. T.)	Information notavailable		
IV Kulgaon (C. T.)	....	....	Rice
III Majivade (C. T.)	Information not available		
V Malyan (C. T.)	Balloons	Fish	Edible oil
V Manikpur (C. T.)	Information not available.		
IV Mohone (C. T.)	Rayon	Rayon	Rice
III Mumbra (C, T.)	Information not available		
III Nagaon (C. T.)	Cloth	Cloth	Ambadi
III Narpoli (C. T.)	Powerloom cloth	Powerloom cloth	Ambadi
IV Palghar (C. T.)	Rubber products	Grass	Medicines
V Sandor (C. T.)	Chemicals	Chemicals	....
V Shahapur (C. T.)	Poha	Nachani	Sugar
VI Shirgaon (C. T.)	....	Hay	....
VI Sopara (C. T.)	Information not available		
I Thane (M. Cl.)	Engineering goods	Woollen readymade garments	Chemicals, Dyes
I Ulhasnagar (M. Cl.)	Rayon	Rayon	Cloth
V Vada (C. T.)	Rice	Rice	Cloth
III Vasai (M. Cl.)	Electrical goods	Fish	Rice
III Virar (C. T.)	Soap	....	Chemicals.

Edible oil comes from Gujrat and diesel from Bombay. Bombay also supplies ready-made garments, stationery, cutlery and crockery articles, drugs and medicines, fine quality footwear, cosmetics and toilet articles. Groceries, betal-nuts, hardware and metal-ware are also imported.

Exports from the district comprise of chemicals, matches, salt, powerloom cloth, rayon, woollen garments, fish, radio sets and transistors, electrical appliances, textile machinery, machinery spare parts, livestock, grass, timber, firewood, vegetables etc.

Slum Population

Considerable urban population of the district lives in slums. Proportions of slum population to total population of the town and respective densities for all the major towns of the district are given in Table 24.

TABLE 24

Proporation of slums population in towns

Class, name and civic status of the town	Proportion of of the slums population to total population of the town	Density in slums (per km²)
1	2	3
II. Ambarnath (M.Cl.) ..	60.10	87,739
I. Bhiwandi (M.Cl.) ..	10.32	11,90,400
I. Dombivli (M.Cl.) ..	6.82	19,024
I. Kalyan (M.Cl.) ..	9.97	1,356,500
I. Thane (M.Cl.) ..	38.69	85,636
I. Ulhasnagar (M.Cl.)	13.05	155,217
Total ..	23.78	91,793

Among these towns Ambarnath has the highest proportion of slum dwellers (60.10%) and Thane ranks second with the slum dwellers constituting 38.69 per cent of its total population. In respect of Bhiwandi, Dombivli, Kalyan and Ulhasnagar the proportions have been returned at 10.32, 6.82, 9.97 and 13.05 per cent respectively.

Places of Tourist Importance

Ambarnath.—The town derives its name from the temple of Shiva located therein and literally Ambarnath means immortal Lord, a name of Shiva. About the middle of the eleventh century a very rich temple was built over the shrine. The temple which is in a fair state of preservation, is prettily placed on the bank of a tributary of the Valdhan river in a hallow shaded by old mango and tamarind trees. It has now become a picnic spot besides a place of worship.

Ganeshpuri.—Revered by virtue of the residence of Swami Nityanand Maharaj, Ganeshpuri is a small township about 75 kms. from Bombay and 18 kms. from Bhiwandi. Even before the Swami made it as his residence, the place was famous for hot springs. There is a samadhi of Nityanand Maharaj who is said to have attained ' Mahanirvan ' on 8th August 1961. Behind the samadhi is a shrine dedicated to Lord Krishna constructed by Swami Maharaj. The idol is in a standing position leaning against a cow. Another shrine dedicated to Goddess Bhadrakali has also been constructed by Swami Maharaj.

Malanggad or Bava Malang.—Malanggad or Bava Malang, also known as " Cathedral Rock " from the broken outline of its basalt crest, was once a strong hill-fort. Lying about 10 miles south of Kalyan and connected by a regular bus service upto its base from the Kalyan railway station, it has grown into a major centre of pilgrimage for people of all caste and creed. Every day, all the year round, and especially on Thursdays, Sundays and holidays, the stream of pilgrims is endless.

Shahad.—Shahad, a former village in Kalyan tahsil now included in the urban area of Ulhasnagar, is famous for magnificient temple of Vitthal constructed recently by the Kalyan Charity Trust and popularly known as Birla Mandir. The place has also come to prominence due to the growth of the industrial complex around it.

Sopara.—This small town in Vasai tahsil is on the western railway line and is a place of great antiquity and was the capital of the Konkan from about B. C. 1500 to A.D. 1300. However, all objects of interest are almost extinct and only a portion of the relic mound is traceable.

Titvala.—The village is famous for the temple dedicated to Ganapati, revered and worshipped by the thousands of devotees and known as Shri Siddhi Vinayak Mahaganapati. As per the local tradition the place was considered to be forming a part of Dandakaryana inhabited by aboriginals mainly Katkaris. The hermitage of the sage Kanva was located at the place and it was here that Shakuntala was staying with the sage Kanva. When Dushyant abandoned his fiancee upon the curse (Shap) given to him by the irascible sage Durvasa, Kanva directed his adopted daughter to establish a shrine in honour of Siddhi Vinayak who would bestow upon her his blessings and will unite her with Dushyant. The deity is said to have been established then. The deity is revered by thousands and on ' Vadya ' 4 of every month the congregation swells many fold.

Vajreshvari.—This place near the bed of the Tansa river, lying about nineteen kilometres north of Bhiwandi, is famous for a temple of goddess ' Vajreshvari ' and hot water springs in its neighbourhood.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DERECTORY

Note explaining the Abbreviations used in the Village Directory

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities, etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsilwise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having a definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown along with the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (Urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix-II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The 'un-inhabitated' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e. the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (*i*) Tahasilwise abstract of educational, medical and other amenities;

Appendix (*ii*) Land utilisation data for census towns;

Appendix (*iii*) Tahsilwise list of villages with no amenities available; and

Appendix (*iv*) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*) added in 1981 are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however the area figures are in km.^{2}

Colomn 4 which gives population and the number of households in each village has been introduced for 1981 census to examine the correlation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational medical communications availability of drinking water days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referent village a dash (—) is shown in the column and next to it in brackets the distance from the village in broad ranges viz. upto 5 km, 5—10 km, and 10 + km to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools i.e. secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within

brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :—

Primary or Secondary School	P
Junior Secondary or Middle School	M
Matriculation or Secondary School	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC)	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C
Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (up to 5 kms, 5—10 kms and above 10 kms of the nearest place where the most modest medical amenity such as dispensary/community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T.B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Available	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9, gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail, and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and back-water, etc.)	NW

Column 11, refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information.

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Waterway (Other than river or canal)	NW
Foot path	FP

Column 12 gives the distance in kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for other purpose like Industrial, Commercial etc.	EO
Electricity for All purposes listed above	EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi, etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the Village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation—

(*a*) lands put to non-agricultural uses.

(*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land—

(*a*) permanent pastures and other grazing lands.
(*b*) lands under miscellaneous tree crops and grooves not included in the net area sown.
(*c*) culturable wastes.

(4) Fallow lands—

(*a*) Fallow lands other than current fallows.
(*b*) Current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation e.g. canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

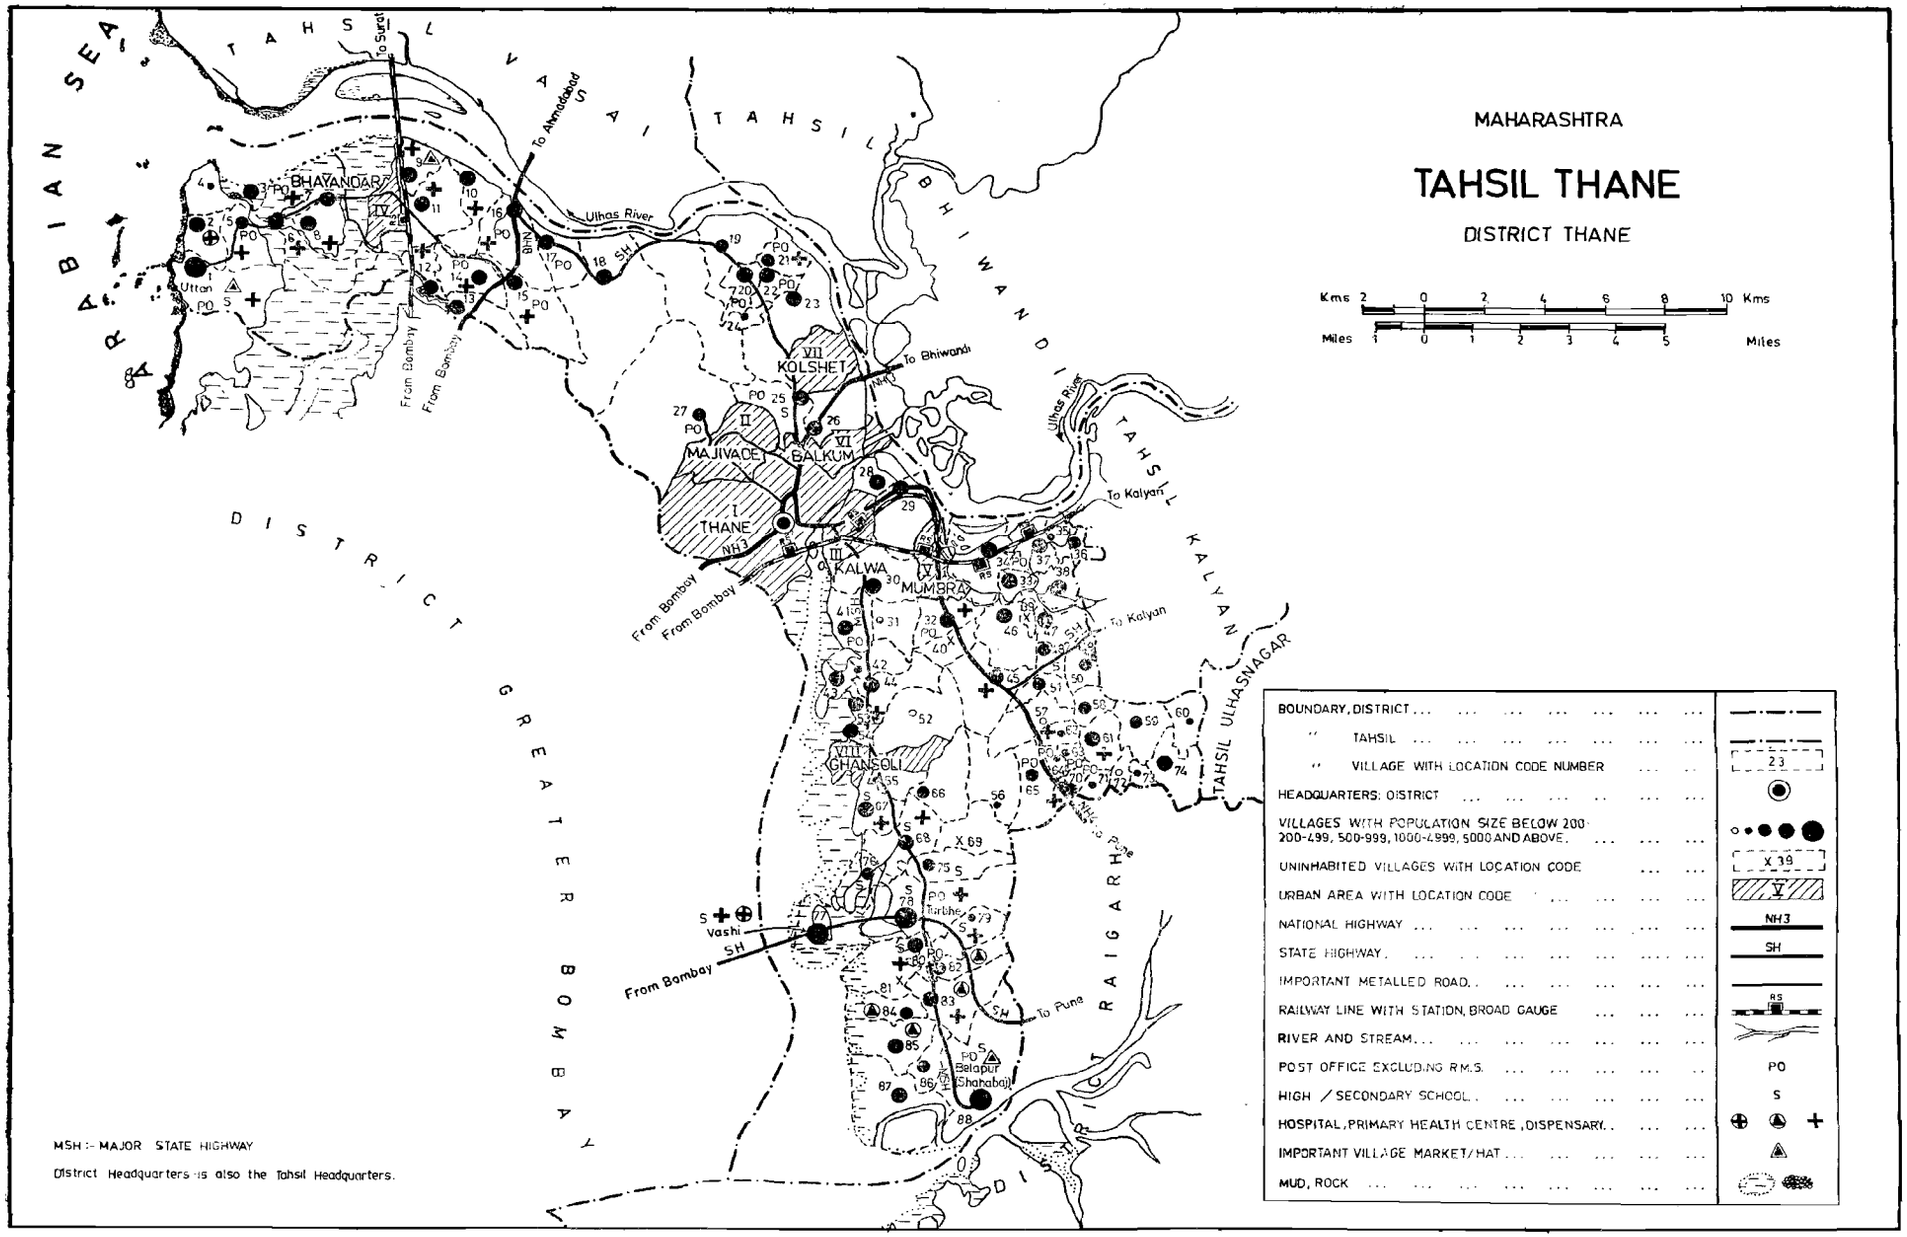

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)	WE
Tube Well (without Electricity) ..	TW
Tube Well (with Electricity) ..	TWE
Tank	Tk
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc., which are not included under orchards or forests, are included in this categary. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc, form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information or number of newspapers coming in the village, motor cycles/scooters. cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooters available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police station,

Based upon Survey of India map with the permission of the Surveyor General of India.

The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.

(*N.B.*—Ranges with ' nil ' entries have been omitted.)

SECTION II

TOWN DIRECTORY

SECTION II—TOWN DIRECTORY

Note explaining the Abbreviations used in the Town Directory

The 'Town Directory' given for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry, and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent town. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census town have no urban civic status. Following abbreviations have been used to indicate the civic status of the town:—

Municipal Corporation/Corporation ..	M.Corp.
Municipality	M.
Municipal Council	M.Cl.
Non-Municipal	N.M.
Cantonment Board/Cantonment ..	C.B.
Notified area/Notified Area Committee/ Notified Committee.	N.A.C.
Census Town	C.T.

Column 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in km., number of households including houseless house-holds, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director-General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil head quarters and the nearest city (Urban area with a population of 100,000 +) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III deals with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are:—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage number of latrines and method of disposal of night soil.

Codes used are:—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt
Head Loads	HL
Baskets	B
Wheel Barrows	WB
Septic Tank Latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used:—

Overhead Tank	OHT
Service Reservoir	SR
River Infiltration Gallery	IG
Borewell pumping system	BWP
Pressure Tank	IT
Tubewell water/Hand pump ..	TW
Tap water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services. In case it is not available in the referrent town the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets. Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added Statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 i.e. class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes:—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centre	FC
T.B. Clinic	TB
Nursing Home..	NH
Ayurvedic	A
Unani	U
Homoeopathic	Hom.
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols.6 to 9) is exhibited as:—

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only	AC
Combined for all categories Arts, Science and Commerce.	ASC
Law	L

Column 10 pertains to the number of recognized shorthand typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B.Ed. college, teacher's training school, music/dancing institute, nursing school etc. Various code used for indicating this data are:—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting ..	Sh.Type
Others	O

Keeping in view the 'Minimum Needs programme' of the Planning Commission the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama community halls, public libraries, indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce, industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and non-agricultural credit societies respectively in each town.

STATEMENT I

Status and Growth History

Serial No.	Class, name and civic administration status of town	Location Code No.	Name of Tahsil	Area (in km²)	Number of households including houseless households (in 1981 Census)	Population and growth rate of the town at the censuses of									Density (1981) (census)	Sex Ratio

Note.—The source for the total area figures in respect of the districts is the Surveyor General of India, while that for the total area figures in respect of the tahsils in the State Land Records Department. The total areas, as also the rural areas, for the tahsil in district may not, therefore, strictly add up to the corresponding figures shown against the district. Names of towns treated as such for the first time in 1971 which continue as towns in 1981 have been marked with an asterisk (*). Names of towns treated as such for the first time in 1981 have been printed in *italics*.
